183EW. Art of Engineering Endeavors. (4) Formerly numbered 185.) Lecture, four hours; discussion, three hours; outside study, five hours. Designed for juniors/senior engineering students. Nontechnical skills and experiences necessary for engineering career success. Importance of group dynamics in engineering practice. Teamwork and effective group skills in engineering teams. Organizational and control of multidisciplinary complex engineering projects. Forms of leadership and qualities and characteristics of effective leaders. Use of computer science, and technology relate to major ethical and social issues. Societal demands on practice of engineering. Emphasis on research and writing in engineering environments. Satisfies engineering writing requirement. Letter grading.

188. Special Courses in Engineering. (4) Seminar, four hours; outside study, eight hours. Special topics in engineering for undergraduate students that are taught on experimental or temporary basis, such as those taught by resident and visiting faculty members. May be repeated for credit with topic or instructor change. Letter grading.

195. Internship Studies in Engineering. (2 to 4) Tutorios, to be arranged. Preparation: apprentice personnel, teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and internship studies at UCLA. May be repeated for credit. S/U grading.

470A-470D. Engineering in Technical Environment. (3 each) Lecture, three hours. Limited to Engineering Executive Program students. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. S/U or letter (471A) grading; In Progress (471B) and S/U (471C) grading.

201. Systems Engineering. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of necessary processes and procedures to successfully manage technology programs. Review of fundamentals of program planning, organizational structure, implementation, and performance tracking methods to provide program manager with necessary information to support decision-making process that provides high-quality products on time and within budget. Letter grading.

201. Systems Engineering. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of major elements of system engineering process. Coverage of key elements: system requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management metrics, review and audit activities and documenta tion. Letter grading.

202. Reliability, Maintainability, and Supportability. (4) Lecture, four hours; outside study, eight hours. Requisite: course 201. Designed for graduate students with one to two years work experience. Integrated logistic support (ILS) is major driver of system lifecycle cost and one key element of system engineering activities. Overview of engineering disciplines critical to this function — reliability, maintainability, and supportability — and their relationships, taught using probability theory. Topics also include fault detection and isolation and parts obsolescence. Discussion of 6-sigma process, one effective design and manufacturing methodology, to ensure system reliability, maintainability, and supportability. Letter grading.

203. System Architecture. (4) Lecture, four hours; outside study, eight hours. Requisite: course 201. Designed for graduate students with B.S. degrees in engineering or science and one to two years work experience in selected domain. Art and science of architec turing. Introduction to architectural methodology — paradigm and tools. Principles of architecting through analysis of architecture diagrams of major existing systems. Discussion of selected elements of architectural practices, such as representation models, design progression, and architecture frameworks. Examination of professionalization of system architecting. Letter grading.

210. Entrepreneurship for Engineers. (4) Lecture, three hours. Limited to graduate engineering students. Topics in starting and developing high-tech enterprises and intended for students who wish to complement their technical education with introduction to entrepreneurship. Letter grading.

275. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and internship studies at UCLA. May be repeated for credit. S/U grading.

471A-471B-471C-471D. Engineering in General Environment. (3-3-1.5) Lecture, three hours (courses 471A, 471B) and 90 minutes (course 471C). Limited to Engineering Executive Program students. Influence of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. S/U or letter (471A) grading; In Progress (471B) and S/U or letter (471C) grading.

472A-472B. Engineering in Business Environment. (3-3-1.5) Lecture, three hours (courses 472A, 472B, 472C) and 90 minutes (course 472D). Limited to Engineering Executive Program students. Language of business for engineering executives. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress (472A, 472C) and S/U or letter grading (credit to be given on completion of courses 472B and 472D).

473A-473B. Analysis and Synthesis of Large-Scale System. (3-3) Lecture, two and one-half hours. Limited to graduate engineering Executive Program students. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for goal-oriented technical group. Letter grading.

485A. Teaching Assistant Training Seminar. (4) Formerly numbered 495.) Seminar, four hours; outside study, eight hours. Preparation: appointment as teaching assistant. Limited to graduate engineering students. Seminar on communication principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.
Scope and Objectives

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is the primary language, and to the study of the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on British, Canadian, and American literary history and requires of its undergraduate majors a firsthand acquaintance with many of the more influential writers who have helped during the past millennium to make English a global language that possesses richly diverse and highly influential literary cultures. Within the department, students are able to pursue a variety of approaches to the study of literary culture beyond the strictly historical — literary criticism, for example, or those that draw on the resources of such disciplines as sociology, psychology, and philosophy. Within the B.A. degree in English, qualified students may elect a concentration either in creative writing or in world literature. The department also offers a Bachelor of Arts degree in American Literature and Culture.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

Undergraduate Study

Students must have completed the Entry-Level Writing requirement before taking any courses in English (other than English Composition A or 2). For further information regarding Entry-Level Writing, see the Undergraduate Study section of this catalog.

Extra-Departmental Requirement in Foreign Literature or Foreign Language

All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or foreign literature, including foreign literature in translation (see course listings under Foreign Literature in Translation in this section). Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high school level through the IGETC program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a P/NP grading basis.
English B.A.
The Bachelor of Arts degree has concentrations in creative writing and in world literature. An international students program in English is also offered.

Preparation for the Major
Required: English Composition 3, English 4W or 4HW or 4WS, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

Transfer Students
Transfer applicants to the English major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Twelve 4- or 5-unit upper division courses, including six in American literature selected from English 170A through 178B, two of which must be devoted to literature written before 1900 (courses 170A, 170B, 171A, 171B, 173A, 174A); two courses from 142A, 142B, 143; one seminar from M179A, M179B, M179C, 182A, 182B, 182C, or when treating American topics, 180; one course from M101A, M101B, M102A, M102B, 103, M104A, M104B, M105A, M105B, 106, M107A (also M101C or M107C when treating American topics or figures), or 109; and two courses from 100 through 199 or from courses pertaining to American culture offered by other departments (of those courses applied toward the major from outside the Department of English, both must usually come from one department or program and appear on a list of approved courses for the major). Each course applied toward requirements for the major must be at least 4 units and be taken for a letter grade.

English Composition 3, English 4W

The honors program is open to departmental majors with a 3.5 departmental and a 3.25 overall grade-point average. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by Winter Quarter of the junior year. For application forms and further information, contact the departmental counselor.

Requirements
All honors students are required to take English 140A or 140B during the junior year and one seminar from the English M179A through 182C sequence, preferably before the senior year. Students in the creative writing concentration are required to have completed or been accepted into their third workshop in a single genre prior to or concurrent with enrollment in course 191H. In Spring Quarter of the junior year, students must take course 191H. During Fall and Winter Quarters of the senior year, they take courses 198A and 198B, in which they write a thesis under the direction of a faculty member. The thesis determines whether they receive highest honors, honors, or no honors.

American Literature and Culture B.A.
Preparation for the Major
Required: English Composition 3, English 4W or 4HW or 4WS, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

Transfer Students
Transfer applicants to the American Literature and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

English Minor
The English minor is designed for students who wish to enhance their major program with the benefits of intensive study of English language and literatures, including a better understanding and appreciation of literatures in English and improvement in critical thinking, reading, and writing skills.
To enter the minor, students must have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 or 3H or English as a Second Language 36. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 149 Humanities Building, (310) 825-1389. This allows them priority enrollment in many upper division courses.

**Required Lower Division Courses (10 units):** English 10B and 10C, with grades of C or better.

**Required Upper Division Courses (21 to 25 units):** Five courses selected from English 100 through 182C, including course 142A and one other course that focuses on literature in English written before 1900. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaas/library/pgmgrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of English offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in English.

**English**

**Lower Division Courses**

4HW. Critical Reading and Writing (Honors). (**5** Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Writing II requirement. Letter grading.

4WS. Critical Reading and Writing (Service Learning). (**5** Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Writing II requirement. Letter grading.

80. Major American Authors. (**5** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for any courses in 170 series. Introduction to chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway. P/NP or letter grading.

85. American Novel. (**5** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for any courses in 170 series. Development, with emphasis on form, of American novel from its beginning to present day. Includes works of such novelists as Hawthorne, Fitzgerald, Faulkner, Ellison, and Morrison. P/NP or letter grading.

88A-88Z. Lower Division Seminars: Special Topics in English. (**5** Seminar, three hours. Limited to 15 students. Content varies; see departmental counselor for information. P/NP or letter grading.

88B. Medieval Literature. (**5** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic peaks, and total dramatic achievement. P/NP or letter grading.

95A. Introduction to Poetry. (**5** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of selection of representative poems. P/NP or letter grading.

95B. Introduction to Drama. (**5** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

95C. Introduction to Fiction. (**5** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

97H. Honors Seminar for Freshmen and Sophomores. (**4** Seminar, three hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information. P/NP or letter grading.
Upper Division Courses

100. Introduction to Special Topics and Genres. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of particular topic, genre, or subgenre in literature such as satire, biography, parody, or specialized classification of literature. May be repeated for credit. P/NP or letter grading.

M101C. Special Topics in Lesbian and Gay Litera- ture. (5) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101C and Women's Studies M101C.) Lecture, four hours. Enforced requisite: En- glish Composition 3 or 3H. Variable specialized studies course in lesbian and gay literature. Topics focus on particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

M102A. Asian American Literature to 1850. (5) (Same as Asian American Studies M112A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Asian American literature from early period of formation to cultural nationalist movement of late 1960s and 1970s. Works of such authors as Edgar Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston included. P/NP or letter grading.

M102B. Asian American Literature since 1960. (5) (Same as Asian American Studies M112B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Chia, Bharati Mukherjee, David Wong Louie, Maxine Hong Kingston included. P/NP or letter grading.

M104A. Early Afro-American Literature from Harle- m Renaissance to 1960s. (5) (Same as Afro-American Studies M104A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century black American literature from New Negro Move- ment of post-World War I period to 1960s, including oral material (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison. P/NP or letter grading.

M104B. Afro-American Literature from Harlem Re- naissance to 1960s. (5) (Same as Afro-American Studies M104B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century black American literature from New Negro Move- ment of post-World War I period to 1960s, including oral material (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison. P/NP or letter grading.

M105A. Early Chicana/Chicano Literature. (5) (Same as Chicana and Chicano Studies M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature from 19th century through World War II; including oral and written forms (folktales, spirituals, sermons; fiction, poet- ry, essays), and translated documents (song-poems, life-stories, oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Amer- ico Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

M105B. Recent Chicana/Chicano Literature. (5) (Same as Chicana and Chicano Studies M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Black Arts Movement of 1960s to present by writers such as Amin Baraka, Nikko Giovann, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

M105C. Celtic Mythology. (4) (Same as British and Celtic Studies M105C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earli- est times to 14th century. P/NP or letter grading.

M105D. British Folklore and Mythology. (4) (Same as British and Celtic Studies M105D.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of early materials, chiefly literary, for study of mythic traditions of Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales. P/NP or letter grading.

M105E. Survey of Medieval Celtic Literature. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Knowledge of Irish or Welsh not required. Study of early periods to 14th century. P/NP or letter grading.

M107A. American Women Writers. (5) (Same as Women's Studies M107A.) Lecture, four hours; dis- cussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by Amer- ican women. P/NP or letter grading.

M107B. British Women Writers. (5) (Same as Wom- en's Studies M107B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women. P/NP or letter grading.

M107C. Special Topics in Women and Literature. (5) (Same as Women's Studies M107C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of specialized seminar course in women and literature, with emphasis on one period, genre, partic- ular theme, or nonnational literary grouping. P/NP or letter grading.

M108C. English Bible as Literature: Special Topics. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of English Bible, with at- tention to particular literary themes, motifs, and genres. Possible discussion of influence of Bible on discrete periods or individual authors in English literature. May be repeated for credit. P/NP or letter grading.

109. Interdisciplinary Approaches to Literature. (4) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit. P/NP or letter grading.

110. Studies in Individual Authors. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Specialized study of work of one single poet, dra- matur, prose writer, or nonfiction writer. May be repeated for credit. P/NP or letter grading.

111C. British Folklore and Mythology. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Designed for seniors/seniors. Survey of folklore of people of Britain, with attention to their history, func- tion, and regional differences. P/NP or letter grading.

111D. Celtic Mythology. (4) Lecture, four hours. En- forced requisite: English Composition 3 or 3H. Survey of early materials, chiefly literary, for study of mythic traditions of Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales. P/NP or letter grading.

111E. Survey of Medieval Celtic Literature. (4) Lecture, four hours. Enforced requisite: English Composi- tion 3 or 3H. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earli- est times to 14th century. P/NP or letter grading.

111F. Celtic Folklore. (4) Lecture, four hours. En- forced requisite: English Composition 3 or 3H. Folk- lore traditions of modern Irish, Welsh, and other Celtic countries, with attention to current techniques of folkloristic research. P/NP or letter grading.

112. Children’s Literature. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of historical backgrounds and development of types of children’s literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography. P/NP or letter grading.

112S. Children’s Literature: Service Learning. (4) Lecture, four hours; discussion, one hour (when scheduled); fieldwork, three to four hours. Enforced requisite: English Composition 3 or 3H. Study of his- torical backgrounds and development of types of chil- dren’s literature, folklore, oral tradition, levels of inter- est, criticism and evaluation, illustration and bibliogra- phy. Service learning component includes minimum of 20 hours service with agency involved with literacy and education. P/NP or letter grading.

113. Literature for Adolescents and Young Adults. (4) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Analysis and evaluation of litera- ture included mainly for junior and senior high schools. Review of mature books that are popu- larly suggested for this age group; study of interests and reading habits of young adults. P/NP or letter grading.
135. Creative Writing: Drama. (5) Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of a play from the viewpoint of each student to write for theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Enrollment in more than one section per term not permitted. May be repeated for credit. P/NP or letter grading.

150B. Later Medieval Literature. (5) Lecture, four hours. Requisites: courses 10A, 10B. Study of English literature of 14th and 15th centuries (e.g., Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, and lyrics). More difficult texts read in modernized form. P/NP or letter grading.

151. Elizabethan Literature. (4) Lecture, four hours. Requisites: courses 10A, 10B. Study of English literature of 16th century, with special emphasis on development and interrelationships of poetry, prose, fiction, and literary theory and criticism during reign of Elizabeth I. P/NP or letter grading.

152A. Drama from Beginning to 1576. (5) Lecture, four hours. Requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.

154. Literature of Restoration and Earlier 18th Century, 1660 to 1730. (5) Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of Restoration and earlier 18th-century thought. P/NP or letter grading.

155. Literature of Later 18th Century, 1730 to 1798. (5) Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought. P/NP or letter grading.

156. Drama, 1660 to 1842. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Survey of English drama from Restoration Licensing Act to end of 18th century. P/NP or letter grading.

160. Earlier Romantic Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of writings by Blake, Wordsworth, Coleridge, and Austen, with collateral readings from such authors as Godwin, Lamb, Burke, Hazlitt, Edgeworth, Baillie, C. Smith, Burns, Southey, D. Wordsworth, Lamb, DeQuincey, and Scott. P/NP or letter grading.

161. Later Romantic Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of writings by Byron, Keats, Percy Shelly, and Mary Shelley, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, Peacock, Landon, Aikin, Hemsan, and Prince. P/NP or letter grading.

162. Earlier Victorian Poetry and Prose. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of poetry and prose of Victorian age from passage of first Reform Bill through Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman. P/NP or letter grading.

163. Later Victorian Poetry and Prose. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of poetry and prose of later Victorian age from Pre-Raphaelite movement through aesthetic and Decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats. P/NP or letter grading.

165. 20th-Century British Poetry. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to present. P/NP or letter grading.

166. 20th-Century British Fiction. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to present. P/NP or letter grading.

168. Drama, 1945 to Present. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of British and American drama, with its principal continental influences, since World War II. P/NP or letter grading.

169A. Special Topics in British Studies. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of particular themes, forms, or moments in British and/or Anglophone literature. Satisfies department's pre- or post-19th-century requirement, depending on term. May be repeated for credit with topic change. P/NP or letter grading.

169B. Postcolonial Literatures. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of how colonialism and decolonization have shaped and been shaped by British, African, and other colonial literature. Study of new English languages and literature that combines European and non-Western aesthetic forms to produce new literary traditions. May be repeated for credit. P/NP or letter grading.

170A. American Literature to 1775. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature through Colonial period. P/NP or letter grading.

170B. American Literature, 1775 to 1832. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature during Revolutionary and early republic periods. P/NP or letter grading.

171A. American Literature, 1832 to 1865. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Historical survey of American literature from Jacksonian era to end of Civil War. P/NP or letter grading.

171B. American Literature, 1866 to 1912. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Historical survey of American literature from end of Civil War to founding of Poetry magazine to end of World War II. P/NP or letter grading.

172A. American Literature since 1945. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Historical survey of American literature since end of World War II. P/NP or letter grading.

173A. American Fiction to 1900. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of American fiction (both novels and short stories) from its beginning to end of 19th century. P/NP or letter grading.

173B. American Fiction, 1900 to 1945. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of American novels and short stories from beginning of 20th century to end of World War II. P/NP or letter grading.

173C. American Fiction since 1945. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of American novels and short stories since end of World War II. P/NP or letter grading.

174A. American Poetry to 1900. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of American poetry from Puritan period through end of 19th century. P/NP or letter grading.

176. American Drama. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American drama from its beginning to present day. Historical period may vary with instructor. P/NP or letter grading.

177. Special Topics in American Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Focused study of some aspect or theme in American literature. May be repeated for credit. P/NP or letter grading.

178A. Perspectives in Study of American Culture. (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit. P/NP or letter grading.

178B. Interracial Encounters in Contemporary American Literature. (5) Lecture, three or four hours. Enforced requisites: English Composition 3 or 4H, English 4W or 4HW. Study of recent literary and cinematic texts produced by people from different ethnic backgrounds living in U.S. and providing comparative cultural perspectives on living in multilingual society. P/NP or letter grading.

M179A. Topics in Afro-American Literature. (5) (Same as Afro-American Studies M179A.) Seminar, four hours. Enforced requisites: English Composition 3 or 4H, English 4W or 4HW. Study of literature and its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit. P/NP or letter grading.

M179B. Topics in Chicana/Chicano Literature. (5) (Same as Chicana/Chicana Studies M179B.) Seminar, three or four hours. Enforced requisites: English Composition 3 or 4H, English 4W or 4HW. Study of literature and its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit. P/NP or letter grading.

M181A. Specialized Studies in Victorian Literature. (5) Seminar, three or four hours. May be repeated for credit. P/NP or letter grading.

M181B. Specialized Studies in 19th-Century American Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M181C. Specialized Studies in 20th-Century American Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M181D. Specialized Studies in 18th-Century Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M181E. Specialized Studies in Romantic Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M181F Specialized Studies in Victorian Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M182A. Specialized Studies in Colonial American Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M182B. Specialized Studies in 19th-Century American Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

M182C. Specialized Studies in 20th-Century American Literature. (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

190H. Honors Research Colloquium in English. (1) Seminar, one hour. Enforced corequisite: course 198A or 198B. Designed to bring together students under-taking supervised tutorial research for departmental honors in seminar setting with one or more faculty members to discuss their own work in progress and critical readings related to honors projects. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191H. Honors Research Seminars: English. (5) Seminar, three hours. Enforced requisite: course 140A or 140B. Open only to students who are eligible and apply for honors program in English. Introduction to research techniques and study of various approaches in application of literary methodology as it relates to interpretation and evaluation of texts. Development and presentation of proposals for honors projects. Consult undergraduate adviser. May be repeated for credit. P/NP grading.

192. Undergraduate Practicum in English. (4) Seminar, four hours. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative projects with guidance of faculty members in small course settings. May be repeated for credit. P/NP or letter grading.
M205A. Study of Oral Tradition: History and Methods. (4) (Same as Scandinavian M271.) Seminar, three hours. Examination of scholarly and literary attempts to study, define, capture, promote and/or appropriate oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century hydraulic models of oral composition, and modern-day electronic media and popular verbal genres, such as joking and rapping. S/U or letter grading.

M205B. Collecting Oral Tradition. (4) (Same as Scandinavian M272.) Seminar, three hours. Description and evaluation of various modern approaches to collecting and documenting oral tradition as text, performance, and sociocultural event. Consideration of approaches ranging from written transcription and textualization to audio and video presentation. S/U or letter grading.

M205C. Studies in Oral Traditional Genres. (4) (Same as Scandinavian M273.) Seminar, three hours. Exploration in depth of variety and history of, and scholarship on, particular oral traditional genre (e.g., ballad, song, epic, proverb, riddle, folklore, legend) or set of closely related oral traditional genres. S/U or letter grading.

211. Old English. (4) Lecture, four hours. Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read literature silently and aloud. Reading of as much of more interesting Old English prose and poetry as can be read in one term. S/U or letter grading.

212. Middle English. (4) Lecture, four hours. Requirement: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of better prose and poetry. S/U or letter grading.

M215. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4) (Same as Classics M218, French M210, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

218. Celtic Linguistics. (4) Lecture, four hours. Survey of salient features of Celtic linguistic study in its Gaelic and British branches, with reference to position of Celtic within Indo-European languages. S/U or letter grading.

230. Workshop: Creative Writing. (2 to 4) Lecture, two to four hours. Preparation: submission of writing samples in specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of nine courses required for first qualifying examination nor any of five courses required for second qualifying examination. S/U or letter grading.

240. Studies in History of English Language. (4) Lecture, four hours. Individual seminars dealing with any single historical period from Old English period to present or development of one particular linguistic change (phonological, lexico-semantic, diachronology) through various periods. May be repeated for credit. S/U or letter grading.

241. Studies in Structure of English Language. (4) Lecture, four hours. Topics in various aspects of structure of modern English, especially syntax and semantics. May be repeated for credit. S/U or letter grading.

242. Language and Literature. (4) Lecture, four hours. Application of linguistics to literary analysis. Individual seminars dealing with one historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. May be repeated for credit. S/U or letter grading.

244. Old and Medieval English Literature. (4) Lecture, four hours. Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

245. Chaucer. (4) Lecture, four hours. May be repeated for credit. S/U or letter grading.

246. Renaissance Literature. (4) Lecture, four hours. Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

247. Shakespeare. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

250. Restoration and 18th-Century Literature. (4) Lecture, three hours. Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

251. Romantic Writers. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

252. Victorian Literature. (4) Lecture, three hours. Studies in English poetry and prose of Victorian period; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

253. Contemporary British Literature. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

255. Contemporary American Literature. (4) Lecture, three hours. Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

256. Studies in Drama. (4) Lecture, three hours. Study of drama as genre from its beginning to present; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

Graduate Courses

202A. Criticism and Interpretation from Classical Era to Renaissance. (4) Lecture, three hours. Examination of major texts in history of critical theory and interpretation from pre-Socratics to Descartes, including classical literature (Plato, Aristotle, Horace, Longinus), biblical hermeneutics (Bible, Midrash, St. Paul, St. Augustine, St. Thomas Aquinas), and medieval and Renaissance theories of interpretation (Dante, Boccaccio, Sidney). S/U or letter grading.

208. Aesthetics and Criticism from Enlightenment to Decadence. (4) Lecture, three hours. Continuation of course 201A, proceeding from neoclassical and Enlightenment critical theory through Victorian and decadent aesthetic and critical theory. Readings may include texts by Rousseau, Dryden, Pope, Hume, Kant, Schiller, the Schlegels, Coleridge, Hegel, Schelling, Arnold, Pater, Wilde, and Nietzsche. S/U or letter grading.

201C. Developments and Issues in Modern Critical Thought. (4) Lecture, three hours. Study of major figures and ideas in modern and contemporary critical theory. Readings vary from year to year but may include such figures as Freud, Durkheim, Saussure, Heidegger, Shklovskii, Benjamin, Adorno, Levi-Strauss, Lacan, Barthes, Derrida, Deleuze, Fanon, Foucault, Irigaray, Lyotard, Bourdieu, and Bhabha. S/U or letter grading.

204. History of Rhetoric. (4) Lecture, four hours. Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval to modern period in alternate years. S/U or letter grading.
257. Studies in Poetry. (4) Lecture, three hours. Studies in various themes and forms of poetry from Old English to present; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

258. Studies in Novel. (4) Lecture, three hours. Studies in evolution of genre from its beginning to present; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

259. Studies in Criticism. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

M260A. Topics in Asian American Literature. (4) (Same as Asian American Studies M260.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

261. Studies in Chicana/Chicano Literature. (4) Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicana literature and culture. Examination of political, aesthetic, economic, and cultural context that emerges in Chicana/Chicana discourse; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

263. Celtic Literature. (4) Lecture, three hours. Preparation: knowledge of one ancient or modern Celtic language. Studies in poetry and prose of early and modern Celtic literature, chiefly Irish and Welsh; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

264. Studies in Rhetoric. (4) Lecture, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts. May be repeated for credit. S/U or letter grading.

265. Postcolonial Literatures. (4) Seminar, three hours. Study of aesthetic, historical, and social back- grounds to literature of former British colonies that became independent after 1947. General issues related to way imperialism, colonialism, and postcolonial- ism have helped to shape and have been shaped by literature in English. May be repeated for credit. S/U or letter grading.

M266. Cultural World Views of Native America. (4) (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms—dance, art, song, religious and medicinal ritual—in selected Native American societies, as these traditional and tribial contexts have been translated into contemporary literary forms (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change. Letter grading.

M270. Seminar: Literary Theory. (5) (Same as Asian M251, Comparative Literature M294, French M270, German M270, Italian M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosoph- ical, historical, and critical foundations of literary theo- ry as well as current issues in literary and cultural studies. S/U or letter grading.

272. Current Issues in Teaching English. (4) Semi- nar, four hours. Focus on one of variety of topics of special current interest. May be repeated for credit. S/U or letter grading.

M298. Interdisciplinary Studies in 17th and 18th Centuries. (4) (Same as History M298.) Discussion, four hours. Topics vary according to participation faculty. May be repeated for credit. S/U or letter grading.

M299. Interdisciplinary American Studies. (6) (Same as History M299) Discussion, four hours. Readings, discussion, and papers on common theme, team-taught by faculty members from different disciplines. Topics vary according to participating faculty. May be repeated for credit with consent of instructors. S/U or letter grading.

275. Teaching Apprentice Practicum. (1 to 4) Seminar, four hours. Enables graduate student instructors to approach challenges of teaching with technology on two fronts: by familiarizing them with range of possible applications and by carrying out research project on technology topic of their choice. S/U grading.

495A. Supervised Teaching Preparation. (2) Semi- nar, two hours. Required of all applicants for teaching assistantships in English. Introduction to teaching of literature intended to prepare teaching assistants for their first assignments in leading discussion sections. Practical concerns of creating assignments, grading papers, and holding conferences. S/U grading.

495B. Supervised Teaching Preparation. (2) Semi- nar, two hours. Required of all teaching assistants in their initial quarter of teaching. Mentoring and group teaching assistant/mentor conferences. S/U grading.

495E. Teaching with Technology. (2 to 4) Seminar, two hours. Enables graduate student instructors to adopt technology and approach challenges of teaching with technology on two fronts: by familiarizing them with range of possible applications and by carrying out research project on technology topic of their choice. S/U grading.

496. Publishing Academic Literary Articles. (4) Discussion, four hours. Structured as writing work- shop and divided into two parts: (1) determination of what publishable article looks like while students re- vise work independently and (2) circulation of student papers to class in advance with writing discussed in seminar room by whole class. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate ad- viser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study. (2 to 4) Tutorial, to be arranged. Limited to students preparing for first qual- ifying examination or engaging in intensive directed re- search project. Must not be basic to high-level skills. Be- sides courses that satisfy the University’s Entry- Level Writing and Writing I and II (English Composition) requirements, the program offers advanced courses in exposition and a lan- guage and composition course for teachers. Special programs include the Transfer Intensive Program (TIP).

Undergraduate Study

Entry-Level Writing

Every student who does not satisfy the Entry- Level Writing requirement by presenting trans- fer credit or acceptable test scores is required to take, as early as possible during the first year in residence, English Composition A, 2, or 21 (determined by performance on the Analyti- cal Writing Placement Examination). For more information regarding Entry-Level Writing, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.
English Composition

Lower Division Courses

A. Introduction to University Discourse. (No credit; 495A) Lecture, four hours. Enforced requisite: satisfactory performance on Analytical Writing Placement Examination. Displaces 4 units on student's Study List but yields no credit toward degree. First course in reading university-level texts and training in written responses that explore a range of rhetorical strategies from paraphrase to analysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar. Completion of course with grade of C or better or demonstration of minimum competence on Analytical Writing Placement Examination is requisite to course 2. Letter grading.

2. Approaches to University Writing. (5) Lecture, four hours. Enforced requisite: course 3 or better or appropriate score on Analytical Writing Placement Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentative coherence and effective style. Completion of course with grade of C or better satisfies Entry-Level Writing requirement. Letter grading.

20W. Intermediate Academic Writing: Various Topics. (5) Lecture, six hours. Enforced requisite: appropriate score on Analytical Writing Placement Examination and English as a Second Language 35 (C or better). Designed for sophomores/juniors/seniors. Course in academic writing suitable for both lower and upper division students that teaches them to write papers with range of complexity and length. Focus on conventions of academic prose across disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay. Satisfies Writing II requirement. Letter grading.

110. Writing Adjunct. (4) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing requirement, course 3 or 3H or English as a Second Language 36. Designed for sophomores/juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical analysis of major problems and contemporary issues. Each course may be taken independently for credit. P/NP or letter grading. 131A, Law and Politics; 131B, Business and Social Health; 131D, Media and Communications.

120A. Language Study for Teachers: Elementary School. (4) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature. P/NP or letter grading.

121. Information Literacy and Research Skills. (1) Lecture, one hour. Preparation: satisfaction of Writing I requirement. Designed to help students become information literate, so they know how to identify, locate, critically evaluate, and use print and electronic information effectively and ethically. Closely interwoven with student responsibilities in information literacy and research-related assignments. P/NP or letter grading.

129A-129D. Academic Writing in Disciplines. (4 each) Lecture, four hours. Designed for juniors/seniors. Advanced study of writing conventions in specific disciplinary areas, with focus on analysis and development of writing expertise in common discourse forms, stylistic patterns, and research practices in given discipline. Each course may be taken independently for credit. P/NP or letter grading. 129A. Literature; 129B. Social Sciences. Lecture, three hours; discussion, one hour; 129C. Physical and Life Sciences; 129D. Fine Arts.

131A-131D. Specialized Writing. (4 each) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Designed for juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical analysis of major problems and contemporary issues. Each course may be taken independently for credit. P/NP or letter grading. 131A, Law and Politics; 131B, Business and Social Health; 131D, Media and Communications.

132A-132D. Topics in Rhetoric and Writing. (4 each) Lecture, four hours; discussion, one hour. Requisite: satisfaction of Entry-Level Writing and English Composition requirements in courses. Designation or assignment. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental requisites must take it for letter grade. 132A. Gender and Writing; 132B, AutoBiographical Writing; 132C. Cultural Studies; 132D. Variable Topics.

135A-135B-136C. Practical Writing and Editing. (4-4-4) Lecture, three hours. Preparation: one course from 131 series. Requisite: satisfaction of Entry-Level Writing requirement, course 3. Sequence in practical writing and editing ability specifically designed to prepare students for careers. Analysis of prose and literary styles necessary to variety of writing in professional, nonacademic fields combined whenever possible with practical experience in writing internships and training in wide range of editorial skills. In Progress (135A) and P/NP or letter (135B, 136C) grading.

195. Community or Corporate Internships in English Composition. (4) Tutorial, to be arranged. Requisite: courses 3 or 3H, satisfaction of Writing II requirement. Limited to juniors/seniors. Internship in supervision of faculty members. Limited to community or college English curriculum. S/U or letter grading.

199. Directed Research or Senior Project in English Composition. (2 to 4) Tutorial, to be arranged. Requisite: course 3 or 3H. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty member, including a minor paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

300. Teaching English. (4) Lecture, four hours. Required of candidates for single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to secondary school or college English curriculum. S/U or letter grading.

495A. Supervised Teaching Preparation. (2) Seminar, two hours. Required of all teaching assistants for Writing II courses not exempt by appropriate departmental or program training. Training and mentoring, with focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in disciplinary contexts. Practical concerns of creating assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

495B. Supervised Teaching Preparation. (2) Seminar, two hours. Course 495A is not requisite to 495B. Required of all teaching assistants who are assigned to English Composition 3 courses. Focus on composition pedagogy, writing course design, assessment of student writing, and specialized problems that may occur in teaching English Composition 3. S/U grading.

Pablo Cicer-Fernandez, D.Env.

Scope and Objectives

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, and physical hazards in the environment. Its graduates are highly trained scientists and professionals capable of identifying and measuring agents of environmental concern; evaluating the health, environmental, and all other impacts of such agents; developing means for their effective management; and evaluating alternative policies directed at improving and protecting environments. Such training is accomplished through several degree programs that offer specialized study in selected academic areas of environmental health sciences such as air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in environmental health sciences (see Public Health Schoolwide Programs). In addition, a unique doctoral degree (Doctor of Environmental Science and Engineering — D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Environmental Health Sciences offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Environmental Health Sciences.

Environmental Health Sciences

Upper Division Courses

100. Introduction to Environmental Health. (4) Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Introduction to environmental health, including leverage of sanitary principles and chronic and acute health effects of environmental contaminants. P/NP or letter grading.

C125. Atmospheric Transport and Transformations of Airborne Chemicals. (4) Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional and long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C225. P/NP or letter grading.

C135. Environmental Policy for Science and Engineering. (4) Lecture, four hours. Preparation: strong quantitative background and good understanding of statistical methods. Introduction to core methods of environmental economics, policy analysis, basic econometrics, and survey design. Application of case-study approach with considerable memo and paper writing and revision. Emphasis on critical thinking about normative and positive aspects of environmental policies. Normative issues include evaluation of benefits and costs of environmental policies. Exploration of why some environmental policies are readily adopted by society, while other policies go unheeded or lead to perverse and counterproductive outcomes. Concurrently scheduled with course C235. P/NP or letter grading.

C140. Fundamentals of Toxicology. (4) Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Concurrently scheduled with course C240. Letter grading.

C152D. Properties and Measurement of Airborne Particles. (4) Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C252D. P/NP or letter grading.

C157. Risk Assessment and Standard Setting. (4) Seminar, four hours. Requisites: course C140, Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of literature. Attention specifically to interface of science and regulatory standards. Concurrently scheduled with course C257. P/NP or letter grading.

197. Individual Studies in Environmental Health Sciences. (2 to 4) (Formerly numbered 197.) Tutori-
al, four hours. Limited to juniors/seniors. Individual in-
tensive study, with scheduled meetings to be ar-
anged to meet particular requirements. Reading materials, 
assigned reading and tangible evidence of mastery of 
subject matter required. May be repeated for credit. 
Individual contract required. P/NP or letter grading.

Graduate Courses

C200A-C200B. Foundations of Environmental Health Sciences. (6-8) (Formerly numbered 200A-
200B.) Lecture, six hours. Multidisciplinary aspects of 
environmental health sciences in context of public 
health and environmental health majors. Concurrently 
scheduled with courses C185A-C185B. Letter grad-
ing. C200A. Preparation: one year of undergraduate 
biochemistry, calculus, and physiology. C200B. 
Requisite: course C200A.

200C. Environmental Health Sciences for Nursing Students. (10) Three hours. Preparation: one 
year of undergraduate biology, calculus, chemistry, and 
physics. Limited to nursing students. Introduction to 
pharmacology, environmental epidemiology, public 
health and environmental health sciences. C200C. 
Requisite: course C200A.

202. Seminar: Environmental Chemistry. (2) Semi-
inar, one hour. Requisites: courses C200A, C200B, 
410A, 410B. Environmental chemistry aspects of en-
vironmental health sciences. Topics vary from term to 
term and include aspects of environmental health, 
epidemiology, and ecology. May be repeated for credit. 
Letter grading.

203. Seminar: Ecotoxicology. (2) Seminar, two 
hours. Discussion of various aspects of ecotoxicology. 
Topics vary from term to term and include aspects of 
environmental health, physics, and ecology. May be 
repeated for credit. S/U grading.

204. Seminar: Exposure Assessment. (2) Semi-
inar, two hours. Discussion of various topics in expo-
sure assessment. Topics vary from term and include 
aspects of environmental health, physics, and ecology. 
May be repeated for credit. S/U grading.

205. Environmental Health Sciences Doctoral Seminar. (2) Seminar, two hours. Limited to envi-
ronmental health sciences doctoral students. Presenta-
tion of current research of environmental health sci-
ces doctoral students. May be repeated for credit. 
S/U grading.

206. Seminar: Applied Coastal Ecology. (2) Semi-
inar, two hours. Discussion of various topics in applied 
coastal ecology. topics vary from term to term and include 
ecosystem ecology, estuarine ecology, and coastal 
ecology. May be repeated for credit. S/U grading.

207. Introduction to Geographic Information Sys-
tems. (2) Lecture, one hour. Introduction to geographic 
information systems (GIS), including use of GIS software, 
mapping, geocoding, and data analysis. S/U or letter grading.

208. Built Environment and Health. (2) Lecture, two 
hours. Limited to public health and urban planning 
graduate students. Interdisciplinary course on built 
environment and health and breaking down silos. U.S. 
and other developed, as well as developing, countries 
are facing increasingly lethal and costly epidemics of 
acute and chronic diseases related to land use and built 
environment decisions. While hazards presented by 
air and water pollution are well recognized for 
afe, infectious, and toxicological illnesses, there is 
increasing recognition of hazards presented by build-
ing and community designs that fail to recognize hu-
man health. Land use and built environment deci-
sions impact everyone age group and social and 
racial minority. Impacts range from very acute (motor 
vehicle trauma) to long term (obesity, cancer, heart dis-
ease, chronic conditions such as their bases economic, 
financial, insurance, housing, and other factors. Analys-
sis of each factor and related disease endpoints. S/U or 
letter grading.

210. Public Health and Environmental Microbiol-
ogy. (4) Lecture, three hours; outside study, six hours. 
Experiments conducted in microbiology laboratories. 
Corequisite: course each in biology, organic chemistry, 
and biochemistry. Basic principles: cycling of matter, 
famous of natural and man-made compounds in 
environment, wastewater and drinking water microorganisms and treatment, and public health 
microorganisms. S/U or letter grading.

212. Applied Ecology. (4) Lecture, four hours. Prepa-
ration: one ecology course. Application of ecological 
theory and principles to solve environmental prob-
lems, including available tools for assessment of 
environmental impacts, and restoration ecology and 
mitigation of environmental impacts. Letter grading.

M220L. Public Health Laboratory. (4) (Same as Ep-
demiology M225L.) Laboratory, five hours. Prepara-
tion: introductory microbiology. Corequisite: course 
M220. Public health laboratory techniques for detec-
tion and identification of pathogenic microorganisms. 
S/U or letter grading.

M225. Atmospheric Transport and Transforma-
tion. (4) Seminar, two hours. Formerly numbered 225.
Lecture, four hours. Preparation: one year of calculus, 
one course each in physics, organic chemistry, and 
physical chemistry. Designed for sci-
ence majors. Emphasis on critical thinking about 
how and why some environmental risks are readily adopted by 
society, while other policies go unheeded or lead to 
perverse and counterproductive outcomes. Concur-
rrently scheduled with course C135. Letter grading.

C226. Urban and Regional Planning. (4) (Formerly 
numbered 240.) Lecture, four hours. Preparation: 
graduate level in engineering, physical, or 
natural sciences. Introduction to commonly used vo-
cabulary in nanoscience required to appreciate bio-
nano at undergraduate level in engineering, physical, or 
chemistry. Limited to graduate students. May be repeated for credit. 
S/U grading.

C227. Environmental Microbiology. (4) Lecture, 
six hours. Multidisciplinary aspects of environmental 
health sciences in context of public 
health and environmental health majors. Concurrently 
scheduled with courses C185A-C185B. Letter grad-
ing. C185A. Preparation: one year of undergraduate biology, calculus, and chemistry. 
Requisite: course C185B. Requisite: course C185B.

C230. Environmental Health Sciences Doctoral 
Seminar. (2) Seminar, two hours. Limited to envi-
ronmental health sciences doctoral students. Presenta-
tion of current research of environmental health sci-
ces doctoral students. May be repeated for credit. 
S/U grading.

C235. Environmental Policy for Science and Engi-
eering. (4) (Formerly numbered 235.) Lecture, four 
hours. Preparation: bachelor's degree in science, engi-
neering, public health, public policy, political sci-
ence, or economics, one year of statistics, one year of 
calculus. Introduction to core methods of environmen-
tal economics, policy analysis, basic econometrics, 
and survey design. Application of case-study ap-
proach with considerable memo and paper writing and 
reading. Focus on applications of normative and po-

gative and counterproductive outcomes. Concur-
rently scheduled with course C140. Letter grading.

C245. Laboratory in Toxicological Methods. (2) 
(Same as Molecular Toxicology M245.) Lecture, one 
hour; laboratory, four to five hours. Survey of experimental techniques used in 
study of toxic substances. Experiments conducted 
within known toxicology laboratory. Experiments focus 
at molecular, cellular, and tissue levels. Principl-
es of techniques and methods of data analysis at 
discussion session prior to laboratory. Letter grading.

C246. Molecular Toxicology. (4) (Same as Mole-
cular Toxicology M246.) Lecture, four hours. Enforced 
requisite: course 240. Fundamental aspects of tox-
ology required for deep understanding of toxicologi-

cal processes, with research-oriented outlook. Dis-
ssemination of information about important molecular 
toxicological topics to make students think about them from research perspective. Students learn about cut-

ging-edge research areas of molecular toxicology, how to 
most optimally extract important information from 
research papers, how to critique papers, how to for-
umate alternative hypotheses for data in papers, how to 
formulate ideas for future research, and how to ex-
press their ideas effectively in oral settings. Letter grading.

250D. Industrial Hygiene Practice. (2) Seminar, two 
hours. Requisites: courses C200A, C200B. Prepara-
tion: concentration: emphasis on critical thinking about 
regulatory framework, risk assessment and risk com-
unication, new legislation, and emergent occupa-
tional health issues. S/U grading.

C252D. Properties and Measurement of Airborne Particles. (4) (Formerly numbered 252D.) Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science in environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C152D. S/U or letter grading.

252E. Identification and Measurement of Gases and Vapors. (4) Lecture, three hours; discussion, one hour; outside study, two hours. Preparation: one year each of chemistry, physics, and calculus. Theoretical and practical aspects of industrial hygiene sampling with measurement of gases and vapors. Letter grading.

252F. Industrial Hygiene Measurements Laboratory. (3) Laboratory, three hours. Corequisites: courses C252D, 252E. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment. S/U or letter grading.

252G. Industrial and Environmental Hygiene Assessment. (4) Lecture, one hour; discussion, two hours; laboratory, two hours; outside study, four hours. Corequisites: courses C200A, C200B, C252D, 252E, 252F. Environmental and industrial hygiene sampling assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.

253. Physical Agents in Work Environment. (2 to 4) (Formerly numbered 253A, 253B.) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Physics, measurement methods, health effects, and control methods for radiation, ionizing and nonionizing, noise, and thermal stress in workplace environment. S/U or letter grading.

255. Control of Airborne Contaminants in Industry. (3) Lecture, one hour. Preparation: one year of physics. Prerequisite: course C252D. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection. Letter grading.

256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health. (4) Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological monitoring and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors. Letter grading.

C257. Risk Assessment and Standard Setting. (4) (Formerly numbered 257.) Seminar, four hours. Prerequisites: courses C240, 251. Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of literature. Attention specifically to interface of science and regulatory standards. Concurrently scheduled with course C157. S/U or letter grading.

258. Identification and Analysis of Hazardous Wastes. (4) Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Prerequisites: course 252E, Biostatistics 100A. Designed to define, identify, label, and inventory hazardous wastes and how workers should be protected. Provides critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes. Letter grading.

259A. Occupational Safety and Ergonomics. (4) Lecture, four hours. Overview of most frequent and severe occupational injuries and illnesses, their distribution, causes, analysis methods, and control approaches, including low back pain, falls, machine exposures, upper extremity musculoskeletal disorders, fleet safety, and selected ergonomics topics. Letter grading.

259C. Seminar in Occupational Ergonomics. (2) Seminar, two hours. Prerequisite: course 259A. Emphasis on research methodology as applied to prevention and control of worker-musculoskeletal disorders. Topics include applied anthropometry, biomechanical modeling, strength measurement, postural analysis, fatigue, and medical surveillance of cumulative trauma disorders. S/U grading.

259G. Fire Prevention, Protection, and Facility Design. (3) Lecture, three hours. Prerequisite: course 259A. Introduction to application of fire science, engineering, and management principles to prevention, suppression, and control of fires and explosions and protection of persons and property from fire or explosion damage and injury. Letter grading.

264. Fate and Transport of Organic Chemicals in Aquatic Environment. (4) (Formerly numbered 264.) Lecture, four hours. Preparation: bachelor’s degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. Concurrently scheduled with course C164. S/U grading.

270. Work and Health. (4) (Formerly numbered 270.) (Same as Community Health Sciences M278.) Lecture, three hours; practicum, one hour. Required preparation: graduate-level methods/statistics course, basic epidemiology. Designed for graduate students. Exploration of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models, measurement, and grading. Emphasizes contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. S/U or letter grading.

280. Principles of Nanobiological Interactions and Nanotoxicology. (4) Lecture, four hours. Preparation: junior or senior standing and a chemistry class at level required for admission to University of California at undergraduate level in engineering, physical, or natural sciences. Introduction to commonly used vocabularies in nanoscience required to appreciate biological interactions and potential toxicity of nanomaterials. Discussion of synthesis and physical-chemical characterization of engineered nanomaterials. Development of understanding of unique properties of engineered nanomaterials and how these properties contribute to biological interactions. Relation of properties of engineered nanomaterials to their potential for transport, reactivity, uptake, and toxicity in natural environments and in body. Concurrently scheduled with course C180. S/U or letter grading.

296A-296N. Research Topics in Environmental Health Sciences. (1 to 4) Seminar, two hours. Advanced study and analysis of current topics in environmental health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

296A. Coastal Ecological Processes and Problems. 296B. Teratogenesis. 296C. Toxicology and Environmental Health Policy. 296D. Economic Impacts of Contamination and Remediation of Coastal Waters. 296E. Molecular Topics in Boron Biology. 296F. Toxicology and Exposure Assessment of Toxic Chemicals. 296G. Advances in Aerosol Technology. 296H. Occupational Safety and Ergonomics. 296I. Industrial and Environmental Hygiene. 296J. Germ Cell Cytogenetic/Genetic Biomarkers. 296K. Aquatic Chemistry. 296L. Water Science and Health. 296M. Experimental and Modeling Studies of Atmospheric Pollution. 296N. Genetic Toxicology.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.
501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward master's degree minimum total course requirement; may be repeated for credit. S/U grading.

502. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limitation to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

505. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U grading.

507. Master's Thesis Research. (2 to 10) Tutorial, four hours. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

508. Doctoral Dissertation Research. (2 to 10) Tutorial, four hours. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Richard F. Ambrose, Ph.D., Chair
Faculty Administrative Committee
Richard F. Ambrose, Ph.D. (Environmental Health Sciences)
Ann E. Carlson, J.D. (Law)
Randall D. Crane, Ph.D. (Urban Planning)
Thomas W. Gillespie, Ph.D. (Geography)
Malcolm S. Gordon, Ph.D. (Ecology and Evolutionary Biology)
William C. Hinds, Sc.D. (Environmental Health Sciences)
Matthew E. Kahn, Ph.D. (Institute of the Environment)
Vasilios I. Manousoutheakis, Ph.D. (Chemical and Biomolecular Engineering)
Michael K. Stenstrom, Ph.D. (Civil and Environmental Engineering)
Arthur M. Winer, Ph.D. (Environmental Health Sciences)

Scope and Objectives
The UCLA Environmental Science and Engineering (ESE) Program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional Ph.D. programs. After three decades, Dr. Libby’s vision has in fact been realized with the evolution of the program from an experimental approach into a key component of the overall effort to train environmental professionals at UCLA.

To date the program has awarded the Doctor of Environmental Science and Engineering (D.Env.) degree to over 200 students, and UCLA remains unique in the country in awarding such a degree. Many graduates have gone on to occupy critical positions in environmental research, remediation, and policy throughout the major environmental agencies in California and the nation. Other graduates have risen to senior positions in private sector companies conducting environmental research and remediation. Still other graduates are applying scientific solutions to environmental problems at national laboratories such as Oak Ridge and Lawrence Livermore Laboratories and at research institutes such as the RAND Corporation.

Although many participating interdepartmental faculty members are from the College of Letters and Science and the Henry Samueli School of Engineering and Applied Science, the program is administered through the School of Public Health where a core faculty is based in the Department of Environmental Health Sciences. No undergraduate major or master's degree is offered.

The program is designed to train multidisciplinary professionals with an appropriate balance of breadth and specific skills, based on a strong master's-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training through nine-month problems courses. Because the D.Env. degree is not a specialized research degree in the manner of a Ph.D., the usual extended research training period in residence at UCLA associated with a Ph.D. is replaced by an 18- to 36-month internship in an appropriate government agency, national laboratory, or private industry, during which in-depth study of an environmental problem leads to a dissertation.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasasa/library/pgmintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree
The Environmental Science and Engineering Program offers the Doctor of Environmental Science and Engineering (D.Env.) degree.

Environmental Science and Engineering
Graduate Courses

277. Leaders in Sustainability. (2) Lecture, two hours. Common course for all students participating in Leaders in Sustainability Program, including those from engineering, law, management, public affairs, and public health. Creation of environment for academically based discussions on various sustainability-related themes, capitalizing on wide mix of disciplines represented among participating students. Sessions feature UCLA faculty members, external speakers, and leadership skills to help students learn more about how to best put their interests in sustainability to use. S/U grading.

400A. Environmental Science and Engineering Problems Course. (8) Discussion, eight hours. Primarily designed for environmental science and engineering doctoral students. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of courses 400B and 400C).

400B. Environmental Science and Engineering Problems Course. (8) Discussion, eight hours. Required: course 400A. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

400C. Environmental Science and Engineering Problems Course. (8) Discussion, eight hours. Required: course 400B. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. Letter grading.

400D. Environmental Science and Engineering Problems Course. (8) Discussion, eight hours. Preparation: successful completion of internship approved by doctoral committee and program director. Required: course 400C. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. S/U or letter grading.

410A-410B-410C. Environmental Science and Engineering Workshops. (2-2-2) Discussion, two hours. Primarily designed for environmental science and engineering doctoral students who are conducting problems courses. Development of multidisciplinary skills essential to solution of environmental problems studied within courses 400A through 400D. Development of presentation skills. S/U grading.

M411. Environmental Health Sciences Seminar. (2) (Same as Environmental Health Sciences M411.) Seminar, two hours. Required for graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

Roberta M. Malmgren, Ph.D.
Shira C. Shafir, Ph.D., M.P.H.
Lisa V. Smith, M.S., Dr.P.H.

Visiting Professor
Zunyou Wu, M.D., Ph.D., M.P.H., M.S.

Scope and Objectives
Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology that includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists might work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology (see Public Health Schoolwide Programs).
M211. Statistical Methods for Epidemiology. (4) (Same as Biostatistics M211 and Statistics M250.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: courses 200B, 200C. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphic displays. Emphasis on applications introduced in courses 200B and 200C and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

M212. Statistical Modeling in Epidemiology. (4) (Same as Biostatistics M209.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course M204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

M216. Questionnaire Design and Administration. (4) (Same as Community Health Sciences M218.) Lecture, four hours. Requisites: courses 200A, 200B, and 200C or Community Health Sciences 211A and 211B. Design, administration, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

220. Principles of Infectious Disease Epidemiology. (4) Lecture, three hours. Requisite: course 100 or 200A. Understanding and control of infectious diseases carried by arthropods for graduate students. Focus on transmission and control of infectious diseases and application of these tools in public health programs to achieve epidemiologic impact on disease reduction, elimination, or eradication. Letter grading.

222. Arthropods as Vectors of Human Diseases. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100). Comprehensive overview of morphology, systematic, host/pathogen relationships, and spectrum of diseases carried by arthropods for graduate students. Focus on public health professionals, and medical doctors seeking information on global prevalence of arthropod-borne diseases. Letter grading.

223. Biology and Ecology of Human Parasitic Diseases. (4) Lecture, four hours. Information on all aspects of parasitic organisms causing human disease, including their morphology, biology, means of diagnosis, and diseases they cause. From epidemiological perspective, special emphasis on way in which parasites maintain themselves in nature and manner in which organisms are transmitted to people. Letter grading.

224. Zoonotic Diseases and Public's Health. (4) Lecture, four hours. Examination of wide variety of infectious disease agents (viruses, bacteria, and protozoa) that cause diseases in individuals and populations. Focus on how these diseases exist in natural environment, how they are transmitted from animals to humans, and methods for their prevention and control. Letter grading.

M225. Public Health Microbiology. (4) (Formerly numbered 225.) (Same as Environmental Health Sciences M220.) Lecture, four hours. Preparation: introductory microbiology. Requisites: courses 200A, 200B, and 200C (or 100). Corequisite: course M225L. Role of public health laboratory is to support testing needs of programs. To successfully fulfill this role, laboratory must provide information based on most sensitive and specific technologies available. Coverage of common infectious disease agents of public health importance and definition of impact of molecular biology on infectious disease epidemiology in modern public health laboratory. S/U or letter grading.

M226. Global Health Measures for Biological Emergencies. (4) (Formerly numbered 226.) (Same as Biostatistics 100A, 100B). Requisites: courses 200A, 200B, and 200C (or 100). Focuses on recognition and mitigation of bioterrorism that might occur in the future. Letter grading.

229. Epidemiology of Foodborne Illnesses. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Focuses on food poisoning and foodborne illness. Emphasis on developing and developed world. Examination of etiologic agents of food poisoning and factors specific to foods that allow them to become agents of disease transmission. S/U or letter grading.

230. Epidemiology of Sexually Transmitted Diseases. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100). Sexually transmitted diseases, medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

231. Principles of Control of Infectious Diseases. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Overview of control of infectious diseases and application of these tools in public health programs to achieve epidemiologic impact on disease reduction, elimination, or eradication. Letter grading.

232. Methods in STI/HIV Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Introduction to range of different methodologies used to collect data and conduct analysis on reproductive epidemiology topics, including methods that produce quantitative data and methods that produce qualitative data, with emphasis on use of methods appropriate for challenging and sensitive research topics such as sexual behavior, abortion use, and sexual abuse. Letter grading.

240. Cardiovascular Epidemiology. (2) Lecture, two hours. Topics include definition, pathogenesis, descriptive epidemiology, development of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

246. Epidemiology of Aging. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Focuses on methods and techniques that produce quantitative data and methods that produce qualitative data, with emphasis on use of methods appropriate for challenging and sensitive research topics such as sexual behavior, abortion use, and sexual abuse. Letter grading.

247. Epidemiology of Injuries in Elderly. (2) Lecture, two hours. Requisite: course 100. Description of frequency of risk factors for, and possibilities of preventing injuries in elderly populations. Comparison of injury outcomes (morbidity and mortality) in younger versus older populations. Focus on methodologic issues of studying elderly people. S/U or letter grading.

248. Psychiatric Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumention, and epidemiology of selected psychiatric disorders. Letter grading.

249. Genetic Epidemiology I. (2) Lecture, two hours. Preparation: at least one course in epidemiology, biostatistics, and genetics. Basic concepts in emerging field of genetic epidemiology, with principal focus on genetic aspects of common diseases. Determining genetic contributions to disease, identifying genes, and characterizing their main effects and interactions. S/U or letter grading.

251. Epidemiology of Nonintentional Injuries. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100). Pertinent epidemiology methods for study of nonintentional trauma, including that from motor vehicle crashes, occupational exposures, falls, and other major external causes, that focus on research approaches, data sources, analytical techniques. Substantive findings on related subproblem areas presented for critical review. Letter grading.

253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures. (2) Lecture, two hours; discussion, one hour. Requisites: course 100, Biostatistics 100A. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.

254. Nutritional Epidemiology. (2) Lecture, one hour; discussion, one hour. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods, ranging from food-borne outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to nutrition and health or disease outcomes. S/U or letter grading.

M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries. (2) (Same as Community Health Sciences M255.) Lecture, two hours. Injuries have been leading killer of children in U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. Letter grading.

258. Epidemiology of Obesity, Diabetes, and Related Disorders. (4) Lecture, two hours; laboratory, two hours. Preparation: basic biochemistry, epidemiology, molecular biology, physiology, and statistics courses. Survey of entire landscape of nutritional, biochemical, and genetic aspects of obesity and diabetes and their microvascular and macrovascular complications. Review of descriptive and analytical epidemiology of these seemingly distinct yet clearly clustered disorders, including so-called metabolic syndrome. Study of distributions and determinants of these disorders in Westernized populations to appreciate how and why these epidemics occurred. Through case studies students learn process of generating etiologic hypotheses that can be tested using modern molecular epidemiologic methods. Techniques and principles of molecular genetics relevant to epidemiologic studies. Analysis of real data sets that include both genotype and phenotype information, with emphasis on integration of various genetic-environment interactions. S/U or letter grading.

259. Disaster Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Community Health Sciences 295. Introduction to epidemiologic methodology to study disasters and their health outcomes, including surveillance, loss estimation, risk factor assessment, intervention, and evaluation. Letter grading.

260. Environmental Epidemiology. (2 or 4) Lecture, three hours. Requisites: courses 200A, 200B, and 200C (or 100). Epidemiologic methods applied to evaluation of human health consequences of environmental hazards. Topics include air pollution, pesticides, drinking water contaminants, use of GIS. Review of recently completed environmental studies published in peer-reviewed literature. S/U or letter grading.

261. Occupational Epidemiology. (4) Lecture, two hours; discussion, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Methodological considerations, approaches, and limitations in epidemiologic studies of occupational groups and environments. S/U or letter grading.

262. Seminar: Environmental and Occupational Cancer Epidemiology. (2) Seminar, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Discussion of examples of recent epidemiologic studies, with focus on environmental and occupational exposures, especially in areas where controversies have arisen such as for electromagnetic fields and childhood leukemia, and bladder cancer and trihalomethanes levels of drinking water. S/U or letter grading.

263. Exposure Assessment in Occupational and Environmental Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Exposure assessment is often most challenging aspect of epidemiologic studies of occupational and environmental hazards. Focus on integration of industrial hygiene principles and epidemiologic methods to improve exposure assessment protocols and exposure analyses for occupational/ environmental health studies. S/U or letter grading.

264. Epidemiology Methods in Occupational and Environmental Health. (2) Lecture, two hours. Introduction to epidemiologic methods applied to evaluation of human health consequences of occupational and environmental hazards, including study design, exposure assessment, and statistical techniques commonly encountered in research focused on assessing health effects resulting from occupational and environmental exposures. Topics include clusters, meta-analysis, risk assessment, and policy development. Illustrated case studies, with focus on techniques to critically evaluate and interpret current literature. Letter grading.

265. Global Health and Tropical Medicine. (2) Lecture, two hours. Introduction to tropical diseases and global health. How issues of maternal-child health, research in tropics, World Health Organizations, and political/medical constraints all are related with respect to health on worldwide scale. Letter grading.

267. Assessing Validity of Complementary and Alternative Healthcare Procedures. (2) Lecture, two hours. Exploration of validity of alternative and complementary healthcare procedures, with special emphasis on disorders in field of neurology. Focus on methods of analyzing clinical and experimental research published in journals that provide support or refute claims made by practitioners of these procedures. Primary procedures include acupuncture, chiropractic, massage, and herbal remedies. Letter grading.

M272. Social Epidemiology. (4) Same as Community Health Sciences M272. Lecture, two hours; discussion, one hour. Requisite: course 100. Relationship between social, economic, and psychological factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality. Letter grading.

273. Responsible Conduct of Research in Global Health. (2) Lecture, one hour; discussion, one hour. Requisite: Community Health Sciences 200. Introduction to fundamental principles of public health ethics, current ethical procedures, guidelines, and requirements, and ethical issues facing public health professionals working in developing countries. History of public health issues, unique ethical issues of research in developing countries, analysis of ethical implications of informed consent, responsibility to study community and its members, benefits, potential for retributive actions, role of funders, and role and responsibilities of review boards. S/U or letter grading.

280. Connecting Epidemiological, Medical, and Mathematical Aspects of Infectious Diseases. (4) Lecture, four hours. Preparation: courses 200A, 200B, 200C. To deepen and further integrate knowledge on infectious diseases, focus on small number of them to enable in-depth study. Each to be presented and discussed from three viewpoints that facilitate greater understanding: epidemiology, immunology and molecular basis, and epidemiologic and mathematical analysis. Letter grading.
M406. Preparing for Smallpox or Other Bioterrorist Events. (2) (Same as Community Health Sciences M406.) Lecture, two hours. Major current public health issue is massive effort to prepare for possible bioterrorist events. Practical application of principles of epidemiology and public health in preparing for smallpox or other bioterrorist events. Letter grading.

410. Management of Epidemiologic Data. (2) Lecture, two hours. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer. S/U or letter grading.

411. Research Resources in Epidemiology. (2) Lecture, one hour; discussion, one hour. Instruction and practical experience in use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication. Letter grading.

412. Public Health Surveillance. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Biostatistics 100A. Overview of public health surveillance methodology, including (1) design, implementation, and evaluation of surveillance systems, (2) analysis and interpretation of surveillance data, and (3) application of surveillance methods to specific health-related outcomes. Letter grading.

413. Methods of Scientific Communication. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Principles of scientific writing and communication. Approaches to developing effective written, oral, and visual presentations of epidemiologic research findings. Communication issues arising in conduct of research, including informed consent process. S/U or letter grading.

414. Practical Epidemiologic Investigations. (2 or 4 Lecture, one or two hours; laboratory, one or two hours. Requisites: courses 200A, 200B, and 200C (or 100). Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. Letter grading.

415. Epidemiology for Developing Countries. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (and/or 100). Biostatistics 100A. Practical use of epidemiology, microcomputers, and spreadsheet models for estimating morbidity and mortality, developing intervention or prevention strategies, and setting program priorities in Third World settings. Letter grading.

M418. Rapid Epidemiologic Surveys in Developing Countries. (4) (Same as Community Health Sciences M418.) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (and/or 100). Biostatistics 100A. Presentation of how to do health surveys in developing countries, including use of microcomputers to develop and test questionnaire, select sample, process and analyze data, and prepare final report. Letter grading.

420. Field Epidemiology in Developing Countries. (3) Seminar, three hours. Requisite: course 100 or 200A or 200B. Introduction to practical concepts and issues in conducting epidemiologic field research in developing countries, including formulating research questions, study site selection, ethical considerations, and logistics of data and specimen collection. S/U or letter grading.

495. Teacher Preparation in Epidemiology. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Ethnomusicology / 327

Scope and Objectives

Ethnomusicology involves the study of all kinds of music from all over the world, using a variety of disciplinary perspectives. The Department of Ethnomusicology, the largest and first of its kind in a U.S. university, offers courses that cover the music of virtually every region of the world and of many ethnic groups in the U.S., as well as courses on jazz, popular music, and film music. Most courses combine an interest in music as an art form with questions about how musical art and practice relate to other aspects of culture, society, politics, and economics. Courses are also given on the philosophy and aesthetics of music and the study of music perception and cognition using experimental methods. In addition to academic courses, the department offers performance ensemble courses in jazz and several world and American music traditions. At the undergraduate level most of the performance courses are open to nonmajors, and many academic courses target nonmajors; prior knowledge of music is not expected or required. The Department of Ethnomusicology is aligned with the Departments of Music and Musicology and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparatory training for a broad range of careers in music after students graduate.

The undergraduate major in Ethnomusicology is offered with two concentrations: one in jazz studies and one in world music with emphases in general world music, performance/composition, public ethnomusicology, and scholarly research. Admission requires an audition/interview. The major provides students with a wide-ranging liberal arts education in music. At its core, this includes (1) comprehensive knowledge of music cultures of the world, (2) understanding of the interrelationship of music, society, and culture, (3) grounding in the basics of Western music theory and musicianship, and (4) the experience of playing in one or several musical ensembles from various traditions around the world.

The concentration in jazz studies seeks to produce students who emerge as outstanding and well-rounded jazz musicians with a strong academic foundation, and to prepare students to...
enter professional careers in the music world, as well as graduate study in various aspects of music such as composition, arranging, film scoring, jazz performance, research, and teaching.

Beyond the core and emphasis requirements, students in the world music concentration may, through elective courses, prepare for a variety of career goals, including the study of ethnomusicology in graduate school, composing and performing music, working in the music industry, serving society in the nonprofit sector, or becoming a K-12 music teacher.

At the graduate level, the department offers M.A. and Ph.D. degrees in Ethnomusicology, with a specialization in systematic musicology. Both degree programs train students for future university teaching careers, as well as careers in library science and archiving, the music industry, public service, and music technology. The department provides fellowships, teaching assistantships, and research assistantships for qualified students.

**Undergraduate Study**

**Ethnomusicology B.A.**

**Admission**

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a video-tape of musical performance, following departmental guidelines.

**Preparation for the Major**

**Required:** Ethnomusicology 10A, 10B, 10C, 11A, 11B, 11C, 20A, 20B, 20C, and 12 units of performance organizations or private instruction in music (courses 91A through 912 or 92).

**The Major**

**Jazz Studies Concentration**

**Required:** Ethnomusicology M110A, M110B, M111, 120A, 120B, 120C, 120D, 129A, 129B, 129C, 183, 186, 12 units of course 171, 12 units of course 177, and one elective course selected from the general world music emphasis (see departmental counselor for course list).

**World Music Concentration**

**Required:** Ethnomusicology 175 or 181, 183; 12 units from courses 181A through 181Z or 182; and eight courses (32 units) from one of the four ethnomusicology emphases: (1) general world music, (2) performance/composition, (3) public ethnomusicology, or (4) scholarly research. See the departmental counselor for the list of courses for each emphasis.

**Emphases (32 units minimum):** To select an emphasis, students who entered the program as freshmen must submit an application to the department in the Fall Quarter of their third year in the program. Students who entered as transfers must select their emphasis during Spring Quarter of their first year of training at UCLA. The application must include (1) an up-to-date transcript, (2) a concise statement by the students explaining why the emphasis has been selected and how it will prepare them for their career goals, and (3) the approval of a faculty member who is a specialist in the emphasis. Students who decide on the general world music emphasis do not need to submit an application.

**General World Music (for students interested in general training in world music):** In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Four 4-unit courses must be selected from one of the following groupings — (1) Americas, (2) Africa and Asia, (3) popular music and jazz, or (4) aesthetics, politics, and psychology of music. Students may complete the remaining four courses with other upper division ethnomusicology courses listed under this emphasis, with courses from other emphases, or with Ethnomusicology 188, 197E, or 197S courses.

**Performance/Composition (for students interested in a career in performance and/or composition):** Students who select this emphasis must have a 3.5 grade-point average in departmental lower division core courses and a cumulative 3.0 GPA at the time of application. In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Students must take four 4-unit courses in this emphasis and a minimum of four 4-unit courses in the general world music emphasis, and fulfill the final project requirement either through a public recital (performance) or major composition. Performers and composers must enroll in Ethnomusicology 186, and instrumental and vocal performers must pass a recital permission jury, presenting excerpts from their recital programs in front of two faculty members, before they are allowed to stage their recitals.

**Public Ethnomusicology (for students interested in careers in the music industry, the music business, archiving, or arts administration):** Students who select this emphasis must have a 3.5 grade-point average in departmental lower division core courses and a cumulative 3.0 GPA at the time of application. In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Students must take four 4-unit courses in this emphasis and an additional two 4-unit courses in the general world music emphasis. Students must fulfill the internship requirement, which consists of three terms (8 units minimum) of Ethnomusicology 195, in an institution approved by the faculty sponsor. Students must write a final research paper (at least 10 pages) at the completion of each internship.

**Scholarly Research (for students interested in pursuing graduate study):** Students who select this emphasis must have a 3.5 grade-point average in departmental lower division core courses and a cumulative 3.25 GPA at the time of application. In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Students must take four 4-unit courses in this emphasis and may complete the remaining four courses with other upper division ethnomusicology courses listed under this emphasis, with courses from other emphases, or with Ethnomusicology 188, 197E, or 197S courses. Students must also write a thesis (25 to 30 pages) and enroll in Ethnomusicology 199 for at least one term while writing the thesis.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaalibrary/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Ethnomusicology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Ethnomusicology.

**Ethnomusicology**

**Lower Division Courses**

5. **Music Around World.** (5) Lecture, four hours; discussion, one hour; outside study, ten hours. Overview of world’s musical traditions by selecting one or two case studies from each of nine musical world regions: Pacific, East Asia, Southeast Asia, South Asia, Middle East, Africa, Europe, Latin America, and the U.S. and Canada. P/NP or letter grading.

10A-10B-10C. World Music Theory and Musicianship. (5-5-5) Lecture, two hours; discussion, four hours; laboratory, two hours; outside study, seven hours. Course 10A is requisite to 10B, which is requisite to 10C. Limited to Ethnomusicology and World Arts and Cultures majors. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition. Letter grading.

11A-11B-11C. World Music Systems and Structures. (5-5-5) Lecture, four hours; discussion, four hours; outside study, seven hours. Course 11A is requisite to 11B, which is requisite to 11C. Limited to Ethnomusicology majors. Students must receive grade of C or better to proceed to next course. Advanced study and analysis of musical systems and aesthetic concepts from selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition. Letter grading.

15. **American Life in Music.** (4) Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in the late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.
Upper Division Courses

C100. Audiosvisuals in 21st Century. (4)
Sociocultural history and survey of blues music tradition from its roots in West Africa to its emergence in African American oral culture, with emphasis on philosophical underpinnings and social and political influence of blues and its influence on development of country, jazz, gospel, rhythm and blues, rock, and hip-hop music, and other mediums. P/NP or letter grading.

C105. Music and Religion. (5)
Lecture, four hours; discussion, one hour. Survey of nature, role, and power of music and religious practice in cultures from around the world, covering the relationship of music and religion in the world religions of Judaism, Christianity, and Islam, as well as religious traditions of Native Americans and syncretic religious practices in African American communities. P/NP or letter grading.

C125A-125B-125C. Jazz Composition and Arranging. (2-2-2)
Study of jazz bebop tradition, including analysis of jazz and its historical background and its development in U.S. P/NP or letter grading.

C110A-M110B. African American Musical Heritage. (5-5)
Formerly numbered CM110A-CM110B.) Lecture, four hours; discussion, one hour. Course M110A is not required to take M110B. Survey of traditional and contemporary musical culture. P/NP or letter grading.

C110A-M110B. African American Musical Heritage. (5-5)
Formerly numbered CM110A-CM110B.) Lecture, four hours; discussion, one hour. Course M110A is not required to take M110B. Survey of traditional and contemporary musical culture. P/NP or letter grading.

C125A-125B-125C. Jazz Composition and Arranging. (2-2-2)
Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Music History majors. In-depth analysis of jazz styles and repertoires and their historical, aesthetic, and cultural context. Concurrently scheduled with courses C222A-C222B-C222C. Letter grading. C121A, Early Jazz to Swing Era; C122B, Bebop to Avant-garde; C122C, Jazz since the Sixties.

C123. Music of Bebop. (4) Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present.

C125A-125B-125C. Jazz Composition and Arranging. (2-2-2) Lecture, four hours; outside study, eight hours. Examination of various aspects of jazz composition. Differentiation between improvisation and notated composition, as well as between composition and arranging, and introduction to basic arranging concepts. Letter grading. C125A. Early Jazz to Swing Era; C125B. Bebop to Avant-garde; C125C. Jazz since the Sixties.
146. Folk Music of South Asia. (4) Lecture, three hours; laboratory, one hour. Illustrated survey of some regional genres, instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence.

147. Survey of Classical Music in India. (4) Exami- nation of regional, media, and foreign influences of In- dian classical music in context of religious, sociocul- tural, and historical background of the country.

156A. Music in China (4-4-4) Letter grading.

158A-158B. Studies in Chinese Instrumental Music. (4-4) Lecture, three hours; laboratory, one hour. 158A. Study of literature, major sources, paleography, theory, and philosophy of the Ch'in, including transcription and analysis. 158B. Study of literature, major sources, paleography, theory, and philosophy of the P'I P'a, including transcription and analysis. 158C. Comprehensive study of Chinese musical instru- ments, classification system, specific musical nota- tion, and use in context of Chinese society.

159. Music on China's Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for under- graduate Ethnomusicology, Music History, Music History, and World Arts and Cultures majors. Survey of musics from China's borderlands and less-known coun-tries; technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibe-to-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

161A-161B. Advanced World Music Performance Organizations. (2 each) Two hours; three hours. Outside practice, three hours. Limited to Ethnomusicology majors. Advanced study of traditional vocal and instru- mental world music. May be repeated for credit without limitation. Letter grading.

181. Anthropology of Music. (4) Designed for Ethnomusicology, Music History, and Anthropology majors. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure.

CM182. Music Industry. (4) (Formerly numbered C182.) (Same as Music CM182 and Music History CM186.) Lecture, four hours; outside study, eight hours. Limitation to Ethnomusicology, Music, and Music History majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and sold today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM288. Letter grading.

183. Study of Ethnomusicology. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10A, 10B, 10C, 20A, 20B, 20C. Designed for Ethnomusicology majors. Introduction to history of field, basic fieldwork and analysis methods, and current issues in research. Letter grading.

C184. Public Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology majors. How music industry functions and how products are created, marketed, and consumed. Techniques of pure research, basic and theoretical in nature, contrasted with those of applied research, practical and policy-oriented in approach. Concurrently scheduled with course C268. Letter grading.

186. Senior Recital or Project. (1) Tutorial, to be arranged. Limited to seniors. Preparation and performance of one-hour recital of song repertoire or prepartation of research project as approved by appropriate faculty. P/NP grading.

188. Special Courses in Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Selective topics in ethnomusicology. Consult Schedule of Classes topic title for instructor. May be repeated for credit. P/NP or letter grading.

193. Journal Club Seminars: Ethnomusicology. (2) Seminar, two hours; outside study, four hours. Limited to undergraduate students. Reading and discussion of writings on subjects in ethnomusicology. May be repeated for credit. P/NP grading.

195. Community or Corporate Internships in Ethnomusicology. (2 to 4) Tutorial, six to 12 hours. Limited to juniors/seniors with minimum cumulative 3.0 grade-point average. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 18 hours of credit with supervising faculty member required. P/NP or letter grading.

196. World Music Teaching Practicum. (4) Seminar, two hours; fieldwork, three hours; outside study, seven hours. Preparation for internship in ethnomusicology majors. Integration of academic work and hands-on training. Participation in theoretical discussions of world music education and application of these theories in elementary and secondary music and social studies classrooms. P/NP or letter grading.

197. Individual Studies in Ethnomusicology. (2 to 4) Tutorial, one hour; outside study, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in ethnomusicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project may be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

197. Individual Studies in Systematic Musicology. (2 to 4) Tutorial, three hours; outside study, 16 to 22 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in systematic musicology, scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project may be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Ethnomusicology. (2 to 4) Tutorial, to be arranged. Limited to junior/senior Ethnomusicology majors. Supervised individual research or investigation under guidance of faculty member and with scheduled meetings arranged. May be repeated for maximum of 8 units. Individual contract required. Letter grading.

Graduate Courses

200. Audiovisual Archiving in 21st Century. (4) Seminar, three hours. Designed for Ethnomusicology majors. Examination of history, present state, and future of audiovisual archives, with specific focus on ethics, copyright, contracts, fieldwork, preservation, and access and issues related to technology, space, budgets, and staffing. Concurrently scheduled with course C100. S/U or letter grading.

201. History of Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology from the late 19th century to the 1980s. Letter grading.

202. Current Issues in Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Current issues, basic literature, and schools of thought in field of ethnomusicology from the 1980s to the present. Letter grading.

203. Empirical Foundations in Systematic Musicology. (4) Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of empirical approaches in systematic musicology. Exploration of theory and philosophy of science and empiricism, experimental semiotics and aesthetics, acoustics, musical learning theory, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Examination of research problems and investigations on specific musical cultures and distinct genres of musical expression.

204. Seminar: African American Music in California. (4) (Same as Afro-American Studies CM121.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM112. S/U or letter grading.

222A-222B-222C. Jazz Styles and Analysis. (4-4-4) Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Musicology majors. In-depth analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with courses C121A-C121B-C121C. Letter grading. C222A. Early Jazz to Swing Era; C222B. Bebop to Avant-garde; C222C. Jazz since the Sixties.

230. European Musics: Politics, Identities, Nationalisms. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. European classical, popular, and traditional musics, with particular attention to ways in which music mirrors, negotiates, and contests ideas about and practices of national and other forms of identity, ideas developed in other domains of discourse and practice such as philosophy, history, literature, and art, and folklore. Examination of ways musicians, ordinary people, and politicians have used music to affect political processes involved in contesting and resolving tensions created between and among these identities and nations. Historical period covered primarily from the 19th and 20th centuries, with examples from all over European continent. Letter grading.

233A-233B-233C. European Traditional and Popular Music. (4-4-4) Discussion, one hour. Review of literature on European traditional and popular music, with special attention to modern issues and processes. May be repeated for credit. In Progress (233A, 233B, 233C) grading.
C236B. Music of Africa. (4) Lecture, four hours; outside study, eight hours. Introduction to music of various African cultures and regions. Through readings, lectures, viewing analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music. Concurrently scheduled with course C136B. Letter grading.

241. Music of Iran and Other Non-Arabic-Speaking Communities. (4) Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory. Investigation of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N) required.

248. Classical Music of India. (4) Lecture, three hours; outside study, nine hours. Requisite: course 146 or 147. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and traditional theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required. S/U or letter grading.

C250. Music and Politics in East Asia. (4) Lecture, four hours; outside study, nine hours. Designed for graduate students. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, with emphasis on world music genres, local/global interactions of musical experience in modern world. Consideration of musical style; historical, social, and cultural aspects of music relative to model of musical meaning. Concurrent participation in course C176. Letter grading.

259. Music on China's Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Survey of music from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighur, Tibet, Khmer, Lao, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C159. S/U or letter grading.

M261. Gender and Music in Cross-Cultural Perspective. (4) (Same as Women's Studies M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (de)construction of messages of resistance, and gender representation to gendered politics via musical production. S/U or letter grading.

262. Musical Ethnography. (4) Seminar, three hours; outside study, nine hours. Examination of selected book-length ethnographies, most published in last 10 years, as both literary genre and research procedure. S/U or letter grading.

263. Perspectives in Popular Music Research. (4) Seminar, four hours. Investigation of theoretical paradigms, issues, and research models of popular music, with emphasis on world music genres, local/global contexts, mass media, and appropriation and aesthetics of style, ethnographic methods, and impact of popular music studies on ethnomusicology. Letter grading.

264. Urbanism and Music. (4) Seminar, three hours; outside study, nine hours. Theoretical and methodological issues in study of the city as cultural entity that affects and is affected by music making. S/U or letter grading.

265. Religion and Music. (4) Seminar, three hours; outside study, nine hours. Cross-cultural examination of role of musical expression in religious contexts and as artistic expression in world's religions. S/U or letter grading.

266. Charles Seeger's Life and Thought. (4) Seminar, three hours; outside study, nine hours. Charles Seeger's (1886 to 1979) major writings and influence on three fields he helped to found (ethnomusicology, systematic musicology, and music therapy) as well as his interest in applied musicology and American composition in the 20th century. S/U or letter grading.

267. Music and Ecstasy. (4) Seminar, three hours; outside study, nine hours. Relationship between music and consciousness in different world cultures and role music plays in religious, spiritual, and historical contexts. Phenomena include trance, spirit possession, shamanism, religious ecstasy, mysticism, and artistic inspiration. S/U or letter grading.

268. Modernity and Musical Experience. (4) Seminar, three hours; outside study, 10 hours. Limited to graduate students. Examination of possibilities for subject-centered musical ethnography to account for fragmented musical experience in modern world. Consideration of local and "world" music in relation to Modernity, postmodernity, globalization, notions of self and subject, power, and media images. Letter grading.

C269. Music, Science, and Technology. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for students majoring in music theory and applied technology, and ethnomusicology. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced music currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C156A.

273. Seminar: Psychology of Music. (6) Seminar, three hours. Selected topics in psychology of music, including current findings in musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit. S/U or letter grading.

275. Seminar: Aesthetics of Music. (6) Seminar, three hours. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives and critical theory, and interpretation. May be repeated once for credit. S/U or letter grading.

276. Psychology of Film Music. (4) Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C176. Letter grading.

279. Seminar: Systematic Musicology. (4) Seminar, three hours. Requisite: course 170. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated once for credit.

280. Teaching World Music and Music Appreciation. (4) Seminar, three hours. Preparation: two ethnomusicology courses or concurrent enrollment in course 20A, 20B, or 20C. Designed for ethnomusicology and musicology graduate students. Practical overview of current pedagogical philosophies and texts used in teaching introductory music survey courses, specifically music appreciation and general world music. Letter grading.

281A-281B. Seminars: Field and Laboratory Methods in Ethnomusicology. (6-6) Seminar, three hours; laboratory, two hours. Requisites: courses 20A-20B. Fieldwork concepts and methods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects.

282. Seminar: Analysis. (6) Seminar, three hours. Requisite: course 180 or graduate ethnomusicology student. Intensive discussion of techniques used in ethnomusicological analysis, including transcription and notation, with emphasis on analysis of musical performance and music events.

283. Seminar: Study of Musical Instruments (Or- ganology). (6) Seminar, three hours. Requisites: courses 201A-201B. Musical instruments studied in terms of their structures, performance contexts, cultural significance, and patterns of change.

284. Seminar: Anthropology of Music. (4) Requi- sites: courses 201A-201B. Analysis of current anthropological paradigms and issues that have major impact on ethnomusicology.

285. Seminar: Comparative Music Theory. (6) Seminar, three hours. Comparative study of codified music theories of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as a science of music, in its place between cultural values and artistic practice in different civilizations.

C286. Public Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology majors. How music industry functions and how products are created, marketed, and consumed. Techniques of pure research, basic and theoretical in nature, contrasted with those of applied research, practical and policy-oriented in approach. Concurrently scheduled with course C184. Letter grading.

CM288. Music Industry. (4) (Formerly numbered C288.) (Same as Music CM282 and Musicology CM288.) Lecture, four hours; outside study, eight hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and consumed. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM182. Letter grading.

289. Research Design and Grant Writing in Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Design of dissertation research proposal, locating and applying for dissertation fieldwork grants, organizing and presenting advanced academic proposals with sophisticated methods and professional writing skills. S/U or letter grading.

291. Ethnomusicology Colloquium Series. (1) Research group meeting, one hour. Limited to graduate ethnomusicology students. Introduction to new trends and issues in discipline of ethnomusicology in effort to strengthen and stimulate intellectual community within department. Topics vary from term to term and consist of presentations by guest lecturers, faculty members, and students. May be repeated for credit. S/U grading.

292A-292B. Seminars: Special Topics in Ethnomusicology. (4 each) Designed for graduate students. Utilization of special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprenticeship personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495A. Teaching Apprentice Practicum. (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Ethnomusicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

495B. Teaching with Technology. (2) Seminar, three hours; outside study, three hours. Limited to graduate ethnomusicology students. Training in presentation, spreadsheet, web design, and digitization software, and its application in classroom and in preparation of electronic teaching portfolio. S/U grading.

596. Directed Individual Studies. (2, 4, or 6) Only 4 units may be applied toward M.A. minimum course requirements.

597. Preparation for Master’s Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4) May be repeated for credit. S/U grading.

598. Guidance of M.A. Thesis. (4, 8, or 12) May be repeated for credit. S/U grading.

**European Studies / 333**

**European Studies B.A.**

The B.A. degree in European Studies is based on four principles: (1) students acquire proficiency in a modern European language other than English, (2) students examine European societies and civilization in depth from a pan-European and regional perspective, in addition to the traditional national focus that language instruction typically provides, (3) they do so from an interdisciplinary point of view, taking courses in at least five different academic departments/programs, and (4) they take lower division courses to acquire a broad introduction to European heritage and upper division courses to study modern Europe in greater detail from the 19th century on.

**Admission**

Interested students should meet with the academic counselor to discuss the program requirements. To enter the major, students (1) must be in good academic standing (minimum 2.5 grade-point average), (2) have completed the foreign language requirements and six preparation for the major courses, (3) are expected to declare the major no later than the end of their sophomore year, and (4) should apply for the major in the academic counselor’s office.

**Preparation for the Major**

The preparation for the major consists of 24 to 30 units of foreign language, 8 units of humanities and arts courses, and 16 units of social sciences courses as follows:

**Foreign Language (24 to 30 units):** Students prepare for the major by studying one modern European language other than English — the declared foreign language — through the intermediate level. Students must fulfill the specific requirements of their selected language department. The relevant language departments are French and Francophone Studies (French), Germanic Languages (Dutch, German, and Yiddish), Italian, Scandinavian Section (Danish, Finnish, Norwegian, and Swedish), Slavic Languages and Literatures (Czech, Hungarian, Lithuanian, Polish, Romanian, Russian, Serbo-Croatian, and Ukrainian), and Spanish and Portuguese.

In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement. The total number of units may vary according to the selected language. Students should complete the lower division foreign language requirement by the end of their sophomore year. If students wish to study a modern European language not taught in full by any UCLA department, they should consult with the academic counselor about how to fulfill the language requirement.

**Humanities and Arts (8 units):** (1) One course in literature or civilization taught in a language department to be selected from Dutch 100, English 90, French 12, 14, 14W, 41, 60, German 50, 50W, 60, Italian 42A, 42B, 46, 50A, 50B, Old Norse Studies 40, Portuguese M35, M42, Romanian 90, Russian 25, 25W, 30, 90A, 90B, 90BW, Scandinavian 50, 50W, Slavic 88, 90, Spanish M35, M42, 60A, 60C, 61A, 62A, or Yiddish 121A; (2) one course from Art History 54, Classics 10, 20, 30, 42, 51A, 51B, Comparative Literature 1A, 1B, 1C, Music History 3, 4, 66, Philosophy 1, 5, 6, or 8.

**Social Sciences (16 units):** (1) Two courses from two different departments selected from Economics 1, 2, 5, Geography 4, Information Studies 10, 20, Political Science 10, 20, 50, Sociology 1, 10, Statistics 10, 12; (2) two courses from one of the following series: History 1A, 1B, and 1C, or 2B, 2C, and 2D, or 3A, 3B, and 3C. Variable topics courses such as History 97C may also be applied toward the history requirement after consultation with the academic counselor.

**Transfer Students**

Transfer applicants to the European Studies major with 90 or more units should complete as many of the following introductory courses as possible prior to admission to UCLA: two years of a modern European foreign language other than English, one language department course in European literature or civilization or one course in a European country’s literature or civilization, one course in a humanities and arts department with focus on Europe, two courses from two different social sciences departments that must have a distinct methodological or European content, and two European history courses.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

Françoise Lionnet, Ph.D. (Comparative Literature, French and Francophone Studies)
Mitchell B. Morris, Ph.D. (Musicology)
Michael E. Shin, Ph.D. (Geography)

**Scope and Objectives**

The European Studies major equips students to appreciate the richness of European cultures, societies, and languages that are fundamental to the understanding of modern Europe. The strongly pan-European program provides the opportunity to study this region from the vantage points of several disciplines in the humanities and social sciences.

The major aims to break down the traditional distinctions between the eastern and western blocs in light of important internal and global transformations and the rise of the European Union pertaining to cultural, economic, political, and social structures that are happening in Europe today.

The Major

The major consists of European Studies 101 and 11 additional upper division courses with substantial modern European content in at least five different departments/programs, with no more than four courses in any one department/program, as follows:

**Humanities and Arts (16 units):**
1. One course taught in a modern European language other than English, with instruction and reading assignments in that language, to be selected from Dutch 131, French 109, 114A through 120, German 132, 140A through 148, 152 through 162, Italian 103A, 103B, 103C, 113 through 120, Portuguese 120A, 120B, C124, C126 through C129, Russian 108, 130A, 130B, 130C, 140A through 140D, 150, Spanish 119A through 120A, 122 through 133, Yiddish 131A, or 131B.
2. (two courses with a pan-European or regional focus from Art History 110C, 1110D, Philosophy 118, Scandinavian 142, 143, C144 through C147, C180, C182, 184, CM186, 187 (one course from the list of courses in item 1 may be applied); (3) one course with either a pan-European or regional focus from item 2 or a national focus selected from Art History 110A, 110B, Dutch 113, English 115B, French 137, German 100C, 102A, 102B, Italian 110, M158, Polish 152B, Russian 120 through 128, Scandinavian 181, or Spanish 151A.

**Social Sciences (16 units):**
1. One modern European history course from History 120A through 120D, 121D, 121E, 121F, 122F, 123B, 123C, 131A, 134B, 134C, or 135C.
2. Two courses with a pan-European or regional focus from Economics 181B, Geography 152, 183, Political Science 111C, 127A, 153A, 153B, 156B, Sociology M166 (one course from the list of courses in item 1 may be applied); (3) one course with either a pan-European or regional focus from item 2 or a national focus selected from History 124C, 125C, 125D, 127C, 127D, 128B, Political Science 128B, 152A, 152B, 152C, 156A.

**Electives (12 units):** One course from any approved humanities course list, one course from any approved social sciences course list, and European Studies 191 or 199 under the supervision of a faculty member, or a 195 internship course related to Europe.

Variable topics courses such as History 191C may be applied toward any of the above course requirements when they are relevant for the course category under which they are petitioned.

**Study in Europe**
The program strongly recommends that students spend at least one term studying in the European country most relevant to their work. Participation in the University of California Education Abroad Program or other study abroad programs is strongly encouraged. Students should consult with their academic adviser about how to optimize the choices of courses offered by the host university.

**European Studies**

**Upper Division Courses**

**101. Introduction to European Studies.** (4) Seminar, three hours. Designed for European Studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including the individual and the state, cultural life, economic relations, nationalism, and international relations.

**191. Variable Topics Research Seminars: European Studies.** (4) Seminar, three hours. Research seminar on selected topics in European studies. Reading, discussion, and development of culminating paper. May be repeated for credit with topic change. Letter grading.

**199. Directed Research in European Studies.** (4) Tutorial, to be arranged. Limited to senior European Studies majors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. Letter grading.

**Double Majors**

Through judicious use of electives, students may find it possible to obtain the B.A. degree with two majors (e.g., European Studies and History, European Studies and Spanish). Interested students should consult the undergraduate academic advisers of both departments involved as early as possible in their B.A. program.

**Europeana**

**101. Introduction to Europeana.** (4) Seminar, three hours. Designed for Europeana students majoring in interdisciplinarity that introduces students to central topics, themes, and concepts of Europeana studies, including the individual and the state, cultural life, economic relations, nationalism, and international relations.

**191. Variable Topics Research Seminars: Europeana Studies.** (4) Seminar, three hours. Research seminar on selected topics in Europeana studies. Reading, discussion, and development of culminating paper. May be repeated for credit with topic change. Letter grading.

**199. Directed Research in Europeana Studies.** (4) Tutorial, to be arranged. Limited to senior Europeana Studies majors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. Letter grading.

**Family Medicine**

**Upper Division Course**

**199. Directed Research in Family Medicine.** (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Theodore O’Connell, M.D., Kaiser-Woodland Hills

Denise K.C. Sur, M.D., UCLA

**Scope and Objectives**

The Department of Family Medicine seeks to provide all students with a basic introduction to family-centered care in both the inpatient and ambulatory settings. During the basic clerkship, students develop (1) an appreciation of the breadth and scope of family medicine; (2) a basic knowledge in the broad content areas of family medicine, and (3) fundamental clinical skills appropriate to family medicine. The overall goal is to provide students with the opportunity to gain an understanding and appreciation of the central role of the primary care physician in the healthcare system, and to offer advanced clinical training for those students interested in pursuing careers in family medicine.

Further, the basic curriculum includes an overview of healthcare issues facing underserved and immigrant populations in urban America, as well as an introduction to health services research in family medicine.

Family medicine faculty members are active both in leadership roles in the department curriculum and in the Primary Care College. All first-year students are assigned to work with a family medicine preceptor once a month on a longitudinal basis for the entire year as part of the Dorset program. In the third and fourth (clinical) years, required and elective opportunities exist. All students take a required four-week clerkship in the third year, which is offered at over 10 teaching sites.

For further details on the Department of Family Medicine, see http://fm.mednet.ucla.edu.

**Family Medicine**

**Upper Division Course**

**199. Directed Research in Family Medicine.** (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.
Scope and Objectives

The purpose of the Film, Television, and Digital Media Department is to develop in its students a scholarly, creative, and professional approach to film, television, and digital art forms. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers an undergraduate minor in Film, Television, and Digital Media, an undergraduate program leading to the Bachelor of Arts in Film and Television, and graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

For current or specific information about the programs and faculty members, see http://www.ftv.ucla.edu/programs/ftvdm.

Undergraduate Study

Film and Television B.A.

The undergraduate Film and Television major encourages development of a personal vision that incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 90 quarter units (60 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own requirements, see http://www.tft.ucla.edu/programs/ftvdm.

Film, Television, and Digital Media Minor

The Film, Television, and Digital Media minor is designed for students who wish to augment their major program of study with a series of courses that promote the study of film, television, and digital media as art forms with social, political, cultural, and economic significance. The minor consists of a selection of upper division courses that introduce students to the specific requirements, see http://www.tft.ucla.edu/programs/ftvdm.

Due to curriculum changes, students in the Theater major are no longer allowed to change their major to Film and Television at the end of their sophomore year.

Preparation for the Major

Required: Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

The Major

Required: Film and Television 100, 115, 130B, 150, 154, 155, 163, 185, 195; one cinema and media studies elective (not previously taken as preparation for the major) from 106B, 106C, 107, 109, 112, 113, 114, M117; one course from 130A or 130C; and a senior concentration (at least 20 units) from one of the following areas:

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the Schedule of Classes for courses limited to majors only.

Film, Television, and Digital Media Minor

The Film, Television, and Digital Media minor is designed for students who wish to augment their major program of study with a series of courses that promote the study of film, television, and digital media as art forms with social, political, cultural, and economic significance. The minor consists of a selection of upper division courses that introduce students to the practice and critical study of film, television, and digital media.

To enter the minor students must have declared a major in a department other than the Film, Television, and Digital Media Department, be in good academic standing (minimum 2.0 grade-point average), have completed at least two film and television courses with grades of C or better, and file a petition at the Student Services Office, 103 East Melnitz Building, (310) 206-8441. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit max-
Upper Division Courses

100. Undergraduate Symposium. (1 or 2) Laboratory, three hours; Television three hours. Structured forum in which undergraduate majors meet on a regular basis to discuss curricular issues, meet with faculty, and have exposure to an array of guest speakers from other film schools. May be repeated for a maximum of 4 units. Letter grading.

101. Story and Style: Theory and Practices of FIlmmaking. (5) Lecture, three hours; screenings, three hours. Historical and critical survey of selected films as case studies to understand the relationship of theory to practice and to develop skills in critical thinking, analytical writing, and strategies for creating original film and video productions. P/NP or letter grading.

106A. History of American Motion Picture. (6) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of American motion picture both as developing art form and as medium of mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

106B. History of European Motion Picture. (5) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of European motion picture both as developing art form and as medium of mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

107. Experimental Film. (6) Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.

108. History of Documentary Film. (5) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films. Letter grading.

110A. American Television History. (5) Lecture/screenings, five hours; discussion, one hour. Critical survey of American television history from its inception to the present. Examination of interrelationships between program forms, industrial paradigms, social trends, and culture. Starting with television's hybrid origins in radio, theater, and film, contextualization, viewing, and discussion of key television shows, as well as Hollywood films that comment on radio and television. Consideration of television programs and series in terms of sociocultural issues (consumerism, lifestyle, gender, race, national identity) and industrial practice (programming, policy, regulation, business). Letter grading.

110B. History of Television. (5) Lecture/screenings, five hours; discussion, one hour. Historical and critical survey of development of television as mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

111. Women and Film. (6) (Same as Women's Studies M111.) Lecture, eight hours; discussion, one hour. Historical issues and critical approaches to women and cinema that may include authorship, auteur, and genre. May be repeated twice for credit.

112. Film and Social Change. (6) Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development. Letter grading.

113. Film Authors. (6) Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film author (director or writer). May be repeated once for credit with consent of department and topic change.

113A. Film Directors: Hitchcock and His Influence. (5) Lecture/screenings, five hours; discussion, one hour. Study of films of Alfred Hitchcock and influence he has had on other filmmakers. Lectures and screenings of Hitchcock films in first seven weeks, with coverage of films that are closely patterned after Hitchcock's in last three weeks. P/NP or letter grading.

113B. Film Authors: Women Filmmakers. (5) Lecture, five hours; discussion, one hour. Consideration of contributions to world cinema made by women directors, with focus on women directors working in various eras and modes of production (e.g., silent cinema, industry cinema, avant garde) with specific investigations of several auteurs, specifically Dorothy Arzner, Jane Campion, and Cheryl Dunye. P/NP or letter grading.

114. Film Genres. (5) Lecture/screenings, five hours; discussion, one hour. Study of specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change. P/NP or letter grading.

116. Film Criticism. (4) Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.

M117. Chicanos in Film/Video. (5) Same as Chicana and Chicano Studies M114.) Lecture/screenings, five hours; discussion, one hour. Goal is to gain nuanced understanding of Chicano cinema as political, socioeconomic, cultural, and aesthetic practice. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — gangster films, social problem films, Westerns, and gang films — that are major genres that account for films about or with Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or signify on these Hollywood genres, including Zoot Suit, Ballad of Gregorio Cortez, and Born in East L.A. Consideration of shorter, more experimental work that critiques Hollywood image of Chicanos. Guest speakers include both pioneer and up-and-coming filmmakers. P/NP or letter grading.

126. Acting for Film and Television. (4) Laboratory, six hours. Projects in acting for television, video, and film. May be repeated twice for credit.
CM129. Contemporary Topics in Theater, Film, and Television. (2) Same as Theater CM129. Lecture, two hours; screenings, two hours. Limited to ju- nior/seniors and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, di- rection, production, and performance. Overview of in- dividual contributions in the collaborative effort; exam- ination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television pro- fessions. May be repeated twice for credit. Concur- rently scheduled with course CM229.

130A. Screenwriting Fundamentals. (2) Lecture, one hour. Corequisite for graduate students enrolled in course 431. Not open for credit to students with credit for course 130B (or 130C prior to Fall Quarter 2008). Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri. P/NP or letter grading.

130B. In-Depth Introduction to Fundamentals of Screenwriting. (4) Formerly numbered 130C. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 130A. Struc- tural analysis of feature films and development of pro- fessional screenwriters’ vocabulary for constructing, deconstructing, and reconstructing their own work. Screenwriting of short film sequences in class and by assignment. P/NP or letter grading.

131. Nontheatrical Screenwriting for Film and Television. (4 or 8) Discussion, three hours. Re- search and writing of documentary, technical, educa- tional, industrial, and propaganda scripts. May be re- peated for a maximum of 12 units.

135A-135B-135C. Advanced Screenwriting Workshops. (8-8-8) Laboratory, three hours. Requisite: course 130B. Course 135A is requisite to 135B, which is requisite to 135C. Courses in film and television writing. First act of original screenplay to be developed in course 135A, followed by second act in course 135B, and third act in course 135C. Letter grading.

140. Interactive Expression. (4) Lecture, six hours. Introduction to history and practice of interactive me- dia, with emphasis on uniqueness of computer-medi- ated expression. Letter grading.

C143. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of differ- ent ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this pro- duction environment. Students conceive and produce a number of short films. Concurrently scheduled with course C243. Letter grading.

C144. Interactive Multimedia Authoring. (4) Lecture, three hours; laboratory, three hours. Introduction to exploring and graduate selected potential and unique digital media and its theoretical issues. Exploration of methodologies and tools for media integration, inter- face design, and interactive audiovisual construction. Students conceive, produce, and master individual in- teractive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C244. Letter grading.

C148. Advanced Digital Media Workgroup. (4) Dis- cussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experi- ence, course provides opportunity to create larger- scale digital media works with advanced software tools and techniques in small process-oriented, cre- ative workshop environment. May be repeated once for credit. Concurrently scheduled with course C248. Letter grading.

C149A-C149B. Music in Film: Another Way to Tell Stories. (4-4) Lecture, three hours. Course C149A is requisite to C149B. Exploration of concepts and is- sues that drive creation and use of music in film. Through lecture/discussion and practical assignments, examination of deep collaboration between filmmaker and composer. Viewing of noteworthy examples and following of collaboration of filmmakers with compos- ers, with weekly sessions dedicated to templing, cre- ation and development of new scores, studio visits, and creative/conceptual dialogue between musician and filmmaker. Ready for templing by end of first quarter and ready for scoring at beginning of second quarter. Concurrently scheduled with cours- es C455A-C455B. Letter grading.

150. Cinematography. (4) Lecture, three hours; lab- oratory, three hours. Limited to Film and Television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in pho- tography to complement material covered in lecture.

151. Introduction to Experimental Filmmaking. (4) Lecture, three hours; laboratory, to be arranged. Lim- ited to Film and Television majors. Techniques of im- age manipulation, design, and art direction. Produc- tion and completion of microfilm (no longer than three minutes), using 16mm nonsync sound film. May be repeated twice for credit. Letter grading.

152. Film and Television Sound Recording. (4) Lecture, three hours; laboratory, to be arranged. Lim- ited to Film and Television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.

C152C. Digital Audio Postproduction. (4) Lecture, three hours; laboratory, three hours. Limited to de- partmental majors. Through discussion, demonstra- tions, and laboratory assignments, exploration of digi- tal audio tools and procedures available to today’s filmmakers. Coverage of many technical, equipment, and software step-by-step, with emphasis on cre- ative process. Concurrently scheduled with course C452C. Letter grading.

153. Motion Picture Lighting. (4) Lecture, three hours; laboratory, three hours. Requisite: course 150. Limited to Film and Television majors. Introduction to principles and tools of lighting used in visual storytell- ing through lectures, discussions, and screenings. Creative lighting techniques covering topics such as people, environment, spatial relationships, move- ment, color, special effects, and continuity.

154. Film Editing. (4) Lecture, three hours; laborato- ry, to be arranged. Limited to Film and Television ma- jors. Introduction to and practical problems of film editing, with practical experience in editing of im- age and synchronous sound.

C154B. Advanced Film Editing. (4) Lecture, three hours; laboratory, one hour. Preparation: submission of a proposal to edit significant scene given to them by instructor. Concurrently scheduled with course C454B. Letter grading.

155. Introduction to Digital Media and Tools. (4) Lecture and laboratory, to be arranged. Limited to Film and Television majors. Instruction and exercis- es in basic concepts and software of virtual produc- tion environments and digital postproduction tools. Letter grading.

163. Directing the Camera. (4) Workshop, eight hours. Limited to Film and Television majors. Investi- gation of expressive potential of the image within and beyond the narrative from a directorial perspective. Experiments with working methodologies which stim- ulate visual creativity and positioning the image as the fundamental element of cinematic expression.

164. Directing the Actor. (4) Exercises in analysis of script and character for purpose of directing actors. Emphasis on eliciting believable performance from the actor. May be repeated twice for credit.

165. Advanced Narrative Television Directing. (4) Laboratory, six hours. Requisites: courses 130B, 185. Limited to Film and Television majors. Supervised excer- cises in television multicamera direction, with emphasis on use of camera, sound, composition, and communication with those in front of and be- hind the camera. May be repeated twice for credit.

C168. Creative Location Film Production. (8) Lect- ture, four hours; discussion, four hours; laboratory, to be arranged. Limited to directing or producer’s pro- gram students. Problems of location, production, di- rection, and cinematography in various “real-life” prac- tical locations. Practical application of solving prob- lems and communication within limitations of production experience. Concurrently scheduled with course C468. Letter grading.

C170A. Introduction to Digital Effects. (4) Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, composing, effects processing, and title sequences. Concurrently scheduled with course C470A. Letter grading.

175A-175B. Undergraduate Film Production: August-October. (4-4) Limited to Film and Television majors. 175A. Lecture, four hours; laboratory, two hours. Writing, pre- production, and production for a short 16mm nonsyn- ch film. 175B. Lecture, three hours; laboratory, eight hours. Completion of postproduction (editing, creation of nonsync sound tracks) for short film begun in course 175A.

175A-175B. Advanced Undergraduate Video Pro- duction: August-October. (4-4) Discussion, three hours; laboratory, to be arranged. Requisite: course 185. Limited to Film and Television majors. Completion of a video production (no more than 20 minutes), including its writing, production, and editing. Letter grading.

M177. Film and Television Acting Workshop. (2) (Same as Theater M178.) Laboratory, four hours. Workshop providing opportunities for students to re- hearse, perform, and evaluate scenes. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camer- a experience. May be repeated twice for credit. Let- ter grading.

178. Film and Television Production Laboratory. (2 or 4) Limited to Film and Television majors. Film modules in supervised labo- ratory experience in various aspects of film and televi- sion production. May be repeated for a maximum of 12 units, but only 8 units may be applied toward Film and Television major.

181B. Writing for Animation. (4 to 8) Lecture, six hours; laboratory, to be arranged. Requisite: course 181A. Research and practice in creative writing and planning for animated film. May be repeated for a maximum of 16 units.

181C. Animation Workshop. (4 or 8) Lecture, six hours; laboratory, to be arranged. Preparation: storyboarding at film class meeting. Requisite: course 181A. Organization and integration of various creative arts used in animation to form a complete study of a selected topic. May be repeated for a maximum of 16 units.

184. Overview of Contemporary Film and Television Industries. (4) Lecture, three hours. Examination of evolving economic structures and business practices in contemporary Hollywood film and television industries, with emphasis on operations of studios and television networks and business relationships with creative systems, and their relationship to independent producers, talent, and agencies. Letter grading.

185. Undergraduate Television and Video Production. (6) Laboratory, six hours. Limited to Film and Television majors. Viewing and discussion of selected documentaries and instruction in various production skills necessary to create projects. Preparation: course 181A. Laboratory: three hours. Laboratory: three hours (additional hours to be arranged). Letter grading.

186. Introduction to Documentary Video Production. (4) Lecture, three hours. Nearly 12 hours. Limited to Film and Television majors. Through discussions, screenings, and student projects, emphasis on creative and critical practice. Letter grading.

187A-187B-187C. Producing and Directing Remote Multimedia Productions. (4-6-7) Lecture/lab oratory, three hours (additional hours to be arranged). Letter grading.

187A. Professionally oriented lecture/laboratory/field workshop course designed to provide discipline-specific leadership and organizational and problem-solving skills required in deadline remote production. Emphasis on clarity of vision, storytelling, effective execution of pitch, preproduction, shoot, and editorial. 187B-187C. Instruction and supervised productions of the remote experience, with focus on development and execution of concept. Experience closely patterned after professional experience, with talent attraction, production venues, and production logistics of remote on-location video programs.

188A. Special Courses in Film, Television, and Digital Media. (2 to 8) Lecture, four hours; discussion, one hour. Special topics in film, television, and digital media for undergraduate students that are taught on experimental or temporary basis. May be repeated for credit. P/N/P or letter grading.

188B. Introduction to Art and Technique of Filmmaking. (4) Lecture, four hours; discussion, one hour. Students acquire understanding of practical and aesthetic challenges undertaken by artists and professionals in making of motion pictures and television. Examination of film as both art and industry: storytelling, sound and visual design, casting and performance, editing, finance, advertising, and distribution. Exploration of American and world cinema from filmic, historical, cultural, and critical practice. Letter grading.

188C. Design and Experimental Digital Film Production. (4) Lecture, three hours; discussion, one hour. Students conceive, write, polish, shoot, and edit short digital experimental movies and crew on classmate projects. Experimental sound, source, and montage; examination of scenes from feature films and experimental short subjects. By end of term, students have one- to three-minute digital films with titles and sound tracks. P/N/P or letter grading.

188D. Film Editing: Overview of History, Technique, and Practice. (4) Lecture, three hours. Practical application of film editing techniques, how they have evolved, and continue to evolve. Examination of history of editing, as well as current editing trends, terminology, and workflow. P/N/P or letter grading.

188E. Digital Cinematography. (4) Lecture, three hours. With lectures, screenings, and demonstrations, study of historical, technical, and aesthetic principles of digital cinematography. How tools and techniques affect visual storytelling process. Topics include formats, aspect ratios, cameras, lenses, special effects, internal menu picture manipulation, lighting, composition, coverage, high definition, digital exhibition, multi-camera shooting. P/N/P or letter grading.

188F. Hollywood Now! (8) Lecture, eight hours; discussion, one hour. Hollywood filmmaking from the 1940s to present, industry interrelated organizational, technological, demographic, narrative, ideological, and aesthetic foundations, Hollywood is dynamic industry marked by contradictory forces of stability and change, and innovation. Examination of emergence of new paradigms, narratives, genres, styles, and modes of address as they are developed by new generation of filmmakers and targeted at new kinds of audiences that are increasingly younger and more global, as illustrated by Hollywood's new star directors: David Fincher, Steven Soderbergh, Paul Thomas Anderson, Quentin Tarantino, Alexander Payne, Wes Anderson, George Clooney, Sofia Coppola, and others. P/N/P or letter grading.

188G. Asian Action Films. (8) Lecture, eight hours; discussion, one hour. Historical, cultural, and critical survey of action film genre from Hong Kong, Taiwan, Japan, and South Korea. Popularity of East Asian action films created new genre that combines themes of American action film, emphasizing spectacle over narrative, with philosophies and action styles of East Asia that produce these films. Exploration of circulation of national-popular traditions within international contexts. Study of more enduring, exciting subgenres and national specialties of genre that have shaped cinematic production and achieved success beyond Asia, including kung fu and other martial arts films, yakuza or gangster films, and flying swordman films. How gender and race shape action cinema, as Bruce Lee, Jackie Chan, and Michelle Yeoh. Examination of issues of industry, authorship, and producers/directors such as Shaw Brothers, Seijun Suzuki, Tsui Hark, King Hu, and John Woo. P/N/P or letter grading.

188I. Writing for Animation Series. (5) Lecture, three hours. Introduction to craft and business of writing animation for television. Overview of history of animation produced specifically for this medium, along with its many formats. Business model has changed radically over past five decades, as have types of shows that have been created. Designed to put showrunners in historic settings, with eye toward where industry is heading given changes in technology and continuing (and growing) scrutiny of outside forces such as corporatization and FCC. Letter grading.

188J. Disney Feature: Then and Now. (5) Lecture, three hours; discussion, three hours. Study and analysis of Disney's animated features. Evaluation of why Disney's animated features have dominated until recently and ramifications of this dominance on animation and society. Letter grading.

188K. Visual Effects. (4) Lecture, three hours. Nearly every film employs some form of visual effects, whether in constructing backdrop of history, creating futuristic or fantasy world, or simply fixing weather or production problems. Exploration of evolution of visual effects, as well as problems and blessings inherent in constantly evolving technology. Top visual effects consultants to be guest lecturers for letter grading.

188M. Film and Television Directing. (4) Lecture, three hours. Through discussions, screenings, demonstrations, and guest presentations, exploration of script, previsualization, directing actors, directing camera coverage in relationship to set design, and directing for camera. P/N/P or letter grading.

188N. History of Animation in American Film and Television. (5) Lecture, six hours. Survey of art of animation in America from its precursors to recent films of Disney, Pixar, DreamWorks, Gibbi, and others. Place of animation in pop culture, racial imagery and ethnic stereotypes, growth of art form, and how it reflects American society. P/N/P or letter grading.

193A. Film Curatorship. (4) Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching.

193B. Television Curatorship. (4) Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of television curatorial and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching.

194. Internship Seminars: Film, Television, and Digital Media. (2 to 8) Seminar, two hours. Corequisite: course 195. Open to juniors/seniors who are interning in film or television industry and to nonmajors. Nonmajors must complete application in Internship Office, 203 East Melnitz Building, to be considered. Discussion of contemporary industry issues and practices. May be repeated for credit. Letter grading.

195. Corporate Internships in Film, Television, and Digital Media. (2 to 8) Lecture, three hours; fieldwork, 14 or 20 hours. Corequisite: course 194. Limited to juniors/seniors. Nonmajors must complete application in Internship Office, 203 East Melnitz Building, to be considered. Corporate internship in supervised setting in business related to film and television industries. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit with supervised faculty member required. Letter grading.

199. Directed Research or Senior Project in Film, Television, and Digital Media. (2 to 8) Tutorial, three hours. Limited to senior Film and Television majors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be taken for maximum of 8 units. Individual contract required. P/N/P or letter grading.

Graduate Courses

200. Seminar: Bibliography and Methods of Research in Film and Television. (6) Seminar, three hours; laboratory, four to six hours (additional screenings and/or video laboratory work as required). Designed for graduate students. Examination and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, compiling database searching and retrieval and, when appropriate, use of computer/video/editing technology for research. Letter grading.

201. Seminar: Media Industries and Cultures of Production. (6) Seminar, three hours; film screenings, three hours. Theory and method in study of media industries, with focus on cultures of production (production world as cultural form). Investigation of ways production practice itself is sociological, institutional, cultural, and critical practice. Letter grading.

203. Seminar: Film and Other Arts. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies in interactions between film and fine arts, performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit.
204. Seminar: Visual Analysis. (6) Seminar, three hours; film screenings, two to four hours. Study of visual analysis (or textual analysis), using DVD accessing features to learn what makes film great and distinct art form. Exploration of role of visual style in narrative fiction filmmaking to attempt to understand some ways it can operate. Letter grading.

205. Seminar: DVD for Film History and Analysis. (6) Seminar, three hours; laboratory, three hours. Preparation of individual original research projects in film and/or television history and analysis designed to be presented in DVD format. Projects may be extensions of work intended for print publication or dissertation writing, or for pedagogical uses. Equal emphasis on research and DVD creation, and on concepts and applications in DVD format versus print publication. Letter grading.

206A. Seminar: European Film History. (6) Seminar, three hours; film screenings, four to six hours. Required. Course 106B. Designed for graduate students. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neorealism, New Wave, etc. May be repeated twice for credit.

206B. Seminar: Selected Topics in American Film History. (6) Seminar, three hours; film screenings, three hours. Focus on a specific topic or period in American film history. Letter grading.

206C. Seminar: American Film History. (6) Seminar, three hours; film screenings, four hours. Introduction to social, political, and aesthetic history of the American film. Letter grading.

206D. Seminar: Silent Film. (6) Seminar, three hours; film screenings, two to four hours. Discussion of silent film from its beginning in 1895 to transition to sound cinema in 1927 to 1930. Film viewings discussed in terms of genre, national cinema, formal developments, and directors. Readings on film historical and theoretical issues. Letter grading.

207. Seminar: Experimental Film. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of form, style, politics, and history of experimental, innovative, avant-garde, and minority film and video.

208A. Seminar: Film Structure. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture. SU or letter grading.

208B. Seminar: Classical Film Theory. (6) Seminar, three hours; film screenings, four hours. Study of principal topics and lines of inquiry that characterize theoretical writings of Arunde, Eisenstein, Bazin, Kracauer, etc. Letter grading.

208C. Seminar: Contemporary Film Theory. (6) Seminar, three hours; film screenings, four to six hours. Requisite: course 208B. Designed for graduate students. Study of redefinition of aims and methods of film theory through contemporary writings. SU or letter grading.

209A. Seminar: Documentary Film. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Nonfictional film and its relation to contemporary culture.

209B. Seminar: Fictional Film. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Film as fiction and its relation to contemporary culture. May be repeated once for credit.

209D. Seminar: Animated Film. (4) Seminar, three hours; laboratory, three hours. Designed for graduate students. Critical study of animated film: its historical development, structure, style, use, and relation to contemporary culture. May be repeated once for credit.

210. Seminar: Contemporary Broadcast Media. (4) Seminar, three hours (additional hours as required). Designed for graduate students. Consideration of issues raised by relations of cinema and radio, cinema and public, associated with innovations in satellite, cable, and cartridge systems. Letter grading.

211A. Seminar: Historiography. (4) Seminar, three hours. Limited to Film and Television M.A. candidates. Beginning examination of major approaches and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

211B. Seminar: Historiography. (4) Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of function and methods of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought on the media.

215. Seminar: Theory and Method. (6) Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, auteurism, semiotics, psychoanalysis, sociol., etc. SU or letter grading.

217A. Seminar: American Television History. (6) Seminar, three hours; screenings, four hours. Critical survey of U.S. television industry from its inception to present. Examination of programming and changes within industry by considering range of technological, economic, aesthetic, social, and cultural dimensions. Letter grading.

217B. Seminar: Selected Topics in Television History. (6) Seminar, three hours; screenings, three hours. Advanced critical seminar, with focus on specific topic or area (historical period, industry, programmatic, genre, production in domestic or international television. Letter grading.

218. Seminar: Culture, Media, and Society. (6) Seminar, three hours; screenings/discussion, four hours. Emphasis on "discourse of the other(s):" The-matization of the other is concerned with theories of "difference rather than similarity or identity — with how other cultures enter into politics of representation and representation of politics through metaphors of (1) difference without opposition, (2) heterogeneity without hierarchy, and/or (3) otherness without ethnocentrism. Examination of how women, national minorities, and Third World peoples have been rendered other; place of cinematic apparatus in this process and how academization of others is positioned vis-à-vis mainstream critical discourse. Letter grading.

219. Seminar: Film and Society. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of ways film affects and is influenced by social, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

220. Seminar: Film and Society. (6) Seminar, four hours; screenings/discussion, three hours. Designed for graduate students. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit. SU or letter grading.

221. Seminar: Film Authors. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

222. Seminar: Film Genres. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

223. Seminar: Visual Perception. (6) Seminar, three hours; film screenings, three hours. Aesthetic, psychophysical, physiological, and phenomenological approaches to vision as they relate to ways in which viewers experience "real" film, television, and digital media. Letter grading.

224. Computer Applications for Film Study. (6) Lecture, three hours; film screenings, three hours. Survey of computer applications relevant to film study, principally color, digital systems, and image capture technology. SU or letter grading.

225. Seminar: Videogame Theory. (6) Seminar, three hours; laboratory, three hours. Videogame theory, with attention of either to the history of videogames or the history of film. Letter grading.

CM229. Contemporary Topics in Theater, Film, and Television. (2) (Same as Theater CM229) Lecture, two hours; screenings, two hours. Limited to junior, senior, and graduate theater and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctions and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated twice for credit. Concur- rently scheduled with course CM129.

C242. Digital Imagery and Visualization. (4) Lecture, three hours; laboratory, three hours. Introduction hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image visualizations. Concurrently scheduled with course C142. Letter grade.

C243. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects. Concurrently scheduled with course C143. Letter grade.

C244. Interactive Multimedia Authoring. (4) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interaction design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C144. Letter grading.

C245. Creative Authoring for World Wide Web. (4) Lecture, three hours; laboratory, three hours. Exploration of creative aspects of World Wide Web as medium for individual and collaborative projects. Students produce Web works and serve them online. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences. May be repeated once for credit. Concurrently scheduled with course C145. Letter grading.

246. Seminar: Issues in Electronic Culture. (6) Seminar, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores impact of new digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools. Letter grading.

C248. Advanced Digital Media Workshop. (4) Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in small project-oriented, creative workshop environment. May be repeated once for credit. Concurrently scheduled with course C148. Letter grading.
287A. Introduction to Art and Business of Producing I (4). Seminar, three hours. Introduction for first-year graduate students to producer’s role in navigating unique dynamic between art and commerce in entertainment industry. Overview of development, production, and distribution of feature films for worldwide theatrical market, including identifying major players, talking to executive produces, and understanding basics of studio and independent financing and distribution. S/U or letter grading.

287B. Introduction to Art and Business of Producing II (4). Seminar, three hours. Requisites: course 287A. Builds on principles taught in course 287A and presents continuation of study of development, production, and distribution of feature films for worldwide theatrical market, including identifying major players, talking to executive producers, and understanding talent elements, and understanding basics of studio and independent financing and distribution. Minimum of two unproduced screenplays to be presented for review by class and instructor to begin identifying potential thesis projects. S/U or letter grading.

287C. Introduction to Art and Business of Producing III (4). Seminar, three hours. Requisites: courses 287A, 287B. Builds on principles taught in courses 287A and 287B. Three unproduced screenplays prepared in course 287B for review by class and instructor with goal of isolating and identifying primary and secondary thesis projects. Discussions of script analysis, casting, and preparation of proposal for primary projects. Completion of outlined outline for original projects and pitching of primary projects to panel of industry executives for further feedback. S/U or letter grading.

288A-288B-288C. Feature Film Development I, II, III (4-4-4). Lecture, three hours. Three unproduced feature screenplays required. Through in-class discussions, script analysis, and production of feature film screenplays, students will explore the creative process of feature film development and production. S/U or letter grading. 288B. Deeper evaluation of screenplay through writing of story notes. S/U. Through reading, script analysis, and group discussions, students develop and understand screenplay writing as a craft and learn how to evaluate screenplays and identify potential projects for development.

289A-289B-289C. Independent Spirit: Creative Strategies for Developing, Writing, Producing, and Marketing Independent Feature Films (4-4-4). Lecture, three hours. Three unproduced screenplays required. Through in-class discussions, script analysis, and production of feature film screenplays, students will explore the creative process of feature film development and production. S/U or letter grading. 289B. Strategy. (4). Lecture. Three hours. Course 289A is not required to 289B. Examination of business realities of industry. Focus on techniques for analyzing behavior, making strategic decisions, and overcoming obstacles to achieving results as producer, writer, or director. Assignments designed to assist students in understanding the tools of their trade and preparing themselves for the competitive independent film industry. S/U or letter grading.

292A. Overview of Network Television Management (4). Lecture, three hours. Designed to expand basic understanding of network and cable television business. Exploration of role of showrunner, executives from networks and production companies, packaging agents, and studios responsible for developing and creating programming. S/U or letter grading.

292B. Who Produces Television? Showrunner, Nonwriting Producer, Network Executive, Studio Executive, or Agent? (4) Lecture, three hours. Course 292A is not required to 292B. In-depth look at role of key individuals in getting television shows on air. Discussion of readings, lectures, and distinguished guests from each area of television industry: networks, studios, agencies, and production companies. S/U or letter grading.

292C. Running Shows: Producing for Broadcast and Cable (4). Lecture, three hours. Course 292B is not required to 292C. Exploration of role of writers-producers or showrunners in creating television shows. Designed to train writers who typically enter field as staff writers and to develop concrete tools of producers. Training of next generation of nonwriting network and studio development executives whose job it is to shepherd projects and pitch story meetings. Students must master navigating the unique dynamic between art and commerce in television industry. Overview of development, production, marketing, distribution, and new technologies. Written and oral presentation of project that may be argued for truly independent filmmaker. S/U or letter grading.
294A. Contracts and Negotiation. (4) Lecture, three hours. Survey of range of contracts involved in studio productions, including literary submission and option agreements, assignments, employment, writer collaboration agreements, coproduction agreements, music rights license, etc. Actual studio agreements referenced to illuminate potential consequences of negotiation strategy exercises. S/U or letter grading.

294B. Entertainment Law, Business Practices, and Negotiation Strategies. (4) Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Conception and design of nonfictional film imagery. One-minute experiments in the relationship of meaning to technical assistant, assoicate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

401. Film Analysis for Filmmakers. (4) Lecture, three hours. Limited to film and television students. Drawing heavily from array of historical examples, examination of many expressive strategies useable in creation of moving image art forms. Utilizing theory and practice, presentation of approach to viewing great films of past that empowers filmmakers to use sound and images to tell original stories in present. Focus on strategic decision making in all aspects of filmmaking, including manipulation of optics, photochemistry, elements of electronic processes, and display of time and motion. May be repeated once for credit.

402A. Art of Presentation. (4) Lecture, three hours. Cultivation of skills needed for students to present themselves and their project goals with clarity and precision to industry professionals. Oral presentations designed to enhance student ability to deliver convincing argument on range of topics. S/U or letter grading.

295B. Advanced Film and Television Producing Workshop for Producers, Writers, and Directors. (4) Lecture, three hours. Course 295A is not requisite to 295B. Designed to help producers, as well as screenwriters and directors, focus on networking opportunities and to develop strategies to bring their feature and television projects to marketplace. Case-study documents (detailed screenplays, dailies, etc.) from current or recently produced projects provided. S/U or letter grading.

295C. Advanced Producing: Role of Successful Producer. (4) Lecture, three hours. Designed to provide producers with comprehensive understanding of business acumen involved in purchasing scripts for studios and independent production companies. Through script analysis and in-class discussions, students examine how to guide not only their own productions, but marketing assets inherent in pieces of material. S/U or letter grading.

296A. Role of Talent Agencies. (4) Lecture, three hours. Introductory overview of various departments at talent agencies and their role in the entertainment industry, film, television, and new media. Exercises encourage producers, writers, and directors to learn how to work effectively with individuals at talent agencies. S/U or letter grading.

296B. Who Represents Me? (4) Lecture, three hours. Course 296A is not requisite to 296B. In-depth analysis of different forms of representation offered by agents, managers, business managers, and lawyers and detail of legal rights and responsibilities of each. Exercises require students to represent right holders in series of potential projects. S/U or letter grading.

297A-297B-297C. New Media Marketing I, II, III. (4-4-4) Seminar, three hours. Course 297A is requisite to 297B, which is requisite to 297C. Overview of changing world of storytelling through development of new technologies and media. Development of short teaser/trailer or website using digital resources (digital cameras, editing, and new media effects) to promote student feature or television thesis project. S/U or letter grading.

298A-298B. Special Studies in Film and Television. (2 to 4 each) Lecture/discussion. Designed for graduate students. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice performer relationship of meaning to technical assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

402B. Cinematography. (4) Lecture, three hours; laboratory, four hours; fieldwork, to be arranged. Limited to graduate film and television students. Production of a 12- to 15-minute fiction film project or project. Letter grading. 402A. Laboratory, six or 12 hours; fieldwork, to be arranged. Requisites: courses 402B, 416B, 416C. Students budget and preproduce their projects by end of first term. 402B. Laboratory, 12 hours; fieldwork, to be arranged. Requisite: course 402A. In second term students must complete photography on location and/or in studio.

402C. Advanced Narrative Directing Workshop. (4) Laboratory, four hours. Requisites: courses 402A, 402B. Completion of project started in courses 402A and 402B. Letter grading.

403A-403B-403C. Advanced Documentary Workshops. (4 or 8-8-8) Limited to nine graduate film and television students. Production of a 10- to 15-minute fiction film or project. Letter grading. 403A. Laboratory, six or 12 hours; fieldwork, to be arranged. Requisites: courses 402A, 402B, 410A, 410B, 410C, 433. Limited to graduate film and television students. Production of advanced individual documentary film or video project. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

404A-404B. Advanced Abstract/Experimental Media Workshops. (8-8) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Limited to 10 students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

404C. Advanced Abstract/Experimental Media Workshop. (8) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 404A, 404B. Completion of all stages of production and postproduction on projects started in courses 404A and 404B. Letter grading.

405. Television Production Workshop. (8) Laboratory, eight hours; other, to be arranged. Limited to graduate film and television students. Basics of television production and direction, focusing on studio multigenerational designs of television production. Use of various formats of video production, including scripted and nonscripted projects, culminating in a narrative three-camera project.

406. Experimental Video Workshop. (4) Laboratory, six hours; other, to be arranged. Limited to graduate film and television students. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

407. Video Documentary Workshop. (8) Laboratory, 12 hours. Limited to graduate film and television students. Production of nonfiction film project. Students will screen a variety of international works and produc- ing a short documentary project using single-camera field production techniques.

408A-408B. Video Editing. (4-4) Discussion and laboratory. Four hours; laboratory, to be arranged. Limited to graduate film and television students. Individual instruction in electronic editing. 408A. Online Editing. 408B. Offline Editing.

409. Directing the Actor for the Camera Workshop. (4) Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Limited to M.F.A. production program students. Team-taught with five weeks designed to give the director actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

410A. Symposium. (2) Seminar, three hours. Limited to and required of first-year M.F.A. production program students. Exploration of principal concepts of film and television production within context of preproduction, production, and postproduction, providing filmic prototype of knowledge in first-year technical craft courses. Exploration of strategies for learning production within academic environment. May be repeated for credit. S/U grading.

410B. Cinematography. (2) Seminar, three hours. Limited to and required of first-year M.F.A. production program students. Production workshop designed to give hands-on experience in all aspects of film/television production (tools and practicum of medium) as each student writes/directs/edits six-minute film. May be repeated for credit. Letter grading.

410C. Postproduction Sound. (2) Seminar, three hours. Limited to and required of first-year M.F.A. production program students. Production workshop designed to give hands-on experience in all aspects of film production (tools and practicum of medium) as each student writes/directs/edits six-minute film. May be repeated for credit. Letter grading.

410D. Postproduction Sound. (2) Formerly numbered 298A.) Seminar, three hours. Requisites: courses 405, 409. Limited to and required of first-year M.F.A. production program students. Technical and aesthetic aspects of postproduction sound recording, editing, and re-recording for film and television. Application of principles of sound design to student films within using UCLA’s John Candy Room and Scoring Stage for Automatic Dialogue Replacement (ADR), Foley, and mixing. Use of Pro Tools LE for recording, editing, and mixing, selection and use of microphones and mixing consoles, and incorporation of Final Cut Pro soundtracks into mix environment. Students record ADR and Foley and present mix of edited dialogue/ADR, Foley, sfx, and music tracks by end of term. Letter grading.

410E. Production. (12) Lecture, three hours; fieldwork, 24 to 40 hours. Requisites: courses 401, 409, 410A through 410D. Limited to and required of first-year M.F.A. production/directing students. Designed to give hands-on experience in film production. Students prepare and direct six-minute films and serve in presigned crew positions for each other. Letter grading.

411. Survey of Multimedia Production. (4) Lecture, three hours; laboratory, three hours. Introduction to various methods of digital production, with focus on photo manipulation, desktop nonlinear postproduction, and distribution on World Wide Web. Letter grading.

417. Lighting for Film and Television. (4) Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Lectures, supervised exercises on a stage or in an exterior setting, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit. Letter grading.

418. Cinematography and Directing. (4) Lecture, two hours; laboratory, six hours. Requisite: course 417. Limited to graduate film and television students. Supervised filming of short dramatic projects on sound stage and at exterior locations that explore complexity of process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects. Letter grading.

419. Advanced Cinematography. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 417, 418. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.

423A. Direction of Actors for Film and Television. (4) Lecture, four hours; workshop. Preparation: first film project. Limited to graduate film and television students. Advanced study and practice of directing actors before a camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

431. Introduction to Film and Television Screenwriting. (4) Lecture, three hours. Limited to graduate film and television students. Introductory course in processes of screenwriting and dramatic writing.

433. Writing the Short Screenplay. (4) Lecture, three hours. Limited to and required of first-year M.F.A. production program students. Concept, development, and writing of a six-minute dramatic film script to be produced in courses 410A, 410B, 410C. Letter grading.

435. Advanced Writing for Short Film and Television Screenplays. (4) Discussion, three hours. Requisite: course 410C. Limited to graduate film and television students. Concept, development, and writing of filmic dramatic script to be produced as an advanced or thesis project. Letter grading.

437. Nontheatrical Writing for Film and Television. (4) Discussion, three hours. Limited to graduate film and television students. Concept, development, and writing of filmic dramatic script to be produced as an advanced or thesis project. Letter grading.

451. Advanced Design for Film and Television. (4) Laboratory, two hours; lecture, three hours. Limited to graduate film and television students. Advanced study and practice of techniques and methods of design for motion pictures. Art direction for advanced workshop productions. May be repeated for a maximum of 12 units.

452A. Film and Television Sound Recording. (4) Lecture, three hours; laboratory, four hours. Limited to graduate film and television students. Principles and practices of film and television sound recording, including supervised exercises.

452B. Music Recording Workshop. (4) Lecture, four hours; laboratory, eight hours. Supervised exercises in music recording techniques, with emphasis on special requirements for motion pictures and television.

454A. Advanced Screenwriting. (4) Lecture, three hours; laboratory, one hour. Preparation: submittal of rough cut of existing project or proposal to edit work of another director. Requisite: course 154. Limited to film and television majors. Postproduction phase of project with advanced knowledge of organization and operation of postproduction process. Students may also propose to edit significant scene given to them by instructor. Concurrently scheduled with course C154B. Letter grading.

454C. Advanced Film Editing. Production Pathways. (2 to 4) Lecture, three hours; laboratory, two hours. Limited to departmental majors. Through discussions, development of project, and laboratory assignments, presentation of student film project. Letter grading.

455A-C455B. Music in Film: Another Way to Tell Stories. (4-4) Lecture, three hours. Course C455A is requisite to C455B. Exploration of concepts and issues that drive creation and use of music in film. Through lecture/discussion and practical assignments, examination of deep collaboration between filmmaker and composer. Viewing of noteworthy examples and following of collaboration of filmmakers with composers, with weekly sessions dedicated to temping, creation and development of new scores, studio visits, and creative/collaborative engagement between musician and filmmaker. Preparation of film ready for temping by end of first quarter and ready for scoring at beginning of second quarter. Concurrently scheduled with courses C149A-C149B. Letter grading.

459A-459B. Directing for Film and Television. (4-4) Lecture, three hours. Limited to graduate film and television students. Analysis and exploration of specific scenes, and differences and many similarities in their approach to a story in the same literary material in the film, television, and digital media.

464A-464B. Advanced Film Directing. (8-8) Hours to be arranged. Limited to graduate film and television students. Special problems in direction of fiction and documentary films.

465. Narrative Television Workshop. (8) Laboratory, eight hours. Supervised exercises in television multi-camera direction, with emphasis on creative use of composition and sound, and communication with those in front of and behind the camera. Letter grading.

466A-466B. Advanced Professional Video Workshops. (8-8) Lecture, three hours; laboratory, to be arranged. Requisites: courses 405, 410A, 410B, 410C, 423A. Limited to graduate film and television students. Hands-on projects in working with various interrelated disciplines in a professional production experience, including interaction with students of design and acting from Department of Theater.

468. Creative Location Film Production. (8) Lecture, four hours; discussion, four hours; laboratory, to be arranged. Limited to directing or producer’s program students. Problems of location, production, directing, and cinematography in various “real-life” practical locations. Practical application of solving problems and communication within limitations of production experience. Concurrently scheduled with course C168. Letter grading.

470A. Introduction to Digital Effects. (4) Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C170A. Letter grading.

472. Commercials. (4) Lecture, four hours. Limited to M.F.A. students. Designed to give students opportunity to explore one very specific kind of filmmaking. Through exploration of advertising, students gain knowledge about what kind of work is salable in American and foreign markets and how to work within distinct confines of commercial genre. Letter grading.

475. Film I. (8) Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of film production, including preproduction planning and production of a group short film.

476. Video I. (8) Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of television and video production, including completion of one or more projects.

478. Video II. (8) Discussion, three hours; laboratory, to be arranged. Requisites: courses 185, and 405 or 476. Designed for graduate students. Group experience in video production with each member rotating on crew work in production of individual or collective projects.

480. Timing for Animation. (4) Lecture, three hours; laboratory, three hours. Process of animation timing through lectures and assignments. Letter grading.

482A-482B. Advanced Animation Workshops. (4 or 8 each) Lecture, three hours; laboratory, to be arranged. Requisites: courses 181A, 181B, 181C. Advanced organization and integration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.

483A-483B. Advanced Computer Animation. (4 to 8 each) Lecture, six hours; laboratory, four hours. Requisites: courses 181A, 181B, 482A. Recommended: course 181B. Course 483A is requisite to 483B, which is requisite to 483C. Creation and production of complete and original advanced computer animated film. Letter grading.

484A-484B. Visual Thinking and Organization for Animation. (4 to 5 each) Lecture, four hours; laboratory, four hours. Course 484A is requisite to 484B. Systematic approach to analyzing and communicating two-dimensional and three-dimensional form and applying traditional compositional approaches to animation. May be repeated for a maximum of 16 units. Letter grading.
FOR THE DEGREE OF DOCTOR OF PHILOSOPHY (PH.D.) IN FILM AND TELEVISION

485. Legal Issues in Animation. (4) [Lecture, three hours; laboratory, three hours. Examination of legal issues in animation, including copyright, contracts, constitutional issues in animation, competing rights, employer/employee relationships, and representation in animation. S/U or letter grading.]

486. Directed Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production. (2 to 12) [Preparation for thesis production, four to eight hours. Limited to M.F.A. production program students. Completion of projects in final stages of postproduction may not be repeated.]

488A. Interactive Animation. (4 to 8) [Lecture, six hours; laboratory, to be arranged. Requisites: courses 181A, 181C, 489A. Organization and integration of various creative arts used in animation and interactive media to form complete study of a selected interactive animation project. May be repeated for a maximum of 16 units.]

488B. Advanced Interactive Animation. (4 to 8) [Lecture, six hours; laboratory, to be arranged. Requisite: course 488A. Organization and integration of various creative arts used in animation and interactive animation to form completed project of a selected interactive animation project. May be repeated for a maximum of 16 units.]

489A. Computer Animation in Film and Video. (4 to 8) [Lecture, six hours; laboratory, four to eight hours; other, to be arranged. Preparation: completed animated film. Requisites: courses 181A, 181C. Instruction in and supervised production of computer animation. May be repeated for a maximum of 16 units. Letter grading.]

489B. Production in Computer Animation. (4 to 8) [Lecture, six hours; laboratory, four to eight hours. Requisite: course 489A. Instruction in creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.]

495A. Practice of Teaching Film and Television. (2) [Seminar, three hours. Required of all teaching assistants and associates in critical studies program. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to teaching experience. S/U grading.]

495B. Teaching with Technology in Film and Media Studies. (2) [Seminar, three hours. How to use appropriate technology to become more effective teaching assistants. Pedagogical impact of tools, including course management software, presentation technologies, and Internet. Discussion of technological resources available on campus. Use of unfamiliar tools to gain confidence in ability to incorporate new technologies in teaching. S/U grading.]

496. Practice of Teaching Film and Television. (2) [Discussion. Required once of all teaching assistants and associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated once. S/U grading.]

498. Professional Internship in Film and Television. (4, 8, or 12) [Full- or part-time at a studio or on a professional project. Designed for M.F.A. program advanced students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their respective specialties. Given only when projects can be scheduled.]

501. Cooperative Program. (2 to 8) [Preparation: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC, S/U grading.]

504A. Directed Individual Studies: Research. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

506A. Directed Individual Studies: Writing. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

596A. Directed Individual Studies: Research. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

596B. Directed Individual Studies: Writing. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

596C. Directed Individual Studies: Designing. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

596D. Directed Individual Studies: Acting. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

596E. Directed Individual Studies: Production. (2 to 12) [Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.]

598. M.A. Thesis in Film and Television. (2 to 12) [Hours to be arranged. Preparation: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be taken for a maximum of 12 units. S/U grading.]

599. Ph.D. Dissertation in Film and Television. (2 to 12) [Hours to be arranged. Preparation: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated. S/U grading.]

FOREIGN LITERATURE IN TRANSLATION

Scope and Objectives

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.

Foreign Literature in Translation

Course List

Africaks (Germanic Languages)
40. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Preapartheid Era to Present

Ancient Near East (Near Eastern Languages)
150A-150B-150C. Survey of Ancient Near Eastern Literatures in English

Arabic (Near Eastern Languages)
150. Classical Arabic Literature in English

Armenian (Near Eastern Languages)
150A-150B. Survey of Armenian Literature in English

Asian (Asian Languages)
151. Buddhist Literature in Translation

Bulgarian (Slavic Languages)
154. Survey of Bulgarian Literature

Chinese (Asian Languages)
C150A. Lyric Traditions

50B. Traditional Narrative and Drama

151. Chinese Literature in Translation: Modern Literature

152. Topics in Contemporary Chinese Literature and Culture

153. Chinese Immigrant Literature and Film

Classics

40W. Reading Greek Literature: Writing-Intensive

41W. Reading Roman Literature: Writing-Intensive

137. Ancient Lives: Art of Biography

140. Topics in History of Greek Literature

141. Topics in History of Latin Literature

142. Ancient Epic

143A. Ancient Tragedy

143B. Ancient Comedy

144. Topical Studies in Ancient Culture

150A. Female in Greek Literature and Culture

150B. Female in Roman Literature and Culture

162. Classical Myth in Literature

163. Ovid and Consequences

Comparative Literature

All undergraduate courses

Czech (Slavic Languages)
155. Survey of Czech Literature from Middle Ages to Present

Dutch (Germanic Languages)
113. Modern Dutch and Flemish Literature in Translation

English
108A-108B. English Bible as Literature

108C. English Bible as Literature: Special Topics

111A. Oral Tradition

111D. Celtic Mythology

111E. Survey of Medieval Celtic Literature

111F. Celtic Folklore

French (French and Francophone Studies)
112. Medieval Foundations of European Civilization

160. Francophone Cultures in English

161. French and Francophone Theater in Translation

164. French and Francophone Novel in Translation

166. French and Francophone Autobiography in Translation

167. French and Francophone Intellectual History in Translation

172. Francophone Cinema and Literature in Translation

191A. Variable Topics Research Seminars in Translation

German (Germanic Languages)
50A-50B. Great Works of German Literature in Translation

55. City as Text: German Exile Culture in Los Angeles

55W. German Exile Culture in Los Angeles

56. Figures Who Changed World

57. Hollywood and Germany

58. Knights and Ladies, Sex and Power at Medieval Court

59. Holocaust in Film and Literature

60W. War

61A-61D. Transatlantic Culture: Modern City in Central Europe

62W. Technoscience and German Culture

M70. Origin of Language

100A. German History and Culture before 1500

100B. German History and Culture, 1500 to 1914

100C. War, Politics, Art

102A-102B. German Film in Cultural Content
Cultures

50, 50W. Introduction to Scandinavian Literatures and Epic
124C-124T. Studies in Russian Literature
120. Literature and Revolution
M118. History of Russia, Origins to Rise of Muscovy
152. Survey of Romanian Literature
Romanian (Slavic Languages)
ture in Translation
40A-40B. Portuguese, Brazilian, and African Literature in Translation

Japanese (Asian Languages)
C150. Topics in Japanese Literature and Philosophy
151. Japanese Literature in Translation: Modern
154. Postwar Japanese Culture through Literature
M156. Literature and Technology

Jewish Studies (Near Eastern Languages)
75. Modern Hebrew Literature Made into Film
M150A-150B. Hebrew Literature in English
M151A-151B. Modern Jewish Literature in English

Korean (Asian Languages)
150. Korean Literature in Translation: Classical
151. Korean Literature in Translation: Modern

Polish (Slavic Languages)
152A-152B-152C. Survey of Polish Literature

Portuguese (Spanish and Portuguese)
40A-40B. Portuguese, Brazilian, and African Literature in Translation
46. Brazilian Culture and Civilization

Romanian (Slavic Languages)
152. Survey of Romanian Literature

Russian (Slavic Languages)
25, 25W. Russian Novel in Translation
M118. History of Russia, Origins to Rise of Muscovy
119. Golden Age and Great Realists
120. Literature and Revolution
124C-124T. Studies in Russian Literature
125. Russian Novel in Its European Setting
126. Survey of Russian Drama
M127. Women in Russian Literature
128. Russian Science Fiction
C170. Russian Folklore

Scandinavian
40. Heroic Journey in Northern Myth, Legend, and Epic
50, 50W. Introduction to Scandinavian Literatures and Cultures
C131. Introduction to Viking Age
C133A. Saga
138. Vikings
C141A. Theory of Scandinavian Novel
CM144A. Voices of Women in Nordic Literature
C145A. Henrik Ibsen
C145B. Knut Hamsun
C146A. August Strindberg
147A. Hans Christian Andersen
C147B. Saren Kierkegaard
152. Backgrounds of Scandinavian Literature
155. Scandinavian Literature of 19th Century
156. Scandinavian Literature of 20th Century
157. Contemporary Nordic Literature
161. Introduction to Nordic Cinema
163A. Introduction to Danish Cinema
166A. Ingmar Bergman
166C. Carl Dreyer
C171. Introduction to Scandinavian Folklore
C174A. Minority Cultures in Scandinavia
174B. Queer Scandinavia
C180. Literature and Scandinavian Society

Serbian/Croatian (Slavic Languages)
154. South Slavic Literature

Slavic (Slavic Languages)
125. Interwar Central European Prose
126. Postwar Central European Prose

South Asian (Asian Languages)
150. Classical Indian Literature in Translation

Southeast Asian (Asian Languages)
130. Topics in Southeast Asian Literature

Spanish (Spanish and Portuguese)
60A-60B-60C. Hispanic Literatures in Translation

Ukrainian (Slavic Languages)
152. Ukrainian Literature

Yiddish (Germanic Languages)
121A. 20th-Century Yiddish Poetry in English Translation
121B. 20th-Century Yiddish Prose and Drama in English Translation
121C. Special Topics in Yiddish Literature in English Translation

Dominic R. Thomas, Ph.D., Chair
Zrinka Stahuljak, Ph.D., Graduate Studies Director
Lia N. Brozgal, Ph.D., Undergraduate Studies Director

Professors
Jean-Claude Carron, Docteur és Lettres
Patrick J. Coleman, Ph.D.
Eric L. Gans, Ph.D.
Lynn A. Hunt, Ph.D.

Associate Professors
Eleanor K. Kaufman, Ph.D.
Andrea N. Loselle, Ph.D.
Sara E. Meitzer, Ph.D.

Assistant Professors
Lisa N. Brozgal, Ph.D.
Laure Murat, Doctorat en Histoire

Lecturers
Laurence M. Denié, Ph.D.
Nicole I. Dufresne, Ph.D.
Kimberly Jansma, Ph.D.

Alain M. Mabankou, D.E.A.
Allen F. Roberts, Ph.D.
Malina Stefanovska, Ph.D.
Dominic R. Thomas, Ph.D.
Stephen D. Werner, Ph.D.

Scope and Objectives
The Department of French and Francophone Studies is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French and Francophone studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The undergraduate lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The undergraduate upper division program is chiefly devoted to perfecting linguistic skills and to the study of French and Francophone culture and literature. Courses in linguistics and business French are also offered. Students entering a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French and Francophone literature and culture. All three plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program offers both M.A. and Ph.D. degrees and comprises training in the various fields of French and Francophone culture, literature, and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered.

Undergraduate Study
If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

Requisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, or equivalent. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

No credit is allowed for completing a less advanced course after successful completion of a
more advanced course in French grammar and/or composition.

French B.A./French and Linguistics B.A.

Preparation for the Majors
**Required:** French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students who receive a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of the instructor. Students in Plan III must also take Linguistics 20.

Transfer Students
Transfer applicants to the French majors with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of French and one French literature course. Students in Plan III must also complete an introduction to linguistics course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

The Majors

Three plans are offered by the department:

**Plan I: French/ Francophone Studies in Literature and Culture**
Plan I leads to the Bachelor of Arts in French. **Required:** Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least six courses in French and Francophone literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. Two upper division elective courses from outside the department may be substituted in the major program with consent of the undergraduate adviser.

**Plan II: Interdisciplinary French/ Francophone Studies**
Plan II, with emphasis on French and Francophone culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. **Required:** Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least two courses in French and Francophone literature; one additional elective course normally selected from upper division offerings in the department in language, civilization, literature, or the arts; five upper division elective courses in fields relevant to French and Francophone studies to be selected in or outside the department in consultation with the undergraduate adviser.

**Plan III: French and Linguistics**
Plan III leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, students are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Linguistics 20 is required as preparation for the major. **Required:** Twelve upper division courses, including French 100, 101, 102; two courses from 105, 107, 108A, 108B, 109; two courses from 114A, 114B, 114C; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level. If students' knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100, 101, or 102, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French and Francophone Studies Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French and Francophone Studies Department. Freshmen and sophomores may take up to two courses taught in English, selected from French 164 through 167, in fulfillment of major requirements (if taken in the junior or senior year, these courses count as electives). A maximum of 8 units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115 and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form. On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take course 198 where they receive regular personal supervision from a faculty member in the research, methodology, and writing of their approximately 30- to 35-page honors thesis (honors projects and the honors thesis are not to be confused).

Students may begin the honors program toward the end of their junior year or during their senior year. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better. **Required Lower Division Courses (8 units):** French 6 or equivalent and one course from 12, 14, 15, 41, or 60.

**Required Upper Division Courses (20 units):** French 100 or 101, and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, [http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm](http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm). In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of French and Francophone Studies offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in French and Francophone Studies.

French

Lower Division Courses

1. **Elementary French.** (4) Lecture, five hours. P/NP or letter grading.

103. Structure of French. (4) Lecture, three hours. Prior background in linguistics not required. Introduction to linguistic analysis of French in areas of phonology, morphology, syntax, and language variation. P/NP or letter grading.

112. Medieval Foundations of European Civilization. (4) Lecture, three hours; discussion/film screenings, two hours. Medieval texts, culture, social structure, and political history as they lay bases of European modernity. P/NP or letter grading.

114A. Medieval and Renaissance Literature. (5) Lecture, three hours. Requisite: course 12. Masterpieces of medieval and Renaissance literature, including examples of epic (La Chanson de Roland), romance (Chrestien de Troyes’ Yvain), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navare and Montaigne). P/NP or letter grading.

114B. 17th and 18th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of selections from major works of classicism and the Enlightenment, including those by Racine, Pascal, La Fontaine, La Farge, Racine, Voltaire, and Rousseau. P/NP or letter grading.

41. French Cinema and Culture. (5) Lecture, screenings, five hours; discussion, one hour. Introduction to French culture and literature through study of films of cultural and literary significance. P/NP or letter grading.

60. French and Francophone Novel. (5) Lecture, three hours; discussion, one hour. Study of literary masterpieces produced by writers from France and Francophone world (Canada, Africa, Caribbe, etc.) from 17th to early 21st century. P/NP or letter grading.

Upper Division Courses

116. Studies in Renaissance French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of Renaissance French culture and literature, including la Pléiade and 16th-century poetry, linguistic and poetic revolution, novel and early prose, and late French humanism. May be repeated for credit with topic change. P/NP or letter grading.

117. Studies in 17th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 17th-century French culture and literature, including theater, philosophers, moralists, novelists, and cultural, political, social, religious, and courtly aspects. May be repeated for credit with topic change. P/NP or letter grading.

118. Studies in 18th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 18th-century French culture and literature, including satire, novel, theater, philosophers, and theoretical writings. May be repeated for credit with topic change. P/NP or letter grading.

120. Studies in 20th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 20th-century French culture and literature, including early 20th-century writers, surrealism, literature from 1915 to 1945, post-World War II literature, existentialism, new novel, theater, and poetry. May be repeated for credit with topic change. P/NP or letter grading.

121. Studies in Francophone Cultures and Literatures. (4) Lecture, three hours. Taught in French. Study of Francophone cultures and literatures, including works by poets, playwrights, and novelists from Caribbean, North Africa, Quebec, and sub-Saharan Africa, immigrant narratives, and colonialism and postcolonial studies. May be repeated for credit with topic change. P/NP or letter grading.

130. Contemporary French and Francophone Cultures. (4) Lecture, three hours. Requisite: course 12 or 100. Taught in French. Study of contemporary French and Francophone world (Africa, Asia, Caribbean, Quebec), government, institutions, and cultural, economic, social, and political issues. May be repeated for credit with topic change. Letter grading.

134. French and Francophone Novel. (4) Lecture, three hours. Taught in French. Study of major literary movements and works of the period, including works by Hugo, Baudelaire, Balzac, Stendhal, Flaubert, Zola, Gide, Proust, Sartre, Robbe-Grillet, and Duras. P/NP or letter grading.

135. Studies in Medieval French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of medieval French culture and literature, including lyric poetry and narrative romance, history of medieval warfare, comedy, and class structures. May be repeated for credit with topic change. P/NP or letter grading.

137. French and Francophone Intellectual History. (4) Lecture, three hours. Taught in French. Exploration of themes that address particular problem of French literature, civilization, or ideas. May be repeated for credit with topic change. P/NP or letter grading.
138. Contemporary French Theory. (4) Lecture, three hours. Requires: course 12 or 100. Taught in French. Study of French theorists (Barthes, Baudrillard, Cixous, Derrida, Foucault, Irigaray, and major contemporary thinkers) beginning with the earliest history and gradual formation of the great urban complex in maps from Renaissance to 20th century. Study of city’s streets and quarters, traffic and transportation, multiple layers of past, present, and future, and flâneurs and insurrectionists through wide range of literary and critical texts. Readings cover mainly 19th and 20th centuries — Honoré de Balzac, Charles Baudelaire, Emile Zola, Marcel Proust, Louis-Ferdinand Céline, and others. P/NP or letter grading.

139. Paris: Study of French Capital. (4) Lecture, three hours. Requires: course 12 or 100. Taught in French. Textual and visual exploration of historical and imaginary reconstructions of Paris, beginning with the earliest history and gradual formation of this great urban complex in maps from Renaissance to 20th century. Study of city’s streets and quarters, traffic and transportation, multiple layers of past, present, and future, and flâneurs and insurrectionists through wide range of literary and critical texts. Readings cover mainly 19th and 20th centuries — Honoré de Balzac, Charles Baudelaire, Emile Zola, Marcel Proust, Louis-Ferdinand Céline, and others. P/NP or letter grading.

M140. Women’s Studies in French Literature. (4) (Same as Women’s Studies M140.) Lecture, three hours. Development of women in French literature as author, character, symbol, etc. P/NP or letter grading.

141. French Cinema. (4) Lecture, three hours. Study of French cinema and cinematographers in generic, thematic, and sociocultural aspects. May be repeated for credit with topic change. P/NP or letter grading.

142. Francophone Cinema. (4) Lecture, three hours. Study of Francophone cinema and cinematographers in generic, thematic, and sociocultural aspects. May be repeated for credit with topic change. P/NP or letter grading.

150. French and Francophone Cultures in English. (4) Lecture, three hours. Study of historical, anthropological, legal, literary, or filmic texts to provide students with broad view of some main issues in field of colonial and postcolonial Francophone studies. P/NP or letter grading.

151. French and Francophone Theater in Translation. (4) Lecture, three hours. Through plays of 20th century, analysis of struggles of individuals and social groups in contexts that are historical, political, philosophical (existentialism, absurd), and cultural (colonialism and conformism). May be repeated for credit with topic change. P/NP or letter grading.

154. Paris: Study of French Capital in Translation. (4) Lecture, three hours. Textual and visual exploration of historical and imaginary (re)constructions of Paris, beginning with the earliest history and gradual formation of this great urban complex in maps from Renaissance to 20th century. Study of city’s streets and quarters, traffic and transportation, multiple layers of past, present, and future, and flâneurs and insurrectionists through wide range of literary and critical texts. Readings cover mainly 19th and 20th centuries — Honoré de Balzac, Charles Baudelaire, Emile Zola, Marcel Proust, Louis-Ferdinand Céline, and others. P/NP or letter grading.

156. French and Francophone Cultural Studies / 347

201. Techniques of Literary Analysis. (4) Lecture, three hours. Practice in close analysis of literary texts, including explication de texte. S/U or letter grading.

202. Cultural Studies. (4) Lecture, three hours. Introduction to theoretical approaches to popular and mass culture, and to postcolonial and Francophone cultural studies. Topics include sociological and anthropological theories such as sociology and structuralism, the city, revolution, avant-garde strategies, media, diaspora during postwar modernization, Algerian War, May 68, and beyond. Theorists include Barthes, de Certeau, Bourdieu, Baudrillard, Lyotard, Ross, Rey Chow, Virilio. S/U or letter grading.

203. Contemporary Francophone Literature. (4) Lecture, three hours. Study of Francophone African, Caribbean, Vietnamese, or Quebec literatures and cultures, with specific attention to issues of cultural contact, language, colonialism, anticolonialism, nationalism, resistance and dissidence, and postcolonial theory. S/U or letter grading.

204. Studies in Autobiography. (4) Lecture, three hours. Introduction to theories of autobiography and subjectivity, and to genre of autobiography in literatures in French across centuries. Topics include early modern approaches to self-writing, Rousseau and emergence of modern self, women’s autobiography in France and Francophone world. Theorists may include Thomas Jefferson, Truffaut, Anne Carson, Paul de Man, Jacques Derrida, Helene Cixous, Michel Foucault, Pierre Bourdieu, Toril Moi. S/U or letter grading.

205A-205B. Studies in Cinema and Literature. (4-4) Lecture, three hours. Discussion of selected topics in French and Francophone cinema and literature. S/U or letter grading.

206A-206B. Studies in Generative Anthropology. (4-4) Lecture, three hours. Discussion of principles of generative anthropology and their application to given set of literary, philosophical, and scientific texts and/or other cultural phenomena. S/U or letter grading.

207. Studies in History of Ideas. (4) Seminar, three hours. Particular problems in French literature and ideas. May be repeated for credit. S/U or letter grading.

208. Studies in Literary Criticism. (4) Seminar, three hours. Readings in literary criticism, theory, and literature from any period of French literature. May be repeated for credit. S/U or letter grading.

209. Studies in Literary Genre. (4) Seminar, three hours. Advanced research and study of literary genres such as poetry, drama, fiction, autobiography, and performance and of theory of these genres. S/U or letter grading.

M210. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4) (Same as Classics M218, English M215, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of Latin and vernacular scripts, and (3) examine a manuscript as a witness to a changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective production in written texts. S/U or letter grading.

219. 19th Century. (4) Lecture, three hours. Readings in 19th-century literature, covering development of novel, lyric poetry, and other key 19th-century genres and cultural analysis and in critical theory. Discussion of current research and literature in research specializations in literary and cultural studies. S/U or letter grading.

220. 20th Century. (4) Lecture, three hours. Overview, both historical and analytical, of 20th-century French literature set in context of several key critical topics that interrogate canonical interpretation. Letter grading.

M270. Seminar: Literary Theory. (5) (Same as Asian M251, Comparative Literature M294, English M270, German M270, Italian M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current research and literature in literary and cultural studies. S/U or letter grading.

296. Research Methods and Writing. (2) Seminar, two hours. Advanced study of current topics in literary and cultural analysis and in critical theory. Discussion of current research and literature in research specialization of faculty member teaching course. S/U or letter grading.

French and Francophone Studies / 347
FRESHMAN GENERAL EDUCATION CLUSTERS
College of Letters and Science
UCLA
A265 Murphy Hall
Box 951571
Los Angeles, CA 90095-1571
(310) 206-5446
http://www.college.ucla.edu/ge/clusters/

Scope and Objectives
Available to entering freshmen only, cluster courses are an option for satisfying general education requirements. Clusters are yearlong, collaboratively taught, interdisciplinary courses that focus on a topic of timely importance, such as the global environment or intercultural dynamics. The courses are taught by some of UCLA’s most distinguished faculty members and seasoned graduate students. During Fall and Winter Quarters, students attend lecture courses and small discussion sections and/or laboratories. In Spring Quarter, the same students enroll in one of a number of seminar seminars dealing with topics related to the cluster theme. Freshman clusters are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. At the conclusion of the entire yearlong cluster, students complete nearly a third of their general education course requirements and fulfill the Writing II requirement. Cluster students are eligible for three terms of honors credit, with the Spring Quarter seminar providing Honors Collegium credit.

For the current cluster course offerings and general education credit, refer to http://www.college.ucla.edu/ge/clusters/

General Education Clusters

Lower Division Courses

M1A-M1B-M1CW. Global Environment. (5-5-5)
Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading. M1A-M1B-M1CW. Global Environment. (5-5-5) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading.

M25A-25B-25CW. Politics, Society, and Urban Culture in East Asia. (5-5-5) Course 25A is enforced requisite to 25B, which is enforced requisite to 25CW. Limited to first-year freshmen. Letter grading.

M26A-26B-26CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 26A is enforced requisite to 26B, which is enforced requisite to 26CW. Limited to first-year freshmen. Letter grading.

M30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 26A is enforced requisite to 26B, which is enforced requisite to 26CW. Limited to first-year freshmen. Letter grading.

M23A-23B-23CW. Inside Performing Arts: Interdisciplinary Exploration of Performance in Society and Culture. (5-5-5) Course 23A is enforced requisite to 23B, which is enforced requisite to 23CW. Limited to first-year freshmen. Letter grading.

23A-23B-23CW. Inside Performing Arts: Interdisciplinary Exploration of Performance in Society and Culture. (5-5-5) Course 23A is enforced requisite to 23B, which is enforced requisite to 23CW. Limited to first-year freshmen. Letter grading.

M25A-25B-25CW. Politics, Society, and Urban Culture in East Asia. (5-5-5) Course 25A is enforced requisite to 25B, which is enforced requisite to 25CW. Limited to first-year freshmen. Letter grading.

M26A-26B-26CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 26A is enforced requisite to 26B, which is enforced requisite to 26CW. Limited to first-year freshmen. Letter grading.

M30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 30A is enforced requisite to 30B, which is enforced requisite to 30CW. Limited to first-year freshmen. Letter grading.

M30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 30A is enforced requisite to 30B, which is enforced requisite to 30CW. Limited to first-year freshmen. Letter grading.

M30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 30A is enforced requisite to 30B, which is enforced requisite to 30CW. Limited to first-year freshmen. Letter grading.

M23A-23B-23CW. Inside Performing Arts: Interdisciplinary Exploration of Performance in Society and Culture. (5-5-5) Course 23A is enforced requisite to 23B, which is enforced requisite to 23CW. Limited to first-year freshmen. Letter grading.

M25A-25B-25CW. Politics, Society, and Urban Culture in East Asia. (5-5-5) Course 25A is enforced requisite to 25B, which is enforced requisite to 25CW. Limited to first-year freshmen. Letter grading.

M26A-26B-26CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 26A is enforced requisite to 26B, which is enforced requisite to 26CW. Limited to first-year freshmen. Letter grading.

M30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives on Myth. (5-5-5) Course 30A is enforced requisite to 30B, which is enforced requisite to 30CW. Limited to first-year freshmen. Letter grading.
Course 66A is enforced requisite to 66B, which is en-
forced requisite to 66CW. Limited to first-year fresh-
men. Letter grading. 66A-66B. Lecture, three hours; dis-
cussion, two hours. In-depth look at city in which
UCLA is located. Drawing on concept of Los Angeles
as laboratory, students engage in systematic way with
urban area that is to be their home for next several
years. As they do, they come to understand peoples,
spaces, politics, and cultures of Los Angeles and its
metropolitan region in both present and past, as well
as Los Angeles’ place in urban world. 66CW. Special
Topics. Seminar, three hours. Enforced requisites:
course 66B, and English Composition 3 or 3H or Eng-
lish as a Second Language 36. Topics may include
musical cultures of Los Angeles, as well as Los Ange-
les as global city, Los Angeles in fiction, Southern California
and environment, planning for 21st-century Los Ange-
elles, and housing and homeless in Los Angeles. Satis-
fies Writing II requirement.

70A-70DW. Evolution of Cosmos and Life. (5 each)
Course 70A is enforced requisite to 70B, which is en-
forced requisite to 70CW or 70DW. Limited to first-
year freshmen. Letter grading. 70A-70B. Lecture three
hours; discussion, two hours. Use of concept of evolu-
tion, as it applies to biological organisms, Earth,
solar system, and universe itself, to introduce stu-
dents to both life and physical sciences. Examination
of evolution of universe, galaxy, solar system, and
Earth in course 70A; focus on evolution of life in
course 70B. 70CW, Special Topics in Life Sciences.
Seminar, three hours. Enforced requisites: course
70B, and English Composition 3 or 3H or English as a
Second Language 36. Not open for credit to students
with credit for course 70DW. Examination in depth of
various issues of evolution in cosmos from life sci-
cences perspective. Satisfies Letters and Science Writing II requirement.
70DW. Special Topics in Physical Sciences.
Seminar, three hours. Enforced requisites:
course 70B, and English Composition 3 or 3H or Eng-
lish as a Second Language 36. Not open for credit to
students with credit for course 70CW. Examination in
depth of various issues of evolution in cosmos from
physical sciences perspective. Satisfies Writing II re-
quirement.

71A-71B-71CW. Biotechnology and Society. (5-5-
5) Course 71A is enforced requisite to 71B, which is en-
forced requisite to 71CW Limited to first-year fresh-
men. Letter grading. 71A-71B. Lecture, three hours;
discussion, two hours; laboratory, two hours. Explora-
tion of methods, applications, and implications of bio-
technology from an ethical, social, and political perspec-
tives as well as biological underpinnings. 71CW, Spec-
tial Topics. Seminar, three hours. Enforced requisites:
course 71B, and English Composition 3 or 3H or Eng-
lish as a Second Language 36. Topics include in-
depth examination of ethics and human genetics, bio-
weapons and biodefense, sex and biotechnology.
Satisfies Writing II requirement.

72A-72B-72CW. Sex from Biology to Gendered Society. (5-5-5) Course 72A is enforced requisite to 72B,
which is enforced requisite to 72CW. Limited to first-
year freshmen. Letter grading. 72A-72B. Lecture, three
hours; discussion, two hours. Examination of many
ways in which sex and sexual identity shape and are
shaped by biological and social forces, ap-
proached from complementary perspectives of an-
thropology, biology, medicine, and sociology. Specific
topics include biological origins of sex differences, in-
tersex, gender identity, gender inequality, homosexuality,
exis differences, sex/gender and law, and politics of
sex research. 72CW, Special Topics. Seminar, three
hours. Enforced requisites: course 72B, and
English Composition 3 or 3H or English as a Second
Language 36. Topics may include politics of reproduc-
tion, sexuality, sexual identity, social construction of
gender, and reproductive technologies. Satisfies Writ-
ing II requirement.

80A-80B-80CW. Frontiers in Human Aging: Bio-
medical, Social, and Policy Perspectives. (5-5-5)
Course 80A is enforced requisite to 80B, which is en-
forced requisite to 80CW. Limited to first-year fresh-
men. Letter grading. 80A-80B. Lecture, three hours;
discussion, two hours. Examination of aging process
from vantage points of multiple disciplines, including
biology, psychology, sociology, engineering, eth-
ics, and policy. Study of biomedical and biological aging and psy-
chological, social, and ethical implications of phenom-
ena. 80CW. Special Topics. Seminar, three hours. En-
forced requisites: course 80B, and English Composition 3 or 3H or English as a Second Lan-
guage 36. Not open for credit to students with credit
for former course 97D. In-depth examination of gen-
der and aging, cellular aging, cancer, and aging of
brain. Satisfies Writing II requirement.

97A. Cluster Colloquia: Variable Topics. (1) For-
merly numbered 97A-97Z.) Seminar, one hour. Vari-
able topics course designed for students who have
completed one GE cluster. Study, through small-
group discussion and projects, of selected topics re-
lated to a cluster theme or topic. Consult Schedule of Classes for topics and instructors. May be repeated
once for credit. P/NP grading.

Scope and Objectives
Geography is the study of the natural world and how humans have changed it. It examines the physical Earth and life on it, looking at the world’s diverse cultures and economies and at the environmental problems they produce.

Geography addresses many issues about the contemporary world. Some are local, such as documenting the development of ethnic neighbor-
borhoods within Los Angeles. Others are re-
gional, such as determining the best locations
for nature reserves in California. Many are
global, such as the study of greenhouse gases
and how they affect climates, culture and re-
source issues in developing countries, and the
impact of information technologies on people
in different places.

The work of geographers often takes them out of the classroom into the field to collect infor-
station on topics that range from the settle-
ment of new immigrants to the distribution of
deranged species, the erosion of shorelines,
and the location of high-tech businesses. On
other occasions, geographers work in laborato-
ries, using techniques such as the computer
alysis of satellite photographs to look for
changes in river courses and the computer
odeling of shifts in global vegetation patterns
and the distribution of human populations. Re-
search is also conducted in libraries and ar-
ives, probing documentary sources on hu-
man interaction with the natural world and how
that world is imagined.

Geography graduates have a wide variety of
career opportunities because of their combina-
tion of geographical/environmental perspec-
tives and technical skills. UCLA geography stu-
dents have gone on to become university
scholars, school teachers, members of govern-
mental and nongovernmental planning, devel-
oment, and conservation agencies, business
executives, lawyers, and specialists in geo-
ographical information analysis for government
and private business. Because of its sophisti-
cated focus on the relationship of the global to
the local, geography is particularly useful for
those who wish to pursue careers with an inter-
national focus.

The department has one of the top programs
in the U.S. and offers two undergraduate ma-
jors that lead to the Bachelor of Arts degree:
Geography and Geography/Environmental
Studies. The Geography major combines a
broad background in the field with specific
tracks. The Geography/Environmental Studies
major focuses on the impact of humans on the
natural environment. Also offered is an under-
graduate minor in Geospatial Information Sys-
tems and Technologies.

The department also offers M.A. and Ph.D.
degrees. Student research projects are con-
ducted in collaboration with a faculty adviser
and advisory committee. Graduate students
work in most major areas of geography and on
projects around the world. Graduate alumni of
the department have teaching positions at
many leading universities in the U.S. and abroad.

**Undergraduate Study**

**Geography B.A.**

The Geography major allows students to combine a broad background in the field with more specific interests and career goals. Students can select classes in several areas of geography such as urban, economic, cultural, environmental, physical, or biogeography. They should consult with the undergraduate adviser to plan a program suitable to their personal objectives.

**Preparation for the Major**

**Required:** Three courses (15 units) as follows: Geography 1 or 2, 3 or 4 or 6, and Statistics 12. Each course must be taken for a letter grade.

**Transfer Students**

Transfer applicants to the Geography major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one physical geography or biogeography course, one cultural geography or economic geography course, and one statistics course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admin_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Twelve upper division geography courses, each taken for a letter grade, which must be distributed as follows: (1) natural systems core — two courses from 100, 101, 102, 103, 104, 105, 106, 111, 112; (2) human systems core — two courses from 118, 133, 134, 140, 142, 148, 150, M153; (3) environmental studies cluster — five courses from M106, M107, M109, 110, 113, M115, 116, 120, 121, 122, 123, 124, 125, 126, M127, M128, 129, 131, 132, 135, 136, 159C, 159D, 159E; (4) procedures — two courses (8 units) from 100A (2 units), 101A (2 units), 105A (2 units), 152, 163, 167 (6 units), 168, 169, 170, M171, 172; and (5) regions — one course from 122, 135, 136, M137, 152, 156, 180, 181, 182A, 182B, 183, 184, 185, 186, 187.

Geography/Environmental Studies majors are advised to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

**Honors Program**

The honors program is designed for Geography and Geography/Environmental Studies majors who are interested in completing a research project that culminates in an honors thesis.

