Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: *summa cum laude*, an overall average of 3.844; *magna cum laude*, 3.736; *cum laude*, 3.588. To be eligible students must have completed at least 98 University of California units for a letter grade. See the *Schedule of Classes* for the most current calculations of Latin honors.

#### School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined

in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

#### Graduate Degrees

The School of Nursing offers the Master of Science in Nursing (M.S.N.) degree and the Doctor of Philosophy (Ph.D.) degree in Nursing.

### Admission

#### Master of Science in Nursing

The following is required of applicants to the M.S.N. program:

1. Either graduation from a recognized college or university having an accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division, or graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. If admitted under the latter, applicants may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees
2. Status as a licensed registered nurse. Prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory
3. An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A, to be completed before entering the school
4. An upper division nursing research course taken at an accredited institution and equivalent to Nursing 193, to be completed before entering the school
5. An upper division physical assessment course taken at an accredited institution and equivalent to Nursing 192, to be completed before entering the school (not required of students selecting the nursing administration specialty)
6. Professional and/or academic competence in nursing attested through three letters of recommendation
7. A satisfactory scholarship record
8. Since written and verbal communication skills are basic to the practice of nursing, it is essential that applicants read, write, and speak English well. International applicants from a country in which English is not the first language and medium of instruction, whether a licensed registered nurse in the U.S. or not, are required to pass the Test of English as a Foreign Language (TOEFL) with a score of 560 (paper and pencil test) or 220 (computer-based test) or higher or the International English Language Testing System (IELTS) examination with an overall band score of 7.0 or

higher. Scores must be submitted prior to consideration for admission

9. All international applicants who are not licensed registered nurses in the U.S. prior to consideration for admission are required to pass the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination

Prospective students interested in the M.S.N. program must file two applications: (1) *UCLA Application for Graduate Admission* and (2) *Application for Admission to the School of Nursing*. Both applications may be obtained from the Student Affairs Office. Applications are accepted for Fall Quarter admission only. The application deadline for priority consideration is December 15; February 1 is the final deadline.

#### Nursing M.S.N./Management M.B.A.

The School of Nursing and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who seek careers in hospital and nursing administration. By providing knowledge of both management and clinical care issues, the program prepares individuals for management positions in an increasingly complex environment. Application materials should be requested separately from both schools.

#### M.S.N. Curriculum for Certified Nurse Practitioners/Midwives

The School of Nursing offers the opportunity for applicants with a B.S. degree in Nursing and certification in California as an adult nurse practitioner (N.P.), family N.P., pediatric N.P., women's health care N.P. or a nurse midwife (C.N.M.), to earn the M.S.N. degree in one year.

Students in this plan meet all the same admission requirements for the M.S.N. degree except for an upper division physical assessment course. In addition, prior to consideration for admission, applicants are required to submit evidence of certification as an N.P. or C.N.M., be practicing N.P.s at least 50 percent time, and submit three letters attesting to their competency.

While students who follow this curriculum are held to the school minimum of 44 units for the M.S.N., up to 8 units may be waived via petition based on skill and knowledge obtained through certification training. Course requirements include Nursing 200A, 200B, 204, 220, 225 (not required for students with a BRN furnishing number), 230, 237D or 238C or 239C, 264, 437D or 438D or 439D, 597, and 4 units of theory elective.

#### Ph.D. in Nursing

Priority for admission to the Ph.D. program is given to graduates of accredited master's programs in nursing. Those admitted to doctoral study with a bachelor's degree in nursing and a master's degree in a nonnursing field are re-

quired to make up clinical specialty deficiencies by taking clinical courses in one of the current master's advanced practice programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted with a bachelor's degree in nursing are required to complete a program of master's courses in nursing at UCLA as a requisite to entry into doctoral courses.

Applicants to the Ph.D. program must provide evidence of the following:

1. A master's degree in nursing; a B.S. degree in Nursing and a master's degree in a nonnursing field; or a B.S. degree in Nursing. Degrees must be from an accredited program satisfactory to the School of Nursing and the Graduate Division. Students who are accepted with deficiencies are required to complete appropriate master's courses
2. A scholarship record satisfactory to the Graduate Division and to the School of Nursing with a minimum grade-point average of 3.5
3. Scores on the GRE General Test taken within the past five years.
4. An upper division statistics course with content equivalent to Biostatistics 100A or Biomathematics 170A
5. A graduate-level nursing research course with content equivalent to Nursing 204
6. A 4-unit graduate-level nursing theory development course
7. A minimum score of 560 (paper and pencil test) or 220 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language Testing System (IELTS) examination for applicants from countries in which English is not the primary language and medium of instruction. Scores must be submitted prior to consideration for admission
8. A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CG-FNS) examination for international applicants who are not licensed as registered nurses in the U.S., prior to consideration for admission
9. Status as a licensed registered nurse; evidence of current licensure as a registered nurse in the State of California is mandatory
10. Four letters of reference affirming the applicant's potential for scholarly, investigative, and creative endeavors in nursing
11. Examples of scholarly papers and/or creative works
12. A statement of educational objectives, specific focus of research, and program and career goals
13. Curriculum vitae

Prospective students interested in the Ph.D. program must file two applications: (1) *UCLA Application for Graduate Admission* and (2) *Application for Admission to the School of Nursing*. Both applications may be obtained from the Student Affairs Office. Applications are accepted for Fall Quarter admission only. The application deadline for priority consideration is December 15; February 1 is the final deadline.

## Master's Degree

The School of Nursing offers graduate studies in the following areas which, for administrative and teaching purposes, are organized within the sections of acute care and primary care:

1. Acute Care Section: acute care, nursing administration, nursing administration/occupational and environmental health, oncology
2. Primary Care Section: family, gerontology, nurse-midwifery, occupational and environmental health nursing, pediatric

Within selected advanced practice specialties, students may elect to focus on the nurse-midwife, nurse practitioner, or clinical nurse specialist role. Some specialties have course requirements over and above the minimum requirements for the M.S.N. degree. Applicants are advised to seek counseling prior to admission in order to select the specialty and role most appropriate to career goals, as well as to meet requirements for acceptance into the particular area of concentration. Students in the nurse practitioner specialties also may take the neuropsychiatric subspecialty.

All graduates are strongly encouraged to sit for advanced practice certification by accredited agencies after graduation.

The M.S.N. degree is offered through the comprehensive examination plan. A minimum of 44 units is required, but each specialty area has additional requirements. Three core courses and additional coursework in the 100, 200, and 400 series are required for each area of clinical specialization. There are core courses, courses for the specialty areas, elective courses, and other special conditions and stipulations.

## Doctoral Degree

In the Ph.D. program, students focus their study in one of two areas: biobehavioral research or health systems research.

Students who choose biobehavioral research focus on studies that describe, explain, and predict biologic and behavioral factors that relate to health promotion and disease prevention. Students who choose health systems research focus on studies that examine the function, structure, process, and outcome of a range of multidisciplinary health delivery systems such as hospitals, nursing homes, and community-based organizations. Both research areas incorporate human diversity and

the influence of the psychosocial and physical environments.

Core course requirements include nine required courses in nursing and one statistics sequence. Cognate course requirements include 24 units of courses in the major area of study (biobehavioral research, health systems research). Of the 24 units, a minimum of 4 units and a maximum of 12 units are taken in nursing. The remainder are taken in support discipline areas.

Written and oral qualifying examinations are required. The written examination evaluates three areas of knowledge: (1) the basic concepts of nursing science, (2) nursing research methods and analysis, and (3) the basic concepts of the student's focused area of study.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which consists of an evaluation of the dissertation proposal.

## Nursing

### Upper Division Courses

**102. Professional Nursing in Culturally Diverse Communities. (5)** Lecture, four hours; community experience, one hour. Introductory course to assist registered nurses in transition to professional nursing in context of a complex and dynamic health care system. Analyses include individual and population-based approaches to health care in dynamic multicultural communities. Letter grading.

**104. Health and Illness Behaviors across Culturally Diverse Communities. (4)** Lecture, four hours. Requisite: course 102. Examination of basic concepts of health and illness from a biobehavioral and health systems framework. Nursing theory as it relates to roles, stress, loss, self-concept, and pain among culturally diverse populations. Letter grading.

**105. Human Physiology. (4)** Lecture, three hours; discussion, one hour. Designed for nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body. P/ NP or letter grading.

**M158. Culture, Illness, and Healing. (4)** (Same as Anthropology M168.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

**190. Community Health Nursing. (8)** Lecture, three hours; clinical, 15 hours; clinical conference, 30 minutes. Clinical concentration in multicultural community health nurse settings: public health, rehabilitation, mental health centers, home health, occupational health, and schools. Theoretical content focuses on the community as a context for understanding relationship between health status of individuals and groups with psychosociophysical environment. Letter grading.

**192. Physical Assessment. (4)** Lecture, three hours; laboratory, three hours. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and required text are mandatory. Letter grading.

**193. Introduction to Research. (4)** Lecture, four hours. Introduction to planning a research project based on a simple question. Specific components of research activities analyzed: specific aims and study purposes, variable definition, sample selection, data collection tools, data analyses, and ethical conduct in research studies. Critique of research reports. P/NP or letter grading.

**195. Nursing Management. (3)** Lecture, two hours; field study, three hours. Prerequisites: courses 102, 104. Management theory applied to nursing practice. Acquisition of basic knowledge of management concepts and skills as practiced in organizational structures and community health care settings. Letter grading.

**196. Issues in Providing Health Care to Culturally Diverse Populations. (4)** Lecture, three hours; discussion, one hour. Open to non-nursing students with consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intra-cultural communication and intergroup/intragroup dynamics in health care settings. P/NP or letter grading.

**199. Special Studies in Nursing. (2 to 16)** Tutorial, to be arranged. Limited to seniors. Individual study of a problem in the field of nursing. May be repeated for credit, but only 4 units may be applied toward degree requirements. P/NP or letter grading.

## Graduate Courses

**200A-200B. Biobehavioral Foundations of Health Assessment. (3-3)** (Formerly numbered C200A-C200B.) Lecture, two hours. Theories of health behaviors in relation to assessment of epidemiological, psychological, and developmental disorders across life span. Analysis of preventive health, disease screening, risk evaluation, and health promotion theories and interventions. Letter grading. **200A.** Prerequisite: course 192 or approved physical assessment course. **200B.** Prerequisite for acute care, family, gerontology, nurse midwifery, occupational and environmental health, oncology, and pediatric specialty students: course 200A.

**201. Health-Related Quality of Life. (2)** Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

**202. Philosophical Foundations of Science of Nursing. (4)** Lecture, four hours. Designed for Ph.D. students. Intended to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice. S/U or letter grading.

**203. History of Nursing Thought. (2)** Lecture, two hours. Analysis and evaluation of contextual forces which influenced development of discipline of nursing. Examination of nursing's historical influence on sociopolitical environment. Letter grading.

**204. Research Design and Critique. (4)** Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 193 or equivalent upper division basic research methodology course. Complex research designs and analysis of multiple variables, and research utilization. Emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of interrelationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems and how these apply to clinical settings. Letter grading.

**205. Advanced Research Methods. (4)** Lecture, four hours. Preparation: one statistics course. Prerequisites: courses 193, 204. Research process and development of research proposals, including quantitative and qualitative approach to designs. Students encouraged to develop research proposal for clinical or basic research problem related to nursing care or variables affecting such care. Letter grading.

**206A-206B. Nursing Theory Development. (4-4)** Seminar, three hours. Preparation: 4 units of nursing theory. Prerequisite or corequisite: course 202 or philosophy of science course. Focus on major issues involved in development of nursing knowledge, including content and methods of developing nursing theory. In Progress and S/U or letter grading.

**207. Research in Nursing: Measurement of Clinical Variables. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 204, 205. Introduction to wide array of research designs and measurement techniques for testing clinical nursing phenomena. Emphasis on dynamic interaction between research process and theory, as well as on comparative analyses of various designs, content analysis, use of appropriate controls, sources of error, and sensitivity problems. Letter grading.

**208. Research in Nursing: Measurement of Outcomes. (4)** Lecture/discussion, three hours. Prerequisites: courses 206A, 207. Measurement theories, including topics related to scaling and tool development. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project. S/U or letter grading.

**209. Human Diversity in Health and Illness. (2)** Lecture, two hours. Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Letter grading.

**211. Theoretical Foundations of Women's Health Care. (2)** Lecture, two hours. Critical evaluation and application of women's health, gynecological and family planning theory, and research and practice guidelines. Health promotion in diverse populations of women integrated within context of management of common health care problems, needs, and deficits. Letter grading.

**211F. Theoretical Foundations of Women's Health Care. (4)** (Formerly numbered C211F.) Lecture, three hours; discussion, one hour. Critical evaluation and application of women's health, gynecological and family planning theory, and research and practice guidelines. Health promotion in diverse populations of women integrated within context of management of common health care problems, needs, and deficits. Letter grading.

**212. Health-Related Family Theory. (2)** (Formerly numbered C212.) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Family is defined broadly to include nontraditional families; consideration of cross-cultural views of families as well. Identification of limitations of current theory and research related to family study and applicability of current knowledge to various problems encountered in care of families. Letter grading.

**213A. Occupational Health Nursing Role and Theory. (4)** (Formerly numbered C213A.) Lecture, four hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Letter grading.

**213B. Health Assessment, Research, and Health Promotion in Occupational Health. (3)** (Formerly numbered 213C.) Lecture, three hours. Prerequisite: course 213A. Clinical practice issues in occupational health nursing, including adult workforce health issues, adult workforce health assessment, and special populations at risk. Health promotion and research in occupational health. Letter grading.

**214. Human Responses to Cancer. (2)** Lecture, two hours. Synthesis of cancer-related research and theory of principles of cancer, cancer prevention, screening, diagnosis, staging, treatment, symptom management, rehabilitation, and quality of life, with application to advanced oncology nursing practice. Assessment and evaluation of selected clinical oncology resources in community. Development of research-based clinical paper. Letter grading.

**214F. Human Responses to Cancer. (4)** (Formerly numbered C214F.) Lecture, three hours; selected field experiences. Synthesis of cancer-related research and theory of principles of cancer, cancer prevention, screening, diagnosis, staging, treatment, symptom management, rehabilitation, and quality of life, with application to advanced oncology nursing practice. Assessment and evaluation of selected clinical oncology resources in community. Development of research-based clinical paper. Letter grading.

**215. Human Responses to Cancer. (2)** Lecture, three hours. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention, screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Letter grading.

**215F. Human Responses to Cancer. (4)** (Formerly numbered C215F.) Lecture, three hours; selected field experiences. Prerequisite: course 214F. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention, screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Letter grading.

**216. Human Responses to Critical Illness. (2)** Lecture, two hours. Biobehavioral theories and research of acute and critical illness. Nursing aspects of selected dysfunctions and implications for acute care advanced practice nurses. Letter grading.

**216F. Human Responses to Critical Illness. (4)** (Formerly numbered C216F.) Lecture, three hours; discussion, one hour. Biobehavioral theories and research of acute and critical illness. Nursing aspects of selected dysfunctions and implications for acute care advanced practice nurses. Letter grading.

**217. Human Responses to Critical Illness. (2)** Lecture, two hours. Prerequisite: course 216. Builds on pathophysiologic concepts and nursing management of acutely and critically ill adults presented in course 216. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for acute care advanced practice nurses. Letter grading.

**217F. Human Responses to Critical Illness. (4)** (Formerly numbered C217F.) Lecture, three hours; discussion, one hour. Prerequisite: course 216F. Builds on pathophysiologic concepts and nursing management of acutely and critically ill adults presented in course 216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for acute care advanced practice nurses. Letter grading.

**218A. Nursing Administration Theory. (4)** Lecture, four hours. Prerequisites: courses 219A, 219B. Synthesis and evaluation of organizational theory in leadership and management of health care organizations, with emphasis on organizational structure, processes, and outcomes. Letter grading.

**218B. Nursing Administration Theory. (4)** Lecture, four hours. Prerequisite: course 218A. Focus on synthesizing organizational and management theories in relation to strategic planning and management, changing care delivery systems, human and financial resource management, decision making, management information systems, professional practice, and meeting accreditation and legal standards. Letter grading.

**218C. Nursing Administration Theory. (4)** Lecture, four hours. Prerequisite: course 218B. Project management, organizational communication, governance, development and change, diverse relationships within the organization, risk management, liability, and ethics of administration decision making. Emphasis on issues affecting local, national, and international health care management. Letter grading.

**218D. Nursing Administration Theory. (4)** Lecture, four hours. Prerequisite: course 218C. Community health care needs, political action and health care policy, marketing, and media. Planning for future continuous personal and professional growth. Emphasis on issues affecting local, national, and international health care management and policy development. Letter grading.

**219A. Essentials of Accounting and Budgeting in Health Care Organizations. (4)** Lecture, four hours. Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and health care economics. Focus on definition of terms and concepts, followed by practical applications within a variety of health care settings. Letter grading.

**219B. Operations Planning and Control for Nursing Administrators. (4)** Lecture, four hours. Requisite: course 219A. Concepts, issues, and analytic techniques of budget formulation, decision making, variance analysis, financing in health care, models for forecasting productivity determinations, and program planning and evaluation for nurse administrators. Emphasis on practical methods and techniques within wide variety of health care situations. Letter grading.

**220. Theories of Instruction and Learning in Nursing. (3)** (Formerly numbered C220.) Lecture, two hours; computer practice, one hour. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Examination of educator role of advanced practice nurse in variety of settings and with diverse cultural and socioeconomic groups. Opportunities provided for skill development in use of computer-based information systems and development of instructional aids. Letter grading.

**222. Immunosuppression and Patient Care. (2)** Lecture, two hours. Research related to immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on physiologic and pathophysiologic mechanisms of immunosuppression as a basis for information used in patient education and clinical decisions, and supportive treatments and modifiers. Letter grading.

**223. Childhood Development: Research and Application to Nursing. (2)** (Formerly numbered C223.) Lecture, two hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Letter grading.

**224. Health-Related Problems of Vulnerable Populations. (2)** Lecture, two hours. Health-related research and models focusing on health promotion and health intervention, and health ethics and policy regarding vulnerable populations. Emphasis on vulnerable or at-risk social groups in the U.S. Letter grading.

**225. Pharmacology for Advanced Practice Nurses. (4)** Lecture, four hours. Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions. Letter grading.

**229. Biologic/Psychologic Interface in Health and Illness. (2)** Lecture, two hours. Interaction of physiologic, behavioral, and psychosocial factors in illness, and theory and research underlying these factors, including differential influence of gender, ethnicity, and culture. Letter grading.

**230. Advanced Pathophysiology. (4)** (Formerly numbered C230.) Lecture, four hours. Requisite: course 105 or equivalent taken within past five years. In-depth examination of pathophysiological processes that underlie human illness and disease, with detailed study of these in major body systems. Examination of manifestations of and responses to processes of cellular and molecular pathology at extracellular, system, and human levels. Letter grading.

**231. Special Topics in Cellular Physiology. (2)** Lecture, two hours. Requisite: course 230. Designed for graduate nursing students. Functional organization and genetic control of human cell. Letter grading.

**232. Human Responses to Aging and Chronic Illness. (2)** Lecture/discussion, four hours. Pathophysiologic concepts and nursing management of older adults who are healthy or who have disability and/or chronic illness. Nursing aspects of selected dysfunctions and implications for advanced practice in gerontological nursing. Letter grading.

**232F. Human Responses to Aging and Chronic Illness. (4)** (Formerly numbered C232F.) Lecture/discussion, four hours. Pathophysiologic concepts and nursing management of older adults who are healthy or who have disability and/or chronic illness. Nursing aspects of selected dysfunctions and implications for advanced practice in gerontological nursing. Letter grading.

**233. Human Responses to Aging and Chronic Illness. (2)** Lecture/discussion, four hours. Biopsychosocial concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.

**233F. Human Responses to Aging and Chronic Illness. (4)** Lecture/discussion, four hours. Biopsychosocial concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.

**235. Reproductive Endocrinology. (2)** Lecture, two hours. Requisite: course 105. Recommended: course 230. Current theory and research related to systematic evaluation of normal reproductive physiology. Highlights human growth and development, sexual differentiation, menstrual cycle, hormonal aspects of puberty, male and female reproduction, placenta, parturition, postpartum period, lactation, and menopause. Letter grading.

**237A. Primary Care of Women: Antepartum Management. (4)** (Formerly numbered C237A.) Lecture, four hours. Presentation of theory and research on assessment and management of women during pregnancy, with emphasis on current nursing models of primary and independent/collaborative care of women/families during antepartum period. Review of management of normal pregnancy and health and social complications. Letter grading.

**237B. Primary Care of Women: Intrapartum and Postpartum Management. (4)** (Formerly numbered 237C.) Lecture, four hours. Requisite: course 237A. Biologic and behavioral issues pertinent to care of women during labor, birth, and postpartum, including analysis of relevant research and critical thinking/decision making in clinical management. Presentation of content as outlined in ACNM Core Competencies, "Care of Childbearing Family," Sections IIC and D. Letter grading.

**237C. Theoretical Foundations of Health Assessment of Women: Primary Care. (4)** (Formerly numbered 237B.) Lecture, four hours. Requisite: course 237B. Application of current theory, research, and knowledge relevant to assessment and management of common health problems in women, with emphasis on physiologic, psychosocial, and behavioral factors and on nurse-midwifery management process. Systematic evaluation of current nursing conceptual models in independent and collaborative primary care of women. Letter grading.

**237D. Primary Care of Women: Advanced Nurse-Midwifery Management. (4)** Lecture, four hours. Requisites: courses 237A, 237B, 237C, 238A (2 units). Builds on previous core and nurse-midwifery coursework, with focus on management of complex antepartum, intrapartum, and postpartum situations and on comanagement or referral as necessary. Basic theory of obstetric ultrasonography and appropriate use of ultrasound information in pregnancy and parturition. Exploration of nurse-midwifery professional issues at local, state, and national levels in accordance with professional organization guidelines. Letter grading.

**238A. Theoretical Foundations of Nursing of Children: Assessment and Health Guidance. (2 or 4)** Lecture, four hours. Requisite: course 200B. Theory and research emphasize interaction among developmental level, family characteristics, and environmental milieu as it affects child well-being. Advanced science base for assessment and anticipatory guidance for children and families to promote child wellness and diagnose common childhood illnesses. Letter grading.

**238B. Theoretical Foundations of Nursing of Children: Common Illnesses and Problems. (2 or 4)** Lecture, four hours. Requisite: course 238A. Theory and research emphasize physiological and psychological basis for common childhood illnesses and problems; evaluation of alternative therapies in research literature also emphasized. Advanced science base for assessment, diagnosis, and management of common childhood illnesses and problems. Letter grading.

**238C. Theoretical Foundations of Nursing of Children: Complex Health Problems. (4)** Lecture, four hours. Requisite: course 238B. Advanced science base for assessment, diagnosis, and ambulatory management of complex chronic and acute childhood illnesses. Theory and research emphasize physiological basis for complex disease entities; evaluation of alternative therapies in research literature also emphasized. Letter grading.

**239A. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4)** Lecture, four hours. Requisite: course 230. Organ systems approach to acuity and chronicity in syndromes related to respiratory, cardiovascular, dermatologic, and genitourinary organ systems and selected content in oncology. First of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by advanced practice nurses and nurse practitioners in variety of clinical settings. Letter grading.

**239B. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4)** Lecture, four hours. Requisite: course 239A. Organ systems approach to acuity and chronicity in syndromes related to endocrine, gastrointestinal, and neurological systems and selected content in oncology. Second of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by advanced practice nurses and nurse practitioners in variety of clinical settings. Letter grading.

**239C. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4)** Lecture, four hours. Requisite: course 239B. Organ systems approach to acuity and chronicity in syndromes related to musculoskeletal and hematological disorders, HIV/AIDS, and vestibular system. Third of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by advanced practice nurses and nurse practitioners in variety of clinical settings. Letter grading.

**241. Biobehavioral Foundations of Neuropsychiatric Assessment. (2)** Lecture, two hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application of neuropsychiatric assessment and diagnosis. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a behavioral nursing approach. Letter grading.

**241F. Biobehavioral Foundations of Neuropsychiatric Assessment. (4)** Lecture, four hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application of neuropsychiatric assessment and diagnosis. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a behavioral nursing approach. Letter grading.

**242. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (2)** Lecture, two hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a biobehavioral nursing approach. Letter grading.

**242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4)** Lecture, four hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a biobehavioral nursing approach. Letter grading.

**243. Theoretical Foundations of Complementary Health Care I. (2)** Lecture, two hours. Overview of theories and research underlying commonly used therapeutic systems available in the U.S. Major emphasis on fundamental mind-body-environment theories and principles. Focus on categories of alternative systems within framework of Western clinical practice. Letter grading.

**243F. Theoretical Foundations of Complementary Health Care I. (4)** Lecture, four hours. Overview of theories and research underlying commonly used therapeutic systems available in the U.S. Major emphasis on fundamental mind-body-environment theories and principles. Focus on categories of alternative systems within framework of Western clinical practice. Letter grading.

**244. Theoretical Foundations of Complementary Health Care II. (2)** Lecture, two hours. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

**244F. Theoretical Foundations of Complementary Health Care II. (4)** Lecture, four hours. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

**245. Theoretical Foundations of Clinical Nurse Specialist Practice. (4)** Lecture/discussion, four hours. Theoretical foundations of clinical nurse specialist practice, including systems theory, behavioral theories, consultation theory, change theory, and models of research utilization. Emphasis on application of relevant theories to clinical nurse specialty practice roles in health care systems through case-study analysis, with focus on application to clinical practice settings which include culturally diverse populations. Letter grading.

**264. Professional Issues in Nursing. (3)** Lecture, three hours. Requisite: course 418A or 437A or 438A or 439A. Assessment of organizational, legal, ethical, and health care policy issues in relation to delivery of health care services by advanced practice nurses in evolving health care system. Letter grading.

**M273. Advanced Seminar: Medical Anthropology. (4)** (Same as Anthropology M263Q, Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

**M290A-M290B-M290C. Child Abuse and Neglect. (2-2-1)** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300A-M300B-M300C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M290A is requisite to M290B, which is requisite to M290C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

**299A. Nursing Research Seminar. (4)** Seminar, three hours. Requisites: courses 206A, 206B, 207, 208. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights practical experience of faculty in assuring scientific integrity while conducting research, culminating in communication and dissemination of their research. S/U grading.

**299B-299C. Nursing Research/Laboratory Experiences. (4-4)** Seminar/discussion, one hour; research/laboratory, three hours. Requisites: courses 202, 206A, 206B. Seminars and research/laboratory-based experiences to assist students to prepare for careers as scientists, with focus on research methodology and mentorship. S/U grading.

**299D. Nursing Education Seminar. (1 to 4)** Seminar, one hour; discussion, one to four hours. Requisites: courses 206A, 206B, 207, 208, 220. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**416. Advanced Practice Nursing: Acute Care Laboratory Practicum. (1)** Laboratory, three hours. Required of acute care and oncology specialty students. Introduction to advanced practice diagnostic or therapeutic procedures and related indications, complications, and follow-up care in laboratory setting, including advanced electrocardiograms and chest X-ray interpretation, suturing, central and arterial line placement, intubation, bone marrow aspiration, and lumbar puncture. S/U grading.

**418A. Nursing Administration Practicum. (2)** Clinic practicum, six hours. Requisites: courses 219A, 219B. Synthesis, evaluation, and practical application of organizational theory in practice setting, with emphasis on content presented in course 218A, including organizational structure, processes, and outcomes. Letter grading.

**418B. Nursing Administration Practicum. (2)** Clinic practicum, six hours. Requisites: courses 218A, 418A. Experience in organizational setting for synthesizing content from course 218B, including strategic planning and management, care delivery systems, resource management, decision making, management information systems, professional practice, and meeting accreditation and legal standards. Letter grading.

**418C. Nursing Administration Practicum. (2)** Clinic practicum, six hours. Requisites: courses 218B, 418B. Experience in organizational setting for synthesizing and evaluating content from course 218C, including processes of project management, organizational communication, governance, development and change, diverse relationships within the organization, risk management, liability, and ethics of administration decision making. Letter grading.

**418D. Nursing Administration Residency. (11)** Clinic practicum, 32 hours; clinical conference, one hour. Requisites: courses 218C, 418C. Experience in organization setting as students assume leadership role in planning, managing, and evaluating an administrative project. Synthesizing of content from course 218D, including assessing community health care needs, marketing, media, and political action and health care policy. Letter grading.

**434. Nurse-Midwifery Clinical Practicum. (4)** Clinic, 12 hours. Requisite: course 237C. Building on previous core and nurse-midwifery coursework, focus on application of principles of health assessment and primary care of women, with emphasis on physiologic, psychosocial, and behavioral factors and on clinical components of nurse-midwifery process. Use of critical analysis in data collection, assessment, diagnosis, treatment, and counseling in clinical settings. Letter grading.

**437A. Nurse-Midwifery Clinical Management I. (2)** Clinic, five hours; clinical conference, one hour. Preparation: completion of physical assessment course. Application of theory, knowledge, and research of primary care of women during antepartum period, with emphasis on counseling and screening for prevention and early detection of common risk conditions that may complicate prenatal period. Letter grading.

**437B. Nurse-Midwifery Clinical Management II. (4)** (Formerly numbered 437C.) Clinic, 12 hours. Corequisite: course 237B. Application of current theory, research, and knowledge relevant to nurse-midwifery management of childbearing family during intrapartum and postpartum periods and continued practice of previous clinical content. Clinical practice of intrapartum, postpartum, and professional competencies as outlined in ACNM Core Competencies. Letter grading.

**437C. Nurse-Midwifery Clinical Management III. (4)** (Formerly numbered 437B.) Clinic, 12 hours. Corequisite: course 237C. Synthesis of previous course and clinical work and continued practice of assessment and management of childbearing family and newborn. Emphasis on development of expanded skills in comprehensive assessment of health problems, including elements of primary care that focus on health promotion, education, disease prevention, and client advocacy. Letter grading.