To qualify for graduation with departmental honors, students must have a cumulative grade-point average of 3.5 or better in all upper division geography courses and a 3.0 overall GPA. They must enroll in Geography 198A and 198B in two consecutive terms and earn grades of A– or better. They may elect to work with one or two faculty sponsors. Students are awarded highest honors, honors, or no honors based on an evaluation of the thesis by the faculty sponsor(s). Contact the undergraduate advising office for further information.

**Computing Specialization**

Majors in Geography and Geography/Environmental Studies may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, M171. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

**Geography Minor**

The Geography minor is designed for students who wish to deepen and/or broaden their major program of study with a distinctive yet flexible program of courses encompassing the relationship between environment and society. The minor allows students to develop a coherent strategy for understanding and explaining the manner in which people and the Earth interact. Students have the opportunity to explore the origins, development, morphology, and processes of landscapes inherited from nature, as well as those institutions and cultural, economic, political, and social patterns associated with the human development, occupancy, organization, perception, and use of these landscapes.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1255 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

**Required Lower Division Courses (10 units):**
Two courses from Geography 1, 2, 3, 4, 6. It is recommended that students take these courses before attempting upper division courses.

**Required Upper Division Courses (20 units):**
Any five upper division geography courses.

No more than 8 units may be applied toward both this minor and a major or minor in another department or program, and at least three of the five upper division courses must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval. Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

**Geography/Environmental Studies Minor**

The Geography/Environmental Studies minor is intended for students interested in environmental issues and emphasizes a systems approach to gaining a causal understanding of major environmental problems facing our society and the world at large. The uniqueness of the minor lies in its geographical perspective on the impact, at various geographical scales, of human activity on natural systems and on the implications of global environmental change on local, regional, and global human systems.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1255 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

**Required Lower Division Courses (10 units):**
Geography 5 and one course from 1, 2, 3, 4, or 6. It is recommended that students take these courses before attempting upper division courses.

**Required Upper Division Courses (20 units):**
Three courses from the environmental studies cluster specified within the major and two ge-
Geography courses from outside the environmental studies cluster.

No more than 8 units may be applied toward both this minor and a major or minor in another department or program, and at least three of the five upper division courses must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

Geospatial Information Systems and Technologies Minor

The Geospatial Information Systems and Technologies minor is designed to provide students with a strong background in the use, application, and development of geospatial/environmental research techniques and methods.

To enter the minor, students must be in good academic standing, have completed Geography 7 with a grade of C or better, and file a petition in the Geography Department Advising Office, 1255 Bunche Hall, (310) 825-1166. For majors in Geography or Environmental Studies, only two upper division courses may overlap between the major and this minor.

Required Lower Division Course (5 units): Statistics 12.

Required Upper Division Courses (24 units minimum): Geography 167, 168, 169, and any three courses selected from 154, 162, 163, 166, 170, M171, 172, 173, and 199 (4 units with approval of the faculty adviser). Each upper division course must be completed with a grade of C or better.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Geography offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Geography.

Geography

Lower Division Courses

1. Earth's Physical Environment. (5) Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to nature and distribution of landforms and climate and their significance to people. P/NP or letter grading.

3. Cultural Geography. (5) Lecture, three hours; discussion, two hours. Introduction to cultural geography of modern world, with examination of key concepts of space, place, and landscape as these have shaped and been shaped by connections between societies and their natural environments. Examples from variety of landscapes and places since 1800 and especially from Los Angeles region. P/NP or letter grading.

4. Globalization: Regional Development and World Economy. (5) Lecture, three hours; discussion, one hour. Economic geography explores spatial distribution of all forms of human productive activity at number of geographical scales — local, regional, national, and global. Key theme is impact of increasingly powerful global economic forces on organization of production. P/NP or letter grading.

5. People and the Earth's Ecosystems. (5) Lecture, three hours; laboratory, two hours. Exploration of ways in which human activity impacts natural environment and how modification of environment can eventually have significant consequences for human activity. Examination, using case studies, of real environmental problems that confront us today. P/NP or letter grading.

6. World Regions: Concepts and Contemporary Issues. (5) Lecture, three hours; discussion, two hours. Interdisciplinary and historical approach to modern peoples, their relationships to wealth or poverty, and their local origins of food production. Brief introduction to physical geography and biogeography of each region. Discussion of each region's peoples, languages, foods, prehistories, and histories. P/NP or letter grading.

7. Introduction to Geographic Information Systems. (5) Formerly numbered 168.) Lecture, three hours; laboratory, two hours. Designed for freshmen/sophomores. Introduction to fundamental concepts and concepts necessary to carry out sound geographic analysis with geographic information systems (GIS). Reinforcement of key issues in GIS, such as geographic coordinate systems, map projections, spatial analysis, and visualization of spatial data. Laboratory exercises use database query, manipulation, and spatial analysis to address real-world problems. P/NP or letter grading.

88A-88Z. Lower Division Seminars: Geography. (4 each) Discussion, three hours; reading period, one hour. Seminars designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised on department during previous term. P/NP or letter grading.

Upper Division Courses

100. Principles of Geomorphology. (4) Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 100A. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations.

100A. Principles of Geomorphology: Field and Laboratory. (2) Laboratory/fieldwork, six hours. Corequisites: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. P/NP or letter grading.

101. Coastal Geomorphology. (4) Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 101A. Study of origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seaciffs, and coral reefs, together with coastal zone management. P/NP or letter grading.

101A. Coastal Geomorphology: Field and Laboratory. (2) Laboratory/fieldwork, six hours. Corequisites: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seaciffs, and coral reefs, together with coastal zone management.

102. Tropical Climatology. (4) Lecture, three hours. In-depth exploration of development of tropical climate, with special reference to hurricanes, ENSO, and monsoons. Examination of human interaction with tropical climate processes and human-induced climate change in tropics. Use of climatological information to foster sound environmental management of climate-related resources in tropics. P/NP or letter grading.

103. Paleoclimatology and Ice-Age Environments. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading.

104. Climatology. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of the many relations between climate and the world's atmosphere and oceans. Application of basic energy-budget concepts to the microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. P/NP or letter grading.

105A. Hydrology: Field and Laboratory. (2) Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in laboratory and make hydrologic measurements in the field.

M106. Applied Climatology: Principles of Climate Impact on Natural Environment. (4) Formerly numbered 106.) (Same as Atmospheric and Oceanic Sciences M106.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Exploration of knowledge and tools to solve complex problems in contemporary applied climatology, including current practices, influence of climate on environment, and human influence on changing climates. P/NP or letter grading.
110. Population and Natural Resources. (4)
Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of human population growth and its impact on the natural environment. Introduction to basic principles of population ecology and the study of population dynamics. P/NP or letter grading.

111. Forest Ecosystems. (4)
Lecture, three hours; field trips. Requisite: course 2 or Life Sciences 1. Designed for juniors/seniors. Study of the structure and function of forest ecosystems, including forest succession, biotic interactions, and the impact of human activity on forest ecosystems. P/NP or letter grading.

112. Analytical Animal Geography. (4)
Lecture, three hours. Requisites: courses 2, 1, or Life Sciences 1. Designed for juniors/seniors. Analysis of animal movements and distributions, with emphasis on migration, migration patterns, and their environmental determinants. P/NP or letter grading.

113. Humid Tropics. (4)

114. Africa and African Diaspora in Americas. (4)
Lecture, three hours. Historical-geographical examination of Africa’s role in Americas, with emphasis on environment, agriculture, food systems, and medieval crops. P/NP or letter grading.

115. Environmentalism: Past, Present, and Future. (4 to 6)
(Same as Environment M115.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Examination of historical and contemporary environmental movements, their goals, and their impact on society. P/NP or letter grading.

116. Biogeography of Plant and Animal Invasions. (4)
Lecture, three hours; reading period, one hour. Requisites: course 2 or 5. Examination of theories and examples of invasion of new environments by plants and animals introduced through natural processes or by human activity. P/NP or letter grading.

117. Medical Geography. (4)
Lecture, three hours; reading period, one hour. Requisite: course 5. Examination of patterns of population/place/disease interactions and some effects of change and development on disease etiology and problems of healthcare. P/NP or letter grading.

118. Conservation of Resources: North America. (4)
Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of basic principles and problems associated with conservation of natural resources in the U.S. and Canada. P/NP or letter grading.

121. Conservation of Resources: Underdeveloped World. (4)
Lecture, three hours; reading period, one hour. Designed for seniors. Analysis of principles and problems of conservation of natural resources of the underdeveloped world. P/NP or letter grading.

122. Wildlife Conservation in Eastern and Southern Africa. (4)

123. Bioresource Management. (4)

124. Environmental Impact Analysis. (4)

125. Health and the Global Environment. (4)
Lecture, three hours; reading period, one hour. Impact of the environment and lifestyle on individual health examined from a geographical perspective, with examples from both developed and developing countries. P/NP or letter grading.

126. Geography of Extinction. (4)
Lecture, three hours; reading period, one hour. Requisite: course 5. Designed for juniors/seniors. Analysis of species extinction and biogeographical extinction since the past 15,000 years. Identification of extinction factors and pathways through case studies of extinct and endangered species and communities. P/NP or letter grading.

127. Soils and Environment. (5)
(Lecture and laboratory) The structure and functioning of soils in relation to the environment. Examination of soil development, morphology, and world distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

(Lecture and laboratory) The structure and functioning of soils in relation to the environment. Examination of soil development, morphology, and world distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

129. Seminar: Environmental Studies. (4)
Seminar, three hours; reading period, two hours. Preparation: three environmental systems cores, three environmental studies cluster courses. Limited to seniors. Examination of problems and issues of environmental science. Requisite: any course numbered 109. (Same as Environment M129.) P/NP or letter grading.

130. Geographical Discovery and Exploration. (4)
Lecture, three hours; reading period, one hour. Requisites: courses 1, 3. Designed for juniors/seniors. Survey of history of exploration, from earliest times to modern, with emphasis on period from Marco Polo to the present.

131. Environmental Change. (4)
Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of natural forces producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Increasing importance of human activity in environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

132. Food, Environment, and Agriculture. (4)
Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Historical and thematic orientation to agriculture revolutions and their role in environmental and cultural transformations in human history. P/NP or letter grading.

133. Cultural Geography of Modern World. (4)
Lecture, three hours; reading period, one hour. Designed for juniors/seniors and graduate students. Historical and structural approach to cultural geography of modern world system, with particular emphasis on structure and functioning of its core, semi-periphery, and periphery. P/NP or letter grading.

134. Space, Place, and Nature in Western Thought. (4)
Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Overview of contemporary ecological and development issues in sub-Saharan Africa. P/NP or letter grading.

135. African Ecology and Development. (4)
Lecture, three hours; discussion, one hour. Designed for juniors/seniors. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of science, knowledge, and inquiry. P/NP or letter grading.

Lecture, three hours; reading period, one hour. Designed for juniors/seniors and graduate students. Study of evolution of cultural landscapes of the area that is now the U.S. Examination of past geographies and of geographical change through time. P/NP or letter grading.

M137. Historical Geography of American Environment. (4)
(Lecture and laboratory) The structure and functioning of soils in relation to the environment. Examination of soil development, morphology, and world distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

138. Place, Identity, and Networked World. (4)
Lecture, three hours; reading period, one hour. Communication technologies, such as personal computers and Internet, seem to be connected to dramatic changes in identities of people, groups, and places. Exploration of those changes and their implications for social institutions and human values and practices. P/NP or letter grading.

139. Japan in World: Culture, Place, and Global Connections. (4)
Lecture, three hours; reading period, one hour. Focus on questions of culture and place in Japan. Exploration of ways that these questions — and Japan itself — have been shaped by historical and contemporary interactions with people in both Japan and other parts of world. P/NP or letter grading.
140. Political Geography. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Spatiality of political activity, spatial constitution of political power. Control over space as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading.

142. Population Geography. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatiality of phenomena and selected case studies. P/NP or letter grading.

144. Ethnicity in the American City. (4) Lecture, three hours; reading period, two hours. Limited to juniors/seniors. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America. Use of comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems ethnic groups face in contemporary American city. P/NP or letter grading.

152. Cities of Europe. (4) Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Europe has been represented through ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced course of events. P/NP or letter grading.

153. Past Societies and Their Lessons for Our Own Future. (5) Same as Anthropology M158B and Honors M158B. Four hours discussion, two hours lecture. Examination of modern and past tribal and band societies (Amazonian Indians, Kalahari San, New Guineans, and others) that met varying fates, as background to examination of how modern state societies are coping or failing to cope with similar issues. P/NP or letter grading.

154. Images of Earth: World from Above. (4) Formerly numbered 108. Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced course of events. P/NP or letter grading.

155. Industrial Location and Regional Development. (4) Lecture, three hours. Requisite: course 4 or Economics 1 or 2 or 5 or 11. Designed for juniors/seniors. Study of origins, growth processes, internal structure and patterns of interactions, and environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

156. Metropolitan Los Angeles. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and patterns of interactions, and environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

157. Models of Regional Growth and Change. (4) Lecture, three hours; reading period, one hour. Requisite: course 1 or 2 or 5 or 11. Designed for juniors/seniors. Examination of empirical and theoretical issues of regional growth and change. Introduction to supply and demand-based models of regional development. P/NP or letter grading.

158. Korean Urban Experience. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors with previous coursework in geography or East Asian studies. Study of cities by geographers entails analysis of evolution, functions, spatial patterns, and other geographical problems of urban societies throughout history. Examination of Korean urban experience as found in Seoul, South Korea, along with other cities in both Korea and overseas where Korean diaspora resides. Korean experience to be juxtaposed against responses by other cities of world to similar challenges. Geography of housing and associated issues. Estimation of current and possible future patterns. P/NP or letter grading.

159A-159E. Problems in Geography. (4 each) Discussion, three hours; reading period, one hour. Preparations: completion of three courses in a concentration. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses taken in concentration. P/NP or letter grading.

161. Cities and Social Difference. (4) Lecture, three hours; discussion, one hour. City landscapes embody both the best and worst of U.S. society; diversity and poverty, opportunity and violence. Study of urban spaces, social differences, inequality, and conflicts over uses and meanings of city space. Social urban geography. P/NP or letter grading.

162. Cities of Europe. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Urbanization of Europe, growth of city systems and international spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of capital cities such as Rome, Paris, and Berlin. P/NP or letter grading.

163. Field Analysis in Biogeography. (4) Fieldwork, eight hours. Requisites: courses 2, 5, 108, 112. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.

164. Environmental Modeling. (4) Lecture, one hour; laboratory, two hours. Presentation of basic concepts related to computer modeling of biogeochemical cycles, geomorphic processes, and other phenomena relevant to changing earth systems and their inhabitants. Laboratory exercises include building basic computer models and working with existing models. P/NP or letter grading.

165. Cartography. (4) Lecture, two hours; laboratory, four hours. Preparation: three courses from 1 through 5. Designed for juniors/seniors. Survey of field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

166. Satellite Remote Sensing and Imaging Geographic Information Systems. (4) Lecture, two hours; laboratory, one hour. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observation System satellites to land-atmosphere interactions, landscape, environmental monitoring, and environmental monitoring. Introduction to digital image-processing and imaging geographic information system (GIS) software. P/NP or letter grading.

168. Multidisciplinary Field Mapping and Analysis. (4) Lecture, one hour; laboratory, one hour. Designed for juniors/seniors. Use of variety of programming languages. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observation System satellites to land-atmosphere interactions, landscape, environmental monitoring, and environmental monitoring. Introduction to digital image-processing and imaging geographic information system (GIS) software. P/NP or letter grading.

170. Geographic Information Systems Programming and Development. (4) Lecture, two hours; laboratory, two hours. Enforced requisite: course 168. Introduction to fundamental concepts and architecture of programming objects in widely used geographic information systems (GIS), and programming in GIS environment. Topics centered on GIS customization and development using variety of programming languages. Lectures followed by laboratory exercises. P/NP or letter grading.

173. Geographic Information Systems Programming and Development. (4) Lecture, two hours; laboratory, two hours. Enforced requisite: course 168. Introduction to fundamental concepts and architecture of programming objects in widely used geographic information systems (GIS), and programming in GIS environment. Topics centered on GIS customization and development using variety of programming languages. Lectures followed by laboratory exercises. P/NP or letter grading.

Regions

181. Mexico, Central America, Caribbean. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Middle America and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies. P/NP or letter grading.
182A. Spanish South America. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding historical development of Spanish South America and contemporary economic and cultural geography of individual Spanish-speaking countries. P/NP or letter grading.

182B. Brazil. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding historical development of Portuguese South America and contemporary economic and cultural geography of Brazil. P/NP or letter grading.

183. Europe. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Europe. P/NP or letter grading.

184. California. (4) Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Systematic and regional treatment of geography of California, including physical, cultural, and economic aspects and detailed studies of various regions. P/NP or letter grading.

185. South and Southeast Asia. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

186. Contemporary China. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People’s Republic of China. Dynamics that have led to China’s major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic basis. P/NP grading.

187. Middle East. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

Special Studies

194. Research Group Seminars: Geography. (2) Seminar, two hours; research group meeting, two hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature or of research of faculty members or students. May meet concurrently with graduate research seminar. May be repeated for credit with topic change. P/NP grading.

C194A. Research Group Seminars: Controversies in Earth System Science. (1) Seminar, two hours. Designed for undergraduate students who are part of research group. Biweekly seminar to discuss emerging issues and controversies in earth system science. Topics include oscillatory climate phenomena, biogeochemical cycling, biocomplexity, land/atmosphere interactions, paleoclimate, and human-induced environmental change. May be repeated for credit. Concurrently scheduled with course C298A. P/NP grading.

195. Community or Corporate Internships in Geography. (4) Tutorial, four hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

198A-198B. Honors Research in Geography I, II. (4-4) Tutorial, to be arranged. Preparation: 3.25 grade-point average overall, at least five upper division geography courses with 3.5 grade-point average. Limited to juniors/seniors. Individual contract and completion of honors thesis or comprehensive research project under direct supervision of one or two faculty members. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to juniors with B average in major or seniors. May be repeated for maximum of 16 units. P/NP or letter grading.

Graduate Courses

Environment

200. History and Paradigms of Geomorphology. (4) Lecture, two hours; discussion, one period, eight hours. Preparation: two courses from 101, 103, 105, M107. Requisite: course 100. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophic, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu.

201. Coastal Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit.

202. Fluvial Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

203. Glacial Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in cold and arctic alpine environments. May be repeated for credit.

204A-204B-204C. Advanced Climatology. (4) Lecture, three hours; laboratory, one hour. Preparation: first year of calculus and acquaintance with Fortran IV. Requisite: course 104. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.

205. Seminar: Climatology. (4) Discussion, three periods, one hour. Requisites: courses 204A, 204B, 204C. Selected topics. May be repeated for credit.

M206. Introduction to Biophysical Modeling of Land Surface Processes and Land/Atmosphere Interactions. (4) Formerly numbered 206. (Same as Atmospheric and Oceanic Sciences M206.) Lecture, two hours; laboratory, one hour; reading period, one hour. Designed for graduate students. Presentation of introductory knowledge for graduate students to understand nature, principles, and scope of biophysical modeling of land surface processes, including ideal canopy model, radiation, heat and CO2 fluxes transfer, and satellite data application. Laboratory sessions included. S/U or letter grading.

207. Regional Climate and Terrestrial Surface Processes. (4) Seminar, three hours. Designed for graduate students. Physical concepts and basic principles of land-surface/atmosphere interactions. Exploration of topics such as regional and global perspective and implications. Human activities cause changes in land cover, which in turn affect regional climate. Some regions, in particular, appear to be “hot spots.” Regions to be studied in detail. S/U or letter grading.

208. Advanced Biogeography: Plants. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisites: courses 108, and 110 or 116. Intensive review and analysis of historical and current factors influencing plant distributions.

212. Advanced Biogeography: Animals. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 112. Intensive review and analysis of biophysical and cultural factors influencing animal distributions. S/U or letter grading.

213. Seminar: Biogeography. (4) Discussion, three hours; reading period, two hours. Requisite: course 208 or 212. Related research projects growing out of course material 208 or 212. May be repeated for credit.

215. Quaternary Studies: Physical Aspects. (4) Discussion, three hours; reading period, two hours; fieldwork, three hours. Preparation: at least one course from 200 through 205. Two appropriate graduate course in atmospheric and oceanic sciences or Earth and space sciences. Analysis of changing physical environment of Quaternary period. May be repeated for credit.

217. Quaternary Studies: Ecological Aspects. (4) Discussion, three hours; reading period, two hours. Requisites: courses 202 or 204A, 204B, and 204C or 208 or 212 or one appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology. Analysis of ecological aspects of environmental change during Quaternary period. May be repeated for credit.

218. Advanced Medical Geography. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 118. In-depth study of selected topics in medical geography and intense review of recent research.

223. Seminar: Humid Tropics. (4) Seminar, three hours; reading period, two hours. Designed for graduate students. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

228. Human Security and Environmental Change. (4) Seminar, three hours. Discussion of impact of environmental change on food, water, and physical security of human populations and societies’ adaptations to environmental change. Topics vary from year to year. S/U or letter grading.

M229. Resource-Based Development. (4) Same as Urban Planning M229C.) Discussion, three hours. Recommended preparation: Urban Planning 234A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

Human Geography

231. Terminology and Theory in Political Econo- my: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice. (4) Discussion, three hours; reading period, three hours. Designed for graduate students. Deconstruction of oft-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Attempt to reconstruct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

232. Advanced Cultural Geography. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 133. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

233. Seminar: Cultural Geography. (4) Seminar, three hours; reading period, two hours. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. S/U or letter grading.

234. Environment and Subsistence in Indigenous Cultures. (4) Seminar, three hours. Lectures and discussions on resource management strategies and environmental issues in indigenous cultures. Topics vary from year to year.
235. Seminar: Social Geography. (4) Seminar, three hours; reading period, one hour. Process of doing so- cial/cultural geography entails conceptualizing, adopt- ing, and formulating social and critical theories of space, subject, and power. Examination of this process by considering theoretical themes that shape concepts of social space and social research. Theoretical dis- cussions of recent research in social/cultural geogra- phy, particularly around topics of gender, race sexuali- ty, subjects and spatiality resistance and agenda, and social difference. S/U or letter grading.

237. Seminar: Historical Geography. (4) Seminar, three hours; reading period, two hours. Theory and practice of historical geography in North America and Europe. May be repeated for credit. S/U or letter grad- ing.

240. Advanced Political Geography: Geopolitics. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Intensive study of theories and prin- ciples of geopolitics. Selected regions used as exam- ples of differing techniques of study in geopolitics. S/U or letter grading.

241. Seminar: Political Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 240. Related research projects growing out of course 240. May be repeated for credit.

248. Location and Space Economy. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading.

249. Seminar: Economic Geography. (4) Dis- cussion, three hours; reading period, two hours. Requi- site: course 248. Related research projects growing out of course 248. May be repeated for credit.

250. Urban Systems. (4) Lecture, two hours; discus- sion, one hour; reading period, one hour. General study of city as a region and its location within urban hierarchy and theories to account for loca- tion and size distribution of cities. S/U or letter grad- ing.

251. Seminar: Urban Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 250. Related research projects growing out of course 250. May be repeated for credit.

260. Advanced Field and Laboratory Analysis in Geomorphology. (4) Laboratory/fieldwork, 10 hours. Preparation: two courses from 200, 201, 202, 203, 215. Designed for graduate students. Examination of advanced field and laboratory procedures used in con- temporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.

262. Advanced Field Analysis: Biogeography. (8) Fieldwork, 10 hours. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

268. Advanced Projects in Geographic Informa- tion Systems (GIS)/Remote Sensing. (4) Dis- cussion, one hour; laboratory, three hours. Recommend- ed requisite: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image pro- cessing package expected. Individualized research projects conducted on UNIX platforms within a struc- tured course environment. All aspects of a modest but original project, including data acquisition, ingestion, and analysis; interpretation of results and presenta- tion in publication-style format.

272. Spatial Statistics. (4) (Same as Statistics 222 and Urban Planning 215.) Lecture, three hours. Designed for graduate students. Survey of modern methods used in analysis of spatial data. Im- plementation of various techniques using real data sets from diverse fields, including neuroimaging, ge- ography, seismology, demography, and environmental sciences. S/U or letter grading.

Regions

282. South America. (4) Seminar, three hours; read- ing period, two hours. Introduction to main issues in geography of South America, with focus mainly on cultural/historical geographical perspectives. Themes and periods can be adapted to individual interests. S/U or letter grading.

283. Europe. (4) Seminar, two hours; discussion, two hours. Requisite: course 163. May be repeated for credit. S/U or letter grading.

286. Geography of Contemporary China. (4) Semi- nar, three hours; reading period, two hours. Designed for graduate students. May be repeated for credit. S/U or letter grading.

292. Advanced Regional Geography: Selected Re- gions. (4) Lecture, three hours; discussion, one hour. Preparation: appropriate upper division regional course. Lecture series devoted to a specific region at discretion of instructor. May be repeated for credit.

Seminars

295. Seminar: Geographic Thought. (4) Discussion, three hours; reading period, two hours. Des- signed for graduate students. Discussion of critical issues of significance to geographic research and education. S/U or letter grading.

296. Cultural Geography Methods Workshop. (1) Seminar, two hours. Biweekly forum for presenta- tion and discussion of new concepts, theories, and methods at juncture of geography, humanities, and environmental study. Principal focus on landscape, but scope of cultural study within geography also embr- aced. S/U grading.

296C. Political Geography Working Group. (1) Seminar, two hours. Limited to graduate students. Bi- weekly forum for analysis of current geopolitics, with emphasis on geographic impacts of recent global events. S/U grading.

296D. Agriculture and Food Studies Colloquium. (1) Seminar, one hour. Current scholarly debates sur- rounding topics on agriculture and food. Interdisciplin- ary discussion, with focus on exploration of confluence of production and consumption studies vis-à-vis agriculture and food. Group discussion of re- cently published work, works-in-progress by partici- pants, and distinguished guest speakers. S/U grading.

Core Courses

297A. History of Modern Geography. (4) Lecture, three hours; reading period, one hour. Evolution of field of geography in 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as modern academic discipline. S/U or letter grading.

297B. Physical Basis of Geography. (4) Lecture, three hours; reading period, one hour. Critical evalua- tion of formative influences, paradigm shifts, and present challenges of physical geography, illustrated from historical developments and changing research frontiers in geomorphology, climatology, oceanogra- phy, hydrology, and soils. S/U or letter grading.

297C. Evolution, Ecology, Environmentalism, and Roots of Modern American Geography. (4) Semi- nar, three hours; reading period, one hour. Discussion of how contemporary development of modern concepts of evolution, ecology, and environmentalism influenced, and were influenced by, development of modern geography as academic discipline. S/U or let- ter grading.

298A. Philosophical Issues in Geographical Inqui- ry. (4) Lecture, three hours. Discussion of geographi- cal research within context of philosophical debates concerning the nature of scientific inquiry. S/U or letter grading.

299A. Statistical Methods for Geographic Re- search. (4) Lecture, three hours; laboratory, two hours. Requisite: course M171. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography. S/U or letter grading.

299B. Geographic Data Visualization and Analyz- is. (4) Lecture, three hours; laboratory, two hours. Requisites: course 168, Statistics 12. Development of broad base of knowledge and set of skills that foster conduct of high-quality geographic data analysis. S/U or letter grading.

299C. Qualitative Methods and Methodology. (4) Seminar, three hours; laboratory, two hours. Exami- nation of definition and use of qualitative methodology and methods in social-cultural geographic research. Exploration of relationship between methodology and epistemology: review of range of research methods and techniques, including interviewing and focus groups, observation, action research, ethnography, and interpretation of material culture, and consider- ation of ethical and practical issues of conducting qualitative research. S/U or letter grading.

299D. Research Design in Geography. (4) Lecture, four hours. Introduction to logic of geographic inquiry. Topics include questions surrounding philosophy of science, research design issues, and range of meth- odologies available to and implemented by geogra- phers to enable students to evaluate geographic liter- ature critically. S/U or letter grading.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice per- sonnel or employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guide- ance and supervision of regular faculty member re- sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching College Geography. (2) Seminar, one hour; laboratory, three hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evalua- tion. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8) May be repeated for credit. S/U grading.

James A. Schultz, Ph.D., Chair

Professors
Sue-Ellen Case, Ph.D., Andrew R. Hewitt, Ph.D.
Douglas M. Kelinker, Ph.D. (George F. Kneller Professor of Education and Philosophy)
Robert S. Kirnner, Ph.D.
Kathleen L. Komar, Ph.D.
John A. McCumber, Ph.D.
Wolfgang Nehring, Ph.D.
James A. Schultz, Ph.D.
Hans Wagenier, Ph.D.

Professors Emeriti
Ehrhard Bahr, Ph.D.
Franz H. Bäuml, Ph.D.
Mariana D. Birnbaum, Ph.D.

Associate Professors
Todd S. Presner, Ph.D.
Christopher M. Stevens, Ph.D.

Scope and Objectives
The Department of Germanic Languages offers an extraordinary array of courses in languages, literatures, and cultures. This broad range of studies offers training in specialized fields such as film, linguistics, folklore, and critical theory. Courses prepare students for a variety of careers, including law, business, international relations, academic professions, and publishing.

Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. Refer to the Scandinavian Section later in this catalog for information about the degrees in Scandinavian studies.

At all levels of study various specializations are possible. Language, literature, and culture studies are available in Afrikaans, Dutch, and Icelandic, in addition to German. The program also provides opportunity for study, work-study, and internships in a German-speaking country or in a country related to the course of study.

Undergraduate Study

Grammar/Composition Courses
No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Afrikaans, Dutch, German, and Yiddish grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

German B.A.

Preparation for the Major
Required: German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed one year of college-level German language courses should enroll in course 4. Students who are in doubt as to their level of language proficiency or who are native speakers should consult the language program supervisor. Students in Plan C must also take Linguistics 20.

Transfer Students
Transfer applicants to the German major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of German.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Three plans are offered by the department:

Plan A: Literature and Culture
Plan A is designed for students who are interested in studying German language and thought by selecting courses in literature, film, folklore, and contemporary culture studies.

Required: German 130A, 130B, and 11 upper division German courses, at least three of which must be at the 150 level or above. Two of the 11 courses may be upper division courses in other departments. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Students elect not to take courses in other departments must have an overall grade-point average of 2.0 or better.

Plan B: German Studies
Plan B is designed for students whose interests are primarily interdisciplinary in nature. Departments majors receive credit not only for upper division courses in German literature, film, folklore, and contemporary culture, but for courses in related fields such as history, political science, philosophy, music, and others.

Required: German 130A, 130B, seven upper division German courses (at least two of which must be at the 150 level or above), and four upper division courses in a related field or fields selected in consultation with the undergraduate adviser. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Only two such contract courses may be applied toward the major. Each course must be taken for a letter grade.

Plan C: German Languages/Linguistics
Plan C is intended for students interested in the study of languages and linguistics and allows students to study more than one Germanic language.

Required: German 130A, 130B, 150, 170, C172, and eight additional upper division courses as follows: three courses in one other Germanic language (Scandinavian languages taught in the Scandinavian Section may be applied by petition to the undergraduate adviser), three linguistics courses from outside the department (i.e., anthropology, applied linguistics, linguistics, sociology) selected in consultation with the undergraduate adviser, and two electives from department offerings (excluding German 100A, 100B, 100C, and courses taught in English translation). Each course must be taken for a letter grade.

Honors Program
To qualify for graduation with departmental honors, students must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 199 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

German Minor
To enter the German minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (8 units):
German 5 and 6 or equivalent.

Required Upper Division Courses (20 units):
Any five German courses (excluding German literature in translation).

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Germanic Languages Minor
To enter the Germanic Languages minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (28 units):
Seven courses in any of the following languages and literatures: Afrikaans, Dutch, German (excluding German literature in transla-
Graduate Courses

596. Directed Individual Study or Research in Afrikaans. (4) Tutorial to be arranged with faculty member who directs study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. (4) Tutorial, to be arranged with instructor (see department for I.D. number). S/U grading.

Dutch

Lower Division Course

10. Contemporary Dutch Society and Culture: Beyond Rembrandt, Cheese, and Wooden Shoes. (3) Formerly numbered 100.) Lecture, three hours. Lectures and readings in English. Country known as Holland, or more correctly, The Netherlands (in Dutch: Nederland) has played crucial role in both American history and American current events. It was first country to set up official diplomatic relations with U.S. (in 1782) and is major investor in U.S. and staunch ally of its foreign policy. Pirating of touristia aura surrounding The Netherlands by actively comparing and contrast- ing contemporary Dutch culture and society with con- temporary American culture and society. How life would be different growing up in The Netherlands. Letter grading.

Upper Division Courses

103A-103B. Elementary Dutch. (4-4) Lecture, four hours; laboratory. Course 103B is requisite to 103B. Introduction to standard language of Nether- lands and one of three standard languages of Bel- giurn. Practice in grammar, listening, speaking, read- ing, and writing. P/NP or letter grading.

104A-104B. Accelerated Dutch. (4-4) Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A, 103B, 103C in three terms rather than three. Letter grading.

113. Modern Dutch and Flemish Literature in Translation. (4) Lecture, three hours. Readings and analysis of works by selected authors of Netherlands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaaijen, and Vroman. Letter grading.

131. Introduction to Modern Dutch Literature. (4) Discussion, three hours. Requisite: course 103B or 120. Selected works of literature of Netherlands and northern (Flemish) Belgium from mid-1850s to pres- ent, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as symbolist Beweging van Tachtig and post-War Beweging van Vijftig. P/NP or letter grading.

199. Directed Research or Senior Project in Dutch. (4) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or pro- ject required. May be repeated for credit. Individual contract required. P/NP or letter grading.

German

Lower Division Courses

1. Elementary German. (4) Lecture; five hours; labo- ratory, one hour. P/NP or letter grading.

1G. Elementary German for Graduate Students. (4) Lecture, four hours. Preparation for Graduate Divi- sion foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

2. Elementary German. (4) Lecture, five hours; labo- ratory, one hour. Enforced requisite: course 1. P/NP or letter grading.

2G. Elementary German for Graduate Students. (4) Lecture, four hours. Preparation for Graduate Divi- sion foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

3. Elementary German. (4) Lecture, five hours; labo- ratory, one hour. Enforced requisite: course 2. P/NP or letter grading.

5G. German for Graduate Students. (4) Lecture/ reading and translation, three hours. Requisite: course 2G. Preparation for Graduate Division foreign language reading requirement. Intensive reading and translation of humanities and social sciences texts. May not be applied toward degree requirements. S/U grading.

5. Intermediate German. (4) Lecture, four hours; labo- ratory, one hour. Enforced requisite: course 4. P/NP or letter grading.

8. Elementary German: Intensive. (12) Lecture, 15 hours; laboratory, five hours. Intensive basic course in German equivalent to courses 1, 2, and 3. P/NP or letter grading.

12. German Conversation. (4) Discussion, three hours. Enforced requisite: course 3. Conversation course designed for intermediate and advanced students who wish to improve their spoken command of German. Topics of current student interest to be used as basis for conversation. P/NP or letter grading.

50A-50B. Great Works of German Literature in Translation. (4-5) Lecture. May not be applied toward completion of major in German. P/NP or letter grading.

50A. Medieval Period through Classicism. (4) Lecture, three hours. Study and analysis of selected mas- terworks in English translation, including works from earliest period, such as heroic and courtly epic, to au- thors such as Grimmelshausen, Lessing, Schiller, and Goethe. P/NP or letter grading.

50B. Romanticism to Present. (5) Lecture, three hours; discussion, one hour. Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffman, Heine, Fontane, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, and Christa Wolf. P/NP or letter grading.
55. City as Text: German Exile Culture in Los Angeles. (4) Lecture, three hours. Not open for credit to students with credit for course 55W. Cultural and historical exploration of the site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

55W. German Exile Culture in Los Angeles. (5) Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 55. Reflection on history of German exilic culture in Los Angeles (literature, film, music, architecture, philosophy) during 1940s — on its significance from anthropological, philosophical, political, and historical perspectives. Satisfies Writing II requirement. Letter grading.

56. Figures Who Changed World. (5) Lecture, three hours; discussion, one hour. Introduction to strains of German philosophy and political thought that resonated internationally. Use of version of “great man” model of history to move beyond such models in its understanding of how, exactly, intellectual currents actually ferment changes in the world. Letter grading.

57. Hollywood and Germany. (5) Lecture/screenings, five hours; discussion, one hour. Examination of images of Germany generated by Hollywood, cultural/historical interface between Hollywood and Germany, and cultural stereotypes to be used as model for principal questions of society and philosophical thinking. P/NP or letter grading.

57A. Berlin Film. (4) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film between 1919 and 1945. Analysis of technological and stylistic development of film from silent Expressionist films to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.

57B. German Film in Cultural Context: Early German Film. (4) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film since 1960 in its thematic and stylistic diversity. Films authored by Werner Herzog, Margarethe von Trotta are juxtaposed with commercial comedies of 1990s. Film discussions enhanced by interactive media. Letter grading.

57C. German Film in Cultural Context: New German Film. (4) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film since 1960 in its thematic and stylistic diversity. Films authored by Werner Herzog, Margarethe von Trotta are juxtaposed with commercial comedies of 1990s. Film discussions enhanced by interactive media. Letter grading.

58. Knights and Ladies, Sex and Power at Medeval Court. (5) Lecture, three hours; discussion, one hour. Introduction to culture of high medieval court, one of great achievements of European Middle Ages. P/NP or letter grading.

59. Holocaust in Film and Literature. (5) Lecture/screenings, five hours; discussion, one hour. History of Holocaust and its present memory through examination of challenges and problems encountered in trying to imagine its horror through media of literature and film. P/NP or letter grading.

60W. War. (5) Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Reflection on cultural history of war — on its significance from anthropological, cultural, and philosophical perspectives. Examine the long-standing relationship between these cultural sites. Discussion of how and why cultural stereotypes are generated and maintained, and why film is a uniquely powerful tool in ideological discourse. P/NP or letter grading.

61A-61D. Transatlantic Culture: Modern City in Central Europe. (5 each) Lecture, three hours; discussion, one hour. Historical exploration of major Central European cities and their cultures. P/NP or letter grading.

61A. Berlin; 61B. Weimar; 61C. Vienna; 61D. Prague.

88. Lower Division Seminar. (4) Seminar, three hours. Course of variable content limited to topics of current interest and offered whenever staff member is available. P/NP or letter grading.

Upper Division Courses

100A. German History and Culture before 1500. (4) Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of German culture and society from beginning to 1500 as represented in literature, art, and architecture. P/NP or letter grading.

100B. German History and Culture, 1500 to 1914. (4) Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of German culture and society as represented in literature, art, music, and architecture from Reformations and invention of printing to start of World War I. P/NP or letter grading.

100C. War, Politics, Art. (5) Lecture, three hours; discussion, one hour. Analysis of interrelationships between politics, social conditions, and arts with respect to World War II. Survey of German film history to be used as model for principal questions of society and philosophical thinking. P/NP or letter grading.

102A. German Film in Cultural Context: Early German Film. (4) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film between 1919 and 1945. Analysis of technological and stylistic development of film from silent Expressionist films to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.

102B. German Film in Cultural Context: New German Film. (4) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film since 1960 in its thematic and stylistic diversity. Films authored by Werner Herzog, Margarethe von Trotta are juxtaposed with commercial comedies of 1990s. Film discussions enhanced by interactive media. Letter grading.

M104. Tristan, Isolde, and History of Heterosexuality in Translation. (4) (Same as Women’s Studies M119.) Lecture, three hours. German, French, and English versions of Tristan and Isolde story from Middle Ages to 20th century. Particular attention to relation between political and sexual identity in each text and contemporaneous ideas about human sexuality. P/NP or letter grading.

106. Faust Tradition from Renaissance to Modern Age. (4) Lecture, three hours. Readings and discussions to focus on the Faust theme and intellectual history, including chapbooks of Doktor Faustus, Marlowe’s and Goethe’s dramas, and Thomas Mann’s and Bulgakov’s novels. Letter grading.

M108. Love and Sex in German Literary Tradition. (4) (Same as Women’s Studies M108.) Lecture, three hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

110. Nietzsche and Critique of Western Culture. (4) Lecture, two hours; discussion, one hour. Readings that focus on Nietzsche’s critique of Christianity, master/slave dynamic, and reciprocal relation between poverty and philosophy. Lectures and readings in English; additional readings in German for majors required to complete all readings in German. Letter grading.

112. Jewish Writing and Thought in German Culture. (4) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Readings may include selections from Luther, Heine, Paul Celan, Nelly Sachs, Anne Frank, and others. Letter grading.

114. German Exile Culture in Los Angeles. (4) Lecture, three hours. Cultural and historical exploration of exile as site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

116. Special Topics in Modern Literature and Culture. (4) Lecture, three hours. Content varies with instructor and may include authors such as Thomas Mann, Rilke, Kafka, Brecht, Christa Wolf, and others. May be repeated for credit. Letter grading.

117. Thomas Mann, Hesse, Böll, and Grass: German Nobel Prize Winners in English. (4) Lecture, three hours. Survey of Nobel-winning German texts with eye for degree to which these authors’ visions reflect Nobel’s ideals of peace and progress of human race. Texts include Weavers (Hauptmann), excerpts from Buddenbrooks (Mann), and Siddharta (Hesse). Viewing of films based on Lost Honor of Katharina Blum and Tin Drum. Letter grading.

118. Feminist Issues in German Literature and Culture. (4) Lecture, three hours. Analysis of major issues in German feminism today (e.g., status, creative work, and reception of women writers in various periods such as Romanticism, Fascism, and/or divided/unified Germanies). Letter grading.

119. Introduction to German Drama. (5) Lecture, four hours. Enforced requisite: course 3. Introduction to four German plays (readings variable) and to different types of drama — tragedy, comedy, tragicomedies, absurd, expressionist, heroic, and epic — and drama theory. Reading, discussion, and analysis of plays in detail, practice in performing roles in class, and writing of short responses in German. May be repeated for credit. Letter grading.

119B. German Play Production. (5) Lecture, four hours. Requisites: courses 3 (enforced), 119A. Staging of production of play in German, working intensively on German pronunciation together in class and individually over Pure Voice. Students responsible for different tasks in theater production, including dress rehearsals and technical jobs such as costumes, set, lighting, programs. Students with minor parts work collaboratively on technical aspects and program notes, which involve further reading (in consultation with instructor). Two performances take place at end of term. May be repeated for credit. Letter grading.

120. German Folklore. (4) Lecture, three hours. Surveys of various folklore genres in cultural context, including legends, proverbs, and cultural enactments such as carnival. Letter grading.

122. Fairy Tales and Fantastic. (5) Lecture, three hours; discussion, one hour. History and reception of folklore collected in Europe, with particular attention to ideology and influence of Grimms’ tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. P/NP or letter grading.

130A-130B. Conversation and Composition on Contemporary German Culture and Society I, II. (4-4) Lecture, three hours. Requisites: course 6. Course 130A is required to 130B. Themes as they emerge in contemporary German texts ranging from newspaper magazine articles to literature, with emphasis on speaking and writing proficiency. Presentation software featured. P/NP or letter grading.

134. Advanced German Language through Cultural History and Current Affairs. (4) Lecture, three hours. Requisites: courses 130A, 130B. Advanced German language course that juxtaposes cultural history with current affairs to teach complex speaking and writing skills of interpretation, analysis, and criticism. Reading list may include selections from Heidegger, Heine, Freud, and current authors. Students create their own interactive media presentations. Letter grading.

140A. Introduction to German Poetry. (4) Lecture, three hours. Close reading of representative examples of German lyric poetry from early as well as recent literatures, using systematic consideration of poetic conventions and forms, dictum, imagery, symbolism, and metrics. Letter grading.

140B. Introduction to German Drama. (4) Lecture, three hours. Lectures on dramatic genres (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, historical drama, etc.), including systematic review of dramatic forms, techniques, and theories. Texts selected from both contemporary and earlier periods. Letter grading.

140C. Introduction to German Narrative Prose. (4) Lecture, three hours. Analysis of narrative prose genres (e.g., short story, novella, fairy tales, etc.), including systematic review of narrative forms, techniques, and styles. Texts selected from both contemporary and earlier periods. Letter grading.

142. Introduction to 18th-Century Studies. (4) Lecture, three hours. Topics in Enlightenment literature, social history, and culture. Works by Goethe, Lessing, Schiller, Kant, Mozart, and others. Letter grading.

144. Introduction to 19th-Century Studies. (4) Lecture, three hours. Presentation of major texts from Romanticism to realism. Works by Kleist, Büchner, Heine, Fontane, and others. Letter grading.

145. 19th-Century German Philosophy. (4) Lecture, three hours; discussion, one hour. German philosophy, which may generally be characterized as philosophy taken rather than passive subsidence to be fundamental nature of all things, is one of Germany's greatest gifts to humanity. Exploration of first half of two-century history of German philosophy — period from Kant to Nietzsche, including Hegel, Kierkegaard, and Marx. Letter grading.

146. Introduction to Modern Literature. (4) Lecture, three hours. Analysis of selected modern works written between 1890 and 1945, including works by authors such as Thomas Mann, Kafka, Pille, Brecht, and others. Letter grading.

147. 20th-Century German Philosophy. (4) Lecture, three hours; discussion, one hour. German philosophy, which may generally be characterized as philosophy that takes activity rather than passive subsidence to be fundamental nature of all things, is one of Germany's greatest gifts to humanity. Exploration of second half of two-century history of German philosophy — period from Nietzsche through Habermas, including Heidegger, Gadamer, Jaspers, and Frankfurt School theorists. Letter grading.

148. Introduction to Contemporary Literature. (4) Lecture, three hours. Analysis and discussion of German, Austrian, Swiss, and ex-GDR literatures from 1945 to present. Examination of works by such writers as Heinrich Böll, Günter Grass, Friedrich Dürrenmatt, Elfriede Jelinek, and Christa Wolf with view to their specific historical context. Letter grading.

150. Language and Linguistics. (4) Lecture, three hours. Requisite or corequisite: course 130A. Theories and methods of linguistics, with emphasis on standard literary German language from time of Indo-European unity to modern, gender expectations, and social-political attitudes. Letter grading.

152. Studies in German Literature before 1750. (4) Lecture, three hours. Requisite: course 140A. Readings and analysis of major works from Middle Ages to baroque. Letter grading.

156. Goethe's Faust. (4) Lecture, three hours. Requisite: course 130A. Reading and discussion of Goethe's major work, Parts I and II, together with general consideration of other treatments of Faust theme in European literature. Letter grading.

162. Advanced Study of Contemporary Literature and Culture. (4) Lecture, three hours. Requisite: course 130A. Literature after 1945 in German-speaking countries, including issues such as nation, borders, ethnic identity, gender relations, and commercialization of culture. Letter grading.

170. Current Topics in Germanic Linguistics. (4) Lecture, three hours. Requisite: course 130A. In-depth investigation of one topic in field of Germanic linguistics, such as phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. May be repeated for credit. Letter grading.

180. Graduate Courses

202A. Bibliography, Research Methods, and Scholarly Writing. (4) Lecture, three hours. Introduction to current scholarly standards and methods of analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, library histories, and special attention to online resources. Practical exercises in analysis of sources, compilation and presentation of bibliographies, and writing of research papers. Letter grading.

201C. Theories of Literary Interpretation. (4) Lecture, three hours. Analysis and discussion of various models of literary interpretation and schools of thought such as hermeneutics, psychoanalytic criticism, social historical approaches, semiotics, and structuralism and poststructuralism. Topics vary with instructor. Letter grading.

202A. Middle High German. (4) Lecture, three hours. Introduction to Middle High German language, with particular emphasis on developing facility in reading. Study of vocabulary combined with introduction to poetic forms and cultural context. Letter grading.

202B. Readings in Middle High German Literature. (4) Lecture, three hours. Introduction to medieval German literature and literary history and to use of contemporary theory in study of medieval texts. Continued practice in reading Middle High German, although most texts to be read in modern translation. Letter grading.

204. Early Modern German Literature. (4) Lecture, three hours. Selected readings from 1500 to 1700, with introduction to development of German as modern literary language and to literary currents and cultural models. Impact of Thirty Years' War on German literary production and reception in German baroque. Letter grading.

207. Weimar Classicism. (4) Lecture, three hours. Reading and interpretation of major works of German classicism. May include problems in reception of classicism by later authors and cultural theorists. Letter grading.

208. Romanticism. (4) Lecture, three hours. Analysis of selected works and theories of German Romantics such as Friedrich Schlegel, Novalis, and Hoffmann, with attention to relationship between Romanticism and other periods. Letter grading.

210A. Naturalism, Symbolism, and Expressionism. (4) Lecture, three hours. Analysis of selected works (poetry, drama, prose) of early modernism from Hauptmann to Kafka. Discussion of sociological spectra and pluralism of styles and forms. Letter grading.

210B. 20th-Century Novel to 1945. (4) Lecture, three hours. Prose works in first half of 20th century as they express war experience, crisis of consciousness, and cultural conflicts between wars, as well as innovations in narrative technique. Letter grading.

211. Postwar Literature. (4) Lecture, three hours. Study of major works by German-speaking authors writing since World War II. Examination of issues such as identity crises, divided Germany, gender expectations, and social-political attitudes. Letter grading.

212. Contemporary Literature and Culture. (4) Lecture, three hours. Analysis of current cultural issues and their relation to literary production and interpretation. Topics may include areas such as feminism, postcolonialism, postmodernism, and contemporary theories of textuality. Letter grading.

213. Topics in Literature and Film. (4) Lecture, three hours. With focus on two different modes of cultural representation, examination of topics in German literature and film from Weimar Republic to present. Study of media theory, feminist film theory, and interrelationships between film, literature, and social history. Letter grading.

232. Old High German. (4) Discussion, three hours. Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical inter-pretation of these documents and identification of dia-lects used in their composition. S/U or letter grading.

C238. Linguistic Theory and Grammatical De-scription. (4) Lecture, three hours. Requisite: course 150 or Linguistics 20. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C172. Graduate students meet as group one additional hour each week and write research papers of greater length and depth. Letter grading.

251. Seminar: Germanic Linguistics. (4) Seminar, three hours. Current topics in synchronic or diachron-ic linguistics, such as specific issues in generative grammar, sociolinguistics and dialectology, or lan-guage contact. Letter grading.

252. Seminar: Historical and Comparative Ger-manic Linguistics. (4) Seminar, three hours. Topics selected from field of historical German phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of Germanic languages, development of Germanic verbal and nominal morphology, proto-Ger-manic syntax). S/U or letter grading.

257. Seminar: Age of Goethe. (4) Seminar, three hours. Selected topics in literature and culture be-tween 1775 and 1832, with special emphasis on work of Goethe and Schiller as it relates to philosophic texts such as Hegel's Phänomenologie des Geistes or as it relates to historical events such as French and American Revolutions. Letter grading.

258. Seminar: Romanticism. (4) Seminar, three hours. Discussion of specific author or topic from Ro-mantic period, possibly in close connection with course 203B. Critical review of secondary works. S/U or letter grading.

263. Seminar: Literary Theory. (4) Seminar, three hours. Special focus on particular theoretical school or interpretive paradigm. Content varies with instruc-tor. Letter grading.

265. German Philosophy. (4) Seminar, three hours. German philosophical tradition is one of most influen-tial, difficult, and problematic Western world has known. Beginning with Kant's Critique of Pure Reason and continuing through Hegel, Marx, Nietzsche, and Heidegger to Arendt and thinkers of Frankfurt school, German philosophers have explored, more deeply and rigorously than any other Western thinkers, na-ture and limits (if any) of human mental activity. Re-sults have been basic to social, political, and aesthetic theories as well as to philosophy itself. Exploration of thought of one member of that tradition by concentrat-ing yearly on one exemplary text. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice per-sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-ance and supervision of regular faculty member re-sponsible for current instruction at UCLA. May be repeated for credit. S/U grading.

495. Approaches to Foreign Language Pedagogy. (4) Seminar, one hour; discussion, two hours. Issues include development of current theories of second-language acquisition, effects of these theories on lan-guage teaching, psycholinguistics, sociolinguistics, assessment techniques, use of multimedia in foreign language pedagogy, and design of syllabi for basic foreign language courses. S/U grading.

496. Teaching with Technology. (4) Seminar, one hour. Introduction for teaching assistants to techno-logical resources available to them and demonstration of how to incorporate computer-based assignments into curriculum of pedagogy. Effects of these technologies on teaching processes and problems of using different types of material both inside and outside classroom, as well as how technology can be used to create teaching portfolios and interactive learning tools. S/U grading.

569. Directed Individual Study or Research. (4) Tutorial, three hours. To be arranged with faculty member who directs study or research. Required re-search paper must be filed with department chair. S/U grading.

596. Directed Individual Study or Research in Yid-dish. (4) Tutorial, to be arranged. Limited to junior-level students. Individual intensive study or more specialized investigation of topics in Yiddish, with scheduled meetings to be ar-ranged between faculty member and student. As-signed reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Yiddish

Upper Division Courses

101A. Elementary Yiddish. (4) Lecture, four hours. Introduction to grammar; in instruction in listening, speaking, reading, and writing skills. P/NP or letter grading.

102B-102C. Intermediate Yiddish. (4-4) Lecture, three hours. Requisite: course 102A. Course 102B is requisite to 102C. Grammatical exercises, reading and linguistic analysis of texts, conversation. P/NP or letter grading.

121C. Special Topics in Yiddish Literature in Eng-lish Translation. (4) Lecture, three hours. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of wide range of 19th- and 20th-century literature. P/NP or letter grading.

131C. Special Topics in Yiddish Literature. (4) Lecture, three hours. Requisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of wide range of 19th- and 20th-century literature. P/NP or letter grading.

197. Individual Studies in Yiddish. (2 to 4) Tutori-al, to be arranged. Limited to junior-level students. Individ-ual intensive study or more specialized investigation of topics in Yiddish, with scheduled meetings to be ar-ranged between faculty member and student. As-signed reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

598. Research for and Preparation of Ph.D. Dis-sertation. (4 to 12) Tutorial, three hours. To be ar-ranged with faculty member who directs study. May be repeated. S/U grading.

599. Research for and Preparation of Ph.D. Dis-sertation. (4 to 12) Tutorial, three hours. To be ar-ranged with faculty member who directs study. May be repeated. S/U grading.

596. Directed Individual Study or Research in Yid-dish. (4) Tutorial, to be arranged with faculty member who directs study or research (course section to be identified by two-letter code using initials of sponsor-ing instructor — see department for I.D. number). May be repeated once. S/U grading.

GERONTOLOGY
Interdisciplinary Minor
College of Letters and Science

UCLA
8631 Franz Hall

Larry L. Butcher, Ph.D., Chair
Faculty Administrative Committee
Larry L. Butcher, Ph.D. (Psychology)
Alan D. Castel, Ph.D. (Psychology)
Steven G. Clarke, Ph.D. (Chemistry and Biochemistry)
Jaana H. Juvonen, Ph.D. (Psychology)
Theodore F. Robles, Ph.D. (Psychology)
Arnold B. Scheibel, M.D. (Neurobiology, Psychiatry and Biobehavioral Sciences)
Fernando Torres-Gil, Ph.D. (Public Policy Social Welfare)

Scope and Objectives
The worldwide expansion of the older adult population ensures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in Gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families become older.

Undergraduate Study
Gerontology Minor
To enter the Gerontology minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (28 units): Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M119X, M150, Community Health Sciences 90, Psychology M117J, 124G, 195A (only 8 units may be applied toward the minor; fieldwork placements must be approved by the chair of the minor), Women’s Studies 185 (only when the special topic is women, health, and aging).

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Gerontology
Upper Division Courses
M104C. Diversity in Aging: Roles of Gender and Ethnicity (4) (Same as Social Welfare M104C and Women’s Studies M104C) Lecture, four hours. Exploration of complexity of variables related to diversity in the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging (4) (Same as Social Welfare M104D) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

M104E. Social Aspects of Aging (4) (Same as Social Welfare M104E) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

M119O. Psychology of Aging (4) (Same as Psychology M119O) Requisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at and stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

M119X. Biology and Behavioral Neuroscience of Aging (4) (Same as Psychology M119X) Lecture, three hours. Designed for juniors/seniors. Biologic mechanisms of aging process and its terminal phase, death, have been increasingly studied in recent years. Establishment of what is known experimentally about biology and behavioral neuroscience of aging and evaluation of theories developed to account for this knowledge. P/NP or letter grading.

120. Sex and Aging (4) Lecture, three hours. Sexuality in aging from psychological, psychobiological, physical, and psychosocial perspectives, with emphasis on differences between females and males concerning physical and social changes that occur with aging and how this impacts on emotional well-being and human sexual response. P/NP or letter grading.

M140. Introduction to Study of Aging (4) (Same as Psychology M140 and Social Welfare M140) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging: biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

M141. Women, Health, and Aging: Policy Issues (4) (Same as Health Services CM141 and Women’s Studies M141) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

Daniel S. Treisman, Ph.D.

Scope and Objectives
The Global Studies major provides undergraduate students with a rigorous interdisciplinary education in the principal issues confronting today's globalized world. The curriculum features three thematic pillars that capture the principal dimensions of the unprecedented depth and breadth of interconnections among nation-states, ethnic and religious groups, and individuals. Culture and society courses concentrate on the tensions between local ways of life with deep historical, linguistic, ethnic, and religious roots and today's pressures for transnational cultures and multiple identities, fueled by the communication of ideas and the movement of people all around the world. Governance and conflict courses focus on challenges to the nation-state from forms of governance above (regional and global forms of governance) and below (autonomy and secessionist movements) and from security threats beyond interstate warfare (ethnic conflict, terrorism, civil wars). Markets courses address the interactions among global, regional, national, and subnational economic processes and market dynamics, their effects on different societies with respect to economic growth, poverty, inequality, and the interactions among market forces, political institutions, and public policy.

The curriculum draws on insights from disciplines across the humanities and social sciences to give students the theoretical and methodological skills and knowledge base necessary to understand this complex and rapidly changing world.

Undergraduate Study
Global Studies B.A.

Admission
Admission to the Global Studies major is by application only and is highly competitive, with only a limited number of students admitted each year. To be eligible to apply, UCLA students must have completed all non-language preparation for the major courses and one modern foreign language equivalent to level 3 by the end of the term in which they are applying. Any remaining language courses may be completed after students have been accepted to the major. Each preparation for the major course must be taken for a letter grade, and the UC grade-point average for all preparation courses must be a minimum of 3.25. In addition, students must have earned a grade of B or better in Global Studies 1.

The application period is once per year, and students must apply no later than the end of Fall Quarter of their junior year.

Note: Meeting the above minimums does not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Preglobal Studies Major
Incoming freshman and transfer students may be admitted as Preglobal Studies majors on acceptance to UCLA. Preglobal Studies majors must apply for the Global Studies major at the end of Fall Quarter of their junior year.

Preparation for the Major
Required: Global Studies 1 with a grade of B or better; one statistics course selected from Political Science 6, 6R, Statistics 10, 11, or 12; demonstrated proficiency equivalent to level 6 at UCLA in one modern foreign language; and five additional courses as follows: (1) one culture and society course selected from Anthropology 9, Comparative Literature 1C or 2C, 1D or 2D, Ethnomusicology 25, Geography 3, 6, History 2B, or World Arts and Cultures 20; (2) one governance and conflict course selected from History 22, Political Science 10, 20, 30, 50, 50R, or Sociology 1, and (3) one markets course selected from Economics 1, 2, or Geography 4. The remaining two courses, taken from two separate categories, may be selected from the three lists above. One course from the following list may be applied toward the culture and society category: Asian 70C, French 14, 14W, Italian 42A, 42B, Near Eastern Languages 50C, Portuguese M42, M44, Russian 90B, 90BW, Spanish M42, M44. A minimum grade-point average of 3.25 is required in these courses.

Transfer Students
Transfer applicants to the Preglobal Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one modern world history course, one major world region languages and cultures course, one international politics course, one macroeconomics or microeconomics course, one statistics course, and demonstrated proficiency equivalent to level 3 at UCLA in one modern foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Global Studies 100A, 100B, and seven elective courses, with at least two from each of the following categories and at least three in one category: (1) culture and society — Anthropology M154Q, Art History C180A, Chicana and Chicano Studies M147, Communication Studies 122, Comparative Literature 100, 114, 115, Film and Television 110C, Film and Television 114, French 142, Geography 110C, 111, History 121E, 121F, 135C, Political Science 122A, 138B, 166, Public Policy CM117, Sociology 183; (2) markets — Anthropology 153P, Chicana and Chicano Studies 125, Economics 110, 120, 121, 122, 181B, Geography 148, History 131A, International Development Studies M100B, Political Science 124A, M167C, Sociology 183.

Global Studies minors are highly encouraged to participate in a summer Global Learning In-
stitute. The courses offered, Global Studies 110A and 110B, may be applied toward any two of the elective categories (culture and society, governance and conflict, and markets). No more than two upper division courses (8 to 10 units) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Global Studies

Lower Division Course

1. Introduction to Global Studies. (5) Lecture, three hours; discussion, one hour. Introduction to phenomena of globalization and broad range of cultural, economic, political, and social issues confronting globalized world today. Structured around three thematic categories — culture and society, governance and conflict, and markets — designed to capture principal dimensions of multifaceted connections among nation-states, nongovernmental organizations, ethnic, cultural, and religious groups, and populations around world. P/NP or letter grading.

Upper Division Courses

100A. Globalization: Concepts and History. (5) Lecture, three hours; discussion, one hour. Enforced requisite: course 1. Introduction to concepts and history of globalization, addressing different processes and forms of globalization while attempting to develop methods and theories through which aspects of globalization can be more readily understood. Letter grading.

100B. Globalization: Contemporary Issues. (5) Lecture, three hours; discussion, one hour. Enforced requisite: course 100A. Application of theoretical tools and historical perspective of course 100A to most pressing contemporary issues concerning globalization. Issues include globalization and Americanization; migration, culture, and identity; terrorism and civil war; global and regional governance; global media, entertainment, and communication; and globalization and inequality. Letter grading.

110A. Globalization in Context. (5) Lecture, six hours. Requisite: course 100B. Corequisite: course 110B. Culture, economy, history, and politics of different locations around world and how they are affected by globalization. Field trips included to gain first-hand experience of these processes. Offered in summer only. P/NP or letter grading.

Beth A. Glenn-Mallouk, Ph.D.
Robert J. Nordyke, Ph.D.
Lori S. Pellicioni, Ph.D., J.D.
John Riddle, Ph.D.
Leah J. Yriesman, Ph.D.

Scope and Objectives

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H., see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/
232. **Governmental Health Services and Trends.** (4) Lecture, four hours. Preparation: two upper division social sciences courses. Requisite: course 100. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions. S/U or letter grading.

**M233. Health Policy Analysis.** (4) Same as Community Health Sciences M252.) Lecture, three hours. Requisites: courses 100 or 200, M236, M237. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of lifecycle of public policy. Letter grading.

234. **Health Services Organization and Management Theory.** (4) Lecture, four hours. Preparation: two upper division social sciences courses. Requisite: course 100. Application of contemporary organization and management theory to systems that provide personal healthcare services. Environmental characteristics, missions/goals, structure, and processes of health services organizations. S/U or letter grading.

235. **Law, Social Change, and Health Service Poli- cy.** (4) Lecture, four hours. Preparation: two upper division political science courses. Requisite: course 100. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. S/U or letter grading.

M236. **Microeconomic Theory of Health Sector.** (4) Same as Public Policy M262.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of healthcare system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

237A. **Special Topics in Health Services Research Methodology.** (4) Lecture, four hours. Requisite: Bio- statistics 200A. Approaches to conceptualization, modeling, design, literature reviews, sampling, data collection, and research. Development of health services research proposal required. Letter grading.

237B. **Special Topics in Health Services Research Methodology.** (4) Lecture, four hours. Requisites: courses 237A, 237B, Biostatistics 200A, 200B (or 201). Designed for doctoral students. Intended to train students in statistical and economic methods used in health services research, with focus on practical application of advanced regression models. Letter grading.

238. **Politics of Healthcare.** (4) Lecture, four hours. Requisite: course 100. Concepts and procedures for political analysis; national, state, and local politics in healthcare; examination of selected case studies. S/U or letter grading.

239. **Aging and Long-Term Care.** (4) Lecture, four hours. Requisites: courses 100, 238, Community Health Sciences 270A, 270B. Care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including pop-ulations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Letter grading.

240. **Healthcare Issues in International Perspec- tive.** (4) Lecture, four hours. Preparation: two upper division social sciences courses. Analysis of crucial issues in health care; manpower policy, economic support, health fa- cilities, patterns of health service delivery, regulation, planning, and other aspects of healthcare systems, as probed in settings of European welfare states, develop- ing nations, and socialist countries. S/U or letter grading.
CM241. Women, Health, and Aging: Policy Issues. (4) (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Preparation: two upper division courses in health services, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes, and women experience in delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM141. Letter grading.

M242. Determinants of Health. (4) (Same as Community Health Sciences M232.) Lecture, two hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

249A-249Z. Special Topics in Health Services. (2 to 4 each) Hours to be arranged. Requisites for each offering announced in advance by department. Advanced seminars covering special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change.

249D. Principles of Organization Leadership: Applications in Public Health and Welfare. (4) Lecture, three hours; discussion, three hours. Designed for graduate students. Examination of principles and models of organization leadership, including presentation by current leaders in the fields of health and welfare. Theories and empirical investigations of leadership qualities. Letter grading.

M249E. Advanced Topics in Health Economics. (4) (Same as Public Policy M266.) Seminar, four hours. Requisites: courses 200A, 200B, M236. Advanced treatment of number of topics in health economics, including mental health economics, pharmaceutical economics, and relationship between labor supply, welfare, and health. Letter grading.

249F. Quality Assurance and Assurance. (4) Seminar, four hours. Preparation: one health services or epidemiology course. Requisites: course 100, Biostatistics 100A, Epidemiology 100. Fundamental issues in quality assessment, quality assurance, and measurement of health status. S/U or letter grading.

249G. Disease Management and Decision Analysis. (4) Seminar, three hours. Requisites: courses 200A, 200B. Doctoral-level seminar focusing on techniques to assess a broad spectrum of medical technologies: therapeutic and diagnostic tests and procedures, clinical practice patterns, public health interventions, and pharmaceuticals. Demonstration of how decision analysis provides basic framework for conducting various economic evaluations. Letter grading.

249H. Current Research Issues. (2 to 4) Discussion, two hours. Designed for doctoral students. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

249I. Seminar Series. (2 to 4) Seminar, two hours. Designed for doctoral students. Presentation of proposed or ongoing research projects by faculty and students, with discussion to determine relevant methodological and policy issues, as well as to offer constructuctive criticism. S/U or letter grading.

M249J. Mental Health Services. (4) (Same as Psychiatry M251.) Lecture, three hours. Requisites: courses 200A, 200B. Designed for students interested in healthcare delivery and mental health. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes. (4) Lecture, three hours. Requisites: courses 200A, 200B, M242, Biostatistics 100A. Designed for students interested in participa-tion of students in critical review and discussion of selected papers dealing with core topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. Letter grading.

M249L. Ethical Issues in Public Health. (4) (Same as Community Health Sciences M249L.) Lecture, four hours. Requisites: courses 200A, 200B. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, confidentiality, managed care, reimbursement, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

249M. Review of Current Health Services Management Literature. (4) Lecture, two hours. Designed to provide first-year M.P.H. professional students with basic skills, and acquisition and quantitative analysis of data for healthcare management, as well as written and oral presentation of these results. Letter grading.

249O. Tobacco and Public Policy. (4) Lecture, four hours. Information and analysis of principal issues in tobacco control. As administrators, researchers, and activists in field of tobacco control, professionals in all specialties of public health should be fully informed on strategies to combat worldwide tobacco epidemic. Letter grading.

249P. Ethical Issues and Healthcare Executive. (2) Lecture, two hours. Introduction to ethical issues facing managers in healthcare organizations today. Understanding and resolving these issues within a framework of Ethical Theory and Management. Focus on social and ethical implications related to implementing evidence-based practice and integration of evidence-based practice. Letter grading.

249Q. Editorial Board Apprenticeship. (2) (Formerly numbered 249G.) (Same as Psychiatry M210.) Seminar, two hours. Designed for postdoctoral fellows and advanced Ph.D. students. Participation in peer review process for academic journal, Health Psychology, with consideration of interface between behavioral science, health, and medicine. Reading and discussion of submissions and advising of editor on suitability for full review. S/U or letter grading.

249R. Cancer Prevention and Control Research. (2) Seminar, two hours. Limited to graduate students. Presentations by faculty members and outside speakers, as well as students, on research topics in cancer prevention and control as well as career development issues such as grant writing, scientific review process, research funding, and other academic issues. Preparation: prior student research in progress as well as solicitation of feedback from class regarding grant proposals, manuscript submissions, and future directions for research. Possible reviews of assigned articles, with focus on specific topics in cancer prevention and control. S/U grading.

249S. Introduction to Science of Implementing Evidence-Based Practice. (4) Seminar, four hours. Requisites: courses 200A, 200B. Designed to provide basic understanding of implementing evidence-based practice. Through series of didactic teaching and interactive case discussions, introduction to integrated framework to understand key issues related to implementation practice and set of tools to apply evidence base to improving healthcare quality. Guest lecturers included who are nationally recognized expert areas. Interactive discussion and case analyses based on materials closely related to lecture material. S/U or letter grading.

249T. Cost-Effectiveness Analysis. (4) Seminar, four hours. Requisites: courses 200A, 200B. Designed to conduct uncertainty analyses, understand methods used to construct quality-adjusted life years (QALYs), conduct Markov analyses, critically analyze large-scale published cost-effectiveness analyses (CEAs), effectively present strengths and limitations of published CEAs to peers, and use advanced features of TreeAge software to construct and analyze CEA models, including Markov models.

250. Evolution of Health Professions in the 20th Century. (4) Lecture, two hours; discussion, two hours. During the 20th century there have been dramatic changes in composition of “helping” professions. Review of forces leading to these changes and description of processes by which lay persons are educated/socialized into major subgroups of health professions. Review of major social forces external to healthcare system that affect its composition. Letter grading.

251. Quality Improvement and Informatics. (4) Lecture, four hours. Requisites: course 100, Biostatistics 100A. Introduction to concepts of healthcare quality measurement, process improvement, and information systems, as well as organizational aspects of implementing them. Letter grading.

M252. Medicare Reform. (4) (Same as Public Policy M257.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retire-ment of baby-boom generation. Letter grading.

M253. Advanced Topics in Health Services Research: Access to Care. (4) (Same as Community Health Sciences M253.) Lecture, three hours; outside study, five hours. Requisites: courses 237A, 237B, and 237C, or Community Health Sciences 210, 210A, and 210B. Doctoral seminar designed to explore health services research regarding access to healthcare and policies to enhance access. Topics include conceptual frameworks, measurement issues, study designs, analytic approaches, and substantive findings and trends in access and access-related policies. Letter grading.

254. Multidisciplinary Perspectives: Research Approaches to Managed Care. (4) Seminar, three hours. Requisites: courses 100, or 200A and 200B. Exploration of perspectives and methodologies of nine academic disciplines relevant to health services research. Scholars in each discipline introduce their framework and discuss applications to current research in managed care. Letter grading.

255. Obesity, Physical Activity, and Nutrition Seminar. (4) (Same as Community Health Sciences M234.) Seminar, three hours; outside study, one hour. Designed for graduate students. Multidisciplinary in- troduction to graduate level to epidemiology, physiology, and current state of preventive and therapeutic interventions for obesity in adults and children, including public health policy approaches to healthy nutrition and physical activity promotion. S/U or letter grading.

260A-260B. World Health. (2-2) Lecture, two hours. Designed for graduate students. Overview of world health, with emphasis on healthcare outside the U.S. Key areas include burden of infectious diseases, health economics, and the role of technology and healthcare policy on delivery. In Progress (260A) and letter (260B) grading.
265. Challenges in Clinical Health Services Research. (4) Lecture, four hours. Requisites: courses 200A, 200B. Designed to prepare students for challenges involved in conducting health services research on clinical topics and populations. Topics include formulating appropriate questions, identifying sources, mechanism of conducting field studies, identifying funding sources, writing grants, and publishing findings. S/U or letter grading.

266A-266B. Community-Based Participatory Health Research: Methods and Applications. (4-4) Lecture, one hour; discussion, one hour; fieldwork, two hours. Limited to clinical scholars fellows. Mentoring of field experiences with introduction to critical issues in conducting research in community settings. Review of assignments, interventions, and evaluation designs for community settings and discussion of practical issues in partnering with communities. Letter grading.

M269. Healthcare Policy and Finance. (4) Same as Public Policy M269.) Seminar, three hours; outside study, nine hours. Exploration of demand for health insurance, policies for public insurance (Medicaid and Medicare), uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer movement, and rise of competitive health markets. Letter grading.

M274. Health Status and Health Behaviors of Racial and Ethnic Minority Populations. (4) Same as Psychology M274.) Lecture, two hours; discussion, one hour. Limited to students. Overview of physical and mental health behaviors and status of major racial/ethnic groups in the U.S. Where appropriate, discussion of international issues as well. S/U or letter grading.

286. American Political Institutions and Health Policy. (4) Lecture, three hours; discussion, one hour. To effectively participate in policy process as analyst, policymaker, advocate, or citizen, it is necessary to understand institutional and political context within which policy is made. Introduction to federal and state policymaking, with focus on health policy. Discussion of federalism and constitutionalism. Examination of stakeholders, public, interest groups, and nature of issue space for health policy. Structure and process of political institutions at federal level, Congress, President, executive agencies, courts, and administrative law. State responsibilities and federal/state relations. How analysis enters policy process with examination of roles of federal analytic agencies and private research and advocacy groups. Lecture grading.

M287. Politics of Health Policy. (4) Same as Community Health Sciences M287.) Lecture, three hours; discussion, one hour. Requisites: courses 200A and 200B, or Community Health Sciences 210. Examination of role of policymakers and law in practice of public health. Entire process, from systems conceptualization and design to project planning and development to system implementation and use. Letter grading.

M411. Issues in Cancer Prevention and Control. (4) Same as Community Health Sciences M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of cancer epidemic, cancer control goals for nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

M420. Children with Special Healthcare Needs: Systems Perspective. (4) Same as Community Health Sciences M420 and Social Welfare M290.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices that have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

M428. Child and Family Health Program Community Leadership Seminar. (2) (Same as Community Health Sciences M428.) Seminar, two hours. Designed for graduate students. Examination of characteristics of community-based organizations (CBOs) and role of leadership in decision-making process involved in major issues facing maternal and child health in Los Angeles County. Focus on specific leadership competencies that are or should be employed by organizations effective in shaping maternal and child health program (or population-level policies and programs). Leaders from CBOs in Los Angeles meet with students, comment on their practicum experiences, and underscore community leadership concepts demonstrated by those CBOs. S/U or letter grading.

430. New Developments in E-Health and Internet. (4) Lecture, four hours. Introduction of new technologies in healthcare e-commerce/internet/new media area, with emphasis on general background, review of applications, and discussion of organizational and managerial issues dealing with successful use and implementation of technologies. S/U or letter grading.

431. Managerial Processes in Health Services Organizations. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 100, 234. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganization. Unique features of health services organizations are stressed as applied presentations are offered. Letter grading.

432. Integrative Seminar: Health Services Management. (4) Seminar, four hours. Requisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty. S/U or letter grading.

434. Employer/Employee Health Management. (4) Lecture, two hours; discussion, two hours. Preparation: a combination of three graduate courses in health planning, hospital finance, health policy, health insurance, occupational health, health services research, and health information systems. Requisite: course 100. Preview and analysis of how employer and employee groups provide, sponsor, and manage health-related services for others. S/U or letter grading.

438. Issues and Problems of Local Health Administration. (4) Lecture, three hours. Preparation: one health services course. Requisites: course 100, Epidemiology 100. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions. Letter grading.

439. Dental Care Administration. (4) Lecture, three to four hours. Requisites or corequisites: Biostatistics 100A, Epidemiology 100. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and utilization mechanisms. Letter grading.

M449A-M449B. Child Health, Programs, and Policies. (4-4) (Same as Community Health Sciences M449A-M449B.) Lecture, four hours. Requisite: course 100. Course M449A is requisite to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

U.S. History / 367
Undergraduate Study

History B.A.

The History Department’s undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major). Each course must be taken for a letter grade.

Preparation for the Premajor and Major

Required for the Premajor: Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22) and one course from 96W or 97A through 97O.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor’s office in 6248 Bunche Hall.

Required for the Major: Three additional lower division history courses.

Transfer Students

Transfer applicants to the History major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one semester or two quarters of history of Western civilization or world history, one historical practice course, and three additional lower division history courses.

Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) History 191.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History

Effective Fall Quarter 2002 for entering freshmen, no course credit is granted for any AP Test.

Honors Program

The honors program is designed for History majors who are interested in completing a year-long research project that culminates in an honors thesis. A 3.5 departmental grade-point average is required for admission. To graduate with departmental honors, students must have a cumulative or overall GPA of at least 3.0 in all University-level coursework and at least a 3.5 GPA in all coursework required for the major.

The honors thesis must be completed in three terms, on the basis of work carried out in History 198A, 198B, and 198C. Students must register their intention to undertake an honors thesis with the undergraduate affairs vice chair no later than Spring Quarter of their junior year.

When students register for honors, they must provide the undergraduate affairs vice chair with a two-paragraph description of their thesis project, which must be approved in writing by the faculty member who agrees to act as their adviser. The undergraduate affairs vice chair must also approve the proposed project in writing.

The faculty adviser is primarily responsible for guiding the thesis work to its completion and assigns grades for the honors courses after the thesis is complete. The honors thesis should be 40 to 60 pages in length and be based on primary source material. Determination of the level of honors awarded (no honors, honors, or highest honors) is made by the undergraduate affairs vice chair, acting in conjunction with the honors committee, at the end of the term in which the thesis is completed.

History of Science and Medicine Minor

The History of Science and Medicine minor is designed for students who wish to augment their major, perhaps in one of the sciences, with a series of courses that analyze the historical growth, impact, and significance of science and medicine in Western and world cultures. The minor consists of a choice of lower division courses that expose students to overviews of science and medicine in large time periods or to specific thematic concerns. Upper division courses offer more focused and often smaller classes that explore crucial episodes or areas with a more rigorous and sophisticated content and methodology.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units and at least one lower division course in the history of science or medicine for a letter grade, and file a petition with the minor adviser in 6265 Bunche Hall.

Required Lower Division Courses (12 units): Three courses from History 2B, 2D, 3A through 3D, Philosophy 8.

Required Upper Division Courses (20 units): Five courses from Anthropology 182, 183, History 179A through 180C, any upper division courses, including History 198A, 198B, 198C, and History 199.
Honors Collegium courses with history of science or history of medicine content. Neurobiology M168 (or Physiological Science M168), Philosophy 124.

Each year certain undergraduate seminars in the History 191 sequence are designated as applicable to the upper division minor requirements. Students may also petition to have other relevant courses, including those from other departments, applied toward the upper division requirements.

At least one upper division course, to be selected and approved in consultation with the undergraduate or faculty adviser, must involve writing a research or interpretative paper of significant length and intellectual content. No more than one upper division course may be applied toward both this minor and a major or minor in another department or program. Transfer credit for courses may be subject to departmental approval.

One course may be taken on a Passed/Not Passed basis; each of the other minor courses must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnnet.ucla.edu/gasas/library/pgmrinitro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of History offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in History.

History

Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. (5-5-5) Lecture, three hours; discussion, two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further begining students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. P/NP or letter grading.

1A. Ancient Civilizations. Prehistory to Circa A.D. 843; 1B. Circa A.D. 843 to Circa 1715; 1C. Circa 1715 to Present.

1A-1B-1C. Introduction to Western Civilization (Honors). (5-5-5) Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 1A, 1B, 1C. P/NP or letter grading. 1AH. Ancient Civilizations, Prehistory to Circa A.D. 843 (Honors); 1BH. Circa A.D. 843 to Circa 1715 (Honors); 1CH. Circa 1715 to Present (Honors).

2A. Power, Ethics, and Technological Change. (4) Lecture, three hours; discussion, two hours. Examination of historical and theoretical relationships between ethical behavior, power, and technological change. Topics include engineering practice and business profits, gender and engineering cultures, product liability and consumer safety, and engineering and computer ethics. Historical case studies include Three Mile Island, Chernobyl, the DC-10, and Challenger Disaster. P/NP or letter grading.

2B. Social Knowledge and Social Power. (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 2A. P/NP or letter grading.

2C-2D. Religion, Occult, and Science. (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

2C. Mystics, Heretics, and Witches in Western Traditi-

ion, 1000 to 1600. (5) Lecture, three hours; discussion, two hours. Specific aspects of elite and popular culture narratives in early modern Europe. Manner in which men and women sought to explain, order, and escape terrors of their lives by embracing transcendental religious experiences and dreaming of apocalypse and witchcraft. Examination of experienc-
es in context of genesis of the state, birth of a new science, and economic and social change. P/NP or letter grading.

2D. Science, Magic, and Religion, 1600 to Present. (5) Lecture, three hours; discussion, two hours. Science and religion as historical phenomena that have evolved over time. Examination of earlier mind-set before 1700 when into science fitted elements that came eventually to be seen as magical. How Western cos-

mologies became “disenchanted.” Magical tradition transformed into modern mystics. Political implications of these movements; science in totalitarian set-
tings as well as “big science” during the Cold War. Discussion of anti-science and cult movements. P/NP or letter grading.

3A-3B-3C. Introduction to History of Science. (5-5-

5) Lecture, three hours; discussion, two hours. History majors may not apply these courses on science gen-

eral education requirements. P/NP or letter grading.

3A. Scientific Revolution. (5) Lecture, three hours; discussion, two hours. Survey of origins of physical sciences involving transformation from Aristotelian to Newtonian model of natural world, rise of experimental science, and origin of sci-

entific societies. P/NP or letter grading.

3B. History of Science from Newton to Darwin. (5) Lecture, three hours; discussion, two hours. In this pe-

riod science became part of Enlightenment campaign for reason and of culture of an Industrial Revolution. New social science and evolutionary debates about science and religion demonstrate its rising intellectual and practical significance. P/NP or letter grading.

3C. History of Modern Science, Relativity to DNA. (5) Lecture, three hours; discussion, two hours. Ranging from starting new physics of relativity and the quan-
tum, and of nuclear power to molecular reductionism in biology and campaigns for statistical objectivity, examination of involvement of science in technologi-
cal, military, intellectual, and political changes of the 20th century. P/NP or letter grading.

3CH. Introduction to History of Science: History of Modern Science, Relativity to DNA (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 3C. P/NP or letter grading.

3D. Themes in History of Medicine. (5) Lecture, three hours; discussion, two hours. Examination, through selected lecture and discussion of primary sources, of five important themes in development of modern medicine: nature of diagnosis, emerg-

gence of surgery, epidemics, conception and treat-

ment of insanity, and use of medical technology. P/NP or letter grading.

4. Introduction to History of Religions. (5) Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greek and early Christian theories to modern history with its discoveries of religions of Indi-
da, China, ancient Near East, etc., and problem of encounter of various religions in the 19th and 20th centuries. P/NP or letter grading.

8A. Colonial Latin America. (5) Lecture, three hours; discussion, two hours. General introduction to Latin American history from contact period to inde-
pendence (1490s to 1820s), with emphasis on con-
vengence of Native American, European, and African cultures in Latin America; issues of ethnicity and gen-
der; development of colonial institutions and societ-
es; and emergence of local and national identities. Readings focus on writings of Latin American men and women from the period studied. P/NP or letter grading.

8AH. Colonial Latin America (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8A. P/NP or letter grading.

8B. Political Economy of Latin American Underde-

gelopment, 1750 to 1930. (5) Lecture, three hours; discussion, two hours. Interaction of capitalist and modern modes of social organization in Latin Ameri-
can history, particularly during the “long” 19th century, by focusing on relationship between economic change, social and cultural structures, and politics in the region. P/NP or letter grading.

8BH. Political Economy of Latin American Under-
development, 1750 to 1930 (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8B. P/NP or letter grading.

8C. Latin American Social History. (5) Lecture, three hours; discussion, two hours. Historical and contemporary perspective of role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history. P/NP or letter grading.

8CH. Latin American Social History (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8C. P/NP or letter grading.

8D. Latin American Social History (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8D. P/NP or letter grading.

9A. History of India. (5) Lecture, three hours; discussion, two hours. Introductory survey for beginning stu-
dents of major cultural, social, and political ideas, tra-
ditions, and institutions of Indic civilization. P/NP or letter grading.

9C. History of Japan. (5) Lecture, three hours; discussion, two hours. Survey of Japanese history from ear-
liest recorded time to the present, with emphasis on development of Japan as a cultural daughter of Chi-

na. Attention to manner in which Chinese culture was Japanized and aspects of Japanese civilization which became unique. Creation of the modern state in the last century and impact of Western civilization on Japan.
P/NP or letter grading.

9CH. History of Japan (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 9C. P/NP or letter grading.

9D. History of the Near and Middle East. (5) Lecture, three hours; discussion, two hours. Introduction to history of Muslim world from advent of Islam to the present day. P/NP or letter grading.
9E. Southeast Asian Crossroads. (5) Lecture, three hours; discussion, two hours. Overview history of a region united by its wet tropical environment and divided by great religious, ethnic, cultural, and political pluralism, with focus on Vietnamese, Thai, Filipino, Khmer, Burmese, and Malayo-Indonesian patterns. P/NP or letter grading.

M10A-10B. History of Africa. (5-5) P/NP or letter grading. M10A. To 1800. (Same as Afro-American Studies M10A.) Lecture, three hours; discussion, one hour. Exploration of development of African societies from earliest times to 1800. P/NP or letter grading.

10BH. Introduction to Civilizations of Africa (Honors). (4) Lecture, three hours; discussion, two hours. Not open for credit to students with credit for course 10BH or 10BW. Survey of social, economic, and political development from 1800 to the present. Attention to different ideologies (nationalism, socialism, apartheid), rural/urban tensions, changing role of women. P/NP or letter grading.

10BW. Introduction to Civilizations of Africa since 1800. (5) Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or Higher English as a Second Language 36. Not open for credit to students with credit for course 10BH or 10BH. Survey of social, economic, and political developments in Africa since 1800, with focus on slave trade, imperialism and colonialism, and nationalism and independence. Attention to different ideologies (nationalism, socialism, apartheid), rural/urban tensions, changing role of women. Four papers required. Satisfies Writing II requirement. Letter grading.

11A-11B. History of China. (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading. 11A. To 1000. Survey of early history of China — Genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires. 11B. 1000 to 1950. Survey of later history of China — evolution of characteristic Chinese institutions and modes of thought from 1000 to 1950. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in contemporary era. 11AH-11BH. History of China (Honors). (5-5) Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A, 11B. P/NP or letter grading. 11AH. To 1000 (Honors). 11BH. 1000 to 1950 (Honors).

12A-12B. History of the U.S. and Its Colonial Origins. (5-5) Lecture, three hours; discussion, two hours. Strongly recommended for History majors planning to take more advanced courses in U.S. history. Cultural heritages, political institutions, economic developments, and social interactions which created contemporary society. P/NP or letter grading. 13A. Colonial Origins and First Nation Building Acts; 13B. 18th Century; 13C. 20th Century.

20. World History to A.D. 600. (5) Lecture, three hours; discussion, two hours. Examination of earliest civilizations of Asia, North Africa, and Europe — Mesopotamia, Egypt, Israel, India, China, Greece, and Rome — from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of society, nature of kingship, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/NP or letter grading.

21. World History. Circa 600 to 1760. (5) Lecture, three hours; discussion, two hours. Outline of world history from rise of Islam to start of Industrial Revolution, structures of world economy, political, and cultural phenomena of world history from 600 to 1760. Use of thematic and comparative approaches, with certain recurring themes and institutions that modulate from culture to culture. Reading of contemporary accounts to look at way people perceived cultures outside their own. P/NP or letter grading.

22. Contemporary World History, 1760 to Present. (5) Lecture, three hours; discussion, two hours. Broad thematic survey of world history since the mid-18th century. Examination, through lecture and discussion, of global implications of imperialism, total war, nationalism, cultural change, decolonization, changes in women's rights and roles, and eclipse of world communism. Designed to introduce students to historical study, help them understand issues and dilemmas facing the world today, and prepare them for more in-depth work in history of specific regions or countries of the world. P/NP or letter grading.

88. Sophomore Seminars: History. (4) Seminar, three hours. Limited to maximum of 20 lower division students. Readings and discussions designed to introduce students to current research in discipline. Culminating project may be required. P/NP or letter grading.

98GE. Sophomore Seminar: Special Topics in History. (5) Seminar, four hours. Requisite: designated GE lecture course; see Schedule of Classes for specific requisite lecture and seminar topics. Designed for sophomores/juniors. Exploration of aspects of lecture topic through readings, images, and discussions. P/NP or letter grading.

95. History Research Methods and Strategies. (5) Seminar, one hour. Development of competency with identifying, locating, critically evaluating, and using information in print, electronic, and other formats. Flow of information in a historical discipline, how to approach research problems systematically, how to access and evaluate information in variety of formats, and how to formulate effective searches and search in electronic databases and on Internet. P/NP or letter grading.

96. Introduction to Historical Practice. (5) Seminar, three hours. Enforced requisite: English Composition 3 or Higher English as a Second Language 36. Not open for credit to students with credit for former course 99W. Introduction to study of history, with emphasis on historical theory and research methods. Satisfies Writing II requirement. Letter grading.

97. Historical Practices Adjunct Seminar. (5) Seminar, one hour. Corequisite: any course from History 97A through 97O. Limited to History majors. Exploration of topics covered in courses 97A through 97O in greater depth through supplemental readings, discussions, or other activities. P/NP grading.

97A-97O. Introduction to Historical Practice: Variable Topics. (4) Lecture, three hours. Discussion classes of no more than 15 students. Introduction to study of history with emphasis on historical theory and research methods. Variable topics courses; consult Schedule of Classes for topics to be offered. Lecture, three hours. P/NP or letter grading. 97A. Ancient History; 97B. Medieval History; 97C. Early Modern History; 97D. U.S. History; 97E. Latin American History; 97F. Near Eastern History; 97G. East Asian History; 97H. History of Science/Technology; 97J. African History; 97K. History of Religion; 97L. Jewish History; 97M. Southeast Asian History; 97N. Indian History; 97O. World History.

Upper Division Courses

100. History and Historians. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attracts also to representative historians. P/NP or letter grading.

101. Topics in World History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of specific historical themes from world historical perspective. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

102. Explorations in Psychoanalysis and History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Art of psychological and historical interpretation; assessment of recent writings in field of psychohistory.

M102A-M102B. Historical Archaeology. (4-4) (Same as Anthropology M115A-M115B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. M102A. World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Themeatic emphasis, with exploration of breadth of discipline both in Old World and Americas. M102B. American Perspective. Emphasis on historical archaeology in North America, particularly to some practical applications.

M103A-M103B. Ancient Egyptian Civilization. (4-4) (Same as Ancient Near East M103A-M103B.) Lecture, three hours; discussion, two hours (when scheduled). Course M102A is not requisite to M103B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading. M103A. Chronological discussion of Prehistory to New Kingdom. M103B. New Kingdom and Late period until 332 B.C. M104. History of Ancient Mesopotamia and Syria. (4) (Same as Ancient Near East M104.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and cultural development of Fertile Crescent, including Palestine, from Late Uruk to neo-Babylonian period. Letter grading.

105A-105B-105C. Survey of Middle East, 500 to Present. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Background and circumstances of rise of Islam, creation of Islamic Empire, and its development. Rise of Dynastic Successor States and Modern Nation States. Social, intellectual, political, and economic development. P/NP or letter grading. 105A. 500 to 1300; 105B. 1300 to 1700; 105C. 1700 to Present.

106A. Premodern Islam. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of early development of Islam with special attention to doctrine of nature of God, human responsibilities, revelation and religious authority, duties of believers, ritual, law, secular movements, mysticism, and popular religion. P/NP or letter grading.

106B. Religion and Society in Modern Middle East. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Religion in modern Middle East, with special attention to nature of meaning and function of religion in society. P/NP or letter grading.

107A-107B-107C. Armenian History. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 107A. Armenia in Ancient and Medieval Times, 2nd Millennium B.C. to A.D. 11th Century; 107B. Armenia from Cilician Kingdom through Periods of Foreign Domination and National Stirrings, 11th to 19th Centuries; 107C. Armenia in Modern and Contemporary Times, 19th and 20th Centuries. Armenian question and genocide, national republic, Soviet Armenia, and dispersion.

107D. Introduction to Armenian Oral History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Uses and techniques of Armenian oral history; prehistory, interviews, and postinterview methods of compilation and evaluation. Field assignments, interviews, and summaries and/or paper based on interviews. P/NP or letter grading.
107A. Caucasus under Russian and Soviet Rule. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political, economic, social, and cultural history of Caucasian region since 1801. Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; na-caus region since 1801. Georgian, Armenian, and

108A. History of North Africa from Islamic Conquest. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political, social, economic, and religious history of Islamic West (Maghrib) from Muslim conquest in 6th century to 15th century. Discussion of political, social, economic, and religious changes during 15th century that characterized North Africa, at least portions of society and aspects of its social/cultural life, in entirely new direction. Examination of those changes that understood exactly what modernity means for region.

Development of state institutions, culture, and society in Central Eu- rope from end of Thirty Years’ War to end of Napoleon- ic Wars. Consideration of absolutism as political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

125B. Nationalism and Modernization in 19th-Century Germany. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for seniors. Problems of class society and state formation, emancipation, assimilation, growth of national con- sciousness, emergence of bourgeois public sphere, dynamism of gender in civil society and political life, post-Napoleonic tensions between reform and reaction, 1848, and national unification. P/NP or letter grading.

125C. 20th-Century Germany. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Development of state institutions, culture, and society in Central Eu- rope from end of Thirty Years’ War to end of Napoleon- ic Wars. Consideration of absolutism as political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

125D. History of Low Countries. (4) Lecture, three hours; discussion, one hour (when scheduled). De- signed for juniors/seniors. Development of Dutch society and culture from Middle Ages to Renaissance; Low Countries from 1380 to 1815, Netherlands and Belgium in context of Europe after 1945. P/NP or letter grading.

122A. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122B. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122C. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122D. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122E. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122F. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122G. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122H. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122I. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122J. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122K. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

122L. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

123A. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

123B. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

123C. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

123D. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

123E. World This Century. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.
129A-129B. Social History of Spain and Portugal. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 130A. Colonial America, 1600 to 1763. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 130B. Southeastern Europe, (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

131A. Marxist Theory and History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Course 131A is generally requisite to 131B. Designed for juniors/seniors. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist analyses of transition from feudalism to capitalist economy via reading Capital; theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises. P/NP or letter grading.

132. Topics in European History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Integrated introduction to important aspects of European history; emphasis on specific topic within broad framework. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M133A-M133B. History of Women in Europe. (4-4) (Same as Women’s Studies M133A-M133B) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to present. P/NP or letter grading. M133A. 800 to 1715; M133B. 1715 to Present.

M133C. History of Prostitution. (4) (Same as Women’s Studies M133C) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical context of prostitution from ancient times to present. Topics include toleration in medieval Europe, impact of syphilis, birth of courtesan, regulation in 19th-century Europe, white slavery scare, and contemporary global sex trade. Readings include novels, primary sources, and testimony by sex workers. P/NP or letter grading.

134B-134C. Economic History of Europe. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 134B. 1780 to 1914. Analysis of emergence of European world economy, first Industrial Revolution, revolutionary changes in technology, demographic patterns, education, transportation, and interrelationship between Western core and European peripheries in process of industrialization. 134C. 20th Century. 137A-137B. British Empire since 1783. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and economic development of empire including evolution of colonial nationalism, development of commonwealth idea, and changes in British colonial policy. P/NP or letter grading.

138A. Colonial America, 1600 to 1763. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of molding of American society in English North America from 1600 to 1763. Emphasis on interaction of three con- verging cultures: Western European, West African, and American Indian. P/NP or letter grading.

138B. Revolutionary America, 1760 to 1800. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Inquiry into origins and consequences of American Revolution, nature of revolutionary process, creation of constitu- tional national government, and development of capital- ist economy. P/NP or letter grading.

138C. U.S. History, 1800 to 1850. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Discussion of major social, political, economic, and cultural transformations of first half of 19th century and how these changes helped to drive wedge between North and South. P/NP or letter grading.

139C. American South, 1877 to Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

141A-141B. American Economic History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 141A. 1790 to 1910. Roles of economic forces in transformations, individual and collective be- longing or impeding effective change in American econo- my from 1790 to 1910. During this period technical skeleton of modern industrial structure was formed. Why and how American economy evolved into dual economy, characterized bycentrally firms large in size and influence and periphery of smaller firms.

141B. 1910 to Present. Dynamics of change in dual economy, along with the greater detail on interrela- tionships between macro and micro developments in economy and on growing interdependence between U.S. and world economy from 1910 to present.

142A-142B. Intellectual History of U.S. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Principal ideas about humanity and God, nature and society, that have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought. P/NP or letter grading.

142C. History of Religion in U.S. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Considerations of religious dimen- sion of people’s experience in U.S. Examination of number of religious traditions that have been impor- tant in the country, with emphasis on relating develop- ments in religion to other aspects of American cul- ture. P/NP or letter grading.

142D. American Popular Culture. (4) Lecture, three hours; discussion, one hour (when scheduled). Rec- ommended requisites: courses 13B, 13C. Designed for juniors/seniors. Survey of American cultural histo- ry since 1865, with emphasis on historical develop- ment of urban, consumer-oriented American mass culture that enveloped diverse groups of Americans as producers and consumers. Historical development of American popular culture according to changing social, economic, and cultural circumstances.

14.4. America in World. (4) (Formerly numbered 144A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Reconsideration of U.S. exceptionalist approach to national self-understanding by rethinking crucial aspects of American history in more international context that goes well beyond foreign relations and international affairs to reconceptualize aspects of American economic, intellectual, cultural, and social history. Consideration of transnational flows of people, ideas, goods, wealth, and power, as well as comparative studies of all these things and more. P/NP or letter grading.

144BH. American Diplomatic History (Honors). (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Role of U.S. in 20th-century world. P/NP or letter grading.

145A-145B. U.S. Urban History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

145A. U.S. Cities: Overview. Demographic, geograph- ic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history. 145B. Topics in U.S. Urban History. Exploration of one aspect of U.S. urban history in depth without having to master chronological geography. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations. P/NP or letter grading.

145C-145D. History of American Architecture and Material Culture. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Aspects of American cultural history as explored through architecture, urban planning, and allied arts, with emphasis on development of architectural consciousness in America, ways in which built environment has affected its users and observers, and extent to which it has reflected their values and ways of living. P/NP or letter grading. 145C, 1600 to 1890; 145D, 1890 to Present.

146A-146B. American Working Class Movements. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Major episodes in social, trade union, and cultural history of American working class from Colonial times to present, with emphasis on both organized and unorganized labor, history of Knights of Labor, A.F. of L, and C.I.O., and development of labor politics. P/NP or letter grading.

146C-146D. U.S. and Comparative Immigration History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Use of overlapping diaspora model that integrates North Atlantic (Europe), South Atlantic (Africa-Caribbean), Pacific (China/Japan/Hawaii), and Latin (Mexico to Brazil) worlds to provide chronological and analytic survey of American and comparative immigration from 1750 to present. Special focus on Southern California in course 146D. P/NP or letter grading.

147A-147B. American Social History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical analysis of American society with emphasis on family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. P/NP or letter grading. 147A, 1750 to 1860; 147B, 1860 to 1960.

147C. History of Women in Colonial British America and Early U.S., 1600 to 1860. (4) (Same as Women's Studies M147B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of early American women from initial confrontation of English and American Indian cultures in early 17th century to rise of women's rights movement in mid-19th century. P/NP or letter grading.

147D. History of Women in U.S., 1860 to 1980. (4) (Same as Women's Studies M147D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of American women from abolition of slavery and Civil War to rise and consequences of second-wave feminism. P/NP or letter grading.

149A-149B. North American Indian History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of Native Americans from contact to present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. P/NP or letter grading. 149A, Precon- tact to 1830; 149B, 1830 to Present.

150A. Comparative Slavery Systems. (4) (Same as Afro-American Studies M150A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of slavery experiences in various New World slave societies, with emphasis on outlining similarities and differences among legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies. P/NP or letter grading.

150B-150C. Introduction to Afro-American His- tory. (4-4) (Same as Afro-American Studies M150B-150C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Afro-American experience, with emphasis on three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban mi- riors. P/NP or letter grading.

150D. Recent African American Urban History: Funk Music and Politics of Black Popular Culture. (4) (Same as Afro-American Studies M150D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of musical genre known as funk that emerged in its popular form during late 1960s and reached popular high point in black culture, despite jazz, fusion of gospel, blues, jazz, rhythm and blues, soul, rock, and many other musical styles, offer students unique window into recent African American history. P/NP or letter grading.

151A. History of Chicano Peoples. (4) (Same as Chicana and Chicano Studies M151A.) Lecture, three hours; discussion, one hour (when scheduled). Survey lecture course on historical development of Mexican (Chicano) community and people of Mexican descent in U.S. through 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in Mexican community by inquiry into major formative historical and policy issues affecting community. Within framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of paper. P/NP or letter grading.

151B. History of Chicano Peoples. (4) (Same as Chicana and Chicano Studies M151B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey course on historical development of Mexican (Chicano) community and people of Mexican descent in U.S. through 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in Mexican community by inquiry into major formative historical and policy issues affecting community. Within framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of paper. P/NP or letter grading.

151C. Understanding Whiteness in American History and Culture. (4) (Same as Chicana and Chicano Studies M151C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History, construction, and representa- tion of whiteness in American society. Readings and discussions trace evolution of “white” identity and ex- plore its significance to historical construction of race class in American history. Letter grading.

151D. Chicana Historiography. (4) (Same as Chicana and Chicano Studies M151D.) Lecture, four hours. Examination of Chicana historiography, looking closely at how practice of writing of history has placed Chicanas into particular narratives. Using Chicana feminist approaches to study of history, revisiting of specific historical periods and moments such as Spanish Conquest, Mexican Period, American Conquest, Mexican Revolution, and Chicano Movement to explore stories about women’s participation in and contribution to making of Chicana and Chicano history. P/NP or letter grading.

153. American West. (4) Lecture, three hours; dis- cussion, one hour (when scheduled). Designed for ju- niors/seniors. Study of West as frontier and as region, in transit from Atlantic seaboard to Pacific, from 17th century to present. P/NP or letter grading.

154. History of California. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Economic, social, intellectual, and po- litical development of California from earliest times to present. P/NP or letter grading.
M155. History of Los Angeles. (4) (Same as Chicana and Chicano Studies M183.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of social, economic, and cultural, and political development of Los Angeles and its environs from time of its founding to present. Emphasis on diverse peoples of area, changing physical environment, social and political developments of city, and Los Angeles’ place among American urban centers. P/NP or letter grading.

M164A-164Z. Topics in African History. (4 each) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of African history at UCLA. Designed for juniors/seniors. Examination of specific topics that have continental application rather than proceeding on strictly chronological or regional basis. P/NP or letter grading.

M165A. Historical Africa – Technological and Cultural Traditions. (4) (Same as Anthropology M119.) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Social, economic, political, and cultural impact of slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and African diaspora. P/NP or letter grading.

M16B. Africa and Slave Trade. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Social, economic, political, and cultural impact of slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and African diaspora. P/NP or letter grading.

M164C. Africa in Age of Imperialism. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Topics include penetration by European colonial powers; emergence of classes, nature of colonial and postcolonial state, and struggle for national liberation in global context. P/NP or letter grading.

M164D. Africa and Diaspora in Global and Comparative Perspective. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: one prior course in African history at UCLA. Designed for juniors/se-niors. Forced migration of Africans through overseas slave trade was formative event of modern world. Exploration of that experience and its lasting consequences by placing it in its global context — African, American, European, Islamic, and Asian. P/NP or letter grading.

M165. Topics in African History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of specific historical themes and/or major issues in African history. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M162A. Modern Brazil. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Selected topics in political, economic, social, and cultural development of Brazil, with emphasis on modernization and struggle for change, 1850 to present. Discussions, films, slides, and guest speakers supplement and complement lectures. P/NP or letter grading.

M162B. Brazil and Atlantic World, 1500 to 1822. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of development of colonial society in Brazil from discovery in 1500 to independence in 1822, placing it in context of Portugal’s overseas expansion in Asia, Africa, and Americas. Emphasis on Portuguese, indigenous, and African roots of modern Brazil. P/NP or letter grading.

M162C. History of Argentina. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of economic, political, social, and cultural development that have shaped Argentina from colonial time to present. Emphasis on 19th-century development of agro-export economy and 20th-century formation of mass society. P/NP or letter grading.

M167A. History of Northeast Africa. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of African peoples and their interactions to 1870. 168S. Selected topics in political, social, and economic conditions within which Chinese orthodoxy and heterodoxy values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in 20th century in light of earlier currents of thought.

M170C. History of Women in China, A.D. 1000 to Present. (4) (Same as Women’s Studies M170C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics include women and family, women in Confucian ideology, women in literati culture, feminist movement, and women and communist revolution. P/NP or letter grading.

M170D. 20th-Century China. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course 118B. Designed for juniors/seniors. Selected topics that may vary from year to year. Recent offerings include law, society, and culture; society and economy; and rural China. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M170E. 19th-Century China. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course 118B. Designed for juniors/seniors. Examination of the economic, social, and political development of China during the imperial period. Analysis of economic, social, and political changes, and their effects on Chinese society in the 19th century, with emphasis on the impact of foreign intrusion on China’s economy and society. P/NP or letter grading.

M170F. Pre-1949 China. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course 118B. Designed for juniors/seniors. Survey of Chinese history from earliest times to present, with emphasis on major political, social, and cultural developments. P/NP or letter grading.
171. Variable Topics in Japanese History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Important topics in Japanese history: political change, economic development, social questions, and popular culture, as well as media and arts, explored through extensive readings. P/NP or letter grading.

172A-172B History of Japan, (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political, economic, and cultural development of Japan from prehistory to present. P/NP or letter grading. 172A. Ancient, Prehistory to 1600; 172B. Early Modern, 1600 to 1868.

172C. Modern, 1868 to Present.

M173B. Women in 20th-Century Japan. (4) (Same as Women's Studies M173B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Japanese women in Japanese and world history through state documents, autobiographies, voices, contemporary television, and other varying historical sources, such as women and new gården order (1900 to 1930), women, war, and empire (1930 to 1945), and women in consumer society (1980s to 1990s). P/NP or letter grading.

173C. Shinto, Buddhism, and Japanese Folk Religion. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social dimension of various Ways, great and little: Shinto's connection with cultural nationalism, Buddhism's medival Reformations, Zen's relation to warrior culture, folk religious aspects such as shamanism, ancestor worship, and millenarianism. P/NP or letter grading.

174A. Early History of India. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to civilization and institutions of India. Survey of history and culture of South Asian subcontinent from earliest times to founding of Mughal Empire. P/NP or letter grading.

174B-174C. History of British India I, II. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to civilization and institutions of India. Survey of history and culture of South Asian subcontinent from earliest times to founding of Mughal Empire. P/NP or letter grading. 174B. Expansion of British rule, theory and practice of British Raj, continuity of forms of governance, constitution of India as oriental despotism, epistemological projects of state, and other modes by which British achieved conquest of knowledge. 174C. Political economy of imperialism and Britain's civilizing mission. Encounter in terms of race and gender, between colonized and colonizers and to questions of resistance and nationalism.

174D. Classical Age of Indian History, A.D. 300 to 1000. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Age of glory under Imperial Guptas and subsequent consolidation under Harsha (north India) and Vakatikas, Chalukya, Pallava, and Chola (central and south India); emergence of Sanskrit as Pan-Indian language; spread of Indian culture in central and Southeast Asia. P/NP or letter grading.

174E. Bhakti Traditions in Indian History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of Bhakti or devotional traditions of India as part of Great Tradition of classical Hinduism; involvement of women; emergence of Sanskrit as Pan-Indian language; spread of Indian culture in central and Southeast Asia. P/NP or letter grading.

175A. Cultural and Political History of Contemporary South Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Process of modernity; partition of India and emergence of Pakistan, political, social, cultural, and women's movements; struggles for rights and conflicts of identity among Muslims, Hindus, and Sikhs; terrorism in Sri Lanka and Punjab; public culture, popular cinema, and street life. P/NP or letter grading.

M175B. Indian Identity in U.S. and Diaspora. (4) (Same as Asian American Studies M172A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of overseas Indian communities; transformations of Hinduism in diaspora; emergence of new diasporic art forms such as bhangra rap and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

175C. Special Topics in Contemporary Indian History. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Treatment of major issues in history of contemporary India. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

176A-176B. History of Southeast Asia. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Overview of history of peoples of Southeast Asia from earliest times to about 1815. 176B. Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in political and economic spheres, growth of nationalism, and process of decolonization.

176C. Philippine History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social, cultural, and political history of Philippines from Spanish conquest through independence. Emphasis on questions of identity under colonialism, understanding Revolutions of 1896 and 1898, and politics of Philippine nationalist discourse. Readings include introduction to major issues in Philippine historiography and literature. P/NP or letter grading.

176D. Premodern Vietnamese History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Overview of history of people of Vietnam to beginning of colonial period (circa 1860), covering political, social, economic, cultural, and religious developments. Consideration of impact of Vietnamese past on modern age. P/NP or letter grading.

176E. Vietnam: Past and Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of history and culture of Vietnam from about 700 B.C. to present, including political, social, and economic developments as well as international relations in post-1954 period. P/NP or letter grading.

177A. National Histories of Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Variable topics with focus on history of one or more of Southeast Asian countries. Examples include the rise of the country of Timor, Thailand, Cambodia, Burma, Laos, Malaysia, Singapore, Brunei, Philippines, Vietnam. P/NP or letter grading.

177B. Comparative Histories of Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Variable topics with focus on history of Southeast Asia from the malarial or comparative perspective. Topics may include history of human rights in Southeast Asia, gender and sexuality in island Southeast Asia, and economic history of Southeast Asia. P/NP or letter grading.

179A. History of Medicine: Historic Roots of Healing Arts. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to traditions, practices, goals, and myths of Western healing professions from time of ancient Greece and Rome to Renaissance. Readings from Hippocrates, Galen, and scholars at Alexandria to healing at Epidaurus and Salerno, contributions of medieval Muslim and Jewish doctors, rise of healing professions, medical faculties, ordering orders, and hospitals. P/NP or letter grading.

179B. History of Medicine: Foundations of Modern Medicine. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Cultural, scientific, and social context that shaped modern medicine from Renaissance to Romantic era. Topics include establishment of anatomy, physiology, and modern clinical medicine, mapping of human body, medical apparatus, physical fitness, rise of anatomico-clinical method at Paris School. P/NP or letter grading.

179C. Medicine and Society in 19th-Century America. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Therapeutics, theories of disease, and medical science scrutinized with understanding that these are never value-neutral, but are shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in 19th century? P/NP or letter grading.

180A. Topics in History of Science. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persons of man of science, role of women in scientific revolution, scientific investigations of women and feminism, homosocial grading.

180B. Historical Perspectives on Gender and Science. (4) (Same as Women's Studies M180B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persons of man of science, role of women in scientific revolution, scientific investigations of women and feminism, homosocial grading.

M181. Topics in Jewish History. (4) (Same as Jewish Studies M181.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of major issues in Jewish history. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M182A. Ancient Jewish History from Patriarchs to Rabbits. (4) (Same as Jewish Studies M182A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Jewish history from Abraham to Rabbinic. Topics of social, political, and religious developments. P/NP or letter grading.

M182B. Between Crescent and Cross: Jewish Middle Ages. (4) (Same as Jewish Studies M182B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of unfolding of Jewish history from rise of Christianity to expulsion of Jews from Spain in 1492. P/NP or letter grading.

M182C. Jewish History, Spanish Expulsion to 1881. (4) (Same as Jewish Studies M182C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of early modern Jewish history beginning with enormously repercussive expulsion of Jews from Spain in 1492, followed by transformations in Jewish society and identity over five centuries in Europe and Middle East, and concluding with nationalism. P/NP or letter grading.
M182D. European Jewry, 1881 to Present. (4) (Same as Jewish Studies M182D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult, Schedule of Classes for specific topics. May be taken independently for credit. P/NP or letter grading. 185D. Religions of Ancient Near East. (4) (Same as Ancient Near East M185D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main polytheistic systems of ancient Near East, with emphasis on Mesopotamia and Syria and with reference to religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magic, wisdom, and moral conduct. P/NP or letter grading. 185E. Special Topics in History of Religions. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics announced in Schedule of Classes and include ancient Germanic cults; Renaissance mysticism; mysteries of low countries; goddesses; religion in secular age. May be repeated for maximum of 16 units with topic and instructor change. P/NP or letter grading. 185A. History of Early Christians. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Christian movement from its origins to circa 160 C.E., stressing its continuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, development's encounters with its religious, social, and political world, and methods of research. P/NP or letter grading. 185B. Religious Environment of Early Christians. (4) Lecture, three hours; discussion, one hour (when scheduled). Recommended preparation: course 185A. Designed for juniors/seniors. Rich variety in religious practice and thought in Mediterranean world of 1st century C.E. as in context of developing Christian movement. Topics include Pharisaeism, Qumran, Philo, Stobics, Epicureanism, traditional Greek and Roman religions, mysteries, astrology, magic, gnosticism, and emperor-worship. P/NP or letter grading. 185C. Religions of South and Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics vary from year to year and include religion of Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be taken independently for credit. P/NP or letter grading. M191DC. CAPPP Washington, DC, Research Seminars. (8) (Same as Political Science M191DC and Sociology M191DC.) Seminar, four hours. Limited to CAPPP Program students. Internships in Washington, DC, based on caption. Study of variety of qualitative methods (observation, interviews, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading. 195D. CAPPP Washington, DC, Research Seminars. (4) (Same as Political Science M195DC and Sociology M195DC.) Seminar, four hours. Limited to junior/senior CAPPP Program students. Internships in Washington, DC, through Center for American Politics and Public Policy. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP grading. 197. Individual Studies in History. (4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. As signed reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP grading. 198A. Honors Research in History. (4) Tutorial, to be arranged. Course 198A is requisite to 198B, which is requisite to 198C. Limited to juniors/seniors. Development of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. Letter grading. 198B. Honors Research in History. (4) Tutorial, to be arranged. Requisite: course 198A. Limited to juniors/seniors. Continued development of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. Letter grading. 198C. Honors Research in History. (4) Tutorial, to be arranged. Requisite: course 198B. Limited to juniors/seniors. Completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. Letter grading. 199. Directed Research in History. (4) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit; History majors limited to 8 units. Individual contract required. P/NP or letter grading.
Graduate Courses

M200V. Advanced Historiography: Afro-American. (4) (Same as Sociology M200V.) Seminar, three hours. May be repeated for credit.

M200W. Advanced Historiography: American Indian Peoples. (4) (Same as American Indian Studies M200W.) Lecture, 90 minutes; seminar, 90 minutes. Introduction to culture-histories of North American Indians and review of Indian concepts of history. Steereotypic approach to content and methodologies related to Indian past that is interdisciplinary and multicultur- al in its scope. Letter grading.

200Y. Advanced Historiography: Application of Economics to History. (4-4) Seminar, three hours. May be repeated for credit.

200Z. Advanced Historiography: Ancient Near East. (4) Seminar, three hours. Course 211A is requisite to 211B. In Progress (211A) and letter (211B) grading.

210A. Methods in Armenian Oral History. (4) Seminar, three hours. Uses and techniques of Armenian oral history; presentation and postinterview procedures; methods of compilation and evaluation. Field assignments, interviews, and summaries and/or paper based on interviews. S/U or letter grading.

210B. Topics in World History. (4) Discussion, three hours. Graduate seminar utilizing written material, theoretical per- spective to examine variety of broad themes in hu- man history. Topics vary annually. Letter grading.

215A-215B. Seminars: Ancient History. (4-4) Seminar, three hours. Course 215A is requisite to 215B. In Progress (215A) and letter (215B) grading.

216A-216B. Seminars: Byzantine History. (4-4) Seminar, three hours. Course 216A is requisite to 216B. In Progress (216A) and letter (216B) grading.

217. Sources and Handbooks of Medieval History. (4) Seminar, three hours. Preparation: reading knowledge- edge of German or French. Introduction to types of medieval source materials and the handbooks need- ed to use them.

M218. Paleography of Latin and Vernacular Manu- scripts, 900 to 1500. (4) (Same as Classics M218, English M215, and French M210.) Lecture, three hours; discussion, two hours. Examination of Latin and vernacular manuscript book from 900 to 1500. (1) Techniques and (2) examination and judgment with regard to place and date of origin, (2) pro- vide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript books that are contemporaneous to that produced in the field. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

C219A. Early Medieval Intellectual History: Thought, Literacy, and Religion, circa 400 to 1050. (4) Lecture, three hours; discussion, one hour (when scheduled). Examination of ideas and means by which they were communicated in early Middle Ages. Concurrently scheduled with course C217A. S/U or letter grading.

C219B. Later Medieval Intellectual History: Thought, Literacy, and Religion, circa 1100 to 1500. (4) Lecture, three hours; discussion, one hour (when scheduled). Examination of evolution of ideas and means by which they were communicated in later Middle Ages. Concurrently scheduled with course C217B. S/U or letter grading.

CM220A. Interfaces: Transmission of Roman Lit- erature. (4) (Same as Classics M220A.) Lecture, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance. Understanding and methods for which Latin literature has been preserved. Concurrently sched- uled with course C219A. S/U or letter grading.

221A-221B. Seminars: Medieval History. (4-4) Seminar, three hours. Course 221A is requisite to 221B. In Progress (221A) and letter (221B) grading.

222A-222B. Seminars: Medieval Intellectual Histo- ry and History of Science. (4-4) Seminar, three hours. Course 222A is requisite to 222B. Selected problems from medieval and early modern philoso- phy, science, and technology. In Progress (222A) and letter (222B) grading.

225. Colloquium for Entering Graduate Students in Modern European History. (4) Seminar, three hours. Normally limited to and required of all modern European history graduate students. Introduction to topics, methods, and historiography of modern Euro- pean history.

226A-226B. Seminars: Italian Renaissance. (4-4) Seminar, three hours. Course 226A is requisite to 226B. In Progress (226A) and letter (226B) grading.

227A-227B. Seminars: Reformation. (4-4) Semi- nar, three hours. Course 227A is requisite to 227B. In Progress (227A) and letter (227B) grading.

229A-229B. Seminars: Early Modern European History. (4-4) Seminar, three hours. Course 229A is requisite to 229B. In Progress (229A) and letter (229B) grading.

M230A-M230B. Seminars: Modern European History. (4-4) (Same as Art History M241A-M241B.) Seminar, three hours. Course M230A is requisite to M230B. May be repeated for credit with consent of adviser. In Progress (M230A) and letter (M230B) grading.

231A-231B. Seminars: Modern European Intellec- tual History and History of Science. (4-4) Seminar, three hours. Course 231A is requisite to 231B. In Progress (231A) and letter (231B) grading.

232A-232B. Seminars: French History of 19th and 20th Centuries. (4-4) Seminar, three hours. Course 232A is requisite to 232B. In Progress (232A) and letter (232B) grading.

233A-233B. Seminars: Russian/Soviet History. (4-4) Seminar, three hours. Course 233A is requisite to 233B. In Progress (233A) and letter (233B) grading.

234A-234B. Seminars: Modern History of Spain, Portugal, and Italy. (4-4) Seminar, three hours. Course 234A is requisite to 234B. In Progress (234A) and letter (234B) grading.

235A-235B. Economic History of Europe, 1790 to 1939. (4-4) Seminar, three hours. Course 235A is requisite to 235B. Analysis of internationalization of European world economy, emergence of Western core and its relation with European peripheries. Com- parative analysis on differing economic and charac- teristics of postwar European economy. In Progress (235A) and letter (235B) grading.

253C-253D. Economic History of 20th-Century Eu- rope. (4-4) Seminar, three hours. Course 253C is requisite to 253D. Cyclical trend, various economic re- gimes, and integration process of Europe. In Progress (253C) and letter (253D) grading.

M235A. Proseminar: Political Psychology. (4) (Same as Political Science M228A and Psychology M228A.) Seminar, three hours. Introduction to political psychology: psychobiography, personality and poli- tics, mass attitudes, group conflict, political communi- cation, and elite decision making.

236B-236C. Seminars: Psychohistory. (4-4) Semi- nar, three hours. Course 236B is requisite to 236C. Exploration of individual and group psychological pro- cesses and their uses in historical research. In Prog- ress (236B) and letter (236C) grading.

239A-239B. Seminars: English History — Middle Ages. (4-4) Seminar, three hours. Course 239A is requisite to 239B. In Progress (239A) and letter (239B) grading.

240A-240B. Seminars: English History — Modern History. (4-4) Seminar, three hours. Course 240A is requisite to 240B. In Progress (240A) and letter (240B) grading.

241A-241B. Seminars: German History. (4-4) Semi- nar, three hours. Course 241A is requisite to 241B. Designed for graduate students. In Progress (241A) and letter (241B) grading.

244A-244B. Seminars: British Empire History. (4-4) Seminar, three hours. Course 244A is requisite to 244B. In Progress (244A) and letter (244B) grading.

245. Colloquium: U.S. History. (4) Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new method- ological and conceptual approaches, use of source materials, and current state of U.S. historiography.

246A-246B. Introduction to U.S. History. (4-4) Seminar, three hours. Three hours of significant- ly significant literature dealing with U.S. history from the Colo- nial period to the present. Each course may be taken independently for credit. 246A, Colonial Period; 246B, 1790 to 1900; 246C, 20th Century.

247A-247B. Seminars: Early American History. (4-4) Seminar, three hours. Course 247A is requisite to 247B. In Progress (247A) and letter (247B) grading.
263A-263B. Seminars: History of American West. (4-4) Seminar, three hours. Course 263A is requisite to 263B. In Progress (263A) and letter (258B) grading.

251A-251B. Collaborative Research Seminars: American History. (4-4) Seminar, three hours. Research seminars taught jointly by two faculty members. In Progress (251A) and letter (251B) grading. 251A.

Common readings and development of individual research projects. Course 251A is requisite to 251B. Reading, writing, and critical discussion of draft papers.

252A-252B. Seminars: Recent U.S. History since 1930. (4-4) Seminar, three hours. Course 252A is requisite to 252B. In Progress (252A) and letter (252B) grading.

253A-253B. Seminars: Recent U.S. History since 1930. (4-4) Seminar, three hours. Course 253A is requisite to 253B. In Progress (253A) and letter (253B) grading.

254A-254B. Seminars: U.S. Social and/or Intellectual History. (4-4) Seminar, three hours. Course 254A is requisite to 254B. In Progress (254A) and letter (254B) grading.

255A-255B. Business Enterprise and American Culture. (4) Seminar, three hours. Course 255A is requisite to 255B. In Progress (255A) and letter (255B) grading.

256A-256B. Seminars: America in World. (4) Seminar, three hours. Course 256A is requisite to 256B. In Progress (256A) and letter (256B) grading.

257A-257B. Seminars: U.S. Urban History. (4) Seminar, three hours. Course 257A is requisite to 257B. In Progress (257A) and letter (257B) grading.

258A-258B. Seminars: Working Class History. (4-4) Seminar, three hours. Course 258A is requisite to 258B. In Progress (258A) and letter (258B) grading.

M259A-M259B. History of Women. (4-4) (Same as Women's Studies M259A-M259B.) Seminar, three hours. Course M259A is requisite to M259B. History of women's social and political issues seen in U.S. and comparative context. In Progress (M259A) and letter (M259B) grading.

260A-260B. Seminars: Native American History. (4-4) Seminar, three hours. Course 260A is requisite to 260B. In Progress (260A) and letter (260B) grading.

M260C. Native American Revitalization Movements. (4) (Same as Anthropology M267C.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dancing, and Peyote Religion. Letter grading.

M260D. Native American Historical Demography. (4) (Same as Anthropology M267D.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence. Letter grading.

261A-261B. Seminars: Afro-American History. (4-4) Seminar, three hours. Course 261A is requisite to 261B. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white. In Progress (261A) and letter (261B) grading.

262A-262B. Seminars: Chicano History. (4-4) Seminar, three hours. Course 262A is requisite to 262B. In Progress (262A) and letter (262B) grading.

263A-263B. Seminars: History of American West. (4-4) Seminar, three hours. Course 263A is requisite to 263B. In Progress (263A) and letter (258B) grading.

M264. History of American Education. (4) (Same as Education M201C.) Discussion, three hours. History of educational thought and social studies influencing American education from 1880s to present. Analysis of relation between these ideas and forces, and aims and practices of American education today. S/U or letter grading.

M265. Latin American Research Resources. (4) (Same as Information Studies M225 and Latin American Studies M220.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

266A-266B. Seminars: Colonial Latin American History. (4-4) Seminar, three hours. Course 266A is requisite to 266B. In Progress (266A) and letter (266B) grading.

M266C. Analyzing Historical Texts. (4) (Same as Linguistics M262C.) Seminar, four hours. Designed for graduate students. Analysis of linguistic structure and ethnohistorical context of legal and other documents written by native-speaking scribes and translators. Topics include paleographic technique and text analysis. May be repeated for credit. S/U grading.

267A-267B. Seminars: Latin American History, 19th and 20th Centuries. (4-4) Seminar, three hours. Course 267A is requisite to 267B. In Progress (267A) and letter (267B) grading.

M268A-M268B. Seminars: Recent Latin American History. (4-4) (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Course M268A is requisite to M268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of interdisciplinary nature. In Progress (M268A) and letter (M268B) grading.

275A-275B-275C. Colloquia: African History. (4-4-4) Seminar, three hours. Designed for all entering and continuing graduate students in African history. Source identification, research methodologies, historiographical traditions, historical interpretation, approaches to teaching, and research design. Forum for critical discussion of dissertation prospectuses and work in progress. Each course may be taken independently for credit. S/U or letter grading.

278A-278B. Seminars: African History. (4-4) Seminar, three hours. Course 278A is requisite to 278B. Topics in African history, with focus on producing papers of publishable quality. In Progress (278A) and letter (278B) grading.

M280. China Studies: Discipline, Methods, Debates. (4) Seminar, three hours. Course 278A is requisite to 278B. Introduction to study of China as practiced in China M201.) Discussion, three hours. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work; help students improve their own writing. May be repeated once. S/U grading.

495. Teaching History. (4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Letter. May be repeated for credit. S/U grading.

596. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Letter. May be repeated for credit. S/U grading.

495. Teaching History. (4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work; help students improve their own writing. May be repeated once. S/U grading.

495. Teaching History. (4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work; help students improve their own writing. May be repeated once. S/U grading.

537. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

495. Teaching History. (4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work; help students improve their own writing. May be repeated once. S/U grading.

495. Teaching History. (4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work; help students improve their own writing. May be repeated once. S/U grading.

495. Teaching History. (4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work; help students improve their own writing. May be repeated once. S/U grading.
Required: Preparation for the Major
counselor at (310) 825-3992.
ments should contact the history/art history
regarding program planning and major require-
Students wanting to confer with a counselor re-
the interdepartmental major. Each course must
may be applied toward the history section of
requirements; a course taken to satisfy the
Lower division history and art history courses
major in History and Art History.
consider a major in one of the two academic
bining courses in history and in art history may
the B.A. degree. Students interested in com-
tween art history and the history of society,
protocol. The UCLA Academic Senate approved the dis-
establishment of the interdepartmental pro-
gram and major in History/Art History effective
Spring Quarter 2009. Students already admit-
ated to the major have until the end of Spring
Quarter 2013 to complete the requirements for
the B.A. degree. Students interested in com-
bining courses in history and in art history may
consider a major in one of the two academic disciplines and a minor in the other, or a double
major in History and Art History.
History/Art History B.A.
Lower division history and art history courses may be applied toward the general education
requirements; a course taken to satisfy the American History and Institutions requirement
may be applied toward the history section of the interdepartmental major. Each course must
be taken for a letter grade.

Preparation for the Major
Required: History 1A, 1B, 1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

Transfer Students
Transfer applicants to the History/Art History
major with 90 or more units must complete as
many of the following introductory courses as
possible prior to admission to UCLA: one year
of history of Western civilization, two art history
courses in ancient, Renaissance and baroque,
Courses in the Honors Collegium are mainly interdisciplinary seminars, and the courses vary each year. Refer to the Schedule of Classes for current course listings. An Honors Collegium quarterly brochure, that gives detailed course descriptions of current offerings, is available at http://www.ugeducation.ucla.edu/honors/hchome.html.

**Honors Collegium**

**Lower Division Courses**

2. Comparative Genocide. (4) Seminar, four hours; discussion, one hour. Social comparative study of genocide, combining theoretical concepts with case studies (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

3. Immigrants and American Dream. (5) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

4. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

5. Comparative Genocide. (4) Seminar, four hours; discussion, two hours. Study of comparative genocides (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

6. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

7. Comparative Genocide. (4) Seminar, four hours; discussion, two hours. Study of comparative genocides (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

8. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

9. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

10. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

11. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

12. Comparative Genocide. (4) Seminar, three hours. Study of process of attaining the “American Dream,” including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

14. Interaction of Science and Society. (4) Seminar, three hours. Examination of interaction of science and society, and effects of this interaction on history, development of societies, evolution of revolutionary ideas as modeled in Galileo, Darwin, and others, and selected contemporary issues such as genetic engineering and the war against infectious diseases. P/NP or letter grading.

15. Acting Myth. (4) Seminar, three hours. Interdisciplinary approach to literature and acting through study of texts and mythologies from variety of Indo-European and Near Eastern sources; students learn acting techniques in directed scenes from the texts. P/NP or letter grading.

16. Science of Singing Voice. (5) Seminar, three hours. Examination of life and times of Socrates and trial that led to his execution, including in-class staging. P/NP or letter grading.

17. What Is This Thing Called Science?: Nature of Modern Science. (5) Lecture, three hours, discussion; discussion of science and other systems of knowledge; study of history and philosophy of science and examination of its reliability as objective knowledge. P/NP or letter grading.

18. Rise and Fall of Modernism. (5) Seminar, three hours. Examination of modernism and its effects on literature. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Study of early and middle 20th-century’s attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. Satisfies Writing II requirement. Letter grading.

19. Political Dissidence Today and in Ancient Greece: Trial and Death of Socrates in Its Classical and Legal Context. (5) Seminar, three hours. Study of trial and death of Socrates by examining its relevance today to legal treatment of dissent and civil disobedience in the U.S. and to variety of contemporary theories and strategies of dissent. Introduction to Greek legal system, values that animated that system, and new ways to think about roles of law. P/NP or letter grading.

20. Three African Civilizations. (5) Seminar, four hours, film viewing, two hours. Study of development of three major African civilizations through their arts, with focus on arts of Mali, Ethiopia, and Kongo from about 100 B.C.E. to present. P/NP or letter grading.

21. Artificial Intelligence: Machines as People, People as Machines. (5) Seminar, three hours; laboratory, one hour. Programming knowledge not required. Examination of human cognitive abilities and study of different historical approaches to programing human cognitive abilities and behaviors into computers, with focus on problem solving. P/NP or letter grading.

22. Representation Medicine: Art, Literature, and Film. (5) Seminar, four hours. Limited to Freshman Summer Program students. Exploration of interdisciplinary dimensions of medical representation, with emphasis on cross-cultural 20th-century portrayals of physicians; includes discussions of doctor-patient relations, healthcare sites and circumstances, aging, alternative treatments, and mental health. Offered in seminar, only, or letter grading. P/NP or letter grading.

23. Theories of Exchange: Social Life of Gifts and Commodities. (4) Seminar, three hours. Study of how creation, maintenance, and dissolution of social and political relations are modulated through exchange of gifts and commodities in different contexts and different societies. P/NP or letter grading.

34. Vietnam War and American Culture. (4) Seminar, three hours. Cultural, social, and political implications of the Vietnam War on American society through examination of photography, journalism, personal narrative, political commentary, drama, and fiction. P/NP or letter grading.

42. Negotiating Conflict in Diverse Cultures. (5) Seminar, three hours; fieldwork, one hour. Exploration of art and science of negotiations in addressing cultural and community conflicts, with focus on positions and interests of disputants, cultural and political context of disputes, and tactics and skills to address conflicts. P/NP or letter grading.

43. Writing and Life Sciences. (5) Seminar, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Seminar, two hours. Culture and history of utopias. (4) Seminar, four hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Seminar, two hours. Study and practice of writing in literary and scientific discourse. Satisfies Writing II requirement. Letter grading.

44. Drugs in Society: Interdisciplinary Perspective on Drug Use, Abuse, Treatment, and Intervention. (5) Seminar, three hours. Examination of drug use and abuse and consequent social issues and policies both historically and in the contemporary U.S., including discussion of current research on neurobiological properties of different drugs and corresponding clinical interventions. P/NP or letter grading.

45. Evidence in Law, Science, History, and Journalism. (4) Seminar, four hours. Rigorous study of ways in which lawyers, historians, and journalists handle evidence, with an aim of advancing cross-disciplinary inquiry to produce a common vocabulary and set of concepts that allow for discussion of evidentiary issues in differing fields of inquiry. P/NP or letter grading.

50W. Writing Science. (6) Seminar, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Seminar, three hours. Study of science writing in popular domain in way that integrates sophisticated understanding of science with humane tradition of writing arts; study includes writings by journalists and scientists on variety of topics. Satisfies Writing II requirement. Letter grading.

51. Music and Society. (5) Seminar, four hours. Minimal experience reading music desirable but not required. Analysis of Western art music, with focus primarily, but not exclusively, on music of late-18th through early-20th centuries through multiple analytical prisms: sociological, historical, political, and musical. P/NP or letter grading.

53. American Folk Music, Protest, and Identity. (5) Seminar, three hours. Examination of American folk music as prism to investigate more general relationships among cultural boundaries such as musical genres and social categories (race, ethnicity, nation, and gender). P/NP or letter grading.

54. Improvisation and Acting Techniques. (5) Seminar, four hours. Development of acting improvisational techniques based on literature in which students find themselves immersed within characters. Students prepare midterm and final scenes to be fully memorized and performed, as well as study acting techniques. P/NP or letter grading.

55. Culture and History of Utopias. (4) Seminar, three hours. Study of major utopian writings from Thomas More’s Utopia to recent ecological and feminist utopian texts, with purpose of uncovering sociocultural, intellectual, and cultural landscapes underlying quest for a more perfect society. P/NP or letter grading.

56. Language and Mind. (5) Lecture, four hours; discussion, one hour. Study of topics in language and mind, including language acquisition in children, language representation in brain, relationship between language and other mental abilities, and autonomous nature of language as system of knowledge. P/NP or letter grading.

57. Language, Performance, and Culture. (5) Lecture, three hours. Mixture of lecture and discussion on topics related to language, performance, and culture in 19th and 20th centuries. Study of theorists such as Saussure, Wittgenstein, Stanley Cavell, Judith Butler, and others, playwrights such as Wilde, Stein, and Samuel Beckett, and films such as “This Girl Friday” and “Monopoly Business.” P/NP or letter grading.

58. Time in Society and History. (5) Seminar, four hours. Examination of concept of time from sociological, philosophical, anthropological, and physical perspectives. How cultures have perceived time, how societies have organized themselves with time, how groups have clashed over time’s definition and measurement, and how academics in various disciplines have perceived time. P/NP or letter grading.

59W. Literature and Culture of the American South. (6) Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Seminar, three hours. Examination of historical imagination as it is expressed in such writers as William Faulkner, Allen Tate, Flannery O’Connor, Richard Wright, and Zora Neale Hurston; in Civil War and Western; and in Southern rhetoric and political documentary. Satisfies Writing II requirement. Letter grading.

60. Discovering and Explaining Anomalies of English. (5) Seminar, three hours. Study of linguistic anomalies, historical facts of English that brought about these irregularities, and artificiality of notion of “standard English.” P/NP or letter grading.

61. Community and Self-Interest in History of American Culture. (6) Seminar, three hours. Exploration of historical origins of frequently contradictory values that inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, collective sense of mission and belief in autonomous individual. P/NP or letter grading.

62. Neuroscience and Psychology of Art and Biology of Aesthetics. (5) Seminar, three hours. Interdisciplinary approach to study of premise that beauty, whether of faces, art works, or other subjects, is processed by brain and can be understood as neurological and psychological phenomenon. P/NP or letter grading.

65. Literature and Culture of Francophone World. (5) Seminar, three hours. Study of literary texts from North and sub-Saharan Africa, Guadeloupe, Haiti, Martinique, Vietnam, France and Spain and examination of cultures of colonial and postcolonial Francophone world. P/NP or letter grading.

67. Cross-Cultural Approaches to Media History and Culture. (5) Seminar, three hours. Examination of media, media history, and media culture from cross-cultural perspective, one that demands redefinition of media and understanding of art in cross-cultural context. P/NP or letter grading.

71. Community and Labor Development from Ground Up. (4) Lecture, three hours; discussion, one hour. Introduction to practical applications of community development and outreach efforts in Los Angeles area, with projects from Community Outreach Partnership Center within School of Public Policy and Social Research. P/NP or letter grading.

83W. Politics and Rhetoric of Literature. (6) Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Examination of relationship among politics, rhetoric, and literature in study of literature from classical times to the present, broadening and contrasting Eastern and Western traditions of political discourse in Western thought, particularly conflict between self and state, between ideology and the practical business of living. Satisfies Writing II requirement. Letter grading.

70A. Gene Discovery Laboratory. (5) Seminar, three hours; laboratory, five hours. Recommended prerequisite course 70A. Laboratory research and seminar discussion that apply experimentally concepts and techniques taught in course 70A. P/NP or letter grading.

70C. Culture, Ethnicity, Race, and Development: Multimodal, Multi disciplinary Approach. (5) Lecture, four hours; discussion, one hour. Study of cultural apprenticeship, including evolution of cultural learning, onetogy of cultural learning, changes in cultural learning over history, and connections between forms and goals of cultural learning in a multicultural society. P/NP or letter grading.

76. Community and Labor Development from Ground Up. (4) Lecture, three hours; discussion, one hour. Examination of texts from colonial Spanish America and 20th-century North America to investigations of how authors in these different contexts have struggled with being between two cultures. P/NP or letter grading.
86. Psychology of Fear. (5) Seminar, three hours; fieldwork, one hour. Examination of phobias, including inquiry into how people are distressed by intense fear. Examination of structures and processes of irrational fears, and discussion of courage and fear reduction strategies. P/NP or letter grading.

87. Issues in American Foreign Policy: Methodology of Assessment. (4) Lecture/debate, three hours; discussion, one hour. Exploration in debate format of wide range of viewing American foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals. P/NP or letter grading.

Upper Division Courses

101A. Student Research Forum. (2) Lecture, one hour; workshop, two hours. Corequisite: course 99. Designed to promote broad and deep understanding of university research, including plenary lectures on research and workshops on grant writing, Internet searches, research abstracts, and laws and regulations governing research. P/NP grading.

101B. UCLA Undergraduate Science Journal. (2) Seminar, two hours. For students on editorial board of annual UCLA Undergraduate Science Journal, including study of writing in the sciences and honing of editing and production skills. May be repeated once for credit. P/NP grading.

101C. UCLA Undergraduate Journal for Humanities and Social Sciences. (2) Seminar, two hours. For students on editorial board of annual Westwind journal of undergraduate research and writing, including study of writing in various disciplines and honing of editing and production skills. May be repeated once for credit. P/NP grading.

101D. Counseling Multicultural Communities. (2) Seminar, two hours. Study of issues of culture and identity in cross-cultural counseling, including development of working model. P/NP grading.

101E. Leading Undergraduate Seminars. (Seminar, two hours. Limited to students who have been accepted into Undergraduate Student Initiated Education (USIE) program. Learning and exploration of issues that are integral to developing seminars and development of skills to become effective student facilitators. Practical teaching strategies and techniques, as well as pedagogical, organizational, and technological issues confronted by new instructors. Discussion of key topics, followed by discussion of syllabi that students are developing for their seminars and conducting of micro-teaching presentations. Guest speakers expand on topics that arise from class discussions. P/NP grading.

101F. Integrity in Research. (2) Seminar, two hours. Limited to students in CARE, HHMI, MARC, and UC LEADS programs. Discussion about integrity in research, current thinking in field, and important ethical issues that impact scientific investigation. P/NP grading.

101G. Graduate School Preparation. (2) Seminar, two hours. Limited to AAP students. Designed to help AAP students familiarize themselves with academic disciplines they would like to pursue in graduate school. Through course readings, guest speakers, and interactions, students learn more about their graduate school options and how to navigate application process. P/NP grading.

110. Information and Research in Social and Behavioral Sciences. (2) Lecture, two hours; activity, two hours. Examination of information access and retrieval within UCLA Library by utilizing subject specialists and subject-specific collections (print and electronic) within social and behavioral sciences disciplines. Course assists students who plan to be involved with major research projects or intend to undertake honors theses or comprehensive 199 projects. P/NP grading.

113. Work, Gender, and Race in America. (5) Seminar, three hours; fieldwork, two hours. Exploration of how shifts from manufacturing to service work and from rural to global market have affected the nature of work in the US for workers assessed by gender, race, ethnicity, and economic status. P/NP or letter grading.

114. Architectural Resistance from Los Angeles: Work of Frank Gehry, Thom Mayne, and Greg Lynn. (Seminar, three hours. Within last 30 years, body of architectural work originating in Los Angeles but reaching world both in innovative architecture and aesthetic influence has emerged. Study of works of three seminal architects — Frank Gehry, Thom Mayne, and Greg Lynn. Site visits and hands-on practice in how to read architectural plans, design, use of computers and modeling in architectural study and design. P/NP or letter grading.

117. Resistance to Evil: Organized Resistance to Nazis in Occupied Europe. (Seminar, three hours. Topic: how resistance is not just a political or ideological issue, but a sociohistorical one. What makes resistance possible are specific historical circumstances and social relations that allow ordinary men and women to oppose their oppressors. Examination of this premise through analysis of organized resistance to Nazi occupation in Europe. P/NP or letter grading.

119. Nuclear Weapons and International Relations. (4) (Same as Environmental M116, Public Policy M116, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build the atomic bomb and current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

120. Art and Performance: Interdisciplinary Approach to Collections of Getty Center. (4) (Same as Theater M109.) Lecture, four hours; discussion, one hour. Drawing from objects in five major collections at Getty Museum, focus on five parallel historical periods in which political, social, and aesthetic philosophy of the age is examined in musical and dramatic performance. Letter grading.

121. Psychoanalysis before Freud, and a Little After. (8) Lecture, three hours; discussion, one hour. Examination of different ways human beings have developed conceptions of themselves through history from early civilizations through Middle Ages, Renaissance, Reformation, scientific revolution, Enlightenment, Enlightenments of modernity, de-simulation, the Viennese and post-Freudian visions; investigation of various interactions of these different conceptions in present day. P/NP or letter grading.

122. Violence Against Women in Cross-Cultural Perspectives. (4) Seminar, three hours. Exploration of sources of violent acts against women in different societies. Topics include wife beating, female sexual slavery, female infanticide, dowry deaths, female genital “circumcision,” rape, and emerging global human rights responses to these issues. P/NP or letter grading.
123. War and Peace in Africa. (4) Seminar, four hours. Investigation into main causes and forms of warfare on African continent, including relationship between interethnic warfare and transborder conflict, historic ethnic antagonism, competition for control of natural resources, and hostilities precipitated by militarism. P/NP or letter grading.

124. Midwives, Mothers, and Medicine: Perspectives on History of Childbirth. (4) Seminar, three hours. Using examples from history and anthropology, examination of variety of practices associated with childbirth over time and across cultures, addressing such themes as shifting roles among birthing women, midwives, and medical men and cultural meanings of birth. P/NP or letter grading.

125. Making Citizens/Making Societies: Political Cultivation in a Cultural Perspective. (4) Seminar, three hours. Examination of how society takes active concern in making sure that certain politically relevant dispositions, sensibilities, capacities, and skills are nourished in population at large, including models of both aristocratic and democratic cultivation and their political implications. P/NP or letter grading.

127. Citizenship, Leadership, and Service. (4) Seminar, three hours; fieldwork, three hours. Interactive participatory study of the relationships between citizenship, leadership, and service, including both theoretical work in classroom and practical work in service organizations. P/NP or letter grading.

128. Latinos, Linguistics, and Literacy. (5) Formerly numbered M128. (Same as Applied Linguistics M172SL, Chicana and Chicano Studies M170SL, and Spanish M172SL.) Seminar, four hours; field project, four to six hours. Recommended prerequisites: Spanish 100A. In-depth study of various topics related to literacy, including different definitions of literacy, programs for adult preliterates, literacy and gender, approaches to teaching a whole language, phonics, Freire’s liberation pedagogy, history of writing systems, phoneme as basis for alphabetic writing, and national literacy campaigns. Required field project involving Spanish-speaking adults in adult literacy programs. P/NP or letter grading.

130. How Cold War Was Played. (4) Lecture/discussion, four hours. Examination of what prompted the Cold War, why it lasted so long, what its impact was on political and socioeconomic systems of both main protagonists, and what its legacy has become. P/NP or letter grading.

132. Bible as Political Theory. (5) Seminar, four hours. The Bible treated as political text, addressing such themes as shifting roles among women, midwives, and medical men and cultural meanings of birth. P/NP or letter grading.

133. Disease and Human Condition. (5) Seminar, four hours. Study of apparently common causes and consequences of diverse forms of social inequality in which culturally ascribed stigma is common factor. P/NP or letter grading.

134. Genetics and Environmental Genomics. (5) Seminar, four hours. Examination of how society takes active concern in making sure that certain politically relevant dispositions, sensibilities, capacities, and skills are nourished in population at large, including models of both aristocratic and democratic cultivation and their political implications. P/NP or letter grading.

135. Formal Modeling and Simulations in Social Sciences. (4) (Same as Anthropology M186 and Human Complex Systems M186.) Seminar, three hours. Exploration of different approaches to modeling empirical phenomena of concern to social sciences. Topics include utility models, learning models, decision models, group competition models, and evolutionary models. Use of computer simulations and group exercises to explore alternate behaviors of individuals interacting according to models for behavior (discussing advantages and drawbacks of more traditional mathematical modeling. Review of alternative forms of formal representations of hypothesized processes and issues related to verification of simulations. P/NP or letter grading.

151. American Jews and Israel in Mutual Perspective. (4) Seminar, three hours. Examination of relationships between Israel and Jews in the U.S., with emphasis on locating the two communities in Jewish history and political impact of this relationship. Offered mutually with parallel course at Tel Aviv University, including shared bulletin board and chat room. P/NP or letter grading.

152. Making Citizens/Making Societies: Political Cultivation in a Cultural Perspective. (4) Seminar, three hours. Examination of relationships between Israel and Jews in the U.S., with emphasis on locating the two communities in Jewish history and political impact of this relationship. Offered mutually with parallel course at Tel Aviv University, including shared bulletin board and chat room. P/NP or letter grading.

153. International Flash Points. (5) Seminar, three hours. Debate-style seminar concentrating on explosive confrontations in current international affairs, including North and South Korea, India and Pakistan, Israel and Palestinians, Iran, Colombia, and Congo and Rwanda. P/NP or letter grading.

154. Interpreting Performance: Examination of Social, Historical, and Cultural Models for Performing Arts. (5) (Same as Theater M112.) Lecture, two hours; discussion, two hours. Examination of nature of performance in theory and practice and of social, historical, and cultural contexts in which performance traditions have evolved. Attendance at approximately five designated performances/events required. P/NP or letter grading.

155. U.S. and World Post-9/11. (5) Lecture, two hours; discussion, two hours; tutorial, 90 minutes every other week. Survey of major questions confronting American foreign policy in period since September 11, 2001, in course organized in conjunction with series of public lectures on this topic. P/NP or letter grading.

156. Consciousness and Brain. (5) Seminar, three hours. Examination of philosophical and neuroscientific aspects of how brain produces conscious experience, including consideration of whether conscious- ness exists, what is meant by intentional experience, and the role of language and self in consciousness. P/NP or letter grading.

157. International Relations of Middle East. (4) (Same as Political Science M132B.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Role of great powers in Middle East, with emphasis on American, Soviet, and Western European policies since 1945. P/NP or letter grading.

158. Justice and Moral Responsibility in Literature. (5) Seminar, three hours. Discussion of literature (fiction and non-fiction) that examines the role of law, justice, government, and moral responsibility in public context. P/NP or letter grading.

165. Women and Literature in Southeastern Europe. (5) Seminar, three hours. Examination, through prism of literature, of changing role of women in southeastern countries (Albania, Bosnia-Herzegovina, Bulgaria, Croatia, Greece, Macedonia, Montenegro, Romania, Russia, Serbia, Slovenia, Turkey) during last 60 years, with emphasis on economic, cultural, and political variables affecting women’s roles. P/NP or letter grading.

166. Stories of Cultural Distance and Imposed Assimilation. (5) Seminar, four hours. Study of how fiction, memoir, and film have represented involuntary cross-cultural assimilation as seen from perspective of intimate others, usually family members, coming to terms with their own and their relatives’ cultural identity. P/NP or letter grading.

167. Politics of Health from 1750 to 1900: World Health and Public Health, Physical and Mental Health. (5) Seminar, three hours. Examination of health in latter half of 18th century and in 19th century. Research topics may include impact of diseases and controversy over inoculation, professional development of physicians, surgeons, pharmacists, midwives, and nurses, evolution of hospital, rise of specialization in healthcare, and intervention of medical scientists or government in public health. P/NP or letter grading.

168. Mediterranean World since Roman Empire. (5) Seminar, three hours. Introduction to study of Mediterranean area over long period from fall of Roman Empire to present day, including discussions of debates on ecological change, social particularity, role of commerce and trade in historical change, and nature of cross-cultural exchange. P/NP or letter grading.

169. Imposture and National Identity. (5) Seminar, three hours. Cross-cultural approach to study of imposture (assumption of false identity) as window through which to examine cultural modernity and national identity. Study of literature, history, and film from Australia, United Kingdom, the U.S., Near East, and South Asia as way of trying to define both hypococrices and creativity of imposture. P/NP or letter grading.

170. Venice Imagined. (5) Seminar, three hours. Study of literature and visual arts associated with city of Venice, Italy, concentrating first on period of early modern Venice as flourishing republic and then on its long decline, of special fascination to Romantic, modern, and contemporary authors. P/NP or letter grading.

171. Rationality and Emotions. (5) Seminar, three hours. Historical study of way in which philosophers, social theorists, and cognitive scientists have characterized relationship between rationality and emotions, culminating in emerging consensus that emotions can positively influence rational decision making. Readings range from philosophy of ancient Greeks to writings of contemporary neuroscientists. P/NP or letter grading.

172. French Thinkers of Society. (5) Seminar, four hours. In-depth study of distinguishing perspectives of French theorists who wrote on society and its impact on individuals. Theorists include Pascal, Rousseau, Marcel Mauss, and Emile Durkheim from early modern period, contemporary thinkers such as Michel Foucault, Michel de Certeau, and Pierre Bourdieu, and two postmodern theorists, Guy Debord and Jean Baudrillard. P/NP or letter grading.

173. Lincoln and American Political Tradition. (5) Seminar, three hours. Examination of nuances of Lincoln’s ideas and complexity of his political positions in his writing and early works, including study of his prose and method of reasoning in all his works. P/NP or letter grading.

174. Future Impact of Nano in New Technologies. (5) Seminar, six hours. Bioartists use cells, DNA molecules, proteins, and living tissues to bring to life ethical, social, and aesthetic issues of sciences. Study of how bioart blurs distinctions between science and art through combination of artistic and scientific processes, creating wide public debate. Exploration of history of biotechnology as well as social implications of this science. P/NP or letter grading.

175. Terrorism, Counterterrorism, and Weapons of Mass Destruction: Practical Approach. (5) Seminar, three hours. Terrorism, its origins, and ways of addressing terrorism at local, national, and global levels. Guest speakers from variety of UCLA departments and from Los Angeles. P/NP or letter grading.

176. Biotechnology and Art. (5) Seminar, six hours. Bioartists use cells, DNA molecules, proteins, and living tissues to bring to life ethical, social, and aesthetic issues of sciences. Study of how bioart blurs distinctions between science and art through combination of artistic and scientific processes, creating wide public debate. Exploration of history of biotechnology as well as social implications of this science. P/NP or letter grading.

177. Secret Guerilla, Imperial Wars, and American Democracy since World War II. (5) Seminar, three hours. Study of U.S. involvement, both covert and overt, in expeditionary wars since World War II, including involvement in Vietnam, Korea, Cuba, Iran, Guatemala, Nicaragua, and Chile, and implication of these actions for vitality of American democracy. P/NP or letter grading.

178. Imposture and National Identity. (5) Seminar, three hours. Cross-cultural approach to study of imposture (assumption of false identity) as window through which to examine cultural modernity and national identity. Study of literature, history, and film from Australia, United Kingdom, the U.S., Near East, and South Asia as way of trying to define both hypococrices and creativity of imposture. P/NP or letter grading.

179. Journal Club Seminars: McNair Research Scholars. (2) Seminar, two hours; discussion, two hours. Limited to McNair research scholars. Study of key research journals and important research articles in humanities and social sciences. Weekly research reports and presentations by McNair students. Presentations by program faculty members and other leading researchers. May be repeated for credit. P/NP grading.

180. Journal Club Seminars: Arts and Humanities Summer Research Program. (2) Seminar, one hour; discussion, one hour. Limited to students selected for Humanities Summer Research Program. Study of humanities research journals and monographs. Weekly student research reports and presentations by humanities faculty members. May be repeated for credit. P/NP grading.

181. Journal Club Seminars: Mellon Mays Undergraduate Research Scholars. (2) Seminar, one hour; discussion, one hour. Limited to Mellon Mays undergraduate fellows. Study of key research journals and important research articles in arts, humanities, and social sciences. Weekly research reports and presentations by Mellon Mays students. Presentations by program faculty members and other leading researchers. P/NP grading.

190. Directed Honors Studies. (4) Tutorial, two hours. Preparation: minimum of 4 units completed in Honors Collegium with grade of B or better, overall UCLA grade-point average of 3.5 or better. Specialized research/reading tutorial with director of one Honors Collegium course to pursue in greater depth significant topics from one collegiate course. May be repeated for credit. P/NP or letter grading.

HUMAN COMPLEX SYSTEMS
Interdisciplinary Minor
College of Letters and Science

UCLA
341 Haines Hall
Box 951553
Los Angeles, CA 90095-1553
(310) 825-2055
fax: (310) 206-7833
e-mail: dread@anthro.ucla.edu
http://hcs.ucla.edu

Dwight W. Read, Ph.D., Chair
Faculty Administrative Committee
Suzanne Lohmann, Ph.D. (Political Science, Public Policy)
William McKelvey, Ph.D. (Management)

Scope and Objectives
Human social systems are complex because humans conceptualize, communicate, and construct. Human social systems are shaped not only by factors extrinsic to the individuals making up the social systems, but also by the humans embedded within them. Humans are agents who analyze, reflect on, affect, shape, modify, and construct the social systems of which they are a part.

Students in the Human Complex Systems minor learn ways of thinking that help them make sense of and move effectively in today’s world—a world that is complex, information-rich, and prone to fast and furious change. They develop analytical skills and learn methodological tools that are relevant for the workplace in the emerging techno-economy. Students who seek to enter graduate school are well prepared by virtue of participating in some of the most exciting and novel research programs linking the frontiers of the social sciences with computer science, life sciences, humanities, management, public policy, and media arts.

Undergraduate Study
Human Complex Systems Minor
To enter the Human Complex Systems minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units minimum): Three courses, including one from Mathematics 2, Statistics 10, 11, 12, 13, or 14 and two from Anthropology 7, 8, 9, 33, Economics 1, 2, Geography 3, 4, any lower division history course, Political Science 10, 20, 30, 50, Sociology 1, 10, 24 (courses may be from the same department or from different departments).

Required Upper Division Courses (20 units minimum): Five courses selected from the following: (1) two core courses from Anthropology 131, Communication Studies 154, Human Complex Systems M130 or Management M118A, Political Science 146G, Sociology 111, (2) two method courses (Human Complex Systems M100/100L and 110), and (3) one elective course from Anthropology 131 (unless taken as part of the core), M186, 186P, Communication Studies 154 (unless taken as part of the core), Geography 142, 148, Human Complex Systems 120, M130 or Management M118A (unless taken as part of the core), Political Science M115A, M142D, 146G (unless taken as part of the core), C119, Public Policy 102, C119, Sociology 111 (unless taken as part of the core), or M118; other courses may be applied by petition, and students may petition to apply Human Complex Systems 197 at the same time the contract is signed.

No more than two courses (8 to 10 units) may be applied toward both this minor and a major program.
or minor in another department or program. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Human Complex Systems

Lower Division Courses

10. Emerging Issues in Complex Systems Science. (2) Lecture, two and one half hours. Presentation of current faculty work in complexity science, particularly in human social and organizational dynamics, but also including aspects of arts, humanities, and natural sciences. Introduction to readings relevant to human complex systems and to current faculty members and researchers who teach and advise in program. P/NP or letter grading.

10A. Introduction to Complex Systems Science. (5) Lecture, four hours. How macroscopic patterns emerge dynamically from local interactions of large number of interdependent (often heterogeneous) entities, without global design or central control. Such emergent order, whose explanation cannot be reduced to explanations at level of individual entities, is ubiquitous in biology and human social collectives, but also exists in certain physical processes such as earthquakes and some chemical reactions. Complexity also deals with how such systems undergo sudden changes, including catastrophic breakdows, in absence of external force or central influence. Key aspect of biological and social collectives is their nature as complex adaptive systems, where individuals and groups adjust their behavior to external conditions. In biological and social systems, complexity science goes beyond traditional mathematics and statistics in its use of multilingual computational models that better capture these complex, adaptive, and self-organizing phenomena. Letter grading.

Upper Division Courses

110. Artificial Culture: Experiments in Synthetic Anthropology. (5) Lecture, two hours; laboratory, four hours. Prior programming experience not required. Hands-on introduction to artificial culture philosophy and practice of constructing highly interactive computer simulations of human social worlds. Informed and critical look at revolutionary new sciences of complexity: multiple agency, simultaneous causation and evolutionary emergence embodied in computational description, and understanding and explanation of human complex systems. Students design their own populations of cultural agents, create social and physical environments in which they live, and study consequences of counterfactual what-if scenarios. May be repeated for credit. Letter grading.

120. Artificial Life, Culture, and Evolution. (6) Lecture, two hours; laboratory, four hours. Prior programming experience not required. Hands-on introduction to artificial life and evolutionary computation as they come to philosophy and practice of artificial culture, description, understanding, and explanation of human complex systems through computer simulations. Informed and critical look at evolution, origin, and emergence of physical, biological, and cultural processes from perspective of revolutionary new sciences of complexity. Students design, modify, and experiment with interactive simulations featuring cellular automata, agentic interaction, and evolutionary and genetic programming. May be repeated for credit. Letter grading.

130. Complexity Science for Social Systems. (4) (Same as Management M18A.) Lecture, four hours. Limited to juniors/seniors. Introduction to (1) complexity science as applied to social behavior and (2) agent-based computational modeling. Use of complexity science to bridge old and new conceptions of social science. Newtonian science, neoclassical economics, and old-style approaches to social science all build on assumptions that all basic agents comprising phenomena (atomic particles, atoms, molecules, organizations, populations of firms) are homogeneous and go forward in time under equilibrium conditions interspersed with occasional disequilibrium periods. Letter grading.

140D. Diversity, Disagreement, and Democracy: Can’t We All Just Get Along? (4) (Same as Political Science M115D.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Can’t we all just get along? Study of diversity, disagreement, and democracy. Diversity covers individual differences, cultural differences, and human universals; groupism, factionalism, and identity politics; multiculturalism and one-world ethics. Disagreement includes moral, ideological, and party-political disagreement; irresolvable and irreconcilable kinds of disagreement; groupthink and group polarization; herding and information cascades. Democracy stands for political mechanisms of information aggregation; political mechanisms to resolve differences, or to keep peace among people with irreconcilable differences; emergence and spread of democracy, liberty, and rule of law. Letter grading.

193P. Journal Club Seminars: Human Complex Systems. (1) (Same as Anthropology M193P.) Seminar, one hour. Limited to undergraduates. Discussion of current readings in discipline. May be repeated for credit with topic change. P/NP grading.

197. Individual Studies in Human Complex Systems. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Human Complex Systems. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Professors
Rita Cantor, Ph.D., in Residence
Stephen Cederbaum, M.D., in Residence
Daniel Cohn, Ph.D., in Residence
Richard A. Gatti, M.D., in Residence (Rebecca Smith Endowed Professor of A-T Research)
Daniel H. Geschwind, Ph.D., in Residence (Gordon and Virginia MacDonald Distinguished Professor of Human Genetics)
Wayne Goody, M.D., Ph.D.
Julie Korenberg, M.D., Ph.D., in Residence
James Lake, Ph.D.
Kenneth L. Lange, Ph.D. (Maxine and Eugene Rosenfield Endowed Professor of Computational Genetics)

Adjunct Professors
Judas L. Lusis, Ph.D.
Edward R.B. McCabe, M.D., Ph.D. (Mattel Executive Endowed Professor of Pediatrics)
Stanley F. Nelson, M.D., in Residence
Karen Reue, Ph.D.
David Rimoin, M.D., Ph.D.
Jerome Rotter, M.D., Ph.D., in Residence
Chia Sabatti, Ph.D.
Janet S. Sinshimeir, Ph.D.
Eric J. N. Villain, M.D., Ph.D.
Stephen G. Young, M.D.

Associate Professors
Esteban C. Dell’Angelica, Ph.D.
Katrina Dipple, M.D., Ph.D.
Guoping Fan, Ph.D.
Stephan Horvath, Ph.D.
Deborah Krakow, M.D., in Residence
Paivi Pajukanta, M.D., Ph.D.
Christina Palmer, Ph.D., in Residence
Marc A. Suchard, M.D., Ph.D.

Assistant Professors
Eleazar Eskin, Ph.D.
Julian Martinez, M.D., Ph.D.

Adjunct Professors
Linda L. McCabe, Ph.D.
Eric Sobel, Ph.D.

Adjunct Associate Professor
Jeanette Papp, Ph.D.

Adjunct Assistant Professors
Christina Jamieson, Ph.D.
Roel Ophoff, Ph.D.

Scope and Objectives

The graduate Human Genetics Program prepares students for careers as independent laboratory researchers with a firm grasp of the developments in biological and medical research. The rapidly evolving field of human genetics

http://www.genetics.ucla.edu

now incorporates genetic, biochemical, cell biological, and developmental studies of both humans and model organisms to tackle biomedically important problems for human health and disease. Areas of study include both Mendelian and non-Mendelian hereditary diseases, genomics and mapping, bioinformatics, developmental biology, neurogenetics, sex determination, cytogentic, human malformation, and chromatin structure and function. Laboratory research is emphasized. Conceptual approaches to medically related biological problems are employed, frequently with the aid of automation and advanced imaging techniques, toward the goal of disease prevention, control, and eradication methods such as gene therapies. Coursework acquaints students with the most current literature and trains students in critical thinking, experimental design, and the ability to anticipate future developments.

Graduate study leading to a Ph.D. degree is emphasized. Under special circumstances, M.S. candidates are considered after consultation with faculty members and the chair.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gsdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Human Genetics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Human Genetics. An M.D./Ph.D. program is also offered.

Human Genetics
Upper Division Courses

CM124. Computational Genetics. (4) (Same as Computer Science CM124.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one statistics course and familiarity with any programming language. Designed for undergraduate and graduate engineering students, as well as students from biological sciences and medical school. Introduction to current quantitative understanding of human genetics and computational interdisciplinary research in genetics. Topics include introduction to genetics, human population history, linkage analysis, association analysis, association study design, isolated and admixed populations, population substructure, human structural variation, model organisms, and genotyping technologies. Computational techniques include those from statistics and computer science. Concurrently scheduled with course CM224. Letter grading.

CM144. Genomic Technology. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Survey of key technologies that have led to successful applications of genomics to biology, with a focus on theory behind specific genome-wide technologies and their current applications. Concurrently scheduled with course C244. P/NP or letter grading.

CM153G. Advanced Principles of Molecular and Cellular Biosciences I. (6) (Same as Biological Chemistry CM153G, Chemistry CM153G, and Molecular, Cell, and Developmental Biology CM153G.) Lecture, five hours; discussion, one hour; outside study, eight hours. Preparation: one statistics course and familiarity with any programming language. Introduction to genetics, bioinformatics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodology appropriate to answer such questions. Concurrently scheduled with course CM253. Letter grading.

CM156. Human Genetics. (4) (Same as Microbiology CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours; outside study, eight hours. Preparation: one statistics course and familiarity with any programming language. Introduction to genetics, bioinformatics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodology appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

CM159. Advanced Principles of Molecular and Cellular Biosciences II. (6) (Same as Biological Chemistry CM169 and Molecular, Cell, and Developmental Biology CM169.) Lecture, five hours. Preparation: one statistics course and familiarity with any programming language. Introduction to genetics, bioinformatics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodology appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

199. Special Studies in Human Genetics. (2 to 8) Tutorial, to be arranged. Students select instructor among eligible research faculty and carry out independent research project under instructor supervision. P/NP or letter grading.

Graduate Courses
M203. Stochastic Models in Biology. (4) (Same as Biomathematics M203.) Lecture, four hours. Requisite: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

M207A. Theoretical Genetic Modeling. (4) (Same as Biomathematics M207A and Biostatistics M227.) Lecture, three hours; discussion, one hour. Requisite: Mathematics 115A, 115A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) (Same as Biomathematics M207B and Biostatistics M237.) Lecture, three hours; laboratory, one hour. Requisites: Biostatistics 110A, 110B. Methods of computer-oriented human genetic analysis. Topics include statistical methodology underlying genetic analysis of both quantitative and qualitative complex traits. Laboratory for hands-on computer-grading and genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

210. Topics in Genomics. (2) Seminar, two hours. Survey of current biological theory and technology used in genomic research. Topics include genomic technologies, functional genomics, proteomics, statistical genetics, bioinformatics, and ethical issues in human genetics. S/U grading.

M211. Mathematical and Statistical Phylogenetics. (4) (Same as Biomathematics M211 and Biostatistics M239.) Lecture, three hours; laboratory, one hour. Requisites: Biostatistics 110A, 110B, Mathematics 170A. Theoretical models in molecular evolution, with focus on phylogenetic techniques. Topics include evolutionary tree construction methods, studies of viral evolution, phylogeography, and coalescent approaches. Examples from evolutionary biology and medicine. Laboratory for hands-on computer analysis of sequence data. S/U or letter grading.

CM224. Computational Genetics. (4) (Same as Computer Science CM224.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one statistics course and familiarity with any programming language. Designed for undergraduate and graduate engineering students, as well as students from biological sciences and medical school. Introduction to current quantitative understanding of human genetics and computational interdisciplinary research in genetics. Topics include introduction to genetics, human population history, linkage analysis, association analysis, association study design, isolated and admixed populations, population substructure, human structural variation, model organisms, and genotyping technologies. Computational techniques include those from statistics and computer science. Concurrently scheduled with course CM124. Letter grading.

M229S. Seminar: Current Topics in Bioinformatics. (4) (Same as Computer Science M229S.) Seminar, four hours; outside study, eight hours. Designed for graduate engineering students, as well as students from biological sciences and medical school. Introduction to current quantitative understanding of human genetics and computational interdisciplinary research in genetics and genomics. Topics include genome analysis, regulatory genomics, association analysis, association study design, isolated and admixed populations, population substructure, human structural variation, model organisms, and genotyping technologies. Computational techniques include those from statistics and computer science. May be repeated for credit with topic change. Letter grading.

Joseph F. Nagy, Ph.D. (English)
Christopher M. Stevens, Ph.D. (Germanic Languages)
Brent H. Vine, Ph.D. (Classics)

Scope and Objectives

The prime aim of the interdisciplinary Indo-European Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with two alternative major emphases: Indo-European linguistics and Indo-Iranian or other specialized language area studies.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Indo-European Studies Program offers Candidate in Philosophy (Ph.C.) and Doctor of Philosophy (Ph.D.) degrees in Indo-European Studies.

Indo-European Studies

Lower Division Courses

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Near Eastern Languages M20, Slavic M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Earliest representations of language known are those of Near East dating to end of 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica left little evidence of corresponding earliest developments, their antiquity and in case of China and Mesoamerica, their evident isolation mark these centers as locus of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greco-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

M70. Origin of Language. (5) (Same as Communication Studies M70 and German M70.) Lecture, three hours; discussion, one hour. Theoretical and methodological issues surrounding origin of language. Topics include evolutionary theory, evolution of man, how language is organized in brain, and science of language, including physiology of speech, phonetics, and comparative reconstruction. Letter grading.

Upper Division Courses

131. European Archaeology, Neolithic to Bronze Age. (4) Lecture, four hours. Survey of European cultures from beginning of food-producing economy in 7th millennium B.C. to beginning of Bronze Age in 3rd millennium B.C. P/NP or letter grading.

132. European Archaeology: Bronze Age. (4) Requisite: course 131. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.
M150. Introduction to Indo-European Linguistics. (5) (Same as Linguistics M150.) Lecture, four hours. Recommended requisite: Linguistics 1 or 20. Indo-European language and its descendants (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of reconstructed Indo-European proto-language and proto-culture. Only one Indo-European language may be investigated in detail. P/NP or letter grading.

C160. Indo-European Comparative Mythology and Poetics. (4) Seminar, three hours. Preparation: familiarity with at least one ancient Indo-European language. Comparison of major Indo-European mythological and poetic traditions and reconstruction of their common sources. Topics include divinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; relations with other traditions; literary continuations of mythopoeic material. Concurrently scheduled with course C260. P/NP or letter grading.

M168. Introductory Hittite. (4) (Same as Ancient Near East M168.) Lecture, two hours; recitation, one hour. Recommended preparation: knowledge of language with case system. Introduction to Hittite grammar by series of graded lessons covering morphology and syntax, followed by readings of selected texts from variety of genres in translation. P/NP or letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. P/NP or letter grading.

Graduate Courses

250A-250B. European Archaeology. (4-4) Seminar, three hours. Studies in ancient European archaeological materials and their relationship to Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress (250A) and S/U or letter grading. (Same as Linguistics M250A-M250B.)

Joshua Sternfeld, Ph.D.

Scope and Objectives

The Department of Information Studies has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, archives, preservation, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Students with master's degrees go on to careers as librarians, archivists, and information professionals in a variety of organizational settings. The Ph.D. focuses on the preparation of scholars in the field.

For information about the department and programs, see http://is.gseis.ucla.edu.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Information Studies offers the Master of Library and Information Science (M.L.I.S.) degree and the Doctor of Philosophy (Ph.D.) degree in Information Studies.

One concurrent degree program (Library and Information Science M.L.I.S./Management M.B.A.) and one articulated degree program (Library and Information Science M.L.I.S./Latin American Studies M.A.) are also offered.

Information Studies

Lower Division Courses

10. Fundamentals of Information Searching and Evaluation. (5) Lecture, one hour; discussion, one hour; laboratory, two hours. Designed for first-year undergraduate students. Introduction to bibliographic and information resources that encompass both general and specialized materials. Specifically designed to facilitate knowledgeable use of UCLA libraries and efficient retrieval of information. Letter grading.

20. Introduction to Information Studies. (5) Lecture, five hours. Designed for undergraduate students. Exploration of social, economic, cultural, ethical, and structural aspects of information, and issues that are critical, emergent, and dominant in society as information proliferates globally via networks and computer-mediated communication. Letter grading.

30. Internet and Society. (5) Lecture, five hours. Designed for undergraduate students. Examination of information technology in society, including Internet, World Wide Web, search engines (e.g., Google, Yahoo, Lycos), retrieval systems, electronic publishing, and distribution of media, including newspapers, books, and music. Exploration of many of these technologies, social, cultural, and political context in which they exist, and how social relationships are changing. Letter grading.

Upper Division Courses

100. Perspectives on Literacy. (4) Lecture, two hours; discussion, two hours. Designed for sophomores/juniors/seniors. Open to M.L.I.S. students and to graduate students from other schools/departments. Interdisciplinary introduction to literacy as a historical, social, and political issue. Topics include culture and literacy, historical development of literate societies, social definitions of illiteracy, literacy campaigns, literacy as a national and local policy issue. Letter grading.
10. Information Resources and Libraries. (5) Lecture, one hour; discussion, one hour; laboratory, two hours. Designed for sophomores/juniors/seniors. Not open for credit to freshmen. Introduction to bibliographic and information resources that encompass both general and specialized materials as well as relevant research methodologies in social sciences, physical sciences, and humanities. Specifically designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Letter grading.

11A-M111E. Ethnic Groups and Their Bibliographies. (4) Lecture. Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. Sections on other ethnic groups may be added. Offered in collaboration with several centers for ethnic studies. May not be repeated for credit. P/NP or letter grading. 111A. American Indian History and Culture; 111B. African American History and Culture; M111C. Latino History and Culture. (Same as Chicano and Chicano Studies M1112; 111D. Asian American History and Culture; M111E. Jewish History and Culture. (Same as Jewish Studies M111E.)

180. Special Topics in Information Studies. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Selected topics or issues related to social, cultural, economic, or political aspects of information and information systems. Consult Schedule of Classes for topics and instructors. May be repeated once for credit with topic change. P/NP or letter grading.

Graduate Courses

200. Information in Society. (4) Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information centers. Letter grading.

201. Ethics, Diversity, and Change in Information Professions. (4) Lecture, two hours; discussion, two hours. Service learning course that serves as forum to discuss, learn, and understand ethical challenges of multicultural information society that shape societal, professional community, and individual views and integrate professional practice, decision making, and public policy. S/U or letter grading.

204. Electronic Publishing. (4) Discussion, four hours. Basic understanding of scholarly process and familiarity with World Wide Web and digital libraries assumed. Designed for master’s and doctoral students in communication, education, English, information studies, management, and sociology. Survey of current issues in electronic publishing. Topics include history of publishing, digital libraries, scholarly communication, economics, perspective of publishers, universities, and librarians, users and uses of electronic documents, electronic books; new genres in electronic communication, visions of future. Letter grading.

208. Scholarly Communication and Bibliometrics. (4) Lecture, four hours. Preparation: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media. Letter grading.

220. Design of Library and Information Services. (4) Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing needs and designing services that meet those needs. Letter grading.

225. Latin American Research Resources. (4) Same as History of America M220.) Discussion, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results. S/U or letter grading.

227. Information Services in Culturally Diverse Communities. (4) Lecture, four hours. Issues in provision of information services in multilingual and multicultural society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage. Letter grading.

228. Measurement and Evaluation of Information Systems and Services. (4) Lecture, two hours; discussion, two hours. Preparation: one research methods course. Recommended: one library automation course. Information systems and services from points of view of client and effectiveness in meeting desired objectives. Review of principles of costing. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description. S/U or letter grading.

229B. Africana Bibliography and Research Methods. (4) Same as African Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant open specialized research materials, using full range of available information resources, including library collections of books, serials, and computerized databases. S/U or letter grading.

229C. Introduction to Slavic Bibliography. (2) Same as Slavic M229C.) Lecture, four hours. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include all relevant library terminology and concepts; survey of languages and translation systems; acquisition of Slavic and East European library materials; Slavic and East European scholarly journals; government and non-government sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

233. Records and Information Resources Management. (4) Lecture, three hours. Introduction to records and information resources management in corporate, government, and other organizational settings, including analysis of organizational information flow, classification and filing systems, records retention scheduling, records protection and security, re- prographics and image management technology, and litigation support. Letter grading.

235. Historical Bibliography. (4) Lecture, four hours. Requisites: courses 200, 435. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to history of print, field, including antiquarian, Anglo-American, and histoire du livre approaches. Letter grading.

238. Environmental Protection of Collections. (4) Same as Conservation M240.) Lecture, two hours; laboratory, two hours. Requisite: course 432. Review of environmental and biological agents of deterioration, including light, temperature, relative humidity, pollution, insects, and fungi. Emphasis on monitoring to identify agents and understanding of materials sensitivities, along with protective measures for collections. Letter grading.

240. Management of Digital Records. (4) Lecture, three hours. Introduction to long-term management of digital administrative, information, communications, imaging, or research systems and records. Topics include electronic recordkeeping, enterprise and risk management, systems analysis and design, metadata development, data preservation, and technological standards and policy development. Letter grading.

245. Information Access. (4) Lecture, four hours. Requisites: courses 200, 260. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources. Letter grading.

264. Information-Seeking Behavior. (4) Lecture, three hours; discussion, one hour. Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses. Letter grading.

422. College, University, and Research Libraries. (4) Lecture, four hours. Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within institutions, to which the topics are pertinent. Functions of research libraries and work of their staffs in serving scholars. S/U or letter grading.

425. Library Services and Programs for Children. (4) Lecture, two hours; discussion, two hours. Theory and practice of serving children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service. Letter grading.

426. Library Services and Literacy for Youth. (4) Lecture, four hours. Overview of literature and programs which are of interest to young adults (seventh grade and above). Discussion of special problems in working with young people and psychology of teenagers. S/U or letter grading.

438A. Seminar: Advanced Issues in Archival Science — Archival Appraisal. (4) Seminar, four hours. Requisite: course 438. Evaluation and examination of contributions of key figures in development of archival appraisal theory; identification and evaluation of distinct movements in archival appraisal; identification of cultural, political, sociological, and technological movements that can have impact on appraisal methodologies. Letter grading.

438B. Seminar: Advanced Issues in Archival Science — Archival Description and Access Systems. (4) Seminar, four hours. Requisite: course 438. Exploration of history of archival description and access systems in the U.S. and their development since World War II; data collection; access tools and implications of these developments in development of online archival access systems. Letter grading.

448. Information Literacy Instruction: Theory and Technique. (4) Lecture, four hours. History, theory, methods, and materials of user education/bibliographic instruction in libraries and other information retrieval environments. Examination of variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources. S/U or letter grading.

455. Government Information. (4) Lecture, four hours. Introduction to nature and scope of government information promulgated by federal government, as well as by state, municipal, international, and foreign governments. Problem-oriented approach. S/U or letter grading.

457. Health Sciences Librarianship. (4) Lecture, four hours. Health sciences information resources and services, management of health sciences information resources and services, health sciences environment and policies, information systems and technology. Letter grading.

464. Metadata. (4) Lecture, four hours. Introduction to variety of metadata provided for digitized and other electronic information resources. Introductory theory and practice designing and applying metadata. S/U or letter grading.

473. Information Technology and Libraries. (4) Lecture, four hours. Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and online services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Development in standards for information processing and new information technologies. Letter grading.

497. Fieldwork in Libraries or Information Organizations. (4 or 8) Fieldwork, 12 or 24 hours depending on hours and complexity of experience or project. Faculty-directed field experience in approved library, archive, or other information setting. Fieldwork experiences may include opportunities in state, national, and international institutions. S/U grading.

498. Internship. (4) Discussion, to be arranged. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

Adjunct Assistant Professor
Wolfgang Buermann, Ph.D.

Scope and Objectives

The mission of the UCLA Institute of the Environment (IoE) is to advance cross-disciplinary research, teaching, and public service on matters of critical importance to the planet and the campus community. The environment is defined broadly to include the interrelated issues of global climate change, loss of biological diversity, sustainability, and threats to human health and well-being from the use and misuse of natural resources, applying all the tools of scientific and policy analysis as well as moral and aesthetic values to the work. Los Angeles itself is a vital asset to this mission. As an international mega-city located in one of the world’s most biologically diverse regions, Los Angeles is a magnet for scholars from around the world who are facing similar issues of pollution, access to potable water, demand for energy to support economic growth, fragmentation of habitat, and the need to restore ecological function to sprawling urban settlements.

The IoE offers creative, multidisciplinary academic programs and courses that address the full complexity of current environmental problems. The Bachelor of Science degree in Environmental Science is an innovative dual-component degree program for students seeking a challenging and invigorating science curriculum. The first component, the Environmental Science major, provides students with disciplinary breadth in several areas important to environmental science. The second component, a minor or concentration in one of eight environmental science areas, each associated with a particular department. With assistance from the Institute of the Environment staff, students must formally apply to and be accepted by the associated department to receive the minor.

Preparation for the Major

Required: Chemistry 14A, 14B, and 14BL (or 20A, 20B, and 20L), Earth and Space Sciences 1 (required for the geology or geophysics and planetary physics minor) or Environment M10, Life Sciences 1, 2, Mathematics 3A and 3B (or 31A and 31B), Physics 1A and 1B (or 6A and 6B), Statistics 12 or 13.

For the atmospheric and oceanic sciences and environmental engineering minors, Mathematics 3C (or 32A) and Physics 1C (or 6C) are also required.

For the conservation biology minor, Chemistry and Biochemistry 14C (or 30A), Life Sciences 1, 3 and 6 are also required.

For the environmental health concentration, Chemistry and Biochemistry 14C (or 30A) and Life Sciences 3 are also required.

For the environmental systems and society minor, two courses from Chemistry and Biochemistry 14C or 30A, Life Sciences 3, Mathematics 3C or 32A, and Physics 1C or 6C, and at least two courses from Astronomy 3, Earth and Space Sciences 15, 16, 20, Ecology and Evolutionary Biology 13, 25, Environment M10, 14 are also required.

For the geography/environmental studies minor, two courses from Chemistry and Biochemistry 14C or 30A, Life Sciences 3, Mathematics 3C or 32A, and Physics 1C or 6C, plus Geography 5 and one course from 1, 2, 3, 4, or 6 are also required. Students should take these courses before enrolling in upper division courses.

For the geology minor, Earth and Space Sciences 1, 61, Mathematics 3C or 32A, and Physics 1C or 6C are also required.

For the geophysics and planetary physics minor, Earth and Space Sciences 1, 8, 9, Mathematics 3C or 32A, and Physics 1C or 6C are also required.

Transfer Students

Transfer applicants to the Environmental Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two general chemistry courses with laboratory for majors, two general biology courses with laboratory for majors, two calculus courses, and two calculus-based physics courses.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

The major consists of four requirements: environmental science, social sciences/humanities, practicum/colloquium, and minor or concentration, as follows:

Environmental Science Requirements

Required: One course from each of the following six core environmental science areas. No more than two courses may be from any one department. (1) One atmospheric and water science course from Atmospheric and Oceanic Sciences 101, 103, M105, 130, Earth and Space Sciences C132, 153, or Geography 105; (2) one climate science course from Atmospheric and Oceanic Sciences 102, Geography 102, 104, or M106; (3) one Earth science course from Earth and Space Sciences C113, 119, 135, 139, 150, Environment M127, Geography 100, or 101; (4) one ecology and conservation biology course from Ecology and Evolutionary Biology 100, 109, 116, 151A, 154, Environment 121, Geography 111, or 113; (5) one environmental management course from Environment M134, M135, 160, or Public Policy C115; (6) one pollutant sources, treatment, fate, and transport course from Atmospheric and Oceanic Sciences 104, Chemical Engineering C118, Civil and Environmental Engineering 153, 154, M166, Environmental Health Sciences 100, C125, C152D, or C164.

Social Sciences/Humanities Requirements

Required: (1) One humans and environment course from Environment M132, M133, M137, M153, Geography M128, M137, 145, 150, 156, or Philosophy 125; (2) one policy and politics course from Environment 138, M155, M161, M162, or M164.

Practicum/Colloquium Requirements

Minor and Concentration Requirements

No more than two of the courses below may be applied toward both these minors and concentrations and a major or minor in another department or program. Successful completion of a minor is indicated on the transcript and diploma.

For the atmospheric and oceanic sciences minor, at least two courses from Atmospheric and Oceanic Sciences 101, 102, 103, 104 and five courses from Atmospheric and Oceanic Sciences C110, C115, 130, 145, C160, C170, Chemistry and Biochemistry 110A are re-
Required. One course may be taken on a Passed/Not Passed basis.

For the conservation biology minor, Ecology and Evolutionary Biology 100, 116 (or Environment 121), and four to six courses from 101, 103, 105, 109, 111, 112, 114A, 122, 129, 151A, 154, 176, 180A are required.

For the environmental engineering minor, Chemical Engineering C118, Civil and Environmental Engineering 153 and five courses from 151, 154, 155, 156A, M166, Environmental Health Sciences C125, C164 are required.

For the environmental health concentration, Environmental Health Sciences 100, C135, Epidemiology 100, and three courses from Chemistry and Biochemistry 153A, Environmental Health Sciences C125, C140, C152D, C157, C164, 203 are required.

For the environmental systems and society minor, five courses from Environment M109, M111, 121, 122, M132, M133, M134, M135, M137, 138, M153, M155, 160, M161, M164 are required.

For the geography/environmental studies minor, three courses from Geography M106, M107, M109, 110, 113, M115, 116, 120, 121, 122, 123, 124, 125, 126, M127, M128, 129, 131, 132, 135, 136, M137, 159C, 159D, 159E, and any two additional upper division geography courses (except those from the preceding list and courses 194 through 199) are required.

For the geology minor, Earth and Space Sciences 112, 119, and three courses from C107, 116, 125, C132, 133, 134, 139, 150 are required.

For the geophysics and planetary physics minor, Earth and Space Sciences 134, 135, and three courses from M140, 152, 153, 154, 155 are required.

Each course applied toward requirements for preparation for the major and the minor, except Environment 170, must be taken for a letter grade. Students must earn a grade of C- or better in each preparation for the major course and must maintain an overall grade-point average of 2.0 (C) or better in all courses applied toward the major.

Environmental Systems and Society Minor

The Environmental Systems and Society minor is designed for students who wish to augment their major program of study with courses addressing the relationships between environmental science and associated social and political issues. The minor seeks to impart a deeper understanding of environmental systems related to air, land, and water resources, providing a basis for sound professional decision making.

To enter the minor, students must be in good academic standing (2.0 grade-point average) and file a petition at the Institute of the Environment, 300 La Kretz Hall, (310) 206-9193.

Required Lower Division Courses (8 units): At least two courses from Astronomy 3, Atmospheric and Oceanic Sciences 1, 2, 3, Earth and Space Sciences 1, 15, 16, 20, Ecology and Evolutionary Biology 10, 13, 25, Environment M1A, M1B, M10, 14, Geography 1, 2, 5.

Required Upper Division Courses (20 units): At least five courses from Environment M109, M111, 121, 122, M132, M133, M134, M135, M137, 138, M153, M155, 160, M161, M164.

No more than 8 units may be applied toward both this minor and any other major or minor program, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer or substitution of credit for any of the above is subject to institute approval; consult an academic adviser at the institute before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Environment

Lower Division Courses

M1A-M1B-M1CW. Global Environment. (5-6-5) (Same as GE Clusters M1A-M1B-M1CW.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading. M1A-M1B. Multidisciplinary Perspectives I, II, III, lecture, three hours; discussion, two hours. Human effects on Earth's ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. M1CW. Special Topics. Seminar, three hours. Enforced requisites: course M1B, and English Composition 3 or 3H or English as a Second Language 36. Examination of environmental issues at local and global scales. Fundamentals of physical, chemical, and biological processes important to environmental science. Laboratory exercises to augment lectures. Letter grading.

14. Ocean Environment. (5) Formerly numbered Ecology and Evolutionary Biology 14.) Lecture, three hours. Introduction to scientific studies of oceans, with emphasis on ecosystems and environmental issues. P/NP or letter grading.

Upper Division Courses

M109. Human Impact on Biophysical Environment: What Science Has Learned. (4) (Same as Geography M109.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of theory, mechanisms, and consequences of interactions between humans and environment. Exploration in depth of three thematic topics (deforestation, desertification, acid rain, ozone depletion) and four major subjects (soil, biodiversity, water, and landforms). P/NP or letter grading.

M111. Earth and Its Environment. (4) (Same as Atmospheric and Oceanic Sciences M100.) Lecture, three hours. Overview of Earth as system of distinct, yet intimately related, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Survey of history of Earth and of life on Earth, particularly in relation to evolution of physical world. Consideration of possibility of technological solutions to global environmental problems using knowledge gained during course. Letter grading.

113. Los Angeles Watershed. (4) Lecture, three hours; discussion, one hour. Overview of how varying scales of influence from atmosphere/climate, basin hydrology, runoff, sewage treatment, wetlands ecology and wetlands loss, coastal water circulation, and coastal biogeochemistry affect water resources in Los Angeles. Letter grading.

M114. Soil and Water Conservation. (4) (Same as Geography M107.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other uses of land. P/NP or letter grading.

121. Conservation of Biodiversity. (4) Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Ecology and Evolutionary Biology 116. Examination of interrelationship of natural biotic and human systems. Description of distribution of biodiversity and natural processes that maintain it. Critical analysis of various levels of threats and multidimensional challenges required for mitigating threats. Letter grading.

122. International Integrated Coastal Manage- ment. (4) Lecture, three hours. Coast is one of most complex and interesting environments because of interactions among several ecosystems. Coast is often densely populated, with high economic and population growth, therefore socioeconomic conflicts are common. Sewage and industrial pollution, overfishing, and poorly planned development often threaten health of environment. Integrated coastal management (ICM) offers framework for resolving conflicts in manner that allows sustainable development. Focus on how ICM is being used in U.S. and around world to solve pressing ecological and socioeconomic problems. Letter grading.

123. Coastal Ecology in Southern Thailand. (5) Lecture, three hours; fieldwork, five hours. Interrelationships between coastal and marine organisms and environmental factors, including physical, chemical, biological, and geological environments; coastal and marine ecosystems; application of ecological theories to marine resource management; human impacts on marine environments; global environmental change; marine and coastal zone management and conservation. Emphasis on tropical coastal habitats and ecology of Thailand and Southeast Asia. Offered in summer only. Letter grading.

M127. Soils and Environment. (5) (Same as Ecology and Evolutionary Biology M127 and Geography M127.) Lecture, five hours; discussion, one hour; field trips. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.
131SL. Gender and Sustainability: Local-Global Connections. (5) (Formerly numbered M131SL.) Lecture, three hours; service learning, two hours. Introduction to gender and development (GAD) theories, analytical approaches, and applied case studies in context of local-global sustainability and environmental issues, with focus on knowledge, roles, relationships, needs, practices, and strategies of women and men. Investigation of gender and sustainable dimensions of food system, including agri-business, community-supported agriculture, farmers’ markets and cooperatives, fair trade and certification, genetically engineered foods, food supplements, food safety, and nutrition, permaculture, and related student-advocated issues. Integration of variety of student-centered learning modes. Volunteering with community/community service organization required. P/NP or letter grading.

M132. Environmentalism: Past, Present, and Future. (4) (Same as Geography M115 and Urban Planning CM165.) Lecture, three hours. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and new and changing nature of modern environmentalism. Introduction to early ideas of environment, how rise of modern sciences reshaped environmental thought, and how this was later transformed by 19th-century ideas and rise of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about nature of development, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

M133. Environmental Sociology. (4) (Same as Sociology M115.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis in detail of interrelationships between social factors (such as gender, age, and race) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

M134. Environmental Economics. (4) (Same as Economics M134A.) Lecture, three hours. Requisites: Economics 41 or Statistics 12 or 13, and Economics 101 (may be waived with consent of instructor). Introduction to major ideas in natural resources and environmental economics, with emphasis on designing incentives to protect environment. Highlights important role of using empirical data to test hypotheses about pollution’s causes and consequences. P/NP or letter grading.

M135. California Sustainable Development: Economic Perspective. (4) (Same as Public Policy M149 and Urban Planning M163.) Lecture, three hours. Examination of specific environmental challenges that California faces. Microeconomic perspective used, with special emphasis on incentives of polluters to reduce their pollution and incentives of local, federal, and state government to address these issues. Focus on measurement and empirical hypothesis testing. P/NP or letter grading.

M137. Historical Geography of American Environment. (4) (Same as Geography M137.) Lecture, three hours. Designed for juniors/seniors. Study of systematic changes of natural environment in U.S. during historical time, with emphasis on interplay between and among natural factors of climate, soils, vegetation, and landforms, and human factors of settlement, economic activity, technology, and cultural traits. P/NP or letter grading.

138. Effective Methods of Social Change. (4) (Formerly numbered 188.) Lecture, three hours; discussion, two hours. Emphasis on most effective methods of social change. Examination of social entrepreneurs, innovators, and visionaries. Review of traditional methods of activism and new theories of nonviolent social change. Case studies of success in reforming clear air, clear ocean, clear waters, clear streets, curing diseases, overcoming poverty, and addressing other problems of social injustice as well as reviewing actual strategies and methods of change in 21st century. Challenges that nonprofit advocates and community activists face today, including strategic planning, time management, networking, negotiation, and fund-raising. P/NP or letter grading.

M150. Introduction to Sustainable Architecture and Community Planning. (4) (Same as Architecture and Urban Design CM153.) Lecture, three hours. Relationship of built environment to national environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials and energy. P/NP or letter grading.

M155. Energy in Modern Economy. (4) (Same as Physics M155.) Lecture, three hours. Requisites: Mathematics 3A and 3B (or 31A and 31B), Physics 1A and 1B (or 6A and 6B), Statistics 12 or 13. Examination of physical laws of energy development, and role that energy plays in our economy, particularly in transportation and power grid. Prospects for decreasing availability of fossil fuels and impact of global warming on energy development. Current and potential future government and social responses to energy issues. P/NP or letter grading.

160. Topics in Environmental Economics and Policy. (4) Seminar, three hours. Requisite: Statistics 12 or 13. Examination of intersection of environmental economics and policy, with focus on testing policy-relevant environmental hypotheses using economics techniques. P/NP or letter grading.

M161. Global Environment and World Politics. (4) (Same as Political Science M122B.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 20. Politics and policy of major global environmental issues such as climate change, energy policy, and political science perspectives. P/NP or letter grading.

M162. Land Use and Development. (4) (Same as Urban Planning M162.) Lecture, four hours. Examination of institutional and historical evolution of land use in U.S. Comparison and contrasting of how cities have evolved in different parts of U.S. and some recent trends in urbanization. Relationship of state-level land-use policies and politics and ways in which localities plan. Environmental, social, and equity aspects of different patterns of urbanization and likely trends into future. Letter grading.

163. Business and Natural Environment. (4) (Formerly numbered 186A.) Lecture, three hours. Examination of role of business in mitigating environmental degradation and incentives to be more environmentally responsive. Emphasis on corporate strategies that deliver value to shareholders while responding to environmental concerns. P/NP or letter grading.

M164. Environmental Politics and Governance. (4) (Same as Urban Planning CM160.) Lecture, three hours. Environmental planning is more than simply land-use planning. Methods of social change and public participation is essential. P/NP or letter grading.

M165. Nuclear Weapons: Critical Decisions. (4) (Same as Honors Collegium M119, Public Policy M116, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt’s decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

170. Environmental Science Colloquium. (1) Seminar, 90 minutes; one field trip. Limited to undergraduates. Study of current topics in environmental science, including participation in weekly colloquium series and field trips. May be repeated for credit. P/NP grading.

180A. Practicum in Environmental Science. (4) Lecture, three hours; discussion, two hours. Enforced requisites: Statistics 12 or 13. Limited to Environmental Science majors who have completed 40 or more units of preparation for major courses, including statistics, and 12 or more units of upper division courses toward major requirement. Investigation of case studies and presentation of tools and methodologies in environmental science, building on what students have been exposed to in other courses. Letter grading.

180B-180C. Practicum in Environmental Science. (5-6) Laboratory, four hours; enforced requisites: course 180A. Course 180B is enforced requisite to 180C. Limited to junior/senior Environmental Science majors. Investigation of various aspects of one environmental case study representing actual multidisciplinary issue. Particular emphasis on developing skills required for working as professionals in this field. Work may involve site investigations, original data collection and analysis, mapping and geographic information systems, and environmental policy and law issues. Case study to be defined and conducted with permission of local agency or nonprofit institution. Letter grading.

184. Basics of Satellite Oceanography. (4) Lecture, two hours; discussion, one hour; computer laboratory, three hours. Remotely sensed data collected since late 1970's provide oceanographers with large volume of information on state of surface of world ocean, including sea surface temperature measured by infrared sensors, anomalies of sea winds measured by scatterometers, and water color properties measured by optical sensors. Multidiscipline information enables comprehensive monitoring of both physical and biological properties of ecosystems in different ocean regions. P/NP grading.

185A. Education for Sustainable Living Program Speaker Series. (1) Formerly numbered 185B.) Lecture, two hours. Analysis of principles of sustainability through series of lectures by world-renowned faculty members, authors, environmentalists, and progressive thinkers, with required student response papers. May be repeated for credit. P/NP grading.

185B. Education for Sustainable Living Program Action Research. (2) Lecture, two hours; fieldwork, four hours. Investigation of issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more by student research teams to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.

185C. Education for Sustainable Living Program Action Leader. (3) Seminar, two hours; fieldwork, six hours. Students lead research teams to investigate issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.
186. Comparative Sustainability Practices in Local/Global Settings. (4) Fieldwork, four hours. Guiding fieldwork and comparative analysis used to assess local sustainability practices and policies in diverse regional or international settings. Emphasis on comparing role of local and regional culture, geography, economic climate, and governmental policies on sustainability awareness and practices. Use of observations, interviews, and unobtrusive measures to document and analyze role and influence of local/global context on sustainability behavior of individuals, small businesses, and other institutions in everyday life. Letter grading.

188B. Urban Sustainability: Environment, Risk, and Quality of Life. (4) Lecture, three hours. Examination of issues related to urban environment, including how concepts of risk, sustainability, and local knowledge inform social action on behalf of urban quality of life. Special emphasis on social, demographic, and environmental change in Los Angeles. Focus on community-based approaches to sustainability and promotion of quality of life in urban environments. Letter grading.

193. Journal Club Seminars: Environment. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of field. May be repeated for credit. P/NP grading.

199. Directed Research in Environment. (2 to 4) Tutorial, two hours. Preparation: submission of written proposal outlining study or research to be undertaken. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Progress report must be submitted to faculty mentor at end of term. Culminating paper or project required. May be repeated for credit, but only 4 units may be taken each term. Individual contract required. P/NP or letter grading.

INTERNATIONAL DEVELOPMENT STUDIES

Interdepartmental Program
College of Letters and Science

UCLA 10357 Bunche Hall
Box 951487
Los Angeles, CA 90095-1487
(310) 825-5187
fax: (310) 206-3555
e-mail: idps@international.ucla.edu
http://www.international.ucla.edu/idps/ids/

Michael F. Lofchie, Ph.D., Chair

Faculty Administrative Committee
To Be Announced

Scope and Objectives

The International Development Studies major offers an opportunity for interdisciplinary study of the critical issues of the developing world, such as poverty, human rights, global health, civil war, economic growth, and global inequality. The curriculum is intended to familiarize students with some of the more important political, economic, social, and cultural realities of the developing regions of the world, such as Asia, Eastern Europe, Africa, the Middle East, and Latin America. The broad intellectual goal of the program is to help students understand why there are such vast socioeco-

nomic disparities between the wealthier and poorer regions of the world and what the broader implications of these disparities are.

An understanding of these issues is indispensable for both practical and scholarly purposes. While encouraging the acquisition of theoretical and conceptual knowledge, the program is equally concerned with its practical application to global realities. The program, therefore, encourages field experience involving travel, study, and/or work in regions in the developing world.

Undergraduate Study

The Undergraduate Council of the UCLA Academic Senate suspended admissions to the International Development Studies major effective June 1, 2009. Continuing students currently in the major and transfer students admitted to the major for Fall Quarter 2009 are not affected by the admissions suspension.

International Development Studies B.A.

Preparation for the Major

Required: Economics 1 or 2; one statistics course from Economics 41, Political Science 6, 6R, Statistics 10, or 12; four social sciences courses, each from a different department, selected from Anthropology 9, Geography 3, 4, 5, 6, History 8A, 8B, 8C, 9A, 9D, 9E, M10A, 10B, 10BW, 11B, 21, 22, Political Science 20, 50, 50R, Sociology 1; and demonstrated proficiency in one modern foreign language equivalent to level 6 at UCLA. Each course must be taken for a letter grade.

After satisfying the preparation for the major requirements, students must meet with the academic counselor in 10357 Bunche Hall to declare the International Development Studies major.

Transfer Students

Transfer applicants to the International Development Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introductory economics course, one statistics course, and four courses selected from four of the following five fields: sociocultural anthropology, cultural and economic geography, world history, comparative politics, and introductory sociology.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Admission to the major is based on completion of all nonlanguage preparation courses and one modern foreign language equivalent to level 3 at UCLA, with a cumulative minimum grade-point average of 2.0. Any remaining language courses may be completed after students have been admitted to the major.

The major consists of four required parts. Each course must be taken for a letter grade.

Required: (1) International Development Studies 100A, 100B, 150, 191; (2) one research methodology course from Anthropology 139, M186, Asian American Studies 103, Chicana and Chicano Studies 123, 129, Economics 103, Geography 163, Honors Collegium M150, Political Science 170A, Sociology 106A, 110, 113; (3) three social and critical theory courses, each from a different department, from Anthropology 150, 152, 153P, 161, Economics 111, 112, 113, 120, Geography 110, 121, M128, 133, 140, 142, 148, 155, Political Science 118, 122A, M122B, 124A, 167A, 168, Sociology 101, M115, 116, 182, 183, 191D; (4) four regional courses, to be divided equally between two of the world’s developing regions (East Asia and East Central Asia, Eastern Europe and West Central Asia, Latin America and Caribbean Basin, Middle East and North Africa, South and Southeast Asia and Pacific Islands, Sub-Saharan Africa) and one additional course, selected from any regional or thematic elective listed below:

Eastern Europe and West Central Asia: Anthropology 175R, Czech 155, History 107C, 107E, 120A through 120D, 127B, 127C, Political Science 128B, 156A through 156D, Romanian 152, Russian 119, 120, 125, 126, 127, 131, Serbian/Croatian 154, Slavic 125, 126, Women’s Studies M127

Honors Program
Majors who have completed International Development Studies 100A and M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 198A, 198B, and 198C, in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 198A, 198B, 198C) and an overall GPA of 3.0. Highest honors are awarded to students who complete the major (including courses 198A, 198B, 198C) with a 3.75 GPA and who produce an exceptional thesis.

International Development Studies

Upper Division Courses

100A. Introduction to Development Studies: Economic Development and Culture Change. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: some beginning experience in social sciences at college level. Designed for juniors/seniors. Broad historical and theoretical introduction to liberal and Marxist traditions in development studies, with focus on state, market, culture, ideology, and politics of professional knowledge. Balance of general trends and positions with selected case studies in developing nations. Letter grading.

M100B. Introduction to Development Studies: Political Economy of Development. (4) (Same as Political Science M167C.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for International Development Studies majors. Political economy approach to puzzle of why some countries are rich and others are poor and why, among latter, some have been able to achieve rapid rates of economic growth and others have not. Explanation and review of logic behind most important arguments that have been advanced to account for differences across countries in rates and levels of economic development. Letter grading.

150. Economics of Developing Countries. (4) Lecture, three hours; discussion, one hour. Requisites: Economics 1 or 2, and one elementary statistics course. Economic analysis of developing countries. Issues underlying causes of underdevelopment and process of development. Topics include population growth, poverty, inequality, inflation, fiscal and monetary policy, and alternative development strategies. Letter grading.

188. Special Courses in International Development Studies. (4) Seminar, three hours. Program-sponsored experimental or temporary courses on selected contemporary topics in international development taught by visiting instructors or affiliated faculty members. May be repeated for credit with topic change. P/NP or letter grading.

198A-198B-198C. Honors Research in International Development Studies. (4-4-4) Tutorial, to be arranged. Preparation: 3.5 grade-point average in courses for major, formal application to honors program. Enforced prerequisites: courses 100A, M100B. Limited to junior/senior International Development Studies majors. May be repeated for credit. Individual contract required. 198A. Research, discussion, and planning of honors thesis under direct supervision of faculty member. Letter grading. 198B. Enforced prerequisite: course 198A. Research, discussion, and planning of honors thesis under direct supervision of faculty member. In Progress grading. 198C. Enforced prerequisite: course 198B. Final drafting and submission of honors thesis under direct supervision of faculty member. Letter grading.

199. Directed Research in International Development Studies. (4) Tutorial, to be arranged. Limited to junior/senior International Development Studies majors. Supervised intensive directed research program in which students conduct interdisciplinary research under guidance of faculty mentor. Culminating paper required. May be applied toward major via petition. May not be repeated. Individual contract required. Letter grading.

Scope and Objectives
The Islamic Studies Interdepartmental Program encompasses the broadest cultural concerns in the study of Muslim societies of the past and present. It provides opportunities for study of the major cultures, languages, literatures, legal theories, medical systems, artistic practices, and religious traditions of the populations of regions where Islam has had, or continues to have, the greatest impact. Within a broad interdisciplinary framework of the humanities, social sciences, and professional schools (e.g., law, public health, the arts), students are expected to acquire knowledge of several different aspects of Muslim societies and to develop skills in cultural analysis, out of which they construct individualized curricula that prepare them to carry out original research.

The Master of Arts and Ph.D. degrees in Islamic Studies are designed primarily for students pursuing academic careers. The degree programs also prove useful for students who plan to live or work in predominantly Muslim areas or those whose careers may be enhanced by a knowledge of Muslim people, languages, and institutions.

The undergraduate major in this discipline is called Middle Eastern and North African Studies. For details, see the program by that name later in this section.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasla/library/pgmgrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Islamic Studies Program offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Islamic Studies. A concurrent degree program (Islamic Studies M.A./Public Health M.P.H.) is also offered.

Islamic Studies / 397

Steven D. Nelson, Ph.D. (Art History)
Allen F. Roberts, Ph.D. (French and Francophone Studies, World Arts and Cultures)
Susan E. Sylomovics, Ph.D. (Anthropology, Near Eastern Languages and Cultures)
Dominic R. Thomas (Comparative Literature, French and Francophone Studies, Italian)
Islamic Studies

Graduate Course

200. Introduction to Islamic Studies. (4) Seminar, three hours. Introduction to various disciplines and methods employed in study of Islamic histories, cultures, and societies, with special emphasis on methodologies and current theories and how they may be used and combined by Islamic studies students. Content varies each year. Letter grading.

Lecturer S.O.E.
Elissa A. Tognozzi, Ph.D.

Lecturer
Hoang T. M. Truong, Ph.D.

Adjunct Assistant Professor
Pasqualino Marino

Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched resources. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization).

Undergraduate Study

Italian B.A.

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is requisite to most upper division literature courses credited toward the major in Italian. The uniqueness of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46.

Transfer Students

Transfer applicants to the Italian major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and one Italian civilization or culture course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Thirteen upper division Italian courses, including 100, 103A, 103B, 113, 114A or 114B, 116A or 116B, 180; one course from 118 or 119; one course from 120 or 121; four courses from 114A through 191. One upper division elective course in a field relevant to Italian studies from outside the department may be substituted with consent of the undergraduate adviser.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

Italian and Special Fields B.A.

Students with special interests or professional goals may select this major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

Transfer Students

Transfer applicants to the Italian and Special Fields major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

Anthropology Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and 33.

The Major

Required: Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; five courses from Anthropology 111, 112, M115A, M115B, C115R, 130, 133Q, 135A, 135B, 135C, 135S, 135T, 139, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate adviser.

Art History Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Art History 50 or 51, 54, 57.

The Major

Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, C109A, 109C, 110A, 110B, 110F, 127, 150D selected in consultation with the undergraduate adviser.

Classics Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40W or 41W, and Greek 1, 2, 3 or Latin 1, 2, 3, or equivalent.

The Major

Required: Italian 100, 103A or 103B, 180, 195, and two courses from 113 through 191 selected in consultation with the undergraduate adviser; Greek 100 or Latin 100, one course from Classics 141 through 197, and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

English Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; English Composition 3, English 4W, 10A, 10B, 10C.

The Major

Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; four courses from English 100, M101A through 119, 121, 140A through 182C selected in consultation with the undergraduate adviser.
Film and Television Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, 46.

The Major
Required: Italian 100, 103A or 103B, 121, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 193A selected in consultation with the undergraduate adviser.

French Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; French 1, 2, 3, 4, 5, 6, 12 or 14.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; one course from French 114A, 114B, 114C, and three courses from 115 through 142 selected in consultation with the undergraduate adviser.

History Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; one course from History 1A, 1B, 1C, 88.

The Major
Required: Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from History 100, 102, 117C through 119D, 121A through 123B, 128A, 128B, 131A through 133B selected in consultation with the undergraduate adviser.

Linguistics Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

The Major
Required: Italian 100, 103A or 103B, 180, 195, and two courses from 113 through 191 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170 selected in consultation with the undergraduate adviser.

Music History Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, Music History 2A, 2B, 26A, 26B, 26C. Recommended: Music 20A, 20B, 20C.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; five courses from Music History 126A, 126B, 126C, 135A, 135B, 135C, 191A through 191G selected in consultation with the undergraduate adviser.

Philosophy Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; Philosophy 100A, 100B, 100C, and three courses from M101A through 185 selected in consultation with the undergraduate adviser.

Political Science Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Political Science 10, 20.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from Political Science M111A through 113A, 116A through 119, 137A, 137B, 139, 153A, 155, 167A selected in consultation with the undergraduate adviser.

Portuguese Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

The Major
Required: Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A through 191 selected in consultation with the undergraduate adviser.

Spanish Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), M42 or M44.

The Major
Required: Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; one course from Spanish 120A or 120B and three courses from 122 through 161 selected in consultation with the undergraduate adviser.

Theater Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

The Major
Required: Italian 100, 103A or 103B, 122, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, Classics 143A, English 142A, 142B, 142C, 168 selected in consultation with the undergraduate adviser.

Women's Studies Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Women's Studies 10.

The Major
Required: Italian 100, 103A or 103B, M158, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; Women's Studies 110A or 110B, and five additional upper division courses from any of the women's studies course lists selected in consultation with the undergraduate adviser.

Study in Italy
Students are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. They are also urged to take advantage of summer language workshops and study programs, including UCLA's own programs in Italy and Los Angeles. For additional information, contact the Education Abroad Program, B300 Murphy Hall, or the Summer Sessions Office, 1147 Murphy Hall.

Honors Program
Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Requirements: Italian 102A, 102B, 102C.

Candidates select three upper division literature courses in which additional readings are required. In the last term of the senior year, they are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses may not fall below A–. Applications should be made during the last term of the junior year.

Italian Minor
To enter the Italian minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units): Italian 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

Required Upper Division Courses (20 units): Italian 100 and four additional Italian courses.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate
Italian

Lower Division Courses

1. Elementary Italian — Beginning. (4) Lecture, five hours. P/NP or letter grading.
2. Special Reading Course. (4) Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.
7. Italian Conversation. (2-2-2) Seminar, three hours. Enforced requisite for course 8A: course 2; for 8B: course 3; for 8C: course 4. Each course may be repeated once for credit. P/NP or letter grading.
8. Intensive Italian. (12) Lecture, 20 hours. Intensive language program equivalent to first year of college Italian (courses 1, 2, 3) and designed to develop basic language skills. Offered in summer only. P/NP or letter grading.
9. Advanced Italian. (24-24-24) Italy through the Ages in English. (5-5-5) Lecture, four hours; discussion, one hour. P/NP or letter grading. 42A. Holy Roman Empire to Sack of Rome. Survey of Italy's unique contribution to Western civilization in history, politics, philosophy, arts, and popular culture from time of Charlemagne to High Renaissance. 42B. Late Renaissance to Postmodern Period. Influence and effects of baroque sculpture and architecture, Galileo, Enlightenment, unification of Italy, Fascism, terrorism, and cinema. 42C. Food and Literature in Italy. Profile of Italian history and culture through analysis of gastronomic and literary texts. Special emphasis on late Middle Ages, Renaissance, and Risorgimento.
10. Italian Cinema and Culture in English. (5) Lecture/screenings, five hours; discussion, one hour. Special topics in Italian culture as reflected and reinforced by the nation's prime artform, stressing aesthetics and ideology of films, contemporary Italian history, and politics. Rotating topics include sex and politics, comedy, integration, family networks, and neorealism. P/NP or letter grading.

Upper Division Courses

101A-101B-101C. Italian Cultural Experience in English. (4-4-4) Lecture, three hours. Study of cultural development of Italy. P/NP or letter grading. 101A. Roots of Western civilization; social and artistic achievements of communal society; Marco Polo, Dante, Boccaccio. P/NP or letter grading. 101B. Renaissance discovery of human genius; religious and political codes of Italian merchant class. 101C. Renaissance rediscovery of human individuality, dignity, and creativity in works of Pico della Mirandola and Castiglione. P/NP or letter grading.
112A-113A-113B. Introduction to Italian Literature and Literary Analysis. (4-4-4) Lecture, three hours. Study of major literary texts and their adaptations into different forms of public spectacle, including theater, opera, and film. Works by Goldoni, Gozzi, Mascagni, Verdi, Puccini, Pirandello, Calvino, Ortese, Zavattini, de Sica, and Taviani Brothers. Emphasis on development of ideas of spectacle.
114A-114B. Middle Ages. (4-4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. P/NP or letter grading. 114A. Middle Ages from Sacred to Profane. Study of major love poets of all time (Dante, Dolce Stil Novo poets, and Petrarch) caught between courtly and religious codes. 114B. Medieval Humor, Moralism, and Society. Novelties of Boccaccio's works as antidote to comic masterpiece, Decameron, analyzed within context of moral and social codes of culture of time.
116A-116B. Italian Renaissance. (4-4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. P/NP or letter grading. 116A. Renewal of Art and Thought. Study of Quattrocento and its representatives in arts and humanistic thought (i.e., Mantegna, Botticelli, Pico, Vasari and Ficino). 116B. Power and Imagination in Renaissance. Study of artistic world of Leonardo, Raffaello, Michelangelo, Titian, and literary masterpieces of Machiavelli, Castiglione, Ariosto, Tasso, in rival world of powerful political forces, such as Roman Papacy and Medici, Gonzaga, and D'Este courts.
118. Age of Enlightenment. (4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. Study of philosophical and political prose, satiric poetry, and drama, unveiling birth of modern spirit through writings of Vico, Metastasio, Parini, and Alfieri. P/NP or letter grading.
119. Late 18th Century: Enlightenment. (4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. Study of Stendhal, Rousseau, and Voltaire. Comparative study of significant literary works and their translation into film and of different techniques in two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.
120. Literature in 20th Century. (4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. Analysis of novel, poetry, and drama of 20th century in connection with modern thought and culture. Authors may include D'Annunzio, Pirandello, Montale, Pasolini, and Calvino. P/NP or letter grading.
121. Literature and Film. (4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. Comparative study of significant literary works and their translation into film and of different techniques in two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.
123. Seminar: Interdisciplinary Italian Studies. (4) Seminar, three hours. Enforced requisite: course 100. Conducted in Italian. Advanced reading, research, and writing in Italian studies with interdisciplinary approach that includes literature, art, history, and politics and emphasis on gender, politics, ethnicity, and post-colonial themes. P/NP or letter grading.
124. Food and Literature in Italy. (4) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. Profile of Italian history and culture through analysis of gastronomic documents and literary texts, with special emphasis on late Middle Ages, Renaissance, and Risorgimento. Examination of relation of food and health sciences through analysis of Regimina Sanitaria, authored by various medical doctors of Salernitan Schools and Patina's Il piacere onesto e la buona salute. P/NP or letter grading.
125. Italian through Opera. (4) Lecture, three hours. Requisite: course 6. Conducted in Italian. Introduction to traditional Italian opera as means of appreciating culture of Italy, art form of opera, and study of Italian language at advanced level through reading of libretti. Six masterworks of Italian opera tradition: Il Barbiere di Siviglia, La Bohème, Pagliacci, Otello, Tosca, and La Traviata — offer culturally authentic contexts to learn about operas, their characters, plots, settings, and themes. Exploration of various historical, political, and cultural issues raised in each opera. P/NP or letter grading.

140. Italian Novella from Boccaccio to Basile in Translatory Trends. (3, 3) Lecture, three hours. Analysis of development of Italian novella in its structural, historical context, and folk material. Special emphasis on how Italian novella influenced other European literatures. P/NP or letter grading.

150. Modern Fiction in Translation. (4) Lecture, three hours. Selects issues in 20th-century thought traced in writers of international fame, with focus on concerns and styles of some prose works such as Umberto Eco, Italo Calvino, Giorgio Agamben, Sergio Tonin, Roberto Calasso, Alessandro Baricco, and Carlo Collodi. P/NP or letter grading.

M158. Women in Italian Culture. (4) Lecture, three hours; discussion, one hour. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

151. Hieroglyphs and Languages, (3) Lecture, three hours. Enforced requisite: course 100. Conducted in Italian. Main forces that have shaped literary or standard Italian and specific ways in which language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions. P/NP or letter grading.

195. Community or Corporate Internships in Italian. (4) Tutorial, three hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contracts required. P/NP or letter grading.

199A. Directed Research in Italian. (2 to 4) Tutorial, to be arranged. Limited to senior Italian majors. Supervised individual study and investigation under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP or letter grading.

199B. Directed Research in Italian and Special Fields. (2 to 4) Tutorial, to be arranged. Limited to senior Italian and Special Fields majors. Supervised individual research or investigation under guidance of faculty mentor. Tutorial in which paper (20 to 25 pages) is to be written in either Italian or English that requires students to unify and synthesize their experience of combining two disciplines of study. Individual contract required. P/NP or letter grading.

Graduate Courses

205A-205B. Studies in Criticism. (4-4) Lecture, three hours. History, theory, and practice of criticism. S/U or letter grading. 205A. Brief History of Literary Criticism. Presentation, discussion, and application of basic currents from stylistics to structuralism.

205B. Discussion of Modern Critical Approaches. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

210. Studies in Early Italian Literature. (4) Lecture, three hours. Topics include origins of Italian language and study of early texts, Scuola Siciliana and early poetry of Tuscany and Northern Italy, and Dolce Stil Novo. S/U or letter grading.

215A-215B. Studies in 15th-Century Literature. (4-4) Lecture, three hours. S/U or letter grading. 215A. Variable Topics. (4) Lecture, content on themes and issues of 15th-century literature, with coverage of authors such as Pulci or Poliziano. 215B. Age of Lorenzo de’ Medici and Poliziano.

216D. Renaissance Theater. (4) Lecture, three hours. S/U or letter grading. 216E. Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Verdi or Leonardo, or Benvenuto S/U or letter grading.

218D. Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico or Ludovico S/U or letter grading.

221A-221D. Studies in Post-20th-Century Literature. (4 each) Lecture, three hours. S/U or letter grading. 221A. Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D’Annunzio, Verga, Marinetti, and Pirandello. S/U or letter grading.

221B. Contemporary Poetry. (4) Lecture, three hours. Analysis of legacy of two major figures in Italian poetry from World War II — Ungaretti and Montale. Thorougly examination of movements and individual poets active in the 1960s and 1970s. S/U or letter grading.

221C. 20th-Century Narrative to World War II. (4) Lecture, three hours. Assessment of turn-of-the-century narrative pattern (Gabriele D’Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernari, Marinetti, etc. S/U or letter grading.

221D. 20th-Century Narrative since World War II. (4) Lecture, three hours. Focus on narrative of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of formalistic modes adopted by the ne-avant-garde. S/U or letter grading.

221E. Pirandello and Contemporary Theater. (4) Lecture, three hours. Thorough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Strehi, Ronconi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance. S/U or letter grading.

222A-222B. Comparative Romance Historical Linguistics. (4) Lecture, three hours. Each course may be taken independently for credit. S/U or letter grading.

222A. Phonology. Principal sound changes from late Latin to modern Italian. 222B. Morphology and Syntax. Prime morpho-syntactic changes occurring between late Latin and main Romance dialects.

223. Structures of Modern Italian. (4) Lecture, three hours. Descriptive analysis of basic features of standard Italian from synchronic, typologic vantage. Topical emphasis may vary annually, but core progression departs from phonology (e.g., syllable types, prosodic patterns, phrasal phonetics), moves through morpho-semantic constituents, passing to sentence sequences (coordination, ellipsis, etc.). S/U or letter grading.

224. Italo-Roman Dialectology. (4) Lecture, three hours. Differentiation of late spoken Latin into myriad varieties spoken in Italy. Attention to discrete language types (e.g., Sardinian, Ladino, Friulian, and Franco-Provençal). Consideration of present-day sociolinguistic pressures. S/U or letter grading.

225. Cultural History of Italian Language. (4) Lecture, three hours. Historical survey of development of Italian language from medieval times to unification of country in 1861. Question della lingua, general accent history, folk material. S/U or letter grading.

225A-250D. Seminars: Dante. (4 each) Seminar, three hours. S/U or letter grading.

253A-253B-253C. Seminars: Chivalric Poetry in Italy. (4-4-4) Seminar, three hours. Relationship between genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso. S/U or letter grading.

255A-255B. Seminars: Baroque. (4-4) Seminar, three hours. S/U or letter grading.

256A-256B. Seminars: 18th Century. (4-4) Seminar, three hours. S/U or letter grading.

257A-257B. Seminars: Romanticism. (4-4) Seminar, three hours. S/U or letter grading.

258A-258B. Seminars: Contemporary Italian Literature. (4-4) Seminar, three hours. S/U or letter grading.
260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4) Lecture, three hours. Open to undergraduates with consent of instructor. Conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across range of texts, some selected from literary canon, but others purely oral (tales, songs, proverbs, curses and curses, secular and ritual drama). S/U or letter grading.

260B. Women in Italian Culture. (4) Lecture, three hours. Designed for graduate students. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women's conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

260C. Studies in Italian Cinema. (4) Lecture, three hours. Designed for graduate students. Italian cinema compared with other European countries' and Hollywood's cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

M270. Seminar: Literary Theory. (5) (Same as Asian M251, Comparative Literature M294, English M270, French M270, German M270, Scandinavian M270, and Theater M270.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current issues in literary and cultural studies. S/U or letter grading.

298. Variable Topics in Italian Studies. (4) Lecture, three hours; discussion, one hour. Designed for graduate students. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

M299. Research Resources for European Studies. (2) (Same as French M299, German M299, Information Studies M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstrations, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495A-495B-495C. Teaching Italian at College Level. (2 to 4 each) Seminar, to be arranged. S/U grading.

495A. Study methods in preparation for teaching Italian at college level, with emphasis on teaching proficiency-oriented instruction. May not be applied toward M.A. course requirements. 495B. Continuation of course 495A; study of contemporary issues in Italian language pedagogy. 495C. Effective uses of technology in foreign language classroom. Project-based seminar in which students develop materials for classroom instruction as well as an electronic teaching portfolio.

501. Cooperative Program. (2 to 6) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies. (2 to 12) May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) S/U grading.

LABOR AND WORKPLACE STUDIES

Interdisciplinary Minor
College of Letters and Science

UCLA

1103E Ueberroth Building
Los Angeles, CA 90095-1478
(310) 206-0812
fax: (310) 794-6410
e-mail: Lsminor@irle.ucla.edu
http://www.labor.ucla.edu/minor/

Jacqueline Leavitt, Ph.D., Chair

Faculty Administrative Committee
Christopher L. Erickson, Ph.D. (Management)
Frank T. Higbie, Ph.D. (History)
Sanford M. Jacoby, Ph.D. (Management)
Jacqueline Leavitt, Ph.D. (Urban Planning)
Ching Kwan Lee, Ph.D. (Sociology)
Karen J. Orren, Ph.D. (Political Science)
Christopher C. Tilley, Ph.D. (Urban Planning)
Abel Valenzuela, Jr., Ph.D. (Chicana and Chicano Studies, Urban Planning)

Scope and Objectives

The Labor and Workplace Studies minor offers an opportunity to learn about the workplace and the social, political, and economic forces that influence it. The program emphasizes the institutions of the labor market, public policy, employment relations, unions, and working-class movements. It also explores issues of race, class, and gender in the workplace. The interdisciplinary approach gives students exposure to disciplines in addition to their own majors; students should plan to take courses from multiple departments, as disciplinary breadth is encouraged.

The program is intended for students who wish to gain an in-depth understanding of the broad array of issues related to labor and the workplace. Students are encouraged to plan, with the faculty adviser and minor coordinator, either a coherent integration of courses according to a thematic or subtopical investigation or, alternatively, a comprehensive survey of the main issues involved in the study of labor and the workplace.

Undergraduate Study

Labor and Workplace Studies Minor

The Labor and Workplace Studies minor augments study in a traditional field. Students are required to complete both a departmental major and this minor. The faculty adviser certifies completion of the program.

To enter the minor, students must be in good academic standing (2.0 grade-point average or better), have completed 45 units, and file a petition and meet with the faculty adviser and minor coordinator at the Center for Labor Research and Education, 1103E Ueberroth Building, (310) 206-0812, Lsminor@irle.ucla.edu.

Students are encouraged to meet early with the faculty adviser and minor coordinator to declare the minor and design a coherent program of coursework.

Required Courses (28 units minimum): Seven courses, with no more than two lower division courses (8 units), selected from Afro-American Studies M173, Asian American Studies 113, M116, Chicana and Chicano Studies 125, M127, M128, 129, Economics 150, 151, 152, History 141B, 146A, 146B, any labor and workplace studies course, Management 180, Political Science 116A, 142C, Psychology M137E, Public Policy 141, C142, C144, Sociology 157, M163, 171, 173, Women’s Studies M137E, M163. Students may petition, prior to enrollment in the course, to apply other topical courses with substantial labor and workplace studies content.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program. No more than 8 units may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Labor and Workplace Studies

Lower Division Courses

M1A-M1B-M1CW. Work, Labor, and Social Justice in U.S. (5-5-5) (Same as GE Clusters M24A-M24B-M24CW) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading. M1A-M1B, Lecture, three hours; discussion, two hours. Exploration of ways in which work has been transformed over last century, impact of this transformation on working people, and role of labor movement as force for social justice. M1CW, Special Topics. Seminar, three hours. Enforced requisites: course M1B, and English Composition 3 or 3H or English as a Second Language 36. Topics include labor law/history, gender, race, and workplace. Satisfies Writing II requirement.

Upper Division Courses

M116. Asian American Social Movements. (4) (Same as Asian American Studies M116.) Lecture, three hours. Designed for juniors/seniors. Examination of several dimensions of Asian American social movements, including grassroots, mass movement characters, political and social vision, and social and political relevance to current issues. How movement participants linked struggle for change with own personal transformation and growth. P/NP or letter grading.

M119. Asian American and Pacific Islander Labor Issues. (4) (Same as Asian American Studies M119.) Lecture, three hours. Examination of historical and contemporary labor issues in Asian and Pacific Islander American communities, with emphasis on key role that Asian and Pacific Islander American students can play in supporting labor struggles of low-income immigrants. P/NP or letter grading.
M127. Farmworker Movements, Social Justice, and AFL-CIO. (4) (Same as Chicana and Chicano Studies M127.) Lecture, four hours. Designed for juniors/seniors. Historical and social context of farmworker organizing, including its multiracial origins and its influence on fight for equality of working women. Specific focus on organizing of United Farm Workers and Farm Workers Organizing Committee, and their relationship to AFL-CIO, other unions, and their influence on Chicano Movement. Letter grading.

M128. Race, Gender, and U.S. Labor. (4) (Same as Chicana and Chicano Studies M128.) Lecture, four hours. Designed for juniors/seniors. Introduction to history and organization of labor movement in U.S. and North America. Discussion of race, class, and gender issues during key movements, and various strategies for social change and economic equity pursued through organized labor and other means. Letter grading.

160. Research Group or Internship Seminars: Labor and Workplace Studies. (5) Seminar, three hours. Enforced corequisite: course 195. Designed for undergraduate students who are part of research group or internship. Discussion of research methods and current literature in field or of research of faculty members or students. In-depth examination of experience of workers and role of labor movement in American society, historically and today. Topics include changing organization of work in the U.S. and reconfiguration of employment relationships; response of labor movement to managerial initiatives; way in which organized labor has handled issues of race, ethnicity, gender, and immigration status; challenges facing workers in the 21st century and ways in which organizations (unions and community-based organizations) are responding to those challenges. Letter grading.

M165A. Immigrant Rights, Labor, and Higher Education. (4) (Same as Afro-American Studies M165 and Sociology M165.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Exploration of relationship between race, immigration, and higher education. Interpretation of current policy debates, and development of innovative interventions. P/NP or letter grading.

M166A. Immigrant Rights, Labor, and Higher Education. (4) (Same as Asian American Studies M166A and Chicana and Chicano Studies M166A.) Seminar, three hours. New immigrant rights movement, with particular attention to labor and higher education. Overview of history of immigrant rights movement and examination of development of coalition efforts between labor movement and immigrant rights movement nationally and locally. Special focus on issue of immigrant students in higher education, challenges facing undocumented immigrant students, and legislative and policy issues that have emerged. Students conduct oral histories, family histories, research on immigration and immigrant rights, write poetry and spoken word about immigrant experience, and work to collectively develop activist publications on immigrant students in higher education. P/NP or letter grading.

M166B. Research on Immigration Rights, Labor, and Higher Education. (4) (Same as Asian American Studies M166B and Chicana and Chicano Studies M166B.) Seminar, two hours. Required: course M166A. Expansion of research conducted by students in course M166A involving oral histories, research on immigration/labor/higher education, and evaluation of legislation and legal issues impacting undocumented students. Letter grading.

M167. Worker Center Movement: Next Wave Organizing for Justice for Immigrant Workers. (4) (Formerly numbered 167.) (Same as Asian American Studies M166C and Chicana and Chicano Studies M1630.) Seminar, three hours. Development of theoretical and practical understanding of worker center movement, with focus on historical factors that have led to emergences and growth of worker centers. Focus on experiences of worker centers in promoting multiethnic and multiracial campaigns for workplace and economic justice. Transnational cross-border solidarity issues and rights of undocumented workers. P/NP or letter grading.

M170. Improving Worker Health: Social Movements, Policy Debates, and Public Health. (4) (Same as Community Health Sciences CM170.) Lecture, three hours; discussion, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. P/NP or letter grading.

M173. Nonviolence and Social Movements. (4) (Same as Afro-American Studies M173 and Chicana and Chicano Studies M173.) Lecture, three hours; discussion, one hour. Overview of nonviolence and its impact on social movements both historically and in its present context in contemporary society, featuring learning from experts in the field, and guest speakers. Exploration of some historic contributions of civil rights struggles and role of nonviolent action throughout recent U.S. history. Examination of particular lessons of nonviolent movements as they impact social change organizing in Los Angeles. P/NP or letter grading.

M180. Southern California Regional Economy. (4) (Same as Urban Planning CM180.) Lecture, three hours; discussion, one hour. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamism and all-day bus tours of key economic regions and guest lectures by regional experts included. Letter grading.

188. Special Courses in Labor and Workplace Studies. (4) Seminar, four hours. Program-sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

195. Community or Corporate Internships in Labor and Workplace Studies. (6) Tutorial, one hour; internship, 15 hours. Enforced corequisite: course 160. Limited to juniors/seniors. Internship in supervised setting in community agency, labor union, or other organization concerned with work and employment issues. Placement subject to be arranged by instructor. Students meet on regular basis with instructor and provide periodic written reports on their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP grading.

199. Directed Research in Labor and Workplace Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program offers the Bachelor of Arts in Latin America and the Bachelor of Arts in Latin American Studies with a master's degree in a professional field.

Undergraduate Study

Latin American Studies B.A.

Undergraduate studies of the Latin American region are designed to serve the needs of students (1) desiring a general education focused on the Latin American cultural region, (2) planning to enter business, government, or international agency service, (3) preparing to teach social sciences or language, and (4) preparing for advanced academic study of Latin America. Students must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area.

e-mail: undergrads@international.ucla.edu
idpgrads@international.ucla.edu (graduate)
http://www.international.ucla.edu/undergrad
http://www.international.ucla.edu/grad

Latin American Studies / 403
Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, students may take Portuguese 102A and 102B which are designed for those with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

Transfer Students

Transfer applicants to the Latin American Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: advanced Spanish and one year of elementary Portuguese, or advanced Portuguese and intermediate Spanish, two Latin American history courses, and additional coursework in the area of concentration.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**Course Limitations**

Students may not take more than 8 units of Latin American Studies 199 for letter-grade credit nor more than 8 units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, students must have advanced junior standing and an overall grade-point average of 3.0, or senior standing.

**Double Majors**

Through judicious use of electives, students may find it possible to obtain the B.A. degree with two majors (e.g., Latin American Studies and History). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the student affairs counselor in Latin American Studies.

**Study in Latin America**

Students are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. For information on studying in Mexico, Costa Rica, Chile, or Brazil, contact the Education Abroad Program, B300 Murphy Hall, (310) 794-9820.

**Core Areas for the Major**

Students select one of three core areas as the focus of their major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

**Core I: Arts and Humanities**

**Preparation**

Required: Two courses from History 8A, 8B, 8C; Latin American Studies 97A (or 191 with department consent); Spanish and Portuguese M44; Art History 55B or Ethnomusicology 81K and World Arts and Cultures 6 or 8.

**Core Area**

Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. Core Concentration: Five courses as listed below in either the literature and folklore field or the linguistics field selected from Portuguese or Spanish, or in the fine arts field selected from art history or ethnomusicology. Only one course from the electives list within the arts and humanities core area may be applied toward the core concentration

2. Theory and Methods: One course from theory and methods within the core concentration field

3. Internal Breadth: Four additional courses from the arts and humanities core area but outside the core concentration field. No more than two of these may be electives

**External Breadth**

Required: From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: at least two courses in social sciences (e.g., history) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either social sciences or ecology and environment. No more than three external breadth courses may be electives.

**Approved Undergraduate Courses**

1. Literature and Folklore Field
   - History 160A, Portuguese 130A, 130B, C132, C133, C134, C135, 141, Spanish 120A through 120D, 137, 139, 140, 142, 143, 144A, 144B, 144C, 147, 149, 151B, 161, 191A, 191B, 198

2. Theory and Methods

3. Fine Arts Field

4. Theory and Methods
   - Art History 197, Ethnomusicology 180, 183, 187E, Film and Television 199, World Arts and Cultures 199

5. Linguistics Field

6. Theory and Methods
   - Linguistics 103, 110, 120A, 120B, M146, 165A, 165B, 170, 197, Portuguese 197, Spanish 197

7. Arts and Humanities Electives
   - Chicana and Chicano Studies 141, 142, Ethnomusicology M110A, M110B, Film and Television 112, Latin American Studies 191, 199, Theater M103C, World Arts and Cultures 131

**Core II: Social Sciences**

**Preparation**

Required: Two courses from History 8A, 8B, 8C; Latin American Studies 97A (or 191 with department consent); Economics 1 and 2, or 100; Statistics 10.

**Core Area**

Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. Core Concentration: Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list within the social sciences core area may be applied toward the core concentration

2. Theory and Methods: One course from theory and methods within the core concentration field

3. Internal Breadth: Four additional courses from the social sciences core area but outside the core concentration field. No more than two of these may be electives

**External Breadth**

Required: From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

**Approved Undergraduate Courses**

1. Anthropology and Sociology Field
   - Anthropology 114P, 114Q, 114R, 173Q, 174P, 179, Sociology 186

2. Theory and Methods
   - Anthropology C114S, 115P, C115R, 136Q, 139, M140, M186, 199, Sociology 112, 199

3. Economics Field
   - Economics 110, 111, 112, 120, 121, 122

4. Theory and Methods
   - Economics M135, 187, 199A, Management 180

5. History Field

6. Theory and Methods
   - History 191E, 197, Information Studies M111C

(4) Political Science Field

- Political Science 124C, 131, 139, 149, 154A, 154B, 169, 199

7. Theory and Methods
   - Political Science 104A, 104B, M105, 113A, 119, 137A, 137B, 168, 170A
Latin American Studies Minor

The interdisciplinary program leading to the Latin American Studies minor allows students to choose from a broad range of course offerings in various departments to develop professional and methodological skills with area expertise.

To enter the minor, students must have an overall grade-point average of 2.0 or better and have completed 45 units. For further information, contact Magda Yamamoto at (310) 206-6571.

Required Lower Division Courses (8 units): History 8A or 8B or 8C or Latin American Studies 97A, Spanish 25 or Portuguese 25.

Required Upper Division Courses (20 units): Five courses selected from the approved list of Latin American studies courses in at least two of the following fields: (1) arts and humanities (art history, ethnomusicology, folklore, Spanish and Portuguese), (2) ecology and environment (geography, public health), (3) social sciences (anthropology, economics, history, political science, sociology). If the social sciences field is selected, at least two courses must be taken in that field. No more than 4 units of course 199 may be applied toward the minor, and at least three upper division courses (12 units) must be taken in residence at UCLA.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Latin American Studies Program offers the Master of Arts (M.A.) degree in Latin American Studies.

Graduate Courses

M200. Latin American Research Resources. (4) (Same as History M205 and Information Studies M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

205. Latin Americanist Scholarship. (4) Lecture, three hours. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

M250A. Indians of South America. (4) (Same as Anthropology M272.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

250B. Interdisciplinary Seminar: Latin American Studies. (4) Seminar, three hours. Problem-oriented seminar on critical areas stressed in UCLA's cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. (4) Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of interdisciplinary nature. (Latin American Studies core course.)

M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4) (Same as Anthropology M264 and Community Health Sciences M264.) Lecture, three hours. Recommended preparation: Community Health Sciences 132; bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotope. Letter grading.

M268A-M268B. Seminars: Recent Latin American History. (4) (Same as History M268A-M268B.) Seminar, three hours. Course M268A is requisite to M268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of interdisciplinary nature. In Progress (M268A) and letter (M268B) grading.
501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. May be repeated, but only 4 units may be applied toward the minimum graduate course requirement. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. (4) Tutorial, to be arranged. Ordinarily taken only during term in which student is being examined. S/U grading.

598. Research for and Preparation of M.A. Thesis. (4) Tutorial, to be arranged. Only 4 units may be applied toward minimum graduate course requirement. S/U grading.

Jack M. Beard, J.D., LL.M.
Robert Bradley Sears, J.D.

Scope and Objectives
The UCLA School of Law is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. The school pioneered clinical teaching, is a leader in interdisciplinary research and training, and is at the forefront of efforts to link research to its effects on society and the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

The law school is unique in that it also offers students an opportunity to specialize in five specific areas of law: business law and policy; critical race studies; entertainment and media law and policy; law and philosophy; and public interest law and policy.

The school offers a three-year curriculum leading to the J.D. degree and two advanced degrees — Master of Laws (LL.M.) and Doctor of Juridical Science (S.J.D.).

Professional Study
The School of Law offers the Juris Doctor (J.D.), Doctor of Juridical Science (S.J.D.), and Master of Laws (LL.M.) degrees.

The undergraduate courses offered by the School of Law are designed for undergraduate students only. For information about the legal curriculum of the School of Law, see http://www.law.ucla.edu/home/.

Law, Undergraduate
Upper Division Courses
156. American Political Thought Seminar. (3) Seminar, nine hours. Examination of American political thought from founding to writings of Abraham Lincoln. Readings include Locke's Second Treatise of Government, Declaration of Independence, Federalist numbers 10 and 51, and numerous writings and speeches of Lincoln, including extensive portions of Lincoln-Douglas debates. Emphasis on class discussion. Letter grading.

161. Consumer Bankruptcy Policy Seminar. (3) Seminar, 13 hours. Examination of consumer bankruptcy policy with one architect of 1978 Bankruptcy Code. Discussion of debt payment in ancient Babylon where spouses and siblings could be sold into slavery for nonpayment of relative's debt. Examination of bankruptcy in U.S. history and analysis of heart of consumer bankruptcy policy, such as when debtors should be released from debts, what property debtors should keep, and how debtors can put together repayment plans. P/NP or letter grading.
170. Race and Racism in California Legal History, 1848 to the Present. (4) Seminar, 14 hours. Limited to freshmen/sophomores. Exploration of California legal history relevant to issues of race and racism, beginning with mid-19th-century transition from Mexican Alta California to U.S. territory and statehood. Topics include state measures affecting California Indians in the 19th century, African Americans in California's 19th-century history, measures used to curtail Chinese immigration laws designed to prevent racial intermarriage, Alien Land Laws aimed at Japanese residents of California, relocation of Japanese citizens after Pearl Harbor, California's response to U.S. immigrants from dust bowl during great depression, post-World War II through 1960s measures aimed at equal access to things like home ownership, employment, and rental housing, and uses of initiative in modern era. P/NP or letter grading.

173. Topics in American Constitutional History. (4) Lecture, three hours. Introduction to major themes, events, and cases in American constitutional history. U.S. Supreme Court decisions and other sources of constitutional meaning, including popular movements and expressions of constitutional principle from actors in other branches of federal government and in and states. Emphasis on historical background and ideological context for particular constitutional controversies and at various points in American history, with more formal analysis of particular decisions and competing methods of constitutional interpretation considered. Topics include origins of judicial review, debates over meaning of federalism in early republic, slavery and constitution, Reconstruction Amendments, laissez-faire constitutionalism, citizenship and empire, origins of civil liberties, New Deal constitutionalism, and prehistory of Brown versus Board of Education. P/NP or letter grading.

175. Seminar: Individual Rights Protected by U.S. Constitution. (3) Seminar, two hours. Limited to juniors/seniors. Broad introduction to and examination of individual rights under Bill of Rights and 14th Amendment to U.S. Constitution, including freedom of speech and press, religious freedom, right to privacy (including procreative rights) and due process of law, constitutional protection against discrimination based on race and gender, and basic criminal procedure protections. Emphasis on principal Supreme Court cases establishing scope of those rights and their limitations. Letter grading.

180. Special Topics in Law. (4) Lecture, four hours. Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit. P/NP or letter grading.

187A. Legal History Colloquium. (3) Seminar, two hours. Corequisite: course 193. Reading of scholarly papers prepared by school faculty members and other scholars in fields of legal history, economics, and political science. Preparation of critiques and discussion of issues in seminar setting with author of papers. P/NP or letter grading.

187B. Politics and International Law Colloquium. (3) Seminar, two hours. Corequisite: course 193. Limited to College Honors students. Lectures on alternative theoretical approaches (including realism, institutionalism, and constructivism) to understand relationships between politics and international law. Weekly presentations on topic by 10 leading law and political science scholars from the U.S. and abroad. Reading of scholarly papers, preparation of critiques, and discussion of issues in seminar setting with authors of papers. P/NP or letter grading.

191. Variable Topics Research Seminars: Law — California Legal History. (4) Seminar, two hours. Requisite: course 193. Research project selected in collaboration with faculty member and using original and secondary materials, to be conducted, followed by major presentation of student work to class and writing of major research paper. Letter grading.

193. Journal Club Seminars: Law. (1) Seminar, one hour; discussion, two hours. Corequisite: course 187A. Adjunct course limited to undergraduate students taking law colloquium. Intensive review of and follow-up of scholarly papers presented in colloquium series. Reading of legal cases and supplemental material to provide legal framework for each scholarly paper presented in colloquium. Supervised by faculty member in charge of colloquium series. May be repeated for credit. P/NP grading.

199. Directed Research in Law. (1 to 6) Tutorial, three hours per week per unit. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating scholarly paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives

Although lesbian, gay, bisexual, and transgender studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelmingly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathologized the invert, and until very recently psychiatry felt called on to “cure” the homosexual. For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained community organization, thereby acquiring a public voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities and genders. This challenge led to a dramatic increase in research on same-sex desire and cross-gender phenomena, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming — partly by assimilation, partly by contestation — the previously hostile learned tradition. This originally rather disparate work gradually coalesced into lesbian, gay, bisexual, and transgender studies, which, over the last 20 years, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, bisexual, and transgender studies is usually on minority sexualities and genders, it is impossible to study them in any meaningful way without raising questions about sexuality and gender in general. And those questions cannot be responsibly answered without considering class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus, lesbian, gay, bisexual, and transgender studies, which may at first seem to concern the private practices of a small number of people, inevitably leads to the much larger study of sexuality, gender, and culture. It represents an important vantage point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual and gender expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, bisexual, and transgender studies is the site of some of the most exciting work being done today on the relation of culture, gender, and sexuality.

UCLA's minor in Lesbian, Gay, Bisexual, and Transgender Studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course each in the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a community organization, thereby acquiring a kind of knowledge not usually available in the classroom. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study
sexuality and gender. They should be acquainted with some of the many different ways sexuality and gender have been organized in the past and are organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual and gender diversity of the world in which they live and of the complex ways in which sexuality and gender intersect with other categories of identity and practice.

Undergraduate Study

Lesbian, Gay, Bisexual, and Transgender Studies Minor
To enter the Lesbian, Gay, Bisexual, and Transgender Studies minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (32 units):
Lesbian, Gay, Bisexual, and Transgender Studies M114, 195, and six additional courses, including at least one each in the humanities, life sciences, and social sciences, to be selected from the approved list of courses available in the program office each term. Students may petition to apply a related course not on the list toward the six-course requirement if they can show that lesbian, gay, bisexual, or transgender issues represent a significant part of the course content. Students are strongly urged to keep in close contact with advisers in the program office who can help them plan their course of study.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Lesbian, Gay, Bisexual, and Transgender Studies

Upper Division Courses

M101A. Lesbian and Gay Literature before Stonewall, (5) (Same as English M101A and Women's Studies M101A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Study of lesbian and gay literature in English from earlier periods through 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

M101C. Special Topics in Lesbian and Gay Literature. (5) (Same as English M101C and Women's Studies M101C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable special- ized studies course in lesbian and gay literature. Topics focus on particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies, (5) (Same as Women's Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgender their experiences; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

M115. Topics in Study of Sexual and Gender Orientation, (4) (Same as Women's Studies M115.) Lecture, discussion, three hours. Requisite: course M114 or Women's Studies 10. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multilingual and cross-cultural emphases. May be repeated for credit. Letter grading.

M117. Queering American History, (4) (Same as Women's Studies M117.) Lecture, four hours. History of sexual and gender minorities in the U.S. Topics include changing norms, romantic friendships, medical discourse, liberation politics, post-Stonewall culture, AIDS, transgender movement, queer theory and politics. P/NP or letter grading.

M133. Chicana Lesbian Literature, (4) (Same as Chicana and Chicano Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of family in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies. Letter grading.

M134. Cultural Construction of Gender and Sexuality: Homosexuality, (4) (Same as Anthropology M134 and Honors College M132.) Seminar, three hours. Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

M137. Gay and Lesbian Perspectives in Pop Music, (5) (Same as Music History M137.) Lecture, four hours; discussion, one hour. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

M147A. Psychology of Lesbian Experience. (4) (Same as Psychology M147A and Women's Studies M147A.) Lecture, two hours; discussion, one hour. Requisite: course M114 or Psychology 10 or Women's Studies 10. Designed for juniors/seniors. Review of research and theory in psychology and women's studies to examine various aspects of lesbian experience, impact of heterosexualism, gender role socialization, minority status of women, lesbian identity development within a multicultural society, changes in psychological theories about lesbians in sociocultural context. P/NP or letter grading.

M150. Speaking Out: Public Speaking on Lesbian, Gay, Bisexual, and Transgender Issues, (1) Discussion, two hours. Intensive course designed to teach leadership and public speaking skills on lesbian, gay, bisexual, and transgender issues. Enrollment limited. Personal growth, and leadership, gay, bisexual, and transgender history intersect with public speaking and leadership skills. Topics include sexual identities, family, leadership, and public speaking performance. P/NP or letter grading.

M167. Contested Sexualities, (4) (Same as Women's Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community, age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

187. Selected Topics in Lesbian, Gay, Bisexual, and Transgender Studies, (4) Lecture, four hours; discussion, three hours. Study of selected topics in lesbian, gay, bisexual, and transgender studies. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

194. Research Group or Internship Seminars: Lesbian, Gay, Bisexual, and Transgender Studies, (2 to 4) Seminar, two hours. Preparation: completion of four courses toward minor. Requisite: course M114. Corequisite: course 195. Designed for seniors who are doing internship in lesbian, gay, bisexual, or transgender organization. Discussion of organization theoretical and political issues in context of internship and relation of those issues to ideas explored in minor courses already taken. May be repeated for credit. P/NP grading.

195. Community or Corporate Internships in Lesbian, Gay, Bisexual, and Transgender Studies, (2 to 4) Tutorial, one hour. Preparation: completion of four courses toward minor. Requisite: course M114. Corequisite: course 194. Limited to seniors. Internship in supervised setting in lesbian, gay, bisexual, or transgender community organization. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in Lesbian, Gay, Bisexual, and Transgender Studies, (2 to 4) Tutorial, one hour. Requisite: course M114. Limited to juniors/seniors. Directed program of independent study or research on specific topic within lesbian, gay, bisexual, and transgender studies, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
Molecular Genetics Department), Molecular, Cell, and Developmental Biology (Molecular, Cell, and Developmental Biology Department), Neuroscience (Neuroscience Interdepartmental Program), Physiological Science (Physiological Science Department), and Psychobiology (Psychology Department). This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses that forms the foundation for any study of life sciences and that is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings in this section of the catalog. For additional information on the life sciences core curriculum, see http://www.lscore.ucla.edu.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the eight majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The Marine Biology and Psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

**Undergraduate Study**

**Life Sciences Core Curriculum**

**Required:** Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

Transfer applicants with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**Undergraduate Research Consortium in Functional Genomics**

The Undergraduate Research Consortium in Functional Genomics (URCFG) offers a sequence of laboratory-intensive courses designed for undergraduate students committed to pursuing research. The innovative partnership between UCLA and the Howard Hughes Medical Institute (HHMI) was formed through a major award to Professor Utpal Banerjee. The HHMI Professors Program seeks to engage leading scientists in transmitting the excitement and values of scientific research to undergraduates. The goal of the URCF is to emphasize the importance for academia and industry of research in the fields of medicine and biotechnology.

Sponsored by the Life Sciences Core, the URCF provides undergraduate students from any UCLA major with the opportunity to learn biological research techniques early in their educational careers and within a structured institutional environment. Students devote between one and four terms to the study of biological research in genetics, bioinformatics, and functional genomics. The training emphasizes research concepts in basic science such as the model organism and in advanced research techniques such as electron microscopy.

Students participate in one structured lower division course — Life Sciences 10H — which is limited to 30 students per term and is offered every term. After satisfactorily completing course 10H and with instructor consent, students may participate in up to three terms of upper division research in genes, genetics, and genomics. The upper division courses — Life Sciences 100HA, 100HB, 100HC — do not involve preexisting laboratory experiments. Syllabi for the courses are instead based on individual research projects whose outcomes students discover through the course of their studies. It is anticipated that only about one third of the students who complete course 10H will subsequently enroll in course 100HA, and students are advised that they can benefit significantly from course 10H alone.

Each course must be taken for a letter grade. Under special circumstances, one course may be waived for students who have prior research experience in fields covered by the courses. Students who complete the required courses receive a certificate of merit indicating their completion of the consortium.

To participate, students must be accepted into the Undergraduate Research Consortium in Functional Genomics. Interested students should contact the URCF coordinator in the Molecular, Cell, and Developmental Biology Student Affairs Office, 2128 Life Sciences, (310) 825-7109, for information regarding admission and an application. Applications are due no later than Friday of the fourth week of the term prior to the term in which students plan to enroll in course 10H.

**Life Sciences**

**Lower Division Courses**

1. **Evolution, Ecology, and Biodiversity.** (5) Lecture, three hours; laboratory, two hours; one field trip. Introduction to principles and mechanisms of evolution by natural selection; population, behavioral, and community ecology; and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships. P/NP or letter grading.

2. **Cells, Tissues, and Organs.** (5) Lecture, three hours; discussion/lab, three hours (alternate weeks). Enforced requisites: Chemistry 14A or 20A. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Letter grading.

3. **Introduction to Molecular Biology.** (5) Lecture, three hours; discussion/lab, three hours (alternate weeks). Enforced requisites: course 2, and Chemistry 14C or 30A. Introduction to basic principles of biochemistry and molecular biology. Letter grading.

5. **Research Training in Genes, Genetics, and Genomics.** (6) Lecture, 90 minutes; laboratory, six hours; computer laboratory, 90 minutes. Limited to 30 students. Basic training in biological research, including techniques in genetics, model organism, bioinformatics, functional genomics, electron microscopy. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

6. **Life: Concepts and Issues.** (5) Lecture, three hours; discussion, two hours. Introduction to important concepts and issues in the field of non-life sciences majors. Topics include chemistry of life, genetics, physiology, evolution, and ecology — all explored in lecture and debates, with a writing component. P/NP or letter grading.

7. **Introduction to Molecular Biology (Honors).** (5) Lecture, two and one-half hours; discussion, 90 minutes; movie section, two and one-half hours. Enforced requisites: course 2, and Chemistry 14C or 30A. Honors course parallel to course 3, but at a more advanced level. Letter grading.

8. **Evolution, Ecology, and Biodiversity.** (5) Lecture, 90 minutes; discussion, 90 minutes. Introduction to study of biodiversity and an application. Applications are due no later than Friday of the fourth week of the term prior to the term in which students plan to enroll in course 10H.

Linguistics

Upper Division Courses
100HA-100HB-100HC. Advanced Research in Genes, Genetics, and Genomics. (4-4-4) Lecture, two hours; laboratory, ten hours. Requisite: course 10H. Course 100HA is requisite to 100HB, which is requisite to 100HC. Designed for undergraduates who are committed to pursuing research. Advanced research training in genetics, cell and developmental biology, bioinformatics, functional genomics. Techniques include electron microscopy, other light microscopies, immunohistochemistry. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

192A. Undergraduate Practicum in Life Sciences. (4) Seminar, two hours. Requisite: course 2 or 3. Training and supervised practicum in laboratory setting for advanced undergraduate students in courses related to life sciences. Students work on oral presentation skills and assist in preparation and presentation of materials and development of programs under guidance of faculty members. May be repeated once for credit. P/NP grading.

192B. Undergraduate Practicum in Life Sciences. (4) Seminar, two hours. Requisite: course 2 or 3. Limited to sophomores/juniors/seniors. Training and supervised practicum for advanced undergraduate students in courses related to life sciences. Students work on oral presentation skills and assist in preparation and presentation of materials and development of programs under guidance of faculty members. Letter grading.

Graduate Course
375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA.May be repeated for credit. S/U grading.

Undergraduate Study
The majors described below are of three types: (1) a major that concentrates entirely on general linguistics, (2) several majors that combine the basic courses of the general program with a language concentration or other related fields, and (3) a major that concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

African Languages B.A.
Preparation for the Major
Required: Linguistics 20, nine courses from African Languages 1A through 42C and 197 (six in one language and three in another).

Transfer Students
Transfer applicants to the African Languages major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course and two years of one language and one year of one other language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.
The Major

**Required:** A minimum of 13 upper division courses, including three courses in an African language; African Languages M187, Linguistics 103; two courses from Film and Television 106C, French 121, Theater 102E, World Arts and Cultures 134, or one or more special 4-unit African Languages 197 tutorials focusing on literature in an African language; three courses from English 114, Ethnomusicology 136A, C136B, History 121A, 121B, 121C, 122A, 122B, 123A, 123B, 124A, 124B, Linguistics 110, 120A, 120B or 127, C140, M146, 170, Political Science 151A, 151B, 151C. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

**Linguistics B.A.**

The B.A. degree program is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables undergraduates to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

**Preparation for the Major**

**Required:** Linguistics 20; two of the following: Philosophy 31, Psychology 10 or 100A, one cultural anthropology course; completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are requisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term of work in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

**Transfer Students**

Transfer applicants to the Linguistics major must complete as many of the following introductory courses as possible prior to admission to UCLA: Linguistics 103, 110, 120A, 120B, 130 or 132, and two courses from 125, 165A, 165B (students may substitute courses 200A and 200B for 165A and 165B respectively if they receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining four courses are electives, three of which must be linguistics courses (no more than one course from 197, 198A, and 199 may be applied toward the major). The other course may be in linguistics or in another field as follows: Anthropology 143, Classics 180, English 121, 122, Philosophy 127A, 127B, 127, Psychology 120A, 124E, 133C, or an upper division course in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an advisor.

Linguistics 198A and 198B, or 199, are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper that can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

**Linguistics and Anthropology B.A.**

**Preparation for the Major**

**Required:** Linguistics 20, completion of the equivalent of the sixth term of a foreign language and the third term of a second foreign language (at least three terms must be in a language other than those in the Romance, Slavic, and Germanic families). Anthropology 33 is strongly recommended, when offered.

**Transfer Students**

Transfer applicants to the Linguistics and Anthropology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: Anthropology 143, Classics 180, English 121, 122, Philosophy 127A, 127B, 127, Psychology 120A, 124E, 133C, or an upper division course in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an advisor.

**Linguistics and Computer Science B.A.**

**Preparation for the Major**

**Required:** Linguistics 20, Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), 30 (or Computer Science 33), completion of the sixth term in one foreign language or the third term in each of two foreign languages. Mathematics 61 is recommended.

**Transfer Students**

Transfer applicants to the Linguistics and Computer Science major with 90 or more units must complete as many of the following introductory
courses as possible prior to admission to UCLA: one introduction to linguistics course, two calculus courses, one symbolic logic course, four computer programming courses, and two years of one foreign language or one year in each of two foreign languages. One discrete structures course is recommended.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 125, 165A or 165B, C180, 185A, Computer Science 131, 132, 161, 181, and one upper division elective in linguistics or computer science. Linguistics 104 and 185B are strongly recommended.

Linguistics and English B.A.
Preparation for the Major
Required: Linguistics 20, English 4W or 4HW, 10A, 10B, 10C, Philosophy 31, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

Transfer Students
Transfer applicants to the Linguistics and English major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: introduction to linguistics course, one critical reading and writing course, one year of English literature survey courses, one symbolic logic course, and two years of one foreign language and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics, French 100, 101, 102, 105, 107, and one elective upper division French literature course.

Linguistics and Italian B.A.
Preparation for the Major
Required: Linguistics 20, Italian 1, 2, 3, 4, 5, 6, Latin 1, 2, 3, one cultural anthropology course.

Transfer Students
Transfer applicants to the Linguistics and Italian major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Italian, one year of Latin, one introduction to linguistics course, and one cultural anthropology course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 180, and three upper division electives in Italian.

Linguistics and Philosophy B.A.
Preparation for the Major
Required: Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

Transfer Students
Transfer applicants to the Linguistics and Philosophy major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two symbolic logic courses and two courses from Western philosophy, political philosophy, philosophy of mind, or skepticism and rationality, and two years of one foreign language and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 125, 165B (or 200B with a grade of A in 120B and consent of instructor), two upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 124 through 135, 170, 172, 174, 180, 181, 184, of which at least two must be from 127A, 127B, 172.

Linguistics and Psychology B.A.
Preparation for the Major
Required: Linguistics 20, Psychology 10, 85, 100A, 100B, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language. Program in Computing 10A is strongly recommended.

Transfer Students
Transfer applicants to the Linguistics and Psychology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, and two years of one foreign language and one year of a second foreign language. One introduction to programming course is strongly recommended.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Eleven upper division courses (six in linguistics and five in psychology) as follows: Linguistics 103, 120A, 120B, 130, 132, and one upper division elective in linguistics (multiple-listed courses may not be applied). Linguistics C135 or 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) is strongly recommended. Also required are Psychology 120A, 121, 133B, and two electives to be selected from 115, 116, M117C, 118, M119L, 124A, 124B, 124C, 124E, 130, 133C, 133E, 133F, 186A, 186B.

Linguistics and Scandinavian Languages B.A.
Preparation for the Major
Required: Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the equivalent of the third term of a second foreign language.

Transfer Students
Transfer applicants to the Linguistics and Scandinavian Languages major with 90 or more units must complete as many of the fol-
lowing introductory courses as possible prior to admission to UCLA: two years of either Swedish, Norwegian, or Danish, one introduction to linguistics course, and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Eleven upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics, two courses from Scandinavian 105, 106, 107 (or one of these courses twice), 197 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

**Linguistics and Spanish B.A.**

**Preparation for the Major**

**Required:** Linguistics 20, Spanish 1, 2, 3, 4, 5, 6, 25 or 27, M42, M44, completion of the equivalent of the third term of a second foreign language.

**Transfer Students**

Transfer applicants to the Linguistics and Spanish major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Spanish, one Spanish composition course, one Spanish civilization course, one Spanish American civilization course, one introduction to linguistics course, and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one additional upper division course in linguistics, Spanish 100A, 100B, 115 or M118A, two courses from 119A, 119B, 119C, and one additional upper division Spanish course.

**Honors Program**

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 198A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

**Computing Specialization**

Students in any of the linguistics majors (except Linguistics and Computer Science) may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A, 10B, 10C, 60. Linguistics C180, 185A. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

**Linguistics Minor**

The Linguistics minor is designed for students where training in linguistics analysis could be an enhancement to their major programs and to students who are interested in language(s) but do not have time in their undergraduate programs to pursue quarter language sequences. In addition, the minor provides students with a way to design “custom” joint degrees with linguistics where the Linguistics Department does not have an existing joint degree program combining linguistics and another field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Course (5 units): Linguistics 20.**

**Required Upper Division Courses (27 to 30 units):** Six courses, which must include Linguistics 103, 120A, 120B, two elective courses selected from 104 through 185B, and an additional elective linguistics course, which may be upper or lower division.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees. The Department offers a Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Linguistics.

**African Languages**

**Lower Division Courses**

1A-1B-1C. Elementary Swahili, (4-4-4) Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania. P/NP or letter grading.

2A-2B-2C. Intermediate Swahili, (4-4-4) Lecture, four hours. Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C. P/NP or letter grading.

4. **Conversational Swahili, (1) Seminar, one hour.** Enforced requisites: courses 1A, 1B. Practice in Swahili conversation on topics of general interest, including East African current events, for Swahili students at intermediate level. May be repeated for credit. P/NP grading.

5. **Building Careers through Knowledge of Africa.** (1) Lecture, one hour. Guest lecturers, representing diverse careers such as academia, business, arts, nonprofits, and religious work, speak about study of Africa and careers they have pursued after studying about Africa in college and/or graduate school. P/NP grading.

7A-7B-7C. Elementary Zulu, (4-4-4) Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. P/NP or letter grading.

8A-8B-8C. Intermediate Zulu, (4-4-4) Lecture, four hours. Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C. P/NP or letter grading.

11A-11B-11C. Elementary Yoruba, (4-4-4) Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of western Nigeria. P/NP or letter grading.

12A-12B-12C. Intermediate Yoruba, (4-4-4) Lecture, four hours. Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C. P/NP or letter grading.

15. **Intensive Elementary Swahili, (12) Lecture, twenty hours (eight weeks).** Intensive instruction (equivalent to courses 1A, 1B, 1C) in Swahili, major language of East Africa, particularly Tanzania. Letter grading.

17. **Intensive Elementary Zulu, (12) Lecture, twenty hours (eight weeks).** Intensive instruction (equivalent to courses 7A, 7B, 7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

18. **Intensive Intermediate Zulu, (12) Lecture, twenty hours (eight weeks).** Enforced requisite: course 7C or 17. Intensive instruction (equivalent to courses 8A, 8B, 8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

27. **Intensive Elementary Xhosa, (12) Seminar, twenty hours.** Basic communication skills and intensive instruction in Xhosa, with emphasis on listening and speaking. Use of various instructional media, including textbook, CD-ROMS, interactive Web-based materials, and videos. P/NP or letter grading.

29. **Intensive Elementary Igbo, (12) Seminar, twenty hours.** Basic communication skills and intensive instruction in Igbo, with emphasis on listening and speaking. Use of various instructional media, including textbook and audio/video materials. P/NP or letter grading.

Linguistics / 413
31A-31B-31C. Elementary Bambara. (4-4-4) Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects. P/NP or letter grading.

32A-32B-32C. Intermediate Bambara. (4-4-4) Lecture, four hours. Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C. P/NP or letter grading.

41A-41B-41C. Elementary Hausa. (4-4-4) Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of northern Nigeria and adjacent areas. P/NP or letter grading.

42A-42B-42C. Intermediate Hausa. (4-4-4) Lecture, four hours. Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C. P/NP or letter grading.

51A-51B-51C. Elementary Amharic. (4-4-4) Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. (4-4-4) Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51C. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/NP (undergraduates), S/U (graduates), or letter grading.

61A-61B-61C. Elementary Wolof. (4-4-4) Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia. P/NP or letter grading.

62A-62B-62C. Intermediate Wolof. (4-4-4) Lecture, four hours. Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

96. Crash Course in Swahili for Volunteers. (2) Seminar, two hours. Preparation for students about to travel to East Africa for volunteer or other work experience. Students learn to interact with speakers of Swahili in most predictable contexts by asking and answering questions. Reading of simple texts and understanding of short oral instructions and descriptions in standard Swahili, P/NP or letter grading.

97. Variable Topics in Elementary and Intermediate Studies in African Languages. (1 to 6) Seminar, five hours. Lecture. Enforced requisite: course 45. Assignments are given to individual students based on their needs and interests in the target languages; a range of language skills and cultural topics are covered for students who are working toward proficiency in a variety of African languages. May be repeated for credit. Letter grading.

Upper Division Courses

103A-103B-103C. Advanced Swahili. (4-4-4) Lecture, four hours. Requisite: course 2C. Course 103A is requisite to 103B, which is requisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. P/NP or letter grading.

109A-109B-109C. Advanced Zulu. (4-4-4) Lecture, five hours. Requisite: course 8C. Course 109A is requisite to 109B, which is requisite to 109C. Readings in Zulu literature and the contemporary press. Discussions mainly in Zulu. P/NP or letter grading.

123A-123B-123C. Advanced Yoruba. (4-4-4) Lecture, four hours. Requisite: course 12C. Course 123A is requisite to 123B, which is requisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba. P/NP or letter grading.

133A-133B-133C. Advanced Bambara. (4-4-4) Lecture, four hours. Requisite: course 32C. Course 133A is requisite to 133B, which is requisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara. P/NP or letter grading.

143A-143B-143C. Advanced Hausa. (4-4-4) Lecture, four hours. Requisite: course 42C. Course 143A is requisite to 143B, which is requisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. P/NP or letter grading.

150A-150B. African Literature in English Translation. (4-4) Lecture, four hours. Narrative and didactic prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. P/NP or letter grading.

153A-153B-153C. Advanced Amharic. (4-4-4) Lecture, five hours (15 hours for intensive course). Requisite: course 52C. Course 153A is requisite to 153B, which is requisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

173. Preparing to Study Abroad in Africa. (4) Lecture, three hours. Discussion mainly in Hausa. P/NP or letter grading.

197. Individual Studies in African Languages. (1 to 6) Tutorial, four hours. Limited to juniors/seniors. Individual intensive instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available. Scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

596. Directed Studies. (1 to 8) Tutorial, to be arranged. Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Indigenous Languages of the Americas

Lower Division Courses

17. Intensive Elementary Quechua, (12) (Formerly numbered Quechua 17.) Lecture, 15 hours; laboratory, five hours. Intensive course equivalent to courses 18A, 18B, 18C. Language of Incas and its present-day dialects, as spoken in Andean South America. Offered in summer only. Letter grading.

18A-18B-18C. Elementary Quechua, (4-4-4) (Formerly numbered Quechua 18A-18B-18C.) Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of Incas and present-day Quechua language, as spoken in Andean South America. P/NP or letter grading.

Upper Division Courses

119A-119B-119C. Advanced Quechua, (4-4-4) (Formerly numbered Quechua 119A-119B-119C.) Lecture, five hours. Requisite: course 18C. Course 119A is requisite to 119B, which is requisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua. P/NP or letter grading.

191. Variable Topics Research Seminars: Indigenous Languages. (2 or 4) (Formerly numbered Quechua 191.) Seminar, three hours. Research seminars on selected topics on various indigenous languages. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

Graduate Course

596. Directed Studies in Quechua. (1 to 6) (Formerly numbered Quechua 596.) Tutorial, to be arranged. Requisites: courses 119A, 119B, 119C. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Linguistics

Lower Division Courses

1. Introduction to Study of Language. (5) Lecture, three hours; discussion, one hour. Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge. P/NP or letter grading.

2. Language in the U.S. (5) Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arrivals languages) and social and political aspects of American language use. P/NP or letter grading.

4. Language and Evolution. (5) Lecture, four hours; discussion, one hour. Basic concepts and tools of evolutionary theory and linguistics relevant to how organisms with linguistic abilities could evolve, and how particular languages, as cultural artifacts, survive and change so rapidly. P/NP or letter grading.

5. Languages of World. (5) Lecture, four hours; discussion, one hour. Introduction to linguistic diversity of world and to such core areas of linguistics as study of sound production and patterning (phonetics and phonology), word formation (morphology), and sentence formation (syntax). Structural characteristics of world’s languages and methods of classifying languages into families and types; subfields of linguistics. P/NP or letter grading.

6. Out of Mouths of Babes. (4) Lecture, six hours. How children acquire language, most complex of human cognitive achievements. Look at amazing linguistic abilities of infants and their first perception and production of speech sounds, then investigation of how children learn words and rules for producing and understanding sentences. Language acquisition in special populations such as children acquiring sign languages, bilingual children, and people acquiring language beyond critical period. Focus mainly on English, with consideration of other languages. Offered in summer only. P/NP or letter grading.

10. Introduction to Historical Linguistics. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 103, 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Survey of the most important stages in the history of English. P/NP or letter grading.

11. Intonation. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104 or 204. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Letter grading.

14. American Indian Linguistics. (5) Lecture, four hours; discussion, one hour. Strongly recommended preparation: course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail. P/NP or letter grading.

120B. Syntax I. (5) Lecture, four hours; discussion, one hour. Requisite: course 20. Course 120A is not requisite to 120B. Descriptive analysis of morphological and syntactic phenomena; phonological and grammatical structures. Letter grading.

125. Semantics, (5) Lecture, four hours; discussion, one hour. Requisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning. P/NP or letter grading.

127. Syntactic Typology and Universals. (5) Lecture, four hours; discussion, one hour. Requisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparision, existence/locational possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed. P/NP or letter grading.
C128A-C128B. Romance Syntax: French. (4-4) Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requisite: course 120B. Course C128A is requisite to C128B. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with courses CM228A-CM228B, P/NP or letter grading.

130. Language Development. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of theoretical and research perspectives on development of children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. P/NP or letter grading.

132. Language Processing. (5) Lecture, four hours; laboratory, one hour. Requisites: courses 20, 120A, 120B. Center issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, ambiguities, speech models of sentence production, and computation of syntactic structure during production. P/NP or letter grading.

C135.Neurolinguistics. (5) Lecture, four hours; discussion, one hour. Requisite: courses 1 or 30, and 130. Exploration of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235. P/NP or letter grading.

C140. Bilingualism and Second Language Acquisition. (5) Lecture, four hours; discussion, one hour. Requisites: courses 120A, 120B, 130. Introduction to study of child bilingualism and adult and child second language (L2) acquisition, with focus on understanding nature of L2 grammar and grammatical processes underlying L2 bilingual acquisition. Discussion of neurolinguistic and social aspects of bilingualism. Concurrently scheduled with course C244. P/NP or letter grading.

C146. Language in Culture. (5) Same as Anthropology M140.) Lecture, three hours; discussion, one hour; fieldwork, one term. Requisite: course 20 or Anthropology 33. Study of language as aspect of culture; relation of habitual thought and behavior to language; and language and classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. P/NP or letter grading.

M150. Introduction to Indo-European Linguistics. (5) (Same as Indo-European Studies M150.) Lecture, four hours. Recommended requisite: course 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of reconstructed Indo-European proto-language and proto-culture. One or more Indo-European languages may be introduced. P/NP or letter grading.

160. Field Methods. (6) Discussion; four hours; individual or group sessions, one to two hours. Requisites: courses 103, 120A, 120B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

165A. Phonology II. (5) Lecture, four hours; discussion, one hour. Requisite: course 120A (undergraduates with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonology theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar. P/NP or letter grading.

165B. Syntax II. (5) Lecture, four hours; discussion, one hour. Requisite: course 120B. Recommended for students with plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics. P/NP or letter grading.

170. Language and Society: Introduction to Sociolinguistics. (5) Study of patterns of variation and language and society; social dialects and social styles in language; problems of multilingual societies.

175. Linguistic Change in English. (5) Lecture, four hours. Requisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexis and syntax. P/NP or letter grading.

M177. Structure of Korean. (4) (Same as Korean CM120.) Lecture, three hours. Recommended preparation: two years of Korean, or one year of Korean and some knowledge of Japanese. Discussion of major syntactic, semantic, and pragmatic characteristics of modern Korean in light of linguistic universals, with brief introduction to typological features, and phonological structure of Korean. Letter grading.

185A. Computational Linguistics I. (5) Lecture, four hours; laboratory, one hour. Requisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. P/NP or letter grading.

185B. Computational Linguistics II. (5) Lecture, four hours; laboratory, one hour. Requisite: course 185A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. P/NP or letter grading.

191A. Variable Topics Research Seminars: Linguistics. (4) (Formerly numbered 191.) Seminar, three hours. Requisites: course 1 or 20. Research seminars on topics selected, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

191B. Variable Topics Research Seminars: Linguistics. (2 or 4) Seminar, three hours. Research seminars on selected topics. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

197. Individual Studies in Linguistics. (2 to 4) Tutorial, four hours. Requisite: course 1 or 20. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject material required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A. Honors Research in Linguistics I. (4) Tutorial, to be arranged. Preparation: 3.5 grade-point average. Requisite or corequisite: course 165A (or 200A) or 165B (or 200B) as prerequisite. Completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 198A is taken. Limited to juniors/seniors. Development of honors thesis under direction of linguistic topic selected by student under direct supervision of faculty member. Consult professor in charge to enroll. May be repeated for credit. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

198B. Honors Research in Linguistics II. (2) Tutorial, to be arranged. Requisite: course 198A. Limited to juniors/seniors. Completion of honors thesis or comprehensive research project begun in course 198A under direct supervision of faculty member. Consult professor in charge to enroll. May be repeated for credit. Individual contract required. Letter grading.

200A. Syntactic Theory I. (4) Preparation: graduate linguistics student or grade of A in course 120B or equivalent course in phonology. Courses 200A and 201 form two-course survey of current research in phonological theory. Interaction of phonology with morphology and syntax, syllable structure, stress. Letter grading.

200B. Syntactic Theory II. (4) Preparation: graduate linguistics student or grade of A in course 120B or equivalent course in phonology. In-depth introduction to selected topics in theory of constituent structure and syntax that indicates, arguments and logical relations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon, grammatical function-changing rules, head-complement relations with evidence.

200C. Semantic Theory I. (4) Lecture, four hours. Requisite: course C180 or C226. Overview of current results and research methods in linguistic semantics. Topics include generalized quantifiers and semantic universals, predicate argument structures, variable binding and pronounization, formal semantic interpretation, syntax and LF; tense, ellipsis, and focus. Letter grading.

201. Phonological Theory II. (4) Requisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology.

203. Phonetic Theory. (4) Requisite: course 120A. Preliminary to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of feature systems for phonetic and phonological analysis.
204A. Experimental Phonetics. (4) (Formerly numbered 202A.) Lecture, three hours. Requires: course 103. Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistical analysis; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech. S/U or letter grading.

204B. Speech Production. (4) Lecture, three hours; laboratory, one hour. Requires: course 104 or 204A. Survey of major topics in speech production research, especially as it relates to linguistic phonetics. Topics include physiology of vocal tract and models of speech production and articulatory/acoustic relations. Emphasis on use of laboratory methods such as aerodynamic transducers, electrolaryngography, static and electro-palatography, electromagnetically artifact- lography, and imaging techniques. S/U or letter grading.

206. Syntactic Theory II. (4) Requires: course 200B. In-depth introduction to selected topics in theory of movement processes and topics selected from following areas: WH-movement and related rules, subjacency conditions on movement; ECP and related conditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in movement constructions; LF WH-movement; filters; reconstruction; parasitic gaps; barriers theory; control theory; null subject parameter.

209A. Computational Linguistics I. (5) Lecture, four hours; laboratory, one hour. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation on parsing, and response generation. S/U or letter grading.

209B. Computational Linguistics II. (5) Lecture, four hours; laboratory, one hour. Requires: course 209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. S/U or letter grading.

209C. Computational Semantics. (4) Lecture, four hours. Preparations: basic knowledge of semantics. Requires: course 185A or 209A. Study of algorithms to compute and reason with meanings of sentences and texts. Phenomena such as anaphor resolution, presupposition projection, and tracking time, objects, and space to be covered. S/U or letter grading.

210A. Field Methods I. (4) Lecture, four hours. Preparation: grade of B or better in course 103 or in examination of the instructor. Requires: courses 200A, 200B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be written. Full descriptive account of the language. May be repeated for credit with topic change. S/U or letter grading.

210B. Field Methods II. (4) Lecture, four hours. Requires: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change. S/U or letter grading.

211. Intonation Theory. (4) Requires: course 200A, 200B. Survey of many of some most significant results on current assumptions about their memory, time, and computational power, and precise assumptions about information provided by the environment.

213A. Grammatical Development. (4) Requires: courses 200A, 200B. Required: course 130 or 233. Survey of theoretical perspectives and contemporary empirical research in development of syntax and other components of grammar, with particular emphasis on acquisition theory, linguistic theory, and issues of learnability.

213B. Brain Bases for Language. (4) Requires: courses 200A, 200B. Recommended: course C135 or C215. This course surveys the contemporary empirical research in neurological and cognitive bases for language, language development, and language breakdown.

213C. Linguistic Processing. (4) Requires: courses 165B and/or 200B. Recommended: courses 123 or 232 or 206. Survey of theoretical perspectives and contemporary empirical research in human processing of language (comprehension and/or production), with emphasis on word processing, ambiguities, resolution, effects of memory load, and relationships between grammar and processor.

214. Survey of Current Syntactic Theories. (4) Requires: course 206. Survey of several current syntactic theories, compared with one another and with theory discussed in course 206, from point of view of theories’ relative descriptive and explanatory power.

215. Syntactic Typology. (2 or 4) Lecture, four hours. Requires: course 206. Current results in word-order universals; genetic classification of world’s languages; cross-language properties of specific construction types, including relative clauses, passives, copular constructions, systems, agreement systems, deixis systems, and types of sentence complements. S/U or letter grading.

216. Syntactic Theory III. (4) Requires: course 206. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; complex quantifier structures.

217. Experimental Phonology. (4) Lecture, four hours. Requires: course 200A. Survey of experimental work that bears on speakers’ knowledge of phonology, including theories of lexicon, relation between perception and phonology, and universal nature of articulatory and phonological structure.

218. Mathematical Structures in Language II. (4) Lecture, four hours. Requires: course C180 or C208. In-depth study of generalized quantifier theory; select- ed topics from distinctive feature theory, formal syntax, and generative theory of natural language theory, variable binding operators. May be repeated for credit with consent of instructor. S/U or letter grading.

220. Linguistic Areas. (4) Requires: courses 120A, and 120B or 127. Recommended: courses 165A or 200A, 165B or 200B. Detailed study of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal South America, Far East, etc.). May be repeated for credit with topic change.

225. Linguistic Structures. (4) Lecture, four hours. Requires: courses 120A, and 120B or 127. Recommended: courses 165A or 200A, 165B or 200B. Pho- nological and grammatical structure of a selected lan- guage and its genetic relationships to others of its family. May be repeated for credit with topic change. S/U or letter grading.

C228A-CM228B. Romance Syntax: French. (4-4) (Same as Romance Linguistics M202A-M202B.) Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requires: course 200B. Course CM228B is required to CM228A. ASpects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with courses C128A-C128B. S/U or letter grading.

230. History of Linguistics. (4) Requires: courses 200A, 200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

232. Language Processing. (5) Lecture, four hours; laboratory, one hour. Central issues in language comprehension and production, with emphasis on how theories of linguistic models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferencing, speech error models of sentence production, and computation of syntactic structure during production. S/U or letter grading.

C235. Neurolinguistics. (5) Lecture, four hours; discussion, one hour. Requires: courses 1 or 20, and 200A, 200B, and 232, 206. Survey of theoretical perspectives and computational models of language and language processing. May be repeated for credit. S/U or letter grading.

236. Computational Phonology. (4) Lecture, four hours. Introduction to computational models of phonology and phonological acquisition. Topics include finite state machines, probabilistic automata, over-constrained models, dynamic programming methods. Letter grading.

237. Linguistic Methods Laboratory. (4) Laboratory, four hours. Variable content, with topics such as computer implementation of linguistic models, corpus studies, experimental methods for linguistic data collection, statistical analysis of results. May be repeated for credit. Letter grading.

M238. Analyzing Historical Texts. (4) (Same as History M266C.) Seminar, four hours. Designed for graduate students. Analysis of linguistic structure and ethnographic context of legal and other documents written by native-speakers and translators. Topics include paleographic technique and text analy- sis software. May be repeated for credit. S/U grading.
C244. Bilingualism and Second Language Acquisi-
tion. (5) Lecture, four hours; discussion, one hour.
Requisites: courses 120A, 120B, 130. Introduction to
study of second language acquisition and adult and child
second language (L2) acquisition, with focus on un-
derstanding nature of L2 grammar and grammatical
processes underlying L2 bilingual acquisition. Discus-
sion of neurolinguistic and social aspects of bilingual-
ism. Concurrently scheduled with course C140. Grad-
uate students expected to read more advanced litera-
ture, do in-class presentations, and submit graduate-
level term paper. S/U or letter grading.

M246C. Topics in Linguistic Anthropology. (4)
(Same as Anthropology M241.) Problems in relations of
language, culture, and society. May be repeated for
credit.

251A. Topics in Phonetics and Phonology. (4)
Lecture, four hours. Requisite: course 200A. Course
201, 203, or 204 may be required. Specialized topics
in phonetics and phonology. Meets with course 251B.
May be repeated for credit.

251B. Topics in Phonetics and Phonology. (2)
Lecture, four hours. Requisite: course 200A. Course
201, 203, or 204 may be required. Specialized topics
in phonetics and phonology. May not be applied to-
ward M.A. or Ph.D. degree requirements. S/U grading.

252A. Topics in Syntax and Semantics. (4) 
Lecture, four hours. Requisite: course 200B. Course
206, 207, 214, 215, or 216 may be required. Specialized
topics in syntax and semantics. Meets with course
252B. May be repeated for credit.

252B. Topics in Syntax and Semantics. (2) 
Lecture, four hours. Requisite: course 200B. Course
206, 207, 214, 215, or 216 may be required. Specialized
topics in syntax and semantics. Meets with course
252A. May be repeated for credit.

253A. Topics in Language Variation. (4) 
Requisite: course 110. Course 202 may be required.
Specialized topics in language variation. Meets with course
253B. May be repeated for credit.

253B. Topics in Language Variation. (2) 
Requisite: course 110. Course 202 may be required.
Specialized topics in language variation. May not be applied to-
ward M.A. or Ph.D. degree requirements. Meets with course
253A. May be repeated for credit. S/U grading.

254A. Topics in Linguistics. (4) Seminar, 
four hours. Requisites: courses 200A, 200B. Course
201, 202, 203, 204, 205, 206, 207, 208, 209A, 209B,
212, 213A, 213C, 214, 215, 216, or 218 may be re-
quired. Individual seminars on topics such as child
language, sociolinguistics, neurolinguistics, computational
linguistics, psycholinguistics, etc. Meets with course
254B. May be repeated for credit.

254B. Topics in Linguistics. (2) Seminar, 
four hours. Requisites: courses 200A, 200B. Course
201, 202, 203, 204, 205, 206, 207, 208, 209A, 209B,
212, 213A, 213C, 214, 215, 216, or 218 may be re-
quired. Individual seminars on topics such as child
language, sociolinguistics, neurolinguistics, computational
linguistics, psycholinguistics, etc. Meets with course
254A. May be repeated for credit. S/U grading.

255A. Topics in Phonetics and Phonology II: 
Proseminar. (4) Seminar, four hours. Requisite:
course 200A. Course 201, 203, or 204 may be re-
quired. Specialized topics in phonetics and phonolo-
gy. May be repeated once for credit. Meets with course
251A. In Progress grading (credit to be given only on completion
of course 252B).

255B. Topics in Phonetics and Phonology II: 
Proseminar. (2) Seminar, two hours. Requisite: course 257A.
Specialized topics in syntax and semantics. May be repeated
once for credit. Letter grading.

257A. Topics in Syntax and Semantics II: Prose-
minar. (4) Seminar, four hours. Requisite: course 200B.
Course 206, 207, 214, 215, or 216 may be required. Specialized
topics in syntax and semantics. May be repeated once for credit. Meets with course 252A. In Progress grading (credit to be given only on comple-
tion of course 257B).

257B. Topics in syntax and Semantics II: Prose-
minar. (2) Seminar, two hours. Requisite: course 257A.
Specialized topics in syntax and semantics. May be repeated
once for credit. Letter grading.

258A. Topics in Language Variation II: Prose-
minar. (4) Seminar, four hours. Requisite: course 200A.
Topics in Language Variation. May be repeated once for credit.

258B. Topics in Language Variation II: Prose-
minar. (2) Seminar, two hours. Requisite: course 258A.
Topics in Language Variation. May be repeated once for credit.

260A-260B-260C. Seminars: Phonetics. (2 or 4 
each) Seminar, three hours. Each course may be tak-
en independently for credit. May not be applied to-
ward M.A. or Ph.D. degree requirements when taken for 1 
units. May be repeated for credit. S/U grading.

261A-261B-261C. Seminars: Phonology. (2 or 4 
each) Seminar, three hours. Each course may be tak-
en independently for credit. May not be applied to-
ward M.A. or Ph.D. degree requirements when taken for 2 
units. May be repeated for credit. S/U grading.

262A-262B-262C. Seminars: Syntax and Seman-
tics. (2 or 4 each) Seminar, 10 hours. Each course
may be taken independently for credit. May not be applied to-
ward M.A. or Ph.D. degree require-
ments when taken for 2 units. May be repeated for credit. S/U grading.

263A-263B-263C. Seminars: Language Variation, 
(2 or 4 each) Seminar, three hours. Each course may be tak-
en independently for credit. May not be applied to-
ward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminars: Special Topics in Lin-
guistic Theory. (2 or 4 each) Seminar, three hours. Special topics may include child language, neurolin-
guistics, psycholinguistics, sociolinguistics, etc. Each
course may be taken independently for credit. May not be applied to-
ward M.A. or Ph.D. degree require-
ments when taken for 2 units. May be repeated for credit. S/U grading.

265A-265B-265C. American Indian Linguistics 
Seminars. (1 or 4 each) Seminar, two hours; field-
work, four hours. Presentation of research on Ameri-
can Indian languages. Each course may be taken in-
dependently for credit. May not be applied toward M.A. or Ph.D. degree require-
ments when taken for 1 unit. May be repeated for credit. S/U grading.

275. Linguistics Colloquium. (4) Preparation: 
comple-
tion of M.A. requirements. Variied linguistic topics, 
generally presentations of new research by students, 
faculty, and visiting scholars. S/U grading.

276. Linguistics Colloquium. (No credit) De-
derived for graduate students. Same as course 275, but taken 
without credit by students not presenting a colloqui-
um. S/U grading.

275A. Teaching Apprentice Practicum. (1 to 4) 
Preparation: apprentice per-
sonal employment in teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

403. Practical Phonetics Training. (1) Exten-
sive practice in production, perception, and transcrip-
tion of sounds from a wide range of languages. Concurrently 
scheduled with practical sections of course 103. S/U grading.

411A-411B. Research Orientation. (2-2) De-
signed for graduate students. Sequence of lectures by de-
partment faculty to acquaint new graduate students with research directions and resources of department 
and elsewhere on campus. May not be applied toward M.A. 
or Ph.D. degree requirements. S/U grading.

422. Practicum: Phonetic Data Analysis. (2) De-
sign

Professors

David Aboody, Ph.D.
Reza H. Ahmadi, Ph.D.
Shlomo Benartzi, Ph.D.
Antonio E. Bernardo, Ph.D.
Sushil Bhikhchandani, Ph.D.
Bart J. Bronnenberg, Ph.D.
Randolph E. Bucklin, Ph.D. (Peter W. Mullin Professor of Management)
Bhagwan Chowdhry, Ph.D.
Charles J. Corbett, Ph.D. (Joseph Jacobs Professor of Entrepreneurial Studies)
Samuel A. Colbert, Ph.D.
Michael R. Darby, Ph.D. (Warren C. Cordiner Professor of Money and Financial Markets)
Aimee L. Drolet, Ph.D. (Betsy Wood Knapp Professor of Innovation and Creativity)
Sebastian Edwards, Ph.D. (Henry Ford II Professor of International Management)
Christopher L. Erickson, Ph.D.
Eric G. Flamholtz, Ph.D.
Craig R. Fox, Ph.D.
Stuart A. Gabriel, Ph.D. (Arden Realty Professor)
Arthur M. Geoffrion, Ph.D.
Martin Greenberger, Ph.D. (IBM Professor of Computers and Information Systems)
Mark S. Grinblatt, Ph.D. (J. Clayburn La Force Professor of Management)
Dominique M. Hanssens, Ph.D. (Bud Knapp Marketing Professor)
Carla Hayn, Ph.D.
John S. Hughes, Ph.D. (Ernst and Young Professor of Accounting)
Sanford M. Jacoby, Ph.D. (Howard Noble Professor of Management)
Uday S. Kamkar, Ph.D. (Los Angeles Times Professor of Management Strategy and Policy)
Barbara S. Lawrence, Ph.D.
Edward E. Leamer, Ph.D. (Chauncey J. Medbery Professor of Management)
David Lewin, Ph.D. (Neil Jacoby Professor of Management)
Marvin B. Lieberman, Ph.D.
Bennet P. Lientz, Ph.D.
Steven A. Lippman, Ph.D. (George Robbins Professor of Management)
Francis A. Longstaff, Ph.D. (Altstate Professor of Insurance and Finance)
John W. Mamer, Ph.D.
Kevin F. McCarland, Ph.D.
John J. McDonough, D.B.A.
Bill McKelvey, Ph.D.
Bruce L. Miller, Ph.D.
Donald G. Morrison, Ph.D. (William E. Leonhard Professor of Management)
Judy D. Olian, Ph.D. (John E. Anderson Professor of Management)
Alfred E. Osborne, Jr., Ph.D.
William G. Ouchi, Ph.D. (Sanford and Betty Sigolof Professor of Corporate Renewal)
Anthony P. Raia, Ph.D.
Kumar Rajaram, Ph.D.
Richard W. Roll, Ph.D. (Japan Alumni Professor of International Finance)
Richard P. Rumelt, D.B.A. (Harry and Else Kunin Professor of Business and Society)
Rakesh K. Sarin, Ph.D. (Paine Professor of Management)
Hans Schlößhammer, D.B.A.
Eduardo S. Schwartz, Ph.D. (California Professor of Real Estate and Land Economics)
Carol A. Scott, Ph.D.
René Stulz, Ph.D.
Avanidhar Subrahmanyan, Ph.D. (Goldyne and Irwin Professor of Money and Banking)
E. Burton Swanson, Ph.D.
Christopher S. Tang, Ph.D. (Edward W. Carter Professor of Business Administration)
Walter N. Torous, Ph.D. (Lee and Seymour Graff Endowed Professor)
Brett M. Trueman, Ph.D.
J. Fred Weston, Ph.D. (Warren C. Cordiner Professor Emeritus of Money and Financial Markets)
Harold M. Williams, J.D.
Bruce G. Willison, M.B.A.

Professors Emeriti

Theodore A. Andersen, Ph.D.
Michael J. Brennan, Ph.D. (Goldyne and Irwin Hearsh Professor Emeritus of Money and Banking)
William F. Brown, Ph.D.
John W. Buckley, Ph.D.
Lee G. Cooper, Ph.D.
Bradford Cornett, Ph.D.
José de la Torre, D.B.A.

R. Clay SproWls, Ph.D.
George A. Steiner, Ph.D., D.B.A.
James Q. Wilson, Ph.D. (James A. Collins Professor Emeritus of Management)

Associate Professors

Andrew S. Ainslie, Ph.D.
Anand V. Bodapati, Ph.D.
John M. de Figueiredo, M.Sc., Ph.D.
Xavier Dreze, Ph.D.
Mark J. Garmis, Ph.D.
Robert L. Geske, Ph.D.
Jung Liu, Ph.D.
Mariko Sakoikara, Ph.D.
Margaret J. Shih, Ph.D.
Sanjay Sood, Ph.D.
Romain T. Wacziarg, M.A., Ph.D.
Shi Zhang, Ph.D.

Assistant Professors

Christiane Barz, Ph.D.
Corinne Bendersky, Ph.D.
Bruce Carlin, Ph.D.
Felipe Caro, Ph.D.
Judson A. Caskey, Ph.D.
Ely Daham, Ph.D.
Florian Edner, Ph.D.
Paola Giuliano, Ph.D.
Noah J. Goldstein, M.A., Ph.D.
Wendy Liu, Ph.D.
Hanno N. Lustig, M.A., M.S., Ph.D.
Marc Martens-Vila, Ph.D.
Subramaniam Ramanaranayan, Ph.D.
Guillaume Y. Roels, Ph.D.
Richard E. Slaasuma, Ph.D.
Jan Schneider, Ph.D.
Suzanne B. Shu, M.Eng., M.B.A., Ph.D.
Jason A. Snyder, Ph.D.
Geoffrey A. Tate, Ph.D.
Miguel M. Unzueta, Ph.D.
Nico Voigtländer, M.Sc., Ph.D.

Liu Yang, Ph.D.
Maia J. Young, Ph.D.
Robert Zeithammer, Ph.D.

Senior Lecturers

Ariella D. Herman, Ph.D.
David S. Ravetch, M.A.
Robert S. Spich, Ph.D.

Lecturers

Stephen D. Cauley, Ph.D.
Gonzalo Freixes, J.D.
Julie Ann Gardner-Treloar, M.B.A.
Jane Guever, J.D.
Gordon L. Klein, J.D.
Danny S. Litt, M.B.A.
Eric H. Sussman, M.B.A.

Adjunct Professors

Ariane Auendaert, M.A.
William M. Cookum, M.B.A.
Jeffrey A. Dubin, Ph.D.
Janis S. Forman, Ph.D.
Robert F. Foster, M.B.A.
George T. Geis, Ph.D.
Jason Hsu, M.Sc., Ph.D.
Victor C. Tabbush, Ph.D.

Scope and Objectives

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master’s and doctoral levels. These include an academic (M.S.) and professional (M.B.A.) master’s and a Master of Financial Engineering (M.F.E.), as well as an Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. The school also offers a part-time dual Executive M.B.A. degree with the National University of Singapore (NUS) Business School that prepares participants for top positions in organizations around the world. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

Undergraduate Study

Accounting Minor

The Accounting minor provides students with a comprehensive accounting background; admission is competitive and based on overall UCLA grade-point average, grade-point average in preadmission courses, and the grades in Management 1A and 1B. Decisions on admission to the minor are made by the Anderson School Accounting Area. Applications are accepted in Fall, Winter, and Spring Quarters. Nontransfer students must apply subsequent to completing 90 units. Transfer students must apply after completing two academic quarters (excluding Summer Sessions) at UCLA.
To enter the minor, students must (1) have a minimum cumulative UCLA grade-point average of 3.2, (2) complete all required preadmission courses with a minimum course grade-point average of 3.2, and (3) receive grades of B or better in Management 1A and 1B. Repetition of more than one preadmission course or of any preadmission course more than once results in automatic denial of admission to the minor. Satisfying these requirements does not guarantee admission to the program, as only a limited number of students are admitted each year. For further information, see http://www.anderson.ucla.edu/x315.xml.

**Required Preadmission Courses (31 units minimum):** Economics 1, 2, 41 or Statistics 10 or 11, Management 1A and 1B (former course 100 taken at UCLA may be substituted), Mathematics 3A or 31A, 3B or 31B or 31E, one Writing II course. If Management 1A and 1B are not taken at UCLA, students must complete courses 120A and 122.

**Required Upper Division Courses (36 units):** Management 120A, 120B, 122, 127A, and three courses from 108, 123, 124, 126, 127B, 130A.

**Transfer credit for any of the above courses is subject to department approval and is considered only for non-management courses. Only one upper division course repeat is allowed.**

Each minor course must be taken for a letter grade; all management courses must be completed at UCLA with grades of C or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gsas.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The John E. Anderson Graduate School of Management offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Management, the Master of Business Administration (M.B.A.) degree, and the Master of Financial Engineering (M.F.E.) degree. The school also offers the Executive M.B.A. Program (EMBA) and the M.B.A. for the Fully Employed (FEMBA).

**Management**

**Lower Division Courses**

**1A-1B. Principles of Accounting. (4-4) Lecture, three hours; discussion, one hour. Not open to freshmen. P/NP or letter grading.**

1A. Introduction to financial accounting principles, including preparation and analysis of financial transactions and financial statements. Valuation and recording of asset-related transactions, including cash, receivables, marketable securities, inventories, and long-lived assets; current liabilities. 1B. Requires: course 1A. Completion of balance sheet with emphasis on debt and equity, including in-depth introduction to time value of money concepts. Introduction to partnership and individual income tax accounting.

**88. Lower Division Seminar: Special Topics in Management. (1 to 4) Seminar, three hours; outside study, nine hours. Requires: satisfaction of Entry-Level Writing requirement. Variable topics seminar that examines specific issues or problems and ways that professionals in management approach study of them. Students prepare, define, and present their own research projects with guidance of professional school faculty member. Letter grading.**

**Upper Division Courses**

107. Business Communications. (4) Process and discipline of effective spoken presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Certain efforts to be videotaped for review. P/NP or letter grading.

M118A. Complexity Science for Social Systems. (4) (Formerly numbered 118.B.) (Same as Human Complex Systems M130.) Lecture, four hours. Limited to juniors/seniors. Introduction to (1) complexity science as applied to social behavior and (2) agent-based computational modeling. Use of complexity science to bridge old and new conceptions of social science. Newtonian science, neoclassical economics, and old-style approaches to social science all build on assumptions that all basic agents comprising phenomenon (atomic particles, atoms, molecules, organisms, people, groups, firms) are homogenous and go forward in time under equilibrium conditions interspersed with occasional disequilibrium periods. Letter grading.

**122. Management Accounting.** (4) Lecture, three hours. Requires: course 100 (or former course 1B), one statistics course. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis. P/NP or letter grading.

**123. Auditing.** (4) Lecture, three hours. Requires: course 120B. Comprehensive study of procedures used in verification of financial statements and related information, including ethical, legal, and other professional issues. Auditing of a complete set of financial statements. P/NP or letter grading.

**125. Special Applications in Accounting.** (4) Requires: course 120B. Recommended: course 122. Designed for seniors. Use of “Strategic Management,” a computer program that simulates experience on a senior management team. Under real and sometimes adverse economic conditions, teams must make strategic and tactical decisions, evaluate performance results, and compete for key resources, market share, and business opportunities. Emphasis on theories of return on equity, product life cycles, product line margin analysis, issuing debt versus equity, and other topics that allow students to apply accounting principles learned in previous courses. P/NP or letter grading.

**127A. Tax Principles and Policy.** (4) Lecture, three hours. Requires: course 100 or former course 1B. Study of fundamental income tax problems encountered by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

**127B. Corporate and Partnership Taxation.** (4) Lecture, three hours. Requires: course 100 or former course 1B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

**127C. International Taxation.** (4) Lecture, three hours. Recommended requisite: course 127A. Study of two principle areas of international taxation from U.S. regulatory perspective: taxation of American citizens and companies conducting business in international arenas (outbound taxation) and taxation of foreign nationals and companies who invest or conduct business in the U.S. (inbound transactions). P/NP or letter grading.

130A. Basic Managerial Finance. (4) Lecture, three hours. Requisite: course 100 (or former course 18), one statistics course. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial planning, analysis, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/NP or letter grading.

133. Investment Principles and Policies. (4) Lecture, three hours. Requisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security pricing; construction of personal investment programs.

150. Elements of Industrial Relations. (4) Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations.

175. Elements of Real Estate and Urban Land Economics. (4) Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land use. Emphasis on decision making as it relates to appraising, building, financing, marketing, and urban property.

176. Frontiers in Biotechnology. (4) (Same as Microbiology CM133.) Lecture, three hours; enforced office time, one hour (to provide specialized training for undergraduate students in project research and written presentation). Requisites: Chemistry 153A or 153B, or Life Sciences 3 and 4, with grades of B or better. Integration of science and biology in biotechnology. Coevolution with pharmaceutical, agricultural, and other key industries, therapeutics, crop improvement, devices, and other industry sectors. Academic research leading to licensing and founding of companies that turn research breakthroughs into marketable products. Stages of product discovery and development. Staged financing and growth: private offerings, public offerings, deals, collaborations, outsourcing, intellectual property, regulation, pricing, profits, risks, public perception. Building value, exit strategies, mergers, acquisitions. Concurrently scheduled with course CM276. Letter grading.

180. Special Topics in Management. (4) Lecture, four hours. Topics of special interest to undergraduate students. Specific subjects may vary each term depending on the particular interest of instructors or students. May be repeated for credit. P/NP or letter grading.

182. Leadership Principles and Practice. (4) Knowledge and skills leading to effectiveness in inter- personal relations, team decision making, and leadership, and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratories.

186. Community or Corporate Internships in Management. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

190. Directed Research in Management. (2 to 6) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation of selected research topic under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201A. Business Forecasting: Turning Numbers into Knowledge. (4) Discussion, three hours. Prepa- ration: basic mathematics. Examinations of one approach to analytical thinking — forcing numerical and textual data into carefully formulated alternative models. Data studied include macroeconomic variables (growth, inflation, unemployment, interest rates, and exchange rates), industry data, and firm data. Letter grading.

201B. Econometrics and Business Forecasting. (4) Lecture, three hours. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear re- gression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects.

203A. Economics of Decision. (4) Discussion, three hours. Preparation: basic probability theory. Basics of single-person decision theory and introduction to non- cooperative game theory. Examination in some detail of von Neumann/Morgenstern expected utility theory. Other topics in decision theory include subjective ex- pected utility theory and departures from expected utility behavior. S/U or letter grading.

205B. Comparative Market Structure and Compe- tition. (4) Requisite: course 205A. Comparative study of markets leading to competition, market struc- tures, and competitive practices in key industries in selected countries.

207. Resource Administration of Nonmarket Ac- tivities. (4) Seminar, three hours. Requisite: course 405. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

208. Public Services and Private Functions. (4) Requisites: courses 405, 406. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financ- ing and provision of public goods and services.

M209. Elements of Economic Organization. (2 to 6) (Same as Law M239.) Lecture, three hours. Preparation: familiarity with basic economic principles, including basic principles of accounting and valuation. Advanced course in business organization. Examination of structure of business transactions and alloca- tion of resources. Risk, cost, and profit determination of capital investments, debt and loan agreements, employment agreements, distribution and marketing agreements (including franchising), motion picture production/distribution agreements, and joint ventures. Assigned reading and focus on documents that incorporate terms of business transactions of deals. S/U or letter grading.

210A. Mathematical Programming. (4) Discussion, three hours. Preparation: Preparatory to Comprehen- sive development of theory and computational meth- ods of linear programming, with applications to a vari- ety of areas. S/U or letter grading.

210B. Applied Stochastic Processes. (4) Discussion, three hours. Preparation: Probability theory at level of Electrical Engineering 131A or Mathematics 170A or Statistics 100A. Topics include Poisson processes, renewal theory, Markov chains, and Markov decision processes, with emphasis on problem formu- lation, decision making, and characterization of opti- mal policies. Specific applications include traditional operations research topics, capital investment, and queueing, maintenance, reliability, as well as several in microeconomics (search and research and development). S/U or letter grading.

210C. Network Flows and Integer Programming. (4) Discussion, three hours. Preparation: Linear pro- gramming. Survey course to (1) lay foundations for more advanced study of graphs, network flow models, and integer programming models and their applica- tions, (2) establish connections between these techni- cal foundations and real problems drawn from many areas of management, and (3) build professional skills needed to apply these tools. S/U or letter grading.

211A. Nonlinear Mathematical Programming. (4) Discussion, three hours. Requisite: course 210A. Mathematics 32A. Theory, methods, and applications of optimization for situations where models must be nonlinear, with special emphasis on case of "convexi- ty." Topics include considerable applications to optimization theory, of optimality and duality, main computa- tional approaches, and survey of currently available computer software. S/U or letter grading.

211B. Large-Scale Mathematical Programming. (4) Discussion, three hours. Preparation: Linear pro- gramming. Survey course to (1) lay foundations for more advanced study of graphs, network flow models, and integer programming models and their applica- tions, (2) establish connections between these techni- cal foundations and real problems drawn from many areas of management, and (3) build professional skills needed to apply these tools. S/U or letter grading.
212A. Decision Sciences Models I. (4) Lecture, four hours. Requisites: course 407, Mathematics 31B. Broad survey of deterministic models of decision sciences, including forecasting, inventory, and operations management. Solution methods include linear programming, network optimization, integer programming, and non-linear programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management. S/U or letter grading.

213A. Intermediate Probability and Statistics. (4) Discussion, three hours. Preparation: working knowledge of differential and integral calculus of several variables, basic probability theory, and univariate mathematical statistics. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequel. S/U or letter grading.

213B. Statistical Methods in Management. (4) Discussion, three hours. Requisite: course 402. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and non-parametric statistics, all as they apply to management studies. S/U or letter grading.

213C. Introduction to Multivariate Analysis. (4) Discussion, three hours. Preparation: working knowledge of differential and integral calculus of several variables, basic probability theory, and univariate mathematical statistics. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminant analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models). S/U or letter grading.

215. Negotiations Analysis. (4) Discussion, three hours. Series of negotiation exercises to foster development of students' negotiation skills and experience. Use of economic and game-theoretic concepts in de-brief to gain insight and develop framework for finding the broad negotiation principles applicable. S/U or letter grading.

216A. Simulation of Modeling and Analysis. (4) Discussion, three hours. Preparation: probability theory, mathematical statistics, analytical modeling. Development of computer simulation models for managerial decision making under uncertainty or complex dynamics, with emphasis on simulation methodology such as design, validation, operating procedures, and interpretation of results. Application areas include finance, marketing, and production. S/U or letter grading.

217A. Decision Analysis. (4) Lecture, three hours. Requisite: course 402. Managerial decision making occurs in presence of uncertainty which can be about events over which no individual has any control or it can be about what other individuals will do. Framework provided for analyzing such decisions, with application of framework to such scenarios as product development, litigation, business of treasure hunting, and bidding. S/U or letter grading.

217B. Game Theory. (4) Discussion, three hours. Requisites: courses 402, 405. Theory of games plays increasingly important role in areas of clear language and concepts for analysis of policy problems in every area. Introduction to subject, with emphasis on interpretation and application of ideas to variety of practical issues in management and public policy, and in practical questions of ethics, fairness, and bargaining. S/U or letter grading.

218A. Selected Topics in Decisions, Operations, and Technology Management. (1 to 4) Discussion, three hours. Requisite: course 403 for 420, 408. Identifying and solving financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion. S/U or letter grading.

224. Topics in Business Law. (4) Lecture, three hours. Requisite: course 403. Topics-oriented course covering wide range of current legal issues that confront entrepreneurs and corporate managers. Topics include venture capital, business formation and integration, contracts, property rights, product marketing, employment, creditor claims, and bankruptcy. S/U or letter grading.

229A. Special Topics in Accounting. (4) Lecture, three hours. Requisite: course 406. Managerial decision making occurs in presence of uncertainty which can be about events over which no individual has any control or it can be about what other individuals will do. Framework provided for analyzing such decisions, with application of framework to such scenarios as product development, litigation, business of treasure hunting, and bidding. S/U or letter grading.

229D. Nonprofit Sector Financial Policy. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Process by which corporate control transactions take place; role of market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Empirical evidence on economic and capital market reactions to control transactions and to defensive measures by management. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of firm. S/U or letter grading.

231E. Managing Finance and Financing Emerging Enterprises. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Designed for second-year graduate students. Emphasis on financial, control, and investment issues of rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles that may be appropriate to securing organizations' money requirements. S/U or letter grading.

232A. Security Analysis and Investment Management. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Topics include security valuation, application of portfolio theory to investment decisions, performance evaluation, and basics of fixed income portfolio management strategies. S/U or letter grading.

232D. Option Markets. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Organization and role of organized option markets, including listed and OTC options and futures: arbitrage and hedging relationships, valuation of derivative trading strategies, and innovations in derivative markets. Students learn fundamental principles and techniques of option valuation and hedging strategies through hands-on experience in creating and evaluating options.

233. Theory of Finance. (4) Lecture, three hours. Requisite: course 408. Focus on valuation of corporate liabilities and other securities under uncertainty. Capital asset pricing model presented rigorously and compared with more recent theories of asset pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on analysis of problems in corporate finance such as optimal financing of the corporation and the market for corporate control. S/U or letter grading.

234. Accounting for Financial Reporting. (4) Lecture, three hours. Requisite: course 408. Designed for second-year graduate students. Emphasis on financial, control, and investment issues of rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles that may be appropriate to securing organizations' money requirements. S/U or letter grading.

233B. Financial Institutions. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of markets to be dealt with in detail. S/U or letter grading.

234A. International Financial Markets. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of markets to be dealt with in detail. S/U or letter grading.

235. Venture Capital and Private Equity. (4) Lecture, three hours. Requisites: courses 408, 430. Use of cases to study entrepreneurial finance and venture capital. Analysis of issues faced by entrepreneurs, who are setting up new firms, as well as decisions of private equity partners and managers. How transactions are structured and why investors and entrepreneurs enter into certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

237A. Fundamentals of Corporate Finance and Accounting. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Examination of financial statements and tax liabilities of firms. Introduction to key issues facing corporate financial decision makers, including making capital budgeting and investment decisions, designing capital structure of firms, minimizing agency costs and costs of financial distress, role of financial innovation, capital markets, real options embedded in investment projects such as option to expand, contract, and shut down operations temporarily. S/U or letter grading.

237B. Fundamentals of Investments. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Essentials of asset pricing and portfolio choice, standard discounted cash flow approaches, and no-arbitrage framework for valuing financial securities. Basic paradigms of asset pricing, such as capital asset pricing model (CAPM), arbitrage pricing theory (APT), and multifactor models. Development and illustration of dynamic portfolio selection and optimization approaches. Brief introduction to other important asset classes such as equities, corporate bonds, real estate, and venture capital. S/U or letter grading.

237G. Computational Methods in Finance. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Quantitative and computational tools used in finance, including numerical techniques such as implementation of binomial and trinomial option pricing, and lattice algorithms for computing derivative prices and hedge ratios, simulation-based algorithms for pricing American options, and numerical solution of partial differential equations that appear in financial engineering. S/U or letter grading.

237H. Quantitative Asset Management. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Application of state-of-the-art quantitative portfolio management techniques to solve problems. Asset pricing models in depth, portfolio optimization, and construction, and dynamic strategies such as pairs trading, long-term and short-term momentum trading, and traditional index-based index tracking strategies. Robustness and market anomalies. Major forms of asset management structures such as mutual funds, hedge funds, exchange traded funds (ETFs), special investment vehicles, and some primary types of trading strategies used by these organizations. S/U or letter grading.

237K. Introduction to Credit Markets. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Introduction to building and implementation of credit models for use by financial institutions and quantitative investors. Basics of corporate debt and equity structures and relationships to credit derivatives markets. Discussion of structured credit products such as both cash and synthetic collateralized debt obligations (CDOs). S/U or letter grading.

237N. Applied Finance Project. (8) Fieldwork, eight hours. Limited to Master of Financial Engineering Program students. Applied quantitative finance project that explores one quantitative finance problem that might be met in practice and involves development or use of some tools developed in M.F.E Program. S/U or letter grading.

238. Special Topics in Finance. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Select ed topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

239A. Theory of Exchanges under Uncertainty. (4) Lecture, three hours. Primarily designed for Ph.D. students, but well-prepared master’s students may find course useful in their career preparation. Foundation of theory of exchange developed as introduction to theoretical literature on pricing of capital assets. S/U or letter grading.

239B. Theory of Investment under Uncertainty. (4) Lecture, three hours. Primarily designed for Ph.D. students, but well-prepared master’s students may find course useful in their career preparation. Examination of theories of finance and investment decisions, with special attention to questions of exchange and allocative efficiency. S/U or letter grading.

239C. Empirical Research in Finance. (4) Lecture, three hours. Preparation: training in econometrics. Primarily designed for Ph.D. students, but well-prepared master’s students may find course useful in their career preparation. In-depth study of current empirical research in field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. S/U or letter grading.

239D. Ph.D. Seminar: Corporate Finance. (4) Seminar, three hours. Designated for Ph.D. students. Advanced topics in corporate finance and empirical research. May be repeated for credit with instructor change. S/U or letter grading.

239X-239Y-239Z. Finance Workshops. (1-1-2) Discussion, 30 minutes. Designed for Ph.D. students. Intended to discuss research papers on the topics of financial research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussion of such papers in internal and external sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.
240A. Managing Service Operations. (4) Discussion, three hours. Requisite: course 410. Design, management, improvement, and measurement of service and delivery systems in various industries and organizations, with emphasis on understanding service and loyalty opportunities, their operating problems, and success strategies. Extensive employment of case studies. S/U or letter grading.

240D. Operations Strategy: Theory and Practicum. (4) Discussion, three hours. Requisite: course 410. Definition and scope of operations strategy. Integrated framework for strategic thinking between operational strategies and corporation's strategic positioning. Cases used to illuminate strategic issues in both manufacturing and nonmanufacturing situations. Objectives of product, or applied strategy aspect of course, to provide students with skill in identifying operationally appropriate business processes and metrics required to implement enterprise's strategic position. S/U or letter grading.

240E. Managing Entrepreneurial Operations. (4) Lecture, three hours. Requisite: course 410. Designed for second-year graduate students. Exploration of operating issues involved in managing entrepreneurial enterprises. Includes building on methodology, principles, and concepts provided in requisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for business management applications to entrepreneurial operations. S/U or letter grading.

240F. Supply Chain Management. (4) Lecture, three hours. Requisite: course 410. Business environment today is characterized by globalized operations, intense competition, rapid technological change, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many industries competition has moved from firm level to supply chain level. Provides understanding of strategic, tactical, and operational issues in supply chain management, with generous attention to emerging digital economy. S/U or letter grading.

241A. Technology Management. (4) Lecture, three hours. Requisites: courses 410, 411A, 411B. Management of high-technology firm, including acquisition, creation, and technological and knowledge assets. Research and product development, product and process technologies, technology regimes, high-technology markets, competition, and technology strategies. Case sectors such as computing, telecommunications, e-business, medical devices, nanotechnology, advanced transportation systems, and electronics. S/U or letter grading.

242A. Models for Operations Planning, Scheduling, and Control. (4) Discussion, three hours. Designed for Ph.D. students with some knowledge of mathematical programming and stochastic processes. Foundations of operations planning, scheduling, and control, with emphasis on formal models and their applications. Aggregate planning, workforce scheduling, inventory management, and detailed operations scheduling and control. S/U or letter grading.

242B. Models for Operations Systems Design. (4) Discussion, three hours. Requisite: course 210C. Designed for Ph.D. students. Survey of research literature on methods and technologies of manufacturing and service systems, including long-range forecasting, operating economies, capacity, location, facilities, processes/technology, work, and work structures. S/U or letter grading.

243B. Inventory Theory. (4) Discussion, three hours. Requisites: course 210B. General discussion of inventory interest, current inventory systems and emerging form of optimal policies and efficient computational methods. Deterministic, stochastic, discrete-time, and continuous-time models. S/U or letter grading.

243C. Scheduling Models for Intermittent Systems. (4) Discussion, three hours. Designed to cover course 242A. Scheduling models and results for simple machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent research approaches, current research on coordinated interaction of computer models, and man-machine interaction. S/U or letter grading.

244X-244Y-244Z. Research in Decisions, Operations, and Technology Management. (1-1-2) Lecture, three hours. Designed for first- and second-year Ph.D. students in decisions, operations, and technology management. Exploration in operations management, analytical methods of operation research, introduction to management in information economy, and models for medical management. May be repeated for credit with topic change. S/U or letter grading.

246A. Business and Environment. (4) Lecture, three hours. Overview of many ways in which environmental issues interact with main functional areas of business: finance, marketing, strategy, operations, accounting. Basic introduction to background of environmental issues, with focus primarily on business aspects. Specific topics vary from year to year, but course details what every manager should know about enviromental issues. S/U or letter grading.

246C. Management in Public and Private Nonprofit Sectors. (4) Designed for graduate students. Examination of roles and management systems of the three sectors of U.S. society: unique aspects and managerial issues for nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

247A. Environment of the Art World. (4) Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

247B. Role of Management in Artistic Decision Making. (4) Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

248A. Special Topics in Public and Private Nonprofit Management. (4) Studies of advanced subjects of current interest in decisions, operations, and technology management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problems. Topics vary each term. May be repeated for credit with topical change.

249A. Special Topics in Arts Management. (4) Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

250A. Labor Relations: Process and Law. (4) (Same as Public Policy M232.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor-management agreement, administration of the contract, law of labor-management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

250C. Behavioral Foundations of Human Resource Management. (4) Requisite: course 250B. Topics include development and training; human resource accounting; behavior of participating management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

251. Managing Human Resources. (4) Management of people in organizations, designed for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) issues facing top management which involve management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

252. Systems of Employee/Management Participation. (4) Designed to provide understanding of systems of employee/participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

253. International Political Economy. (4) Lecture, three hours. Examination of political, legal, and social institutions to demonstrate varieties of modern capitalist and business/government relations around the world. Analysis of major domestic policy options that nations are pursuing in response to economic globalization and introduction to international coalitions being formed as result of globalization, including NAF-TA, and to nongovernmental organizations created to deal with special problems such as global environmental crisis. Letter grading.

254. Pay and Rewards in Organizations. (4) Lecture, three hours. Systematic treatment of pay (compensation) and rewards in organizations, with emphasis on design, implementation, and outcomes of organizational pay and reward systems and practices that are shaped by strategic, labor market, and motivation-al considerations. Specific topics include variable compensation (e.g., bonus, stock option compensation, stock ownership, and stock option plans) and noncompensation rewards; compensation and rewards for performance and in entrepreneurial and public organizations; fringe benefits; executive and senior-interna-tional and comparative compensation/reward practices. S/U or letter grading.
281. Global Marketing Management. (4) Lecture, three hours. Requisites: courses 411A, 411B. Analysis of opportunities, distinguishing characteristics and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. Letter grading.

283A. Consumer Behavior. (4) Lecture, three hours. Requisites: courses 411A, 411B. Study of nature and determinants of consumer behavior. Emphasis on influence of sociological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers’ attitudes, consumption, and purchasing behavior. S/U or letter grading.

264A. Marketing Research. (4) Lecture, three hours. Requisites: courses 411A, 411B. Designed for professional users of research results rather than for specialists in research. Marketing research is aid to management. Emphasis on development of research methods and evaluation of the results. Letter grading.

265. Brand Management. (4) Formerly numbered 265A.) Lecture, three hours. Requisites: courses 411A, 411B. Introduction to considerations in development, implementation, and management of brands. Discussion of challenges to creating and maintaining strong brands. Topics include building brand knowledge and identities, marketing mix and brands, brand architectures, and brand equity. Letter grading.

266A. New Product Development. (4) Lecture, three hours. Requisites: courses 411A, 411B, 411E. Examining of new product development (NPD) process with objective of learning key tools and methods and applying them to case studies, exercises, and course project. Products viewed through three lenses: quantitative and behavioral approaches to studying customer needs; and problems of adapting American marketing concepts and methods. Letter grading.

266B. Advertising and Marketing Communications. (4) Lecture, three hours. Requisites: courses 411A, 411B. Detailed review of use of communication tools in marketing. Critical review of advertising and promotional policies from developmental and executional perspectives. Discussion of other forms of marketing communications, with goal of helping students develop integrated communication strategies. Letter grading.

267. One-to-One Marketing. (4) Lecture, three hours. Requisites: courses 402, 411A, 411B. Use of personal computer and network to develop interactive strategy and application to one-to-one marketing context. Frameworks and analytical tools for interacting with customers and learning about their preferences as they evolve through four stages of customer life cycle: (1) Initial brand awareness and product trial, (2) mid-lifecycle, (3) mid-maturity purchase and transaction behavior, and (4) customer attrition or switcher to other product line or brand. Letter grading.

268. Selected Topics in Marketing. (4) Lecture, three hours. Requisites: courses 411A, 411B. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit. S/U or letter grading.

269. Theory in Marketing. (4) Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

270C. Application Frontiers in Information Systems. (4) Lecture, three hours. Requisites: course 404. Exploration of new state-of-the-art applications in information systems, such as in electronic commerce, assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

271C. Emerging Technologies in Information Systems. (4) Discussion, three hours. Requisite: course 404. Special topics in new and emerging technologies such as multimedia, digital imaging, object-oriented software, heterogeneous databases, and parallel processing. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

272A. Information Systems Development. (4) Discussion, three hours. Methods and tools for information system design, development, implementation, and maintenance. User requirements analysis. Design and specification of application software and databases. Object-oriented and alternative approaches, such as rapid prototyping. System integration. Automated support. S/U or letter grading.

272C. Special Topics in Information Systems. (4) Discussion, three hours. Designed primarily for Ph.D. students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

274X-274Y-274Z. Current Research in Information Systems. (1-1-2) Discussion, two hours. Designed for Ph.D. students. Year-long sequence associated with Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U or letter grading.

CM276. Frontiers in Biotechnology. (4) (Same as Microbiology CM233) Lecture, three hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3 and 4, with grades of B or better. Integration of science and biology. Collaboration with pharmaceutical, agricultural, and other key industries, therapeuticc, crop improvement, devices, and other industry sectors. Academic research leading to licensing and founding of companies that turn research breakthroughs into marketable products. Stages of product discovery and development. Staged financing and growth: private offerings, public offerings, deals, collaborations, outsourcing, intellectual property, regulation, pricing, profits, risks, public perception. Building value, exit strategies, mergers and acquisitions. Concurrently scheduled with course CM176. S/U or letter grading.

M277A-277B. Real Estate Finance Law. (3 to 6 each) (Formerly numbered M278C.) (Same as Law M209A) Lecture, three hours. Designed to enforce requisite to 277B. Concentrated study of law governing financing of land transactions from both national and California perspectives. Topics include California deed of trust, installment land contracts and other forms of financing, real estate taxes, mortgage foreclosures, and borrower bankruptcy on mortgage lenders, construction lending, future advances lending, condominium development, and secondary mortgage market. In Progress (M277A) and S/U or letter grading.

278A. Urban Real Estate Financing and Investment. (4) Lecture, three hours. Requisites: courses 408, 430. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies. S/U or letter grading.

278B. Real Estate Securitization: Debt. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Analysis of money, capital, and mortgage markets to determine potential availability and costs of mortgage sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions. S/U or letter grading.

279A. Cases in Real Estate Investments. (4) Lecture, three hours. Requisites: courses 408, 430. Development of understanding of principal issues involved with real estate investment and finance. Topics include real estate financial analysis and valuation in variety of contexts (single and multifamily residential, commercial/industrial, shopping center, and hotel properties), real estate taxation, real estate law, development process, securitization, REITs, and leasing and workout of troubled properties. S/U or letter grading.

279B. Entrepreneurial Real Estate Development. (4) Lecture, three hours. Requisites: courses 278A (or 278A), 408, 430. Introduction to various aspects of real estate development from perspectives of entrepreneur and investor and various types of developments, including single family, multifamily, hotel, office, retail, and industrial. Industry guest speakers to help reinforce principles taught. Real estate development simulation assignment and presentations to panel of investors included. S/U or letter grading.

280A. Studies, Research Philosophies, and Methodology in Human Systems. (4) Discussion, three hours. Designed for Ph.D. students. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimentation, field studies, case approaches, and a range of analytic and descriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

280B. Personal and Professional Development. (4) Discussion, three hours. Designed for Ph.D. students. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

280C. Research Design in Human Systems Studies. (4) Discussion, three hours. Designed for Ph.D. students. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and Ph.D. dissertations. May be repeated for credit. S/U or letter grading.

281A. Sociotechnical Systems. (4) Designed for graduate students. Introduction to systems concepts and views of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

281B. People in Organizations. (4) Designed for graduate students. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts of organizations as interacting social and human behavior organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

282. Task Group Processes. (4) Lecture, three hours. Requisite: course 281A or 281B. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technical environment. Impacts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

284A. Organization Design. (4) Lecture, three hours. Requisite: course 281A or 281B. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive approaches. Development of specific methods of designing from microcode to macrodesign of total organizational systems. Special emphasis on sociotechnical and differentiation/integration models. S/U or letter grading.

285C. Managing Entrepreneurial Organizations. (4) Lecture, three hours. Issues involved in developing and managing entrepreneurial organizations. Topics include organizational growth, managerial tools, strategic planning, organizational design, management development, control systems, leadership, and cultural management. Examination of transitions that individuals must make as organizations grow. S/U or letter grading.

285A. Leadership, Motivation, and Power. (4) Discussion, three hours. Designed for graduate students. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from micro to macro view. Use of experience-based learning methods to aid diagnosis and understanding of one’s own influence styles. S/U or letter grading.

285B. Managerial Interpersonal Communication. (4) Discussion, three hours. Designed for graduate students. Interpersonal and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one’s own communication styles and skills, considering verbal, nonverbal perception, and cross-cultural aspects. S/U or letter grading.

286. Negotiations Behavior. (4) Discussion, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on importance of practical negotiation skills and experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for most effective application of these skills. S/U or letter grading.
287. Groups and Their Facilitation. (4) Discussion, three hours. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including “sensitivity” basic groups, group counseling, self-help groups, small groups, and committees in managerial decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

288A. Selected Topics in Behavioral Science. (4) Discussion, three hours. Designed for graduate students. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretical positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

288B. Current Issues in Sociotechnical Systems and Organization Design. (4) Discussion, three hours. Designed for graduate students. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

288C. Selected Topics in Human Systems Studies and Organizational Behavior. (4) Discussion, three hours. Designed for graduate students. Psychological and social aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

288D. Current Issues in Human Systems Change and Development through Consulting. (4) Discussion, three hours. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and exit, diagnosis, process consultation, consciousness raising, and dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

M292A. Research and Development Policy. (4) (Same as Public Policy M280A.) Lecture, three hours. Examination of research and development as process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

292C. Comprehensive Planning in Public Sector. (4) Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

293A. Advanced Management of American Business. (4) Lecture, three hours. Evaluation of certain criticisms made by business of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

293C. Ethical Considerations in Business. (4) Lecture, three hours. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

295B. Small Business Management. (4) Exploration of crucial aspects of small business enterprises. Emphasis on identification and analysis of characteristic operating problems of small firms and application of appropriate methods or techniques for their resolution.

295C. Corporate Entrepreneurship. (4) Inquiry into nature of entrepreneurship and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in a corporate context.

296A. International Business Management. (4) Discussion, three hours. Identification, analysis, and resolution of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociocultural, political, economic, and environmental characteristics. Structuring of organizational responsibilities and control in multinational firms. S/U or letter grading.

296B. International Comparative Management Research. (4) Designed for Ph.D. students. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

297A. Comparative and International Management. (4) Comparative study of practice of management in selected foreign countries, as affected by their social environments and development of management theory. S/U or letter grading.

297C. International Business Law. (4) Requires: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investments; international business and government relations.

297D. International Business Negotiations. (4) Requisite: course 296A. Exploration of international business negotiations, emphasizing issues involving interaction with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.

297E. Business and Economics in Emerging Markets. (4) Lecture, three hours. Requisite: course 205A or 405. Analysis of changing economic, political, demographic, and social conditions in developing countries as they affect the business environment. Process of economic growth, market-orientation, and creation of domestic capital markets. Inflation and stabilization programs, identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

298A. Special Topics in Management Theory. (4) Designed for Ph.D. students. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298B. Special Topics in International and Comparative Management. (4) Designed for Ph.D. students. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298C. Special Topics in Sociotechnical Systems. (4) Designed for Ph.D. students. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298D. Special Topics in Management. (1 to 4) Lecture, three hours. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

M298E. Seminar: Neuroeconomics. (4) (Same as Psychology M267.) Seminar, three hours. Limited to graduate students. Analysis and discussion of research on cognitive and neural bases of decision making. S/U or letter grading.

298X-298Y/298Z. Management Strategy and Policy Workshops. (1-1 to 2-12) Discussion, three hours. Designed for Ph.D. students. Develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

299R. Research Methods in Management. (4) Discussion, three hours. Designed for Ph.D. students. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss presentations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.
410. Operations Technology Management. (4) Lecture, three hours. Requisites: courses 402, 403. Emphasis on and devoted to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design, revision, and control systems for production operations. Letter grading.

411B. Marketing Management II. (4) Lecture, three hours. Requisite: course 411A. Examination of analytical tools to gauge market attractiveness and to allocate resources to elements of marketing mix. Topics include market sizing based on diffusion of innovation and trial-and-repeat processes, customer preference measurement and market segmentation techniques, and optimal marketing and pricing strategies across products and customers. Letter grading.

412. Management Organizations. (4) Lecture, three hours. Preparation: completion of first-year core program, integration of the concepts and techniques of management in complex organizations, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of interaction such structures and systems tend to produce.

421A. Management Communications I. (1) Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, design recommendations, etc. Emphasis on analytical-based persuasive writing. S/U grading.

421B. Management Communications II. (1) Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective preparation of group written communications in managerial contexts where multiple audiences are important. Issues include achieving a single voice, establishing appropriate tone, incorporation of multiple points of view, etc. S/U grading.

422. Analysis and Communications. (4) Discussion, three hours. Designed for graduate students. Study and practice of oral and written management communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and use of computer technology. Organized around writing and speaking exercises. Personal attention to students' written communications and oral presentations.

444A-444B. Applied Management Research: Two-Quarter Plan. (4-4) Fieldwork, four hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress (444A) and S/U or letter (444B) grading.

445. Applied Management Research. (8) Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

451. Fieldwork in Organizational Development. (2 to 12) Fieldwork, to be arranged. Requisite: course 284B. Supervised practical experience in organizational development with emphasis on interpersonal, intragroup, total organization, and interorganizational settings. S/U or letter grading.

452. Fieldwork in Technical Assistance for Minority Business Enterprises. (1 to 4) Preparation: completion of first year of master's program. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in minority communities. Experience or fieldwork in an organization as an intern or fellow. Focus on individual and oral presentations. S/U or letter grading.

453. Fieldwork in Arts Management. (4 to 12) Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

455E. International Exchange Program. (2 to 16) Lecture, 30 hours; discussion, 10 hours. Students attend up to four M.B.A.-level courses at institutions with exchange agreements with Anderson School. Some courses may be taught in local language. In addition to learning subject matter of courses, intent is to provide opportunity for students to enhance their knowledge of region while exchanging ideas and views with their peers at that institution. S/U or letter grading.

457. Fieldwork in Investment Management. (4) Discussion, three hours. Use of academic theories learned in a practical experience by managing a portfolio started with donated funds. Mirrors situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.

461A. Leadership Foundations I. (2) (Formerly numbered 461.) Lecture, two hours. Limited to Executive M.B.A. Program students. Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting diagnostic and decision-making skills of individuals. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progression, working with others, and shaping work culture. S/U or letter grading.
461B. Leadership Foundations II. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of course 461A, with focus on development of self-assessment and self-reflection skills. Facilitation of self-evaluation of leadership strengths and weaknesses, with emphasis on individual problem solving and decision making and team design and development. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 461C).

461C. Leadership Foundations III. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of course 461B. Further exploration of leadership strengths and weaknesses, with emphasis on individual peer coaching, conflict management, individual goal setting, and goal achievement. Readings, cases, decision simulations, peer coaching, and discussions. S/U grading.

461D. Leadership Foundations IV. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of course 461C. Facilitation of self-evaluation of leadership strengths and weaknesses, with emphasis on career development, social networks, and organizational planning and control. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 461E).

470B. Strategic Management Research. (4) Fieldwork, four hours. Limited to Executive M.B.A. Program students. Preparation of strategic overview of a selected company entailing analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and other data/analyses for a company and/or a survey. In Progress grading (credit to be given only on completion of course 470C).

470C. Strategic Management Research. (4) Fieldwork, four hours. Limited to Executive M.B.A. Program students. Further research and analysis of one strategic issue facing selected company and identified in course 470B. Presentation of final reports and evaluation of student efforts by corporate personnel. S/U or letter grading.

470D. Seminar: Policy Analysis. (2) Seminar, two hours. Limited to Executive M.B.A. Program students. Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel. S/U or letter grading.

471A-471B. Management Practicum. (2-2) Lecture, three hours. Two-term individual or group (three to five students) project on global strategic issues selected by student and approved by faculty. Focus on planning, design, and evaluation of research methodology and final report. Letter grading.

472A. Marketing Strategy and Policy. (4) Formerly numbered 472A. Limited to Executive M.B.A. Program students. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions. S/U or letter grading.

472B. Product Innovation and Marketing. (4) Lecture, four hours. Limited to Executive M.B.A. Program students. Development and implementation of marketing and sales strategies for products and services to customers. Use of creativity tools, customer research, and marketing science to create value and allocate resources so as to maximize profits and revenues that result. S/U or letter grading.

473A. Managerial and Organizational Processes. (2) Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Macromodels of organizational behavior, markets, and design and functioning of organizations, and relationships of organizations to their environment. S/U or letter grading.

474. Operations and Technology Management: Systems, Strategies, and Policies. (4) Lecture, four hours every other week for three hours. Limited to Executive M.B.A. Program students. Analysis of strategic and operating policies and decision systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems.

477. The Manager and Business/Society Relationships. (4) Limited to Executive M.B.A. Program students. Study of business organizations and the external environments that managers choose their immediate environments from. There are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

478. Selected Topics in Management. (2 to 4) Seminar, 90 minutes to three hours. Limited to Executive M.B.A. Program students. Examination of selected problems and issues in an area of current concern in management. S/U or letter grading.

480. Corporate Governance. (4) Lecture, three hours. For members of corporate boards of directors to understand their responsibilities, hone their skills, and learn to improve their practices. Topics include legal and moral duties as directors, risk management, managing top management team of corporation. Letter grading.

481. Contemporary Issues in Business: Services Marketing and Customer Asset Management. (4) Lecture, three hours. Designed for prospective users of research results rather than for specialists in research. Focus on services marketing and the relationship of research and consumer behavior to services marketing decisions. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data. Letter grading.
4.82. Negotiations Behavior. (4) Lecture, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations but also to analyze contexts for most effective application of these skills. Letter grading.

4.83. Management of Technology and Innovation. (4) Lecture, three hours. Problems of managing technological innovation in Asia. Topics include incorporation of technological consideration into strategy, adoption of technological innovation, promoting innovation through organizational design and leadership, e-business, and m-business. Letter grading.

4.84. Asian Business Environment. (4) Lecture, three hours. Theoretical issues related to analysis of countries' economic, political, and social conditions. Topics include political risk analysis, demographics, urbanization. Application to scenario planning in Asia-Pacific region/countries. Letter grading.

4.85. Corporate Entrepreneurship. (4) Lecture, three hours. Managerial efforts aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in context of large corporations in manufacturing and service industries. Development of awareness and understanding of range, scope, and complexity of issues related to creation of organizational environment that is supportive of entrepreneurial endeavors, and insight concerning effective implementation of technological and organizational innovations in corporate setting. Letter grading.

4.86. Strategic Leadership and Strategic Implementation. (4) Lecture, three hours. Designed to address several fundamental aspects of leading complex organizations, with emphasis on important tasks of developing well-aligned, high-performance organizations and on challenges of leading change in organizations. Enables students to develop organized point of view on strategic leadership and to increase their awareness of themselves as leaders. Letter grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Research in Management. (1 to 8) Directed individual study or research. May be repeated. S/U or letter grading.

597. Preparation for Qualifying Examinations. (4 or 12) Preparation for master's comprehensive examination or Ph.D. qualifying examinations. S/U grading.

---

**Scope and Objectives**

At the heart of materials science is an understanding of the microstructure of solids. “Microstructure” is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optimal selection of engineering materials that must simultaneously fulfill dimensional, property, quality control, and economic requirements. The department also has a program in electronic materials that provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

Yang Yang, Ph.D.

Professors Emeriti
Alan J. Ardell, Ph.D.
David L. Douglass, Ph.D.
William Klement, Jr., Ph.D.
John D. Mackenzie, Ph.D. (Nippon Sheet Glass Company Professor Emeritus of Materials Science)
Kanji Uno, Ph.D.
Aly H. Shabaik, Ph.D.
George H. Sines, Ph.D.
Christian N.J. Wagner, Dr rer. nat.
Alfred S. Yue, Ph.D.

Associate Professors
Vidvuds Ozolins, Ph.D.
Benjamin M. Wu, D.D.S., Ph.D.

Assistant Professors
Yu Huang, Ph.D.
Ioanna Kakoulidi, Ph.D.
Sunee Kodambaka, Ph.D.

Adjunct Professors
Eric P. Bescher, Ph.D.
Harry Patton Gillis, Ph.D.
John J. Gilman, Ph.D.
Marek A. Przystupa, Ph.D.

Preparation for the Major
**Required:** Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31 (or another programming course approved by the Faculty Executive Committee); Materials Science and Engineering 10, 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C (or Electrical Engineering 1).**

The Major
**Required:** Chemical Engineering 102A (or Mechanical and Aerospace Engineering 105A), Civil and Environmental Engineering 101 (or Mechanical and Aerospace Engineering 101), 108, Electrical Engineering 100, Materials Science and Engineering 104, 110, 110L, 120, 130, 131, 131L, 132, 140, 143A, 150, 160, Mechanical and Aerospace Engineering 181A or 182A; two laboratory courses (4 units) from Materials Science and Engineering 121L, 141L, 143L, 161L; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; and three major field elective courses (12 units) from Chemical Engineering 1114, Civil and Environmental Engineering 130, 135A, Electrical Engineering 2, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C, plus at least one elective course (4 units) from Chemistry and Biochemistry 30A, 30AL, Electrical Engineering 131A, Materials Science and Engineering 170, 171, Mathematics 170A, or Statistics 100A.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.
Electronic Materials Option

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31 (or another programming course approved by the Faculty Executive Committee); Electrical Engineering 10; Materials Science and Engineering 10, 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C (or Electrical Engineering 1).

The Major

Required: Chemical Engineering 102A (or Mechanical and Aerospace Engineering 105A), Electrical Engineering 101, 121B, Materials Science and Engineering 104, 110, 110L, 120 (or Electrical Engineering 2), 121, 121L, 122, 130, 131, 131L, 140, Mechanical and Aerospace Engineering 101, and 181A or 182A; four courses (16 units) from Electrical Engineering 123A, 123B, Materials Science and Engineering 132, 150, 160; 4 laboratory units from Electrical Engineering 172L, Materials Science and Engineering 141L, 161L, 199; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; and one major field elective course (4 units) from Electrical Engineering 110, 124, 131A, 172, Materials Science and Engineering 111, 143A, 162.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgrmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Materials Science and Engineering offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Materials Science and Engineering.

Materials Science and Engineering

Lower Division Courses

10. Freshman Seminar: New Materials. (1) Seminar, one hour; outside study, two hours. Preparation: high school chemistry and physics. Not open to students with credit for course 104 or former course 14. An introduction to basic concepts of materials and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics. Letter grading.

10L. Physical Measurement in Materials Engineering. (2) Laboratory, four hours; outside study, two hours. Various physical measurement methods used in materials science. Measurement of electrical, thermal, electrical, and magnetic techniques. Letter grading.

Upper Division Courses

104. Science of Engineering Materials. (4) Formerly numbered 144. Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Chemistry 20A, 20B, 20L, Physics 1A, 1B. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between crystal structure and properties of technological materials. Illustration of their fundamental differences and their applications in engineering. Letter grading.

105. Principles of Nanoscience and Nanotechnology. (4) Formerly numbered M105L. Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: Chemistry 20, and Electrical Engineering 1 or Physics 1C. Introduction to underlying science encompassing structure, properties, and fabrication of technologically important nanoscale systems. New phenomena that emerge in very small system sizes (typical feature sizes below few hundred nanometers) explained using basic concepts from physics and chemistry. Chemical, optical, and electronic properties, electron transport, structural stability, self-assembly, and application of various nanostructures such as quantum dots, nanoparticles, quantum wires, quantum wells and multilayers, carbon nanotubes. Letter grading.

110. Introduction to Materials Characterization A (Graduate, Undergraduate Projects, and X-Ray Scattering). (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 104. Modern methods of materials characterization: fundamentals of crystallography, properties of X-ray and X-ray scattering; powder method, Laue method; determination of crystal structures; phase diagram determination; high-resolution X-ray diffraction methods; X-ray spectroscopy; design of materials characterization procedures. Letter grading.

110L. Introduction to Materials Characterization A Laboratory. (2) Laboratory, four hours; outside study, two hours. Preparation: course 104. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, crystal structure determination, high-resolution X-ray diffraction methods, and special topics. Letter grading.