**437D. Nurse-Midwifery Clinical Management IV. (6)** Clinic, 18 hours. Requisite: course 437C. Corequisite: course 237D. Synthesizing previous course and clinical work, students continue to practice assessment and management of childbearing family. Emphasis on management of complications in antepartal, intrapartal, and postpartal periods, interpretation and utilization of ultrasonography in clinical settings, and performance of limited third-trimester ultrasound examinations. Letter grading.

**437E. Nurse-Midwifery Clinical Management V. (4)** Clinic, 11 hours; clinical conference, one hour. Corequisite: course 211F. Primary care for gynecology, family planning, sexually transmitted diseases, and premenopausal and perimenopausal women/families. Principles of prevention, assessment, diagnosis, treatment, and counseling applied in clinical experiences, case studies, and skills laboratories. Letter grading.

**437F. Nurse-Midwifery Integration. (8)** Clinic, 24 hours. Requisite: course 437E. Students assume management responsibility for full scope of nurse-midwifery practice, providing continuity and comprehensive obstetric care to the childbearing woman, care to the newborn, family planning, and gynecologic care to the well woman. Students expected to implement one of the functional aspects of clinical nurse specialist role (i.e., educator, practitioner, researcher, or consultant). Letter grading.

**438A. Advanced Practice Nursing in Care of Children: Wellness Care. (2)** Clinic practicum, six hours. Requisite: course 238A. Development of expanded skills in comprehensive assessment and provision of anticipatory guidance for children and families to promote child wellness. Application of theory and research in provision of wellness care throughout childhood years. Letter grading.

**438B. Advanced Practice Nursing in Care of Children: Management of Common Illnesses. (4)** Clinic practicum, 12 hours. Requisite: course 238B. Development of expanded skills in comprehensive assessment and management of common childhood illnesses and problems; students continue to gain skills in promoting child wellness. Application of theory and research in care of common illnesses throughout childhood years. Letter grading.

**438C. Advanced Practice Nursing in Care of Children: Management of Complex Health Problems. (4)** Clinic practicum, 12 hours. Requisite: course 238C. Development of expanded skills in assessment and ambulatory management of complex acute and chronic childhood illnesses. Application of theory and research in provision of care for complex acute and chronic illnesses throughout childhood years. Letter grading.

**438D. Pediatric Primary Care: Residency. (9)** Clinic practicum, 27 hours. Requisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Research, theory, and clinical knowledge analyzed, integrated, and applied to care of children and families with actual or potential health problems. Letter grading.

**439A. Advanced Practice Nursing: Clinical Practicum. (2)** Clinic practicum, six hours. Corequisite: course 239A. Advanced practice nursing in acute care, family, gerontology, occupational and environmental health, and oncology. Nursing management and evaluation of health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

**439B. Advanced Practice Nursing: Clinical Practicum. (4)** Clinic practicum, 12 hours. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

**439C. Advanced Practice Nursing: Clinical Practicum. (4)** Clinic practicum, 12 hours. Corequisite: course 239C. Third clinical practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-associated symptoms and complex patient/family presentations. Analysis, evaluation, and integration of current theory and research to provide basis for development of interventions and treatment for acute and chronic problems across life span. Letter grading.

**439D. Advanced Practice Nursing: Residency. (9)** Clinic practicum, 27 hours. Requisites: courses 239C, 439C. Residency in advanced practice role where students assume primary responsibility for planning, managing, and evaluating care of clients in specialty setting. Emphasis on application and integration of theory, research, and clinical knowledge in advanced practice role. Letter grading.

**441. Neuropsychiatric Subspecialty Clinical Seminar. (1)** Clinical seminar, one hour; self-study, two hours. Requisites: courses 241F, 242F. Designed for advanced practice nurses in any nurse practitioner specialty. Neuropsychiatric assessment, treatment, and case presentations in selected populations with addictive, affective, and cognitive dysfunctions in relation to neurophysiology and pathology and to family, social, and cultural structures. S/U grading.

**442. Neuropsychiatric Subspecialty Clinical Seminar. (1)** Clinical seminar, one hour; self-study, two hours. Requisite: course 441. Designed for advanced practice nurses in any nurse practitioner specialty. Continuation of course 441. S/U grading.

**445. Advanced Practice Nursing: Clinical Nurse Specialty Practicum. (4 or 9)** Clinic practicum, 12 or 27 hours. Requisite: course 245. Practicum/residency in clinical nurse specialty role where students gain experience in expert clinical practice, consultation, education, leadership/change management, and research/research utilization. Emphasis on application and integration of theory, research, and clinical knowledge to goals of multidisciplinary health care systems. Letter grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (4 to 8)** Tutorial, to be arranged. Opportunity for individual graduate nursing students to pursue special studies or research interests. May be repeated for credit, but only 4 units may be applied toward graduate degree requirements. S/U grading.

**597. Individual Study for Comprehensive Examination. (4 to 8)** Tutorial, to be arranged. Opportunity for individual graduate nursing students to prepare for comprehensive examination. May be repeated once for credit, but only 4 units may be applied toward M.S.N. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. Individualized faculty supervision of Ph.D. dissertation research by student's chair. May be repeated for credit, but only 8 units may be applied toward Ph.D. degree requirements. S/U grading.

## OBSTETRICS AND GYNECOLOGY

*School of Medicine*

UCLA  
27-117A Center for the Health Sciences  
Box 951740  
Los Angeles, CA 90095-1740  
(310) 794-1884  
<http://www.obgyn.medsch.ucla.edu/>

### Chairs

Alan H. DeCherney, M.D., *Executive Chair*  
Teichiro Fukushima, M.D., *Vice Chair, King/Drew*  
Howard L. Judd, M.D., *Vice Chair, Olive View-UCLA*  
Lawrence Platt, M.D., *Vice Chair, Cedars-Sinai*  
Michael G. Ross, M.D., *Vice Chair, Harbor-UCLA*

### Scope and Objectives

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women's health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the

courses offered, see the *Announcement of the UCLA School of Medicine*.

## OPHTHALMOLOGY

*School of Medicine*

UCLA  
2-142 Jules Stein Eye Institute  
Box 957000  
Los Angeles CA 90095-7000  
(310) 825-5053  
<http://www.medsch.ucla.edu/som/jsei/>

### Chairs

Bartly J. Mondino, M.D. (*Bradley R. Straatsma Professor of Ophthalmology*), *Chair*  
Sherwin J. Isenberg, M.D. (*Grace and Walter Lantz Endowed Professor*), *Vice Chair, Harbor-UCLA*  
Arthur L. Rosenbaum, M.D., *Vice Chair*

### Scope and Objectives

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## ORAL BIOLOGY

*School of Dentistry*

UCLA  
63-050 Dentistry  
Box 951668  
Los Angeles, CA 90095-1668  
(310) 825-1955  
<http://www.dent.ucla.edu/sod/oralBio/>

George W. Bernard, D.D.S., Ph.D., *Chair*

### Professors

George W. Bernard, D.D.S., Ph.D.  
Robert Chiu, Ph.D.  
Douglas Junge, Ph.D.  
Lawrence E. Wolinsky, D.D.S., Ph.D.

### Professors Emeriti

Colin K. Franker, Ph.D.  
Louis J. Goldberg, D.D.S., Ph.D.

### Associate Professors

Francesco Chiappelli, Ph.D.  
Jacob Fleischmann, M.D.  
Susan A. Haake, D.M.D., M.D.S., Ph.D.  
Kenneth T. Miyasaki, D.D.S., M.S., Ph.D.  
Wenyuan Shi, Ph.D.  
Igor Spigelman, Ph.D.

### Assistant Professors

George Huang, Ph.D.  
Anahid Jewett, M.P.H., Ph.D.

### Adjunct Professors

Carol A. Bibb, Ph.D., D.D.S.  
Bernard G. Sarnat, M.D., M.S., D.D.S.

### Adjunct Associate Professor

Diana Messadi, D.D.S., Ph.D.

### Adjunct Assistant Professor

Shen Pang, Ph.D.

### Scope and Objectives

Oral biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Section of Oral Biology in the School of Dentistry offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Oral Biology.

### Admission

#### M.S./Ph.D. in Oral Biology

In addition to meeting the general admission requirements set by the Graduate Division, applicants to the M.S. or Ph.D. program must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemis-

try (inorganic, organic, and biological chemistry), one year of biology, and one year of physics.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing their background, work experience, research interests, and career goals.

In addition, applicants to the Ph.D. program are required to take the Graduate Record Examination (GRE) General Test.

### Oral Biology M.S. or Ph.D./ Dentistry D.D.S. or Certificate

Applicants may apply for a combined D.D.S./Oral Biology M.S. or Ph.D. or advanced certificate training/Oral Biology M.S. or Ph.D. by making simultaneous application for graduate study in the Oral Biology Section and for admission to the School of Dentistry and to the certificate programs. Applicants must submit the *UCLA Application for Graduate Admission* and the application required for the D.D.S. or advanced certificate training and must be accepted by both of the concerned units in order to participate in a combined program.

### Master's Degree

For areas of study, see Doctoral Degree.

The M.S. degree is offered through the thesis plan. A total of 36 units is required, 20 of which must be at the graduate level. Eight core graduate courses in oral biology are required. Students must take additional elective courses (a minimum of 5 units), either at the upper division or graduate level, that are essential to the research area.

### Doctoral Degree

Major fields include bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

In the first two Ph.D. years, seven core courses in oral biology, two laboratory rotations, and a seminar are required. In the second year, students are expected to choose an area of emphasis and continue to take additional required and elective courses (a minimum of four to five courses).

Participation in teaching activities is required by assisting the faculty in a one-quarter oral biology course offered to dental students.

Written and oral qualifying examinations are required. The written examination consists of a broad essay-type examination in the major areas of oral biology and cell biology.

Following successful completion of the written examination, students prepare a dissertation proposal and take the University Oral Qualifying Examination, which includes a discussion of the proposal and questions on general topics related to oral biology.

## Oral Biology

### Graduate Courses

**201A-201B-201C. Advanced Oral Biology. (3-2-3)** Lecture, three hours/two hours/three hours:

**201A.** Ontogenesis. (3) Lecture, three hours. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans. S/U or letter grading.

**201B.** Homeostasis in Oral Systems. (2) Lecture, two hours. Normal regulatory functions of various oral systems. Topics include mechanisms of salivary secretion and nonspecific salivary protective mechanisms; integrative action of oral sensory systems such as touch, pain, and taste; normal control of movements in jaw and face. Letter grading.

**201C.** Pathobiology. (3) Lecture, three hours. Molecular basis for pathogenic processes in tissues of the oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc. S/U or letter grading.

**M203. Oral Embryology and Histology. (4)** (Same as Neurobiology M229.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

**M204. Mechanisms and Relief of Pain. (2)** (Same as Neuroscience M233.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

**205. Methodology in Research Design and Data Analysis. (4)** Lecture, two hours; discussion, one hour; computer laboratory, one hour. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistics and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their Ph.D. research.

**206. Current Topics in Oral Immunology. (1)** Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc.

**209. Scientific Ethics. (2)** Lecture, one hour; laboratory, one hour. Required course in scientific ethics for graduate students in Oral Biology M.S. and Ph.D. programs and for NRSA trainees in School of Dentistry. Letter grading.

**211. Biology of the Temporomandibular Joint. (2)** Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

**215. Fundamentals of Immunology. (2)** Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopathology involved in autoimmunity, cancer, and immunodeficiency syndromes.

**226A-226B. Craniofacial Growth and Development. (2-2)** Preparation: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

**227. Dental Embryology and Histology. (2)** Description and interpretation of important stages in development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the orofacial apparatus which are of significance to clinical dental specialists.

**228. Dental Pharmacology and Therapeutics. (2)** Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

**M234. Seminar: Developmental Neuroendocrinology. (2)** (Same as Neurobiology M234.) Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

**260. Oral Biology Seminar. (2)** Seminar, one hour; outside research, one hour. Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

**273. Research in Clinical Immunology and Lymphology. (2)** Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases.

**275. Molecular and Cell Biology for Oral Biology Graduate Students. (3)** Lecture, two hours; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4 to 8)** Tutorial, to be arranged. S/U grading.

**598. Thesis Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 8)** Tutorial, to be arranged. S/U grading.

## Scope and Objectives

Organismic biology touches every aspect of modern life, and understanding how living organisms are adapted to their environments is the major challenge of the discipline. To meet this challenge, the Department of Organismic Biology, Ecology, and Evolution offers undergraduate and graduate instruction at all levels of biology — from regulatory and physiological processes within organisms through the natural ecology and behavior of living organisms and to the population and community dynamics of multiple species. All of these subject areas address practical problems facing the world today, and all influence human decisions on matters ranging from conservation of the environment to advancement of medical science.

The Bachelor of Science degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

## Undergraduate Study

Students may earn a Bachelor of Science degree in one of four different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; Marine Biology;

and Plant Biology. The majors build on similar lower division introductory courses and differ primarily in the upper division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects and for students who later seek admission to health sciences-related professional schools. The remaining three majors — Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

## Biology B.S.

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required:* Two morphology and systematics/ecology, behavior, and evolution courses (Microbiology and Molecular Genetics 101, 101L, Organismic Biology, Ecology, and Evolution 103, 105, 110, 116, 120, 122, C126, 129, 130, C135, 136); two developmental and molecular biology/physiology courses (Molecular, Cell, and Developmental Biology 138, C141, 144,

171, Organismic Biology, Ecology, and Evolution 121, 128, C134A or 134B, 146, M158, 162, M166, 167, 179); two additional upper division courses in molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193) or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192); Chemistry and Biochemistry 153A, 153L; three additional upper division courses in atmospheric sciences (one course from Atmospheric Sciences 101, 102, 104, or 130), chemistry, mathematics (except Mathematics 104, 106), microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I), physics, physiological science (except Physiological Science 193, 195A, 195B, 196), or from Biomathematics 110, Biostatistics 100B, Earth and Space Sciences 116, Geography 112, Psychology 115. Courses selected must include two laboratory courses (Organismic Biology, Ecology, and Evolution 101, 103, 105, 110, 136, M158, 162, M166, 167, 181).

A maximum of 8 units of the Organismic Biology, Ecology, and Evolution 190 series or 4 units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Ecology, Behavior, and Evolution B.S.

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A (31A, 31B, and 32A must be taken to satisfy the calculus requirement); Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Ecology, Behavior, and Evolution majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required:* One morphology and systematics course (Organismic Biology, Ecology, and Evolution 103, 105, 110, or 130); one physiology course (Organismic Biology, Ecology, and Evolution 146, 162, M166, or 167); one additional laboratory course (Organismic Biology, Ecology, and Evolution 103, 105, 110, 136, 146, 162, M166, 167, or 181); three ecology, behavior, and evolution courses (Organismic Biology, Ecology, and Evolution C119, 120, 122, 129, C135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), or equivalent; Chemistry and Biochemistry 153A, 153L; two or more upper division courses in chemistry, geography, geology, mathematics (except Mathematics 104, 106), microbiology, organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I), or physics (recommended: taxon-oriented courses such as Organismic Biology, Ecology, and Evolution 111, 112, 113A, 114, C115, 152; other courses in ecological, behavioral, and evolutionary processes such as Organismic Biology, Ecology, and Evolution 116, 117, 122, M127, 128, C134A, in addition to courses listed above).

Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, are graduating seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a high grade-point average.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

As prerequisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point

average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109 or C215 prior to applying for the Marine Biology Quarter.

### Marine Biology B.S.

The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Earth and Space Sciences 15 or Atmospheric Sciences 6 or 6A; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Marine Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required:* Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution C109; one laboratory course (Organismic Biology, Ecology, and Evolution 110, M158, or 181); one marine organismic biology course (Organismic Biology, Ecology, and Evolution 101, 105, 112, or 137); one physiology course (Organismic Biology, Ecology, and Evolution 128, 162, M166, 167, or 179); one ecology, behavior, and evolution course (Organismic Biol-

ogy, Ecology, and Evolution 116, C119, 120, 122, 129, C135, or 136); one field quarter consisting of four courses from the Marine Biology Quarter (MBQ) or equivalent field studies given elsewhere (for a 16-unit equivalent, see undergraduate adviser); two physical, chemical, or geological oceanography courses from Atmospheric Sciences 102, 103, 104, 130, Chemistry and Biochemistry 103, Earth and Space Sciences 100, 116, 119, 153, Geography 100, 101, 103, 123, 130, Mechanical and Aerospace Engineering 103 (strongly recommended), 150A.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Marine Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

As prerequisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109 or C215 prior to applying for the Marine Biology Quarter.

### Plant Biology B.S.

The Plant Biology major prepares students for postgraduate programs and careers in plant biology, including environmental biology, ecology, agricultural sciences, plant physiology, and cellular biology. Students select key courses to obtain a sound, broad foundation in plant biology, learning state-of-the-art research techniques. They are also given opportunity to participate in individual supervised research projects using plants as experimental organisms.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Plant Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably

equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

## The Major

**Required:** Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution 146 or 162; one laboratory course (Organismic Biology, Ecology, and Evolution 101, 103, 105, 110, M158, 162, M166, or 167); one plant morphology or anatomy course (Organismic Biology, Ecology, and Evolution 101, 103, or 152); two molecular or cellular plant biology courses (Molecular, Cell, and Developmental Biology C141, C150, M170, Organismic Biology, Ecology, and Evolution 121); one ecology or evolution course (Organismic Biology, Ecology, and Evolution 120, 122, 128, or 130); one field quarter course involving research in plant biology (Organismic Biology, Ecology, and Evolution 118, 124, 128, or 148) or a laboratory internship (Organismic Biology, Ecology, and Evolution 190 series or 199) which requires a written paper on some aspect of plant research; two additional upper division courses in chemistry, computer science, geography, microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I).

A maximum of 8 units of the Organismic Biology, Ecology, and Evolution 190 series or 4 units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Plant Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Organismic Biology, Ecology, and Evolution 103, 113B, 114, C115, 118, 124, C125, C126, 131, 132, and 134B. The Marine Biology Quarter occurs during Fall Quarter and includes some combination of Organismic Biology, Ecology, and Evolution 102, C104, 106,

123, 147, 148, 163, 164, and 165. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Fall or Winter Quarter. Information and applications are available in the Undergraduate Advising Office.

## Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Organismic Biology, Ecology, and Evolution 190A and 190B.

## Computing Specialization

Majors in Biology, Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science M196B, Geography 168, Organismic Biology, Ecology, and Evolution C159, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Organismic Biology, Ecology, and Evolution offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Biology.

## Admission

Applicants are urged to seek the advice of departmental faculty members in their field of interest. The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics,

and mathematics is desirable. Deficiencies in these or other subjects should be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. Students with academic deficiencies may be admitted on a provisional basis.

All applicants must take the General Test (verbal, quantitative, and analytical) and the Subject Test in Biology of the Graduate Record Examination (GRE). Three letters of recommendation are required. The letters should be from professors, supervisors, or others who may provide an evaluation of the applicant's accomplishments or potential in research, teaching, and related scholarly activities.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Organismic Biology, Ecology, and Evolution.

Students are admitted in Fall Quarter only. Following the January 1 deadline, applications to the department are reviewed by the departmental admissions committee which advises prospective sponsors about the desirability of admission.

## Master's Degree

For areas of study, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination and thesis plans. The program consists of at least nine courses, five of which must be graduate (200 series) courses.

## Doctoral Degree

Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at a marine science center in Fall Quarter, field biology in Spring Quarter, and tropical biology through courses offered by the Organization for Tropical Studies.

Ph.D. students must complete a minimum of 20 units of graduate-level (200 series) courses.

Students are required to serve as teaching assistants for three terms.

Written and oral qualifying examinations are required. The written examination consists of two parts. Part I examines the breadth of understanding (conceptual and synthetic) of the diversity of specialized subjects within integrative biology and is coupled to two required graduate courses in evolutionary biology and ecology. Part II is designed to test the student's ability to read critically and evaluate the literature in the chosen scientific specialty.

Following successful completion of the written examination, students prepare a dissertation proposal and take the University Oral Qualifying Examination, which consists of a defense of the proposal.

# Organismic Biology, Ecology, and Evolution

## Lower Division Courses

**10. Plants and Civilization. (4)** Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history.

**11. Biomedical Research Issues in Minority Communities. (4)** Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

**12. Biodiversity and Extinction: Crisis and Conservation. (4)** Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

**13. Evolution of Life. (4)** Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within the framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes.

**21. Field Biology. (4)** Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: course 2. Not open for credit to students with credit for course 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals.

**M22. Introduction to Statistical Methods for Life and Health Sciences. (5)** (Same as Statistics M13.) Lecture, three hours; discussion, one hour; laboratory, one hour. Presentation and interpretation of data, descriptive statistics, introduction to correlation and regression and to basic statistical inference (estimation, testing of means and proportions, ANOVA) using both Bootstrap methods and parametric models. P/NP or letter grading.

**25. Marine Biology. (4)** Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Earth and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms. P/NP or letter grading.

**50. Desert Life. (4)** Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

## Upper Division Courses

**101. Marine Botany. (6)** (Formerly numbered 101A.) Lecture, four hours; laboratory, six hours; three to four field trips. Requisite: Life Sciences 1. Introduction to biology and ecology of marine plants, including algae, sea grasses, and mangroves, with focus on form and function of marine plants and their ecological role in different marine habitats and ecosystems. Letter grading.

**102. Biology of Marine Invertebrates. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates. Given off campus at a marine science center.

**103. Plant Evolution and Systematics. (5)** Lecture, three hours; laboratory, three hours; field trip. Requisites: Life Sciences 1, 2, 3, 4. Evolution, systematics, morphology, principles of taxonomy, phytogeography, phylogenetic analysis, speciation, and natural history of plants. P/NP or letter grading.

**C104. Experimental Invertebrate Zoology. (6)** Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212.

**105. Biology of Invertebrates. (6)** Lecture, three hours; laboratory/field trips, six hours. Requisite: Life Sciences 1. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates.

**106. Experimental Marine Invertebrate Biology. (4 or 6)** Lecture, two hours; laboratory, 12 hours. Requisites: courses 105, and M166 or 167 (either may be taken concurrently). Offered either as a 6-unit quarter-long course or as a 4-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations.

**C109. Introduction to Marine Science. (4)** Lecture, three hours; laboratory, three hours; weekend field trips. Requisite: Life Sciences 1. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C215.

**110. Vertebrate Morphology. (6)** Lecture, three hours; laboratory, five hours. Requisites: Life Sciences 1, 2, 3, 4. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

**111. Biology of Vertebrates. (5)** Lecture, three hours; laboratory, three hours; four one- to two-day field trips. Requisite: Life Sciences 1. Adaptations, behavior, and ecology of vertebrates. Letter grading.

**112. Ichthyology. (6)** Lecture, three hours; laboratory, six hours; field trips. Requisite: Life Sciences 1. Highly recommended: courses 110, 111. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine fishes of the Southern California shoreline, tidepools, and coastal streams. Letter grading.

**113A. Herpetology. (5)** Lecture, three hours; laboratory, three hours; field trips, three and one half days per term. Requisite: Life Sciences 1. Vertebrate zoology course restricted to biology of reptiles and amphibians of the world, covering current systematics, ecology, behavior, morphology, and physiology of these animals. Letter grading.

**113B. Field Herpetology. (8)** Requisite: Life Sciences 1. Recommended: course 111. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

**114. Ornithology. (5)** Lecture, three hours; laboratory/field trips, three hours. Requisite: course 111. Limited enrollment. Systematics, distribution, physiology, behavior, and ecology of birds. P/NP or letter grading.

**C115. Mammalogy. (5)** Lecture, three hours; laboratory, three hours. Requisite: course 110 or 111. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C213. Letter grading.

**116. Conservation Biology. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 2, 3, 4. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentation on specific conservation issues.

**117. Evolution of Vertebrates. (5)** Lecture, three hours; laboratory, three hours. Requisite: course 110. Recommended: one general geology course. Fossil record of the evolution of vertebrates, with emphasis on paleobiology and morphology of tetrapods. P/NP or letter grading.

**118. Plant Adaptations. (8)** Lecture, one hour; field trip, 10 hours. Preparation: completion of preparation for the major courses. *Five-week course offered only as part of Field Biology Quarter*. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments using community, population, and ecophysiological levels of integration.

**C119. Mathematical Ecology. (4)** Lecture, three hours. Requisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C219.

**120. Evolution. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Recommended: Life Sciences 4. Designed for departmental majors specializing in environmental and population biology. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

**121. Molecular Biology and Evolution. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution. Letter grading.

**122. Ecology. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Highly recommended: Mathematics 31B, 32A. Designed for departmental majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems. P/NP or letter grading.

**123. Marine Ecology. (4 or 8)** Lecture, five hours; laboratory, five hours. Recommended prerequisite: course 122. Offered either as an 8-unit quarter-long course or as a 4-unit five-week intensive course given off campus as part of *Marine Biology Quarter*. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required.

**124. Field Ecology. (4 or 8)** Lecture, two hours; laboratory or field trip, 10 hours. Requisite: Life Sciences 1. Recommended: courses 111, 120, 122. Offered either as a 4-unit quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When course is given as part of *Field Biology Quarter*, it is 8 units and lasts for five weeks. Field and laboratory research in ecology; collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies.

**C125. Tropical Animal Communication. (4 or 8)** Requisite: Life Sciences 1. Offered either as a 4-unit quarter-long course or as an 8-unit *Field Biology Quarter* course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C225.

**C126. Behavioral Ecology. (4 or 8)** Requisites: course 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Offered either as a 4-unit quarter-long course or as an 8-unit *Field Biology Quarter* course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C227.

**M127. Soils and Environment. (5)** (Same as Environment M127 and Geography M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

**128. Plant Physiological Ecology. (5)** Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1, Physics 1C or 6C. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Letter grading.

**129. Animal Behavior. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 4. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization.

**130. Principles of Systematic Biology. (4)** Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1. Recommended: courses 120, C135. Concepts, principles, and methods of comparative biology as they apply to the inference of evolutionary relationships among organisms. Principles and application of biological nomenclature.

**131. Insect Ecology. (4 or 8)** Lecture, two hours; laboratory or field trip, eight hours. Requisite: Life Sciences 1. Recommended: courses 120, 122. Offered either as a 4-unit quarter-long course with weekend field trips or as an 8-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

**132. Field Behavioral Ecology. (8)** Lecture, two hours; laboratory/field trip, 10 hours. Requisite: Life Sciences 1. Recommended: course 129. Five-week course offered only as part of Field Biology Quarter. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip.

**C134A. Physiological Ecology of Desert Animals. (5)** Lecture, three hours; laboratory, two hours; two two-day field trips per term. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C214. Letter grading.

**134B. Field Physiological Ecology of Desert Animals. (8)** Requisite: Life Sciences 1. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of Field Biology Quarter. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

**C135. Population Genetics. (4)** (Formerly numbered 135.) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C235. Letter grading.

**136. Ecology, Behavior, and Evolution Laboratory. (6)** Lecture, four hours; laboratory, eight hours; field trips, six and one half days per term. Requisites: course 120 or 122 or 129 (may be taken concurrently), Life Sciences 1, 4, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Strongly recommended: course 122. Designed for Ecology, Behavior, and Evolution majors. Laboratory and field exercises on population genetics, growth, and regulation; competition and predation; behavioral interactions; species' diversity and distribution. Methodological aspects from theoretical models and computer simulations to laboratory and garden experiments to fieldwork. Mandatory field trips, including two weekend trips. Letter grading.

**137. Chemical Communication. (4)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL, Life Sciences 1, 2, 3. Chemical signals are most important means by which organisms communicate. Exploration of how chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthetic approach, with emphasis on applications to cell biology, physiology, and ecology. P/NP or letter grading.

**M139. Introduction to Chemical Oceanography. (4)** (Same as Atmospheric Sciences M105.) Lecture, three hours. Introductory course for physical sciences, life sciences, and engineering majors interested in oceanic environment. Chemical composition of oceans and nature of physical, chemical, and biological processes governing this composition in the past and present. Cycles of major and minor oceanic constituents, with focus on those that are most important for life (i.e., carbon, nitrogen, phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes. Letter grading.

**CM145. Advanced Paleontology. (4)** (Same as Earth and Space Sciences CM118.) Lecture, three hours. Requisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM245. P/NP or letter grading.

**146. Physicochemical Biology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2, 3, Physics 1C or 6C. Physicochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction. Letter grading.

**147. Biological Oceanography (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Lectures include physical, chemical, and biological factors affecting abundance and distribution of organisms in marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux. Letter grading.

**148. Biology of Marine Plants. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Introduction to general biology of marine algae, including basics of structure reproduction, life histories, systematics, and introduction to physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given off campus at a marine science center. Letter grading.

**C151A. Tropical Ecology. (4)** Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C221A. P/NP or letter grading.

**C151B. Field Tropical Ecology. (8)** Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of Field Biology Quarter. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C221B.

**152. Functional Plant Anatomy. (5)** Lecture, three hours; laboratory, three hours. Requisites: Life Sciences 1, 2, 3, 4. Structure and functional significance of various cell and tissue types in higher plants, plus patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits. P/NP or letter grading.

**154. California Ecosystems. (5)** Lecture, three hours; laboratory or field trip, four hours. Requisite: Life Sciences 1. Introduction to structure, biodiversity, and dynamics of California ecosystems, with focus on Southern California, and impact of human activities on these systems. P/NP or letter grading.

**157. Functional Integrated Histology. (6)** Lecture, three hours; laboratory, four hours. Requisites: Chemistry 14CL or 30BL, 153A, Life Sciences 1, 2, 3, 4, Mathematics 3C or 32A, Physics 4BL or 6C. Not open for credit to students with credit for former course 153 or 153L. Structure and function of cell and extracellular matrix as basic building blocks of tissues and organs, structural specializations of cells and their interactions in forming four basic tissues, how cells and tissues are structurally and functionally linked in organs. Letter grading.