111. Introduction to Materials Characterization B (Electron Microscopy). (4) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisites: courses 104, 110. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy; emissive and reflective modes; chemical analysis; electron optics of both instruments. Letter grading.

C112. Introduction to Archaeological Materials Science: Scientific Methodologies, Techniques, and Interpretation. (4) Lecture, three hours; laboratory, two hours. Preparation: general chemistry, or inorganic and organic chemistry. Recommended requisite: course 110. Several basic scientific techniques employed for examination of archaeological and cultural artifacts to answer questions of anthropological significance and their state of preservation. Theoretical and hands-on instruction to provide fundamentals of petrography and analytical techniques such as U/V/NIR spectrophotometry, scanning electron microscopy (SRF), X-ray diffraction (SRD), scanning electron microscopy and energy dispersive spectroscopy (SEM-EDS), and others. Examination and analysis protocols, sample preparation techniques, and methods of scientific analysis and interpretation for study of organic and inorganic materials of archaeological and cultural significance. Concurrently scheduled with course CMG12. Letter grading.

120. Physics of Materials. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 104, 110 (or Chemistry 113A). Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding, lattice vibrations, band theory, and characterization of electrical conductivity, optical absorption, magnetic behavior, dielectric properties, and p-n junctions. Letter grading.

121. Materials Science of Semiconductors. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 120. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect characterization, and dopants. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications. Letter grading.

121L. Materials Science of Semiconductors Laboratory. (2) Lecture, 30 minutes; discussion, 30 minutes; laboratory, two hours; outside study, three hours. Corequisite: course 121. Experiments conducted with equipment characterizing measurements of contact resistance, dielectric constant, and thin film biaxial modulus and CTE. Letter grading.

122. Principles of Electronic Materials Processing. (4) Lecture, four hours; outside study, seven hours. Requisite: course 104. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOVCVD, LPE, and MBE; metals and dielectrics. Letter grading.

130. Phase Relations in Solids. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 104, 110. Physical metallurgy of steels, lightweight alloys (Al and Ti), and superalloys. Strengthening mechanisms, microstructural control methods for strength and toughness improvement. Grain boundary segregation. Letter grading.

131. Diffusion and Diffusion-Controlled Reactions. (4) Lecture, four hours; outside study, eight hours. Requisite: course 130. Diffusion in metals and inorganic solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Letter grading.

131L. Diffusion and Diffusion-Controlled Reactions Laboratory. (2) Laboratory, two hours; outside study, four hours. Corequisite: course 131. Design of heat treatment cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory. Letter grading.

C133. Ancient and Historic Metals: Technology, Microstructure, and Corrosion. (4) Lecture, two hours; laboratory, 90 minutes. Processes of extraction, alloying, surface patination, metallic coatings, corrosion, and microstructure of ancient and historic metals. Extensive laboratory work on preparation and examination of metallic samples under microscope, as well as lectures on technology of metallic works of art. Practical instruction in metallographic microscopy. Exploration of phase and grain structure, and examination of common alloying systems and environments and analytical techniques appropriate for examination and characterization of metallic artifacts. Concurrently scheduled with course CMG33. Letter grading.
140. Materials Selection and Engineering Design. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 132, 150, 160, or equivalent. Comprehension of products available for design in engineering. Properties and applications of metals, nonferrous alloys, polymers, ceramics, and composite materials. Materials selection, treatment, and serviceability emphasized as part of successful design. Project grading.

141L. Computer Methods and Instrumentation in Materials Science. (2) Laboratory, four hours. Preparation: knowledge of a computer language for instruction and documentation. Limited to junior-senior Material Science and Engineering majors. Interface and control techniques, real-time data acquisition and processing, computer-aided testing. Letter grading.

143A. Mechanical Behavior of Materials. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 104, Mechanical and Aerospace Engineering 101. Plastic flow of metals under simple and combined loading, strain rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications. Letter grading.

143L. Mechanical Behavior Laboratory. (2) Laboratory, four hours; course 143A (may be taken concurrently). Methods of characterizing mechanical behavior of various materials; elastic and plastic deformation, fracture toughness, fatigue, and creep testing.

150. Introduction to Polymers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plastication. Letter grading.

160. Introduction to Ceramics and Glasses. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Preparation: at least two courses from 132, 143A, 150, 160. Requisite: course 104. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in electronics, structural, and reforming applications. Letter grading.

162. Electronic Ceramics. (4) Lecture, four hours; outside study, eight hours. Requisites: course 104, Electrical Engineering 1 (or Physics 1C). Unconventional ceramics in microelectronics, thin film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical wave guide applications and designs. Letter grading.

170. Engaging Elements of Communication: Oral Communication. (2) Lecture, one hour; discussion, one hour; outside study, four hours. Comprehensive oral presentation and communication skills provided by building on strengths of individual personal styles in creation of positive interpersonal relationships. Skill set prepares students for different types of academic and professional presentations for wide range of audiences. Learning environment is highly supportive and interactive as it helps students creatively develop and greatly expand effectiveness of their communication and presentation skills. Letter grading.

171. Engaging Elements of Communication: Writing for Technical Community. (2) Lecture, one hour; discussion, one hour; outside study, four hours. Comprehensive technical writing skills, on topics specific to field of materials science and engineering. Students write review term paper in selected subject field of materials science and engineering from given set of journal publications. Instruction leads students through several crucial steps, including brainstorming, choosing title, coming out with outline, concise writing of abstract, conclusion, and final polishing. Other subjects include writing style, word choices, and grammar. Letter grading.

CM180. Introduction to Biomaterials. (4) (Same as Biomedical Engineering CM180.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: courses Chemistry 20A, 20B, and 20L. Engineering materials used in medicine; and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM280. Letter grading.

180. Special Courses in Materials Science and Engineering. (4) Seminar, four hours; outside study, eight hours. Special topics in materials science and engineering for undergraduate students that are taught in an experiential laboratory setting as those taught by resident and visiting faculty members. May be repeated once for credit with topic or instructor change. Letter grading.

194. Research Group Seminars: Materials Science and Engineering. (4) Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of group research. Discussion of research methods and current literature in field or of research of faculty members. May be repeated for credit. Letter grading.

199. Directed Research in Materials Science and Engineering. (2 to 8) To be scheduled, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. Occasional field trips may be arranged. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

211. Electron Microscopy. (4) (Formerly numbered 244.) Lecture, four hours; outside study, eight hours. Requisites: courses 111, 112, 235. Electron microscopy, geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to conductive crystallography, fast ion and X-ray diffractions, Lorentz microscopy, laboratory applications of contrast theory. Letter grading.

CM212. Introduction to Archaeological Materials Science: Scientific Methodologies, Techniques, and Interpretation. (4) (Same as Conservation M212.) Lecture, three hours; laboratory, two hours. Preparation: general chemistry, or inorganic and organic chemistry. Recommended requisite: course 110. General basic scientific approaches employed for examination of archaeological and cultural artifacts to answer questions of anthropological significance and their state of preservation. Theoretical and hands-on instruction to provide fundamental knowledge and analytical techniques such as UV/NIR spectroscopy, X-ray fluorescence (XRF), X-ray diffraction (XRD), scanning electron microscopy and energy dispersive spectroscopy (SEM-EDS), and others. Examination and analysis protocols, sample preparation techniques, and methods of scientific analysis and interpretation for study of organic and inorganic materials of archaeological and cultural significance. Concurrently scheduled with course C112. Letter grading.

M213. Deterioration and Conservation of In-Situ Archaeological and Cultural Materials. (4) (Same as Conservation M213.) Lecture, two hours; laboratory, three hours. Requisites: courses M215 (or Art History M203F or Conservation M250) and M216 (or Conservation M216). Deterioration processes (both natural and man-made) of in-situ and ex-situ archaeological and cultural decorative surfaces (mainly rock art, wall paintings, polychrome sculpture, decorative architectural elements, and mosaics) and on solutions to mitigate, pacify, or arrest decay mechanisms based on preventive, passive, and remedial solutions (later based on minimum intervention). Sessions include holistic approaches for preservation of archaeological sites; hydrology of sites; monitoring the damaging effects of salts; biodegradation; chemical and mechanical weathering; earthquakes, frost, flooding, and vandalism; structural repairs, grouting, cleaning, and desalination; sheltering and finishing accessibility, structuring, consolidation, and protective surface treatments. Letter grading.

M215. Techniques and Materials of Archaeological and Cultural Materials: In-Situ and Ex-Situ Architectural Decorative Surfaces. (4) (Same as Art History M203F and Conservation M250.) Seminar, two hours; laboratory, three hours. Requisite: courses M215 or Conservation M216 or Conservation M216. Occasional field trips or portable displays of in-situ and ex-situ archaeological and cultural decorative surfaces to museums and historical sites. Letter grading.

222. Growth and Processing of Electronic Materials. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 130, 131, Thermodynamics of semiconductor growth, and device processing. Particular emphasis on fundamentals and principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical, and transport properties, novel materials systems, and characterization. Letter grading.

223. Materials Science of Thin Films. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 131, Fabrication, structure, and property correlations of thin films used in microelectronics for data and information processing. Topics include film deposition, interfacial properties, stress and strain, electromigration, phase changes and kinetics, reliability. Letter grading.

224. Deposition Technologies and Their Applications. (4) Lecture, three hours; outside study, nine hours. Designed for graduate engineering students. Deposition methods used in high-technology applications. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma-assisted vapor deposition processes, plasma spray, electrodeposition. Applications in semiconductor, chemical, optical, mechanical, and metallicurgical industries. Letter grading.

226. Si-CMOS Technology: Selected Topics in Materials Science. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Recommended preparation: Electrical Engineering 221B. Requisites: courses 130, 131, 200, 221, 222. Selected topics in materials science from modern Si-CMOS technology, including technological challenges in high-k/metal gate stacks, strained Si FETs, SOI and three-dimension dual-gate FETs, source/drain engineering including trans-sient-enhanced diffusion, nonvolatile memory, and metallization for ohmic contacts. Letter grading.

233. Ancient and Historic Metals: Technology, Microstructure, and Corrosion. (4) Same as Conservation M246. Seminar, two hours; laboratory, 90 minutes. Designed for graduate students in materials science. Students present research on corrosion, microstructure, and corrosion of ancient and historic metals and artifacts. Topics vary and may include the use of new analytical techniques. Letter grading.

243A. Fracture of Structural Materials. (4) Lecture, four hours; laboratory, two hours; outside study, four hours. Requisite: course 143A. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation mechanics, fatigue, fracture in reactive environments, alloy development, fracture-safety design. Letter grading.

252. Organic Polymer Electronic Materials. (4) Lecture, four hours; outside study, eight hours. Preparation: knowledge of introductory organic chemistry and polymer science. Introduction to organic electronic materials with emphasis on materials chemistry and processing. Topics include conjugated polymers; heavily doped, highly conducting polymers; applications as processable metals and in various electrical, optical, and electrochemical devices. Synthesis of semiconductor polymers for organic light-emitting diodes, solar cells, thin-film transistors. Introduction to emerging field of organic electronics. Letter grading.

270. Computer Simulations of Materials. (4) Lecture, four hours; outside study, eight hours. Introduction to modern methods of computational modeling in materials science. Topics include computational techniques, classical molecular dynamics, and Monte Carlo methods, with emphasis on understanding basic physics and ideas and learning to design, run, and analyze computer simulations. Use of computer models from current literature to show how these methods can be used to study interesting phenomena in materials science. Hands-on computer experiments. Letter grading.

271. Electronic Structure of Materials. (4) Lecture, four hours; outside study, eight hours. Preparation: basic knowledge of quantum mechanics. Recommended preparation: course 200. Introduction to modern first-principles electronic structure calculations for various types of modern materials. Properties of electrons and interatomic binding in molecules, crystals, and liquids, with emphasis on practical methods for solving Schrödinger equation and using it to calculate physical properties such as elastic constants, equilibrium structures, binding energies, vibrational frequencies, electronic band gaps and band structures, properties of defects, surfaces, interfaces, and magnetism. Extensive hands-on experience with modern density-functional theory code. Letter grading.

272. Theory of Nanomaterials. (4) Lecture, four hours; outside study, eight hours. Preparation: basic knowledge of quantum mechanics. Preparation: course 200. Introduction to modern first-principles electronic structure calculations for various types of modern materials. Properties of electrons and interatomic binding in molecules, crystals, and liquids, with emphasis on practical methods for solving Schrödinger equation and using it to calculate physical properties such as elastic constants, equilibrium structures, binding energies, vibrational frequencies, electronic band gaps and band structures, properties of defects, surfaces, interfaces, and magnetism. Extensive hands-on experience with modern density-functional theory code. Letter grading.

275. Exploration of Advanced Topics in Materials Science and Engineering. (2) Lecture, one hour; discussion, one hour; outside study, four hours. Requisite: course 104, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged teeth and tissues. Topics include structure and properties of metallic implants, similarities and differences between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM280. Letter grading.

276. Seminar: Advanced Topics in Materials Science and Engineering. (2) Seminar, two hours; outside study, four hours. Preparation: any materials science and engineering course. Seminar for graduate students to discuss recent developments in materials science and engineering. Seminar topics may include research projects and current literature in materials science and engineering. Students may present summary previews of topics prior to lecture. Class discussions follow each presentation. May be repeated for credit. S/U grading.

278. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Seminar for graduate materials science and engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.
**Scope and Objectives**

Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

**Undergraduate Study**

Admission

Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter any of the Mathematics Department majors.

**Preliminary Examination in Mathematics**

If students wish to enroll in Mathematics 1, 3A, or 31A, they must pass the Mathematics Diagnostic Test.

The examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It is also given several times during the academic year. For specific dates and test locations, refer to the Schedule of Classes or the departmental website at [http://www.math.ucla.edu/ugrad/diagnostic.shtml](http://www.math.ucla.edu/ugrad/diagnostic.shtml), or contact the Mathematics Student Services Office, 6356 Math Sciences.
Advanced Placement in Calculus
Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 5 receive 4 units of credit and Mathematics 31A equivalency; those with a score of 4 receive 4 units of calculus and analytic geometry credit. They may petition for 31A equivalency, or they may take course 31A at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students who take the BC Test and obtain a score of 5 receive 8 units of credit and Mathematics 31A, 31B equivalency; those with a score of 4 receive 4 units of credit and Mathematics 31A equivalency. They may petition for 31A, 31B equivalency, or they may take courses 31A, 31B at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students receiving a score of 4 or lower on the AB or 3 or lower on the BC examination should consult the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA.

Credit Limitations
Credit is given for at most one course in each of the following groups: (1) 3A, 31A; (2) 3B, 31B, 31E; (3) 3C, 32A; (4) 110A, 117.

Courses from only one of the following statistics sequences may be applied toward any mathematics major: (1) Statistics 100A (or Mathematics 170A), 100B, 100C or (2) Statistics 110A, 110B.

Mathematics 2 and Statistics 10 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 132 is not open for credit to students with credit for Physics 132.

Mathematics 151A and 151B are not open for credit to students with credit for Electrical Engineering 103.

Mathematics 170A and Statistics 100A are not open for credit to students with credit for Electrical Engineering 131A.

Students may not take or repeat a mathematics course for credit if it is a requisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Mathematics 31B, they must do so before completing course 32A).

Students may not receive credit for both a course and the honors version of that course (e.g., they may not receive credit for both Mathematics 131A and 131AH).

Mathematics Upper Division Courses
Mathematics 115A, 131A, 132, 142, 151A, and 164 are offered each term. The remaining upper-division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

Program in Computing Courses
Program in Computing 1 is designed for students who wish to acquire a general introduction to the topic of computers and computation, but who have no prior experience in computing.

Courses 10A, 10B, and 10C provide an extensive introduction to programming, using the C++ language. Courses 15, 20A, 20B, 20C, 30, 40A, 40B, and 60 are of interest to Letters and Science majors who are completing a specialization in Computing or who are planning to take upper division coursework in computer science. These students should seek the advice of their major department.

Undergraduate Majors
The department offers five majors: Mathematics, Applied Mathematics, Mathematics of Computation, Mathematics/Applied Science, and Mathematics for Teaching. The department also participates in the Mathematics/Economics Interdepartmental Program, which offers a Mathematics/Economics major, and in the Mathematics/Atmospheric and Oceanic Sciences Interdepartmental Program, which offers a Mathematics/Atmospheric and Oceanic Sciences major.

The Mathematics major is designed for students whose basic interest is mathematics; the Applied Mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the Mathematics of Computation major for individuals interested in the mathematical theory and the applications of computing; the Mathematics/Applied Science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the Mathematics for Teaching major for students planning to teach mathematics at the high school level. As part of the Mathematics/Applied Science major, the department offers programs for students interested in the fields of actuarial science, management/accounting, mathematics/history of science, and medical and life sciences.

Each course taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

Mathematics B.S.
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, Program in Computing 10A, and two courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Life Sciences 1, Philosophy 31, 32, Physics 1B, 1C, 6B, 6C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

Transfer Students
Transfer applicants to the Applied Mathematics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, two calculus-based physics courses, one C++ programming course, and one course from general chemistry and biochemistry. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

Mathematics of Computation B.S.
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, Program in Computing 10A, 10B, 10C, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must
have a minimum overall grade-point average of 2.0 for the courses.

Transfer Students
Transfer applicants to the Mathematics of Computation major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, two calculus-based physics courses, three programming courses, and one course from general chemistry for majors or calculus-based physics.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A, 151B, and six courses from 106 through 199 and Statistics 100A through 101C; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall grade-point average of 2.0.

Mathematics/Applied Science B.S.
The Mathematics/Applied Science major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: actuarial plan, management/accounting plan, mathematics/history of science plan, or medical and life sciences plan. In the past, Mathematics/Applied Science majors have combined the study of mathematics with fields such as atmospheric and oceanic sciences, biochemistry, biology, chemistry, economics, geography, physics, psychology, and statistics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C-; and students must have a minimum overall grade-point average of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

Transfer Students
Transfer applicants to the Mathematics/Applied Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors and one C++ programming course. Additional courses are required for each concentration plan.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 106 through 199 and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students are not admitted to the major if they have 135 or more units by the end of the term in which they plan to enter the program.

Actuarial Plan
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A.

The Major

Management/Accounting Plan
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Management 1A, 1B, Program in Computing 10A.

The Major
Required: Seven mathematics courses, including Mathematics 115A, 131A, 164, 170A or Statistics 100A or 110A, Mathematics 170B or Statistics 100B or 110B, and two courses from Mathematics 106 through 199 and Statistics 100C; seven management courses, including Management 120A, 120B, 122, 140, 212A, 212B, and one additional course from 108 through 122.

Mathematics/History of Science Plan
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, and three courses from History 2B, 2D, 3A through 3D.

The Major
Required: Eight mathematics courses, including Mathematics 106, 115A, 131A, 134, 170A, and three courses from 110A through 199; six outside courses to be selected from History 179A through 180C, Philosophy 124, Physiological Science M168, and any upper division Honors Collegium course with history of science/medicine content.

Medical and Life Sciences Plan
Preparation for the Major

The Major
Required: Seven mathematics courses, including Mathematics 115A, 134, 151A, 170A, 170B, and two courses from 110A through 199 and Statistics 100B through 101C; six outside courses, including Neuroscience M101A, M101B, and M101C, and three courses from Biomathematics 110, 160, Biostatistics 100A, Chemistry and Biochemistry CM160A, Computer Science CM186B, Ecology and Evolutionary Biology C119, 133, 135, Physiological Science 100, 135, and any additional upper division course from these fields with consent of the administering department and the Mathematics Department.

Mathematics for Teaching B.S.
The Mathematics for Teaching major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the Mathematics, Applied Mathematics, or Mathematics of Computation major.

Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Physics 1A or 6A, Program in Computing 10A, and two courses from Chemistry and Biochemistry 20A, 20B, Physics 1B, 1C, 6B, 6C, Program in Computing 10B through 97. Each course must be passed with a minimum grade of C-; and students must have a minimum overall grade-point average of 2.0 for the courses.

Transfer Students
Transfer applicants to the Mathematics for Teaching major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, one C++ programming course, and three courses from calculus-based physics, general chemistry for majors, and computing.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Mathematics 105A, 105B, 105C, 106, 110A or 117, 115A, 120A or 123, 131A, 170A or Statistics 100A, Statistics 100B, one course from Mathematics 110B through 191H
or Statistics 100C, one course from Mathematics 131B through 136, one course from 142 through 167.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

Honors Program

Students majoring in Mathematics, Applied Mathematics, and Mathematics of Computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall grade-point average of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

Computing Specialization

 Majors in Mathematics, Applied Mathematics, Mathematics/Applied Science, or Mathematics for Teaching may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Mathematics 61 or 180. Program in Computing 10A, 10B, two courses from 10C, 15, 20A, 20B, 30, 40A, 60, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Subject Matter Preparation Program for Single Subject Credential in Mathematics

Students interested in obtaining a single subject secondary school credential in mathematics should consult with a departmental counselor regarding the requirements for a waiver from the Mathematics California Subject Examination for Teachers (CSET), which is required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible because the program does require additional courses beyond the major requirements. For additional information on teaching credential requirements, consult the Department of Education at (310) 825-8328.

Mathematics Minor

The Mathematics minor is designed to provide students with the opportunity to widen their background and general comprehension of the role of mathematics in various disciplines.

To enter the minor, students must have an overall grade-point average of 2.0 or better and meet with the undergraduate mathematics advisor in the Student Services Office, 6356 Math Sciences.

Required Lower Division Courses (12 units): Mathematics 32A, 33A, 33B.

Required Upper Division Courses (20 units): At least five courses (20 units) selected from Mathematics 106 through 199.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Mathematics offers the Masters of Arts in Teaching (M.A.T.) degree and Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Mathematics.

Mathematics

Lower Division Courses

3A. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including trigonometry). Requirement: successful completion of Mathematics Diagnostic Test (score of 36 or better) or course 1 with a grade of C– or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of integral calculus, introduction to differential equations and multivariable differential calculus. P/NP or letter grading.

3B. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Requirement: course 3A with a grade of C– or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of integral calculus, introduction to differential equations and multivariable differential calculus. P/NP or letter grading.

3C. Probability for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Requirement: course 3B with grade of C– or better. Elementary probability, probability distributions, random variables, and limit theorems. P/NP or letter grading.

31A. Differential and Integral Calculus. (4) Lecture, three hours; discussion, one hour. Preparation: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry). Requirement: successful completion of Mathematics Diagnostic Test or course 1 with a grade of C– or better. Differential calculus and applications; introduction to integration. P/NP or letter grading.

31AX. Workshop in Integral Calculus. (1) Discussion, one hour. Corequisite: course 31A. Supplementary techniques and applications for solving problems in integral calculus. Limits of investigation set by individual instructor. P/NP grading.

31B. Integration and Infinite Series. (4) Lecture, three hours; discussion, one hour. Requirement: course 31A with a grade of C– or better. Transcendental functions; methods and applications of integration; sequences and series. P/NP or letter grading.

31BH. Integration and Infinite Series (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 31B. P/NP or letter grading.

31BX. Workshop in Integral Calculus. (1) Discussion, one hour. Corequisite: course 31B. Supplementary techniques and applications for solving problems in integral calculus. Limits of investigation set by individual instructor. P/NP grading.

31E. Calculus for Economics Students. (4) Lecture, three hours; discussion, one hour. Requirement: course 31A with a grade of C– or better. Not open for credit to students with credit in course 3B, 3C, or 31B. Calculus for applications to economics. Partial differentiation, implicit functions, exponential and logarithmic functions, extrema, optimization, constrained optimization. P/NP or letter grading.

32A. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Requirement: course 31B with a grade of C– or better. Introduction to differential calculus of several variables, vector field theory. P/NP or letter grading.

32AH-32BH. Calculus of Several Variables (Honors). (4-4) Lecture, three hours; discussion, one hour. Requirement: course 31B with a grade of B or better. Honors sequence parallel to courses 32A, 32B.

32B. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Requirement: course 32A with a grade of C– or better. Introduction to integral calculus of several variables, line and surface integrals. P/NP or letter grading.

33A. Linear Algebra and Applications. (4) Lecture, three hours; discussion, one hour. Requirement: course 32A with a grade of C– or better. Introduction to linear algebra: systems of linear equations, matrix algebra, linear independence, subspaces, bases and dimension, orthogonality, least-squares methods, determinants, eigenvalues and eigenvectors, matrix diagonalization, and symmetric matrices. P/NP or letter grading.

33AH. Linear Algebra and Applications (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 33A. P/NP or letter grading.
338. Differential Equations. (4) Lecture, three hours; discussion, one hour. Requisite: course 32A with a grade of C– or better. Highly recommended: course 33A. First-order, linear differential equations; second-order, linear differential equations with constant coefficients; power series solutions; linear systems. P/NP or letter grading.

338X. Workshops in Infinite Series and Differential Equations. (1) Discussion, one hour. Corequisite: course 33B. Supplementary techniques and applications for solving problems in infinite series and differential equations; investigation set by individual instructor. P/NP grading.

61. Introduction to Discrete Structures. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, Program in Computing 10A. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Bn/in algorithm. P/NP or letter grading.

71SL. Classroom Practices in Elementary School Mathematics. (2) Seminar, three hours; fieldwork, three hours. Introduction for prospective mathematics teachers to field of elementary education and teaching and learning of mathematics in elementary school classrooms. Pairs of students are placed in local elementary school classrooms to observe, participate, and assist mentor teachers in instruction. Introduction to inquiry-based learning practices, national and California standards, reading and learning differences in children, and cognitive ability of elementary-age children as it relates to introduction of concepts, curricular planning, classroom management, and learning assessment. P/NP grading.

72SL. Classroom Practices in Middle School Mathematics. (2) Seminar, three hours; fieldwork, three hours. Introduction for prospective mathematics teachers to field of secondary education and teaching and learning of mathematics in middle school classrooms. Pairs of students are placed in local middle school classrooms to observe, participate, and assist mentor teachers in instruction. Discussion of learning in middle school culture, cognitive development of students at this level, and best means to teach appropriate mathematics. P/NP grading.

97. Variable Topics in Mathematics. (4) Lecture, three hours; discussion, one hour. Study of selected topics in mathematics at introductory level. P/NP or letter grading.

98XA. PEERS Collaborative Learning Workshops for Life Sciences Majors. (1) Formerly numbered 5.) Laboratory, three hours. Corequisite: associated undergraduate lecture course in mathematics for life sciences majors. Development of intuition and problem-solving skills in collaborative learning environment. May be repeated four times, but only 1 unit may be applied toward graduation. P/NP grading.

98XB. PEERS Collaborative Learning Workshops for Physical Sciences and Engineering Majors. (1) Laboratory, three hours. Corequisite: associated undergraduate lecture course in mathematics for physical sciences and engineering majors. Development of intuition and problem-solving skills in collaborative learning environment. May be repeated four times, but only 1 unit may be applied toward graduation. P/NP grading.

Upper Division Courses

General and Teacher Training

100. Problem Solving. (4) (Formerly numbered 192) Lecture, three hours; discussion, one hour. Requisite: course 31A with grade of C– or better. Problem-solving techniques and mathematical topics useful as preparation for Putnam Examination and similar competitions. Continued fractions, inequalities, modular arithmetic, closed form evaluation of sums and products, problems in geometry and combinatorics, other nonroutine problems. Participants expected to take Putnam Examination. P/NP grading.

103A-103B-103C. Observation and Participation: Mathematics Instruction. (2-2-2) Formerly numbered 330.) Seminar, one hour; fieldwork (classroom observation and participation), two hours. Requisites: courses 31A, 31B, 32A, 32B, 33A, 33B. Course 103A is enforced requisite to 103B, which is enforced requisite to 103C. Observation, participation, or tutoring in mathematics classes at middle school and secondary levels. May be repeated for credit. P/NP (undergraduate) or S/U (graduate) grading.

105A-105B. Mathematics and Pedagogy for Teaching Mathematics. (4-4) Lecture, four hours. Requisites: courses 110A (or 117), 115A, 120A (or 123), 131A. Course 105A is requisite to 105B. Designed for senior Mathematics Department majors. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. P/NP or letter grading.

105C. Mathematics and Pedagogy for Teaching Mathematics. (4) Lecture, four hours. Requisites: courses 105A, 105B, 110A (or 117), 115A, 120A (or 123), 131A. Course 105B is requisite to 105C. Signed for senior Mathematics Department majors. Introduction to discrete structures, including sets and relations, permutations and combinations, graphs and trees, inductive reasoning, and exponential growth. P/NP or letter grading.

106. History of Mathematics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, 32A, 32B. Sources of modern mathematics in ancient Babylonia and Greece, including place value number systems and proof. Development of algebra through Middle Ages to Fermat and Abel, invention of analytic geometry and calculus. Selected topics. P/NP or letter grading.

Algebra, Number Theory, and Logic

110A-110B. Algebra. (4-4) Lecture, three hours; discussion, one hour. P/NP or letter grading. 110A. Requisite: course 115A. Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. 110B. Requisites: courses 110A or 117. Groups, structure of finite groups.

110AH-110BH. Algebra (Honors). (4-4) Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 110A-110B. 110C. Algebra. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A, 110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

111. Theory of Numbers. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A or 117, 115A. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

114C. Computability Theory. (4) Formerly numbered 114A.) Lecture, three hours; discussion, one hour. Requisite: course 110A or 131A or Philosophy 135. Effectively calculable, Turing computable, and recursive functions; Church/Turing thesis. Normal form theorem; universal functions; unsolvability and undecidability results. Recursive and recursively enumerable sets; relative recursiveness, polynomial-time computability. Arithmetical hierarchy. P/NP or letter grading.

114L. Mathematical Logic. (4) (Formerly numbered 114L.) Lecture, three hours; discussion, one hour. Requisite: course 110A or 131A or Philosophy 135. Introduction to mathematical logic, aiming primarily at completeness and incompleteness theorems of Gödel. Propositional and predicate logic; syntax and semantics; formal deduction; completeness, compactness, and Lowenheim/Skolem theorems. Formal number theory, transfinite induction, Gödel incompleteness theorem. P/NP or letter grading.

114S. Introduction to Set Theory. (4) Formerly numbered M114S.) (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Requisite: course 110A or 131A or Philosophy 135. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

115C. Computability Theory. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation. Jordan canonical form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric and orthogonal linear transformations, polar decomposition.

115AH. Linear Algebra (Honors). (5) Lecture, three hours; discussion, two hours. Requisite: course 33A. Honors course parallel to course 115A. P/NP or letter grading.

115AX-115BX. Workshops in Linear Algebra. (1-1) Discussion, one hour. Corequisite for course 115A: course 115A-115B; for course 115AX: course 115A; for course 115BX: course 115B. Supplementary techniques and applications for solving problems in linear algebra. Limits of investigations. P/NP or letter grading.

115HX. Workshop in Linear Algebra (Honors). (1) Discussion, one hour. Corequisite: course 115AH. Honors course parallel to course 115AX. P/NP or letter grading.

116. Mathematical Cryptology. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Program in Computing 130. Introduction to mathematical cryptology using methods of number theory, algebra, probability. Topics include symmetric and public-key cryptosystems, one-way functions, signatures, key exchange, groups, primes, pseudoprimes, primality tests, quadratic reciprocity, factoring, rho method, RSA, discrete logs. P/NP or letter grading.

117. Algebra for Applications. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

Geometry and Topology

120A-120B. Differential Geometry. (4-4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature, Gaussian curvature, congruence of curves and surfaces, intrinsic geometry of surfaces, isometries, geodesics, Gauss/Bonnet theorem. P/NP or letter grading.

121. Introduction to Topology. (4) Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

123. Foundations of Geometry. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

Analysis

131A-131B. Analysis. (4-4) Lecture, three hours; discussion, one hour. Requisite: courses 32B, 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in Euclidean space, functions, continuity. 131B. Requisites: courses 115A, 131A. Differentiation integral sequences and series of functions, power series, Fourier series.

131AH-131BH. Analysis (Honors). (4-4) Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 131A, 131B.
131A. Analysis Techniques. (1) Lecture, one hour. Requisite: course 33B. Corequisite: course 131A. Review of elementary techniques of mathematics and their applications to topics in analysis, such as geometric and algebraic constructions, least upper bound axiom, etc. P/NP grading.

131C. Topics in Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: courses 131A, 131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

132. Complex Analysis for Applications. (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy/Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

182. Algorithms. (4) Lecture, three hours; discussion, one hour. Requisite: course 3C or 32A. Graphs, greedy algorithms, divide and conquer algorithms, dynamic programming, network flow. Emphasis on designing efficient algorithms useful in diverse areas such as bioinformatics and allocation of resources. P/NP or letter grading.

184. Topics in Combinatorics. (4) Lecture, three hours; discussion, one hour. Corequisites: courses 115 and 118. Introduction to combinatorics, including generating functions, existence and counting problems, graph theory, combinatorial designs, and other topics. P/NP or letter grading.

190A-190O. Seminars: Current Literature. (1-4) Special Studies. May be repeated for credit. P/NP or letter grading.

190A. Discrete Mathematics. (4) (Formerly numbered 113.) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Permutations and combinations, basic counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem. P/NP or letter grading.

190B. Algorithms. (4) Lecture, three hours; discussion, one hour. Requisites: courses 61 (or 180), 115A. Introduction to combinatorics, including generating functions, existence and counting problems, graph theory, and other topics. P/NP or letter grading.

190D. Probability. (4) Lecture, three hours; discussion, one hour. Requisite: course 120B. Not open to students with credit for Electrical Engineering 131A or Statistics 131A. Random variables and vectors, expectation. P/NP or letter grading.

191. Variable Topics Research Seminars: Mathematics. (4) Seminar, three hours. Variable topics. Research in mathematics that covers material not covered in regular mathematics upper-division curriculum. Reading, discussion, and development of culminating project. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

191H. Honors Research Seminars: Mathematics. (4) Seminar, three hours. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition. P/NP or letter grading.

195. Community Internships in Mathematics Education. (4) Tutorial, to be arranged. Limited to juniors/seniors. Internship to be supervised by Center for Community Learning and Mathematics Department. Students and faculty mentors. Application and capstone evaluation. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

Graduate Courses

Teacher Preparation

201A-2018B-201C. Topics in Algebra and Analysis. (4-4-4) Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Important ideas of algebra, geometry, and analysis taught effectively from elementary to modern mathematics. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

202A-202B. Mathematical Models and Applications. (4-4) Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Mathematical modeling: describing various empirical situations. Basic characteristics of postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

203. Master's Linear Algebra. (4) Lecture, four hours; discussion, one hour. Rigorous treatment of fundamental results of pure and applied linear algebra over fields. Applications to contemporary research. Preparation for linear algebra portion of UCLA Mathematics Basic Examination that is required of M.A. and Ph.D. students. S/U or letter grading.

204. Master's Analysis. (4) Lecture, four hours; discussion, one hour. Rigorous treatment of fundamental results of analysis. Applications to contemporary research. Preparation for the linear algebra portion of UCLA Mathematics Basic Examination that is required of M.A. and Ph.D. students. S/U or letter grading.

Number Theory

205A-205B. Algebra. (4) Lecture, four hours; discussion, one hour. Rigorous treatment of fundamental results of algebra. Applications to contemporary research. Preparation for the linear algebra portion of UCLA Mathematics Basic Examination that is required of M.A. and Ph.D. students. S/U or letter grading.

205A-205B. Number Theory. (4-4-4) Lecture, three hours. Requisites: courses 210A, 246A. Algebraic number theory, including ideal theory, valuations, local fields, cyclotomic fields. Introduction to class-field theory, analytic number theory, L-functions and class number formulas, and modular forms. S/U or letter grading.

207A-207B-207C. Topics in Number Theory. (4-4-4) Lecture, three hours. Analysis on GL(1) and GL(2). Classical topics of analytic number theory, algebraic number theory, special values of L-functions and p-adic L-functions, arithmetic theory of modular forms, advanced topics in analytic number theory. Arithmetic geometry, especially of modular curves. S/U or letter grading.

M209A. Cryptography. (4) (Same as Computer Science M282A.) Lecture, four hours; outside study, eight hours. Introduction to theory of cryptography, stressing rigorous definitions and proofs of security. Topics include notions of hardness, one-way functions, hard-core bits, pseudorandom generators, pseudorandom functions and pseudorandom permutations, semantic security, public-key and private-key encryption, secret-sharing, message authentication, digital signatures, interactive proofs, zero-knowledge proofs, collision-resistant hash functions, commitment protocols, key-agreement, contract signing, and two-party secure computation with static security. Letter grading.

M209B. Cryptographic Protocols. (4) (Same as Computer Science M282B.) Lecture, four hours; required course M209A. Consideration of advanced cryptographic protocol design and analysis. Topics include noninteractive zero-knowledge proofs; zero-knowledge arguments; concurrent and non-black-box zero-knowledge; IP=PSPACE proof, stronger notions of security for public-key encryption, including chosen-ciphertext security; secure multi-party computation; dealing with dynamic adversary; nonmalleability and composability of secure protocols; software protection; threshold cryptography; identity-based cryptography; private information retrieval; protection against man-in-the-middle protocols; identification protocols; digital cash schemes; lower bounds on use of cryptographic primitives, software obfuscation. May be repeated for credit with topic change. Letter grading.

Algebra

210A-210B-210C. Algebra. (4-4-4) Requisites: courses 110A, 110B, 110C. Students with credit for course 210B may receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holden/Schreier; rings and ideals; factorization theory in integral domains, modular rings, integral ring domains, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. (4) Requisite: course 210A. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. (4) Requisite: course 210A. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

213A-213B. Group Theory. (4-4) Requisite: course 210A. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Introduction to Algebraic Geometry. (4-4) Requisite: course 210A. Topics include classification and first properties of algebraic varieties in affine and projective space; irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to the theory of Riemann surfaces, as time permits.

215A-215B. Commutative Algebra. (4-4) Requisite: course 210A. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

216. Further Topics in Algebra. (4) Requisites: courses 214A-214B. Further examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

217. Geometry and Physics. (4) (Same as Physics M236.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include super-symmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems, and classical ideal rings. Letter grading.

218A. Discrete Mathematics: Probabilistic Methods. (4) (Formerly numbered 276.) Lecture, three hours. Linear time and speed, second moment method, local lemma, correlation inequalities, martingales, large deviation inequalities, Janson and Talagrand inequalities, and pseudo-randomness. S/U or letter grading.

218C. Topics in Discrete Mathematics. (4) Lecture, three hours. Examination of variety of methods, approaches, and techniques that were developed in last 30 years in discrete mathematics. Topics may include extremal problems for graphs and set systems, Ramsey theory, additive number theory combinatorial geometry, topological methods in combinatorics, entropy and other tools from information theory, discrete harmonic analysis and its applications to combinatorics and theoretical computer science. Topics vary from year to year. May be repeated for credit with consent of instructor. S/U or letter grading.

Logic and Foundations

220A-220B-220C. Mathematical Logic. (4-4-4) Lecture, three hours. Requisite: course M114S. Fundamental methods and results in mathematical logic, using mathematical methods to reason about existence or nonexistence of proofs and constructions in many different settings. Topics include compactness theorem, saturation of models, completeness and incompleteness theorems of Gödel, Turing computability and degrees of unsolvability, recursion in Baire space, Zermelo/Fraenkel axioms, universe of constructible sets, and related equiconsistency results in set theory. S/U or letter grading.

261. Game Theory. (4) (Formerly numbered M261.) Lecture, three hours. Designed for graduate mathematics students. Bargaining theory, core, value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

266B-266C. Applied Partial Differential Equations. (4-4) Requisites: courses 265A, 265B. Classification of parabolic problems, and linear boundary value problems, systems with multiple time scales, and applications to fluid mechanics. Analytical techniques for second-order partial differential equations, eigenvalue problems for differential equations, Green's functions, spectral theory of differential operators such as continuum and particle mechanics, classical and quantum examples. Applications to electrical engineering, material science, and fluid mechanics. S/U or letter grading.

271A. Tensor Analysis. (4) Requisite: course 131A. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

495. Teaching College Mathematics. (2) Seminar, one hour; two-day intensive training at beginning of Fall Quarter. Required of all new teaching assistants and new Ph.D. students. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

495B. Technology and Teaching. (2 to 4) Seminar, two hours; laboratory, one hour (when scheduled). Prerequisite: course 495. Focus on undergraduate mathematics instruction. Web-based electronic communication, using technology for class organization, use of presentation software packages, and creation of electronic teaching portfolio. Provides mechanics of technology and forum for evaluation and comparison of technology in undergraduate mathematics teaching. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA department chair and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USCs. S/U grading.

502. Directed Individual Study or Research. (1 to 12) Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member. May be repeated for credit, but only two 502 courses (8 units) may be applied toward M.A. degree unless departmental consent is obtained. S/U or letter grading.

Program in Computing

Lower Division Courses

1. Introduction to Computers and Computing. (4) Lecture, three hours; laboratory, one hour. Not open for credit to students with credit for course 15 or 10A; may not be taken concurrently with course 15 or 10A. Fundamentals of computers and computing. Editors, spreadsheets, file management, machine organization, and computer hardware; Internet; software applications. P/NP or letter grading.

15. Introduction to Lisp and Symbolic Computation. (5) Lecture, three hours; discussion, two hours. Introduction to symbolic computing using Lisp programming language. Basics; list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

30A. Introduction to Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Introduction to programming and software reuse; recursion; algorithms for sorting and searching. P/NP or letter grading.

10B. Intermediate Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Abstract data types and their implementation using C++; control structure, recursion, algorithms and data structures; dynamic data structures, including linked lists, stacks, queues, trees, and hash tables; applications; object-oriented programming and software reuse; recursion; algorithms for sorting and searching. P/NP or letter grading.

10C. Advanced Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Introduction to object-oriented computing using C++. Advanced algorithms and data structures; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms. P/NP or letter grading.

15. Introduction to Lisp and Symbolic Computation. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Introduction to symbolic computing using Lisp programming language. Basics; list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

20A. Principles of Java Language with Applications. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 20A. Further aspects of use of classes, graphics components, exception handling, multithreading, and multimedia. Additional topics may include networking, servlets, database connectivity, and JavaBeans. P/NP or letter grading.

20C. Seminar: Enterprise Computing with Java. (5) Lecture, three hours; discussion, two hours; laboratory, five hours. Enforced prerequisite: course 20B. Overview of Enterprise Java APIs: remote method invocation, database access with SQL, servlets, and JSP; issues in implementation of server-side Java applications. Use of Java in conjunction with XML. Individual or group projects and presentations. P/NP or letter grading.

30. Machine Organization and Assembly Language Programming. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. Description of machine organization and assembly language. Representation of information, instruction sets and formats, addressing modes, memory organization and management, input/output (I/O) processing and interrupts. P/NP or letter grading.

40A. Introduction to Programming for Internet. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. Introduction to core technologies of Internet, with focus on client-side Web programming, fundamental protocols, static Web pages, Perl language, Common Gateway Interface, XML. P/NP or letter grading.

40B. Advanced Topics in Programming for Internet. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 40A. Study of advanced topics in Web programming, with focus on server-side technologies. P/NP or letter grading.

Special Studies

285A-285L. Seminars. (4 each) Seminar, three hours. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading.

285A. History and Development of Mathematics.
285B. Number Theory.
285C. Algebra.
285D. Logic.
285E. Geometry.
285F. Topology.
285G. Analysis.
285H. Differential Equations.
285I. Functional Analysis.
285K. Probability.
285L. Dynamical Systems.

290A. History and Development of Mathematics.
290B. Number Theory.
290C. Algebra.
290D. Logic.
290E. Geometry.
290F. Topology.
290G. Analysis.
290H. Differential Equations.
290I. Functional Analysis.
290J. Applied Mathematics.
290K. Probability.
290L. Dynamical Systems.
290M. Mathematics.
290N. Combinatorics.
290O. Cryptography.
290A-296N. Participating Seminars. (1 each) Seminar, two hours. Seminars and discussion by staff and students. S/U grading.

296A. History and Development of Mathematics.
296B. Number Theory.
296C. Algebra.
296D. Logic.
296E. Geometry.
296F. Topology.
296G. Analysis.
296H. Differential Equations.
296I. Functional Analysis.
296J. Applied Mathematics.
296K. Probability.
296L. Dynamical Systems.
296M. Mathematics.
296N. Combinatorics.
307A-370B. Teaching of Mathematics. (4-4) Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Limited to senior Mathematics Department majors. Course 370A is required to 370B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from a problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.
**Upper Division Courses**

110. Parallel and Distributed Computing. (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Requisite: course 10A. Topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

**Graduate Courses**

285C-285L. Seminars. (4 each) Seminar, three hours. Topics in various computational fields by means of lectures and informal conferences with staff members. S/U or letter grading.

285C. Computational Algebra.

285D. Logic and Theory of Computation.

285K. Randomness and Computation.

285L. Computational Statistics.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

**Scope and Objectives**

The Mathematics/Atmospheric and Oceanic Sciences B.S. degree program is designed for students who have an interest in and talent for both subjects. Students completing the major are well-qualified for graduate study in the most demanding graduate programs in atmospheric sciences, oceanic sciences, or applied mathematics. Postgraduate training leads to employment at a professional level in academia, government, or private enterprise. Opportunities for employment outside academia include environmental agencies, consulting companies, and governmental agencies such as NASA, National Oceanic and Atmospheric Administration (NOAA), National Center for Atmospheric Research (NCAR), Department of Energy (DOE), and the military, the Air Force and Navy in particular.

Graduates of the program are employed by private and public weather products firms, consulting companies, public utilities, and as science teachers at the elementary and secondary levels.

**Undergraduate Study**

**Mathematics/Atmospheric and Oceanic Sciences B.S.**

**Preparation for the Major**

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, 1C, Program in Computing 10A, and two courses selected from Atmospheric and Oceanic Sciences 1, 2, 3, 5. Physics 4AL and 4BL are recommended but not required. Chemistry and Biochemistry 14A and 14B (or 20A and 20B) may also be required, depending on atmospheric and oceanic sciences upper division course selection. Each course must be taken for a letter grade and must be passed with a grade of C- or better, and students must have a minimum overall grade-point average of 2.0 for the courses.

**Transfer Students**

Transfer applicants to the Mathematics/Atmospheric and Oceanic Sciences major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, physics courses equivalent to Physics 1A, 1B, and 1C, and one C++ programming course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.
the parts of economics that emphasize the use of mathematics and statistics. It is ideal for students who may wish to complete a higher degree in economics.

**Undergraduate Study**

**Mathematics/Economics B.S.**

**Preparation for the Major**

**Required:** Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Economics 1, 2, 11, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

**Transfer Students**

Transfer applicants to the Mathematics/Economics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one introduction to discrete structures course, two principles of economics courses, one microeconomic theory course, and one C++ programming course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Seven mathematics/statistics courses, including Mathematics 115A, 131A, 170A or Statistics 100A, 170B or Statistics 100B, two courses from Mathematics 110A (or 117), 164, 167, and 174, and one additional course from Mathematics 110B through 199 and Statistics 100C, 101B, and 101C; six economics courses, including Economics 101, 102, three courses from 103, 141A through 148, and Mathematics 174, and one additional course from Economics 103 through 199B.

The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the six courses from the Economics Department.

**Honors Program**

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the preparation for the major courses with an overall grade-point average of 3.5 or better.

To qualify for honors at graduation, students must (1) complete Mathematics 110BH or 131BH, and 115AH, (2) prepare a senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 198A and 198B, and (4) complete the major requirements with at least a 3.5 GPA in the mathematics and economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

**Computing Specialization**

Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the major and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 20A, 20B, 30, 40A, 60, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Mathematics Department Student Services Office). Students graduate with a bachelor’s degree in mathematics/economics and a specialization in Computing.

**Scope and Objectives**

The Department of Mechanical and Aerospace Engineering offers curricula in aerospace engineering and mechanical engineering at both the undergraduate and graduate levels. The scope of the departmental research and teaching program is concerned with the design and control of advanced and experimental aerospace systems, their applications, and the control and utilization of energy. The aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing aircraft used for air
Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

The Major

Required: Mechanical and Aerospace Engineering 101, 102, 103, 105A, 105D, 107, 131A or 135A, 156A, 157, 162A, 162B, 162M, 171A, 182A, 183; two departmental breadth courses (Electrical Engineering 100 and Materials Science and Engineering 104 — if one or both of these courses are not required) from an approved list available in the Office of Academic and Student Affairs; and two major field elective courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; and two major field elective courses (8 units) from Mechanical and Aerospace Engineering 131A (unless taken as a required course), 131AL, C132A, 133A (unless taken as a required course), 133AL, 134, 135, 136, CM140, 150A, 150B, 150C, C150G, 150P, 150R, 153A, 155, 157A, 161A, 161B, 162C, 163A, 163C, M168, 169A, 171B, 172, 174, CM180, CM180L, 181A, 182B, 182C, 184, 185, 186, C187L.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website.

Graduate Degrees

The Department of Mechanical and Aerospace Engineering offers the Master of Science in Engineering (M.S.) degree in Manufacturing Engineering, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Aerospace Engineering, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Mechanical Engineering.

Mechanical and Aerospace Engineering

Lower Division Courses

94. Introduction to Computer-Aided Design and Drafting. (4) Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more online computer systems to design and display various objects. Letter grading.

Upper Division Courses

102. Dynamics of Particles and Rigid Bodies. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Required: course 101, Mathematics 33A, Physics 1A. Fundamental concepts of Newtonian mechanics. Kinematics and kinetics of particles and rigid bodies in two and three dimensions. Impulse-momentum and work-energy relationships. Applications. Letter grading.

103. Elementary Fluid Mechanics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Required: Mathematics 32B, 33A, Physics 1B. Introductory course dealing with applications of principles of mechanics to flow of compressible and incompressible fluids. Letter grading.

105A. Introduction to Engineering Thermodynamics. (4) Formerly numbered M105A.) Lecture, four hours; discussion, two hours; outside study, six hours. Required: Chemistry 20B, Mathematics 32B. Non-mathematical thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

107. Introduction to Modeling and Analysis of Dynamic Systems. (4) Lecture, three hours; discussion, one hour; laboratory, two hours; outside study, four hours. Required: Computer Science 31, Electrical Engineering 100. Introduction to modeling of physical systems, with examples of mechanical, fluid, thermal, and electrical systems. Description of these systems with coverage of impulse response, convolution, frequency response, first- and second-order systems transient response analysis, and numerical solution. Nonlinear differential equation descriptions with discussion of equilibrium solutions, small signal linearization, large signal response, block diagram representation and response of interconnections of systems. Hands-on experiments reinforce lecture material. Letter grading.

131A. Thermodynamics and Heat Transfer Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 131A, and 157 or 157S. Experimental study of physical phenomena and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of cooling tower heat exchange, and internal combustion engine. Students take and analyze data and discuss physical phenomena. Letter grading.

133A. Engineering Thermodynamics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Math 20A, Math 20B. Application of first and second law of thermodynamics to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive flow. Letter grading.

133AL. Power Conversion Thermodynamics Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 133A, and 157 or 157S. Experimental study of power conversion and heat transfer systems. Fluid plant process instrumentation and equipment. Experiments include studies of thermodynamic operating characteristics of actual Brayton cycle, Rankine cycle, compressive refrigeration unit, and absorption refrigeration unit. Letter grading.

134. Design and Operation of Thermal Hydraulics Power Systems. (4) Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: courses 133A, 133AL. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems. Letter grading.

135. Fundamentals of Nuclear Science and Engineering. (4) Lecture, four hours; discussion, two hours; outside study, seven hours. Requisites: Chemistry 20A, Mathematics 33B. Review of nuclear physics, radioactivity and decay, and radiation interaction with matter. Nuclear fission and fusion processes and mass defect, chain reactions, criticality, neutron diffusion and multiplication, heat transfer issues, and applications. Introduction to nuclear power plants for commercial electricity production, space power, spacecraft propulsions, nuclear fusion, and nuclear science for medical uses. Letter grading.

136. Energy and Environment. (4) Lecture, four hours; outside study, eight hours. Requisite: course 105D. Recommended: courses 131A, 133A. Global energy use and supply, electrical power generation, fossil fuel and nuclear power plants, renewable energy such as hydropower, biomass, geothermal, solar, wind, and wave. Materials, cells, transportation, energy conservation, air and water pollution, global warming. Letter grading.

CM140. Introduction to Biomechanics. (4) Same as Biomedical Engineering CM140. Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 101, 102, 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and analysis. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM240. Letter grading.

150B. Aerodynamics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 103, 105A. Advanced concepts of potential flow theory. Incompressible flow around thin airfoils (lift and moment coefficients) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl-Meyer expansion. Linearized supersonic and transonic flow around thin airfoils and wings. Variable shock wave. Transonic flow. Letter grading.

150C. Combustion Systems. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 105A. Chemical thermodynamics of ideal gas mixtures, premixed and diffusion flames, explosions and detonations, combustion chemistry, high explosives. Combustion processes in rocket, turbine, and internal combustion engines; heating applications. Letter grading.

C150G. Fluid Dynamics of Biological Systems. (4) (Formerly numbered 150D.) Lecture, four hours; outside study, one hour. Requisites: course 150A. Fluid mechanics of aquatic locomotion; insect and bird flight aerodynamics; pulsatile flow in circulatory system; rheology of blood; transport in microrcirculation; role of fluid dynamics in arterial diseases. Concurrently scheduled with course C250G. Letter grading.

150P. Aircraft Propulsion Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 103, 105A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

150R. Rocket Propulsion Systems. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 103, 105A. Rocket propulsion concepts, including chemical rockets (liquid, gas, and solid propellants), hybrid rocket engines, electric (ion, plasma) rockets, nuclear rockets, and solar-powered vehicles. Current issues in launch vehicle technologies. Letter grading.

154A. Preliminary Design of Aircraft. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 154S. Classical preliminary design of aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of low-speed aircraft. Letter grading.

154S. Flight Mechanics, Stability, and Control of Aircraft. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of aircraft. Effects of airplane flexibility on stability derivatives. Letter grading.

155. Intermediate Dynamics. (4) Lecture, four hours; discussion; two hours; outside study, six hours. Requisite: course 102. Axioms of Newtonian mechanics; general coordinate systems, Lagrange equations; variational principles; central force motion; kinematics and dynamics of rigid bodies. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinate expansion, conservation of energy. Letter grading.

156A. Advanced Strength of Materials. (4) Lecture, four hours; discussion; two hours; outside study, six hours. Requisites: courses 101, 182A. Not open to students with credit for course 168A. Torsion, stress, strain, and material behavior. Stressors in loaded beams with symmetric and asymmetric cross sections. Torsion of cylinders and thin-walled structures, shear flow. Stresses in beams with variable cross-section and shrink-fit problems, rotating shafts. Curved beams. Contact stresses. Strength and failure, plastic deformation, fatigue, elastic instability. Letter grading.

157. Basic Mechanical Engineering Laboratory. (4) Laboratory, four hours; outside study, eight hours. Requisites: courses 101, 103, 105A, 105D, Electrical Engineering 100. Methods of measurement of basic quantities and performance of basic experiments in heat and mass transfer, fluid mechanics, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis. Letter grading.

159. Fluid Mechanics and Aerodynamics Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 150A, 150B, and 157 or 157S. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as understand the relationship of experimental programs and use of modern experimental tools and techniques in field. Letter grading.

157S. Basic Aerospace Engineering Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 101, 102, 103, 105A, Electrical Engineering 100. Recommended: course 15. Measurements of basic physical quantities in fluid mechanics, aerodynamics, and structures. Operation of primary transducers, computer-aided data acquisition, signal processing, and data analysis. Performance of experiments to enhance understanding of basic physical principles and clear understandings of structures/systems of relevance to aerospace engineering. Letter grading.

161A. Introduction to Astronautics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 151A. Spacecraft engines: course 182A. Space environment of Earth, trajectories and orbits, step rockets and staging, two-body problem, orbital transfer and rendezvous, problem of three bodies, elementary perturbation theory, influence of Earth's oblateness. Letter grading.

161B. Introduction to Space Technology. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended preparation: courses 102, 150P, 161A. Propulsion requirements for typical space missions, thermochromy of propellants, internal ballistics, regenerative cooling, liquid propellant feed systems, POGO instability. Electric propulsion. Multistage rockets, separation dynamics, Satellite structures and materials, loads and vibrations. Thermal control of spacecraft. Letter grading.

161C. Spacecraft Design. (4) Lecture, four hours; outside study, eight hours. Requisite: course 161B. Coverage of preliminary design by students, of small spacecraft carrying lightweight scientific payload with modest requirements for electric power, lifetime, and altitude stability. Students work in groups of three or four, with each student responsible primarily for one subsystem and for integration with whole. Letter grading.

161D. Space Technology Hardware Design. (4) Lecture, two hours; laboratory, three hours; outside study, seven hours. Recommended:quisite or corequisite: course 161B. Design, by students, of hardware with applications to space technology. Designs are then built by HSSEAS professional machine shop and tested by students. New project carried out each year. Letter grading.

162B. Mechanical Product Design. (4) Lecture, two hours; laboratory, six hours; outside study, six hours. Requisites: courses 94, 156A, 162A, 183, Electrical Engineering 110L. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project. Letter grading.

162C. Electromechanical System Design Laboratory. (4) Lecture, four hours; laboratory, eight hours; outside study, three hours. Requisite: course 162B. Laboratory and design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. Assembled machine is instrumented and monitored for operational performance. Letter grading.

162M. Senior Mechanical Engineering Design. (4) Lecture, four hours; laboratory, six hours; outside study, five hours. Requisites: courses 131A or 133A, 162B, 171A. Must be taken in last two academic terms of students' programs. Analytical course of large engineering system. Design factors include functionality, system reliability, safety, economics, reliability, aesthetics, and social impact. Final report of engineering specifications and drawings to be presented by design teams. Letter grading.

163. Introduction to Computer-Controlled Machines. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite or corequisite: course 171A. Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall electromechanical systems. Motion and command generation, servo-controller design, and computer/machine interaction. Letter grading.

166A. Analysis of Flight Structures. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: courses 101, 102A. Not open to students with credit for course 156A. Introduction to two-dimensional and three-dimensional statics, trusses, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections; shear flow, shear-lag; combined bending torsion of thin-walled, stiffened in aerostatic and other vehicles; elements of plate theory; buckling of columns. Letter grading.

166C. Design of Composite Structures. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites. Letter grading.

161H. Introduction to Finite Element Methods. (4) (Formerly numbered 161B.) (Same as Civil Engineer- ing 135SC.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 156A or 166A or Civil Engineering 130. Introduction to basic concepts of finite element methods (FEM) and applications to structural and solid mechanics and heat transfer. Direct matrix structural analysis; weighted residual, least squares, and Ritz approxima- tion methods; convergence properties; isoparametric formulation of multidimensional heat flow and elasticity; numerical integration. Practical use of FEM software; geometric and analytical modeling; preprocessing techniques; term projects with computers. Letter grading.

171A. Introduction to Feedback and Control Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 107, and 181A or 182A. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and control methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Letter grading.

172. Control System Design Laboratory. (4) Laboratory, four hours; outside study, four hours. Requisite: course 171A. Application of frequency domain design techniques for control of mechanical systems. Successful controller design requires students to for- mulate performance specifications, analyze a problem, experimentally identify mechanical systems, and de- velop uncertainty descriptions for design models. Ex- ploration of issues concerning model uncertainty and sensor/actuator plant models. Students implement con- trol designs on flexible structures, rate gyroscopes, and inverted pendulum. Detailed reports required. Letter grading.

174. Probability and Its Applications to Risk, Reliabil- ity, and Quality Control. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requ- isite: Mathematics 33B. Introduction to probability theory; random variables, distributions, functions of random variables, distribution of components, reliability, redundancy, complexity, systems, stress- strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling. Letter grading.

CM180. Introduction to Micromachining and Microelec tromechanical Systems (MEMS). (4) (Formerly numbered M180.) (Same as Biomedical Engineering 150 and Electrical Engineering 150.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20A, 20L, Physics 1A, 1B, 1C, 4AL, 4BL. Corequisite: course CM180L. Introduction to micromachining technolo- gies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Students design processes capable of achieving desired MEMS device. Concurrently scheduled with course CM280A. Letter grading.

CM180L. Introduction to Micromachining and Micro- electromechanical Systems (MEMS) Laboratory. (2) (Formerly numbered M180L.) (Same as Biomedical Engineering 150L and Electrical Engineering 150L.) Lecture, one hour; laboratory, four hours. Prerequisite: CM180 or 180L. Laboratory in preparation of hands-on experiences for CM180. Hands-on introduction to microma- chining technologies and microelectromechanical systems (MEMS) laboratory. Methods of microma- chining and how these methods can be used to pro- duce variety of MEMS, including microstructures, mi- croensors, and microactuators. Students go through process of fabricating MEMS device. Concurrently scheduled with course CM280L. Letter grading.

181A. Complex Analysis and Integral Transforms. (4) Lecture, four hours; outside study, eight hours. Requisites: course 181B. Introduction to complex analysis, analytic functions, conformal mapping, contour integrals, singularities, poles, Cauchy integrals, Laplace trans- form: properties, convolution, inversion; Fourier trans- form: properties, convolution, FFT, applications in dy- namics, vibrations, structures, and heat conduction. Letter grading.

182C. Numerical Methods for Engineering Applications. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 107, 181A or 182A. Introduction to numerical solution of initial and boundary value problems and ordinary and partial differential equa- tions. Letter grading.

185. Introduction to Radio Frequency Identification and Its Application in Manufacturing and Supply Chain. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 162B, Computer Science 31. Manufacturing today requires that allows information about product status to be writ- ten, stored, and transmitted wirelessly. Tag data can then be retrieved by readers using software transmitted by way of RFID middleware layer. Study of how RFID is being utilized in manufacturing, with focus on automo- tive and aerospace. Letter grading.

C187L. Nanoscale Fabrication, Characterization, and Biotechnology Laboratory. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Multidisciplinary course that introduces laboratory techniques of nanoscale fabrication, characterization, and biotechnology. Basic physical, chemical, and biological principles related to these techniques, top-down and bottom-up (self-assemble) nanofabrication, nanomanipulation, AFM, STM, SEM, etc., and optical and electrochemical biosensors. Students encouraged to create their own ideas in self-designed experiments. Concurrently scheduled with course C297L. Letter grading.

188. Special Courses in Mechanical and Aerospace Engineering. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Special topics in mechanical and aerospace engineering for undergraduates or graduates..Operation on experimental or temporary basis, such as those taught by resident or temporary faculty, such as those taught by resident or temporary faculty; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

194. Research Group Seminars: Mechanical and Aerospace Engineering. (2 to 4) Seminar, two hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. Student presentation of projects in research specialty. May be repeated for credit. P/NP or letter grading.

199. Directed Research in Mechanical and Aerospace Engineering. (1 to 5) Lecture, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

231B. Radiation Heat Transfer. (4) Lecture, four hours; outside study, eight hours. Requisites: course 105D. Radiation theories of materials and radiative energy transfer. Emphasis on fundamental concepts, including energy levels and electromagnetic waves as well as analytical methods for calculating radiative properties and radiation transfer in absorbing, emitting, and scattering media. Applications cover laser-material interactions in addition to traditional areas such as combustion and thermal insulation. Letter grading.

231M. Microscale Energy Transport. (4) Lecture, four hours; outside study, eight hours. Requisite: course 105D. Heat carriers (photons, electronics, phonons, molecules) and their energy characteristics, statistical properties of heat carriers, scattering and propagation of heat carriers, Boltzmann transport equations, derivation of classical laws from Boltzmann transport equations, deviation from classical laws at small scale. Letter grading.

235A. Laser Reactor Theory. (4) Lecture, four hours; outside study, eight hours. Requisite: course 182A. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory. Letter grading.

239B. Seminar: Current Topics in Transport Phe- nomena. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

239F. Special Topics in Transport Phenomena. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change. S/U grading.

239G. Special Topics in Nuclear Engineering. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study in areas of current interest in nuclear engineering such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change. S/U grading.

239H. Special Topics in Fusion Physics, Engineer- ing, and Technology. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced treatment of subjects selected from research areas in fusion science and engineering, such as instabilities in burning plasmas, alternate fusion confinement concepts, inertial confinement fu- sion, fusion-fusion hybrid systems, and fusion reactor safety. May be repeated for credit with topic change. S/U grading.

CM240. Introduction to Biomechanics. (4) Same as Biomedical Engineering CM240. Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 101, 102, 156A. Introduction to mechanical functions of human body; skeletal adaptation to optimize load transport, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM140. Letter grading.

250A. Foundations of Fluid Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Corequisite: course 182B. Development and application of fundamental fluid mechanics at graduate level, with emphasis on incompressible flow. Flow kinematics, basic equations, constitutive relations, exact solutions on the Navier/ Stokes equations, variations, decomposition of flow fields, potential flow. Letter grading.

250B. Viscous and Turbulent Flows. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamental principles of fluid dynamics applied to study of the complex features of fluid motion discussed in order of advancing Reynolds number; wakes, boundary layers, instability, transition, and turbulent shear flows. Letter grading.

250C. Compressible Flows. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Effects of compressibility in viscous and inviscid flows. Steady and unsteady inviscid subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized and hypersonic); shock dynamics. Letter grading.

250E. Spectral Methods in Fluid Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 182A, 182B, 182C, 250A, 250B. Introduction to basic concepts and techniques of various spectral methods applied to solving partial differential equations. Particular emphasis on solving unsteady three-dimensional Navier/Stokes equations. Topics include spectral representation of functions, discrete Fourier transform, etc. Letter grading.

250F. Hypersonic and High-Temperature Gas Dy- namics. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: course 250C. Molecular and chemical description of equilibrium and nonequilibrium hypersonic and high-temperature gas flows, chemical thermodynamics and statistical ther- modynamics for calculation gases, equilibrium flow of real gases, vibrational and chemical rate processes, nonequilibrium flows of real gases, and computational fluid dynamics methods for nonequilibrium hypersonic flows. Letter grading.

C250G. Fluid Dynamics of Biological Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 151B. Introduction to locomotion: insect and bird flight aerodynamics; pustule flow in circulatory system; rheology of blood; transport in microcirculation; role of fluid dynamics in arterial dis- eases; blood flow in arteries. Concurrently scheduled with course C150G. Letter grading.

252A. Stability of Fluid Motion. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. Letter grading.

252D. Combustion Rate Processes. (4) Lecture, four hours; outside study, eight hours. Requisite: course 250C. Kinetics in chemical kinetics: molecular collisions, distribution functions and averaging, semiempirical and ab initio potential surfaces, trajectory calculations, statistical reaction rate theories. Practical examples of large-scale chain mechanisms from combustion chemistry of several elements, etc. Letter grading.

253A. Advanced Engineering Acoustics. (4) Lecture, four hours; outside study, eight hours. Advanced studies in engineering acoustics, including three-di- mensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. Letter grading.

254A. Special Topics in Aerodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B, 182A, 182B, 182C. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. Letter grading.

255A. Advanced Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B, 182A, 182B, 182C. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. Letter grading.

255B. Mathematical Methods in Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 252A. Concepts of stability; state-space interpretation; stability by determinant by simulation, linearization, and Lyapunov direct method; the Hamiltonian as a Lyapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems. Letter grading.

256A. Linear Elasticity. (4) (Same as Civil Engineering M230A.) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 182A, 182B, 182C. Linear elastostatics. Cartesian tensors; infinitesimal strain tensor; Cauchy stress tensor; strain energy; equilibrium equations; linear constitutive relations; plane elastostatic problems, holes, corners, inclusions, cracks; three-dimensional problems; fracture. Basic fracture mechanics, and Cerruti. Introduction to boundary integral equa-

tion method. Letter grading.

256B. Nonlinear Elasticity. (4) (Same as Civil Engineering M230B.) Lecture, four hours; outside study, eight hours. Requisite: course M256A. Kinematics of deformation, material and spatial coordinates, deforma-
tion gradient tensor, nonlinear and linear strain tensors, strain-displacement relations; balance laws; Cauchy and Piola stresses, Cauchy equations of mo-
tion, balance of energy, stored energy; constitutive re-
lations, elasticity, hyperelasticity, thermoeelasticity; in-
earization of field equations; solution of selected problems. Letter grading.

256F. Analytical Fracture Mechanics. (4) Lecture, four hours; outside study, eight hours. Requisite: course M256A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity fac-
tors; engineering applications in stiffened structures, pressure vessels, plates, and shells. Letter grading.

256L. Elastodynamics. (4) (Same as Earth and Space Sciences M224A.) Lecture, four hours; outside study, eight hours. Requisites: courses M256A, M256B. Equations of linear elasticity, Cauchy equa-
tion of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissi-
pative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, non-
destructive evaluation (NDE), and mechanics of earthquakes. Letter grading.

258A. Nanomechanics and Micromechanics. (4) Lecture, four hours; outside study, eight hours. Requisite: course M256A. Analytical and computational modeling methods to describe mechanics of materials at scales ranging from atomistic through microstruc-
ture or transitional and up to continuum. Discussion of atomistic models, discrete systems, molecular dynam-
ics, Langevin dynamics, and kinetic Monte Carlo and their applications at nanoscale. Developments and applications of dislocation dynamics and statistical mechanics methods in areas of nanostructure and mi-
crostructure self-organization, heterogeneous plastic deformation, material instabilities, and failure phe-
nomena. Presentation of technical applications of these emerging modeling techniques to surfaces and interfaces, grain boundaries, dislocations and defects, surface growth, quantum dots, nanotubes, nanoclus-
ters, thin films (e.g., optical thermal barrier coatings and ultrathin nanolayers), (nano)identifica-
tion, smart (active) materials, nanoindenting and mi-
croindenting, and torsion. Letter grading.

259A. Seminar: Advanced Topics in Fluid Me-
chanics. (4) Seminar, outside study, eight hours. Advanced study of topics in fluid mechanics, with extensive student participation involving assign-
ments in research problems leading to term paper or oral presentation (possible help from guest lecturers). Letter grading.

259B. Seminar: Advanced Topics in Solid Me-
chanics. (4) Seminar, four hours; outside study, eight hours. Advanced study in various fields of solid me-
chanics on topics of current interest. Topics include dynamics, elasticity, plasticity, and stability of solids. Letter grading.

260. Current Topics in Mechanical Engineering. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Recommended for graduate mechanical and aerospace engineering students. Lectures, discus-
sions, and student presentations and projects in ar-
eas of current interest in mechanical engineering. May be repeated for credit. S/U grading.

261A. Energy and Computational Methods in Structural Mechanics. (4) Lecture, four hours; out-
side study, eight hours. Requisite: course 156A or 166A. Review of theory of linear elasticity and re-
duced structural theories (rods, plates, and shells). Calculus of variations. Virtual work. Minimum and sta-
tionary variational principles. Variational approxima-
tion methods. Weighted residual methods, weak forms. Static finite element method. Isoparametric el-

261B. Computational Mechanics of Solids and Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 261A. Variational for-
mulation and computer implementation of linear elas-
tic finite element method. Error analysis and conver-
gence. Methods for large displacements, large defor-

262. Mechanics of Intelligent Material Systems. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber-optic strain, stress, and displacement sensors, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, inch-worm, and bi-
morph. Letter grading.

263A. Analytical Foundations of Motion Control-
lers. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: courses 163A, 294. Theory of motion control for modern computer-controlled ma-
chines; multiaxis computer-controlled machines; ma-
cine kinematics and dynamics; multiaxis motion coor-
dination; coordinated motion with desired speed and acceleration; jerk analysis; motion command genera-
tion; theory and design of controller interpolators; mo-
tion trajectory design and analysis; geometry-speed-
sampling time-relationship and control. Letter grading.

263B. Spacecraft Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Recommended: course 255B. Modeling, dy-
namics, and stability of spacecraft; spinning and dual-
spin spacecraft dynamics; spinning and tri-spin dynamics; spinning rocket dynamics; environmental torques in space, modeling and model reduction of flexible space structures. Letter grading.

263C. Mechanics and Trajectory Planning of In-
dustrial Robots. (4) Lecture, four hours; outside study, eight hours. Requisite: course 163A. Theory and implementation of industrial robots. Design con-

263D. Advanced Robotics. (4) Lecture, four hours; outside study, eight hours. Recommended prerequis-
tes: courses 155, 171A, 263C. Motion planning and control of articulated dynamic systems: nonlinear joint control, experiments in joint control and multiaxis co-
ordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and ma-
ipulator design, kinematic redundancies, motion planning of manipulators in space, obstacle avoid-
ance. Letter grading.

M270A. Linear Dynamic Systems. (4) (Same as Chemical Engineering M280A and Electrical Engineering M237A.) Lecture, four hours; outside study, eight hours. Requisites: course 171A or Electrical Engineering 141. State-space description of linear time-invariant (LTI) and time-varying (TV) systems. Stability, controllability, observability, realization, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

M270C. Optimal Control. (4) (Same as Chemical Engineering M280C and Electrical Engineering 240C.) Lecture, four hours; outside study, eight hours. Requisite: course 227A. Optimal control problems for nonlinear systems. Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

M271B. Stochastic Estimation. (4) Lecture, four hours; outside study, eight hours. Requisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators. Letter grading.

M272A. Nonlinear Dynamic Systems. (4) (Same as Chemical Engineering M282A and Electrical Engineering 237A.) Lecture, four hours; outside study, eight hours. Requisite: course 270A or Chemical Engineering 280A or Electrical Engineering 240A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability, Lyapunov (direct and converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

M275A. System Identification. (4) Lecture, four hours; outside study, eight hours. Methods for identification of dynamical systems from input/output data, with emphasis on identification of discrete-time (digital) models of sampled-data systems. Coverage of conversion to continuous-time models. Models identified include transfer functions and state-space models. Discussion of applications in mechanical and aerospace engineering, including microelectromechanical systems, microelectromechanical systems (MEMS) devices, and acoustic ducts. Letter grading.

M276. Dynamic Programming. (4) (Same as Electrical Engineering M273.) Lecture, four hours; outside study, eight hours. Recommended requisite: Electrical Engineering 232A or 236A or 236B. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Examples from inventory theory, finance, optimal control and estimation, Markov decision processes, mathematical optimization, communications. Letter grading.

M277. Advanced Digital Control for Mechatronic Systems. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 171B, M270A. Digital signal processing and control analysis of mechatronic systems. System inversion-based digital control algorithms and robustness properties, Youla parameterization of stabilizing controllers, practical design of digital controllers, real-time control and learning control, and adaptive control. Real-time control investigation of topics to selected mechatronic systems. Letter grading.

M280A. Introduction to Micromachining and Microelectromechanical Systems (MEMS). (4) Formerly numbered M280B. (Same as Biomedical Engineering CM250A and Electrical Engineering CM250A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20A, 20L, Physics 1A, 1B, 1C, 4AL, 4BL. Corequisite: course CM280L. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Students design microfabrication processes currently scheduled with course CM180L. Letter grading.

M282. Microelectromechanical Systems (MEMS) Device Physics and Design. (4) (Same as Biomedical Engineering CM252 and Electrical Engineering M252.) Lecture, four hours; outside study, eight hours. Introduction to MEMS design. Design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and micro-fabrication processes. Computer-aided design for MEMS. Design project required. Letter grading.

CM280L. Introduction to Micromachining and Microelectromechanical Systems (MEMS) Laboratory. (Formerly numbered 280L.) (Same as Biomedical Engineering CM250L and Electrical Engineering CM250L.) Lecture, one hour; laboratory, four hours; outside study, one hour. Requisites: Chemistry 20A, 20L, Physics 1A, 1B, 1C, 4AL, 4BL. Corequisite: course CM280A. Hands-on introduction to micromachining technologies and microelectromechanical systems (MEMS) laboratory. Methods of micromachining and how these methods can be used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Students go through process of fabricating MEMS device. Concurrently scheduled with course CM180L. Letter grading.

CM282L. Microelectromechanical Systems (MEMS) Device Physics and Design Laboratory. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control of micro devices. Letter grading.

CM284L. Sensors, Actuators, and Signal Processing Laboratory. (4) Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/material properties, mechanical characterization. Topics include fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/ fracture) as they apply to MEMS devices. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

M285. Microscale Heat Transfer. (4) Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/material properties, mechanical characterization. Topics include fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/ fracture) as they apply to MEMS devices. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

M286. Molecular Dynamics Simulation. (4) Lecture, four hours; outside study, eight hours. Preparation: computer programming experience. Requisites: courses 182A, 182C. Introduction to basic concepts and methodologies of molecular dynamics simulation. Advantages and disadvantages of this approach for various engineering technologies. Selected topics of interest, especially microscale fluid mechanics, heat transfer, and solid mechanics problems. Letter grading.
295C. Radio Frequency Identification Systems: Analysis, Design, and Applications. (4) Lecture, four hours; outside study, eight hours. Designed for graduate engineering students. Examination of emerging discipline of radio frequency identification (RFID), including basics of RFID, how RFID systems function, design and analysis of RFID systems, and applications to fields such as supply chain, manufacturing, retail, and homeland security. Letter grading.

296B. Thermochemical Processing of Materials. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 183. Thermodynamics, heat and mass transfer, principles of material processing; phase equilibria and transitions, transport mechanisms of heat and mass, moving interfaces and heat sources, natural convection, nucleation and growth, microstructures. Applications with chemical vapor deposition, infiltration, etc. Letter grading.

297. Composites Manufacturing. (4) Lecture, four hours; outside study, eight hours. Requisites: course 166B, Mat. Sci. 151. Matrix materials, fiber preforms, elements of processing, autoclave and compression molding, filament winding, pultrusion, resin transfer molding, automation, material removal and assembly, and metal and ceramic matrix composites, quality assurance. Letter grading.

298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate mechanical and aerospace engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

M299A. Seminar: Systems, Dynamics, and Control Topics. (2) Same as Chemical Engineering M297 and Electrical Engineering M248S.) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow, teaching assistant experience under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours; outside study, four hours. Preparation: appointment as teaching assistant in department. Seminar on communication of mechanical and aerospace engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Chairs
Alan M. Fogelman, M.D. (William S. Adams Professor of Medicine and Castara Professor of Cardiology), Executive Chair
Jan H. Tillisch, M.D., Executive Vice Chair
Mary C. Territo, M.D., Executive Vice Chair, Academic Affairs
Robert K. Oye, M.D., Executive Vice Chair, Clinical Services
Dennis J. Sionon, M.D. (Bowyer Professor of Medical Oncology), Executive Vice Chair, Research

Scope and Objectives
The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught information acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in all four years of medical school, with the third and fourth years constituting a continuous of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

Medicine

Upper Division Courses

M160A. Health Outreach and Education for At-Risk Populations. (4) (Same as Public Health M160A) Lecture, four hours; discussion, two hours. Recommended preparation: M.D., Ph.D., or dental degree. Review and critique of literature and field work in health education in at-risk populations. Field work experience. P/NP or letter grading.

M160B. Health Outreach and Education for At-Risk Populations. (4) (Same as Public Health M160B) Lecture, two hours; discussion, two hours. Requisite: course M160A. Second in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, with field visits. P/NP or letter grading.

M260C. Methodology in Clinical Research III. (4) (Same as Biostatistics M260C) Discussion, four hours. Preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M261. Ethics in Patient-Oriented Research. (2) (Same as Biostatistics M261) Lecture, two hours; discussion, two hours. Discussion of current issues in responsible conduct of clinical research, including research ethics. S/U or letter grading.

M263. Clinical Pharmacology. (2) (Same as Biomathematics M263 and Psychiatry M263) Lecture, two hours. Preparation: completion of professional health sciences degree (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of principles of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeting, gene therapy, and genomics. Letter grading.

M270C. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4) (Same as Biomathematics M270, Biomedical Engineering M270, and Computer Science M296C) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, compartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

M270D. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Biomathematics M270, Biomedical Engineering M270, and Computer Science M296C) Lecture, four hours; outside study, eight hours. Requisite: course M270C or Biomathematics 220. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

M270E. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4) (Same as Biomedical Engineering M296C and Computer Science M296C) Lecture, four hours; outside study, eight hours. Requisite: course M270C. Recommended: course M270D. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research project and final report. S/U or Ph.D.-level project training. Letter grading.

M290A-M290B, Child Abuse and Neglect. (2-2) (Same as Community Health Sciences M245A-M245B, Dentistry M300A-M300B, and Social Welfare M230F-M230G-M203H) Lecture, two hours. Course M290A is requisite to M290B. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of School of Dentistry, Law, Medicine, Nursing, and Public Health and Departments of Education and Psychology, as well as by relevant public agencies. Letter grading.
Scope and Objectives
Microbiology at UCLA is a diverse science that includes bacteriology, virology, immunology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in Microbiology, Immunology, and Molecular Genetics prepare for careers in biomedical research, medicine, dentistry, or other health professions, biotechnology and genetic engineering, industrial microbiology, agricultural or environmental sciences, public health, and law or bioethics, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, microbial pathogenesis, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology, immunology, and molecular genetics at the undergraduate level and depth and training in independent study and research for graduate students.

Undergraduate Study
Microbiology, Immunology, and Molecular Genetics B.S.

Premicrobiology, Immunology, and Molecular Genetics Major
While students are completing the preparation courses for the major, they are classified as Premicrobiology, Immunology, and Molecular Genetics majors.

Preparation for the Major
Life Sciences Core Curriculum
Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 1A, 1B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students
Transfer applicants to the Microbiology, Immunology, and Molecular Genetics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

Students intending to major in Microbiology, Immunology, and Molecular Genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

The Major
Required: Four foundation courses (Chemistry and Biochemistry 153A, Microbiology, Immunology, and Molecular Genetics 101, 103L, 185A); six elective courses selected from Chemistry and Biochemistry 153L, Microbiology, Immunology, and Molecular Genetics 102, 106, 107, 121A, 123, 132, CM156, 168, 198C, 198B; and at least 8 units of general elective courses selected from Biostatistics 100A, Chemistry and Biochemistry 103, 110A, 136, C140, 153B, 153C, 156, CM160A, C161A, 171, C172, C179, C181, Ecology and Evolutionary Biology 121, 135, 137, 162, Epidemiology 100, Human Genetics C144, Life Sciences 100HA, Molecular Cell, and Developmental Biology 100, 120L, 138, M140, C141, 143, 144, 165A, 168, 171, 172, 187A, Neuroscience M101A, M101B, M101C.

Each major course must be taken for a letter grade of C– or better, and students must have a minimum overall grade-point average of 2.0 or better in the major.

Honors Program
Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty adviser from the department. The core of the program consists of Microbiology, Immunology, and Molecular Genetics 198A, 198B, and 198C research, culminating in a thesis. If the thesis is accepted by the honors committee and students complete all major requirements with a GPA of at least 3.5, they are awarded the bachelor’s degree with departmental honors. The department also offers an honors seminar course each Winter Quarter that is required for the honors program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gradnet.ucla.edu/gasaa/library/pgmgrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Microbiology, Immunology, and Molecular Genetics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Microbiology, Immunology, and Molecular Genetics.

Microbiology, Immunology, and Molecular Genetics

Lower Division Courses

6. Microbiology for Nonmajors. (4) Lecture, four hours. Not open for credit to students with credit for course 101 or Life Sciences 2. Designed for non-science students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. P/NP or letter grading.

7. Developments in Biotechnology. (4) Lecture, three hours; demonstration/laboratory, one hour. Recommended preparation: course 6 or Life Sciences 2. Not open for credit to students with credit for course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, waste, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

10. Medical Microbiology for Nursing Students. (4) Lecture, three hours; discussion/laboratory, one hour. Required preparation: course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, waste, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

Upper Division Courses
101. Introductory Microbiology. (4) Lecture, three hours; discussion, one hour. Requires: Life Sciences 3. Historical foundations of microbiology; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Letter grading.
102. Introductory Virology. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 3 with grade of C– or better. Biological properties of bacterial and animal viruses, replication, methods of detection, interactions with host cells and multicellular hosts. Letter grading.

103L. Laboratory Methods in Modern Microbiology and Immunology, Laboratory. Two hours lecture, labo-

104L. Laboratory Methods in Modern Virology. Laboratory. Two hours laboratory, six hours; experiment progression, one hour. Requisites: Life Sciences 3, 4. Recommended requisite or corequisite: course 101. Practical exposure to modern laboratory methods and analytical techniques that are common to many disciplines, including bacteriology, virology, immunology, pathogenesis, parasitology, genetics, genomics, and bioinformatics. Active use and application of scientific method while working collaboratively on interdisciplinary experiments and projects. Students should leave with ability to draw analogies between disciplines and choose most appropriate method to analyze problems within context of new topics. Letter grading.

106. Molecular and Genetic Basis of Bacterial Infections. (4) (Formerly numbered C106.) Lecture, three hours; discussion, one hour. Requisite: course 101. Biological and genetic properties of bacteria that afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resis-

107. Virology. (4) (Formerly numbered C107.) Lecture, three hours; discussion, one hour. Requisites: course 185A. Chemistry 153A. Strongly recommended: course 102. Viral pathogens that infect mammals. Viral entry into and replication in host cells. Host response and host-virus interaction. Pathogenic manifestations exhibited during viral infec-

120. Advanced Techniques in Microbiology. (4) (Formerly numbered C120.) Lecture, one hour; labora-

121A. Microbial Molecular Biology Laboratory. (4) (Formerly numbered 188.) Lecture, two hours; labora-

123. Advanced Annotation and Comparative Genomics. (4) Lecture, two and one half hours; comput-

124. Immunochemistry in Experimental and Clinical Research. (4) Lecture, four and one half hours. Requisite: course 103L or Life Sciences 187A with grade of B– or better. Participation in discovery-based research experience, working as research team to analyze microbial genomes using bioinformatics techniques involving variety of on-

125. Immunology. (5) Lecture, three hours; discussion, one hour. Requisite: course 274, Letter grading.

150. Microbial Parasitology. (4) (Formerly num-

174. Advanced Topics in Molecular Parasitology. (2) Lecture, two hours. Requisites: course 188, Life Sciences 3, 4. Examination of recent advances in molecular biology of parasitic protozoa and its ability to bind to

191H. Honors Research Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature in microbiology, immunology, and molecular genetics field. P/NP grading.

193B. Journal Club Seminars: Microbiology, Immun-

194A. Research Group Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Designed for undergraduate students who are part of research group in department faculty laboratory. Discussion of research methods and current literature in field or of research of faculty members or students. May be repeated for credit. P/NP grading.

194B. Research Group Seminars: UC LEADS and NIH/MARC. (2) Seminar, two hours. Limited to stu-

197. Individual Studies in Microbiology, Immunology, and Molecular Genetics. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject material re-

198A-198B-198C. Honors Research in Microbiol-

Microbiology, Immunology, and Molecular Genetics / 455

C174. Advanced Topics in Molecular Parasitology. (2) Lecture, two hours. Requisites: course 188, Life Sciences 3, 4. Examination of recent advances in molecular biology of parasitic protozoa and its ability to bind to

Microbiology, Immunology, and Molecular Genetics / 455
208. Molecular Biology of Animal Viruses. (4) Lecture, three hours. Preparation: courses in general biochemistry and microbiology, including virology. Recommended for advanced undergraduate students with majors in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, viral replication, and immune suppression of microbial tissue damage. Topics include molecular virology and virologic disease. S/U or letter grading.

M229. Molecular Mechanisms of Host/Pathogen Interaction. (4) (Same as Pathology M229.) Lecture, two hours; discussion, two hours. Preparation: Biophysical Chemistry CM253. Molecular mechanisms of microbial interactions with eukaryotic host cells that result in disease or pathogen survival. Topics include pathogenesis of common viruses, bacteria, fungi, and parasites, basis of toxin-mediated cellular damage, and immune suppression of microbial tissue damage. Letter grading.

CM233. Frontiers in Biotechnology. (4) (Formerly numbered C233.) (Same as Management CM276.) Lecture, three hours. Preparation: Chemistry 153A and 153B, or Life Sciences 3 and 4, with grades of B or better. Integration of science and business in biotechnology. Coevolution with pharmaceutical, agricultural, and other key industries, therapeutics, crop improvement, devices, and other industry sectors. Academic research leading to licensing and founding of companies that turn research breakthroughs into marketable products. Stages of product development and stage. Stage financing and growth; private offerings, public offerings, exits, collaborations, and mergers. Concurrently scheduled with course CM133. S/U or letter grading.

C234. Ethics and Accountability in Biomedical Research. (2) Seminar, two hours. Designed for graduate students and undergraduates who have credit for life sciences or biomedical individual studies 199 course. Responsibility of the scientific community and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, dual relationships, intellectual property, subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course C134. S/U grading.

C240. Cytokines and Reproductive Biology. (2) (Same as Molecular, Cell, and Developmental Biology M240.) Lecture, two hours; discussion, one hour. Overview of current progress on research involving cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

242. Seminar: Microbial Molecular Genetics. (2) Seminar, two hours. Preparation: Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

244. Research Ethics Seminar. (2) Seminar, two hours. Preparation: Discussion and student presentations of recent work in areas of scientific research and regulation of replication, transcription, and translation of viral genome and its complex interaction with the host cell. Letter grading.

250. Seminar: Microbial Metabolism. (2) Seminar, two hours. Preparation: Discussion and student presentations of recent work in areas of scientific research and regulation of replication, transcription, and translation of viral genome and its complex interaction with the host cell. Letter grading.

261. Molecular and Cellular Immunology. (4) Lecture, four hours; Seminar, two hours. Preparation: Biological Chemistry CM253. Strongly recommended corequisite: course 298. Comprehensive course for graduate students and selected undergraduate students covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented by course 298 seminar, with focus on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

274. Advanced Topics in Molecular Parasitology. (2) (Same as Pathology 274) Lecture, two hours. Preparation: Life Sciences 3, 4. Examination of recent advances in molecular biology of parasites and host-parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Concurrently scheduled with course C274. Letter grading.

296. Seminar: Research Topics in Microbiology, Immunology, and Molecular Genetics. (1 to 4) Seminar, two hours; research group meeting, one hour. Preparation: Enrollment of graduate students. Advanced study and analysis of current topics in microbiology, immunology, and molecular genetics. Discussion of current research and literature in areas of particular interest of faculty member teaching course. S/U grading.

298. Current Topics in Microbiology, Immunology, and Molecular Genetics. (2) Seminar, two hours. Preparation: Enrollment of graduate students. Advanced study and analysis of current topics in microbiology, immunology, and molecular genetics. Discussion of current research and literature in areas of particular interest of faculty member teaching course. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Preparation for Teaching Microbiology in Higher Education. (2) Seminar/discussion/laboratory, two hours. Preparation: Design for graduate students. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.

Claudia Rapp, D.Phil., Chair

**Faculty Administrative Committee**

Osman M. Galal, M.D., Ph.D. (Community Health Sciences)

Nouri Gana, Ph.D. (Comparative Literature)

Sharon E. Geratel, Ph.D. (Art History)

Gil Z. Hochberg, Ph.D. (Comparative Literature)

Michael G. Morony, Ph.D. (History)

Claudia Rapp, D.Phil. (History)

Willemina Z. Wendrich, Ph.D. (Near Eastern Languages and Cultures)

**Scope and Objectives**

The major and minor in Middle Eastern and North African Studies (MENAS) offer in-depth knowledge and specialized study of this geographic region, its peoples, and its cultures from the end of antiquity to the present. The program also explores the role and influence of this rich cultural heritage around the world. A strong foundation in history is complemented by a wide selection of courses in art history, geography, Near Eastern languages and cultures, political science, and sociology.

The graduate major in this discipline is called Islamic Studies. For details, see the program by that name earlier in this section.
Undergraduate Study

Middle Eastern and North African Studies B.A.

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish, or the equivalent level of proficiency as determined by admission into a second-year language course (other languages may be substituted by petition); History 9D; and three lower division courses (at least 12 units) with Middle Eastern or North African content selected from Anthropology 8, 9, Comparative Literature 1A, 1B, 1C, 1D, Economics 1, 2, Ethnomusicology 20B, 91L, 91N, Geography 3, History 20, 21, 22, Near Eastern Languages 50A, 50B, 50C, Political Science 20, 50, Sociology 1. Other courses may be substituted by petition, but only with advance approval.

To enter the major, students must be in good academic standing (minimum overall 2.0 grade-point average), have completed 45 units and the requirements for the Preparation for the Major, and attend a mandatory counseling session and file a petition with the academic counselor, 10357 Bunche Hall.

Transfer Students

Transfer applicants to the Middle Eastern and North African Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one course in Middle Eastern and North African history and three additional courses with relevant content (eligibility of courses to be determined at the introductory counseling meeting).

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: At least 11 upper division courses as follows: (1) three courses at the intermediate or advanced level or the equivalent in the Middle Eastern language taken in lower division, or the equivalent level of proficiency as determined by a departmentally administered examination, (2) History 105A, 105B, 105C, and (3) five elective courses, including courses in three different departments and two courses in a single department, to be selected from Anthropology 176, Art History 104A, 104B, C104C, 105E, Economics 110, 111, 112, 120, Ethnomusicology 161L and 161N (both must be taken to equal one 4-unit course), French 121, 160, Geography 135, 187, History 108A, 116A, 116B, 164B, 164C, 167A must be included) and two courses with specific Middle Eastern or North African content. Courses must be selected from Anthropology 176, Art History 104A, 104B, C104C, 105E, Economics 110, 111, 112, 120, Ethnomusicology 161L and 161N (both must be taken to equal one 4-unit course), French 121, 160, Geography 135, 187, History 108A, 116A, 116B, 164B, 164C, 167A, upper division Near Eastern Languages and Cultures nonlanguage courses, Political Science 132A, M132B, 157, 165, Sociology 187.

Other courses may be substituted by petition, but only with advance approval.

No more than 8 to 10 units (two courses) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Middle Eastern and North African Studies Minor

The Middle Eastern and North African Studies minor allows students to select from a broad range of courses in various departments to develop professional and methodological skills with area expertise. The minor enables students with an interest in the region to add dimension to their programs.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 45 units, and file a petition and seek counseling with the academic counselor, 10357 Bunche Hall.

Required Lower Division Courses (8 units): History 9D and one course selected from Anthropology 8, 9, Comparative Literature 1A, 1B, 1C, 1D, Economics 1, 2, Ethnomusicology 20B, 91L, 91N, Geography 3, History 20, 21, 22, Near Eastern Languages 50A, 50B, 50C, Political Science 20, 50, Sociology 1. Other courses may be substituted by petition, but only with advance approval.

Other courses may be substituted by petition, but only with advance approval.

No more than 8 to 10 units (two courses) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Middle Eastern and North African Studies

Upper Division Course

191A. Variable Topics Research Seminars: Middle Eastern and North African Studies. (4) Seminar, three hours. Research seminars on selected topics in Middle Eastern and North African studies. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

Scope and Objectives

The Department of Molecular and Medical Pharmacology has basic and clinical components in which students have opportunities to develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts integrative teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Departmental investigators study the biochemistry and pharmacology of drugs, gene expression and its regulation, signal transduction processes, cell-to-cell communication, viral replication and pathogenesis, autoimmune disease, neuronal development and plasticity, and integrated organ functions using techniques of chemistry and structural biology. DNA microarrays, molecular and cell biology, transgenic and chimeric mice, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Molecular Imaging, Ahmanson Biological Imaging Clinic, and UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interest, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities. Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnets.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Molecular and Medical Pharmacology offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Molecular and Medical Pharmacology.

The department also offers two M.D./Ph.D. programs concurrently with the School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the School of Medicine in order to qualify. The second is the Specialty Training and Advancement Research Program (STAR) in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

The department, together with the Division of Laboratory Animal Medicine, offers Ph.D. or postdoctoral training combined with residency training for veterinarians (with D.V.M. or D.V.M./Ph.D. degrees) in the Veterinary Investigator in Scientific Training and Advancement (VISTA) program.

Note: There is no degree program in pharmacy at UCLA.

Molecular and Medical Pharmacology

Upper Division Courses

M110A. Drugs: Mechanisms, Uses, and Misuse. (4) (Same as Molecular Toxicology M110A.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Life Sciences 2, 3. Course M110A is requisite to 110B. Introduction to pharmacology and toxicology for undergraduate students, emphasizing drug development and mechanisms of action of drugs and toxic agents. Letter grading.

M110B. Drugs: Mechanisms, Uses, and Misuse. (4) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: course M110A, Life Sciences 2, 3. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse. Letter grading.

199. Directed Research in Molecular and Medical Pharmacology. (2 to 8) Tutorial, three hours per week per unit. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200. Introduction to Laboratory Research. (4 to 8) Laboratory, eight to 16 or 16 to 20 hours. Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor reports covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

203. Medical Pharmacology. (2) Lecture, zero to two hours; discussion, zero to four hours. Requisites: courses 211A, 211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutic problems by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. S/U or letter grading.

M205A. Introduction to Chemistry of Biology. (3) (Formerly numbered M205B.) (Same as Chemistry M205A.) Lecture, three hours. Chemical biology teaching language and techniques of biology. Structure of biological molecules, kinetics and thermodynamics of biological systems, catalysis and electron transfer, genomics, proteomics, and metabolomics. S/U or letter grading.

M205B. Issues on Chemistry/Biology Interface. (2) (Same as Chemistry M205B.) Seminar, one hour. Requisite: course M205A. Selected talks and papers presented by training faculty on solving problems and utilizing tools in chemistry and molecular biology on chemistry/biology interface (CBI). S/U grading.

211A-211B. Principles of Pharmacology. (4-2) Lecture, three to eight hours; discussion, zero to nine hours. Preparation: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. S/U or letter grading.

M234C. Laboratory in Toxicological Methods. (2) (Same as Environmental Health Sciences M245 and Molecular Toxicology M245.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxic model to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; developmental biology and neurobiology; nucleic acid biochemistry; gene regulation; immunobiology; microbiology/virology and pathogenesis; molecular evolution and paleobiology; oncogenes and signal transduction; plant molecular biology; protein and enzyme structure and function; genomics; bioinformatics; and structural biology.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Molecular Biology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Biology.

**Preparation for the Major**

**Life Sciences Core Curriculum**

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving grades below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

Transfer applicants to the Molecular, Cell, and Developmental Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferable equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission. Refer to the UCLA Transfer Admission Guide at [http://admissions.ucla.edu/prospect/adm_tr.htm](http://admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required Courses:** Chemistry and Biochemistry 153A, 153L, Molecular, Cell, and Developmental Biology 104, 138 or C141, M140 or 165A, 144 or 165B. Credit for a maximum of two upper division developmental biology courses may be applied toward the major requirements — the first as a required course and the second as elective units. Due to content overlap, students with credit for both courses 165A and 165B cannot receive major credit for course M140.

**Electives:** At least 20 upper division elective units, of which at least 10 must be in courses offered by the department. Any upper division departmental course, except Molecular, Cell, and Developmental Biology 100, 190A, 190B, 190C, 192A, 192B, 193, 194A, 194B, or 199, is acceptable. The following courses outside the department may be taken to satisfy a maximum of 10 units in this category: Biological Chemistry CM153G, Biomathematics 160 or Biostatistics 100A or Statistics 100A, Chemistry and Biochemistry 153C, 156, C159A, C159B, CM160A, Ecology and Evolutionary Biology 110, 121, 146, 162, Human Genetics C144, Life Sciences 100HA or 100HB or 100HC, Microbiology, Immunology, and Molecular Genetics 101, 102, 106, 168, C174, 185A, Physiological Science C126, 166.

**Laboratory:** At least 4 units of upper division laboratory experience selected from Chemistry and Biochemistry 154, Ecology and Evolutionary Biology M158, 162, Life Sciences 100HA or 100HB or 100HC, Microbiology, Immunology, and Molecular Genetics 101 and 101L (both courses must be taken), 102 and 102L (both courses must be taken), Molecular, Cell, and Developmental Biology 150L, 155, 187A, 198A through 198D, 199, 199A through 199D, Physiological Science 166.

A maximum of 12 units of Molecular, Cell, and Developmental Biology 198A through 198D or 199A through 199D and no more than one course from 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.

Any single course may be applied toward only one category within the major (e.g., course C141 may be applied toward the required or elective category but not toward both).

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Majors must earn a C– or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

**Honors Program**

**Admission**

The honors program provides exceptional Molecular, Cell, and Developmental Biology majors with the opportunity to do research culminating in an honors thesis. Junior and senior majors who have completed all university-level coursework, including all preparation courses and requirements for the major with an overall grade-point average of 3.0 or better and a 3.5 GPA or better in the required major courses, may apply for admission to the honors program. Students must have the sponsorship of an approved faculty adviser.

For further information and application forms, students should consult the Student Affairs Office, 2128 Life Sciences, early in their educational planning. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program.

**Requirements**

The core of the program consists of at least one approved undergraduate seminar course from Molecular, Cell, and Developmental Biology 191 and three research courses (12 units minimum) from 196A, 198B, and 198C, culminating in a thesis.

To qualify for graduation with honors, students must satisfactorily complete all requirements for the honors program and the major and obtain at least an overall 3.0 grade-point average and a 3.5 GPA or better in coursework required for the major. On recommendation by the faculty sponsor and with approval of the thesis by
Molecular, Cell, and Developmental Biology / 461

the departmental honors committee, students are awarded no honors, departmental honors, or highest departmental honors.

At the discretion of the departmental honors committee, students who have (1) a GPA of 3.6 or better, both overall and in the major and (2) demonstrated exceptional accomplishment on the research thesis are awarded highest departmental honors.

Computing Specialization

Majors in Molecular, Cell, and Developmental Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186B or Ecology and Evolutionary Biology C159. A grade of C− or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Student Affairs Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Molecular, Cell, and Developmental Biology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Molecular, Cell, and Developmental Biology.

Molecular, Cell, and Developmental Biology

Lower Division Courses

40. AIDS and Other Sexually Transmitted Diseases. (5) Lecture, five and one-half hours; experiential service learning, 30 minutes. Introduction to interdisciplinary debate surrounding personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

50. Stem Cell Biology, Politics, and Ethics: Tearing Apart Issues. (8) Lecture, three and one-half hours; discussion, 90 minutes. Developmental biology of various types of human stem cells. Important functional differences between embryonic, hematopoetic, and adult stem cells, as well as differences in their biomedical potentials. Discussion of history of debate surrounding embryos, as well as various social, ethical, political, and economic aspects of stem cell research. P/NP or letter grading.

60. Biomedical Ethics. (5) Lecture, three hours; discussion, one hour. Examination of importance of ethics in research and exploration of how and why bioethics is relevant to reproductive screening, policy formation, public regulation, and law. Provides foundation in traditional ethics, consideration of subcategories of bioethics, neuroethics, and eugenics, and how to apply ethical reasoning in research and technology. P/NP or letter grading.

70. Genetic Engineering and Society. (4) Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with Bi 5 or Life Sciences 3 or 4. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society. Letter grading.

80. Green World: Plant Biology for Now and Future. (5) Lecture, two and one half hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable clean energy, reclamation of deforested and nutritionally depleted soils, and biological factories to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

140. AIDS and Other Sexually Transmitted Diseases. (5) Lecture, four hours; discussion, two hours. Satisfies premedical requirements. Not open to students with Bi 5 or Life Sciences 3 or 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of variety of plant systems, with focus on developing critical understanding of current research in this field. Concurrently scheduled with course C239. Letter grading.

143. Developmental Biology: Genetic Control of Organismal Development. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/ plant, and plant/herbivore interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C250. P/NP or letter grading.

150L. Plant Communication Laboratory. (4) Formerly numbered 120L.) Laboratory, four hours. Enforced prerequisite: course 138 or 150. Recommended: course 104 or Microbiology 103L or 121A. Introductory plant biology laboratory to give students hands-on experience doing experiments and making their own observations about plant biology. Letter grading.

CM156. Human Genetics. (4) (Same as Human Genetics CM156 and Microbiology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

CM160. Biological Catalysis. (4) (Same as Chemistr CM160.) Lecture, four hours. Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on mechanistic level. Concurrently scheduled with course CM252. Letter grading.

162. Genetic Control of Animal Behavior. (5) Lecture, three hours; discussion, one hour. Enforced requisites: Life Sciences 4, and upper division molecular, cell, and developmental biology or neuroscience courses. How do worms decide whether something smells good or bad? What happens to brain of fruit fly when it is exposed to alcohol? How does fish embryo decide whether to respond to touch by swimming leisurely or rapidly escaping? Behavior of animals, including humans, is controlled by ensembles of neurons that together form neural circuits. Understanding how these circuits function is unifying goal of neurobiology. Physiological techniques have been used in past to investigate logic of neural circuits. Scientists now ask how genes make neural circuits work and use variety of cutting-edge genetic and molecular techniques. Survey of recent primary literature that applies these approaches to three models: olfaction in nematode worms, alcohol-induced behavior in fruit flies, and motor responses in zebrafish. Letter grading.

165A. Biology of Cells. (5) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14D or 30B, Life Sciences 3. Not open for credit to students with credit for course M140. Molecular basis of cellular structure and function, with focus on each individual cellular organelle, as well as interaction of cells with extracellular environment and with other cells. Material presented in context of experimental questions and answers to incorporate concept of scientific method and recent advances in cell biology research. Exposure in discussion to latest research that directly relate to information examined in lectures. Letter grading.

165B. Molecular Biology of Cell Nucleus. (5) Lecture, three hours; discussion, two hours. Requisites: course 165A, Chemistry 14D or 30B, Life Sciences 3. 4. Continuation of course 165A. Molecular biology of eukaryotic cell nucleus, with focus on structure, organization, replication, and repair of eukaryotic genome; eukaryotic gene expression, including transcription, translation, and transport; cell cycle and cancer. Study of advanced specialized topics to allow integrated approach to molecular cell biology. Material presented in context of experimental questions and answers to incorporate concept of scientific method and recent advances in cell biology research. Exposure in discussions to current literature that directly relates to information examined in lectures. Letter grading.

168. Stem Cell Biology. (5) Lecture, three hours; discussion, one hour. Enforced requisites: courses 138, 165A. Strongly recommended: courses 143, 168B (or Microbiology 132), State-of-art education of embryonic and adult stem cells and how these pluripotent/multipotent cells can be used to treat congenital defects, diseases, or injury in humans. Review of current knowledge of differentiation of embryonic stem cells and how they develop into various tissue types. Discussion of adult stem cells in hematopoietic, nervous, and other systems to provide examples of tissue-specific stem cells and their impact in human disease. Examination of various model organisms as examples of how model organisms have helped to discover fundamental principles in stem cell biology. How advances in cell and molecular biology and tissue engineering can be applied to use of stem cells in regenerative medicine. Ethical and legal issues related to stem cell research. Letter grading.

172. Genomics and Bioinformatics. (5) Lecture, three hours; discussion, one hour. Requisite: course 144 or 165B or Chemistry 153B or Microbiology 132. Genomics is study of complete repertoire of molecules in cells. Topics include human and yeast genomes and genetic approaches to study of function of individual genes, fundamental bioinformatics algorithms used to study relationship between nucleotide and protein sequences and reconstruction of their evolution, use of microarray technologies to measure changes in gene expression, analysis of microarray data including clustering and promoter analysis, proteomics techniques including expression and interactions, epigenetic study of DNA methylation and chromatin modification, and systems biology, or computational approaches to integrating varied genomic data to gain more complete understanding of cellular biology. Letter grading.

C174A-C174D. Advanced Topics in Cell and Molecular Biology. (2 each) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recent developments in molecular, cell, and developmental biology. Concurrently scheduled with courses C222A-C222D. Letter grading.

C174A. Molecular Evolution. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, Life Sciences 4. Current developments in field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Letter grading.

M175A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A (14C may be taken concurrently), Life Sciences 2, Physics 1B or 1BH or 6B. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assembles of neurons process complex information and control movement. P/NP or letter grading.

M175B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: course M175A (or Neuroscience M101A or Physiological Science M117A) or Physiology M111A or Physiological Science M111A or Psychology 115. Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M175C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisite: course M175A (or Neuroscience M101A or Physiological Science M117A or Psychology M117A or Physiological Science 111A or Psychology 115). Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

M181. Biological Bases of Psychiatric Disorders. (4) (Same as Neuroscience M130, Physiological Science M181, Psychiatry M181, and Psychology M117J.) Lecture, three hours. Requisite: course M175A (or Neuroscience M101A or Physiological Science M117B or M117A) or Physiological Science 111A or Psychology 115. Not open for credit to students with credit for Physiological Science 111A. Opportunity to participate in research in annotation of sequenced eukaryotic genome. Undergraduate student researchers start research in groups of two as members of course 187 research team, in which students conduct cutting-edge research in genomic biology, biotechnology, and bioinformatics. May not be repeated for credit. Letter grading.

187A. Principles and Practices of Genomic Research. (5) (Formerly numbered Life Sciences 187A.) Lecture, one hour; laboratory, six hours; research group meeting, two hours. Enforced requisite: Life Sciences 4. Course 187A is enforced requisite to 187B, which is enforced requisite to 187C. Not open for credit to students with credit for former Life Sciences 187A. Opportunity to participate in research in annotation of sequenced eukaryotic genome. Undergraduate student researchers start research in groups of two as members of course 187 research team, in which students conduct cutting-edge research in genomic biology, biotechnology, and bioinformatics. May not be repeated for credit. Letter grading.
187B. Principles and Practices of Genomic Research. (4) (Formerly numbered Life Sciences 187B.) Laboratory, six hours; research group meeting, three hours. Enrolled: course 187A or former Life Sciences 187A. Not open for credit to students with credit for former Life Sciences 187B. Designed for undergraduate students interested in continuing their own research projects started in courses 187A and 187B. Opportunity to continue, refine, and complete research on annotation of sequenced eukaryotic genome. Enrolled: undergraduate student researchers mentor incoming students to become successful members of course 187 research team and to participate in reading, discussing, and presenting original published scientific papers in field of genomics. May not be repeated for credit. Letter grading.

187C. Principles and Practices of Genomic Research. (4) (Formerly numbered Life Sciences 187C.) Laboratory, six hours; research group meeting, three hours. Enrolled: course 187B or former Life Sciences 187B. Not open for credit to students with credit for former Life Sciences 187C. Designed for undergraduate students interested in publishing original research started in courses 187A and 187B in leading and coordinating research team. Opportunity to refine, complete, and publish research on annotation of sequenced eukaryotic genome. Advanced experience. Research student researcher also coordinates research team and sets goal for research project plan. May not be repeated for credit. Letter grading.

190A-190B-190C. Joint Research Colloquia. (1-1-1) Seminar, two hours. Enrolled: course 189A or 190B or 190C or 199A or 199B or 199C. Limited to juniors/seniors. Designed to bring together students undertaking supervised research projects in model systems in joint laboratory meeting/seminar setting with one or more additional faculty members whose laboratories are working on related topics. Discussion and presentation of student work or research procedures. Intended to encourage more sophisticated understanding of most current topics in research fields of students or fields using related model organisms. P/NP or letter grading. 190A. Plant Model Systems; 190B. Invertebrate Model Systems; 190C. Vertebrate Model Systems.

191. Variable Topics Research Seminars: Molecular, Cell, and Developmental Biology. (2) Seminar, three hours; laboratory, zero to six hours. Intended for students with strong commitment to pursue graduate studies in molecular, biochemical, physiological, and biomedical fields. Weekly variable topics course with reading, discussion, and presentation of paper selected from current literature. May be repeated once for credit. P/NP or letter grading.

192A. Undergraduate Practicum in Molecular, Cell, and Developmental Biology. (4) Seminar, three hours; laboratory, zero to six hours. Enrolled: junior Life sciences majors. Training and supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative programs under guidance of faculty members in small course settings. Consult Undergraduate Office for further information. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology majors. May not be repeated for credit. P/NP or letter grading.

192B. Undergraduate Practicum: CellLab. (2) Seminar, two hours. Limited to juniors/seniors in any life science major. CellLab provides an advanced supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative programs under guidance of faculty members in small course settings. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology majors. May be repeated for credit. P/NP or letter grading.

193. Journal Club Seminars: Molecular, Cell, and Developmental Biology. (1) Seminar, two hours. Corequisite: course 198A or 198B or 198C or 199 or 199A or 199B or 199C. Limited to juniors/seniors. Development of in-depth understanding of and ability to discuss current literature in field of students' own research. May be repeated for credit. P/NP grading.

194A. Research Group Seminars: Molecular, Cell, and Developmental Biology. (1) Seminar, two hours. Corequisite: course 198A or 198B or 198C or 199 or 199A or 199B or 199C. Limited to juniors/seniors. Involvement in laboratory's weekly research group meeting to encourage student participation in research and to stimulate progress in specific research area. Discussion of specific research methods and current literature in field or of research of faculty members or students. May be repeated for credit. P/NP or letter grading.

194B. Research Group Seminars: Current Topics in Biomedical Sciences. (2) Seminar, two hours. Limited to juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, cell, or biomedical fields. Weekly presentation and discussion of paper selected from current literature. May be repeated for credit. Letter grading.

198A-198B. Honors Research in Molecular, Cell, and Developmental Biology. (4 each) Tutorial, 16 hours. Requisite: course 104. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Development and completion of comprehensive research project in area under direct supervision of approved faculty member to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken for at least 12 units. Individual contract required. In Progress (198A) and letter (198B) grading. Report on progress must be presented to undergraduate adviser each term 198 course is taken, two hours.

199. Special Studies Directed Research in Molecular, Cell, and Developmental Biology. (2 to 4) Tutorial, six to 12 hours. Preparation: submission of written proposal to department for approval by appropriate term deadline. Proposal to be developed in consultation with instructor, outlining research study to be undertaken. Requisites: course 104, Life Sciences 3, 4, 5, and 104. Independent research major may enrol with sponsorship from department faculty members or preapproved outside faculty members. Other junior/senior life sciences majors may enrol only with department faculty sponsors. Supervised individual research under guidance of faculty mentor. Studies to involve laboratory research, not literature surveys or library research. At end of term culminating paper describing progress of project and signed by student and instructor must be presented to department. May be repeated for credit. Individual contract required. Letter grading.

199A-199D. Directed Research in Molecular, Cell, and Developmental Biology. (2 to 4) Tutorial, 12 hours. Preparation: minimum 3.0 grade-point average in major. Requisites: course 104, Life Sciences 3, 4. Course 199A is requisite to 199B, which is requisite to 199C, which is requisite to 199D. Limited to juniors/seniors. Department majors may enrol with sponsorship from department faculty members or preapproved outside faculty members. Other junior/senior life sciences majors may enrol only for research projects in laboratories with department faculty sponsors. Supervised individual research under guidance of faculty mentor. Culminating research project described to broad and deepening understanding of some phase of molecular, cell, and developmental biology. Must be taken for at least 2 terms and for total of at least 8 units. Individual contract required. In Progress (199A) and letter (199B) grading. Students may elect to enrol in additional research through courses 199C and 199D (letter grading). Report on progress must be presented to department each term 199A through 199D course is taken, two hours.

Graduate Courses

M220. Cell, Developmental, and Molecular Neurobiology. (5) (Formerly numbered Neuroscience CM220.) Lecture, six hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurotransmission, development, and neuronal plasticity. Letter grading.

C222A-C222D. Advanced Topics in Cell and Molecular Biology. (2 each) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current research in the life sciences (molecular, cell, and developmental biology). A research and seminar course open to both graduate and advanced undergraduate students. Concentrating on a particular subject. Letter grading.

C222A. Molecular Evolution. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current research in the life sciences (molecular, cell, and developmental biology). A research and seminar course open to both graduate and advanced undergraduate students. Concentrating on a particular subject. Letter grading.

224. Molecular Basis of Vascular Biology. (4) Lecture, four hours. Requisites: Life Sciences 3, 4. Developmental and pathological aspects of vascular biology. Presentation and discussion of key questions of vascular biology with mechanistic viewpoint. Major emphasis on experimental approaches and current research in field. Introduction to several model systems along with presentation of specific topic. Basic information provided as to how this knowledge is obtained in detail using a variety of experimental approaches and model organisms. Letter grading.

228. Prokaryotic and Eukaryotic Gene Systems. (2) Lecture, two hours. Presentations concerning current experimental approaches in study of DNA replication, organization, transcription, and translation. SU or letter grading.

Molecular, Cell, and Developmental Biology / 463
M230B. Structural Molecular Biology. (4) (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure: structures of globular proteins and RNA; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory. (2) (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

M234. Genetic Control of Development. (4) (Same as Biological Chemistry M234.) Lecture, four hours. Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

C239. Molecular Basis of Plant Differentiation and Development. (5) Lecture, three hours; discussion, one hour. Requisites: Life Sciences CM111, CM131, 153. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and presentation of term paper, in addition to other coursework, required of graduate students. Letter grading.

M240. Cytokines and Reproductive Biology. (2) (Same as Microbiology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

242. Topics in Neurobiology. (4) Lecture, three hours. Discussion, one hour. Enforced requisites: Life Sciences 13, 13B. Selected topics from various areas of neurobiology, including mammalian learning and memory, synapses, neurodegeneration, and computational neuroscience. S/U grading.

C250. Plant Communication. (4) Lecture, three hours; discussion, one hour. Enforced requisites: Life Sciences 2C, 2D. Molecular and cellular aspects of plants as static organisms, yet they live in world of symbiosis and community. Plants change atmosphere, enrich soil, and communicate with insects, bacteria, and each other. Earth’s ultimate symbiosis. Just as human brain has re-vealed over time misconceptions about how things work at deeper level, scientists and economists recognize that beyond obvious need to grow above-ground biomass for fuel production, we must better understand how to make that biomass in sustainable manner. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of secondary compounds in plant microbe, plant-plant, and plant-animal interactions; synop-sis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with other course grading.

CM252. Biological Catalysis. (4) (Same as Biological Chemistry CM252, Chemistry CM252, and Pharmacology M252.) Lecture, four hours; requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 13. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmaceuticals and biotechnological agents and artificial enzymes. Drug metabolism and interactions addressed on mechanistic level. Concurrently scheduled with course CM160. Graduate students required to write research paper and present oral report on it. Letter grading.

254. Seminar: Plant Morphogenesis. (2) Seminar, two hours. S/U or letter grading.

255. RNA Editing. (4) Lecture, two hours; discussion, one hour. Preparation: knowledge of molecular biology and molecular genetics. Discussion of diverse set of novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type of editing in trypanosome mitochondria, C to U substitution in apo B mRNA and plant mitochondria, C insertion editing in Physarum mitochondria, etc. Discussion of mechanism, function, and evolution of these phenomena. S/U grading.

CM256. Human Genetics. (4) (Same as Human Genetics CM256 and Microbiology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Application of genetic principles in human populations, with emphasis on cytotgenics, biochemical genetics, population genetics, and family studies. Lectures and readings in literature, with focus on current questions and problems in human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

265A-265B-265C. Seminars: Development, Stem Cells, and Disease Mechanisms. (2-2-2) (Formerly numbered M265A-M265B-M265C.) Seminar, two hours. Enforced requisites: course 138 or 143, Life Sciences 275. Limited to graduate students. Advanced course based on research papers on fundamental cellular mechanisms governing development and disease. Disease results from genetically determined or acquired deficits in cell and molecular processes; analysis of these processes in context of normal development indicates ways of dealing with corresponding disease. S/U grading.

M272. Stem Cell Biology and Regenerative Medicine. (2) Seminar, two hours; discussion, two hours. Designed for graduate students. Presentation of current knowledge of embryonic and adult stem cells and factors that regulate their growth and development. Major emphasis on how advances in cell and molecular biology and tissue engineering can be applied to use of stem cells in regenerative medicine. Biotechnical and legal issues related to stem cell research. S/U or letter grading.

276. Seminar: Molecular Genetics. (2) Seminar, two hours. Topics vary each term. S/U or letter grading.

278. Seminar: Molecular Genetics of Development. (2) Seminar, two hours. Designed for graduate students. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcriptional regulation. S/U grading.

283. Seminar: Topics in Cell Biology. (2) Seminar, two hours. Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include: bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function. S/U or letter grading.

284. Seminar: Structural Macromolecules. (2) Seminar, one hour; discussion, three hours. Preparation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology. Letter grading.

285. Seminar: Plant Development. (2) Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

289. Current Topics in Plant Molecular Biology. (2) Discussion, one hour. Recent research developments in field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

295. Seminar: Molecular, Cell, and Developmental Biology. (2) Seminar, two hours. In-depth surveys of recent developments in molecular, cell, and developmental biology research. Reading and presentation of primary research articles to learn to critically evaluate research papers and to organize and present seminars on specific research topics. S/U or letter grading.

296. Advanced Topics in Molecular, Cellular, and Developmental Biology. (2) Discussion, three hours. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

297. Advances in Molecular Analysis of Plant Development and Plant/Pathogen Interactions. (2) Discussion, two hours. Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant pathogen interactions. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Preparation for Teaching Molecular, Cell, and Developmental Biology in Higher Education. (2) Seminar, two hours. Designed for graduate students. Study of problems and methodologies in teaching molecular, cell, and developmental biology, including workshops, seminars, apprentice teaching, and peer observation. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

Molecular, Cellular, and Integrative Physiology

Interdepartmental Program
College of Letters and Science and David Geffen School of Medicine

James G. Tidball, Ph.D., Chair
Faculty Administrative Committee
Mark A. Frye, Ph.D. (Physiological Science)
David L. Glanzman, Ph.D. (Neurobiology, Physiological Science)
Thomas J. O’Dell, Ph.D. (Physiology)
James G. Tidball, Ph.D. (Pathology and Laboratory Medicine, Physiological Science)
Yibin Wang, Ph.D. (Anesthesiology, Physiology)

Scope and Objectives

Physiology is the study of the functional processes that collectively constitute life. The studies usually employ quantitative analyses of normal life processes, of pathological defects in normal life processes, of model systems to clarify and test basic physiological principles, and of functional specializations of organisms that have evolved under the influence of differing selective forces. Thus, physiology contributes importantly to advances in knowledge both in the basic biological sciences and in biomedical sciences and provides an essential foundation for the practice of medicine.

The primary objective of the interdepartmental Molecular, Cellular, and Integrative Physiology Program is to train a new generation of physiologists who apply modern knowledge in molecular and cellular biology and systems physiology to important questions in organismic function. Students learn to conceptualize physiological questions across several levels of organization and to understand how research strategies incorporating each of the levels of analysis can be formulated. This approach to physiology education is responsive to the need for physiologists who can intellectually and technically span disciplines related to physiology that are typically separated.

Coursework consists of formal instruction in the most current information in molecular biology, cell biology, and the molecular and cellular foundations of physiology. In addition, students identify an area of emphasis in biophysics, cellular and molecular biology, or integrative/comparative physiology in which additional studies are pursued. The heart of the program, however, is the research that leads to the dissertation, which is performed under the guidance of a faculty mentor. The program faculty includes more than 60 professors in the David Geffen School of Medicine and College of Letters and Science. Collectively they have been recently ranked by the National Research Council in the top five in the U.S. for their quality as an academic faculty.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detail for each topic may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Molecular, Cellular, and Integrative Physiology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular, Cellular, and Integrative Physiology.

Molecular, Cellular, and Integrative Physiology

Graduate Courses

M200G. Biology of Learning and Memory. (4) (Same as Neurobiology M200G, Neuroscience M220, and Psychology M208.) Lecture, four hours. Molecular, neural circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

M215. Cellular and Molecular Foundations of Physiology. (5) (Same as Physiological Science M215.) Lecture, three hours; discussion, two hours. Application of molecular and cellular approaches to systems level questions. Basic foundation for study of major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

249. Seminar: Pathogenic Mechanisms in Muscle Disease. (2) Seminar, two hours. Recent advances have been made in genetic identification of molecular basis of muscle disease, and some mechanisms involved have been elucidated. Focus on muscle diseases in which substantial mechanistic information has been obtained, including particular cellular localizations and diseases associated with those locations. Topics include Duchenne muscular dystrophy, congenital muscular dystrophy, limb girdle dystrophy, Ullrich myopathy, and other forms of genetically inherited muscle disease. S/U grading.

290A-290B-290C. Tutorials. (4-4-4) Tutorial, two hours. Discussion, analysis, and critique of original research literature. Letter grading. 290A. Cellular and Molecular Physiology; 290B. Biophysics; 290C. Integrative and Comparative Physiology.

296. Research Seminar. (2) Seminar, to be arranged. Review of literature, discussion of original research, and analysis of current topics in molecular, cellular, and integrative physiology. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 10) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 10) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 10) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

Oliver Hankinson, Ph.D., Chair
Faculty Administrative Committee
Jesús Arauzo, Ph.D. (Medicine)
Michael D. Collins, Ph.D. (Environmental Health Sciences)
Curtis D. Eckert, Ph.D. (Environmental Health Sciences)
Hilary A. Godwin, Ph.D. (Environmental Health Sciences)
Oliver Hankinson, Ph.D. (Pathology and Laboratory Medicine)
David E. Krantz, M.D., Ph.D. (Psychiatry and Biobehavioral Sciences)
Robert H. Schiestl, Ph.D. (Pathology and Laboratory Medicine)

Scope and Objectives

Faculty from a variety of departments and schools at UCLA, including Biological Chemistry, Chemistry and Biochemistry, Environmental Health Sciences, Epidemiology, Medicine, Molecular and Medical Pharmacology, and Pathology and Laboratory Medicine, have joined forces to create an interdisciplinary Ph.D. program in Molecular Toxicology that is administered through the School of Public Health. Specialties within the program include, but are not limited to, neurotoxicology, immunotoxicology, reproductive and developmental toxicology, genetic toxicology, toxicokinetics and metabolism, genetics and molecular biology, carcinogenesis, and environmental toxicology. There is a particular emphasis on mechanisms of toxicity, since it is now widely accepted that understanding mechanisms will provide the means for accurately determining risk.
New chemicals have been the basis for most of the technological developments during the past century, and there is no question that society has reaped enormous benefits from the creation and growth of the chemical industry. However, major health and environmental problems have also been the legacy of the synthesis of new chemical species. The discipline of toxicology, which seeks to characterize and elucidate the mechanisms of the problems related to exposure of chemical agents, has also developed from a purely descriptive to a mechanistic science whose objective is to understand the basis of toxic action, predict the toxicity of new chemical entities, and protect organisms from them. Toxicology has used the basic disciplines of chemistry, biochemistry, and cell biology to advance understanding of toxicological phenomena, and the growth of the sophistication of toxicology has paralleled the increase in knowledge derived from the basic chemical and biological sciences.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Molecular Toxicology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Toxicology.

Molecular Toxicology

Upper Division Courses

M110A. Drugs: Mechanisms, Uses, and Misuse. (4) (Same as Pharmacology M110A.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Life Sciences 2, 3. Introduction to pharmacology and toxicology for undergraduate students, emphasizing drug development and mechanisms of action of drugs and toxic agents. Letter grading.

197. Individual Studies in Molecular Toxicology. (2 to 4) (Formerly numbered 199.) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

211A-211B-211C. Molecular Toxicology Seminars. (1-1-1) Seminar, one hour twice per month. Seminar series which alternately features outside speakers and members of UCLA molecular toxicology community (students, postdoctoral fellows, and faculty) and deals with topics relevant to molecular toxicology. In Progress (211A, 211B) and S/U (211C) grading.

M241. Introduction to Chemical Pharmacology and Toxicology. (6) (Same as Pharmacology M241.) Lecture, six hours. Preparation: organic and biological chemistry. Designed for molecular and medical pharmacology students. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action. S/U or letter grading.

M245. Laboratory in Toxicological Methods. (2) (Same as Environmental Health Sciences M245 and Pharmacology M234C.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques conducted within known toxin to demonstrate its effects at molecular, cellular, and tissue levels. Preparation: principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

M246. Molecular Toxicology. (4) (Same as Environmental Health Sciences M246.) Lecture, four hours. Enforced requisite: Environmental Health Sciences 240. Fundamental aspects of toxicology required for deep understanding of toxicological processes, with research-oriented outlook. Dissemination of information about important molecular toxicological topics to make students think about them from research perspective. Students learn about cutting-edge research areas of molecular toxicology, how to most optimally extract important information from research papers, how to critique papers, how to formulate alternative hypotheses for data in papers, how to formulate ideas for future research, and how to express their ideas effectively in oral settings. Letter grading.

296A-296G. Research Topics in Molecular Toxicology. (2 each) Research group meeting, two hours. Advanced study and analysis of current topics in molecular toxicology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

296A. Chemical Toxicology.

296B. Molecular Carcinogenesis.

296C. Teratogenesis.

296D. Molecular Topics in Boron Biology.

296E. Germ Cell Cytogenetic/Genetic Biomarkers.

296F. Genetic Toxicology.

296G. Laboratory Analysis.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. Individual guided studies under direct faculty supervision. May not be applied toward degree course requirements. May be repeated for credit. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, four hours. May not be applied toward degree course requirements. May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research. (8 to 12) Tutorial, to be arranged. May not be applied toward degree course requirements. May be repeated for credit. S/U grading.)

Clara Chu, Ph.D. (Information Studies)

Anne J. Gilliland-Swetland, Ph.D. (Information Studies)

Leah A. Lievrouw, Ph.D. (Information Studies)

Steven Ricci, M.A., Ph.D. (Film, Television, and Digital Media)

Scope and Objectives

The Moving Image Archive Studies M.A. is an interdepartmental degree program offered jointly by the Department of Information Studies in the Graduate School of Education and Information Studies and the cinema and media studies faculty of the Department of Film, Television, and Digital Media in the School of Theater, Film, and Television. The program is an intensive, specialized two-year course of study consisting of graduate seminars, directed studies, and an extensive practicum program, as well as special topic screenings, guest lectures, and technical demonstrations. The program is also affiliated with the UCLA Film and Television Archive.

The goal of the program is not merely training, but a broad education grounded in historical, critical, and theoretical study. The subject matter encompasses the aesthetics and history of film and television, the cultural responsibilities of selection and curatorialship, access and programming for the public, collection management, cataloging and documentation, and technical aspects of preservation and restoration. Seminars and practica are taught by a combination of UCLA faculty members, academic scholars, top-level preservationists, and other archives specialists.

The program recognizes that traditional models of archival work have been redefined in recent years to emphasize moving image preservation as an ongoing process of activities along a continuum that includes curatorialship, laboratory preservation, storage management, cataloging, and access. The program encourages familiarity with all these closely related archival functions and provides opportunities for specialization within them.
A key goal is to link theory with practice. The program embraces hands-on practice in archives, libraries, studios, and laboratories in the Los Angeles area, as well as nationally and internationally.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gndt.ucla.edu/gasaalibrary/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree
The Moving Image Archive Studies Program offers the Master of Arts (M.A.) degree in Moving Image Archive Studies.

Moving Image Archive Studies
Graduate Courses
200. Moving Image Archiving: History, Philosophy, Practice. (4) Seminar, four hours. Introduction to historical development of moving image archives. Critical analysis of archival policies regarding collection development, access, exhibition, cataloging, preservation, and restoration. Introduction to principle models and methodologies of moving image archive practices from 1938 establishment of International Federation of Film Archives to the present, addressing practices such as collection development of classical, national, regional, and nonmainstream materials (small gauge formats, independent and amateur productions, new media); changing role of technology in preservation and restoration; ethics of moving image restoration; cataloging standards and documentation systems; classical and alternative models of archive administration and funding; cultural impact of public programming; research and publication supported by moving image archives; access, education, and archival production. S/U or letter grading.

210. Moving Image Preservation and Restoration. (6) Seminar, four hours. Critical analysis of distinct models for archival preservation and restoration of moving image media. Examination and evaluation of current preservation standards for storage and duplication. Discussion of critical preservation problems such as nitrate deterioration, color fading, vinegar syndrome, and irreparable formats. Exploration of case studies of specific restoration projects through critical before and after studies, with focus on crucial ethical issues embedded within each technical and aesthetic decision facing restorers. Of special interest is question of whether it is possible and appropriate to speak of particular schools and/or philosophies of restoration. Range of key issues addressed, such as identification of original versus subsequent and multiple versions and theoretical and practical distinctions between different types of restoration. S/U or letter grading.

220. Archaeology of Media. (4) Seminar, four hours. History of moving image technologies. Examination of relationship between technological evolution and forms of moving image expression. Lectures combined with extensive presentations of full range of analog, video, and digital image types to train students to develop discerning eye required for professionals working in 21st-century moving image archive. In addition to study of specific technical developments such as new gauges, formats, color processes, aspect ratios, films stocks, and projection systems, exploration of larger economic and industrial forces behind them. Study of aesthetic consequences of specific production and exhibition innovations by examining different types of images, genres, and narratives that accompany and influence passage of new technologies. S/U or letter grading.

230. Moving Image Cataloging. (4) Seminar, four hours. Introduction to methodologies and standards specific to moving image cataloging. Discussion and debate of continued application of Library of Congress subject headings and genres to cataloged moving image materials. Exposure to variety of indexing languages used today within online environments and practical application in cataloging principles to motion pictures and television programs. Survey of general theories and alternate documentation practices at work within field as well as specific cataloging rules established by FIAF for local and national moving image archives. Discussion of important issues of public access, exploring various methods and protocols for making collection-related information available through secondary and nonsystematic channels such as study guides, collection profiles, Websites, stand-alone databases, and exhibition catalogs. Letter grading.

240. Collection Development. (4) Seminar, four hours. Analysis of collection development policies for moving image archives and their relationship to archival practices from cataloging to preservation and access. Day-to-day operation of archives involves complex set of interrelated activities, including collection identification and selection; conservation and storage; budget planning and grant writing; staff training, and supervision; and donations, deposit agreements, and application of copyright law. Exploration of these essential tasks and their implications for archives through case studies of moving image archives with distinct collection types, ranging from 35mm narrative to small-format video and digital media. S/U or letter grading.

250. Access to Moving Image Collections. (4) Seminar, four hours. Survey and analysis of policies and procedures used to provide access to moving image collections. Identification and exploration, through lecture and discussion, of three distinct modes of public access: traditional access, public exhibition, and proactive access. S/U or letter grading.

498. Individual Directed Studies: Practicum in Moving Image Archiving. (2 to 8) Seminar, 12 hours. Hands-on experience at entry professional level in archive, library, information center, or media laboratory supervised by one archivist or other appropriately qualified professional and one program faculty member. S/U grading.

596. Directed Individual Study or Research. (2 to 6) Tutorial, four hours. Study or research in areas or subjects not offered as regular courses. S/U or letter grading.

Scope and Objectives
The Department of Music provides undergraduate and graduate training in Western classical music, with concentrations in composition, music education, and performance. The department is aligned with the Departments of Ethnomusicology and Musicology and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and
preparatory training for a broad range of careers in music after students graduate.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group performance. Given in the context of a liberal education, this provides a foundation for an academic or professional career and affords valuable cultural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degrees of Master of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.

Students interested in a concentration in music history and literature should consider the majors in Music History and Musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in Ethnomusicology offered through the School of the Arts and Architecture.

Undergraduate Study

Music B.A.

Admission

All applicants for admission and change of major are required to pass an audition in their principal performing medium.

Preparation for the Major

Required (for all concentrations except music education): Music 20A, 20B, 20C, with grades of C or better; 12 units from courses 60A through 65; two years (12 units) of performance organizations (courses C90A through 90N); Music History 26A, 26B, 26C. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), 90N; students taking keyboard or guitar lessons may choose from C90A through 90N.

Theory: Six courses selected in consultation with a faculty adviser.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Music offers the Master of Music (M.M.) degree, Doctor of Musical Arts (D.M.A.) degree, and Master of Arts (M.A.) degree, and Doctor of Philosophy (Ph.D.) degrees in Music.

Music

Lower Division Courses

1A-1B. Fundamentals of Music. (4-4) Lecture; three hours; discussion; two hours. Designed for nonmusic majors. P/NP or letter grading. 1A. Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. 1B. Requisite: course 1A. Diatonic harmony; four-part writing, including inversions, seventh, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

4A-4B-4C. Basic Musicianship. (2-2-2) Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

5. Beginning Voice Class. (2) Lecture, four hours; outside practical preparation, two hours. Not open to voice majors. Correct singing techniques, including vocal mechanism, posture and breathing, musical warm-ups, optimal vocal production, diction, and performance delivery to be put into practice in classroom study, vocal exercises, and performances. Final recital with piano accompaniment required. May be repeated for maximum of 12 units with a grade of C in each course. Letter grading.

7. Understanding Movie Music. (4) Lecture, four hours; outside study, eight hours. Musical experience helpful, but not required. Brief historical survey of film music, with strong emphasis on recent development: Japanese animation, advertising, and MTV, as well as computer tools and digital scoring methods. Designed to inspire and inform those interested in movie music. Offered in summer only. P/NP or letter grading.

8. Computer-Assisted Sight-Singing Laboratory. (2) Limited to graduate students. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.

10. Computer-Assisted Sight-Singing Laboratory. (2) Lecture, two hours; laboratory, one hour. Requisite: course 1A. Individualized, self-instructional approach for development of sight-singing skills through use of a computer music, keyboard instrument, and linear program learning.

15. Art of Listening. (5) Lecture, three hours; discussion, one hour; outside study, 11 hours. Acquisition of listening skills through direct interaction with live performance, performers, and composers. Relations of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice. P/NP or letter grading.

20A. Music Theory I. (4) Lecture, two hours; discussion, six hours. Preparation: passing score on departmental examination. Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: interval recognition; fixed-do solfeggio; diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-compass, note-against-note melodies; simple rhythmic dictation; use of treble, alto, and bass clefs.

34x71]sic History 26A, 26B, 26C; Ethnomusicologyformance organizations (courses C90A grades of C or better; 12 units from courses education): Required (for all concentrations except music Preparation for the Major principal performing medium. All applicants for admission and change of ma-terion, this provides a foundation for an academic or professional career and affords valuable cul-tural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degrees of Master of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.

Students interested in a concentration in music history and literature should consider the majors in Music History and Musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in Ethnomusicology offered through the School of the Arts and Architecture.

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Music offers the Master of Music (M.M.) degree, Doctor of Musical Arts (D.M.A.) degree, and Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Music.
208. Music Theory II. (4) Lecture, four hours; discussion, four hours. Requisite: course 20A with a grade of C or better. Theory: diatonic harmony through secondary dominants and diminished sev- enth; submediant to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass nota- tion. Musicianship: trial dictation, including sec- ondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic ornamentation; more advanced sight-sing- ing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

20C. Music Theory III. (4) Lecture, four hours; discussion, four hours. Requisite: course 20B with a grade of C or better. Theory: chromatic harmony in- cluding development of tonality, 1800 to 1850; appro- priate analysis and style composition. Musicianship: advanced sight-singing; two-part contrapuntal dicta- tion; keyboard harmony (harmonic sequences in ma- jor and minor keys); reading in open score of four ho- mophonic parts in four clefs.

60A-65. Undergraduate Instruction in Perform- ance. (2each) Studio, one hour. Limited to Music majors (freshmen in Fall and Winter Quar- ters and by jury examination in Spring Quarter. May be repeated for credit. P/NP or letter grading. 60A. Vi- olin; 60B. Viola; 60C. Cello; 60D. String Bass; 60E. Harp; 60F. Classical Guitar; 60G. Viola da gamba; 60H. Lute; 61A. Flute; 61B. Oboe; 61C. Clarinet; 61D. Bassoon; 61E. Saxophone; 62A. Trumpet; 62B. French Horn; 62C. Trombone; 62D. Tuba; 63. Percus- sion. 64A. Piano; 64B. Organ; 64C. Harpsichord; 65. Voice.

80A. Beginning Keyboard. (4) Laboratory, five hours; preparation/practice, seven hours. Simple key- board skills including reading in simple major and minor keys and tutorial materials. Each of courses 114A through 114I. Study of Instrumental and Vocal Tech- niques. (1 each) 114A. Piano; 114B. Organ; 114C. Harpsichord; 114D. Voice.

100C. Chamber Singers. (2) Activity, three hours. Preparation: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all pe- riods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

90D. Opera Workshop. (2) Activity, six hours. Prepa- ration: audition. Rehearsal, performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

90E. Symphony Orchestra. (2) Activity, four hours. Preparation: audition. Group performance of sym- phonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C481. P/NP or letter grading.

90L. Music Theater Workshop. (2) Activity, six hours. Preparation: audition. Rehearsal and perfor- mance of scenes and complete musical theater pro- ductions, including the study of scene realization and composition. May be repeated for credit without limi- tation. P/NP or letter grading.

90M. Marching and Varsity Bands. (2) Activity, four hours. Preparation: audition. Group performance of sports anthems and arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading.

90N. Jazz Ensemble. (2) Activity, three hours. Prep- aration: audition. Group performance of jazz and pop- ular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading.

90P. Alexander Technique. (2) Lecture, four hours; outside preparation and practice, two hours. Limited to Music majors. Introduction to principles of Alexan- der technique. Study of musician’s postural attitude at instrument. Designed to help instrumentalists and voc- ists develop and deliver instruction in K-12 settings. P/NP or letter grading.

104A. Modal Countercritique. (3) Lecture, three hours. Requisite: course 120C (accelerated section). In- depth exploration of styles and techniques of counterpoint of 15th and 16th centuries through writing and analysis of important forms of the period. May be repeated for credit. Letter or P/NP grading.

105A. Orchestration I. (4) Discussion, three hours. Requisite: courses 120C (accelerated section), 123C. Ranges and characteristics of instruments, with exercises in scoring. P/NP or letter grading.

106B. Orchestration II. (4) Discussion, three hours. Requisite: courses 120C (accelerated section), 123C. Scoring and analysis for ensembles and full orchestra. P/NP or letter grading.

110. Learning Approaches in Music Education. (4) Lecture, two hours; activity, two hours. Outside study, eight hours. Introduction to concepts and skills central to teaching music. Exploration of three modes of music learning: learning through notation, oral transmission, and imitation. Study of improvisation and communal composition using clarinet and guitar. Evaluation of experiences in context of major learning theories. Letter grading.

111A. Technology in Music Education I. (1) Labo- ratory, three hours. Requisite: course 20A. Provides music educators with tools and knowl- edge necessary to use appropriate computer hard- ware and software for purposes of music sequencing, arranging, and scoring, with emphasis on applications that are appropriate for use in public and/or private schools for levels K-12 and higher education. Activi- ties include familiarization with computer systems and software, computer-assisted music notation and pub- lication, and development of basis sequencing tech- niques. Letter grading.

111B. Technology in Music Education II. (1) Labo- ratory, three hours. Requisite: course 111A. Introduc- tion to instructional uses of computers. P/NP or letter grading.

114A-114L. Study of Instrumental and Vocal Tech- niques. (1 each) Formerly numbered 114A-114L. Studio, three hours. Requisite or corequisite: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 114A through 114L may be repeated once for credit. Letter grading.

114A. High Strings; 114B. Low Strings; 114C. Flute and Saxophone; 114D. Double Reeds; 114E. Trum- pet and Trombone; 114F. Horn and Tubas; 114G. Snare Drum; 114H. Other Percussion; 114I. Voice.

Upper Division Courses

114A. Modal Countercritique. (3) Lecture, three hours. Requisite: course 120C (accelerated section). In- depth exploration of styles and techniques of counterpoint of 15th and 16th centuries through writing and analysis of important forms of the period. May be repeated for credit. Letter or P/NP grading.

105A. Orchestration I. (4) Discussion, three hours. Requisite: courses 120C (accelerated section), 123C. Ranges and characteristics of instruments, with exercises in scoring. P/NP or letter grading.

106B. Orchestration II. (4) Discussion, three hours. Requisite: courses 120C (accelerated section), 123C. Scoring and analysis for ensembles and full orchestra. P/NP or letter grading.

110. Learning Approaches in Music Education. (4) Lecture, two hours; activity, two hours. Outside study, eight hours. Introduction to concepts and skills central to teaching music. Exploration of three modes of music learning: learning through notation, oral transmission, and imitation. Study of improvisation and communal composition using clarinet and guitar. Evaluation of experiences in context of major learning theories. Letter grading.

111A. Technology in Music Education I. (1) Labo- ratory, three hours. Requisite: course 20A. Provides music educators with tools and knowl- edge necessary to use appropriate computer hard- ware and software for purposes of music sequencing, arranging, and scoring, with emphasis on applications that are appropriate for use in public and/or private schools for levels K-12 and higher education. Activi- ties include familiarization with computer systems and software, computer-assisted music notation and pub- lication, and development of basis sequencing tech- niques. Letter grading.

111B. Technology in Music Education II. (1) Labo- ratory, three hours. Requisite: course 111A. Introduc- tion to instructional uses of computers. P/NP or letter grading.

114A-114L. Study of Instrumental and Vocal Tech- niques. (1 each) Formerly numbered 114A-114L. Studio, three hours. Requisite or corequisite: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 114A through 114L may be repeated once for credit. Letter grading.

114A. High Strings; 114B. Low Strings; 114C. Flute and Saxophone; 114D. Double Reeds; 114E. Trum- pet and Trombone; 114F. Horn and Tubas; 114G. Snare Drum; 114H. Other Percussion; 114I. Voice.
116. Introduction to Conducting. (2) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

117. Study and Conducting of Instrumental and Choral Literature. (2) Lecture, three hours. Requisite: course 116. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature. (2-2) Lecture, one hour; laboratory, two hours. Requisites: courses 116, 117. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. 118A. Choral; 118B. Instrumental.

119. Vocal Techniques for Music Education. (2) Laboratory; three hours, outside study, three hours. Introduction to art of teaching voice, including anato- my of singing instrument, biomechanics of singing, diagno- sis and correction of faults, health and care of voice, and instructional techniques. Letter grading.

120A. Music Theory V. (4) Lecture, four hours; dis- cussion, four hours. Preparation: passing score on departmental first-year examination. Requisite: course 20C with a grade of C (2.0) or better. Theory: baroque counterpoint; early choral polyphonic; two-part invention; exposition and first modula- tion of a three-part invention; canonic principles; analysis of in- ventions, canons, and fugues. Musicianship: sight- singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

120B. Music Theory V. (4) Lecture, four hours; dis- cussion, four hours. Requisite: course 120A with a grade of C (2.0) or better. Theory: advanced chromat- ic harmony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental examination.

120C. Music Theory VI. (4) Lecture, four hours; dis- cussion, two hours; laboratory, two hours. Requisite: course 120B with a grade of C (2.0) or better. Historical approach taken, beginning with the European baroque to the American music theater of today. Technical skills are developed in a series of projects. Letter grading.

121. Special Topics in 20th-Century Music. (4) Lecture, three hours; courses 20A, 20B, 20C, 120A, 120B, 120C. In-depth study of certain as- pects of 20th-century music ranging from individual composers and schools to ideological or stylistic con- cerns. May be repeated once for credit. May be concurrently scheduled with course C222.

122. Speculative Music Theory. (4) Discussion, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

123A-123B-123C. Composition. (4-4-4) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is requisite to 123B, which is requisite to 123C. Designed for composition students. Vocal and instrumental composition in the smaller forms, including style composition and 20th- century techniques. Each course may be repeated once for credit, but first year must be taken in se- quence.

124B. Scoring for Wind Ensemble. (4) Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical applications in scor- ing for large wind ensembles. Preparation and pro- duction of score and parts. May include percussion. At least one reading by UCLA Wind Ensemble sched- uled. Letter grading.

124C. Scoring and Arranging for Choral Ensem- ble. (4) Discussion, three hours. Requisites: 106B, 120C (accelerated section), 123C. Practical applica- tions in scoring and arranging for choral ensembles, including a capella as well as choral works with instru- ments. Preparation and production of score and parts. At least one reading by UCLA Chorale or other choral group scheduled. Letter grading.

M131. Development of Latin Jazz. (4) Same as Ethnomusicology M131. Lecture, four hours; dis- cussion, one hour. Survey of historical and stylistic devel- opment of musical style referred to today as “Latin jazz.” P/NP or letter grading.

136A-136B-136C. Historical Survey of Music The- ater. (4-4-4) Lecture, four hours; discussion, one hour. Historical survey of major works from music thea- ter, tracing development of the art form from its Eu- ropean beginning to the American music theater of to- day. Technical skills are developed in a series of projects. Letter grading.

160A-160B-160C. Music Industry. (4) Lecture, four hours; dis- cussion, four hours; laboratory, three hours. Preparation and production of score and parts. May include percussion. May be concurrently scheduled with course C222.

188. Special Courses in Music. (4) Lecture, three hours; outside study, nine hours. Special topics in mu- sic for undergraduate students taught on experimen- tal or temporary basis. May be repeated for credit. P/ NP or letter grading.

195. Community or Corporate Internships in Mu- sic. (2 to 4) Tutorial, six hours. Limited to juniors/se- niors. Internship in supervised setting in community agencies or businesses. Students will work under the supervision of an instructor and complete an internship report.

197. Individual Studies in Music. (2 or 4) Tutorial, one hour. Preparation: 3.0 grade-point average. Limit- ed to seniors. Individual intensive study in music, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter (research project) required. May be re- peated for maximum of 8 units. Individual contract re- quired. P/NP or letter grading.

Graduate Courses

M201. Repertory and Analysis. (2) Same as Musicology M201.) Seminar, two hours. Requisite or corequisite: Musicology 200A. Exploration of defined repertory through readings and analysis. Specific top- ics vary. May be repeated for credit. SU grading.

202. Analysis for Performers. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of analytical techniques and approaches required for professional performers, includ- ing analysis of form, structure, and style (harmonic and melodic); transcription, small and large forms, theories of musical coher- ence, and understanding of styles. Letter grading.

203. Musical Terminology. (4) Lecture, three hours; outside study, nine hours. Designed for graduate mu- sicology students. Focus on terminology intended to clarify performance and interpretation of vocal and instrumental music in European tradition. Coverage of terms in Italian, French, and German. Letter grading.

204. Music Bibliography for Performers. (4) Lec- ture, three hours; outside study, nine hours. Designed for graduate music performance students. Survey of general bibliographic techniques in music, with em- phasis on materials for performing musicians. Letter grading.

C222. Speculative Music Theory. (4) Discussion, three hours. Designed for graduate music students. Technicals of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

CM182. Music Industry. (4) Same as Ethnomusicol- ogy CM182 and Music History CM186.) Lecture, four hours; dis- cussion, four hours; laboratory, three hours. Preparation and production of score and parts. May include percussion. At least one reading by UCLA Chorale or other choral group scheduled. Letter grading.

CM182. Letter grading.

CM282. Music Industry. (4) Lecture, four hours; media laboratory, one hour. Department graduate music performance students. Exploration of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM182. Letter grading.

250A. Seminar: Composition for Motion Pictures and Television. (6) Seminar, three hours; laboratory, three hours. Focus on task of completing one entire scene for television episode or original student film. Discussion of recent television shows. Composition of one original title song and short cues to someone else's song required. Term assignment involves student orchestration, learning, and performance of work on outside publication and next year's assignment. Pre-approach to scoring for television series to be scored by professional composer. Letter grading.

250B. Seminar: Composition for Motion Pictures and Television. (6) Seminar, three hours; laboratory, three hours. Focus on task of completing one entire scene for television episode or original student film. Discussion of recent television shows. Composition of one original title song and short cues to someone else's song required. Term assignment involves student orchestration, learning, and performance of work on outside publication and next year's assignment. Pre-approach to scoring for television series to be scored by professional composer. Letter grading.

290. Composition Forum. (2) Seminar, two hours. Weekly forum to present professional composers of range of mediums, including large ensemble vocal and/or instrumental works, chamber music, electronic music, and film television, as guest lecturers. Letter grading.

300. Introduction to Orff Schulwerk. (2) Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Intended for teachers of music, church musicians, and music therapists who have had little or no previous experience with Orff Schulwerk. Introduction to Orff Schulwerk, including, and teaching processes of this approach to music instruction for children. Offered in summer only. S/U or letter grading.

S331A-S331B-S331C. Orff Schulwerk Training Courses. (4-4-4) Lecture, four hours; discussion, five hours; laboratory, 15 hours. Requisite: course 330. Course S331A is requisite to S331B, which is requisite to S331C. In-depth courses in teaching of Orff Schulwerk approach to music instruction for children. Students who successfully complete each course are eligible for certification at that level through the American Orff Schulwerk Association. Offered in summer only. S/U or letter grading. S331A. Level I (Beginnings); S331B. Level II (Intermediate); S331C. Level III (Advanced).

341. Conducting for High School and College Band/Wind Ensemble Teachers. (2, 4) Lecture, 25 hours. Comprehensive view of current trends in band/wind ensemble programs, including nonverbal communication, conducting, and rehearsal techniques. Study of new and recently published literature and discography. Required of all band/wind ensemble program. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

S342. Contemporary Marching Band. (1) Lecture, 12 hours. Innovative approaches to marching band programs for high school and college teachers, including creative approaches to charging and drill design and use of microcomputers. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

343. Effective and Creative String Teaching. (2) Lecture, 24 hours. Comprehensive course for teachers of strings. Emphasis on elementary, junior high, and high school levels. Topics include development of instructional techniques for violin, viola, cello, and bass; critical examination of current pedagogical materials; and reading sessions of recently published music for string orchestra. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

S345. Symposium on Art of Choral Music. (2) Lecture, 25 hours. Symposium for college, high school, and junior high school choral directors on development of practical techniques for solving real challenging problems in choral conducting and teaching. Topics include innovative choral methods, choral conducting, vocal pedagogy, voice classification, and survey of standard and current choral literature. Offered in summer only. S/U or letter grading.

350A. Introduction to Computer-Assisted Instruction of Music. (2) Lecture, three hours; laboratory, two hours. Introduction to use of computers in music classroom, with emphasis on practical information necessary to intelligently purchase and implement microcomputers in schools. Coursework to be experienced and reviewed, jargon defined and illustrated, and practical hands-on experience obtained. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

350B. Exploration of MIDI Computer Resources: Keyboards and Synthesizers. (2) Lecture, two hours; laboratory, three hours. Creative use of MIDI-based synthesizers under computer control. Exploration of available hardware resources allied with various software sequencing packages. Use of software for computer-based music printing. Hands-on experience may be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

371. Marching Band in Secondary Education. (2) Study of contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band, as well as historical perspective. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship with active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

401. New Music Forum. (2) Tutorial/laboratory. Preparation: one year of graduate study in music at UCLA. Interactive course in preparation and performance of a premiere work especially composed for a graduate performer or performers by a graduate composer at UCLA.

460A-465. Graduate Instruction in Performance. (5 each) Studio, one hour; performance laboratory/outside study, 17 hours. Limited to graduate performance students. Individual study and preparation of musical literature in area of specialization. May be repeated for credit. Letter grading. 460A. Violin; 460B. Viola; 460C. Cello; 460D. String Bass; 460E. Harp; 460F. Classical Guitar; 460G. Viola da gamba; 461A. Piano; 461B. Saxophone; 461C. Clarinet; 461D. Bassoon; 461E. Saxophone; 462A. Trumpet; 462B. French Horn; 462C. Trombone; 462D. Tuba; 463. Percussion; 464A. Piano; 464B. Organ; 464C. Harpsichord; 464D. Fortepiano; 465. Voice.

596A. Directed Individual Studies in Orchestration and Composition. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

596C. Directed Individual Studies in Music Education. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4) Tutorial, to be arranged. Only 4 units may be applied toward degree requirements. May be repeated for credit. S/U or letter grading.

598. Guidance of M.A. Thesis. (4, 8, or 12) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

599. Guidance of Ph.D. or D.M.A. Dissertation. (4, 8, or 12) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Raymond L. Knapp, Ph.D., Chair
Timothy D. Taylor, Ph.D., Vice Chair

Professors
Raymond L. Knapp, Ph.D.
Susan K. McClary, Ph.D.
Robert M. Stevenson, Ph.D.

Associate Professors
Robert W. Fish, Ph.D.
Elizabeth C. LaGuin, Ph.D.
Desiree L. Leffet, Ph.D.
Mitchell B. Morris, Ph.D.

Assistant Professors
Olivia A. Blochel, Ph.D.
Nina S. Eidsheim, Ph.D.

Scope and Objectives
The Department of Musicology provides students with a broad understanding of the history of music, course study and preparation of final master's recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

472. Master Class in Opera. (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of opera literature. May be repeated for credit. S/U or letter grading.

475. Master Class in Conducting. (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit. S/U or letter grading.

480. UCLA Chorale. (2) Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C90A.

481. Symphony Orchestra. (2) Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C90E. S/U or letter grading.

482. Wind Ensemble. (2) Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C90G.

485. Chamber Ensembles. (2) Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C175. S/U or letter grading.

496. Technology Seminar. (2) Seminar, two hours; laboratory, one hour; outside study, three hours. Introduction to departmental and campuswide technology resources, exploration of applications of technology in education, and development of means of using technology to assess and document teaching competence. S/U grading.

Music history appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The undergraduate program prepares students for graduate programs in music and related fields, and offers training within the broader context of the humanities. The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for qualified students.

Undergraduate Study
Music History B.A.

Admission
The Music History program assumes that students have some musical background before entering UCLA. Although auditions are not required, prospective majors should be sufficiently competent on an instrument or in voice to participate in a performance group, as required by the program.

Preparation for the Major
Required: Music 20A, 20B, 20C, Music History 12W, 26A, 26B, 26C, and 6 units (three terms) of performance organizations selected from Ethnomusicology 91A through 91Z, Music C90A through 90M, or Music History 28A through 28C. Enrollment in Music 20A requires either a minimum score on the Music Theory Placement Examination administered by the Music Department or successful completion of Music 3 (or a comparable year-long college-level music theory sequence). Students with limited musicianship skills may find it useful to enroll in Music 4A, 4B, 4C concurrently with Music 20A, 20B, 20C. Transfer applicants may petition to waive courses 20A, 20B, 20C if they have completed equivalent work prior to enrolling at UCLA.

Transfer Students
Transfer applicants to the Music History major with 90 or more units must complete the following courses prior to admission to UCLA: one year of music theory and one year of music history and analysis. Experience in music performance is strongly recommended. Transfer students are required to take Music History 12W, 26A, 26B, 26C at UCLA.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.
The Major

Required: Music 120A, 120B, 120C, Music History 126A, 126B, 126C, 190, 191T, 193C, 193D; one course from Music History 191A through 191G; one course from 160 through 185; one additional 4- to 6-unit upper division course; and one upper division ethnomusicology course (4 to 5 units). Students may petition to substitute theory or analysis courses in ethnomusicology or music history for one or more of Music 120A, 120B, 120C, as appropriate. Students may enroll in lessons from the Music Department, if instructors are available.

Each course applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable).

Honors Program

The honors program is designed for Music History majors who wish to carry out an extended independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior Music History majors who have completed a minimum of four upper division music history courses with a departmental grade-point average of 3.7 or better and an overall GPA of 3.0 or better are eligible to apply. Normally, the thesis must be completed during Fall Quarter of the senior year. To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.7 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete at least one quarter of Music History 198 (2 units) with a grade of A– or better on the resulting thesis.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.7 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete at least one quarter of Music History 198 (2 units) with a grade of A or better on the resulting thesis.

Music History Minor

The Music History minor provides undergraduates with an overview of music history and the study of music. Students may select from a wide variety of undergraduate courses that range through the history of European and American music.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the department in 2443 Schoenberg Music Building. For further information, contact the department at (310) 206-5187.

Required Lower Division Courses (10 units): Two courses with grades of C or better.

Required Upper Division Courses (18 to 22 units): Music History 193A, 193B, one course from 160 through 185 (6 units), and two additional 4- to 6-unit upper division courses.

No more than two courses may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Musicology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Musicology.

Music History

Lower Division Courses

2. Introduction to Classical Music. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

3. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

4. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

5. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

6. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

7. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

8. History of Electronic Dance Music. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

9. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

11. Writing about Music. (4) Lecture, four hours; laboratory, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Emphasis on learning specific skills, incorporating technical description, historical contextualization, subjective reaction, and certain stylistic conventions necessary in writing about music. Satisfies Writing II requirement. Letter grading.

26A-26B-26C. History and Analysis of Music I. (5-5-5) Lecture, four hours; laboratory, one hour. Course 26A is enforced requisite to 26B, which is enforced requisite to 26C. Students must receive a grade of C– or better to proceed to next course in sequence. History and literature of music from ancient world to 1815, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Letter grading.

28A-28B-28C. Collegium Musicum. (2-2-2) Lecture, three hours. Preparation: ability to read music. Group performance of Western vocal and instrumental music, lecture and laboratory, one hour. Emphasis on music of Western vocal and instrumental music, with special attention to music of the Renaissance and Baroque periods. Letter grading.

60. American Musical. (5) Lecture, four hours; discussion, 90 minutes. Survey of American musical in 20th century, beginning with its roots in opera, vaudeville, and Gilbert and Sullivan, and focusing on its connections to politics, technology, film, opera, and variety of popular musical styles, including Tin Pan Alley, jazz, and rock. P/NP or letter grading.

62. Mozart. (5) Formerly numbered 132.) Lecture, four hours; discussion, one hour. Designed for students who do not read music. Life, works, and mythologies of Wolfgang Amadeus Mozart, in context of both his age and our own. P/NP or letter grading.

63. Bach. (5) Formerly numbered 133.) Lecture, four hours; discussion, one hour. Designed for undergraduate students. Life and works of Johann Sebastian Bach. P/NP or letter grading.

64. Motown and Soul: African American Popular Music of 1960s. (5) Lecture, four hours; discussion, one hour. Survey of developments in post-World War II African American popular music, with special attention to musical achievements of Motown Records, Stax, and other rhythm and blues, funk, and soul music centers of production. Relationships between musical form and cultural issues of 1960s, including Civil Rights Movement, counterculture, black nationalism, capitalism, and separatism, and larger dimensions of African American experience as mediated through groove-based music. P/NP or letter grading.

65. Blues in American Music. (5) Formerly numbered 22.) Lecture, four hours. History of blues, both as specific genre and as range of techniques and approaches that have been at center of American music and culture, from 19th century to present. Exploration of commonly accepted blues mainstream exemplified by figures like Bessie Smith, Robert Johnson, and B.B. King, but also central role blues has played in jazz, folk, country, gospel, rock, soul, and rap. While following evolution of music through 20th century, examination of how blues has served as metaphon for African American culture as it permeates American traditions. P/NP or letter grading.

68. The Beatles. (5) Formerly numbered 4.) Lecture, four hours; discussion, one hour. Examination of life and music of the Beatles within social and historical context of 1960s. P/NP or letter grading.
Upper Division Courses

126A-126B-126C. History and Analysis of Music II. (5-5-5) Lecture, four hours; laboratory, one hour. Required of students who read music and wish to examine music and music-making in 1960s. Letter grading.

137. Gay and Lesbian Perspectives in Pop Music. (5) Same as Women's Studies 137. Lecture, four hours; discussion, one hour. Survey of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular music; methods in feminist and gay/lesbian theory and criticism. Letter grading.

140. Music, Media, and Consumer Society. (4) Lecture, four hours. Consideration of impact of recording technologies (gramophone, tape recorder, Walkman, sampler), broadcast media (radio, television, MTV, Internet), and global capitalism (record labels, advertising, Muzak) on how we consume and are consumed by music. How music functions and malfunctions on records, under movies, behind ads, and in semiotic fabric of everyday life. Letter grading.

162. Selected Topics in Music of Mozart. (6) Seminar, two hours. Preparation: ability to read music and engage in melodic, harmonic, and formal analysis. Enforced corequisite: attendance, but not enrollment, in course 62 lecture. Limited to Music History majors and minors. Intensive discussion of selected pieces by Mozart and other topics important to fuller understanding of his contributory role. Consideration of Enlightenment, as well as contemporary culture. Letter grading.

164. Selected Topics in African American Popular Music of 1960s. (6) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 64 lecture. Intensive discussion of developments in post-World War II African American popular music, with special attention to musical achievements of Motown Records, Stax, and other rhythm and blues, funk, and soul music centers of production. Relationships between musical forms and cultural issues of 1960s, including Civil Rights Movement, counterculture, black nationalism, capitalism, and separatism, and larger dimensions of African American experience as mediated through groove-based music. Letter grading.

166. Medievalism and Music History. (6) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 66 lecture. Exploration of ways in which specific approaches and attitudes to past shape music history, composition, and performance, with special focus on folk music and early music reviv- alists. Letter grading.

168. 1968. (6) Seminar, two hours. Enforced corequi- site: attendance, but not enrollment, in course 68 lec- ture. Exploration of central issues in history and culture of 1960s as they crystallize or are brought out by events of 1968 to understand 1968 not as an iconic year in it- self, but rather to use it as lens for observing cultures of music and music-making in that decade. Letter grading.

172. Selected Topics in Sacred Music. (6) Semi- nar, two hours. Enforced corequisite: attendance, but not enrollment, in course 72 lecture. Introduction to some ways that music has been held to embody, sup- port, and enact sacredness, including experience of god(s), sense of transcendental, work of liturgy, and intersections of music, politics, and religion. Letter grading.

186. CM185. Music Industry. (4) Same as Ethnomusicol- ogy CM182 and Music CM182. Lecture, four hours; outside study, eight hours. Limited to Ethnomusico- logy, Music, and Music History majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music pub- lished in 18th century and continuing through develop- ment of audio media, radio, and other media as well as major genres and technologies. Letter grading.

188. Topics in Music History. (4) Lecture, three hours; laboratory, one hour. Variable topics selected from several outside composers in Western art music. Consult Schedule of Classes for topics to be offered. May be repeated for credit. Letter grading.

190. Research Colloquia in Music History. (1) Seminar, one hour. Designed for senior Music History majors. Designed to bring together students under- taking supervised tutorial research in seminar setting with one or more faculty members to share their work with their peers, as well as act as interlocutors for oth- er course members. Students expected to present their work to class and help critique work of others at similar stage of development. P/ NP grading.

191A. Middle Ages; 191B. Renaissance; 191C. Baroque.

191D. Classic; 191E. Romantic; 191F. 20th Century; 191G. Other Topics.

193A. Music History Journal Club Seminars for Minors. (2) Seminar, two hours. Limited to junior/se- nior Music History minors. Overview of music history as academic discipline: topics to read, attend semina- ris and lectures on current topics in field. Study of music and its history under a number of guises, includ- ing historical study of music, addressing both re- search methodologies and historical narratives. Theo- retical concerns central to music history in practice at UCLA and elsewhere, including gender and sexual- ity, music and politics, race, popular music studies, and jazz studies. P/ NP grading.
199. Directed Research in Music History. (2 to 4) Tutorial, two hours. Preparation: 3.0 grade-point average. Limited to junior/senior Music History majors. Supervised individual research under guidance of faculty mentor. Culminating paper or project required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

Musicology

Graduate Courses

200B. Historiography and Cultural Theory. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Critical examination of principles and procedures that inform historical study of music, with emphasis on impact of recent cultural theory. Letter grading.

200C. Analysis and Criticism. (6) Seminar, three hours. Historical study of music, with emphasis on impact of new developments in the field of musicology, with focus on problems of how music operates as cultural practice and how musical meanings can most effectively be analyzed and written about. Letter grading.

233. Cuban Vanguardism. (4) Seminar, three hours. Designed for graduate musicology students. Exploration of Cuban rancheras and sonology as they intersect with musical vanguardism in Cuba between 1910 and 1940. Afro-Cubanismo and modernism within Cuba, with specific concentration on composers Alejandro Garcia Caturla and Amadeo Roldan. Dialectic of Cuban music with respect to its interaction with national identity which they sought to solidify or represent in their music by drawing on “folk” traditions consisting of mix of European, African, and indigenous influences. Examination of theoretical debates, selected traditions of Afro-Cuban dance and music, popular musics in Cuba, vanguard scores, and Afro-Cubanism in literature. Letter grading.

242. Wagner’s Parsifal. (4) Seminar, three hours. Examination of Wagner’s place in intellectual and spiritual worlds of that culture through detailed consideration of Wagner’s final work, Parsifal. Problematic: How does the musical language, genre designation, and dramatic action, Parsifal’s exemplifies and establishes concepts and modes of feeling that remain crucial to 20th-century culture as well. Exploration of these issues through close reading of musical text as well as examination of astoundingly rich body of commentary surrounding the work. Letter grading.

222. Medieval Notation. (4) Seminar, three hours. Preparation: completion of all M.A. or Ph.D. course work in Music History, Music, and Musicology majors. Examination of in- fluence of music industry on way music is created, published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM288. Letter grading.

298. Seminar: Research Methods. (2) Tutorial, to be arranged. Limited to graduate students. Instruction in methods of research and critical understanding of (and set of tools for applying) past research in musicology. May be repeated for credit. S/U grading.

264. Seminar: Topics in Musicology. (6) Seminar, three hours. Designed for graduate students. Specific topics vary from term to term. May be repeated for credit.

Musicology / 475

250A. Renaissance. (4) Seminar, three hours. Vocal and instrumental notation; paleography of period. S/U or letter grading.

250B. Baroque. (4) Seminar, three hours. Vocal and instrumental notation; paleography of period. S/U or letter grading.

250C. Classical. (4) Seminar, three hours. Vocal and instrumental notation; paleography of period. S/U or letter grading.

250D. Romantic. (4) Seminar, three hours. Vocal and instrumental notation; paleography of period. S/U or letter grading.

250E. 20th Century. (4) Seminar, three hours. Vocal and instrumental notation; paleography of period. S/U or letter grading.

250F. Contemporary. (4) Seminar, three hours. Vocal and instrumental notation; paleography of period. S/U or letter grading.

260A-260G. Seminars: Historical Musicology. (4 each) Seminar, three hours. Preparation: course 242. Examination of principal theoretical writings concerning music from antiquity through Zarlino. Special course dealing with problems and practices as related to period; analytical research and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

260G. CM288. Music Industry. (4) (Same as Ethnomusicology CM288 and Music CM288.) Lecture, four hours; outside study, eight hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM186. Letter grading.

265A-265G. Seminars: Historical Musicology. (2 each) Formerly numbered 265A-265F.) Seminar, three hours. Preparation: course 242. Specific topics vary from year to year. S/U not be applied toward M.A. or Ph.D. degree requirements. May be repeated for credit. Meets with corresponding course from 260A through 260G series; concurrent enrollment in both courses is allowed. S/U grading.

262. Contemporary Popular Music Studies. (4) Seminar, three hours. Designed for graduate students. Critical exploration of methodologies of interdisciplinary field of popular music studies, including how music, lyrics, and visual images produce meanings within contexts shaped by mass mediation, capitalism, and political realities of gender, class, and race.

263. Topics in Performance. (6) Seminar, three hours. Designed for graduate students. Specific topics vary from term to term. May be repeated for credit.

265A-265G. Seminars: Historical Musicology. (2 each) Formerly numbered 265A-265F.) Seminar, three hours. Preparation: course 242. Specific topics vary from year to year. S/U not be applied toward M.A. or Ph.D. degree requirements. May be repeated for credit. Meets with corresponding course from 260A through 260G series; concurrent enrollment in both courses is allowed. S/U grading.

275. Music Industry. (4) (Same as Ethnomusicology CM288 and Music CM288.) Lecture, four hours; outside study, eight hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM186. Letter grading.

298. Seminar: Research Methods. (2) Seminar, two hours. Limited to second-year musicology graduate students and students with master's degrees. Development of advanced knowledge and bibliographic control in the field of musicology; specialization. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Introductory Practicum for Teaching Apprentices in Musicology. (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

596. Directed Individual Studies in Musicology. (2, 4 or 6) Tutorial, to be arranged. Limited to graduate students. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. (2) and Ph.D. Qualifying Examination. (2 or 4) Preparation: completion of all M.A. or Ph.D. course and language requirements. Limited to graduate students. S/U grading.

Music Industry
The mission of the Department of Near Eastern Languages and Cultures is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area that was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in Ancient Near Eastern Civilizations, Arabic, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the requisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

Ancient Near Eastern Civilizations B.A.

There are four options for a major in Ancient Near Eastern Civilizations: (1) Mesopotamia, (2) Egypt, (3) Near Eastern archaeology and cultures, and (4) biblical studies.

Preparation for the Major

Requisite for all options: Near Eastern Languages M20 or 50A; requisites for options 1, 2, and 3: German 1, 2, 3 (French 1, 2, 3 may be substituted); requisites for option 4: Hebrew 1A, 1B, 1C. Majors in all four fields are encouraged to continue their language study beyond the requisite levels.

Transfer Students

Transfer applicants to the Ancient Near Eastern Civilizations major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one civilization course for all options, one year of German or French for the options in Mesopotamia, Egypt, and Near Eastern archaeology and cultures, and one year of Hebrew for the biblical studies option.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Majors in all four options are required to take 14 upper division courses selected in consultation with the program adviser.

Majors selecting option 1 (Mesopotamia) are required to take 14 courses as follows: four language courses (Semitics 140A, 140B, 141, 142) and two literature and history courses selected from Ancient Near East M104, 150A, M185D. The remaining eight courses are to be selected from Ancient Near East M103A, M103B, 130, 140A, 140B, 140C, 145, 150B, 150C, 160, 161, 162, 163, 164A, 164B, 164C, 170, 170A, 169, Jewish Studies M150A. One course must be in research methodology (such as Anthropology 111, C158, 130, M140, 141, 150, 156, Archaeology C159, Comparative Literature 100, English 111A, 140A, or Linguistics 110) taken preferably in another department with consent of the adviser.

Majors selecting option 2 (Egypt) are required to take 14 courses as follows: four language courses (Ancient Near East 120A, 120B, 120C, 121A) and three literature and history courses (Ancient Near East M103A, M103B, 150B). The remaining seven courses are to be selected from Ancient Near East CM101A, CM101B, M104, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160, 161, 162, 163, 164A, 164B, 164C, C165, 167, 170, Iranian 169, Jewish Studies M150A, M182A. One course must be in research methodology (such as Anthropology 111, C158, 130, M140, 141, 150, 156, Archaeology C159, Comparative Literature 100, English 111A, 140A, or Linguistics 110) taken preferably in another department with consent of the adviser.

Majors selecting option 3 (Near Eastern archaeology and cultures) are required to take 14 courses as follows: three upper division courses in any Near Eastern language (Akkadian, Arabic, Egyptian, Hebrew) and two courses in research methodology (such as Anthropology 111, C158, 130, M140, 141, 150, 156, Archaeology C159, Comparative Literature 100, English 111A, 140A, or Linguistics 110). The remaining nine courses are to be selected from Ancient Near East M103A, M103B, M104, 120A, 120B, 120C, 121A, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160, 161, 162, 163, 164A, 164B, 164C, C165, Art History M101A, M101B, M102A, M102B, Classics 168, Jewish Studies M150A, 150B, 170, M182A, Semitics 140A, 140B, 141, 142.

Majors selecting option 4 (biblical studies) are required to take 14 courses as follows: four language courses (Hebrew 102A, 102B, 102C, 120) and three history and literature courses (Jewish Studies M150A, M182A, English 108B). The remaining seven courses are to be selected from Ancient Near East M103A, M103B, M104, 130, 150A, 150B, 160, 161, 162, 163, 164A, 164B, 164C, C165, English 108A, 108C, Greek 130, Hebrew 125, 130, 135, History 186A, 186B, 186C, Jewish Studies 150B, 170, 177, Latin 120, Semitics 130.
Study Abroad
Students are encouraged to spend time abroad either to (1) study with an education abroad program or (2) work on a UCLA-affiliated archaeological excavation in the broader Middle East. For information on studying abroad, contact the Education Abroad Program, B300 Murphy Hall, (310) 825-4995; for UCLA-affiliated excitations, contact the departmental academic counselor at (310) 825-4165.

Arabic B.A.
Preparation for the Major
Required: Arabic 1A, 1B, 1C.
Transfer Students
Transfer applicants to the Arabic major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Arabic.
Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Hebrew B.A.
Preparation for the Major
Required: Hebrew 1A, 1B, 1C, or equivalent.
Transfer Students
Transfer applicants to the Hebrew major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Hebrew.
Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Fourteen courses, including Hebrew 102A, 102B, 102C, 103A, 103B, 103C; one term of Hebrew 120 or 125; and one term of Hebrew C140. The remaining six courses may be selected from Hebrew 111A, 111B, 111C, 130, 135, C140, 160, 170, 180A, 180B, 199, Jewish Studies M150A, 150B, M182A, M182B, Semiotics 110, 115, 130, 140A, 140B. No more than two of the 14 courses may be credited through a proficiency test administered by the department. A maximum of two Hebrew 197 or 199 courses (8 units total) may be applied toward the major.

Iranian Studies B.A.
Students majoring in Iranian Studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

Preparation for the Major
Required: Iranian 1A, 1B, 1C, or equivalent.
Transfer Students
Transfer applicants to the Iranian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Persian.
Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Fourteen courses, including at least six from Iranian 102A, 102B, 102C, 103A, 103B, 103C, M110A, M110B, M110C, 120, 140, 141, 142, 161A, 161B, 161C, 170, 187 and at least five courses from Ancient Near East 150A, 150B, 163, Arabic 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology 20B, History 105A, 105B, 105C, 110D, Iranian Studies 104, 120, 181A, 181B, 187, 197, 199, M210, 220A, 220B, 221, 231A, 231B, 231C, 250, 251, Political Science 157. The remaining three courses may be selected from any of the above. No more than two of the 14 courses may be credited through a proficiency test administered by the department. A maximum of two Iranian 197 or 199 courses (8 units total) may be applied toward the major.

Jewish Studies B.A.
Students must select one of five tracks: (1) Jewish history, (2) Jewish religions, (3) Jewish literature and culture, or (4) American Jewish literature and culture, or (5) Israel studies.

Preparation for the Major
Required: Jewish Studies 10.
Transfer Students
Transfer applicants to the Jewish Studies major with 90 or more units must complete the following introductory course prior to admission to UCLA: one social, cultural, and religious institutions of Judaism course.
Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Majors in all five tracks are required to take 14 upper division courses selected in consultation with the program adviser, including seven required core courses, five courses within the selected track, and two electives to be chosen from Hebrew, Jewish studies, or any courses listed under any track.
Core requirements include Jewish Studies M184A (or History M184A); one year of upper division Hebrew (either Hebrew 102A, 102B, and 102C, or Hebrew 103A, 103B, and 103C); two terms of the Jewish history sequence selected from Jewish Studies M182A, M182B, M182C, M184B, and one course on the Hebrew Bible selected from English 108A, Hebrew 120, or Jewish Studies M150A, 150B.
A third year of Hebrew or one year of Yiddish or another Jewish language is strongly recommended but not required.
Students are encouraged to take a research tutorial within Jewish Studies 197 or 199. A maximum of two 197 or 199 courses (8 units total) may be applied toward the major.
A course may be applied toward only one category within the major (i.e., core requirement, track requirement, or electives). No more than 20 units may be applied toward both the Jewish Studies major and a major or minor in another department or program.
For the Jewish history track, students are required to complete the remaining two courses from Jewish Studies M182B, M182C, M184B and three courses from the following list, in addition to the core courses for the major: Ancient Near East 162, History M182D, 183A, 183B, 186A, 191A, 197, Jewish Studies 140A, 140B, 170, M182D, M182E, M182F, M184D, 197, 199.
For the Jewish religion track, students are required to complete Jewish Studies 150B and four of the following courses, in addition to the core courses for the major: Ancient Near East 162, English 108A, 108C, 199, Hebrew 120, 125, 130, History 186A, Jewish Studies 130, 135, M150A, M151A, 155, 170, M182A, M182B, M187, 197, 199.
For the Jewish literature and culture track, students are required to complete Hebrew 103A, 103B, 103C, and two of the following courses, in addition to the core courses for the major: English 103, 108A, 108C, 182C, German 112, Hebrew 111A, 111B, 111C, 120, 125, 130, 140, Iranian 131, Jewish Studies 135, 143, M150A, 150B, M151A, 151B, 155, 170, 177, M187, 197, 199.
For the American Jewish studies track, students are required to complete Sociology 159 and four of the following courses, in addition to the core courses for the major: English 103, 182C, 199, History 197, Jewish Studies 135, 140A, 140B, M151A, 177, M182F, M184C, 199, Yiddish 101A, 101B, 101C, 102A, 102B. For the Israeli studies track, students are required to complete Hebrew 103A, 103B, 103C, and two of the following courses, in addition to

Study in Israel
Students are encouraged to spend up to one year in Israel either to (1) study with an education abroad program or (2) study at an Israeli university. For information on studying in Israel, contact the Education Abroad Program, B300 Murphy Hall, (310) 825-4889.

Arabic and Islamic Studies Minor
The Arabic and Islamic Studies minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of Arabic language and literature and Islam.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Arabic 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):
Seven courses in Arabic or Islamics; 199 courses may not be applied. With consent of the undergraduate adviser, two of the seven courses may be taken outside the department.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Armenian Studies Minor
The Armenian Studies minor is designed for students who wish to augment their major program with a group of courses that provide a systematic introduction to the study of Armenian culture.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Armenian 101A, 101B, 101C, or the equivalent as determined by the department, and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):
Seven courses from the Armenian section of the department; 199 courses may not be applied. At least one course from each of the three disciplines of language, literature, and history must be selected. Eligible language courses begin in the fourth quarter of study (i.e., course 102A for Western Armenian, course 105A for Eastern Armenian). With consent of the undergraduate adviser, two of the seven courses may be taken outside the department. Ordinarily, the following courses may be applied: History 107A through 107E, 200S, 201S, 211A, 211B, 212, Indo-European Studies M150.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Hebrew and Jewish Studies Minor
To enter the Hebrew and Jewish Studies minor, students must have an overall grade-point average of 2.0 or better, have completed Hebrew 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):
Seven courses from the Hebrew or Jewish studies section of the department; 199 courses may not be applied. With consent of the undergraduate adviser and based on course content, two of the seven courses may be taken outside the department.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Near Eastern Languages and Cultures Minor
The Near Eastern Languages and Cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):
Seven courses selected in consultation with an academic adviser from any of the courses offered by the department; 199 courses may not be applied. With consent of the undergraduate adviser, two of the seven courses may be taken outside the department, provided the content of the courses bears a direct relation to the culture of the Near East.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaalibrary/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Near Eastern Languages and Cultures offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Near Eastern Languages and Cultures.

Ancient Near East
(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

Lower Division Course
10W. Jerusalem: Holy City. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Survey of religious, political, and cultural history of Jerusalem over three millennia as symbolic focus of three faiths: Judaism, Christianity, and Islam. Transformation of sacred space as reflected by literary and archaeological evidence through examination of testimony of artifacts, architecture, and iconography in relation to written word. Study of creation of mythic Jerusalem through event and experience. Satisfies Writing II requirement. Letter grading.

Upper Division Courses
CM101A. Art and Architecture of Ancient Egypt, Predynastic Period to New Kingdom. (4) Formerly numbered Near Eastern Languages M101A.) (Same as Art History M101A.) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during Predynastic period and Old Kingdom. May be repeated for credit with consent of instructor. Concurrently scheduled with course C267A. P/NP or letter grading.

CM101B. Art and Architecture of Ancient Egypt, New Kingdom to Greco-Roman Period. (4) Formerly numbered Near Eastern Languages M101B.) (Same as Art History M101B.) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts from New Kingdom to Greco-Roman period. Concurrently scheduled with course C267B. P/NP or letter grading.

M103A-M103B. Ancient Egyptian Civilization. (4-4) (Same as History M103A-M103B.) Lecture, three hours; discussion, one hour (when scheduled). Course M103A is not requisite to M103B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading, M103A. Chronological discussion of Predynasty, Old and Middle Kingdom, M103B. New Kingdom and Late period until 332 B.C. M104. History of Ancient Mesopotamia and Syria. (4) (Same as History M104.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and cultural development of Fertile Crescent, including Palestine, from Late Uruk to neo-Babylonian period. Letter grading.
M110A-M110B-M110C. Iranian Civilization. (4-4-4) (Same as History M110A-M110B-M110C and Iranian M110A-M110B-M110C.) Lecture, three hours; discussion, one hour (when scheduled). History of ancient Iran from rise of Elam to end of Sasanian dynasty — Elamite civilization and Mede, Achaemenid, Arsacid, and Sasanian Empires. Emphasis on ancient Iran, but may be offered for early Islamic period. P/NP or letter grading.

120A-120B-120C. Intermediate Ancient Egyptian Readings. (5-5-5) Lecture, five hours. Course 120A is requisite to 120B, which is requisite to 120C. P/NP or letter grading. 120A. Introduction to hieroglyphic script and phonology and morphology of Middle Egyptian. Basic rules of Middle Egyptian syntax, with focus on nominal, adjectival, and verbal sentences. 120B. Verbal system and syntax of verbal sentences of Middle Egyptian. 120C. Reading of authentic Egyptian texts to deepen knowledge of Egyptian grammar and to acquire familiarity with aims and methods of philology, study of ancient texts.

121A-121B-121C. Middle Egyptian Technical Literature. (4-4-4) Lecture, three hours. Requisite: course 121A. Course 121A is requisite to 121B, which is requisite to 121C. Thematic readings in ancient Egyptian historical, religious, and literary texts.

124. Middle Egyptian Technical Literature. (4) Lecture, three hours. Requisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included. P/NP or letter grading.

130. Ancient Egyptian Religion. (5) Lecture, three hours; discussion, one hour. Introduction to religious beliefs, practices, and sentiments of ancient Egypt to study Egyptian religion as coherent system of thought and sphere of action that once served as meaningful and relevant framework for understanding physical reality and human life for inhabitants of Nile Valley. General principles as well as developments through time (circa 3000 B.C. to 300 C.E.). Topics include mythology, temple and cult, magic, and personal piety. P/NP or letter grading.

135. Religion in Ancient Israel. (4) Lecture, three hours. Introductory survey of ancient Israelite religious beliefs and practices, their origin, and development, with special emphasis on diversity of religious practice in ancient Israel and Canaan during 1st millennium B.C.E. P/NP or letter grading.

140A-140B-140C. Elementary Sumerian. (4-4-4) Lecture, three hours. Requisites: Semitics 140A, 140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from early third millennium B.C. to about 2000 B.C. P/NP or letter grading.

150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. (4-4-4) Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. 150A. Mesopotamia: 1500 B.C.E. Egypt; 150C. Syria and Palestine, Asia Minor, Persia.

162. Archaeology of Ancient Israel. (4) Lecture, three hours. Survey of Bronze and Iron Age archaeology of Canaan and Israel through coming of Alexander the Great, with emphasis on relationship between archeology and historical texts. P/NP or letter grading.

163. Archaeology of Iran. (4) Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. P/NP or letter grading.

164A. Sumerians. (4) Lecture, three hours. Overview of Sumer and related cultures of Greater Mesopotamia in 4th and 3rd millennia B.C.E., with focus on rich cultural history of region and integration of archaelogical, art historical, and written records. P/NP or letter grading.

164B. Assyrians. (4) Lecture, three hours. Overview of Assyrian cultural history from its origins to end of Neo-Assyrian period (circa 612 B.C.E.), with focus on rise, mechanics, and decline of Neo-Assyrian Empire, which at its peak ruled ancient Near East from Zagros to Egypt. P/NP or letter grading.

164C. Babylonians. (4) Lecture, three hours. Overview of Babylonian and cultural history of region from late 3rd millennium B.C.E. to invasion of Cyrus in 539 B.C.E., with focus on history and archaeology of region, urban structure, literature, and legal practices. P/NP or letter grading.

C165. Egyptian Archaeology. (4) (Formerly numbered 165.) Seminar, three hours. Requisites: one course from M103A, M103B, 130, or Near Eastern Languages and Literatures 530 to prepare for research aspects of topics in ancient Egyptian archaeology. Topics vary each year. May be repeated for credit. Concurrently scheduled with course C266. P/NP or letter grading.

M167. Magic in Ancient World. (4) (Same as Classics M167.) Lecture, three hours; discussion, one hour (when scheduled). Requisites: Classics 10 or 20. Exploration of art of influencing natural course of events by occult means as practiced in ancient world at large. Coverage of beliefs in supernatural forces; rites aimed at controlling these forces effectively, and character and social roles of ritual experts in various cultures of ancient world. Source material includes types of magical spells, literary texts about magic and magicians, and artifacts such as amulets and ritual implements. P/NP or letter grading.

M168. Introductory Hittite. (4) (Same as Indo-European Studies M168.) Lecture, two hours; recitation, one hour. Recommended preparation: knowledge of language with case system. Introduction to Hittite grammar by series of graded lessons covering morphology and syntax, followed by readings of selected texts from variety of genres in transliteration. P/NP or letter grading.

170. Introduction to Biblical Studies. (4) Lecture, two hours. Knowledge of original languages not required. Bible (English translations) both Canaan, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to present. P/NP or letter grading.

M185D. Religions of Ancient Near East. (4) (Same as History M185D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main polytheistic systems of ancient Near East, with emphasis on Mesopotamia and Syria and with reference to religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magic, wisdom, and moral conduct. P/NP or letter grading.

197. Individual Studies in Ancient Near East. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study with scheduled meetings to be arranged between faculty member and student. Assigned reading and identification of research of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Ancient Near East. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M201. Archaeological Research Design. (4) (Same as Archaeology M201C.) Seminar, three hours. Requisites: Archaeology M201A, M201B. How to design archaeological projects in preparation for M.A. thesis or Ph.D. phase. Students do exploratory research to select subject, then write research design that could form basis for extensive paper, grant application, or oral examination. Students work closely with faculty members and report weekly on their progress. Preparatory to at least one oral progress report or presentation, one on theoretical framework and one on practical aspects of project. Final written research design that incorporates theoretical and practical aspects of research and formulates bridging arguments required. S/U or letter grading.

M208. Topics in Ancient Iranian History. (4) (Same as History M210 and Iranian M210.) Seminar, three hours. Varying topics on Elamite, Achaemenid, Arsacid, and Sasanian history. May be repeated for credit. S/U or letter grading.

210. Late Egyptian. (4) Lecture, three hours. Requisites: courses 121A, 121B, 121C. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. S/U or letter grading.

211A-211B. Egyptian Texts of Greco-Roman Period. (4-4) Lecture, three hours. Requisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greek and Roman periods. Readings and translation of various textual types. Letter grading.

220. Seminar: Ancient Egypt. (4) Seminar, three hours. May be repeated for credit. S/U or letter grading.

221A-221B. Demotic. (4-4) Lecture, three hours. Requisite: course 121C. Course 221A is requisite to 221B. Introduction to Demotic grammar and orthography. Reading of texts from various genres. May be repeated for credit with topic change. S/U or letter grading.

230. Seminar: Ancient Syria/Palestine. (4) Seminar, three hours. Examination of selected topics on political, social, and intellectual history of ancient Israel. Exploration of how historical, social, and political contexts shaped and influenced interpretation and use of biblical texts. May be repeated for credit. S/U or letter grading.

240A-240B-240C. Seminars: Sumerian Language and Literature. (4-4-4) Seminar, two hours. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis, and literary history from Sumerian to Babylonian. S/U or letter grading.

M250. Seminar: Ancient Mesopotamia. (4) (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. S/U or letter grading.

250X. Seminar: Ancient Mesopotamia. (1) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without homework required in course M250. May be repeated for credit. S/U or letter grading.

260. Seminar: Ancient Near Eastern Archaeology. (2 to 4) Seminar, two hours. May be repeated for credit. S/U or letter grading.

261. Practical Field Archaeology. (2 to 8) Fieldwork, two hours. Participation in archaeological excavations or other archaeological research in Near East under staff supervision. May be repeated for credit. S/U or letter grading.

262. Seminar: Object Archaeology. (4) Seminar, two hours; laboratory, one hour. Selected topics in analysis and interpretation of Near Eastern archaeo logical finds in museum collections. Students work with objects in Heermanek Collection of Los Angeles County Museum of Art. S/U or letter grading.
263. Seminar: Egyptian Monuments. (4) Seminar, two hours. Selected monuments and sites in Egypt, including Delta, Nile Valley, desert sites, wads, oases, and border regions. Architecture and decoration of temples and tombs, statuary and monuments, set- tlements and use history, text translation of appropriate documents, including stelae, monumental inscriptions, or pertinent socioeconomic texts. May be repeated for credit with consent of instructor. S/U or letter grading.

264. Egyptian Museum Collections. (4) Seminar, two hours; research group meeting, one hour. Ancient Egyptian museum collections around world, data sets, provenance and dating studies, collection history and agenda, museology, and exhibition history. May be repeated for credit with consent of instructor. S/U or letter grading.

265. Depositional History and Stratigraphic Analysis. (4) (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("law") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in literature, with specific test cases from actual sites. Requisite: one course from M103A, M103B, or M148.

Upper Division Courses

102A-102B-102C. Intermediate Standard Arabic. (5-5-5) Lecture, six hours. Requisite: course 1C. Course 102A is requisite to 102B, which is requisite to 102C. Intermediate formal Arabic, including listening, speaking, reading, and writing. Offered in summer only. P/NP or letter grading.

103A-103B-103C. Advanced Arabic. (4-4-4) Lecture, four hours. Requisites: courses 102A, 102B, 102C. Advanced formal Arabic, including grammar, composition, and readings from classical and modern texts. Letter grading.

111A-111B-111C. Elementary Spoken Egyptian Arabic. (4-4-4) Lecture, three hours. Knowledge of Arabic not required; not suitable for heritage speakers. Introduction to spoken Arabic dialect of Egypt. Training in listening, speaking, and reading. P/NP or letter grading.

111S. Summer Intensive Elementary Egyptian Arabic. (4) Lecture, three hours. Knowledge of Arabic not required; not suitable for heritage speakers. Introduction to spoken Arabic dialect of Egypt. Training in listening, speaking, and reading. P/NP or letter grading.

112A-112B-112C. Advanced Spoken Egyptian Arabic. (4-4-4) Lecture, three hours. Study of Egyptian colloquial Arabic for heritage speakers or students who have completed courses 1A, 1B, 1C. P/NP or letter grading.

115. Studies in Arabic Diplomatic. (4) Lecture, three hours. Introduction to diplomatic Arabic, with emphasis on translation from Arabic to English and listening and comprehension. May vary from year to year based on student interest and instructor availability and may include IRA, Levantine, North African, or Gulf Arabic. P/NP or letter grading.

116A-116B-116C. Elementary Iraqi Arabic. (5-5-5) Lecture, five hours. Course 116A is requisite to 116B, which is requisite to 116C. Introduction to dialect of Arabic spoken in Iraq, with emphasis on conversational proficiency. Recognition and production of sounds of Iraqi Arabic and basic vocabulary, grammar, idiomatic expressions, and relevant cultural background through dialogues and other conversational exercises. P/NP or letter grading.

120. Islamic Texts. (4) Lecture, four hours. Requisites: course 103C. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit. Letter grading.

121. Oral Literature and Performance of Arab World. (4) (Same as Comparative Literature M121.) Lecture, three hours. Knowledge of Arabic not required. Introduction to study of living oral traditions of troubadours, storytellers, oral poets, and performers in Arabic-speaking Middle East. P/NP or letter grading.

130. Classical Arabic Texts. (4) Lecture, four hours. Requisite: course 103C. Readings from premodern literary texts, with grammatical and syntactical analysis. May be repeated for credit. Letter grading.

141. Modern Arabic Literature. (4) Lecture, three hours. Conducted in English and Arabic, with all required readings in original Arabic only. Readings in modern Arabic literature, variably organized across around particular trends, genres, topics, canonical authors, national literatures, mixing thematic and formal analyses of literary and critical texts and makings of film, video, clip, and song in approaching literary culture. May be repeated for credit. Letter grading.

142. Arab Media. (4) Lecture, four hours. Requisite: course 103A. Development of facility with language of Arab press and broadcasting. Activities include monitoring current materials via Internet; transcribing, translating, and summarizing; writing original reports in Arabic; and oral presentations and discussions. May be repeated for credit. P/NP or letter grading.

M148. Contemporary Arab Film and Song. (4) (Same as Comparative Literature M148.) Seminar, three hours. Exploration of conjunctions between contemporary Arab film and song and between popular cultures and emergent Islamic culture, with possible focus on specific genres such as realist/neorealist Arab film; feminist Arab film or popular Arab film and song; religious/cultural celebrations or repre- sentation or democracy and human rights or censorship, reception, and resistance. Possible examination of various national cinemas such as Tunisian, Egyptian, Moroccan, Algerian, and Palestinian. Various mu- nicipal, Moroccan, and Palestinian. Various musical forms and styles. Analysis of music videos and Hip-hop also examined in relation to emergence not only of national cinemas, national music industries, and iconic singers but also of video clips, satellite TV, star academy, and reality shows — all products of transnational and pan-Arab mass media. P/NP or letter grading.

150. Classical Arabic Literature in English. (4) Lecture, three hours. Readings in English; knowledge of Arabic not required. Survey of premodern Arabic cultural production in its political, religious, and social contexts. Coverage of pre-Islamic Arabia, rise of Islam, and major themes of Southwest Asian history, along with significant figures and moments in literature and culture of premodern period. Consideration of sele- cted modern responses to Arabic tradition. P/NP or letter grading.

M151. Modern Middle Eastern Literature in English. (4) (Formerly numbered 151.) (Same as Comparative Literature M151.) Lecture, three hours. Designed for upper division literature majors. Topics may include con- structions of otherness in modern Arab culture; East-West debate; memory, mourning, violence, narrative, and ethics; globalization, oil, and cul- tural insurgency; Arab culture in transnational context or questions of reception, exoticism, translation, and marketing. Topics may include prison narratives; novels of terror; memoirs by women and/or by refu- gees and exiles; 19th- and 20th-century travel narra- tives; Romantic poetry; literature of pre-1948; rise of Arab novel. Areas may range from genetic look at Arab world to narrow focus on Maghreb or one country such as Algeria, Palestine, Iraq, Lebanon, or Egypt. May also be organized around Arab literatures written in one particular language, namely English, Arab- hic, or French. Letter grading.

M155. Al-Andalus: Literature of Islamic Spain. (4) (Formerly numbered 155.) (Same as Comparative Literature M155.) Lecture, six hours. Study of litera- ture of Islamic Spain to learn about interaction of Arab- bic and Western and Arabic and Jewish cultures and to recognize Islamic culture as vital force in European life and in approach to specific problems posed by Arabic gram- mar and dialectology. Letter grading.

Arabic Lower Division Courses

1A-1B-1C. Elementary Standard Arabic. (5-5-5) Lecture, six hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Introduction to formal Arabic (modern standard Arabic), including listen- ing, speaking, reading, and writing. P/NP or letter grading.

1B-1C-1D. Intermediate Standard Arabic. (5-5-5) Lecture, six hours. Course 1B is enforced requisite to 1C, which is enforced requisite to 1D. Introduction to Modern Standard Arabic, including listening, speaking, reading, and writing. P/NP or letter grading.

95. Arabic Language and Culture. (4) (Same as Comparative Literature M95.) Lecture, four hours. Requisite: course 120. Readings in premodern philosophy and theology. May be repeated for credit. P/NP or letter grading.
181. Translating Arabic. (4) Seminar, three hours. Preparation: advanced proficiency in English and Ara- bic (at least three years of Arabic instruction or equiv- alent). Open to both native and non-native speakers of English and Arabic. Training of students in methodolo- gy of translation from Arabic into English, with focus on producing accurate and readable English versions of Arabic texts from variety of fields. Close reading and written translation of Arabic texts, with review of linguistic and cultural difficulties that arise in course of translation. Texts may include classical Arabic litera- ture (religion, historiography), modern writing (litera- ture, media), and spoken Arabic (television, radio), based on student interest. Letter grading.

188FL. Special Studies: Readings in Arabic. (1) Seminar. Hours to be announced. Students must be concurrently enrolled in affiliated main course. Primary readings and additional work in Ara- bic to enrich and augment work assigned in main course, including reading, writing, and oral exercis- es. May be repeated for credit. P/NP or letter grading.

197. Individual Studies in Arabic. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual inten- sive study, with scheduled meetings to be arranged between faculty member and student. Assigned read- ing and tangible evidence of mastery of subject mat- ter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Senior Project in Arabic. (2 to 4) Tutorial, one hour. Limited to juniors/se- niors. Supervised individual research or investigation under guidance of faculty mentor. Culumating paper or project required. May be repeated for credit. Indi- vidual contract required. P/NP or letter grading.

Graduate Courses

220. Seminar: Islamic Texts. (4) Seminar, three hours. Major Islamic thinkers and their works from classical period to modern times. Coverage of doc- trines and their influence on various schools of thought in Islam, such as Al-sunna wa't-Jama'a, Shi'a, Mu'tazila, and Sufis. May be organized around one author and his works, multiple authors and their works, or specific topic with representative readings from various schools. Exploration of secondary litera- ture in Arabic and other languages for student re- search papers. May be repeated for credit. S/U or letter grading.

M231. Texts in Judeo-Arabic. (4) (Same as Hebrew M231.) Lecture, three hours. Requisites: course 102C, Hebrew 102C. Reading of Judeo-Arabic texts by Maimonides (medieval religion, medicine, philoso- phy) and the Muslim-Judeo-Arabic dialects of Iraq and Egypt, with discussion of grammar and devi- ations from norms of classical Arabic. M150A-150B. Hebrew Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. M150A, Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Comparative Literature M101.) Study of literary culture of ancient Israel through examination of principal compositional strategies of Hebrew Bible and Apocalyptic (read in translation). P/NP or letter grading. 150B. Rabbinc Judaism. Topics include emergence of rabbinc Judaism, its original literary forms; rabbinc worldview; forms of medieval rabbinc literature; modern Jewish religious movements and their attitude to rabbinc Judaism. M151A-151B. Modern Jewish Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. M151A. Diaspora Literature. (Same as Comparative Literature M166.) Study of literary responses of Jews to modernity, its challenges, and threats. Readings in texts written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. 151B. Israeli Literature. Study of translations from Hebrew literature written in Israel and discussion of cardinal facets of Israeli life: social issues, security problems, identity of the state, role of individual. Analysis of formal aspects of each work.

M162. Israel Seen through Its Literature. (4) (Same as Comparative Literature M162.) Lecture, three hours. Attempt to impart profound understanding of Israel and its literature. Examination of variety of literary texts — stories, novels, and poems — and reading of them in context of their historical backgrounds. P/NP or letter grading.

177. Variable Topics in Jewish Studies. (4) Lecture, three hours. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit. P/NP or letter grading.

M181. Topics in Jewish History. (4) (Same as History M181.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of major issues in Jewish history. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M182A. Ancient Jewish History from Patriarchs to Rabbits. (4) (Same as History M182A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Jewish history from exodus of Hebrews from Egypt to the Babylonian exile. P/NP or letter grading.

M182B. Between Crescent and Cross: Jewish Middle Ages. (4) (Same as History M182B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Jewish history from the Islamic conquest to the Later Middle Ages. P/NP or letter grading.

M182C. Jewish History, Spanish Expulsion to 1881. (4) (Same as History M182C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Jewish history from the Spanish Inquisition to the 1881 immigration to the United States. P/NP or letter grading.

M182D. European Jewry, 1881 to Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Jewish history from 1881 to the present. P/NP or letter grading.

M182E-M182F. Jewish Intellectual History. (4-4) Tutorial, three hours; seminar, one hour (when scheduled). Preparation: familiarity with Hebrew. Survey of Jewish intellectual history from the 13th century to the present. P/NP or letter grading.

187. Holocaust in Literature. (4) (Same as Comparative Literature M187.) Lecture, three hours. Required: History M182D or 183A or 183B. Investigation of how Holocaust informs variety of literary and cinematic works and raises wide range of aesthetic and moral questions. P/NP or letter grading.

191. Variable Topics Research Seminars: Jewish Studies. (4) Seminar, three hours. Research seminar on selected topics. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP or letter grading.

197. Individual Studies in Jewish Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Approval required for subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Jewish Studies. (2 to 8) Tutorial, to be arranged. S/U grading.

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Indo-European Studies M20, Slavic M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Earliest representations of language known are those of Near East dating to 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica codified writing correspond to earlier developments, their antiquity and, in case of China and Mesoamerica, their evident isolation marks these centers as loci of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greek-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

50A. First Civilizations. (5) Lecture, three hours; discussion, one hour. Survey of great civilizations of ancient Near East — Egypt, Israel, and Mesopotamia — with attention to emergence of writing, monotheism, and urban societies. Letter grading.

50C. Modern Middle Eastern Cultures. (5) Lecture, three hours; discussion, one hour. Survey of modern Middle Eastern cultures through readings and films from Arab countries, Iran, and Israel. Letter grading.

Near Eastern Languages

Lower Division Courses

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Indo-European Studies M20, Slavic M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Earliest representations of language known are those of Near East dating to 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica codified writing correspond to earlier developments, their antiquity and, in case of China and Mesoamerica, their evident isolation marks these centers as loci of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greek-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

Upper Division Courses

141. Advanced Akkadian. (4) Lecture, three hours. Old Babylonian syntax; reading of basic Old Babylo- nian texts.

142. Akkadian Literary Texts. (4) Lecture, three hours. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

197. Individual Studies in Semitics. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual in- tensive study, with scheduled meetings to be arranged between faculty member and student. Approval required for subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200. Bibliography and Method of Near Eastern Languages and Literatures. (4) Lecture, two hours. Required for M.A. degree. Introduction to bibliographi- cal resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

201. Study of Religion: Theory and Method. (4) Seminar, three hours. Preparation: familiarity with at least two major world religions. Introduction to variety of theories and methods used in academic study of religion. In attempt to underscore importance that historical, cultural, and social exigencies play in develop- ment of religious traditions, discussion of theories comparatively and in their historical context, with fo- cus on presuppositions and core concepts and impli- cations of each theory. Letter grading.

290. Seminar: Paleography. (4) Seminar, three hours. Provides students with ability to cope with vari- eties of manuscripts.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice person- nel employment as teaching assistant, associate, or teaching assistantship under active guidance and supervision of regular faculty member re- sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

597. Examination Preparation. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U grading.

Semitics

Upper Division Courses

141. Advanced Akkadian. (4) Lecture, three hours. Old Babylonian syntax; reading of basic Old Babylo- nian texts.

142. Akkadian Literary Texts. (4) Lecture, three hours. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

197. Individual Studies in Semitics. (2 to 4) Tutori- cal, one hour. Limited to juniors/seniors. Individual in- tensive study, with scheduled meetings to be arranged between faculty member and student. Approval required for subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
Graduate Courses

210. Ancient Aramaic Dialects. (4) Lecture, three hours. Requisites: course 130. Reading of surviving inscriptions and papyri. Texts include Old Aramaic inscriptions, Egyptian Aramaic texts, Qumran Aramaic, and Targumic Aramaic. May be repeated for credit. S/U or letter grading.

215B. Syriac. (4) Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of Bible and Syriac literature. May be repeated for credit. S/U or letter grading.

230. Seminar: Northwest Semitic Languages and Literatures. (4) Seminar, two hours. May be repeated for credit. S/U or letter grading.

240. Seminar: Akkadian Language. (4) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit. S/U or letter grading.

240X. Seminar: Akkadian Language. (1) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

241. Seminar: Akkadian Literature. (4) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit. S/U or letter grading.

241X. Seminar: Akkadian Literature. (1) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

280A-280B-280C. Seminars: Comparative Semitics. (4-4-4) Seminar, two hours. S/U or letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Turkishic Courses

Upper Division Courses

101A-101B-101C. Elementary Turkish. (5-5-5) Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Grammar, reading, conversational, and elementary composition drills. P/NP or letter grading.

111A-111B-111C. Elementary Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.

112A-112B-112C. Advanced Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

114A-114B-114C. Bashkir. (4-4-4) Lecture, three hours. Requisite: course 102A. Grammar, reading of literary and folkloric texts.

115A-115B-115C. Elementary Azeri. (4-4-4) Knowledge of Russian, Turkish, and Persian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill.

120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek. (4-4-4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 102A, 102B, and 102C, or 111A, 111B, and 111C, or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonemics, morphology, syntax, parameiology, and lexicology analyzed on today’s native material. Letter grading.

160. Turkish Tradition. (4) Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present. Letter grading.

165. Islamic Literary Heritage of Central Asia. (4) Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

180. Modern Turkish Languages and Peoples. (4) Lecture, three hours. Advanced reading in Turkish program and recommended for students in Soviet studies. English and linguistic survey of the Turkish peoples.

197. Individual Studies in Turkish. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigning and evaluating evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Turkish. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

210A-210B-210C. Introduction to Ottoman. (4-4-4) Lecture, three hours. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

230A-230B-230C. Historical and Comparative Survey of Turkish Languages. (4-4-4) Lecture, three hours. Requisites: course 180. Extinct and living Turkish languages. History of Turkish: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkish languages on comparative basis.

225A-235B. Middle Turkish: Karakhanid, Khwarazmi, Mamluk-Kipchak, and Old Anatolian. (4) Lecture, three hours. Requisite: course 180. Survey of Middle Turkish documents. Textual and linguistic analysis of Middle Turkish texts from various literary genres.

240A-240B-240C. Advanced Ottoman. (4-4-4) Lecture, three hours. Requisites: courses 210A, 210B, 210C. Emphasis on different genres of Ottoman writing (bibles letters as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

250A-250B-250C. Islamic Texts in Chaghatay. (4-4-4) Lecture, three hours. Requisites: courses 220A, 220B, 220C. Philological and linguistic survey of basic Islamic source material written in Chaghatay literary language. Reading and discussion of Chaghatay texts on Islamic topics.

280A-280B. Seminars: Modern Turkish Literature. (4-4) Seminar, two hours. Requisite: course 102B. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

290A-290B. Seminars: Classical Turkish Literature – Ottoman, Chaghatay, and Azeri. (4-4) Seminar, two hours. Requisites: courses 210A, 210B, and 210C, and/or 220A, 220B, and 220C. Survey of Islamic literatures of the Turks in classical period. Readings of Ottomans, Chaghatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Professors
Dean Bok, Ph.D. (Dolly Green Professor of Ophthalmology)
Nicholas C. Brecha, Ph.D.
Dean V. Buonomano, Ph.D.
Marie-Françoise Chesneau, M.D., Ph.D. (Charles H. Markham Professor of Neurology)
Carminie D. Clements, Ph.D.
Edwin L. Cooper, Ph.D.
Jean S. de Vellis, Ph.D. (Dr. George Tarjan Professor of Mental Retardation), in Residence
V. Reggie Edgerton, Ph.D.
Jerome Engel, Jr., M.D., Ph.D. (Jonathan Sinay Professor of Epilepsy)
Jack L. Feldman, Ph.D.
Robin S. Fisher, Ph.D., in Residence
Robert G. Frank, Jr., Ph.D. (Medical History Division)
David L. Glanzman, Ph.D.
Roger A. Gorski, Ph.D.
Ronald M. Harper, Ph.D.
Carolyn R. House, Ph.D.
Paul E. Micevych, Ph.D.
Thomas Otis, Ph.D.
Arnold B. Scheibel, M.D.
Richard W. Young, Ph.D.
Jaime Villablanca, Ph.D.
John D. Schlag, M.D.
Earl Eldred, M.D.
John H. Campbell, Ph.D.
Ellen R. Dirksen, Ph.D.
Earl Eltred, M.D.
Lawrence Kruger, Ph.D.
John Lu, Ph.D.
Yvaz V. O’Neill, Ph.D.
John D. Schlag, M.D.
José P. Segundo, M.D.
M.B. Starman, Ph.D.
Jaime Villablanca, Ph.D.
Charles Woody, Ph.D.
Richard W. Young, Ph.D.
Emery G. Zimmermann, M.D., Ph.D.
Associate Professors
Dario L. Ringach, Ph.D.
Felix E. Schweizer, Ph.D.
Assistant Professors
James W. Bisley, Ph.D.
Lars Dreier, Ph.D.
Baljit S. Khakh, Ph.D.
Bennett G. Novitch, Ph.D.
Carlos Portera-Caillau, Ph.D.
Joshua T. Trachtenberg, Ph.D.
Adjunct Professor
Ronald Szymusiak, Ph.D.

Scope and Objectives
The Department of Neurobiology offers advanced training leading to the Ph.D. degree. Graduates can anticipate an academic career at the college or university level or as a basic science researcher at a research institute or biotechnology company. In accord with this the department strives to produce graduates soundly qualified both for teaching at the college or university level and for the conduct of original research in neurobiology.

The overall objective of the Ph.D. program is to provide a strong theoretical and practical foundation in the area of cellular and systems neurobiology, with the goal to develop a better understanding of normal and pathological brain function and behavior. The graduate program provides (1) basic and advanced instruction in the fundamentals of neuroscience, (2) advanced independent research training in the areas of cellular, structural, and systems neurobiology, and (3) teaching experience in undergraduate, graduate, and professional (dental and medical) courses in neuroscience. The program is targeted toward highly qualified and self-motivated doctoral students who take advantage of a flexible curriculum characterized by extensive informal and formal interactions with faculty in small groups and on an individual tutorial basis. The curriculum is structured to allow students extensive opportunities for critical examination of contemporary neuroscience literature and research and for the development of oral and written communication skills.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Neurobiology offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Neurobiology.

Medical History
Upper Division Courses
107A-107B. Historical Development of Medical Sciences. (4-4) Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. P/NP or letter grading. 107A. Contributions of medicine and medical personalities from earliest times through 1650. 107B. Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

M169. History of Neurosciences. (4) (Same as Neurobiology M169.) Lecture, one hour; discussion, two hours. Development of neurosciences, especially neuroanatomy and neurophysiology, from Enlightenment era through latter 20th century. Emphasis on fundamental nerve functions, cell communication, and technological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.

Graduate Course
596. Directed Individual Studies in Medical History. (2 to 12) Tutorial, to be arranged. Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences. S/U or letter grading.

Neurobiology
Lower Division Course
88. Lower Division Seminar: Special Topics in Neurobiology. (4) Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Entry-Level Writing requirement. Variable topics seminar that examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of professional school faculty member. Letter grading.

Upper Division Courses

M168. Ideas and Experiments in History of Physiology. (4) (Same as Physiological Science M168.) Lecture, three hours. Interaction of concepts and experimental techniques in physiology from the early 19th to latter 20th centuries, including heart and circulation, hormones, nutrition and vitamins, brain, spinal cord, and peripheral nervous system, as well as development of physiology as scientific discipline. Discussion of weekly readings and presentations by students. Letter grading.

M169. History of Neurosciences. (4) (Same as Medical History M169.) Lecture, one hour; discussion, two hours. Development of neurosciences, especially neuroanatomy and neurophysiology, from Enlightenment era through latter 20th century. Emphasis on fundamental nerve functions, cell communication, and technological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.

197. Individual Studies in Neurobiology. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter may be required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Neurobiology. (2 to 8) Tutorial, to be arranged. Limited to juniors and seniors. Supervised individual research or investigation under guidance of faculty mentor. Studies in anatomy and related subject areas appropriate for training of particular students, which includes reading assignments or laboratory work leading to final oral or written report. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

Graduate Courses
M200A. Synapses, Cells, and Circuits. (4) (Same as Neuroscience M200A.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.

M200B. Cell, Developmental, and Molecular Neurobiology. (6) (Same as Molecular, Cell, and Developmental Biology M200B and Neurobiology M200B.) Lecture, six hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

M200C. Sensory Systems Neurobiology. (4) (Same as Neuroscience M221.) Lecture, two hours; discussion, two hours. Fundamental topics in sensory systems neurobiology, including sensory transduction, taste and olfaction, audition, vision, and somatosensory system. Letter grading.
220. Structural Neurobiology. (4) Lecture, four hours. Fundamental topics in motor systems neurobiology, including muscle, motor units, and motoneuron pools, spinal motor control, reflexes, locomotion, basal ganglia, cerebellum, and eye movements. Letter grading.

220E. Regulatory, Behavioral, and Cognitive Neurobiology. (6) Lecture, discussion, two hours; laboratory, two hours. Topics include hypothalamus, cardiovascular system, breathing, food intake and metabolism, water intake and body fluids, neuroendocrine system, circadian timing, sleep and dreaming, psychosocial development, motivation, reward and addiction, cognitive development, object, face, and spatial recognition, learning and memory, language and communication, and thinking and problem solving. Letter grading.

M200F. Cellular Neurophysiology. (4) (Same as Neuroscience M202 and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requirements: Molecular, Cell, and Developmental Biology 171 or Physiological Science 166, and Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

M200G. Biology of Learning and Memory. (4) (Same as Molecular, Cellular, and Integrative Physiology M200G, Neuroscience M220, and Psychology M220.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

220. Structural Neurobiology. (2) Lecture, two hours; discussion, two hours; laboratory, two hours. Introduction to molecular structure of chemical, electrical, and mixed synapses as determined by imaging methods such as electron tomography. Comprehensive review of current principles governing synaptic transmission and balanced account of some of top cellular and molecular mechanisms of synaptic function. Letter grading.

M227. Neuroendocrinology of Reproduction. (4) (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Preparation: undergraduate life sciences and chemistry courses. Structural, functional, and developmental aspects of neuroendocrine and reproductive organs, with emphasis on feedback regulatory mechanisms between hypothalamic-pituitary and gonadal functions and on functional integration of neuroendocrine-reproductive axis at cellular and molecular levels. Letter grading.

270. Joint Seminar: Neuroscience Lectures. (1) (Formerly numbered 270A-270B-270C.) Seminar, one hour. Formal lectures on current research topics in neuroscience by speakers from national, international, and local neuroscience communities. S/U grading.

M287. Dynamics of Neural Microcircuits. (4) (Same as Neuroscience M287.) Lecture, two hours; discussion, two hours. Development of integrative understanding of neural microcircuits that underlie specific functions of sensory processing, generation, and coordination of motor activity, as well as generation and modulation of neural rhythms. Letter grading.

95. Preparation for Teaching in Anatomical Sciences. (2-2-2) Seminar, one hour; discussion, one hour. Advanced seminar courses in neurobiology to be offered by different departmental faculty members. Topics are grouped thematically. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Designed for graduate students. Observation and practice of methods of teaching in anatomy. May include preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. S/U grading.

Neurology

Upper Division Course

199. Directed Research in Neurology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. FINP or letter grading.

Neuroscience

Interdepartmental Undergraduate Program

College of Letters and Science

UCLA

C-153 Reed Neurological Research Center
Box 951769
Los Angeles, CA 90095-1769
(310) 825-5521
fax: (310) 825-1730

Chairs

John C. Mazzotti, M.D., Ph.D., Chair (Frances Stark Professor of Neurology)
Andrew Charley, M.D., Vice Chair of Programs and Research
Barbara Giesser, M.D., Vice Chair of Clinical Affairs
Barbara G. Vickery, M.D., M.P.H., Vice Chair of Academic Affairs
Hugh B. McIntyre, Jr., M.D., Ph.D., Acting Vice Chair, Harbor-UCLA
Alan Shewmon, M.D., Vice Chair, Olive View-UCLA
Claude G. Wasterlain, M.D., Vice Chair, VA Southern California

Scope and Objectives

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental...
interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

Undergraduate Study

Neuroscience B.S.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; one course from Statistics 10 or 13.

Each core curriculum course must be passed with a grade of C− or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving grades below C− in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

Transfer applicants to the Neuroscience major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, one semester of organic chemistry with laboratory, and one statistics course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospective/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

The following 12 courses are required for the Neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 1: Neuroscience M101A, M101B, M101C, 102, Chemistry and Biochemistry 153A, 153L

Group 2: Three electives (one from each area) as follows:

Area 2C: One molecular, cell, and developmental neuroscience course from Neuroscience M130, M145, M148, C177, 191C, Physiological Science C126, M145, 146, 147, 148

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms) or 198A and 198B (one term in each course) or Psychology M181A and M181B (with approval of the neuroscience curriculum committee before start of project; one term in each course). All majors who elect to do two terms (one term applies toward Group 3 and one toward Group 4) of Neuroscience 198A and 198B or 199 or Psychology M181A and M181B must do one term of Neuroscience 99 in the same laboratory. In addition, they must submit a poster to the neuroscience undergraduate poster session or the curriculum committee prior to graduation.

Group 4: Two additional elective courses from the Group 2 or 3 list or from Neurobiology/Medical History M169 or Physiological Science 135. Students who select two terms of Neuroscience 198A and 198B or 199 or Psychology M181A and M181B must select only one additional elective to satisfy Group 4.

Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted.

No more than eight courses may be from any one department. A maximum of 8 units of Neuroscience 198 or 199 (in any combination) may be applied toward the major. Each required and elective course must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

Honors Program

The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis. Majors who have completed all preparation courses with a grade-point average of 3.0 or better and an overall GPA of 3.2 or better may apply for admission to the honors program. Applications and program requirements are available in the Neuroscience Undergraduate Office and at http://www.neurosci.ucla.edu. Students must submit the application before beginning their upper division honors requirements. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

Neuroscience Minor

The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.
C172. Neuroimaging and Brain Mapping. (4) Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Psychological Science M180A or Psychology M171A) or Molecular, Cell, and Developmental Biology 171 or Psychological Science 111A or Psychology 115. Strongly recommended: course 102. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relations discussed with regard to imaging. Concurrently scheduled with course CM272. Letter grading.

C177. Drugs of Abuse from Neurobiology to Policy and Education. (4) Lecture, four hours. Enforced requisite: course M101A. Course ranges from synaptic to societal. Focuses on didactic on current neuroscientific basis for understanding substance abuse and blends that material with relevant topics such as epidemiology, co-occurring disorders, treatment options, prevention, and public policies, with emphasis on communication of course materials to general public. Concurrently scheduled with course CM277. Letter grading.

178. Human Electroencephalography and Evoked Potentials in Research and Clinical Diagnosis. (4) Seminar, four hours. Enforced requisite: course M101A. Not open for credit to students with credit for course 191A, seminar 1. Emphasis on human electroencephalogram (EEG) and sensory-evoked potentials. Introduction to number of experimental paradigms that allow for recording of different brain signals from brainstem to cortex. Letter grading.

180. Genetic, Molecular, and Genomic Approaches to Neurological and Developmental Disease. (4) Seminar, three hours. Enforced requisite: courses M101A, M101B. Not open for credit to students with credit for course 191C, seminar 2. Cellular models of learning and memory. Genetic and genomic approaches to studying nervous system development and disease. Overview of current technologies used to generate mouse models for genetic and phenotypic analysis. Review of techniques for studying development and disease. Integrative genomic approaches for identifying and characterizing gene(s) involved in these processes. Emphasis on mouse models, but other model organisms considered as well. Letter grading.

181. Cellular and Molecular Mechanisms of Learning and Memory. (4) Seminar, four hours. Enforced requisite: course M101A. Not open for credit to students with credit for course 191C, seminar 2. Cellular models of learning and memory. Genetic and molecular approaches to learning and memory. Learning and memory deficits in neurodegenerative diseases. LTP and LTD models. Letter grading.

191A-191B-191C. Variable Topics Research Seminars: Neuroscience. (4-4-4) Seminar, three hours. Topics on one or more aspects of neuroscience. Reading, discussion, and development of culminating project. May be applied as elective only in specific area of group 2. Each course may be repeated once for credit. P/NP or letter grading. 191A. Behavioral and Cognitive Neuroscience. Requisite: course M101A or Physiological Science 111A. 191B. Systems and Integrative Neuroscience. Requisite: course M101A or Physiological Science 111A. 191C. Molecular, Cell, and Developmental Neuroscience. Enforced requisite: course M101B.

191H. Honors Seminars: Neuroscience. (4) Seminar, four hours. Preparation: one statistics course (Statistics 100A, 104A, or 105A). Open only to honors program students. Instruction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for major. Must be taken during Winter Quarter of academic year that students enroll in courses 198A and 198B. Letter grading.

192B. Project Brainstorm: Neuroscience K-12 Outreach. (4) (Formerly numbered 195.) Seminar, one hour; fieldwork, three hours. Limited to junior/seniors. Course to be supervised by faculty and teaching assistant advisers. Project Brainstorm is K-12 science education outreach program of Brain Research Institute (BRI) and Neurosciences Ph.D. and under-graduate programs that stimulates interest in science for children and young adults in grades K-12 by providing hands-on learning experiences that emphasize function and importance of brain. Students expected to prepare age-appropriate lesson plans to be used in Project Brainstorm classroom visits. Students meet on regular basis with supervisors and provide periodic reports of their experience. May not be applied toward major requirements. May be repeated twice for credit. P/NP grading.

193. Journal Club Seminars: Current Research in Brain Development and Regeneration. (1) Seminar, one hour. Enforced requisite: course M101B. Limited to graduate students. Review and discussion of recent research papers that make potential breakthroughs in understanding of brain development and regeneration. May be repeated for credit. P/NP grading.

198A. Honors Research in Neuroscience. (4) Tutorial, 12 hours minimum. Requisites: courses 99, M101A. Limited to neuroscience honors program students. Directed independent research involving extensive reading and development of honors thesis or comprehensive project under direct supervision of faculty member. For departmental honors, students must also take course 191H. Minimum of 6 units of courses 198A, 198B, 199 may be applied toward major. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

198B. Honors Research in Neuroscience. (4) Tutorial, 12 hours minimum in laboratory. Requisite: course 198A. Continued reading and research that culminate in honors thesis under direct supervision of faculty member. For departmental honors, students must also take course 191H. Minimum of 6 units of courses 198A, 198B, 199 may be applied toward major. Individual contract required. Letter grading.
The Neuroscience Program prepares students for careers in neuroscience research and education. The hallmark of the program is an integrated approach to study of the nervous system, using the multilevel analytical tools of molecular, cellular, systems, and/or behavioral biology, as well as quantitative approaches from the fields of mathematics, physics, and engineering. Students working at one or two analytical levels nevertheless learn to appreciate the methods and advantages of other levels of analysis. Emphasis is both on mechanisms of neural function and the biological basis of disease. Students select their research mentor from the list of all neuroscience faculty at UCLA.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree
The Neuroscience Program offers the Doctor of Philosophy (Ph.D.) degree in Neuroscience.

Neuroscience Graduate Courses
M201. Cell, Developmental, and Molecular Neurobiology. (6) (Same as Molecular, Cell, and Developmental Biology M220 and Neurobiology M220B.) Lecture, six hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

M202. Cellular Neurophysiology. (4) (Same as Neurobiology M202F and Physiological Science M269.) Lecture, three hours; discussion, two hours. Requisites: Molecular, Cell, and Developmental Biology 171 or Physiological Science 166, and Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, ionic pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

M203. Neuroanatomy: Structure and Function of Nervous System. (4) (Same as Biomedical Engineering M283.) Lecture, three hours; discussion/laboratory, three hours. Anatomy of central and peripheral nervous system at cellular histological and regional systems level, with emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems. Letter grading.

M204. Synapses, Cells, and Circuits. (4) (Same as Neurobiology M284.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.

205. Systems Neuroscience. (4) Lecture/discussion, four hours. Introduction to fundamentals of systems neuroscience, with emphasis on integration of molecular mechanisms, cellular processes, anatomical circuits, and behavioral analysis to understand function of neural systems. Letter grading.

M206. Neuroengineering. (4) (Same as Biomedical Engineering M260 and Electrical Engineering M255.) Lecture, four hours; laboratory, three hours; outside study, five hours. Requisites: Mathematics 32A, Physics 1B or 8B, Introduction to principles and technologies of biotechnology and neural signal recording, processing, and stimulation. Topics include biologic, electrophysiology (action potentials, local field potentials, EEG, ECOG), intracellular and extracellular recording, microelectrode technology, neural signal processing (neural signal frequency bands, filtering, spike detection, spike sorting, stimulation artifact removal), brain-computer interfaces, deep-brain stimulation, and prosthetics. Letter grading.

207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2) Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

215. Variable Topics Research Literature Seminars: Neuroscience. (1) Seminar, two hours. Critical discussion and analysis of current literature for various neuroscience research topics. Only one topic may be taken twice for credit and applied toward neuroscience graduate requirements. S/U grading.

M220. Biology of Learning and Memory. (4) (Same as Molecular, Cellular, and Integrative Physiology M200G, Neurobiology M200G, and Psychology M208.) Lecture, four hours. Molecular, cellular, circuit, systems, and neuroanatomical elements, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

M221. Sensory Systems Neurobiology. (4) (Same as Neurobiology M200C.) Lecture, two hours; discussion, two hours. Fundamental topics in sensory systems neurobiology, including sensory transduction, transfer, and adaptation, audition, vision, and somatosensory system. Letter grading.

M230. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Physiological Science M210 and Psychology M210.) Lecture, four hours; discussion, one hour. Requisites: course M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation. Letter grading.
240. Phenotypic Measurement of Complex Traits. (4) Lecture, three hours. Preparation: background in human genetics helpful. Integrative approach to understanding gene to behavior pathways by examination of levels of phenotype expression across systems (cell, brain, organism), across species (invertebrate, fly, mouse, human), and throughout development across varying environmental milieus. Using examples from human disorders such as schizophrenia and Alzheimer's disease, linking of these diverse approaches in genetic research to map out integrative system of understanding basis of complex human behavior. Emphasis on basic understanding of methods used at each level of phenotype analysis, along with major resources that can be accessed to gain insight to gene-behavior link. S/U or letter grading.

255. Functional Organization of Behavior. (2) Lecture, two hours. Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

M263. Neuronal Mechanisms Controlling Rhythmic Movements. (4) (Same as Physiological Science M263.) Requisite: Physiological Science M145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotyped movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn. 

M264A-M266B-M268C. Seminars: Cellular Neuroscience. (2 to 4 each) (Same as Physiological Science M264B.) Seminar, two to four hours. Requisite: course M202. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students are required to present two-hour seminar. S/U or letter grading.

M265. Advanced Magnetic Resonance Imaging. (4) (Same as Biomedical Physics M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruc- tion more intuitive than mathematical. Letter grading.

M273. Neural Basis of Memory. (4) (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

M275. Functional Neuroimaging: Techniques and Applications. (3) (Same as Biomedical Engineering M284, Biomedical Physics M285, Psychiatry M285, and Psychology M278.) Lecture, three hours. In-depth examination of activation imaging, including MRI and electrophysiological methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Focus on understanding techniques, how to design activation imaging paradigms, and how to interpret compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

M287. Dysfunctions of Neural Microcircuits. (4) (Same as Neurobiology M287.) Lecture, two hours; discussion, two hours. Development of integral understanding of neural microcircuits that underlie specific functions of sensory processing, generation, and coordination of motor activity, as well as generation and modulation of neural rhythms. Letter grading.

M293. Culture, Brain, and Development Forum. (1) (Same as Anthropology M293, Applied Linguistics M232, Education M285, and Psychology M248.) Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide students with exposure to current research in understanding complex relationships between culture, brain, and development. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel experience as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Methods in Neuroscience Public Education. (2) (Seminar, one hour; fieldwork, six hours. Designed for juniors/seniors and graduate students. Training and supervised practicum for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. S/U grading.

Courtney H. Lyder, N.D., G.N.P., F.A.A.N., Dean
Adeline M. Nyamathi, A.N.P., Ph.D., F.A.A.N., Acting Associate Dean for Academic Affairs, Acting Associate Dean for Research
Suzette Cardin, R.N., D.N.Sc., F.A.A.N., Assistant Dean for Student Affairs

**Professors**

Lynn V. Doering, R.N., D.N.Sc., F.A.A.N., Ph.D.
Joyce A. Newman Giger, R.N., Ed.D., F.A.A.N. (Lulu Wolf Hassenplug Professor of Nursing)
Felicia S. Hodge, Dr.P.H.
Mary A. Lewis, R.N., Ph.D., P.N.P., F.A.A.N.
Courtney H. Lyder, N.D., G.N.P., F.A.A.N.
Adeline M. Nyamathi, A.N.P., Ph.D., F.A.A.N. (Audrienne H. Moseley Professor of Community Health Research)
Linda R. Phillips, R.N., Ph.D., F.G.S.A., F.A.A.N.
Linda P. Sanna, R.N., D.N.Sc., F.A.A.N.
Mary A. Wool, R.N., D.N.Sc., F.A.A.N.

**Professors Emeriti**

Nancy L.R. Anderson, R.N., Ph.D., N.P.-C., A.O.C.N., F.A.A.N.
Lina K. Badr, R.N., D.N.Sc., P.N.P.-C., F.A.A.N.
Ollye Y. Burner, R.N., Ph.D.
Betty L. Chang, R.N., D.N.Sc., F.N.P.-C., F.A.A.N.
Barbara A. Davis, R.N., Ed.D.
Kathleen Dracup, R.N., Ph.D., F.A.A.N.
Jacquelyn H. Flaskerud, R.N., Ph.D., F.A.A.N.
Charles E. Lewis, M.D., Sc.D.
Donna K. McNeese-Smith, R.N., Ed.D., C.N.A.
Sharon J. Reeder, R.N., Ph.D., F.A.A.N.
Maria W. Saraydarian, Ph.D.
Gwen M. Van Servellen, R.N., Ph.D., F.A.A.N.
Donna V. Steeg, R.N., Ph.D., F.A.A.N.
Donna L. Vredevoe, Ph.D.
Frances M. Wiley, R.N., M.N.

**Associate Professors**

Barbara M. Bates-Jensen, R.N., Ph.D.
Margaret A. Compton, R.N., Ph.D., F.A.A.N.
Karen H. Gylis, R.N., Ph.D.
Mary Sue V. Hellermann, R.N., Ph.D.
Janet C. Mentles, R.N., Ph.D., G.N.P.
Wendie A. Robbins, R.N., Ph.D., N.P., F.A.A.N. (Audrienne H. Moseley Professor of Biological Nursing Science)
Dorothy J. Wiley, R.N., Ph.D.

**Assistant Professors**

Jo-Ann O. Eastwood, R.N., Ph.D.
Lorraine S. Evangelista, R.N., Ph.D.
Leah FitzGerald, R.N., Ph.D., C.F.N.P.
Marie N. Fongwa, R.N., Ph.D.
Angela L. Hudson, R.N., Ph.D., F.N.P.
Eufemia Jacob, R.N., Ph.D.
Linda Searle Leach, R.N., Ph.D., C.N.A.A.
Paul M. Macey, Ph.D., in Residence
Sally L. Maliski, R.N., Ph.D.
 Aurelia M. O’Connell, R.N., Ph.D., A.C.N.P., B.C., C.C.R.N.
Carol L. Pavlish, R.N., Ph.D.
Sophie Sokolow, Ph.D., M.P.H.
D. Lynn Woods, R.N., Ph.D., G.N.P., F.A.A.N.
Kymna N. Wright, R.N., Ph.D., M.S.N., M.P.H., C.P.N.P.

**Lecturers**

Jody Adams-Renteria, R.N., M.N., F.N.P.
Lucy Artini, R.N., M.N., F.N.P.
Katherine G. Baker, R.N., M.N.
John Barnes, R.N., M.S.N.
Melinda D. Beswick, R.N., M.S.N.
Nancy Jo Bush, R.N., M.N.
Mary M. Canobio, R.N., M.N., F.A.A.N.
Rebecca Cross, R.N., Ph.D., F.N.P.
Maggie Dewan-Smith, R.N., M.S.N., N.P.
Patricia Duncan, R.N., M.S.N.
Jan M. Fredrickson, R.N., M.N., C.P.N.P.
Catherine Gabster, R.N., M.S.
Lorraine Garcia-Teague, R.N., Ph.D., N.P.
J. Kelly Graves, R.N., Ph.D.
Laurie Love-Bibbero, R.N., M.S.N., F.N.P.
Young Kee Markham, R.N., M.N., F.A.A.N.
Nancy E. McGrath, R.N., M.N., C.P.N.P.
Eric McLaughlin, Ph.D.
Josephine D. Ortiz, R.N., M.S.N., F.N.P.
Jeanette Polaskech, R.N., M.S.
Deborah A. Rice, R.N., M.N., F.P.N.-C.
Joan Schleper, R.N., M.S.N., G.N.P.
Aaron Streiflow, R.N., F.N.P., Ph.D.
Jane Tokunow, R.N., M.S.N., F.A.A.N.
Inese Verzemnieks, R.N., Ph.D.
Anna Maybellie Vilenesenda, R.N., M.S.N.
Susan Woodland, R.N., M.S.N., N.P-C.

**Adjunct Professors**

Mary P. Cadogan, R.N., Dr.P.H., G.N.P.

**Adjunct Associate Professor**

Colleen K. Keenan, R.N., Ph.D., F.W.H.C.N.P.

**Adjunct Assistant Professor**

Karabi Sinha, Ph.D.

**Scope and Objectives**

A strong scientific basis underlies the teaching of nursing practice, leadership, and research. Related clinical experiences are arranged within the UCLA Medical Center, its affiliates, other major medical centers, or in selected community sites.

At the generic bachelor’s level, nurses are prepared as generalists with special skills in primary, secondary, and tertiary prevention and care within a population-based context, leadership, and evidence-based practice. A program designed for associate degree or diploma nurses provides an opportunity to learn about community-based nursing care while providing a foundation for entering the advanced practice nurse master’s degree program. At the master’s level, nurses are prepared as generalists in hospital-based care or for advanced nursing practice as nurse practitioners, clinical specialists, or administrators in a variety of settings and specialized areas of healthcare. The Ph.D. program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

**Undergraduate Study**

**Nursing B.S.**

Two undergraduate programs are offered: Nursing B.S. (Generic/Prelicensure) for non-nurses and Nursing B.S. (R.N. to B.S./Postlicensure) for registered nurses.

**Generic/Prelicensure**

The focus of the generic/licensure program is on the preparation of nurse generalists with special skills in primary, secondary, and tertiary prevention and care within an individual- and population-based context while developing the basics for a strong leadership role. Students learn the art and science of nursing us-

**Transfer Students**

Transfer applicants to the Nursing major with 90 or more units must complete the following introductory courses prior to admission to UCLA: communications, human anatomy, human physiology, inorganic and organic chemistry, cells, tissues, and organs, molecular biology, and psychology.

**The Major**

Required: Biostatistics 100A, Nursing 115, 150A, 150B, 152W, C155, C160, 161, 162A, 162B, 163, 164, 165A, 165B, 166, 167, 168, 169, 171C, 171D, 173, 174. Transfer students must complete Nursing 10, 20, 50, 54A, and 54B on entry. Students may request to pursue a minor in a related field if the coursework can be completed within the 216-unit limit.

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

Each required nursing course in the school must be completed with a grade of C or better (C- grade is not acceptable).
required knowledge needed for professional nursing in a changing society and to build on their earlier associate degree or diploma education. The program also provides a bridge for students who may wish to prepare for advanced practice study at the graduate level.

Emphasis is placed, throughout the curriculum, on concepts related to (1) contributing to the visibility of academic health centers through responsiveness to community needs, (2) improving care of the underserved in community clinics in inner-city urban and rural settings, and (3) redesigning the role of public (community) healthcare through community outreach, home-based health services, and population-based health promotion.

Admission
The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission, beginning in the junior year, requires licensure as a registered nurse and a minimum of one year of full-time experience as an R.N. within the past five years, completion of requisite courses, scholarship, and attainment of a passing score on four Excelsior College Examinations. Students must have a grade of C or better in each requisite course and an overall grade-point average of 3.0 or better prior to admission.

Three recommendation forms and a written statement of purpose are also required. Diversity of life experiences, including previous employment, volunteer work, and community service that reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated for all applicants. Consideration is also given to students who are socially, economically, and educationally disadvantaged. Completed applications should reflect clearly identified career goals and documentation of potential in advanced practice nursing.

Transcripts of all high school and college work must be submitted to the UCLA Office of Undergraduate Admissions and Relations with Schools and the School of Nursing. Applicants already enrolled at UCLA need to submit transcripts to the School of Nursing.

Preparation for the Major
Required: Completion of each University and school requirement course with a grade of C or better (C– grade is not acceptable) prior to admission as follows: human anatomy (one course), sociocultural anthropology (one course), humanities (one or more courses), introductory or general microbiology with laboratory (one course), introductory physics (one course or one year of high school physics with laboratory with a grade of B or better), human physiology (one course), introductory psychology (one course), introductory sociology (one course).

The Major
Required: Completion of 76 to 85 units of lower and upper division coursework, including Bio-statistics 100A, Chemistry and Biochemistry 14A, 14B, 14C, Life Sciences 2, 3, Nursing 50, 102, C109, 152W, C160, 168, 171C, 171D, 173, 174, 200, 220, and one or more courses from 213A, 214F, 216F, 219A, 232F, and three 4-unit electives related to nursing to be selected with consent of the adviser, depending on student interest and area of concentration.

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

Each required nursing course in the school must be completed with a grade of C or better (C– grade is not acceptable).

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The School of Nursing offers the Master of Science in Nursing (M.S.N.) degree and the Doctor of Philosophy (Ph.D.) degree in Nursing. A concurrent degree program (Nursing M.S.N./Management M.B.A.) is also offered.

Nursing
Lower Division Courses
10. Introduction to Nursing and Social Justice I. (2) Lecture, two hours. Within context of history of nursing, introduction to practice of nurses, including role of advocacy. Discussion of effective use of self as professional nurse in relation to ethics, cultural competence, and human diversity. Introduction to ethical principles (justice, autonomy, veracity, beneficence, confidentiality) and professional values (altruism, autonomy, human dignity, integrity, and social justice) in relation to nursing practice throughout history. Letter grading.
20. Introduction to Nursing and Social Justice II. (2) Lecture, two hours. Advanced discussion on history of nursing, with focus on role of contemporary nursing in relation to ethics and social justice. Analysis of ethical principles (justice, autonomy, veracity, beneficence, confidentiality) and professional values (altruism, autonomy, human dignity, integrity, and social justice) in relation to nursing practice throughout history in health/illness and end-of-life contexts. Letter grading.

54B. Pathophysiology II. (2) Lecture, two hours. Requisite: course 54A. Designed to provide students with understanding of pathophysiological changes that occur within internal environments of individuals. Presence of dysfunction or disease of selected systems provided as rationale for nursing diagnosis and therapeutic interventions. Letter grading.

Upper Division Courses
102. Professional Nursing in Culturally Diverse Communities. (5) Lecture, four hours; community experience, three hours. Introductory course to assist registered nurses in transition to professional nursing in context of complex and dynamic healthcare system. Analyses include individual and population-based approaches to healthcare in dynamic multicultural communities. Letter grading.
105. Human Physiology. (4) Lecture, three hours; discussion, one hour. Designed for nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body. P/NP or letter grading.
115. Pharmacoology and Therapeutics. (5) Lecture, four hours. Requisites: courses 54A, 54B. Clinical pharmacology for undergraduate nursing students, beginning with emphasis on basic pharmacologic principles. Focus on major drug classes and their mechanism of action, pharmacokinetics, adverse effects, and clinical issues. Letter grading.
150A. Fundamentals of Professional Nursing. (4) (Formerly numbered 150.) Lecture, four hours. Introduction to practice of professional nursing as theory-based goal-directed method for assisting patients to meet basic human needs at various levels of health continua. Concepts of communication, interdisciplinary communication and collaboration, interpersonal relationships, and nursing process as clinical decision-making strategy essential to practice of professional nursing. Essentials of nutrition. Characteristics and roles of professionals. Development of professional role of advocate, teacher, and collaborator roles in learning experiences in nursing skills laboratory and clinical settings. Letter grading.
150B. Fundamentals of Professional Nursing Laboratory. (1) Laboratory, four hours. Requisite: course 150A. Introduction to practice of professional nursing as theory-based goal-directed method for assisting patients to meet basic human needs at various levels of health continua. Concepts of communication, interdisciplinary communication and collaboration, interpersonal relationships, and nursing process as clinical decision-making strategy essential to practice of professional nursing. Learning experiences in nursing skills laboratory and clinical settings. P/NP grading.
152W. Human Development/Health Promotion in Culturally Diverse Populations. (5) (Formerly numbered 152.) Lecture, discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Limited to nursing students. Introduction to primary prevention strategies as they pertain to health and wellness across lifespan, using population-based approach to nursing care of diverse populations. Priorities of nutrition and reproductive health, including issues related to contraception and parenting; wellness; school-age health, and chronic illness prevention strategies for young- and middle-aged adults; elderly who live independently in communities or within institutions. Analysis of influential forces altering political, societal, and governmental systems within U.S. Satisfies Writing II requirement. Letter grading.

M158. Culture, Illness, and Healing. (4) Same as Anthropology M168. Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

C160. Secondary Prevention. (4) Lecture, four hours. Requisite: course 152. Corequisite: course 161. Screening and early detection of illness to prevent chronic or acutely deteriorating illness. Expanding on concepts of health and human development and using nursing process, application of nursing role in providing curative and preventive care to individuals and families to screen, diagnose, and treat illness at earliest possible time to prevent disability or premature mortality. Examination of health problems of individuals within context of family, community, and interdisciplinarily. Emphasis on differences in developmental stages in response to screening for early and late signs and symptoms of illness in ambulatory and acute care settings, community agencies, rehabilitation units, outpatient specialty clinics and surgical units, and home and community settings. Concurrently scheduled with course C260. Letter grading.

162A. Tertiary Prevention and Care: Medical-Surgical/Gerontology I. (4) Formerly numbered C165. Lecture, five hours. Requisites: courses 162A, 162B, 163, 164, 166, 167. Examination of pathophysiological and psychosocial aspects of assessment and management for selected acute and emergent problems of patients/clients across lifespan, with focus on their influence on family and community, and interdisciplinarily. Building on prior knowledge and experience, integration of basic knowledge of pathophysiology, diagnostics, pharmacology, therapeutic interventions, and communication concepts as applied to care of medical and surgical clients across lifespan. Discussion of application of nursing process, research, problem solving, and critical thinking. Letter grading.

162B. Tertiary Prevention and Care: Pediatrics. (3) Lecture, three hours. Requisites: courses 162A, 162B, 163, 164. Corequisite: course 167. Examination of pathophysiological and psychosocial aspects of assessment and management for selected acute and emergent problems of pediatric patients/clients, with emphasis on social, cultural, and developmental influences. Building on prior knowledge and experience, integration of basic knowledge of pathophysiology, diagnostics, pharmacology, therapeutic interventions, and communication concepts as applied to care of pediatric clients. Discussion of application of nursing process, research, problem solving, and critical thinking. Letter grading.

171D. Public Health Nursing. (3) Clinical, nine hours. Corequisite: course 171C. Clinical concentration in population-based public health nursing in culturally diverse settings, including health departments, health policy institutions, and public service agencies. Public health nursing practice activities focus on health promotion and disease prevention at level of communities, aggregates, systems, and both domestic and international populations. P/NP grade.

172. Introduction to Research. (4) Lecture, four hours. Introduction to planning research project based on simple question. Specific components of research activities analyzed: specific aims and study population, variables used for definition, data collection tools, data analyses, and ethical conduct in research studies. Critique of research reports. P/NP or letter grading.

174. Physical Assessment. (4) Lecture, three hours; laboratory, three hours. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering lifespan. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and required text are mandatory. Letter grading.

179. Individual Studies in Nursing. (2 to 4) Tutoring. One hour. Limited to junior/senior Nursing majors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

191. Health-Related Quality of Life. (2) Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, contexts, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

201. Health-Related Quality of Life. (2) Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, contexts, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

202. Philosophy of Nursing Science. (4) Lecture, four hours. Exploration of the philosophical base of nursing science, the contribution of scientific thought and research, and the relationship of the nursing process to the philosophy of nursing science. P/NP or letter grading.

203. History of Nursing Thought. (2) Lecture, two hours. Examination of the humanistic aspects of nursing and the role of the nurse as a historical figure in the development of nursing. Letter grading.
204. Research Design and Critique. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 173 or equivalent upper division basic research methodology course. Comprehensive research design and analysis of multiple variables, and research utilization. Emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of inferential statistical tests, study design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical problems and how these apply to clinical settings. Letter grading.

205A. Introduction to Qualitative Methods in Research. (4) Formerly numbered 205.) Lecture, four hours. Requisite: course 202. Introduction to qualitative research design in nursing science. Examination of major methodologies that guide qualitative research in relation to various strategies for data collection (interviews, participant observation, focus groups), data analysis, and data interpretation. Scientific rigor and ethical concerns for research with human participants critically examined. Letter grading.

205B. Advanced Qualitative Research Methodology I. (4) Lecture, four hours. Requisites: course 205A, submission of ORRS application for small pilot study in fall of second year. In-depth analysis of symbolic interactionism and pragmatism as foundation for study of grounded theory methodology as guide to study design. Development of sampling plan, interview strategies for data collection, and basic coding. Exploration of self-reflexivity and ethics in relation to entrée to field, recruitment of pilot study participants, interviewing, and preliminary data analysis via analytic, theoretic, and reflective memos based on pilot study data collected as part of course. Letter grading.

205C. Advanced Qualitative Research Methodology II. (4) Lecture, four hours. Requisites: courses 205, 205B. Advanced techniques for simultaneous collection and analysis of qualitative data. Expansion on traditional grounded theory analysis procedures by learning additional analytical and constructivist grounded theory techniques to analysis of data. Development of conceptual formulation (or grounded theory) of student-selected phenomenon based on student data collected and analyzed as part of course. Letter grading.

206. Nursing Theory Development. (4) Lecture, four hours. Examination of history of theoretical thinking in nursing and contextual issues that continue to influence development of nursing knowledge and nursing science. Application of skills fundamental to development of theory in nursing and integral to use of theory in nursing research. Letter grading.

207. Quantitative Research Designs of Clinical Phenomena. (4) Lecture, 3 hours; discussion, one hour. Introduction to wide array of quantitative research designs for testing clinical nursing phenomena. Emphasis on dynamic interaction between research process and theory, as well as on appropriate use of experimental, quasi-experimental, and correlational designs among diverse populations. Approaches for evaluation of validity of various research designs, with analysis of related threats to validity of each design. Letter grading.

209. Human Diversity in Health and Illness. (4) (Formerly numbered 209.) Lecture, four hours. Human diversity in response to illness that nurses diagnose and treat, especially in the context and culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Concurrently scheduled with course C109. Letter grading.

210A. Nursing Science of Individual Responses to Health and Illness. (4) (Formerly numbered 246.) Lecture, four hours. Designed for Ph.D. students. Exploration and in-depth analysis of state of science in relation to health services, biological and vulnerable populations, and biobehavioral nursing research. Exploration of research on particular phenomena, synthesis of existing findings in literature, critique of significance of focus on this phenomenon for nursing science, identification of causal factors and meaningful gaps in knowledge through systematic review of research literature, and recommendations for future nursing research in biologic, biobehavioral, vulnerable populations, and health services research strands. Letter grading.

210B. Independence of Theory and Research Questions in Nursing Science. (4) Formerly numbered 247.) Lecture, four hours. With focus on state of science in nursing research, analysis of critical interdependence of philosophical assumptions, theoretical conceptualizations of phenomena for study, and formulation of research questions for guiding nursing knowledge development. Role of theory as integral to design of research analyzed in relation to pragmatic mandate to produce useful results that enhance nursing practice and policy. Emphasis on trajectory of entire programs of research for phenomena of interest to nursing science and implications in areas of biologic, health services, and vulnerable populations. Letter grading.

210C. Nursing Intervention and Program Research. (4) Formerly numbered 248A.) Lecture, four hours. State of science of nursing intervention and program initiation, development, and evaluation. Critical review of research supporting interventions and programs to enhance nursing practice and quality of care for individuals and families across lifespan. Examination of philosophical assumptions as well as analytical processes for evaluating effectiveness of interventions and programs. Consideration of nursing interventions and programs from perspective of biologic, biobehavioral, health services, and vulnerable populations research strands. Letter grading.

211. Theoretical Foundations of Women's Health Care during Reproductive Years. (4) Lecture, three hours; discussion, one hour. Theory and research on assessment and management of women's health issues during reproductive years. Clinical topics include gynecology, family planning, pregnancy, and postpartum care, with emphasis on health promotion of women during reproductive years in primary care settings. Letter grading.

212. Health-Related Family Theory. (2) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on family. Family is defined broadly to include nontraditional families; consideration of cross-cultural views of families as well. Identification of limitations of current theory and research related to family study and applicability of current knowledge to various problems encountered in care of families. Letter grading.

213A. Occupational Health Nursing Role and Theory. (4) Lecture, four hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Letter grading.

217F. Human Responses to Critical Illness. (4) Lecture, three hours; discussion, one hour. Requisite: course 216F. Builds on pathophysiologic concepts and nursing management of acutely and critically ill adults presented in course 216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for acute care advanced practice nurses. Letter grading.

218C. Nursing Administration Theory. (4) Lecture, four hours. Requisite: course 218B. Project management, organizational communication, governance, development, and change. Focus on leadership within organizations, risk management, liability, and ethics of administration decision making. Emphasis on issues affecting local, national, and international healthcare management. Letter grading.

218D. Nursing Administration Theory. (4) Lecture, four hours. Requisite: course 218C. Community healthcare needs, political action and healthcare policy, marketing, and planning for future continuous personal and professional growth. Emphasis on issues affecting local, national, and international healthcare management and policy development. Letter grading.

219A. Essentials of Accounting and Budgeting in Healthcare Organizations. (4) Lecture, four hours. Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and healthcare economics. Focus on definition of terms and concepts, followed by practical applications within variety of healthcare settings. Letter grading.

220. Theories of Learning in Nursing. (3) Lecture, two hours. Theories of learning, curriculum, and program development, and principles and techniques of evaluation. Examination of educator role of clinical practice nurse in variety of settings and with diverse cultural and socioeconomic groups. Opportunities provided for skill development in use of computer-based information systems and development of instructional aids. Letter grading.

M221. Qualitative Research Design and Methodology for Indigenous Communities. (5) Same as American Indian Studies M202 and Health Services M202.) Seminar, three hours. Introduction to some key theoretical themes in American Indian studies and exploration of methods that can be used to incorporate them in research on American Indian cultures, societies, languages, and other issues. Quantitative methods, parts of qualitative methods, and on qualitative research methods, ethics, and special considerations in conducting research in American Indian country. Design of research and exploration of feasibility of researching topics. Letter grading.

222. Immunosuppression and Patient Care. (2) Lecture, two hours. Research related to immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on pathophysiologic mechanisms of immunosuppression as a basis for information used in patient education and clinical decisions, and supportive treatments and modifiers. Letter grading.

223. Childhood Development: Research and Application to Nursing. (3) Lecture, three hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Letter grading.

225A. Advanced Pharmacology I. (3) (Formerly numbered 225B.) Lecture, two hours. Course 225A is required prior to course 225B. Basic pharmacological principles in addition to clinical knowledge and skills necessary for care of clients/patients with stable acute or chronic illness. Focus on major drug classes and their mechanisms of action, pharmacokinetics, adverse effects, and clinical uses. Letter grading.

225B. Advanced Pharmacology II. (2) Lecture, two hours. Course 225A is required prior to course 225B. Knowledge of and skills in pharmacology necessary for care of clients/patients with stable acute or chronic conditions. Letter grading.

226. Seminar: Aging Research. (2) Seminar, two hours. Preparation: completion of first-year course work. In-depth examination of gerontological nursing concepts within context of specialty areas of research (acute care, oncology, occupational health, and gerontological nursing). Provides opportunity for students to integrate nursing concepts into their evolving dissertation research and to examine state of science in their areas of focus. Core facility from all specialty areas participate in discussions. S/U grading.

227. Ethnogeriatric Nursing. (4) Lecture, three hours. Course 209. Identification of unique content related to minority aging using Giger and Davidhizar Transcultural Assessment Model. Examination of transcultural nursing viewed as culturally competent practice that is both client centered and research focused. Exploration of difference between Eurocentric lens and gerontological lens when providing nursing care to ethnically and racially diverse elders. In-depth examination of issues related to conducting research with elders who are racially and ethnically diverse in variety of healthcare settings. Study design. Strategies for conducting research. Exposing the concept of informed consent of minority elders, and data collection techniques, including critique and use of data collection instruments used in community and long-term care settings. Behavioral observations, interviews, and surveys. Letter grading.

228. Research Methods for Aging Populations. (4) Lecture, three hours. Requisites: courses 204, 205A, 207. Familiarity with elder populations. In-depth examination of issues related to conducting research with elders in variety of healthcare settings. Study designs for conducting research in community and long-term care settings. Issues surrounding consent, planning for mortality and morbidity, data collection techniques for frail elders, including use of assessment tools used in community and long-term care settings, behavioral observations, interviews, and surveys, and statistical analysis techniques related to missing data, longitudinal data analysis, clustering, and repeated measures. Letter grading.

229. Biologic/Psychologic Interface in Health and Illness I. (4) Lecture/discussion, four hours. Focus on integration of physiologic, behavioral, and psychosocial factors in illness, and theory and research underlying these factors, including differential influence of gender, ethnicity, and cultural factors. Letter grading.

230A-230B. Advanced Pathophysiology I, II. (2-2) ( Formerly numbered 230B.) Lecture, two hours. Requisite: course 105 or equivalent taken within past five years. Course 230A is required prior to course 230B. In-depth examination of pathophysiological processes that underlie human illness and disease, with detailed study of these in major body systems. Analysis of manifestations of and responses to processes of cellular and molecular pathology at extracellular, system, and human levels. Letter grading.

232. Human Responses to Aging and Chronic Illness. (2) Lecture/discussion, four hours. Pathophysiologic concepts and nursing management of older adults who are healthy or who have disability and/or chronic illness. Nursing aspects of selected dysfunction implications and implications for advanced practice in gerontological nursing. Letter grading.

233. Human Responses to Aging and Chronic Illness. (4) Lecture/discussion, four hours. Pathophysiologic concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.

234. Human Responses to Aging and Chronic Illness. (4) Lecture/discussion, four hours. Biopsychosocial concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.

235. Human Responses to Aging and Chronic Illness. (4) Lecture/discussion, four hours. Biopsychosocial concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.

241. Biobehavioral Foundations of Neuropsychiatric Assessment. (2) Lecture, two hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment and diagnosis. Exploration of theory and research evidence underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a behavioral nursing approach. Letter grading.

241F. Biobehavioral Foundations of Neuropsychiatric Assessment. (4) Lecture, four hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment and diagnosis. Exploration of theory and research evidence underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a behavioral nursing approach. Letter grading.

242. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (2) Lecture, two hours. Concepts and principles of working with individuals and groups using psychotherapeutic nursing practices. Discussion of evolution of these modalities in nursing practice, as well as the research evidence underlying treatment of individuals with cognitive and attention deficits and thought, addictive, and mood disorders, with emphasis on developing a unified approach to management of biobehavioral symptoms in advanced nursing practice. Letter grading.

242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, four hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a biobehavioral nursing approach. Letter grading.

244. Theoretical Foundations of Complementary Healthcare II. (4) Lecture, four hours. Specialties of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

244F. Theoretical Foundations of Complementary Healthcare II. (4) Lecture, four hours. Specialties of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

245. Theoretical Foundations of Clinical Nurse Specialist Practice. (4) Lecture/discussion, four hours. Theoretical foundations of clinical nurse specialist practice, including systems theory, behavioral theories, consultation theory, change theory, and models of research utilization. Emphasis on applicability of relevant theories to clinical nurse specialist roles in healthcare systems through case study analysis, with focus on application to clinical practice settings which include culturally diverse populations. Letter grading.

249. Meeting Health-Related Needs in Under-served Populations. (4) Lecture, four hours. Requirements: course 439A. Examination of systematic barriers within healthcare settings that limit access to those in need of healthcare, including uninsured and marginalized populations. Analysis of current evidence-based interventions designed to address these challenges and improve outcomes in culturally competent manner. Presentation of current trends in healthcare financing, limited access, and public policy. Letter grading.

250. Ethical Issues, Social Justice, and History of Nursing. (5) Lecture, five hours. Interplay of social, cultural, legal, and political forces in the U.S. on the development of nursing roles and principles. Focus on categories of alternative systems developed for personal and public healthcare delivery in U.S. Letter grading.

259. Secondary Prevention. (4) Lecture, four hours. Requirements: course 252. Corequisite: course 225A. Screening and early detection of illness to prevent chronic or acutely deteriorating illness. Expanding on concepts of health and illness, using data driven, evidenced-based approach to nursing care of diverse populations. Priorities in reproductive health, including issues related to childbearing and parenting; well-child care, school-age health, and chronic illness prevention strategies for young- and middle-aged adults; priorities associated with aging, including chronic illness among both older and frail populations. Analysis of influence of evidence-based research on clinical practice, policy, and government systems. Letter grading.

254A. Theoretical Foundations of Master’s Entry Clinical Nurse Role. (4) Formerly numbered 254.) Lecture, four hours. Theoretical foundations of primary, secondary, and tertiary prevention strategies as they pertain to health and wellness across the life span, using data driven, evidenced-based approach to nursing care of diverse populations. Priorities in reproductive health, including issues related to childbearing and parenting; well-child care, school-age health, and chronic illness prevention strategies for young- and middle-aged adults; priorities associated with aging, including chronic illness among both older and frail populations. Analysis of influence of overarching political, societal, and government systems. Letter grading.

254B. Theoretical Foundations of Master’s Entry Clinical Nurse Role Fundamentals Laboratory. (1) Laboratory, three hours. Focus on application to clinical practice settings that include culturally diverse populations. Discussion of case management, outcomes coordination, leadership, risk management, information technology, and research utilization of MECN role as it relates to patient/client sphere of influence. Letter grading.

254B. Theoretical Foundations of Master’s Entry Clinical Nurse Role Fundamentals Laboratory. (1) Laboratory, three hours. Focus on application to clinical practice settings that include culturally diverse populations. Discussion of case management, outcomes coordination, leadership, risk management, information technology, and research utilization of MECN role as it relates to patient/client sphere of influence. Letter grading.

254C. Theoretical Foundations of Master’s Entry Clinical Nurse Role Fundamentals Laboratory. (1) Laboratory, three hours. Focus on application to clinical practice settings that include culturally diverse populations. Discussion of case management, outcomes coordination, leadership, risk management, information technology, and research utilization of MECN role as it relates to patient/client sphere of influence. Letter grading.

266. Healthcare Systems/Organizations. (4) Lecture, four hours. Development of understanding of ways healthcare is organized and delivered. Discussion of totality of healthcare systems, including establishment of private and public healthcare plans and delivery systems, development of managed care systems, common characteristics shared by HMOs, PPOs, and impact of managed care on nursing. Delivery of patient care within integrated care systems and on continuum of healthcare. Application of basic economic elements and financial concepts to nursing and healthcare organizations. Letter grading.

267. Healthcare Policy. (3) Lecture, three hours. Requisite: course 266. Analysis of healthcare policies and how policies impact national and state healthcare delivery. Discussion of concepts related to policy-making, specifically how to formulate healthcare policy, how to affect political process, and stakeholder involvement in policy decision making. Development of understanding of how increased levels of public, governmental, and third-party participation in and scrutiny of shape and direction of healthcare system. Current mandated assembly bills and their effect on nursing. Concepts associated with escalating healthcare costs and cost containment efforts instituted by private and government sectors, as well as by individual healthcare institutions. Letter grading.

269. Quality Improvement and Population-Based Quality of Practice. (4) Lecture, four hours. Requisite: course 268. Principal elements related to quality improvement theories and ways in which quality management impacts delivery of patient-centered and value-driven care, including improved system performance and efficient use of fiscal resources, quality improvement, and patient-population quality practice at organizational level. Review of individual methods to improve patient-care outcomes such as organizational support, effective teamwork, and quality-improvement concepts and strategies. Emphasis on quality management, adverse outcomes, evidence-based clinical and cost-control decision making, patient safety and risk reduction, resource management, and external impacts are applied to the delivery of healthcare services by advanced practice nurses in acute care settings. Letter grading.

270A-N25S. 400- to 600-Level Child Abuse and Neglect. (2-2-1) (Same as Community Health Sciences M244 and Psychiatry M247.) Seminar, three hours. Limited to 15 students. Examination of interdisciplinary approaches to the identification, management, prevention, and treatment of child physical and sexual abuse and neglect, with lectures by faculty members of Schools of Medicine, Law, Medicine, Nursing, and Public Health and Departments of Education, Psychology, Sociology, and Anthropology M273. Advanced Seminar: Medical Anthropology. (2 to 4) (Same as Anthropology M262, Community Health Sciences M244, and Psychiatry M247.) Seminar, three hours. Limited to 15 students. Examination of interdisciplinary approaches to the identification, management, and treatment of child physical and sexual abuse and neglect, with lectures by faculty members of Schools of Medicine, Law, Medicine, Nursing, and Public Health and Departments of Education, Psychology, Sociology, and Anthropology. Letter grading.

270A. Nursing Science Seminar. (1) Seminar, one hour. Introduction to nursing research methods, activities, and programs within specialty strands at UCLA School of Nursing: behavioral sciences, biologic sciences, health disparities/vulnerable populations, and health services. Exemplar work of UCLA nurse scholars highlighted. Overview of nursing research at UCLA and potential research opportunities for doctoral study. S/U grading.

270B-295C. Nursing Science Seminars. (1-2) Seminar, one hour. Requisite: course 250A. Introduction to grant writing, with focus on preparing applications for National Student Research Award. Discussion of requirements and specifications of basic organization funding sources, and evaluation criteria identified. Role of external funding to facilitate doctoral and postdoctoral research, research activities, and professional development. S/U grading.

M270. Interdisciplinary Response to Infectious Disease Emergencies: Nursing Perspective. (4) Lecture, three hours; discussion, one hour. Designed to prepare nurses for role in community emergency health problems and coordinated response, with specific attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Dentistry, Medicine, and Public Health during weeks two through five. Letter grading.

289A. Nursing Research Seminar. (2) Seminar, two hours. Seminar to assist students who are beginning careers in scientific research to understand issues of research design and conduct of research and protection of research subjects. S/U grading.

299B-299C. Nursing Research/Laboratory Experiences. (4-4) Seminar/discussion, one hour; research/laboratory, three hours. Requisites: courses 202, 209, 301. Seminar and research/laboratory-based experiences to assist students to prepare for careers as scientists, with focus on research methodology and mentorship. S/U grading.

299D. Nursing Education Seminar. (2) Seminar, two hours; discussion, one to two hours. Requisites: courses 206, 207, 208, 220. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

418A. Nursing Administration Practicum. (3 or 4) Clinic practicum, eight to 12 hours; clinical conference, one hour. Requisites: courses 219A, 219B. Synthesis, evaluation, and practical application of organizational theory in practice setting, with emphasis on content presented in course 218C, including strategic planning and management, care delivery systems, resource management, decision making, management information systems, professional practice, and meeting accreditation and legal standards. Letter grading.

418C. Nursing Administration Practicum. (3 or 4) Clinic practicum, eight or 11 hours; clinical conference, one hour. Requisites: courses 218A, 218B. Experience in organizational setting for synthesizing and evaluating content from course 218B, including strategic planning and management, care delivery systems, resource management, decision making, management information systems, professional practice, and meeting accreditation and legal standards. Letter grading.

418D. Nursing Administration Residency. (12) Clinical practicum, 33 hours; clinical conference, one hour. Requisites: courses 218C, 418C. Experience in organization setting as students assume leadership role in planning, managing, and evaluating administrative projects. Synthesizing of content from course 218D, including assessing community healthcare needs, marketing, media, and political action and healthcare policy. Letter grading.

Nursing / 499

438D. Pediatric Primary Care: Residency. (8) Clinical practicum, 24 hours. Requisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Research, theory, and clinical knowledge analyzed, integrated, and applied to care of children and families with actual or potential health problems. Letter grading.

439C. Advanced Practice Nursing: Clinical Practicum. (6) Clinical practicum, 24 hours. Corequisite: course 239C. Third clinical practicum course for advanced practice nurses, with focus on nursing management of adult complex patients/family presentations. Analysis, evaluation, and integration of current theory and research to provide basis for development of interventions and treatment for acute and chronic problems across lifespan. Letter grading.

441. Neuropsychiatric Subspeciality Clinical Seminar. (1 to 2) Clinical seminar, one hour; self-study, two hours. Requisites: courses 241F, 424F. Designed for advanced practice nurses in any nurse practitioner specialty. Neuropsychiatric assessment, treatment, and case presentations in selected populations with addictive, affective, and cognitive dysfunctions in relation to neurophysiology and pathology and to family, social, and cultural structures. S/U grading.

450. Advanced Practice Nursing: Clinical Elective Independent Study. (2 to 6) Clinical practicum, eight hours. Clinical elective designed to enhance skills and competencies in student-selected advanced practice specialty or related practice dimension, with emphasis on application and integration of theory and evidence-based practice knowledge. S/U grading.

495. Nursing Education Practicum. (2) Seminar, six hours. Supervised student teaching internship in preparation for academic roles. In-depth opportunity to gain skills in role of nurse educator within university setting, including application of instructional strategies and evaluation methods. S/U or letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Opportunity for individual graduate nursing students to pursue special studies or research interests. May be repeated for credit, but only 4 units may be applied toward degree requirements. S/U grading.

597. Individual Study for Comprehensive Examination. (4 to 8) Tutorial, to be arranged. Opportunity for individual graduate nursing students to prepare for comprehensive examination. May be repeated once for credit, but only 8 units may be applied toward Ph.D. degree requirements. S/U grading.

599. Research and for Preparation of Ph.D. Dissertation. (2 to 8) Tutorial, to be arranged. Individualized faculty supervision of Ph.D. dissertation research by student's chair. May be repeated for credit, but only 8 units may be applied toward Ph.D. degree requirements. S/U grading.

OBSTETRICS AND GYNECOLOGY

David Geffen School of Medicine

UCLA

27-117A Center for the Health Sciences Box 951740

Los Angeles, CA 90095-1740

(310) 206-6575

Chairs

Gautam A. Chaudhuri, M.D., Ph.D., Executive Chair
Andrea J. Rapkin, M.D., Executive Vice Chair
Brian J. Koos, M.D., D.Phil., Vice Chair, Academic Affairs

Michael T. Johnson, M.D., Vice Chair, Clinical Affairs
Christine H. Holschneider, M.D., Vice Chair, Olive View-UCLA
Ricardo Azziz, M.D., Vice Chair, Cedars-Sinai
Michael G. Ross, M.D., Vice Chair, Harbor-UCLA

Scope and Objectives

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women's health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year that emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology and infertility, gynecologic oncology, and reproductive health.
Ophthalmology

Upper Division Course

199. Directed Research in Ophthalmology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Cun-Yu Wang, Ph.D., D.D.S., Chair
Fariba S. Younai, D.D.S., Vice Chair

Professors
Carole B. Bibb, Ph.D., D.D.S.
Francesco Chiarelli, Ph.D.
Robert H. Chiu, Ph.D.
Susan Kinde Haake, Ph.D., D.M.D.
Diana Massedi, D.D.S., Ph.D.
Wenyuan Shi, Ph.D.
Igor Spigelman, Ph.D.
Sotiroi Treadis, Ph.D., D.D.S.
Lawrence E. Wolinsky, D.M.D., Ph.D.
Cun-Yu Wang, Ph.D., D.D.S.

Professors Emeriti
George W. Bernard, D.D.S., Ph.D.
Douglas Junge, Ph.D.
Bernard G. Sarnat, M.D., M.S., D.D.S.

Associate Professors
Anahid Jewett, M.P.H., Ph.D.
Mo K. Kang, Ph.D., D.D.S., M.S.
Kenneth T. Miyasaki, D.D.S., M.S., Ph.D.

Assistant Professors
Shen Hu, Ph.D.
Reuben Kim, Ph.D., D.D.S.
Clarice Law, D.M.D., M.S.
Jeanne Nervina, Ph.D., D.M.D., M.S.

Adjunct Professors
Carl A. Maida, Ph.D., M.A.
Robert Merrill, D.D.S., M.S.

Adjunct Associate Professors
Kim-Hyuk Shin, Ph.D., M.S.
Craig D. Woods, D.D.S.

Adjunct Assistant Professors
Yong Kim, Ph.D.
Renate Lux, Ph.D.
Ting-Ting Wu, Ph.D.

Professor of Clinical Dentistry
Fariba S. Younai, D.D.S.

Scope and Objectives

Ophthamology is the area of knowledge that deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Section of Oral Biology in the School of Dentistry offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Oral Biology. A combined D.D.S./Oral Biology M.S or Ph.D. or advanced certificate training/Oral Biology M.S or Ph.D. is also offered.

Oral Biology

Graduate Courses

201A, 201C. Advanced Oral Biology. (3-3) Lecture, three hours. S/U or letter grading.

201A. Ontogeny. (3) Lecture, three hours. Evolutionary perspective of cellular development from simple molecules that were formed during first billion years of Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans. S/U or letter grading.

201C. Pathobiology. (3) Lecture, three hours. Molecular basis for pathogenic processes in tissues of oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc. S/U or letter grading.

205A. Methodology in Research Design and Data Analysis. (2) (Formerly numbered 205A.) Lecture, two hours. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistics and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their research. Letter grading.

206. Current Topics in Oral Immunology. (2) Lecture, two hours. Preparation: basic immunology. Discussion and analysis of current research dealing with immunology to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology. Letter grading.

208. Genomics in Oral Biology Research. (2) Lecture, one hour; discussion, one hour. Introduction to fundamentals and technical aspects of genomics and proteomics and analysis of data derived, theory of implications and applications of genomics and proteomics in diagnostic protocols such as salivary diagnostics. Letter grading.

209. Scientific Ethics. (2) Lecture, one hour; laboratory, one hour. Required course in scientific ethics for graduate students in Oral Biology M.S. and Ph.D. programs and for NRSA trainees in School of Dentistry. Letter grading.

211. Biology of Temporomandibular Joint. (2) Lecture, two hours. Anatomy, histology, physiology, and biomechanics of temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging. S/U or letter grading.

212. Proseminar: Oral Biology Research. (2) Seminar, one hour; discussion, one hour. Introductory course for grantsmanship. Guest seminars on topics in research oral biology (pain pathways, immunology, bone biology, microbiology, cancer, and salivary genomics), followed by discussions led by course chair. Letter grading.

214. Current Research in Osteoimmunology. (2) Seminar, one hour; discussion, one hour. Exploration of oral bone biology and immunology and how both systems talk to each other. Topics include immune modulation of bone metabolism, osteoblastic niche for hematopoietic progenitors, adult bone marrow stem cell changes, and osteoimmunology in at-risk populations. Letter grading.

215A. Fundamentals of Immunology. (2) Formerly numbered 215L. Lecture, two hours. Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopathology involved in autoimmune, cancer, and immunodeficiency syndromes. Letter grading.

215B. Current Advanced Research Topics in Immunology. (2) Seminar, one hour; discussion, one hour. Overview of rapidly changing discoveries in very important field of oral immunology. Directed and student-led discussions of current cutting-edge research developments in immunology. Letter grading.

226. Craniofacial Growth and Development. (2) Lecture, two hours. Preparation: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of important aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics that aid their understanding and analysis of course content that has application to their specific and professional fields. Letter grading.

227. Dental Embryology and Histology. (2) Lecture, two hours. Description and interpretation of important stages in development of orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of orofacial apparatus that are of significance to clinical dental specialists. S/U or letter grading.

228. Dental Pharmacology and Therapeutics. (2) Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with den- tistry. General principles of drug action and drug effects on autonomic and central nervous systems. S/U or letter grading.

229A. Culture, Ethnicity, and Health: Implications for Oral Biology and Medicine. (2) Seminar, one hour; discussion, one hour. Examination of sociocultural, biological, and linguistic anthropology to understand factors that influence health and well-being, experience and distribution of illness, prevention and treatment of sickness, healing processes, social relations of therapy, management, and cultural importance and utilization of pluralistic medical systems. Theory, perspectives, and methods from clinical medicine, public health, epidemiology, demography, and social sciences. Letter grading.

229B. Anthropological Perspectives on Global Health: Implications for Oral Biology and Medicine. (2) Seminar, one hour; discussion, one hour. What factors determine health, illness, and disease in global context, including political ecology of infectious diseases, child health issues, women’s health and reproductive health, global trade in legal and illegal drugs, demography and health transition, structural adjustment, problems associated with globalization of pharmaceutical industry; antibiotic resistance, and globalization and health equity. Letter grading.

234. Seminar: Developmental Neuroendocrinimmunology. (2) Formerly numbered M234. Seminar, two hours. Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuromunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmunome interaction from developmental perspective. S/U or letter grading.

M256. Interdisciplinary Response to Infectious Disease Emergencies: Dentistry Perspective. (4) Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Medicine, Nursing, and Public Health during weeks two through five. Letter grading.

273. Research in Clinical Immunology and Lymphology. (2) Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases. Letter grading.

275. Molecular and Cell Biology for Oral Biology Graduate Students. (3) Lecture, two hours; literature review, one hour. Advanced course on prokaryotes, and eukaryotic molecular and cell biology, with emphasis on applications in dental research. Letter grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

Pathology and Laboratory Medicine / 503

Scope and Objectives

Pathology is the branch of medicine concerned with the causes and development of disease. The goal of the cellular and molecular pathology (CMP) graduate program is to provide students with the knowledge to integrate findings at the molecular, cellular, and systemic levels to understand the causes and progression of disease.

Coursework is designed so that students gain an in-depth knowledge of cell and molecular biology, genetics, and disease mechanisms. Didactic instruction is complemented by participation in seminars and training in the design and execution of original laboratory research. As a result, graduates obtain the expertise to translate and answer questions defined in the clinical area to the laboratory bench and vice versa.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Pathology and Laboratory Medicine offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Cellular and Molecular Pathology.

Pathology and Laboratory Medicine

Upper Division Course

199. Directed Research in Pathology. (2 to 4) Tutorial, 10 hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M229. Molecular Mechanisms of Host/Pathogen Interaction. (4) (Same as Microbiology M229.) Lecture, two hours; discussion, two hours. Requisite: Biological Chemistry CM253. Molecular mechanisms of microbial interactions with eukaryotic host cells that result in disease or pathogen survival. Topics include pathogenesis of common viruses, bacteria, fungi, and parasites, basis of toxin-mediated cellular damage, and immune suppression of microbial tissue damage. Letter grading.

M237. Cellular and Molecular Basis of Disease. (4) (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biophysical chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

238. Histology and Pathology for Graduate Students. (2) Laboratory, two hours. Designed for UCLA ACCESS or Cellular and Molecular Pathology Ph.D. students. Basic introductory knowledge of normal tissue, pathologic processes, and animal models as observed by light microscopy. Letter grading.

240. Transplantation Immunology from Benchside to Bedside. (4) Lecture, three hours; laboratory, one hour. Preparation: knowledge of basic immunology. Limited to graduate students. New developments in organ transplantation, updates on basic science of immune mechanisms, integration of basic science principles with clinical practice. Letter grading.

M255. Mapping and Mining Human Genome. (3) (Formerly numbered 255.) (Same as Human Genetics M255.) Lecture, three hours. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localization of disease genes. S/U or letter grading.

256. Seminar: Viral Oncology. (2) Seminar, two hours. Advanced research seminar designed to consider current developments in field. Selection of current subjects and publications dealing with tumor virology, oncogenesis, development, and cellular regulation. S/U or letter grading.

M257. Introduction to Toxicology. (4) (Same as Pharmacology M257.) Requisite: Pharmacology M241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

M258. Pathologic Changes in Toxicology. (4) (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

260. Immunopathology. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisite: Microbiology 261. Advanced information for graduate and advanced undergraduate students regarding immune system anatomy, lymphocytic development, acute and chronic inflammation, hypersensitivity, and autoimmunity. Letter grading.
Scope and Objectives
The Department of Pediatrics encompasses four teaching hospitals: Mattel Children’s Hospital UCLA and Olive View-UCLA, Harbor-UCLA, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken in any of four programs (Mattel/Olive View-UCLA, Cedars-Sinai, Harbor-UCLA, Kaiser Los Angeles). In-depth electives in the Department of Pediatrics are listed in the School of Medicine Handbook of Clinical Courses, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see http://www.pediatrics.medsch.ucla.edu.

Pediatrics

Upper Division Course
199. Directed Research in Pediatrics. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Course
M215. Interdepartmental Course: Tropical Medicine. (2) (Same as Medicine M215 and Pathology M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

PHARMACOLOGY
See Molecular and Medical Pharmacology
The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

Undergraduate Study

Philosophy B.A.

Preparation for the Major
Required: Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

Transfer Students
Transfer applicants to the Philosophy major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one philosophy of mind or skepticism and rationality course, one ethical theory course, one symbolic logic course, and one additional philosophy course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of 8 units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

Honors Program

Admission
To be admitted to the honors program, students must have taken at least three upper division philosophy lecture or seminar courses at UCLA with an overall grade-point average of 3.7.

Requirements
To be awarded honors in philosophy at graduation, Philosophy majors must (1) have a 3.7 grade-point average in UCLA philosophy courses and a 3.7 GPA in upper division UCLA philosophy courses; (2) satisfy the honors directed study requirement by taking Philosophy 198A and 198B in conjunction (usually, but not necessarily concurrently) with two different regular upper division philosophy courses supervised by the instructors of those courses; and (3) receive a grade of A– or better in each course applied toward satisfaction of the honors requirement.

Students may substitute Philosophy 191 for either course 198A or 198B or, alternatively, may complete up to two philosophy graduate seminars in lieu of courses 198A and/or 198B. For an undergraduate or graduate seminar to be applied toward the honors directed study requirement, the consent of both the seminar instructor and the faculty honors adviser is required in advance. Students may also substitute up to one 4-unit Philosophy 198C or 199 course in which they produce a substantial paper that represents an original piece of research or its equivalent.

Exceptional work done to satisfy the honors requirement may be submitted to the department chair for consideration for highest honors.

Philosophy Minor

To enter the Philosophy minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (8 units): Philosophy 7 or 21, and 22 or 31.

Required Upper Division Courses (24 units): Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Philosophy offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Philosophy. A concurrent degree program (Philosophy Ph.D./Law J.D.) is also offered.

Philosophy

Lower Division Courses

1. Beginnings of Western Philosophy. (5) Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks. P/NP or letter grading.

2. Introduction to Philosophy of Religion. (4) Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

3. Historical Introduction to Philosophy. (5) Lecture, three hours; discussion, two hours. Historical introduction to Western philosophy based on classical texts dealing with major problems, related thematically and studied in chronological order: properties of rational argument, existence of God, problem of knowledge, nature of causality, relation between mind and body, possibility of justice, and others. P/NP or letter grading.

4. Philosophical Analysis of Contemporary Moral Issues. (5) Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women, P/NP or letter grading.

5. Philosophy in Literature. (5) Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in Western tradition. P/NP or letter grading.

6. Introduction to Political Philosophy. (5) Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

7. Introduction to Philosophy of Mind. (5) Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about the mind and its relation to the body, including materialism, functionalism, behaviourism, determinism and free will, nature of psychological knowledge. P/NP or letter grading.

8. Introduction to Philosophy of Science. (5) Lecture, three hours; discussion, one hour. Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at nontechnical level of episodes from history of science. P/NP or letter grading.

9. Principles of Critical Reasoning. (4) Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of which amounts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).
21. Skepticism and Rationality. (4) Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley.

22. Introduction to Ethical Theory. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 22W. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussions of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc. P/NP or letter grading.

22W. Introduction to Ethical Theory. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Limited to freshmen/sophomores. Not open for credit to students with credit for course 22. Introduction to major ethical theories in Western thought. Examination of works of Plato, Aristotle, Hume, Kant, and Mill. Topics include ideas of virtue, obligation, egoism, relativism, and foundations of morals. Four papers required. Satisfies Writing II requirement. Letter grading.

31. Logic, First Course. (4) Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; formal logic and structure of language.

97. Freshman Seminar. (4) Variable topics; consult Schedule of Classes or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

Upper Division Courses

100A. History of Greek Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

100B. Medieval and Early Modern Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

100C. History of Modern Philosophy, 1650 to 1800. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediate successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and Berkeley, Malebranche and Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

Group I: History of Philosophy

M101A. Plato — Earlier Dialogues. (4) (Same as Classics M146A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato. P/NP or letter grading.

M101B. Plato — Later Dialogues. (4) (Same as Classics M146B.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in middle and later dialogues of Plato. P/NP or letter grading.

M102. Aristotle. (4) (Same as Classics M147.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle. P/NP or letter grading.

M103A. Ancient Greek and Roman Philosophy. (4) (Same as Classics M145A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of texts, their literary form, interrelations, and contribution to discussion of basic philosophic issues. P/NP or letter grading.

M103B. Later Ancient Greek Philosophy. (4) (Same as Classics M145B.) Lecture, three hours. Preparation: one course from 1, 100A, M101B, M102, or M103A. Study of some major texts in Greek philosophy of Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

104. Topics in Islamic Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

106. Later Medieval Philosophy. (4) Preparation: one philosophy course. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

107. Topics in Medieval Philosophy. (4) Lecture, four hours; discussion, one hour. Preparation: one philosophy course. May be repeated for credit with consent of instructor. P/NP or letter grading.

C108. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially Leviathan, with attention to its relevance to contemporary political philosophy. May be repeated with consent of instructor. P/NP or letter grading.

C109. Descartes. (4) Lecture, four hours. Preparation: course 21 or two philosophy courses. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be repeated with consent of instructor. P/NP or letter grading.

C110. Spinoza. (4) Lecture, three hours; discussion, one course. Preparation: course 21. Study of philosophy of Spinoza. May be repeated with consent of instructor. P/NP or letter grading.

C111. Leibniz. (4) Lecture, three hours; discussion, one course. Preparation: course 21. Study of philosophy of Leibniz. May be repeated with consent of instructor. P/NP or letter grading.

C112. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on works in translation. May be repeated with consent of instructor. P/NP or letter grading.

C113. Hume. (4) Lecture, four hours. Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214. P/NP or letter grading.

115. Kant. (4) Formerly numbered 115.) Lecture, three hours; discussion, one hour. Preparation: course 21 or two philosophy courses. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated with consent of instructor. Concurrently scheduled with course C215. P/NP or letter grading.

116. 19th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the text.

117. Late 19th- and Early 20th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in one or more philosophies of early modern period, or study in single area such as theory of knowledge, metaphysics in several philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219. P/NP or letter grading.

Group II: Logic, Semantics, and Philosophy of Science

124. Philosophy of Science: Historical. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

125. Philosophy of Science: Contemporary. (4) Lecture, three hours; discussion, one hour. Preparation: one course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

126. Philosophy of Science: Social Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to philosophical issues, various biases in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

127A. Philosophy of Language. (4) Lecture, three hours; discussion, one hour. Preparation: one course 31, Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analytcity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor. P/NP or letter grading.

127B. Philosophy of Language. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor. P/NP or letter grading.

128. Philosophy of Mathematics. (4) Lecture, four hours. Preparation: courses 31, 137, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and predicative definition (Russell, Poincaré, early Weyl). P/NP or letter grading.

129. Philosophy of Psychology. (4) Lecture, three hours; discussion, one hour. Preparation: one 4-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

130. Philosophy of Space and Time. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one physics course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relationalist views of space and time, philosophical impact of relativity theory.

131. Science and Metaphysics. (4) Lecture, four hours. Preparation: two philosophy courses. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to require course 31, preferably in preceding semester, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor. P/NP or letter grading.

132. Philosophy of Biology. (4) Lecture, four hours. Preparation: one philosophy course. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of biological species, and biological explanation. P/NP or letter grading.

133. Topics in Logic and Semantics. (4) Lecture, four hours. Preparation: course 137. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics. P/NP or letter grading.

134. Introduction to Set Theory. (4) (Same as Mathematics M114.) Lecture, three hours; discussion, one hour. Preparation: course 135 or Mathematics 110A or 131A. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

135. Introduction to Metaphysics. (4) Lecture, four hours. Preparation: course 31. Metaphysics sentential logic and first order predicate logic; formal logical language, formal deductive systems, and models. Compactness and completeness theorems, which concern complexity of notion of logical consequences. Letter grading.

136. Modal Logic. (4) Lecture, four hours. Preparation: course 31. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott completeness, incompleteness in tense and modal logic, quantification extensions. Letter grading.

137. Logic, Second Course. (4) (Formerly numbered 32.) Lecture, three hours; discussion, one hour. Enforcement of course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions. P/NP or letter grading.

Group III: Ethics and Value Theory

150. Society and Morals. (4) Lecture, three hours; discussion, one hour. Preparation: course 22. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

151A-C 151B-151C. History of Ethics. (4-4-4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Each course may be taken independently of other courses. 151A. Selected Classics in Ancient Ethical Theories: Plato, Aristotle, C151B. Modern, Intensive study of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C245; 151C. Selected Classics of Medieval Ethics.

153A. Topics in Ethical Theory: Normative Ethics. (4) Lecture, three hours; discussion, one hour. Preparation: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (critical rights of action). May be repeated for credit with consent of instructor. P/NP or letter grading.

153B. Topics in Ethical Theory: Metaethics. (4) (Formerly numbered 153B) Lecture, three hours; discussion, one hour. Preparation: course 22. Study and analysis of basic concepts, selected problems, and contemporary issues in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral mutability, etc. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C253. P/NP or letter grading.

154. Topics in Value Theory: Rationality and Action. (4) Lecture, three hours; discussion, one hour. Preparation: course 61 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of will, and decision theory. May be repeated for credit with consent of instructor. P/NP or letter grading.

154B. Topics in Value Theory: Moral Responsibility and Free Will. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Examination of philosophical problems surrounding moral responsibility and free will, using contemporary or classical readings in attempt to better understand kind of freedom required for moral agents. P/NP or letter grading.

155. Medical Ethics. (4) Lecture, three hours; discussion, one hour. Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation. P/NP or letter grading.

156. Categorical Propositions. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Preparation: one logic course. Examination of logical structure of categorical propositions and their role in deductive inference. May be repeated for credit with consent of instructor. P/NP or letter grading.

157A-B. History of Political Philosophy. (4-4) Lecture, three hours; discussion, one hour. Preparation: one relevant philosophy course. Study of central political theories of one of the following: Hobbes, Locke, Hume, and Rousseau. Preparation: one relevant philosophy course. May be repeated for credit with consent of instructor. P/NP or letter grading.

157A-157B. History of Political Philosophy. (4-4) Lecture, three hours; discussion, one hour. Preparation: course 21 or 22. Intensive investigation of one or two topics in political philosophy, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

157C. Metaphysics of Modality. (4) Lecture, four hours. Preparation: courses 31, 137. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophy of modality. May be repeated for credit with consent of instructor. P/NP or letter grading.

157A. Historical Studies in Existentialism. (4) Preparation: one philosophy course. Study of central philosophical texts of one of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics: role of metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

157B. Historical Studies in Existentialism. (4) Preparation: one philosophy course. Study of central philosophical texts of one of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

158. Metaphysics. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Introduction to philosophical topics raised in classical and contemporary philosophy of language and philosophy of mind. May be repeated for credit with consent of instructor.

159. Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Examination of philosophical texts of one of the following: Leibniz, Hume, and Russell. May be repeated for credit with consent of instructor.

159A. Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Examination of philosophical texts of one of the following: Leibniz, Hume, and Russell. May be repeated for credit with consent of instructor.

160. Philosophy of Action. (4) Lecture, four hours. Preparation: two philosophy courses. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception. P/NP or letter grading.

182. Elements of Metaphysics. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions: nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenализm, materialism, dualism). P/NP or letter grading.

183. Theory of Knowledge. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Analysis of concept of empirical knowledge. May be repeated for credit with consent of instructor. P/NP or letter grading.

184. Topics in Metaphysics. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor. P/NP or letter grading.

185. Major Philosophers of 20th Century. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor. P/NP or letter grading.

Special Studies

M187. Philosophical Analysis of Issues in Feminist Theory. (4) Seminar, one hour; discussion, three hours. Variable topics; consult Schedule of Classes or "Department Announcements" for topic to be offered in specific term. Reading, discussion, and development of culminating project. May be repeated for credit with consent of instructor. P/NP or letter grading.

190A-198B. Honors Research in Philosophy. (2-2) Tutorial, two hours. Limited to junior/senior philosophy honors program students. Each course to be taken in conjunction with one upper division philosophy lecture course, either concurrently or in subsequent term, under direct supervision of lecture course instructor. Advanced work related to lecture course, further reading, and preparation of 12- to 15-page paper representing original research. Courses 190A and 198B must be taken in conjunction with two different lecture courses, and both must be taken to satisfy departmental honors requirements. May be repeated for credit. Individual contract required. Letter grading.

198C. Honors Research in Philosophy. (4) Tutorial, four hours. Limited to junior/senior philosophy honors program students. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Philosophy. (2 to 4) Tutorial, three hours. Limited to junior/senior. Supervised individual research under guidance of faculty mentor. Culuminating paper or research project required. Up to 8 units may be applied toward degree requirements, but no 199 course may be substituted for course in one of four groups on basis of similarity of subject matter. May be repeated for credit. Individually contract required. P/NP or letter grading.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. (4-4-4) Seminar, three hours. Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics. S/U or letter grading.

Group I. History of Philosophy

203. Seminar: History of Ancient Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

204. Topics in Medieval Philosophy. (4) Lecture, four hours. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of single area such as logic or theory of knowledge edge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor. S/U or letter grading.

205. Seminar: History of Medieval and Renaissance Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

206. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially Leviathan, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course 210. S/U or letter grading.

207. Seminar: History of Medieval and Renaissance Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

208. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophy of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course 219. S/U or letter grading.

209. Spinoza. (4) Lecture, three hours. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course 211, in which case there is two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students. S/U or letter grading.

210. Leibniz. (4) Lecture, three hours. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course 212, in which case there is two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students. S/U or letter grading.

211. Kant. (4) Lecture, four hours. Preparation: one or several courses in philosophy. May be repeated for credit with consent of instructor. May be concurrently scheduled with course 212. S/U or letter grading.

212. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophy of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course 212. S/U or letter grading.

214. Hume. (4) Lecture, four hours. Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course 215. S/U or letter grading.

215. Kant. (4) Formerly numbered 215s) Lecture, three hours; discussion, one hour. Preparation: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor. Concurrently scheduled with course 216. S/U or letter grading.

216. 19th-century Philosophy. (4) Seminar, four hours. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

217. Philosophy of Perception. (4) Lecture, three hours; discussion, one hour. Selected topics in one or more philosophies of perception. May be repeated for credit with consent of instructor. Concurrently scheduled with course 218. S/U or letter grading.

218. Philosophy of Perception. (4) Seminar, three hours. Preparation: consent of instructor. May be repeated for credit with consent of instructor. S/U or letter grading.

Group II. Logic, Semantics, and Philosophy of Science

219. Philosophy of Logic. (4) Lecture, three hours. Preparation: consent of instructor. May be repeated for credit with consent of instructor. S/U or letter grading.

220. Seminar: Topics in Philosophy. (4) Seminar, three hours. Preparation: consent of instructor. May be repeated for credit with consent of instructor. S/U or letter grading.

221. Seminar: Topics in Philosophy. (4) Seminar, three hours. Preparation: consent of instructor. May be repeated for credit with consent of instructor. S/U or letter grading.

223. Philosophy of Physics. (4) Seminar, three hours. Preparation: consent of instructor. May be repeated for credit with consent of instructor. S/U or letter grading.

225. Probability and Inductive Logic. (4) Lecture, three hours. Requisite: course M134 or Mathematics M114S. Topics include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherency, and conditioning. S/U or letter grading.

226. Topics in Mathematical Logic. (4) Lecture, four hours. Content varies from term to term. May be repeated for credit with consent of instructor. S/U or letter grading.

227. Philosophy of Social Science. (4) Lecture, four hours. Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in social sciences encouraged to enroll. May be repeated for credit with consent of instructor. S/U or letter grading.

230. Seminar: Logic. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.
231. Seminar: Intensional Logic. (4) Seminar, four hours. Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor. S/U or letter grading.

232. Philosophy of Science. (4) Seminar, three hours. Selected topics in philosophy of science. May be repeated for credit with consent of instructor. S/U or letter grading.

233. Seminar: Philosophy of Physics. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. (4) Seminar, four hours. Requisites: course 150 or C156 or 157A or 157B or any two philosophy courses. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor. S/U or letter grading.

C245. History of Ethics: Modern. (4) Lecture; three hours; discussion, one hour. Intensive study of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156B. S/U or letter grading.

246. Seminar: Ethical Theory. (4) Seminar, four hours. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor. S/U or letter grading.

247. Topics in Political Philosophy. (4) Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

248. Problems in Moral Philosophy. (4) Seminar, four hours. Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

C253B. Topics in Ethical Theory: Metaethics. (4) Lecture, three hours; discussion, one hour. Requisites: course 22. Study and analysis of basic concepts, selected problems, and contemporary issues in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

255. Seminar: Aesthetic Theory. (4) Seminar, four hours. Selected topics. May be repeated for credit with consent of instructor. S/U or letter grading.

M256. Topics in Legal Philosophy. (4) (Same as Law M256.) Lecture, three hours. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

M257. Seminar: Philosophy of Law. (4) (Same as Law M524.) Seminar, three hours. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

258. Philosophical Research in Ethics and Value Theory. (2 to 4) Seminar, two hours. Preparation: completion of proposition requirement. Presentation of ongoing research by graduate students. Participation in public presentations of others, and read and discuss philosophical texts related to presentations. Must be taken for 4 units in quarters in which students present their own research. May be repeated for credit with consent of instructor. S/U grading.

Group IV. Metaphysics and Epistemology

271. Seminar: Topics in Metaphysics and Epistemology. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

275. Human Action. (4) Preparation: two upper division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor. S/U or letter grading.

280. 20th Century Continental Philosophy. (4) Seminar, three hours. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

281. Seminar: Philosophy of Mind. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

282. Seminar: Metaphysics. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

283. Seminar: Theory of Knowledge. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

284. Seminar: Philosophy of Perception. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

285. Philosophy of Psychoanalysis. (4) Seminar, three hours. Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, ego, id, super-ego, defense mechanisms, and psychoanalytic conception of human nature. S/U or letter grading.

286. Philosophy of Psychology. (4) Seminar, four hours. Relevance of computer simulation to accounts of the mind and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology. S/U or letter grading.

287. Seminar: Philosophy of Language. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

288. Seminar: Wittgenstein. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

289. Seminar: Philosophy of Religion. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

290. Workshop: Philosophy of Language. (4) Seminar, two hours. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

291. Workshop: Philosophy of Mathematics. (4) Seminar, three hours. Ongoing discussion of current issues in philosophy of mathematics based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

299. Seminar: Philosophical Research. (4) Seminar, three hours. Preparation: advancement to candidacy. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprenticeship personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching College Philosophy. (2 to 4) Seminar, to be arranged. Seminars, workshops, and preceptorship teaching. Selected topics, including evaluation scales, various texts and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies. (2 to 12) Tutorial, to be arranged. Properly qualified graduate students who wish to pursue one problem through reading or advanced study may do so if their proposed project is acceptable to one staff member. May be repeated for credit. S/U or letter grading.

Phillip Pritchett, Ph.D.

Scope and Objectives
Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton’s discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein’s general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole. Today astronomers study the accretion of matter onto supermassive black holes in quasars and search for the most distant regions of the universe to learn about exotic physical conditions that existed when the universe’s expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe’s matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet undiscovered exotic particles that are predicted by the most advanced theories of elementary particle physics.

Undergraduate Study
The Department of Physics and Astronomy offers a choice of four undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Biophysics, the B.S. degree program in Physics, and the B.A. degree program in Physics. Each course taken to fulfill any of the requirements for the majors must be taken for a letter grade.

Astronomy Courses
The department offers general courses to all University students, including those who are not science oriented. Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths but are still aimed at nonscience majors. Course 4 discusses stellar and supermassive black holes; course 5 concentrates on the problem of life in the universe; course 6 discusses the structure and evolution of the universe.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 1 series and two terms of the Mathematics 31 and 32 series). Students of junior and senior standing in Physics or related sciences are invited to select any of these courses: Astronomy 115, 117, 127, 140, 180.

Physics Courses
Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take Physics 10.

Physics 1Q is intended for entering freshman Physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH form sequences of courses in general physics for majors in Physics. The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one course in the 1A, 1B, 1C sequence by taking the final examination with a class at the end of any term. This serves as a placement examination. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental advisor.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences.

Physics 10 is a one-term, nonlaboratory course that surveys the whole field of physics. Any two or more courses from Physics 1A, 6A, and 10 are limited to 6 units credit.

Astrophysics B.S.

Preparation for the Major
Required: Astronomy 81, 82; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Program in Computing 10A or demonstrated ability to program. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year. Recommended: Chemistry and Biochemistry 20A.

Transfer Students
Transfer applicants to the Astrophysics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two astrophysics courses, two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one programming course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Honors Program
Senior majors in Astrophysics with a 3.5 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.5 and 3.75 or better, respectively, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

Biophysics B.S.
The goal of the Biophysics major is to provide students with the undergraduate background to enable them to enter very good graduate programs in biophysics, molecular biology, and physics. As the molecular biophysics field emerges as an important and rapidly developing area of scientific research and knowledge, the major is designed to provide both the scientific/technical training and the immersion in physics and molecular biology necessary to enable students to understand and integrate these fields intellectually and to have the opportunity to become leaders in bringing the analytic and experimental techniques of both fields to bear on the complicated behavior of microbiological macromolecular systems.

Preparation for the Major
Required: Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 87; Chemistry and Biochemistry 20A, 20B, 30A, 30B; Life Sciences 2, 3 or 3H, 4; Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: Life Sciences 1, Mathematics 33B, Physics 18L.

Transfer Students
Transfer applicants to the Biophysics B.S. major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 115C, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series, which should be taken in the senior year; (3) there must be three additional upper division courses in the plan, preferably selected from Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, 140B; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

Honors Programs
The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

Physics B.A.
The Physics B.A. major is intended to provide a strong background in physics, yet allow students flexibility to study other fields as well. It should be of particular interest to students who want to double major or who want to teach science. Students who intend to continue work toward the Ph.D. in Physics are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major
Required: Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 87; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 1-707A Physics and Astronomy Building.

Transfer Students
Transfer applicants to the Physics B.A. major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 115C, 131. One year of general chemistry and Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 1-707A Physics and Astronomy Building.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Physics and Astronomy offers the Master of Arts in Teaching (M.A.T.) degree in Astronomy, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Astronomy, Master of Arts in Teaching (M.A.T) degree in Physics, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Physics.
Astronomy

Lower Division Courses

3. Nature of Universe. (5) Lecture, three hours; discussion, one hour. Essentially nonmathematical course for general UCLA students that discusses black holes and related cosmic catastrophes. White dwarfs, neutron stars, and black holes are compact objects formed in violent events that terminate lives of stars and are associated with some of most energetic and explosive phenomena in astrophysics: planetary nebulae and novae (white dwarfs), supernovae, pulsars, galactic X-ray sources, and gamma ray bursts. Supermassive black holes form in nuclei of young galaxies, and gravitational accretion of matter onto black holes powers most energetic objects in universe — quasars. Universe was born in ultimate cosmic explosion — Big Bang — that may have derived its energy from quantum mechanical vacuum. P/NP or letter grading.

4. Black Holes and Cosmic Catastrophes. (4) Lecture, three hours; discussion, one hour. Essentially nonmathematical course for general UCLA students that discusses black holes and related cosmic catastrophes. White dwarfs, neutron stars, and black holes are compact objects formed in violent events that terminate lives of stars and are associated with some of most energetic and explosive phenomena in astrophysics: planetary nebulae and novae (white dwarfs), supernovae, pulsars, galactic X-ray sources, and gamma ray bursts. Supermassive black holes form in nuclei of young galaxies, and gravitational accretion of matter onto black holes powers most energetic objects in universe — quasars. Universe was born in ultimate cosmic explosion — Big Bang — that may have derived its energy from quantum mechanical vacuum. P/NP or letter grading.

5. Life in Universe. (4) Lecture, four hours; discussion, one hour. Preparation: prior introduction to astrophysics. Life exists for life everywhere in context of evolution of universe from simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics. P/NP or letter grading.

6. Cosmology: Our Changing Concepts of Universe. (4) Lecture, three hours; discussion, one hour. Preparation: prior introduction to astrophysics and biology. Life exists for life everywhere in context of evolution of universe from simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics. P/NP or letter grading.

7. Astronomy and Media. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Designed to help nonmajors develop skills to continually learn about science through media. Detailed study of sources of information in astronomical and related fields: print media, electronic media, and other. P/NP or letter grading.

8. Astrophysics I: Stars and Nebulae. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomore and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrela- tions between these parameters. Methods and importance of astrophysics. Variable stars. Planetary and gaseous nebulae. P/NP or letter grading.

88A-88Z. Lower Division Seminars. (2 each) Seminar, two hours. Limited to freshmen. Variable topics; consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

88A. Cosmic Evolution. (2) Seminar, two hours. Limited to freshmen. Varied astronomical and physical processes: evolution; origin of matter; general principles of evolution. P/NP or letter grading.

88B. Stellar Evolution. (2) Seminar, two hours. Limited to freshmen. Varied astronomical and physical processes: evolution; origin of matter; general principles of evolution. P/NP or letter grading.

Upper Division Courses

115. Statistical Mechanics and Its Application to Astrophysics. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A, 33B, Physics 1A, 1B, and 1C (or 1A, 1BH, and 1CH). Particle distributions, partition functions, black body radi- ation, Saha equation, degeneracy. Applications to stellar atmospheres, interstellar medium. P/NP or letter grading.

180. Astrophysics Laboratory. (4) Lecture, two hours; laboratory, four hours. Designed for junior/se- niors in Astrophysics, Physics, or related field. Lectures cover statistical mechanics, one- and two- dimensional random processes, and numerical meth- ods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photography. Emphasis on use of computers for automatic collection of data and for processing two-dimen- sional astronomical images. P/NP or letter grading.

190. Research Colloquia in Astrophysics. (2) Seminar, two hours. Designed to bring together stu- dents undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be re- peated for credit. P/NP grading.

194. Research Group Seminars: Astrophysics. (1) Research group meeting, one hour. Designed for undergraduate students who are part of research group/laboratory. Discussion of research of faculty members or students with regard to understanding methodology in field and/or laboratory equipment. May be repeated for credit. P/NP grading.

274. Galaxies. (4) Lecture, three hours. Galaxy prop- erties: kinematics, mass, morphology, stellar popula- tions; spiral orbits and spiral structure; galaxy forma- tion; galaxy clusters, collisions, and mergers; obser- vations and theory of quasars and active galactic nuclei. Letter grading.

277A-277B. Astronomy Research Project. (6-6) Tu- torial, to be arranged. Designed for second-year gradu- ate astronomy students. Two-term research project planned in conjunction with faculty adviser on any suitable research topic in astronomy or astrophysics, culminating in written report at end of second term. S/ U (277A) and Letter (277B) grading.
Physics and Astronomy / 513

278. Special Topics in Astronomy. (2 or 4) Seminar, to be arranged. Informal course with lecture/sem- inar format, focusing on one of set of specific topics in astronomy. (1 unit for 2-unit course or letter (4-unit course) grading.)

279. Seminar: Current Astronomical Research. (2) Seminar, one hour. Astronomy and astrophysics colloquium with lectures on current research by local and visiting researchers. S/U grading.

281. Quantum Mechanics for Astrophysics. (4) Lecture, four hours. Designed for departmental gradu- ate students. Quantum mechanical topics in areas of interest for astrophysics applications. Hydrogen atom, radiative transitions, complex atoms, molecular spec- troscopy including electronic, vibrational, and rotation- al transition, nuclear reaction theory. Letter grading.

M285. Origin and Evolution of Solar System. (4) (Same as Earth and Space Sciences M265.) Lecture, four hours. Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis, solar origin, evolution, and termination; solar nebula, hydrodynamic processes, formation of planets and satellite systems. Content varies from year to year. May be re- peated for credit. S/U grading.

296. Research Topics in Astronomy. (2) Discus- sion, two hours. Advanced study and analysis of cur- rent topics in astronomy. Discussion of current re- search and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M297. Research Tutorial: Astroparticle Physics. (2 or 4) (Same as Physics M297.) Tutorial, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discuss- ion by faculty, postdoctoral fellows, and graduate stu- dents on topics of current interest in astrophysics. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, one hour. Enriched preparation for upper division physics courses. May be repeated for credit. Letter grading.

596A. Directed Individual Studies. (4 to 10) Tutor- ial, to be arranged. May be repeated at discretion of department. S/U grading.

596L. Advanced Study and Research at Lick Ob- servatory. (4 to 12) Tutorial, to be arranged. Diz- gned for graduate students who require observa- tional experience, as well as those working on obser- vational problems of current research and development. May be repeated at discretion of department. S/U grading.

599. Ph.D. Research and Writing. (10 to 12) Tutor- ial, to be arranged. May be repeated at discretion of department. S/U grading.

Physics

Lower Division Courses

1A. Physics for Scientists and Engineers: Me- chanics (Honors). Lecture/demonstration, four hours; dis- cussion, one hour. Recommended preparation: high school physics, one year of high school calculus or Mathematics 31A and 31B. Enforced requisite: Math- ematics 3A, 3B, 31A, 31B. Recommended corequisite: Mathematics 32A. Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrum, gravitation. P/NP or letter grading.

1AH. Physics for Scientists and Engineers: Me- chanics (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisite: Math- ematics 31A, Enriched requisite: Mathematics 31B. Recommended corequisite: Mathematics 32A. En- riched preparation for upper division physics courses. Same material as course 1A but in greater depth; rec- ommended for Physics majors and other students de- siring such coverage. P/NP or letter grading.

1BH. Physics for Scientists and Engineers: Oscil- lations, Waves, Electric and Magnetic Fields. (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisite: course 1A or 1AH, Mathematics 31B. Enforced corequisite: Mathematics 32A, 32B. Enriched preparation for upper division physics courses. Same material as course 1B but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

1CH. Physics for Scientists and Engineers: Elec- trodynamics, Optics, and Special Relativity (Hon- ors). (5) Lecture/demonstration, four hours; discus- sion, one hour. Enforced requisite: courses 1A or 1B, 1BH, 1AH or 1BH, Mathematics 32A, 32B. En- forced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 33A. Enriched preparation for upper di- vision physics courses. Same material as course 1C but in greater depth; recommended for Physics ma- jors and other students desiring such coverage. P/NP or letter grading.

1Q. Contemporary Physics. (2) Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

4A. Physics Laboratory for Scientists and Engi- neers: Mechanics. (2) Laboratory, three hours. En- forced requisite: course 1A or 1AH, Enforced corequisite: course 1B or 1BH. Experiments on measuring gravity, accelerated motion, kinetic and potential ener- gy, linear and angular momentum, oscillators, resonance and vibrating strings. Computer data acquisition and analysis. Introduction to error analysis, including distributions and least-squares fit- ting procedures. Letter grading.

4BL. Physics Laboratory for Scientists and Engi- neers: Electricity and Magnetism. (2) Laboratory, three hours. Enforced requisite: courses 1A or 1AH, 1B or 1BH. Enforced corequisite: course 1C or 1CH. Experiments on electric fields, forces, and potentials. Magnetic fields. Linear and nonlinear devices. Resis- tors, capacitors, and inductors. Modern circuits. Geo- metrical and physical optics. Letter grading.

6A. Physics for Life Sciences Majors: Mechanics. (5) Lecture, three hours; discussion, one hour; labora- tory, two hours. Enforced requisite: Mathematics 3A, 3B. Enforced corequisite: Mathematics 3C. Not open for credit to students with credit for course 6AH. Motion, Newton laws, energy, linear and angular momentu- mation, rotation, equilibrium, gravity, biological applica- tions. P/NP or letter grading.

6AH. Physics for Life Sciences Majors: Statics and Dynamics of Forces. (5) Lecture, three hours; dis- cussion, one hour; laboratory, two hours. Enforced requisite: Mathematics 3A, 3B. Enforced corequisite: Mathematics 3C. Not open for credit to students with credit for course 6AH. Statics and Dynamics of Forces. Energy, and momentum, with applications to biological and biochemical systems. Physics of states of matter (solids, liquids, and gases) and of surfaces and interfaces as they apply to biological organisms. P/NP or letter grading.

6B. Physics for Life Sciences Majors: Waves, Electric, and Magnetism. (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A or 6AH. Not open for credit to students with credit for course 6BH. Mechanical waves, sound, electricity and magnetism, electro- magnetic waves, biological applications. P/NP or let- ter grading.

6BH. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics (Honors). (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A or 6AH. Not open for credit to students with credit for course 6BH. Sound and electromagnetic waves, interference, dif- fraction, radioactivity, and hydrodynamics, with appli- cations to biological and biochemical systems. P/NP or letter grading.

6C. Physics for Life Sciences Majors: Light, Flu- ids, Thermodynamics, Modern Physics. (5) Lec- ture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6AH. Not open for credit to students with credit for course 6CH. Ge- ometrical and physical optics, fluid statics and dynam- ics, thermodynamics. Selected topics from founda- tions of quantum mechanics; atoms, nuclear and particle physics; relativity; medical detectors; biological applications. P/NP or letter grading.

6CH. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport (Honors). (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6BH. Not open for credit to students with credit for course 6EC. Electro- statics in vacuum and in water. Electric current with applications to electrophysiology. Magnetism, espe- cially NMR. Diffusion and heat flow, with applications to biological and biochemical systems. P/NP or letter grading.

9. Physics. (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 1A, 1AH, 6A, or 6AH. Special mathemati- cal preparation beyond that necessary for admission to University in freshman standing not required. Top- ics include planetary motion, Newton laws, gravita- tion, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, at- omics, and subatomic particles. As time permits, de- velopment of physical ideas placed in cultural and histor- ical perspective. P/NP or letter grading.

18L. Modern Physics Laboratory. (4) Lecture, one hour; laboratory, six hours. Enforced requisite: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). 4AL, 4BL, 17. Experiments on radioactivity, scattering, Pauli constant, superconductivity, superfluidity. Letter grading.

87. Introduction to Biophysics. (4) (Formerly num- bered M88.) Seminar, three hours. Enforced requi- site: courses 1A, 1B, and 1C; or 1AH, 1BH, and 1CH, 4AL, 4BL, 17. Experiments on radioactivity, scattering, Pauli constant, superconductivity, superfluidity. Letter grading.

88. Lower Division Seminar: Current Topics in Physics. (2) Limited to freshmen/sophomores. Inten- sive exploration of a particular theme or topic based on current research. Course topics and courses for topics to be offered in a specific term. P/NP or letter grading.
Upper Division Courses

105A. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A. Corequisite: Mathematics 33B. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear and nonlinear oscillations. Letter grading.

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering, Coherence theory, Kirchhof formula, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest. P/NP or letter grading.

110A. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 131. Mathemat-ics 32B, 33A, 33B. Electrostatics and magnetostatics. P/NP or letter grading.

110B. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A. Mathe-matics 32B, 33A, 33B. Faraday law and Maxwell equations. Propagation of electromagnetic radiation. Multiple radiation and radiation from an accelerated charge. Special theory of relativity. P/NP or letter grading.

112. Thermodynamics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Mathematics 32B, 33A, 33B. Corequisite: course 115B. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications. P/NP or letter grading.

114. Mechanics of Wave Motion and Sound. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, Mathematics 32B, 33A, 33B. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics. P/NP or letter grading.

116. Electronics. (4) Lecture, three hours; laboratory, three hours. Alternating current circuits, transmission lines, circuits, and IC circuits to generate, modify, and detect electrical signals. Introduction to digital circuits, analysis of noise and methods to reduce its influence in electrical measurements.

117. Electronics for Physics Measurement. (4) Lecture, three hours; laboratory, two hours. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurement. Basic introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and study of methods of computer data acquisition and signal processing. Letter grading.

M122. Introduction to Plasma Electronics. (4) (Same as Electrical Engineering M185.) Lecture, three hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

123. Atomic Structure. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions. P/NP or letter grading.

124. Nuclear Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Introduction of radiation with matter. P/NP or letter grading.

126. Elementary Particle Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators. P/NP or letter grading.

128. Cosmology and Particle Astrophysics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 115A, 115B, 126. Introduction to cosmology and high-energy particle astrophysics, based on latest developments of both experiment and theory. Special emphasis on unified picture of universe that emerges from particle physics, astronomy, and cosmology. Extensive discussion of unsolved problems and future prospects to help students determine their opportunities in future. Letter grading.

131. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals. P/NP or letter grading.

132. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 131, Mathematics 32B, 33A, 33B. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theory, Taylor and Laurent series, calculus of residues, and Laplace transforms. P/NP or letter grading.

140A. Introduction to Solid-State Physics. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 131. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands. Letter grading.

150. Physics of Charged-Particle and Laser Beams. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A, 110B. Physics of charged-particle and laser beams presented as a unified subject. Basic physics of charged-particle beams, covering relativistic particle motion in electromagnetic fields, transverse focusing, relativistic ion and electron mechanisms, linear and circular accelerators, and advanced topics. Some fundamentals of laser physics, including gain and broadening mechanisms, linear light optics, laser resonators, and advanced topics and applications. P/NP or letter grading.

M155. Energy in Modern Economy. (4) (Same as Environment M155.) Lecture, three hours. Requisites: courses 1A and 1B (or 6A and 6B), Mathematics 3A and 3B (or 31A and 31B). Statistics 12 or 13. Examin-ation of physics of energy, history of energy development, and role that energy plays in our economy, par-ticularly in transportation and power grid. Prospects for decarbonizing availability and prices of fuels and impact of global warming on energy development. Current and potential future government and social responses to energy issues. P/NP or letter grading.

160. Numerical Analysis Techniques and Particle Simulations. (4) Lecture, three hours; computer terminals, six hours. Preparation: minimum knowledge of computer programming (Fortran), Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, 110A, 110B. Introduction to field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems. P/NP or letter grading.

180A. Nuclear Physics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180B. Physical Optics and Spectroscopy Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180D. Acoustics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180E. Plasma Physics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180F. Elementary Particle Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180G. Soft Matter Laboratory. (4) (Same as Chemistry M120.) Laboratory, four hours. P/NP or letter grading.

188. Special Courses in Physics. (4) Lecture, three hours; discussion, one hour. Limited to junior/senior Astrophysics and Physics majors. Departmentally sponsored temporary courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

188L. Special Laboratory Courses in Physics. (4) Lecture, one hour; laboratory, two hours. Limited to junior/senior departmental majors. Departmentally sponsored temporary laboratory courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

201Q. Modern Physics Research Areas. (2) Seminar, two hours. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work related to recent work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191. Variable Topics Research Seminars: Physics and Astronomy. (4) Seminar, three hours. Participating research seminar on advanced topics in physics. Reading, discussion, and development of culminating project. Content varies from year to year. May be repeated for credit by petition. P/NP or letter grading.

192. Undergraduate Practicum in Physics. (2 to 4) Seminar, one hour. Limited to juniors/senior. Students assist in preparation of materials and development of innovative programs with guidance of faculty members in small course settings. May be repeated for credit. P/NP grading.

193. Journal Club Seminars: Physics. (2) Reading, discussion, and development of culminating project. Content varies from year to year. May be repeated for credit by petition. P/NP or letter grading.

194. Research Group Seminars: Physics and Astronomy. (1) Research group meeting, one hour. Directed for undergraduate students who are part of research group/laboratory. Discussion of research of faculty members in small course settings. May be repeated for credit. P/NP grading.

195. Directed Research or Senior Project in Physics. (2 to 4) Tutorial, two hours. Limited to juniors/senior in physics research areas, with approval under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201D. Modern Physics Research Areas. (2) Re- view of modern physics research areas, with report on thesis on topic actively pursued at UCLA. S/U grading.

214A. Advanced Atomic Structure. (4) Nj symbols, continuous groups, fractional parentage coefficients, n electron systems.

215C. Quantum Statistical Mechanics and the Many Body Problem. (4) Lecture, three hours. Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green’s function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid. S/U or letter grading.

220. Classical Mechanics. (4) Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

221A-221B-221C. Quantum Mechanics. (4-4-4) Lecture, three hours. S/U or letter grading. 221A. Fundamentals of quantum mechanics, operators and state vectors, equations of motion. 221B. Requisite: course 221A. Feynman’s operational interpre- tations, perturbation theory. 221C. Formal theory of col- lision processes, quantum theory of radiation, intro- duction to relativistic quantum mechanics.

223. Advanced Classical Mechanics. (4) Requi- site: course 220. Topics such as nonlinear mechan- ics, ergodic theory, mechanics of continuous media.

224. Introduction to the Strong Interaction. (4) Ev- idence concerning the strong interaction, particularly as exemplified in nucleon-nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion ex- change potential, phase shift analysis.

229A-229B-229C. Relativistic Quantum Theory. (6- 6-6) Lecture, four hours. Requisites: courses 221A, 221B, 221C. Modern quantum field theory, including quantum elec- trodynamics and quantum chromodynamics, renor- malization group methods, path-integral quantization, and spontaneous symmetry breakdown, monopoles and other solitons. S/U or letter grading.

230D. Relativistic Quantum Theory. (6) Lecture, four hours. Requisites: courses 221A, 221B, 221C. Modern quantum field theory, including quantum electro- dynamics and quantum chromodynamics, renor- malization group methods, path-integral quantization, and spontaneous symmetry breakdown. Advanced topics include instantons and other topological def- ects, large N methods, finite temperature field theory, lattice field theory, effective field theory methods, con- formal field theory, and topological aspects of anom- alies. S/U or letter grading.

231A. Methods of Mathematical Physics. (4) Lec- ture, three hours. Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functionals on a completeness basis, integral transforms, partial differential equations. S/U or letter grading.

243A. Special Topics in Physics Relativity. (4–4) Special and general theories, with applications to elementary particles and astrophysics.

243C. Special Topics in General Relativity. (4) Lecture, four hours. S/U or letter grading.

237B. String Theory. (4) Lecture, four hours. Requisite: course 237A. Topics may include toroidal compactification, 1-duality and 2-branes, supersymmetric strings, orbifolds, Calabi/Yau compactifications and physics in four dimensions, and strings at strong coupling and dualities. S/U or letter grading.

266. Seminar: Propagation of Waves in Fluids. (2 to 4) Seminar, three hours. S/U or letter grading.

268. Seminar: Spectroscopy. (2 to 4) Seminar, three hours. S/U or letter grading.

269A. Seminar: Nuclear Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269B. Seminar: Elementary Particle Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269C. Seminar: Accelerator Physics. (2 to 4) Seminar, three hours. Physics principles governing design and performance analysis of particle accelerators, existing accelerators as examples and emphasizing interplay among design goals, component performance, and operational experience. S/U grading.

280E. Advanced Plasma Laboratory. (4) Lecture, two hours; laboratory, four hours. Requisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

290. Research Tutorial: Plasma Physics. (2 or 4) Requisite: course 241A. Seminar and discussion by faculty, postdoctoral fellows, and graduate students. Topics include superconductivity in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

291. Research Tutorial: Elementary Particle Theory. (2 or 4) Requisites: courses 226A, 230A, 230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4) Requisite of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

294. Research Tutorial: Accelerator Physics. (2 or 4) Lecture, one hour; discussion, two hours. Requisite: course 241A. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

295. Research Tutorial: Solid Earth Physics. (2 or 4) Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on topics of current interest in astrophysics. May be repeated for credit. S/U grading.

298. Research Tutorial: Experimental Elementary Particle Physics. (2 or 4) Limit six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on topics of current interest in experimental elementary particle physics. May be repeated for credit. S/U grading.

299. Research Tutorial: Nuclear Physics. (2 or 4) Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

M370A. Integrated Science Instruction Methods. (4) Same as Chemistry M370A and Earth and Space Sciences M370A. Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: one introductory lower division year (including laboratory) each of chemistry, life sciences, and physics and at least two Earth science courses, preferably one with field experience. Classroom management, lesson design, assessment, history of science education. S/U or letter grading.

M370B. Integrated Science Instruction Methods. (4) Same as Chemistry M370B and Earth and Space Sciences M370B. Lecture: discussion, one hour; laboratory, one hour. Requisite: course M370A or Chemistry M370A or Earth and Space Sciences M370A. Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching College Physics. (2) Seminar/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Requisite: required of all teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies. (2 to 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (4) Tutorial, to be arranged. May be repeated twice for credit.

598. Master's Thesis Research and Writing. (4) Tutorial, to be arranged. May be repeated twice for credit. S/U or letter grading.

599. Ph.D. Research and Writing. (4 to 12) Tutorial, to be arranged. May be repeated for maximum of 18 units. S/U grading.

PHYSIOLOGICAL SCIENCE

College of Letters and Science

UCLA

2317 Life Sciences

Box 951606

Los Angeles, CA 90095-1606

(310) 825-3891,

Graduate Office
physiological science, while elective students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including developmental neurobiology, gene regulation/neural development, cellular neurobiology, molecular neurobiology, neuromuscular physiology, neuroendocrine physiology, cardiac physiology, diet and degenerative disease, auditory and visual behavior, biomechanics of re-

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphasis on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including developmental neurobiology, gene regulation/neural development, cellular neurobiology, molecular neurobiology, neuromuscular physiology, neuroendocrine physiology, cardiac physiology, diet and degenerative disease, auditory and visual behavior, biomechanics of re-

habilitative medicine, muscle cell biology, inflammatory cell biology, vascular biology, cardiac electrophysiology, neuromotor control, and social control of neuronal plasticity. Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology Ph.D. Program (http://www.mcip.ucla.edu) or the interdepartmental Neuroscience Ph.D. Program (http://www.neuroscience.ucla.edu).

**Undergraduate Study**

**Physiological Science B.S.**

**Preparation for the Major**

**Life Sciences Core Curriculum**

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C, or 6AH, 6BH, and 6CH.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in the two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

Transfer applicants to the Physiological Science major with 90 or more quarter units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors; preferably equivalent to Life Sciences 1 and 2; one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

*Required:* Physiological Science 107, 111A (or M180A), 111B, 111C, 111L, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Either three units of course 199 and one letter-graded unit of course 193 OR four units of course 198 may be applied toward the elective requirement. Courses 189HC, 191H, 192, 195, 196, and graduate courses at the 300, 400, or 500 level may not be applied toward this require-

ment. One graduate course at the 200 level may be applied toward the elective requirement by petition.

Each required and elective course must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major. Additionally, a grade of C– or better in each of the core courses (Physiological Science 107, 111A or M180A, 111B, 111C) is required to enroll in the next course in the series.

**Honors Program**

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degree**

The Department of Physiological Science offers the Master of Science (M.S.) degree in Physiological Science.

**Physiological Science Lower Division Courses**

3. Introduction to Human Physiology. (5) Lecture, three hours; laboratory, two hours. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Understanding of human body, its organization from molecular to cellular and organs, and how component parts function in integrated manner to permit life as we know it. P/NP or letter grading.

5. Issues in Human Physiology: Diet and Exercise. (5) Lecture, three hours; discussion, 30 minutes; laboratory, 90 minutes. Not open to Physiological Science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

13. Introduction to Human Anatomy. (5) Lecture, four hours; laboratory, five hours. Not open to Physiological Science majors. Structural survey of human body, including integumentary, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

90. Introduction to Biomedical Science. (2) Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. PINP or letter grading.

Upper Division Courses

100. Experimental Statistics. (4) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. PINP or letter grading.

CM102. Basic Human Biology for Biomedical Engineers I. (4) (Same as Biomedical Engineering CM102.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiological Science majors. Broad overview of basic biological activities and organization of human body in system (organ/tissue) to system basis, with particular emphasis on molecular/simulation of functional aspect of biological system included. Actual demonstration of biomedical instruments, as well as visits to biomedical facilities. Concurrently scheduled with course CM204. Letter grading.

CM103. Basic Human Biology for Biomedical Engineers II. (4) (Same as Biomedical Engineering CM103.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiological Science majors. Molecular-level understanding of human anatomy and physiology in selected organ systems (digestive, skeletal, endocrine, immune, reproductive, respiratory, and skeletal muscular systems, with introduction to biomechanical principles. Letter grading.

111A-111B-111C. Foundations in Physiological Science. (9-6-6) Lecture, four hours; laboratory, two hours. Letter grading. 111A. Requisites: course 107, Chemistry 14C or 30A, Life Sciences 1, 2, 3, 4, Physiology 1B or 6B or 6CH. Not open for credit to students with credit for course M180A. Students must receive a grade of C- or better to proceed to next course in series. Introductions to principles of neurophysiology: cellular and systems neuroscience, including factors controlling muscle cell, neural circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. 111B. Requisites: course 111A, Chemistry 14D or 30B. Students must receive a grade of C- or better to proceed to next course in series. Principles of muscular, cardiovascular, and pulmonary physiology. 111C. Requisites: course 111A or M180A, Chemistry 153A. Students must receive a grade of C- or better to proceed to next course in series. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

111L. Physiological Science Laboratory. (3) Laboratory, four hours. Requisites: courses 111A, 111B, 111C (111C may be taken concurrently). Required of Physiological Science majors. Designed to illustrate physiological principles studied in courses 111A, 111B, 111C. Letter grading.

124. Molecular Biology of Aging. (4) Lecture, three hours. Enforced requisites: Chemistry 135A, Life Sciences 1, 2, 3, 4, 5, 6, 9, 10. Discoveries of new science of age of biology, with examination of aging as plastic trait modulated by genes and physiological processes. Discussion of how these findings integrate with both nutritional modulation and lifespan and complex and profound relationships between underlying aging process and diseases of aging. Topics include dietary restriction, mitochondrial, insulin/IGF signaling, and link between tumor suppression and organismal aging. Letter grading.

126. Biological Clocks. (4) Lecture, three hours; discussion, one hour. Requisites: courses 111A, 111B, and 111C or M 180A, M 180B, and M 180C. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within organisms and are called circadian rhythms. Biological basis of these daily rhythms or circadian oscillations. Exploration of molecular, cellular, and systems-level organization of these timing systems. Temporal role of these variations in maintaining homeostatic mechanisms of body and impact on nervous system. Concurrently scheduled with course C226. Letter grading.

133. Exercise Physiology. (5) Lecture, three hours; laboratory, two hours. Requisites: course 111B. Physiological responses and adaptations to acute and chronic exercise. Concurrently scheduled with course C252. Letter grading.

145. Neuro力学 Mechanisms Controlling Movement. (5) (Same as Neuroscience M145.) Lecture, four hours. Requisites: course 111A or M180A or Neuroscience M147 or M180A. Examination of construction of vertebrate nervous system as series of steps beginning with several embryonic cells and culminating as complex highly ordered system. Topics include neuromuscular, spinal cord, sensory, autonomic, and neuroendocrine. Letter grading.

147. Neurobiology of Learning and Memory. (5) Lecture, four hours; research demonstration, one hour. Requisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

M148. Neuronal Signaling in Brain. (4) (Same as Neuroscience M148.) Lecture, three hours; discussion, one hour. Requisites: courses 111A, 111B (111B may be taken concurrently). Integration of principles gained through basic science curriculum with presently understood mechanisms of human brain function. Consideration of diseases. Progression of development of these diseases presented in terms of changes in cell biology and function, and changes in regulation of intercellular interactions. Letter grading.

153. Dissection Anatomy. (4) Lecture, two hours; laboratory, six hours. Requisite: course 111B. Departmental application required. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.

154. Cellular Communication and Regulation of Physiological Processes. (4) Lecture, three hours. Limited to juniors/seniors. Signal transduction concepts, with focus on role of receptors, G proteins, and intracellular messengers such as cyclic AMP and calcium. Integration of these concepts with variety of physiological processes, including stimulus-secretion coupling, vascular smooth muscle contraction, and role of growth factors in cell proliferation. Contemporary scientific research articles used as basis for material presented. Students required to present journal article for discussion. Letter grading.

155. Development and Structure of Musculoskeletal System. (4) Requisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Identification of knowledge of muscle and connective tissue structure and function on each of these levels to understand organization and physiological behavior of the intact system.

165. Comparative Animal Physiology. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2, 3. Physiological response and function at molecular, cellular, tissue, and system levels of a variety of animals and the relationship to common chronic diseases and physiology of fuel utilization during aerobic and anaerobic exercise. Letter grading.

167. Physiology of Nutrition. (4) Lecture, four hours. Limited to senior Physiological Science majors. Topics include nutritional aspects of metabolism and physiology of the gastrointestinal tract and the relationship to common chronic diseases. May not be repeated for credit. Individual contract required. Letter grading.

169. Comparative Animal Physiology. (4) Lecture, three hours; discussion, nine hours. Limited to junior/senior physiological science honors program students. Development and completion of honors thesis for departmental honors students. May be repeated for credit. Individual contract required. Letter grading.

170. Research Apprenticeship in Physiological Science. (2 to 4) Tutorial, 12 hours. Requisites: courses 111A, 111B. Corequisite: course 193. Limited to junior/senior physiological science honors program students. Additional course to provide further research opportunities for departmental honors students. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty mentor. May be repeated for credit. Individual contract required. Letter grading.

172. Comprehensive Examination in Physiology. (1) Seminar, one hour. Required of undergraduate students. May be repeated for credit. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

C244. Neural Control of Physiological Systems. (5) Lecture, four hours. Requisite: course 111B or M180A or Neuroscience M180A. Study of control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C270A.

250A. Muscle Dynamics. (4) Lecture, four hours. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques. Letter grading.

270A-270B-270C. Modern Concepts in Physiology. (4-4-4) Lecture, two hours; discussion, two hours. Study and evaluation of primary research literature. Study of foundations of modern techniques in physiology, research, analysis of research design. Letter grading.

270A. Requisite or corequisite: course 111A. Foundation for experimental study of organization and function of nervous system and cellular basis of neural plasticity. Letter grading.

270B. Requisite: courses 111A and 151C. Foundation for experimental study of musculoskeletal, cardiovascular, and respiratory systems. Requisite or corequisite: course 111C. Foundation for experimental study of general issues and mechanisms in neuroendocrine physiology.

M272. Neuroimaging and Brain Mapping. (4) (Same as Neuroscience CM272 and Psychology M213.) Study of the cognitive neuroscience of the brain using functional magnetic resonance imaging, positron emission tomography, and other neuroimaging techniques. May be repeated for credit. S/U or letter grading.

291A-291B-291C. Seminars: Cardiovascular Function and Adaptation. (2 to 4 each) Seminar, two to four hours. Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar. Letter grading.

292. Evolution and Development of Auditory System. (2 or 4) Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal pathways. Emphasis on primary literature sources as well as current methodological approaches. Two-hour seminar presentation required for 2 units; seminar paper and two-hour seminar presentation required for 4 units. S/U or letter grading.

293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation. (2 to 4 each) Requisites: courses 138, M260. Selected topics on muscular de- terminants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

294. Recent Advances in Neurophysiology. (1) Seminar, one hour. Requisite: Life Sciences 2 or under- graduate degree in science. Critical examination and discussion of recent data and publications that focus on synaptic function. Student presentations, read- ings, and participation in discussions required. S/U grading.

296. Research Seminar: Physiological Science. (2) Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

297. Seminar: Muscle Cell Biology: (2 to 4) Semi- nar, two hours. Selected topics in muscle cell biology. Students required to present two-hour seminar. May be repeated for credit.

298. Seminar: Nervous System Development. (1 to 2) Seminar, two hours. Selected topics in develop- mental neurobiology, such as neuronal migration, ax- onal guidance, gene expression, and synaptogenesis. Weekly primary literature and original literature reviews. One- hour seminar presentation on assigned weekly reading required of all students; students enrolled for 2 units must also complete written analysis of additional primary literature papers. May be repeated for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel development as team leader, associate, or fellow. Teaching apprenticeship under active guid- ance and supervision of regular faculty member re- sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.
Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, and organ systems and integrative phenomena, including neuroscience and behavioral physiology.

In the last survey conducted by the Conference Board of the Associated Research Councils, UCLA's Physiology Department was judged fourth best in the nation in terms of the quality of its faculty. The department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology Ph.D. Program. See http://www.mcip.ucla.edu or UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences at http://www.uclaaccess.ucla.edu.

**Physiology**

**Upper Division Courses**

100. Elements of Human Physiology. (6) Designed for first-year dental students. Major organic body functions. With special supplementation, a suitable introduction to the field for graduate students for whom the 201A, 201B course sequence is too extensive.

199. Directed Research in Physiology. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**Graduate Courses**

M210. Molecular and Cellular Mechanisms of Neuromuscular Integration. (5) (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour. Requisite: Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including secretion and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation. Letter grading.

220. Methods in Cell Physiology. (6) Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

221. Cell Physiology: Excitability. (6) Requisite: course 220. In-depth coverage of general properties of excitable cells, lineal cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and current, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

**M223. Membrane Molecular Biology.** (4) (Same as Biological Chemistry M223.) Lecture, two hours; discussion, two hours. Requisite: Biological Chemistry CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes, pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

288. Current Topics in Physiology. (2 to 4) Lecture, one hour; discussion, one hour. Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. May be repeated for credit. S/U or letter grading.

595. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. S/U grading.

598. Thesis Research for M.S. Candidates. (2 to 16) Tutorial, to be arranged. May not be applied toward degree requirements for M.S. or Ph.D. degree, provided that students enroll in two different 4-unit 598 courses in different laboratories under supervision of different mentors. Term paper required for letter grading. S/U or letter grading.

599. Dissertation Research for Ph.D. Candidates. (2 to 16) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

**Physiology**

**Scope and Objectives**

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

**Graduate Courses**

M210. Molecular and Cellular Mechanisms of Neuromuscular Integration. (5) (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour. Requisite: Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including secretion and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation. Letter grading.

220. Methods in Cell Physiology. (6) Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

221. Cell Physiology: Excitability. (6) Requisite: course 220. In-depth coverage of general properties of excitable cells, lineal cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and current, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

**M223. Membrane Molecular Biology.** (4) (Same as Biological Chemistry M223.) Lecture, two hours; discussion, two hours. Requisite: Biological Chemistry CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes, pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

599. Dissertation Research for Ph.D. Candidates. (2 to 16) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.
Preparation for the Major
Required: Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are requisites to upper division courses and are required in those fields designated as the concentration or distribution field. Students must also take Political Science 6 or 6R. Students who concentrate in Fields I, II, III, or IV may substitute Statistics 10 or 12 for course 6 or 6R.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

Transfer Students
Transfer applicants to the Political Science major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one statistics course and four courses from political theory, world politics, game theory, American politics, or comparative politics.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Ten upper division courses (40 units) selected from Political Science 104A through 199, each taken for a letter grade. Students are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150), psychology (except Psychology 115, 116), sociology. Each course must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into five fields: (I) political theory, (II) international relations, (III) American politics, (IV) comparative politics, and (V) methods and models.

In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

1. A concentration in one field by completing the lower division course and at least four upper division courses in that field
2. A distribution of the lower division course and two upper division courses in each of two other fields (four upper division courses
3. Two additional elective courses in political science to comprise the total of 10

Field Concentration Requirements
The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

I. Political Theory: Political Science 10 and any four courses in Field I
II. International Relations: Course 20 and any four courses in Field II. Courses 114A and 151C may also be applied toward concentration or distribution in Field II
III. American Politics: Course 40 and any four courses in Field III. Courses 114A through 114D, 115A, 120A, and 121A may also be applied toward concentration or distribution in Field III

IV. Comparative Politics: Course 50 and any four courses in Field IV. Courses 118, 124C, 128A, 128B, 131, 132A, M132B, and 135 may also be applied toward concentration or distribution in Field IV

V. Methods and Models: Courses 6 or 6R (Statistics 10 and related courses may not be substituted), 30, and any four courses from 104A, 104B, M105, M106, 124A, 142D, 149 (collective action: congress, institutions, and collective choice; legislative strategy), 153B, 156D, 166, 169 (political economy of development), 170A, 191B (international negotiation)

Courses 119, 139, 149, 169, and 179 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 191H, 198, and 199 may not be applied toward either the concentration or distribution requirement.

Political Science majors should be aware that the upper division course requirements in the major (56 units) do not meet the upper division requirement of 60 units for graduation. Additional upper division units must be taken to reach the 60-unit total.

Undergraduate Seminars
Each term the department offers a series of seminars (Political Science 191A through 191E) in each field. The requisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program
The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar course in the Political Science 191 series be-
fore they enter the honors program or course 191H.

Students wishing to qualify for graduation with
developmental honors must complete the follow-
ing: (1) courses 191H and 198, in which a se-
nior thesis is written; (2) eight upper division
courses (excluding courses 119, 139, 149,
169, and 179) distributed as follows: four
courses in one field and four additional
courses, two in each of two other fields; (3) four
upper division courses in one or two of the so-
cial sciences other than political science.

International Relations
Specialization

The undergraduate specialization in Interna-
tional Relations can only be taken jointly with a
major in Political Science, and all requirements
for the Political Science major must be met by
or in addition to meeting the requirements of
this program. Students completing the program
receive a degree with a major in Political Sci-
ence and specialization in International Rela-
tions. The program is designed to serve the
needs of (1) students desiring a general edu-
cation focused on international affairs and (2)
students preparing for graduate work in inter-
national affairs, whether in a social science or
area study.

The program is also beneficial for (1) students
planning careers (in business, law, journalism,
or library service) with an international empha-
sis and (2) those preparing to teach social sci-
ces in the secondary schools. These stu-
dents should structure their programs primarily
to meet the preparation requirements of the
professional school or instructional credential
of their choice.

Courses in management and administration,
and in oral and written communications, ordi-
narily increase the career options of students
in this program.

Preparation for the Specialization
Required: Political Science 20, 50, and two
courses from 10, 30, 40; Anthropology 9; Eco-
nomics 1 and 2, 5, or 100; Geography 3 or 5;
History 1A, 1B, and 1C, or any three courses
from 8A, 8B, 8C, 9A, 9C, 9D, M10A, 10B, 11A,
11B; Sociology 1.

Upper Division Requirements

The Political Science major should be com-
pleted as follows: any four upper division politi-
cal science courses in each of Fields II and IV
and two additional courses both in Field I or III.

Other required social sciences courses include
one course from Anthropology 161, 167, 171,
173Q, 174P, 175R, 175T, 175U, 177, Sociol-
ogy 179, 182, 183, 186, 187; two courses from
Economics 110, 111, 112, 120, 121, 122, 180,
181A, 181B; one course from Geography 110,
121, 125, M128, 133, 140, 181, 182A, 182B,
183, 185, 186, 187; two courses from History
113A, 113B, 114A, 123A, 123B, 137A, 137B,
140C, 144.