**M158. Cell Biology. (6)** (Same as Physiological Science M158.) Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3, 4. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels. Letter grading.

**C159. Computational Biology. (4)** Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connections to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C275.

**162. Plant Physiology. (6)** Lecture, four hours; laboratory, four hours. Requisites: Life Sciences 1, 2, 3. Basic aspects of plant function, including photochemical, biochemical, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; organellar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress. Letter grading.

**163. Biology of Marine Tetrapods. (4)** Five-week intensive course. Lecture, five hours; laboratory and fieldwork, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Highly recommended: course 111. Survey of "higher" vertebrates living in marine habitats, including estuarine amphibians, marine reptiles, seabirds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at a marine science center. Letter grading.

**164. Field Biology of Marine Fishes. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Recommended: Mathematics 3A, 3B, 3C. Selected aspects of natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given off campus at a marine science center.

**165. Ecological Physiology of Marine Vertebrates. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Recommended: Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in the oceans of the world and to major marine habitats. Given off campus at a marine science center. Letter grading.

**M166. Animal Physiology. (6)** (Same as Physiological Science M166.) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, 153A, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course 167 or 170 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

**167. Regulatory Physiology. (6)** Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course M166 or 170 or to Physiological Science majors. Introduction to whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems. Letter grading.

**168. Marine Phytoplankton Physiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2. Key physiological processes, with emphasis on photosynthesis, carbon and nutrient uptake, mineralization, and toxin production of key components of marine phytoplankton, such as cyanobacteria, diatoms, dinoflagellates, and coccolithophores. Letter grading.

**170. Animal Environmental Physiology. (6)** Lecture, three hours; laboratory, six hours. Prerequisites: Chemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL, Life Sciences 1, 2, 3, 4, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course M166 or 167. Designed for Ecology, Behavior, and Evolution majors. Introduction to physiology (function) of animals' organs and organ systems, with emphasis on environmental interactions and ecological adaptations. Letter grading.

**M173. Anatomy and Physiology of Sense Organs. (4)** (Same as Physiological Science M173.) Lecture, three hours; discussion, one hour. Prerequisites: Molecular, Cell, and Developmental Biology 171 (or Physiological Science 111A) or M175A and M175B (or Physiological Science M180A and M180B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

**179. Comparative Endocrinology. (4)** Lecture, three hours; discussion, two hours. Recommended requisite: course M166 or 167 or Molecular, Cell, and Developmental Biology 138. In-depth treatment of basic principles of endocrinology, with emphasis on physiological endocrinology. Examples from both invertebrates and vertebrate animals. Letter grading.

**181. Parasitology. (6)** Lecture, three hours; laboratory, six hours. Prerequisites: Life Sciences 1, 3. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Letter grading.

**182. Field Community and Population Ecology. (4)** Lecture, five hours; field study, seven hours. Corequisites: courses 183, 184, 199. Introduction to experimental field research, with emphasis on investigating communities and populations of native plants and animals to reveal their structures, their relationships to individual members, and environmental factors in their success and limitation. Given off campus as part of UC Environmental Biology Supercourse.

**183. Applied Conservation Biology. (4)** Lecture, five hours; field study, seven hours. Corequisites: courses 182, 184, 199. Introduction to complexities and realities of natural resource exploitation and preservation, with emphasis on trade-offs between economic benefits and ecosystem stability and sustainability. Given off campus as part of UC Environmental Biology Supercourse.

**184. Physiological Ecology. (4)** Lecture, five hours; field study, seven hours. Corequisites: courses 182, 183, 199. Examination of functional means by which animals and plants cope with their environments, and physiological limits determining boundary conditions of ecological niches. Emphasis on unifying principles describing regulatory features of animals and plants, and responses of species in extreme environments. Given off campus as part of UC Environmental Biology Supercourse.

**188. Seminar: Biology and Society. (2)** Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.

**CM189A-CM189B. Theoretical Behavioral Ecology. (4-4)** (Same as Anthropology CM189A-CM189B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is requisite to CM189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM295A-CM295B.

**190A-190D. Honors Research in Organismic Biology, Ecology, and Evolution. (2 to 4 each)** Individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Organismic Biology, Ecology, and Evolution Department faculty for at least two terms and for a total of at least 8 units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C and 190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken. Eight units may be applied toward departmental majors.

**192. Teaching Practicum in Organismic Biology, Ecology, and Evolution. (1 to 4)** Tutorial, to be arranged. Limited to junior/senior departmental majors. Training and supervised practicum for advanced undergraduates in teaching courses related to biology. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. May not be applied toward course requirements for departmental majors. May be repeated for credit. P/NP or letter grading.

**M194. Undergraduate Seminar: Current Topics in Biomedical Sciences. (2)** (Same as Molecular, Cell, and Developmental Biology M194 and Physiological Science M194.) Seminar, two hours. Designed for juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**199. Special Studies. (2 to 16)** Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than 8 units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward departmental majors.

**199I. Independent Studies in Application of Biology. (2 to 4)** Discussion, one hour; fieldwork, five to 12 hours. Independent studies course to be supervised by Field Studies Office, fieldwork site, and faculty adviser. Consult Undergraduate Office for more information. May not be applied toward requirements for departmental majors. May be repeated for a maximum of eight units. Each repetition must have its own analytical focus or show progression of research. P/NP grading.

## Graduate Courses

**M200A. Evolutionary Biology. (4)** (Same as Earth and Space Sciences M216.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

**200B. Ecology, Behavior, and Functional Ecology. (4)** (Formerly numbered Biology 200B, 200C.) Lecture, two hours; discussion, two hours. Principles and current topics in ecology, behavioral biology, and plant and animal physiology. Topics may include island biogeography, habitat selection, community structure, disturbance ecology, life history evolution, social behavior, sexual selection, foraging theory, energetics, photosynthesis, water relations, chemical ecology, endocrinology, physiological ecology, and adaptational biology. S/U or letter grading.

**203. Marine Botany and Physiology. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Designed for graduate students. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at a marine science center.

**204. Advanced Biology of Algae. (4)** Lecture, four hours; discussion, one hour. Consideration of current research in experimental phyecology. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats.

**205. Marine Invertebrate Biology. (4)** Lecture, four hours; laboratory, eight hours. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given off campus at a marine science center.

**206. Advanced Ichthyology. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit.

**208. Advanced Vertebrate Morphology. (4)** Lecture, two hours; laboratory, eight hours. Requisite: course 110. Emphasis on a functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit.

**209. Behavior of Arthropods. (4)** Lecture, three hours; discussion, one hour. Requisite: course 105 or 107. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required.

**210. Advanced Ornithology. (4)** Lecture, two hours; laboratory, two hours; fieldwork, two hours. Requisite: course 114. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality).

**C212. Experimental Invertebrate Zoology. (6)** Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104.

**C213. Mammalogy. (5)** Lecture, three hours; laboratory, three hours. Requisite: course 110 or 111. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C115. Letter grading.

**C214. Physiological Ecology of Desert Animals. (5)** Lecture, three hours; laboratory, two hours; two-day field trips per term. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C134A. Letter grading.

**C215. Introduction to Marine Science. (4)** Lecture, three hours; laboratory, three hours; weekend field trips. Requisite: Life Sciences 1. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C109.

**M216. Statistical Methods for Life Sciences. (4)** (Formerly numbered 216.) (Same as Statistics M251.) Lecture, three hours. Requisite: Statistics M13. Fundamentals of statistics as applied in life sciences, including statistical inferences for continuous and categorical data (estimation, testing of means and proportions, ANOVA) study design, linear regression, and introduction to principle components analysis. Methods to be implemented on computer with SAS. S/U or letter grading.

**217. Marine Ecology. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given off campus at a marine science center.

**218. Oceanology. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Ecology and dynamics of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at a marine science center.

- C219. Mathematical Ecology. (4)** Lecture, three hours. Requisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C119.
- C221A. Tropical Ecology. (4)** Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C151A. S/U or letter grading.
- C221B. Field Tropical Ecology. (8)** Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C151B.
- 224. Marine Molecular Biology. (8)** Lecture, three hours; laboratory, eight hours. Preparation: background in marine sciences, basic cell biology and biochemistry. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at a marine science center.
- C225. Tropical Animal Communication. (4 or 8)** Requisite: Life Sciences 1. Offered either as a 4-unit quarter-long course or as an 8-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C125. S/U or letter grading.
- C227. Behavioral Ecology. (4 or 8)** Requisites: course 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Offered either as a 4-unit quarter-long course or as an 8-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C126. S/U grading.
- M231. Molecular Evolution. (4)** (Same as Earth and Space Sciences M217.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of the genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.
- 232. Advanced Ecology. (4)** Lecture, three hours; discussion, one hour; field trip, three hours. Requisite: course 122. Concepts and topics in ecology, evolutionary or behavioral ecology, or theoretical ecology. Topics vary from year to year and may include island biogeography, tropical biology, biodiversity, modeling in ecology, habitat selection, community structure and organization, and ecology and evolution of reproductive rates. May be repeated for credit. S/U or letter grading.
- C235. Population Genetics. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C135. Letter grading.
- 236. Seminar: Marine Molecular Biology. (4)** Discussion, 10 hours. Requisite: course 224. Seminar on current issues and work in marine molecular biology. Given off campus at a marine science center.
- M238. Ocean Biogeochemical Dynamics and Climate. (4)** (Same as Atmospheric Sciences M235.) Lecture, three hours. Interaction of ocean biogeochemical cycles with physical climate system. Biogeochemical processes controlling carbon dioxide and oxygen in oceans and atmosphere over time-scales from a few million years to a few years. Anthropogenic perturbation of global carbon cycle and climate. Response of ocean ecosystems to past and future global changes. Use of isotopes to study ocean biogeochemical cycles and climate. Interactions between biogeochemical cycles on land and in ocean. Letter grading.
- 240. Physiology of Marine Animals. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at a marine science center.
- 243. Animal Communication. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Open to qualified undergraduates with consent of instructor. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information.
- 244. Advanced Insect Physiology. (4)** Lecture, two hours; laboratory, five hours. Requisite: course 168. Detailed discussion of current problems in insect physiology, with advanced laboratory.
- CM245. Advanced Paleontology. (4)** (Same as Earth and Space Sciences CM218.) Lecture, three hours. Requisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM145. S/U or letter grading.
- 247. Advanced Plant Biology. (4)** Lecture, three hours; discussion, two hours. Requisite: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.
- 251. Seminar: Systematics. (2)** Discussion, two to four hours. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit.
- 253. Seminar: Plant Structure. (2)** Seminar, two hours. S/U or letter grading.
- 255. Seminar: Invertebrate Zoology. (2)** Seminar, two hours. S/U or letter grading.
- 259. Seminar: Herpetology. (2)** Discussion, three hours. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology.
- 260. Seminar: Biology of Terrestrial Vertebrates. (2)** Seminar, two hours. S/U or letter grading.
- 263. Seminar: Population Genetics. (2 or 4)** Discussion, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc.
- 264. Seminar: Stomatal Function. (4)** Seminar, two hours; discussion, two hours. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations.
- 265. Seminar: Biophysical Plant Ecology. (2)** Seminar, two hours. S/U or letter grading.
- 267. Seminar: Current Topics in Evolutionary Ecology. (2)** Seminar, two hours. S/U or letter grading.
- 268. Seminar: Population Biology. (2)** Seminar, two hours. S/U or letter grading.
- 269. Seminar: Animal Ecology. (2)** Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.
- 270. Seminar: Environmental Physiology. (2)** S/U grading.
- 271. Seminar: Phycology and Mycology. (2)** Requisite: course 101A. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts.
- 272. Seminar: Marine Biology. (2)** Seminar, two hours. S/U or letter grading.
- 273. Seminar: Entomology. (2)** Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.
- 274. Seminar: Behavioral Ecology. (2)** Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.
- C275. Computational Biology. (4)** Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connection to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C159.
- 279. Seminar: Evolutionary Biology. (2)** Seminar, two hours. Requisite: course M231. Emphasis on a particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.
- 282. Seminar: Ichthyology. (2)** Requisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit.
- 288. Seminar: Plant Cell Biology. (2)** Recommended preparation: course 162.
- M290. Seminar: Comparative Physiology. (2)** (Same as Physiological Science M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.
- 291. Seminar: Physiology and Biochemistry of Arthropods. (2)** Seminar, two hours. S/U or letter grading.
- CM295A-CM295B. Theoretical Behavioral Ecology. (4-4)** (Same as Anthropology CM289A-CM289B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM295A is requisite to CM295B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B.
- 296. Seminar: Integrative Biology — Cellular, Organismic, and Population. (1 to 4)** Discussion, three hours. Advanced study and analysis of current topics in cellular, organismic, and population biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.
- 299. Seminar: Parasitology. (2)** Seminar, two hours. S/U or letter grading.
- 375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Biology in Higher Education. (2)** Seminar, to be arranged. Designed for graduate students. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

**496. Preparation for Teaching Biology in Higher Education. (2)** Designed for graduate students. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

**596. Directed Individual (or Tutorial) Studies. (2 to 12)** Tutorial, to be arranged. Letter grading.

**596F. Directed Individual (or Tutorial) Studies. (2 to 8)** Tutorial, to be arranged. Given off campus at a marine science center.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**598. M.A. Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

## ORGANIZATIONAL STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
4256 Bunche Hall  
Box 951472  
Los Angeles, CA 90095-1472  
(310) 825-3862  
<http://www.polisci.ucla.edu/>

### Faculty Advisory Committee

Bryan C. Ellickson, Ph.D. (*Economics*)  
Oscar Grusky, Ph.D. (*Sociology*)  
Eric H. Monkkonen, Ph.D. (*History*), *Chair*

## Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Organizational Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

## Undergraduate Study

### Organizational Studies Specialization

Students may elect to combine the Organizational Studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in Organizational Studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or M18 and 104 or equivalent.

### Upper Division Requirements

*Required:* Nine upper division courses, including (1) at least three courses outside the major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in a governmental or service organization.

Professor Eric H. Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

## ORTHOPAEDIC SURGERY

*School of Medicine*

UCLA

Box 956902  
Los Angeles, CA 90095-6902  
(310) 825-6986  
<http://www.medsch.ucla.edu/som/deptlist.htm>

### Chair

Gerald A.M. Finerman, M.D.

## Scope and Objectives

The medical student program in orthopaedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students

acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For further details on the Department of Orthopaedic Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## PATHOLOGY AND LABORATORY MEDICINE

 Jeffery L. Twiss, M.D.

#### Adjunct Professor

Sunita M. Bhuta, M.D.

#### Adjunct Associate Professor

Nora Rozengurt, Ph.D.

#### Adjunct Assistant Professor

Robert Trelease, Ph.D.

## Scope and Objectives

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications

available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Pathology and Laboratory Medicine offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Experimental Pathology.

## Admission

Admission to the program is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences. Information may be obtained from UCLA ACCESS, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

## Master's Degree

Students are only accepted into the program for the purpose of receiving a Ph.D. degree. However, the department also awards the M.S. degree in cases where a student is unable to finish the full Ph.D. program, but the work completed is adequate to the standards and minimum requirements for an M.S. degree.

The M.S. degree is offered through the comprehensive examination and thesis plans; the former consists of the written qualifying examination for the Ph.D. Students must complete the core courses and the 6 elective units required of all students in the Ph.D. program. The minimum total number of units required is 36, 35 of which must be at the graduate level.

## Doctoral Degree

Ph.D. students follow the UCLA ACCESS curriculum during the first year. This consists of two required core courses in biological chemistry, an elective (for students obtaining degrees in experimental pathology, this is normally 4 units of basic mechanisms of disease), seminars, and laboratory rotations. In the second year students take research seminars and other required coursework in the molecular and cellular foundations of disease.

Students must serve as teaching assistants for two quarters.

Written and oral qualifying examinations are required. The written examination consists of a written grant proposal related to the general areas of the student's dissertation, yet different from the dissertation. The format of the proposal is based on the first award application from the Public Health Service Grant application, with minor modifications.

Following successful completion of the proposal, students take the University Oral Qualifying Examination.

# Pathology and Laboratory Medicine

## Upper Division Courses

**102. Gross Anatomy of the Human Body. (8)** (Formerly numbered Orthopaedic Surgery 102.) Lecture, three hours; laboratory, nine hours. Designed for dental and graduate students. Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading.

**199. Special Studies. (2 to 6)** Supervised laboratory research, 10 hours minimum. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

## Graduate Courses

**200A. Dental Pathology. (3)** Lecture, 90 minutes; laboratory, three hours. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

**205A-205B. Gross and Developmental Anatomy for Medical Students. (5-5)** (Formerly numbered Orthopaedic Surgery 205A-205B.) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Designed for medical students. Open to nonmedical students with consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. S/U or letter grading. **205A.** Limbs, Thorax, and Abdomen (first eight weeks); **205B.** Pelvis, Head, and Neck.

**207. Gross and Developmental Anatomy for Graduate Students. (12)** (Formerly numbered Orthopaedic Surgery 207.) Lecture/laboratory, three four-hour sessions (16-week semester). Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. Trunk and extremities; head and neck. Letter grading.

**M215. Interdepartmental Course: Tropical Medicine. (2)** (Same as Medicine M215, Microbiology and Immunology M215, and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**231A. Pathological Anatomy and Physiology. (6)** Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology.

**231B-231C. Pathophysiology of Disease. (6-6)** Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Prerequisite: course 200A. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading.

**M237. Molecular and Cellular Foundations of Disease. (4)** (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

**255. Mapping the Human Genome. (3)** Lecture, 90 minutes; discussion, 90 minutes. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

**M256. Seminar: Viral Oncology. (2)** (Same as Microbiology and Immunology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

**M257. Introduction to Toxicology. (4)** (Same as Pharmacology M257.) Requisite: Pharmacology 241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

**M258. Pathologic Changes in Toxicology. (4)** (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

**M294. Molecular Basis of Cancer. (4)** (Same as Microbiology and Immunology M294.) Lecture, three hours. Requisites: Biological Chemistry CM253, CM267, Microbiology and Immunology M229, Neurobiology M209A. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

**M294L. Cancer Histopathology Laboratory. (2)** (Same as Microbiology M294L and Microbiology and Immunology M294L.) Lecture, one hour; laboratory, two hours. Requisites: course M294 (preferred) or M293, Biological Chemistry CM253, CM267, and Microbiology and Immunology M229 or Neurobiology M209A. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

**298A-298D. Current Research in Disease Mechanisms. (2 each)** (Formerly numbered 298A-298B-298C.) Lecture, 90 minutes. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Designed for graduate experimental pathology students. Current research in disease mechanisms, with strong emphasis on experimental approach in pathology. Topics include genetic and metabolic disorders, thyroid disease, immunology, atherosclerosis, infectious diseases, and Alzheimer's disease. S/U or letter grading.

**596. Directed Individual Study or Research. (4 to 12)** Tutorial, to be arranged. Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

**597. Preparation for Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Preparation: one year of pathology coursework. Individual study for qualifying examinations. S/U grading.

**599. Preparation of Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. Preparation: completion of qualifying examinations and majority of Ph.D. research. Writing and completion of dissertation. S/U grading.

## PEDIATRICS

Thomas S. Klitzner, M.D., Ph.D., *Vice Chair, Academic*  
*Affairs, UCLA Medical Center*

Adam J. Jonas, M.D., *Chair, Harbor-UCLA*  
Frederick James, M.D., *Chair, King/Drew*

Mohammed Malekzadeh, M.D., *Chair, Olive View-UCLA*

David L. Rimoin, M.D., Ph.D., *Chair, Cedars-Sinai*

## Scope and Objectives

The Department of Pediatrics encompasses five teaching hospitals: Mattel Children's Hospital at UCLA and Olive View-UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken in any of the four programs (Mattel/Olive View-UCLA, Cedars-Sinai, Harbor-UCLA, King/Drew). In-depth electives in the Department of Pediatrics are listed in the *School of Medicine Handbook of Clinical Courses*, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Pediatrics

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Pediatrics. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in pediatrics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Graduate Course

**M215. Interdepartmental Course: Tropical Medicine. (2)** (Same as Medicine M215, Microbiology and Immunology M215, and Pathology M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

Andrew Hsu, Ph.D.  
David C. Wilson, Ph.D.

## Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged among the six best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

"Philosopher," translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject

to which they are exposed — whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

## Undergraduate Study

### Philosophy B.A.

#### Preparation for the Major

*Required:* Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

#### Transfer Students

To be admitted as Philosophy majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one philosophy of mind or skepticism and rationality course, one ethical theory course, one symbolic logic course, and one additional philosophy course.

#### The Major

*Required:* Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of 8 units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

## Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (8 units) in philosophy with an average GPA of 3.5.

## Philosophy Minor

To enter the Philosophy minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* Philosophy 7 or 21, and 22 or 31.

*Required Upper Division Courses (24 units):* Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Philosophy offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Philosophy.

### Admission

The department admits only those who plan to earn the Ph.D. degree. The M.A. degree may be earned while completing requirements for the Ph.D. Admission requires approval by the Graduate Division and the department.

The *UCLA Application for Graduate Admission* should be sent directly to the Graduate Division. The departmental application, three letters of recommendation (on the official forms), official scores on the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), official scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination for applicants whose first language is other than English, and two official transcripts from each institution attended should be sent to the graduate counselor in the department. Departmental information and application can be obtained by writing to the department in September.

## Master's Degree

The M.A. degree is offered through the comprehensive examination plan, which also serves as the Ph.D. written qualifying examination. Students must complete at least nine upper division or graduate courses, five of which must be at the graduate level. The total course requirement must include a required seminar for first-year students and a course in logic.

There is a language requirement for this degree.

## Doctoral Degree

Ph.D. students must complete three first-year seminars plus 11 additional upper division and graduate courses in philosophy, distributed among courses in logic, the history of philosophy, ethics and value theory, metaphysics and epistemology, special area requirements (including a proposition), and electives.

Students are required to serve as teaching assistants for three quarters.

Written and oral qualifying examinations are required. The M.A. comprehensive examination is required of all doctoral students and serves as the doctoral written qualifying examination.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, the primary purpose of which is to determine whether they are able to complete the dissertation successfully.

There is a language requirement for this degree.

## Philosophy

### Lower Division Courses

**1. Beginnings of Western Philosophy. (4)** Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks.

**2. Introduction to Philosophy of Religion. (4)** Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

**4. Philosophical Analysis of Contemporary Moral Issues. (4)** Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

**5A. Philosophy in Literature. (4)** Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition.

**6. Introduction to Political Philosophy. (4)** Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

**7. Introduction to Philosophy of Mind. (4)** Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge.

**8. Introduction to Philosophy of Science. (4)** Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at nontechnical level of episodes from history of science.

**9. Principles of Critical Reasoning. (4)** Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

**21. Skepticism and Rationality. (4)** Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley.

**22. Introduction to Ethical Theory. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 22W. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc. P/NP or letter grading.

**22W. Introduction to Ethical Theory. (5)** Lecture, two and one half hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 22. Introduction to major ethical theories in Western thought. Examination of works of Plato, Aristotle, Hume, Kant, and Mill. Topics include ideas of virtue, obligation, egoism, relativism, and foundations of morals. Four papers required. Satisfies Letters and Science Writing II requirement. Letter grading.

**31. Logic, First Course. (4)** Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language.

**32. Logic, Second Course. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions.

**97. Freshman Seminar. (4)** Variable topics; consult *Schedule of Classes* or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

## Upper Division Courses

**100A. History of Greek Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

**100B. Medieval and Early Modern Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

**100C. History of Modern Philosophy, 1650 to 1800. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

## Group I: History of Philosophy

**M101A. Plato — Earlier Dialogues. (4)** (Same as Classics M146A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

**M101B. Plato — Later Dialogues. (4)** (Same as Classics M146B.) Lecture, three hours; discussion, one hour. Requisite: course M101A. Study of selected topics in middle and later dialogues of Plato.

**M102. Aristotle. (4)** (Same as Classics M147.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle.

**M103A. Ancient Greek and Roman Philosophy. (4)** (Same as Classics M145A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

**M103B. Later Ancient Greek Philosophy. (4)** (Same as Classics M145B.) Lecture, three hours. Preparation: one course from 1, 100A, M101B, M102, M103A. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

**104. Topics in Islamic Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

**105. Medieval Philosophy from Augustine to Maimonides. (4)** Preparation: one philosophy course. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universals, existence and nature of God, problem of evil, and doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.

**106. Later Medieval Philosophy. (4)** Preparation: one philosophy course. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

**107. Topics in Medieval Philosophy. (4)** Preparation: one philosophy course. Recommended requisite: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

**C108. Hobbes. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208.

**C109. Descartes. (4)** Requisites: course 21 or two philosophy courses. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.

**C110. Spinoza. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C111. Leibniz. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C112. Locke and Berkeley. (4)** Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

**C114. Hume. (4)** Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

**115. Kant. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

**116. 19th-Century Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in 19th-century thought.

**117. Late 19th- and Early 20th-Century Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

**118. Kierkegaard. (4)** Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

**C119. Topics in Modern Philosophy. (4)** Preparation: one philosophy course. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

## Group II: Logic, Semantics, and Philosophy of Science

**124. Philosophy of Science: Historical. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

**125. Philosophy of Science: Contemporary. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

**126. Philosophy of Science: Social Sciences. (4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

**127A. Philosophy of Language. (4)** Requisite: course 31. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

**127B. Philosophy of Language. (4)** Requisite: course 31. Course 127A is not requisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor.

**128A. Philosophy of Mathematics. (4)** Requisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl).

**128B. Philosophy of Mathematics. (4)** Requisite: course 128A. Intuitionism of Brouwer, Heyting, and later Weyl; proof theory of Hilbert.

**129. Philosophy of Psychology. (4)** Lecture, three hours; discussion, one hour. Preparation: one 4-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

**130. Philosophy of Space and Time. (4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one physics course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory.

**131. Science and Metaphysics. (4)** Preparation: two philosophy courses. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.

**132. Philosophy of Biology. (4)** Preparation: one philosophy course. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.

**133. Topics in Logic and Semantics. (4)** Requisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

**M134. Introduction to Set Theory. (4)** (Same as Mathematics M112.) Lecture, three hours; discussion, one hour. Requisite: course 32 or Mathematics 31B. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**135A. Metatheory of Sentential Logic. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definition of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.

**135B. Metatheory of Predicate Logic. (4)** Lecture, three hours; discussion, one hour. Requisite: course 135A. Classical first-order logic, its scope, and limits. Gödel completeness theorem as main positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logic.

**136. Modal Logic. (4)** Requisite: course 135A. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott completeness, incompleteness in tense and modal logic, quantificational extensions.

### Group III: Ethics and Value Theory

**150. Society and Morals. (4)** Lecture, three hours; discussion, one hour. Requisite: course 22. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

**151A-151B-151C. History of Ethics. (4-4-4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Each course may be taken independently for credit. **151A.** Selected Classics in Ancient Ethical Theories: Plato, Aristotle; **151B.** Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc.; **151C.** Selected Classics of Medieval Ethics.

**153A. Topics in Ethical Theory: Normative Ethics. (4)** Requisite: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

**153B. Topics in Ethical Theory: Metaethics. (4)** Requisite: course 22. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

**154. Topics in Value Theory: Rationality and Action. (4)** Requisite: course 6 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

**155. Medical Ethics. (4)** Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

**C156. Topics in Political Philosophy. (4)** (Formerly numbered 156.) Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C247. P/NP or letter grading.

**157A-157B. History of Political Philosophy. (4-4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. May be repeated with consent of instructor. **157A.** Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. **157B.** Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

**161. Topics in Aesthetic Theory. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

**166. Philosophy of Law. (4)** Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

### Group IV: Metaphysics and Epistemology

**170. Philosophy of Mind. (4)** Lecture, three hours; discussion, one hour. Preparation: two relevant philosophy courses. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

**172. Philosophy of Language and Communication. (4)** Preparation: two relevant philosophy or linguistics courses. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

**175. Topics in Philosophy of Religion. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

**176. Metaphysics of Modality. (4)** Requisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of modal theory of modal logic. What are "possible worlds"? What is the "accessibility" relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) "Haeccetism" and (2) "Aristotelian Essentialism"? P/NP or letter grading.

**177A. Existentialism. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

**177B. Historical Studies in Existentialism. (4)** Preparation: one philosophy course. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.

**178. Phenomenology. (4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

**179. Oriental Philosophy: Buddhism. (4)** Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

**182. Elements of Metaphysics. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions; nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenalism, materialism, dualism).

**183. Theory of Knowledge. (4)** Requisite: course 21. Analysis of concept of empirical knowledge. May be repeated for credit with consent of instructor.

**184. Topics in Metaphysics. (4)** Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

**186. Topics in Theory of Knowledge. (4)** Requisite: course 182 or 183. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a priori knowledge, problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

**187. Philosophy of Action. (4)** Preparation: two philosophy courses. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

**188. Philosophy of Perception. (4)** Preparation: two philosophy courses. Critical study of main philosophical theories of perception and arguments used to establish them.

**189. Major Philosophers of the 20th Century. (4)** Preparation: two philosophy courses. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.

### Special Studies

**M192. Philosophical Analysis of Issues in Feminist Theory. (4)** (Same as Women's Studies M192.) Lecture, three hours. Requisite for Women's Studies majors: Women's Studies 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor. Letter grading.

**193. Christian Ethical Thought. (4)** Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and religious life.

**195. 19th- and 20th-Century Religious Thought. (4)** Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich.

**196. Undergraduate Seminar: Philosophy. (4)** Seminar, one hour; discussion, three hours. Variable topics; consult *Schedule of Classes* or "Department Announcements" for topic to be offered in a specific term. May be repeated for credit with consent of instructor.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

### Graduate Courses

**200A-200B-200C. Seminar for First-Year Graduate Students. (4-4-4)** Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

### Group I. History of Philosophy

**201. Plato. (4)** Study of later dialogues.

**202. Aristotle. (4)** Analysis of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

**203. Seminar: History of Ancient Philosophy. (4)** Selected problems and philosophers. May be repeated for credit with consent of instructor.