Completion of the sixth quarter course (or
ym distinction, a grade of C or better, of any
modern foreign language is also required.
French 6, German 6, Spanish 25, and Russian
6 are most frequently offered in fulfillment of
this requirement, but also refer to the offerings
listed under African Languages, Asian Lan-
guages and Cultures, Germanic Languages,
Italian, Near Eastern Languages and Cultures,
and Portuguese. Arabic, Chinese, French, Ger-
man, Japanese, Russian, and Spanish are the
languages of widest career utility in interna-
tional affairs.

Each course must be taken for a letter grade.

Area Focus

Students are advised but not required to con-
centrate their political science, geography, his-
tory, and language courses so as to achieve
broad familiarity with one area, such as Africa,
East Asia, Europe, Latin America, the Middle
East, South Asia, or Southeast Asia.

For further information, contact the Undergrad-
uate Office, 4269A Bunche Hall.

Political Science Minor

The Political Science minor introduces stu-
dents to political processes and institutions.

To enter the minor, students must have an
overall grade-point average of 2.0 or better and
file a petition in the Undergraduate Office, 4269A Bunche Hall.

Required Lower Division Courses (10 units):
Any two lower division political science

Courses.

Required Upper Division Courses (20 units):
Any five upper division political science
courses.

Each minor course must be taken for a letter
grade, and students must have an overall
grade-point average of 2.0 or better. Success-
ful completion of the minor is indicated on the
transcript and diploma.

Graduate Study

Official, specific degree requirements are de-
tailed in Program Requirements for UCLA
Graduate Degrees, available at the Graduate
Division website, http://www.gdnet.ucla.edu/
gasaia/library/pgmrinintro.htm. In many cases,
more detailed guidelines may be outlined in
announcements, other publications, and web-
ites of the schools, departments, and pro-
grams.

Graduate Degrees

The Department of Political Science offers
Master of Arts (M.A.), Candidate in Philosophy
(C.Phil.), and Doctor of Philosophy (Ph.D.) de-
grees in Political Science.

Political Science

Lower Division Courses

6. Introduction to Data Analysis, (5) Lecture,
three or four hours; discussion, one hour (when
scheduled). Not open for credit to students with credit for course
6R. Introduction to collection and analysis of political data, with emphasis on application of statistical rea-
soning to study of relationships among political vari-
ables. Use of computer as aid in analyzing data from
various fields of political science, among them com-
parative politics, international relations, American pol-
itics, and public administration. P/NP or letter grading.

6R. Introduction to Data Analysis — Research
Version, (5) Lecture, three or four hours;
discussion, one hour (when scheduled). Corequisite: course 50R.
Not open for credit to students with credit for course
6. Introduction to collection and analysis of political data,
with emphasis on application of statistical reasoning
to study of relationships among political variables.
Use of computer as aid in analyzing data from compar-
ative politics. P/NP or letter grading.

10. Introduction to Political Theory, (5) Lecture,
three hours; discussion, one hour. Exposition and
analysis of selected political theorists and concepts
from Plato to the present. P/NP or letter grading.

20. World Politics, (5) Lecture, three hours;
discus-
sion, one hour. Required of all students concentrat-
ing in Field II. Introduction to problems of world politics. P/
NP or letter grading.

30. Politics and Strategy, (5) Lecture, three or four hours;
discussion, one hour (when scheduled). Intro-
duction to study of strategic interaction in political ap-
plications. Use of game theory and other formal mod-
eling strategies to understand politics. P/NP or letter grading.

40. Introduction to American Politics, (5) Lecture,
three hours; discussion, one hour. Basic institutions
and processes of democratic politics. Treatment of
themes such as constitutionalism, representation, par-
ticipation, and leadership coupled with particular em-
phasis on the American case. P/NP or letter grading.

50. Introduction to Comparative Politics, (5) Lecture,
three hours; discussion, one hour. Not open for credit to students with credit for course
50R. Comparative study of constitutional principles,
governmental institutions, and political processes in selected
countries. P/NP or letter grading.

50R. Introduction to Comparative Politics — Re-
search Version, (5) Lecture, three or four hours; dis-
cussion, one hour (when scheduled). Corequisite: course 6R. Not open for credit to students with credit
for course 50R. Comparative study of constitutional princi-
ples, governmental institutions, and political process-
es in selected countries, with emphasis on presenta-
tion and evaluation of quantitative evidence. P/NP or
letter grading.

88A-88D. Lower Division Seminars, (4 each) Semi-
nar, three hours. Limited to freshmen/sophomores.
Opportunity to enhance writing, oral, and reasoning
skills. General introduction to a subfield of a major ar-
ea, or intensive exploration of a particular theme or
topic. Variable topics; consult Schedule of Classes for
topics to be offered in a specific term. May not be re-
peated for credit except by students who receive a
grade of C−, D, or F. P/NP or letter grading.

88A. Political Theory; 88B. International Relations; 88C.
Politics; 88D. Comparative Politics.
Upper Division Courses

104A-104B. Introduction to Survey Research. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 6. Designed for juniors/seniors. Courses in fundamentals of survey research as a method. 104A. Sampling theory and methods, development of survey questionnaire, discussing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

M107. Women and Politics. (4) (Same as Women’s Studies M117.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to rapidly growing body of empirical and theoretical scholarship on women and politics in both national and international contexts. Topics may include women’s movement in the U.S. and globally; women’s electoral participation; representation of women and issues in legislatures worldwide; women as heads of government and state; feminist critiques of political science; women and human rights; ERA; struggle for suffrage; mothers of political and military; women, development, and globalization. May be applied toward Field I, III, or IV. P/NP or letter grading.

Field I: Political Theory

M111A-111B-111C. History of Political Thought. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: juniors/seniors. Exposure and critical analysis of major political philosophers and schools. P/NP or letter grading. M111A. Ancient and Medieval Political Theory from Plato to Machiavelli. (Same as Classics M121.) Early Modern Political Thought from Hobbes to Bentham. 111C. Late Modern and Contemporary Political Theory from Hegel to the Present.

M112A. Democratic Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Analysis of selected major authors, issues, and arguments in contemporary democratic theory. M112B. Invention of Democracy. (5) (Same as Classics M125.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Democracy was invented in ancient Greece. Political form grounded on equality before law, citizenship, and freedom, it came into existence as struggle for “good, aware of its excellence and proud of its power,” krateo. It became only regime capable of including all members of community while disregarding wealth, status, and diverging interests. Examination of history and theory of ancient democracy. P/NP or letter grading.

M113A. Problems in 20th-Century Political Theory. (4) (Formerly numbered 113.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study and interpretation of theorists who have focused their analyses on social and political problems of the 20th century. P/NP or letter grading.

M113B. Politics, Theory, and Film. (4) Seminar, four hours. Recommended requisite: course 10. Designed for juniors/seniors. Intense and individualized examination of politically significant films with respect to central issues in political theory such as power and truth in light of relevant political theorists. P/NP or letter grading.

M114A-114B. American Political Thought. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of American political thinkers from the Puritan period to 1865. 114A. Exposition and critical analysis of American political thinkers from 1865 to the present. M114C. African American Political Thought. (4) (Same as Afro-American Studies M114C.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. P/NP or letter grading.

M114D. African American Freedom Narratives. (4) (Same as Afro-American Studies M114D.) Lecture, three or four hours; discussion, one hour (when scheduled). Historical, psychological, and thematic interpretation of selected narratives and storytelling in African American culture and politics. P/NP or letter grading.

M114E. Malcolm X and Black Liberation. (4) (Same as Afro-American Studies M114E.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Analysis of black radicalism in mid-20th century, with special attention to contribution of Malcolm X and black nationalism to African American liberation movement. P/NP or letter grading.

M115A. Ethics and Governance. (4) (Formerly numbered 115A.) (Same as Human Complex Systems M145 and Public Policy M122.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of applied ethics and governance, taking case-based approach, mixing normative and positive perspectives. Is action X morally right or wrong? How do people reason about whether action X is morally right or wrong? How can we design governance structures that encourage people to act ethically, contribute to public goods, and lead productive and fulfilling lives? May be applied toward Field I or III. P/NP or letter grading.

M115B. Political Ethics. (4) (Same as Public Policy CM126.) Lecture, three or four hours; discussion, one hour (when scheduled). Course M115A is not requisite to M115B. Designed for juniors/seniors. Study of major issues in morality, or lack thereof, of political life. Coverage of both existing political theory and real-world examples such as Watergate, terrorism, civil rights politics, and presidential campaigns. Topics include basic ethical theory, role- relativistic, Machiavellianism, relativism, and real-world ethics. P/NP or letter grading.

M115C. Citizenship and Public Service. (4) (Formerly numbered 115C.) (Same as Civic Engagement M151.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 10. Designed for juniors/seniors. Study of ways in which political thinkers have conceived of ideas of citizenship and public service, how these ideas have changed over time, and frameworks for thinking about citizenship in era of markets and globalization. P/NP or letter grading.

M115D. Diversity, Disagreement, and Democracy: Can’t We All Just Get Along? (Same as Human Complex Systems M140D.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Can’t we all just get along? Study of diversity, disagreement, and democracy. Diversity covers individual differences, cultural differences, and human universals; groupism, factionalism, and identity politics; multiculturalism and one-world ethics. Disagreement includes moral, ideological, and party-political disagreement; resolvable and irresolvable kinds of disagreement; groupthink and group polarization; herding and information cascades. Democracy stresses political rather than social aggregation; political mechanisms to resolve differences, or to keep peace among people with irresolvable differences; emergence and spread of democracy, liberty, and rule of law. P/NP or letter grading.

M116A. Marxism. (4) (Formerly numbered 116.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of origins, nature, and development of Marxist political thought. P/NP or letter grading.

M116B. Continental Political Thought. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. Letter grading.

M117. Jurisprudence. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. Letter grading.

119. Special Studies in Political Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one course in Field I. Recommended prerequisite: course 10. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. Courses numbered 119, 139, 149, 159, and 179 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward major. P/NP or letter grading.

M119A. Miscegenation: A Critical Reconsideration of Race and Race. (4) (Same as Classics M124.) Lecture, three hours. Designed for juniors/seniors. Study of how Western culture has conceived and reinterpreted political theory, race and racism, and white supremacy, or to keep peace among people with irresolvable differences; emergence and spread of democracy, liberty, and rule of law. P/NP or letter grading.

Field II: International Relations

120A. Foreign Relations of U.S. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of factors and forces entering into formation and implementation of American foreign policy, special emphasis on contemporary problems. P/NP or letter grading.
120B. World Politics and U.S. Foreign Policy after
September 11. (4) Lecture, three or four hours; dis-
cussion, one hour (when scheduled). Designed for ju-
niors/seniors. Survey of foreign policies from 1945
through 2001, with emphasis on containing nuclear
proliferation and on avoiding nuclear war. Letter
grading.

122A. World Order. (4) Lecture, three or four
hours; discussion, one hour (when scheduled). Requi-
site: course 20. Designed for juniors/seniors. Theory
and practice of the international system seen as com-
munity of policymakers and final crisis simulation exer-
cise. Letter grading.

122B. Global Environment and World Politics.
(4) (Same as Environment M161.) Lecture, three or
four hours; discussion, one hour (when scheduled).
Recommended requisite: course 20. Politics and pol-
icy of major global environmental issues such as cli-
mate change, integrating law, policy, and political
science perspectives. Letter grading.

123A-123B. International Law. (4-4) Lecture,
three or four hours; discussion, one hour (when sched-
uled). Requisite: course 20. Course 123A is requisite to
123B. Designed for juniors/seniors. Study of nature
and place of international law in conduct of interna-
tional relations. Letter grading.

124A. International Political Economy. (4) (Former-
ly numbered 124.) Lecture, three or four hours;
discussion, one hour (when scheduled). Requisite:
course 20. Designed for juniors/seniors. Study of pol-
itical aspects of international economic issues. P/NP
or letter grading.

124B. Comparative Foreign Economic Policy. (4)
(Formerly numbered 128.) Lecture, three or four
hours; discussion, one hour (when scheduled). De-
signated for juniors/seniors. Examination of foreign
trade, monetary, and investment policies of U.S., Ja-
pan, France, and Federal Republic of Germany since
1945. P/NP or letter grading.

125A. Arms Control and International Security. (4)
(Formerly numbered 125.) Lecture, three or four
hours; discussion, one hour (when scheduled). De-
signated for juniors/seniors. Arms control in context
of international security in nuclear age. Nuclear arms
race; relationship between deterrence doctrines and
nuclear war; roles of technology and ideology; nucle-
ar war; arms control; one hour (when scheduled). Letter
grading.

125B. U.S. National Security Policy. (4) (Same as
Public Policy CM123.) Lecture, three hours; outside
study, nine hours. Limited to juniors/seniors. Examina-
tion of means and methods of how policymakers develop
strategies to address them. Exploration of Cold War legacy, development of
American national security strategic doctrine, and U.S. failures in achieving
U.S.S.R. from 1945 to present. Examination of broad spectrum of issues confronting
today's foreign policy leaders, from threats to vital U.S. interests (WMD prolifi-
cation and terrorism), to regional security and economic challenges (China, Iraq), to
humanitarian intervention and nation-building (Darfur, Af-
ghanistan). Students draft analytic options memos and deliver oral presentations on how to handle six current national security threats/promises. Provides overview of cur-
rent challenges and hones student analytic skills to ex-
amine these challenges from strategic policy perspec-
tive. Letter grading.

126. Peace and War. (4) Lecture, three or four
hours; discussion, one hour (when scheduled). Requi-
site: course 20. Designed for juniors/seniors. Theory
and research on causes of war and conditions of peace.

127A-127B. Atlantic Area in World Politics. (4-4)
Lecture, three or four hours; discussion, one hour
(when scheduled). Designed for juniors/seniors. 127A.
Western European. External relations of United King-
dom, West Germany, France, Italy, and other Europe-
an members of NATO, in regard to European security
in context of the Atlantic Alliance. 127B. U.S. and Eu-
rope. Requisite: course 127A. Relations between the U.S.
and Western European members of the Atlantic
Alliance in context of their coincidences.

128. U.S./Soviet Relations. (4) Lecture, three or
four hours; discussion, one hour (when scheduled).
Requisite: course 20. Designed for juniors/seniors. Survey of relations between the U.S. and former Sovi-
et Union from Revolutions of 1917 to collapse of the

128B. International Relations of Post-Communist
Russia. (4) Lecture, three or four hours; discussion,
one hour (when scheduled). Requisites: courses 20, 149,
and 169. Survey of foreign policy of post-Communist Russia, with special em-
phasis on Russia's relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent
States.

129. Diplomacy and War. (4) (Not same as course
129 prior to Winter Quarter 2008.) Lecture, three or
four hours; discussion, one hour (when scheduled).
Requisite: course 20 or 137A. Designed for juniors/
seniors. Analysis of role of diplomacy in great power
politics, history of diplomatic institutions, advantages of public and private diplomacy, bilateral and multilat-
eral settings, and theory and practice of deterrence and coercion. P/NP or letter grading.

131. Latin American International Relations. (4)
Lecture, three or four hours; discussion, one hour
(when scheduled). Requisite: course 20. Designed for
juniors/seniors. Major problems of Latin American
international relations and organization in recent de-
cades.

132A-M132B. International Relations of Middle
East. (4-4) Lecture, three or four hours; discussion,
one hour (when scheduled). Designed for juniors/se-
eniors. P/NP or letter grading. 132A. Requisite: course 20. Contemporary regional issues and conflicts, with particular attention to Inter-Arab politics, Arab-Israeli peace process and regional conflicts. 132B. (Same as Honors Collegium M157.) Role of great powers in Middle East, with emphasis on American, Soviet, and West European policies since 1945.
Field III: American Politics

140A-140B-140C. National Institutions. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. 140A. Congress. Study of those factors which affect the character of the legislative process and capacity of representative institutions to govern in contemporary society. 140B. The Presidency. Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. 140C. Supreme Court. Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

M141A-141E. Electoral Politics. (4 each) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading:

M141A. Political Psychology. (4) (Same as Psychology M138.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues. P/NP or letter grading.

141B. Public Opinion and Voting Behavior. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote decision, and influence of public opinion on public policy formulation. P/NP or letter grading.

141C. Political Behavior Analysis. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 6, 40, 141B. Designed for juniors’ seniors. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses. P/NP or letter grading.

M141D. Mass Media and Elections. (4) (Same as Communication Studies M161.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Assessment of manner in which Americans’ political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media “effects,” and role of the media in the American political process. P/NP or letter grading.

141E. Elections, Media, and Strategy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. Analysis of elections and media, including game-theoretic analysis. Downs spatial model of elections, valence characteristics in elections, campaign finance, endogeneity problems in social sciences, liberal bias in media, industrialization of news industry, and effects of media on voter decisions. May be applied toward Field III or V. P/NP or letter grading.

142A-142B-142C. Political Parties and Interest Groups. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. 142A. Political Parties. Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, the political parties and their problems and party activists, political finance, and policy formulation practices. 142B. Politics of Interest Groups. An examination of the political role of various interest groups in governmental process, with attention to internal organization, leadership, and politics of such groups to goals and functions of various types of groups and to strategies and tactics of influence. 142C. Government and the Economy. National and state control of public and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation.

142D. Understanding Public Issue Life Cycle. (4) (Formerly numbered 142D.) (Same as Public Policy M127.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended preparation: courses 10, 40, and one course from Economics 1, 2, 5, 110, or 101. Examination of how public issue life cycle is shaped by (1) economic and political incentives of various actors — business, news media, mass public, organized interests, the president, regulatory agencies, and courts and (2) ideolog-ical, cognitive biases, and ethical reasoning. P/NP or letter grading.

143A-143B-143C. Subnational Government. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40 for juniors/seniors. P/NP or letter grading. 143A. American State Government. Course, four hours. Examination of governments of states of federal union as major sources of public policy in the U.S., with government of California as principal topic. 143B. Government of American Cities. Course, four hours. Intensive analysis of contemporary urban government and emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems. 143C. Politics of Global Los Angeles in 21st Century — Globalization, Democracy, and Citizenship in Southern California Region. Study of political transformation of Southern California region. Major themes include (1) globalization, restructuring, and regional development, (2) citizenship, democracy, and regional governance, (3) effects of globalization processes on contemporary local politics, (4) effectiveness of political structures and electoral politics.

144A-M144B. Ethnic Politics. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. 144A. Chicano/Latino Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Preliminary meeting Tuesday, 2:00 p.m. Ethnic politics of one upper division course on race or ethnicity from history, psychol-ogy, or sociology. Requisite: course 40. Designed for juniors/seniors. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining historically changing relationship between class, race, and power by studying interaction between state policies, political and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period. Letter grading.

M144B. African American Politics. (4) (Same as Afro-American Studies M144.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one upper level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in the U.S., focusing on conditions facing racial and ethnic groups, with black Americans being primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic condi-tions of black community, (2) to analyze important po-litical issues facing black Americans, (3) to sharpen students’ analytical skills. P/NP or letter grading.

M144C. Equal Rights and Unequal Education. (4) (Same as Education M186 and Public Policy M186.) Lecture, three or four hours. Exploration of the relationship between American beliefs about equal opportunity and racial equality and inequalities that exist in public educa-tion. Three major topic areas in education as vehicles for understanding philosophical and empirical complexities of issues surrounding equality in Ameri-can education and life. Examination of issues from le-gal, sociological, political, and philosophical perspec-tives. Arguments range from Martin Luther King to Ronald Reagan, and legal cases include Plessy versus Ferguson to Brown versus Board of Education, as well as cases still pending in courts. Letter grading.

145A-145E. Public Law and Judicial Process. (4 each) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. P/NP or letter grading:

145A. Anglo-American Legal System. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in U.S. and remain relevant today. P/NP or letter grading.

145C. Constitutional Law — Civil Liberties. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Protection of civil and political rights and liberties under constitution. P/NP or letter grading.

145D. Judicial Oversight of Bureaucracy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Legal controls of administration action. Substan-tive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

145E. Constitutional Law — Rights of Accused. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. P/NP or letter grading.

146A-146F. Organization Theory, Public Policy, and Administration. (4 each) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Introduction to processes of policy for-mation and implementation. Exploration of emerg-ence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.
146C. Governing the Bureaucracy in the U.S. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of the role of elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of the executive branch of the government (career bureaucrats). P/NP or letter grading.

146D. Theories of Organization and Decision Making. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

146E. National Policy Development and Implementation. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term. P/NP or letter grading.

146F. Politics, Ethics, and Business. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of political issues, interest institutions, and the ways that those institutions are used to shape constraints on and provide opportunities for business. Ethical issues that arise in external environment of business and its internal operations. Examples of topics include government regulation, product liability, affirmative action, lobbying Congress, exporting hazardous waste to developing countries. P/NP or letter grading.

146G. Social Life of Information. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of how information moves from those who have it to those who need it. Information flows in groups, organizations, and mass public. Analysis of how decision-making structures in groups and organizations shape flow of information and how flow of information influences group and organizational performance. How mass media create a "public issue life cycle." P/NP or letter grading.

147A-147B-147C. American Political Development. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. P/NP or letter grading.

147A. Comparisons, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Introduction to historical development of American politics and ideas and institutions that drive durable change over time. Examination of theories, concepts, and analytical tools at center of developmental inquiry. P/NP or letter grading.

147B. Period Inquiry. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of one period in American political history. Critical features fostering stability and change. Discussion of contributions to structure and content of contemporary American politics. Possible periods, Founding, Reconstruction, Progressive Era, New Deal, and Cold War. Consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

147C. Institutional Development. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of one American political institution and its development over time, or interaction of American politics and some aspect of culture and society. Assessment of broader political environment of politics, isolating points of contact, conflict, and pressure for change. Possible institutions include political parties, Congress, Constitution, business regulation, and politics and religion. P/NP or letter grading.

149. Special Topics in American Government and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Course 119, 139, 149, 169, and 179 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward major. P/NP or letter grading. Also see course 117

Field IV: Comparative Politics

151A-151B-151C. African Politics. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letter grading.

151A. Government and Politics of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution. Letter grading.

151B. Political Economy of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of interrelations of economic and political factors in African development, with special attention to political basis of inappropriate economic policy during early post-independence period and change toward a more appropriate economic strategy in recent times. Letter grading.

151C. Special Topics in African Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consult Schedule of Classes for topics to be offered in a specific term. Letter grading.

152A-152B-152C. Government and Politics of West European Countries. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Constitutional and political structure and development of one or more states in Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading. 152A. Britain; 152B. France; 152C. Germany.

153A-153B. Comparative Government and Politics of Western Democracies. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparison of constitutional and political structure of West European states, with particular attention to contemporary problems. P/NP or letter grading.

153A. West European Government and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

153B. Game-Theoretic Approach to West European Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Course 153A is not required. Designed for juniors/seniors. Uses of elementary game theory to investigate post-World War II Western European politics. Social and political forces, and political institutions. Particular emphasis on crises and political behavior in the West — United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S. P/NP or letter grading.

154A-154B. Government and Politics in Latin America. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of governmental and political development, organization, and practice in Latin America. P/NP or letter grading.

154C. Black Experience in Latin America and Caribbean. (4) Same as Afro-American Studies M154. Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, by topic. Emphasis on cross-Atlantic comparisons, not only the major states of selected Post-Communist countries, with emphasis on development of general theories of political and economic reform. P/NP or letter grading.

155A-155D. Government and Politics of Post-Communist States. (4 each) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

155A. Eastern Europe. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union. P/NP or letter grading.

155B. Post-Soviet States. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of institutions and political processes in selected post-Communist states of Eastern Europe. P/NP or letter grading.

156D. Political Economy of Post-Communist Reform. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Focused study of interaction between transitions to democracy and market reform in the post-Soviet world. P/NP or letter grading.

157. Government and Politics in the Middle East. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

158. Southeast Asian Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of regional political environment in major Southeast Asian states. Use of comparative analysis to address major problems confronting region, including democratization, economic growth, drug trade, deinfrastructurization, and security threats. Letter grading.

159A-159B. Government and Politics of China. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors: 159A. Chinese Revolution and Age of Mao Zedong. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

159B. China in Age of Reform. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of China’s political and ideological transformation in post-Mao era. Assessment of impact of changing socioeconomic conditions on revolutionary policies and programs of Chinese Communist Party. Exploration of ideology of 1989 Tiananmen crisis and consequences for China of collapse of Communism in East Europe and the Soviet Union.

M154C. Black Experience in Latin America and Caribbean. (4) Same as Afro-American Studies M154. Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, by topic. Emphasis on cross-Atlantic comparisons, not only the major states of selected Post-Communist countries, with emphasis on development of general theories of political and economic reform. P/NP or letter grading.

155. Advanced Pluralist Democracies. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, by topic. Emphasis on cross-Atlanticcomparisons, not only the major states of selected Post-Communist countries, with emphasis on development of general theories of political and economic reform. P/NP or letter grading.
160. Government and Politics of Japan. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 50. Designed for juniors/seniors. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

164. Comparative History of Government from Earliest Times to Present Day. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended prerequisite: course 50. Designed for juniors/seniors. Historical diversity of forms of government: archetypal politics, great empires, major innovations, notable variants. P/NP or letter grading.

165. Islam and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Religious and spiritual foundations of Islamic legal and political institutions; legitimacy of historical and contemporary Islamic regimes, movements, and ideologies; political strategies of Islamic activism. P/NP or letter grading.

166. Comparative Analysis of Government Institutions. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparison of major institutional structures such as presidentialism vs. parliamentary, unicameralism vs. bicameralism, multiparty systems, federal vs. unitary systems, plurality vs. proportional electoral systems, etc. Method of analysis is rational choice (political actors are assumed to maximize their results given institutional constraints and action of other actors). Result is that institutions affect political outcomes in systematic ways. P/NP or letter grading.

167A. Ideology and Development in World Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 50. Designed for juniors/seniors. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of current debate about imperialism.

167B. Comparative Development and Administration. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 50. Designed for juniors/seniors. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Explains why some countries are poor and why, among latter, some have been able to achieve rapid rates of economic growth and others have not. Explanation and review of logic behind most important arguments that have been advanced to account for differences across countries in rates and levels of economic development. May be applied to either Field IV or V. Letter grading.

167D. Political Institutions and Economic Development. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 50. Designed for juniors/seniors. Political economy approach to question of why some countries are rich and others are poor and why, among latter, some have been able to achieve rapid rates of economic growth and others have not. Explanation and review of logic behind most important arguments that have been advanced to account for differences across countries in rates and levels of economic development. May be applied to either Field IV or V. Letter grading.

167F. Comparative Political Analysis. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: two courses in Field IV, or course 50 and one course in Field IV. Designed for juniors/seniors. Major approaches to study of comparative politics. Conceptual framework and methodology of comparative analysis. Letter grading.

Special Studies

190. Research Colloquia in Political Science. (1) Seminar, one hour. Designed to bring together students undertaking supervised tutorial research in seminars setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

190H. Honors Research Colloquia in Political Science. (1) Seminar, one hour. Designed to bring together students writing departmental honors theses in seminar setting with one or more faculty members to discuss their thesis work in progress. Led by one supervising faculty member.

191A-191E. Variable Topics Research Seminars for Majors. (4 each) Seminar, three hours. Preparation: two upper division courses in field in which seminar is offered. Limited to junior/senior Political Science majors. May be repeated for credit. P/NP or letter grading.

197A. Applied Formal Models: Collective Action and Social Movements. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 30. Designed for juniors/seniors. How do institutional policies and political movements convince people to participate? Consideration of various theoretical perspectives, including game-theoretic, social network, structural, and “identity” approaches, illustrated by case studies. May be applied toward Field III, IV, or V. P/NP or letter grading.

197B. Collective Choice and Majority Rule. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 30. Designed for juniors/seniors. How do different voting rules determine how different groups of people vote? Consideration of various theoretical perspectives, including game-theoretic, social network, structural, and “identity” approaches, illustrated by case studies. May be applied toward Field III, IV, or V. P/NP or letter grading.

197C. Legislative Strategy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 30. Designed for juniors/seniors. How do politicians get policies changed by legislatures, city councils, and other voting bodies? Application of game-theoretic reasoning to common situations and tactics in the legislature. May be applied toward Field III or V. P/NP or letter grading.

197D. Negotiation. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 30. Designed for juniors/seniors. Study of negotiation and bargaining in different contexts. Experiential exercises with emphasis on various aspects of negotiation, including coalition formation, honesty, and role of agents. May be applied toward Field II or V. P/NP or letter grading.

197E. Strategy and Conflict. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced prerequisite: course 30. Designed for juniors/seniors. Intermediate topics in game theory applied to political problems, with special attention to strategic consequences of incomplete information and information asymmetries. P/NP or letter grading.

197F. Special Topics in Methods and Models. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Prerequisite: course 30. Designed for juniors/seniors. Intensive examination of one or more special problems related to methods and models in political science. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, and 175 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward major. P/NP or letter grading.
195. Community or Corporate Internships in Political Science. (2 or 4) Tutorial, to be arranged. Preparation: 3.0 overall grade-point average. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Political Science. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for maximum of 16 units. Individual contract required. P/NP grading.

Graduate Courses

Formal Theory and Quantitative Methods

200AL. Statistical Methods Laboratory I. (4) Laboratory, three hours. Corequisite: course 200A. Letter grading.

200D. Quantitative Methods in Politics. (4) Seminar, three hours. Preparation: knowledge of calculus and matrix algebra. Recommended requisite: course 200C. Design, testing, and evaluation of hypotheses in course 200C. Focus on logical and mathematical structure underlying some statistical methods that are frequently used in political science. Emphasis on understanding structure of the logic rather than on gaining added experience using them to analyze data. Applied data analysis. Letter grading.

200E. Advanced Topics in Quantitative Methods. (4) (Formerly numbered 200EC.) Seminar, three hours. Topics vary and have included instrumental variables principal components and scaling, models of selection, models of duration, ecological inference, and hazard function. Students present papers on relevant statistical theory and applications. Monte Carlo simulations and replications of well-known studies used to demonstrate how various models work and how they are applied in practice. S/U or letter grading.

201A. Introduction to Formal Political Analysis. (4) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools with which to interpret and critique political background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote trading.

201B. Theory of Collective Choice. (4) Seminar, three hours. Recommended preparation for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstract, deductive study of voting systems and other collective-choice processes. Axometric method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts.

202B. Economic Theory and Methods for Political Science II. (4) Discussion, three hours. Requisite: course 202A. Continuing survey of microeconomic techniques used in formal political science, with focus on market failures and on modeling individual choice in nonmarket situations. Specific topics include externalities, public goods and allocation mechanisms, collective action, spatial models, structure-induced equilibrium, and information asymmetries.

204. Game Theory in Politics. (4) Seminar, three hours. Survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science.

205B. Topics in Applied Game Theory. (4) (Same as Economics M215.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, collective allocation, and voting power. S/U or letter grading.

205D. Multivariate Analysis with Latent Variables. (4) (Same as Psychology M257 and Statistics M204.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured means factor analytic models. Structural equation modeling, including path diagrams with latent variables, specific structural equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications. S/U or letter grading.

205E. Bayesian Econometrics. (4) (Same as Economics M231, 231B.) Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. May be repeated for credit. S/U or letter grading.

209. Special Topics in Formal Theory and Quantitative Methods. (4) Seminar, three hours. S/U or letter grading.

Political Theory

210A-210B. Introduction to Political Theory. (4-4) Lecture, three hours. Exploration of major texts and issues in political theory. 210A. Classical and Medieval Formulations from Plato through Aquinas. 210B. Early Modern Period from Machiavelli through the Enlightenment.

214. Political Theory in Transnational Context. (4) Seminar, three hours. Discussion, one hour (when scheduled). Critical analysis of selected text from postcolonial, spatial, feminist, postmodern, and poststructuralist theories that assess impact of processes of globalization on such major concepts and problems of traditional social and political theory as sovereignty, citizenship, rights, community, representation, and democracy. S/U or letter grading.

215. Liberalism and its Critics. (4) Seminar, three hours. Discussion, one hour (scheduled). Examination of works of one or more major contemporary liberal theorists (Rawls, Dworkin, Habermas, Nussbaum, etc.) in light of alternatives which have been proposed, and the liberal position (communitarianism, poststructuralism, group rights theories, etc.). S/U or letter grading.

216. Toleration, Pluralism, and Diversity. (4) (Same as Public Policy M248.) Seminar, three hours. Prior experience in political or legal theory helpful. Exploration of both abstract concepts and practical issues. S/U or letter grading.

217. Selected Texts in Political Theory. (4) Seminar, five hours. Critical examination of major texts in political theory, with particular attention to their philosophical system, their relations to contemporary political and intellectual currents, and importance of system for present-day political analysis. S/U or letter grading.

218. Selected Topics in Political Theory. (4) Seminar, three hours. Critical examination of major problems in political theory. S/U or letter grading.

International Relations

220B. International Relations Core Seminar II. (4) Seminar, three hours. Enforced requisite: course 220A. Further analysis of academic work in international relations and introduction to design of research project in this area. Letter grading.

222. Seminar: Strategic Interaction. (4) Seminar, three hours. Strategic move influences the other person’s choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory.

225. American Foreign Policy. (4) Discussion, three hours. Discussion of approaches used to explain foreign policy making at international, small group, bureaucratic, and domestic political levels. Application to selected cases in American foreign policy.
240A. Western European Politics. (4) Seminar, three hours. Survey of contemporary research approaches and problems in Western European politics. S/U or letter grading.

240B. Political Development of Modern Europe. (4) Seminar, three hours; discussion, one hour (when scheduled). Principal phases of political development from high feudalism to the present, together with theories of causation.

247A. Evolution of Soviet and Russian Politics. (4) Seminar, three hours; discussion, one hour (when scheduled). Discussion seminar surveying political evolution of Soviet Union and its transformation.

247B. Domestic Context of Russian Foreign Policy. (4) Seminar, three hours. Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. S/U or letter grading.

251. Political Economy of Economic Reform. (4) Discussion, three hours. Comparison of experimental economic reforms. Emphasis on students for writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required in Progress (234A, 234B) and letter (234C) grading.

253A-233B-233C. Political Economy Workshops (4-4-4). Discussion, two hours. Preparation: successful completion of major field examinations. Workshops for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required in Progress (234A, 234B) and letter (234C) grading.

254A-254B. Institutions and Comparative Politics. (4-4) Seminar, three hours; discussion, one hour (when scheduled). Comparative Political System. (4) Seminar, three hours; discussion, one hour (when scheduled).

261A. International Political Economy I. (4) Seminar, three hours. Introduction to international trade and investment and international political economy of both industrialized and industrializing societies.

261B. Mass Attitudes and Political Behavior. (4) Seminar, three hours. Introduction to political psychological, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

271. Executive Politics and Presidency. (4) Seminar, three hours. Analysis of executive organization and leadership, with emphasis on American Presidency, special attention to theories of organization and personality and relationship between executive and other institutions and groups. S/U or letter grading.

284. Seminar: Bureaucracy and Organization. (4) Seminar, three hours. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of executive. S/U or letter grading.

Race, Ethnicity, and Politics
M287A-M287B. Immigration, Racial Change, and Education in 21st-Century Metropolis. (4-4) (Same as Education M289A-M289B, Public Policy M289A-M289B, and Sociology M290A-M290B.) Seminar, four hours. Examination of metropolitan American society and institutions at beginning of 21st century. Consideration of best available information on patterns of settlement, changing functions of urban space and institutions, and issues of opportunity linked to urban structure in society facing unprecedented demographic change that will end primarily European domination of our society. May be repeated for credit. S/U grading.

289A. Approaches to Study of Race, Ethnicity, and Politics. (4) Seminar, three hours. Analysis of alternative theoretical, methodological, and empirical approaches to study of race, ethnicity, and politics. S/U or letter grading.

289B. Current Research on Race, Ethnicity, and Politics. (4) Seminar, three hours. Exploration of current research on race, ethnicity, and politics. S/U or letter grading.

Special Studies
290. Modern Political Economy. (4) Discussion, three hours. Discussion of implications for understanding politics of thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macromodels, forms of political participation, state, government regulation, growth of government, bureaucracy elections, public policy, inflation, S/U or letter grading.

M291A-M291B. Social Theory and Comparative History. (4-4) (Same as History M203A-M203B and Sociology M296A-M296B.) Seminar, three and one-half hours every other week. Introduction to historical and sociological theory and theoretically sensitive history, following program of Center for Social Theory and Comparative History. Each course may be taken independently for credit. S/U or letter grading.

292A-292B. Introduction to Political Inquiry. (4-4) Seminar, three hours; discussion, one hour (when scheduled). S/U or letter grading.

292A. Problems of Scientific Inquiry and Normative Discourse. (292B. Research Design. Requisite: course 292A. Major conceptual frameworks and approaches to political science. 293. Great Ideas in Social Sciences. (2) Seminar, two hours. Vehicle for faculty and visitors to teach research seminars of variable length. Special training opportunities on advanced quantitative methods, including complexity theory, agent-based modeling, experimental economics, artificial cognitive neuroscience, and evolutionary psychology, to be offered at irregular intervals. May be repeated for credit. S/U grading.

295. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Political Science. (4) Seminar, to be arranged. Seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in first term of their assistantships. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean. Vehicle for faculty and visitors to teach courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 4) Tutorial, to be arranged. May be applied only three times toward minimum course requirement in first two years. May be repeated. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examination. (2 to 12) Tutorial, to be arranged. May be repeated. S/U grading.

Richard A. Rawson, Ph.D., In Residence
Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students.

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs.

Clinical Psychology Internship

The department offers a 12-month Clinical Psychology Internship. Students enrolled in clinical psychology doctoral programs at APA-approved universities are eligible to apply. Applications are accepted through November 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each trainee.

Students interested in this certificate program should contact David Crawford, C8-244 Semel Institute, (310) 794-5715, e-mail: dcrawford@mednet.ucla.edu, or see http://www.semel.ucla.edu/psychology/internship/.

Information on clinical practicums that are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Psychiatry and Biobehavioral Sciences

Upper Division Courses

197. Individual Studies in Psychiatry. (2 to 4) Formerly numbered 199.) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be taken for letter grade only. May be repeated for credit. Individual contract required. Additional information and contract forms are available in Office of Educational Opportunity, C2-237/238 Semel Institute. P/NP or letter grading.

199. Directed Research in Psychiatry and Biobehavioral Sciences. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of a faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

207A-207B-207C. Hypnosis Seminars. (2-2-2) Experiential seminars to prepare mental health professionals in adult and child clinical applications, involving didactics, demonstrations, trainee practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnosis, self-hypnosis), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnosis research. Emphasis on acquiring skills for clinical practice. SU grading.

M210. Editorial Board Apprenticeship. (2) (Same as Health Services M249Q.) Seminar, two hours. Designed for postdoctoral fellows and advanced Ph.D. students. Participation in peer review process for academic journal, Health Psychology, with consideration of interface between behavioral science, health, and medicine. Reading and discussion of submissions and advising of editor on suitability for full review. SU or letter grading.

M222. Transcultural Psychiatry. (4) (Same as Anthropology M234P.) Lecture, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, “culture specific” syndromes, non-Western psychiatry, and questions of “sick” societies. May be repeated for credit.

Psychiatry and Biobehavioral Sciences / 533

M230. Communication of Science. (2) (Same as Biometrics M262.) Lecture, two hours; discussion, one hour. Presentation of various types of scientific writing and practice. Details specific articles; methods, results, discussion. Writing of review article. Grant submissions: aims, background, study design, appendices. Communication with lay public. S/U or letter grading.

M234. Affective Disorders. (2 or 4) (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are required to present a lengthy written research paper and required to make a presentation or prepare a research paper.

237. Seminar: Behavioral Neuroimmunology. (1) Seminar, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

M238. Survey Research Techniques in Psychocultural Studies. (Same as Psychology M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

M240. Assessment and Treatment of African American Families. (3) (Same as Afro-American Studies M240.) Seminar, two hours. Designed for graduate students. Course aims to develop mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with African American children and families. Letter grading.

M246. Psychological Aspects of Mental Retardation. (4) (Same as Psychology M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems). S/U or letter grading.

M251. Mental Health Services. (4) (Same as Health Services M464.) Lecture, three hours. Requisites: Health Services 200A, 200B. Designed for doctoral students. Survey of contemporary American delivery of health services, including communally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

253. Seminar: Child Development. (1) Theories of development, systems of child development, and characteristics of child development. Presentation of assigned readings by students plays major role in each session.

259. Legal and Ethical Issues with Vulnerable Populations. (3) Lecture, 90 minutes; laboratory, three and one-half hours. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people); philosophy, ethics, ethical codes, issues, and how to resolve them. Use of videotapes and discussion of cases.

261. Advanced Seminar: Child and Adolescent Psychopharmacology. (1) Use of problem-based teaching methods and critical reviews of medical literature as basis for rational pharmacotherapy in children and adolescents. Major focus on development of a clinical decision-making process, given the limited scientific evidence and the pharmacological practice in the field. S/U grading.

M263. Clinical Pharmacology. (2) (Same as Biometrics M263 and Medicine M263.) Lecture, two hours; preparation: completion of health sciences degree (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of principles of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary pharmacological practice and drug discovery. Use of case studies to illuminate the role of pharmacology in the context of potential or contributing factors. S/U or letter grading.

M266. Advanced Magnetic Resonance Imaging. (4) (Same as Biomedical Physics M266 and Neuroscience M302.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intensive than mathematical. Letter grading.

M270. Neural Basis of Memory. (4) (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

M272. Psychological Anthropology. (4) (Same as Anthropology M234Q.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Issues include unconsciousness, such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness processes as they relate to culture. Topics vary from term to term. May be repeated for credit.

M273. Advanced Seminar: Medical Anthropology. (2 to 4) (Same as Anthropology M263Q, Community Health Medicine M244, and Anthropology M247.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

M280. Politics of Reproduction. (2 to 4) (Same as Anthropology M280Q, and Anthropology M390.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society. Letter grading.

281A-281B-281C. Behavioral Therapy in Educational Settings. (4-4-4) Lecture, one hour; laboratory, seven hours. Supervised experience in classroom working with exceptional children in conducting systematic observations, administering formal assessments, and developing and carrying out individualized educational and behavioral programs. Theoretical background furnished through one-hour weekly lecture. S/U or letter grading.

M282. Anthropology of Human Body. (2 to 4) (Same as Anthropology M234T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about human body and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies. Letter grading.

M283. Anthropology of Genetic Knowledge. (2 to 4) Lecture, one hour; laboratory, three hours. Exploration of how sociocultural and political dynamics shape our understandings of genetic discoveries and how genetic information is used to create conceptions of self and society. Letter grading.

284A. Principles of Neuroimaging I. (4) Lecture, four and one-half hours. Preparation: competence in integral calculus, electricity and magnetism, computer programming (any language), general statistics. Requisite: course 292. Instrumental imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, positron emission tomography, magnetoencephalography, transcranial magnetic stimulation, near infrared imaging. Letter grading.

284B. Principles of Neuroimaging II. (4) Lecture, four and one-half hours. Preparation: competence in integral calculus, electricity and magnetism, computer programming (any language), general statistics. Requisite: course 284A. Instrumental imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, positron emission tomography, magnetoencephalography, transcranial magnetic stimulation, near infrared imaging. Letter grading.
294. Essentials of Clinical Investigation. (2) From lesion research and functional neuroimaging. Omy from systems perspective, integrating results neuroscience graduate students. Human functional anat-

rolevel neuroanatomy course. Designed for neuropsy-

pharmacology of drug abuse, as well as addiction prevention. Discu-

sion of pros and cons of various treatment modali-

295B. (2) Seminar, two hours; discussion, one hour. Drug use patterns and treatment issues in specific populations such as women, adolescents, homeless, multiply diagnosed, as well as different ethnic popula-

295C. (2) Seminar, two hours; discussion, one hour. Theoretical perspectives on drug use and abuse, as well as policy and ethical aspects of drug abuse re-

search. Research design and analysis issues perti-

ent to drug abuse research. S/U grading.

402. Journal Club. (1) Seminar, two hours; outside study, two hours. Presentation of participant re-

search. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

403. Individual Case Supervision. (1 to 4) Preparation: submission of written proposal to be structured by instructor and student prior to enrollment; addition-

al information and additional criteria, including di-

agnostic and ethnical techniques.

M288. Social and Behavioral Factors of HIV/AIDS: Global Perspectives. (4) Same as Community Health Sciences M294.) Lecture, four hours. Requi-

sites: Community Health Sciences 100 and Epidemi-

ology 100, or prior social sciences courses. Overview of social and behavioral factors which influence both transmission and prevention of HIV/AIDS throughout the world. Letter grading.

M289. Intervention to Reduce HIV and Its Consequences. (4) Same as Community Health Sciences M299.) Lecture, three hours. Examination of interven-
tions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV inter-

ventions for variety of high-risk populations. Letter grading.

290. Los Angeles HIV-Community Colloquia. (1) Lecture, two hours. Examination of emerging scientif-

ic HIV-related research. Discussion of policy issues, theories, and designs of HIV-related services and pro-

grams and shifting epidemiology of the virus and dis-

ease. S/U grading.

291. Functional Magnetic Resonance Imaging and Consciousness. (1) Seminar, two hours; discussion, three hours. Opportunity for stu-

dents to gain better appreciation of experimental neu-

roimaging methods and challenges in experimenta-
tion of higher and abstract cognitive processes. Read-
ing of journal articles by students and instructor addressing topics of experimental functional magnetic resonance imaging and experimental studies of con-

sciousness. Preparation of summaries, discussion of selected manuscripts, and performance of adequate background research to clarify material. S/U grading.

292. Functional Neuroanatomy for Neuropsychol-

ogists. (2) Lecture, two hours. Preparation: graduate-

level neuroanatomy course. Designed for neuropsy-

chology and radiology postdoctoral fellows and neu-

roscience graduate students. Human functional anat-

omy from systems perspective, integrating results from lesion research and functional neuroimaging. Students learn to identify gyri and major sulci on MR images and memorize associated Brodmann's re-

gion. Letter grading.

294. Essentials of Clinical Investigation. (2) Lecture, two hours; discussion, one hour. Advanced training for graduate students. Introduction to initial steps in clini-
cal research through preparation of research propos-
al. Small working groups develop grant proposal on specific topic. S/U grading.

295A-295B. Substance Issues in Sub-

stance Abuse I, II, III. (2-2-2) Seminar, two hours; discussion, one hour. S/U grading;
Albert Mehrabian, Ph.D.

Nancy J. Woolf, Ph.D.
Dahlia Zaidel, Ph.D.

Adjunct Associate Professors
Ines Firstenberg, Ph.D.
William J. McCarthy, Ph.D.

Adjunct Assistant Professor
Gian C. Gonzalez, Ph.D.

Scope and Objectives
Psychology is a subject of considerable interest to most people — we all tend to practice some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments in the country.

The undergraduate curriculum has been designed to reflect the extensive breadth of psychology — both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as behavioral neuroscience, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience — either in the form of laboratory courses or by participation with faculty members and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that provide new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in the areas of behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, health, and behavioral, social, and quantitative psychology. The graduate program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study Psychology B.A.

The Psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, al-
though such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Prepsychology Major
Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychology major. Prepsychology majors can petition to declare the Psychology major once they have (1) satisfied all the preparation for the major requirements and (2) are accepted into the major through a competitive application process (for students who entered UCLA as freshmen) or file a petition to declare the Psychology major (for students who entered UCLA as transfers).

Preparation for the Major
Each of the following required courses must be taken for a letter grade (C or better in Psychology 10, 100A, and 100B, C– or better in the remaining courses): Life Sciences 1 or 15 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A or Physics 10 or 1A or 6A; one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus; one course from Philosophy 1, 2, 3, 4, 5, 6, 7, 8, 9, 21, 22, 22W, 31; Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B are only open to students who have declared the Prepsychology major before the term in which they plan to enroll. It is recommended that students with no background in introductory statistics take Statistics 10 before enrolling in course 100A.

Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

Freshman Students
Students may declare the Prepsychology major once they have established a 2.5 grade-point average in at least one preparation for the major course.

Students must petition to declare the Psychology major and can do so once they complete all nine preparation for the major courses and submit an application to enter the major by the end of the Spring quarter of their second year at UCLA. Admission into the major is based on student academic performance in the preparation courses. Students who have a grade-point average of 2.9 or higher in the preparation coursework and have met all other Prepsychology major requirements are guaranteed entry into the major after they submit the application by the above deadline. Students with a grade-point average between 2.5 and 2.89 in the preparation coursework enter a competitive application pool and are admitted only if there is space available in the major. Students with a grade-point average below 2.5 in the preparation coursework are not eligible to apply for admission to the major.

Transfer Students
Transfer applicants to the Psychology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course equivalent to Life Sciences 1 or 15 or Physiological Science 3, one general chemistry or general physics course, one philosophy course, one introduction to psychology course, and one course from statistics (recommended), finite mathematics, calculus, computer science theory, or computer programming in C++.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospectadm_tr.htm for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

The Major

Required: (1) Five core courses, with at least two from each category and a fifth course from either category: (a) Psychology 110, 115 (or M117A, M117B, and M117C), 120A, 120B, and (b) 127 or 128, 130 (or one course from 133A through 133J), 135, 150; (2) one laboratory/fieldwork course from 101, 111, 116, 121, 126, 131, 136A, 136B, 136C, 151, 186A through 186D; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper division psychology electives. All three courses must be completed to receive psychology elective credit.

Each upper division course must be taken for a letter grade. A C– or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

Cognitive Science B.S.

The Cognitive Science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Precognitive Science Major
Students need to file a petition in the Undergraduate Advising Office to declare the Precognitive Science major. They are then identified as Precognitive Science majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Cognitive Science major. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major
Each of the following required courses must be taken for a letter grade (C or better in each course and a 2.5 overall grade-point average in the preparation courses) before students reach 140 total units: Life Sciences 1 or 15 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A or Physics 10 or 1A or 6A; Mathematics 31A, 31B, Philosophy 7 or 8 or 9; Program in Computing 10A, 10B, and one course from 15 or 20A or 40A; Psychology 10, 85, 190A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in their career; these courses are open only to students who have declared the Precognitive Science major before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

Transfer Students
Transfer applicants to the Cognitive Science major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course, one general chemistry or general physics course, two calculus/analytical geometry courses, one general physics course, one philosophy course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, one computer programming course in C++, and one other computer programming course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospectadm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Psychology 115 (or M117A, M117B, and M117C), 120A or 120B, and one course from 124A through 124J; (2) one course from 186A through 186D and one course from 121, 186A through 186D, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology...
Psychobiology B.S.

The Psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Prepsychobiology Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychobiology major. They are then identified as Prepsychobiology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychobiology major.

Preparation for the Major

**Life Sciences Core Curriculum**

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Also required are Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Prepsychobiology major before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Each core curriculum course must be taken for a letter grade (C– or better in each course and a 2.0 overall grade-point average in the core curriculum) before students reach 150 total units. Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

**Transfer Students**

Transfer applicants to the Psychobiology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, one semester of organic chemistry with laboratory, one introduction to psychology course, one psychological statistics course, and one psychology research methods course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Ecology and Evolutionary Biology 100 or 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A, M117B, and M117C), 116 or Neuroscience 101L, 120A or 120B; (2) one course from Psychology 127 or 128, 130, 133A through 133L, 135, 150; (3) 16 units of graded elective courses from the following list: Ecology and Evolutionary Biology 112, 113A, 114A (no more than one from this group), Psychology 111, 112A, 112B, 112D, M117A, M117B, M117C, M117J, 119A through M119X, 160, 186D, 191CH (only if content is approved by the Undergraduate Advising Office), Chemistry and Biochemistry 153A, 153L, Computational and Systems Biology M186C, Ecology and Evolutionary Biology 100, 102, 105, 106, 110, 111, 115, 117, C119, 120, 121, 122, 124 (only 4 units may be applied toward the major), 129, 135, 146, M158, 164, 170, Microbiology, Immunology, and Molecular Genetics 185A, Molecular Cell, and Developmental Biology 100, 104, 138, M140, CM156, Neuroscience 102, Physiological Science C144, 146, 147, M148, 166, 173.

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and 10 units of upper division psychobiology electives. All three courses must be completed to receive psychobiology elective credit.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

**Honors**

**Honors Courses**

Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

**Honors Program**

Psychology, Cognitive Science, and Psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 191AH, 191BH, 191CH) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. Other requirements may apply. Consult the Undergraduate Advising Office during Spring Quarter for further information and application forms. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors.

**Computing Specialization**

Majors in Psychology, Psychobiology, and Cognitive Science may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15, 20A, 30, 40A, or 60, and (3) completing at least three courses from Psychology 85, 121, 142H, 186A through 186D (one 199 course may be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor's degree in their major and a specialization in Computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.
Applied Developmental Psychology Minor

The Applied Developmental Psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduate students how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including Cognitive Science, Psychobiology, and Psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1615 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.

Required Lower Division Course (4 units): Psychology 10.

Required Upper Division Courses (24 units): Psychology 134A (must be taken concurrently with course 134D), 134B (must be taken concurrently with course 134E), and four additional courses from Education 120, 121, 132, Psychology 123F, 130, 131, 132A, 132B, 133B through 133I, 134F, 134G, 134I, 199A or 199B (content must be approved by the Undergraduate Advising Office), Sociology M174. One of the four additional courses must include either Psychology 130 or one course from 133B through 133I.

Internship Requirement/Fieldwork Component (8 units): Psychology 134C, 134D (must be taken concurrently with course 134A), 134E (must be taken concurrently with course 134B). Students work as interns for three consecutive academic terms at an approved day-care center/school. The internship provides hands-on experience working with young children as teacher’s aides and opportunities for observing children.

No more than two courses may be applied toward both this minor and a major in another department or program. Each minor course, except for the fieldwork component of the internship courses, must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Cognitive Science Minor

The Cognitive Science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster from four clusters of upper division courses that have been organized to reflect different aspects of cognitive science. Students take three courses within their primary cluster and two additional courses from the remaining clusters (secondary clusters).

The minor is open to all enrolled UCLA students, other than Cognitive Science majors, who have an overall grade-point average of 2.0 or better. Students must make an appointment with a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730, to enter the minor and receive counseling on how to select a primary cluster.

Required Courses (28 units): Psychology 85 and one course from 15, 100B, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

Students must also select (with approval of the Undergraduate Advising Office) and complete one of the following four primary clusters: (1) biological basis of cognition cluster — three courses from Linguistics C135, Neuroscience 102, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), 119B, 119F, M119L, M119N, 160; (2) computation and modeling cluster — three courses from Biomathematics 10B, Computer Science 161, Psychology 186A through 186D (at least one course must be from Computer Science 161, Psychology 186A through 186D); (3) human cognition cluster — two courses from 120A or 120B, 124A through 124J, 133B, 133C, 133E; (4) mind and language cluster — three courses from Linguistics 120A, 120B, 125, 130, 132, C135, 185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

No more than two courses may be applied toward both this minor and a major in another department or program. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduate students closer to understanding the importance of research and internships, including their applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychol 99, 185, 192, 193, 194A through 194D, 195A, 195B, 196A, 196B, 199A, or 199B. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward the undergraduate degree. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

Only one 4-unit 199 course may be taken per term, and only 16 units of course 199 may be applied toward the degree. Only one 199 course may be taken for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by the Undergraduate Advising Office, 8 units of course 199 may be applied toward the Psychology 195B/196B requirement for the Cognitive Science major and 4 units of course 199B may be applied toward the elective course requirements for the Psychology major.

Psychology Research Opportunity Programs

The Psychology Research Opportunity Programs (PROPS) represent a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of PROPS is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for PROPS takes place each Fall Quarter. Students selected to participate are awarded stipends for Winter and Spring Quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, students are required to attend weekly seminars covering such topics as graduate school, careers in academia, and research opportunities in various fields of psychology. Prior research experience is not required. This is an excellent opportunity for students to begin their research careers and acquire the needed experience to pursue advanced studies.

Infant Development Program

The Megan E. Daly Infant Development Program (IDP), established in May 1983, is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, their families, and caregivers. In addition, the program provides an opportunity for undergraduate students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers on an individual basis or in a group setting. The program has two primary functions: (1) to offer quality group care for infants and toddlers of the students, staff, and faculty of the Psychology Department and
other UCLA departments and (2) to serve as a teaching and research facility for the Psychology Department and the UCLA community. The program has two locations and accommodates children from three months to three years old.

**UCLA Psychology Clinic**

The UCLA Psychology Clinic in the Department of Psychology is a major training center for students in the clinical psychology Ph.D. program, one of the top-ranked programs in the country. It provides a broad range of psychological services to children and adults, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and utilize research-based cutting-edge psychological interventions. Students and faculty members are also involved in a variety of research projects through the clinic.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Psychology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Psychology.

**Psychology**

**Lower Division Courses**

10. Introductory Psychology. (4) Lecture, four hours. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology: six hours of psychological research and a grade of C or better required of all departmental premajors. P/NP or letter grading.

85. Introduction to Cognitive Science. (4) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Enforced requisite: course 10. Limited to freshmen/sophomores. Intensive analysis in seminar situations of selected topics of current psychological interest. Schedule of classes for topics and instructors may be repeated for credit:

88A. Stress, Adaptation, and Coping. Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

88B. Research Methods in Psychology. (6) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10 and 100A, with grades of C or better. Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

88C. General Psychology Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B. General laboratory course for psychology students to acquire key concepts in psychology. The active participation is emphasized throughout. Use of current technologies (e.g., Web-based teaching, interactive computer demonstrations) in challenging atmosphere to learn how mind works. P/NP or letter grading.

90-98A-98Z. Lower Division Seminars. (4 each) Seminar, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; seminar format designed for freshmen/sophomores. P/NP or letter grading.

**Upper Division Courses**

100A. Psychological Statistics. (4) Lecture, four hours. Requisites: course 10 with a grade of C or better, and one course from Computer Science 2, Mathematics 2, Programming 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. Letter grading.

100B. Research Methods in Psychology. (6) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10 and 100A, with grades of C or better. Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

101. General Psychology Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B. General laboratory course for psychology students to acquire key concepts in psychology. The active participation is emphasized throughout. Use of current technologies (e.g., Web-based teaching, interactive computer demonstrations) in challenging atmosphere to learn how mind works. P/NP or letter grading.

M107. Asian American Personality and Mental Health. (4) (Same as Asian American Studies M117.) Lecture, three hours. requisite: course 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

110. Fundamentals of Learning. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A, 100B. Designed for juniors/seniors. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in psychology. P/NP or letter grading.

111. Learning Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B, 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals. Letter grading.

112A. Basic Processes of Motivated Behavior. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 100, 110A, 110B, 110C. Designed for juniors/seniors. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals. P/NP or letter grading.

12B. Psychobiology of Fear and Anxiety. (4) Lecture, three hours. Requisites: courses 100, 100A, 110. Recommended: course 115. Designed for juniors/seniors. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112C. Psychobiology of Anxiety and Depression. (4) Lecture, two and one-half hours; discussion, 30 minutes. Requisites: courses 110A, 110B, 110C. Limited to juniors/seniors. Presentation of biological and behavioral approaches to anxiety and depression, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112D. Animal Cognition. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 100A, 110A, 110B. Designed for juniors/seniors. Investigation of scientific study of cognition and behavior in animals. Topics include perception and attention, working and reference memory, spatial cognition, timing and counting, concept formation, and abstract reasoning. Most discussions focus on laboratory findings with animals, as viewed from evolutionary framework concerned with natural histories of animals. P/NP or letter grading.

115. Principles of Behavioral Neuroscience. (4) Lecture, three hours; discussion, one hour. Requisites: course 100A, Life Sciences 2 or 15. Not open to students with credit for course M117A. Designed for juniors/seniors. Nervous system anatomy, physiology, pharmacology, and their relationship to behavior. P/NP or letter grading.

116. Behavioral Neuroscience Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 100A, 100B, 115. Designed for Psychobiology and Psychology majors. Laboratory experience with various topics in behavioral neuroscience. P/NP or letter grading.

M117A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A (14C is taken concurrently), Life Sciences 2, Physics 1B or 1BH or 6B or 6BH. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, molecular neuroscience, design of experiments, synaptic transmission, sensory systems and motor system; how assembles of neurons process complex information and control movement. P/NP or letter grading.

M117B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: courses 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A, Life Sciences 3.4. Molecular biology of channels and receptors; focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M117C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.
M117J. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M181, Neuroscience M130, Physiological Science M180A or M180B, or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A.) Lecture, three hours; discussion, one hour. Requisite: course 115 or M117A or M117C. Designed for juniors/seniors. Survey of psychiatric disorders, including schizophrenia, depression, bipolar disorder, obsessive-compulsive disorder. Focus on basic mechanisms and brain circuits underlying these disorders. Possible consideration of developmental aspects. P/NP or letter grading.

M119Q. Psychology of Aging. (4) (Same as Gerontology M119Q.) Lecture, four hours. Requisite: course 115. Designed for seniors. Recent research and theory on the cognitive, neurobiological, and physiological mechanisms of aging. Emphasis on ultimate causes of aging and related processes at the organismal and cellular levels. Lecture, two hours; discussion, one hour. P/NP or letter grading.

M121. Laboratory in Cognitive Psychology. (4) Laboratory, four hours. Requisites: courses 10, 100A, 102, and 120A. Designed for juniors/seniors. Laboratory experience with methods and phenomena from research on human perception, memory, and cognition. P/NP or letter grading.

M124A. Advanced Topics in Sensation and Perception. (4) Lecture, three hours. Requisites: courses 10, 100A, 120A or 120B. Designed for juniors/seniors. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches. P/NP or letter grading.

M124B. Visual Information Processing. (4, Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A, 120A or 120B. Exploration of issues in visual information processing, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects. P/NP or letter grading.

M124C. Human Memory. (4) Lecture, two hours; discussion, one hour. Requisite: course 120A or 120B. Designed for seniors. Recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

M124D. Principles of Human Performance. (4) Designed for Psychology majors. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesthesia, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performance, vehicle control, and sport.

M124E. Language and Cognition. (4) Lecture, three hours. Requisites: courses 10, and 120A or 120B. Designed for juniors/seniors. Recent theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition. P/NP or letter grading.

M124F. Thinking. (4) Lecture, three hours. Requisite: course 120A or 120B. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

M124G. Cognitive Aging. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 120A or 120B. Designed for juniors/seniors. Recent facts and theories on relations between normal aging and cognition, including perception, language comprehension, learning, memory, thinking, inhibitory processes in attention, sequential processes in action, general slowing phenomenon, and related neuropsychological issues. P/NP or letter grading.

M124H. Cognitive Neuroscience of Memory. (4) Lecture, three hours. Requisites: courses 85 or 120A, and 115. Designed for juniors/seniors. Introduction to neural basis of learning and memory. Topics include cellular and molecular mechanisms of learning and memory, human amnesia, working memory and prefrontal cortex, procedural learning, emotional memory systems, and memory consolidation. P/NP or letter grading.
124. Perception, Learning, and Learning Technology. (4) Seminar, three hours. Requisite: course 120A or 120B. Aspects of perception and cognition as they relate to learning, with application to educational technology. Basic knowledge about visual information processing, perceptual learning, knowledge representation, pattern recognition, attention, memory, and expertise, as well as research on learning, technology, and applications of perceptual and cognitive concepts in specific domains, with special focus on teaching and learning. P/NP or letter grading.

125A. Developmental Psychopathology. (4) Seminar, three hours; fieldwork, seven hours. Research approaches utilized by psychologists in Fernald Research Intern Program to conduct research in developmental psychopathology in context of direct experience. Interns provided with necessary background to undertake various research activities during Winter and Spring Quarters. P/NP grading.

125B. Research Methods in Developmental Psychopathology. (4) Laboratory, three hours; fieldwork, seven hours. Limited to departmental majors. Research approaches utilized by psychologists to conduct research in developmental psychopathology. Letter grading.

125C. Advanced Research Methods in Developmental Psychopathology. (4) Laboratory, three hours; fieldwork, seven hours. Limited to departmental majors. Advanced research approaches utilized by psychologists to conduct research in developmental psychopathology. Letter grading.

126. Clinical Psychology Laboratory. (4) Laboratory, four hours. Requisites: courses 10, 100A, 100B, 127. Designed for departmental majors. Methods, designs, and issues in conduct of clinical psychology research. Students develop and conduct research. Content varies by instructor, with concentration on one of the following: schizophrenia, mood disorders, anxiety disorders, childhood disorders, psychophysiological methods, observational methods with couples and families. Letter grading.

127. Abnormal Psychology. (4) Lecture, three hours. Requisite: course 10. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychoanalytic reactions, and other abnormal personality patterns.

128. Psychopathology. (4) Lecture, three hours; discussion, one hour. Requisite: course 10. Open to students with credit for course 127. Overview of recent theories and research on different forms of psychopathology, such as depression, anxiety, schizophrenia, eating disorders, personality disorders, and substance abuse. Integration of assessment and treatment approaches. In-depth exploration of selected topics during discussion meetings. P/NP or letter grading.

129A. Personality Measurement. (4) Lecture, three hours. Requisites: courses 10, 100A. Rational methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions. P/NP or letter grading.

129B. Introduction to Psychoanalysis. (4) Lecture, three hours. Requisites: courses 10, 100A. Development of Freud’s ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicott, and Bim. P/NP or letter grading.

129C. Culture and Mental Health. (4) Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and American Indians). P/NP or letter grading.

129D. Personality. (4) Lecture, three hours. Requisite: course 10. Survey of major topics in field of personality, including personality theories, personality assessment, and physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

129E. Social and Personality Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Trends in research on personality development during childhood. Topics include parent-child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations. P/NP or letter grading.

130. Developmental Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence. P/NP or letter grading.

131. Research in Developmental Psychology. (4) Discussion, one hour; laboratory, three hours. Requisites: courses 123A through 133I. Survey of research designs and methods in field of psychology. Focus on applications of experimental research to developmental psychology. P/NP or letter grading.

131A. Child Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

131B. Applied Developmental Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include quality of child care, patterns and ranges of normal child behaviors, developmental disabilities, catastrophic, physical, and public policy issues, child-rearing practices. P/NP or letter grading.

132A. Adolescence. (4) Lecture, three hours. Requisites: courses 10, 100A. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychoanalytic reactions, and other abnormal personality patterns.

132B. Mental Health in Schools: Policy and Practice. (4) Seminar, three hours. Requisite: juniors/seniors. Topics include psychological and educational aspects of mental health in schools. Psychopathology placed into broader perspective of normal development and psychosocial problems to explore range of theoretical, practical, and ethical issues. P/NP or letter grading.

132C. Cognitive Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. P/NP or letter grading.

132D. Language Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (spoken and written), the nature of language acquisition, learning mechanisms, communication skills, and relation between language and thought in children. P/NP or letter grading.

133. Fieldwork in Applied Developmental Psychology. (2) Fieldwork, 86 hours per term. Enforced corequisite: course 134A. Designed for Applied Developmental Psychology minors. Fieldwork in applications of developmental psychology to support and illustrate, in applied setting, theories and research findings presented in lecture. P/NP grading.

134C. Advanced Fieldwork in Applied Developmental Psychology. (2) Fieldwork, 86 hours per term. Enforced corequisite: course 134B. Designed for Applied Developmental Psychology minors. Fieldwork in applications of developmental psychology to support and illustrate, in applied setting, theories and research findings presented in lecture. P/NP grading.
134F. Infant Care and Development. (4) Lecture, three hours. Requisites: course 10, one course from 130 or 133B through 133I, one statistics course. In-depth study of research methods, current research findings, and theories used to understand infant development from conception through second year of life, including cross-cultural application of this knowledge to various populations. P/NP or letter grading.

134G. Early Childhood Curriculum. (4) Lecture, three hours. Requisites: course 10, one course from 130 or 133B through 133I, one statistics course. Examination of methods, models, and philosophies that enhance development of children in context of childcare settings. Topics include issues of multiculturalism, antibias curriculum, and special needs adaptations.

134I. Child, Family, and Community. (4) Lecture, three hours. Requisites: course 10, one course from 130 or 133B through 133I, one statistics course. Examination of role of early childhood educators within context of diverse racial, ethnic, economic, and cultural backgrounds and impact of these dynamics on children's development. P/NP or letter grading.

135. Social Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A, 135. Designed for psychology majors. Introduction to research designs and methods used to test social psychological hypotheses, including experiments, observation, data analysis, and questionnaires. P/NP or letter grading.

136A. Social Psychology Laboratory. (4) Lecture, one hour; laboratory, four hours. Requisites: courses 10, 100A, 135. Designed for psychology majors. Design and conduct psychological experiments. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, questionnaire design, data coding, and analysis. Training in telephone interviewing techniques in laboratories. P/NP or letter grading.

137A. Sport Psychology. (4) Lecture, three hours. Designed for junior/senior Psychology majors. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

137C. Intimate Relationships. (4) Lecture, three hours. Requisites: courses 10, 100A. Limited to juniors/seniors. Introduction to how social scientists think about, study, and treat intimate relationships, with emphasis on understanding how relationships change over time. Topics include attraction, relationship formation, conflict resolution, social support, sex, role of individual differences, and external circumstances. P/NP or letter grading.

137E. Work Behavior of Women and Men. (4) (Same as Women's Studies M137E.) Lecture, two and one-half hours. Requisite: course 10 or Women's Studies 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and independence of work and family roles. P/NP or letter grading.

137F. Introduction to Sport Psychology. (4) Lecture, three hours. Designed for juniors/seniors. Survey of topics in sport psychology, including leadership and team dynamics, role of mental health, and agression, personality, motivation, fan behavior, and performance enhancement. Consideration of youth sport through world-class athletes. P/NP or letter grading.

137H. Personal Influence and Social Power. (4) Lecture, three hours. Requisite: course 135. Theories and research focusing on how people influence one another and resist such influence, and on the basis of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such topics as issues and leadership in organizations, interpersonal influence and health, and power relationships in the family, interpersonal influence in everyday life, social power of political figures.

M138. Electoral Politics: Political Psychology. (4) (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 10. Designed for juniors/seniors. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues. P/NP or letter grading.

M140. Introduction to Study of Aging. (4) (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major issues of human aging — biological, social, psychological, and humanistic. Introduction to the information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

142H. Advanced Statistical Methods in Psychology (Honors). (4) Lecture, three hours; laboratory, two hours. Requisites: courses 100A, 100B. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlations, statistical techniques, analysis variance, and multiple regression. P/NP or letter grading.

M147A. Psychology of Lesbian Experience. (4) (Same as Lesbian, Gay, and Transgender Studies M147A and Women's Studies M147A.) Lecture, two hours; discussion, one hour. Requisite: course 10 or Lesbian, Gay, Bisexual, and Transgender Studies M114 or Women's Studies 10. Designed for juniors/seniors. Review of research and theory in psychology and women's studies to examine various aspects of lesbian experience, impact of heterosexism/stigma, gender role socialization, minority status of women and lesbians, identity development within a cultural context, and outcomes of disordered behavior. Focus on understanding and solution of community problems. Topics include community development, social change, and health problems. P/NP or letter grading.

150. Introduction to Health Psychology. (4) (Formerly numbered 137D.) Lecture, three hours. Requisite: course 10. Not open for credit to students with credit for former course 138D. Study of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; and how psychological perspective might be enlarged and extended in medical area. P/NP or letter grading.

151. Research Methods in Health Psychology. (4) (Formerly numbered 136D.) Laboratory, four hours. Requisites: courses 10, 100A, 135. Not open for credit to students with credit for former course 136D. Research methods used in health psychology, including experimental, quasi-experimental, and non-experimental methods. Examples and projects from health psychology. Letter grading.

156. Genetics of Human Cognition and Behavior. (4) Lecture, three hours. Requisites: courses 10, 127. Limitations and potential of psychological and behavioral genetics, including methods for determining genetic and environmental influences and for locating and characterizing genes impacting these traits, as well as current knowledge of genetic contributions to cognition, behavior and disorders thereof. P/NP or letter grading.

M163. Death, Suicide, and Trauma. (4) (Same as Sociology M138.) Lecture, three hours; discussion, one hour. Sociological analysis of incidence of violent death. Suicide is eight leading cause of death in U.S. and third leading cause for young people aged 15 to 24. Both kinds of violent deaths are often dismissed as P/NP or letter grading.

M165. Psychology of Gender. (4) (Same as Women's Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development, role conflict, personality and politics, and psychological differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

M172. Afro-American Woman in U.S. (4) (Same as American Studies M172 and Women's Studies M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of large society and as members of their biological and ethnic group. P/NP or letter grading.

173. Advanced Abnormal Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A, 127. Examination of research and therapy concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety and stress, the schizophrenias, or mood disorders. P/NP or letter grading.

175. Community Psychology. (4) Designed for junior/senior Psychology majors. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

177. Counseling Relationships. (4) Lecture, two hours; discussion, two hours. Requisites: courses 10, 100A, 127. Designed for junior/senior Psychology majors. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention. P/NP or letter grading.

178. Human Motivation. (4) Lecture, three hours. Designed for juniors/seniors. Examination of theories of human motivation, experimental findings supporting the theories, and history of study of motivation. Topics include sociobiology, aspiration level, achievement strivings, and causal attributions.

179B. Biomedical and Psychosocial Aspects of AIDS/HIV. (4) Lecture, three hours. Requisite: course 150 or 179A or Health Services 100. Designed for juniors/seniors. Basics of epidemiology of AIDS, routes of transmission, clinical characteristics of AIDS, neurological and psychological aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions. P/NP or letter grading.

180C. Contemporary Problems in Developmental Disabilities. (4) [Formerly numbered M180A.] (Same as Psychiatry M180C.) Seminar, three hours. Corequisite: course M181A. Limited to Developmental Disabilities Program students. Examination of broad spectrum of issues related to mental retardation, intelligence and IQ, genetics, neurobiology, and other developmental disabilities. P/NP or letter grading.

181A. Research in Contemporary Problems in Developmental Disabilities. (4) [Same as Psychiatry M181A.] Lecture, one hour; laboratory, eight hours. Corequisite: course M180. Limited to Developmental Disabilities Program students. Research experience. In Progress grading (credit to be given only on completion of course work). P/NP or letter grading.

184A-184B. Psychology Research Opportunity Program Seminars. (2-2) Seminar, 90 minutes. Designed to bring together Psychology Research Opportunity Program (PROPS) students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. P/NP grading.

185. Research Practicum in Psychology. (3) Laboratory, seven hours. Corequisite: course 194D. Limited to juniors/seniors. Practical applications of psychological theories and methods through research under guidance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be repeated for credit. P/NP or letter grading.

186C. Cognitive Science Laboratory: Psychophysical Theories and Methods. (4) Lecture, two hours; laboratory, four hours. Requisites: courses 10, 85, 100A, 100B. Designed for junior/senior departmental majors. Lectures and laboratory work that examine perceptual measurement procedures (psychophysical methods) and cognitive processing and decision-making models on which procedures are based, with particular emphasis on signal detection theory and its applications. Letter grading.

187A. Psychology and Law. (4) Lecture, two hours; discussion, two hours. Designed for juniors/seniors. Study of new topics on legal psychology, including suspect identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and may be required to write papers. Letter grading.

187B. Advanced Psychology and Law. (4) Lecture, three hours; discussion, one hour. Requisite: course 187A. Designed for juniors/seniors. Study of additional topics and issues, including gangs, violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

187C. Sex and Law. (4) Lecture, three hours. Limited to juniors/seniors. Examination of Constitutional foundation for sexual rights in America, with focus on freedoms of speech and press, right to privacy, and Ninth Amendment rights reserved by the people. P/NP or letter grading.

188A. Special Seminars: Psychology. (4) Seminar, three hours. Limited to juniors/seniors. Departmental special topic seminar of selected topics in psychology, such as those taught by visiting faculty members. Reading, discussion, and development of culminating project. P/NP or letter grading.

188B. Special Courses in Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A, 100B, 115. Designed for junior/senior departmental majors. Departmentally sponsored experimental or temporary courses on topics of psychological interest, such as those taught by visiting faculty members. Consult Schedule of Classes or instructors. May be repeated for credit. P/NP or letter grading.

190. Research Colloquia in Psychology. (1) Seminar, one hour. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191. Variable Topics Research Seminars: Psychology. (1) Seminar, one hour. Limited to juniors/seniors. Research seminar on selected topics in psychology. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP grading.

191AH-191BH-191CH. Departmental Honors Research Seminars. (2-2-2) Seminar, two hours. Enforced corequisite: course 191H. Course 191AH is required to 191BH, which is required to 191CH. Limited to juniors/seniors. Opportunity for development and analysis of creative ideas through individual research projects with faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, courses 191CH and 198 may be applied toward elective course requirement for any Psychology Department major. Letter grading.

192. Education Practices in Psychology. (4) Seminar, three hours. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students to assist in courses related to psychology. Students assist in preparation of materials and development of innovative programs under guidance of faculty members and teaching assistants. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirement for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

193. Journal Club Seminars: Psychology. (1) Seminar, one hour. Limited to juniors/seniors. Discussion of readings selected from current literature of particular field or attendance at and write-ups of speakers series. May be repeated for credit. P/NP grading.

194A. Internship Seminars: Psychology. (2) Seminar, two hours. Enforced corequisite: course 196A (3-unit option). Limited to juniors/seniors. Study of research methods, applications, and current literature through group discussion, presentation, and papers. Research fields and topics vary by instructor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194B. Research Group Seminars: Psychology. (1) Seminar, one hour. Corequisite: course 196A (3-unit option). Limited to juniors/seniors. Study of research methods and current literature in field or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194C. Research Group Seminars: Cognitive Science. (1) Seminar, one hour. Corequisite: course 196A (3-unit option). Limited to juniors/seniors. Study of current literature in field or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194D. Research Group Seminars: Practicum. (1) Seminar, one hour. Corequisite: course 196A (3-unit option). Limited to juniors/seniors. Study of research methods and current literature in field or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

195A. Community Internships in Psychology. (2) Tutorial (approved community setting), six hours. Corequisite: course 196A (3-unit option). Limited to juniors/seniors. Internship in applications of psychology in supervised setting in community agency or business. Students meet on regular basis with sponsor and provide periodic reports of their experience. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract with supervising placement sponsor required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

201. Current Issues in Learning and Behavior. (1) Discussion, 90 minutes. Designed for graduate students. Required of learning and behavior students a minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning, behavior, or applied behavioral analysis by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. S/U grading.

202. Research in Learning and Behavior. (2) Forum in which graduate students discuss the literature and methodological, analytical, and interpretational issues related to specific topics of research in learning and behavior. S/U grading.

204A. Basic Motivational Processes. (4) Lecture, three hours. Designed for graduate students. Analysis, using behavioral systems approach, of basic motivated behavior and processes of allocating, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior. S/U or letter grading.

204B. Theories of Learning. (4) Discussion, three hours. Requisite: course 200A. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

204C. Evaluative Processes. (4) Lecture, three hours. Designed for graduate psychology students. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc. S/U or letter grading.

204D. Fear and Anxiety. (4) Lecture, three hours. Preparation: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research.

205A. Cortical Plasticity and Perceptual Learning. (2) Lecture, three hours. Designed for graduate students. Exploration of factors that contribute to cortical plasticity and how it relates to different forms of perceptual learning in visual, auditory, and somatosensory modalities. Review of mechanisms of cortical plasticity, including basic features of long-term synaptic plasticity and computational models of cortical processing. Letter grading.

205B. Human Neurophysiology. (2) Lecture, three hours. Designed for graduate students. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modularity and organization, coordinated sensory representation, language, functional specialization, attention, and regulation of cortical function by extracortical systems. Letter grading.

205D. Clinical Psychopharmacology. (2) Lecture, three hours. Designed for graduate students. General principles of brain neurotransmitters, including synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and “atypical” compounds. Letter grading.

205E. Physiology of Emotion and Stress. (2) Lecture, three hours. Designed for graduate students. Overview of literature on role of brain and autonomic nervous system in regulation of emotional responses. Some emphasis on involvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases. Letter grading.

205G. Behavior Genetics. (2) Not same as course 205G prior to Winter Quarter 2008.) Lecture, three hours. Designed for graduate students. In-depth analysis of field of behavior genetics methods for determining genetic and environmental influences and for locating and characterizing genes impacting these traits, as well as current knowledge of genetic contributions to intelligence and behavior disorders thereof. Letter grading.

205K. Vision Neurobiology. (2) Lecture, three hours. Designed for graduate students. Exploration of anatomy, physiology, and computation in visual system, focusing on retina, visual cortex, and overall performance. Letter grading.

205L. Cognitive Neuroscience. (2) Lecture, three hours. Designed for graduate students. Overview of neural basis of higher cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization. Letter grading.

205M. Neuropsychology of Perception. (2) Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics includeagnosias and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. Letter grading.

M208. Biology of Learning and Memory. (4) Same as Molecular, Cellular, and Integrative Physiology M200G, Neurobiology M200G, and Neuroscience M220.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel experimental approaches.

212. Evaluation of Research Literature in Physiological Psychology. (1) Discussion, 90 minutes. Papers of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

215A. Health Psychology. (Formerly numbered 227) Lecture, three hours. Preparation: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional healthcare and self-care. Letter grading.

220A. Social Psychology. (4) Lecture, three hours. Designed for graduate psychology students. Intensive consideration of concepts, theories, and major problems in social psychology.

220C. Advanced Social Psychology. (4) Lecture, three hours. Requisites: courses 220A or 220B. Review of contemporary topics and issues in social psychological research and theory.

220D. Introduction to Social Psychology. (4) Lecture, three hours. Designed for graduate students. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

222A. Interpersonal Relations. (4) Discussion, three hours. Requisite: course 220A. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

222B. Interpersonal Influence and Social Power. (4) Seminar, three hours. Preparation: advanced social psychology course (psychological or sociological). Review of theory and research on personal influence and social power, with applications to various power relationships such as supervisor/subordinate, healthcare professional/patient, doctor/nurse, parent/child, student/teacher, political figures, etc. S/U or letter grading.

222C. Psychology of Intergroup Relations. (4) Lecture, three hours. Designed for graduate students. In-depth and comprehensive exposure to major theoretical and methodological issues within domain of intergroup relations research. Approaches not simply restricted to work within psychology but across social sciences in general, including anthropology, political science, and sociology. S/U or letter grading.

226A-226B-226C. Current Literature in Social Psychology. (90 minutes) Lecture. Course 226A is limited to first-year social psychology students. Courses 226B and 226C are open to nonsocial psychology students with consent of instructor. Recent and current topics in social psychology presented by members of seminar and their significant and methodology discussed and criticized in depth. S/U grading.

M228A. Proseminar: Political Psychology. (4) (Same as History M236A and Political Science M261D.) Seminar, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

M228B. Seminar: Political Psychology. (4) (Same as Political Science M261D.) Discussion, three hours. Requisite: course 220A or Political Science M261A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion. S/U or letter grading.

M228C. Critical Problems in Political Psychology. (4) (Same as Political Science M261E.) Discussion, three hours. S/U or letter grading.

229. Social Cognition. (4) Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.

231. Psychology of Gender. (4) Seminar, three hours. Preparation: one prior course on gender/women's studies. Critical evaluation of current research and theory on gender. Students will be drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

233. Seminar: Environmental Psychology. (4) Requisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man-environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to explain within-individual differences in response to same environment over time or between current and past environments. Review of literature relating information rate from environments to arousal and preferences for those environments.

234. Social Psychological Aspects of Competitive Youth Sport. (4) Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.

M236. Interdisciplinary Relationship Science. (4) (Formerly numbered 236) (Same as Anthropology M295S, Education M297, and Sociology M270.) Lecture, three hours. Limited to graduate students. Discussion approaches to relationship science in fields of anthropology, education, psychology, and sociology. Focus on theme of understanding biological, behavioral, and cultural aspects of relationships through diverse theoretical and methodological approaches. Use of broad definition of interpersonal relationships, including relationships such as parent-child, teacher-student, sibling, peer, kin, romantic relationships, marriages, and friendships. S/U or letter grading.

238. Survey Techniques in Psychocultural Studies. (4) (Same as Psychiatry M238B.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

239. Personality, Motivation, and Attribution. (4) (Same as Education M215.) Discussion, three hours. Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affective domains. S/U or letter grading.

240A. Language and Cognitive Development. (4) Lecture, three hours. Preparation: one undergraduate developmental psychology course in cognitive or language development. Discussion-oriented, for graduate students. Consideration of major topics and concepts, key theories, latest methods, and research findings in development of language and cognition. S/U or letter grading.

240B. Social and Emotional Development. (4) Lecture, three hours. Preparation: one undergraduate developmental psychology course in social development or related topic. Designed for graduate students. Consideration of major topics and concepts, key theories, latest methods, and research findings in social and emotional development. S/U or letter grading.

241. Current Developments in Developmental Psychology. (1) Discussion, 90 minutes. Designed for graduate developmental psychology students. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to interchange presentations by graduate students. S/U grading.

242A-M242G. Seminars: Developmental Psychology. (4 each) Each course may be taken independently and may be repeated for credit.

242A. Perceptual Development. (4) Seminar, three hours. Preparation: one undergraduate development psychology course in social development or related topic. Designed for graduate students. Consideration of major topics and concepts, key theories, latest methods, and research findings in social and emotional development. S/U or letter grading.

242B. Cognitive Development. (4) Seminar, three hours. Requisites: courses 240A, 240B. May be taken independently and may be repeated for credit. S/U or letter grading.

242C. Socialization. (4) Seminar, three hours. Requisites: courses 240A, 240B. May be taken independently and may be repeated for credit. S/U or letter grading.

M242D. Social Development and Education. (4) (Same as Education M217A.) Seminar, four hours. Bi-ologial and familial, school, and other influences on children; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice. S/U or letter grading.

242F. Development of Language and Communication. (4) Seminar, three hours. Requisites: courses 240A, 240B. May be taken independently and may be repeated for credit. S/U or letter grading.
M242G. Adolescent Development. (4) (Same as Education M217F.) Seminar, four hours. Designed for graduate students. Review of recent research on physical, cognitive, social, and psychological development during second decade of life. Topics include pubertal development, changes in parent/adolescent relationships, role of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.

243A-243B. Seminars: Practical and Societal Issues in Developmental Psychology. (4-4) Seminar, three hours. Requisites: courses 240A, 240B. Socialization processes in human development and implication for social/political, educational, research issues, values, and societal change. In Progress (243A) and S/U or letter (243B) grading.

244. Critical Problems in Developmental Psychology. (4) Lecture, three hours. Requisites: courses 240A, 240B. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

M245. Personality Development and Education. (4) (Same as Education M217C.) Lecture, four hours. Review of research and theory of critical content areas in personality development that bear on student performance; achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development. S/U or letter grading.

M246. Personality Theories and Methods of Personality Retardation. (4) (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems). S/U or letter grading.

M247. Culture, Brain, and Development. (4) (Formerly numbered 247-) (Same as Anthropology M293S, Applied Linguistics M233, and Education M286.) Seminar, three hours. Designed for graduate students. Integration of knowledge across different disciplines to understand interrelations of culture, brain, and development, where development includes both human ontology and human phylogeny. S/U or letter grading.

M248. Culture, Brain, and Development Forum. (1) (Same as Anthropology M293, Applied Linguistics M232, Education M285, and Neuroscience M293.) Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide students with exposure to current research in understanding complex relationship between culture, brain, and development. S/U grading.

249. Evaluation Research. (4) Requisites: courses 250A, 250B. Application to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

250A. Advanced Psychological Statistics. (4) Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.

250B. Advanced Psychological Statistics. (4) Advanced experimental design and planning of investigations.

251A-251B-251C. Research Methods. (4-4-4) Tutorial, to be arranged. Designed for graduate psychology students. Students select an original research project under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U (251A, 251B) and S/U or letter (251C) grading.

252B. Discrete Multivariate Analysis. (4) Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear models, multivariate categorical designs, and ordered categorical variables. Applications from various areas of psychology.

254A. Computing Methods for Psychology. (4) Lecture, three hours. Requisites: courses 250A, 250B. Use of MATLAB, but only basic programming knowledge assumed; no prior knowledge of MATLAB required. Students work in small groups on projects relevant to work in experimental psychology and cognitive science. Topics include simulation/modeling, statistical data analysis, and stimulus presentation. S/U or letter grading.

255A. Quantitative Aspects of Assessment. (4) Lecture, four hours. Requisites: courses 250A, 250B. Introduction to issues concerning empirical measurement of abstract constructs using both classical and modern empirical techniques. Hands-on approach allows students to develop practical experience. In addition to discussion of issues concerning reliability and validity, topics include exposure to analytic approaches, including item response theory, multiple regression, principal components analysis, exploratory factor analysis, confirmatory factor analysis, path analysis, and structural equation modeling. S/U or letter grading.

M257. Multivariate Analysis with Latent Variables. (4) (Same as Political Science M208D and Statistics M242.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling; theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications. S/U or letter grading.

259. Quantitative Methods in Cognitive Psychology. (4) Requisites: courses 250A, 250B. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

271D. Clinical Research Laboratory. (2) Discussion, one hour; laboratory, one hour. Corequisites: courses 270A, 270B, or 270C, and 271A or 271B or 271C. Designed for graduate clinical psychology students. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage. S/U grading.

271E-271F. Clinical Research Laboratories. (2-2) Requisite: course 271D. Designed for graduate clinical psychology students. Required of first-year clinical psychology students. S/U grading. 271E. Brief overview of research design issues in clinical psychology and practical issues in students' own research activities. 271F. Discussions of students' particular research activities and issues, plus laboratories in computer analysis of statistical data.

272A-272G. Advanced Clinical Psychological Methods. (4 each) Each course may be taken independently for credit:

272A. Behavior Modification with Children. (4) Seminar, three hours; courses 271A, 271B, 271C. Course in series of clinical intervention and assessment offerings for second- and third-year clinical students covering behavior modification research and practice in clinic, school, institution, and home settings. May be taken independently for credit.

272C. Clinical Interventions for Psychological Problems of Children. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. May be taken independently for credit.

272D. Family Therapy and Family Dynamics. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. May be taken independently for credit.

272E. Special Problems. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. May be taken independently for credit.

272F. Behavior Modification with Adults. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. Designed for second-year graduate clinical psychology students. Contribution of cognitive behavioral modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, anxiety, alcoholism, or learning disabilities. May be taken independently for credit.

272G. Marital Therapies. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 270A, 270B, 270C, 271A, 271B, 271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings. May be taken independently for credit.

273A-273B-273C. Professional and Ethical Issues in Clinical Psychology (2-2-2) Lecture, one hour; discussion, one hour. Designed for graduate clinical psychology students. Year-long course sequence covering variety of topics necessary for clinical psychologists in training, including legal and ethical issues, client suicide, assessment issues, in empirically validated treatments, psychiatric consultation and psychoactive medications, working with diverse client populations.

274. Health Status and Health Behaviors of Racial and Ethnic Minority Populations. (4) (Same as Health Services M274.) Lecture, two hours; discussion, one hour. Limited to graduate students. Overview of physical and mental health behaviors and statuses of major racial/ethnic groups in U.S. Where appropriate, discussion of international issues as well. S/U or letter grading.

275. Conceptual and Methodological Issues in Community Intervention. (4) Lecture, three hours. Literature review of student-centered, client-centered, and community-based approaches to social problems from macroscopic perspective; discussion of multidimensional explanatory models for select illustrative problems; discussion and critical evaluation of both individual-focused and community-focused interventions with high-risk and impacted populations. S/U or letter grading.

276. Clinical Approaches to Children with Learning and Related Behavior Problems. (4) Lecture, three hours; discussion, one hour. Designed for Ph.D. students. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence. S/U or letter grading.

277. Advanced Clinical Assessment. (4) Lecture, four hours; laboratory, three hours. Designed for graduate clinical psychology students. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopharmacology, and application of assessment to problems in psychotherapy. S/U or letter grading.

278. Functional Neuroimaging: Techniques and Applications. (3) (Same as Biomedical Engineering M234, Biomedical Neuroscience M285, and Psychiatry M285.) Lecture, three hours. In-depth examination of activation imaging, including MRI and electrophysiological methods; data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and presentation of functional MRI experiment. S/U or letter grading.

280. Affective Disorders. (2 or 4) (Same as Psychiatry M234.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are assigned a more intensive reading list and required to make a presentation or prepare a research paper. S/U or letter grading.

288A-289B-289C. Current Issues in Clinical Psychology. (1-1-1) Discussion, two hours. Designed for final year clinical psychology students. Critical evaluation of research and applied topics relevant to clinical psychology. In Progress (288A, 289B) and S/U (289C) grading.

292. Biobehavioral Mechanisms of Stress and Disease. (4) Lecture, three hours. Designed for graduate psychology students. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. usual and altered stress responses (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement. S/U or letter grading.

292B. Psychosocial Contributors to Ethnic Disparities in Health. (4) Seminar, three hours. Limited to graduate students. Role of social class, gender, and other psychosocial factors in accounting for disparities in physical and psychological health in racial/ethnic groups. Attention to variety of specific disorders, with focus on explanatory models and approaches to intervention. S/U or letter grading.

294. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Neuroscience M255.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic-hypophyseal interaction, both hormonal and neural. Structure and function of hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress, anxiety, and other psychosocial factors. Aging of reproductive behaviors and function. Letter grading.

296. Research Topics in Psychology. (1) Research group meeting, one hour. Limited to graduate students. Discussion of current literature, new ideas, methodological issues, and preliminary findings. Research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned readings included. S/U grading.

297. Issues in Social Development of Minority Child. (4) Seminar, three hours. Designed for graduate students. Critical evaluation of existing research on social psychological development of minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study. S/U or letter grading.

298. Special Problems in Psychology. (4) Discussion, three hours. Content depends on interests of particular instructor. May be repeated for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

401. Fieldwork in Clinical Psychology. (1 to 12) Fieldwork, to be arranged. Requisites: courses 271A, 271B, 271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee). S/U or letter grading.

402. Clinical Research Practicum. (2) Fieldwork, two hours. Faculty and graduate students who share interests discuss current literature, new ideas, methodological issues, and preliminary findings. Meetings include research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned reading included. S/U grading.

403. Special Topics Study Course. (1 to 4) Discussion, one to four hours. Under faculty supervision, group of students meets each week for quarter in self-directed study group to pursue specific topic of their choice that is not covered in other department courses. S/U grading.

410A-410B-410C. Clinical Teaching and Supervision. (4-4-4) Clinic, four hours. Preparation: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology. S/U or letter grading.

410D-410E-410F. Clinical Assessment Supervision. (4-4-4) Clinic, two hours; other, one hour. Designed for third-year graduate clinical psychology students. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment. Letter grading.

420A-420B. Health Psychology Practicum. (2-2) Fieldwork, to be arranged. Designed for graduate students. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in field. S/U or letter grading.

421. Research in Social Psychology. (2) Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

423. Social Survey Research Practicum. (4) Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys. S/U or letter grading.

425. Health Psychology Lecture Series. (2) Lecture, one hour. Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of training program in health psychology. May be repeated for credit. S/U grading.

451. Internship in Clinical Psychology. (6 to 12) Fieldwork, to be arranged. Preparation: successful completion of departmental qualifying examinations; Requisite: course 401. May be repeated for credit. S/U grading.

454. Internship in Industrial Psychology. (2 to 4) Fieldwork, to be arranged. S/U or letter grading.

495. Presentation of Psychological Materials. (4) Seminar, to be arranged. Supervised practicum in graduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus advisor; department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Research and Study in Psychology. (2 to 12) Tutorial, to be arranged. One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

597. Individual Studies. (2 to 12) Tutorial, to be arranged. Designed primarily for preparation for Ph.D. qualifying examinations. May be required by some area committees as requisite for taking examinations. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Tutorial, to be arranged. Preparation; successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

**PUBLIC AFFAIRS**

**Interdisciplinary Minor**

**School of Public Affairs**

UCLA

3357H Public Affairs Building

Box 951656

Los Angeles, CA 90095-1656

(310) 206-4613

e-mail: spaminor@spa.ucla.edu

http://www.spa.ucla.edu/minor/main2.cfm

Fernando M. Torres-Gil, Ph.D., Chair

Faculty Administrative Committee

Randall D. Crane, Ph.D. (Urban Planning)

Alfreda P. Iglehart, Ph.D. (Social Welfare)

Jorja Leap, Ph.D. (Social Welfare)

William B. Parent, Ph.D. (Public Affairs)

Hilary A. Godwin, Ph.D. (Public Policy)

**Scope and Objectives**

The Public Affairs minor teaches undergraduates the students the skills of policy analysis and exposes them to many of the local, state, national, and international issues facing today’s policymakers and opinion leaders. Courses explore the public (governmental) and nonprofit sectors and provide a theoretical, conceptual, and practical foundation for students. Particular attention is given to the vexing issues facing urban areas and urban planners, social welfare and social workers, and public policies that affect individuals and groups of people in their public and private lives.

**Undergraduate Study**

**Public Affairs Minor**

To enter the minor, students must have an overall grade-point average of 2.0 or better and complete Public Policy 10A with a grade of B or better. For further information, contact the program director or counselor at (310) 206-4613 or spaminor@spa.ucla.edu.

**Required Core Courses (8 units):** Public Policy 10A and one course from 10B, 101, 102, M116, C119, 125, Honors Collegium 82, Social Welfare 191, Urban Planning 120, 121 or, by petition only, another applied policy course. Highly recommended: one statistics and one microeconomics course.

**Required Upper Division Courses (20 units):**

(1) Three courses from one of the following clusters:

(a) gender and multiculturalism cluster — Public Policy M120, Social Welfare 101, 104A, 104B, M104C, 104F, Urban Planning 141, M175; (b) labor and work cluster — Public Policy 141, C142, C144, 145, 148; (c) policy studies cluster — three upper division public policy lecture/seminar courses (191A may be repeated for credit with topic change); (d) social welfare cluster — three upper division social welfare lecture courses (fieldwork and internship courses such as Social Welfare 130A and 130B may not be applied); (e) urban policy and planning cluster — three upper division urban planning lecture courses (129 may be repeated for credit with topic change); or (f) by petition, a cluster of upper division policy courses proposed by the student; (2) one elective course offered by the School of Public Affairs not used to satisfy the core or cluster requirement; (3) capstone project to be completed during the senior year that may be satisfied by one of the following: (a) Public Policy 187, (b) Political Science M191DC or M194DC, (c) Civic Engagement 105SL, or (d) by petition another upper division applied policy course that requires a substantial term paper.

Fieldwork and internship courses, such as Social Welfare 130A, 130B, and Urban Planning CM165, may not be applied toward the minor. No more than three of the cluster and elective courses may be from a single department, and no more than two may be from outside the school.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**PUBLIC HEALTH**

**Interdisciplinary Minor**

Hilary A. Godwin, Ph.D., Chair
Program Requirements for UCLA Schoolwide Programs

Public Health

Lower Division Courses

10. Introduction to Public Health. (4) Seminar, three hours. Designed for lower division students. Introduction to range of topics, issues, and frameworks to help students understand current public health issues and public health systems, policies, and practices. P/NP or letter grading.

Upper Division Courses

M105. Health in Chicano/Latino Population. (4) (Same as Chicana and Chicano Studies M106.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Examination of Chicano/Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binational review of health effects in U.S. and Mexico. Letter grading.

M151. Healthcare in Transitional Communities. (4) (Same as Sociology M142.) Lecture, three hours; discussion, one hour. Analysis of health, social, economic, and political processes affecting organization and accessibility of healthcare in transitional and disadvantaged communities. Fieldwork required. Letter grading.

M160A. Health Outreach and Education for At-Risk Populations. (4) (Same as Medicine M160A.) Lecture, four hours; possible field observations. First in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, with field visits. P/NP or letter grading.

M160B. Health Outreach and Education for At-Risk Populations. (4) (Same as Medicine M160B.) Lecture, two hours; discussion, two hours. Requisite: course M160A. Second in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, discussion groups, and field activities including health education. P/NP or letter grading.

180SA. Current Topics in California Health Policy. (4) Lecture, four hours. Corequisite for UCLA students: Civic Engagement 195SA; for non-UCLA students: one internship course. Limited to junior/senior UC Center Sacramento Program students. Development of systematic understanding of policy analysis to help students develop their own advanced policy analysis of current California-related health policy issues, and analysis of key policy challenges facing health and healthcare of California’s diverse population. Offered in summer only. Letter grading.

Upper Division Courses

M105. Health in Chicano/Latino Population. (4) (Same as Chicana and Chicano Studies M106.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Examination of Chicano/Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binational review of health effects in U.S. and Mexico. Letter grading.

M151. Healthcare in Transitional Communities. (4) (Same as Sociology M142.) Lecture, three hours; discussion, one hour. Analysis of health, social, economic, and political processes affecting organization and accessibility of healthcare in transitional and disadvantaged communities. Fieldwork required. Letter grading.

M160A. Health Outreach and Education for At-Risk Populations. (4) (Same as Medicine M160A.) Lecture, four hours; possible field observations. First in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, with field visits. P/NP or letter grading.

M160B. Health Outreach and Education for At-Risk Populations. (4) (Same as Medicine M160B.) Lecture, two hours; discussion, two hours. Requisite: course M160A. Second in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, discussion groups, and field activities including health education. P/NP or letter grading.

180SA. Current Topics in California Health Policy. (4) Lecture, four hours. Corequisite for UCLA students: Civic Engagement 195SA; for non-UCLA students: one internship course. Limited to junior/senior UC Center Sacramento Program students. Development of systematic understanding of policy analysis to help students develop their own advanced policy analysis of current California-related health policy issues, and analysis of key policy challenges facing health and healthcare of California’s diverse population. Offered in summer only. Letter grading.
The Department of Public Policy offers the Master of Public Policy (M.P.P.) degree, the Master of Public Policy (M.P.P./Law J.D.), the Master of Public Policy (M.P.P./Management M.B.A.), and the Master of Public Policy (M.P.P./Social Welfare M.S.W.). These programs provide coursework in such areas as microeconomics, statistics, political processes, and public and nonprofit management. Concurrent degree programs allow students to combine study in an M.P.P. with work toward a J.D. in the School of Law, an M.B.A. in the John E. Anderson Graduate School of Management, or an M.S.W. in the Department of Social Welfare.

The undergraduate minor in Public Affairs familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For further information on the minor, see Public Affairs earlier in this section of the catalog.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmqrnintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree
The Department of Public Policy offers the Master of Public Policy (M.P.P.) degree. Three concurrent degree programs (Public Policy M.P.P./Law J.D., Public Policy M.P.P./Management M.B.A., and Public Policy M.P.P./Social Welfare M.S.W.) are also offered.

Public Policy

Lower Division Courses

10A. Introduction to Public Policy. (4) Lecture, three hours; outside study, nine hours. Observation of a principal topics of contemporary policy analysis, developing their applications with experience from institution's own research, visitors, small student projects, or field trips. Letter grading.

10B. California Policy Issues. (4) Lecture, three hours; outside study, nine hours. Enforced requisite: course 10A. Application of policy analysis to California issues. Guest lectures from practitioners and academics along with readings and videos. Student written reports and oral presentations required. Letter grading.

108. California Policy Issues. (4) Lecture, three hours; outside study, nine hours. Enforced requisite: course 10A. Application of policy analysis to California issues. Guest lectures from practitioners and academics along with readings and videos. Student written reports and oral presentations required. Letter grading.

Upper Division Courses

C101. Drug Abuse Control Policy. (4) Lecture, three hours; outside study, nine hours. Introduction to drug abuse as social problem and to drug abuse control as policy issue, with examination of both necessary and sufficient conditions for making and executing wise policies. Concurrently scheduled with course C235. Letter grading.

102. Imperfect Rationality. (4) Lecture, three hours; outside study, nine hours. Idea that individuals are capable of acting rationally, in their own interest, is central to economic theory and to custom, law, and common sense thinking. Economics offers thorough account of ways in which such people should deal with choice, risk, and time. Casual observation and experimental evidence agree that actual behavior deviates in systematic ways from prescriptive model of rationality. Groups of rationally seeking individuals tend to fail to act as rationally self-seeking groups. Consideration of deviations between rational choices and actual behavior in public policies. Letter grading.

103. Ethics, Morality, and Public Life: Contemporary Controversies. (4) Lecture, four hours; outside study, eight hours. Study of ethical and moral questions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills. Letter grading.

104. Culture and Political Structure of Los Angeles. (4) Lecture, three hours; outside study, nine hours. Exploration of two of the puzzle in modern urban life: the different communities that live here (and in most other major cities) and political structure that binds us all together. Who are the communities living here? How do they organize themselves and develop leaders? How does integration into mainstream take place? What is “mainstream” today? How does political structure help or impede the notion of a united city? Letter grading.

105. Leadership in Public Interest. (4) Lecture, three hours. Examination of prevailing models, theories, and practices of leadership in public settings and application of them through case studies, films, and situational articles. Participation in group projects and discussions designed to improve understanding of role of leadership in mobilizing people groups to difficult work. Introduction to literature and theory on leadership, examination of leadership and group dynamics, and challenge of leadership in times of stress and change. Letter grading.

112. Controversies in Education Policy. (4) Formerly numbered C112.) Lecture, three hours; outside study, nine hours. Focus on several controversial topics in contemporary education. Topics vary each year and include multiculturalism, affirmative action, test score gap, bilingual education, and school choice. Introduction to major arguments for and against several important education policies and to encourage students to critically evaluate logic and evidence behind these policies. Letter grading.

M116. Nuclear Weapons: Critical Decisions. (Same as Environment M165. Honors Collegium M119, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

CM117. Crisis Decision Making in U.S. Foreign Policy. (Formerly numbered C117.) (Same as Political Science M121B.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 120A, 137A, 137B. In-depth look at theory and practice of U.S. foreign policy making. Assessment of competing theories of international relations and application to specific case studies. Weekly role plays of foreign policymakers and final crisis simulation exercise. Concurrently scheduled with course C272. Letter grading.
125. Rights and Wrongs of Affirmative Action. (4) Lecture, three hours; discussion, one hour. Exploration ofrace-based affirmative action from moral, political, and social philosophy standpoint. Topics include defining discrimination, individual and group equality; different meanings of "diversity"; meritocracy and its critics; historical and future-based arguments; sociological analysis; possibilities for moral compromise. Letter grading.

CM126. Political Ethics. (4) Formerly numbered CM126.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of major issues in morality, or lack thereof, of political life. Coverage of both readings in moral and political theory and real-world examples such as Watergate, terrorism, civil rights politics, and presidential campaigns. Topics include basic ethical theory, role-relative ethics, Machiavellian amorality, democratic responsibility and representation, dirty hands problems, international ethics. Concurrently scheduled with course CM249. Letter grading.

M127. Understanding Public Life Cycle. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended preparation: Public Science 10, 40, and one course from Economics 1, 2, 5, 11, 100, or 101. Examination of how public life cycle is shaped by both internal incentives (e.g., institutional biases of various actors — business, news media, mass public, organized interests, Congress, the president, regulatory agencies, and courts and 2) ideology, cognitive biases, and other psychosocial factors. Letter grading.

141. Employment and Labor Policy: Survey. (4) Lecture, three hours; outside study, nine hours. Required: course 10A. Introduction to current public policy issues in employment, labor relations, and labor markets. Historical context for current employment and labor policies in the U.S. and, in philosophical analysis of reasons for government regulation. Analysis of current issues, such as unions, the work-place, and labor-market trends. Workforce diversity, education and training, social welfare policy, and global issues (immigration, trade, and global economy as it affects the workforce). Future trends and issues on policy horizon. Letter grading.

C144. Comparative Industrial Relations. (4) Lecture, three hours; outside study, nine hours. Required: course 10A. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frame- works for analyzing human resource systems, exami- nation of institutions and ideologies of labor, manage- ment, government, and power in those systems, examination of labor market structures and their implications for labor relations; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course CM231. Letter grading.

145. Labor Policies in the U.S.: Historical Perspec- tive. (4) Lecture, three hours; outside study, nine hours. Required: course 10A. Insight into evolution of labor policies in U.S. in context to the present. Exploration of important policy areas such as child labor, labor standards, protective legislation for women workers, industrial relations, civil rights, occupu- tional safety and health, international labor standards in (1) historical context (economic, political, and social factors that shaped the debate), (2) moti- vation and action of major players (business, labor, government), and (3) changing patterns of govern- ment involvement in public policy. Letter grading.

146. Democracy, Disobedience, and Dissent. (4) Lecture, three hours; outside study, nine hours. Required: Philosophy 6 or Political Science 10. Theories of political and legal obligation and their critics; justified disobedience in response to inequality, injustice, and social exclusion; moral and religious pluralism as argu- ment for both obedience and dissent. Letter grading.

CM104. International Relations in Glo- balizing World. (4) Lecture, three hours; outside study, nine hours. To enable students to think of world in dynamic terms, (2) be able to map, divide, and explain world in terms of major trends, (3) be able to articulate patterns of shift, change, and movement in world space and history. Concurrently scheduled with course CM245. Letter grading.

148. Business and Public Policy. (4) Lecture, three hours; outside study, nine hours. Required: course 10A. Introduction to key issues arising at interface between business and government policy. Discussion of why government focuses so intensively on regulating economic outcomes, national security, and transnational relationship, business political activity, and major govern- ment policies. Topics include economic regulation (industrial policy, antitrust, technology policy); social regulation of business (environmental risk, lia- bility, corporate governance); and corporate social re- sponsibility, business ethics, and green business. Dis- cussion of topics in their historical and political con- text. Concurrently scheduled with course CM125. Letter grading.

M149. California Sustainable Development: Eco- nomic Perspective. (4) (Same as Environment M139 and Urban Planning M163.) Lecture, three hours. Examination of specific environmental chal- lenges that California faces. Macroeconomic perspec- tive used, with special emphasis on incentives of pol- luters to reduce their pollution and incentives of local, federal, and state government to address these is- sues. Focus on measurement and empirical hypothe- sis testing. P/NP or letter grading.

M186. Equal Rights and Unequal Education. (Same as Education M144B and Political Science M144C.) Lecture, four hours. Exploration of contradictions between American beliefs about equal opportunity and racial equality and inequalities that exist in public education. Three major topics in education: as vehicles for understanding philosophical and em- pirical complexities of issues surrounding equality in American education and life. Examination of issues from legal, sociological, political, and philosophical perspectives. Argument is Martin Luther King to Ronald Reagan, and legal cases include Plessy versus Ferguson to Brown versus Board of Education as well as cases still pending in courts. Letter grading.

187. Research Seminar: Public Policy. (4) Semi- nar, three hours; outside study, nine hours. Required: course 10A. Limited to and required of seniors in Pub- lic Affairs minor. Production of research project that examines in depth one particular policy issue in its so- cial context, including political pressures involved and problems of implementation. Emphasis on skills of data analysis and research, conceptualization, and written analysis and presentation. Letter grading.

191A. Variable Topics Research Seminars: Public Policy. (4) Seminar, three hours; outside study, nine hours. Examination of specific policy issues or selected field of policy studies (e.g., international policy, crime policy, policy history) in depth, with specific topics to be identified by instructor. Reading, discussion, and development of research project for credit if applied toward Public Affairs minor. May be repeated for credit with topic change. P/NP or letter grading.

191B. Variable Topics Research Seminars: Public Policy. (3) Seminar, three hours. Examination of par- ticular field (e.g., public policy history, international policy, crime policy, policy history) in depth, with spe- cific topics to be identified by instructor. Reading, dis- cussion, and development of culminating project. Must be taken for credit if applied toward Public Aff- airs minor. May be repeated for credit with topic change. P/NP or letter grading.
191C. Variable Topics Research Seminars: Public Policy. (2) Seminar, two hours. Examination of partic- ular subfields of policy studies (e.g., international poli- cy, crime policy, policy history) in depth, with specific topics to be identified by instructor. Reading, discus- sion, and development of culminating project. Must be taken for credit if applied toward Public Affairs minor. May be repeated for credit with topic change. P/NP or letter grading.

191D. Variable Topics Research Seminars: Public Policy. (1) Seminar, one hour. Examination of particu- lar subfields of policy studies (e.g., international poli- cy, crime policy, policy history) in depth, with specific topics to be identified by instructor. Reading, discus- sion, and development of culminating project. Must be taken for credit if applied toward Public Affairs minor. May be repeated for credit with topic change. P/NP or letter grading.

193A. Marschak Colloquium: Social Sciences. (2) Seminar, two hours. Limited to undergraduate stu- dents. Weekly Marschak Colloquium presentations, highly regarded and long-standing in- terdisciplinary lecture series given by leading social science experts, required. Discussion of lecture topics and research models in behavioral sciences. Letter grading.

197. Individual Studies in Public Policy. (2 or 4) Tutorial, four hours. Preparation: 3.0 grade-point aver- age. Limited to junior seniors. Individual intensive study, with specific problems to be agreed upon be- tween faculty member and student. Assigned reading and tangible evidence of mastery of subject matter re- quired. May be repeated for credit. Individual contract re- quired. P/NP or letter grading.

Graduate Courses

201. Principles of Microeconomic Theory I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 204) to prepare students for analysis of public policy, with review of economic principles and basic microeco- nomic theory and policy applications. Consumer theory and demand, producer theory and supply, equi- librium of product and factor markets. Letter grading.

202. American Political Institutions and Process- es. (4) Lecture, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environment of policy and administration. Discussion of U.S. constitutional arrangements, followed by in- strumental and integrative examination of primary in- stitutions of politics and governance from organized interests to legislatures, bureaucracies, and courts. Letter grading.

203. Statistical Methods of Policy Analysis I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 208) to prepare students for analysis of public policy, with review of economic principles and basic microeco- nomic theory and policy applications. Consumer theory and demand, producer theory and supply, equi- librium of product and factor markets. Letter grading.

204. Principles of Microeconomic Theory II. (4) Lecture, three hours; outside study, nine hours. Re- quisite: course 201. Second course in two-term se- quence (see course 208) covering both theory and policy applications. Topics include monopoly, factor markets, general welfare economics, ex- ternalities, public goods, uncertainty, and intertempo- ral optimization. Letter grading.

205. Bureaucracy and Public Management. (4) Lecture, three hours; outside study, nine hours. Prob- lems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organization en- vironment in which policy analysts work; tools for un- standing role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies. Letter grading.

206. Political Economy of Policy Adoption and Im- plementation. (4) Lecture, three hours; outside study, nine hours. How policy is formed, adopted, and implemented. How policies are formu- lated, by whom, how policy agendas are set, how to define relationships between politicians, bureaucrats, lobbyists, and media experts. Letter grading.

207. International Political Economy. Lecture, three hours; outside study, nine hours. Examination of political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and business-government relations. Analysis of do- mestic policy options nations are pursuing in re- sponse to economic globalization, such as protection- ism, mercantilism, and deregulation. Introduction to international coalitions being formed, including NAF- TA, and to nongovernmental organizations created to deal with special problems such as global environ- mental crisis. Letter grading.

210. Management in the 21st Century. (4) Lecture, three hours; outside study, nine hours. Overview of moral philosophy, political theory, and public-sector ethics, using from classical, modern, and consen- sorary literature and case studies. Consideration of vari- ous ways in which terms such as “democracy” and “liberty” are used in public discourse. Practice in de- veloping and defending moral arguments, both orally and in writing. Letter grading.

211. Normative Issues in Policy Analysis. (4) Le- cture, three hours; discussion, one hour. Limited to graduate students. Technical introduction to some basic norma- tive categories, arguments, and tools essential for ad- dressing questions of public policy. Normative ques- tions are those that concern whether actions, charac- ters, or states of world are right or wrong — or, in less absolute cases, better or worse than possible alterna- tives. Allegedly, value-free methods of analysis do not help decide policy questions. Certain policy questions raise normative concerns sooner or more urgently than others: those that go beyond matters of economic efficiency and touch on questions of human dignity, equality, justice, or national or cultural traditions. Some questions that seem not to be subject to efficiency analysis raise some strong ethical concerns distinct from those of efficiency. Discussion of disagreement that exists over both what efficiency is and in what cases or across what dimensions it ought to govern. Letter grading.

212. Child Welfare Policy. (4) Same as Social Welfare M290J. Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of develop- ment of infrastructure to support needs of children and families. S/U or letter grading.

213. Mental Health Policy. (4) Same as Social Welfare M290K. Lecture, three hours. Examination of evolution of social policy and services for mentally ill, with emphasis on political, economic, ideological, and sociological factors that have shaped such mental health services they are provided. S/U or letter grading.

215. Health Policy. (4) Same as Social Welfare M290M. Lecture, three hours. Introduction to contem- porary issues in healthcare financing and delivery, pro- viding historical perspective on emergence of these is- sues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

216. Public Policy for Children and Youth. (4) Same as Social Welfare M290N. Lecture, three hours. Policy issues that affect children and adoles- cents in relation to their interaction with the courts and community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

217. Methods of Evaluating Social Programs. (4) Lecture, three hours; outside study, nine hours. Course re- quisites: courses 203, 208. Examination of design and statistical methods for evaluating impacts of so- cial programs. Introduction to use of experimental and nonexperimental designs and various methods for estimating impacts of social programs. Discussion of designs for process analyses. Letter grading.

218. Research Design and Methods for Social Policy. (4) Same as Urban Planning M204L. Lecture, three hours; outside study, nine hours. Limited to graduate students. How to become more sophisticated consumers and producers of qualitative and quanti- tative policy research. In first half of course, formal principles of research design; in second half, various data collection methods, including ethnography, inter- viewing, and survey design. Letter grading.

220. Transportation, Land Use, and Urban Form. (4) Same as Urban Planning M254A. Lecture, three hours. Historical evolution of urban form and transpor- tation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form. Letter grading.

221. Travel Behavior Analysis. (4) Same as Ur- ban Planning M256A. Lecture, three hours. Requisites: courses 201 and 203, or Urban Planning 207 and 220B. Descriptions of travel patterns in metropol- itan areas, recent trends and projections into future, over- view of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new ap- proaches to travel behavior analysis. Letter grading.

222. Transportation Economics, Finance, and Policy. (4) Same as Urban Planning M257A. Lecture, three hours. Overview of transportation finance and economics: concepts of efficiency and equity in trans- portation finance; historical evolution of highway and transit finance; current issues in highway finance; pri- vate participation in road finance, toll roads, road costs and cost allocation, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services. Letter grading.

223. Transportation and Environmental Issues. (4) Same as Urban Planning M258A. Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; ve- hicle inspection and maintenance issues; transporta- tion demand management and transportation control measures; alternative fuels and vehicles; cor- porate average fuel economy and global warming is- sues; growth of automobile worldwide fleet; automo- bile in sustainability debate. Letter grading.

224A. Introduction to Geographic Information Systems. (4) Same as Urban Planning M202A. Lecture, three hours; laboratory, one hour. Preparation: one graduate-level statistics course, familiarity with one packaged statistics program. Principles of Geographic Information Systems (GIS) and applied techniques of using spatial data for mapping and analysis. Topics include data quality, data manipula- tion, spatial analysis, and information systems. Use of mapping and spatial analysis to address planning problem. Letter grading.
224. Advanced Geographic Information Systems. (4) (Same as Urban Planning M206B.) Lecture, four hours; laboratory, four hours. Requirement: course M204A or Urban Planning M206A. Principles and skills of geographic analysis and modeling; managing, processing, and interpreting spatial data. Especially useful for students interested in environmental, community, regional planning, and transportation-related research. Scripts (Avenue), modeling (Spatial Analyst), network analysis, and transportation modeling (TransCAD). Letter grading.

225. Education Policy and Education Inequality. (4) (Formerly numbered C225.) Seminar, three hours; outside study, nine hours. Limited to graduate students. Examination of policies that may reduce socio-economic and ethnic disparities in educational success. Topics include international and national comparisons of educational outcomes, private and public school choice, school accountability policies, interventions to improve school or teacher quality, parent and preschool interventions, and supplemental educational services. Letter grading.

M237. Nonprofit Sector, State and Civil Society. (4) (Same as Social Welfare M290S and Urban Planning M237.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for social welfare objectives: research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

M230. Labor Markets and Public Policy. (4) (Same as Social Welfare M241E and Urban Planning M288.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. Concurrently scheduled with course C142. S/U or letter grading.

M231. Comparative Industrial Relations. (4) (Same as Management M255.) Lecture, three hours; outside study, nine hours. Requirement: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussions of theoretical frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and meaning of “web of rules” governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course C144. S/U or letter grading.

232. Labor Relations: Process and Law. (4) (Same as Management M250A.) Lecture, three hours. Designed for graduate students. Examination of collective bargaining, at advanced level, of collective bargaining process, labor-management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

233. Employment Issues in California. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Drawing on resources of UCLA Business Forecasting Project, introduction to and analysis of general features of California labor market, analysis of employment fluctuations and forecasting techniques including linkages between employment fluctuations in California and elsewhere in the country, and social issues related to labor market. Letter grading.

234. Labor Markets and Social Policy. (4) Lecture, three hours; outside study, nine hours. Examination of analytical tools and conceptual models needed to understand policies directed toward people in lower tail of income distribution. Concepts include static and dynamic labor supply, labor demand, compensating differentials, human capital, and economic models of immigration and crime. Letter grading.

235. Drug Abuse Control Policy. (4) Lecture, three hours; outside study, nine hours. Introduction to drug abuse as social problem and to drug abuse control as a field of both necessity and difficulty of making and executing wise policies around psychoactive substances. Concurrently scheduled with course C101. Letter grading.

237. Ethical Questions in Public Life. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of role of policy in shaping forms and meanings of culture and cultural activities in contemporary society. Overview of relevant theories of culture and their ramifications in such phenomena as consciousness, ideology, and identity. Empirical examination of what policymakers have said and done about promotion of culture of interests of various social goals. Contemporary trend of economic and cultural intersecting to be subject for trend analysis. Examination of globalization and national cultural interests in depth, especially cultural meaning and role of cultural politics in contemporary society and their consequences for trajectories of cultural policy at local, national, and international levels. Letter grading.

238. Issues in Cultural Policy. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Survey of role of policy in shaping forms and meanings of culture and cultural activities in contemporary society. Overview of relevant theories of culture and their ramifications in such phenomena as consciousness, ideology, and identity. Empirical examination of what policymakers have said and done about promotion of culture of interests of various social goals. Contemporary trend of economic and cultural intersecting to be subject for trend analysis. Examination of globalization and national cultural interests in depth, especially cultural meaning and role of cultural politics in contemporary society and their consequences for trajectories of cultural policy at local, national, and international levels. Letter grading.

239. Budget Politics, Social Policy, and Entitlement Reform. (4) Lecture, three hours; outside study, nine hours. Examination of politics of public budgeting in the U.S., with emphasis on financing of social safety net. Exploitation of budgetary process as setting for gaining substantive knowledge about how government really works and for developing political skills required to influence resource allocation decisions. Concurrently scheduled with course C124. Letter grading.

240. Theories of Regional Economic Development I. (4) (Same as Urban Planning M236A.) Lecture, three hours; discussion, one hour. Introduction to theories of local economic development, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Topics include basic ethical theory, role-relative ethics, Machiavellian amorality, democratic responsibility and representation, ethics of compromise, dirty hands problems, international ethics. Concurrently scheduled with course CM126. Letter grading.

241. Introduction to Regional Planning. (4) (Same as Urban Planning M230.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space. Letter grading.

M243. Community Development and Housing Policies of the State, Civil Society, and Nonprofits. (4) (Same as Social Welfare M290U and Urban Planning M275.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

M244. Transportation Planning. (4) (Same as Urban Planning M255.) Lecture, three hours. Examination of how planners analyze and organize public transportation systems. Measuring system performance, intelligent transportation systems, transportation demand management, parking management, freight movement and facilities, public transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled. Letter grading.

CM245. Globalization Issues and Problems in Globalizing World. (4) Lecture, three hours; outside study, nine hours. To enable students to (1) think of world in dynamic terms, (2) be able to map, divide, and assemble world in many different ways, and (3) be able to use modern tools of flux, change, and movement in world space and history. Concurrently scheduled with course C147. Letter grading.

M246. Electoral Democracy: Theory and Behavior. (4) (Same as Political Science M268B.) Seminar, three hours. Examination of both empirical and normative questions from rich variety of perspectives for scholars in all subfields of political science as well as policy students and others interested in these issues. Consideration of topics fundamental to both democratic theory and study of American politics — public opinion; nature and purpose of elections; representa- tion; parties; and purpose of campaign strategy. Letter grading.

M248. Tolerance, Pluralism, and Diversity. (4) (Same as Political Science M216.) Seminar, three hours. Prior experience with cross-cultural or legal material help- ful. Exploration of both abstract concepts of tolerance and contemporary disputes. S/U or letter grading.

C249. Political Ethics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for graduate students. Study of major issues in morality, or lack thereof, of political life. Coverage of both readings in moral and political theory and real-world examples such as Watergate, terrorism, civil rights politics, and presidential scandals. Topics include basic ethical theory, role-relative ethics, Machiavellian amorality, democratic responsibility and representation, ethics of compromise, dirty hands problems, international ethics. Concurrently scheduled with course CM126. Letter grading.

(310) 825-9775
director@radonc.ucla.edu

Chair
Dieter R. Enzmann, M.D. (Leo G. Rigler Professor of Radiological Sciences)

Scope and Objectives
The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging pertaining to thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, computed tomography, magnetic resonance imaging, ultrasonography, and interventional radiology are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through the use of Web-based teaching materials. A longitudinal core clerkship is offered during the third year, with a comprehensive examination.

Greater depth of experience is provided to the three weeks of elective clerkship offered to fourth-year medical students that emphasizes training in general diagnostic radiology, angiography/interventional radiology, neuroradiology, and pediatric radiology.

For further details on the Department of Radiological Sciences, see http://www.radiology.ucla.edu.

Debra K. Shugler, Ph.D. (English)
Jonathan A. Silk, Ph.D. (Asian Languages and Cultures)
Ronald V. Vroon, Ph.D. (Slavic Languages and Literatures)

Scope and Objectives
The undergraduate major in the Study of Religion equips students to understand and compare creatively the worldwide varieties of core convictions, stories, texts, rituals, and practices known collectively as religion. Students complete courses in at least six departments in which religious phenomena are analyzed, including Anthropology, Asian Languages and Cultures, Classics, English, History, Near Eastern Languages and Cultures, Philosophy, Political Science, and World Arts and Cultures. Students can anticipate gaining versatile intellectual tools for approaching, analyzing, and appreciating the deep roots, human motivations, and history of the formation of religious traditions in their respective cultural contexts. Within this interdepartmental program, students may focus in depth on one or more specific religions. Many students select this major in combination with a second major field, a minor, or related language study.

Undergraduate Study
Study of Religion B.A.

Preparation for the Major
Required: History 4; Philosophy 2; two courses from Anthropology 9, Asian 60, History 1A, 1B, 1C, 9A, 9C, 9D, M10A, 10B, 11A, 11B.

Transfer Students
Transfer applicants to the Study of Religion major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one history of religions course, one philosophy of religion course, and two courses from sociocultural anthropology, Buddhism, history of Western civilization, Asian civilizations, civilizations of Africa, and history of China.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Phi-
losophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 191) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (197 and 199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

Approved courses (courses marked with an asterisk have readings in foreign languages; see departmental course listings for requirements):

Group I — Methods: Anthropology 130, 156, History 186C, Philosophy 175, Study of Religion 100, 110, 120, Theater 101A

Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty mentor. Students admitted to honors should take three 199 courses under the guidance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

To qualify for admission students should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor S. Scott Barchy at the program address.

Study of Religion

Upper Division Courses

100. Undergraduate Seminar: Biographies and Autobiography in Study of Religion. (4) Seminar, four hours. Stimulation and discipline for refining empathetic and critical understanding of contemporary religious experiences in wide variety of cultural contexts. Drawing on autobiographies and with participants trained in course on how to take oral histories, participants apply methodological tools for analysis of role of religion in personal life. Students write brief biographies, based on extensive interviews, of one adult person who is active or reactive participant in one religious tradition other than one most familiar to researchers. Letter grading.

110. Religion and Violence. (4) Seminar, three hours; discussion, one hour. Exploration of capacity of religion to mobilize and legitimate violence. Materials include theoretical texts by Rene Girard, Wolf Burkert, Jonathan Z. Smith, and David Rapoport and case studies dealing with religion and violence in India, Northern Ireland, Egypt, Lebanon, Israel, Palestine, Sri Lanka, and the U.S. Letter grading.

120. Abrahamic Religions: Traditions in Tension. (4) Seminar, three hours. Examination of Abrahamic tradition as received and developed by Jews, Christians, and Muslims according to rubrics of linkage and interaction, with view both to potential clashes in the 21st century and to resources inherent in these traditions for heading off such clashes and misunderstandings. Letter grading.

130. Undergraduate Seminar: Study of Religion. (Formerly numbered 100.) Seminar, three hours. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor. P/NP or letter grading.

199. Directed Research in Study of Religion. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Cumulating paper or project required. Twelve units may be applied toward major. Individual contract required. Letter grading.

Professor

William E. Peris, M.S., M.O.A., Lieutenant Colonel, Chair

Adjunct Assistant Professors

Daniel L. Carter, M.A., Captain
Lawrence A. Smith II, M.B.A., Captain

Scope and Objectives

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Army Senior Division Reserve Officers’ Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920. Navy and Air Force units were established in 1938 and 1949 respectively.

This voluntary training allows students to qualify for an officer’s commission in the Army, Navy/Marine Corps, or Air Force while completing their college education. The ROTC curriculum is not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of a major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for current and transfer students. All have leadership laboratories that teach leadership and management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance between $300 and $500 per month during the academic year. Applications for scholarships may be obtained at http://www.afrrotc.com or by calling (310) 825-1742. Completed applications should be submitted prior to August 15 for early consideration and no later than December 1 of the year preceding college matriculation. Two-year scholarship applications may be obtained from the UCLA Aerospace Studies Department and are considered when received.

Air Force ROTC Program

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating the ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.
Undergraduate Study

Four-Year Program

The four-year program is available to first-term freshmen and those full-time students with at least three and one half years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A, 1B, 1C, 20A, 20B, and 20C), followed by a two-year Professional Officer Course (POC) described under Two-Year Program. GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A, 130B, 130C, 140A, 140B, and 140C. POC participation requires three hours of leadership laboratory and three hours of academic class each week during the academic year.

Requisites for the two-year program are successful completion of the GMC and a four-week field training course (see Four-Year Program above), or successful completion of a six-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the six-week field training program must apply to the department chair early during Fall Quarter of their sophomore year. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, performance during an officer board interview, and a physical fitness test.

Students selected for the six-week summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see Four-Year Program above).

Students enrolled in the POC incur a military obligation and are paid from $450 to $500 per month during the academic year. Additionally, they may compete for a scholarship up to full tuition, fees, and $900 for textbooks. Graduation and successful completion of the POC leads to a commission as a second lieutenant.
Army ROTC is a program that enables students to become officers in the U.S. Army, Army Reserves, or Army National Guard while earning a college degree. The curriculum supplements students’ academic majors by offering elective courses ranging from leadership and management to military law. Courses are augmented with leadership laboratories that stress practical skills such as first aid, land navigation, survival techniques, rappelling, military tactics, and scenario-driven leadership action courses. Non-ROTC students may enroll in many of the military science courses without enrolling in the ROTC program.

Additionally, students who decide to become Army officers can receive summer training in military parachuting (Airborne School at Fort Benning, GA), helicopter operations that include rappelling from a hovering helicopter (Air Assault School in Hawaii), and mountaineering operations (Northern Warfare School in Alaska).

Scholarships are available for two, three, and four years of academic study and are awarded on a competitive basis. Army Scholarships pay for full tuition and mandatory fees or housing, up to $10,000, and provide a tiered stipend ranging from $3,000 to $5,000 per year and a $1,200 book allowance. Nonscholarship, contracted ROTC cadets also receive the tiered stipend of $3,000 to $5,000 per year. Students in the program also compete for over $35,000 in merit-based scholarships provided annually by various private organizations that support the Army ROTC program. Additionally, students may work part-time as officer trainees in local Army Reserves or National Guard units through the simultaneous membership program (SMP). Contracted students can fly free on military aircraft within the continental U.S. on a space-available basis.

Students who receive placement credit for two years of ROTC, attending a paid ROTC Leaders’ Training Course, membership in the Army Reserves or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service. The Army also allows enrollment in the two-year program while students attend graduate school.

Successful completion of the Advanced Course program and a bachelor's degree may lead to a commission as a second lieutenant in the Army Reserves, National Guard, or Active Army.

### Military Science

#### Lower Division Courses

2. Leadership Laboratory. (No credit) Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in the classroom and to develop their confidence as future military officers. No grading.

11. Foundations of Officership. (2) Lecture, one hour. Introduction to issues and competencies that are central to commissioned officer's responsibilities. Framework established to understand officership, leadership, military customs, briefings, and life skills such as physical fitness, nutrition, and time management. P/NP or letter grading.

12. Basic Military Leadership. (2) Lecture, one hour. Introduction to fundamentals of leadership, Army leadership values, ethics, and counseling techniques. Foundation of basic leadership fundamentals central to commissioned officer's responsibilities established. P/NP or letter grading.

14. Principles of Land Navigation Applicable in Maneuver. (2) Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

15. Modern Guerrilla Warfare. (2) Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include non-military responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions.

21. Individual Leadership Development. (3) Lecture, two hours. Introduction to various individual leadership personality types, in combined lecture, discussion, and experiential learning, to assist students in development of their own individual leadership style. Additional emphasis on military factors and principles of leadership, goal setting, basic communication, and consideration of others. P/NP or letter grading.

### Undergraduate Study

Students aspiring to become Army officers follow prescribed course sequences with the Military Science Department and a physical fitness program. Generally, the courses consist of one 2- to 4-unit course per term and physical fitness sessions one to three times per week, depending on the participation-level requirements.

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete six military science courses and (2) the Advanced Course, two years of upper division study consisting of six military science courses, one military history course, and a five-week summer camp.

Army ROTC students must satisfy the military history requirement by completing Military Science 110 or another history course approved by the chair.

Transfers and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance between $450 and $500 a month for 10 months during each of the two academic years, plus military science uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 16 specialty areas in either the Army's National Guard, Reserves, or Active Army. Students' preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a five-week summer camp. Non-ROTC students may be granted a delay in reporting to their initial assignment.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. The active duty obligation for those students commissioned into the Active Army is three years. Students who accept ROTC scholarships and enter the Active Army serve one additional year. ROTC students wishing to obtain certain advanced degrees may be granted a delay in reporting to their initial assignment.

### Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

### Two-Year Program

The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school junior
All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

Scholarships
ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance between $250 and $400 per month during the academic year. Applications for scholarships may be obtained at https://www.nrotc.navy.mil or by calling (800) 628-7682. Completed applications should be submitted prior to August 15 for early consideration and no later than December 1 of the year preceding college matriculation. Two-year scholarship applications may be obtained from the UCLA Naval Science Department and are considered when received.

Navy/Marine Corps ROTC Program
The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers’ Training Corps (NROTC), scholarship students receive full tuition, fees, books, and subsistence pay of $250 to $400 per month. Nonscholarship students may apply to participate as members of the midshipman battalion under the NROTC College Program and, like NROTC Scholarship students, they also receive a reserve commission at graduation. Because of the rapid development of highly technical ship systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy/Marine Corps Scholarships are currently available to students pursuing any major offered by the University, as long as they agree to complete basic technical requirements. In addition to University requirements, Navy option midshipmen must complete 26 units and Marine Corps option midshipmen 18 units of science courses, physical fitness test, and summer training cruises, each about four to six weeks long. Both Navy and Marine Corps option students must also pass a swimming test. The department also conducts a sail training program for all Navy midshipmen. All naval science courses are open to students who are not in the program but have an interest in the Navy/Marine Corps and related fields, such as engineering, navigation and naval operations, history, and management.

Undergraduate Study
Scholarship Program
The majority of naval science students attend the University on Navy/Marine Corps Scholarships which are awarded primarily on a four-year basis to high school seniors selected by a nationwide competition. A two-year upper division scholarship program is also available, with a similar selection process, to students who

Upper Division Courses

131. Tactical Planning and Analysis. (4) Lecture, three hours; laboratory, four hours. Introduction to leadership development process used to evaluate military leadership performance. Examination of how to conduct individual and small unit training as well as introduction to basic principles of tactics. Emphasis on study of reasoning skills, troop leading procedures, and military orders process. P/NP or letter grading.

132. Army Officrership and Communication. (4) Lecture, three hours; laboratory, four hours. Examination of officership that culminates in detailed case study. Interpersonal communication, with focus on general communication theory as well as written and spoken communication skills. Presentation of information briefing to receive feedback from both instructor and fellow students. P/NP or letter grading.

133. Leadership and Problem Solving. (4) Lecture, three hours; laboratory, four hours. Examination of role communications, values, and ethics play in effective leadership, including ethical decision making, consideration of others, transactional and transformational leadership, and survey of Army leadership doctrine. Emphasis on improving oral and written communication abilities and leadership development and assessment. P/NP or letter grading.

141. Leadership and Management. (4) Lecture, three hours; laboratory, four hours. Interactive course to develop student proficiency in planning and executing complex training operations. Counseling techniques and development of skills needed to lead various organizations. Exploration of training management, leadership skills, and developmental counseling techniques. P/NP or letter grading.

142. Leadership, Ethics, and Military Law. (4) Lecture, three hours; laboratory, four hours. Interactive course to enhance student understanding of organizational culture, leadership, and ethics. Understanding and enhancement of leader-member relations, assessment of organizational culture and ethical climate, and how to effect change in organizations. Exploration of foundations of military law and law of war. P/NP or letter grading.

143. Officership: Professional Military Leadership. (4) Lecture, three hours; laboratory, four hours. Capstone interactive leadership course to prepare students for challenges of being commissioned officers in U.S. Army by discussing various leadership challenges and case studies. Study of military units, with specific emphasis on joint operations involving Army, Navy, Air Force, and Marine Corps assets, military operations other than war, and global war on terror. Other topics include personnel administration, maintenance management, and financial planning. P/NP or letter grading.

197. Individual Studies in Military Science. (2 to 4) (Formerly numbered 199.) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Jason T. Davenport, B.S., Lieutenant, U.S. Navy
Tarek S. Elmasry, B.S., Lieutenant, U.S. Navy
Rommel M. Esteves, M.S., Commander, U.S. Navy
Michael C. Palmer, M.A., Major, U.S. Marine Corps

Scope and Objectives
In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Army Senior Division Reserve Officers’ Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920. Navy and Air Force units were established in 1938 and 1949 respectively. In 1972, the University, a unit of the Army Senior Division, received official recognition from the U.S. Army as theうち Naval Reserve Officers’ Training Corps (NROTC). Starting in 1982, the Naval Reserve Officers’ Training Corps (NROTC) expanded to NROTC units around the country.

The Naval Reserve Officers’ Training Corps (NROTC) is a program of the U.S. Navy, providing college students with an opportunity to prepare for a commission as a midshipman in the Navy or Marine Corps. The NROTC program is designed to provide students with an education that prepares them for leadership positions in the Navy or Marine Corps.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

Scholarships
ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance between $250 and $400 per month during the academic year. Applications for scholarships may be obtained at https://www.nrotc.navy.mil or by calling (800) 628-7682. Completed applications should be submitted prior to August 15 for early consideration and no later than December 1 of the year preceding college matriculation. Two-year scholarship applications may be obtained from the UCLA Naval Science Department and are considered when received.

Navy/Marine Corps ROTC Program
The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers’ Training Corps (NROTC), scholarship students receive full tuition, fees, books, and subsistence pay of $250 to $400 per month. Nonscholarship students may apply to participate as members of the midshipman battalion under the NROTC College Program and, like NROTC Scholarship students, they also receive a reserve commission at graduation. Because of the rapid development of highly technical ship systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy/Marine Corps Scholarships are currently available to students pursuing any major offered by the University, as long as they agree to complete basic technical requirements. In addition to University requirements, Navy option midshipmen must complete 26 units and Marine Corps option midshipmen 18 units of science courses, physical fitness test, and summer training cruises, each about four to six weeks long. Both Navy and Marine Corps option students must also pass a swimming test. The department also conducts a sail training program for all Navy midshipmen. All naval science courses are open to students who are not in the program but have an interest in the Navy/Marine Corps and related fields, such as engineering, navigation and naval operations, history, and management.
have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition, fees, and uniforms, students receive subsistence pay of $250 to $400 per month and a book stipend. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning. 

**College Program (Nonscholarship)**

Students attending the University who meet Navy/Marine Corps requirements but who do not have an NROTC Scholarship may enroll in the College Program during their freshman year. These students have the opportunity to compete for scholarships after the completion of one term of naval science courses. If they do not win a scholarship, or choose not to compete for one, they must compete for advanced standing prior to their junior year. A two-year College Program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, monthly subsistence pay in their junior and senior years. College Program students serve on active duty for a minimum of three years following graduation and commissioning.

**Marine Corps Option**

Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

**Naval Science Minor**

The Naval Science minor is designed for students who wish to augment the major they are completing in another departmental program. Naval science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences.

To enter the minor, students must have an overall grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

**Required Lower Division Courses (10 units):** Naval Science 1B, 20A, 20B.

**Required Upper Division Courses (20 units):** Naval Science 101A, 101B, 102B, 103, 104.

Each minor course must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

**Naval Science**

**Lower Division Courses**

A. Naval Science Laboratory. (No credit) Laboratory, one hour. Required course 102C. Limited to Naval Science ROTC midshipmen. Designed to cover service-specific administrative processes that are required knowledge for newly commissioned Navy and Marine Corps officers. No grading.

Z. Leadership Laboratory. (No credit) Laboratory, to be arranged. Mandatory for and limited to Naval Science ROTC midshipmen. Provides midshipmen with general military training and practical command and staff leadership experiences through classroom instruction and performance of various tasks and interactive processes within framework of organized midshipmen-run military unit, with oversight by active-duty military staff. As integral part of naval science curriculum, provides professional experiences designed to develop leadership potential and orientation for active duty. No grading.

1A. Introduction to Naval Science. (3) Lecture, three hours. Introduction to organization of Naval Service, various components of Navy, career opportunities, shipboard damage control, fire fighting, Naval and Marine Corps operations, and some customs and traditions of Naval Service. Letter grading.

1B. Naval Ship Systems I. (4) Lecture, four hours. Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy. P/NP or letter grading.

20A. Naval Ship Systems II. (4) Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

20B. Seapower and Maritime Affairs. (3) Lecture, three hours. Conceptual study of seapower, with emphasis on historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, with focus on current abilities of specific nations to use oceans to attain national objectives. P/NP or letter grading.

**Upper Division Courses**

102B. Naval Leadership and Management I. (4) Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer’s role as a leader/man. 

102C. Leadership and Ethics. (2) Lecture, two hours. Requisite for Naval Science ROTC midshipmen: course 102B. Capstone course that examines principles of leadership and ethics relevant to military leaders through study and interactive discussion of classical and contemporary source documents and case studies. Letter grading.

103. Evolution of Warfare. (4) Study of evolution of warfare, including historical and comparative consideration of how leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

104. Expeditionary Military Operations. (4) Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

197. Individual Studies in Naval Science. (1 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Absent and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**Scope and Objectives**

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

http://www.humnet.ucla.edu/humnet/scandinavian/
Scandinavian Minor
To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

Required Courses (28 units): Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.pdns.net.ucla.edu/gasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree
The Scandinavian Section offers the M.A. degree in Scandinavian.

Scandinavian
Lower Division Courses
1. Elementary Swedish. (4) Discussion, four hours. P/NP or letter grading.
6. Intermediate Swedish: Intensive. (12) Lecture, 15 hours; laboratory, five hours. Intensive basic course in Swedish equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.
7. Elementary Norwegian. (4) Discussion, four hours. P/NP or letter grading.
16. Elementary Danish. (4) Discussion, four hours. P/NP or letter grading.
147A. Hans Christian Andersen. (4) Formerly numbered 184.) Lecture, two hours; discussion, one hour. Study of selected works of Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

147B. Soren Kierkegaard. (Formerly numbered 147.) Seminar, three hours. Readings and discussion of selected works by Soren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C245B. P/NP or letter grading.

152. Backgrounds of Scandinavian Literature. (4) Formerly numbered 141.) Seminar, three hours. Readings and discussion of representative texts selected from literature of medieval, Renaissance, baroque, and Enlightenment periods. P/NP or letter grading.

152FL. Backgrounds in Scandinavian Literature. (2) Formerly numbered 141FL.) Seminar, two hours. Requisite: course 5 or 15 or 25. Enforced corequisite: course 152. Additional work in Northern languages to augment work assigned in course 152, including reading, writing, and other exercises in Danish, Icelandic, Norwegian, or Swedish. P/NP or letter grading.

156. Scandinavian Literature of 19th Century. (4) Formerly numbered 143.) Seminar, three hours. Readings and discussion of selected works of modern Scandinavian literature from beginning of century to present. P/NP or letter grading.

156FL. 20th-Century Scandinavian Literature. (2) Formerly numbered 143FL.) Seminar, two hours. Requisite: course 5 or 15 or 25. Enforced corequisite: course 156. Additional work in Northern languages to augment work assigned in course 156, including reading, writing, and other exercises in Danish, Icelandic, Norwegian, or Swedish. P/NP or letter grading.

157. Contemporary Nordic Literature. (4) Formerly numbered 181.) Seminar, three hours. Reading and analysis of selected texts by major 20th-century Swedish authors. P/NP or letter grading.

163A. Introduction to Danish Cinema. (4) Seminar, three hours. Introduction to history of cinema in Denmark, rather than focus on films of particular directors or topics. Theoretical readings from important critics, including Kracauer, Bazin, Metz, and Chatman, along with several directed exercises, to develop vocabulary and critical method for discussing films in general and Danish cinema in particular. Other readings include selections from Hjort, Sandberg, Tangherlini, and others, as well as Scandinavian theorists. P/NP or letter grading.

166C. Carl Dreyer. (4) Seminar, three hours. Carl Theodor Dreyer (1889 to 1968) is not only one of the great masters of Nordic cinema, but of world cinema as well. Focus on films that Dreyer made during his early period between 1919 and 1964. Contextualization of silent and sound works of this most personal of filmmakers within multiple frameworks: Danish national film industry, transnational European cinema, and issues of auteur filmmaking. Readings by key Dreyer scholars such as David Bordwell, Ray Carney, Paul Schrader, Mark Sandberg, and others, as well as Dreyer's own writings on cinema. All films have English subtitles or subtitles. P/NP or letter grading.

166FL. Ingmar Bergman. (2) Seminar, two hours. Requisite: course 5 or 15 or 25. Enforced corequisite: course 156.F. Focused on film theory and history, analysis of Bergman's early and late works, with an emphasis on the meaning of his films. P/NP or letter grading.

171T. Introduction to Scandinavian Folklife. (4) Formerly numbered 178.) Seminar, three hours. Themes in Scandinavian folklore, introduction to tales and legends of Scandinavian culture as well as to interpretive methodologies that strive to answer questions "why do people tell stories that they tell?" Concurrently scheduled with course C271. Letter grading.

174A. Minority Cultures in Scandinavia. (4) Seminar, three hours. Exploration of emergence of immigrant cultures in Nordic region. Beginning in 1960s, large numbers of people from Turkey, Italy, and Pakistan began immigrating to Nordic countries, followed in subsequent decades by immigrants and refugees from Vietnam, India, Iran, Iraq, Afghanistan, Cambodia, and countries throughout Africa. Cultural landscape previously marked by relatively high degree of cultural homogeneity now characterized by broad cultural diversity. Examination of emergence of new voices in Nordic cultural landscape in wide range of cultural expressive media, including literature, film, and visual and performing arts. Exploration of emergence of new forms of Nordic literature, such as gender-, documentalized phenomenon of Rinkeby Swedish. Concurrently scheduled with course C274A. P/NP or letter grading.

174B. Queer Scandinavia. (4) Formerly numbered 177.) Seminar, three hours. Queer themes in Scandinavian literature, mainly from 19th and 20th centuries. Scandinavian countries have had more progressive view on homosexuality than most other countries, and Scandinavian writers portrayed homosexuality in explicit and radical ways as early as turn of 19th century. Introduction to key theoretical works within field of gay and lesbian studies and queer studies, as well as presentation of historical view of how homosexuality has been perceived in Western world over time. P/NP or letter grading.

175. Introduction to Sami Language and Culture. (4) Formerly numbered 138FL.) Lecture, three hours. Use of thematically arranged, structurally graduated readings, conversation topics, individual and group assignments, and journal writing to provide systematic overview of linguistic characteristics of Estonian language. At course end students should be able to communicate in Sami in a variety of common social situations and should be equipped with necessary basic concepts to continue language acquisition and cultural studies in their social and professional milieu, interacting with native speakers, or taking formal courses at intermediate level. Concurrently scheduled with course C275. P/NP or letter grading.

180. Literature and Scandinavian Society. (4) Seminar, three hours. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by undergraduate advisor) with topic change. May be concurrently scheduled with course C280. P/NP or letter grading.
C218. Seminar: Scandinavian Literature. (4) Seminar, three hours. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265. P/NP or letter grading.

187FL. Special Studies: Readings in Scandinavian, (2) Seminar, two hours. Requisite: course 5 or 15 or 25. Students must be concurrently enrolled in affiliated main course. Additional work in Nordic languages (Danish, Icelandic, Norwegian, Swedish) to augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. Individual contract required. P/NP or letter grading.

197. Individual Studies in Scandinavian, (2 to 4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assignment reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Scandinavian, (4) Formerly numbered Old Norse Studies 199.) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty member. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

C231. Introduction to Viking Age. (4) Formerly numbered Old Norse Studies C231.) Lecture, three hours. History, society, and culture of early Scandinavians. Texts in English, including readings in Old Norse sagas and Eddas. Concurrently scheduled with course C131. Graduate students do additional readings and write more extensive research papers. Letter grading.

C233A. Saga. (4) Formerly numbered Old Norse Studies C233A.) Seminar, three hours. Sagas are largest extant medieval prose literature. Texts in English, with selections from different types of Icelandic sagas. Consideration of history and society that produced these narratives. Concurrently scheduled with course C133A. Graduate students do additional readings and write more extensive research papers. Letter grading.

C238B. Advanced Old Norse Prose. (4) Formerly numbered Old Norse Studies 238B.) Lecture, three hours. Requisite: course 132B. Readings of major saga texts. Also, secondary sources that bear on specific issues in Old Norse literature and medieval Scandinavian history. S/U or letter grading.

C237. Old Norse Literature and Society. (4) Formerly numbered Old Norse Studies 237.) Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C137. Graduate students do additional readings and write more extensive research papers. Letter grading.

C241A. Theory of Scandinavian Novel. (4) Formerly numbered C264.) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Analysis of predominant structures of Scandinavian novel from its 18th-century beginnings through its rise in 19th century and its 20th-century evolution. Discussion of application of contemporary theoretical theories to novels. Concurrently scheduled with course C141A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C244A. Voices of Women in Nordic Literature. (4) Formerly numbered C266.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Historical and critical analysis of writing by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course CM144A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245A. Henrik Ibsen. (4) Formerly numbered C251.) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C145A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245B. Knut Hamsun. (4) Formerly numbered C254.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored themes of nature as modern idyll. May be concurrently scheduled with course C145B. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C246A. August Strindberg. (4) Formerly numbered C256.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. August Strindberg’s portrayals of marital conflict reflected and shaped literary representation of so-called battle of sexes. His work, as well as its literary transformations, placed into Scandinavian, European, and feminist context. May be concurrently scheduled with course C146A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C247B. Soren Kierkegaard. (4) Formerly numbered C253.) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Readings and discussion of selected works of Soren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C147B. S/U or letter grading.

C265. Seminar: Scandinavian Literature. (4) Seminar, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185. S/U or letter grading.

C271. Introduction to Scandinavian Folklore. (4) Formerly numbered C267.) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretative methodologies that strive to answer question “why do people tell stories that they tell” concurrently scheduled with course C171. Letter grading.

M271. Study of Oral Tradition: History and Methods. (4) Same as English M205A.) Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and/or appropriate oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern-day electronic and popular verbal genres, such as joke and rapping. S/U or letter grading.

M272. Collecting Oral Tradition. (4) Same as English M205B.) Seminar, three hours. Description and evaluation of various modern approaches to collecting and documenting oral tradition as text, performance, and sociocultural event. Consideration of apparent meaning and value of body of oral tradition as text, performance, and sociocultural event. S/U or letter grading.

M273. Studies in Oral Traditional Genres. (4) Same as English M205C.) Seminar, three hours. Exploration of emergence of immigrant cultures in Nordic region. Beginning in 1960s, large numbers of peoples from Vietnam, India, Iran, Iraq, Afghanistan, Cambod ia, and countries throughout Africa. Cultural landscapes previously marked by relatively high degree of cultural homogeneity now characterized by broad cultural diversity. Examination of emergence of new voices in cultural language and media (e.g., music, film, and visual and performing arts). Exploration of emergence of new forms of Nordic languages, such as well-documented phenomenon in Tinkerby Swedish. Concurrently scheduled with course C174A. S/U or letter grading.

C275. Introduction to Sami Language and Culture. (4) Formerly numbered C236.) Lecture, three hours. Use of thematically arranged, structurally graduated readings, conversation topics, individual and group assignments, and journal writing to provide systematic overview of linguistic characteristics of Estonian language. May be concurrently scheduled with course C186. Students should be able to communicate in Sami in variety of common social situations and should be equipped with necessary basic concepts to continue language acquisition and cultural studies in their social and professional milieu, interacting with native speakers, or taking formal courses at intermediate level. Concurrently scheduled with course C175. S/U or letter grading.

C280. Literature and Scandinavian Society. (4) Formerly numbered C292.) Seminar, three hours. Designed for graduate students. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Graduate students may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel should be responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 6) Tutorial, to be arranged with faculty member who directs the study or research. Limited to graduate Scandinavian students. Twelve units may be applied toward the course requirement, but only 4 units may be applied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.
597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4 to 8)
Tutorial, to be arranged with faculty member who directs the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (4) Tutorial, to be arranged with faculty member who directs the study or research. May be repeated. S/U grading.

David W. Maedadyen, Ph.D., Chair

Professors
Michael H. Heim, Ph.D.
Vyacheslav V. Ivanov, Ph.D.
Olga Kagan, Ph.D.
Emily R. Kleinin, Ph.D.
Roman Koropeckyj, Ph.D.
Gail D. Lenhoff, Ph.D.
David W. Maedadyen, Ph.D.
Alekandr I. Osipov, Ph.D.
Ronald W. Voon, Ph.D.

Professors Emeriti
Henning Andersen, Ph.D.
Peter C. Hodgson, Jr., Ph.D.
Vladimir Markov, Ph.D.
Rochelle H. Stone, Ph.D.
Dean S. Worth, Ph.D.

Senior Lecturer S.O.E.
Edward Denzler, M.A., Emeritus

Lecturers
Melinda Borbely, M.A.
Marianna Chodorowska-Plich, Ph.D.
Georgiana Galeateanu, Ph.D.
Susan C. Krezin, Ph.D.
Ganna Kudyma, Ph.D.
Viktorija Lejkov-Lacan, Ph.D.

Scope and Objectives
The Department of Slavic Languages and Literatures offers a wide array of courses in the languages and cultures of Russia and of Central and Eastern Europe. Instruction is offered in Czech, Hungarian, Polish, Romanian, Russian, Serbian/Croatian, and Ukrainian to provide the necessary linguistic skills to pursue advanced work in the literature, culture, history, politics, and social structures of these areas. Students have the choice of several majors and minors and the opportunity to enhance their knowledge and skills through programs of study abroad.

The department offers two majors in Russian. The Russian Language and Literature major is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirement by combining regular coursework with summer programs or with the University of California Education Abroad Program (EAP) in Moscow, which is open to students who have completed the equivalent of one or more years of study (level 1 on the American Council on Teaching of Foreign Languages — ACTFL — scale). Students interested in this program should consult the undergraduate adviser as early as possible.

The major in Russian Studies is designed for students who wish to complement mastery of the language with an array of courses on Russian history, politics, literature, and culture. The major in Central and East European Languages and Cultures is designed to provide students with a mastery of two languages of central or eastern Europe and familiarity with the literature, as well as general background in the cultural, political, and social history of the Slavic peoples. The graduate program provides advanced training in Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

Central and East European Languages and Cultures B.A.

Preparation for the Major
Required: Central and East European Studies 91 or Slavic 90.

Transfer Students
Transfer applicants to the Central and East European Languages and Cultures major with 90 or more units must complete the following introductory course prior to admission to UCLA: one culture, history, or civilization course on one or more European nations.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: (1) One three-quarter introductory Central and East European language sequence to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, Serbian/Croatian 101A, 101B, 101C, or Ukrainian 101A, 101B, 101C; (2) one three-quarter advanced language sequence to be selected from Czech 102A, 102B, 102C, Hungarian 102A, 102B, 102C, Polish 102A, 102B, 102C, Romanian 102A, 102B, 102C, Serbian/Croatian 102A, 102B, 102C, or Ukrainian 102A, 102B, 102C OR any three courses from Russian 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C, 103A, 103B, 103C, 123, 130A, 140A; (3) one three-quarter introductory language sequence of a second Slavic or Central European language (15 units), or equivalent proficiency as determined through departmental testing, to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, Serbian/Croatian 101A, 101B, 101C, or Ukrainian 101A, 101B, 101C, (4) five courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Central and East European Languages and Cultures or Russian Language and Literature are normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Undergraduate Study
The department offers three majors: (1) Central and East European Languages and Cultures, (2) Russian Language and Literature, and (3) Russian Studies. The equivalent of a major in Central and East European Languages and Cultures or Russian Language and Literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Central and East European Languages and Cultures or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

The Major
Required: (1) One three-quarter introductory Central and East European language sequence to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, Serbian/Croatian 101A, 101B, 101C, or Ukrainian 101A, 101B, 101C; (2) one three-quarter advanced language sequence to be selected from Czech 102A, 102B, 102C, Hungarian 102A, 102B, 102C, Polish 102A, 102B, 102C, Romanian 102A, 102B, 102C, Serbian/Croatian 102A, 102B, 102C, or Ukrainian 102A, 102B, 102C OR any three courses from Russian 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C, 103A, 103B, 103C, 123, 130A, 140A; (3) one three-quarter introductory language sequence of a second Slavic or Central European language (15 units), or equivalent proficiency as determined through departmental testing, to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, Serbian/Croatian 101A, 101B, 101C, or Ukrainian 101A, 101B, 101C, (4) five courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Central and East European Languages and Cultures or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Russian Language and Literature B.A.

Preparation for the Major
Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency, 90A or 90B or 90BW.

Transfer Students
Transfer applicants to the Russian Language and Literature major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years
of Russian and one Russian civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Russian Studies B.A.

Preparation for the Major

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 90A.

Transfer Students

Transfer applicants to the Russian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Russian civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Russian 100A, 100B, 101C, or 101A, 101B, 101C, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History M127A through 127D, two courses from Political Science 128A, 128B, 156A, Russian C170, and four additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design I Media Arts, Film, Television, and Digital Media, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

Honors Program

The honors program is designed for exceptional departmental majors who wish to complete a research project that culminates in an honors thesis. Juniors and seniors who have completed all university-level coursework, including all preparation courses and requirements for the major, with an overall grade-point average of 3.0 and a 3.5 GPA or better in the major courses, are eligible to apply. Students must have the sponsorship of an approved faculty adviser. All honors students must enroll in Slavic 198A and 198B in two consecutive terms to conduct independent research and write the honors thesis. The results of the research should be presented as a conference paper at the annual Slavic Undergraduate Research Conference.

Central and East European Studies Minor

The Central and East European Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Sciences with exposure to a variety of disciplines pertinent to the study of central and eastern Europe, including language, literature, history, political science, folklore, ethnomusicology, and women's studies.

To enter the minor students must be in good academic standing (2.0 minimum grade-point average) and file a petition with the department counselor in 322B Humanities Building. (310) 825-3866.

Required Lower Division Course (5 units): Central and East European Studies 91 or Slavic 90.

Required Upper Division Courses (28 to 31 units): (1) One three-quarter introductory central and east European language sequence to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, Serbian/Croatian 101A, 101B, 101C, or Ukrainian 101A, 101B, 101C (students who demonstrate sufficient fluency in one of these languages through departmental testing are exempt from this three-course sequence and can replace it with a minimum of 12 units of language courses from item 3); (2) one course dealing directly with the target culture to be selected from Czech 155, Ethnomusicology 161C, History 120A through 120D, 130A, 130B, Polish 152A, 152B, 152C, Political Science 156B, 156D, Romanian 152, Russian 124G, Serbian/Croatian 154, Slavic 125, 126, 179, Sociology M166, Ukrainian 152, Women's Studies M166, or 185; (3) 12 units of second-year or higher-level language courses to be selected from Czech 102A, 102B, 102C, 187A through 187M, Hungarian 102A, 102B, 102C, 187A through 187M, Polish 102A, 102B, 102C, 187A through 187M, Romanian 102A, 102B, 102C, 187A through 187M, Serbian/Croatian 102A, 102B, 102C, 187A through 187M, Ukrainian 102A, 102B, 102C, 187A through 187M, Women's Studies M166, or 185.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Language Minor

To enter the Russian Language minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (13 units): Russian 6 and two courses from 25, 90A, 90B.

Required Upper Division Courses (23 units): Three courses from Russian 101A through 103C and two additional upper division Russian language and literature courses. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Literature Minor

To enter the Russian Literature minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (10 to 15 units): Russian 3 or 13B or 15B and two courses from 25, 90A, 90B.

Required Upper Division Courses (20 units): Five Russian language or literature courses, including at least two from Russian M118, 119, 120, 130A, 130B, 130C, 140A through 140D.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Studies Minor

To enter the Russian Studies minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (10 to 15 units): Russian 3 or 13B or 15B and two courses from 25, 90A, 90B.

Required Upper Division Courses (20 units): Five courses dealing directly with Russia, to be selected from any upper division Russian language and literature courses, History M127A through 127D, Political Science 128A, 128B, 156A, Russian C170. With approval of the undergraduate adviser, other related courses may be applied toward the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate
Hungarian

Upper Division Courses

101A-101B-101C. Elementary Hungarian. (4-4-4)
Discussion, three to four hours. Course 101A is requisite to 101B, which is requisite to 101C. Introduction to grammar; instruction in speaking, listening, reading, and writing. P/NP or letter grading.

102A-102B-102C. Advanced Hungarian. (4-4-4)
Lecture, three hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. P/NP or letter grading.

121. Survey of Hungarian Literature in Translation. (4)
Lecture, three hours. Designed for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures. P/NP or letter grading.

187A. Advanced Tutorial Instruction in Hungarian. (2)
Tutorial, one hour; laboratory, one hour. Preparation: two years of Hungarian and/or Hungarian placement test. Recommended corequisite: course 187B. Tutorial and guided independent study of advanced Hungarian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187B. Advanced Tutorial Instruction in Hungarian. (2)
Tutorial, one hour; laboratory, one hour. Requisite or corequisite: course 187A. Tutorial and guided independent study of advanced Hungarian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187C-187M. Advanced Tutorial Instruction in Hungarian. (2 each)
Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Hungarian placement test. Recommended corequisite: course 187B. Tutorial and guided independent study of advanced Hungarian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

Lithuanian

Upper Division Courses

101A-101B-101C. Elementary Lithuanian. (4-4-4)
Lecture, three hours. Course 101A is requisite to 101B, which is requisite to 101C. Basic courses in Lithuanian language. P/NP or letter grading.

102A-102B-102C. Advanced Lithuanian. (4-4-4)
Lecture, three hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. P/NP or letter grading.

103. Intensive Elementary Lithuanian. (12)
Lecture, 19 hours. Intensive basic course in Lithuanian equivalent to one year of language study. Use of series of thematically arranged, structurally graduated readings, conversation exercises, and individual and group assignments, as well as journal writing, to provide systematic overview of linguistic characteristics of Lithuanian language. P/NP or letter grading.

Polish

Upper Division Courses

101A-101B-101C. Elementary Polish. (5-5-5)
Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Basic courses in Polish language. P/NP or letter grading.

102A-102B-102C. Advanced Polish. (4-4-4)
Lecture, three hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. P/NP or letter grading.

152A-152B-152C. Survey of Polish Literature. (4-4-4)
Lecture, three hours. Lectures and readings in English. Letter grading. 152A. From the Middle Ages to Neoclassicism: 152B. Reimagining a Nation. Readings in 19th-century Polish literature and culture. 152C. Dreaming, Mocking, and Writing “as if.” Readings in modern Polish literature and culture.

187A. Advanced Tutorial Instruction in Polish. (2)
Tutorial, one hour; laboratory, one hour. Preparation: two years of Polish and/or Polish placement test. Recommended corequisite: course 187B. Tutorial and guided independent study of advanced Polish: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187B. Advanced Tutorial Instruction in Polish. (2)
Tutorial, one hour; laboratory, one hour. Requisite or corequisite: course 187A. Tutorial and guided independent study of advanced Polish: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187C-187M. Advanced Tutorial Instruction in Polish. (2 each)
Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Polish placement test. Tutorial and guided independent study of advanced Polish: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

Graduate Course

280. Seminar: Polish Literature. (4)
Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

Romanian

Lower Division Course

90. Introduction to Romanian Civilization. (4)
Lecture, three hours. Introductory survey of social and cultural institutions of Romanian people and their historical background. P/NP or letter grading.

Upper Division Courses

101A-101B-101C. Elementary Romanian. (5-5-5)
Recitation, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Basic courses in the Romanian language. P/NP or letter grading.

102A-102B-102C. Advanced Romanian. (5-5-5)
Lecture, five hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. Differences between oral and written discourse, expansion of students’ general and academic vocabulary, and increased range of grammatical structures for use in speaking and writing. Cultural information to be included in readings. Letter grading.

103. Intensive Elementary Romanian. (12)
Lecture, 19 hours. Intensive basic course in Romanian equivalent to courses 101A, 101B, 101C. P/NP or letter grading.

152. Survey of Romanian Literature. (4)
Lecture, three hours. Lectures and readings in English. Survey of Romanian literature from Middle Ages to Present. P/NP or letter grading.
Graduate Course

201. Romanian as a Romance Language. (4) Lecture, three hours. Survey of structure and development of the Romanian language, with special emphasis on relationship of Romanian to other members of the Romance group.

Russian Lower Division Courses

1. Elementary Russian. (5) Recitation, five hours; laboratory, one hour. P/NP or letter grading.
2. Elementary Russian. (5) Lecture, five hours; laboratory, one hour. Requisite: course 1. P/NP or letter grading.
10. Intensive Elementary Russian. (12) Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.
11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian. (2) Basic courses in the Russian language; 2 to 4 units per term recommended. Each 2-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/NP or letter grading.
15A-15B. Accelerated Elementary Russian. (8-7) Recitation, five hours; laboratory, two hours. Material of first-year Russian course to be covered in two terms, with extensive use of language laboratory and the Russian Room. P/NP or letter grading.
25. Russian Novel in Translation. (5) Lecture, three hours; discussion, one hour. Not open to credit to students with credit for course 25W. Designed for nonmajors. Study of major works by the great 19th-century Russian novelists. P/NP or letter grading.
25W. Russian Novel in Translation. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English 1B or 1B-1C or 110C. Not open for credit to students with credit for course 25. Designed for nonmajors. Study of major works by the great 19th-century Russian novelists. Satisfies Writing II requirement. Letter grading.
30. Russian Culture and World Cinema. (4) Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, with focus on problems of perception and misperception arising when literature is translated into cinema, and one national culture is viewed through the eye of another. P/NP or letter grading.
31. History of Russian Cinema. (5) Lecture, three hours; discussion, one hour; film screening, three hours. Overview of Russian cinema from silent films of early 20th century to current developments, with focus on cinematic styles, genres, and directors. Particular attention to differences between visual and verbal storytelling. P/NP or letter grading.
32. Russia and Asia: Cultural Dialogues. (5) Lecture, three hours; discussion, one hour. Since the end of Soviet Union, cultural and political flux within non-Chinese lands that have shared an ancient past has increased dramatically. Given radical rejection of Russian heritage in the former Soviet territories, key distinctions in the way Russians have handled the inclusion or exclusion of mental frameworks between Slavic and Near Eastern studies. Examination of relation of Russia’s culture to its borders: Caucasus, Central Asia, China, and Japan. P/NP or letter grading.
90A. Introduction to Russian Civilization. (5) Lecture, three hours; computer laboratory, one hour. Introduction to Russian culture and society from earliest times to 1917. P/NP or letter grading.
90B. Russian Civilization in the 20th Century. (4) Lecture, three hours. Not open for credit to students with credit for course 90BW. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. P/NP or letter grading.
90BW. Russian Civilization in the 20th Century. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English 1B or 1B-1C or 110C. Not open for credit to students with credit for course 90B. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. Weekly discussions focus on varied approaches to writing addressing class topics. Five short papers required. Satisfies Writing II requirement. Letter grading.
Upper Division Courses

100A-100B-100C. Literacy in Russian. (4-4-4) Lecture, three hours. Course 100A is requisite to 100B, which is requisite to 100C. For students who speak Russian but have difficulty reading and writing. Focus on improving reading and writing skills, including vocabulary, and developing speaking skills required for academic discourse. P/NP or letter grading.
102A-102B-102C. Topics in Advanced/Superior Russian. (4-4-4) Formerly numbered 102A-102D). Lecture, three hours. Requisite: course 101C. Discussion and composition, with emphasis on vocabulary development and review of selected grammar topics. Readings in fiction and nonfiction, films, and videos, and use of Internet. Each course may be taken independently and may be repeated for credit. P/NP or letter grading.
103A-103B-103C. Russian for Native and Near-Native Speakers. (4-4-4) Lecture, three hours. Course 103A is not requisite to 103B, which is not requisite to 103C. Development of oral language skills, emphasizing correct and diversified use of language and addressing individual grammatical difficulties. May be repeated for credit with topic or instructor change. P/NP or letter grading. 103A. Russian National Identity. Readings in literature, philosophy, criticism, film. 103B. Literature and Film. Film adaptations of Russian literature. Readings and screenings. 103C. Special Topics.
107A-107B-107C. Russian for Social and Cultural Studies. (4-4-4) Formerly numbered 107.) Lecture, three hours. Exploration of texts and media in social sciences and culture, with emphasis on press, television, and Internet. Each course may be taken independently and may be repeated for credit. P/NP or letter grading.
115. History of Russia, Origins to Rise of Muscovy. (4) (Same as History M127A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Kievan Russia and its culture, Appanage principalties and towns; Mongol invasions; unification of Russian state by Muscovy, Autocracy and its Servitors; serfdom. P/NP or letter grading.
119. Golden Age and Great Realists. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors are advised to take this course in their sophomore year. Lectures and readings in English. Survey of 19th-century Russian literature (Pushkin, Gogol, Tolstoy, Dostoevsky, Chekhov) in its cultural, political, and social contexts. P/NP or letter grading.
120. Literature and Revolution. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors are advised to take this course in their sophomore year. Lectures and readings in English. Major works of the 20th century (Belyi, Pasternak, Bulgakov, Solzhenitsyn, and others) from prerevolutionary avant-garde to the present. P/NP or letter grading.
121. Russian Pop Culture. (5) Lecture, three hours. Designed for juniors/seniors. Russian majors are advised to take this course in their sophomore year. Lectures and readings in English. Overview of Russian popular culture today, with examination of status of Russia’s classic(al) traditions and the rise of modern literature. Emphasis on relationship of modern Russian literature to its borders: Caucasus, Central Asia, China, and Japan. P/NP or letter grading.
122. Siberia. (5) Lecture, three hours. Introductory survey in which current cultural and ecological issues are situated in their geographical and historical background, including analysis of Siberian human geography before first contact with European colonizers and development of modes of interaction among different cultural groups. Reading in English of selection of literary works by well-known 20th-century Siberian writers whose texts serve as locus for closer examination of Siberian regional literary culture and ecological networks within which it exists. P/NP or letter grading.
123. Historical Commentary on Modern Russian. (4) Lecture, three hours. Requisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.
124D. Studies in Russian Literature: Dostoevsky. (4)
Lecture, three hours. Lectures and readings in English. Selections from early short fiction and philosophical works followed by in-depth readings of one or two major novels such as Crime and Punishment or The Brothers Karamazov. P/NP or letter grading.