**206. Topics in Medieval Philosophy. (4)** Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

**207. Seminar: History of Medieval and Renaissance Philosophy. (4)** Selected problems and philosophers. May be repeated for credit with consent of instructor.

**C208. Hobbes. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108.

**C209. Descartes. (4)** Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

**C210. Spinoza. (4)** Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C211. Leibniz. (4)** Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C212. Locke and Berkeley. (4)** Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading.

**C214. Hume. (4)** Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114.

**215. Kant. (4)** Intensive study of selected writings of Immanuel Kant.

**216. 19th-Century Philosophy. (4)** Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

**C219. Topics in Modern Philosophy. (4)** Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

**220. Seminar: Topics in History of Philosophy. (4)** Seminar, three hours. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

## Group II. Logic, Semantics, and Philosophy of Science

**221A. Topics in Set Theory. (4)** Lecture, three hours. Requisite: Mathematics M112. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo/Fraenkel; von Neumann/Gödel theory. May be repeated for credit with consent of instructor. S/U or letter grading.

**221B. History of Set Theory. (4)** Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors.

**222A-222B-222C. Gödel Theory. (4-4-4) 222A.** Preparation: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222B.** Requisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222C.** Requisite: course 222B. Gödel numbering and Gödel theory. Final course in Gödel theory series.

**224. Philosophy of Physics. (4)** Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

**225. Probability and Inductive Logic. (4)** Lecture, three hours. Requisite: course M134 or Mathematics M112. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning. S/U or letter grading.

**226. Topics in Mathematical Logic. (4)** Content varies from term to term. May be repeated for credit with consent of instructor.

**227. Philosophy of Social Science. (4)** Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.

**230. Seminar: Logic. (4)** May be repeated for credit with consent of instructor.

**231. Seminar: Intensional Logic. (4)** Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of *Principia Mathematica*, possible worlds semantics. May be repeated for credit with consent of instructor.

**232. Philosophy of Science. (4)** Selected topics in philosophy of science. May be repeated for credit with consent of instructor.

**233. Seminar: Philosophy of Physics. (4)** May be repeated for credit with consent of instructor.

## Group III. Ethics and Value Theory

**241. Topics in Political Philosophy. (4)** Requisites: course 150 or C156 or 157A or 157B or any two philosophy courses. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.

**245. Seminar: History of Ethics. (4)** Selected topics. May be repeated for credit with consent of instructor.

**246. Seminar: Ethical Theory. (4)** Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.

**C247. Topics in Political Philosophy. (4)** (Formerly numbered 247.) Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

**248. Problems in Moral Philosophy. (4)** Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

**255. Seminar: Aesthetic Theory. (4)** Selected topics. May be repeated for credit with consent of instructor.

**M256. Topics in Legal Philosophy. (4)** (Same as Law M217.) Lecture, three hours. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

**M257. Seminar: Philosophy of Law. (4)** (Same as Law M524.) Seminar, three hours. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

## Group IV. Metaphysics and Epistemology

**271. Seminar: Topics in Metaphysics and Epistemology. (4)** Discussion, three hours. May be repeated for credit with consent of instructor.

**275. Human Action. (4)** Preparation: two upper division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

**280. 20th-Century Continental Philosophy. (4)** Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

**281. Seminar: Philosophy of Mind. (4)** May be repeated for credit with consent of instructor.

**282. Seminar: Metaphysics. (4)** May be repeated for credit with consent of instructor.

**283. Seminar: Theory of Knowledge. (4)** May be repeated for credit with consent of instructor.

**284. Seminar: Philosophy of Perception. (4)** May be repeated for credit with consent of instructor.

**285. Philosophy of Psychoanalysis. (4)** Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature.

**286. Philosophy of Psychology. (4)** Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

**287. Seminar: Philosophy of Language. (4)** May be repeated for credit with consent of instructor.

**288. Seminar: Wittgenstein. (4)** Seminar, three hours. May be repeated for credit with consent of instructor.

**289. Seminar: Philosophy of Religion. (4)** May be repeated for credit with consent of instructor.

**290. Workshop: Philosophy of Language. (4)** Seminar, two hours. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

**291. Workshop: Philosophy of Mathematics. (4)** Seminar, three hours. Ongoing discussion of current issues in philosophy of mathematics based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor. S/U or letter grading.

**299. Seminar: Philosophical Research. (4)** Seminar, three hours. Preparation: advancement to candidacy. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Philosophy. (2 to 4)** Seminar, to be arranged. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies. (2 to 8)** Tutorial, to be arranged. Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.

**597. Directed Studies for Graduate Examinations. (2 to 8)** Tutorial, to be arranged. Preparation for M.A. comprehensive examination or Ph.D. oral qualifying examinations. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

## PHYSICS AND ASTRONOMY

*College of Letters and Science*

UCLA

Viktor Decyk, Ph.D.  
Phillip Pritchett, Ph.D.

## Scope and Objectives

Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton's discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein's general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions which existed when the universe's expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe's matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet-

undiscovered exotic particles which are predicted by the most advanced theories of elementary particle physics.

Department of Physics and Astronomy faculty members and students are able to study the universe in the holistic manner which is demanded by the breadth of these two disciplines.

## Undergraduate Study

The Department of Physics and Astronomy offers a choice of three undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Physics, and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for the majors must be taken for a letter grade.

### Astronomy Courses

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A and 2B two-term sequence covers the material in courses 3, 4, and 6. Students may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Students who had an astronomical introductory course in high school should take either courses 2A and 2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in Astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 1 series and two terms of the Mathematics 31 and 32 series).

Students of junior and senior standing in Physics or related sciences are invited to select any of these courses: Astronomy 115, 117, 127, 140, 180.

## Physics Courses

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take Physics 10.

Physics 1Q is intended for entering freshman Physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH form sequences of courses in general physics for majors in Physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one course in the 1A, 1B, 1C sequence by taking the final examination with a class at the end of any term. This serves as a placement examination. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences.

Physics 10 is a one-term, nonlaboratory course that surveys the whole field of physics. Any two or more courses from Physics 1A, 6A, and 10 are limited to 6 units credit.

## Astrophysics B.S.

### Preparation for the Major

*Required:* Astronomy 81, 82; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Program in Computing 3 or 10A or demonstrated ability to program. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

### Transfer Students

To be admitted as Astrophysics majors, transfer students with 90 or more units must have completed the following introductory courses prior to admission to UCLA: two astrophysics courses, two years of calculus, one and one half years of calculus-based physics with laboratory for majors, one programming course, and one general chemistry course for majors.

### The Major

*Required:* Astronomy 115, 117, 127, 140, 180; Physics 105A, 105B, 110A, 110B, 115A, 115B, 115C, 131. *Recommended:* Physics 108, M122, 123, 124, 132, 140A, 140B.

## Honors Program

Senior majors in Astrophysics with a 3.5 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.5 and 3.75 or better, respectively, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

## Physics B.S.

The Physics major should be taken if students intend to continue toward the Ph.D. in Physics.

### Preparation for the Major

*Required:* Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

### Transfer Students

To be admitted as Physics majors, transfer students with 90 or more units must have completed the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

### The Major

*Required:* Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 115C, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series, which should be taken in the senior year; (3) there must be at least five upper division courses in the plan, preferably selected from Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, 140B; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

## Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

## General Physics B.A.

The General Physics major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If students intend to continue work toward the Ph.D. in Physics, they are advised to work for the B.S. in Physics as described earlier.

### Preparation for the Major

*Required:* Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

### Transfer Students

To be admitted as General Physics majors, transfer students with 90 or more units must have completed the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

### The Major

*Required:* Physics 105A, 110A, 110B, 112, 115A, 115B, 131, one course from the 180 series, two upper division physics electives (excluding C185 and 199), and four upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

## Single Subject Credentials

Students may earn credentials for secondary science teaching in the following subject areas: biological science, chemistry, physics, and geoscience. Completion of the single subject credential program in the Teacher Education Program is required. Consult the Department of Education, 1009 Moore Hall, (310) 825-8328, for information.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications

available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Physics and Astronomy offers the Master of Arts in Teaching (M.A.T.) degree in Astronomy, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Astronomy, Master of Arts in Teaching (M.A.T.) degree in Physics, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Physics.

## Admission

### M.S./Ph.D. in Astronomy

The basic requirement for admission to the M.S./Ph.D. program is a bachelor's degree in physics or astronomy. Applicants in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

### M.A.T. in Astronomy

The department is not admitting students to the M.A.T. program at this time.

### M.S./Ph.D. in Physics

Applicants to the M.S./Ph.D. program must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination is required for all international students whose native language is not English.

### M.A.T. in Physics

For information about the M.A.T. program, contact the Director of the Master of Arts in Teaching Program, Department of Physics and Astronomy, 3-164 Knudsen Hall, UCLA, Box 951547, Los Angeles, CA 90095-1547.

## Master's Degrees

### M.S. in Astronomy

The M.S. degree is offered through the comprehensive examination plan. The comprehensive examination is integrated with the Ph.D. written qualifying examination and consists of satisfactory completion of the second-year research project, culminating in a written report of the methods used and results obtained, and the oral portion of the comprehensive examination at the M.S. level.

Eleven courses are required for the M.S. degree, 10 of which must be at the graduate level. At least one of the courses must consist of a quarter of work on the second-year research project.

### M.A.T. in Astronomy

The M.A.T. degree is offered through the comprehensive examination plan. Nine courses are required for the academic portion of the program and must include at least five graduate courses in astronomy, mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. Although it does not count for degree credit, Physics 370 is also required.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, are required.

### M.S. in Physics

The M.S. degree is offered through the comprehensive examination and thesis plans; the latter is available only by special petition. The comprehensive examination is integrated with the Ph.D. written qualifying examination. Nine courses are required for the M.S. degree, six of which must be at the graduate level.

To satisfy the minimum requirement of six graduate courses in physics specified by the department, it is recommended that five of the minimum requirement of six be the five designated fundamental core courses, since the comprehensive examination is based on the content of these courses. Students must also take one of a designated set of breadth courses. The remaining three courses of the minimum nine courses required for the M.S. degree may be satisfied through upper division or graduate courses in physics or a related field, which are acceptable to the department for credit toward the M.S. degree, with the restriction that no more than two may be chosen from individual study and/or seminar courses.

### M.A.T. in Physics

The M.A.T. degree is offered through the comprehensive examination plan and leads to qualification for instructional credentials at the secondary school or junior college level.

A total of 12.5 courses are required. The program consists of at least five graduate physics courses, four of which are chosen from a designated list, and five professional (300 series) courses. Courses required are (1) the five graduate physics courses and (2) the set of courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12. Supervised teaching at the secondary school and junior college level is required as part of the education courses.

## Doctoral Degrees

### Ph.D. in Astronomy

Students must take nine core courses in astronomy and physics offered during the first

five quarters in residence and achieve a grade-point average of at least B, averaged over all astronomy and physics graduate courses taken during this time.

Students must satisfactorily complete the two-quarter second-year research project, culminating in a written report of the methods and the results of the research performed. Before undertaking the second-year research project, students must identify a faculty adviser who is willing to oversee their work on the project.

Students are required to spend at least three quarters as a teaching assistant at UCLA or have equivalent experience elsewhere.

Written and oral qualifying examinations are required. The written qualifying examination is integrated with the M.S. comprehensive examinations and consists of a written report on the second-year research project.

In the oral portion of the examination, students present the results of their second-year research project and are expected to be able to respond to questions and to solve basic problems from all core areas of astrophysics in which they have had the opportunity to take the course.

Following successful completion of the examinations, students take the University Oral Qualifying Examination, the main purpose of which is to discuss and evaluate their proposed dissertation problem. At the discretion of the committee, questions may be asked with regard to other material in their field of specialization and related matters.

### Ph.D. in Physics

Ph.D. degrees are based on original work, generally in one of the following fields of specialization: accelerator physics; elementary particles; intermediate energy and nuclear physics; low-temperature/acoustics; plasma and astrophysics; condensed matter, including solid-state; and spectroscopy.

Arrangements can also be made for students to receive a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, and geophysics.

There are core and breadth requirements. Students are required to acquire a mastery of the core graduate physics material represented in five core courses, which represents the body of knowledge tested on the written comprehensive examination.

Students also are required, in consultation with their adviser, to take a series of courses, seminars, and tutorials to prepare them for original research in a given area of specialization.

Finally, students are required to take a sequence of individual study courses with a faculty member in their chosen field of specialization to prepare for original dissertation research and to obtain a Ph.D. research sponsor. By the second quarter of the course sequence, students are expected to make a substantive oral presentation describing the results of a problem. All students must fulfill a breadth re-

quirement by passing one of three required courses.

Written and oral qualifying examinations are required. The scope of the written examination is defined by the graduate physics material in the core courses.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, the main purpose of which is to discuss and evaluate their proposed dissertation problem. At the discretion of the committee, questions may be asked in regard to other material in their field of specialization and related matters.

## Astronomy

### Lower Division Courses

**2A-2B. Introduction to the Physical Universe. (4-4)** Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. P/NP or letter grading. **2A.** Planets and Stars; **2B.** Galaxies and Cosmology. Enforced requisite: course 2A with a grade of C or better.

**3. Astronomy: Nature of the Universe. (4)** Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments. P/NP or letter grading.

**3H. Introductory Astronomy and Astrophysics. (4)** Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in Astrophysics or in physical and mathematical sciences. P/NP or letter grading.

**4. Universe of Stars and Stellar Systems. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Essentially nonmathematical course for general University students with previous introduction to astronomy; sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies. P/NP or letter grading.

**5. Life in the Universe. (4)** Lecture, four hours. Preparation: prior introduction to astronomy. Life on Earth and prospects for life elsewhere in the context of the evolution of the universe from the simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics. P/NP or letter grading.

**6. Cosmology: Our Changing Concepts of the Universe. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Exposition of our ideas about the structure and evolution of the universe and its contents. Special and general relativity; black holes, neutron stars, and other endpoints of stellar evolution. Expanding universe, cosmic microwave background radiation, dark matter. Big Bang and inflation. P/NP or letter grading.

**7. Astronomy and the Media. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced requisite: course 3. Designed to help nonmajors develop skills to continually learn about science through media. Detailed study of research currently in the media, including meteor impacts, greenhouse effect, NASA, cosmology, and extraterrestrial life. Investigation of forces that influence science reporting. P/NP or letter grading.

**8A-8B. Astronomy with Physics: Exploring the Universe. (5-5)** Lecture, three hours; discussion, one hour; laboratory, two hours. Course 8A is enforced requisite to 8B. Not open to students with credit for course 3 or Physics 10. Two-quarter integrated course in conceptual physics and astronomy to introduce broad range of topics in both fields, including visits to UCLA Planetarium and telescope, as well as optional field trips to dark sky sites. Laboratories offer both hands-on and computer experience. P/NP or letter grading.

**81. Astrophysics I: Stars and Nebulae. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomore and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gaseous nebulae. P/NP or letter grading.

**82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Recommended: course 81, Physics 1B and 1C (or 1BH and 1CH). Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and earliest moments of the universe. P/NP or letter grading.

**88A-88Z. Lower Division Seminars. (2 each)** Seminar, two hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**88A. Cosmic Evolution. (2)** Seminar, two hours. Limited to freshmen. Varied astronomical and physical processes of evolution; discussion of how, over billions of years, basic mechanisms of cosmic evolution have transformed universe from fiery origin at Big Bang into abode for intelligent life. P/NP or letter grading.

### Upper Division Courses

**115. Statistical Mechanics and Its Application to Astrophysics. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A, 33B, Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Particle distributions, partition functions, black body radiation, Saha equation, degeneracy. Applications to stellar atmospheres, stellar interiors, and the interstellar medium. P/NP or letter grading.

**117. Radiation and Fluids in Astrophysics. (4)** Lecture, three hours. Requisite: course 115. Designed for junior/senior Astrophysics and Physics majors. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the early universe. P/NP or letter grading.

**127. Stellar Atmospheres, Interiors, and Evolution. (4)** Lecture, three hours. Recommended requisites: courses 115, 117. Designed for senior Astrophysics and Physics majors. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through normally observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres. P/NP or letter grading.

**140. Stellar Systems and Cosmology. (4)** Lecture, three hours. Designed for senior Astrophysics and Physics majors. Properties of star clusters and galaxies, with particular emphasis on Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang. P/NP or letter grading.

**180. Astrophysics Laboratory. (4)** Lecture, two hours; laboratory, four hours. Designed for juniors/seniors in Astrophysics, Physics, or a related field. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images. P/NP or letter grading.

**199. Special Studies. (2 or 4)** Tutorial, to be arranged. Limited to senior Astrophysics and Physics majors (with an outstanding record). Special studies with an individual faculty member. P/NP or letter grading.

### Graduate Courses

**270. Fundamentals I: Fluids and Dynamics. (4)** Lecture, three hours. Dynamics of gaseous flows and collisionless, self-gravitating systems. Basic equations of fluid dynamics, with application to shocks, winds, and accretion. The Jeans, Kelvin/Helmholtz, and Rayleigh/Taylor instabilities. Basic equations of stellar dynamics and application to relaxation processes, including virialization, core collapse, and dynamical friction. Letter grading.

**271. Fundamentals II: Radiation. (4)** Lecture, three hours. Radiative transitions in molecules, atoms, and nuclei. Sources of continuous and line radiation. Transition probabilities for spontaneous and stimulated emission and for absorption. Source function and equation of radiative transfer, with applications. Curve of growth and abundance determinations. Scattering processes, polarized light, masers. Letter grading.

**272. Stellar Structure and Evolution. (4)** Lecture, three hours. Structure and evolution of stars, stellar energy sources and problems of nucleosynthesis, theory of variable stars, structure of the sun from helioseismology and neutrinos. Supernova processes. Binary systems. Letter grading.

**273. Stellar Photospheres. (4)** Lecture, three hours. Physics of stellar photospheres. Radiative transfer under stellar atmosphere conditions. Continuous and line spectra of stars. Chemical abundances in stars. Stellar winds and stars with extended atmospheres. Letter grading.

**274. Galaxies. (4)** Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar orbits and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei. Letter grading.

**275. Cosmology. (4)** Lecture, three hours. Requisite: course 274. Thermal and physical history of the universe. Interaction of matter and cosmic microwave background radiation. Study of inhomogeneities in the universe from inflationary epoch to the current large-scale structure. Letter grading.

**276. Instrumentation and Observational Techniques. (4)** Lecture, three hours. Telescopes, optical principles, cameras, and spectrographs. Optical detectors; photomultiplier tubes, CCDs. Infrared detectors and arrays. Radio detectors. X-ray and gamma-ray detectors. Interferometry and aperture synthesis. Data analysis techniques. Statistical methods. Letter grading.

**277A-277B. Astronomy Research Project. (6-6)** Tutorial, to be arranged. Designed for second-year graduate astronomy students. Two-term research project planned in conjunction with a faculty adviser on any suitable research topic in astronomy or astrophysics, culminating in a written report at end of second term. S/U (course 277A) or letter (course 277B) grading.

**278. Special Topics in Astronomy. (2 or 4)** Seminar, to be arranged. Informal course with lecture/seminar format, focusing on one of a set of specific topics in astronomy. S/U (2-unit course) or letter (4-unit course) grading.

**279. Seminar: Current Astronomical Research. (2)** Seminar, one hour. Astronomy and astrophysics colloquium with lectures on current research by local and visiting researchers. S/U grading.

**281. Quantum Mechanics for Astrophysics. (4)** Lecture, four hours. Designed for departmental graduate students. Quantum mechanical topics in areas of interest for astrophysics applications. Hydrogen atom, radiative transitions, complex atoms, molecular spectroscopy including electronic, vibrational, and rotational transition, nuclear reaction theory. Letter grading.

**M285. Origin and Evolution of Solar System. (4)** (Same as Earth and Space Sciences M285.) Lecture, four hours. Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

**296. Research Topics in Astronomy. (2)** Discussion, two hours. Advanced study and analysis of current topics in astronomy. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**M297. Research Tutorial: Astroparticle Physics. (2 or 4)** (Same as Physics M297.) Tutorial, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596A. Directed Individual Studies. (4 to 10)** Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

**596L. Advanced Study and Research at Lick Observatory. (4 to 12)** Tutorial, to be arranged. Designed for graduate students who require observational experience, as well as those working on observational problems for their thesis. May be repeated at discretion of department. S/U grading.

**599. Ph.D. Research and Writing. (10 to 12)** Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

## Physics

### Lower Division Courses

**1A. Physics for Scientists and Engineers: Mechanics. (5)** Lecture/demonstration, four hours; discussion, one hour. Recommended preparation: high school physics, one year of high school calculus or Mathematics 31A and 31B. Enforced prerequisite: Mathematics 31A. Enforced corequisite: Mathematics 31B. Recommended corequisite: Mathematics 32A. Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. P/NP or letter grading.

**1AH. Physics for Scientists and Engineers: Mechanics (Honors). (5)** Lecture, four hours; discussion, one hour. Enforced prerequisite: Mathematics 31A. Enforced corequisite: Mathematics 31B. Recommended corequisite: Mathematics 32A. Enriched preparation for upper division physics courses. Same material as course 1A but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

**1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields. (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisites: course 1A, Mathematics 31B. Enforced corequisite: Mathematics 32A. Recommended corequisite: Mathematics 32B. Damped and driven oscillators, mechanical and acoustic waves. Electrostatics: electric field and potential, capacitors, and dielectrics. Currents and DC circuits. Magnetic field. P/NP or letter grading.

**1BH. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields (Honors). (5)** Lecture, four hours; discussion, one hour. Enforced prerequisites: course 1AH or 1A, Mathematics 31B. Enforced corequisite: Mathematics 32A. Recommended corequisite: Mathematics 32B. Enriched preparation for upper division physics courses. Same material as course 1B but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

**1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity. (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisites: courses 1A, 1B, Mathematics 32A. Enforced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 33A. Ampere law, Faraday law, inductance, and LRC circuits. Maxwell equations in integral and differential form. Electromagnetic waves. Light, geometrical, and physical optics. Special relativity. P/NP or letter grading.

**1CH. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity (Honors). (5)** Lecture, four hours; discussion, one hour. Enforced prerequisites: courses 1AH or 1A, 1BH or 1B, Mathematics 32A. Enforced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 33A. Enriched preparation for upper division physics courses. Same material as course 1C but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

**1Q. Contemporary Physics. (2)** Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

**4AL. Physics Laboratory for Scientists and Engineers: Mechanics. (2)** Laboratory, three hours. Enforced prerequisite: course 1A or 1AH. Enforced corequisite: course 1B or 1BH. Experiments on measuring gravity, accelerated motion, kinetic and potential energy, impulse and momentum, damped and driven oscillators, resonance and vibrating strings. Computer data acquisition and analysis. Introduction to error analysis, including distributions and least-squares fitting procedures. Letter grading.

**4BL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism. (2)** Laboratory, three hours. Enforced prerequisite: course 1A or 1AH. Enforced corequisite: course 1B or 1BH. Experiments on electric forces, fields, and potentials. Magnetic fields. Linear and nonlinear devices. Resistors, capacitors, and inductors. Modern circuits. Geometrical and physical optics. Letter grading.

**6A. Physics for Life Sciences Majors: Statics and Dynamics. (4)** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisites: Mathematics 3A, 3B. Enforced corequisite: Mathematics 3C. Statics and dynamics of forces, energy, and momentum, with applications to biological and biochemical systems. Physics of states of matter (solids, liquids, and gases) and of surfaces and interfaces as they apply to biological organisms. P/NP or letter grading.

**6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics. (4)** (Not the same as course 6B prior to Winter Quarter 1999.) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisite: course 6A. Sound and electromagnetic waves, interference and diffraction, radioactivity, and hydrodynamics, with applications to biological and biochemical systems. P/NP or letter grading.

**6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport. (4)** (Not the same as course 6C prior to Spring Quarter 1999.) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisite: course 6B. Electrostatics in vacuum and in water. Electric current with applications to electrophysiology. Magnetism, especially NMR. Diffusion and heat flow, with applications to biological and biochemical systems. P/NP or letter grading.

**10. Physics. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 1A or 1AH or 6A. Special mathematical preparation beyond that necessary for admission to University in freshman standing not required. Topics include planetary motion, Newton laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, development of physical ideas placed in cultural and historical perspective. P/NP or letter grading.

**17. Light, Atomic Nature of Matter, and Special Relativity. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32A, 32B. Enforced corequisite: Mathematics 33A. Electromagnetic waves, geometrical and physical optics, photons, photoelectric effect, blackbody radiation. Atomic spectra, Bohr atom, wave-particle duality, kinetic theory of gases, solids, and liquids. Nature of space and time: special relativity. P/NP or letter grading.

**18L. Modern Physics Laboratory. (3)** Laboratory, six hours. Enforced prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4AL, 4BL, 17. Experiments on superconductivity, radioactivity, atomic clock; measurement of speed of light, fine structure constant, Boltzmann constant, Planck constant. Letter grading.

**88. Lower Division Seminar: Current Topics in Physics. (2)** Limited to freshmen/sophomores. Intensive exploration of a particular theme or topic based on current research. Consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**M88. Limits of Biological Design through Physical Principles. (4)** (Same as Molecular, Cell, and Developmental Biology M88H.) Seminar, three hours. Enforced prerequisites: courses 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or 6A, 6B, and 6C, Chemistry 20A, 20B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. P/NP or letter grading.

**91A-91B-91C. Physics Workshops for Scientists and Engineers. (1-1-1)** Discussion, four hours. Enforced corequisite for course 91A: course 1A; for 91B: course 1B; for 91C: course 1C. Workshops with focus on developing physical intuition and problem-solving skills in peer-group collaborative learning environment. Students must fulfill total of 30 hours to receive credit. P/NP grading.

**96A-96B-96C. Physics Workshops for Life Sciences Majors. (1-1-1)** Discussion, four hours. Enforced corequisite for course 96A: course 6A; for 96B: course 6B; for 96C: course 6C. Workshops with focus on developing physical intuition and problem-solving skills in peer-group collaborative learning environment. Students must fulfill total of 30 hours to receive credit. P/NP grading.

### Upper Division Courses

**105A. Analytic Mechanics. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A. Corequisite: Mathematics 33B. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear and nonlinear oscillations. P/NP or letter grading.

**105B. Analytic Mechanics. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A. Relativity with four vectors, noninertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation. P/NP or letter grading.

**108. Optical Physics. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory, Kirchhoff formulation of diffraction theory, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest. P/NP or letter grading.

**110A. Electricity and Magnetism. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 131, Mathematics 32B, 33A, 33B. Electrostatics and magnetostatics. P/NP or letter grading.

**110B. Electricity and Magnetism. (4)** Lecture, three hours; discussion, one hour. Prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A, Mathematics 32B, 33A, 33B. Faraday law and Maxwell equations. Propagation of electromagnetic radiation. Multipole radiation and radiation from an accelerated charge. Special theory of relativity. P/NP or letter grading.

**112. Thermodynamics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115B. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications. P/NP or letter grading.

**114. Mechanics of Wave Motion and Sound. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, Mathematics 32B, 33A, 33B. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics. P/NP or letter grading.

**115A. Quantum Mechanics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 33A, 33B. Corequisite: course 105B. Classical background. Basic ideas of quantum nature of light, wave-particle duality, Heisenberg uncertainty principle, Bohr atom, physical operators. Schrödinger equation. One-dimensional square well and harmonic oscillator problems. Boundary values. Classical correspondences. Letter grading.

**115B. Quantum Mechanics. (4)** Lecture, three hours; discussion, one hour. Enforced requisites: courses 115A, 131. Formal theory: commutator algebra, Hermitian operators, generalized uncertainty principle, Ehrenfest relations. Three-dimensional problems. Central potentials. Angular momentum. Hydrogen atom. Identical particles and Pauli exclusion principle. Electrons in an electromagnetic field. Letter grading.

**115C. Quantum Mechanics. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 115B. Matrix mechanics. Addition of angular momentum. Time-independent and time-dependent perturbation theory. Fermi Golden Rule. Applications. Scattering theory. Letter grading.

**116. Electronics. (4)** Lecture, three hours; laboratory, three hours. Alternating current circuits, transmission line circuits, transistor and IC circuits to generate, modify, and detect electrical signals, introduction to digital circuits, analysis of noise and methods to reduce its influence in electrical measurements.

**117. Electronics for Physics Measurement. (4)** Lecture, three hours; laboratory, two hours. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurements. Broad introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and study of methods of computer data acquisition and signal processing. P/NP or letter grading.

**M122. Introduction to Plasma Electronics. (4)** (Same as Electrical Engineering M185.) Lecture, three hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

**123. Atomic Structure. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Theory of atomic structure. Interaction of radiation with matter. P/NP or letter grading.

**124. Nuclear Physics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions. P/NP or letter grading.

**126. Elementary Particle Physics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators. P/NP or letter grading.

**131. Mathematical Methods of Physics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals. P/NP or letter grading.

**132. Mathematical Methods of Physics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms. P/NP or letter grading.

**140A. Introduction to Solid-State Physics. (4)** (Formerly numbered 140.) Lecture, three hours; discussion, one hour. Enforced requisite: course 115C. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands. Letter grading.

**140B. Properties of Solids. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 140A. Elementary discussion of properties of solids. Use of theory of electrons and the lattice to examine properties of semiconductors, metals, and superconductors, together with magnetic and dielectric properties of materials. Properties of noncrystalline solids. Letter grading.

**150. Physics of Charged-Particle and Laser Beams. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A, 110B, 115A, 115B. Physics of charged-particle and laser beams presented as a unified subject. Basic physics of charged-particle beams, covering relativistic particle motion in electromagnetic fields, transverse focusing, acceleration mechanisms, linear and circular accelerators, and advanced topics. Some fundamentals of laser physics, including gain and broadening mechanisms, linear light optics, laser resonators, and advanced topics and applications. P/NP or letter grading.

**160. Numerical Analysis Techniques and Particle Simulations. (4)** Lecture, three hours; computer terminals, six hours. Preparation: minimum knowledge of computer programming (FORTRAN). Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, 110A, 110B. Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems. P/NP or letter grading.

**180A. Nuclear Physics Laboratory. (4)** Laboratory, four hours. P/NP or letter grading.

**180B. Physical Optics and Spectroscopy Laboratory. (4)** Laboratory, four hours. P/NP or letter grading.

**180C. Solid-State Laboratory. (4)** Laboratory, four hours. P/NP or letter grading.

**180D. Acoustics Laboratory. (4)** Laboratory, four hours. P/NP or letter grading.

**180E. Plasma Physics Laboratory. (4)** Laboratory, four hours. P/NP or letter grading.

**180F. Elementary Particle Laboratory. (4)** Laboratory, four hours. P/NP or letter grading.

**C185. Foundations of Physics. (4)** (Formerly numbered 185.) Lecture, three hours. Historical development and philosophical sources of classical and modern physics. Concurrently scheduled with course C285. Letter grading.

**199. Special Studies in Physics. (2 to 4)** Tutorial, to be arranged. May be repeated, but no more than 12 units may be applied toward Physics B.S. degree requirements.

## Graduate Courses

**201Q. Modern Physics Research Areas. (2)** Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

**210A. Electromagnetic Theory. (4)** Boundary value problems in electrostatics and magnetostatics. Multipole expansions; dielectrics and macroscopic media. Maxwell equations and conservation laws. Wave guides and resonators; simple radiating systems.

**210B. Electromagnetic Theory. (4)** Electromagnetic potentials and Hertz vectors. Cylindrical waves. Spherical waves. Debye potentials. Multipole radiation. Classical relativistic electrodynamics. Radiation from moving charges.

**213A. Advanced Atomic Structure. (4)** Group representation theory. Angular momentum and coupling schemes. Interaction of radiation with matter.

**213B. Advanced Atomic Structure. (4)** N-j symbols, continuous groups, fractional parentage coefficients, n electron systems.

**213C. Molecular Structure. (4)** Application of group theory to vibrational and electronic states of molecules. Molecular orbital theory. Raman effect. Angular momentum and coupling in molecules.

**214A. Advanced Acoustics. (4)** Propagation of waves in elastic and fluid media. Reflection, refraction, diffraction, and scattering of waves in fluids. Attenuation mechanisms in fluids.

**214B. Advanced Acoustics. (4)** Propagation in non-homogeneous fluids and in moving fluids. Radiation pressure, acoustic streaming, and attenuation in large amplitude sound fields. Propagation of sound in liquid helium. Mechanisms resulting in attenuation for elastic waves in solids.

**215A. Statistical Physics. (4)** Thermodynamics and statistical mechanics with applications.

**215B. Nonequilibrium Statistical Mechanics. (4)** Probability theory, Markov processes, equations of change, BBGKY hierarchy and its consequences, Boltzmann equation, Chapman/Enskog method, transport coefficients, fluctuation/dissipation theorems, density matrix, H-theorems.

**215C. Quantum Statistical Mechanics and the Many Body Problem. (4)** Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.

**220. Classical Mechanics. (4)** Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

**221A-221B-221C. Quantum Mechanics. (4-4-4)** Lecture, three hours. **221A.** Fundamentals of quantum mechanics, operators and state vectors, equations of motion. **221B.** Requisite: course 221A. Rotations and other symmetry operations, perturbation theory. **221C.** Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.

**222A-222B-222C. Plasma Physics. (4-4-4)** Properties of a Coulomb gas with and without a magnetic field: equilibrium, oscillations, instabilities, fluctuations, collective phenomena, transport properties, and radiation. Description via single-particle orbit theory, magnetohydrodynamics, and kinetic equations of various types.

**223. Advanced Classical Mechanics. (4)** Requisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.

**224. Introduction to the Strong Interaction. (4)** Evidence concerning the strong interaction, particularly as exemplified in nucleon/nucleon and pion/nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion exchange potential, phase shift analysis.

**225A-225B. Advanced Nuclear Physics. (4-4)** Requisites: courses 221A, 221B. Normally preceded by course 224. Advanced course in structure of complex nuclei, nuclear models, scattering and reactions.

**226A-226B-226C. Elementary Particle Physics. (6-6-6)** Lecture, four hours. Requisites: courses 221A, 221B, 221C, 230A, 230B (230A, 230B may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking,  $SU(2) \times U(1)$  electroweak interactions of leptons, quarks,  $W$ s,  $Z^0$  and  $\gamma$ , quark theory of hadrons and quantum chromodynamics.

**226D. Beyond the Standard Model. (4)** Lecture, three hours. Requisites: courses 226A, 226B, 226C, 230A, 230B, 230C. Discussion of possible extensions of the current standard model of electroweak and strong interactions, including axions, technicolor, grand unified theories, supersymmetry, supergravity, and superstrings. S/U grading.

**230A-230B-230C. Relativistic Quantum Theory. (6-6-6)** Lecture, four hours. Requisites: courses 221A, 221B, 221C. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.

**231A. Methods of Mathematical Physics. (4)** Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

**231B. Methods of Mathematical Physics. (4)** Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.

**231C. Methods of Mathematical Physics. (4)** Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.

**232A-232B. Relativity. (4-4)** Special and general theories, with applications to elementary particles and astrophysics.

**232C. Special Topics in General Relativity. (4)** Lecture, four hours. S/U or letter grading.

**233. Introduction to High-Energy Astrophysics. (4)** Introductory lectures on modern high-energy astrophysics. High-energy radiation processes. Neutron stars. Pulsars. X-ray sources. Black holes. Supermassive rotators and quasars.

**235. Group Theory and Quantum Mechanics. (4)** Requisite: course 221A. Group representation theory and applications to quantum mechanics of atoms, molecules, and solids.

**M236. Geometry and Physics. (4)** (Same as Mathematics M217.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

**241A. Solid-State Physics. (4)** Requisites: courses 140, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties.

**241B. Solid-State Physics. (4)** Requisite: course 241A. Transport theory with applications, electron/electron interactions.

**241C. Solid-State Physics. (4)** Requisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.

**242A-242B. Advanced Solid-State Theory. (4-4)** Requisites: courses 241A, 241B, 241C (may be taken concurrently). Many body methods in solid-state physics.

**243A-243K. Special Topics in Solid-State Physics. (4 each)** Lecture, three hours. P/NP or letter grading. **243A.** Disordered Systems; **243B.** Magnetic Resonance; **243C.** Phase Transitions; **243D.** Magnetism; **243E.** Superconductivity; **243F.** Macromolecules; **243G.** Semiconductors; **243H.** Optical Interactions; **243I.** Nonlinear Optics; **243J.** Hopping Transport; **243K.** Low-Temperature Physics.

**250. Introduction to Acceleration of Charged Particles. (4)** Lecture, three hours. Requisites: courses 210A, 210B, 215A. Principles of charged-particle acceleration, including principles of synchrotrons and storage rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical accelerators, and free electron lasers.

**260. Seminar: Problems in Plasma Physics. (4)** Seminar, four hours. S/U or letter grading.

**261. Seminar: Special Problems in Theoretical Physics. (4)** Seminar, four hours. S/U or letter grading.

**262. Seminar: Physics of the Solid State. (2 to 4)** Seminar, three hours. S/U or letter grading.

**264. Seminar: Advanced Physical Acoustics. (4)** Seminar, four hours. S/U or letter grading.

**266. Seminar: Propagation of Waves in Fluids. (2 to 4)** Seminar, three hours. S/U or letter grading.

**268. Seminar: Spectroscopy. (2 to 4)** Seminar, three hours. S/U or letter grading.

**269A. Seminar: Nuclear Physics. (2 to 4)** Seminar, three hours. S/U or letter grading.

**269B. Seminar: Elementary Particle Physics. (2 to 4)** Seminar, three hours. S/U or letter grading.

**269C. Seminar: Accelerator Physics. (2 to 4)** Seminar, three hours. Physics principles governing design and performance analysis of particle accelerators, using existing accelerators as examples and emphasizing interplay among design goals, component performance, and operational experience. S/U grading.

**280E. Advanced Plasma Laboratory. (4)** Lecture, two hours; laboratory, four hours. Requisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

**C285. Foundations of Physics. (4)** Lecture, three hours. Historical development and philosophical sources of classical and modern physics. Concurrently scheduled with course C185.

**290. Research Tutorial: Plasma Physics. (2 or 4)** Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

**291. Research Tutorial: Elementary Particle Theory. (2 or 4)** Requisites: courses 226A, 230A, 230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

**292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4)** Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

**293. Research Tutorial: Current Topics in Physics. (2)** Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

**294. Research Tutorial: Accelerator Physics. (2 or 4)** Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

**295. Research Tutorial: Solid Earth Physics. (2 or 4)** Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

**296. Research Topics in Physics. (2)** Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**M297. Research Tutorial: Astroparticle Physics. (2 or 4)** (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

**298. Research Tutorial: Experimental Elementary Particle Physics. (2 or 4)** Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

**299. Research Tutorial: Nuclear Physics. (2 or 4)** Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

**M370A. Integrated Science Instruction Methods. (4)** (Formerly numbered 370.) (Same as Chemistry M370A and Earth and Space Sciences M370A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: one introductory lower division year (including laboratory) each of chemistry, life sciences, and physics and at least two Earth science courses, preferably one with field experience. Classroom management, lesson design, assessment, history of science education. S/U or letter grading.

**M370B. Integrated Science Instruction Methods. (4)** (Same as Chemistry M370B and Earth and Space Sciences M370B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisite: course M370A (or former course 370) or Chemistry M370A or Earth and Space Sciences M370A. Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Physics. (2)** Seminar/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

**596. Directed Individual Studies. (2 to 12)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (4)** Tutorial, to be arranged. May be repeated twice for credit. S/U grading.

**598. Master's Thesis Research and Writing. (4)** Tutorial, to be arranged. May be repeated twice for credit.

**599. Ph.D. Research and Writing. (8 or 12)** Tutorial, to be arranged. May be repeated for a maximum of 18 units. S/U grading.

## PHYSIOLOGICAL SCIENCE

*College of Letters and Science*

UCLA

Wayne W. Massey, Ph.D.  
Ben W. Miller, Ph.D.  
Norman P. Miller, Ed.D.

### Associate Professors

Alan Garfinkel, Ph.D.  
Barney A. Schlinger, Ph.D.

### Assistant Professors

Rachelle H. Crosbie, Ph.D.  
Patricia E. Phelps, Ph.D.  
Stephanie A. White, Ph.D.

### Adjunct Professor

Larry Faller, Ph.D.

### Adjunct Associate Professors

Nasser A. Farahbakhsh, Ph.D.  
Fernando Gómez-Pinilla, Ph.D.

### Adjunct Assistant Professor

William C. Whiting, Ph.D.

## Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including developmental neurobiology, gene regulation/neural development, cellular neurobiology, molecular neurobiology, neuromuscular physiology, neuroendocrine physiology, cardiac physiology, diet and degenerative disease, auditory and visual behavior, biomechanics of rehabilitative medicine, muscle cell biology, inflammatory cell biology, vascular biology, cardiac electrophysiology, neuromotor control, and social control of neuronal plasticity.

## Undergraduate Study

### Physiological Science B.S.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same

course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Physiological Science majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

#### The Major

*Required:* Physiological Science 107, 111A (or M180A), 111B, 111C, 111L, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Four units of course 190 or 199 may be applied toward the elective requirement. Courses 193, 195A, 195B, 196, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major. Additionally, a grade of C– or better in each of the core courses (Physiological Science 107, 111A or M180A, 111B, 111C) is required to enroll in the next course in the series.

## Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications

available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Physiological Science offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Physiological Science.

## Admission

M.S. degree applicants are expected to have completed a bachelor's degree in biological or physical sciences. Applicants generally are expected to have completed a year of coursework in each of the following: calculus, physics, biology, inorganic chemistry, and biochemistry. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required.

A departmental faculty committee consider applicants on the following: (1) prior scholastic performance, (2) letters of recommendation, (3) scores on the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT), and (4) the statement of purpose, which should include relevant background information concerning preparation for the degree and a description of the applicant's expectations, goals, and degree objective. Applicants also must include a description of their specific area of interest in physiology, their research interests, and the name of one or more departmental faculty whom they wish to consider as a potential research mentor.

Admission to the thesis plan is approved only if a departmental faculty member is identified who is willing to serve as the applicant's research mentor. Information concerning the faculty and their research interests is available at <http://www.physci.ucla.edu/> or on request from the department. Applicants are encouraged to communicate directly with the faculty, including through a personal interview.

Ph.D. applicants are expected to have completed the same admission requirements as outlined for the M.S. degree. In addition, Ph.D. applicants may be admitted to the program through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

## Master's Degree

The M.S. degree is offered through the thesis plan. Students must complete a master's thesis based on either original research in a specific area of physiology or on nonlaboratory research on a current question in modern physiology that is based on study of the primary research literature. The nonlaboratory thesis also requires an oral presentation.

Students are required to complete nine courses, six at the graduate level. Coursework includes a second-level statistics or research design course approved by the department, re-

quired courses in biological chemistry and physiological science, and electives.

## Doctoral Degree

A minimum of nine courses is required for the Ph.D. degree. Courses are selected by the student and the student's advisory committee and approved by the graduate affairs committee.

Students are required to complete two quarters as a teaching assistant.

Written and oral qualifying examinations are required. The written examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry, (2) cell biology or cellular neurophysiology, and (3) systems physiology or systems neuroscience.

Following successful completion of the written examination, students prepare a research proposal and take the University Oral Qualifying Examination.

## Physiological Science

### Lower Division Courses

**3. Introduction to Human Physiology. (4)** Lecture, three hours. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

**5. Issues in Human Physiology: Diet and Exercise. (4)** Lecture, three hours. Not open to Physiological Science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

**6. The Human Machine: Physiological Processes. (4)** Not open to Physiological Science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

**13. Introduction to Human Anatomy. (5)** Lecture, four hours; laboratory, three hours. Not open to Physiological Science majors. Structural survey of human body, including skeletomuscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

**90. Introduction to Physiological Science. (2)** Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

### Upper Division Courses

**C100. Experimental Statistics. (4)** Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course CM200. P/NP or letter grading.

**CM102. Human Anatomy for Biomedical Engineers. (4)** (Formerly numbered M102.) (Same as Biomedical Engineering CM102.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Concurrently scheduled with course CM204. Letter grading.

**CM103. Human Physiology for Biomedical Engineers. (4)** (Formerly numbered M103.) (Same as Biomedical Engineering CM103.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Concurrently scheduled with course CM203. Letter grading.

**107. Systems Anatomy. (5)** (Formerly numbered 27.) Lecture, four hours; laboratory, three hours; tutorial, two hours. Requisites: Life Sciences 2, Physics 1A or 6A. Students must receive a grade of C- or better to proceed to next course in series. Systems anatomy focused primarily on human anatomy. Topics include cardiorespiratory, reproductive, nervous, and skeletomuscular systems, with introduction to biomechanical principles. Letter grading.

**111A-111B-111C. Foundations in Physiological Science. (6-6-6)** Lecture, four hours; laboratory, two hours. Letter grading. **111A.** Requisites: course 107, Chemistry 14C or 30A, Life Sciences 1, 2, 3, 4, Physics 1B or 6C. Not open for credit to students with credit for course M180A. Students must receive a grade of C- or better to proceed to next course in series. Introduction to principles of neurophysiology: cellular and systems neuroscience, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. **111B.** Requisites: course 111A or M180A, Chemistry 14D or 30B. Students must receive a grade of C- or better to proceed to next course in series. Principles of muscular, cardiovascular, and pulmonary physiology. **111C.** Requisites: course 111A or M180A, Chemistry 153A. Students must receive a grade of C- or better to proceed to next course in series. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

**111L. Physiological Science Laboratory. (2)** Laboratory, four hours. Requisites: courses 111A, 111B, 111C (111C may be taken concurrently). Required of physiological science majors. Designed to illustrate physiological principles studied in courses 111A, 111B, 111C.

**C125. Comparative Endocrinology: Molecular to Behavioral. (4)** Lecture, two hours; discussion, two hours. Requisite: course 111C. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course CM225.

**126. Biological Clocks. (4)** Lecture, three hours; discussion, one hour. Requisite: course 111A or M180A. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within the organisms and are called circadian rhythms. Exploration of molecular, cellular, and system-level organization of these timing systems.

**133. Exercise Physiology. (5)** Lecture, three hours; laboratory, two hours. Requisite: course 111B. Physiological responses and adaptations to acute and chronic exercise. Letter grading.

**C135. Dynamical Systems Modeling of Physiological Processes. (5)** Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C235.

**136. Exercise and Cardiovascular Function. (5)** Lecture, four hours. Requisite: course 111B. Consideration of acute and chronic effects of exercise in diagnosis, prevention, and treatment of cardiovascular disorders.

**C137. Growth and Adaptation in Cardiovascular System. (4)** Requisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C237.

**138. Neuromuscular Physiology and Adaptation. (4)** Requisites: course 111B, Chemistry 153A. Cellular responses to acute and chronic exercise and environmental states of neuromuscular system.

**142. Sensorimotor Physiology. (5)** Lecture, three hours; laboratory, two hours. Requisite: course 111A or M180A. Neurophysiological principles governing control of limb movements, including regulation by spinal cord circuits, cerebellum, basal ganglia, and sensorimotor cortices.

**C143. Neuromotor Control of Posture and Movement. (5)** Lecture, four hours. Requisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C243.

**C144. Neural Control of Physiological Systems. (5)** Lecture, four hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244.

**CM145. Neural Mechanisms Controlling Movement. (5)** (Formerly numbered C145.) (Same as Neuroscience M145.) Lecture, four hours. Requisite: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C245. Letter grading.

**147. Neurobiology of Learning and Memory. (5)** Lecture, four hours; research demonstration, one hour. Requisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

**M148. Molecular and Cellular Physiology of Neurons. (4)** (Same as Neuroscience M148.) Lecture, three hours. Requisite: course 111A or M180A or Neuroscience M101A. Advanced treatment of selected topics in cellular neurophysiology. Letter grading.

**C150. Musculoskeletal Mechanics. (5)** (Formerly numbered 150.) Lecture, three hours. Requisite: course 111B. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biostatics, dynamics, and modeling. Concurrently scheduled with course C250B. Letter grading.

**151. Limb Dynamics. (5)** Lecture, three hours; laboratory, two hours. Requisite: course C150. Biomechanical analysis of human movement, with special emphasis on control of limb movement.

**C152. Musculoskeletal Anatomy, Physiology, and Biomechanics. (5)** Lecture, three hours. Requisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C252.

**153. Dissection Anatomy. (4)** Lecture, two hours; laboratory, six hours. Requisite: course 111B. Departmental application required. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.

**155. Development and Structure of Musculoskeletal System. (4)** Requisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Integration of knowledge of muscle and connective tissue structure and function on each of these levels to understand organization and physiological behavior of the intact system.

**M158. Cell Biology. (6)** (Same as Organismic Biology M158.) Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3, 4. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels. Letter grading.

**M166. Animal Physiology. (6)** (Same as Organismic Biology M166.) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, 153A, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for Organismic Biology 167 or 170 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

**167. Physiology of Nutrition. (4)** (Formerly numbered 197B.) Lecture, four hours. Limited to senior Physiological Science majors. Topics include physiological adaptation to starvation and physiological responses to oxidants/antioxidants, vitamins, minerals, photochemicals, and their relationship to common chronic diseases and physiology of fuel utilization during aerobic and anaerobic exercise. Letter grading.

**M168. Ideas and Experiments in History of Physiology. (4)** (Formerly numbered 197Z.) (Same as Neurobiology M168.) Lecture, three hours. Interaction of concepts and experimental techniques in physiology from the early 19th to latter 20th centuries, including heart and circulation, hormones, nutrition and vitamins, the brain, spinal cord, and peripheral nervous system, as well as development of physiology as scientific discipline. Discussion of weekly readings and presentations by students. Letter grading.

**M173. Anatomy and Physiology of Sense Organs. (4)** (Same as Organismic Biology M173.) Lecture, three hours; discussion, one hour. Requisites: courses 111A (or Molecular, Cell, and Developmental Biology 171) or M180A and M180B (or Molecular, Cell, and Developmental Biology M175A and M175B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

**M180A-M180B-M180C. Neuroscience: From Molecules to Mind. (5-5-5)** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading:

**M180A.** Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A or former course 10D or 30 (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

**M180B.** Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A) or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

**M180C.** Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisite: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A) or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

**M181. Biological Bases of Psychiatric Disorders. (4)** (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A) or Psychology 115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**190A. Honors Thesis. (4)** Requisites: courses 111A, 111B. Limited to physiological science honors program students. Directed independent research for departmental honors with a faculty member, involving definition of research topic and extensive reading and research in the field of proposed honors thesis. In Progress grading (credit to be given only on completion of course 190B).

**190B. Honors Thesis. (4)** Requisite: course 190A. Continued reading and research that culminate in final honors thesis. Only 4 units of course 190 or 199 may be applied toward elective requirements for the major.

**190C. Advanced Studies for Honors Thesis. (4)** Requisite: course 190B. Additional course to provide further research opportunities for departmental honors students.

**192. Intracellular Calcium Regulation. (4)** Lecture, one hour; discussion, two hours. Requisites: courses 111A, 111B, 111C. Lecture on and review of current literature covering broad issues of intracellular calcium metabolism, regulation, and transport.

**193. Field Studies in Physiological Science. (4)** Lecture, one hour; fieldwork, six to eight hours. Limited to seniors. Departmental application required. Supervised field studies in specific careers related to physiological science. May not be repeated for credit and may not be applied toward elective requirements for the major. P/NP grading.

**M194. Undergraduate Seminar: Current Topics in Biomedical Sciences. (2)** (Same as Molecular, Cell, and Developmental Biology M194 and Organismic Biology M194.) Seminar, two hours. Designed for juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**195A. Scientific Research and Ethics. (2)** Lecture, one hour; discussion, one hour. Corequisites: courses 190A and 190B or 199 or participant in Student Research Program. Instruction in principles of scientific method, writing, and ethics; critique of current journal articles and research projects. Students present individual research proposal with background literature. P/NP grading.

**195B. Advances in Biological Research. (2)** Lecture, one hour; discussion, one hour. Requisites or corequisites: courses 190A and 190B or 199. Critical discussion of current research literature in biological sciences, with emphasis on design, analysis, and reporting of scientific investigation. P/NP or letter grading.

**196. Laboratory Practicum in Systems Anatomy. (3)** (Formerly numbered 196A-196B.) Lecture, two hours; laboratory practicum, five hours. Requisite: course 107. Training and supervised practicum for advanced undergraduates in teaching courses related to human anatomy. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. May not be applied toward elective requirements and may not be repeated for credit. Departmental application required. P/NP or letter grading.

**197A-197Z. Variable Topics in Physiological Science. (4 each)** Limited to juniors/seniors. Variable topics courses which cover specific subjects of special interest. May be repeated for credit with topic change.

**199. Special Studies in Physiological Science. (2 or 4)** Tutorial, to be arranged. Requisites: courses 111A, 111B. Limited to Physiological Science majors with advanced junior standing and 3.0 grade-point average in major, or seniors. Directed independent research with a faculty member. Course application must be submitted to undergraduate affairs chair during first week of classes. Only 4 units of course 199 may be applied toward elective requirements for the major.

## Graduate Courses

**CM200. Experimental Statistics. (4)** (Same as Biostatistics M220.) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course C100. S/U or letter grading.

**M202. Cellular Neurophysiology. (4)** (Same as Neurobiology M200F and Neuroscience M202.) Lecture, three hours; discussion, two hours. Requisites: course 111A or M180A or Physics 6B, Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

**CM203. Human Physiology for Biomedical Engineers. (4)** (Same as Biomedical Engineering CM203.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Concurrently scheduled with course CM103. Letter grading.

**CM204. Human Anatomy for Biomedical Engineers. (4)** (Same as Biomedical Engineering CM202.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Concurrently scheduled with course CM102. Letter grading.

**M205. Behavioral and Systems Neuroscience. (4)** (Same as Neuroscience M205 and Psychology M205Z.) Lecture, three hours. Requisites: Neuroscience M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**M210. Molecular and Cellular Mechanisms of Neural Integration. (5)** (Same as Neuroscience M230 and Physiology M210.) Lecture, four hours; discussion, one hour. Requisite: Neuroscience M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**211. Exercise Cardiovascular Physiology. (4)** Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training.

**M212. Introduction to Cellular Physiology and Biophysics. (6)** (Same as Molecular, Cell, and Developmental Biology M237 and Physiology M212.) Lecture, five hours. Requisite: course 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**M213. Principles of Integrative Physiology. (6)** (Same as Physiology M213.) Lecture, four hours; discussion, two hours. Designed for graduate students. Open to juniors/seniors with consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

**215. Molecular and Cellular Foundations of Physiology. (5)** Lecture, three hours; discussion, two hours. Application of molecular and cellular approaches to systems level questions. Basic foundation for study of major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

**CM225. Comparative Endocrinology: Molecular to Behavioral. (4)** (Same as Physiology M225.) Lecture, two hours; discussion, two hours. Designed for graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course C125.

**M227. Cellular, Molecular, and Functional Aspects of Reproductive System. (4)** (Same as Neurobiology M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

**C235. Dynamical Systems Modeling of Physiological Processes. (5)** Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C135.

**C237. Growth and Adaptation in Cardiovascular System. (4)** Requisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C137.

**M240. Neural Systems for Motor Control. (4)** (Same as Neuroscience M262.) Requisite: course C143. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

**241. Substrates for Neural Repair. (4)** Lecture, four hours. Requisite: Neuroscience M201 or M203 or M204. Progress in basic and clinical neuroscience provides new insight to understand mechanisms of cell repair and strategies to promote neural healing. Focus on physiological, molecular, and anatomical basis governing repair processes in brain and spinal cord and their clinical implications. Letter grading.

**C243. Neuromotor Control of Posture and Movement. (5)** Lecture, four hours. Requisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C143.

**C244. Neural Control of Physiological Systems. (5)** Lecture, four hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

**C245. Neural Mechanisms Controlling Movement. (5)** Lecture, four hours. Requisite: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course CM145. Letter grading.

**M247. Neural Control of Cardiopulmonary Function. (4)** (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Requisites: courses 111A, 111B or 133 or 142 or M180A, M180B. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanism underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

**250A. Muscle Dynamics. (4)** Lecture, four hours. Requisite: course 151. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques. Letter grading.

**C250B. Musculoskeletal Mechanics. (5)** (Formerly numbered 250B.) Lecture, three hours. Requisites: course 107, Physics 6A. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biostatistics, biodynamics, and modeling. Concurrently scheduled with course C150. Letter grading.

For Scott Chandler, 21 years teaching physiological science has been a continuous metamorphosis. “Because one ingredient to becoming an excellent teacher,” he explains, “is realizing that I am still a student constantly learning how to stimulate, motivate, and communicate with my students.”

A cellular neurophysiologist, Chandler studies the neuronal mechanisms controlling jaw movements that occur during feeding, drinking, and swallowing. While most people never even think about what’s behind such bodily behaviors, Chandler is passionate in his endeavor to unlock the underlying mechanisms controlling jaw movements and considers them essential to meaningful human existence. Progress in this area will ultimately lead to an understanding of the organizing principles utilized by the central nervous system with respect to motor production and will determine potential therapeutic interventions for the correction of abnormal jaw movements that occur as a result of injury or disease.

**C252. Musculoskeletal Anatomy, Physiology, and Biomechanics. (5)** Lecture, three hours. Requisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C152.

**M255. Seminar: Neural and Behavioral Endocrinology. (2)** (Same as Neurobiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

**M260. Neuromuscular Factors in Movement Regulation. (4)** (Same as Neuroscience M260.) Requisite: course 138. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

But Chandler measures success not just in the laboratory, where he works to uncover neuronal secrets, but also in the classroom where he challenges students to think critically, evaluate complex issues, and formulate logical conclusions. “This is invigorating! If I can instill the joy and importance of learning through my passion for teaching, I feel my efforts have been rewarded. I thoroughly love interacting with students, and find that I am continuously learning from them as well.”

“Most students who major in neuroscience or physiological science are interested in the health profession and medical school,” he notes. “However, there are lots of opportunities in industry as well, especially with the advent of new techniques in molecular neuroscience that will someday lead to an understanding of the basis and cure for many disease processes.” Until then, Chandler continues in his work inspiring students with a desire to learn, to obtain a thirst for knowledge, and to realize that ultimately their quest for knowledge is motivated from within.

**M263. Neuronal Mechanisms Controlling Rhythmic Movements. (4)** (Same as Neuroscience M263.) Requisite: course CM145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

**270A-270B-270C. Modern Concepts in Physiology. (4-4-4)** Lecture, two hours; discussion, two hours. Study and evaluation of primary research literature. Study of foundations of modern techniques in physiology research, analysis of research design. Letter grading. **270A.** Requisite or corequisite: course 111A. Foundation for experimental study of organization and function of nervous system and cellular basis of neural action. **270B.** Requisite or corequisite: course 111B. Foundation for experimental study of musculoskeletal, cardiovascular, and respiratory systems. **270C.** Requisite or corequisite: course 111C. Foundation for experimental study of general issues and mechanisms in neuroendocrine physiology.

**Scott Chandler,  
Physiological Science  
Department**

*This is invigorating! If I can instill the joy and importance of learning through my passion for teaching, I feel my efforts have been rewarded. I thoroughly love interacting with students, and find that I am continuously learning from them as well*

---

**M272. Neuroimaging and Brain Mapping. (4)** (Same as Neuroscience CM272 and Psychology M213.) Lecture, three hours. Requisites: course M202, Neuroscience M201. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging. Letter grading.