124G. Studies in Russian Literature: Gogol. (4)
Lecture, three hours. Lectures and readings in English. Russian novelist (The Gift, American novelist (Lolita), autobiographer (Speak Memory), and critic. Concurrently scheduled with course 227. P/NP or letter grading.

124P. Studies in Russian Literature: Pushkin. (4)
Lecture, three hours. Lectures and readings in English. Major works in all genres, including lyric poetry, narrative poems, plays, prose fiction, and selected letters. P/NP or letter grading.

124T. Studies in Russian Literature: Tolstoy. (4)
Lecture, three hours. Lectures and readings in English. Early and late stories and novels, excerpts from the diaries and one major novel such as War and Peace or Anna Karenina. P/NP or letter grading.

125. Russian Novel in Its European Setting. (4)
Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Emphasis on 19th- and 20th-century novels.

126. Survey of Russian Drama. (4)
Lecture, three hours. Lectures and readings in English. Introduction to representative selection of most important dramatic works in Russian literary tradition, including works from neoclassical, Romantic, realist, and futurist traditions. P/NP or letter grading.

127. Women in Russian Literature. (4)
(Same as Women's Studies M127.) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers. P/NP or letter grading.

128. Russian Science Fiction. (4)
Lecture, three hours. Readings in English. Introduction to Russian science fiction in the 20th century. Emphasis on function of science fiction in development of Russian culture before and after the October Revolution. P/NP or letter grading.

129. Animation and Music Video. (5)
Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Lectures and readings in English. Humanities have recently passed through so-called visual turn; traditional emphases on language(s) in field have been reconsidered in light of society's increasingly visual workings. New attitude toward our own changing culture (i.e., toward its future) has equal value if applied retrospectively to multiple cultures of one erstwhile empire. In territory where many tongues or traditions needed to be ironed out, visual often plays role society's social construction. Because of past politics and today's profit-driven events, small fickle forms of visual narrative reflect change and social change much better than ponderous grandeur of feature-length cinema. Letter grading.

130A-130B-130C. Russian Poetry. (4-4-4)
Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

130A. Introduction to Analysis of Russian Poetry. Role of biography, cultural subtexts, rhetoric, and form in interpreting poetic texts. 130B. Poetry of Russian Neoclassicism, Romanticism, and Realism. Major works of late 18th and 19th centuries in their historical and cultural contexts. 130C. Russian Poetry in the 20th Century. Major poetic schools from early modernism (symbolism, futurism, acmeism) to contemporary avant-garde.

131. History of Russian Cinema. (4)
Lecture, three hours. Overview of most popular art form in world's largest nation to its struggle with incipient capitalism in Russia, how misogynist on other side of world departed from path marked out by Hollywood and London, how films operate as form of nationwide persuasion, relationship between word and image in those acts of persuasion, how infantimentary dogma cannot escape importance of audience desire(s), different forms of social existence as refuge from both, and how, from both, what values of world's biggest country are. Role of language in self-definition. Is so-called visual matter? P/NP or letter grading.

150. Russian Folk Literature. (4)
Lecture, four hours. Lectures and readings in Russian. P/NP or letter grading.

C170. Russian Folklore. (3 to 5) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Concurrently scheduled with course C240. P/NP or letter grading.

C191. Variable Topics Research Seminars: Russian Literature. (4) Seminar, three hours. Requisite: course 6. Reading and discussion of selected authors; culminating seminar paper required. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

Graduate Courses

201A-2018-201C. Russian: Vocabulary, Pronunciation, Style. (4-4-4) Lecture, three hours. Requisite: course 102C. Conducted in Russian. Reading and analysis of texts with focus on vocabulary, pronunciation, and style, respectively, in three consecutive terms. S/U or letter grading.

203. Practicum in Russian. (2) Requisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts in Russian; composition, conversation; stylistics. May be repeated for credit. S/U grading.

211A. Literature of Medieval Rus’. (4) Lecture, three hours. Requisite: M.A. (literature). Survey of the literature from its beginning through the Kievian and Muscovite periods up to the end of the 17th century.

212A-212B. 19th-Century Russian Literature. (4-4) Lecture, three hours. S/U or letter grading.

213A. 20th-Century Russian Literature, 1890 to 1929. (4) Lecture, three hours. Required for M.A. (literature). Lectures and readings in major literary trends of modernist period, such as decadence, symbolism, futurism, acmeism, and ornamental school. Analysis of representative works by Blok, Bely, Khlebnikov, Pasternak, Platonov, and others. S/U or letter grading.

219. Movements and Genres in Russian Literature. (4) Lecture, three hours. Introduction to most important theoretical issues of Russian literature viewed in diachronic perspective. Letter grading.

227. Linguistic Approaches to Russian Poetry. (4) Lecture, three hours. Introduction to use of linguistic methods in study of Russian poetic texts. May be repeated for credit. S/U or letter grading.

228. Russian Folklore. (3 to 5) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Concurrently scheduled with course C170. S/U or letter grading.

241. Topics in Russian Phonology. (4) Lecture, three hours. Requisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

242. Topics in Russian Morphology. (4) Lecture, three hours. Requisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

243. Topics in Historical Russian Grammar. (4) Lecture, three hours. Requisites: course 204, Slavic 221. Selected topics in Russian historical morphology, morphology, and syntax. May be repeated for credit with consent of instructor.

251. Topics in Literature of Medieval Rus’. (4) Lecture, three hours. Requisite: course 211A. Detailed discussion of particular writers, periods, or genres. May be repeated for credit with consent of instructor and graduate adviser.

261. Discourse Grammar of Russian. (2 or 4) Lecture, three hours. Analysis of phenomena of Contemporary Standard Russian controlled by discourse/pragmatic factors at all levels of linguistic structure from phonology to intersentential syntax. S/U or letter grading.

ent. P/NP or letter grading.

265. Topics in Russian Syntax. (4) Lecture, three hours. Requisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

270. Russian Poetics. (4) Lecture, three hours. Introduction to technical study of Russian poetics and versification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th centuries.

277. Studies in Russian Literature: Nabokov. (4) Lecture, three hours. Lectures and readings in English. Russian novelist (The Gift, American novelist (Lolita), autobiographer (Speak Memory), and critic. Concurrently scheduled with course C124H. S/U or letter grading.

290. Seminar: Russian Poetry. (4) Seminar, three hours. Recommended preparation: course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

291A. Seminar: Literature of Medieval Rus’. (4) Seminar, three hours. Requisite: course 211A. Select ed topics and works from 10th-17th centuries. May be repeated for credit with consent of instructor and graduate adviser.

291B. Seminar: 18th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

292. Seminar: 19th-Century Russian Literature. (4) Seminar, three hours. Requisites: courses 212A, 212B. Selected authors and works from 19th-century poetry and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar: 20th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 213A. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser. S/U or letter grading.

294. Seminar: Russian Literary Criticism. (4) Seminar, three hours. Requisites: courses 211B, 212A, 212B, 213A. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. May be repeated for credit with consent of instructor and graduate adviser.

298. Seminar: History of Russian Culture. (4) Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

Slavic

Lower Division Courses

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Indo-European Studies M20, Near Eastern Languages M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Early representations of language known are those of Near East dating to end of 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica left little evidence of corresponding earliest developments, their antiquity and, in case of China and Mesoamerica, their evident isolation mark these centers as loci of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greco-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

40. Christianities East and West. (5) Lecture, three hours; discussion, one hour. Survey of major historical branches of Christianity — Eastern and Oriental Orthodoxy, Roman Catholicism, and Protestantism, contrasting how history, dogma, culture, and community structures develop in the three traditions. S/U or letter grading.

808. Sophomore Seminars: Literature and Culture. (4) Seminar, three hours. Variable topics course designed to explore themes and issues pertinent to Slavic literature and culture. Coursing may project may be required. Consult Schedule of Classes or department for topics to be offered in specific term. Letter grading.

90. Introduction to Slavic Civilization. (5) Lecture, three hours; discussion, one hour. Introductory survey of social and cultural institutions of Slavic peoples and their historical background. P/NP or letter grading.

Upper Division Courses

100L. Intensive Elementary Latvian. (12) Lecture, 19 hours. Intensive basic course in Latvian equivalent to one year of language study. Use of series of methodically arranged, structurally graduated readings, conversation exercises, and individual and group assignments, as well as journal writing, to provide systematic overview of linguistic characteristics of Estonian language. P/NP or letter grading.

125. Interwar Central European Prose. (4) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

126. Postwar Central and East European Prose. (4) Lecture, three hours. Examination of cultural politics of postwar Central and East Europe from 1947 to 1992 through analyses of novels, essays, photographs, and films. Special attention to relation between communist culture and ideology. P/NP or letter grading.

179. Baltic and Slavic Folklore and Mythology. (4) Lecture, four hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities. P/NP or letter grading.

Graduate Courses

200A. Literary Proseminar. (4) Seminar, three hours. Required for M.A. (literature). Designed to prepare incoming graduate students for scholarly work by introducing them to resources (departmental, intramural, and extramural), methodologies, and techniques for analysis of literary materials and cultural studies. S/U grading.

201. Introduction to Old Church Slavic. (4) Lecture, three hours. Required for M.A. (linguistics). Introduction to phonology and grammar; readings.

211. Slavic Gender Linguistics. (2 or 4) Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to males and females. Course contributes to understanding of language, literature, sociolinguistics, gender issues, and Slavic culture in general. S/U or letter grading.

229. Introduction to Slavic Bibliography. (2) (Same as Information Studies M229C.) Introduction to Slavic and East European bibliography for the humanites and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; recent reference sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

281. Seminar: Slavic Linguistics. (4) Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate advisor.

282. Seminar: Structural Analysis. (4) Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate advisor.

M299. Research Resources for European Studies. (2) (Same as French M299, German M299, Information Studies M299, Italian M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Slavic Languages at College Level. (4) Seminar, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of language teaching. Discussion of contemporary language teaching methodology as well as problems of pedagogical grammar. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

Ukrainian

Upper Division Courses

102A-102B-102C. Advanced Ukrainian. (4-4-4) Lecture, three hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. Development of advanced listening, speaking, reading, and writing skills. P/NP or letter grading.

152. Ukrainian Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as Kolomyrevsky, Shevchenko, Franko, Ukrainka, and Tychyna.

187A. Advanced Tutorial Instruction in Ukrainian. (2) Tutorial, one hour; laboratory, one hour. Preparation: two years of Ukrainian and/or Ukrainian placement test. Recommended corequisite: course 187B. Tutorial and guided independent study of advanced Ukrainian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187B. Advanced Tutorial Instruction in Ukrainian. (2) Tutorial, one hour; laboratory, one hour. Requisite or corequisite: course 187A. Tutorial and guided independent study of advanced Ukrainian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187C-187M. Advanced Tutorial Instruction in Ukrainian. (2 each) Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Ukrainian placement test. Tutorial and guided independent study of advanced Ukrainian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

**Social Thought**

Interdisciplinary Minor

College of Letters and Science

UCLA

A316 Murphy Hall

Box 951430

Los Angeles, CA 90095-1430

Jeffrey Prager, Ph.D., Chair

Faculty Administrative Committee

Brian P. Copenhagen, Ph.D. (History, Philosophy)
Barbara Herman, Ph.D. (Philosophy)
Russell Jacoby, Ph.D., in Residence (History)
Michael Mann, Ph.D. (Sociology)
Jeffrey Prager, Ph.D. (Sociology)
Brian D. Walker, Ph.D. (Political Science)
Matthew Norton Wise, Ph.D. (History)

Scope and Objectives

The Social Thought minor provides an opportunity for students to take a series of courses that focus on modern social and intellectual thought from the 17th through the 20th century. The minor builds on lower division introductory exposure to the history of modern ideas as embodied in a number of key texts by significant thinkers such as Descartes, Hobbes, Locke, Smith, Rousseau, Wollstonecraft, Mill, Marx, Weber, Darwin, Nietzsche, Freud, DuBois, de Beauvoir, and others and promotes more intense and broad exposure to the great ideas and modern thinkers of the contemporary world. It culminates with enrollment in a two-semester senior thesis tutorial related to a theme from previous coursework and closely supervised by a faculty mentor. The senior thesis occurs in conjunction with a weekly research colloquium where students meet with faculty members to discuss their senior thesis work or related work in the minor.

The minor is intended to supplement the liberal arts education of undergraduates who, through their major, are interested in finding an area of specialization related to career objectives and who seek broad and systematic training in the major ideas of the modern world.

Undergraduate Study

Social Thought Minor

The Social Thought minor is limited to students who formally apply and are admitted. To apply, students must submit an application, a personal statement supporting their interest in pursuing the minor, a letter of recommendation from a faculty mentor, and a transcript to the College Academic Counseling Office, A316 Murphy Hall.

To enter the minor, students must have an overall grade-point average of 2.0 or better and apply for admission only after successfully completing the following lower division requirements: General Education Clusters 21A and 21B, OR two courses from German 56, Honors College 20, 21W, 55, 57, 62, 83W, Philosophy 6, Political Science 10, Sociology 10.

Required Research Colloquia and Senior Thesis (12 units): Students must also complete Social Thought 190A and 199A in one term and courses 190B and 199B in the following term.

No more than two courses (8 to 10 units) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Winfred E. Smith, M.S.W., Emerita
Michelle Talley, L.C.S.W.

Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These, then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student’s interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Affairs, the program affords students instructional opportunities in the other affiliated departments — Public Policy and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better healthcare, better job training, and better economic futures.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

Social Welfare

Upper Division Courses

190A-190B. Research Colloquia in Social Thought I, II. (2-2) Seminar, two hours. Corequisite for course 190A: course 190A; for course 190B: course 190B. Limited to juniors/seniors. Requisite of students in Social Thought minor. Designed to bring together students undertaking supervised senior thesis work in seminar setting with one or more faculty members to discuss their work or related work in Social Thought minor. Led by one supervising faculty member. Course 190A may be repeated for credit. P/NP grading.

199A-199B. Directed Research or Senior Thesis in Social Thought I, II. (4-4) Tutorial, to be arranged. Corequisite for course 199A: course 190A; for course 199B: course 199B. Limited to juniors/seniors. Required of students in Social Thought minor. Supervised individual research under guidance of faculty mentor. Cummulating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Social Welfare / 571
104B. Japanese American Redress. (4) Lecture, four hours. Examination of process through which Civil Liberties Act of 1988 was created, pursued, and passed. Theology and methodology from the U.S. government to over 110,000 Japanese Americans incarcerated in concentration camps during World War II. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Gerontology M104C and Women's Studies M104C) Lecture, four hours. Exploration of complexity of variables related to diversity of aging population and its value in aging process. Examination of gender and ethnicity within context of both physical and social aging, in multidisciplinary perspective utilizing faculty from variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) (Same as Gerontology M104D) Lecture, four hours. Examination of theoretical models and concepts of policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (4) (Same as Gerontology M104E) Lecture, four hours. Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around key aspect of social gerontology. P/NP or letter grading. 

104F. Japanese American Community and Family. (4) Lecture, four hours. Examination of interaction of Japanese American families and communities within larger social and political environment, and understanding of importance of social, cultural, and political influences of Japanese American families and communities. P/NP or letter grading.

105. Social Welfare Policy in Modern America: Historical Perspectives. (4) Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate societal problems: poverty, sickness, and joblessness. Collectively these programs are known as “the welfare state”; examination of working with older adults in the community. P/NP or letter grading.

104G. Intergenerational Communication. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Didactic component with focus on development of social skills in areas of research, students; cover one field of observation experience (module) from a number of field settings. P/NP or letter grading.

107. Field Practicum: Social Welfare. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 106. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under instructional supervision of an agency mentor and a UCLA faculty member. P/NP or letter grading.

130A-130B. Community Research and Services Seminars. (4-4) Seminar, three hours; service learning, four hours; outside study, five hours. Course 130A is requisite to 130B. Limited to juniors/seniors. History and roles of social welfare policy within government, organizations, and communities. Reflections about service learning experiences, with application of issues related to lecture and seminar readings. Students are to be assigned to two-term tutoring/mentoring site where they apply tutoring techniques as they assist middle school children living in impoverished areas of Los Angeles County. In Progress (130A) and P/NP or letter (130B) grading.

131. Poverty, Poor, and Welfare Policy. (4) Seminar, three hours. Limited to juniors/seniors. Current research and policy issues concerning poverty in the U.S., with emphasis on origins and maintenance of household and its impact on families. Overview of measurements and characteristics of poor people; alternative theoretical explanations of poverty; historical overview of major social policies for labor market. Examination of economic, political, and social factors that shape policy responses. Letter grading.

132. Community Analysis and Community Needs. (4) Lecture, three hours. Limited to juniors/seniors. Theoretical and practical foundation for understanding and depicting demographic composition of communities and for determining community needs. Use of systems theory as organizing framework. Community-level interventions are affected by community’s social ecology, culture, economic system, political system, ethnic composition, and class structure. Agencies often seek to define community needs and develop interventions to respond to those needs. Knowledge of community is essential for ascertaining its strengths and resources that can be mobilized for addressing and responding to community needs, issues, and concerns. Social service agencies and communities can work together in partnership to enhance quality of community life. P/NP or letter grading.

140A. Introduction to Study of Aging. (Same as Gerontology M140 and Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

142SL. Intergenerational Communication Across Lifespan. (Same as Gerontology M142SL.) Lecture, three hours; fieldwork, one hour. Limited to juniors/seniors. What do you say to your parents in conversation? How do you talk to your grandparents? How do you handle conflicts with older friends who have been your role models? How do you manage relationships that are of this generation's? What is the role of family in this age group? How do you communicate well with those who are older than you? Individuals of all ages interact with one another, and their interactions have significant impact on their lives. Introduction to intergenerational communication. Social issues related to intergenerational communication across lifespan. Letter grading.

151. Child Welfare Policy in America. (4) Lecture, three hours. Limited to juniors/seniors. Examination of public child welfare system in the U.S. Review of social policies and programs that impact children. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environment for determining community needs. Use of systems theory as organizing framework. Community-level interventions are affected by community’s social ecology, culture, economic system, political system, ethnic composition, and class structure. Agencies often seek to define community needs and develop interventions to respond to those needs. Knowledge of community is essential for ascertaining its strengths and resources that can be mobilized for addressing and responding to community needs, issues, and concerns. Social service agencies and communities can work together in partnership to enhance quality of community life. P/NP or letter grading.

162. Health Policy and Services. (4) Lecture, three hours. Limited to juniors/seniors. Contemporary issues in healthcare financing and delivery and historical perspectives on these issues. Impact of government on these issues in healthcare and ways controversy about this role continues to shape and constrain public policy in health. Major public programs, notably Medicare and Medicaid, and their impact on the health and cost for diverse vulnerable populations. Various public and private approaches to healthcare reform and ways of thinking about the predicted impact, cost, and political feasibility. Issues in care of persons with chronic illness and debate about public and private approaches to long-term care reform. Social work roles in healthcare policy and practice. P/NP or letter grading.

163. Prevention of Risky Substance Use and Related Problems. (4) Lecture, four hours. Limited to juniors/seniors. Prevention of substance use and related harms from illegal and illegal substances is major concern to parents, communities, and nations. Examination of research related to patterns of drug use and related harm (such as crime and mental health disorders) and effectiveness of interventions to reduce these problems. Through review of evidence-based programs and policies, evaluation of effectiveness of evidence-based interventions and implementation strategies to increase student knowledge, skills, and expertise in determining effective interventions to reduce drug-related harm, using most up-to-date information. P/NP or letter grading.

164. HIV Prevention in the U.S. and in Developing World. (4) Lecture, three hours. Limited to juniors/seniors. Overview of various approaches to HIV prevention, drawing on infectious disease paradigms from public health and theories of behavior change from fields of psychology, sociology, and communications. Sexual behavior and injection drug use, existing and promising technologies to reduce HIV transmission, and fiscal, cultural, ethical, and moral dilemmas in allocation of prevention resources. P/NP or letter grading.

181. Nonprofit Sector, Society, and Civil Society. (4) (Formerly numbered C181.) Lecture, three hours; outside study, nine hours. Use of political economy perspective to analyze forces that have shaped rise and change in characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between U.S. and other countries. P/NP or letter grading.

191. Variable Topics Research Seminars: Social Welfare Seminars. (4) Seminar, three hours; outside study, three hours. Corequisite: course 194. Not open to freshmen. Examination of research on topics relevant to psychosocial determinants of children’s health and community resources for children and families, and opportunity to gain breadth and depth of knowledge in seminar setting. May be repeated for credit. P/NP grading.

194. Internship Seminars: Social Welfare. (1) Seminar, one hour; outside study, three hours. Corequisite: course 195. Not open to freshmen. Introduction to topics relevant to psychosocial determinants of children’s health and community resources for children and families, and opportunity to gain breadth and depth of knowledge in seminar setting. May be repeated for credit. P/NP grading.

195. Community Internships in Social Welfare. (2) Tutorial, four hours. Corequisite: course 194. Not open to freshmen. Introductory course in community-based child health and advocacy. Students learn about community resources for children and families through service learning experience and work with pediatric patients and families in UCLA pediatric unit. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. Letter grading.

199. Directed Research in Social Welfare. (2 or 4) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.
Graduate Courses

201A-201B. Dynamics of Human Behavior. (3-3) Lecture, two hours; discussion, one hour. Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research which contribute to unified theory of human development. Letter grading.

202A-202B. Dynamics of Human Behavior. (2-2) Discussion, two hours. Requisites: courses 201A, 201B. Deviations and pathologies in both physical, emotional, and social areas of human functioning as a result of problems related to role and function of social workers. S/U or letter grading.

203A-203B-203C. Integrative Seminars. (2-2-2) Seminar, two hours. Integrative courses that bring together theory and practice of social work in variety of topical areas relevant to profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

205. Cross-Cultural Awareness. (4) Lecture, two hours; discussion, two hours. Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups. Focus on clarity of alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U or letter grading.

M206A. Homelessness: Housing and Social Service Issues. (4) [Same as Urban Planning M270.] Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who are homeless, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to homeless people. Letter grading.

206. History and Philosophy of Social Welfare. (2) Discussion, two hours. History of social work as field: body of knowledge, method and process, and point of view analyzed within context of economic, political, social, philosophical, and scientific climate of period. S/U or letter grading.

211B. Social Welfare Policy and Services II. (4) Lecture, three hours; outside study, nine hours. Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services. S/U or letter grading.

223. Seminar: Social Work Profession. (2) Seminar, two hours. Development of social work in contemporary society; relationships with other professions; probable future trends in profession; social work ethics, professional organizations, certification licensing; responsibility for continued self-criticism and improvement of profession. S/U grading.

225A. Formulation and Analysis. (4) Seminar, three hours. Designed for Ph.D. students. Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis. Letter grading.

225B. Integrative Study of Social Welfare Issues. (4) Seminar, three hours. Designed for Ph.D. students. Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis. Letter grading.

226A-226B-226C. Theory of Social Welfare Practice with Individuals, Families, and Groups I, II, III. (2-2-2) Lecture, two hours. Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

231A-231B-231C. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups IV, V, VI. (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of theories, concepts, and principles underlying social casework practice. Focus on deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

231D. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups — Gerontology. (4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of theories, concepts, and principles underlying social casework practice. Theoretical models related directly to practice with diverse populations of older adults. Presentation of comprehensive preclinical assessment. How to engage in collaborative treatment planning across range of life-level problems and address impediments to intervention process. Theoretical underpinnings and most effective practice models to enable students to serve needs of older clients and their families as they adjust to life transitions, as well as to health and mental health problems most prevalent for older adults. Client populations range from elderly to physically frail and/or demented from diverse backgrounds. S/U or letter grading.

231E. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups — School Social Work. (4) Lecture, three hours; outside study, nine hours. Integration of theory and practice as they pertain to role of social workers in school settings. Biopsychosocial/ecological assessment of students (including, but not limited to, differences due to ethnic and/or cultural diversity and to students who are learning handicapped), ecological intervention strategies, collaboration within multidisciplinary team, and role of liaison between pupils, family, school, and community. Use of discussion, videos, current literature, and case presentation to explore impact of school social workers as change agents. S/U or letter grading.

240A-240B. Theories of Social Welfare Practice in Organizations, Communities, and Policy Settings I, II, III (2-2-2) Lecture, three hours. Corequisite: required social work practicum. Historical and theoretical development of administration, planning, and social welfare organizations; understanding the community as a social system; administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. Letter grading.

241A-241B-241C. Advanced Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings IV, V, VI. (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. S/U or letter grading.

M241D. Social Advocacy and Domestic Violence. (4) [Same as Law M359.] Lecture, three hours; field-work. Use of domestic violence as case study to give students skills needed to advocate for individuals or issues. How systems work, how law legitimizes systems, and how advocacy can be used to change systems. Letter grading.

M241E. Leadership, Development, and Governance of Nonprofit Organizations. (4) [Same as Public Policy M247 and Urban Planning M228.] Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

M241F. Strategic Planning for Public and Nonprofit Organizations. (4) [Same as Public Policy M247 and Urban Planning M228.] Lecture, three hours; outside study, nine hours. Designed for graduate students. Technical processes of problem solving regarding substantive social welfare problems at community level. This form of community practice fills niche between professional and knowledge and skill set possessed by agency and program administrators on one hand and by policy analysts and policymakers on other. Letter grading.

245A. Epistemology of Practice. (4) Seminar, three hours. Designed for Ph.D. students. Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science and practice interplay. Letter grading.

245B. Models of Social Work Practice Research. (4) Seminar, three hours. Designed for Ph.D. students. Research for practice, with major emphasis on methods of intervention research that seek to design, test, evaluate, and disseminate innovative intervention technologies. Letter grading.

258. Critical Problems in Social Welfare. (2) Discussion, two hours. Designed for Ph.D. students. Current problems in field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

280. Social Welfare Research. (3) Lecture, three hours; outside study, six hours. Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge. S/U or letter grading.

281A-281B-281C. Advanced Social Welfare Research. (2-2-2) Discussion, two hours. Individual or group research projects requiring intensive examination and analysis of social problem area, directed toward development of national knowledge and techniques for social work practice. In Progress (281A, 281B) and S/U or letter (281C) grading.
285A-285B-285C. Research in Social Welfare. (4-4-4) Discussion, three hours. Review of areas of research of concern to social workers, with special attention to design, instrumentation, data collection, data processing, reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research. S/U or letter grading.

285E. Research in Gerontology. (4) Lecture, three hours. Overview of research in aging. Development of research questions, selecting appropriate theoretical frameworks, conducting literature reviews, selecting appropriate research design, identifying sampling methods. Special considerations in aging research, including sampling, questionnaire design, and recruitment issues. Letter grading.

285F. Research in Health. (4) Lecture, three hours. Research in area of health policy and services. Discussions of readings about range of research from field of health services. Identification of research design issues, design of research instruments, analysis of strengths and limitations of current approaches to health services research, consideration of alternative roles for social work practitioners in arena of health services. Letter grading.

285H. Program Evaluation Research. (4) Lecture, three hours. Discussion of differences and similarities between evaluation and other research, alternative program evaluation methods, roles and limitations of evaluation research in real world, development of proposals for feasible program evaluation research. Letter grading.

285I. Research in Youth Populations. (4) Lecture, three hours. Research methods as applied to problems, issues, and interventions pertaining to youth populations. Instruction and experience in applying experimental and quasi-experimental designs, survey research methods, ethnographic methods, single-subject designs, and observational methods. Interpersonal definition of variables and selection of design of appropriate measures for research with children and adolescents. Letter grading.

286A. Survey of Research Methods. (4) Seminar, three hours. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. Letter grading.

286B. Advanced Research Methods. (4) Seminar, three hours. Advanced concepts underlying research methods. Continuing study of theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. Letter grading.

286C. Research Internship. (4) Fieldwork, four hours. Supervised study and training through participation in on-going research project or one initiated by students under faculty supervision, enabling students to apply research skills developed in prior courses. May be repeated for credit. S/U grading.

290A-290B-290C. Seminars: Social Work. (4-4-4) Seminar, three hours; outside study, nine hours. Series of seminars in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.

M290D. Women, Health, and Aging: Policy Issues. (4) (Same as Health Services CM241.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to health needs. Letter grading.

M290L. Child Welfare Policy. (4) (Same as Public Policy CM212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural traditions, and how it is given form in public child welfare system. Examination of development of infrastructure to support needs of children and families. S/U or letter grading.

M290K. Mental Health Policy. (4) (Same as Public Policy CM213.) Lecture, three hours. Examination of evolution of social policy and services for mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of mental illness and services they are provided. S/U or letter grading.

M290L. Poverty, Poor, and Welfare Reform. (4) (Same as Public Policy CM214 and Urban Planning CM246.) Lecture, three hours. Major policy and research issues concerning poverty and social policy directed towards poor in U.S. S/U or letter grading.

M290M. Health Policy. (4) (Same as Public Policy CM215.) Lecture, three hours. Introduction to contemporary issues in healthcare financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M290N. Public Policy for Children and Youth. (4) (Same as Public Policy CM216.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and communities, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

M290P. Aging Policy, Elderly and Families. (4) (Same as Public Policy CM217.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examinations of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. Letter grading.

M290R. Law and Poor. (4) (Same as Law CM215, Public Policy CM295, and Urban Planning CM248.) Lecture, three hours. Designed for graduate students. Study of welfare and social welfare policy and programs in U.S., with emphasis on interaction of moral attitudes toward poor and structure and implementation of law, policy, and administration. Current reform consensus and major reforms. Letter grading.

M290S. Nonprofit Sector, State and Civil Society. (4) (Formerly numbered CM290S.) (Same as Public Policy CM227 and Urban Planning CM287.) Lecture, three hours; outside study, nine hours. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between U.S. and other countries. S/U or letter grading.

290T. Social Work and Juvenile Justice System. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Exploration of evolution of juvenile justice system in the U.S. and issues that have shaped current juvenile justice. Role of social workers in system to be theme throughout course. Letter grading.

M290U. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits. (4) (Same as Public Policy CM243 and Urban Planning CM275.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

M290V. Management Challenges and Tools for Nonprofit Sector. (4) (Same as Public Policy CM226 and Urban Planning CM268.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Fundamental building blocks for successful management in nonprofit sector. Students develop management skills in strategic thinking, program solving, project management, team building, and negotiation. Use of case studies to troubleshoot critical challenges, from financial crisis to market failure, that nonprofit managers typically face. Letter grading.

290W. International Social Welfare. (4) Lecture, three hours; outside study, nine hours. Intended for graduate students interested in pursuing analysis of key international social welfare issues. Topics approached from perspective of globalization of social, economic, and political activities. Problems of global poverty, social injustice and inequality, and issues of racial, ethnic, and cultural diversity, with emphasis on multifaceted contributions of social work, social services, and social welfare and international social development within rich and poor countries. Acquisition of knowledge of international social welfare activities, as well as analytical skills to research and debate complex international issues. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

401A-401B-401C. Practicum: Social Work. (3-3-3) Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire disciplined practice foundation in profession. In Progress (401A, 401B) and S/U grades in Progress (401C) grading.

490C. Professional Communication for Social Welfare. (2) Lecture, two hours. Writing workshop on students’ papers in progress, with eye toward scholarly publication. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.
Undergraduate Study

Society and Genetics Minor

To enter the Society and Genetics minor, students must (1) have an overall grade-point average of 2.5 or better and (2) file a petition in 1325 Rolfe Hall no later than three terms before graduation. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the undergraduate adviser.

Required Upper Division Courses (30 to 34 units):
- (1) Society and Genetics 101 or, for life sciences majors, a 4- or 5-unit upper division elective course from the approved list of courses issued each term by the program, (2) course 102W, (3) course 191, and (4) at least four upper division elective courses (minimum 16 units) from the approved list. One individual research tutorial and corequisite research seminar (or course 190 and 199) may be applied; enrollment in additional 190/199 courses may be considered by petition.

Students may petition to have a course not on the approved list applied toward the four-course elective requirement.

No more than one upper division course may be applied toward both this minor and a major or minor in another department or program. Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

Scope and Objectives

The minor in Society and Genetics provides undergraduate students with the opportunity to understand and probe the complex problems and possibilities presented by genetics, with special attention to their social context and content. Given the dynamic interaction between genetics and the social world in which it is embedded, the minor is robustly multidisciplinary.

The emphasis on multidisciplinary scholarship is reflected in the collaborative cross-disciplinary approach to instruction in the core courses of the minor, as well as in the wide range of elective courses available in such areas as anthropology, biology, history, philosophy, public policy, and sociology.

180. Special Courses in Society and Genetics. (4) Lecture, three hours. Departmentally sponsored experimental or temporary courses on selected topics, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

188. Special Courses in Society and Genetics. (4) Seminar, three hours. Departmentally sponsored experimental or temporary courses on selected topics, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

190. Research Colloquium in Society and Genetics. (2) Seminar, two hours. Enforced corequisite: course 199. Designed to bring together advanced undergraduate students undertaking supervised research to join in seminar setting with faculty and graduate students to discuss and debate major current issues in the field. Letter grading.

197. Individual Studies in Society and Genetics. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter (paper or other product) required. May be repeated for credit. Individual contract required. Letter grading.

Sociology

College of Letters and Science

UCLA
264 Haines Hall
Box 951551

William G. Roy, Ph.D., Chair

Professors
Walter R. Allen, Ph.D.
Francis R. Anderson, B.A.
César J. Ayala, Ph.D.
Suzanne M. Bianchi, Ph.D. (Dorothy L. Meier Social Equities Professor)
Sociology is the study of the organization, dynamics, and consequences of social life. The scope of the discipline is as broad and diverse as social life itself. Sociologists study social interaction and relationships, organizations and institutions, communities and whole societies. The methods of sociological investigation are also varied: sociologists immerse themselves in the daily life of groups, interview group participants, examine recorded interaction, interpret historical documents, analyze census data, and conduct large surveys. The methods and concepts of sociology yield powerful insights into the social processes shaping lives, problems, and possibilities in contemporary society. The capacity to identify and understand these processes — a capacity that C.W. Mills called the "sociological imagination" — is valuable preparation for personal and professional participation in a changing and complex world.

In addition to contributing to a liberal arts education, the Sociology major prepares individuals for a broad range of career options and graduate and professional studies. The analytic perspectives and skills gained in the major are a foundation for careers in law, social welfare, urban planning, business, education, and public health. The major also provides a foundation for students intending to pursue graduate work in sociology and related fields. Employment opportunities available to the graduate with a Bachelor of Arts degree in Sociology also include work in community service organizations and health agencies, government service, and human resources. The Sociology Department faculty includes internationally renowned scholars who address topics ranging in scope from the organization of face-to-face interaction to the consequences of globalization. The department boasts outstanding teachers — five of whom have won Distinguished Teaching Awards — and excellent trained teaching assistants, many of whom have also won awards. The select honors program has a record for training students in the fundamentals of research and generating honors theses of substantial accomplishment.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

Undergraduate Study

Sociology B.A.

Presociology Major

While students are completing the lower division preparation courses for the major, they may be classified as Presociology majors.

Preparation for the Major

Required: Sociology 1, 20; one course from Mathematics 2, 3A, or 31A; one course from Statistics 10, 11, 13, or Psychology 100A.

Each course required for the major in Sociology, including lower division and allied field courses, must be taken for a letter grade with a grade-point average of 2.0. A minimum grade of C is required in each Preparation for the Major course.

Transfer Students

Transfer applicants to the Presociology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to sociology course, one finite mathematics or calculus course, and one statistics course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Fifteen upper division courses, including (1) two theory courses — Sociology 101, 102; (2) one methods course from Sociology 113 or Statistics 112; (3) one course from each of the following core areas: (a) interactions — Sociology 111, 119, CM125, 126, 130, 132, 133, 134, (b) institutions and social processes — courses 116, 158, 173, M174, (c) power and inequality — courses 156, 157, M162, 182; (d) any five upper division sociology elective courses; and (5) four upper division allied field courses (16 units) in anthropol-ogy, communication studies, economics, geography, history, political science, and psychology.

Students should complete course 101 and the core courses as early as possible and before taking other upper division courses. Courses 101 and 102 must be completed with grades of C or better. Students are required to maintain an overall grade-point average of 2.0 in all upper division courses.

Only 8 units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member. As preparation for the honors program, students must complete all preparation for the major courses.

Prior to taking other upper division sociology courses, students must complete a 189 honors seminar section of Sociology 101 and 102. They then must complete all upper division requirements for the major.

After acceptance into the honors program, students are required to take courses 191H, 198A, 198B, and 198C (honors thesis seminars) which may be applied as electives toward the major requirements.

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 254E Haines Hall. Stu-
dents should apply in the last term of their junior year.

Computing Specialization

Majors in Sociology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology 112, 113. Each course must be taken for a letter grade. Students graduate with a bachelor’s degree in sociology and a specialization in Computing.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrintro.htm. In many cases, more detail may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Sociology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Sociology.

Sociology

Lower Division Courses

1. Introductory Sociology. (5) Lecture, four hours; discussion, one hour. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation. P/NP or letter grading.

M5. Social Organization of Black Communities. (5) (Same as Afro-American Studies M5) Lecture, four hours; discussion, one hour; field trips. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Letter grading.

10. Social Thought and Origins of Sociology. (5) Lecture, three hours; discussion, two hours. Introduction to historians of thought, with special emphasis on theoretical predecessors to development of discipline of sociology. Exposition and analysis of selected sociological concepts and theorists, especially from the 17th to 19th centuries. Letter grading.

20. Introduction to Sociological Research Methods. (5) Lecture, three hours; discussion, one hour. Introduction to methods used in contemporary sociological research, with focus on issues of research design, data collection, and analysis of data. Fieldwork may be required. Letter grading.

Upper Division Courses

101. Development of Sociological Theory. (5) Lecture, three hours; discussion, one hour. Comparative survey of basic concepts and theories in sociology from 1850 to 1920. P/NP or letter grading.

102. Contemporary Sociological Theory. (5) Lecture, three hours; discussion, one hour. Requisite: course 101. Critical examination of significant theoretical formulations from 1920 to the present. P/NP or letter grading.

106A. Field Research Methods I. (6) Lecture, two hours; discussion, two hours; fieldwork, eight to 10 hours. Research practicum in which students write field notes on their experiences in and observations of intensive internship field placement. Readings focus on fieldwork roles and relations, observing and describing written field notes, field interviewing, ethical issues, and preliminary data analysis. Fieldwork and extensive field notes required. Letter grading.

106B. Field Research Methods II. (6) Lecture, two hours; discussion, two hours; fieldwork, 10 hours. Requisite: course 106A. Collection and analysis of both field notes and unstructured interview data from student field placement. Use of techniques of qualitative data analysis, including qualitative coding, analytic memoing, and grounded theory methods, to analyze these materials and to write ethnographic paper. Letter grading.

110. Sociohistorical Methods. (4) Lecture, three hours; discussion, one hour. Designed for juniors/ seniors. Study of general principles of scientific research: generalization, inference, and verification and particular problems of historical specification, comparison, and counterfactual reasoning in constructing and testing replaceable explanation of historical event. P/NP or letter grading.

111. Social Networks. (4) Lecture, three hours; laboratory, one hour. Analysis of how social networks create social structure, how social actors utilize them, and their unexpected effects. Topics include job search, firm efficiency, and social movements. Visual- ization programs, computer simulations, and research project. P/NP or letter grading.

112. Introduction to Mathematical Sociology. (4) Lecture, three hours; laboratory, one hour. Requisites: Mathematics 2, 3A (course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus), Statistics 10. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Letter grading.

113. Statistical Methods for Social Research. (4) Lecture, three hours; laboratory, one hour. Requisite: Statistics 10. Continuation of Statistics 10, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies. Students learn how to use computer and write papers analyzing prepared data sets. P/NP or letter grading.

114A-114B. Introduction to Scientific Sociology. (4-4) Lecture, three hours; discussion, one hour. How to make testable arguments about social reality and how to test those arguments in context of study of social stratification, and ethnic and gender inequality. Introduction to elementary, robust analytic tools. P/NP or letter grading.

M115. Environmental Sociology. (4) Same as Environment M133.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis in detail of interrelations between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

117. Family Demography. (4) Lecture, three hours; discussion, one hour. Examination of demographic behaviors, such as marriage, divorce, and childbear- ing, associated with family and household organization. Sociological approach to understanding causes and consequences of trends and differentials in family formation and dissolution. P/NP or letter grading.

M118. Simulating Social Artificial Communities. (5) Same as Honors Colloquium M148.) Seminar, three hours; computer laboratory, one hour. Examination of social behavior through computer simulations of behavior in artificial communities. P/NP or letter grading.

119. Primeate Societies. (4) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Select- ed topics on diverse behaviors and cultural forms of primates, with special focus on chimpanzees, chim- panzees, and gorillas. Examination of primate soci- oecology, sexual competition, demography and kinship, politics, communication, and interactions within and between groups. Implications for our lives as human primates. P/NP or letter grading.

M124A-M124B. Conversational Structures I, II. (4-4) (Formerly numbered CM124A-CM124B.) (Same as Communication Studies M144A-M144B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. M124A. Introduction to some structures that are employed in organization of conversational interac- tion such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. M124B. Requisite: course M124A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations. CM125. Talk and Social Institutions. (4) (Same as Communication Studies M125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course C256P. P/NP or letter grading.

126. Study of Norms. (4) Lecture, three hours; discussion, one hour. Properties of norms, of normative- ly governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required. P/NP or letter grading.

127. Mind and Society. (4) Lecture, two and one-half hours; discussion, one hour. Requisite: course 1. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extra-ordinary contexts. P/NP or letter grading.

128. Sociology of Emotions. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. De- signed for juniors/seniors. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual ex- pression of emotions on social conditions; relations between thought, sensations, and emotions; self and emotions; social construction of emotions. P/NP or letter grading.

129. Sociology of Time. (4) Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, and sociological perspectives; “cyclical” and “linear” time in primitive, ancient, and medieval societies; ritual, the sacred, and the ceremonial; social construction of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination. P/NP or letter grading.

130. Self and Society. (4) Lecture, three hours; discussion, one hour. Examination of social processes shaping experience, definition, and enactment of self and personal identity. P/NP or letter grading.
132. Social Psychology: Sociological Approaches. (4) Lecture, three hours; discussion, one hour. Survey of contribution of sociologists to theory and research in social psychology, including theories of social influence; conformity and deviation; reference groups; and interaction processes. P/NP or letter grading.

133. Collective Behavior. (4) Lecture, three hours; discussion, one hour. Course 1. Designed for juniors/seniors. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social structures. P/NP or letter grading.

134. Culture and Personality. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior. P/NP or letter grading.

135. Group Processes. (4) Lecture, three hours; discussion, one hour. Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from variety of theoretical viewpoints; implications of various research techniques. P/NP or letter grading.

M138. Death, Suicide, and Trauma. (4) (Same as Psychology M159.) Lecture, three hours; discussion, one hour. Sociological analysis of incidence of violent death. Suicide is eighth leading cause of death in U.S. and third leading cause for young people aged 15 to 24. Both kinds of violent deaths are often dismissed as extreme psychopathology, reflecting individual mental health issues. Sociologists argue that suicide and homicide are social facts. Suicide and homicide do not occur randomly in society but are stratified according to social factors such as age, gender, race, sexual orientation, and class. Analysis of this sociological argument and evaluation of explanatory power of different theories to make sense of violent death, paying particular attention to forensic and medicolegal system to determine suicide and solve homicides. Review of historic and contemporary studies to examine how research and conceptualizations of suicide and homicide have changed, as well as social responses to these phenomena. P/NP or letter grading.

M142. Health Care in Transitional Communities. (4) (Same as Public Health M151.) Lecture, three hours; discussion, one hour. Analysis of social, cultural, economic, and political processes affecting organization and accessibility of healthcare in transitional and disadvantaged communities. Fieldwork required. Letter grading.

145. Sociology of Deviant Behavior. (4) Lecture, three hours; discussion, one hour. Examination of leading sociological approaches to study of deviation and general survey of major types of deviation in American society. P/NP or letter grading.

C146. Sociology of Interpersonal Conflict. (4) Lecture, three hours; discussion, one hour. Origins, development, and outcomes of interpersonal conflicts and troubles that arise in close relationships, households, workplaces, and public places in contemporary societies. Concurrently scheduled with course C229A. Letter grading.

147A. Sociology of Crime. (4) Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and development of crime and criminal behaviors. P/NP or letter grading.

147B. Sociology of Criminal Justice. (4) Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons. P/NP or letter grading.

149. Youth, Trouble, and Juvenile Justice. (4) Lecture, three hours; discussion, one hour. Examination of processes through which youth become involved in juvenile justice system. Analysis of this system as people-processing and people-changing institution as context for considering critical issues in juvenile justice. P/NP or letter grading.

M150. Sociology of Aging. (4) (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of aged; caregiving relations and institutions; professions concerned with aged and aging. Letter grading.

151. Comparative Immigration. (4) Lecture, three hours; discussion, one hour. Survey of immigration of Europeans, Asians, and Hispanics to the U.S. since the 19th century. Emphasis on ethnonational-racial groups that migrated voluntarily to this country, with emphasis on immediate postimmigration settling patterns. P/NP or letter grading.

152. Comparative Acculturation and Assimilation. (4) Lecture, three hours; discussion, one hour. Requisite: course 151. Comparison of acculturation and assimilation of Europeans, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

M153. Chinese Immigration. (4) (Same as Asian American Studies M130C.) Lecture, three hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with social environment. P/NP or letter grading.

154. Race and Ethnicity: International Perspectives. (4) Lecture, three hours; discussion, one hour. Not open to freshmen. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S. P/NP or letter grading.

M155. Latinos in U.S. (4) (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as particular emphasis on their location in larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

156. Race and Ethnicity in American Life. (4) Lecture, three hours; discussion, one hour. Role of race and ethnicity in the U.S., including interplay between racial and ethnic structures and meanings. Special attention to comparison of African American and European American experiences and to transformation of Asian American and Latino communities and the nation generally, brought by renewal of mass migration in second half of 20th century. P/NP or letter grading.

157. Social Stratification. (4) Lecture, three hours; discussion, one hour. Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology. P/NP or letter grading.

158. Urban Sociology. (4) Lecture, three hours; discussion, one hour. Description and analysis of urbanization and urbanism in the U.S. and world. P/NP or letter grading.

159. Comparative Studies of Jewish Communities in the U.S. and Abroad. (4) Lecture, three hours; discussion, one hour. History and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelationships and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required. P/NP or letter grading.

160. Intergroup Conflict and Prejudice. (4) Lecture, three hours; discussion, one hour. Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimination. Special attention to alternative sociological and psychological theories of prejudice; effects of minority status on individuals; and possibilities for attitude and behavior change. P/NP or letter grading.

M161. Comparative American Indian Societies. (4) (Same as American Indian Studies M161.) Lecture, three hours; discussion, one hour. Requisite: course 1 or American Indian Studies M160. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies. Letter grading.

M162. Sociology of Gender. (4) (Same as Women's Studies M162.) Lecture, three hours; discussion, one hour. Requisite: course 1 or Women's Studies 10. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender roles in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Women's Studies M163.) Lecture, three hours. Requisite: course 1 or Women's Studies 10. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.

M164. Politics of Reproduction. (4) (Same as Women's Studies M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, and new reproductive technologies. Letter grading.

M165. Sociology of Race and Ethnicity. (4) (Same as Afro-American Studies M165 and Labor and Workplace Studies M165.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Exploration of relationship between race/ethnicity, employment, and health. Examining race and employment in terms of racial divisions in workforce and how they evolved historically. Consideration of circumstances under which workers and unions have excluded people of color from jobs and unions, as well as circumstances under which workers and unions have organized people of color into unions in efforts to improve their wages and working conditions. Impact of globalization on these dynamics. P/NP or letter grading.

M166. Women in Socialist and Post-Socialist States. (4) (Same as Women's Studies M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender differences are everywhere central to democratization and marketization. Discussion of ways in which state policies affect women. Letter grading.

168. Organizations and Society. (4) Lecture, three hours; discussion, one hour. Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and research on behavior of organizations in society. P/NP or letter grading.
169. Law and Society. (4) Lecture, three hours; dis-
cussion, one hour. Specific topics may include law in
preindustrial and industrialized societies, legalization of
certain social relations, participants' experienc-
es of legal processes, lay perceptions of justice, social
movements toward equal justice, roles of lawyers and
dentists, social impact of court decisions. P/NP or letter
grading.

170. Medical Sociology. (4) Lecture, three hours;
discussion, one hour. Requisite: course 1. Provides
majors in Sociology and other social sciences, as well
as students preparing for health sciences careers, with
understanding of health-seeking behavior and in-
terpersonal and organizational relations that are in-
volved in receipt and delivery of health services. P/NP
or letter grading.

171. Occupations and Professions. (4) Lecture,
three hours; discussion, one hour. Description and
analysis of representative occupations and profes-
sions, with emphasis on contemporary U.S. P/NP or
letter grading.

172. Entrepreneurship. (4) Lecture, three hours;
discussion, one hour. Requisite: course 1. Description
and analysis of entrepreneurship, with special refer-
ence to historical origins, ideology, international com-
parisons, women and ethnic minority participation, le-
gal and illegal forms, public and private auspices. P/NP
or letter grading.

173. Economy and Society. (4) Lecture, three
hours; discussion, one hour. Sociology of economic
life, with emphasis on principal economic institutions
of the U.S. P/NP or letter grading.

M174. Sociology of the Family. (4) Same as Wom-
en's Studies M174.) Lecture, three hours; discussion,
one hour. Theory and research dealing with modern
family, its structure, and functions, including historical
changes, variant family patterns, family as an institu-
tion, and influence of contemporary society on the
family. P/NP or letter grading.

M175. Sociology of Education. (5) Same as Edu-
cation M108.) Lecture, four hours; discussion, one
hour. Study of how U.S. educational system both pro-
motes socioeconomic opportunities and maintains
socioeconomic inequalities: historical and theoretical
perspectives on role of education in U.S. society;
trends in educational attainment; ways in which family
background, class, race, and gender affect education-
al achievement and attainment; stratification between
and within schools; effects of education on socioeco-
omic attainment, family, health, attitudes, and social
participation; educational policies to improve school
quality and address socioeconomic inequalities. Let-
ergardening.

M176. Sociology of Mass Communication. (4)
(Same as Communication Studies M147.) Lecture,
four hours; discussion, one hour (when scheduled). Studies in relationship between mass communication and social organization. Topics include history and or-
ganization of major media institutions, social forces
that shape production of mass media news and enter-
tainment, selected studies in media content, and ef-
ects of media on society. P/NP or letter grading.

M178. Sociology of Caribbean. (4) (Same as Afro-
American Studies M178.) Lecture, three hours; dis-
cussion, one hour. Requisite: course 1. Historical and
histori-
cal sociology of Caribbean, with emphasis on colo-
nialism and decolonization, development and under-
development, race-making institutions and evolution of
race relations, migrations, and the P/NP or letter
grading.

179. Comparative East Asian Societies. (4) Lec-
ture, three hours; discussion, one hour. Designed for
juniors/seniors. Introductory and comparative survey of
traditional societies of East Asia, including China,
Japan, Korea, and Vietnam, with focus on dynamic in-
teractions between culture, state, and society in pro-
cess of change. P/NP or letter grading.

180A-180Z. Special Topics in Sociology. (4 each)
Lecture, three hours; discussion, one hour. Limited to
juniors/seniors. Study of selected topics of sociologi-
cal interest. Consult Schedule of Classes for topics
and instructors. May be repeated for credit and may
be applied as elective units toward Sociology major.
P/NP or letter grading.

181. State and Society in China. (4) Lecture,
three hours; discussion, one hour. Designed for junior/se-
niors. Thematic overview of post-1949 society and
politics in China, with emphasis on long-term evolu-
tion of China's state and society from 1949 to present.
P/NP or letter grading.

182. Political Sociology. (4) Lecture, three hours;
discussion, one hour. Contributions of sociology to
study of politics, including analysis of political aspects
of social systems, social context of action, and social
bases of power. P/NP or letter grading.

183. Comparative and Historical Sociology. (4)
Lecture, three hours; discussion, one hour. Requisite:
course 1. Survey of central themes of comparative
and historical studies in sociology. Various aspects of
development of modern society, including develop-
ment of nation-state, emergence of capitalism, indus-
trialization, and population growth. Variation in con-
temporary social relations, factors of individuality and
context of theoretical perspectives. P/NP or letter grading.

184. Social Change. (4) Lecture, three hours;
discussion, one hour. Study of patterns of social change,
resistance to change, and change-producing agen-
cies and processes. P/NP or letter grading.

185. American Society. (4) Lecture, three hours;
discussion, one hour. Analysis of major institutions in the
U.S. in historical and international perspective, with
emphasis on topics such as industrialization, work,
state, politics, community, family, religion, and Ameri-
can culture. Theories of social change, conflict, and or-
der applied to case of the U.S. P/NP or letter grading.

186. Latin American Societies. (4) Lecture,
three hours; discussion, one hour. Social structure and
social conflict in Latin America, with special attention
to racial and class structures and dilemmas of economic
and political development. Country and specific focus
varies each term. P/NP or letter grading.

187. Population and Society in Middle East. (4)
Lecture, three hours; discussion, one hour. Designed
for juniors/seniors. Survey of Middle Eastern societ-
es; their historic and environmental bases; contem-
porary demographic and cultural situation. P/NP or
letter grading.

191A. Undergraduate Seminar: Self and Identity.
(5) Seminar, three hours. Limited to juniors/senior So-
ciology majors. Examination of cultural, historical, and
interactional contexts shaping definition, enactment,
and experience of self. Reading, discussion, and de-
velopment of culminating project. Letter grading.

191B. Undergraduate Seminar: Sociology of Hu-
mor and Laughter. (5) Seminar, three hours. Lim-
ited to junior/senior Sociology majors. Selected topics.
Reading, discussion, and development of culminating
project. Letter grading.

191C. Undergraduate Seminar: Money and Emo-
tions. (5) Seminar, three hours. Limited to junior/se-
ior Sociology majors. Selected topics. Reading, dis-
cussion, and development of culminating project. Let-
ter grading.

191D. Undergraduate Seminar: Sociology of De-
velopment. (5) Seminar, three hours. Limited to Ju-
nior/seniors. Selected topics on development in third
world from global perspective. Reading, discussion,
and development of culminating project. Letter grading.

M191DC. CAPPP Washington, DC, Research Sem-
inars. (8) Same as History M191DC and Political
Science M191DC.) Seminar, three hours; laboratory,
24 hours. Limited to CAPPP Program students. Semi-
nars for undergraduate students in Center for Ameri-
can Politics and Public Policy's program in Washing-
ton, DC. Focus on development and execution of orig-
inal empirical research based on experiences from
Washington, DC-based field placements. Study of va-
riety of qualitative methods (observation, interviewing,
evaluation), and comparison to quantitative analysis. Ex-
amination of features of social and significant research;
in-intensive writing. Letter grading.

191E. Undergraduate Seminar: Population Growth
Models. (5) Seminar, three hours. Limited to juniors/
seniors. Selected topics. Reading, discussion, and de-
velopment of culminating project. Letter grading.

191F. Undergraduate Seminar: Sociology of Glo-
balization. (5) Seminar, three hours. Limited to ju-
nior/seniors. Great extension of social relations
across globe has occurred over last 50 years. What are
causes and mechanisms of this process, how far has it
transformed human societies, and how far will it go in
future? Economic, cultural, political, and military
aspects of globalization, extent to which global
expansion of capitalism, nation-state system, and Ameri-
can imperialism reinforce or undercut each other,
producing new lines of division and conflict across
world. Reading, discussion, and development of culminating project. Letter grading.

191G. Undergraduate Seminar: Chicago School of
American Sociology, Symbolic Interaction, and
Study of Race and Ethnicity in Cities — Historical
Perspective. (3) Seminar, three hours. Limited to ju-
nior/seniors. Review of work of Chicago School of
American Sociology, with emphasis on contributions of
Robert E. Park, W.I. Thomas, Ernest Burgess, and
George Herbert Mead. Reading, discussion, and de-
velopment of culminating project. Letter grading.

191H. Honors Seminars: Sociology. (4) Seminar,
three hours. In-depth introduction to process of pro-
ducing scholarly sociological research for students
who intend to write undergraduate thesis for depart-
mental honors. Letter grading.

191I. Undergraduate Seminar: Health and Inequal-
ity. (5) Seminar, three hours. Limited to juniors/se-
niors. During past century, social inequalities in health
and survival were widening in the U.S. as in other de-
veloped societies. Broad overview of these trends and
their causes. Reading, discussion, and develop-
ment of culminating project. Letter grading.

191J. Undergraduate Seminar: Mexican Society.
(5) Seminar, three hours. Selected topics on contem-
porary Mexican society and vital transformations it has
undergone in recent years. Reading, discussion, and de-
velopment of culminating project. Letter grading.

191K. Undergraduate Seminar: Cigarettes and
Western Civilization — Sociological History of
Smoking. (5) Seminar, three hours. Limited to ju-
nior/seniors. Use of history of tobacco and cigarette
smoking to explore important themes in sociology,
history, and culture. History of tobacco from its roots
in Native American culture, its contribution to founda-
tion of European colonies in New World, its cultural
incorporation in Western Europe, its role in rise of indus-
trial way of life and health consequences, and its de-
mise as legitimate soft drug for modern urban people.
Letter grading.

191L. Undergraduate Seminar: Environmental
Justice and Sustainability. (5) Seminar, three
hours. Limited to juniors/seniors. Sociological ap-
proach to study of environmental issues and prob-
lems. Topics include ecological politics and ecocentrism,
environmental racism, global environmental change,
sustainable development, and society-environment
interface. Reading, discussion, and development of culminating project. Letter grading.
191M. Undergraduate Seminar: Social Ecology. (5) Seminar, three hours. Limited to juniors/seniors. Fundamentals of sociological approach to social ecology, also known as human ecology. Study of adaptation of population to its environment. Topics include density, maintaining personal space, space and territoriality, and effects of environment on humans. Reading, discussion, and development of culminating project. Letter grading.

C191N. Undergraduate Seminar: Urban and Suburban Sociology. (5) Formerly numbered 191N.) Seminar, three hours. Limited to juniors/seniors. History and present condition of cities and suburbs in America, with stress on global cities such as New York and Los Angeles, and comparisons to London and Shanghai. Process of suburbanization as it began in early 19th century and still continues. Analysis of city politics, house and architectural styles, crime, urban terror, public housing and ghettos, segregation and integration of neighborhoods, questions of gentrification, immigration, urban culture (especially art, museums, and movie and music industries), and environmentalism. Concurrently scheduled with course C297. Letter grading.

191P. Undergraduate Seminar: Communication in Medical Care. (5) Seminar, three hours. Limited to juniors/seniors. Sociology dimensions of patient care in primary care context. Use of microsociological methods to examine main facets of American primary care medical visits, including detailed analysis of interactional conduct of those visits and development of microanalytical contracts into quantifiable measures. Emphasis on direct contact with empirical materials and development of observational and analytic skills. Reading, discussion, and development of culminating project. Letter grading.

191T. Undergraduate Seminar: War and Society. (5) Seminar, three hours. Limited to juniors/seniors. Study of relationship between military and its socio-organization in general, with particular attention to shock-based civic militarism characteristic of the West. Topics include honor, discipline, bureaucracy, conscription, logistics, total war, guerilla war, terrorism, and propaganda. Reading, discussion, and development of culminating project. Letter grading.

194. Research Group Seminars: Sociology. (2) Seminar, two hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. May be repeated for credit. P/NP grading.

M194DC. CAPPP Washington, DC, Research Seminars. (4) Same as History M194DC and Political Science M194DC.) Seminar, four hours. Limited to junior/senior CAPPP Program students. Internships in Washington, DC, for undergraduate students in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparative and historical analysis, examination of features of solid and significant research; intensive writing. Letter grading.

195. Community or Corporate Internships in Sociology. (4) Tutorial, three hours. Limited to juniors/seniors. Internship in community agency or business to be supervised jointly by Center for Community Learning and faculty adviser. Students meet on regular basis with instructor and provide weekly reports of their experience. Normally only 4 units of internship are allowed. Individual contract with supervising faculty member required. P/NP or letter grading.

M195DC. CAPPP Washington, DC, Internships. (4) Same as History M194DC and Political Science M194DC.) Tutorial, four hours. Limited to junior/senior CAPPP Program students. Internships in Washington, DC, for Center for American Politics and Public Policy. Students meet on regular basis with instructor and provide periodic reports of their experience. Individual contract with supervising faculty member required. P/NP grading.

199. Directed Research in Sociology. (2 to 4) Tutorial, one hour. Preparation: 3.0 grade-point average in major. Requisites: courses 1, M18. Limited to junior/senior Sociology majors. Independent intensive study designed for students who want to do research under guidance of faculty mentor. Scheduled meetings to be arranged between faculty member and student. Culuminating paper or project required. May be repeated for maximum of 8 units with no more than 4 in any one term. Individual contract required; see undergraduate counselor. P/NP or letter grading.

Graduate Courses

201A-201B-201C. Proseminars: Sociology. (2-2-2) Seminar, two hours every other week. Required of first-year graduate sociology students. Introduction to range of theoretical and research interests represented by department faculty members. S/U grading.

202A-202B. Theory and Research in Sociology. (4-4) Lecture, two hours; discussion, two hours. Required of first-year graduate sociology students. Examination of potential research interests in population, method, and substance in exemplary sociological works, with analytical and skills-centered orientation. In Progress (202A) and S/U or letter (202B) grading.

204. Topics in Sociological Theorizing. (4) Seminar, four hours. Examination of selected issues and problems in classical or contemporary sociological theory. S/U or letter grading.

205. Family and Social Change. (4) Lecture, three hours. Examination of sources of change in family and household organization, with major focus on relationships among economic institutions, family structure, and content of family life. Consideration of concepts, theories, and data about kinship. S/U or letter grading.

M206. Understanding Fertility: Theories and Methods. (4) Same as Community Health Sciences M222.) Lecture, three hours. Preparation: one formal or social demography course. Requisite: Biostatistics 100A. Application of demographic theories and methods to describe fertility trends and differentials and social and proximate determinants of fertility, with emphasis on understanding key proximate determinants. For advanced students interested in population demography of health, and social demography. Letter grading.

210A-210B. Intermediate Statistical Methods I, II. (4-4) Lecture, three hours; discussion, two hours. Intermediate statistical methods using computers; probability theory, sampling distributions, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. S/U or letter grading.

210C. Intermediate Statistical Methods III. (4) Lecture, four hours. Requisite: course 210B. Survey of advanced statistical methods used in social research, with focus on problems for which classical linear regression model is inappropriate, including categorical data, structural equations, longitudinal data, incomplete and erroneous data, and complex samples. S/U or letter grading.

211A-211B. Comparative and Historical Methods. (4-4) Lecture, three hours. In Progress (211A) and S/U or letter (211B) grading. 211A. Strategies of Research and Conceptualization. Topics include relationship of theory and fact to social science. Logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. 211B. Research Techniques. Requisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

212A-212B. Quantitative Data Analysis. (4-4) Lecture, three hours. Requisites: courses 210A, 210B. Course 212A is enforced requisite to 212B. Analysis and interpretation of primarily nonequivalent experimental data, with focus on sample survey and census data. Extensive practice at utilizing statistical methods encountered in previous courses, culminating in term paper in style of American Journal of Sociology or similar journal article. Topics include simple tabular analysis, log-linear analysis, ordinary least squares regression, robust regression, binomial and multinomial logit regression, and scale construction. Logic of analysis and problems of statistical inference, including diagnostic procedures and methods for handling complex sample survey designs. In Progress (212A) and S/U or letter (212B) grading.

227. Sociology of Knowledge. (4) Lecture, three hours. Designed for graduate students. Survey of theoretical and empirical research concerning systems of knowledge and role of intellectual and artistic elites in Western societies. S/U or letter grading.

228. Critical Issues in Macrosociology. (4) Formerly numbered 228A. Lecture, three hours. Conceptual introduction to area of macrosociology in which exemplary works are read, studied for substance and method, and criticized in seminar and in written papers. S/U or letter grading.

229A. Sociology of Interpersonal Conflict. (4) Lecture, three hours; discussion, two hours. Origins, development, and outcomes of interpersonal conflicts and troubles that arise in close relationships, households, workplaces, and public places in contemporary societies, currently studied with course 1416E. Letter grading.

229B. People-Processing Institutions. (4) Lecture, three hours; discussion, two hours. Course C229A is not requisite to this course. Theoretical and empirical studies of cooperation and decision-making processes of variety of people-processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Letter grading.

230A-230B. Comparative Ethnicity, Race, and Nationalism. (4) Seminar, three hours. Preparation for independent research in area of comparative ethnicity, race, and nationalism through close reading of key theoretical and empirical works. S/U or letter grading.

230C. Comparative Ethnicity, Race, and Nationalism. (4) Seminar, three hours. Introduction to comparative and historical sociology of race and ethnicity to demonstrate merits of double comparative approach to race, one that strives to be as comparative at level of theory (attending to relationship between race and other forms of social classification, including ethnicity and nationalism) as it does at level of reseach. Exploration of cases from wide variety of countries, including Australia, Brazil, Colombia, Dominican Republic, Haiti, Mexico, modern China, modern Japan, Nazi Germany, Nicaragua, Rwanda, South Africa, Sudan, and Turkey. Letter grading.

230D. Social Policy and the Social Order. (4) Lecture, three hours. Nature of social structure and how it affects relation of class structure to politics and political power. Issues are analyzed and contextualized such as gender, age, race, and nationalism. Examination of contemporary “globalization” tendencies of capitalism. Letter grading.

233. Seminar: Theory and Research in Comparative Social Analysis. (2) Lecture, one hour; discussion, two hours. Preparation for seminar C239A. Analysis of current theoretical debates of the field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in the field. S/U or letter grading.

236A. (4) Lecture, three hours. Comprehensive overview of key current theoretical debates in study of international migration, with emphasis on exploring both theoretical debates of the field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in the field. S/U or letter grading.

236B. (4) Lecture, three hours. Further exploration of key current theoretical debates in study of international migration, with emphasis on exploring both theoretical debates of the field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in the field. S/U or letter grading.

237. Seminar: Theory and Research in Comparative Social Analysis. (2) Seminar, two hours. Designed for graduate students. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and Third World, and implications for theory construction and social research. S/U grading.

238. Feminist Theory. (4) (Same as Women’s Studies M238.) Lecture, three hours. Designed for graduate students. Analysis of key feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminists and/or feminists of color, feminist scholars from other countries, and recent “antifeminist” feminists. Discussion of directions for future feminist sociology. Letter grading.

239A-239B. Quantitative Research on Social Stratification and Social Mobility. (4-4) Lecture, three hours; discussion, two hours. Course C239A is not requisite to this course. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress (239A) and letter (239B) grading.

241. Theories of Gender in Society. (4) Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; why gender is absent from classical macrosociology; can masculinist paradigms make space for gender or does feminist-informed sociology necessitate fresh approach? S/U or letter grading.

M242. Analysis of Data with Qualitative and Limited Dependant Variables. (4) (Same as Statistics M242.) Lecture, three hours. Requisites: courses 210A and 210B, or Statistics 100A, 100B, and 100C. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

244A-244B-244C. Conversation Analysis. (6) Formerly numbered C244A-C244B.) Lecture, three hours; discussion, two hours. S/U or letter grading. 244A. Introduction to some structures basic to the study of conversational microstructure, to interaction of possibilities of comparative (historical and cross-national) research program in field, linking North American, European, and other global experiences of immigration. S/U or letter grading.

244B. Lecture, three hours. Further exploration of key current theoretical debates in study of international migration, with emphasis on exploring both theoretical debates of the field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in the field. S/U or letter grading.

244C. Lecture, four hours. Introduction to some structures basic to the study of conversational microstructure, to interaction of possibilities of comparative (historical and cross-national) research program in field, linking North American, European, and other global experiences of immigration. S/U or letter grading.

M210. Introduction to Demographic Methods. (4) (Same as Biostatistics M208, Community Health Sciences M208, and Economics M208.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

M213B. Applied Event History Analysis. (4) (Same as Statistics M213.) Lecture, three hours. Preparation: to binary response models. Requisites: courses 210A, 210B. Introduction to regression-like analyses for “time to event” data. Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; nonproportional hazards; parametric survival models; hazard processes; multilevel survival models. S/U or letter grading.

216A-216B. Survey Research Design. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 210A. History of survey method; facet metatheory and concept formation: questionnaire and item design; scales, indices typologies; data collection — planning and management; network, snowball, and experience sampling processes; sampling, strati- fication and clustering. Students participate in survey research project. Letter grading.

217B-217C. Ethnographic Fieldwork. (4-4) Seminar, three hours. Recommended requisite: course 217A. Theories and techniques of ethnographic field- work. Kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethinical problems involved in such research. In Progress (217B) and letter (217C) grading.

220. Self and Society. (4) Lecture, three hours. Examination of social processes shaping definition and experience of the self, embodied interactional practices through which the self is constructed in everyday and institutional contexts, formation and transformation of self during life course, and construction of self in society. Letter grading.

223. Phenomenological and Interactionist Perspectives on Selected Topics. (4) Lecture, three hours. Comparison of phenomenological and symbolic and perspectives by examining particular body of live or current research that addresses relevant substantive issues. Topics vary: attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between approaches. When relevant, attention to logical and historical relations of phenomenolo- gy and interactionism of pragmatist, existentialist, and ordinary language philosophers. S/U or letter grading.
245. Cultural Sociology: Classical and Contempo-
rary Approaches. (4) Lecture, one hour; discussion,
two hours. Exploration of classical approaches to cul-
tural dimension of social life — Weberian, Durkheimian,
Parsonian, and critical — and living traditions they have
spawned. Examination of contemporary efforts at con-
structing new cultural sociology. Theoretical focus, with
consideration of case studies. S/U or letter grading.

246. Sociology of Culture. (4) Seminar, three hours.
Theoretical and methodological issues in structural
approaches to culture. Perspectives include cultural
economics, political economy, and production of cul-
ture. S/U or letter grading.

247. Sociology of Emotions. (4) Lecture, two hours;
discussion, one hour. Designed for graduate students.
Sociological theories of emotional expression; experi-
ential approaches to emotions: motivational, cognitive,
psychophysiological, and behavioral; repression, so-
cial oppression, and emotions; creativity and ex-
pressed affect; thought, sensations, and emotions;
specific emotions; cultural differences in emotional ex-
pression; measurement of emotions. Letter grading.

248. Selected Topics in Culture and Society. (4)
Seminar, three hours. Designed for graduate students.
Seminar on selected topics on culture and society.
Consult Student for topics and instructors. May be repeated for credit. S/U or letter grading.
M249A. Health Professions. (4) Same as Commu-
ity Health Sciences M274.) Lecture, three hours.
Requisite: Community Health Sciences 210. Soci-
ological examination of concepts "health" and "illness"
and role of various health professionals, especially
physicians. Attention to meaning of professionaliza-
tion and professionalclient relationships within range
of organizational settings. Letter grading.

249B. Health and Illness Behavior. (4) Same as Commu-
ity Health Sciences M275.) Seminar, three hours.
Designed for graduate students. Seminar dis-
cussion based on readings on medicalization, health promotion as moral enterprise and consumerism, and preoccupation with body. S/U or letter grading.

250. Sociology of Health. (4) Seminar, three hours.
Exploration of literature of human health as product of
society. Macro focus and micro focus used to examine
relevance of macro organizational features of national
society (culture, economy, politics) while maintaining
awareness of micro pathways that link these wider in-
fluences to personal experience (mind, body, emo-
tion). Main focus on modern industrial societies and
organized around many of the major health issues in sociology of
health. S/U or letter grading.

M252. Selected Topics in Sociology of Gender. (4)
(Same as Women's Studies M252.) Lecture, two hours;
discussion, two hours. Designed for graduate
students. Seminar on selected topics in sociology of
gender. May be repeated for credit. Letter grading.

254. Human Capital, Social Capital, and Cultural
Capital. (4) Lecture, three hours. Designed for gradu-
ate students. Intellectual history of these concepts,
points of difference and similarity among these con-
cepts, current exemplars of research that utilize these
concepts, and critical reflection on research traditions.
Letter grading.

M255. Cross-Cultural Perspectives on Gender. (4)
(Same as Women's Studies M255.) Seminar, three hours.
How does gender manifest itself in lives of dif-
erent groups of women in U.S. and abroad? Are uni-
versal analytical categories or unified feminist move-
ments possible in an era of gender too different cross-cultur-
ally? S/U or letter grading.

256. Demography. (4) Lecture, four hours. S/U or let-
er grading.

257. Demography of Marriage Formation and Dis-
solution. (4) Dis charged. Requisite: course 210A. Extensive and intensive critical exami-
nation of major approaches to analysis of marriage
formation and dissolution, with focus primarily on de-
mographic literature. S/U or letter grading.

C258. Talk and Social Institutions. (4) Lecture, four
hours; discussion, one hour. Practices of communica-
tion and social interaction in nature of major institu-
tional sites in contemporary society. Setting varies but
may include emergency services, police and courts,
medicine, news interviews, and political oratory. Con-
currently scheduled with course CM125. S/U or letter grading.

259. Social Structure and Economic Change: His-
torical and Comparative Perspectives. (4) Lec-
ture, four hours. S/U or letter grading.

260. Economy and Society. Discussion, two hours.
(4) Discussion, two hours. Recommended for gradu-
ate students. Review and critique of major analytical
traditions in economy and society. S/U or letter grading.

or letter grading.

M262. Selected Problems in Urban Sociology. (4)
(Same as Afro-American Studies M200C.) Seminar,
three hours. S/U or letter grading.

263. Social Demography of Los Angeles. (4)
(Same as Community Health Sciences M263.) Lec-
ture, three hours. Requisites: courses 110 and 220. Use of
of Los Angeles to examine major social and
demographic factors that characterize cities in the
U.S. Examination of role of these factors in affect-
ing health outcomes.

265. Problems in Organization Theory. (4) Lec-
ture, four hours. S/U or letter grading.

266. Selected Problems in Analysis of Conversa-
tion. (4) Lecture, three hours. Requisites: courses
244A, 244B. Variable topics/format course. Consult
instructor for topic each semester. Selection of topics
to be offered in spe-
cific term. May be repeated for credit with topic change.
S/U or letter grading.

268. Selected Problems in Psychoanalytic Sociol-
y (4) Discussion, three hours. Recommended prepara-
tion: at least one year of methods courses. Selected
problems in interpretation of sociology and
psychoanalysis, which may be substantive (group de-
velopment, socialization, culture, deviance, collective
behavior) or methodological: latter focuses on clinical
workshop and experimental use of psychoanalytic and
sociological techniques. S/U or letter grading.

M269A-M269B-M269C. Relationship Science Fo-
rums. (2-2-2). (Same as Anthropology M285A-
M295B-M295C, Education M298A-M298B-M298C,
and Psychology M237A-M237B-M237C.) Seminar,
90 minutes. Limited to graduate students. Current re-
search and theory about personal relationships pre-

de nt ed by members of seminar, faculty members,
and guest speakers from diverse fields, including
anthropology, education, psychology, and sociology.
May be repeated for credit. S/U or letter grading.

M270. Interdisciplinary Relationship Science. (4)
(Same as Anthropology M295S, Education M297,
and Psychology M237S.) Lecture, three hours. Limited
to graduate students. Diverse approaches to relation-
ship science in fields of anthropology, education, psy-
chology, and sociology. Focus on theme of under-
standing biological, behavioral, and cultural aspects
of relationships through diverse theoretical and meth-
odological approaches. Use of the concept of in-
terpersonal relationships, including relationships such
as parent-child, teacher-student, sibling, peer, kin,
romantic relationships, marriages, and friendships. S/U
or letter grading.

272. Topics in Political Sociology. (4) Lecture,
four hours. S/U or letter grading.

(Same as American Indian Studies M200C and
Anthropology M295.) Seminar, three hours. Introduc-
tion to most important issues facing American Indians
as individuals, communities, tribes, and organizations
in contemporary world, building on historical back-
groud represented in earlier courses M200A and

276. Selected Topics in Sociology of East Asia. (4)
Lecture, three hours. Designed for graduate stu-
dents. Selected problems in sociological study of East Asia.
May include topics on China and Japan comparatively. Possible topics include (1) Chi-

278. Sociology of Latin America. (4) Lecture,
two hours. Designed for graduate students. Selected
topics in sociological study of Latin America. Possible topics include social movements,
ethnicity, and social development. Letter grading.

281. Selected Problems in Mathematical Sociolo-
y. (4) Lecture, three hours. Exploration of some
mathematical models of sociological processes. Pos-
sible topics include models of small groups, sexual
mobility, kinship relations, organizations, social inter-
action. S/U or letter grading.

282. Sociology of Medicine. (4) Seminar, three
hours. Review of major concepts and issues in sociol-
y of medicine. Topics include medicine, culture, and
historical and Comparative Perspectives. (4)

283. Communication in Medical Care. (4)
Seminar, three hours. Review and development of empirical
knowledge about doctor-patient relationship. Analysis
of nature and dynamics of routine office visits, with
focus on nature and role of norms in regulating doctor-
patient conduct, role of expertise and power in doctor-
patient relationship, and methodological questions concerning how doctor-patient relationship can be ana-
yzed. S/U or letter grading.

284. Topics in Mental Health and Illness. (4) Lec-
ture, two to three hours. Requisite: course 148. De-
signed for graduate students. S/U or letter grading.

285A-285Z. Special Topics in Sociology. (4 each)
Seminar, three hours. Designed for graduate stu-
dents. Seminars on selected current topics of socio-
logical interest. Consult Schedule of Classes for top-
ics and instructors. May be repeated for credit. S/U or letter grading.

287. Topics in Chinese Society. (4) Seminar, three
hours. Preparation: at least two upper division cours-
es on China in any social sciences discipline. Intro-
duction to current research questions in Chinese soci-
y, as well as major themes in study of Chinese society,
both historical and contemporary, including

demographic, economic, political, and social change
before and after 1949. S/U or letter grading.

288A-288B-288C. Mental Health Services for Per-
sonts with AIDS. (4-4-6) Lecture, four hours. De-
signed for graduate students. Analysis of current re-
search on mental health service systems for persons
with AIDS. S/U grading.

289A-289B. Practicum in Conversation Analysis.
(2-2) Requisites: courses 244A, 244B. S/U grading.
289A. Data Analysis. Laboratory, two hours. Practice
in analysis of conversational data. 289B. Developing
Work in Progress. Seminar, three hours. Opportunity
to advance research projects in progress and to de-
velop skills of constructive criticism in discussing work
of others.
South Asian Studies / 583

M290A-M290B. Immigration, Racial Change, and Education in 21st-Century Metropolis. (4-4) (Same as Education M289A-M289B, Political Science M287A-M287B, and Public Policy M289A-M289B.) Seminar, four hours. Examination of metropolitan American society and institutions at beginning of 21st century. Consideration of best available information on patterns of settlement, changing functions of urban space and institutions, and issues of opportunity linked to urban structure in society facing unprecedented demographic change that will end primarily European domination of our society by mid-century, creating democracy with no racial or ethnic majority. How this demographic transition and postindustrial transformation of urban functions and space interact to shape opportunity and inequality. Vast economic transformations, brought about by globalization of workplace and dramatic decline of industrial employment in advanced nations, not only greatly raise stakes on creating equal opportunity but also cut off what were previously extremely important parts of intergenerational mobility. In Progress (M290A) and letter (M290B) grading.

295. Working Group in Sociology. (1 to 4) Discussion, two hours. Variable topics, including sociology of gender; ethnography; social networks; race, ethnicity, immigration; and social demography and stratification. Advanced study and analysis of current topics in specialized areas of sociology. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M296A-M296B. Social Theory and Comparative History. (4-4) (Same as History M203A-M203B and Political Science M291A-M291B.) Seminar, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following program of Center for Social Theory and Comparative History. Each course may be taken independently for credit. S/U or letter grading.

M296C. Theories in Cultural History. (4) (Same as History M203C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material. Letter grading.

C297. Urban and Suburban Sociology. (5) Formerly numbered 297.) Seminar, three hours. History and present condition of cities and suburbs in America, with stress on global cities such as New York and Los Angeles, and comparisons to London and Shanghai. Process of suburbanization as it began in early 19th century and still continues. Analysis of city politics, house and architectural styles, crime, urban terror, public housing and ghettos, segregation and integration of neighborhoods, question of gentrification, immigration, urban culture (especially art, museums, and movie and music industries), and environmentalism. Concurrently scheduled with course C191N. Letter grading.

298. Workshop in Culture and Society. (4) Seminar, two hours every other week. Interdisciplinary workshop for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society, whether social, literary, or philosophical in nature. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

M402. Practices of Evaluation in Health Services: Theory and Methodology. (4) (Same as Health Services M422) Seminar, four hours. Requisites: Health Services 200A, 200B. Introduction to evaluation of health services programs and policies. Exposure to basic theoretical concepts and specific evaluation methodologies and designs. Letter grading.

485. Supervised Teaching in Sociology. (2 to 4) Seminar, two hours. Preparation: appointment as teaching assistant in Sociology Department. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Scope and Objectives

The minor in South Asian Studies seeks, through multidisciplinary approaches, to address the history and contemporary importance of South Asia, which is comprised of Sri Lanka, India, Pakistan, Nepal, Bhutan, Bangladesh, and the Maldives, and accounts for nearly 1.5 billion people.

Studying South Asia as a region exposes students to the rich historical, cultural, and religious diversity of a major center of civilization. South Asia is the birthplace of half of the world’s religions, including Buddhism, Hinduism, Sikhism, and Jainism. India, Pakistan, and Bangladesh together have more Muslims than the Middle East, and South Asian Islam, interacting with the other faiths of the subcontinent, has seen an efflorescence of philosophy, theology, poetry, and art.

South Asia is emerging as an important node in the global economy as a center of high technology and manufacturing. It is also important as a regional power, a contributor to world literature and film, and a seedbed for philosophy and social activism.

Undergraduate Study

South Asian Studies Minor

The South Asian Studies minor is designed for students who wish to augment their major with two additional South Asian studies courses. Students must complete a minimum of 20 units. Required courses include:

1. Required Lower Division Courses (10 units maximum): History 9A and completion of the third term of either Hindi (Hindi-Urdu 3 or 3R) or Sanskrit (South Asian 110C) or by demonstrated proficiency as determined by a placement examination.

2. Upper Division Courses (5 units): 30-40 units minimum. Five courses, with no more than two from any single discipline or department, to be selected from the following:

a. Asian American Studies, Women’s Studies
b. Asian Languages and Literatures

3. Required Upper Division Courses (20 units minimum): Five courses, with no more than two from any single discipline or department, to be selected from:

a. Art History
b. History

b. Asian American Studies, Women’s Studies
b. Asian Languages and Literatures

Variable or selected topics courses (e.g., Comparative Literature 191) fulfill minor requirements only when the content focuses substantially on South Asia. Other courses with substantial South Asian content of at least 50 percent (as determined by the course instructor) may be applied only with prior approval of
a petition filed with the academic counselor. Up to 12 units taken through a study abroad program may be applied toward the minor, though no more than 8 of the units may be applied toward the 20 units of upper division coursework.

Independent studies courses (197 or 199) may not be applied toward the minor. No more than one upper division course may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Scope and Objectives
The Southeast Asian Studies major and minor approach Southeast Asia as a region of deep local particularities and transregional engagements. This includes the study of present-day countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, the Philippines, Singapore, Brunei, and East Timor. This is a massively heterogeneous grouping of societies, ethnicities, languages, cultures, histories, and environments.

In addition to the prominence of the region in many recent international issues (democratization, the Cold War, decolonization, global capital flows, natural resource and environmental regulation, ethnic tensions, etc.), Southeast Asia is also a prominent site for reflection on enduring questions about culture and human diversity. Southeast Asia is taught as a region, with emphasis on the particular languages, cultures, politics, and topographies of individual nations, ethnic groups, subnational regions, and associations. Yet, it is nearly impossible to teach about any part of Southeast Asia without at least occasionally engaging a range of transregional connections that date back to ancient times. Historically, the peoples of Southeast Asia have been engaged with each other as well as with India and China, the Middle East, Europe, and the Americas and with global contexts of economics, politics, migrations, and communications. When approached from the point of view that holds Southeast Asia to be a locus of shifting transactions and human connections (rather than a reified and timeless region of common culture), the study of the region speaks powerfully to critical issues across many disciplines. Thus construed, Southeast Asian studies addresses major contemporary concerns in the humanities, social sciences, arts, business, the professions, government policy, and international affairs.

Undergraduate Study
Southeast Asian Studies B.A.
The major is designed for students who are deeply interested in the study of Southeast Asian languages, cultures, and societies. It requires the intermediate-level study of one Southeast Asian language, three lower division core courses on Southeast Asia as a region, and at least 14 upper division courses, including a capstone senior seminar. Majors are expected, whenever possible, to study for at least one term at a university in Southeast Asia.

Admission
To enter the major, students must (1) be in good academic standing (minimum 2.0 grade-point average), (2) have completed 45 units and at least one lower division core course in Southeast Asian studies, and (3) file a petition with the academic counselor in 10357 Bunche Hall. All interested students should meet with the counselor to discuss the program requirements.

Preparation for the Major
Required: History 9E, Southeast Asian Studies 1, 88; completion of six terms of either Filipino 1 through 6, Indonesian 1 through 6, Thai 1 through 6, or Vietnamese 1 through 6 or demonstrated proficiency as determined by a placement examination. Proficiency in other Southeast Asian languages may be accepted by petition, pending completion of a placement examination or approval of an alternative course of language study.

Transfer Students
Transfer applicants to the Southeast Asian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: either one course on Southeast Asia or one year of study of a Southeast Asian language (or demonstrated equivalent ability).

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: At least 14 upper division courses (56 units) must be completed, including 10 courses that must have substantial Southeast Asian content, as follows:

Three humanities and arts courses must be selected from Art History 114F, Ethnomusicology C159, 161B, 161H, 161M, Indonesian 100A, 100B, 100C, Southeast Asian 130, 135, 170A, 170B, 170C, Thai 100A, 100B, 100C, Theater 102B, Vietnamese 100A, 100B, 100C, World Arts and Cultures 112B. For Ethnomusicology 161B, 161H, and 161M to count as one 4-unit upper division course to be applied toward the major, any two of the courses may be taken once or any one course may be taken twice.

Variable or selected topics courses (e.g., Asian American Studies 191) fulfill major requirements only when the content focuses substantially on Southeast Asia or a subregion of it.

All majors must also successfully complete Southeast Asian Studies 191.

Three elective courses must be selected from the courses listed above and from those offered by the program. Other courses with substantial Southeast Asian content may be applied toward the major pending approval of a petition filed with the academic counselor.

Breadth and Methods Requirement
Four additional upper division courses on topics outside Southeast Asia must be taken to satisfy the breadth and methods requirement. The courses must be selected in consultation with and approved by the academic counselor. The requirement can be fulfilled by one of the following options:

1. Completing at least 16 units that focus on a single geographical region other than Southeast Asia (e.g., East Asia, South Asia, Europe, Middle East). All four courses must focus on the same country or region. This track provides students with an opportunity to analyze Southeast Asia from a comparative geographic perspective.

2. Completing at least 16 units with a single topic of study relevant to Southeast Asia (e.g., religion, economic development, gender studies, human rights, diasporic studies, popular culture). All four courses must concentrate on the same topic. This track provides students with an opportunity to view Southeast Asia from a comparative thematic approach.

3. Completing at least 16 units on subjects outside Southeast Asia from any one department (e.g., Anthropology, Art History,
Asian American Studies, Comparative Literature, History, Political Science, Sociology) whose methodology or discipline can be applied to the study of Southeast Asia. One of the courses should be a theoretical or methodological core course in the discipline. This track provides students with solid background in a particular field that can then be applied to the study of Southeast Asia.

At least one half the units required for the major must be in departments that offer undergraduate majors in the College of Letters and Science. Each course for the major must be taken for a letter grade and be successfully completed with a grade of C (2.0) or better. No more than two independent studies courses (197 or 199) may be applied toward the degree.

Study in Southeast Asia

Study in Southeast Asia for at least one term during the junior or senior year is highly recommended. The program considers study in Southeast Asia an important cultural experience and an opportunity to advance language proficiency, as well as a way to expand the range of formal classroom education.

The University of California operates Education Abroad Programs (EAPs) in several Southeast Asian countries. See http://www.ieo.ucla.edu/Eap/ for the current list. Students may apply to any of the UC-sponsored EAPs in Southeast Asia or they may petition to attend a university in Southeast Asia by making arrangements directly or by enrolling through another American university’s study abroad program.

Students majoring or minoring in Southeast Asian Studies who attend an EAP are eligible to earn course credit (4 units) toward the upper division requirements by successfully completing Southeast Asian Studies 180, when offered, for a letter grade after they return to UCLA. The principal assignment in course 180 is to write a paper based on field experience or research collected while in Southeast Asia or to produce a creative work (fiction, memoir, art, performance) of equivalent note.

Honors Program

The honors program is designed to offer highly motivated Southeast Asian Studies majors the opportunity to design and conduct their own independent research under the guidance of a faculty adviser and consists of a three-term directed-study series of courses — Southeast Asian Studies 198A, 198B, 198C — culminating in an honors thesis.

Admission

To enter the honors program, students must (1) have completed Southeast Asian Studies 1 and 88, (2) have a 3.5 grade-point average in the major and a 3.5 overall GPA, and (3) obtain agreement from a faculty member to supervise their honors thesis. Application should normally be made during the junior year, after students have completed more than 90 units of coursework. Consult the academic counselor for further details about the application, thesis requirements, and rules regarding the selection of a faculty thesis adviser.

Requirements

After a faculty adviser has been selected and has agreed to advise them during the year-long project, students must complete the Southeast Asian Studies Honors Program Application and a two-page preliminary outline of the proposed research project, have the faculty adviser sign the application, and submit both to the academic counselor who verifies that the necessary signatures have been obtained and the requisites have been met. The counselor assists the students in formally enrolling in Southeast Asian Studies 198A. Enrollment in subsequent terms (courses 198B and 198C) is contingent on students having demonstrated satisfactory progress toward writing of the honors thesis.

Throughout the three terms of the honors program, students work closely with their faculty adviser who guides them through the various phases of research. At the end of the third term, students submit the thesis to their faculty adviser for final review.

To graduate with departmental honors, students must (1) complete all requirements for the major with a cumulative grade-point average of 3.5 or better in upper division courses required for the major and an overall GPA of 3.5 or better, (2) complete courses 198A, 198B, and 198C, and (3) produce an honors thesis (approximately 40 to 60 pages) determined to be of honors quality by a committee of three faculty members. The thesis must then be submitted to the academic counselor in 10357 Bunche Hall.

To graduate with departmental highest honors, students must (1) complete all requirements for the major with a cumulative grade-point average of 3.75 or better in upper division courses required for the major and an overall GPA of 3.5 or better, (2) complete courses 198A, 198B, and 198C, and (3) produce an honors thesis (approximately 40 to 60 pages) determined to be of highest honors quality by a committee of three faculty members. The thesis must then be submitted to the academic counselor in 10357 Bunche Hall.

Departmental honors and highest honors are recorded on the final transcript and diploma after students successfully complete the program.

Southeast Asian Studies Minor

The Southeast Asian Studies minor is designed for students who wish to augment their major with concerted study of language, culture, and society in Southeast Asia. The minor includes the introductory study of one Southeast Asian language, two lower division core courses on Southeast Asia as a region, and five upper division courses that may focus on one or more Southeast Asian cultures or societies.

To enter the minor, students must (1) be in good academic standing (minimum 2.0 grade-point average), (2) have completed 45 units and at least one lower division nonlanguage preparatory course in Southeast Asian studies, and (3) file a petition with the academic counselor in 10357 Bunche Hall.

Required Lower Division Courses (13 units):

- History 9E, Southeast Asian Studies 1, and completion of Filipino 3, Indonesian 3, Thai 3, or Vietnamese 3 or demonstrated proficiency as determined by a placement examination. Proficiency in other Southeast Asian languages may be accepted by petition, pending completion of a placement examination or approval of an alternative course of language study.

Required Upper Division Courses (20 units):

- Five courses, with (1) at least two humanities and arts courses selected from Art History 114F, Ethnomusicology C159, 161B, 161H, 161M, Indonesien 100A, 100B, 100C, Southeast Asian 130, 135, 170A, 170B, 170C, Southeast Asian Studies 191, Thai 100A, 100B, 100C, Theater 102B, Vietnamese 100A, 100B, 100C, World Arts and Cultures 112B and (2) at least two social sciences and policy courses selected from Anthropology 175U, Asian American Studies 133, 134, M164, M171D, 171E, History 176A through 176E, 177A, 177B, 191M, Political Science 158, Social Welfare 104A, Southeast Asian 157.

For Ethnomusicology 161B, 161H, and 161M to count as one 4-unit upper division course to be applied toward the major, any two of the courses may be taken once or any one course may be taken twice.

Variable or selected topics courses (e.g., Asian American Studies 191) fulfill minor requirements only when the content focuses substantially on Southeast Asia or a subregion of it. Other courses with substantial Southeast Asian content may be applied pending approval of a petition filed with the academic counselor.

Independent studies courses (197 or 199) may not be applied toward the minor. No more than two upper division courses may be applied toward both this minor and a major or minor in another department or program. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Southeast Asian Studies Lower Division Courses

1. Introduction to Southeast Asian Studies. (5) Lecture, three hours; discussion, one hour (when scheduled). Introductory survey of diverse and dynamic societies of contemporary Southeast Asia, with strong focus on interdisciplinary themes in humanities and cultural studies. P/NP or letter grading.
88. Sophomore Seminars: Introduction to Interdisciplinary Study of Southeast Asia. (5) Seminar, three hours. Limited to majors. Introduction to methods of interdisciplinary and comparative study, providing students with opportunity to develop competence in using those approaches through investigation of critical issues in Southeast Asian studies. Culminating paper or project may be required. Letter grading.

Upper Division Courses

180. Research Seminar: Southeast Asian Studies. (4) Seminar, three hours. Limited to Southeast Asian Studies majors and minors. Designed for students to analyze their experiences after they return from study abroad in Southeast Asia. Culminating paper or project required. Letter grading.

188. Special Courses in Southeast Asian Studies. (4) Lecture, three hours; discussion, one hour. Interdepartmentally sponsored experimental or temporary courses on selected contemporary topics in Southeast Asian studies taught by visiting instructors or affiliated faculty members. May be repeated for credit with topic change. P/NP or letter grading.

191. Senior Seminar: Variable Topics in Southeast Asian Studies. (4) Seminar, three hours. Limited to senior majors. Research seminar on selected topics. Examination of literature and/or state of field in Southeast Asian studies. Capstone course for majors who write substantial literature review or paper based on original research. May be repeated once for credit with topic change and consent of chair. Letter grading.

Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department’s courses are primarily designed to serve the five B.A. programs: B.A. in Spanish, B.A. in Spanish and Community and Culture, B.A. in Spanish and Linguistics, B.A. in Spanish and Portuguese, and B.A. in Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the B.A. program in Chicana and Chicanos Studies, B.A. and M.A. programs in Latin American Studies, and M.A. and Ph.D. programs in Comparative Literature.

Undergraduate Study

Undergraduate Courses

Spanish 1 through 3 use Castells’ Mosaicos. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, and read Spanish.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the Schedule of Classes or the department office for test dates and location.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Spanish and Portuguese grammar and/or composition.

Spanish B.A.

Preparation for the Major

Required: Spanish 25 or 27 or equivalent, and M42 and M44 or equivalent as determined by the undergraduate adviser. Each course must be passed with an average grade of C or better prior to beginning upper division work in the major.

Transfer Students

Transfer applicants to the Spanish major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: (1) Seven core courses, including Spanish 100A or 100B, 105 or 107 (possible exemption granted by passing departmental writing proficiency examination), 119A or 119B, 120A, 120B, 120C, and 127 and (2) six upper division Spanish elective courses in literature, culture, or linguistics.

Preparation for the Major

Required: Spanish 25 or 27 or equivalent, and M42 and M44 or equivalent as determined by the undergraduate adviser. Each course must be passed with an average grade of C or better prior to beginning upper division work in the major.

Transfer Students

Transfer applicants to the Spanish and Portugal and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/
The Major

Required: (1) Two language and linguistics courses from Spanish 100A or 100B, and 105 or 107; (2) two community-based and experiential learning courses (8 to 10 units) selected from Chicana and Chicano Studies 100SL, Spanish M164SL, M165SL, M172SL, 195; (3) two Hispanic literature courses — Spanish 120A and 120B; (4) three Hispanic literature, language, and culture courses selected from 109, 120C, 140, 142, 143, 144A, 144B, 144C, M145A, M145B, M146, 147, 151A, 151B; (5) 2 units of 187A, 187B, 189HC, or 199 associated with at least one course from item 3 or 4; (6) two interdisciplinary studies courses selected from Chicana and Chicano Studies 100SL, M106, 119, 120, M121, M122, 131, M144, 149, 181, Sociology M155; (7) one upper division elective course (4 units) in Spanish or an additional course selected from item 6.

A minimum of 46 units applied toward the major must be in addition to units applied toward major or minor requirements in another department or program.

Spanish and Linguistics

B.A.

Preparation for the Major

Required: Spanish 25 or 27 or equivalent as determined by the placement test; course M35 or Linguistics 20; course M42 or M44 or equivalent as determined by the undergraduate adviser; and three terms of study in one language other than Spanish and English, which may be taken concurrently with the major. Each course must be passed with an average grade of C or better.

Transfer Students

Transfer applicants to the Spanish and Linguistics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one introduction to linguistics course, one Spanish civilization course or one Spanish American civilization course, and one year of a language other than Spanish or English.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: (1) Spanish 100A, 100B, 105, Linguistics 103, 120A, 120B, (2) one course from Linguistics 160 or 165A or 165B, and (3) three upper division Spanish electives, two of which must be in Spanish linguistics.

Spanish and Portuguese

B.A.

Preparation for the Major

Required: Spanish 25, Portuguese 3 or 102B, M42 or M44 or equivalent, 46 or equivalent.

Transfer Students

Transfer applicants to the Spanish and Portuguese major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one year of Portuguese, one Spanish civilization course or one Spanish American civilization course, and one Brazilian culture course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: (1) Four upper division language and linguistics courses: Portuguese 100A, 100B, 105, Spanish 105; (2) four upper division literature courses selected as follows: two courses from Spanish 119A, 119B or from 120A, 120B, 120C and two courses from Portuguese 120A, 120B or from 130A, 130B; (3) six upper division electives, three of which must be in Spanish and three in Portuguese (numbered C124 and above). Only upper division courses taught in the target language may be applied toward the major.

Portuguese B.A.

Preparation for the Major

Required: Portuguese 3, M35, M42 or M44, 46, or equivalent.

Transfer Students

Transfer applicants to the Portuguese major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Portuguese, one nature of language course, one Portuguese civilization course or one Brazilian civilization course, and one Brazilian culture course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Portuguese Language and Literature Concentration

Required: Thirteen upper division courses, including Portuguese 100A, 100B, 105, either 120A and 120B, or 130A and 130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.

Portuguese and Linguistics Concentration

Required: Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A, M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

Study in a Portuguese-Speaking Country

Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance and must be approved by the department.

Honors Program

The honors program is open to all departmental majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project that they pursue under the faculty member’s guidance through Spanish 198. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

Mexican Studies Minor

The Mexican Studies minor allows students with an interest in Mexico to augment their major programs with courses that expose them to the history, literature, and culture of Mexico. Given Southern California’s proximity to Mexico, the demographics of Los Angeles, and the shared history of Mexico and the Southwest, the minor is a natural complement to many majors.

To enter the minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish. A petition to declare the minor should be filed with the undergraduate counselor in 5314 Rolfe Hall.

Required Lower Division Courses (8 units): Spanish 25 or 27, and one course from History 8A, 8B, 8C, or Spanish M44.

Required Upper Division Courses (20 units): Spanish 144A, 144B, 144C, and two courses...

No more than two upper division courses may be applied toward both this minor and a major or minor in another department or program. By petition and after consultation with the undergraduate adviser, one 4-unit 197 or 199 course may be applied toward the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Portuguese Minor**

To enter the Portuguese minor, students must have an overall grade-point average of 2.0 or better and must complete Portuguese 3 or 102B.

**Required Lower Division Course (4 units):** Portuguese 46.

**Required Upper Division Courses (24 units):** Portuguese 105 and five Portuguese courses selected from 100A through 199 (except 102A, 102B). Only one 4-unit Portuguese 197 or 199 course may be selected.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Spanish Minor**

To enter the Spanish minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

**Required Lower Division Courses (8 units):** Spanish 25 or 27, and M35.

**Required Upper Division Courses (24 to 25 units):** Six courses in literature, of which four (22 units) must be selected from Spanish 119A through 191B (one of the four must be from either 119A or 119B or from 120A, 120B, or 120C).

No more than two upper division courses may be applied toward both this minor and a major or minor in another department or program. By petition and after consultation with the undergraduate adviser, one 4-unit 197 or 199 course may be applied toward the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Spanish Linguistics Minor**

To enter the Spanish Linguistics minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

**Required Lower Division Courses (8 units):** Spanish 25 or 27, and M35.

**Required Upper Division Courses (24 units):** Spanish 100A, 100B, three courses from 107, 115, M118A, M118B, and one other upper division Spanish course.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Spanish and Portuguese offers the Master of Arts (M.A.) degree in Spanish, Master of Arts (M.A.) degree in Portuguese, and Candidate in Philosophy (C.Phil.) and Doctor of Philosophy (Ph.D.) degrees in Hispanic Languages and Literatures.

**Portuguese**

**Lower Division Courses**

1. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour. P/NP or letter grading.

2. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 1. P/NP or letter grading.

4. Portuguese Conversation. (2-2) Discussion, three hours. Enforced requisite: course 3 with grade of B or better. P/NP or letter grading.

M35. Spanish, Portuguese, and Nature of Language. (8) (Same as Spanish M35.) Lecture, three hours; discussion, one hour. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses, Study of language and its relation to other areas of human knowledge. P/NP or letter grading.

M42. Civilization of Spain and Portugal. (5) (Same as Spanish M42) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spain and Portugal, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

M44. Civilization of Spanish America and Brazil. (5) (Same as Spanish M44) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spanish America and Brazil, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

46. Brazilian Culture and Civilization. (5) Lecture, four hours. Conducted in English. Topical analysis of cultural history of Brazil, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/NP or letter grading.

**Upper Division Courses**

102A-102B. Intensive Portuguese. (4-4) Preparation: foreign language experience (other than Portuguese). Development of speaking and reading skills equivalent to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

103. Language and Popular Culture. (4) Lecture, three hours. Requisite: course 3 or 102B. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity. Letter grading.

105. Advanced Composition and Style. (4) Lecture, three hours. Requisite: course 3 or 102B. Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns. P/NP or letter grading.

M118A-M118B. History of Portuguese and Spanish. (4-4) (Same as Spanish M118A-M118B). Lecture, three hours. Requisites: courses M35, 100A. Course M118A is requisite to M118B. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. P/NP or letter grading. M118A. Phonology; M118B. Morphology and Syntax.

120A-120B. Introduction to Portuguese Literature. (4-4) Lecture, three hours. Requisite: course 105. Introduction to principal periods, currents, and authors of Portuguese literature. P/NP or letter grading.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main concepts of contemporary literary theory and criticism. Letter grading.

202. Synchronic Morphology and Phonology. (4) Lecture, three hours. Study of theoretical synchronic linguistics. Prerequisite: course 204A or 204B. P/NP grading.

204A-204B. Generative Grammar. (4-4) Lecture, three hours. Course 204A is requisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semantics, and phonology on metaphor, and meter.

M205A-M205B. Development of Portuguese and Spanish Languages. (4-4) (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

C235. 20th-Century Brazilian Literature. (4) Lecture, three hours. Requisite: course 105. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C235. P/NP or letter grading.

C414. Brazilian Film and Literature. (4) Lecture, three hours. Conducted in English. Topics analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/NP or letter grading.

197. Individual Studies in Portuguese. (2 to 4) Tutorial, to be arranged. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. Eight units of courses 197 and/or 199 may be applied toward major requirements. May be repeated for credit with topic change. Concurrently scheduled with course C197. S/U or letter grading.

199. Directed Research in Portuguese. (2 to 4) Tutorial, to be arranged. Requisite: course 105. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Enrolled subject matter as required. Eight units of courses 197 and/or 199 may be applied toward major requirements. May be repeated for credit. Individual contract required. P/NP or letter grading.

M200. Research Resources. (4) (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.
3A. Intensive Spanish. (4) Lecture, 20 hours; laboratory, five hours. Enforced requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, lunches. Offered in summer only. P/NP or letter grading.

4A. Intermediate Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 3. P/NP or letter grading.

4A. Intermediate Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 4. P/NP or letter grading.

6. Intermediate Spanish. (4) Discussion, five hours. Enforced requisite: course 5. Review and analysis of more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with grade of A or better may enroll directly in course 25. P/NP or letter grading.

8A-8B. Spanish Conversation. (2-2) Discussion, three hours. Course 8A is open to students with credit for course 6. Course 8B has completed course 3 with grade of B or better may be admitted. P/NP or letter grading.

9A-9B. Advanced Conversation. (2-2) Discussion, three hours. Enforced requisite: course 8B. P/NP or letter grading.

10. Intensive Elementary Spanish. (12) Lecture, 20 hours. Intensive elementary instruction in speaking, listening, reading, and writing equivalent to courses 1, 2, and 3, with emphasis on Spanish grammar and Hispanic culture. Offered in summer only. P/NP or letter grading.

27. Composition for Spanish Speakers. (4) Lecture, three hours; composition course. Prerequisite: course 5. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25). P/NP or letter grading.

28A. Spanish for Special Purposes: Medical. (4) Lecture, three hours. Enforced requisite: course 6. Practice in speaking, reading, and writing Spanish using appropriate vocabulary and cultural situations for students with special fields such as medicine, business, law, etc. P/NP or letter grading.

M35. Spanish, Portuguese, and Nature of Language. (5) (Same as Portuguese M35.) Lecture, three hours; discussion, one hour. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge. P/NP or letter grading.

M42. Civilization of Spain and Portugal. (5) (Same as Portuguese M42.) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spain and Portugal, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

M44. Civilization of Spanish America and Brazil. (5) (Same as Portuguese M44.) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spanish America and Brazil, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

60A-60B-60C. Hispanic Literatures in Translation. (4-4-4) Lecture, three hours. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in English. 60A. Spanish Literature; 60B, Spanish-American Literature; 60C. Don Quijote.

61A-61B-61C. Hispanic Literatures in Spanish. (4-4-4) Lecture, three hours. Not open for credit to students with credit for corresponding course in 60 series. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in Spanish. 61A, Spanish literature; 61B, Spanish-American Literature; 61C, Don Quijote.

62A-62B-62C. Hispanic Literatures and Film. (4-4) Lecture, three hours; film screenings, two to three hours. Analysis of main aesthetic, cultural, and philosophical questions in the Hispanic world as articulated in literature and film, addressing not only principal currents affecting Hispanic artistic expression but also diverse strategies employed by two distinct modes of representation. 62A. Spanish; 62B, Spanish America; 62C. The Chicano Experience.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture.

97. Variable Topics in Spanish. (2) Lecture, two hours. Variable topics course with lectures, discussions, and papers; conferences with Class or department counselor for topic to be offered in specific term. May be repeated for credit. P/NP or letter grading.

Upper Division Courses

100A-100B. Introduction to Study of Spanish Grammar. (4-4) Lecture, three hours. Requisite: course M35, 100A. Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish. 100B. Syntax. Study of syntactical systems of Spanish.

102A-102B. Catalan Language and Culture I, II, (4-4) Lecture, six hours. Introduction to oral and written Catalan language. Two-term accelerated language sequence equivalent to three terms of traditional pattern and designed for advanced undergraduate and graduate students. May not be applied as upper division sequence elective in major. P/NP or letter grading. 102A. Preparation: at least two years of college-level Spanish, Portuguese, or another Romance language other than Catalan. 102B. Requisite course 102A.

109. Spanish of Southern California. (4) (And viewing slides, listening to music, etc.) associated with each stop along the way. Letter grading.

119A. Introduction to Study of Literature: Prose. (4) Lecture, three hours. Requisite: course 25. Introduction to study of literary devices, figures of speech, and descriptive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

121A. Topics in Medieval Iberian Literature. (4) Lecture, three hours. Requisite: course 25 or 27. Varying topics on multilingual and multicultural medieval Iberia, including Hispanic-Arabic and Hispanic-Jewish traditions, Ladino, Alajamiado texts, Hispanic-Latin, Occitan, Galician-Portuguese, Catalan, and Castilian. Oral versus written traditions, Convivencia, Europe versus Orient, Sephardic romancero, end of medieval Iberian civilization, and New World. May be repeated for credit with topic change. P/NP or letter grading.

122. Medieval Literature: El Camino de Santiago. (3) Lecture, three hours. Introductory course in medieval Spanish literatures following route of imaginary pilgrimage through northern Spain in the year 1300, from French border near Roncesvalles to shrine of St. James in Santiago de Compostela leading works of literature (and viewing slides, listening to music, etc.) associated with each stop along the way. Letter grading.
123. Three Masterpieces of Spanish Medieval Literature. (4) Lecture, three hours. Enforced requisites: course 25 or 27. Recommended: course 120A. Reading and understanding of three masterpieces of medieval Spanish literature: Conde Lucanor by Don Juan Manuel (collection of folk tales and fables from both European and Oriental sources), Libro de buen amor by Juan Ruiz (disastrous love adventures of rural archpriest, in verse), and Celestina by Fernando de Rojas (dark drama of lust, sorcery, and murder set against the background of Inquisition and of Spain’s nascent empire). P/NP or letter grading.

128. The Enlightenment and Romanticism in Spain. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of main manifestations of thought and literature from 1700 to 1850.

130. Post-Romanticism, Realism, and Naturalism in Spain. (4) Lecture, three hours. Recommended preparation: course 120B. Development of main trends of Spanish literature from 1850 to 1898.

132. 20th-Century Spanish Prose. (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish prose literature since 1898.

133. 20th-Century Spanish Poetry and Drama. (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish poetry and drama since 1898.

137. Literature of Colonial Spanish America. (4) Lecture, three hours. Recommended preparation: course 120A. Study of most important genres and authors from the Conquest to 1810.

139. Romanticism and Realism in Spanish-American Literature. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of most important currents of thought and literary trends from 1810 to 1880.

140. Modernismo. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of principal characteristics of modernism in Spanish literature.

144A. Mexican Literature. (4) Lecture, three hours. Requisite: course 25 or 27. Study of major movements and authors of Mexican literature. P/NP or letter grading.

144B. Mexican Culture. (4) Lecture, three hours. Requisite: course 25 or 27. Study and analysis of Mexican culture through variety of cultural expressions such as film, music, literature, and other popular genres. Letter grading.

144C. Special Topics in Mexican Studies. (4) Lecture, three hours. Requisite: course 25 or 27. Variable topics course with readings, discussions, and papers; consult Schedule of Classes or department counselor for topic to be offered in a specific term. P/NP or letter grading.

M145A-M145B. Introduction to Chicano Literature. (4-4) (Same as Chicana and Chicano Studies M145A-M145B. Seminar, one hour; in-service training or fieldwork, four hours; seminar, three hours. Recommended preparation: course 25 or 27. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. Letter grading. M145A. Literature to 1960. M145B. Literature after 1960.

M146. Chicano Narrative. (4) (Same as Chicana and Chicano Studies M146B.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — Corrido, Semblanza, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems. P/NP or letter grading.

147. Central American Literature. (4) Lecture, four hours. Study of representative novels, short stories, poems, and testimonio writings, and essays by contemporary Central American authors and authors of Central American heritage. P/NP or letter grading.

149. Folk Literature of Hispanic World. (4) Lecture, three hours. Study of history and present dissemination of folk literature throughout Hispanic countries. P/NP or letter grading.

151A-151B. Women in Hispanic Literature. (4-4) Discussion, three hours. Recommended preparation: courses 125A, 125B, 120C. Study of works by and about women, with emphasis on portrayal of women, women’s roles, and myths of womanhood within the Hispanic socio-ideological context. 151A. Spain; 151B. Spanish America.

161. Film and Literature of Spanish-Speaking World. (5) (Formerly numbered M161.) Lecture, three hours; discussion, one hour. May be taught in either English or Spanish. Exploration of perceptions of reality offered by different authors and filmmakers from Spain, Latin America, and Chicano community. P/NP or letter grading.

M164SL. Spanish/English Exchange. (5) (Same as Chicana and Chicano Studies M164SL.) Seminar, three hours; fieldwork at Venice High School, four hours. Preparation: two years of college or university Spanish. Students are paired with one or more English learners. ESL teacher helps high school students and converses for two hours in Spanish and two hours in English. Topics for Spanish portion provided in APS manual; topics for English exchange selected by ESL teacher. Encounters form basis for student conversations. High school students complete a foreign language profile packet for their learner’s journal. Review of key areas of Spanish grammar to allow UCLA students to improve language skills, increase knowledge of Latino community and new immigrant Latino youth, and help Venice students improve their English. Some discussions concern U.S. culture, importance of higher education, student adaptation to life in the U.S., and stimulation of their interest in higher education. P/NP or letter grading.

M165SL. Taking It to Street: Spanish in Community. (5) (Formerly numbered M165SL.) (Same as Applied Linguistics M165SL.) Seminar, three hours; fieldwork, 10 hours. Requisite: course 25 or 27. Service learning course to give students opportunity to use cultural and linguistic knowledge acquired in Spanish classes in real-world settings. Students required to spend minimum of eight to ten hours per week at agreed on site in Latino community. P/NP or letter grading.

M172SL. Latinos, Linguistics, and Literacy. (5) (Formerly numbered M172SL.) (Same as Applied Linguistics M172SL and Chicana and Chicano Studies M170SL and Honors Collegium M128SL.) Seminar, four hours; field project, four to six hours. Recommended requisite: course 100A. In-depth study of various topics related to literacy, including different definitions of literacy, classroom discussions for adult preliterates, literacy and gender, approaches to literacy (whole language, phonics, Freire’s liberation pedagogy), historical and current perspectives, phonemes as basis for alphabetic writing, and national literacy campaigns. Required field project involving Spanish-speaking adults in adult literacy programs. P/NP or letter grading.

187A-187B. Advanced Tutorial in Community and Culture I, II. (1-2) Tutorial, one hour. Requisite: course 25 or 27. Designed as adjunct to upper division course in Hispanic literature, language, and culture. Exploration of topics in greater depth through supplemental readings, papers, community service, or other activities. Course 187A may be repeated once for credit. P/NP or letter grading.

191A. Variable Topics in Spanish: Studies in Hispanic Literature and Linguistics. (4) Seminar, three hours. Limited to 15 junior/seniors. Variable topics course with readings, discussions, and development of culminating paper. Consult Schedule of Classes or department counselor for topic to be offered in specific term. P/NP or letter grading.

195. Community Internships in Spanish. (4) Tutorial, one hour; fieldwork, 10 hours. Requisite: course 25 or 27. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide journal of their experience. Final research paper required. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in Spanish. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. Courses 195 and/or 197 may be applied toward major requirements. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

198. Senior Honors Research in Spanish. (4) Tutorial, to be arranged. Supervised individual research under guidance of faculty mentor. Culminating paper required. Eight units of courses 195 and/or 199 may be applied toward major requirements. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Spanish. (2 to 4) Tutorial, to be arranged. Requisite: course 25. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. Eight units of courses 195 and/or 199 may be applied toward major requirements. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M200. Research Resources. (4) (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students. P/NP or letter grading.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.
202A. Phonology. (4) Lecture, three hours. Study of the sound structure of Spanish and main phonologi- cal processes that map underlying representations into surface representations. Bearing of phonological theory on study of meter.

202B. Morphology. (4) Lecture, three hours. Study of derivational and inflectional word formation pro- cesses and their interaction with syntactic structure.

204A-204B. Generative Syntax and Semantics. (4-4) Lecture, three hours. Study of syntactic structure of Spanish and relation between underlying representa- tions and logical form within a principles-and-parame- ters framework. Bearing of syntactic and semantic structure on study of literature.

M205A-M205B. Development of Portuguese and Spanish Languages. (4-4) (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

209. Dialectology. (4) Lecture, three hours. Major di- alect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contri- bution of cultural and historical features, including in- digenous languages, to their formation.

221. Medieval Lyric Poetry. (4) Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500.

222. Medieval Epic and Narrative Poetry. (4) Lecture, three hours. Readings of and lectures on Span- ish epic and narrative poetry from the beginning to 1500.

223. Medieval Prose. (4) Lecture, three hours. Read- ings of and lectures on Spanish prose from the begin- ning to 1500.

224. Poetry of the Golden Age. (4) Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700.

225. Drama of the Golden Age. (4) Lecture, three hours. Readings of and lectures on the commedia.

228. The Enlightenment. (4) Lecture, three hours. Readings of and lectures on representative works of the period.

229. Romanticism. (4) Lecture, three hours. Read- ings of and lectures on representative works of the period.

230. Realism and Naturalism. (4) Lecture, three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1900.

231. Major Currents in Modern Spanish Literature. (4) Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.

232. Spanish Prose Literature from 1898 to the Civil War. (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

233. Spanish Prose Literature after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

234. Spanish Drama and Poetry from 1898 to the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems.

235. Spanish Drama and Poetry after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems of the period.

237. Literature of the Spanish Conquest. (4) Lecture, three hours. Readings of and lectures on chroni- diess, poems, and indigenous accounts of the Spanish Conquest.

241A-241B. Contemporary Spanish-American Po- etry. (4-4) Lecture, three hours. Intensive study of grim- important poets of Spanish America from modernism to the present.

242A-243B. Contemporary Spanish-American Po- etry. (4-4) Lecture, three hours. Intensive study of grim- important poets of Spanish America from modernism to the present.

244A-244B. Contemporary Spanish-American American Literature. (4) Lecture, three hours. Study of important novelists from modernism to the present.

246. Contemporary Spanish-American Drama. (4) Lecture, three hours. Intensive study of folk literature of Span- ish and Portuguese cultures as presented in (1) bal- lad and poetry, (2) narrative and drama, (3) speech. S/U or letter grading.

251A-M251B. Studies in Galegian-Portuguese and Old Spanish. (4-4) (Same as Portuguese M251A-M251B.) Lecture, three hours. Study of problems related to historical development of Galegan- Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropri- ate guidance committee.

256A-256B. Studies in Spanish Linguistics. (4-4) Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Each course may be repeated once with topic change and consent of appropri- ate guidance committee.

257. Studies in Dialectology. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

262A-262B. Studies in Medieval Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

264A-264B. Studies in Golden Age Spanish Litera- ture. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

265. Cervantes. (4) Discussion, two hours. May be repeated once with topic change and consent of appro- priate guidance committee.

270A-270B. Studies in 18th-Century Spanish Lit- erature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

271A-271B. Studies in 19th-Century Spanish Lit- erature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

272A-272B. Studies in 20th-Century Spanish Lit- erature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

277A-277B. Studies in Colonial Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

Richard A. Berk, Ph.D.
Thomas S. Ferguson, Ph.D.
Robert L. Jennrich, Ph.D.
James B. MacQueen, Ph.D.
William M. Mason, Ph.D.
Bengt Muthen, Ph.D.
Judea Pearl, Ph.D.
Sidney C. Port, Ph.D.
N. Donald Ylvisaker, Ph.D.

Associate Professors
Mark H. Hansen, Ph.D.
Christina G.S. Palmer, Ph.D., in Residence
Janice L. Reiff, Ph.D.
Hongquan Xu, Ph.D.

Assistant Professor
Qing Zhou, Ph.D.

Senior Lecturer
Maryam M. Estandiari, Ph.D.

Lecturers
Nicolas Christou, Ph.D.
Gretchen G. Davis, M.S.
Vera Ioudina, Ph.D.
Vivian Lew, Ph.D.
Juana Sanchez, Ph.D.

Adjunct Assistant Professor
Ivaylo D. Dinov, Ph.D.

Academic Administrator
Robert L. Gould, Ph.D.

Scope and Objectives
With the advent of fast computing and the subsequent flood of data detailing almost every aspect of our daily lives comes an urgent need for scientists trained in modern statistical methodologies.

Both the undergraduate and graduate programs are structured around three core course sequences that introduce students to the science of data: theoretical statistics, data analysis, and statistical computing. This balance reflects the scale and complexity of problems that statisticians are now routinely called to address. Additional course offerings reflect the work of faculty members in bioinformatics, sensor networks, environmental studies, finance, and computer vision.

Courses and workshops for secondary school teachers of statistics are also offered in order to promote sound statistics pedagogy throughout the curriculum.

Reflecting diverse research interests, the Statistics Department is organized around several centers that collectively provide undergraduate and graduate students rich opportunities for specialized study. These include the Center for Environmental Statistics, Center for Image and Vision Sciences, Center for Statistical Computing, Center for Statistical Research in Computational Biology, and Center for the Teaching of Statistics.

Undergraduate Study

Undergraduate Courses
Students planning to pursue advanced degrees in statistics should enroll in the Statistics 100 sequence. Most courses are offered once or twice each year; students interested in either the major or minor in Statistics should meet with the student affairs officer early in their careers.

Statistics B.S.
The Statistics major is designed to provide a general introduction to the practice of statistics for students who intend to pursue study at the graduate level or seek employment in industry or government. Courses are selected to provide sufficient theoretical background for future graduate-level research work, exposure to modern techniques and practices, and experience in fields of application.

To enter the major, students should have successfully completed one lower or upper division Statistics Department course with a letter grade, have an overall grade-point average of 2.0 or better, and declare the Statistics major with the undergraduate adviser in 8117A Math Sciences, (310) 206-3742.

It is strongly recommended that, in conjunction with the B.S. degree, pursue a minor in a substantive discipline that applies statistics. Students must consult with the undergraduate faculty adviser to ensure that the minor selected is one in which statistics is applied.

Preparation for the Major

Transfer Students
Transfer applicants to the Statistics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission: two years of calculus, one linear algebra course, and one statistics course. Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Only 8 units of course 199 may be applied toward the major. Courses 189 and 189HC may not be applied toward any of the major requirements.

Students planning to continue their study of statistics at the graduate level are strongly advised to include in their schedule as many of the following courses as possible: Mathematics 131A, 131B, 151A, 151B, 170B, 171.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Statistics Minor

The Statistics minor is designed to provide a solid background in statistics for students majoring in other disciplines.
Statistics

Lower Division Courses

10. Introduction to Statistical Reasoning. (5) (Formerly numbered 10A.) Lecture, three hours; discussion, one hour; computer laboratory, two hours. Preparation: three years of high school mathematics. Not open for credit to students with credit for course 10H, 11, 12, 13, or 14. Introduction to statistical thinking and understanding, including strengths and limitations of basic experimental designs, graphical and numerical summaries of data, inference, regression as descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and testing hypotheses, introduction to regression and correlation. P/NP or letter grading.

11. Introduction to Statistical Methods for Business and Economics. (5) Lecture, three hours; discussion, one hour; computer laboratory, one hour. Requisite: one course from Mathematics 3A or 31A. Not open for credit to students with credit for course 10, 10H, 12, 13, 14, 100A, 100B, 100C, Mathematics 170A, or 170B. Elements of statistical analysis. Presentations and interpretations of data; descriptive statistics; probability problems, that are useful in wide variety of scientific disciplines. Culminating project may be required. P/NP or letter grading.

12. Introduction to Statistical Methods for Geography and Environmental Studies. (5) (Formerly numbered M12.) Lecture, four hours; discussion, one hour; laboratory, one hour. Not open for credit to students with credit for course 10, 11, 13 or (former Statistics M12, Anthropology M80, Geography M40, or Sociology M18). Introduction to statistical thinking and understanding, with emphasis on techniques used in geography and environmental science. Underlying logic behind statistical procedures, role of variation in statistical thinking, strengths and limitations of statistical summaries, and fundamental inferential tools. Emphasis on applications in geography and environmental science in laboratory work using professional statistical analysis package, including spatial statistics, maps, and cartography. P/NP or letter grading.

13. Introduction to Statistical Methods for Life and Health Sciences. (5) Lecture, three hours; discussion, one hour; laboratory, one hour. Not open for credit to students with credit for course 10, 10H, 11, 12, 13, or 14. Presentation and interpretation of data, descriptive statistics, introduction to correlation and regression and to basic statistical inference (estimation, testing of means and proportions, ANOVA) using both bootstrap methods and parametric models. P/NP or letter grading.

14. Introduction to Statistical Methods in Physical Sciences and Engineering. (5) Lecture, three hours; discussion, one hour; laboratory, one hour. Not open for credit to students with credit for course 10, 10H, 11, 12, or 13. Introduction to conceptual and technical aspects of statistics, with attention to applications of physical sciences and engineering. Topics include data collection and experimental design, quantifying uncertainty in measurement, descriptive statistics, introduction to time series and regression. Laboratory component to learn data analysis on real data and fundamental techniques of computer statistical analysis, including bootstrap methods. P/NP or letter grading.

35A. Interactive and Computational Probability. (4) (Formerly numbered 35A.) Lecture, three hours; discussion, one hour. Requisite: Mathematics 31A. Not open for credit to students with credit for course 10, 10H, 11, 12, or 13. Introduction to probability topics in interactive problem-driven manner. Various applets, interfaces, and demonstrations used to illustrate fundamental properties of distributions, random number generation, combinatorics, expectation, variability, and sampling. Assignment of projects that require light computer programming. Emphasis on practical description, utilization, and graphical presentation of various probabilistic modeling techniques. P/NP or letter grading.

35B. Introduction to Probability with Applications to Poker. (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 35B. Basic introductory probability topics in interactive problem-driven manner. Various applets, interfaces, and demonstrations used to illustrate fundamental properties of distributions, random number generation, combinatorics, expectation, variability, and sampling. Assignment of projects that require light computer programming. Emphasis on practical description, utilization, and graphical presentation of various probabilistic modeling techniques. P/NP or letter grading.

35C. Applied Sampling. (4) (Formerly numbered 34.) Lecture, three hours; discussion, one hour. Designed for lower division students in social science and those who plan to major in Statistics. Topics include methods of sampling from finite populations, sources of sampling and estimation bias, and methods of generating efficient and precise estimates of population characteristics. Practical applications of sampling methods via lectures and hands-on laboratory exercises. P/NP or letter grading.

88. Sophomore Seminars: Statistics. (2) Seminar, two hours; requisite: one course from 10, 10H, 11, 12, 13, or 14. Limited to 20 lower division students. Readings and discussions designed to introduce students to current statistical consulting research and field applications. Culminating project may be required. P/NP or letter grading.

Upper Division Courses

100A. Introduction to Probability. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A. Not open to students with credit for Electrical Engineering 131A or Mathematics 170A; open to graduate students. Students may receive credit for only two of the following: courses 100A, 110A, Biostatistics 100A. Probability distributions, random variables, vectors, and expectation. P/NP or letter grading.

100B. Introduction to Mathematical Statistics. (4) Lecture, three hours; discussion, one hour. Requisite: course 100A or Mathematics 170A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. P/NP or letter grading.

100C. Linear Models. (4) Lecture, three hours; discussion, one hour. Requisite: course 100B. Theory of linear models, with emphasis on matrix approach to linear regression. Topics include model fitting, extra sums of squares principle, testing general linear hypothesis in regression, inference procedures, Gauss/Markov theorem, examination of residuals, principle component regression, stepwise procedures. P/NP or letter grading.

101A. Introduction to Design and Analysis of Experiment. (4) Lecture, three hours; discussion, one hour. Requisites: one course from 10, 11, 12, 13, or 14, and Mathematics 32B. Fundamentals of collecting data, including components of experiments, randomization and blocking, completely randomized design and ANOVA, multiple comparisons, power and sample size, and block designs. P/NP or letter grading.

101B. Introduction to Data Analysis and Regression. (4) (Formerly numbered 101A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3B or 31B, or Mathematics 32B and 33A. Recommended prerequisites: course 110A. Designed for juniors/seniors. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping for statistical inference. P/NP or letter grading.

101C. Introduction to Regression and Data Mining. (4) (Formerly numbered 120B.) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 101B. Designed for juniors/seniors. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping. P/NP or letter grading.

102A. Introduction to Computational Statistics with R. (4) (Formerly numbered 135.) Lecture, three hours. Requisites: Mathematics 3B or 31B, or Mathematics 32B and 33A. Introduction to programming and data analysis in R. P/NP or letter grading.
102B. Matrix Computation and Optimization for Statistics. (4) (Formerly numbered 175.) Lecture, three hours; discussion, one hour. Requisite: one course from 10, 11, 12, 13, 14, 100A, or 110A. Introduction to those parts of matrix algebra and matrix computation that are most useful for statisticians. Use of computer exercises and R programming language.

105. Statistics for Engineers. (4) Lecture, three hours; discussion, one hour. Requisite: course 100A or Electrical Engineering 131A or Mathematics 170A. Foundation of basic concepts and techniques of statistics. Topics include descriptive distributions, statistical estimation, hypothesis testing, with emphasis on application of these concepts. Discussion of methods for checking whether assumptions required for mathematical foundations are appropriate for given set of data. P/NP or letter grading.

110A-110B. Applied Statistics. (4-4) Lecture, three hours; discussion, one hour. P/NP or letter grading. 110A. Requisite: course 35A or 35B or 35C and Mathematics 2B or 31B, or Mathematics 32B and 33A. Not open to students with credit for Electrical Engineering 131A. Students may receive credit for only two of the following: courses 100A, 110A, Biostatistics 100A. Probability, distributions, expectation, estimation, central limit theorem, confidence intervals, testing. 110B. Requisite: course 110A. Core course in applied statistics for social science majors, includes introduction to computer based inference and analysis. Sample problems, goodness of fit and contingency table analysis, correlation and regression, analysis of variance, nonparametric statistics.

112. Statistical Methods for Social Sciences. (5) Lecture, three hours; discussion, one hour. Enforced requisites: one course from 10, 10H, 11, 12, 13, 14, 100A, or 110A. Introduction to statistical methods for creating better Web search engines used in analysis of numerical time-series data. Examines principles of methods dealing with nonresponse and missing data, including introduction to terminology, limitations of simple methods, and modern methods for dealing with missing data, such as EM algorithm and multiple imputation. P/NP or letter grading.

130. Statistical Analysis with SPSS. (4) Lecture, three hours. Requisite: one course from 10, 10H, 11, 12, 13, 14, 100A, or 110A. Overview of Statistical Package for Social Sciences (SPSS) software intended for students in any major who have interest in data analysis. Though original design catered to students in social sciences, current development has considerably expanded its repertoire of functionality and from simple to more advanced data manipulation and analysis. Ease of use maintained that is popular with students not accustomed to programming. Ability of program to combine ease of use with variety of levels of data exploration and inference has made it popularly used analytical tool. P/NP or letter grading.

130D. Statistical Programming, Computation, and Visualization. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course from 10, 11, 12, 13, 14, Psychology 100A. Selected theories for quantification of psychological, educational, scientific, and social science data. Classical test, factor analysis, generalizability, item response, optimal scaling, ordinal measurement, computer-adaptive, and related theories. Construction of tests and measures and their reliability, validity, and bias. P/NP or letter grading.

130E. Data Management and its Applications. (4) (Same as Psychology M14.) Lecture, three hours. Requisites: courses 10, 11, 12, 13, 14, Psychology 100A. Selected theories for quantification of psychological, educational, scientific, and social science data. Classical test, factor analysis, generalizability, item response, optimal scaling, ordinal measurement, computer-adaptive, and related theories. Construction of tests and measures and their reliability, validity, and bias. P/NP or letter grading.

150D. Statistical Analysis of Internet and World Wide Web Data. (4) Lecture, three hours. Requisite: course 100B or 100C or 101B. Demography and statistical models of browsing behavior of World Wide Web (WWW). Fundamental ideas, history of data, and statistical methods for creating better Web search engines and spam filters. Use of large data sets to illustrate important issues and statistical solutions. Statistical software, some programming, handling of large data sets, and text mining, with emphasis on acquiring hands-on experience and on becoming active participants in current research debates. P/NP or letter grading.

C150. Site-Specific Topics. (4) Seminar, three hours. Tracking of invisible flows of data through greater Los Angeles metropolitan area, with focus on small number of specific sites situated prominently in both physical and virtual (data) spaces. Documentation of kinds of data that originate, terminate, or simply route through each location. Consideration of analyses (visual, computational, or simply informal), decisions that are made, and actions that are taken on basis of these data, whether they be human or automated responses. Documentation of how patterns of data acquisition and analysis dictate behaviors, enable or restrict movements, and shape local community. Analysis of creative works by artists, including urban art. Concurrency scheduled with course C260. P/NP or letter grading.

C151. Introduction to Pattern Recognition and Machine Learning. (4) (Formerly numbered 161.) Lecture, three hours. Requisites: course 100B, Mathematics 33A. Introduction to pattern analysis and machine intelligence designed for advanced undergraduates and graduate students. May not be applied toward M.S. or Ph.D. requirements. Concurrently scheduled with course C261. P/NP or letter grading.

165. Statistical Methods and Data Mining. (4) Lecture, three hours. Requisite: course 100A. Introduction and overview of up-to-date methods in microarray analysis designed for students in biostatistics, statistics, and human genetics who are interested in technology and statistical analysis of microarray experiments. Useful for students with basic statistical training who are interested in understanding logic underlying many statistical methods. P/NP or letter grading.

170. Introduction to Time-Series Analysis. (4) Lecture, three hours. Requisite: course 100C. Exploration of standard methods in temporal and frequency analysis used in analysis of numerical time-series data. Examples provided throughout, and statistical implementation techniques discussed. P/NP or letter grading.
M171 Introduction to Spatial Statistics. (4) (Same as Geography M171.) Lecture, three hours; laboratory, one hour. Requisite: one course from 10, 11, 12, 13, or 14. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

C173. Applied Geostatistics. (4) Lecture, three hours; discussion, one hour. Requisite: course 100C (may be taken concurrently) or 101B or 110B. Geostatistics can be applied to many problems in other disciplines such as hydrology, traffic, air and water pollution, ecology, economics, geography, waste management, forestry, oceanography, meteorology, and agriculture and, in general, to every problem where data are observed at geographic locations. Acquisition of knowledge from different areas that can be used to analyze real spatial data problems and to connect geostatistics with geographic information systems (GIS). Concurrently scheduled with course C273. P/NP or letter grading.

C180. Introduction to Bayesian Statistics. (4) Lecture, three hours; discussion, one hour. Requisite: Mathematics 32B, 33B. Designed for juniors/seniors. Introduction to statistical inference based on use of Bayes theorem. Bayesian models, prior and posterior distributions, current applications, and computational issues. Topics include Stein paradox, nonparametric Bayes, and statistical learning. Examples of applications vary according to interests of students. May not be applied toward Ph.D. in Statistics. Concurrently scheduled with course C236. P/NP or letter grading.

C182. Fundamentals of Scientific Writing. (2) Seminar, one hour. Development and perfection of student writing skills in preparation for careers through variety of scientific writing and reading assignments. Objectives and techniques of scientific writing and practice with different forms of professional writing. Analysis of quality of writing, including control, clarity, grammar, and mechanics. Concurrently scheduled with course C295. P/NP or letter grading.

C185. Statistical Methods for Physical Sciences. (4) (Same as Atmospheric and Oceanic Sciences CM185.) Lecture, three hours. Designed for juniors/seniors. Statistical framework for data analysis in fields of atmospheric sciences, astronomy, geology, and chemistry, depending on class composition. Presentation of popular techniques in all fields, with emphasis on applications and data, not theory, although some understanding of theory is needed. Concurrently scheduled with course CM225. P/NP or letter grading.

186. Careers in Statistics. (1) Seminar, one hour. Discussion of applications of statistics by weekly guest speakers. How statistics is applied to legal, economic decisions, arts, environment, and other fields, with some emphasis on career paths in statistics. P/NP or letter grading.

199. Directed Research in Statistics. (1 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Consent of instructor or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

210B. Regression Analysis: Model Building, Fitting, and Criticism. (4) Lecture, three hours. Enforced requisite: course 200A. Designed for graduate students. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention is given to extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping for statistical inference. S/U or letter grading.

210C. Advanced Modeling and Inference. (4) Lecture, three hours. Strongly recommended requisite: courses 200B, 201B. Designed for graduate students. Introduction to advanced topics in statistical modeling and inference, including Bayesian hierarchical models, missing data problems, mixture modeling, additive modeling, hidden Markov models, and Bayesian networks. Coverage of computational methods used and developed for these models and problems, such as EM algorithm, data augmentation, dynamic programming, and belief propagation. S/U or letter grading.

212. Program Evaluation and Policy Analysis. (4) (Same as Sociology M212.) Lecture, three hours. Preparation: exposure to binary response models. Requisites: Sociology 210A and 210B. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. Designed for graduate students. Survey of modern methods used in analysis of spatial data. Implementation of various techniques using real data sets from diverse fields, including neuroimaging, geography, seismology, demography, and environmental sciences. S/U or letter grading.

221. Analysis of Data with Qualitative and Limited Dependent Variables. (4) (Same as Sociology M242.) Lecture, three hours. Requisites: courses 100A, 100B, and 100C, or Sociology 210A and 210B. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. Designed for graduate students. Simulation, renewal theory, sampling, and practice with different forms of professional writing. Analysis of quality of writing, including control, clarity, grammar, and mechanics. Concurrently scheduled with course C295. P/NP or letter grading.

233. Time-Series Analysis. (4) (Same as Earth and Planetary Sciences M233.) Lecture, three hours. Designed for graduate students. Exploration of methods for analyzing numerical time-series data. Basic topics in temporal and frequency analysis, followed by more recent topics. Examples in various fields including economics, signal processing, and atmospheric sciences. S/U or letter grading.

234. Spatial Statistics. (4) (Same as Geography M234 and Urban Planning M215.) Lecture, three hours. Designed for graduate students. Survey of modern methods used in analysis of spatial data. Implementation of various techniques using real data sets from diverse fields, including neuroimaging, geography, seismology, demography, and environmental sciences. S/U or letter grading.

235. Experimental Design. (4) Lecture, three hours. Requisite: course 100C or 101B or 110B. Basic principles, analysis of variance, randomized block designs, Latin squares, balanced incomplete block designs, factorial designs, fractional factorial designs, minimum aberration designs, robust parameter designs. Concurrently scheduled with course C151. S/U or letter grading.
C226. Bootstrap, Jackknife, and Resampling Methods. (4) Lecture, three hours; discussion, one hour. Designed for graduate students. Simple intuitive introduction to practical application of statistics for experiments and surveys in business and biological, medical, physical, and social sciences. Resampling methods—bootstrap and permutation tests—are tab-free and distribution-free, require common sense (not calculus), yet have a broader range of applications than classical parametric statistical procedures. Concurrently scheduled with course C152. S/U or letter grading.

M231. Pattern Recognition and Machine Learning. (4) (Same as Computer Science M276A.) Lecture, three hours. Designed for graduate students. Fundamental concepts, theories, and algorithms for pattern recognition: methods that are used in computer vision, image processing, speech recognition, data mining, statistics, and computational biology. Topics include Bayesian decision theory, parametric and nonparametric classification, clustering, complexity (VC-dimension, MDL, AIC), PCA/ICA/ICA, MDS, SVM, boosting. S/U or letter grading.

M232B. Statistical Computing and Inference in Vision and Image Science. (4) (Formerly numbered 232B.) (Same as Computer Science M266B.) Lecture, three hours. Preparation: basic statistics, linear algebra (matrix analysis), computer vision. Introduction to broad range of algorithms for statistical inference that can be used in vision, pattern recognition, speech, bioinformatics, data mining. Topics include Markov chain Monte Carlo computing, sequential Monte Carlo methods, belief propagation, partial differential equations. S/U or letter grading.

234. Statistics and Information Theory. (4) Lecture, three hours. Preparation: introductory probability theory course. While data compression and transmission are fundamental problems in information theory, field provides insights into fundamentally statistical problems of estimation, prediction, and model selection. Even new concepts of randomness emerge from this line of research. S/U or letter grading.

C236. Introduction to Bayesian Statistics. (4) Lecture, three hours; discussion, one hour. Designed for graduate students. Statistical inference is based on use of Bayes theorem, covering foundational aspects, current applications, and computational issues. Topics include Stein paradox, nonparametric Bayes, and statistical learning. Examples of applications vary according to interests of students. May not be applied toward Ph.D. in Statistics. Concurrently scheduled with course C180. S/U or letter grading.

M237. Data and Media Arts. (4) (Same as Design I Media Arts M259.) Lecture, three hours. Through expanding reach of telecommunications networks and general advancement of data collection technologies, almost every aspect of our lives can be “rendered” in data. Contemplation of use of data in creation of media art and examination of each step in process of data collection, analysis, and representation. Topics include databases and data warehousing, exploratory analysis and visualization, clustering and pattern finding, sampling, and various data mining algorithms. Exploration, through discussions, of fundamental concepts like complexity and randomness. Techniques that organize data search for patterns, and cluster data orderful and/or expressive representations. Letter grading.

238. Vision as Bayesian Inference. (4) Lecture, three hours. Requisite: course 100A or 200A. Formulation of vision as Bayesian inference using models developed for designing artificial vision systems. Applied to statistics, they define ideal observer models that can be used to model human performance and serve a benchmark. S/U or letter grading.

239. Probabilistic Models of Cognition. (4) Seminar, three hours; discussion, one hour. Requisites: course 100B, Computer Science 180, Mathematics 33A. Modeling aspects of human cognition, designing artificial intelligence systems. Introduction to foundational concepts and foundations of basic mathematical and computational techniques. Topics illustrated on different aspects of cognition. S/U or letter grading.

M242. Multivariate Analysis with Latent Variables. (4) (Same as Political Science M208D and Psychology M257.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as LISREL, confirmatory factor analysis models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications. S/U or letter grading.

M245. History of Statistics. (4) (Same as History M296.) Seminar, three hours. History of statistics ranges over vast and diverse territory. Development of mathematical methods; philosophical, political, and social issues that were linked to their emergence and use. S/U or letter grading.

M250. Statistical Methods for Epidemiology. (4) (Same as Biostatistics M211 and Epidemiology M211.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requires: Epidemiology 200B, 200C. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in Epidemiology 200B and 200C and introduction of new topics, including principles of epimetrics in disease, smoothening and sensitivity analysis. S/U or letter grading.

M251. Statistical Methods for Life Sciences. (4) (Same as Ecology and Evolutionary Biology M216.) Lecture, four hours. Preparation: course 13. Fundamentals of statistics as applied in life sciences, including statistical inferences for continuous and categorical data (estimation, testing of means and proportions, ANOVA) study design, linear regression, and introduction to principle components analysis. Methods to be implemented on computer with SAS, S/U or letter grading.

CM252. Statistical Methods for Physical Sciences. (4) (Same as Atmospheric and Oceanic Sciences CM213.) Lecture, three hours. Designed for graduate students. Statistical framework for data analysis in fields of atmospheric sciences, astronomy, geology, and chemistry; depending on class composition. Presentation of popular techniques in all fields, with emphasis on applications and data, not theory, although some understanding of theory is needed. Concurrently scheduled with course CM185. S/U or letter grading.

257. Design, Analysis, and Modeling for Embedded Sensing. (4) Lecture, three hours; discussion, one hour. Recommended preparation: knowledge of probability and regression analysis. Limited to graduate students. Analysis of data produced by embedded sensing, which is product of several technological advances such as low-power computing and communications platforms, and robot devices. S/U or letter grading.
291. Statistics Consulting Seminar. (4) Seminar, three hours. Preparation: at least one UCLA graduate-level statistics course. Exposure to real statistical and scientific problems that appear in typical interactions between statisticians and researchers, with lectures centered on case studies presented by faculty members and invited speakers from business and academic fields. Applied regression analysis and design of experiments, together with basic statistical programs. Presentations and written reports required. S/U or letter grading.

292. Graduate Student Statistical Packages Seminar. (1 to 2) Seminar, two hours. Introduction to various statistical packages. How to handle data in different packages (input, output, data management, treatment of missing data), general syntax of different programming languages, and good practice for writing own statistical functions. S/U grading.

293. Graduate Student Research Seminar. (2) Seminar, two hours. Designed for graduate statistics students. Participating seminar in which various aspects of performing research are discussed by variety of faculty members. Exposure to current research topics with statistical implications to help students select possible thesis or dissertation topics. May not be applied toward degree course requirements. S/U grading.

295. Fundamentals of Scientific Writing. (2) Seminar, one hour. Development and perfection of student written communication skills through variety of scientific writing and reading assignments. Objectives and techniques of scientific writing and practice with different forms of professional writing. Analysis of quality of writing, including control, clarity, grammar, and mechanics. Concurrently scheduled with course C182. S/U or letter grading.

the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see http://www.surgery.medsch.ucla.edu.

Surgery

Upper Division Course

199. Directed Research in Surgery, (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives

UCLA’s theater program offers comprehensive training for the profession, as well as serious study of theater’s long history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater. Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, directing, history and criticism, musical theater, and playwriting, all within the rigorous liberal arts framework of the B.A. degree. The department also offers a Theater minor.

At the graduate level, the M.A. in Theater offers a flexible curriculum of graduate courses that provides a focus in theater scholarship or theater practice. For exceptional students who wish to pursue graduate education, the M.A. offers a foundation in theater history, criticism, or performance studies, or an area of theater practice such as dramatic writing, directing, design, or theater education outreach. Students in the M.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

For current or specific information about the programs and faculty members, see http://www.tft.ucla.edu/programs/tht.

Undergraduate Study

Theater B.A.

The Theater B.A. provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore acting, design, directing, playwriting, and production to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced elective courses in acting, design and production, directing, musical theater, playwriting, theater history, criticism, dramatic literature, and performance.

Admission

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. Students must submit required supplemental materials directly to the Theater Department. All applicants must also sign up for an audition and/or interview at http://www.tft.ucla.edu/admissions/. There is a $50 fee for all auditions/interviews. Applicants may submit materials for consideration in one or more of the following areas: acting, design and production, directing, history and criticism, musical theater, and playwriting.

Preparation for the Major

Required: Theater 11, 12, 13, 14A, 14B, 14C, 50 (must be taken for 4 units total).

The Major

Required: A total of 61 upper division units, including Theater 101A, 101B, 101C, 150 (must be taken for 4 units total), and 38 upper divi-
The Theater Minor

The Theater minor is designed for students who wish to augment their major program of study with a series of courses that promote the study of theater as a global phenomenon for reflecting the human experience. The minor consists of a selection of lower division courses that expose students to the fundamentals of theatrical production, as well as acting, writing, and directing. Upper division courses offer more focused study of those areas, as well as theater design, history, education, and theater of non-Western cultures.

To enter the minor students must be in good academic standing (minimum 2.0 grade-point average), have completed at least one theater course with a grade of C or better, and file a petition at the Student Services Office, 103 East Melnitz Building, (310) 206-8441. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by each student's school or college.

Required Lower Division Courses (6 to 10 units): Theater 10 and one course from 15, 20, 28A, 28B, 28C, 30.

Required Upper Division Courses (22 to 27 units): Theater 150, one course from 102A through 102E, M103A through M103G, 105, 106, 107, 108, M109, 110, 111A, 111B, 111C, or 113, and four courses from 118A, 118B, 121, 123, 130A, 13B, 139, C146A, C146B, C146C, 149, 195.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to department approval.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Theater offers Master of Arts (M.A.) and Master of Fine Arts (M.F.A.) degrees in Theater and Candidate in Philosophy (C.Phil.) and Doctor of Philosophy (Ph.D.) degrees in Theater and Performance Studies.

Theater Lower Division Courses

1A-1B-1C, Introduction to Dance for Music Theater (1-1-1) Studio, four hours. Designed for Theater majors. Introduction to basic music theater dance technique. Each course may be repeated once for credit. Letter grading.

2. Theater in Performance: International Theater Festival. (5) Lecture, three hours; discussion, two hours. Exploration of theater in performance as revealed in productions and guest artists of UCLA International Theater Festival, with emphasis on collaborative role of theater artists and active role of audience. Students view selected productions, go back stage to discover how they are realized, and meet creative team. Letter grading.

10. Introduction to Theater. (5) Lecture, three hours; discussion, one hour. Exploration of theater in production, with emphasis on collaborative role of theater artists and active role of audience. Understanding of and access to theatrical event and enhanced appreciation of value of theater; to society; development of critical skills through consideration of representative examples of theatrical production from Europe, America, Asia, and Africa. Letter grading.

11. Approaches to Interpretation of Theater and Performance. (5) Lecture, four hours. Introduction to basic methods of interpretation in theater and performance throughout world. Topics illustrated by faculty members and guest speakers, visits to off-campus theaters, and reading from contemporary plays. Letter grading.

12. Introduction to Performance. (4) Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of the performer in the theatrical event, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills. Letter grading.

13. Play Reading and Analysis. (5) Lecture, three hours. Provides base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of the theater's subdisciplines, including acting, directing, design, playwriting, and critical study. Letter grading.

14A-14B-14C, Introduction to Design. (5-5-5) Lecture, three hours; studio, six hours. Exploration of visual interpretation of drama. Study of styles and techniques of design, collaborative role of designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study. Letter grading.

15. Introduction to Directing. (4) Lecture, two hours; studio, four hours. Requisite: course 11. Investigation of role of the director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production. Letter grading.

20. Acting Fundamentals. (4) Studio, four hours. Introduction to interpretation of drama through art of actor. Development of improvisation, skills, and discipline in presentation of dramatic material to audiences. PNP or letter grading.

23. Musical Literacy for Singing Actors I. (2) Studio, three to four hours. Introduction to reading and understanding musical notation, musical terminology, and basic to complex rhythm-reading and sight-singing in C major. Letter grading.

26. Alexander Techniques. (2) Studio, three hours. Study and practice in Alexander techniques as method of developing balance, poise, and coordination of body and mind. Exploration of use of rhythm to expand movement potential of actors and relevant use of visual arts and animal studies to character development and expression of movement potential. P/NP or letter grading.

27. From Vaudeville to Standup Comedy. (2) Studio, three hours. Exploration of many aspects of comedy using American vaudeville traditions, acts, and performers as historical base to experience importance of rhythm, timing, delivery, speech, and body language in all styles of comedy, to find value of improvisation/creation as well as innovative writing skills in all comedy forms, to discover how comedy draws from so many art forms, including music/songs, dance, storytelling, clowning, magic, design, and turn- ing/atunts, and to build overall confidence/ease in comic performance. P/NP or letter grading.

28A-28B-28C. Acting, Voice, and Movement Workshops I. (2-2-2) Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units. Letter grading.

28D-28E-28F. Acting, Voice, and Movement Workshops I. (2-2-2) Studio, six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units. Letter grading.

30. Dramatic Writing. (1 to 4) Studio, three hours. Exploration and development of creative writing skills for one or more of various forms of entertainment media. May be taken for maximum of 8 units. Letter grading.

35A-35B-35C. Singing for Musical Theater I. (1-1-1) Studio, four to five hours. Exploration of musical literacy and development of singing techniques for musical theater. Basic voice training to explore how voice works, learn to maintain appropriate and consistent voice, and learn to preserve voice health. How to build stamina and range. Letter grading.

50. Theater Production. (1 to 2) Laboratory, three to six hours. Laboratory experience in various aspects of theater production. Experience may include stage management or member of production crew. May be repeated for a maximum of 8 units. Letter grading.

72. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three hours. Exploration and laboratory experience in one or more of various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be taken for a maximum of 8 units. Letter grading.

Upper Division Courses

101A. Making Tradition. (5) Lecture, four hours; discussion, one hour. Examination of traditional performance traditions in terms of how they were produced, including training techniques, archive practices, and forms of history. Examples may include classical Greek tragedy, Noh and Kyogen, Za Ji and Chuanshi, Quern Querite/English medieval festival plays, Sanskrit drama, fioruba/Egungun, Yaqul deer dance, depending on faculty's discretion. Letter grading.

101B. Reconstructing Theatrical Past. (5) Lecture, three hours; discussion, one hour. Reconstructing theater is understood in several ways: reconstruction of performance spaces and spectacles; and of specific productions and traditions such as neoclassicism that seek to reintegrate classical traditions. Letter grading.

101C. Deconstructing Theater. (5) Lecture, three hours; discussion, one hour. Exploration of deconstructive practices such as fragmentation, abstraction, and decontextualization, with focus on theatrical movements, directorial adaptations, cultural translations, and new forms. Letter grading.

102A. Theater of Japan. (5) Lecture, three hours. Emphasis of study is on the emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Kabuki performance traditions. Letter grading.

102B. Theater of Southeast Asia. (5) Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society. Letter grading.

102C. Cross-Cultural Currents in Theater. (5) Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures. Letter grading.

102E. Theater of Non-European World. (5) Lecture, three hours; discussion, one hour. Survey of theater from point of view as modern discipline. Emphasis is on understanding the development of the theater from the point of view as a process and development of the theater as a part of the human experience. Letter grading.

30A. American African Theater History: Slavery to Mid-1800s. (4) (Same as Afro-American Studies M103A) Lecture, three hours. Designed for juniors/seniors. Examination of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to mid-1800s. Letter grading.

30B. African American Theater History: Minstrel Stage to Rise of American Musical. (4) (Same as Afro-American Studies M103B) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from minstrel stage to rise of American musical. Letter grading.

30C. Origins and Evolution of Chicano Theater. (Bo) (Same as Chicana and Chicano Studies M103C) Lecture, three hours. Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions that led to emergence of Chicano theater. Letter grading.

30E. African American Theater History: Depression to Present. (4) (Same as Afro-American Studies M103E) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from Depression to present. Letter grading.

104A-104B-104C. History of American Theater. (5-5-5) Lecture, three hours. Study of history of influence of different cultures, especially on the development of theater as social institution in America. Letter grading. 104A. Revolutionary War to Civil War; 104B. Civil War to WWI; 104C. WWI to Present.

105. Main Currents in Theater. (5) Lecture, three hours. Seminar examining the major theatrical events that occurred from the beginning of the 19th century to the present. Letter grading.

108. Undergraduate Seminar: History and Criticism. (5) Seminar, four hours. Limited to 15 students. Selected topics in history and criticism of theater and performance. Study of how experimental theaters originate, how they imagine their form of performance, their audience, and their goals. Concentration on theaters that regarded themselves, in some way, as experimental. Examples studied include theaters within the U.S. from the 1960s to the present, although examples from other countries, specifically Poland, also considered. Letter grading.

M109. Art and Performance: Interdisciplinary Approaches. (5) Lecture, four hours; discussion, one hour. Drawing from objects in five major collections at Getty Museum, focus on five parallel historical periods in which political, social, and aesthetic philosophy of the age is examined in musical and dramatic performance. Letter grading.

111A-111B-111C. Selected Topics in European Theater. (5-5-5) Lecture, two hours; discussion, two hours. Examination of nature of performance in theory and practice and of social, historical, and cultural contexts in which performance traditions have evolved. Attendance at approximately five designated performances/events required. P/NP or letter grading.

113. Special Topics in Critical Studies. (5) Lecture, three or four hours. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit. P/NP or letter grading.

116A-116B-116C. Acting II. (4-4-4) Studio, six hours. Development of acting skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to contemporary American scenes. Letter grading.

118A. Creative Dramatics. (4) Lecture/laboratory. Studies of principles and procedures of improvisational approach to drama as done with children from nursery school to junior high.
118C. Interactive Theater. (4) Laboratory. Active, problem-solving process of theater exercises and games designed to encourage racial stereotypes, sexual harassment, gender discrimination, and other issues that divide members of the campus community, as well as issues which divide the campus from the Los Angeles community. Selective social and political awareness of problems and ideas fundamental to intellectual development, exercises and games nurture skills and attitudes useful in facilitating discussions between acts and audience participation. Use of techniques of sensory awareness, movement, pantomime, improvisation, and characterization. Letter grading.

118D. ArtsBridge Teaching Practicum. (4) Lecture, four hours. Requisites: courses 118A, 118B. Development of teaching materials to integrate theater with specific core curricula. Collaboration with classroom teacher to identify core subject to be taught. Language arts, science, history, mathematics, and social science core curriculum areas. Development of evaluation tools to measure effectiveness of incorporating theater materials into curriculum. Weekly meetings to discuss teaching strategies and preparation to present one or more classes that incorporate California Teaching Content Standards, objectives, motivation, detailed implementation of lesson plan, and ideas for assessment. Classroom work culminates in thoroughly documented final project evaluated by ArtsBridge student, classroom teacher, and UCLA faculty members. P/NP or letter grading.

119B. Theater for the Child Audience: Performance. (4) Lecture; two hours; laboratory, four hours. Preparation: audition prior to first class meeting. Designed to provide opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through ensemble work, rehearsal, and preparation of an original production for possible presentation outside the classroom.

120A-120B-120C. Acting and Performance in Film. (5-5-5) (Formerly numbered 120A-120B-120C) Lecture; six hours. Exploration of performance in film. Through screenings of performance-driven films, class discussion, and acting exercises, development of methods, styles, and performances of some of world’s most highly regarded actors and their work. Letter grading.

121. Acting Workshop. (2) Laboratory, to be arranged. Requisite: course 20. Courses 160, 163A, 163B, and 163C may be taken concurrently. Workshop which provides students with opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit.

124A-124B-124C. Voice and Speech II. (1-1-1) Studio, three to four hours. Development of voice and speech techniques for stage. Letter grading.

125A-125B-125C. Movement and Combat III. (1-1-1) Studio, three to four hours. Physical awareness for actors, concentrating on warming up body, relaxation, control, strength, gymnastics, martial arts, and use of weapons. Letter grading.

125D-125E-125F. Movement and Combat III. (1-1-1) Studio, three to four hours. Physical awareness for actors, concentrating on warming up body, relaxation, control, strength, gymnastics, martial arts, and use of weapons. Letter grading.

126A-126B-126C. Acting II. (4-4-4) Studio, six hours. Study of characterization, including introductions to Shakespeare. Approach to verse, spoken word, use of emblems in classic texts. Personalization within heightened reality. Letter grading.

128A-128B-128C. Acting, Voice, and Movement Workshops II. (2-2-2) Studio, four to six hours. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units. Letter grading.

128D-128E-128F. Acting, Voice, and Movement Workshops II. (2-2-2) Studio, six hours. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units. Letter grading.

CM129. Contemporary Topics in Theater, Film, and Television. (4) Lecture/Television (CM129.) Lecture; two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater/film, and television with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelationships among these arts. Individual units participate in production of leading members of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with course CM229.

130A. Fundamentals of Playwriting I. (4) Lecture; three hours; discussion and analysis of dramatic structure, characterization, and narrative leading to guided completion and critique of student-written one-act play. Letter grading.

130B. Fundamentals of Playwriting II. (4) Lecture; three hours plus conference. Requisite: course 130A. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

130C. Writing for American Musical Theater. (4) Lecture/laboratory, three hours. Study of practice and techniques used in musical theater: opening numbers, romance, subplots, and comedy. May be repeated once for credit.

131A. Intermediate Playwriting. (5-5-5) Lecture; three hours. Requisite: course 130A. Exploration of play forms and writing of one-act play. May be repeated twice for credit. Letter grading.

131B. One-Act Play. Requisite: course 131A. Preparation and writing of one-act plays and/or outlining of full-length play. May be repeated twice for credit with consent of instructor. Letter grading.

131C. Full-Length Play. Requisite: courses 131A, 131B. Preparation and writing of full-length play. May be repeated twice for credit with consent of instructor.

C133A-C133B-C133C. Script Development Workshops. (4 to 8 each) Lecture; three hours; studio, three hours; studio, four to 24 hours. Guided process of script development, with emphasis on communication, artistic growth, and professional process. May be taken for a maximum of 8 units. Concurrently scheduled with courses C433A-C433B-C433C. Letter grading.

136. Advanced Acting for Stage. (4) Studio, four hours. Requisite: course 123. Study and practice of art of acting through progression to more advanced acting problems. May be repeated twice for credit. Consecutive enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units. Letter grading.

137A-137B-137C. Continuum Study in Acting for the Stage. (4-4-4) Studio, six hours. Requisite: course 123. Technique of characterization and performance in advanced and complex acting styles. May be repeated once for credit.

138. Special Problems in Performance Techniques. (4) Lecture/laboratory. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

139. Play Reading and Analysis. (5) Lecture, three hours. Investigation of dramatic texts, with focus on play structure, plot, character, dialog, ideas, and various other elements essential to theatrical interpretation and realization. Letter grading.

C140A. Introduction to Programming for Entertainment Design. (4) Studio, three hours. Study and practice in object-based programming using MAX/MSP programming language. May be repeated once for credit. Concurrently scheduled with course C440A. Letter grading.

C140B. Advanced Programming for Entertainment Design. (4) Studio, three hours. Study and practice in object-based programming using MAX/MSP programming language to control sound and video. May be repeated once for credit. Concurrently scheduled with course C440B. Letter grading.

C140C. Advanced Projects in Programming for Entertainment Design. (4) Studio, three hours. Advanced projects using object-based programming to control sound and video. May be repeated once for credit. Concurrently scheduled with course C440C. Letter grading.

C144A-C144B-C144C. Advanced Sound Design. (4-4-4) Lecture; four hours; laboratory, four hours. Concurrently scheduled with courses C444A-C444B-C444C. Letter grading.

C144A. (4) Lecture; four hours; laboratory, four hours. Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of dialogue, effects, and music tracks for the theater sound design. May be repeated once for credit.

C144B. (4) Lecture; four hours; laboratory, four hours. Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and score, conceptual development of the design, and multitrack recording techniques to realize the design. May be repeated once for credit. Letter grading.

C144C. (4) Lecture; four hours; laboratory, four hours. Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of sound and reinforcement in the theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit. Letter grading.

145. Costume Design for the Theater. (4) Lecture/laboratory. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit.
C146A-C146B-C146C. Art and Process of Enter-
tainment Design. (4-4-4 to 8) Lecture. Conceptual-
ization, design, and prototyping of interactive theatri-
cal events. Each course may be repeated once for
credit. Concurrently scheduled with courses C446A-
C446B-C446C. Letter grading.

C146A. (4) Lecture, three hours. Exploration of orig-
inal form of media-rich entertainment experience
through lectures, presentations, and seminar partici-
pation. Students form collaborative teams to conceive
and propose interactive entertainment events. May be
repeated once for credit.

C146B. (4) Lecture, three hours. Prototype develop-
ment; two to five proposals to be more completely de-
fined and developed. Students form collaborative
teams for further conceptual development of their
project proposals. May be repeated once for credit.
Letter grading.

C146C. (4 to 8) Lecture, three to six hours. Prototype
development; conceptual refinement and technologi-
cal realization of prototypes, which may entail cre-
alization of elaborate proposals containing storyboards,
budgets, and models or may involve production of short “performances” demonstrating entertainment
potential of concepts or prototypes. May be repeated
once for credit.

147A. Drafting. (4) Development of visual communi-
cation skills through drafting. Exploration of drafting
for scenic and lighting designs. May be repeated once
for credit.

147B. Rendering. (4) Introductory course in basic
skills necessary for drafting and rendering for scenic,
costume, and lighting design for theater, film, and televi-
sion. May be repeated once for credit. Letter grading.

148. Special Courses in Design and Technical
Theater. (4) Lecture, three hours. Group study of se-
lected subjects in design and technical theater. May be
repeated twice for credit.

149. Introduction to Design. (5) Lecture, three
hours. Exploration of function, design, and
presentation of design through digital design, including study of styles and techniques of design, collaborative role of designer, principles of de-
sign for scenery, lighting, costumes, and sound. Both
technical and aesthetic groundwork for further study.
Investigation of techniques for realization of designs
in production. Letter grading.

150. Theater Production and Performance. (1 to 2)
Laboratory, three to six hours. Laboratory experi-
ence in technical theater production, including
performance in project or production, stage man-
agement, member of crew, or assignment as designer
or assistant on production. May be repeated for max-
imum of units.

C151A. Scenic Design. (4) (Formerly numbered
151A.) Lecture/studio, four hours. Requisites: courses
14A, 14B, 14C. Imagination as impetus for design, text
analysis, metaphor, and conceptualization. Inves-
tigation of design research process, composition, and
style leading to visual presentation of design. May be
repeated once for credit. Concurrently scheduled with
course C451A. Letter grading.

C151B. Scenic Design for Theater. (4) (Formerly
numbered 152B.) Lecture/studio, four hours. Requi-
tes: courses 14A, 14B, 14C. Introduction to and
lighting design for proscenium, thrust, and arena configura-
tions, music theater, and concert lighting. May be repeated
once for credit. Concurrently scheduled with course
C452B. Letter grading.

C151C. Lighting Design for Television. (4) Lecture/
studio. Study of current professional lighting design
practices in television for single- and multi-camera
production. Concurrently scheduled with course
C453C. Letter grading.

C153A. Costume Design. (4) (Formerly numbered
153A.) Lecture/studio, four hours. Requisites: courses
14A, 14B, 14C. Imaginazione as impetus for design, text
analysis, metaphor, and conceptualization. Investi-
gation of design research process, composition, and
style leading to visual presentation of design. May be
repeated once for credit. Concurrently scheduled with
course C453A. Letter grading.

C153B. Costume Design for Theater. (4) (Formerly
numbered 153B.) Lecture/studio, four hours. Requi-
tes: courses 14A, 14B, 14C. Study of costume de-
sign for proscenium, thrust, and arena configurations, mul-
tisite productions, and music theater. May be re-
peated once for credit. Concurrently scheduled with
course C453B. Letter grading.

C153C. Costume Design for Film and Television. (4)
Lecture/studio, four hours. Requisites: courses
14A, 14B, 14C. Professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. May be repeated once for credit. Concurrently sched-
uled with course C453C. Letter grading.

C154A. Sound Design. (4) (Formerly numbered
154A.) Lecture/studio, four hours. Requisites: courses
14A, 14B, 14C. Introduction to and sound and audio
in acoustic, audio, and digital domain. Study of and prac-
techniques for recording, editing, and creating
soundscapes. May be repeated once for credit. Con-
currently scheduled with course C454A. Letter grading.

C154B. Sound Design for Theater. (4) (Formerly
numbered 154B.) Lecture/studio, four hours. Requi-
tes: courses 14A, 14B, 14C. Exploration of sound
design for theater and techniques for mixing, rein-
forcement, and signal processing. Topics include use
of delay, equalization, and microphone placement for
theater sound reinforcement. Study of creation of sound
effects, control of MIDI data, and design tech-
niques for musical theater. May be repeated once for
credit. Concurrently scheduled with course C454B. Letter
grading.

C154C. Sound for Film and Televison. (4) Lecture/
studio. Study of current professional sound recording,
re-recording, mixing, and synchronization practices for
film and television. Concurrently scheduled with
course C454C. Letter grading.

C155A-C155H. Graphic Representation of Design.
(2 each) Studio. Concurrently scheduled with courses

C155A. Perspective Drawing. (2) Studio, four hours.
Requisites: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, in-
cluding one- and two-point perspective, form light,
shade, and textures. Letter grading.

C155B. Watercolor Rendering. (2) Studio, four hours.
Requisite: course 147A or 147B. Study of watercolor
techniques as they relate to interpretation of scenic
designs, including painting of brick, wood, stone, fab-
rics, and other surfaces. Letter grading.

C155C. Marker Rendering. (2) Studio, four hours.
Requisite: course 147A or 147B. Study and practice of marker rendering techniques as a means of com-
munication for scenic and costume designers. Letter
grading.

C155D. Model Making. (2) Studio, four hours. Requi-
tes: course 147A or 147B. Study of the model for rep-
resentation of scenic designs from initial working pro-
totypes to finished color models. Use of wide variety of materials and techniques for execution of the mod-
el. Letter grading.

C155E. Life Drawing. (2) Studio, four hours. Requi-
tes: course 147A or 147B. Study and practice in drawing
of human form. Letter grading.

C155F. Costume Rendering. (2) Studio, four hours.
Requisite: course 147A or 147B. Study of techniques
for rendering theatrical costumes, with emphasis on
figure, clothing, and fabrics. Letter grading.

C155G. Scene Painting Techniques. (2) Studio, four
hours. Requisite: course 147A or 147B. Study of sene-
c painting techniques and materials and their real-
ization of color design and elevations. May be repeat-
ed once for credit. Letter grading.

C155H. Selected Topics in Graphic Representation of
Design. (2) Studio, six hours. Group study of selected
subjects in techniques for interpretation of design for
theater. May be repeated once for credit. Letter grading.

C156A. Introduction to Computer-Assisted Draft-
ing. (4) Studio, four hours. Requisite: course 147A.
Investigation of drafting and editing techniques, draw-
ing floor plan sections, and elevation drawings using
AutoCAD. Concurrently scheduled with course
C456A. Letter grading.