**M290. Seminar: Comparative Physiology. (2)** (Same as Organismic Biology M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

**291A-291B-291C. Seminars: Cardiovascular Function and Adaptation. (2 to 4 each)** Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar.

**292. Evolution and Development of Auditory System. (2 or 4)** Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal pathways. Emphasis on primary literature sources as well as current methodological approaches. Two-hour seminar presentation required for 2 units; seminar paper and two-hour seminar presentation required for 4 units. S/U or letter grading.

**293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation. (2 to 4 each)** Requisites: courses 138, M260. Selected topics on muscular determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

**M295A-M295B-M295C. Seminars: Cellular Neuroscience. (2 to 4 each)** (Same as Neuroscience M266A-M266B-M266C.) Seminar, two to four hours. Requisite: course M202. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar. S/U or letter grading.

**296. Research Seminar: Physiological Science. (2)** Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

**297. Seminar: Muscle Cell Biology. (2 to 4)** (Formerly numbered 297A-297B-297C.) Seminar, two hours. Selected topics in muscle cell biology. Students required to present two-hour seminar. May be repeated for credit.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. In-Service Practicum for Teaching Assistants in Physiological Science. (2)** Seminar, to be arranged. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Individual Studies for Graduate Students. (2 to 8)** Tutorial, to be arranged. To enroll for letter grade, petition signed by faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to end of second week of class. Eight units may be applied toward degree requirements for M.S. or Ph.D. degree, provided that students enroll in two different 4-unit 596 courses in different laboratories under supervision of different mentors. Term paper required for letter grading. S/U or letter grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 16)** Tutorial, to be arranged with faculty member serving as student's comprehensive examination chair or Ph.D. committee chair. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 16)** Tutorial, to be arranged with faculty member serving as student's thesis committee chair. May not be applied toward M.S. course requirements. May be repeated as necessary. S/U grading.

**599. Research for and/or Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

### Adjunct Professors

Christopher B. Cooper, M.D.  
Arthur Peskoff, Ph.D.  
Douglas Rees, Ph.D.  
Kenneth P. Roos, Ph.D.

### Adjunct Assistant Professor

Bernard Ribalet, Ph.D.

## Scope and Objectives

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Physiology offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Physiology.

## Admission

The department does not admit candidates for the M.S. degree; however, the degree may be awarded as a terminal degree in special cases.

Applicants to the Ph.D. program may apply directly to the department or through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences (172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-

1570, 310-206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@med-net.ucla.edu](mailto:uclaaccess@med-net.ucla.edu), a standard first-year biomedical curriculum that allows entry into the department in the second year.

Ph.D. applicants must meet the general admission requirements of the Graduate Division and hold a bachelor's degree in a biological or physical science or in the premedical curriculum. In general, applicants should have completed coursework in mathematics through calculus and differential equations, college physics, chemistry (including organic chemistry and biochemistry), and biology. Courses in cell biology and molecular biology are highly recommended.

In certain cases, at the discretion of the department, if applicants lack preparation in one of the courses mentioned above but have a strong background in areas pertinent to physiology, they may be admitted to graduate status provided that deficiencies are made up. It is recommended that the deficiencies be corrected prior to matriculation.

Applicants must submit (1) transcripts of grades for all college-level work; (2) the results of the Graduate Record Examination (GRE); the GRE Subject Test in Biology or in the applicant's undergraduate major is optional. For those applying to a combined M.D./Ph.D. program who are currently in medical school, or for those who hold the M.D. degree, MCAT scores may be accepted in lieu of the GRE; (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research; and (4) an essay describing academic background, research experience, motivation for research, and career goals.

Selected applicants are asked to have an interview with members of the graduate admissions committee or a designated interviewer. Final decisions on admission to the graduate program reside with the graduate admissions committee which examines the recommendations for academic excellence, promise in scientific career goals consistent with the scientific expertise of the faculty, and the existence of financial support for the applicant during the first and subsequent years of training.

An application packet is available by writing to the Graduate Student Office, Department of Physiology, UCLA School of Medicine, Box 951751, Los Angeles, CA 90095-1751. Applicants may apply online at <http://www.gd-net.ucla.edu>. Applications should be submitted by December 15.

## Master's Degree

The M.S. degree is offered through the comprehensive examination and thesis plans and is offered only to students who wish to receive a terminal master's degree and leave the doctoral program. Nine courses are required, five of which must be graduate courses.

## Doctoral Degree

The major fields in which graduate students may pursue research include (1) molecular physiology and biophysics, (2) cellular physiology, and (3) integrative physiology. The subdisciplines of these areas include membrane biophysics, membrane transport, cellular signal transduction, channel and transporter structure and function, muscle physiology, fundamental neurophysiology, neuromuscular physiology, and cardiovascular, gastrointestinal, respiratory, and reproductive physiology.

During the first two Ph.D. years there are four required courses and 12 required units in techniques or special topics courses and/or seminars or comparable courses in cell biology, neuroscience, molecular biology, chemistry, or biology as governed by research interest. Three laboratory rotations are required during the first year. A course in scientific ethics is required. Many of the course requirements are fulfilled as part of the first-year UCLA ACCESS curriculum. Students with advanced standing who enter the department directly may be exempt from some of the course requirements.

Students are required to serve as a teaching assistant for two quarters.

Written and oral qualifying examinations are required. The purpose of the written qualifying examination is to assess ability to read and critically evaluate research papers in the chosen division of physiology.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which is based on a written proposal prepared in the form of a mini-research grant application. Following completion of the examinations, there is a midstream oral presentation in which progress on the research project is reviewed by the dissertation committee.

## Physiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Physiology. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in physiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**100. Elements of Human Physiology. (6)** Designed for first-year dental students. Major organic body functions. With special supplementation, a suitable introduction to the field for graduate students for whom the 201A, 201B course sequence is too extensive.

**199. Special Studies. (1 to 8)** Tutorial, to be arranged. Special studies in physiology, including either reading assignments or laboratory work or both, designed for proper training of students.

## Graduate Courses

**201A-201B. Organ System Physiology. (6-6)** Lecture, six hours; laboratory, three and one-half hours. Designed for medical and qualified graduate program students. Recommended corequisites: courses M203A, M203B. Runs throughout School of Medicine's second semester. Lectures, laboratories, and conferences. Properties of biological membranes. Contractility of muscle. Epithelial transport. Cardiovascular, renal, respiratory, and gastrointestinal systems. Fluid and electrolyte balance. To receive credit, both courses must be taken together in same academic year. In Progress grading.

**M203A-M203B. Neuroscience. (4-4)** (Same as Neurobiology M203A-M203B.) Lecture, four hours. Designed for medical and qualified graduate program students. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system, with emphasis on their applications in the medical sciences. To receive credit, both courses must be taken together in same academic year. In Progress and letter grading.

**M204. Cellular and Molecular Developmental Neurobiology. (4)** (Same as Neurobiology M204, Neuroscience M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A and 201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**M209A. Molecular, Cellular, and Developmental Neurobiology. (6)** (Same as Molecular, Cell, and Developmental Biology CM220 and Neurobiology M200B.) Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

**M210. Molecular and Cellular Mechanisms of Neural Integration. (5)** (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour. Requisite: course M209A or Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**M212. Introduction to Cellular Physiology and Biophysics. (6)** (Same as Molecular, Cell, and Developmental Biology M237 and Physiological Science M212.) Lecture, five hours. Requisite: course M209A or Physiological Science 111A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**M213. Principles of Integrative Physiology. (6)** (Same as Physiological Science M213.) Lecture, four hours; discussion, two hours. Designed for graduate students. Open to juniors/seniors with consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

**220. Methods in Cell Physiology. (6)** Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

**221. Cell Physiology: Excitability. (6)** Requisite: course 220. In-depth coverage of general properties of excitable cells, linear cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

**M223. Membrane Molecular Biology. (4)** (Same as Biological Chemistry M223.) Lecture, two hours; discussion, two hours. Requisite: Biological Chemistry CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

**M225. Comparative Endocrinology: Molecular to Behavioral. (4)** (Same as Physiological Science CM225.) Lecture, two hours; discussion, two hours. Designed for graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis.

**298. Current Topics in Physiology. (2 to 4)** Lecture, one hour; discussion, one hour. Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. May be repeated for credit. S/U or letter grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged.

**598. Thesis Research for M.S. Candidates. (2 to 12)** Tutorial, to be arranged.

**599. Dissertation Research for Ph.D. Candidates. (2 to 12)** Tutorial, to be arranged.

Any B. Zegart, Ph.D.

### Visiting Professor

Michael S. Dukakis, J.D.

## Scope and Objectives

The Department of Policy Studies is an interdisciplinary unit composed of faculty members from around the campus, as well as faculty unique to the department. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include social insurance and welfare programs, unemployment and training, drug policy and crime, economic development, environmental quality, education, and health care. The department plays a major role in two schoolwide programs: the Master of Public Policy (M.P.P.) degree and the undergraduate minor in Public Policy.

The M.P.P. degree program is designed to train professionals in both public- and private-sector policy analysis and implementation and provides coursework in such areas as microeconomics, statistics, and political processes.

The undergraduate minor in Public Policy familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For further information on the minor, see Public Policy and Social Research Schoolwide Programs later in this section of the catalog.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Department of Policy Studies offers the Master of Public Policy (M.P.P.) degree.

## Admission

### Master of Public Policy

Applicants to the M.P.P. program are evaluated on their overall record. The final decision is based on a subjective assessment of the applicant's potential to meet the scholarship requirements of the program and to succeed as a policy professional.

A grade-point average of 3.0 or better in the junior and senior years is required, and preference is given to applicants with a 3.5 or above. Additional consideration is given to the strength of the applicant's undergraduate program and its standards. The quantitative nature of the core curriculum requires that attention be given to quantitative and analytical abilities. An elementary statistics course is strongly recommended.

Scores on the Graduate Record Examination (GRE) General Test are used in combination with the grade-point average to help predict academic performance in the M.P.P. program. Scores above 650 in each area are usually essential for admission to the program, although possible reasons for lower scores are considered. Especially high GRE scores may help alleviate concerns about a troublesome academic record, but a high GRE score alone is insufficient reason for admission.

A score of at least 600 (paper and pencil test) or 250 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language Testing System (IELTS) examination is required for applicants whose native language is not English.

The statement of purpose is evaluated to determine the applicant's genuine academic interest in and commitment to a career in public policy, as well as the applicant's general ability to write coherent and convincing prose. The statement can also help determine the match between the applicant's interests and the school's offerings and to assess written communication skills.

Applicants with at least two years of work experience in policy-making or implementation are preferred. Internships and volunteer work in a policy setting are also viewed positively.

Three letters of recommendation are required from supervisors in policy-related work or instructors in undergraduate courses. Recommendations should be from individuals who know the applicant well and who can comment specifically on the potential for a career as a policy professional rather than someone of high status in a firm or school who has minimal knowledge of the applicant.

Applications and program information can be obtained on written request to the School of Public Policy and Social Research.

### Policy Studies M.P.P./Law J.D.

The Department of Policy Studies and the School of Law offer a concurrent degree pro-

gram whereby students may pursue the M.P.P. and the J.D. at the same time. Applicants are required to satisfy the regular admission requirements for both programs. During the first year students follow the required law curriculum, taking 33 units. The second year is spent in the M.P.P. program taking 36 units toward the M.P.P. degree. During the third and fourth years students take the remaining 24 units of the M.P.P. curriculum and 40 units of law courses to complete the J.D. degree. Applicants interested in the concurrent program should contact the School of Law and the graduate adviser in the Policy Studies Department.

## Master's Degree

There are several areas of study. In the second year students select either two two-course concentrations or one four-course concentration from the following: drug and crime policy, education and human capital, employment and labor policy, environmental and natural resources policy, health policy, international policy and economics development, regional development policy, social welfare policy, transportation policy, and urban poverty.

Students also have the option, with their faculty adviser's approval, of designing their own concentrations from other courses offered in the School of Public Policy and Social Research or in other UCLA schools or departments.

The M.P.P. degree is offered through the comprehensive examination plan. The examination is in the format of an applied policy project completed during the three-quarter policy seminar. A total of 72 units of coursework is required, including nine core courses, four concentration courses, two electives, and a three-quarter seminar in applied policy analysis.

Students pursuing the concurrent degree program with the School of Law complete the nine core courses, concentration courses, and the three-quarter seminar in applied policy analysis for total of 60 units. The remaining 12 units of course requirements are fulfilled through law courses taken for the J.D. program.

A required field internship consists of approximately 400 hours of work for an agency, firm, or organization that is on an approved list of fieldwork placements.

## Policy Studies

### Lower Division Courses

**10A. Introduction to Public Policy. (4)** Lecture, three hours; outside study, nine hours. Overview of principal topics of contemporary policy analysis, developing their applications with examples from instructor's own research, visitors, small student projects, or field trips.

**10B. California Policy Issues. (4)** Lecture, three hours; outside study, nine hours. Enforced requisite: course 10A. Application of policy analysis to California issues. Guest lectures from practitioners and academics along with readings and videos. Student written reports and oral presentations required. Letter grading.

### Upper Division Courses

**C101. Drug Abuse Control Policy. (4)** (Formerly numbered 101.) Lecture, three hours; outside study, nine hours. Introduction to and development of main ideas and themes that enter into analysis and execution of policies directed at control of substance abuse and its side effects; illustration and instantiation of main techniques and concepts of policy and management analysis. Concurrently scheduled with course C235. Letter grading.

**102. Rational Policies, Irrational People. (4)** Lecture, three hours; outside study, nine hours. Development of some central concepts of rational-choice model and examination of theories and evidence about systematic ways in which actual behavior deviates from that model. Exploration of various reasons groups of rationally self-seeking individuals might fail to act as rationally self-seeking groups and discussion of policy implications of individual and collective departures from rational action. Letter grading.

**103. Ethics, Morality, and Public Life: Contemporary Controversies. (4)** Lecture, four hours; outside study, eight hours. Study of ethical and moral questions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills. Letter grading.

**104. Culture and Political Structure of Los Angeles. (4)** Lecture, three hours; outside study, nine hours. Exploration of two pieces of the puzzle in modern urban life: the different communities that live here (and in most other major cities) and political structure that binds us all together. Who are the communities living here? How do they organize themselves and develop leaders? How does integration into mainstream take place? What is "mainstream" today? How does political structure help or impede the notion of a united city? Letter grading.

**CM110. Information Superhighway. (4)** (Same as Communication Studies M155.) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services. Concurrently scheduled with course C270. Letter grading.

**M111. Culture, Identity, and Media. (4)** (Same as Communication Studies M157.) Discussion, three hours. Interplay of national culture and identity with electronic media, both "old" and "new." Examination of how national mythologies, constructive or pernicious, are reinforced through the media in several countries: U.K., France, Germany, Canada; analysis of how media manipulation, especially of radio and television, increasingly paves the way to war: Bosnia, Rwanda, Somalia. Letter grading.

**C112. Controversies in Education Policy. (4)** Lecture, three hours; outside study, nine hours. Focus on several controversial topics in contemporary education. Topics vary each year and include multiculturalism, affirmative action, "test score gap," bilingual education, and school choice. Introduction to major arguments for and against several important education policies and to encourage students to critically evaluate logic and evidence behind these policies. Concurrently scheduled with course C225. Letter grading.

**C115. Environmental and Resource Economics and Policy. (4)** Lecture, three hours. Requisites: Economics 11, 143. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Concurrently scheduled with course CM250. Letter grading.

**M116. Nuclear Weapons: Critical Decisions. (4)** (Same as Environment M165 and Honors Collegium M119.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

**C117. Crisis Decision Making in U.S. Foreign Policy. (4)** Lecture, three hours; outside study, nine hours. Recommended requisites: Political Science 120, 137A, 137B. In-depth look at theory and practice of U.S. foreign policy-making. Assessment of competing theories of international relations and application to specific case studies. Weekly role plays of foreign policymakers and final crisis simulation exercise. Concurrently scheduled with course C272. Letter grading.

**C119. Crime Control Policy. (4)** Lecture, three hours; outside study, nine hours. Design, implementation, and evaluation of policies to control crime. Operations of major institutions within criminal justice system. Theories of crime causation and prevention and their relationship to impacts of alternative policies. Concurrently scheduled with course C219. Letter grading.

**M120. Race, Inequality, and Public Policy. (4)** (Formerly numbered 120.) (Same as Afro-American Studies M120.) Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America. Letter grading.

**141. Employment and Labor Policy: Survey. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to current public policy issues in employment, labor relations, and labor markets. Historical context for current employment and labor policies in the U.S. Pro and con philosophical analysis of reasons for government regulation. Analysis of current data on labor unions, the workplace, and labor-market trends. Workforce diversity, education and training, social welfare policy, and global issues (immigration, trade, and global economy as it affects the workforce). Future trends and issues on policy horizon. Letter grading.

**C142. Labor Markets and Public Policy. (4)** (Formerly numbered 142.) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. Concurrently scheduled with course CM230. Letter grading.

**C144. Comparative Industrial Relations. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 10A. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course CM231. Letter grading.

**145. Labor Policies in the U.S.: Historical Perspective. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 10A. Insight into evolution of labor policies in the U.S. from 19th century to the present. Exploration of important policy areas such as child labor, labor standards, protective legislation for women workers, industrial relations, civil rights, occupational safety and health, and international labor standards in (1) historical context (economic, political, and social factors that shaped the debate), (2) motivation and action of major players (business, labor, government), and (3) changing patterns of government involvement in public policy. Letter grading.

**148. Business and Public Policy. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to key issues arising at interface between business and government policy. Discussion of why government focuses so intensively on regulating economic outcomes, nature of business/government relationship, business political activity, and major government policies. Topics include economic regulation (industrial policy, antitrust, technology policy); social regulation of business (energy, environment, risk, liability, corporate governance); and corporate social responsibility, business ethics, and green business. Discussion of topics in their historical and political context, with comparison between economic regulation in the U.S. and other countries. Letter grading.

**190. Special Topics in Public Policy. (4)** Discussion, three hours. Examination of particular subfields of policy studies (e.g., international policy, crime policy, policy history) in depth, with specific topics to be identified by instructor. Must be taken for credit if applied toward Public Policy minor. May be repeated for credit with topic change. P/NP or letter grading.

**197. Research Seminar: Policy Studies. (4)** Seminar, three hours; outside study, nine hours. Prerequisites: courses 10A, 10B. Required of students in Public Policy minor. Production of research paper that examines in depth a particular policy issue in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition and analysis, conceptualization, and written analysis and presentation. Letter grading.

**199. Special Studies in Policy Studies. (2 or 4)**

Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to juniors/seniors. Intensive directed research in policy studies. P/NP or letter grading.

## Graduate Courses

**201. Principles of Microeconomic Theory I. (4)** Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 204) to prepare students for economic analysis of public policy, with review of economic principles and basic microeconomic theory and policy applications. Consumer theory and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

**202. American Political Institutions and Processes. (4)** Lecture, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environment of policy and administration. Discussion of U.S. constitutional arrangements, followed by instrumental and integrative examination of primary institutions of politics and governance from organized interests to legislatures, bureaucracies, and courts. Letter grading.

**203. Statistical Methods of Policy Analysis I. (4)** Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 208). Review of statistical principles useful to policy research and analysis. Topics include descriptive statistics, expectations, univariate distribution, probability, covariance and correlations, statistical independence, random sampling, estimators, unbiasedness and efficiency, statistical inference, confidence intervals, and hypothesis testing. Letter grading.

**204. Principles of Microeconomic Theory II. (4)** Lecture, three hours; outside study, nine hours. Prerequisite: course 201. Second course in two-term sequence (see course 201) covering both theory and policy applications. Topics include monopoly, factor markets, general equilibrium, welfare economics, externalities, public goods, uncertainty, and intertemporal optimization. Letter grading.

**205. Bureaucracy and Public Management. (4)** Lecture, three hours; outside study, nine hours. Problems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organization environment in which policy analysts work; tools for understanding role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies. Letter grading.

**206. Political Economy of Policy Adoption and Implementation. (4)** Lecture, three hours; outside study, nine hours. Analysis of how policy is formed, adopted, and implemented. How policies are formulated, by whom, how policy agendas are set, how to define relationships between politicians, bureaucrats, lobbyists, and media experts. Letter grading.

**207. International Political Economy. (4)** Lecture, three hours; outside study, nine hours. Examination of political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and business/government relations. Analysis of domestic policy options nations are pursuing in response to economic globalization, such as protectionism, mercantilism, and deregulation. Introduction to international coalitions being formed, including NAFTA, and to nongovernmental organizations created to deal with special problems such as global environmental crisis. Letter grading.

**208. Statistical Methods of Policy Analysis II. (4)** Lecture, three hours; outside study, nine hours. Prerequisite: course 203. Second core course in statistics and quantitative methods for M.P.P. degree. Quantitative studies of public policy, covering regression analysis and its application to public policy questions. Letter grading.

**209. Management in the 21st Century. (4)** Lecture, three hours; outside study, nine hours. Overview of moral philosophy, political theory, and public-sector ethics using readings from classical and contemporary literature and case studies. Consideration of various ways in which terms such as "democracy" and "liberty" are used in public discourse. Practice in developing and defending moral arguments, both orally and in writing. Letter grading.

**M210. Foundations of Social Welfare Policy. (4)** (Same as Social Welfare M221A and Urban Planning M241.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

**M211. Aging Policy, Elderly and Families. (4)** (Same as Social Welfare M290P.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. Letter grading.

**M212. Child Welfare Policy. (4)** (Same as Social Welfare M290J.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

**M213. Mental Health Policy. (4)** (Same as Social Welfare M290K.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

**M214. Poverty, the Poor, and Welfare Reform. (4)** (Same as Social Welfare M290L and Urban Planning M246.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

**M215. Health Policy. (4)** (Same as Social Welfare M290M.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

**M216. Public Policy for Children and Youth. (4)** (Same as Social Welfare M290N.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

**217. Methods of Evaluating Social Programs. (4)** Lecture, three hours; outside study, nine hours. Prerequisites: courses 203, 208. Examination of design of and statistical methods for evaluating impacts of social programs. Introduction to use of experimental and nonexperimental designs and to various methods for estimating impacts of social programs. Discussion of designs for process analyses. Letter grading.

**218. Research Design and Methods for Social Policy. (4)** Lecture, three hours; outside study, nine hours. Limited to graduate students. How to become more sophisticated consumers and producers of qualitative and quantitative policy research. In first half of course, formal principles of research design; in second half, various data collection methods, including ethnography, interviewing, and survey design. Letter grading.

**C219. Crime Control Policy. (4)** Lecture, three hours; outside study, nine hours. Design, implementation, and evaluation of policies to control crime. Operations of major institutions within criminal justice system. Theories of crime causation and prevention and their relationship to impacts of alternative policies. Concurrently scheduled with course C119. Letter grading.

**M220. Transportation, Land Use, and Urban Form. (4)** (Same as Urban Planning M254.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form. Letter grading.

**M221. Travel Behavior Analysis. (4)** (Same as Urban Planning M256.) Lecture, three hours. Prerequisites: courses 201 and 203, or Urban Planning 207 and 220B. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

**M222. Transportation Economics, Finance, and Policy. (4)** (Same as Urban Planning M257.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services. Letter grading.

**M223. Transportation and Environmental Issues. (4)** (Same as Urban Planning M258.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate. Letter grading.

**M224A. Introduction to Geographic Information Systems. (4)** (Same as Urban Planning M206A.) Lecture, three hours; laboratory, one hour. Preparation: one graduate-level statistics course, familiarity with one of the packaged statistics programs. Principles of Geographic Information Systems (GIS) and applied techniques of using spatial data for mapping and analysis. Topics include data quality, data manipulation, spatial analysis, and information systems. Use of mapping and spatial analysis to address a planning problem. Letter grading.

**M224B. Advanced Geographic Information Systems. (4)** (Same as Urban Planning M206B.) Lecture, four hours; laboratory, four hours. Prerequisite: course M224A or Urban Planning M206A. Principles and skills of geographic analysis and modeling; managing, processing, and interpreting spatial data. Especially useful for students interested in environmental, demographic, suitability, and transportation-related research. Scripts (Avenue), modeling (Spatial Analyst), network analysis, and transportation modeling (TransCAD). Letter grading.

**C225. Controversies in Education Policy. (4)** Lecture, three hours; outside study, nine hours. Focus on several controversial topics in contemporary education. Topics vary each year and include multiculturalism, affirmative action, "test score gap," bilingual education, and school choice. Introduction to major arguments for and against several important education policies and to encourage students to critically evaluate logic and evidence behind these policies. Concurrently scheduled with course C112. Letter grading.

**M226. Management Challenges and Tools for Nonprofit Sector. (4)** (Same as Social Welfare M290V and Urban Planning M286.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Fundamental building blocks for successful management in nonprofit sector. Students develop management skills in strategic thinking/problem solving, project management, team building, and negotiation. Use of case studies to troubleshoot critical challenges, from finance to crisis management to marketing, that nonprofit managers typically face. Letter grading.

**M227. Nonprofit Sector, State and Civil Society.**

**(4)** (Same as Social Welfare M290S and Urban Planning M287.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in the U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between the U.S. and other countries. Letter grading.

**M228. Leadership, Development, and Governance of Nonprofit Organizations.**

**(4)** (Same as Social Welfare M241E and Urban Planning M288.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

**CM230. Labor Markets and Public Policy.**

**(4)** (Formerly numbered M230.) (Same as Management M259C.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. Concurrently scheduled with course C142. S/U or letter grading.

**CM231. Comparative Industrial Relations.**

**(4)** (Same as Management M255.) Lecture, three hours; outside study, nine hours. Requisite: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course C144. S/U or letter grading.

**M232. Labor Relations: Process and Law.**

**(4)** (Same as Management M250A.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

**233. Employment Issues in California.**

**(4)** Lecture, three hours; outside study, nine hours. Designed for graduate students. Drawing on resources of UCLA Business Forecasting Project, introduction to general features of California labor market, analysis of employment fluctuations and forecasting techniques including linkages between employment fluctuations in California and elsewhere in the country, and social issues related to labor market. Letter grading.

**234. Labor Markets and Social Policy.**

**(4)** Lecture, three hours; outside study, nine hours. Examination of analytical tools and conceptual models needed to understand policies directed toward people in lower tail of income distribution. Concepts include static and dynamic labor supply, labor demand, compensating differentials, human capital, and economic models of immigration and crime. Letter grading.

**C235. Drug Abuse Control Policy.**

**(4)** Lecture, three hours; discussion, 90 minutes; outside study, nine hours. Introduction to and development of main ideas and themes that enter into analysis and execution of policies directed at control of substance abuse and its side effects; illustration and instantiation of main techniques and concepts of policy and management analysis. Concurrently scheduled with course C101. Letter grading.

**M240. Theories of Regional Economic Development I.**

**(4)** (Same as Urban Planning M236A.) Lecture, three hours; laboratory, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Letter grading.

**M241. Introduction to Regional Planning: Evolution of Regional Planning Doctrines.**

**(4)** (Same as Urban Planning M230.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space. Letter grading.

**M242. Regional Development, Urbanization, and Industrial Policy.**

**(4)** (Same as Urban Planning M231.) Lecture, three hours; outside study, nine hours. Survey of regional development, with special reference to "new economic geography" and its relevance for formulation of local economic development policies. Letter grading.

**M243. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits.**

**(4)** (Same as Social Welfare M290U and Urban Planning M275.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is the problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

**M244. Transportation Planning.**

**(4)** (Same as Urban Planning M255.) Lecture, three hours. Examination of how planners analyze, manage, and operate transportation systems. Measuring system performance, intelligent transportation systems, transportation system demand management, parking management, freight movement and facilities, public transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled. Letter grading.

**CM250. Environmental and Resource Economics and Policy.**

**(4)** (Formerly numbered C250.) (Same as Urban Planning M267.) Lecture, three hours. Requisites: courses 204 and 208, or Urban Planning 207 and 220B. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Concurrently scheduled with course C115. Letter grading.

**M266. Advanced Topics in Health Economics.**

**(4)** (Same as Health Services M249E.) Seminar, four hours. Requisites: Health Services 200A, 200B, M236. Advanced treatment of a number of topics in health economics, including mental health economics, pharmaceutical economics, and relationship between labor supply, welfare, and health. Letter grading.

**M267. Medicare Reform.**

**(4)** (Same as Health Services M252.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retirement of baby-boom generation. Letter grading.

**M268. Microeconomic Theory of Health Sector.**

**(4)** (Same as Health Services M236.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

**M269. Health Care Policy and Finance.**

**(4)** (Formerly numbered 269.) (Same as Health Services M269.) Seminar, three hours; outside study, nine hours. Requisites: Biostatistics 100A, 100B, Health Services 200A, 200B, M236. Exploration of demand for health insurance, policies for public insurance (Medicaid and Medicare), the uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer protection movement, and rise of competitive health care markets. Letter grading.

**C270. Information Superhighway.**

**(4)** Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services. Concurrently scheduled with course CM110. Letter grading.

**271. Urban Poverty, Workforce Development, and Public Policy.**

**(4)** Lecture, three hours; outside study, nine hours. Limited to graduate students. Examination of how urban labor markets function, particularly low-skill labor markets, and exploration of how public and private interventions affect outcomes for disadvantaged populations. In first half of course, major theories of low-skill workers' labor market problems in employment and wages; in second half, employment and training programs, policy initiatives and implementation, and new directions in workforce development. Letter grading.

**C272. Crisis Decision Making in U.S. Foreign Policy.**

**(4)** Lecture, three hours; outside study, nine hours. In-depth look at theory and practice of U.S. foreign policy-making. Assessment of competing theories of international relations and application to specific case studies. Weekly role plays of foreign policymakers and final crisis simulation exercise. Concurrently scheduled with course C117. Letter grading.

**M280A. Research and Development Policy.**

**(4)** (Formerly numbered 280.) (Same as Management M292A.) Lecture, three hours. Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

**M280B. Growth, Science, and Technology.**

**(4)** (Formerly numbered M281.) (Same as Management M292B.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform nature of and population of firms in existing industries. S/U or letter grading.

**290. Special Topics in Public Policy.**

**(4)** Discussion, three hours. Advanced seminar on emerging issues in public policy. May be repeated for credit. Letter grading.

**291. Methods of Policy Analysis.**

**(4)** Lecture, three hours; outside study, nine hours. Designed for graduate students. Techniques of policy analysis with applications: benefit and cost; optimization and constraint; risk, risk aversion, risk spreading; tax incidence, incentive effects, and deadweight loss; strategic interactions (games and negotiations). Emphasis on concepts rather than computation. Letter grading.

**292. Quantitative Policy Analysis.**

**(4)** Lecture, three hours. Requisites: courses 203, 208. Exploration of additional statistical and econometric tools (e.g., discrete choice analysis, methods to deal with endogeneity bias, and analysis of longitudinal data) as follow-up to requisite courses. Application of statistical tools in conduct of analysis and evaluations of public policy initiatives and policy-relevant issues. Letter grading.

**M293. Privatization, Regulation, and Public Finance.**

**(4)** (Formerly numbered 293.) (Same as Urban Planning M243.) Lecture, three hours; outside study, nine hours. Requisite: course 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

**294. Education Markets and Education Policy.**

**(4)** Lecture, three hours. Designed for graduate students. Provides set of tools that can be used to analyze pressing policy questions in field of education and some substantive background in policy issues of the day. Letter grading.

**M295. Law and the Poor.**

**(4)** (Same as Law M215, Social Welfare M290R, and Urban Planning M248.) Lecture, three hours. Designed for graduate students. Study of major income-maintenance programs in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

**298A-298B. Seminars: Applied Policy Analysis. (4-4)** Seminar, three hours; outside study, nine hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and internship (unless waived). Two-term seminar in which students prepare major public policy projects and papers which are case studies of policy evaluation and implementation and are equivalent to professional master's theses. Papers build on prior core courses, internship experience, and policy cluster courses. Letter grading.

**596. Directed Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

## POLITICAL SCIENCE

*College of Letters and Science*

UCLA  
4289 Bunche Hall

Douglas S. Hobbs, Ph.D.  
Marvin Hoffenberg, M.A.  
Arnold L. Horelick, Ph.D.  
Michael D. Intriligator, Ph.D.  
Roman Kolkowicz, Ph.D.  
Andrzej Korbonksi, Ph.D.  
Charles R. Nixon, Ph.D.  
David C. Rapoport, Ph.D.  
Foster H. Sherwood, Ph.D., LL.D.  
Richard Sisson, Ph.D.  
Richard L. Sklar, Ph.D.  
Leo M. Snowiss, Ph.D.  
David A. Wilson, Ph.D.  
James Q. Wilson, Ph.D.  
Charles E. Young, Ph.D.

### Associate Professors

Richard D. Anderson, Jr., Ph.D.  
Kathleen Bawn, Ph.D.  
Martin I. Gilens, Ph.D., *Acting*  
Kirstie McClure, Ph.D.  
Raymond A. Rocco, Ph.D.  
Kenneth Schultz, Ph.D.  
James Tong, Ph.D.  
Daniel S. Treisman, Ph.D.

### Assistant Professors

Matthew A. Baum, Ph.D.  
Alberto Diaz-Cayeros, Ph.D.  
Scott C. James, Ph.D.  
Barbara Koremenos, M.P.P.  
Jeffrey B. Lewis, Ph.D.  
Daniel N. Posner, Ph.D.  
Michael Ross, Ph.D.  
Mark Q. Sawyer, Ph.D.  
Michael F. Thies, Ph.D.  
Lynn Vovreck, Ph.D.  
Brian D. Walker, Ph.D.

### Adjunct Assistant Professor

James A. Desveaux, Ph.D.

## Scope and Objectives

The undergraduate major in Political Science aims to provide understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give students a strong foundation in the discipline while enabling them to acquire additional skills for advancing their professional careers.

## Undergraduate Study

### Political Science B.A.

#### Prepolitical Science Major

All students intending to major in Political Science must enroll as Prepolitical Science majors. After completion of preparation for the major courses, they need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

#### Preparation for the Major

*Required:* Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are prerequisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as the concentration or distribution field. Students must also take Political Science 6 or one of the following statistics courses: Anthropology M80, Economics M40, Geography M40, Sociology M18, Statistics 10.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

### Transfer Students

To be admitted as Political Science majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one statistics course and four courses from political theory, world politics, political economy, American politics, or comparative politics.

### The Major

*Required:* Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. Students are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116), sociology. These courses must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into four fields: (I) political theory, (II) international relations, (III) American politics, and (IV) comparative politics.

In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

1. A concentration in one field by completing the lower division course and at least four upper division courses in that field
2. A distribution of the lower division course and two upper division courses in each of two other fields (four upper division courses)
3. Two additional elective courses in political science to comprise the total of 10

### Field Concentration Requirements

The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

- I. *Political Theory:* Political Science 10 and any four courses in Field I
- II. *International Relations:* Course 20 and any four upper division courses in Field II
- III. *American Politics:* Course 40 and any four courses in Field III
- IV. *Comparative Politics:* Courses 50, 168, and any three additional courses in Field IV. Course 118 may also be applied toward concentration in this field

Courses 119, 139, 149, and 169 may be applied no more than twice toward the field concentration requirement. No more than three of

these courses may be applied toward the major.

Courses 195A, 195B, 195C, and 199 may not be applied toward either the concentration or distribution requirement.

Political Science majors should be aware that the upper division course requirements in the major (56 units) do not meet the upper division requirement of 60 units (effective Fall Quarter 1997) for graduation. Additional upper division units must be taken to reach the 60-unit total.

### Undergraduate Seminars

Each term the department offers a series of seminars (Political Science C197A through C197D) in each field. The requisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

### Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before they enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A, 195B, 195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, and 169) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

### Political Science Minor

The Political Science minor introduces students to political processes and institutions.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Undergraduate Office, 4256 Bunche Hall.

*Required Lower Division Courses (8 units):* Any two lower division political science courses.

*Required Upper Division Courses (20 units):* Any five upper division political science courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Political Science offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Political Science.

### Admission

The department admits only students whose degree objective is the Ph.D. degree. An M.A. degree may be earned while completing requirements for the Ph.D.

In addition to University minimum requirements, the department requires three letters of recommendation, scores from the General Test of the Graduate Record Examination (GRE), and a sample of applicants' analytical writing skills (e.g., senior or master's degree thesis, term paper). Applicants are selected on the basis of perceived promise.

Applicants may write for departmental brochures to the Graduate Studies Office. The department does not have an application form in addition to the *UCLA Application for Graduate Admission*. The deadline for receipt of all application materials is December 15 of the year preceding the Fall Quarter in which students wish to matriculate.

### Master's Degree

The M.A. degree is offered through the comprehensive examination plan, which consists of the submission of one doctoral qualifying paper that is deemed acceptable by the faculty. Students must successfully complete 12 of the 16 courses required for the Ph.D.

### Doctoral Degree

Five fields of study are offered: political theory, international relations, American politics, comparative politics, and formal theory and quantitative methods.

Ph.D. students must take 16 required courses, including two required courses in statistics, four courses in each of two major fields, one course in each of two minor fields, and four additional graded courses, including no more than two independent study courses. Fields determine which courses meet major and minor field requirements.

Written and oral qualifying examinations are required. The written examination is in the form of two research papers. Following successful

completion of the written examinations, students prepare a dissertation proposal and take the University Oral Qualifying Examination.

There is a language/research methodology requirement for this degree.

## Political Science

### Lower Division Courses

**6. Introduction to Quantitative Research. (4)** Lecture, three hours; discussion, one hour. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

**10. Introduction to Political Theory. (4)** Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present.

**20. World Politics. (4)** Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics.

**30. Introduction to Political Economy. (4)** Lecture, three hours; discussion, one hour. Introduction to political economy, especially application of economic reasoning to political and social phenomena. P/NP or letter grading.

**40. Introduction to American Politics. (4)** Lecture, three hours; discussion, one hour. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case. P/NP or letter grading.

**50. Introduction to Comparative Politics. (4)** Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries. P/NP or letter grading.

**88A-88D. Lower Division Seminars. (4 each)** Seminar, three hours. Limited to freshmen/sophomores. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C-, D, or F. P/NP or letter grading. **88A.** Political Theory; **88B.** International Relations; **88C.** Politics; **88D.** Comparative Politics.

### Upper Division Courses

**102. Statistical Analysis of Political Data. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 6. Designed for juniors/seniors. Introduction to statistical inference. Topics include measures of central tendency, elementary probability theory, common probability distributions, least-squares and maximum likelihood estimation, confidence intervals and statistical tests, comparison of means, analysis of variance, and multiple regression and correlation. Statistical techniques and topics illustrated with applications to a variety of political data.

**104A-104B. Introduction to Survey Research. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 6. Designed for juniors/seniors. Courses in fundamentals of survey research as a method. **104A.** Sampling theory and methods, writing of questions, questionnaire construction, and interviewing. Attitudes, attitude measurement, and attitude change. Participation in formulation of research problem. **104B.** Requisite: course 104A. Conducting a survey. Development of survey questionnaire, designing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

**M105. Economic Models of Public Choice. (4)** (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: any lower division political science course. Enforced requisite: Economics 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

**M106. Economic Models of Political Conflict and Conflict Resolution. (4)** (Same as Economics M136.) Seminar, three hours; discussion, one hour. Enforced requisite: Economics 11. Prior political science course desirable but not essential. Designed for juniors/seniors. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war: strategy and tactics. P/NP or letter grading.

**M107. Women and Politics. (4)** (Formerly numbered 107.) (Same as Women's Studies M117.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to rapidly growing body of empirical and theoretical scholarship on women and politics in both national and international contexts. Topics may include women's movement in the U.S. and globally; women's electoral participation; representation of women in Congress and in legislatures worldwide; women as heads of government and state; feminist critiques of political science; women and human rights; ERA; struggle for suffrage; mothers as political actors; women and the military; women, development, and globalization. May be applied toward Field I, III, or IV. P/NP or letter grading.

## Field I: Political Theory

**111A-111B-111C. History of Political Thought. (4-4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of major political philosophers and schools. **111A.** Ancient and Medieval Political Theory from Plato to Machiavelli; **111B.** Early Modern Political Theory from Hobbes to Bentham; **111C.** Late Modern and Contemporary Political Theory from Hegel to the Present.

**112A. Democratic Theory. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of selected major authors, issues, and arguments in contemporary democratic theory.

**113. Problems in 20th-Century Political Theory. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study and interpretation of theorists who have focused their analyses on social and political problems of the 20th century.

**114A-114B. American Political Thought. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. **114A.** Exposition and critical analysis of American political thinkers from the Puritan period to 1865. **114B.** Requisite: course 114A. Exposition and critical analysis of American political thinkers from 1865 to the present.

**116. Marxism. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of origins, nature, and development of Marxist political theory.

**117. Jurisprudence. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. Letter grading.

**118. Political Violence. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'etat, assassination, and terrorism. May be applied toward either Field II or IV.

**119A-119Z. Special Studies in Political Theory. (4 each)** Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one course in Field I. Requisite: course 10. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

## Field II: International Relations

**120. Foreign Relations of the U.S. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary problems.

**121. Studies in Formulation of American Foreign Policy. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of formation of American foreign policy with respect to individual cases. Consult *Schedule of Classes* for topics to be offered in a specific term.

**122A. World Order. (4)** (Formerly numbered 122.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Study of problems of the international system seen as a community capable of cooperation and development. P/NP or letter grading.

**M122B. Global Environment and World Politics. (4)** (Same as Environment M161.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 20. Politics and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. P/NP or letter grading.

**123A-123B. International Law. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Course 123A is requisite to 123B. Designed for juniors/seniors. Study of nature and place of international law in conduct of international relations. Letter grading.

**124. International Political Economy. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Study of political aspects of international economic issues.

**125. Arms Control and International Security. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space.

**126. Peace and War. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Theory and research on causes of war and conditions of peace.

**127A-127B. Atlantic Area in World Politics. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. **127A.** Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. **127B.** U.S. and Europe. Requisite: course 127A. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S./Soviet relations.

**128A. U.S./Soviet Relations. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Survey of relations between the U.S. and former Soviet Union from Revolutions of 1917 to collapse of the U.S.S.R. in 1991.

**128B. International Relations of Post-Communist Russia. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia's relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States.

**129. Comparative Foreign Economic Policy. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of foreign trade, monetary, and investment policies of the U.S., Japan, France, and Federal Republic of Germany since 1945.

**130. Politics of Latin American Economic Development. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Interaction of international and domestic factors in political and economic evolution of Latin America.

**131. Latin American International Relations. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Major problems of Latin American international relations and organization in recent decades.

**132A-132B. International Relations of the Middle East. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. **132A.** Requisite: course 20. Contemporary regional issues and conflicts, with particular attention to inter-Arab politics, Arab-Israeli problem, and Persian Gulf area. **132B.** Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945.

**133. International Relations of Sub-Saharan Africa. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Contemporary regional issues and conflicts; foreign policies of African states; role of external powers.

**134. Foreign Policy Decision Making and Tools of Statecraft. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 120. Designed for juniors/seniors. Contrasts purposive and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading.

**135. International Relations of China. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-à-vis the U.S. and Soviet Union.

**136. International Relations of Japan. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan.

**137A-137B. International Relations Theory. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. **137A.** Examination of various theoretical approaches to international relations. P/NP or letter grading. **137B.** Alternative approaches to analysis of international politics and their application to historical and contemporary cases.

**139A-139Z. Special Studies in International Relations. (4 each)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: two courses in Field II, or course 20 and one course in Field II. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

**M139A. Political and Economic Issues in Proliferation of Nuclear Weapons. (4)** (Same as Economics M188A.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Interdisciplinary approach to problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues. Letter grading.

## Field III: American Politics

**140A-140B-140C. National Institutions. (4-4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. **140A.** Congress. Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. **140B.** The Presidency. Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. **140C.** Supreme Court. Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

**M141A-M141D. Electoral Politics. (4 each)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors:

**M141A.** Political Psychology. (Same as Psychology M138.) Requisite: course 40. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

**141B.** Public Opinion and Voting Behavior. Requisite: course 40. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote decision, and influence of public opinion on public policy formulation.

**141C.** Political Behavior Analysis. Requisites: courses 6, 40, 141B. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses.

**M141D.** Mass Media and Elections. (Same as Communication Studies M161.) Requisite: course 40. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

**142A-142B-142C. Political Parties and Interest Groups. (4-4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. **142A.** Political Parties. Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, membership problems and party activists, political finance, and policy formulation practices. **142B.** Politics of Interest Groups. Systematic investigation of role of political interest groups in governmental process, with attention to internal organization, leadership, and politics of such groups to goals and functions of various types of groups and to strategy and tactics of influence. **142C.** Government and Labor. Labor force and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation.

**142D. Understanding Public Issue Life Cycle. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Recommended preparation: courses 10, 40, and one course from Economics 1, 2, 5, 11, 100, or 101. Examination of how public issue life cycle is shaped by (1) economic and political incentives of various actors — business, news media, mass public, organized interests, Congress, the president, regulatory agencies, and courts and (2) ideology, cognitive biases, and ethical reasoning. P/NP or letter grading.

**143A-143B. Subnational Government. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. **143A.** American State Government. Examination of governments of states of federal union as major sources of public policy in the U.S., with government of California as principal topic. **143B.** Government of American Cities. Intensive analysis of contemporary urban governance in the U.S. Emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems.

**144A-M144B. Ethnic Politics. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors:

**144A.** Chicano/Latino Politics. (4) (Formerly numbered M144A.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/seniors. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining historically changing relationship between class, race, and power by studying interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period. Letter grading.

**M144B.** African American Politics. (4) (Same as Afro-American Studies M144.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Course M144A is not requisite to M144B. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

**145A-145D. Public Law and Judicial Process. (4 each)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors:

**145A.** Anglo-American Legal System. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

**145B.** Constitutional Law — Separation of Powers. Constitutional questions concerning separation of powers, federalism, and relationship between government and property.

**145C.** Constitutional Law — Civil Liberties. Protection of civil and political rights and liberties under the constitution.

**145D.** Judicial Oversight of the Bureaucracy. Legal controls of administration action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

**146A-146F. Organization Theory, Public Policy, and Administration. (4 each)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors:

**146A.** Public Administration and Policy. Requisite: course 40. Introduction to processes of policy formation and implementation. Exploration of emergence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

**146B.** Bureaucracy and Public Management. Preparation: familiarity with American government. Requisite: course 40. Nature of bureaucracy in modern government, with emphasis on the U.S.; explanation of why government agencies behave as they do. Focus on real and imagined problems with bureaucratic rule; evaluation of commonly proposed solutions for these problems. Examples from schools, armies, welfare bureaus, regulatory agencies, and intelligence services, among others. P/NP or letter grading.

**146C.** Governing the Bureaucracy in the U.S. Requisite: course 40. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in "permanent government" (career bureaucrats).

**146D.** Theories of Organization and Decision Making. Requisite: course 40. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

**146E.** National Policy Development and Implementation. Requisite: course 40. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term.

**146F.** Politics, Ethics, and Business. Requisite: course 40. Examination of political issues, interests, and institutions that impose constraints on and provide opportunities for business. Ethical issues that arise in external environment of business and its internal operations. Examples of topics include government regulation, product liability, affirmative action, lobbying Congress, exporting hazardous waste to developing countries.

**149. Special Topics in American Government and Politics. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: course 40, two courses in Field III. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 117

## Field IV: Comparative Politics

**151A-151B-151C. African Politics. (4-4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letter grading:

**151A.** Government and Politics of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution. Letter grading.

**151B.** Political Economy of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of interactions of economic and political factors in African development, with special attention to political basis of inappropriate economic policy during early post-independence period and change toward a more appropriate economic strategy in recent times. Letter grading.

**151C.** Special Topics in African Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consult *Schedule of Classes* for topics to be offered in a specific term. Letter grading.

**152A-152B-152C. Government and Politics of West European Countries. (4-4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Constitutional and political structure and development of one or more states in Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading. **152A.** Britain; **152B.** France; **152C.** Germany.

**153A-153B. Comparative Government and Politics of Western Europe. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading:

**153A.** West European Government and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 50. Designed for juniors/seniors. Comparison of constitutional and political structure of West European states, with particular attention to contemporary problems. P/NP or letter grading.

**153B.** Game-Theoretic Approach to West European Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Course 153A is not requisite to 153B. Designed for juniors/seniors. Uses of elementary game theory to investigate post-World War II Western European politics. Social and political forces, and political institutions. Particular emphasis on study of three West European countries — United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S. P/NP or letter grading.

**154A-154B. Government and Politics in Latin America. (4-4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of governmental and political development, organization, and practices. **154A.** States of Middle America; **154B.** States of South America.

**155. Advanced Pluralist Democracies. (4)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

**156A-156D. Government and Politics of Post-Communist States. (4 each)** Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading:

**156A.** Russia. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union. P/NP or letter grading.

**156B. Eastern Europe.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of institutions and political processes in selected post-Communist states of Eastern Europe. P/NP or letter grading.

**156C. Post-Soviet States.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of institutions and political processes in selected former Soviet republics other than Russia. P/NP or letter grading.

**156D. Political Economy of Post-Communist Reform.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Focused study of interaction between transitions to democracy and to the market in selected post-Communist countries, with emphasis on development of general theories of political and economic reform. P/NP or letter grading.

**157. Government and Politics in the Middle East.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of government in the Arab States, Turkey, Israel, and Iran. P/NP or letter grading.

**159A-159B. Government and Politics of China.** (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors:

**159A. Chinese Revolution and Age of Mao Zedong.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

**159B. China in Age of Reform.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of China's political and ideological transformation in post-Mao era. Assessment of impact of changing socioeconomic conditions on revolutionary policies and programs of Chinese Communist Party. Exploration of etiology of 1989 Tiananmen crisis and consequences for China of collapse of Communism in East Europe and the Soviet Union.

**160. Government and Politics of Japan.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 50. Designed for juniors/seniors. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

**164. Comparative History of Government from Earliest Times to Present Day.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 50. Designed for juniors/seniors. Historical diversity of forms of government: archetypal politics, great empires, major innovations, notable variants. P/NP or letter grading.

**165. Islam and Politics.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Religious and spiritual foundations of Islamic legal and political institutions; legitimacy of historical and contemporary Islamic regimes, movements, and ideologies; political strategies of Islamic activism. P/NP or letter grading.

**166. Comparative Analysis of Government Institutions.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparison of major institutional structures such as presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, federal vs. unitary systems, plurality vs. proportional electoral systems, etc. Method of analysis is rational choice (political actors are assumed to optimize their results given institutional constraints and action of other actors). Result is that institutions affect political outcomes in systematic ways. P/NP or letter grading.

**167A. Ideology and Development in World Politics.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 50. Designed for juniors/seniors. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of current debate about imperialism.

**167B. Comparative Development and Administration.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 50. Designed for juniors/seniors. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.

**168. Comparative Political Analysis.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: two courses in Field IV, or course 50 and one course in Field IV. Designed for juniors/seniors. Required of all students concentrating in Field IV. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.

**169. Special Studies in Comparative Politics.** (4) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: two courses in Field IV. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

## Special Studies

**194. Selected Topics in Political Science.** (2 to 4) Seminar, three hours. Designed for juniors/seniors. Seminar on selected current topics of interest in political science. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit; may be applied toward major but not to concentration or distribution requirement. P/NP or letter grading.

**195A-195B-195C. Honors Seminars and Thesis.** (4-4-4) Preparation: one course in C197 series, 3.5 grade-point average in upper division political science courses, eligibility for Letters and Science honors. Course 195A is requisite to 195B, which is requisite to 195C. Designed for juniors/seniors. One-year honors seminar and thesis-writing sequence. Students entering course 195A are expected to have some experience in writing research papers and to have in mind a research topic suitable for treatment at length and in depth:

**195A.** Students define their research topic, select a suitable research method, determine appropriate sources of information, prepare research proposal, find a thesis director, begin their research, and submit progress reports or preliminary drafts. Class sessions emphasize critical and constructive discussions of students' topics, methods, and problems in research, as well as general consideration of political science research topics and methods of current or continuing interest. Students also meet privately with instructor to discuss research progress.

**195B-195C.** Writing of honors thesis under direction of a faculty member. Thesis is read by appropriate field committee and graded highest honors, honors, or no honors. In Progress grading.

**C197A-C197D. Seminars for Majors.** (4 each) Seminar, three hours. Preparation: two upper division courses in field in which seminar is offered. Limited to junior/senior Political Science majors with 3.25 grade-point average in upper division political science courses. Consult *Schedule of Classes* for topics to be offered in a specific term. May be applied toward distribution or concentration requirement. May be concurrently scheduled with various graduate courses. **C197A.** Political Theory; **C197B.** International Relations; **C197C.** Politics; **C197D.** Comparative Government.

**M197G. Introduction to Development Studies: Political Economy of Development.** (4) (Same as International Development Studies M100B and Sociology M180.) Seminar, three hours. Designed for juniors/seniors. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

**M197W. CAPPW Washington Research Seminar.** (8) (Formerly numbered 197W.) (Same as Sociology M197W.) Seminar, three hours; laboratory, 24 hours. Limited to CAPPW Program students. Seminar for undergraduates in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

**199. Readings in Political Science.** (2 to 4) Tutorial, to be arranged. Preparation: 3.0 overall grade-point average. Limited to juniors/seniors. Individual studies. May not be applied toward concentration or distribution requirement. May be repeated for a maximum of 16 units. P/NP or letter grading.

**199. Independent Studies for Internships.** (2 to 4) Tutorial, to be arranged. Preparation: 3.0 overall grade-point average. Limited to juniors/seniors. Independent studies course to be supervised jointly by Center for Experiential Education and Service Learning and faculty adviser. Further supervision to be provided by organization for which student is doing internship. No more than 8 units may be applied toward the major; units applied must be taken for a letter grade. Maximum of 4 units may be applied toward concentration or distribution requirement only when adjunct to an upper division political science course or seminar. May be repeated for a maximum of 16 units. P/NP or letter grading.

## Graduate Courses

### Formal Theory and Quantitative Methods

**200A. Statistical Methods I.** (4) Lecture, three hours. Corequisite: course 200AL. Introduction to statistical analysis of political data. Methods of data analysis, estimation, and inference.

**200AL. Statistical Methods Laboratory I.** (4) Laboratory, three hours. Corequisite: course 200A.

**200B. Statistical Methods II.** (4) Lecture, three hours. Recommended preparation: knowledge of elementary calculus. Requisites: courses 200A, 200AL. Applications of multiple regression in political science.

**200C. Statistical Methods III.** (4) Lecture, three hours. Preparation: knowledge of elementary calculus. Requisites: courses 200A, 200AL, 200B. Statistical modeling of political processes. Topics include simultaneous equations models, discrete choice models, time-series models.

**200D. Quantitative Methods in Politics.** (4) Seminar, three hours. Preparation: knowledge of calculus and matrix algebra. Recommended requisite: course 200C. Designed to build on foundations set in course 200C. Focus on logical and mathematical structure underlying some statistical methods that are frequently used in political science. Emphasis on understanding structure of the models rather than on gaining added experience using them to analyze data. Applied data analysis. Letter grading.

**M200E. Advanced Regression Analysis.** (4) (Same as Psychology M256.) Seminar, three hours. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

**201A. Introduction to Formal Political Analysis.** (4) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote trading.

**201B. Theory of Collective Choice.** (4) Seminar, three hours. Recommended preparation for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstract, deductive study of voting systems and other collective-choice processes. Axiomatic method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts.

**202. Mathematics for Political Science.** (4) Lecture, three hours. Preparation: working knowledge of high school algebra. Survey of mathematical methods useful in political science. Topics include differential and integral calculus, differential equations, optimization, and linear algebra.

**203A. Economic Theory and Methods for Political Science I.** (4) Discussion, three hours. Preparation: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major topics in formal political economy. Investigation of models of regulation, trade protection, collective bargaining, and economic growth as time permits.

**203B. Economic Theory and Methods for Political Science II. (4)** Discussion, three hours. Requisite: course 203A. Continuing survey of microeconomic techniques used in formal political science, with focus on market failures and on modeling individual choice in non-market situations. Specific topics include externalities, public goods and allocation mechanisms, collective action, spatial models, structure-induced equilibrium, and information asymmetries.

**204. Game Theory in Politics. (4)** Seminar, three hours. Survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science.

**M208A. Game Theory. (4)** (Same as Economics M214B and Mathematics M261.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

**M208B. Topics in Applied Game Theory. (4)** (Same as Economics M215.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

**M208D. Multivariate Analysis with Latent Variables. (4)** (Same as Psychology M257.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

**M208E. Bayesian Econometrics. (4)** (Same as Economics M232A.) Lecture, three hours. Requisites: Economics 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. S/U or letter grading.

**209. Special Topics in Formal Theory and Quantitative Methods. (4)** Seminar, three hours.

## Political Theory

**210A-210B. Introduction to Political Theory. (4-4)** Lecture, three hours. Exploration of major texts and issues in political theory. **210A.** Classical and Medieval Formulations from Plato through Aquinas; **210B.** Early Modern Period from Machiavelli through the Enlightenment.

**M211. Morality of Capitalism. (4)** (Same as Management M293B.) Lecture, three hours. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

**212. Seminar: Political Theory. (4)** Seminar, three hours.

**214. Political Theory in Transnational Context. (4)** Seminar, three hours; discussion, one hour (when scheduled). Critical analysis of selected text from postcolonial, spatial, feminist, postmodern, and post-structuralist theories that assess impact of processes of globalization on such major concepts and problems of traditional social and political theory as sovereignty, citizenship, rights, community, representation, and democracy. S/U or letter grading.

**215. Liberalism and Its Critics. (4)** Seminar, three hours; discussion, one hour (when scheduled). Examination of works of one or more major contemporary liberal theorists (Rawls, Dworkin, Habermas, Nussbaum, etc.) in light of alternatives which have been proposed to the liberal position (communitarianism, post-structuralism, group rights theories, etc.). S/U or letter grading.

**C217. Selected Texts in Political Theory. (4)** Discussion, three hours. Critical examination of major texts in political theory, with particular attention to their philosophical system, their relations to contemporary political and intellectual currents, and importance of the system for present-day political analysis. May be concurrently scheduled with course C197A.

**C218. Selected Topics in Political Theory. (4)** Discussion, three hours. Critical examination of a major problem in political theory. May be concurrently scheduled with course C197A.

**219. Workshop: Political Theory. (4)** Discussion, three hours.

## International Relations

**220. International Relations Theory. (4)** Discussion, three hours. Approaches to and central problems of international relations theory.

**C221. Advanced International Relations Theory. (4)** Discussion, three hours. Introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B.

**222. Seminar: Strategic Interaction. (4)** Seminar, three hours. A strategic move influences the other person's choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory.

**C223. Politics and Strategies of Modern War. (4)** Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. May be concurrently scheduled with course C197B.

**225. American Foreign Policy. (4)** Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and domestic politics levels. Application to selected cases in American foreign policy.

**C226. The Making of American Foreign Policy. (4)** Seminar, three hours. Intensive analysis of policy formulation process and substance of selected contemporary problems in foreign policy. Political and institutional factors affecting foreign policies; analysis of policy options. May be concurrently scheduled with course C197B.

**C227. Foreign Policy Process. (4)** Discussion, three hours. Requisites: courses 120, 220. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

**230. Contending Perspectives on International Political Economy. (4)** Discussion, three hours. Survey of various theoretical approaches to international political economy.