C156B. Advanced Computer-Assisted Drafting.
(4) Studio, four hours. Requisite: course 147A. Inves-
tigation of drafting techniques for scenic and lighting
designs using AutoCAD. Concurrently scheduled with
course C456B. Letter grading.

C156C. Computer-Assisted Rendering. (4) Studio,
four hours. Investigation of three-dimensional lighting
and scenic design previsualization: wire-frame per-
spective drawing and photo-realistic computer rend-
tering techniques using three-dimensional studio. Con-
currently scheduled with course C456C. Letter grad-
ing.

C156D. Introduction to Computer-Assisted Draft-
ing. (4) Studio, four hours. Requisite: course 147A.
Investigation of drawing and editing techniques, draw-
ing floor plan sections, and elevation drawings using
Vectorworks. Concurrently scheduled with course
C456D. Letter grading.

C156E. Advanced Computer-Assisted Drafting.
(4) Studio, four hours. Requisite: course 147A. Inves-
tigation of drafting techniques for scenic and lighting
designs using Vectorworks. Concurrently scheduled with
course C456E. Letter grading.

C156F. Introduction to Computer-Assisted Ren-
dering. (4) Studio, four hours. Investigation of three-
dimensional lighting and scenic design previsualization:
wire-frame perspective drawing and photo-realistic
computer rendering techniques using three-dimensional studio. Con-
currently scheduled with course C456F. Letter grad-
ing.

C157A-C157B-C157C. Costume Construction
Techniques. (2-2-2) Studio, four hours. Study of the-
techniques of drafting, pattern making, fitting, and
construction techniques for period costumes and
undergarments to achieve authentic-appearing cost-
tume using contemporary methods. May be repeated
once for credit. Concurrently scheduled with courses
C457A-C457B-C457C. P/NP or letter grading.

C157A. Requisites: courses 14A, 14B, 14C. Introduc-
tion to drafting, pattern grading fitting, and
spread adaptation. C157B. Requisite: course 157A.
Introduction to costume drafting, construction of peri-
od undergarments. C157C. Requisites: courses 157A, C157B. Draping, patternmaking, and fitting tech-
niques for period garments.

C158A. Scenic Design Technology. (4) Lecture/stu-
dio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization
of scenic designs for theater, film, and television.
Study of advanced techniques and materials for con-
struction, finishing, and rigging of scenery and prop-
erties. Concurrently scheduled with course C458A. Letter
grading.

160. Fundamentals of Play Direction. (5) Lecture, two hours; laboratory, four hours. Required of Theater majors. Course 121 may be taken concurrently. Basic theories of play direction. Foundations for understanding and preparation of scenes under rehearsal conditions.

163A. (4) Lecture/studio. Requisite: course 15. Intensive development of directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions. Letter grading.

C163D. Directing Project for the Stage. (5) Discussion, three hours; laboratory, four to eight hours. Requisites: courses 101A, 163C. Application of stage directing techniques in production of short play or project. Students direct one-act play or project. May be repeated once for credit. Concurrently scheduled with course C285D. Letter grading.

170. Design and Production Project. (4) Laboratory, eight hours. Requisites: courses 14A, 14B, 14C. Experience as stage manager or designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs, or stage management in production. May be repeated once for credit. Letter grading.

171A. Advanced Theater Laboratory. (1 to 4) Hours to be arranged. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of 4 units.

171B. Advanced Theater Laboratory. (1 to 4) Hours to be arranged. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of 4 units.

172. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Exploration and laboratory experience in one or more various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for maximum credit. Letter grading.

173A. Design Assignment: Assistant Designer. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as an assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

173B. Production Design Assignment: Designer. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as a designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

174B. Project in Stage Management. (3) Studio, nine hours. Requisite: course 174A. Laboratory experience in the professional duties of assistant stage manager, including participation as an assistant stage manager in production, rehearsal, and performance phases of a production. May be repeated once for credit. Letter grading.

174C. Project in Stage Management. (4) Studio, 12 hours. Requisite: course 174A. Laboratory experience in professional duties of stage manager, including participation as stage manager in production, rehearsal, and performance phases of production. Problems of unions, auditions, organization, scheduling, and responsibility of a lengthy run. May be repeated three times for credit. Letter grading.

175A-175C-175D. Summer Theater Workshops. (4 or 8 each) Laboratory, 12 to 24 hours. Participation in various aspects of theater production and performance. Offered in summer only. Letter grading.

175B. Summer Theater Workshop. (1 to 4) Laboratory, three hours. Participation in various aspects of theater production and performance. Offered in summer only. Letter grading.

M178. Film and Television Acting Workshop. (2) Same as Film and Television M177.) Laboratory, four hours. Workshop providing opportunities for students to rehearse, perform, and evaluate scenes. Three different production styles to which performers may need to adjust are (1) preparation rehearsal with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.

180. Senior Project. (4) Lecture or studio, three hours. Requisites: courses 101A, 101B, 101C. Preparation of conceptual or creative project to provide culminating experience in production of creative or research work. May be repeated twice for credit. Letter grading.

181. Career Development for Actors. (2) Lecture, three hours; fieldwork, three hours. Limited to seniors. Study of business practices, career entry, and development for actors. P/NP or letter grading.

C185A. Role of Producer in Professional Theater. (2) Lecture, three hours. Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C285A. P/NP or letter grading.

C185B. Role of Management in Educational and Community Theater. (2) Lecture, three hours. Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C285B. P/NP or letter grading.

M187. Art Alive: Art and Improvisation in Museums. (Non-Seminar) (College M116) Seminar, four hours. Offered in collaboration with Los Angeles County Museum of Art (LACMA). Interpretation of art in collection through acting, dialogue, movement, music, and text, with research in art history and production of creative performance piece required. P/NP or letter grading.

195. Community or Corporate Internships in Theater, Film, and Television. (2, 4, or 8) Tutorial, eight, 16, or 24 hours. Limited to juniors/seniors. Internship at various theaters, studios, or entertainment organizations accentuating creative contributions, organizations, and work of professionals in their various specialties. Students meet on regular basis with instructor and provide periodic reports of their experience. May be taken for maximum of 8 units. Individual contract with supervising faculty member required. Letter grading.

199. Directed Research or Senior Project in Theater. (2 to 8) Tutorial, three hours. Limited to seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

202A. Seminar: Western Classical Theater. (4) Discussion, three hours. Designed for graduate students. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

202B. Seminar: Medieval Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

202C. Seminar: Renaissance and Baroque Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

202D. Seminar: Bourgeois and Romantic Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

202E. Seminar: Modern Consciousness in Theater. (4) Discussion, three hours. Designed for graduate students. Study of prototypes of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit.

202F. Seminar: Modern Realism. (4) Discussion, three hours. Designed for graduate students. Selected studies of theater's response to science and technology, politics, and revolution. May be repeated twice for credit.

202G. Seminar: Modern Theatricalism. (4) Discussion, three hours. Designed for graduate students. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

202M. Seminar: American Theater. (4) Discussion, three hours. Designed for graduate students. Select ed studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

202P. Seminar: Traditions of African Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

202R. Seminar: East Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

202S. Seminar: South Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.
202T. Seminar: Southeast Asian Theater. (4) Discussion, three hours. Designed for graduate students. Investigation of a selected area of theater and drama study that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

206. Themes in World Theater and Drama. (5) Seminar, four hours. Designed for graduate students. Selected topics in world theater history. Dramaturgy, production, and/or architecture organized on a thematic basis. May be repeated four times for credit.

207A-207B. Theater Aesthetics. (4-4) Designed for graduate students. Discussion of essential issues in aesthetic theories of art and drama based on philosophy of art and theories of the theater. 207A. Classical and Medieval Theories of Art and Theater; 207B. Renaissance Theories of Art and Theater to the Present.

208A-208B. Dramaturgy I, II. (4-4) Lecture, three hours; laboratory, one hour. Designed for graduate students. Letter grading. 208A. Theoretical and practical aspects of the dramaturge’s work in contemporary theater; 208B. Requisite: course 208A. Continuation of study of theory and practice of dramaturgy.

208C. Practicum in Dramaturgy. (2 to 12) Laboratory, to be arranged. Requisites: courses 208A, 208B. Demonstration of competence in practice of dramaturgy through completion of approved dramaturgical assignment. May be taken for maximum of 12 units. Letter grading.

209. Theater Authors. (5) Designed for graduate students. Investigation of work of a theater artist from history of world theater. Emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

210. Topics in World Theater and Drama. (5) Designed for graduate students. Investigation of selected topics in world theater history.戏剧学 and dramatic form. May be repeated four times for credit.

216A. Approaches to Representation. (5) Lecture, three hours; laboratory, one hour. Overview of strategies of representation from classical aesthetic theories to postmodern deconstructions of them. May be repeated once for credit. Letter grading.

216B. Approaches to History. (5) Lecture, three hours; laboratory, one hour. Overview of key methodological theories, and debates in historiography of theater and performance linked to plays and performances appropriate to approach. Letter grading.

216C. Approaches to Identification. (5) Lecture, three hours; laboratory, one hour. Overview of key theories, directors, and performance texts of identifystructural boundary between audience member or scholar and theatrical or performance object. Letter grading.

220. Graduate Forum. (1 to 2) Seminar, one to two hours. Limited to graduate theater students. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

221. Introduction to Performance Studies. (5) Seminar, three hours. Investigation of performance as sustained practice in traditional disciplines such as theater, music, and dance and as lens to focus thinking about human experience in fields such as philosophy, literature, cultural anthropology, linguistics, education, and law. Emphasis on establishing interdisciplinary dialogue across many fields. Letter grading.

229. Contemporary Topics in Theater, Film, and Television. (2) Same as Film and Television CM229. Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overviews of writing for alternative audiences in the collaborative effort; examination of distinctive and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with course CM129.

230A-230B-230C. Writing for the Contemporary Theater. (4 to 6 each) Lecture, three hours; studio, two hours. Designed for graduate students. Letter grading. 230A. One-Act Play. Analysis of stage and dramatic structure of selected contemporary short plays leading to the guided completion and critique of student-written one-act plays. 230B. Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to the guided completion and critique of a student-written full-length play. 230C. Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to the guided completion and critique of student work.

231. Special Topics in Playwriting. (4) Lecture, three hours. Analysis and practice of various aspects of playwriting. Variable content selected from topics such as comedy writing, docudrama, experimental theater. May be repeated twice for credit. Letter grading.

232. Manuscript Analysis. (4) Lecture, three hours. Designed for graduate students. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

242. Introduction to Design in Production. (4) Lecture or studio, four hours. Introduction to process of design for entertainment, collaborative role of designer, and realization of designs in production. May be repeated once for credit. Letter grading.

243A-243B-243C. Scenic Design. (4-4-4) Advanced study and practice in scenic design for theater. Emphasis on design and critique of design for production. Each course may be taken for a maximum of 8 units. Letter grading.

244A-244B. Advanced Theater Production. (2 to 8 each) Studio, 12 to 24 hours. Designed for graduate students. Creative participation in preparation and presentation of a theatrical production. Each course may be taken for a maximum of 8 units. Letter grading.

245. Production Management. (4) Lecture, three hours. Study in production management for the theater. Examination of professional duties of production manager, including preparation, rehearsal, and performance phases of a production. Problems of scheduling, production management, labor negotiation, and budgeting while maintaining a creative and collaborative environment. Letter grading.
266. Theatrical Conceptualization. (4) Examination of process of conceptualization in dramatic production; centrality of theatrical conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimuli for theatrical conceptualization, with focus on collaborative aspect of theatrical production. Letter grading.

272. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Exploration and laboratory experience in one or more various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for a maximum of 24 units. Letter grading.

C285A. Role of Producer in Professional Theater. (2) Lecture, three hours. Designed for graduate students. Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C185A. S/U or letter grading.

C285B. Role of Management in Educational and Community Theater. (2) Lecture, three hours. Designed for graduate students. Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C185B. S/U or letter grading.

298A-298B. Special Studies in Theater Arts. (2 to 4 each) Lecture, three to six hours. Seminar study of problems in theater arts, organized on topic basis. May be repeated once for credit.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

420A-420B-420C. Advanced Acting I. (4 to 8-4-4) Studio, six to 18 hours. Letter grading.

420A. (4 to 8) Studio, six to 18 hours. Development of an internal technique, beginning with an autodrama which is a dramatization of one's personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing the circumstances, life of the character, and intentions of the scene. Letter grading.

420B. (4) Studio, six to 18 hours. Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how the actor goes about doing research and fieldwork on the character being played. Letter grading.

420C. (4) Studio, six to 18 hours. Development of an external technique through comedy and of skits, improvisation, physical humor, delivery of a line, rhythm, timing, and public cabaret. Fusion of the internal, use of action and object with the external. Letter grading.

421A-421B-421C. Advanced Acting II. (4 or 8 each) Studio/laboratory, six to 18 hours. Letter grading.

421A. Extending the idea of autobiography and using it as art. The actor as performance artist. Playing characters quite removed from oneself. Using Shakespeare and oneself to play him. 421B. Continued character behavior study through analysis of language used by actors and directors in film and television production and subtle differences between acting for stage and camera. Working in multicamera studio environment, students prepare and tape scenes for analysis. May be repeated twice for credit. Letter grading.

424A-424B-424C. Advanced Acting and Voice I. (2 or 4 each) Studio/laboratory, three to six hours. Development of voice and speech techniques for the stage, including those of relaxation, breathing, resonance, and development of speaking voice. Speech training utilizes International Phonetic Alphabet to train students in standard American speech. Text work in poetry and prose. Letter grading.

424D-424E-424F. Advanced Acting and Voice II. (2 or 4 each) Studio/laboratory, three to six hours. Advanced voice problems. Extension of first-year work, with increased demands on voice. Range, resonance, and breathing capacity extension. Articulation and phonetic alphabet. Text work in classical verse. Letter grading.

424G-424H-424I. Advanced Speech and Voice III. (2 or 4 each) Studio, three to six hours. Extension of second-year work, with increased demands on voice/speech, range, resonance, and breathing capacity extension. Application of learning and training in International Phonetic Alphabet to create dialects of characters, as well as as systematic approach to creating dialect charts. Letter grading.

425A-425B-425C. Advanced Movement I. (2 or 4 each) Studio/laboratory, three to six hours. Discovery of body's unique language through exercises designed to explore and free the total instrument. Development of a flexible actor with range, expression, and confidence physically. Awakening of the imagination while exploring the worlds of ritual, animal, conceptual, and modern dance movements. Letter grading.

425D-425E-425F. Advanced Movement II. (2 or 4 each) Studio/laboratory, three to six hours. Presentation of a more complete picture of stage movement and its relationship to theater, music, and dance. Advancement of physical training of individual actors to their maximum potential. Experience in techniques and discovery of origins of a variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques. Letter grading.

425G-425H-425I. Advanced Movement III. (2 or 4 each) Studio, three to six hours. Advanced physical training for actors in set and costume design, dance, or combat discipline: capoeira, martial arts, ballet, ballroom, period dance, circus techniques. Letter grading.

426A-426B-426C. Alexander Techniques. (2 or 4 each) Studio, three to six hours. Study and practice in Alexander techniques as method of developing balance, poise, and coordination of body and mind. Exploration of use of rhythm to expand movement potential of actors and relevant use of visual arts and animal studies to character development and to expansion of movement potential. Letter grading.

430A-430B-430C. Advanced Studies in Playwriting. (4 to 8 each) Lecture, three hours. Limited to M.F.A. playwriting program students. Guided completion of full-length scripts for production.

431. Special Topics in Playwriting. (4) Discussion, three hours. Designed for M.F.A. playwriting program students. Analysis and practice of various aspects of playwrights art. Vaelected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theater, or improvisational techniques. May be repeated twice for credit.

C433A-C433B-C433C. Script Development Workshop. (2 to 4 each) Lecture, three hours; studio, four to 24 hours. Designed for graduate students. Guided process of script development, with emphasis on communication, artistic growth, and professional process. Each course may be taken for a maximum of 8 units. Concurrently scheduled with courses C133A-C133B-C133C. Letter grading.

C435A-C435B-C435C. Advanced Problems in Writing for the Stage. (0-0-2) Lecture. Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of 6 units. In Progress (C435A, C435B) and S/U (C435C) grading.

C440B. Advanced Programming for Entertainment Design. (4) Studio, three hours. Study and practice in object-based programming using MAX/MSP programming language to control sound and video. May be repeated once for credit. Concurrently scheduled with course C140B. Letter grading.

441A-441B-441C. Lighting Design. (4-4-4) Lecture/studio. Letter grading.

441A. (4) Lecture/studio. Study and practice in lighting the actor, emphasizing textual and character analysis from lighting designer's perspective, conceptual development with the director, effect of light on dynamics of staging, use of color in light, and relationship of lighting designer to the actor. May be repeated once for credit. Letter grading.

441B. (4) Lecture/studio. Study of use of light and color to define space, effect of lighting on scenery and costumes, lighting for arena/thrust theaters, multimedia productions, lighting patterns, and moving scenery. May be repeated once for credit. Letter grading.

441D. Scene Projection and Media Techniques. (4) Lecture/laboratory. Designed for graduate students. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage.

442A-442B-442C. Costume Design. (4-4-4) Lecture/studio. Advanced study and practice in costume design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, period style, and character analysis leading to visual presentation of the design. Study of costume design for theatrical productions, ballet, opera, and musical theater. May be repeated once for credit. Letter grading.

443. Problems in Design. (2 or 4) Lecture/laboratory, four hours (additional hours as required). Study and practice in design techniques for theater. May be repeated for a maximum of 24 units. Letter grading.

444A-C444B-C444C. Advanced Sound Design. (4-4-4) Lecture, four hours; laboratory, four hours. Concurrently scheduled with courses C144A-C144B-C144C. Letter grading.
C444A. (4) Lecture, four hours; laboratory, four hours. Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, automation, and reproduction of dialogue, effects, and music tracks for theater and sound design. May be repeated once for credit. Letter grading.

C444B. (4) Lecture, four hours; laboratory, four hours. Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and concept, conceptual development of the design, and multimedia recording techniques to realize the design. May be repeated once for credit. Letter grading.

C444C. (4) Lecture, four hours; laboratory, four hours. Study and practice in processing and mixing of live and recorded sound; max-down of multitrack recordings; preparation of sound tracks and sound reinforcement in theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit. Letter grading.

445A-445B. Production Design for Film, Television, and Entertainment Media. (4-4) Lecture/studio, four hours. Study and practice in design of scenic environment for film, video, and entertainment media, including use of software on design choices, role of production designers and art directors, and design for single- and multiple-camera production. Each course may be repeated once for credit. Letter grading.

C446A-C446C. Art and Process of Entertainment Design. (4-4 to 6) Lecture. Conceptualization, design, and prototyping of interactive theatrical events. Each course may be repeated once for credit. Concurrently scheduled with courses C446A-C446B-C446C. Letter grading.

C446A. (4) Lecture, three hours. Exploration of original forms of media-rich entertainment experience through lectures, presentations, and seminar participation. Students form collaborative teams to conceive and propose interactive entertainment events. May be repeated once for credit. Letter grading.

C446B. (4) Lecture, three hours. Prototype development; two to five proposals to be more completely defined and developed. Students form collaborative teams for further conceptual development of their project proposals. May be repeated once for credit. Letter grading.

C446C. (4 to 8) Lecture, three to six hours. Prototype development; conceptual refinement and technological realization of prototypes, which may entail creation of elaborate proposals containing storyboards, budgets, designs, concept, and other work involving production of short "performances" demonstrating entertainment potential of concepts or prototypes. May be repeated once for credit. Letter grading.

448A-448B. Costume Design for Film, Television, and Entertainment Media. (4-4) Lecture/studio, four hours. Study and practice in design of costumes for live and virtual characters in film, television, and entertainment media, including effect of differing media on design choices. Each course may be repeated once for credit. Letter grading.

449. Design Thesis Project. (4) Lecture/studio, four hours. Series of group design projects that serve as comprehensive examination for M.F.A. degree in entertainment design. Also may involve production of short "performances" demonstrating entertainment potential of concepts or prototypes. May be repeated once for credit. Letter grading.

C451A. Scenic Design. (4) Lecture/studio, four hours. Introduction to design for film, television, and multimedia. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. Concurrently scheduled with course C451A. Letter grading.

C451B. Scenic Design for Theater. (4) Lecture/studio, four hours. Study of scenic design for proscenium, thrust, and arena configurations, multiset productions, and music theater. May be repeated once for credit. Concurrently scheduled with course C451B. Letter grading.

C451C. Production Design for Film, Television, and Video. (4) Lecture/studio, four hours. Study of role of art director, scenic design for single-camera and multicamera production, and set decoration. May be repeated once for credit. Concurrently scheduled with course C451C. Letter grading.

C452A. Lighting Design. (4) Lecture/studio, four hours. Study of production design for proscenium, thrust, and arena configurations, music theater, and concert lighting. May be repeated once for credit. Concurrently scheduled with course C452A. Letter grading.

C452B. Lighting Design for Theater. (4) Lecture/studio, four hours. Study of lighting design for proscenium, thrust, and arena configurations, music theater, and concert lighting. May be repeated once for credit. Concurrently scheduled with course C452B. Letter grading.

C453A. Costume Design. (4) Lecture/studio, four hours. Study of costume design for script, text analysis, concept, metafor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. Concurrently scheduled with course C453A. Letter grading.

C453B. Costume Design for Theater. (4) Lecture/studio, four hours. Study of costume design for proscenium, thrust, and arena configurations, multiset productions, and music theater. May be repeated once for credit. Concurrently scheduled with course C453B. Letter grading.

C453C. Costume Design for Film and Television. (4) Lecture/studio, four hours. Study of current professional costume design for single-camera and multicamera production, and set decoration. May be repeated once for credit. Concurrently scheduled with course C453C. Letter grading.

C454A. Sound Design. (4) Lecture/studio, four hours. Introduction to sound and audio in acoustic, video, and. audio, and digital domain. Study and practice of techniques for recording, editing, and creating soundscapes. May be repeated once for credit. Concurrently scheduled with course C454A. Letter grading.

C454B. Sound Design for Theater. (4) Lecture/studio, four hours. Exploration of sound design for theater, and technologies for mixing, reinforcement, and signal processing. Topics include use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit. Concurrently scheduled with course C454B. Letter grading.

C454C. Sound for Film and Television. (4) Lecture/studio. Study of current professional sound recording, re-recording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C454C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill. Letter grading.

C455A. Perspective Drawing. (2) (2) Lecture. Introduction to use of pencil and pen to communicate design ideas, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

C455B. Watercolor Rendering. (2) (2) Lecture. Study of watercolor techniques and the application of design techniques, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

C455C. Marker Rendering. (2) Lecture. Study of marker rendering techniques as a means of communication for scenic and costume designers. Letter grading.

C455D. Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill. Letter grading.

C455E. Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.

C455F. Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for creating theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

C455G. Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Letter grading.

C455H. Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated once for credit. Letter grading.

C456A. Introduction to Computer-Assisted Drafting. (4) Studio, four hours. Requisite: course 147A. Investigation of drawing and editing techniques, drawing floor plan sections, and elevation drawings using AutoCAD. Concurrently scheduled with course C456A. Letter grading.

462. Advanced Directing. (8 or 12) Studio, 12 or 30 hours. Designed for graduate students. Advanced problems in directing for theater, film, and television. May be repeated for maximum of 24 units. Letter grading.

463. Production Project in Direction for the Stage (8 or 12 units). Studio, 24 hours. Designed for graduate students. Creative participation as director in conceptualization and preparation of a dramatic work. Letter grading.

472. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Exploration and laboratory experience in one or more various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for maximum of 24 units. Letter grading.

474. Advanced Projects in Design and Production. (4) Lecture/studio, four hours. Study and practice in preparation and execution of designs for theater, film, video, and related entertainment forms. As contributing artistic member of design team, creative responsibilities include designer, technical supervisor, or production manager. May be repeated for maximum of 16 units. Letter grading.

495A-495B-495C. Practicum and Practice in Teaching Theater. (2-2-2) Seminar, to be arranged; discussion, two hours. Limited to Ph.D. students. Study and practice of teaching theater at university level. Orientation and preparation of graduate (Ph.D.) students who have responsibility to assist in teaching undergraduate courses in department. Discussion of problems common to the teaching experience. Letter grading.

498. Professional Internship in Theater, Film, and Television. (4, 8, or 12) Full- or part-time at a studio or on a professional project. Designed for advanced M.F.A. students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Directed Individual Studies: Research. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596B. Directed Individual Studies: Writing. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596C. Directed Individual Studies: Directing. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596D. Directed Individual Studies: Design. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596E. Directed Individual Studies: Acting. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

596F. Directed Individual Studies: Production. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations in Theater Arts. (2 to 8) Tutorial, to be arranged. May be repeated for a maximum of 12 units. S/U grading.

Scope and Objectives
The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with nonprofit and private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers an undergraduate minor in Urban and Regional Studies, a two-year Master of Arts degree, and a Ph.D. degree. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, an M.Arch. I in the Department of Architecture and Urban Design, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every
avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. Student organizations provide an interesting program of extracurricular activities.

Undergraduate Study

Urban and Regional Studies Minor

The scale, diversity, balkanized governance, and natural environment of Southern California all contribute to making it an extraordinary natural laboratory for learning about urban and regional issues, whether the focus is on immigration, employment, the built environment, transportation, poverty, natural resources, or a host of other challenges. The Urban and Regional Studies minor offers undergraduate students a means to address some of these issues from an interdisciplinary perspective, giving a balanced mixture of theory, practice, and service learning courses.

To enter the minor, students must be in good academic standing with an overall grade-point average of 2.0 or better, have completed 90 or more units, and complete either Urban Planning 120 or 121 with a grade of C or better. An introductory course in geography, political science, or sociology is recommended. For further information, contact the program director or counselor at (310) 206-4613.

Required Courses (28 units): (1) Urban Planning 120 or 121 with a grade of C or better; (2) five elective courses from at least two departments, selected as follows: (a) at least three courses from Public Policy 10A, 104, C115, M120, C147, Urban Planning 120 (unless taken under item 1), 121 (unless taken under item 1), 130, C133, 141, M150, CM160, CM165, M175, C184 and (b) two courses from Anthropology 167, Chicana and Chicano Studies 181, Geography 150, History 145A, 145B, Management 175, Political Science 143B, Sociology 158 (students may petition to include a School of Public Affairs course not listed above to fulfill an elective requirement); (3) capstone project that may be satisfied by one of the following: (a) Urban Planning 185SL — service learning project; or (b) Urban Planning 199 or a 199 in the College of Letters and Science with a faculty mentor affiliated with this minor — individual research project.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

Urban Planning

Upper Division Courses

120. Introduction to Cities and Planning. (4) Lecture, three hours. Survey of urban history and evolution in U.S., urban social theory, current growth trends, system of cities, urban economy and economic restructuring, traditional and alternative location theories, urban transportation, and residential location and segregation. P/NP or letter grading.

121. Urban Policy and Planning. (4) Lecture, three hours. Examination of current urban planning and policy issues and debates, such as normative theories of good urban form, metropolitan organization and governance, economic development and growth management, edge cities, spatial mismatch hypothesis, urban poverty, racial/ethnic inequality, gender and urban structure, sustainability, and future of cities. P/NP or letter grading.

M122. Policy, Planning, and Community. (4) (Same as Asian American Studies M108.) Lecture, three hours; field laboratory. Project-oriented methods on conducting needs assessment in Asian American communities. Geographic information systems to be used to define problems and needs. Letter grading.

129. Special Topics in Urban Policy and Research. (4) Lecture, three hours. Examination of particular planning/policy subfield (e.g., economic development, environmental planning, housing and community development, international planning and development, land use, or urban design) in some depth. Specific topic area rotates depending on instructor. May be repeated for credit with topic change. P/NP or letter grading.

130. Fundamentals of Urban and Regional Economics. (4) Lecture, three hours. Preparation: one introduction to microeconomics course. Most U.S. population lives and works in urbanized areas, and world’s population is becoming more urbanized with each passing decade. National, state, and local governments are engaged in managing, planning, policymaking, and governance in urban context. Ultimate efficacy of those public activities can be enhanced by understanding of economic forces acting on urban areas. Basic concepts related to location choice, agglomeration effects, economies of scale, and specialization by cities and transportation. P/NP or letter grading.

C133. Political Economy of Urbanization. (4) Lecture, three hours. Introduction to approaches to urban studies, basic concepts and analytical approaches of urban economic policy, with major emphasis on American urban problems and restructuring of modern metropolitan. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crises, and role of urban social movements. Concurrently scheduled with course C233. P/NP or letter grading.

CM137. Southern California Regional Economy. (4) (Same as Labor and Workplace Studies M180.) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and guest lectures by regional experts included. Concurrently scheduled with course C237C. Letter grading.

M140. Issues in Latina/Latino Poverty. (4) (Same as Chicana and Chicano Studies M121.) Lecture, three hours. Examination of nature and extent of urban and rural poverty confronting Latina/Latino population in U.S. Special emphasis on antipoverty policies of government and nonprofit organizations and social planning and economic development strategies. Attention also to literature on underclass. Letter grading.

141. Planning for Minority Communities. (4) Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues that affect implementation. P/NP or letter grading.

M150. Transportation Geography. (4) (Same as Geography M149.) Lecture, three hours. Designed for juniors/seniors. Study of geographical aspects of transportation, with focus on characteristics and functions of various modes and on complexities of intra-urban transport. P/NP or letter grading.

151. Urban Transportation Economics. (4) Lecture, three hours. Big cities offer many attractions, but high density also produces traffic congestion and air pollution. Can we have dense urban areas without congested traffic and polluted air? Analysis of economic explanations for transportation problems and examination of possible solutions. Because university campuses resemble small cities, they are used as examples to explore various policies (such as BruinGO at UCLA) that universities have adopted to improve transportation. Letter grading.

CM160. Environmental Politics and Governance. (4) (Same as Environment M164.) Lecture, three hours. Environmental planning is more than simply finding problems and fixing them. Each policy must be negotiated and implemented within multiple, complex systems of governance. Institutions and politics matter deeply. Overview of how environmental governance works in practice and how it might be improved. Concurrently scheduled with course C260. Letter grading.

M162. Land Use and Development. (4) (Same as Environment M162.) Lecture, four hours. Examination of institutional and historical evolution of land use in U.S. Comparison and contrasting of how cities have evolved in different parts of U.S. and some recent trends in urbanization. Relationship of state-level land-use policies and politics and ways in which localities plan. Environmental, social, and equity aspects of different patterns of urbanization and likely trends into future. Letter grading.

M163. California Sustainable Development: Economic Perspective. (4) (Same as Environment M135 and Public Policy M149.) Lecture, three hours. Examination of specific environmental challenges that California faces. Microeconomic perspective used, with special emphasis on incentives of pollutants to reduce their pollution and incentives of local, federal, and state government to address these issues. Focus on measurement and empirical hypothesis testing. P/NP or letter grading.
Graduate Courses

M201. Theories of Architecture. (4) (Same as Architecture and Urban Design M201.) Lecture, three hours. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding nature of speculative inquiry in architectural context. Letter grading.

M202A-202B. Public Control of Land Development. (3 to 6 each) (Same as Law M286.) Lecture, three hours. Course M202A is enforced requisite to M202B. Analysis of legal and constitutional constraints on land use planning and in administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required. In Progress (M202A) and S/U or letter (202B) grading.

M203A-203B. Seminar: Urban Affairs. (3 to 6 each) (Formerly numbered M202C.) (Same as Law M252.) Seminar, three hours; two field trips. Course M203A is enforced requisite to M203B. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antisequestration and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered. In Progress (M203A) and S/U or letter (203B) grading.

M204. Research Design and Methods for Social Policy. (4) (Same as Public Policy M218.) Lecture, three hours; outside study, nine hours. Limited to graduate students. How to become more sophisticated consumers and producers of quantitative and qualitative policy research. In first half of course, formal principles of research design; in second half, various data collection methods, including ethnography, interviewing, and survey design. Letter grading.

M206A. Introduction to Geographic Information Systems. (4) (Same as Public Policy M224A.) Lecture, three hours; laboratory, one hour. Preparation: one graduate-level statistics course, familiarity with one packaged statistics program. Principles of Geographic Information Systems (GIS) and applied techniques and Regional Studies minors. Internship in supervised setting in community agency or urban planning setting. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervisor required. May be repeated for credit. Individual contract required. P/NP or letter grading.

M206B. Advanced Geographic Information Systems. (4) (Same as Public Policy M224B.) Lecture, four hours; laboratory, four hours. Requires course M206A or Public Policy M224A. Principles and skills of geographic analysis and modeling; managing, processing, and interpreting spatial data. Especially useful for students interested in environmental, demographic, and public policy analysis. Scripts (ArcView), modeling (Spatial Analyst), network analysis, and transportation modeling (Tранскей). Letter grading.

207. Applied Microeconomics for Urban Planning. (4) Lecture, three hours. Preparation: passing score on microeconomics examination given first day of class. Practical use of economics in analyzing public resource allocation problems. Topics include review of marginal analysis, difference between equity and efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality. Letter grading.

208A. Colloquium in Planning Research. (4) For- merly numbered 210C.) Lecture, one hour; discussion, two hours. Required of first-year Ph.D. students. Introduction to design and execution of planning research. Exploration of such planning scholarship and approaches to research on contemporary planning topics. Preparation and filing of Ph.D. program of study. Letter grading.

208B. Introduction to Research Design. (4) Formerly numbered 208B.) Seminar, three hours. Required in first or second year of Ph.D. program. Identification of planning problems, formulation of research questions, review of literature and identification of gaps, development of researchable hypotheses, understanding of strengths and weaknesses of qualitative and quantitative methodologies, understanding of threats to validity, review of critiques of traditional methods and of alternative approaches to scholarship. Letter grading.

208C. Advanced Research Design. (4) Seminar, three hours. Required of Ph.D. students. Development of dissertation proposal for Ph.D. students who have passed their field examinations but have not yet advanced to candidacy. S/U or letter grading.

209. Special Topics in Planning Theory. (4) Lecture, three hours. Topics in planning theory selected by faculty members. May be repeated for credit. S/U or letter grading.

211. Law and Quality of Urban Life. (4) Lecture, three hours. Introduction to law as urban system, directed primarily toward those interested in intersection of law and policy: broad array of urban issues examined, as is law's role as partial cause and cure of urban problems. Examination of law as changing process rather than collection of principles, so that students develop facility to interact with law and lawyers in positive and forceful manner. S/U or letter grading.

212. International/Comparative Planning Workshop. (4) Seminar, three hours; field trips, five to 10 days. Topics of planning and policy in various international or domestic sites. Topics may include urban design, urban development, urban governance, land use, environmental issues, transportation, infrastructure planning, housing development, community development, and/or physical planning. May be repeated for credit. S/U or letter grading.

M215. Spatial Statistics. (4) (Same as Geography M272 and Statistics M222.) Lecture, three hours. Designed for graduate students. Survey of modern methods used in analysis of spatial data. Implementation of various techniques using real data sets from diverse fields, including environmental, geography, seismology, demography, and environmental science. S/U or letter grading.

218. Graphics and Urban Information. (4) Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of built environment. Development of fundamental skills of graphic ideation and communication. Letter grading.

219. Special Topics in Built Environment. (4) Lecture, three hours. Topics in built environment selected by faculty members. May be repeated for credit. S/U or letter grading.

220A. Quantitative Analysis in Urban Planning I. (4) Lecture, three hours; laboratory, 90 minutes. Preparation: passing the mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic techniques of planning and descriptive statistical methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as tool in analysis of planning-related data. Letter grading.

220B. Quantitative Analysis in Urban Planning II. (4) Lecture, three hours; laboratory, 90 minutes. Requirement: course 220A or equivalent as demonstrated by passing the mathematics proficiency examination given first day of class 220A. Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling techniques, analysis of variance, correlation, and simple and multiple regression. Use of computer as tool in statistical analysis and modeling. Letter grading.

222A. Introduction to Planning History and Theory I. (Formerly numbered 222.) Lecture, three hours. Required of first-year M.A. students, typically in Fall Quarter; required of first-year Ph.D. students who have not completed comparable graduate course in planning history and theory. Exploration of planning thought and practice over time, leading authors and key issues in field of planning, traditional and insurgent historical approaches to planning for multiple and pluralistic publics. Letter grading.

222B-222C. Advanced Planning Theory and History I, II. (Formerly numbered 210A-210B.) Lecture, three hours. Required of first-year M.A. students, typically in Fall Quarter; required of first-year Ph.D. students who have not completed comparable graduate course in planning history and theory. Topics in planning history and theory. Examination of development of fundamental skills of graphic ideation and communication. Letter grading.

223A. Conservation in Inhabited Landscapes. (4) Lecture, three hours. Recommended preparation: course 234A. Development more thoroughly of themes raised in earlier courses. Topics may include peasanties, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor. Letter grading.

223C. Resource-Base Development. (4) (Same as Geography M223C.) Discussion, three hours. Recommended preparation: course 234A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of state, corporations, and local groups, and institutional structure and social impact of its development. Letter grading.

223A-235B. Urbanization in Developing World I, II. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Course 235A is requisite to 235B. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates. Letter grading.

223A. Sectoral Analysis. (4) (Same as Public Policy M240.) Lecture, three hours; discussion, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Letter grading.

236C. Advanced Workshop on Regions in World Economy. (4) Lecture, three hours. Required preparation: course 236B. Advanced workshop on regional development examining both micro and macro policy systems, their geographies, and processes that affect regional performance in globalized environment. Letter grading.

237A. Sectoral Analysis. (4) Lecture, three hours; laboratory, one hour. Introduction to methods and procedures of sectoral investigation as applied to regions, industries, and companies. Survey of different approaches to these problems. Discussion of recent developments. Letter grading.

237B. Urban and Regional Economic Development Applications. (4) Lecture, three hours. Survey and analysis of economic development strategies in U.S. Because economic development strategies seek to modify or shape existing conditions, focus on how policies attempts to harness dynamics associated with new forms of industrialization, intensified global competition, and interrelationships among capital, labor, and state. Letter grading.

237C. Southern California Regional Economy. (4) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and garment centers by regional experts included. Concurrently scheduled with course CM137. Letter grading.

239. Special Topics in Regional and International Development. (4) Seminar, three hours. Topics in urban and regional development selected by faculty members. May be repeated for credit. S/U or letter grading.

240. Local Government. (2 to 6) (Same as Law M285.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

242. Locational Conflict. (4) Discussion, three hours. Conceptual foundation for understanding underlying sources of locational conflict across cities and regions; exploration of examples aimed at varying types of controversial facilities and land uses in human service and environmental arenas; development of strategies for addressing, overcoming, and coping with locational conflict. Letter grading.

243. Privatization, Regulation, and Public Finance. (4) (Same as Public Policy M243.) Lecture, three hours; outside study, nine hours. Required: Public Policy 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local government. Letter grading.

244. Urban Poverty and Planning. (4) Lecture, three hours. Examination of determinants of urban poverty, with emphasis on poverty in U.S. and on geographical dimensions of poverty and planning interventions that contribute to poverty reduction. Topics include relationship between poverty and human and social capital, demographic change, low-wage labor market, spatial concentration of poor, residential segregation, and social policy. Letter grading.
245. Urban Public Finance. (4) Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to finance urban governmental and private nonprofit facilities. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as a tool for supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market. S/U or letter grading.

247. Race, Gender, Culture, and Cities. (4) Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their policy implications. Topics relate new diversity and gender with global restructuring, new urban economy, and policies of workplace, housing, schools, and public space. S/U or letter grading.

249. Special Topics in Social Policy and Analysis. (4) Lecture, three hours. Topics in social policy and analysis selected by faculty members. May be repeated for credit. S/U or letter grading.

250. Introduction to Social Policy. (4) Lecture, three hours. Analysis of trends in U.S. social policy including stratification, history, needs, and ideological debates that affect development of social policy in U.S., compared with Western Europe. S/U or letter grading.

251. Planning for Multiple Publics. (4) Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken 1 or 2 letter grades above 245.

252. Parking, Transportation, and Land Use. (4) Lecture, three hours. Parking is key link between transportation and land use, but that link has been widely misunderstood. Transportation engineers typically assume that parking is simply there at end of most trips, while urban planners treat parking as transportation issues that engineers must study. No profession is intellectually responsible for parking, and everyone seems to assume that someone else is doing hard thinking. Mistakes in planning for parking help to explain why planning for transportation and land use has in many ways gone slowly, subtly, incrementally. Study of theory and practice of planning for parking and examination of how planning for parking in U.S. has become planning for free parking. Exploration of new ways to improve planning for parking, transportation, and land use. Letter grading.

253. Sprawl. (4) Lecture. Three hours. Consequent of rapidity of urban development, despite growing pressures to extension of this system, despite growing pressures to plan for different metropolitan region, despite many consider poorly planned. Discussion of causes and effects of sprawl, including urban planning, transportation for elderly and disabled.

Letter grading.

254. Travel Behavior Analysis. (4) (Same as Public Policy M221.) Lecture, three hours. Examination of new ways to improve planning for parking and examination of how planning for transportation and land use has in many ways gone slowly, subtly, incrementally. Study of theory and practice of planning for parking, transportation for elderly and disabled. Letter grading.

255. Transportation Economics, Finance, and Policy. (4) (Same as Public Policy M222.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transport planning; historical evolution of highway and transit finance; current financing of rail transit; private participation in road finance, toll roads, road costs and cost allocation, truck congestion pricing; current issues in transit finance; transit fare and subsidy policies and privatization of transit services. Letter grading.

256. Transportation and Environmental Issues. (4) (Same as Public Policy M223.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle impacts on air and water issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile use; automobile and automobile use in sustainability debate. Letter grading.

257. Transportation and Economic Development. (4) Lecture, three hours. Examination of equity issues related to urban transportation, with focus on complex relationships among urban spatial structure, transportation (travel patterns and transportation investments), and economic outcomes. Role of transportation in improving economic outcomes for low-income and minority households. S/U or letter grading.

258. Environmental Politics and Governance. (4) Lecture, three hours. Environmental planning is more than simply finding problems and fixing them. Each policy must be negotiated and implemented within a complex, competing institutional framework. Institutions and politics matter deeply. Overview of how environmental governance works in practice and how it might be improved. Concurrently scheduled with course CM160. Letter grading.

259. Environmental Politics and Governance. (4) Lecture, three hours. Examination of equity issues related to urban transportation, with focus on complex relationships among urban spatial structure, transportation (travel patterns and transportation investments), and economic outcomes. Role of transportation in improving economic outcomes for low-income and minority households. S/U or letter grading.

260. Environmental Politics and Governance. (4) Lecture, three hours. Environmental planning is more than simply finding problems and fixing them. Each policy must be negotiated and implemented within a complex, competing institutional framework. Institutions and politics matter deeply. Overview of how environmental governance works in practice and how it might be improved. Concurrently scheduled with course CM160. Letter grading.

261. Land-Use Planning: Processes, Critiques, and Innovations. (4) Lecture, three hours. Under- standing of techniques, processes, strategies, and dilemmas of land-use planning. Despite strong criticisms and demonstrated shortcomings, land-use control remains integral part of planning practice. How does land-use control work? How has it evolved? What are the problems with land-use control mechanisms? How well do innovations in land-use planning address criticisms? What is role of land-use planning in good society? S/U or letter grading.

262. Urban Environmental Problems: Water Resources. (4) (Formerly numbered 262B.) Lecture, three hours. Water is life and wealth in California, which has world’s most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost entirely to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Urban environmental impacts, geography, use of water, and consideration of resource planning. S/U or letter grading.

M264A. Environmental Law. (3 to 6) (Formerly numbered M264.) (Same as Law M290.) Lecture, three hours. Concurrently scheduled with course 264B. Environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for pollution abatement and control. Focus on air pollution and Clean Air Act as means of illustrating policy issues underlying field. In Progress (M264A) and S/U or letter grading.

265. Environmentalism: Past, Present, and Future. (4) Lecture, three hours. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and new challenges. Introduction to early ideas of environmentalism, how rise of modern sciences reshaped environmental thought, and how this was later transformed by 19th-century ideas and rise of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about nature of development, sustainability, equity, and modernity. Letter grading.

M267. Environmental and Resource Economics and Policy. (4) (Same as Public Policy CM250.) Lecture, three hours. Requisites: courses 207 and 220B, or Public Policy 204 and 208. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists that bear on public policies. Letter grading.

269. Special Topics in Environmental Analysis and Policy. (4) Lecture, three hours. Topics in environmental analysis and policy selected by faculty members. May be repeated for credit. S/U or letter grading.

270. Homelessness: Housing and Social Service Issues. (4) (Same as Social Welfare M206A.) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to homeless. Letter grading.

M272. Real Estate Development and Finance. (4) (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours; outside study, eight hours. Requisites: courses 220A, 220B. Recommended for first-year students in community development and built environment area of concentration. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packaging, and feasibility studies. Lectures and projects integrate development process with proposed design solutions that are interactively modified to meet economic feasibility tests. S/U or letter grading.
Scope and Objectives
The fundamental goal of the Department of Urology is to teach medical students the general principles of diagnosis and management in diseases of the genitourinary tract. Urology encompasses a wide scope of human illness, including conditions that are congenital and acquired, pediatric and adult, male and female, malignant and benign. The department functions to acquaint students with the skills necessary to manage these conditions in the initial stages and over the long term.

Instruction spans all four years of the undergraduate medical school curriculum but is concentrated during the clinical rotations. Students spend one week on the urology service during the third year and may return for an additional four-week elective rotation during the fourth year. The clinical experience includes time spent in the faculty and resident clinics, on ward rounds, and in didactic conferences that cover general urology, urological subspecialties, uropathology, and uroradiology. Urology teaching settings include the Reagan UCLA, Harbor-UCLA, Olive View-UCLA, Santa Monica UCLA, and West Los Angeles VA Medical Centers.

For further details on the Department of Urology and a listing of the courses offered, see http://www.uclourology.com.

Urology
Upper Division Course
199. Directed Research in Urology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Kathryn Norberg, Ph.D.
Sharon J. Traweek, Ph.D.
Juliet A. Williams, Ph.D.

Assistant Professors
Lieba B. Faier, Ph.D.
Aisha K. Finch, Ph.D.
Mishuana R. Goeman, Ph.D.

Scope and Objectives
The Department of Women's Studies provides interdisciplinary academic programs that span departments, disciplines, and ideologies. The department offers a Bachelor of Arts degree and a minor; the graduate program offers Master of Arts and Ph.D. degrees.

The programs provide students the opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied—women in their racial, class, sexual, national, and cultural diversity. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power and asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Emphasis on multidisciplinary, multiethnic, and transnational approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women's studies offers unique contextual validation for today's gender controversies and prepares students for a wide range of career and life choices.

The faculty members who teach women's studies courses come from various College of Letters and Science departments, area studies centers, and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. A governance committee composed of the chair, faculty members, and graduate and undergraduate student representatives sets program policies and curricula.

The department works closely with undergraduate and graduate student associations to promote student activism and community service among its majors, minors, and graduate students. It also assists other student groups with extracurricular programming on feminist issues. Research in women's studies is promoted in cooperation with the Center for the Study of Women.

Undergraduate Study
Women's Studies B.A.

The major in Women's Studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

Admission
To be admitted to the major, students must have completed Women's Studies 10, be in good standing, and formally register with the program. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Students are encouraged to draw on the University's diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

Each course applied toward the major must be taken for a letter grade, and students must have a grade-point average of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which they receive grades of C– or lower may not be applied toward the core requirements in the major.

Preparation for the Major
Required: Women's Studies 10. Students must also complete departmental lower division requirements, as applicable, for upper division women's studies courses in the disciplines.

Transfer Students
Transfer applicants to the Women's Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one multidisciplinary feminist perspectives on women and society course and departmental lower division requisite courses.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable students to acquire a depth of knowledge within one or two disciplinary or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

Required: At least 13 upper division courses (minimum of 4 units each) as follows:
1. Three core courses, including (a) one feminist theory course from Women's Studies 110A or 110B or M110C, (b) course 130 or one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each term by the department, and (c) course 187

2. A distribution of at least four courses, each from a different department or discipline, selected from the approved list of women's studies courses

3. Six additional concentration courses from one or two of the disciplines in which the core and distribution courses have been taken. Students may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women's health, or lesbian studies. If two fields are selected, the ratio of the six courses may be divided 3-3 or 4-2

One upper division tutorial (minimum of 4 units) selected from course 195, 197, or 199 may be applied toward the concentration requirement for the major. This limit does not apply to Women's Studies 198A or 198B.

Honors Program
The honors program is open to advanced junior and senior Women's Studies majors with a 3.6 grade-point average in women's studies courses and a minimum 3.4 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the department chair for approval. Students wishing to undertake honors in the major are encouraged to complete Women's Studies 187 by Spring Quarter of the junior year or Fall Quarter of the senior year.

To qualify for honors at graduation, students must successfully complete course 187 and two successive terms of honors research (courses 198A, 198B) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 198A may be applied toward the concentration requirement; course 198B is in addition to the minimum required concentration courses. Further information is available from the undergraduate counselor in the department office.

Women's Studies Minor
The Women's Studies minor augments and enriches study in a traditional field. Students participating in this program are required to complete both a departmental major and the Women's Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 2225 Rolfe Hall. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Required Lower Division Course (4 units): Women's Studies 10.

Required Upper Division Courses (28 units): (1) One feminist theory course from Women's Studies 110A or 110B or M110C, (2) 120 or 187 or an equivalent senior research seminar approved in advance, and (3) five upper division elective courses (minimum of 4 units each) from the approved list of women's studies courses issued each term by the department. At least three elective courses must be taken in departments other than the major department. No more than 4 units of courses 195 through 199 may be applied.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Courses in which students receive grades of C– or lower may not be applied toward the core requirements in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaas/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Women's Studies Department offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Women's Studies.

Women's Studies
Lower Division Course
10. Introduction to Women's Studies: Feminist Perspectives on Women and Society. (5) Lecture, three hours; discussion, two hours. Introduction to study of women and men in society, covering comparative issues of social, political, and economic position in the workplace, family, cultural institutions; historical basis of women's subordination; the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change. P/NP or letter grading.

Upper Division Courses

M101C. Special Topics in Lesbian and Gay Literature. (5) (Same as English M101C and Lesbian, Gay, Bisexual, and Transgender Studies M101C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in lesbian and gay literature. Topics focus on particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Gerontology M104C and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

105. Topics in Women and Medicine. (4) Lecture/discussion, three hours. Examination of medical conditions of women in context of issues that impact women's health, healthcare, and healthcare providers. Discussion of basic health concepts and self-care; consideration of a women's health specialty and ways to deliver healthcare to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading.

M106. Imaginary Women. (4) (Same as Honors Collegium M106.) Seminar, four hours. Designed for juniors/seniors. Study of four female cultural archetypes — abscending wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

M107A. American Women Writers. (5) (Same as English M107A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women. P/NP or letter grading.

M107B. British Women Writers. (5) (Same as English M107B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women. P/NP or letter grading.

M107C. Special Topics in Women and Literature. (5) (Same as English M107C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping. P/NP or letter grading.

M108. Love and Sex in German Literary Tradition. (4) (Same as German M108.) Lecture, three hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

108S. Violence against Women. (4) (Formerly numbered M108S.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Factual information and theoretical analyses regarding various forms of violence against women and in their homes, workplaces, and communities through critical examination of social structures and social science research. Letter grading.
M109. Women in Jazz. (4) (Same as Afro-American Studies M109 and Ethnomusicology M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from 1880s to present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

110A. Feminist Theories in Social Sciences. (4) Lecture/discussion, three hours. Required: course 10. Multidisciplinary explorations of theorists’ attempts to theorize in psychology, sociology, and political science. Consideration of critical social institutions concerning impact of race, ethnicity, class, etc. Emphasis on relation of theories to changes in law, work, politics, education, economics, family, religion, sexuality, art, etc. Themes: theories of research questions and methodologies. P/NP or letter grading.

110B. Feminist Theories in the Humanities. (4) Lecture/discussion, three hours. Required: course 10. Examination of theoretical positions on gender and women in study of literature and the arts. Analysis of ways in which women and sexuality have been represented in cultural production, considering impact of race, ethnicity, class, etc. Applications of theories to research questions and methodologies. P/NP or letter grading.

M110C. Philosophical Analysis of Issues in Feminist Theory. (4) (Same as Philosophy M187.) Lecture, three hours. Required for Women’s Studies majors: course 10 or one-half hour. One-half hour course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions to intersectional feminism. Emphasis on women in philosophy. Critical study of concepts and principles that arise in discussion of women’s rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor. Letter grading.

M111. Women and Film. (6) (Same as Film and Television M111.) Lecture, eight hours; discussion, one hour. Historical issues and critical approaches to women and cinema that may include authorship, stardom, female genres, and images of women in Hollywood cinema, alternative cinema, and independent cinema from silent era to present. Letter grading.

112. Special Topics in Women and the Arts. (4) Lecture, three hours. Required: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they are created. May be repeated for credit of interdisciplinary courses: one-half hour course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions to intersectional feminism. Emphasis on women in philosophy. Critical study of concepts and principles that arise in discussion of women’s rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor. Letter grading.

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (5) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgendered people; examination of sexuality and gendered categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

M115. Topics in Study of Sexual and Gender Orientation. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M115.) Lecture/discussion, three hours. Required: course 10 or M114. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and bisexual issues; variable topics may include cultural representations, historical and political changes, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphasis by consent of credit. Letter grading.

M117. Women and Politics. (4) (Same as Political Science M107.) Lecture, three or four hours; discussion, one hour. Examination of political representation, role of women in political organizations. Topics may include women’s movement in the U.S. and abroad, elected and appointed representation, representation of women in Congress and in legislatures worldwide; women as heads of government and state; feminist critiques of political science; women and human rights; ERA; struggle for suffrage; mothers as political actors; women and the military; women, development, and globalisation. P/NP or letter grading.

M118. Queering American History. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M118.) Lecture, four hours. History of sexual and gender minorities in the U.S. Topics include changing norms, romantic friendships, medical discourse, liberation politics, post-Stonewall culture, AIDS, transgender movement, queer theory and politics. P/NP or letter grading.

M119. Tristan, Isolde, and History of Heterosexuality in Translation. (4) (Same as German M104.) Lecture, three hours. German, French, and English versions of Tristan and Isolde story from Middle Ages to 20th century. Particular attention to relation between representation of heterosexual love in each text and contemporaneous ideas about human sexuality. P/NP or letter grading.

120. Internship in Women’s Studies. (4) Seminar, three hours; internship, eight hours. Preparation: at least two upper division women’s studies courses. Required: courses 10, 110A or 110B. Field studies course combining seminar with field placement. Practical experience in working on women’s issues and connecting these experiences to methodological and theoretical themes explored in course 110A or 110B. Letter grading.

M121. Topics in Gender and Disabilities. (4) (Same as Disability Studies M121.) Lecture, three and one half hours. Limited to juniors/seniors. Ways in which issues of disability are affected by gender, with particular attention to various roles, positions, and concerns of women with disabilities. Approach is intersectional, exploring how social categories of class, race, ethnicity, religion, age, sexuality, nationality, and citizenship affect and are affected by gender and disability. Topics may include law (civil rights, nondiscrimination), representations and social and political attitudes, public policy, health. May be repeated for credit with topic and instructor change. P/NP or letter grading.

M124. Psychology of Language and Gender. (4) (Same as Communication Studies M124.) Lecture, four hours. Examination of current theoretical perspectives on relation between gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; women’s and men’s language in various racial/ethnic/class/sexual preference groups; and conversational interaction. Letter grading.

125. Women and Healthcare in the U.S. (4) Lecture/discussion, three hours. Required: course 10. Examination in depth of various ways women provide healthcare in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of healthcare. P/NP or letter grading.

M127. Women in Russian Literature. (4) (Same as Russian M127.) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to “alternative tradition” of women’s writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with the “official tradition.” Letter grading.

128. Roots of Patriarchy: Ancient Goddesses and Heroes. (4) (Same as Honors Collegium M118.) Lecture, three hours. Examination of ancient goddesses and heroes in European, Near Eastern, Celtic, Balto-Slavic, Indo-Iranian, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

M132A. Chicana Feminism. (4) (Same as Chicana and Chicano Studies M110.) Lecture, three hours. Required: course 10 or Chicana and Chicano Studies 10A. Examination of theories and practices of women who identify as “Chicana feminist.” Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within community and dominant society. Attention to Anglo-European and Third World women. P/NP or letter grading.

M133A-M133B. History of Women in Europe. (4-4) (Same as History M133A-M133B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to present. P/NP or letter grading.

M134. Women in India. (200 to 1715.) Lecture, three hours. Required: course 10. Overview of conditions facing Chicanas in U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas. P/NP or letter grading.

M133A-M133B. History of Women in Europe. (4-4) (Same as History M133A-M133B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to present. P/NP or letter grading.

M133C. History of Prostitution. (4) (Same as History M133C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of prostitution from ancient times to present. Topics include tolerance in medieval Europe; impact of syphilis, birth of courtesan, regulation in 19th-century Europe, white slavery scare, and contemporary global sex trade. Readings include novels, primary sources, and testimony by sex workers. P/NP or letter grading.

M135C. Bilingual Writing Workshop. (4) (Same as Chicana and Chicano Studies M135.) Seminar, four hours. Writing sample required on first day of class; according to course Web page. Instructor may not be able to enroll. Technical instruction, analysis, and theoretical discussion of bilingual creative expression, with focus on specific genre (i.e., autobiography, poetry, fiction). Emphasis on memory, identity, gender, and sexuality. Central theme of bilingualism as politics and aesthetics. Peer critique of weekly writing assignments. Letter grading.
M136. Music and Gender. (5) (Same as Music History M136.) Lecture, four hours; discussion, one hour. Analysis of gender ideologies in several musical cultures: representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular music; methods in feminist and gay/lesbian theory and criticism. Letter grading.

M137E. Work Behavior of Women and Men. (4) (Same as Psychology M137E.) Lecture, two and one-half hours. Required: course 10 or Psychology 10. Designed for students majoring in or minoring in human development and human relations. The study of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, turnover, work/family interface, and work role development. Letter or P/N grading.

138. Gender and Popular Culture. (5) Lecture, three hours; screenings, two hours. Limited to juniors/seniors. Conceptual tools and critical skills necessary to rigorously interrogate gender politics of popular culture in the U.S. context. Consideration of theories of popular culture and exploration of distinctive power and ideological force exerted by popular culture in American public life. Examination of specific representations of male and female bodies to understand visual vocabulary of gender in popular culture, as well as relationship between visual stereotypes and ideologies of gender. Examination of debates on transformative potential of pop culture and exploration of capacity and limits of popular culture as agent of social change. Letter grading.

139. Women and Art in Contemporary U.S. (4) Lecture/studio, four hours; studio, two hours. Required: course 10 or Psychology 10. Exploration of some significant cultural issues of contemporary American women's art movement. Representation, resistance, and critical intervention in relation to gender, race, and class. Emphasis on visual and performance arts as these reflect various perspectives of feminism. Letter grading.

M140. Women's Studies in French Literature. (4) (Same as French M140.) Lecture, three hours. Examination of a selected aspect of the situation of women in French literature as author, character, symbol, etc. P/N or letter grading.

M141. Women, Health, and Aging: Policy Issues. (4) (Same as Gerontology M141 and Health Services CM141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and health status of older women, aging major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

M144. Women’s Movement in Latin America. (4) (Same as Chicana and Chicano Studies M144.) Lecture, four hours. Course on women’s movements and feminism in Latin America and Caribbean to examine diverse social movements and locations from which women have launched political and gender struggles. Discussion of forms of feminism and women’s consciousness that shaped indigenous rights movements, environmental struggles, labor movements, Christian-based communities, peasant and rural organizing, and new social movements that are concerned with gender and human rights. Through comparative study of women’s movements in diversity of political systems as well as national and transnational arenas, students gain understanding of historical contexts and political conditions that give rise to women’s resistance, as well as major debates in field of study. P/N or letter grading.

M145. Feminist Geography. (4) (Same as Geography M145.) Lecture, three hours; discussion, one hour. Critical engagement of gender as concept of geographic inquiry, gender and feminist analysis of systems of gendered geographic theory and methods, landscapes of gender, challenges of representing gender. Spaces of femininity, masculinity, and sexuality. P/N or letter grading.

M147A. Psychology of Lesbian Experience. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M147A and Psychology M147A.) Lecture, two hours; discussion, one hour. For juniors/seniors. Introduction to major themes in history of early American women from firsthand confrontation of American and English Indian cultures in early 17th century to role of women in movement in mid-19th century. P/N or letter grading.

M147C. History of Women in U.S., 1860 to 1980. (4) (Same as History M147C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of early American women from firsthand confrontation of American and English Indian cultures in early 17th century to role of women in movement in mid-19th century. P/N or letter grading.

M147D. History of Women in U.S., 1860 to 1980. (4) (Same as History M147D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of early American women from firsthand confrontation of American and English Indian cultures in early 17th century to role of women in movement in mid-19th century. P/N or letter grading.

M147E. History of Women in U.S., 1860 to 1980. (4) (Same as History M147E.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of early American women from firsthand confrontation of American and English Indian cultures in early 17th century to role of women in movement in mid-19th century. P/N or letter grading.

M147F. History of Women in U.S., 1860 to 1980. (4) (Same as History M147F.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of early American women from firsthand confrontation of American and English Indian cultures in early 17th century to role of women in movement in mid-19th century. P/N or letter grading.

M148. Women in Higher Education. (4) (Same as Education M148.) Seminar, three hours. Designed for juniors/seniors. Overview of issues related to experiences of women in higher education. Topics include curricular transformation, feminist pedagogy, gender equity, women faculty members, and intersection of gender and race. Letter grading.

M149. Media: Gender, Race, Class, and Sexuality. (5) (Same as Communication Studies M149.) Lecture, four hours; activity, one hour. Limited to junior/senior Communication Studies and Women’s Studies majors. Examination of manner in which media culture induces people to perceive various dominant and dominated and/or colonized groups of people. Ways in which women, gay, lesbian, bisexual, transgender, racial, and ethnic marginalized peoples, class relations, and other subaltern or subordinated groups are presented and often misrepresented in media. Investigation of empirical and theoretical applications of communications and feminist theories for understanding ideological nature of stereotyping and politics of representation through use of media, guest presentations, labs, discussions, and readings. Introduction to theory and practice of cultural studies. Letter grading.
M159. Pornography and Evolution. (4) (Same as Communication Studies M159.) Lecture, three hours. Discussion of theories and research on why pornography exists and its effects. Use of topic to illustrate value of evolutionary theory to social sciences generally. Letter grading.

M162. Sociology of Gender. (4) (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Requisite: course 10 or Sociology 1. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Sociology M163.) Lecture, three hours. Requisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.

M164. Politics of Reproduction. (4) (Same as Sociology M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, surrogacy, and new reproductive technologies. Letter grading.

M164A. Women, Violence, Globalization: India, Philippines, Singapore, Vietnam. (4) (Same as Asian American Studies M164.) Lecture, four hours. Study of various forms of violence done on women not only in and of themselves but in light of larger systems of oppression, with focus on Pilipino, Vietnamese, Sin- gaporean, and South Asian cultures. Letter grading.

M165. Psychology of Gender. (4) (Same as Psychology M165.) Lecture, three hours. Consideration of psychological and sociological literatures in order to understand contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

M166. Women in Socialist and Post-Socialist States. (4) (Same as Sociology M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender has been everywhere a central component to democratization and marketization. Discussion of ways in which state policies affect women. Letter grading.

M167. Contested Sexualities. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

168. Feminist Economics in Globalizing World. (4) Lecture, four hours. Preparation: satisfaction of Letters and Science Writing II requirement. Requisite: course 10. Designed for juniors/seniors. Overview of field of feminist economics, with emphasis on development experiences in globalizing world economy. Overview of gender inequalities such as gender division of labor in paid and unpaid work, patterns of employment and unemployment, and wage gaps between men and women in different world economy regions; feminist economics and theoretical debates within gender and development field on topics such as structural adjustment, feminization of labor force, and poverty; examination of efforts and policies to increase gender equality, including international policies-making institutions, and civil society organizations to make economic policies and structures gender-equitable. P/NP or letter grading.

170. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (5) (Formerly numbered CM170.) (Same as Comparative Literature M170.) Seminar, three hours. Designed for upper division literature majors. Investigation of narrative texts by contemporary French, German, English, American, Spanish American, African, and Asian women writers from various ethnic and national backgrounds. P/NP or letter grading.

M170C. History of Women in China, A.D. 1000 to Present. (4) (Same as History M170C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics include women and family, women in Confucian ideology, women in literati culture, feminist movement, and women and communistic revolution and revolutionary. P/NP or letter grading.

171A. Women, Gender, and Law: Jurisprudence of Sexual Equality. (4) Lecture, four hours. Requisite: course 10 or Political Science 10 or Philosophy 6 or 9. Recommended: course 110A or 110B or M110C. Exploration of models of equality described and/or advocated by legal theorists primarily in the U.S. — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment, reproductive consent, access to safe and effective reproductive control technologies) for purposes of comparison and critique. Specific focus may vary by instructor (e.g., consideration of sexual equality theory/hedonic equity, legal status of women in countries outside the U.S. or from perspectives of international human rights). May be repeated for credit with topic or instructor change. P/ NP or letter grading.

M172. Afro-American Woman in U.S. (4) (Same as Afro-American Studies M172 and Psychology M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Impact of political, economic, and social factors which impact on interpersonal relationships of African-American women as members of large society and as members of their biological and ethnic group. P/NP or letter grading.

M173B. Women in 20th-Century Japan. (4) (Same as History M173B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Japanese women in Japanese and world history through state documents, autobiographical voices, contemporary television, and other varying historical sources, including topics such as women and new political order (1900 to 1950), women, war, and empire (1900 to 1945), and consumption society (1980s to 1990s). P/NP or letter grading.

M174. Sociology of the Family. (4) (Same as Sociology M174.) Lecture, three hours; discussion, one hour. Theory and research dealing with modern family. Its structure, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.

M175. Women and Cities. (4) (Same as Urban Planning M175.) Lecture, three hours. Limited to juniors/seniors. Examination of relationship between women and cities: (1) how cities have affected women's opportunities for economic and social equality, (2) women's contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women's needs and interests. P/NP or letter grading.

CM176. Critical Media Literacy and Politics of Gender: Theory and Production. (4) (Same as Education CM176.) Seminar, three hours. Corequisite: course CM176. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical projects. Concurrently scheduled with course CM278. Letter grading.

CM178. Critical Media Literacy and Politics of Gender: Laboratory. (2) (Same as Education CM178.) Laboratory, two hours. Corequisite: course CM176. Hands-on production experience as integral component of course CM178. Concurrently scheduled with course CM278. Letter grading.

M180B. Historical Perspectives on Gender and Science. (4) (Same as History M180B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persons of man of science, role of women in scientific revolution, and scientific investigations of women and femininity. P/NP or letter grading.

185. Special Topics in Women's Studies. (4) Lecture, three hours. Preparation: one prior women's studies course. Designed for juniors/seniors. Specialized or advanced study in one area within women's studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

M185A. Global Feminism, 1850 to the Present. (4) (Same as History M185A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for advanced juniors/seniors. Introduction to movements for women's rights (educational, political, economic, sexual, and reproductive) around world and over one and one-half centuries. P/NP or letter grading.

187. Senior Research Seminar: Women's Studies. (4) Seminar, three hours. Requisites: courses 10, and 110A or 110B or M110C. Designed for advanced juniors/seniors. Women's Studies. In-depth study of major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique each other student's work in progress. Letter grading.

195. Community or Corporate Internships in Women's Studies. (2 or 4) Tutorial, eight hours. Requisites: course 110A or 110B or M110C, or two upper division women's studies courses not in 198 to 199 series. Limited to juniors/seniors. Internship in supervised setting in community agency, organization, or business approved by program. Content of student work must apply gender analysis or be focused on some aspect of women's studies. Students meet on regular basis with instructor, provide periodic reports on their experience on-site, and submit final report. Must be taken for 4 letter-graded units to be applied toward Women's Studies major or minor. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

197. Individual Studies in Women's Studies. (4) Tutorial, four hours. Preparation: at least two upper division women's studies courses. Requisite: course 110A or 110B or M110C. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Content may include themes in feminist discourse, application of feminist theoretical perspectives to disciplinary field, or emerging areas of inquiry. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required.

198A-198B. Honors Research in Women's Studies. (2 or 4) Tutorial, four hours. Limited to junior/senior women's studies honors program students. Two-term sequence to research and write honors thesis under direct supervision of faculty and functions, including presentation of research and scholarly projects. Individual contract required. P/NP or letter grading.

198B. Requisite: course 198A. Letter grading.
Graduate Courses

201. Feminist Knowledge Production: Early/Modern. (4) Lecture/discussion, three hours. Examination of early and modern theories and epistemologies in context of global flows of people, ideas, and goods, and in diverse socioeconomic settings. Evaluation of varied forms of feminist knowledge production and multicultural critiques of theories of modernity. Letter grading.

203. Research Methods in Studies of Women and Gender. (4) Lecture/discussion, three hours. Preparation: concurrent enrollment in graduate research methods course in discipline or focus area, one or more undergraduate or graduate courses in women's studies. Requisites: courses 201, 202. Topics in advanced critique of sexist research methods, models of inclusion of women in research and theory, nonsexist research methods from conception through interpretation, what constitutes "feminist" research, inclusiveness and attention to diversity issues, appropriate frameworks in comparative research. Supplements disciplinary offerings on research methods. Letter grading.

204. Current Research in Women's Studies. (1) Seminar, to be arranged. Designed for graduate students in any discipline conducting research on women/gender-related issues. Attendance and participation in Feminist Research Seminar sponsored by Center for Study of Women; presentations in interdisciplinary women's studies research and theory, with their significance and methodology discussed and critiqued in depth. Preparation: advancement to upper division women's studies courses, minimum 3.0 units. Letter grading.

205. Gender and Politics of Information. (4) Seminar, three hours. Designed for graduate students. Examination of gendered dimensions embedded in information technologies. Critical feminist assessment of information as resource and commodity; impact of Internet and information technologies on women and men and gendered distinctions between who builds and who "owns" information technology resources; race, class, gender relations in cyberspace and electronic communications. Letter grading.

210. Topics in Women and Public Policy. (4) Lecture, four hours. Designed for graduate women's studies students. Introduction to background, decision-making processes, and current debates over public policy directly affecting women in one or more major spheres of public life (e.g., work, family, political system, healthcare, legal regulation). Topics may focus on public health, political science, medicine, workplace studies, and social welfare. May be repeated for credit with topic or instructor change. Letter grading.

215. Topics in Study of Sexuality and Gender. (4) Seminar, three hours. Designed for graduate students. Multidisciplinary studies on aspects of sexual orientation, gender identity, queer and transgender theory, interdisciplinary research on minority sexualities, and social construction/deconstruction of gender. May be repeated for credit with instructor change. Letter grading.

220. Cultural Studies in Gender, Race, and Sexuality. (4) Seminar, three hours. Designed for graduate students. In-depth study of representations of gender and sexuality in literature and performance culture, with special attention to race. Topics include flow of artistic cultural production across national borders, theorizing feminism as diasporic or multicultural formation. Prerequisite: course 203. Letter grading.

223. Feminist Theory. (4) (Same as Sociology M238.) Seminar, three hours. Designed for graduate students. Analysis of current American feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminists and/or feminists of color, feminist scholars from other countries, and recent "antifeminist" feminists. Discussion of directions for future feminist sociology. Letter grading.

225. Selected Topics in Sociology of Gender. (4) (Same as Sociology M252.) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on sociology of gender. May be repeated for credit. Letter grading.

225A. Seminar: Current Problems in Comparative Education. (4) (Same as Education M253A.) Seminar, four hours. Examination of some of most influential critical theorists, including Marx, Nietzsche, Freud, Marcuse, Foucault, Fanon, and de Beauvoir and their contributions to critique of contemporary education, society, politics, and social justice. Letter grading.

225B. Cross-Cultural Perspectives on Gender. (4) (Same as Sociology M256B.) Seminar, three hours. How does gender manifest itself in lives of different groups of women in U.S. and abroad? Are universal analytical categories or united feminist movements possible or is gender too different cross-culturally? S/U or letter grading.

225A9A-M225B9B. History of Women. (4-4) (Same as History M259A-M259B.) Seminar, three hours. Course M259A is requisite to M259B. History of women's social and political issues seen in U.S. and comparative context. In Progress (M259A) and letter (M259B) grading.

226. Gender and Music in Cross-Cultural Perspectives. (4) (Same as Ethnomusicology CM261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (including gender representation in popular music), and gender representation to gendered politics via musical production. S/U or letter grading.

2263P. Gender Systems. (4) (Same as Anthropology CM263P.) Seminar, three hours. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideological systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

2266. Feminist Theory and Social Sciences Research. (4) (Same as Education M266.) Lecture, four hours. Examination of how diverse feminist social theories of last quarter century have both challenged and strengthened conventional social sciences theories of last quarter century have both challenged and strengthened conventional social sciences theories, and their methodologies. Introduction especially to feminist standpoint theory, distinctive critical theory methodology now widely used in social sciences. Letter grading.

227. Critical Media Literacy and Politics of Gender: Theory and Production. (4) (Same as Education CM272B.) Seminar, three hours. Corequisite: course CM272L. Directed reading range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM178. Letter grading.

227L. Critical Media Literacy and Politics of Gender: Laboratory. (2) (Same as Education CM272L.) Laboratory, two hours. Corequisite: course CM272. Hands-on production experience as integral component of course CM272. Concurrently scheduled with course CM178. Letter grading.

228. Special Topics in Women's Studies. (4) Lecture/discussion, four hours. Designed for graduate students. Selected topics or special problems. In-depth study of aspects of feminist theory or research methods or gender analysis within disciplinary studies in social sciences, humanities, health sciences, arts, or professional programs. May be repeated for credit with topic or instructor change. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: appointment as teaching assistant, associate, or fellow. Corequisite or corequisite: course 495. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Feminist Pedagogy. (2) Seminar, two hours. Preparation: appointment as teaching assistant in department. Introduction to feminist methods of teaching, with emphasis on reciprocity and dialogue and de-emphasis on hierarchy. Required of students while serving as teaching assistants (first time only) in undergraduate women's studies courses. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. Requisites: courses 201, 202, 203. Directed individual research and study in area related to women's studies/gender studies, arranged individually by student with instructor. May be repeated for credit. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, eight hours. Limited to graduate women's studies students. Reading and preparation for written M.A. comprehensive examination or Ph.D. qualifying field examinations. May be repeated for a maximum of 12 units. S/U grading.

CULTURES
Arts and Cultures (WAC) are organized around arts scholars, and ethnographers, the academic programs in the Department of World Arts and Cultures and Architecture (WAC) are organized around three fundamental missions: (1) the formulation of critical and intercultural insights into the nature of human creativity, (2) the creation and interdisciplinary study of dance and other body-based modes of performance, and (3) mutually beneficial engagement with the diverse cultural and artistic communities of Los Angeles. The department is an interdisciplinary unit that finds its raison d’être in a set of intellectual and artistic problems rather than an established academic discipline.

The undergraduate program offers concentrations in dance and in world arts and cultures. The graduate program offers Master of Arts and Ph.D. degrees in Culture and Performance and a Master of Fine Arts in Dance. One set of degrees encompasses research on communities, cultures, and transnational movements, including arts traditions and innovations, arts activism, and interdisciplinary art-making. Another set of degrees provides dance education with a difference, offering opportunities to engage multiple dance practices, intercultural dance studies, civic engagement, and choreographic research. While operating with considerable independence, these degree streams are unified by a common concern for cultural identity and differences, the meanings of tradition in contemporary societies, the forging of connections between critical theory and artistic practices, and the changing social roles and responsibilities of artists and scholars of the arts in the U.S. and worldwide.

Students in the World Arts and Cultures Department at UCLA study with faculty members of international standing engaged in both creative artistic work and research. Potential careers for graduates include work with community nonprofits and activist groups, government arts agencies, museums, and teaching/educational institutions. Many students pursue dance as choreographers or dancers, while others work in performance art, videography, and theatrical production. Urban planning, law, environmental activism, public health, and medicine are among the many fields in which graduates have excelled.

Undergraduate Study
World Arts and Cultures B.A.

The World Arts and Cultures major leads to the Bachelor of Arts degree and is designed to offer choice and flexibility while maintaining balance and rigor. At the outset, students select one of two concentrations: dance or world arts and cultures. All students take a set of core courses designed to explore a wide range of artistic practices in cultural context. In addition, it is recommended that students selecting the dance concentration study movement techniques of their choice four to five days a week for the first two years of the program, while those concentrating in world arts and cultures must select 8 units of arts practice electives in movement, music, theater, film, design, or visual art — either within or outside the department.

In the junior year, students enroll in World Arts and Cultures 185 where they propose the final path of study for the senior year. World arts and cultures concentration students propose a senior honors project, while dance concentration students have the option of (1) 12 units in a senior focus from clusters or (2) a senior honors project. Students are guided in their proposals by the instructor and in consultation with their faculty mentors.

The dance concentration is grounded in contemporary choreography and offers courses in a wide range of idioms from throughout the world, including special emphasis on modern/postmodern dance. Opportunities for performance, production, videography, and movement studies are augmented by courses in the study of the body and of bodily identity from historical and cultural perspectives, dance theory, and dance in the public sphere, including arts pedagogy and civic engagement. Multimodal forms of expression integrating music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The world arts and cultures concentration provides students with an introduction to key issues, problems, and debates in the study of art activism and creativity in cultural context. Beyond the required set of core courses, students select from a range of courses offered in the World Arts and Cultures Department and in other departments. Students may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women’s studies).

Students who wish to confer with the departmental student affairs officer regarding program planning and major requirements should contact Wendy Temple at (310) 825-8537.

Admission

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on submission of a written research paper, transcripts, two letters of recommendation, and two personal essays. These supplementary materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also considered. Students interested in the dance concentration must participate in an early February audition. Specifics about the audition are included in the e-mail request the above-mentioned supplementary materials.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. They are advised to take world arts and cultures courses
before and during the term in which they apply to the program. They must have a minimum 2.0 overall grade-point average and no more than 120 quarter units. Students interested in the world arts and cultures concentration may apply at the beginning of Fall, Winter, and Spring Quarters. Those interested in the dance concentration may apply at the beginning of Fall and Spring Quarters and are expected to participate in an audition.

Dance Concentration

The dance concentration consists of 111 units of coursework.

Preparation for the Major

Required: World Arts and Cultures 1, 2A, 2B or 47, 16, 45, 67A, 67B, 70, 85, and 12 units in movement practice electives selected from courses 5 through 15 or 55 through 65.

The Major

Required: (1) World Arts and Cultures 185; (2) 16 units in production/performance practices, including 12 units from courses C106A through C115 (two different styles required) and 4 units from 169, 171, 172, 174A, 174B, or other department courses with faculty approval; and (3) 38 units combined from the following three clusters: (a) topics in dance studies — course 101 and 8 units from C145 through C168 or 199 or from outside the department with faculty approval, (b) creative inquiry/research — courses 117A, 117B, and 4 units from 116, 117C, 174A, 174B, or C180, or from outside the department with faculty approval, and (c) civic engagement — course 100A or 100B or 103 and 8 units from 100A, 100B, 103, 144, 166, 167, 177SL, or from outside the department with faculty approval. Students then select 12 additional focus units from one of the three clusters. They also have the option to complete a capstone senior project (courses 186A and 186B).

World Arts and Cultures Concentration

The world arts and cultures concentration consists of 107 units of coursework.

Preparation for the Major

Required: World Arts and Cultures 1, 2A, 2B, 20, 21, 22 or 24, 70, 85, and 8 units in world arts practice electives selected from courses 5 through 16 or 55 through 67B (4 units must be taken within the department; 4 units may be from outside the department).

The Major

Required: (1) World Arts and Cultures 100A or 100B, 101, 103, 185, 186A, 186B; (2) 8 units in locating cultures in which students select a geographical/cultural focus from either inside or outside the department with faculty approval; (3) 4 units in arts/activism/community engagement selected from course M125A, 144, 166, 167, C188, 174A, 174B, C175, or 177SL; and (4) 28 units from one of three commitment areas — studies in culture and performance, interdisciplinary/intercultural work, or integrated studies — selected from approved course lists (see department council), in which 16 units must be taken within the department and 12 units may be inside or outside the department.

Senior Honors Project

World Arts and Cultures 186A and 186B lead to a senior honors project that has three possible areas of focus — performance, applied research, or studies in culture and performance: (1) the performance project is a creative project leading to the production and public performance of original or traditional work; (2) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; and (3) the culture and performance focus involves students in independent ethnographic research in some aspect of the arts.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasa/library/pgmqrinintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of World Arts and Cultures offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Culture and Performance and a Master of Fine Arts (M.F.A.) degree in Dance.

World Arts and Cultures Lower Division Courses

1. Introduction to World Arts and Cultures. (5) Lecture, three hours; discussion, one hour. Survey of concepts and theories involved in intercultural, interdisciplinary art-making, text-based creation of work, and more. In-depth investigative experience to understand practice-based research process from conception to presentation. Research inquiry methods may include readings and assigned written analysis. Supervised fieldwork, and individual and collaborative assignments in selected media, activist orientations, and practice-oriented processes. Substantial practice-based culminating project required. May be repeated for credit without limitation. Letter grading.

2A. Lower Division Seminar: Practice-Based Research. (5) Seminar, two hours; studio, two hours; outside study, 11 hours. Variable topics seminar with focus on practice-based research in arts. Skills may include development of dance/theatrical performance, video/filmmic creation, interdisciplinary art-making, text-based creation of work, and more. In-depth investigative experience to understand practice-based research process from conception to presentation. Research inquiry methods may include readings and assigned written analysis. Supervised fieldwork, and individual and collaborative assignments in selected media, activist orientations, and practice-oriented processes. Substantial practice-based culminating project required. May be repeated for credit without limitation. Letter grading.

2B. Lower Division Seminar: Writing-Based Research. (5) Seminar, four hours; outside study, 11 hours. Variable topics seminar with focus on scholarly research in arts. Study of culture and performance, individual and cultural identity through arts, arts criticism, theoretical and analytical approaches to arts practice, and arts activism. Substantial culminating research paper required. May be repeated for credit. Letter grading.

5. Beginning Global and Transcultural Forms. (2) Studio, three hours. Beginning-level studio of world arts practices crossing national and cultural boundaries. Variable topics, such as transcultural aesthetic, postcolonial, and postmodern dance artists’ works. May be repeated twice for credit. P/NP or letter grading.

6. Beginning World Arts Practices in Sub-Saharan Africa and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from sub-Saharan Africa and extending to cultures of African Diaspora, including those in Brazil and Afro-Caribbean. Variable topics, such as dance of Guinea, Mali, and Senegal or Afro-Caribbean masking traditions, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

7. Beginning World Arts Practices in Middle East/North Africa and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from Middle East and North Africa. Variable topics, such as belly dancing or Israeli folk dance, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

8. Beginning World Arts Practices in Latin America and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from Latin America, including cultures of South and Central America. Variable topics, such as Argentine tango and Mexican folkloric dances, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

9. Beginning World Arts Practices in North America and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from North America, including U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

10. Beginning World Arts Practices in East Asia and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from East Asia, including China, Korea, and Japan. Variable topics, such as movement and music techniques of Beijing Opera, Korean shamanic movement practices, and Kabuki theater, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

11. Beginning World Arts Practices in South Asia and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from South Asia and extending to cultures of South Asian diasporas, including communities in England and West Africa. Variable topics, such as Bharata Natyam (classical dance of India), bhangra (diasporic social dance), and hatha yoga, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

12. Beginning World Arts Practices in Southeast Asia and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from Southeast Asia. Variable topics, such as Cambodian court dance, Indonesian kechak, or Balinese legong, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

13. Beginning World Arts Practices in Europe and Diaspora. (2) Studio, three hours. Beginning-level studio of world arts practices originating from Europe and extending to cultures of European diaspora, including U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

15. Beginning Modern/Postmodern Dance. (2) Laboratory, four hours. Study of dance technique. Critical viewing, reading, and discussion of modern/postmodern dance artists’ works. May be repeated twice for credit. P/NP or letter grading.
16. Beginning Improvisation in Dance. (2) Lecture, one hour; laboratory, three hours. Introduction to creative exploration in movement through improvisational and compositional exercises that access and develop imagination, find relationship between imagination and dance making, and enrich movement vocabulary. May be repeated once for credit. P/NP or letter grading.

20. Culture: Introduction. (5) Lecture, four hours. Introduction to key concepts and major theoretical methodologies that characterize field of cultural studies, including discussion of notions of culture, popular culture, subculture, youth culture, hegemony, gender, race, class, and national identity. Letter grading.

21. Introduction to Field-Based Research. (5) Lecture, three hours. Introduction to methods, techniques, and issues in conducting field-based research, including nature, uses, and limitations of major data-gathering procedures, ethical concerns, sampling, checks and controls, teamwork, interventions, and results as not only tangible and impersonal outcomes of inquiry but also personal and tangible. Through readings, discussion, and hands-on exercises, students learn fieldwork projects and write proposals, prepare consent forms and deal with ethical issues, observe behavior, construct questionnaires, interview, use audiovisual documentation, and manage and process raw data. Letter grading.

22. Introduction to American Folklore Studies. (5) Lecture, four hours; discussion, one hour; outside study, 10 hours. Cultural/historical survey of role of folklore in development of American civilization and of influence of American society on the shape of folklore in American society; attention also to representative areas of inquiry and analytical procedures. P/NP or letter grading.

23. Introduction to American Indian Studies. (5) (Same as American Indian Studies M10.) Lecture, three hours; discussion, one hour; activity, one hour. Survey of selected Native American cultures from pre-Western contact to contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

24. World Arts, Local Lives. (5) Lecture, three hours; discussion, one hour. Use of Fowler Museum's long-term exhibition entitled “Intersections: World Arts/Local Lives” as object of study to examine many insights that arts can provide into social, political, and religious experience. Drawing heavily on cultures of Africa, Asia, Pacific, and indigenous Americas, both ancient and contemporary, consideration of degree to which notions of aesthetics and efficacy are intertwined and interdependent in art forms made to intervene in people's lives in active, instrumental ways. Use of specific case studies to illustrate and interro- gate theoretical paradigms. P/NP or letter grading.

45. Introduction to Dance Studies. (4) Lecture, three hours. Introduction to discipline of dance studies, with focus on study of corporeality as key contemporary perspective on body. Multidisciplinary approach to studying dance conceptualized as social construct, including attention to gender, race, class, and national identity. P/NP or letter grading.

46. Survey of Dancing in Selected Cultures. (2) Studio, three hours. Introduction to dances and their movement characteristics in global context. P/NP or letter grading.

47. World Dance Histories. (5) Lecture, three hours; discussion, two hours. Comparative framework for looking at dance practices through time as they have developed around world, questioning relation of dance to culture and politics and providing students with tools for investigating histories of any given dance form. P/NP or letter grading.

55. Intermediate World Arts Practices in Global and Transcultural Forms. (2) Studio, three hours; outside study, three hours. Intermediate-level study of world arts practices crossing national and cultural boundaries. Variable topics, such as body music, cross-cultural textile creation, or mural painting, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

56. Intermediate World Arts Practices in Sub-Saharan Africa and Diaspora. (2) Studio, three hours. Intermediate-level study of world arts practices originating from sub-Saharan Africa or from cultures of African diaspora, including Brazil and Afro-Caribbean. Variable topics, such as dance of Guinea, Mali, and Senegal or Afro-Caribbean masking traditions, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

57. Intermediate World Arts Practices in Middle East/North Africa and Diaspora. (2) Studio, three hours. Intermediate-level study of world arts practices originating from Middle East and North Africa. Variable topics, such as belly dancing or Israeli folk dance, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

58. Intermediate World Arts Practices in Latin America and Diaspora. (2) Studio, three hours; outside study, three hours. Intermediate-level study of world arts practices originating from Latin America, including Caribbean and South America. Variable topics, such as Argentine tango and Mexican folkloric dances, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

59. Intermediate World Arts Practices in North America and Diaspora. (2) Studio, three hours. Intermediate-level study of world arts practices originating from North America, including U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

60. Intermediate World Arts Practices in East Asia and Diaspora. (2) Studio, three hours; outside study, three hours. Intermediate-level study of world arts practices originating from East Asia, including China, Korea, and Japan. Variable topics, such as movement and music techniques of Beijing Opera, Korean sha-manic movement practices, Kabuki theater, or Tai Chi, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

61. Intermediate World Arts Practices in South Asia and Diaspora. (2) Studio, three hours. Intermediate-level study of world arts practices originating from South Asia or from cultures of South Asian diaspora, including communities in England and West Africa. Variable topics, such as Bhutanese Namgyal (classical dance of India), bhangra (diasporic social dance), and hatha yoga, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

62. Intermediate World Arts Practices in South-east Asia and Diaspora. (2) Studio, three hours. Intermediate-level study of world arts practices originating from Southeast Asia. Variable topics, such as Cambodian court dance, Indonesian kechak, or Bali-nese legong, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

63. Intermediate World Arts Practices in Europe and Diaspora. (2) Studio, three hours. Intermediate-level study of world arts practices originating from Europe and extending to cultures of European diaspora, including U.S. Variable topics for creating dances, such as flamenco, Bal- can folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

64. Intermediate Modern/Postmodern Dance. (2) Studio, four hours. Technical training with emphasis on increasing skill. May be repeated twice for credit. P/NP or letter grading.

67A. Theories and Methods in Dance Composition I: Languages. (4) Formerly numbered 67.) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisite: course 16. Examination of diverse movement sources from which dances are made. How do different choreographers envision vocabularies of movement they use? How do they select or create movement with which they create dance? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Readings about and viewing of videos of selected artists' work and their different strategies for creating languages of their dances for comparison. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

67B. Theories and Methods in Dance Composition II: Processes. (4) (Formerly numbered 69.) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisite: course 67A. Examination of diverse processes through which creation of dance may take place. How do different choreographers conceptualize creative process of dance-making? What kinds of strategies do they use for sequencing their materials? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Readings about and viewing of videos of selected artists' work and their different strategies for their processes of creating dances for comparison. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

70. Production Practicum. (2) Lecture, 90 minutes; activity, three and one hour. Introduction to practical perspectives on producing events in world arts and cultures, including but not limited to theatrical support and planning and executing lecture series. Introduction to professional stage production principles and hands-on experience in technical theater. May be repeated once for credit. P/NP grading.

78. Private Instruction in World Arts and Cultures. (2 to 4) Studio, three to six hours. Designed for fresh- men/sophomores. Private or semiprivate instruction in one world arts practice with distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for maximum of 24 units. P/NP grading.

85. Sophomore-Year Proposal. (1) Lecture, 90 minutes. Planning and execution of proposal for junior year of study, with attention to exploring resources of department and University as whole. P/NP grading.

Upper Division Courses

100A. Art as Social Action. (5) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Discussion of what constitutes artist's social responsi- bility and in what ways art is qualified to engage in di- rect political action. Study of tension between powers of this world and powers of art. P/NP or letter grading.

100B. Art as Moral Action. (5) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. One's ability to distinguish between right and wrong action is culturally intuited, nurtured, and developed. Study of cultural strategies of moral engagement, per- suasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

101. Theories of Performance. (5) Lecture, four hours; studio, two hours. Requisite: course 85. Perfor- mance commonly refers to activities on prosenium stage. Explosion of that narrow notion of performance by delving into scholarship of performance. Performance studies, which draws on disciplines of anthro- pology, cultural studies, gender studies, linguistics, postcolonial theory, and sociology. Exploration in stu- dio of concept of performing theory by creating inter- disciplinary performance works that engage with and amplify theories studied. P/NP or letter grading.
116. Advanced Improvisation in Dance. (2) Studio, four hours. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection. May be repeated twice. P/NP or letter grading.

117A. Theories and Methods in Dance Composition III: Locations. (4) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisites: courses 16, 67A, 67B. Examination of how location of dancing impacts its meaning. How does occasion of dance, concert, festival, ritual, or celebration influence experience of it? What are factors that need to be considered when locating dancing in one particular place? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Examination of range of locations for dances, including pro-scenium stages, theaters in round, parks, sidewalks, temples, amphitheaters, village squares, and other site-specific locations that endow dance with specific significance and how various artists have worked with place in construction of new dances. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

117B. Theories and Methods in Dance Composition IV: Impacts. (4) Seminar, two hours; studio, two hours; outside study, eight hours. Enforced requisite: course 117A. Examination of relation of dance to its audience. Synthesis of analyses undertaken in previous courses to determine how dances move their viewers. How do dances appeal to or address their audiences? How do historical, sequential, and locational factors affect dance reception? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Different approaches to dance result in highly distinctive kinds of responses from audiences. Focus on creation of three in-depth studies, each of which endeavors to construct distinctive kind of response from viewers. P/NP or letter grading.

117C. Advanced Topics in Choreography. (4) (Formerly numbered 117.) Lecture, four hours; studio, two hours; outside study, six hours. Enforced requisite: course 117B. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topics through lecture, reading, and discussion. Thematic topics include contemporary issues and concerns such as image, essence, and abstraction; home, history, and memory; interculturalism; constructing identity. May be repeated for credit with different topics. P/NP or letter grading.

118. Advanced Interdisciplinary Composition. (4) Lecture, four hours; studio, two hours. Enforced requisites: courses 67A, 67B. Focus on developing a choreographic composition with focus on developing works that engage two or more disciplines, such as dance, music, visual art, performance art. Theoretical engagement with selected topics through lectures, readings, and discussion. May be repeated for credit without limitation. P/NP or letter grading.

119. Advanced Intercultural Composition. (4) Lecture, four hours; studio, two hours. Enforced requisites: courses 67A, 67B. Directed exploration in composition, with focus on works that engage techniques and practices of two or more cultures. Engagement with postcolonial theory through lecture, readings, and discussion. May be repeated for credit without limitation. P/NP or letter grading.

120. Selected Topics in Cultural Studies. (4) Lecture, three hours. Enforced requisite: course 120A. Directed exploration in interdisciplinary study of arts and performance in cultural and historical context. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit without limitation. P/NP or letter grading.

121. Ethography of Performance. (4) Lecture, two hours; discussion, two hours; outside study, eight hours. Development of observation and recording skills for study of performance events, including both academic and community-based events. Focused ethnographies and training in and application of field research methodologies. P/NP or letter grading.

122. Introduction to Folklore. (4) Lecture, four hours. Survey of various forms of folklore and approaches to their identification, description, and analysis, including their historical and social significance. Introduction to expressive behavior of folk groups from throughout world and comparison through readings, lectures, film, and fieldwork, with attention to artists and communities involved in relation to evolving popular culture. P/NP or letter grading.

C123. Arts of Identity: Survey of Expressive Cultures. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 122. Directed exploration in culture, history, and community of various expressive cultures. May be repeated for credit with different topics. P/NP or letter grading.

M125A. Beyond Mexican Mural: Muralism and Community Laboratory. (4-2) (Same as Art M186AL-M186BL-M186CL and Chicana and Chicano Studies M186AL-M186BL-M186CL) Course M125AL is requisite to M125BL, which is requisite to M125CL, which is requisite to M125CL. Lecture, laboratory, four hours. Corequisite: course M125A. May be repeated for credit with different topics. P/NP or letter grading.

M125B. Beyond Mexican Mural: Muralism and Community Laboratory. (4-2) (Same as Art M186AL-M186BL-M186CL and Chicana and Chicano Studies M186AL-M186BL-M186CL) Course M125AL is requisite to M125BL, which is requisite to M125CL, which is requisite to M125CL. Lecture, laboratory, four hours. Corequisite: course M125A. May be repeated for credit with different topics. P/NP or letter grading.

M125C. Beyond Mexican Mural: Intermediate Muralism and Community Laboratory. (4-2) (Same as Art M186AL-M186BL-M186CL and Chicana and Chicano Studies M186AL-M186BL-M186CL) Course M125AL is requisite to M125BL, which is requisite to M125CL, which is requisite to M125CL. Lecture, laboratory, four hours. Corequisite: course M125A. May be repeated for credit with different topics. P/NP or letter grading.
M126. Whose Monument Where: Course on Public Art. (4) (Same as Art M185 and Chicana and Chicano Studies M185.) Lecture, four hours. Recommended prerequisite: course M125A, M125B, or M125C. Examination of public monuments in U.S. as basis for cultural insight and critique of American values from perspective of artist. Use of urban Los Angeles as test case for range of public space issues such as who is “public,” what is “public space” at end of 20th century, what defines neighborhoods, and do different ethnic populations use public space differently. P/NP or letter grading.

M128. Chicana Art and Artists. (4) (Same as Art M184 and Chicana and Chicano Studies M175.) Lecture, four hours. Introduction to Chicana art and artits. Examination of Chicana artist's works and how Chicana artist's have developed unique identity and expertise as artists and Chicanas. Letter grading.

C129. Folk Art and Aesthetics. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to folklore, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advanced technology, and Americans. Concurrently scheduled with course C229. P/NP or letter grading.

C130. Space and Place. (4) (Same as Architecture and Urban Design M130.) Lecture, four hours. Survey of array of spaces and places from cross-cultural or comparative perspective and with performance emphasis, with focus on mutual interaction of human beings and their created environments. Emphasis on “common,” “ordinary,” “anonymous,” or “vernacular” nonbuilt and built environments, which are built and used by members of small-scale, “traditional,” and “transitional” communities around world. P/NP or letter grading.

C131. Folk Art and Aesthetics. (4) Lecture, four hours. Designed for juniors/seniors. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis. P/NP or letter grading.

C132. Narrative and Oral Performance. (4) Lecture, four hours. Survey of concepts of story as text versus narrating as oral performance, studies of individual narrators, how stories are composed in performance, interaction of narrator and audience, how place and experience become embodied in narratives, modes of representing oral narrating, and politics of stories and oral performance. P/NP or letter grading.

C133. Textiles of World. (4) Lecture, four hours; discussion, one hour; laboratory, one hour. How cloth and clothing was and continues to be hand-woven in indigenous societies. Use of textiles from Fowler Museum collection to coordinate hands-on study. Concurrently scheduled with course C229. P/NP or letter grading.

C140. Women Healers, Ritual, and Transformation. (4) (Same as Women's Studies CM143.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM240. P/NP or letter grading.

C141. Carnival and Festivity. (4) Lecture, three hours; fieldwork, one hour. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and carnavalization in contemporary times. Concurrently scheduled with course C241. P/NP or letter grading.

C143A. Introduction to Museology: Museum Collections and Administration. (5) Lecture, six hours. Introduction to history and functions of museums, training development to present collection, organization, management, and conservation of objects and legal and ethical issues surrounding these practices. P/NP or letter grading.

C143C. Introduction to Museology: Selected Topics. (4) Discussion, six hours; individual study, six hours, prerequisites: 143B. Students pursue projects in area of museum operations, working with staff members and museum directors to produce papers on contemporary issues in museums. For example, one student might work under curator and director to examine cultural property issues as they pertain to contemporary museums, following suggested reading list. P/NP or letter grading.

C144. Make Art/Stop AIDS. (5) Lecture, four hours; studio, two hours. Can arts save lives? That is central question posed here in relation to global AIDS epidemic. Working in close connection with public health and epidemiology, exploration of arts as powerful effective tool in AIDS prevention and treatment efforts. Review of literature of AIDS cultural analysis that emerged in late 1980s in U.S. and application of that literature to international hot spots such as India, China, South Africa, and Brazil. Collaborative theory-in-action projects. P/NP or letter grading.

C145. Selected Topics in Dance Studies. (2 to 4) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Selected topics in study of dance and corporeality. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit without limitation. Concurrently scheduled with course C245. P/NP or letter grading.

C146. Politics of Performance. (4) Seminar, four hours; outside study, eight hours. Designed for juniors/seniors. Opportunities for artists and intellectuals as cultural workers operating in domains of ideology, aesthetics, and theory. Analysis of such key words as ideology, aesthetics, theory, art, politics, intervention, intellectual, and artists. Concurrently scheduled with course C246. P/NP or letter grading.

C147. Arts and Healing. (4) Lecture, four hours. Interdisciplinary, contemporary arts-based model of healing applicable to persons leading Western modernist lifestyles and coping with two kinds of social crises during their lifetimes: (1) developmental transitions that are disruptive life-cycle changes that have potential to promote self-regeneration or self-fragmentation and (2) external transitions that are situational catastrpohic events that evoke great terror and trigger fears of annihilation and chaos, but if successfully negotiated, have potential to promote revitalized sense of self, greater compassion for others, and restored sense of trust and hope in humanity. Concurrently scheduled with course C247. P/NP or letter grading.

C148. Dance as Healing and Therapy. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Designed for juniors/seniors. Introduction to historical, theoretical, methodological, and ethical considerations involved in practice of dance as healing and therapy. Concurrently scheduled with course C248. Letter grading.

C149. Dance in Multicultural U.S. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Designed for juniors/seniors. Study of dance performance in U.S., with emphasis on genres that can be viewed in multicultural Los Angeles, from concert modern/postmodern dance, Mexican folklorico, and Japanese butoh to popular idioms and video dance. Attention given to genres from Native American, African, Oceania, Asia, Africa, and Europe. Student projects involve creation of in-class performances. P/NP or letter grading.

C150. History of Dance in Culture and Performance. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. P/NP or letter grading.

C152. History and Theory of Modern/Postmodern Dance. (4) Lecture, four hours; studio, two hours; outside study, six hours. Introduction to key figures in creation of modern dance, with special attention to their theories and philosophies and tracing of radical shift to postmodern dance that occurred in mid-20th century. Contemporary developments, both historical and theoretical. Student projects involve choreography and writing. Concurrently scheduled with course C252. P/NP or letter grading.

C154. Dance and Folioklore. (4) Lecture, four hours. Consideration of vernacular tradition as site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European American dance idioms. Concurrently scheduled with course C254. P/NP or letter grading.

C155. Self and Culture. (4) Seminar, two hours; labatory, two hours; outside study, eight hours. Designed for juniors/seniors. Examination of critical de-velopmental processes and situational factors contrib-uting to construction of sense of self and emergence of creativity and subjectivity in different cultural contexts. Concurrently scheduled with course C255. P/NP or letter grading.
history that gave rise to
in light of (1) Mexico's political, religious, and social
tendency of female artists living in patriarchal societies had to
to generate an emotional equilibrium, (3) way her significant attachments influ-
to shape cultural icons. Concurrently scheduled with course C283. P/NP or letter grading.

158. Choreographing Gender. (4) Lecture, three hours; laboratory, two hours. Designed for juniors/se-
Analyze of aesthetic codes and theatrical cho-

159. Movement Theories. (2) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity.
Development of movement efficiency for prevention of
dance injuries. May be repeated twice. P/NP or letter grading.

160. Topics in Body Mechanics. (4) Lecture, three hours; studio, one hour. Designed for juniors/seniors.
Variable topics with discussion of injury pre-

161. Movement Observation and Analysis. (4) Lecture, four hours; laboratory, two hours. Designed for
students of variable theoretical frameworks and techniques such as labananalysis to em-
phasize culturally defined processes of observing, an-
alyzing, and describing human movement. P/NP or letter grading.

164. Public Writing in Arts. (4) Lecture, four hours; outside study, eight hours. Survey of journalistic ap-
proaches to writing about arts, with eye toward shaping
mountainous structures and regional histo-
ymark of the essay. May be repeated once. P/NP or letter grading.

165. Foundations of Dance Education. (4) Lecture, two hours; laboratory, three hours. Introduction to
movement concepts, skills, and teaching principles for modern/postmodern dance instruction. Supervised teaching practicum included. P/NP or letter grading.

166. Dance as Culture in Education. (4) Lecture, two hours; laboratory, two hours. Theoretical and practical aspects of teaching ethnic dance, especially in higher education. P/NP or letter grading.

167. Creative Dance for Children. (4) Lecture, three hours; laboratory, one hour. Introduction to movement concepts, skills, and principles for teaching children's
dance; emphasis on dance as creative medium of
expression. P/NP or letter grading.

168. Beyond Academia: Making Art in Real World. (4) Lecture, four hours; outside study, eight hours.
Designed for juniors/seniors. Focus on understand-
bureaucratic structures and regional histo-
sories. Emphasis on the role of art in real world inc-
in such practical issues as publicity and grant-writ-

169. Repertory Tour Ensemble. (2 or 4) Lecture, two hours; studio, four to six hours. Designed for
World Arts and Cultures majors. Creation and presentation of performances in community, with special emphasis on
problems of touring companies with variable repertoire. May be repeated once. P/NP or letter grading.

170. Advanced Production. (1) Laboratory, three hours. Requires: course 70. Further development and con-
struction of projects in choreography, performance art, and dance film. May be repeated for credit with
abatement. P/NP or letter grading.

171. Lighting Design for Dance Theater. (4) Lecture, four hours; laboratory, two hours. Lighting for dance:
examination of aesthetics, principles, and technical

172. Costume and Scenic Design Concepts for Dance Theater. (4) Lecture, four hours. Study of the-
ory for conceptualizing dance performance environ-
ments, communication through visual elements, artis-
tic properties of costume and sets media, and proce-
dures for producing dance costumes and sets in order to
facilitate choreographer/designer communication. P/NP or letter grading.

C173. Sound Resources for Performance. (4) Lecture, three hours; studio, one hour; outside study, eight hours. Designed for juniors/seniors.
Exploration of music, in search of interesting, new, and unusual. Investigation of musical possibilities via record store. Introduction to scores, soundscapes, sounds patterns; body (clapping, stepping, and singing); and hardware store (found sound). Participants collabora-
tively create and experiment with recording and in pre-
parations of research reports. Concurrently scheduled with course C273. P/NP or letter grading.

174A. Projects in World Arts and Cultures. (2) (Formerly numbered 174.) Laboratory, four hours. In-
dividualized major projects in choreography, perfor-
mance, cultural studies, production, and media. May be repeated for credit. P/NP or letter grading.

174B. Projects in World Arts and Cultures. (4) (Formerly numbered 174.) Laboratory, six hours. Individual-
ized major projects in choreography, performance, cultural studies, production, and media. May be repeated for credit. P/NP or letter grading.

C175. Applied Folklore. (4) Lecture, four hours. De-
signed for juniors/seniors. Introduction to methods and
issues in application of folklore studies to such areas as
education, health, museums, organization development,
tourism, environmental planning, economic and community
development, aging, art therapy, and public
sector. P/NP or letter grading.

177SL. Taking Action: Arts Practice and Commu-
nity Service. (4) Seminar, four hours; outside study, eight hours. Enrollment limited to 103. Designed for
juniors/seniors. Application of training in world arts and cultures through service projects designed by stu-
dents in collaboration with selected community or-
ganizations and institutions. Reflection on impact of ser-
vice on communities and theories. May be repeated once for credit. P/NP or letter grading.

178. Advanced Private Instruction in World Arts and Cultures. (2 to 8) Studio, three to 12 hours. De-
signed for juniors/seniors. Private or semiprivate in-
struction in one world arts practice with distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for max-
imum of 24 units. P/NP or letter grading.

180. Video Production in Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (cam-

eering, lighting, sound, coverage), and editing (organiz-
ing raw footage, constructing program, mastering fin-
ished tape). Emphasis alternates quarterly between
ethnographic and dance/chorography. May be repeated once for credit. P/NP or letter grading.

181. Ethnographic Film. (4) Lecture, four hours. Survey of ethnographic film and video, with focus on
studies of expressive culture. Emphasis on critical and
comparative visual study of cul-
ture, community, and arts. P/NP or letter grading.

182. Dance and Visual Media. (4) Lecture, four hours. Examination of aesthetic differences between
dance, film, and video and exploration of new aesthet-
ic when they are combined. Analysis of record and
documentary dance film, choreo-cinema, and impact of
MTV, as well as integration of media with perfor-
mation for dance. Letter grading.

C183. Film and Folklore. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to film cri-
cism and folklore methodology. Topics include early
examples of folklore on film, changing conceptions of
folklore and uses of films about folklore, and exam-
ple of films of by, with, and for folklorists. Concurrently scheduled with course C283. P/NP or letter grading.

C184. Production Arts Seminar. (4) Seminar, four
hours. Theory and practice of production administra-
tion, including hands-on case studies for producing
public events in arts and academia. Topics include, but
are not limited to, history and theories of produc-
mation, mission statements, budgeting, marketing,
public relations, fundraising, legalities, and archiving.
Concurrentley scheduled with course C243. P/NP or letter grading.

185. Junior-Year Proposal. (1) Lecture, 90 minutes; outside study, 90 minutes. Requires: course 65. Limited
in World Arts and Cultures. May be repeated for planning and execution of proposal (either senior focus or senior honors project) for senior-year study, with attention to
examination of project components and shaping
the whole. May be repeated once for credit. P/NP grading.

186A-186B. Senior Honors Projects in World Arts and Cultures. (5-5) Lecture, four hours; outside study, 11 hours. Requires: course 185. Course 186A is required to 186B. Limited to senior World Arts and Cultures majors. Application of concepts and content from interdisciplinary major to individual projects.
Methodologies may include critical, comparative, eth-
ographic, and performance approaches. Lecture/
seminar format with World Arts and Cultures faculty
first term; faculty-directed presentations of indi-

dividual projects during second term. Letter grading.

195. Community or Corporate Internships in World Arts and Cultures. (2 to 4) Tutorial, six hours.
Internship in supervised setting in community agency or
business. Students meet on regular basis with in-
structor and provide periodic reports of their experi-

199. Directed Research in World Arts and Cul-
tures. (2 to 4) Lecture, one hour. Preparation: 3.0
gradepoint average in major. Limited to juniors/se-

200. Theories of Culture. (4) Seminar, three hours; outside study, nine hours. Introduction to history of
culture concept in arts, humanities, and social scienc-
es. Analysis of contemporary debates concerning
ownership and use of word "culture" and critical elici-
tation of study of culture. S/U or letter grading.

201. Theories of Performance. (4) Seminar, three hours; outside study, nine hours. Theory and practice of performance: with focus on
theater. S/U or letter grading.

Graduate Courses

200. Theories of Culture. (4) Seminar, three hours; outside study, nine hours. Introduction to history of
culture concept in arts, humanities, and social scienc-
es. Analysis of contemporary debates concerning
ownership and use of word "culture" and critical elici-
tation of study of culture. S/U or letter grading.

201. Theories of Performance. (4) Seminar, three hours; outside study, nine hours. Focus on the history and concept of performance: with focus on
theater. S/U or letter grading.
202. Research Methodologies. (4) Not same as course 202 prior to Fall Quarter 2009.) Seminar, three hours; outside study, nine hours. Hands-on course designed to help students develop understanding of many developed qualitative research methods and designs they encounter in their work. Identification and creation of research problems, development of designs, actual data collection, and analysis procedures to address those problems. S/U or letter grading.

203. Proseminar: Dance Studies. (4) Seminar, three hours; outside study, nine hours. Survey of theoretical issues and problems in study of dance and body movement in cultural, social, and historical context. S/U or letter grading.

204. Theories of Corporeality. (4) Seminar, three hours; outside study, nine hours. Cross-cultural and interdisciplinary perspectives on human body. Topics include representations of body, body symbolism, embodiment of identity (including gender, race, ethnicity, and class identities), and analysis of dance and other somatic modes of performance. S/U or letter grading.

205. Folklore Theories and Methods. (4) Lecture, three hours; outside study, nine hours. Introductory course in history, analytical perspectives, and current trends, including research techniques in contemporary folklore and oral traditions. S/U or letter grading.

206. Folklore Seminar. (4) Seminar, three hours; outside study, nine hours. Variable topics. Detailed consideration of particular folk genre, culture area, historical period, and topic of issue in field of folklore. May be repeated for credit. S/U or letter grading.

207. Ethnography of Performance. (4) Formerly numbered 202.) Seminar, three hours; outside study, nine hours. Survey of methods and methodological issues in ethnographic study of performance in cultural context. Field documentation, participant observation, oral history and interview techniques, performative dimensions of ethnographic research, ethics, and politics of ethnographic research. S/U or letter grading.

210. Ethnography of and as Colonialism. (4) Seminar, three hours. Beginning with 1550 debates over Indian humanity and ranging to contemporary scholarship about and by indigenous peoples, focus on intersections of writing, colonialism, violence, and history in Americas. Exploration of relationship between 16th-century reasoning about race and postcolonial, Western, and academic practices of writing history and development of critical and reflexive postcolonial theories as such perspectives bear on anthropological and historical studies of indigenous religiosity in Andean, Incan, and Maya worlds. S/U or letter grading.

211A-211F. Advanced Choreography. (4 each) Lecture, two hours; studio, two hours. Theoretical aspects of advanced choreography for students who have reached level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers. S/U or letter grading.

216. Analyzing Narrative and Oral Performance. (5) Lecture, four hours. Designed for graduate students. Exploration of ways of documenting individual narrators and making them available to public. Development of critical and reflexive discourse, impact of audience and situated event on both narrating and story, how experiences and values are communicated, strategies of oral storytelling, and role of politics in oral narrative. S/U or letter grading.

220. Seminar: Culture and Performance. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students in interdisciplinary study of expressive culture, arts, and performance in social and historical context. May be repeated for credit with different topics. S/U or letter grading.

223. Arts of Identity: Survey of Expressive Cultures. (4) Lecture, four hours; outside study, eight hours. Focus on production, distribution, consumption, and creativity in cultural context. Special attention to relationships between arts and identity and to role of artists in cultural survival and transformation. Concurrently scheduled with course C123. S/U or letter grading.

225A-225B. Theories of Movement: Labananaly sis. (4-4) Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing movement and designing dance. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing. S/U or letter grading.

229. Food Customs and Symbolism. (4) Lecture, three hours. Designed for graduate students. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realms, child rearing practices, foodsharing, food and identity, food and its emotional significance, aver sions and taboos, advertising, changing food habits, and American customs. Concurrently scheduled with course C129. S/U or letter grading.

240. Women Healers, Ritual, and Transformation. (4) Same as Women's Studies CM243.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM140. S/U or letter grading.

241. Carnival and Festivity. (4) Lecture, three hours; fieldwork, one hour. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and carnivalesque and politics of celebration. Concurrently scheduled with course C141. S/U or letter grading.

242. Myth, Magic, and Mind. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Consideration of metaphor and symbol, reflexive anthropology, and notion of culture as text applied to context of magical discourse, rhetorical devices including parable and irony, and arguably magical experience of humans “shape-shifting” to become animals. Concurrently scheduled with course C142. S/U or letter grading.

243. Production Arts Seminar. (4) Formerly numbered CM243.) Seminar, four hours. Theory and practice of production administration, including hands-on case studies for producing public events in arts and academia. Topics include, but are not limited to, history and theories of producing, mission statements, budgeting, marketing, public relations, fund-raising, legal issues, and archiving. Concurrently scheduled with course C184. S/U or letter grading.

244. Folk Medicine. (4) Seminar, three hours; outside study, nine hours. Exploration of fundamental concepts, analytical approaches, and recurrent questions in research on folk or traditional medicine, including categories and motivations of healers, variety of illnesses, and treatment modalities such as use of faith- and plant-based remedies, along with issues about persistence, efficacy, and development of culturally sensitive healthcare. S/U or letter grading.

245. Selected Topics in Dance Studies. (2 to 4) Lecture, four hours; outside study, eight hours. Designed for graduate students in cultural dance and corporeality. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit without limitation. Concurrently scheduled with course C145. S/U or letter grading.

246. Politics of Performance. (4) Seminar, four hours; outside study, eight hours. Designed for graduate students. Opportunities to reflect on artists and intellectuals as cultural workers operating in domains of ideology, aesthetics, and theory. Analysis of such key words as ideology, aesthetics, theory, art, politics, intervention, intellectuals, and artists. Concurrently scheduled with course C146. S/U or letter grading.

247. Arts and Healing. (4) Lecture, four hours. Interdisciplinary, content-based model of healing applicable to persons leading Western modernist lifestyles and coping with two kinds of social crises during their lifetimes: (1) developmental transitions that are disruptive life-cycle changes that have potential to promote self-regeneration or self-fragmentation and (2) external transitions that are situational catastrophic events that evoke great terror and trigger fears of annihilation and chaos, but if successfully negotiated, have potential to promote revitalized sense of self, greater compassion for others, and restored sense of trust and hope in human community. S/U or letter grading.

248. Dance as Healing and Therapy. (4) Lecture, two hours; laboratory, two hours; outside study/research, eight hours. Designed for graduate students. Introduction to historical, theoretical, methodological, and ethical considerations involved in practice of dance as healing and therapy. Concurrently scheduled with course C148. Letter grading.

252. History and Theory of Modern/Postmodern Dance. (4) Lecture, four hours; studio, two hours; outside study, six hours. Introduction to key figures in creation of modern dance, with special attention to their theories and philosophies and tracing of radical shift to postmodern dance that occurred in mid-20th century. Contemporary developments, both historical and theoretical. Student projects involve choreography and writing. Concurrently scheduled with course C152. S/U or letter grading.

254. Dance and Folklore. (4) Lecture, four hours. Consideration of vernacular tradition as site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European American dance idioms. Concurrently scheduled with course C154. S/U or letter grading.

255. Self and Culture. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Designed for graduate students. Examination of critical developmental processes and situational factors contributing to construction of sense of self and emergence of creativity and subjective relatedness in different cultural contexts. Concurrently scheduled with course C155. S/U or letter grading.
C256. Frida Kahlo: Creation of Cultural Icon. (5) Lecture, four hours. Examination of life of renowned Mexican artist Frida Kahlo in light of (1) Mexico's political, religious, and cultural history that gave rise to mestizaje and machismo, (2) social conditions that strongly influenced construction of her mestiza and gender identity, as well as her revolutionary political ideals, (3) twenty-first century female artists living in patriarchal societies had to confront, (3) way her significant attachments influenced her construction of self as the source of self and kind of artwork she produced, (4) transcendent and self-regulatory functions her self-portraits served in maintaining her emotional equilibrium, (5) conversion of Kahlo's image after her death into cultural icon by culturally disengaged groups, and (6) psychosocial conditions and processes that tend to promote creation of cultural icons. Concurrently scheduled with course C156. S/U or letter grading.

C264. Public Writing in Arts. (4) Lecture, four hours; outside study, eight hours. Survey of journalistic approaches to writing about arts, with eye toward shaping critique of public writing practices and putting that critique into practice. Exploration of new modes of (and venues for) writing that rebalance power differential between art makers and commentators. Concurrently scheduled with course C164. S/U or letter grading.

C265. Beyond Academia: Making Art in Real World. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course C168. S/U or letter grading.

C273. Sound Resources for Performance. (4) Lecture, three hours; studio, one hour; outside study, eight hours. Designed for graduate students. Exploration of music, in search of interesting, new, and unusual, in-vestigations of musical possibilities via video store, internet, and music library; environmental sounds and patterns; body (clapping, stepping, and singing); and hardware store (found sound). Participants meet with fellow students in creative efforts and in presentations of research results. Concurrently scheduled with course C173. S/U or letter grading.

C275. Applied Folklore. (4) Lecture, four hours. Designed for graduate students. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklore. Concurrently scheduled with course C175. S/U or letter grading.

C280. Video Production in Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (organizing raw footage, constructing program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C180. Letter grading.

C283. Film and Folklore. (4) Lecture, three hours. Designed for graduate students. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C183. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Directed Professional Activities. (2 to 8) Lecture, to be arranged. Directed projects in professional editing, bibliographic, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

C406A. Advanced World Arts Practices in Sub-Saharan Africa and Diaspora. (2) Seminar, three hours; outside study, three hours. Advanced-level study of world arts practices originating from sub-Saharan Africa and African diasporas. Variable topics and genres, such as West African tap, Bali, Mali, Guinea, Senegal and diaspora (Guatemala, Cuba, Brazil, Caribbean), including cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C106A. S/U or letter grading.

C409A. Advanced World Arts Practices in North America and Diaspora. (2) Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from North America, including U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz tap, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C109A. S/U or letter grading.

C413A. Advanced World Arts Practices in Europe and Diaspora. (2) Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from Europe and extending to cultures of European diasporas, including U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C113A. S/U or letter grading.

C415. Advanced Modern/Postmodern Dance. (2) Studio, six hours. Requisite: course 65. Studies in advanced modern/postmodern dance technique, with emphasis on performing skills. May be repeated for credit without limitation. Concurrently scheduled with course C115. S/U or letter grading.

441. Dance Production Practicum. (2 to 4) Laboratory, four to eight hours (one or two hours may be individualized consultation). Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for maximum of 8 units. S/U grading.

451. Teaching Assistant Seminar. (2) Seminar, one hour; laboratory, three hours. Required of all World Arts and Cultures Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

452. Directed Field Study in Dance Education. (2 to 8) Seminar, one hour; field study, two hours minimum. Directed field study to provide teaching experience in community school or other approved site. No more than 4 units may be applied toward M.A. degree requirements. S/U grading.

478. Advanced Private Instruction in World Arts and Cultures. (2 to 8) Studio, three to 12 hours; outside study, three to 12 hours. Private or semiprivate instruction with distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for maximum of 24 units. S/U grading.

480. Seminar: Research Topics. (2) Seminar, two hours. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students register for seminar presentation each term they are enrolled for credit. May be repeated for maximum of 8 units. S/U grading.

490. Projects in Choreography and Performance. (2 to 8) Seminar, one three-hour rehearsal per unit per week minimum. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for maximum of 16 units. S/U or letter grading.

495. Teacher Preparation in World Arts and Cultures. (2) Seminar, two hours. Directed work in preparation of course syllabi and discussion of topics relevant to developing teaching skills. Fundamental principles and methods with which to design course syllabi and gather resources for courses. Topics include development of teaching philosophy, evaluating/selecting course content, teaching methodologies, assessment/evaluation/practicing grading, and consideration of practical, administrative, and ethical issues. Students meet with instructor to review their specific needs as they progress in development and elaboration of course plans. Microteaching sessions provide context for applying concepts and principles discussed. S/U grading.

496. Professional Internship in Dance. (4, 8, or 12) Seminar, to be arranged. Full- or part-time supervised fieldwork. Limited to M.F.A. students. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties. S/U or letter grading.

596A. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

596R. Directed Study or Research in Hospital or Clinic. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examination. (2 to 8) Tutorial, to be arranged. Preparation for M.A. or M.F.A. comprehensive examination or Ph.D. qualifying examination. S/U grading.

APPENDIX A: REGULATIONS AND POLICIES

Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy and childbirth), physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services (including membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services). The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University’s student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Box 951405, Los Angeles, CA 90095-1405, (310) 825-4042.

Inquiries regarding nondiscrimination on the basis of disability covered by the Americans with Disabilities Act (ADA) of 1990 or Section 504 of the Rehabilitation Act of 1973 may be directed to Monroe Gorden, ADA and 504 Compliance, A239 Murphy Hall, UCLA, Box 951405, Los Angeles, CA 90095-1405, voice (310) 825-2242, TTY (310) 206-3349; http://www.ada.ucla.edu.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, and/or refer to Section 111.00 of the University of California Policies Applying to Campus Activities, Organizations, and Students (available in 1206 Murphy Hall or at http://www.ucop.edu/ucophome/coordinrev/ucpolicies/aos/toc.html) for further information and procedures.

Student Conduct Policies

Students are members of both society and the academic community with attendant rights and responsibilities. Students are expected to make themselves aware of and comply with the law, and with University and campus policies and regulations. While many of UCLA’s policies and regulations parallel federal, state, and local laws, UCLA’s standards may be set higher. The University of California Policies Applying to Campus Activities, Organizations, and Students (UC Policies) have been incorporated into the UCLA Student Conduct Code either by adapting or inserting verbatim the language of the policies. The complete University of California Policies Applying to Campus Activities, Organizations, and Students is available at http://www.ucop.edu/ucophome/coordinrev/ucpolicies/aos/toc.html. Students may contact the Office of the Dean of Students, Office of Ombuds Services, or Student Legal Services for advice concerning these policies.

A. Jurisdiction

The University has jurisdiction over student conduct that occurs on University property, or in connection with official University functions whether on or off University property. Although the University will not routinely invoke its disciplinary processes over student conduct that occurs off campus except in connection with an official University function, the University has discretion to exercise jurisdiction over conduct that occurs off campus and that would violate student conduct and discipline policies or regulations if the conduct had occurred on campus when (1) the alleged misconduct indicates the student poses a threat to the safety or security of any member(s) of the University community or (2) the alleged misconduct involves academic work or the forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.

Specifically, the University may choose to exercise jurisdiction over off-campus incidents under alternative A.1 above where the alleged misconduct involves

a. Physical abuse, including but not limited to sexual assault, sexual misconduct, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person

b. Stalking (as defined in Section 102.10 of the University of California Policies Applying to Campus Activities, Organizations, and Students)

c. Sexual harassment (as defined in Section 160.00 et seq. of the University of California Policies Applying to Campus Activities, Organizations, and Students)

d. Participation in hazing or any method of initiation or preinitiation into a campus organization or other activity engaged in by the organization or members of the organization at any time that causes, or is likely to cause, physical injury or personal degradation or disgrace resulting in psychological harm to any student or other person

In determining whether or not to exercise off-campus jurisdiction in cases under alternative A.1 above, the University will consider the seriousness of the alleged misconduct; whether the alleged victim is a member of the campus community; the ability of the University to gather information, including the testimony of witnesses; or whether the off-campus conduct is part of a series of actions that occurred both on and off campus.

This section is intended only to provide guidance for the exercise of discretion by the University in invoking its jurisdiction over conduct that occurs off campus. It may not be relied upon by any student charged under this section to create any rights, substantive or procedural, or as a basis for a challenge to the exercise of the University’s jurisdiction.

B. Types of Misconduct

Students may be disciplined for violations or attempted violations (including aiding, abetting, or participating in the planning of an act that would be in violation of the UCLA Student Conduct Code, whether or not the individual who carries out that act is a student). Violations include the following types of misconduct:

102.01: Academic Dishonesty. All forms of academic misconduct, including but not limited to cheating, fabrication, plagiarism, multiple submissions, or facilitating academic misconduct. For the purposes of the UCLA Student Conduct Code, the following definitions apply:

102.01a: Cheating. Cheating includes, but is not limited to, the use of unauthorized materials, information, or study aids in any academic exercise or the failure to observe the expressed procedures or instructions of an academic exercise (e.g., examination instructions regarding alternate seating or conversation during an examination).

102.01b: Fabrication. Fabrication includes, but is not limited to, falsification or invention of any information or citation in an academic exercise.

102.01c: Plagiarism. Plagiarism includes, but is not limited to, the use of another’s words or ideas as if they were one’s own, including but not limited to representing, either with the intent to deceive or by the omission of the true source, part of or an entire work produced by someone other than the student, obtained by purchase or otherwise, as the student’s original work or representing the identifiable but altered ideas, data, or writing of another person as if those ideas, data, or writing were the student’s original work.

Appendixes
102.01d: Multiple Submissions. Multiple submissions includes, but is not limited to, the re-submission by a student of any work which has been previously submitted for credit in identical or similar form in one course to fulfill the requirements of a second course, without the informed permission/consent of the instructor of the second course; or the submission by a student of any work submitted for credit in identical or similar form in one course to fulfill the requirements of a concurrent course, without the permission/consent of the instructors of both courses.

102.01e: Facilitating Academic Dishonesty. Facilitating academic dishonesty includes, but is not limited to, knowingly helping another student commit an act of academic misconduct (e.g., cheating, fabrication, plagiarism, multiple submissions).

102.01f: Coercion Regarding Grading or Evaluation of Coursework. Threatening personal or professional repercussions or discipline against an instructor to coerce the instructor to change a grade or otherwise evaluate the student's work by criteria not directly reflective of coursework.

102.02: Other Forms of Dishonesty. Other forms of dishonesty, including but not limited to fabricating information or knowingly furnishing false information or reporting a false emergency to the University.

102.03: Forgery. Forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.

102.04: Theft. Theft of, conversion of, misappropriation of, or damage to or destruction of any property of the University or property of others while on University premises or at official University functions; or possession of any property when the student had knowledge or reasonably should have had knowledge that it was stolen.

102.05: Computers. Theft or abuse of University computers and other University electronic resources such as computer and electronic communications facilities, systems, and services. Abuses include, but are not limited to, unauthorized entry, use, transfer, or tampering with the communications of others; interference with the work of others and with the operation of computer and electronic communications facilities, systems, and services; and violations of copyright laws, whether by theft, unauthorized sharing, or other misuse of copyrighted materials such as songs, movies, software, photos, or text. Violation of the UCLA E-Mail Policy and Guidelines (available at http://www.adminvce.ucla.edu/appm/public/455.htm), of the University of California Electronic Communications Policy (available at http://www.ucop.edu/ucophome/policies/ec/), or of any other University acceptable or allowable use policy is also considered a violation of Section 102.05.

102.06: Unauthorized Use of University Resources or Name. Unauthorized entry to, possession of, receipt of, or use of any University services, equipment, resources, or properties, including the University's name, insignia, or seal.

102.07: University Housing and Parking.

102.07a: University Housing. Violation of policies, regulations, or rules governing University-owned, operated, or leased housing facilities or other housing facilities located on University property.

102.07b: Parking. Violation of policies, regulations, or rules governing University parking services or University-owned or operated parking facilities.

102.08: Physical Abuse. Physical abuse includes physical assault, sexual assault, sexual misconduct, sex offenses; threats of violence; or other conduct that threatens the health or safety of any person.

Sexual Assault occurs when a person knowingly causes another person to engage in a sexual act by (a) physical force, violence, threat, intimidation, and/or coercion; (b) ignoring the objections of the other person; (c) causing the other's intoxication or impairment through the use of drugs or alcohol; or (d) taking advantage of the other person's incapacitation, state of intimidation, helplessness, or other inability to consent. Situations involving physical force, violence, threat, intimidation, and/or coercion fall under the definition of Sexual Assault.

Sexual Misconduct occurs when a person, having failed to take appropriate steps to gain effective consent, engages in a sexual act with another under the unreasonable belief that effective consent had been obtained. Sex offenses include, but are not limited to, sexual assault upon a child, incest, and consensual sex with an individual under the age of consent (18 years of age in California). NOTE: For the purpose of this regulation, the following apply:

1. “Effective consent” referenced in the terms above means words or actions that show a voluntary agreement to engage in a mutually agreed-upon sexual activity.

2. “Sexual act” referenced in the terms above includes, but is not limited to, sexual intercourse, sodomy, oral-genital contact, or sexual penetration with a foreign object (including a finger), the touching of a person's intimate parts (defined as genitalia, groin, breast, or buttocks, or clothing covering them), or compelling a person to touch his or her own or another person's intimate parts without effective consent.

3. Intoxication of the accused will not diminish his or her responsibility for any violations of this section.

102.09: Sexual Harassment. Sexual harassment, as defined in the University of California Policies Applying to Campus Activities, Organizations, and Students (Section 160.00), reads in part: Sexual harassment is unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature, when submission to or rejection of this conduct explicitly or implicitly affects a person's employment or education, unreasonably interferes with a person's work or educational performance, or creates an intimidating, hostile, or offensive working or learning environment. In the interest of preventing sexual harassment, the University will report to any such conduct.

Refer to the Policy on Sexual Harassment and Complaint Resolution Procedures (section 160.00) for the entire definition. The Policy on Sexual Harassment and Complaint Resolution Procedures is incorporated into the Policy on Student Conduct and Discipline.

102.10: Stalking. Stalking behavior in which a student repeatedly engages in a course of conduct directed at another person and makes a credible threat with the intent to place that person in reasonable fear for his or her safety, or the safety of his or her family; where the threat is reasonably determined by the University to seriously alarm, torment, or terrorize the person; and where the threat is additionally determined by the University to serve no legitimate purpose.

102.11: Harassment. Harassment by a student of any person. For the purposes of this section, harassment:

a. Is the use, display, or other demonstration of words, gestures, imagery, or physical materials, or the engagement in any form of bodily conduct, on the basis of race, color, national or ethnic origin, alienage, sex, religion, age, sexual orientation, or physical or mental disability that has the effect of creating a hostile and intimidating environment sufficiently severe or pervasive to substantially impair a reasonable person's participation in University programs or activities, or use of University facilities.

b. Must target a specific person or persons

c. Must be addressed directly to that person or persons

NOTE: The Office of the President has issued the following guidelines on interpretation and application of this section (102.11: Harassment): “Prior to applying this provision of policy to any student conduct, the Office of General Counsel will be consulted regarding its proper interpretation and application in light of the specific circumstances.”

102.12: Hazing. Participation in hazing or any method of initiation or preinitiation into a campus organization or other activity engaged in by the organization or members of the organization at any time that causes, or is likely to cause, physical injury or personal degradation or disgrace resulting in psychological harm to any student or other person.

102.13: Obstruction or Disruption. Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities.

102.14: Disorderly Conduct. Disorderly or lewd conduct.
102.15: Disturbing the Peace. Participation in a disturbance of the peace or unlawful assembly.

102.16: Failure to Comply. Failure to identify oneself to, or comply with directions of, a University official or other public official acting in the performance of his or her duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties.

102.17: Controlled Substances. Unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances, identified in Federal and State laws or regulations.

102.18: Alcohol. Manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations.

102.19: Destructive Devices. Possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices.

102.20: Weapons. Except as expressly permitted by law, possession, use, storage, or manufacture of a firearm or other weapon capable of causing bodily injury. Except as expressly permitted by University policy, possession, use, storage, or manufacture of replicas of firearms or other weapons.

102.21: Violation of Disciplinary Conditions. Violation of the conditions contained in the terms of a disciplinary action imposed under the UCLA Student Conduct Code.

102.22: Violation of Interim or Emergency Suspension Conditions. Violation of the conditions contained in a written Notice of Interim or Emergency Suspension issued pursuant to Section IV of the UCLA Student Conduct Code.

102.23: Unauthorized Use or Sale of University Materials. Except as provided herein, no student shall give, sell, or otherwise distribute to others or publish any recording made during any course presentation without the written consent of the University and the instructor/presenter. This policy is applicable to any recording in any medium, including handwritten or typed notes.

Any distribution of a recording of a course presentation at UCLA that captures the actual sounds and/or images of that course presentation, in any medium, must consider not only the rights of the instructor and the University, but also those of other parties. Examples include the privacy rights of students enrolled in the course, the rights of guest lecturers, and the copyright interests in materials authored by others that are displayed or presented during the course presentation. In addition to the consent of the University and the instructor/presenter, it may be necessary to secure permission from these other parties before any recording, distribution, publication, or communication is legally permitted.

102.23a: Selling Course Notes. Selling, preparing, or distributing for any commercial purpose course lecture notes or video or audio recordings of any course unless authorized by the University in advance and explicitly permitted by the course instructor in writing. The unauthorized sale or commercial distribution of course notes or recordings by a student is a violation of the UCLA Student Conduct Code whether or not it was the student or someone else who prepared the notes or recordings. This policy is applicable to any recording in any medium, including handwritten or typed notes.

102.23b: Copying Course Notes. Copying for any commercial purpose handouts, readers, or other course materials provided by an instructor as part of a University of California course unless authorized by the University in advance and explicitly permitted by the course instructor or the copyright holder in writing (if the instructor is not the copyright holder). Students currently enrolled in a course may provide a copy of their own notes or recordings to other currently enrolled students for noncommercial purposes reasonably arising from participation in the course, including individual or group study.

102.23c: Commencement Tickets. Selling commencement tickets.

102.24: University Properties. Using University properties for the purpose of organizing or carrying out unlawful activity.

102.25: Violations of Law. Violation of Federal, State, or local laws.

Sexual Assault and Sexual Misconduct

UCLA does not tolerate sexual assault or sexual misconduct. Where there is probable cause to believe a student has committed a sexual assault or has engaged in sexual misconduct, disciplinary action will be pursued. Sanctions may include dismissal from the University.

If a Person Has Been Sexually Assaulted

Those who believe that they are the victims of sexual assault should

1. Immediately call the police department. If possible, call the UCLA Police Department at (310) 825-1491 or 911

2. Get medical attention. Campus police will provide transportation to the Santa Monica UCLA Medical Center Emergency Room for emergency medical treatment and evidence collection. A counselor from the Rape Treatment Center will be available at that time, free of charge

Utilize campus and community support services:

1. Contact a Rape Services Consultant (RSC) at Counseling and Psychological Services. RSCs have expertise in working with people who have been sexually assaulted. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist any UCLA student regardless of where or when the assault occurred. For assistance, contact Counseling and Psychological Services at (310) 825-0768 or go to 221 Wooden Center West and ask to speak to an RSC.

Harassment

Sexual Harassment

The University of California is committed to creating and maintaining a community where all persons who participate in University programs and activities can work and learn together in an atmosphere free from all forms of harassment, exploitation, or intimidation. Every member of the University community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy. The University will respond promptly and effectively to reports of sexual harassment and will take appropriate action to prevent, correct, and, if necessary, discipline behavior that violates this policy. See http://www.ssexualharassment.ucla.edu.

Definitions

For detailed definitions of sexual harassment, refer to Section 102.09 of the UCLA Student Conduct Code listed above.

Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the Sexual Harassment Coordinator in 2241 Murphy Hall or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant’s status at the University at the time of the alleged incident:

1. Campus Human Resources/Employee and Labor Relations, Manager, 200 UCLA Wilshire Center, (310) 794-0860

Caring assistance is available for persons who have been subjected to sexual assault or sexual misconduct. They are encouraged in the strongest terms to make a report.
2. Campus Human Resources/Staff and Faculty Counseling Center, Coordinator, 380 UCLA Wilshire Center, (310) 794-0248
3. Center for Student Programming, Associate Director, 105 Kerckhoff Hall, (310) 206-8817
4. Chancellor’s Office, Sexual Harassment Coordinator, 2241 Murphy Hall, (310) 206-3417
5. Counseling and Psychological Services, Director, 221 Wooden Center West, (310) 825-0768
6. David Geffen School of Medicine, Dean’s Office, Special Projects Director, 12-138 Center for the Health Sciences, (310) 794-1958
7. Graduate Division, Office Manager, 1237 Murphy Hall, (310) 206-3269
8. Healthcare Human Resources, Employee Relations Manager, 400 UCLA Wilshire Center, (310) 794-0500
9. Lesbian Gay Bisexual Transgender Campus Resource Center, Director, B36 Student Activities Center, (310) 206-3628
10. Office of the Dean of Students, Assistant Dean of Students, 1206 Murphy Hall, (310) 825-3871
11. Office of Ombuds Services, 105 Strathmore Building, (310) 825-7627; 52-025 Center for the Health Sciences, (310) 206-2427
12. Office of Residential Life, Judicial Affairs Coordinator, Residential Life Building, 370 De Neve Drive, (310) 825-3401
13. Resnick Neuropsychiatric Hospital, Administration/Human Resources Associate Director, B7-370 Semel Institute, (310) 206-5258
14. School of Dentistry, Assistant Dean, Student Affairs, A0-111 Dentistry, (310) 825-2615
15. Student Legal Services, Director, 70 Dodd Hall, (310) 825-9894
16. UCLA Extension, Human Resources Director, 629 UNEX Building, (310) 825-4287; Student Services Director, 214 UNEX Building, (310) 825-2556

Other Forms of Harassment

The University strives to create an environment that fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly, harassment, in its many forms, works against those values and often corrodes a person’s sense of worth and interferes with one’s ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The University of California Policies Applying to Campus Activities, Organizations, and Students (hereafter referred to as Policies; http://www.ucop.edu/ucophome/coordrev/ucpolicies/aos/toc.html) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.08 of the Policies.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 102.04 of the Policies.

Further, under specific circumstances described in the Universitywide Student Conduct Harassment Policy (http://www.deanofstudents.ucla.edu), students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this Policy are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

1. Counseling and Psychological Services, 221 Wooden Center West, (310) 825-0768, http://www.counseling.ucla.edu
2. Dashew Center for International Students and Scholars, 106 Bradley Hall, (310) 825-1681, http://www.internationalcenter.ucla.edu

Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of the available options is the most useful for the particular circumstances.

With regard to the Universitywide Student Conduct Harassment Policy, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this Policy and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the UCLA Faculty Handbook (copies are available in the Academic Personnel Office, 3109 Murphy Hall, and at http://www.apo.ucla.edu/facultyhandbook/9.htm). Part II A of the Faculty Code of Conduct outlines faculty obligations to students and reads as follows:

Teaching and Students

Ethical Principles: “As teachers, the professors encourage the free pursuit of learning of their students. They hold before them the best scholarly standards of their discipline. Professors demonstrate respect for students as individuals and adhere to their proper roles as intellectual guides and counselors. Professors make every reasonable effort to foster honest academic conduct and to assure that their evaluations of students reflect each student’s true merit. They respect the confidential nature of the relationship between professor and student. They avoid any exploitation, harassment, or discriminatory treatment of students. They acknowledge significant academic and scholarly assistance from them. They protect their academic freedom.” (from 1966 AAUP statement, revised 1987)

Types of Unacceptable Conduct

Failure to meet the responsibilities of instruction, including (1) arbitrary denial of access to instruction, (2) significant intrusion of material unrelated to the course, (3) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (4) evaluation of student work by criteria not directly reflective of course performance, (5) undue and unexcused delay in evaluating student work.
Discrimination, including harassment, against a student on political grounds or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a covered veteran or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

Violation of University policy, including the pertinent guidelines, applying to nondiscrimination against students on the basis of disability.

Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

Entering into a romantic or sexual relationship with any student for whom a faculty member has, or should reasonably expect to have in the future, academic responsibility (instructional, evaluative, or supervisory).

Exercising academic responsibility (instructional, evaluative, or supervisory) for any student with whom a faculty member has a romantic or sexual relationship.

Charges of Violation
If a student has reason to believe that a faculty member has violated the Faculty Code of Conduct and that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with the Office of Ombuds Services and a member of the Academic Senate Grievance Advisory Committee, file such a charge in person if the student continues to feel it is warranted.

Residence for Tuition Purposes
Students who have not been living in California with intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the University must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Laws Governing Residence
The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Order 110.2 of The Regents of the University of California (http://www.universityofcalifornia.edu/regs/bylaws/sol1102.html). Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Who Is a Resident?
Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S.

Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types: A, E, G, H-1, H-4, I, K, L, O-1, O-3, R, or V. To establish residence students must be physically present in California for more than one year, and they must have the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California residents, students are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse, registered domestic partner, or their parents.

Requirements for Financial Independence
Students are considered financially independent if one or more of the following apply: (1) they are at least 24 years of age by December 31 of the calendar year for which they are requesting residence classification; (2) they are a veteran of the U.S. Armed Forces; (3) they are a ward of the court or both parents are deceased; (4) they have legal dependents other than a spouse; (5) they are married, have a registered domestic partner, or are a graduate student or a professional student, and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are single undergraduate students and they were not claimed as an income tax deduction by their parents or any other individual for the two tax years immediately preceding the term for which they are requesting resident classification, and they can demonstrate self-sufficiency for those years and the current year.

Note: Financial dependence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in University-administered funds (e.g., grants, stipends, fellowships) in the term for which classification is sought.

Establishing Intent to Become a California Resident
Indications of students’ intent to make California their permanent residence can include the following: (1) registering to vote and voting in California elections, (2) designating California as their permanent address on all school and employment records, including military records if they are in the military service, (3) obtaining a California driver’s license or, if they do not drive, a California Identification Card, (4) obtaining California vehicle registration, (5) paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence, (6) establishing a California residence in which they keep their personal belongings, and (7) licensing for professional practice in California.

The absence of these indicia in other states during any period for which students claim residence can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.

General Rules Applying to Minors
If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent’s right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa that precludes them from establishing a domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors
Divorced or Separated Parents
Minor U.S. citizens or eligible aliens may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.

Parent of Minor Moves from California
Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (1) they remained
in California after their parent(s) departed, (2) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (3) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

Two-Year Care and Control
Minor students may be entitled to resident classification if, immediately prior to enrolling in a postsecondary institution, they have been living with and been under the continuous direct care and control of an adult or adults other than a parent for a period of no less than two years. The adult or adults having control must have been residents of California during the one year immediately prior to the residence determination date. The classification continues until students have attained the age of majority and have lived in the state the minimum time necessary to become a resident, so long as continuous full-time attendance is maintained at a postsecondary institution.

Self-Support
If students are U.S. citizens or eligible aliens and are minors who can prove that they lived in California for the entire year immediately before the residence determination date, that they have been self-supporting for that year, and that they intend to make California their permanent home, they may be eligible for resident status.

Exemptions from Nonresident Tuition
Member of the Military
Members of the U.S. military may be exempt from the nonresident tuition fee unless their assignment to California is for the purpose of attending a state-supported institution of higher education. Graduate and professional students are eligible for this exemption for two years, during which time they must fulfill the UC residence requirements in order to maintain their resident status. They must provide the residence deputy on campus with a statement from their commanding officer or personnel officer stating that their assignment to active duty in California is not for educational purposes. The letter must include the dates of their assignment to the state.

Undergraduate students discharged from military service after having been stationed in California on active duty for at least 366 days are entitled to resident classification for the minimum time necessary to establish residence (366 days). In this case, financial independence is not a requirement.

Spouse, Registered Domestic Partner, or Other Dependents of Military Personnel
Students are exempt from payment of the nonresident tuition fee if they are a spouse, registered domestic partner, or natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. Graduate and professional students are eligible for the exemption only until they have resided in the state the minimum time necessary to become a resident (366 days). Students must petition for a waiver of the nonresident tuition fee each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

Child, Spouse, or Registered Domestic Partner of Faculty Member
To the extent funds are available, if students are an unmarried dependent child under age 21, spouse, or registered domestic partner of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member’s membership on the Academic Senate must be secured each term this waiver is granted.

Child, Spouse, or Registered Domestic Partner of University Employee
Students may be entitled to resident classification if they are an unmarried dependent child, spouse, or registered domestic partner of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory or University of California Washington, DC, Center). Their parents, spouse’s, or registered domestic partner’s employment status with the University must be ascertained each term.

Child, Spouse, or Registered Domestic Partner of Deceased Public Law Enforcement or Fire Suppression Employee
Students may be entitled to a waiver of the nonresident tuition fee if they are the child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

Dependent Child of a California Resident
If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of the nonresident tuition fee until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

Native American Graduate of a Bureau of Indian Affairs High School
Students who are graduates of a California high school operated by the federal Bureau of Indian Affairs may be exempt from the nonresident tuition fee.

Employee of a California Public School District
Students holding a valid credential authorizing service in the public schools of the State of California who are employed by a school district in a full-time certificate position may be exempt from the nonresident tuition fee.

Student Athlete in Training at the U.S. Olympic Training Center, Chula Vista
Any amateur student athletes in training at the U.S. Olympic Training Center in Chula Vista may be exempt from the nonresident tuition fee until they have resided in California the minimum time necessary to become a resident.

Graduate of a California High School
Students who attended high school in California for three or more years (9th grade included) and graduated from a California high school (or attained the equivalent) may be exempt from the nonresident tuition fee. They are not eligible for the exemption if they are a nonimmigrant alien.

Surviving Dependents of California Residents Killed in the September 11, 2001, Terrorist Attacks
Students who are surviving dependents of California residents killed in the September 11, 2001, terrorist attacks may be exempt from the nonresident tuition fee.

Residents Killed in the September 11, 2001, Terrorist Attacks
Students who are survivors dependents of California residents killed in the September 11, 2001, terrorist attacks may be exempt from the nonresident tuition fee. Recipients must be California residents, and students must be under age 28. Students’ annual income must not exceed the national poverty level. If the recipient was a parent who died, the parent must have been a California resident at the time of death.

Temporary Absences
If persons are nonresident students who are in the process of establishing a residence for tuition purposes and they return to their former home during noninstructional periods, their presence in the state is presumed to be solely for educational purposes and only convincing evidence to the contrary rebuts this presumption. Students who are in the state solely for educational purposes are NOT classified as residents for tuition purposes regardless of the length of their stay.

If persons who have been classified as residents for tuition purposes and they leave the state temporarily, their absence could result in the loss of their California residence. The burden is on students (or their parents if they are minors) to verify that they did nothing inconsistent with their claim of a continuing California residence during their absence. Steps that students (or their parents) should take to retain a California residence include the following:
1. Continue to use a California permanent address in all records — educational, employment, military, etc.

2. Continue to satisfy California tax obligations. If students are claiming California residence, they are liable for payment of income taxes on their total income from the date they establish their residence in the state, including income earned in another state or country.

3. Retain a California voter's registration and vote by absentee ballot.

4. Maintain a California driver's license and vehicle registration. If it is necessary to change the driver's license or vehicle registration, students must change them back within the time prescribed by law.

**Petition for Resident Classification**

Students may obtain a petition at 1113 Murphy Hall or at http://www.registrar.ucla.edu/forms/residenceclass.pdf for a change of classification from nonresident to resident status. All changes of status must be initiated at least three weeks in advance of the fee payment deadline for the applicable term.

**Time Limitation on Providing Documentation**

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

**Incorrect Classification**

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, they are also subject to U.C. discipline. Resident students who become nonresidents must immediately notify the residence deputy.

**Inquiries and Appeals**

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, UCLA Office of the Registrar, 1113 Murphy Hall, Box 951429, Los Angeles, CA 90095-1429 (310-825-3447; http://www.registrar.ucla.edu/faq/residencefaq.htm) or to the Senior Paralegal — Residence Matters, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the senior paralegal within 30 days of notification of the residence deputy's final decision.

**Privacy Notice**

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not students are legal residents for tuition purposes. Registration cannot be processed without this information. The Registrar's Office on campus maintains the requested information. Students have the right to inspect University records containing the residence information requested on the form.

**Financial Aid Minimum Progress Standards**

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, students expect they cannot meet the satisfactory academic progress requirements listed below, they should contact the Financial Aid Office immediately for further advising. See the Guide to Satisfactory Academic Progress at http://www.fao.ucla.edu/publications.html.

**Undergraduate Students**

**Qualitative Standard**

The qualitative standard is enforced by the College or school. Students are notified by their academic department if they fall below the required grade-point average (GPA).

**Quantitative Standard**

The quantitative standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of terms, including summer. It may differ from the College/school requirement.

All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as full-time students, they must successfully complete at least 24 units in their first academic year at UCLA to maintain satisfactory academic progress. Thereafter, students must successfully complete 55 units by the end of the sixth term, 86 units by the end of the ninth term, 117 units by the end of the twelfth term, 148 units by the end of the fifteenth term, and 180 units by the end of the eighteenth term.

After 18 terms of enrollment as a full-time student or the equivalent as a part-time student, no further financial aid is granted.

The measurement of progress occurs at the end of each Winter Quarter. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If students enter UCLA in advanced standing, the number of terms for which they are eligible for aid is reduced proportionally to the number of transfer units credited to their record. For example, students who are credited with 90 transfer units would have only 12 terms of financial aid eligibility as an undergraduate at UCLA.

If persons are continuing students at UCLA at the time they apply for financial aid, their progress is measured by the satisfactory academic progress chart to determine their eligibility (i.e., they must have successfully completed 55 units if they attended UCLA for six terms). They would then have only 12 terms of financial aid eligibility.

**Changing Major/Double Major/Minor**

A change of academic major or the pursuit of a double major or minor does not extend eligibility for financial assistance.

**Nonstandard Enrollment**

Progress for students approved for part-time enrollment by the Registrar's Office is measured by a modified schedule. Part-time students should inform the Financial Aid Office of their enrollment arrangements so their aid can be adjusted accordingly.

**Successful Completion**

To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

**Withdrawal and Cancellation**

Withdrawal after the first day of classes during a term counts as a term attended when determining overall term and unit count eligibility, unless students do not attend any classes for the given term and receive a 100 percent refund of all fees. Cancellation of registration on or before the first day of classes does not count as a term attended when determining term or unit count eligibility. Administrative cancellation does not count toward the overall term or unit count eligibility.

**Disqualification and Reinstatement**

The Financial Aid Office monitors satisfactory academic progress annually after Winter Quarter grades are recorded. Progress is measured according to the number of terms students have attended and the number of units they have successfully completed.

Students not meeting the requirements shown on the schedule may receive a warning letter or have their financial aid suspended. Once deficiencies are satisfied, financial aid may be reinstated.

Financial aid eligibility is reinstated for the term following the term in which students reestablish compliance with the units-per-term schedule. For example, if they successfully complete 16 units in Fall Quarter and therefore make up the deficiency, they become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of their need and the availability of funds.
Appeal Process
Students who fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in the immediate family, or other such mitigating circumstances may appeal their disqualification.

To appeal, students should submit a letter and supporting documentation to the Financial Aid Office explaining the circumstances and how they affected their ability to meet the requirements. The satisfactory academic progress appeal coordinator evaluates the request based on the rationale and evidence provided.

Graduate Students
Qualitative Standard
The qualitative standard is enforced by the dean of the Graduate Division in consultation with the department.

Quantitative Standard
Students must successfully complete at least 8 units per term of enrollment to be eligible for financial aid as full-time students. Approved study loads of less than 8 units result in proportionally reduced aid for that term and are charged against the maximum period of eligibility at the appropriate proportional rate.

Disqualification and Appeal Process
If students fail to meet the qualitative and quantitative requirements, their financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by their academic department, the dean of the Graduate Division, and/or the Financial Aid satisfactory academic progress appeal coordinator.

Period of Eligibility
The degree program to which students are admitted determines the maximum number of terms for which they can receive need-based financial aid. Terms for which no need-based aid is received are considered when determining the remaining number of terms of financial aid eligibility.

Students who are in a credential program or a professional master's program (other than Master of Fine Arts) are eligible for a maximum of nine terms of need-based financial aid.

Students who are in a Master of Fine Arts program are eligible to apply for aid for the first 12 terms of enrollment. If students are in an M.A. or M.S. program, a doctoral program, or a combination master's/doctoral program, their eligibility expires after 27 terms of enrollment. Students who change their program may be accommodated through an extension of terms of eligibility. The extension should be secured at the time the program change is made.

Professional Schools
Students attending the Schools of Dentistry, Law, and Medicine are covered by criteria established by the respective school.

Grading Regulations
Assigning a Grade
The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

Grade Complaints
A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic grounds, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Office of Ombuds Services or may follow the procedures for the formal filing of charges (see Faculty Code of Conduct earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

Correction of Grades
All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. No grade change may be made once a student has graduated. All grade changes are recorded on the transcript.

Policy on Alternate Examination Dates
In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates for any test or examination at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates are worked out directly and on an individual basis between the student and the faculty member involved.

In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

Students unable to reach a satisfactory arrangement with their instructor should contact the Office of Ombuds Services, 105 Strathmore Building, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Office of Ombuds Services or the Office of the Dean of Students for assistance.

Undergraduate Final Examinations
No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and are given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major de-
Disclosure of Student Records

Pursuant to the Federal Family Educational Rights and Privacy Act (FERPA), the California Information Practices Act, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right to (1) inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under Federal and State Laws and University Policies, (2) have withheld from disclosure, absent their prior written consent for release, personally identifiable information from their student records, except as provided by Federal and State Laws and University Policies, (3) inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) file complaints with the U.S. Department of Education regarding alleged violations of the rights accorded them by FERPA.

UCLA, in accordance with Federal and State Laws and University Policies, has designated the following categories of personally identifiable information as “directory information” which UCLA may release and publish without the student’s prior consent: name, address (local/mailing, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, enrollment status, grade level, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailing, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this “directory information” released and published may so indicate through URSAs (http://www.ursa.ucla.edu). To restrict the release and publication of the additional items in the category of “directory information,” complete the UCLA FERPA Restriction Request form available from Enrollment and Degree Services, 1113 Murphy Hall.

Student records which are the subject of Federal and State Laws and University Policies may be maintained in a variety of offices, including the Registrar’s Office, Office of the Dean of Students, UCLA Career Center, Graduate Division, UCLA External Affairs Department, and the offices of a student’s College or school and major department. Students are referred to the UCLA Telephone Directory (http://www.directory.ucla.edu) which lists all the offices that may maintain student records, together with their campus address and telephone number. Students have the right to inspect their student records in any such office subject to the terms of Federal and State Laws and University Policies. Inspection of student records maintained by the Registrar’s Office is by appointment only and must be arranged three working days in advance. Call (310) 825-1091, option 6, or inquire at Enrollment and Degree Services, 1113 Murphy Hall.

A copy of the Federal and State Laws, University Policies, and the UCLA Telephone Directory may be inspected in the office of the Information Practices Coordinator, 600 UCLA Wilshire Center. Information concerning students’ hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

Undergraduate Retention, Graduation, and Time to Degree

Retention and graduation rates are higher than ever before at UCLA and among the highest for public universities anywhere in the country. Over the past three years, 97 percent of all students entering from high school and 95 percent of all students entering as transfers were still enrolled at UCLA one year later. Over the past three years, the four-year, five-year, and six-year graduation rates for students entering from high school averaged 66, 87, and 89 percent respectively. Final graduation rates of 90 to 91 percent have been observed and projected for all freshman cohorts entering UCLA since Fall Quarter 1997. Over the past three years, the two-year, three-year, and four-year graduation rates for entering transfer students have averaged 57, 85, and 89 percent respectively. Final graduation rates of 90 to 91 percent have been observed and projected for all transfer cohorts entering UCLA since Fall Quarter 2000.

Time to degree for UCLA undergraduates has declined significantly over the past decade. In 2007-08 approximately 3,800 baccalaureate degrees were awarded to students who entered directly from high school. The average number of quarters registered at UCLA was 12.2, down from an average of 13.1 quarters for similar graduates in 1997-98. Among recent graduates, 74 percent were registered for 12 quarters or less (i.e., four years or less), 84 percent for 13 quarters or less, 90 percent for 14 quarters or less, and 98 percent for 15 quarters or less (i.e., five years or less).

In 2007-08 approximately 3,000 baccalaureate degrees were awarded to students who entered as transfers. The average number of quarters registered at UCLA was 6.7, down from an average of 7.7 quarters for similar graduates in 1997-98. Among recent graduates, 65 percent were registered for six quarters or less (i.e., two years or less), 76 percent for seven quarters or less, 83 percent for eight quarters or less, and 95 percent for nine quarters or less (i.e., three years or less).

Additional information is available at http://www.aim.ucla.edu/graduation/graduation.asp.

Campus Security Information

UCLA Police Department

The UCLA Police Department (UCPD), (310) 825-1491, http://www.ucpd.ucla.edu, is temporarily located in the Kinross Building (between Lot 36 and Gayley Avenue) and will be moving back to 601 Westwood Boulevard in January 2010. The sworn State of California Police Officers are empowered by the State of California and the authority to enforce all state and local laws. UCLA police officers conduct patrol 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services and community safety programs.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the Los Angeles District and City Attorney Offices.

Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus, Reagan UCLA Medical Center, Center for the Health Sciences, Santa Monica UCLA Medical Center and Orthopaedic Hospital, and University Apartments South. The City of Los Angeles Police Department does not handle calls for service on campus or on most UCLA properties. All requests for police service should be made to UCPD. All crime occurring on campus, the Center for the Health Sciences, and other UCLA properties should be reported immediately to the department to ensure appropriate action is taken. Crimes occurring off campus should be reported immediately to the local law enforcement agency. UCPD does take reports from students, faculty, and staff for incidents occurring in the Westwood area.

Police, fire, or medical EMERGENCIES can be reported by dialing 911 from any telephone on campus. All landline telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emer-
gencies can also be reported by using the blue-hooded or yellow Emergency Reporting Telephones located throughout the campus.

Campus community members are encouraged to program the department number (310-825-1491) into their cell phones. When on campus this number should be used in the event of an emergency to avoid the delay that may occur by the time it takes for the emergency cellular operators to transfer calls to the appropriate jurisdiction.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

Crime Statistics and Reports

As required by the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, UCLA prepares an annual report describing campus security policy and information concerning alcohol and drug use, crime prevention, crime reporting, and related matters. It also includes three years of crime statistics. Printed copies are available by calling (310) 825-1491. The report can be accessed at http://map.ais.ucla.edu/go/1000958.

Community Service Officers

UCPD employs approximately 80 student community service officers (CSOs; http://map.ais.ucla.edu/go/1000806) who are the additional “eyes and ears” (trained observers) of the department and act as noninterventional visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department’s Communications Center and provide a direct link to police, fire, and medical aid. CSOs provide security service to a number of campus buildings, including residence halls and libraries. They are most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service operates every day of the year from dusk to 1 a.m. (2 a.m. on Thursdays during academic terms). Individuals requesting the service call the Communications Center at (310) 794-WALK; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service (http://map.ais.ucla.edu/go/1001008) provides a safe and convenient mode of transportation around campus at night (Monday through Thursday from 6 to 11 p.m. during academic terms) and is accessible to people with disabilities.

Crime Prevention

An involved community is one of the best defenses against crime. Therefore, the department is committed to a community policing philosophy and supports a proactive Crime Prevention Unit (http://map.ais.ucla.edu/go/1001449) that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and sexual assault prevention. Other programs are developed to meet the special needs of the campus community. Brochures and literature on crime prevention and personal safety are available. Counseling and Psychological Services (CAPS) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, and the continuum of violence and rape in society. The educational programs, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exercises. CAPS reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. CAPS works closely with the student housing offices and the police department to increase campus safety.

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity that pose a potential threat to the campus are brought immediately to the attention of the community through campus Crime Alert Bulletins (http://map.ais.ucla.edu/go/1001893). Additionally, those interested in receiving public safety bulletins and news briefs can sign up for the public safety list server at http://lists.ucla.edu/cgi-bin/mailman/listinfo/campus

safety-l.

Emergency Medical Services

UCPD provides emergency medical assistance for the campus community through the Emergency Medical Service program, which is staffed by students certified as emergency medical technicians (EMTs). As in all emergencies, call 911 for this service.

Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behavioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs that are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Counseling and Psychological Services (310-825-0768; http://www.counseling.ucla.edu) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling is treated in accordance with University Policies and State and Federal Laws. Any decision to seek assistance is not used as connec tion with any academic determination or as a basis for disciplinary proceedings.

Policies

UCLA is designated as a drug-free environment, and only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the responsibility to better inform the UCLA community about alcohol and substance abuse.

The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment. Refer to the UCLA policies on substance abuse for further information.

Residential Housing

UCLA is the size of a small city and provides residential housing to approximately 11,000 students. Housing facilities range from apartments designed for students with children to multistudent apartment complexes to high-rise student residence halls. UCPD and student housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, Crime Alert Bulletins are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple commonsense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain on-campus facilities are under the shared jurisdiction of their local police department and the UCLA Police Department, which provides assistance to students, faculty, and staff and/or referrals to neighboring police departments.

Safety Tips

The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Angeles community, individuals with criminal intent are able to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be alert and aware of their surroundings and exercise good commonsense safety precau-
tions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and UCPD. Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

APPENDIX B: UNIVERSITY ADMINISTRATIVE OFFICERS

Terms of Regents (http://www.universityofcalifornia.edu/regents/) appointed by the Governor expire March 1 of the year in parentheses. The Student Regent (Jesse Bernal) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

Regents Ex Officio

Governor of California
Arnold Schwarzenegger

Lieutenant Governor of California
John Garamendi

Speaker of the Assembly
Karen Bass

State Superintendent of Public Instruction
Jack T. O’Connell

President of the Alumni Associations of the University of California
Ronald W. Stovitz

Vice President of the Alumni Associations of the University of California
Yolanda Nunn Gorman

President of the University
Mark G. Yudof

Appointed Regents

Richard C. Blum (2014)
William De La Peña (2018)
Russell S. Gould (2017)
Eddie Island (2017)
Odessa P. Johnson (2012)
George D. Kieffer (2021)
Joanne Corday Kozberg (2010)
Sherry L. Lansing (2010)
Monica C. Lozano (2013)
Hadi Makarechian (2020)
George M. Marcus (2012)
Norman J. Pattiz (2015)
Bonnie Reiss (2020)
Frederick R. Ruiz (2016)
Leslie Tang Schilling (2013)
Bruce D. Varner (2018)
Paul D. Wachtler (2016)
Charlene Zettel (2021)
Jesse Bernal, Student Regent (2010)

Faculty Representatives to the Board of Regents

Henry C. Powell
Daniel L. Simmons

Officers of The Regents

President of The Regents
Arnold Schwarzenegger

Chair of The Regents
Russell S. Gould

Vice Chair of The Regents
Sherry L. Lansing

Chief Investment Officer and Acting Treasurer
Marie N. Berggren

General Counsel
Charles F. Robinson

Secretary and Chief of Staff
Diane M. Griffiths

Senior Vice President—Chief Compliance and Audit Officer
Sheryl Vacca

Office of the President

President of the University
Mark G. Yudof

Executive Vice President
Bruce B. Darling

Interim Provost and Executive Vice President—Academic Affairs
Lawrence H. Pitts

Executive Vice President—Business Operations
Katherine N. Lapp

Executive Vice President—Chief Financial Officer
Peter J. Taylor

Senior Vice President—External Relations and Vice President—Agriculture and Natural Resources
Daniel M. Dooley

Senior Vice President—Health Sciences and Services
John D. Stobo

Vice President—Budget and Capital Resources
Patrick J. Lenz

Vice President—Finance
Anne C. Broome

Vice President—Human Resources
Dwaine B. Duckett

Vice President—Investments
Marie N. Berggren

Vice President—Legal Affairs
Charles F. Robinson

Vice President—Research and Graduate Studies
Steven W.V. Beckwith

Chancellors of the Campuses

Chancellor at Berkeley
Robert J. Birgeneau

Chancellor at Davis
Linda Katehi

Chancellor at Irvine
Michael V. Drake

Chancellor at Los Angeles
Gene D. Block

Chancellor at Merced
Sung-Mo Steve Kang

Chancellor at Riverside
Timothy P. White

Chancellor at San Diego
Marye Anne Fox

Chancellor at San Francisco
Susan Desmond-Hellman

Chancellor at Santa Barbara
Henry T. Yang

Chancellor at Santa Cruz
George W. Blumenthal

University Professors, UCLA
Robert B. Edgerton, University Professor, Los Angeles, Anthropology, Psychiatry and Biobehavioral Sciences
M. Frederick Hawthorne, University Professor, Los Angeles, Chemistry and Biochemistry

UCLA Administrative Officers

Chancellor
Gene D. Block, Ph.D.

Executive Vice Chancellor and Provost
Scott L. Waugh, Ph.D.

Administrative Vice Chancellor
Sam J. Morabito, M.B.A.

Vice Chancellor—Academic Personnel
Thomas H. Rice, Ph.D.

Vice Chancellor—External Affairs
Rhea Turleltaub, B.A.

Vice Chancellor—Finance, Budget, and Capital Programs
Steven A. Olsen, M.P.P.

Vice Chancellor—Graduate Studies and Dean of Graduate Division
Claudia Mitchell-Kernan, Ph.D.

Vice Chancellor—Legal Affairs
Kevin S. Reed, J.D.

Vice Chancellor—Medical Sciences
Gerald S. Levy, M.D.

Vice Chancellor—Research
Roberto Peccei, Ph.D.

Vice Chancellor—Student Affairs
Janina Montero, Ph.D.

Vice Provost—Faculty Diversity and Development
Rosina M. Becerra, Ph.D.

Vice Provost—Intellectual Property and Industry Relations
Kathryn Ann Atchison, D.D.S., M.P.H.

Vice Provost and Dean — UCLA International Institute
J. Nicholas Entrikin, Ph.D.

Arthur D. Schwabe (Medicine)
Duane E. Smith (Political Science)
Andreas Tietze (Near Eastern Languages and Cultures)
1972
Barbara K. Keogh (Education)

APPENDIX C:
ENDOWED CHAIRS

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University's three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or "chairs," that support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 325 endowed chairs that have been approved by the Office of the President of the University of California.

See the complete list of endowed chairs at http://www.registrar.ucla.edu/catalog/UCLA EndowedChairs0910.pdf.

APPENDIX D:
DISTINGUISHED TEACHING AWARDS

Academic Senate Recipients

Each year the UCLA Alumni Association presents Distinguished Teaching Awards to six Academic Senate faculty members. The highly prized awards are presented at the annual UCLA Alumni Association Awards Ceremony, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during Fall Quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.
Robin S. Liggett (Architecture and Urban Design, Urban Planning)
William Melnitz (Theater)
Joseph K. Perloff (Medicine)
Karen E. Rowe (English)
1983
Claude Bernard (Physics and Astronomy)
Bryan C. Ellickson (Economics)
Robert S. Elliott (Electrical Engineering)
Albert D. Hutter (English)
Charles M. Knobler (Chemistry and Biochemistry)
1984
Robert Dallek (History)
Hooshang Kangerloo (Radiological Sciences)
Jeffrey Prager (Sociology)
Stanley Siegel (Law)
Sandra A. Thompson (Linguistics)
1985
Patricia M. Greenfield (Psychology)
David F. Martin (Computer Science)
Mark W. Plant (Economics)
Ross P. Shideler (Scandinavian Section, Comparative Literature)
William D. Warren (Law)
1986
Roger A. Gorski (Neurobiology)
Patricia A. Keating (Neurobiology)
Leonard Kleinrock (Computer Science)
Martin Wachs (Urban Planning)
Scott L. Waugh (History)
1987
Lawrence W. Bassett (Radiological Sciences)
E. Bradford Burns (History)
Kenneth W. Graham, Jr. (Law)
Howard Suber (Film and Television)
Richard A. Yarborough (English)
1988
Alison G. Anderson (Law)
Ann L.T. Bergen (Classics)
Charles A. Berst (English)
Michael J. Goldstein (Psychology)
Richard L. Sklar (Political Science)
1989
John B. Garnett (Mathematics)

Non-Academic Senate Recipients
In spring of 1985, the Office of Instructional Development began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments
are eligible. Recipients are selected by the Academic Senate Committee on Teaching, utilizing the same criteria as that used for Academic Senate members.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

Gold Shield Faculty Prize

The $30,000 Gold Shield Faculty Prize, an award for academic excellence, was created by the Gold Shield Alumnae of UCLA in celebration of their fiftieth anniversary in 1986. The prize is funded by an endowment of $250,000 raised by Gold Shield for this purpose, which has grown to over $450,000. Guidelines provide that the prize “recognize and reward UCLA faculty members who have demonstrated extraordinary accomplishment in teaching and in research or creative activity...and who have made a significant contribution to undergraduate education.” Preference for recipients is given to faculty members in mid-career who do not often receive the extra professional incentives available to distinguished senior faculty.

The Gold Shield Faculty Prize is awarded to each recipient for scholarly use. The awardee is selected every year by a committee of peers appointed by the Academic Senate. Student and Gold Shield representatives are included. Recipients must come from fields that have undergraduate programs at UCLA.

1986-88
Michael E. Jung (Chemistry andBiochemistry)

1988-90
Patricia M. Greenfield (Psychology)

1990-92