**231. International Political Economy I. (4)** Seminar, three hours. Interaction between international trade and investment and domestic political economics of both industrialized and industrializing societies.

**232. International Political Economy II. (4)** Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models, as well as two-level game models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics.

**233A-233B-233C. Political Economy Workshops (4-4-4).** Discussion, two hours. Preparation: successful completion of major field examinations. Workshops for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. S/U or letter grading.

**234A-234B-234C. Workshops: National Security, Foreign Policy, and International Relations (0-0-12).** Discussion, two hours. Preparation: successful completion of major field examinations. Course 234A is requisite to 234B, which is requisite to 234C. Courses must be taken in sequence. Workshops for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress grading.

**C239. Selected Topics in International Relations. (4)** Discussion, three hours. May be concurrently scheduled with course C197B.

## Comparative Politics

**240A-240B. Seminars: Comparative Politics. (4-4)** Seminar, three hours. Course 240A is not requisite to 240B. Letter grading. **240A.** (Formerly numbered 240.) Survey of ideas and approaches that have been historically important in field of comparative politics, with a selection of theories and methodologies that have comprised the field over time. **240B.** Survey of contemporary research approaches and problems in field of comparative politics, with a range of theories and methodologies used by practitioners in the field.

**C241. African Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**C242. Chinese and East Asian Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**C243. Japanese and Western Pacific Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**C244. Latin American Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**C245. Middle Eastern Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**C246A. Western European Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**246B. Political Development of Modern Europe. (4)** Seminar, three hours; discussion, one hour (when scheduled). Principal phases of political development from high feudalism to the present, together with theories of causation.

**C247. Politics of the Soviet Union and Post-Soviet Region. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**247A. Evolution of Soviet and Russian Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). Discussion seminar surveying political evolution of Soviet Union and its transformation.

**C247B. Domestic Context of Russian Foreign Policy. (4)** Seminar, three hours; discussion, one hour (when scheduled). Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. May be concurrently scheduled with course C197B.

**C248. South Asian Politics. (4)** Seminar, three hours; discussion, one hour (when scheduled). May be concurrently scheduled with course C197D.

**251. Political Economy of Economic Reform. (4)** Discussion, three hours. Some familiarity with economics helpful. Principal political and economic arguments for economic reform and consideration of political issues that arise from this process. Letter grading.

**252. Parties and Party Systems. (4)** Seminar, three hours; discussion, one hour (when scheduled). Theories and practices of political parties, party systems, and elections in comparative perspective.

**253. Political Change in Communist Systems. (4)** Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence.

**254A-254B. Institutions and Comparative Politics. (4-4)** Seminar, three hours; discussion, one hour (when scheduled):

**254A.** Comparative Institutional Analysis. Use of advances of rational choice theory and new institutionalism to compare and analyze major institutional structures, including presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, cadre vs. mass parties, and plurality vs. proportional electoral systems.

**254B. Political Institutions, Delegation, and Policy-Making.** Analysis of political foundations of policy-making. Characterization of democratic institutions as a series of delegations, from voters to elected officials, within parties and legislatures, and from elected politicians to unelected bureaucrats. Examination of implications of different institutional designs for how those delegations are made and controlled.

**255. Seminar: Political Change. (4)** Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization.

**256. External Sources of Domestic Politics. (4)** Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions.

**257. Labor and Working-Class Politics. (4)** Discussion, three hours. Questions and topics on comparative labor and working-class politics.

**259. Selected Topics in Comparative Politics. (4)** Discussion, three hours. Critical examination of a major problem in comparative politics.

## American Politics

**260A. Survey Course in American Politics: Political Parties and the Electoral Process. (4)** Discussion, three hours.

**260B. Survey Course in American Politics: American Political Institutions. (4)** Discussion, three hours.

**M261A. Proseminar: Political Psychology. (4)** (Same as History M236A and Psychology M228A.) Discussion, three hours. Introduction to political psychology; psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**C261B. Mass Attitudes and Political Behavior. (4)** Discussion, three hours. Requisite: course 141B or 260A. Analysis of development and change of political attitudes in mass publics and their relationship to voting, protest, and violence. May be concurrently scheduled with course C197C.

**261C. Political Communication. (4)** Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of "media effects" research, reporting and advertising as determinants of election outcomes, adversarial versus deferential journalism, and analyses of media bias.

**M261D. Seminar: Political Psychology. (4)** (Same as Psychology M228B.) Discussion, three hours. Requisite: course M261A or Psychology 220A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

**M261E. Critical Problems in Political Psychology. (4)** (Same as Psychology M228C.) Discussion, three hours.

**C262. Political Parties. (4)** Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

**C264. Politics and Society. (4)** Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

**265. Politics and Economy. (4)** Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and organized labor.

**266. Group Theories of Politics. (4)** Discussion, three hours. Critical appraisal of "group theory" approaches to study of political decision making, with special attention to empirical research problems and findings.

**268. Seminar: Political and Electoral Problems. (4)** Seminar, three hours. Preparation: two graduate courses in politics.

**269. Seminar: Political Behavior. (4)** Seminar, three hours.

**C270. Legislative Behavior. (4)** Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

**C271. Executive Politics and the Presidency. (4)** Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

**272. Political Environment of the Federal Executive. (4)** Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive/legislative relations.

**273. American Political Development. (4)** Discussion, three hours. National political institutions in historical perspective, theories of state building, state societal relations, political culture.

**275. Seminar: American Political Institutions. (4)** Seminar, three hours.

**C279. Seminar: Public Law. (4)** Seminar, three hours. May be concurrently scheduled with course C197C.

**C281. Public Policy Studies. (4)** Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and process, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197C.

**284. Seminar: Bureaucracy and Organization. (4)** Seminar, three hours. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of the executive.

## Special Studies

**290. Modern Political Economy. (4)** Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macromodels, forms of political participation, the state, government regulation, growth of government, bureaucracy elections, public policy, inflation.

**M291A-M291B. Social Theory and Comparative History. (4-4)** (Same as History M203A-M203B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**292A-292B. Introduction to Political Inquiry. (4-4)** Seminar, three hours; discussion, one hour (when scheduled). **292A.** Problems of Scientific Inquiry and Normative Discourse; **292B.** Research Design. Requisite: course 292A. Major conceptual frameworks and approaches to political science.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Political Science. (4)** Seminar, to be arranged. Seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in first term of their assistantships. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 4)** Tutorial, to be arranged. May be applied only three times toward minimum course requirement in first two years. May be repeated.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. May be repeated. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. May be repeated. S/U grading.

 David L. Sultzer, M.D., *in Residence*  
 M. Albert Thomas, Ph.D., *in Residence*  
 Jürgen Unützer, M.D., *in Residence*  
 James A. Waschek, Ph.D., *in Residence*  
 Joseph B. Watson, Ph.D., *in Residence*  
 Ma-Li Wong, M.D., *Acting*  
 Roger P. Woods, M.D., *in Residence*  
 Cindy M. Yee-Bradbury, Ph.D.  
 Bonnie T. Zima, M.D., *in Residence*

#### Assistant Professors

Mark G. Barad, M.D., Ph.D., *in Residence*  
 Mark Bodner, Ph.D., *in Residence*  
 Ellen M. Carpenter, Ph.D., *in Residence*  
 Susana Cohen-Cory, Ph.D., *in Residence*  
 Christopher S. Colwell, Ph.D., *in Residence*  
 Ian A. Cook, M.D., *in Residence*  
 Mirella Dapretto, Ph.D., *in Residence*  
 Pablo Davanzo, M.D., *in Residence*  
 Mark A. Frye, M.D., *in Residence*  
 Victoria C. Hendrick, M.D., *in Residence*  
 Marco Iacoboni, M.D., Ph.D., *in Residence*  
 Alex J. Kopelowicz, M.D., *in Residence*  
 David E. Krantz, M.D., Ph.D., *in Residence*  
 Helen Lavretsky, M.D., *in Residence*  
 Jennifer G. Levitt, M.D., *in Residence*  
 Faustino Lopez, M.D., Ph.D., *in Residence*  
 Kelsey C. Martin, M.D., Ph.D., *in Residence*  
 Christina G.S. Palmer, Ph.D., *in Residence*  
 Sanjaya Saxena, M.D., *in Residence*  
 Benjamin V. Siegel, M.D., *in Residence*  
 Donna Ames Wirshing, M.D., *in Residence*

Cui-Wei Xie, M.D., Ph.D., *in Residence*  
 Alexander S. Young, M.D., *in Residence*

#### Professors of Clinical Psychiatry

Michael Gitlin, M.D., *Clinical*  
 Barry H. Guze, M.D., *in Residence*  
 Charles S. Grob, M.D.  
 Andrew T. Russell, M.D.  
 Neena Sachinvala, M.D., *Clinical*  
 James E. Spar, M.D.  
 William C. Wirshing, M.D.

#### Associate Professor of Clinical Psychiatry

Vivien K. Burt, M.D., Ph.D.  
 James J. McGough, M.D.

## Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students.

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs. Additional information is available from the department office.

## Developmental Disabilities Immersion Program

The Developmental Disabilities Immersion Program (DDIP), cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Center for Experiential Education and Service Learning (CEESL), provides a community learning environment for undergraduate students who devote two quarters to the intensive study of developmental disabilities. Each year a group of 30 students is selected for the program which runs during Winter and Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required courses include Psychology/Psychiatry M180A, M180B, M181A, M181B. Courses are designed to foster discussions integrating students' field and research experiences. Lectures and discussions explore biological, psychological, and social questions concerning causes and treatment of developmental disabilities. Also covered is an analysis of programs for the care and training of individuals with development disabilities. The fieldwork component gives students the opportunity to apply theories and concepts learned in their coursework to actual settings involving individuals with developmental disabilities. Students also undertake a two-quarter research project under the guidance of a UCLA faculty member.

Students interested in the program should contact the DDIP coordinator at the Center for Ex-

periential Education and Service Learning, 160 Powell Library, (310) 825-7867, for information regarding admission and an application.

## Clinical Psychology Internship

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Associate Registrar, C8-852 NPI&H, (310) 825-0548, e-mail: slipschultz@mednet.ucla.edu.

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

## Psychiatry and Biobehavioral Sciences

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Psychiatry and Biobehavioral Sciences. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in psychiatry and biobehavioral sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4)** (Same as Anthropology M136Q.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

**M180A. Contemporary Problems in Mental Retardation. (4)** (Same as Psychology M180A.) Lecture, three hours. Requisites: Psychology 10, 100A, and 127 or 130 or 133A through 133L. Corequisite: course M181A. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. P/NP or letter grading.

**M180B. Contemporary Issues in Mental Retardation. (4)** (Same as Psychology M180B.) Lecture, three hours. Requisite: course M180A. Corequisite: course M181B. Limited to Immersion Program students. Psycho-educational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. P/NP or letter grading.

**M181A-M181B. Research in Contemporary Problems in Mental Retardation. (4-4)** (Same as Psychology M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress and P/NP or letter grading.

**185. Social Psychology of Urban Student Education. (6)** Lecture, 90 minutes; discussion, 90 minutes; fieldwork, six to eight hours. Designed for juniors/seniors. Students interested in study of urban youth and their education acquire comprehensive and first-hand knowledge of factors affecting these students' achievement. Field study component requires students to intern with youth in schools and after-school programs. P/NP or letter grading.

**M191. Biological Bases of Psychiatric Disorders. (4)** (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychology M117J.) Lecture, three hours. Requisite: Neuroscience M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**192A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (4)** (Formerly numbered M192A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

**192B. Field Studies Seminar: Health Outreach Issues and Interventions. (2 or 4)** (Formerly numbered M192B.) Discussion, two hours; fieldwork, three to four hours (2-unit course) or six to eight hours (4-unit course). Requisite: course 192A. Dynamics of multidisciplinary approaches to preventive health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

**199. Special Studies in Psychiatry. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in Office of Education, C8-202 NPI&H.

## Graduate Courses

**M203. Molecular Neurobiology. (4)** (Same as Neuroscience M203.) Lecture, three hours; discussion, one hour. Preparation: basic biochemistry. Requisites: Biological Chemistry 201A, 201B. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

**M204. Cellular and Molecular Developmental Neurobiology. (4)** (Same as Neurobiology M204, Neuroscience M204, and Physiology M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A and 201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**207A-207B-207C. Hypnosis Seminars. (2-2-2)** Experiential seminars to prepare mental health professionals for adult and child clinical applications, involving didactics, demonstrations, trainee practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnoanesthesia, self-hypnosis), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnoanalysis. Emphasis on acquiring skills for clinical practice. S/U grading.

**208A-208B. Clinical Neuropsychology. (2-2)** (Formerly numbered 208A-208B-208C.) Lecture, 90 minutes. Designed for graduate and postgraduate students. Introduction and review of neuropsychological concepts, including functional neuroanatomical systems of the brain, analytic and synthetic activities of the brain, effects of generalized and focal brain impairment on behavior, and introduction to use of neuropsychological test instruments. Letter grading.

**M209. Introduction to Neural Networks: Modeling and Applications. (4)** (Same as Biomathematics CM208C.) Lecture, three hours. Preparation: calculus. Introduction to theory of neural networks and their applications. Survey of current neural-network models of cognitive functions. S/U or letter grading.

**M210. Seminar: Psychocultural Studies and Medical Anthropology. (4)** (Same as Anthropology M234.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. S/U or letter grading.

**M213. The Individual in Culture. (4)** (Same as Anthropology M235.) Seminar, three hours. Designed for graduate students.

**M214. Cross-Cultural Studies of Socialization and Children. (4)** (Same as Anthropology M236P.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

**M221. Cellular and Molecular Neurochemistry. (4)** (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Pharmacology M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M222. Transcultural Psychiatry. (4)** (Same as Anthropology M234P.) Lecture, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

**226A-226B. Childhood Psychopathology Research Seminars. (2-2)** Seminar, 90 minutes. Current research in causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood disturbances.

**M231. Hispanic Mental Health Issues and Treatment. (2)** (Formerly numbered 231.) (Same as Social Welfare M203E.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

**M232. Causal Inference. (4)** (Same as Biostatistics M235.) Lecture, three hours; discussion, one hour. Requisite: Biostatistics 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman. Rubin model for causal inference, propensity scores. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed. Letter grading.

**M234. Affective Disorders. (2 or 4)** (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

**M235. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4)** (Same as Anthropology M236Q, Education M222A, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

**236A-236B-236C. Psychology Interns Seminars. (1-1-1)** Seminar, 90 minutes. Current topics in clinical psychology. Group-selected topics for discussion pertaining to psychopathology, diagnostic evaluation, and modalities of treatment. S/U grading.

**237. Seminar: Behavioral Neuroimmunology. (1)** Seminar, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

**M238. Survey Research Techniques in Psychocultural Studies. (4)** (Same as Psychology M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

**M240. Assessment and Treatment of African American Families. (3)** (Same as Afro-American Studies M240.) Seminar, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with an African American child and family.

**242. Parent and Child Psychotherapy Seminar. (1)** Preparation: current experience in psychoanalytically oriented child psychotherapy. Seminar meets throughout year. During Summer Quarter emphasis on initial clinical and research evaluation as well as early treatment of the child and family. During Fall, Winter, and Spring Quarters instructors use videotaped sessions and notes from their own clinical work to discuss such topics as diagnostic criteria, family system treatment formulations stressing work with parents and children, and such theoretical and technical issues as transference, resistance, overdetermined nature of symptoms, and termination. Student presentations encouraged in order to amplify clinical and theoretical issues and to become familiar with ongoing cases which are part of a systematic outcome study.

**243A-243B-243C. Mental Retardation and Chronic Medical Illness Interdisciplinary Core Curriculum. (1-1-1)** Lecture, 90 minutes. Survey series on major topic areas of mental retardation and chronic medical illness, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in interdisciplinary framework as generic information independent of discipline. S/U grading.

**M246. Psychological Aspects of Mental Retardation. (4)** (Same as Psychology M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

**M249. Neurobiology of Sleep. (3)** (Same as Neuroscience M259 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

**M251. Mental Health Services. (4)** (Same as Health Services M249J.) Lecture, three hours. Requisites: Health Services 200A, 200B, 200C. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

**253. Seminar: Child Development. (1)** Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays major role in each session.

**M254. Supporting Families of Children with Special Needs. (2)** (Formerly numbered 254.) (Same as Social Welfare M203D.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

**M255. Functional Organization of Behavior. (2)** (Same as Neuroscience M255.) Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

**256. Basic Clinical Child Psychopathology. (1)** Weekly seminar covering basic clinical aspects of child psychopathology. Readings provided for basis of discussion on topics including interviewing of parents and children, diagnosis, and related syndromes. S/U grading.

**257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders. (3-3-3)** Laboratory, 90 minutes; didactic, 90 minutes. Didactic and practical training in communication and its dysfunction as these relate to language disabilities seen in interdisciplinary medical setting. Provides background for graduate and postdoctoral students who plan to engage in clinical work and/or clinical research in which language disturbances of childhood and adulthood are relevant.

**259. Legal and Ethical Issues with Vulnerable Populations. (3)** Lecture, 90 minutes; laboratory, three and one-half hours. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people); philosophies, ethics, ethical codes, issues, and how to resolve them. Use of videotapes and discussion of cases.

**261. Advanced Seminar: Child and Adolescent Psychopharmacology. (1)** Use of problem-based teaching methods and critical reviews of medical literature as basis for rational pharmacotherapy in children and adolescents. Major focus on development of a clinical decision-making process, given the limited scientific evidence supporting pharmacological practice in the field. S/U grading.

**262A-262B-262C. Clinical Fieldwork in Developmental Disabilities and Chronic Illness. (1 to 4 each)** Requisites or corequisites: courses 243A, 243B, 243C. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in various community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

**M266. Advanced Magnetic Resonance Imaging. (4)** (Same as Biomedical Physics M266 and Neuroscience M267.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

**M270. Neural Basis of Memory. (4)** (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

**M272. Psychological Anthropology. (4)** (Same as Anthropology M234Q.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

**M273. Advanced Seminar: Medical Anthropology. (4)** (Same as Anthropology M263Q, Community Health Sciences M244, and Nursing M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

**275A-275B. Sociobiology Seminars. (2-2)** Review of sociological theory as it applies to adult bonding behavior: kin-selection theory, reciprocal altruism theory, mate selection theory, and bond strategy theory. Bonds viewed primarily from biological rather than psychological perspective. In Progress and S/U or letter grading.

**M277. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4)** (Same as Psychology M285.) Seminar, 90 minutes. Designed for graduate students. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

**M280. Politics of Reproduction. (4)** (Same as Anthropology M269P.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

**281. Behavioral Therapy in an Educational Setting. (4)** Lecture, one hour; laboratory, six to 10 hours. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

**M282. Anthropology of Human Body. (4)** (Same as Anthropology M234T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

**M283. Anthropology of Genetic Knowledge. (4)** (Same as Anthropology M265.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape our understandings of genetic discoveries and how genetic information is used to create conceptions of the self and society. Letter grading.

**M285. Functional Neuroimaging: Techniques and Applications. (4)** (Same as Biomedical Physics M285.) In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U or letter grading.

**M286A-M286B-M286C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2)** (Same as Biostatistics M206A-M206B-M206C.) Seminar, 90 minutes. Requisite: Biostatistics 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

**287. Small Group Cognitive/Behavioral Interventions. (4)** Lecture, three hours. Presentation of brief therapeutic interventions for adults and children at risk for suicide, depression, conduct problems, and HIV, with didactic and experiential techniques.

**M288. Social and Behavioral Factors of HIV/AIDS: Global Perspective. (4)** (Same as Community Health Sciences M294.) Lecture, four hours. Requisites: Community Health Sciences 100 and Epidemiology 100, or prior social sciences courses. Overview of social and behavioral factors which influence both transmission and prevention of HIV/AIDS throughout the world. Letter grading.

**M289. Intervention to Reduce HIV and Its Consequences. (4)** (Same as Community Health Sciences M299.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations. Letter grading.

**290. Los Angeles HIV-Community Colloquia. (1)** Lecture, two hours. Examination of emerging scientific HIV-related research. Discussion of policy issues, theories, and designs of HIV-related services and programs and shifting epidemiology of the virus and disease. S/U grading.

**291. Seminar: Behavioral Biology — Rage. (4)** (Formerly numbered 291A-291B.) Seminar, three hours. Graduate and professional seminar focusing on proximate causation, development, and evolution of human behavior and vertebrate social organization. Emphasis on deviant and rage behavior. S/U or letter grading.

**295A-295B-295C. Advanced Seminars: Substantive Issues in Substance Abuse I, II, III. (2-2-2)** S/U grading:

**295A.** Neurobiology and psychopharmacology of drug abuse, as well as epidemiology and prevention. Discussion of pros and cons of various treatment modalities for drug dependence.

**295B.** Drug use patterns and treatment issues in specific populations such as women, adolescents, the homeless, the multiply diagnosed, as well as different ethnic populations. Exploration of relationship between drug abuse, sexuality, and HIV/AIDS.

**295C.** Theoretical perspectives on drug use and abuse as well as policy and ethical aspects of drug abuse research. Research design and analysis issues pertinent to drug abuse research.

**298. Current Topics in Biobehavioral Sciences. (1 to 4)** Current issues in biobehavioral sciences offered on selective basis depending on instructor interest and topical relevancy of problems. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**402. Journal Club. (1)** Seminar, two hours; outside study, two hours. Presentation of participants' current research. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

**403. Individual Case Supervision. (1 to 4)** Preparation: submission of written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in Office of Education, C8-202 NPI&H. One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management.

**M424. Functional Magnetic Resonance Imaging Journal Club. (1)** (Same as Biomedical Physics M424.) Discussion, 90 minutes. Directed reading and discussion of current topics and developments in functional magnetic resonance imaging. S/U grading.

**425. Teaching Case Conference. (1)** Review of diagnosis and treatment of full spectrum of disorders, with expert off-unit consultants.

**429. Child Outpatient Team. (1)** Weekly team meetings to coordinate clinical activities of trainees in Child Outpatient Department. Discussion of literature and theories related to selected cases. S/U grading.

**449. Parent Training Intervention Workshop. (2)** Lecture, 90 minutes; discussion, one hour. Advanced clinical trainees learn behavioral techniques of assessment and treatment of parent/child problems. Lectures, case presentations, and workshops on various skills necessary.

**471. Grand Rounds. (No credit)** Designed for second-year residents in Child Service and child psychiatry fellows. Each month one second-year child psychiatry fellow presents a major clinical problem. Senior faculty discussants preside. Presenting trainees expected to cover pertinent literature and to assemble critical elements of information on case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

**478. Clinical Genetics Rounds. (No credit)** Designed for medical graduates. Weekly clinical rounds on patients seen in the wards during preceding week. House staff and others involved in clinical work may attend. Usually in-depth discussion of medical and genetic aspects of one or more disorders presented.

**479. Genetics Clinic Presentation. (No credit)** Weekly clinical teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder.

**480. Analysis of Human Chromosome Studies. (1)** Chromosome karyotypes prepared in cytogenetics laboratory during preceding week presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome stains.

**482. Clinical Practicum in Childhood Anxiety and Related Disorders. (3)** Clinic, two hours. Training in cognitive/behavioral assessment and treatment of children and adolescents with anxiety and related disorders. Didactic and experiential training, including direct patient care, clinical supervision, and participation in weekly team meetings. Letter grading.

**485. Human Genetics Seminar. (No credit)** Seminar, one hour. Preparation: introductory genetics course. Weekly lecture series intended for those interested in human genetics or in specific topic to be presented. Speakers are invited for their expertise or research in some special area related to human genetics and may be from UCLA or elsewhere. No grading.

**596P. Individual Studies in Psychiatry. (2 to 12)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in Office of Education, C8-202 NPI&H. Directed individual research and study in psychiatry at graduate level.

### Assistant Professors

Bernard W. Balleine, Ph.D.  
Dean V. Buonomano, Ph.D.  
Stephen A. Engel, Ph.D.  
Shelly L. Gable, Ph.D.  
Curtis D. Hardin, Ph.D.  
Martie G. Haselton, Ph.D.  
Yuen J. Huo, Ph.D.  
Barbara Knowlton, Ph.D.  
Matthew D. Lieberman, Ph.D.  
Traci L. Mann, Ph.D.  
Dario L. Ringach, Ph.D.

### Adjunct Professors

Dennis J. McGinty, Ph.D.  
James G. Miller, Ph.D.  
Jill M. Waterman, Ph.D.  
Dahlia Zaidel, Ph.D.

### Adjunct Associate Professors

Jacqueline D. Goodchilds, Ph.D.  
Jaana H. Juvonen, Ph.D.  
William J. McCarthy, Ph.D.  
Nancy J. Woolf, Ph.D.

### Adjunct Assistant Professors

Iris Firstenberg, Ph.D.  
Lisa Travis, Ph.D.

## Scope and Objectives

Psychology is a subject of considerable interest to most people — we all tend to practice

some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments of its kind in the country.

The structure of the undergraduate curriculum has been designed to reflect the extensive breadth of psychology — in terms of both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as psychobiology, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience — either in the form of laboratory courses or by participation with faculty and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that can give them new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in areas such as behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement, and social psychology. The program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

## Undergraduate Study

### Psychology B.A.

The Psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent

background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

### Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychology major. They are then identified as Prepsychology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychology major. The following required courses must be taken for a letter grade (a C– or better in each course and a 2.3 overall grade-point average in the preparation courses) before students reach 110 total units (transfer students must complete all remaining preparation courses by the end of the first year of enrollment): Anthropology 7 or 10 or 12; Life Sciences 1 or 15 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus; Physics 10 or 1A or 6A; one course from Philosophy 1, 4, 6, 7, 8, 9, 21, 22; Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Prepsychology major before the term in which they plan to enroll. It is recommended that students with no background in introductory statistics take Statistics 10 before enrolling in course 100A.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

#### Transfer Students

To be admitted as Psychology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one human evolution course,

one biology course, one general chemistry course (or one year of high school chemistry with a C or better), one general physics course, one philosophy course, one introduction to psychology course, one psychological statistics course, one psychology research methods course, and one course from statistics (recommended), finite mathematics, calculus, computer science theory, or computer programming in C++.

### The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Five core courses selected from Psychology 110, 115 (or M117A, M117B, and M117C), 120A, 120B, 127, 130 (or one course from 133A through 133I), 135; (2) one laboratory/fieldwork course from 111, 113, 116, 121, 126, 131, 136A, 136B, 136C, 171A, 174, 186A, 186B, 186C; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper division psychology electives.

All upper division courses must be taken for a letter grade. A C– or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

### Cognitive Science B.S.

The Cognitive Science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

### Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Precognitive Science major. They are then identified as Precognitive Science majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Cognitive Science major. Questions about the

major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

The following required courses must be taken for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses) before students reach 130 total units: Life Sciences 1 or 15 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 31A, 31B; Philosophy 7 or 8 or 9; Physics 10 or 1A or 6A; Program in Computing 10A, 10B, and one course from 15 or 20 or 40; Psychology 10, 85, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Precognitive Science major before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

#### Transfer Students

To be admitted as Cognitive Science majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course, one general chemistry course (or one year of high school chemistry with a C or better), two calculus/analytical geometry courses, one general physics course, one philosophy course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, one computer programming course in C++, and one other computer programming course.

### The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Psychology 115 (or M117A, M117B, and M117C), 120A or 120B, and one course from 124A through 124G; (2) one course from 186A or 186B or 186C and one course from 121, 186A, 186B, 186C, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology 110, 112A through M119N, 123, 124A through 124G (if taken for the major, may not be applied as an elective), 130, 133B, 135, 142H, 150, 151, 187A, 189, 190B or 190C (if content is approved by the Undergraduate Advising Office and courses have not been applied toward the Psychology 188A or 188B requirement), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Communication Studies 156, Computer Science 111 through M196B, Ethno-

musicology 172A, Linguistics 103 through C185B, Mathematics 110A through 171, Philosophy 124 through 136, Statistics 100A, 100B, 100C, M120A, M120B; (4) two terms of Psychology 188A or 188B (may be fulfilled by taking any two courses from 188A, 188B, or 190C, provided content is approved by the Undergraduate Advising Office).

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper division cognitive science electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements. With the exception of Psychology 188A and 188B, each course must be taken for a letter grade.

## Psychobiology B.S.

The Psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

### Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychobiology major. They are then identified as Prepsychobiology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychobiology major.

### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Also required are Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Prepsychobiology major before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

All core curriculum courses must be taken for a letter grade (a C– or better in each course and a 2.0 overall grade-point average in the core curriculum) before students reach 150 total units. Psychology 100A and 100B must be completed before students reach 130 total units. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

### Transfer Students

To be admitted as Psychobiology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, one semester of organic chemistry with laboratory, one introduction to psychology course, one psychological statistics course, and one psychology research methods course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

### The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Organismic Biology, Ecology, and Evolution 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A, M117B, and M117C), 116, 120A or 120B; (2) one course from Psychology 127, 130, 133A through 133I, 135; (3) 16 units of graded elective courses from the following list: Organismic Biology, Ecology, and Evolution 112, 113A, 114 (no more than one from this group), Psychology M117A, M117B, M117C, M117J, M117K, 119A through M119O, 190C (only if content is approved by the Undergraduate Advising Office), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Chemistry and Biochemistry 153A, 153L, Molecular and Medical Pharmacology 110A, 110B, Molecular, Cell, and Developmental Biology 104, 138, C139, CM156, 171, M185A, Neuroscience 151, M174, Organismic Biology, Ecology, and Evolution 102, C104, 105, 106, 110, 111, C115, 117, C119, 120, 121, 122, 124 (only 4 units may be applied toward the major), 131 (only 4 units may be applied toward the major), C135, 146, M158, 164, M166, 167, 179, Physiological Science 142, C144, 147, M173.

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and 10 units of upper division psychobiology electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

## Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduates closer to understanding research and its applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 188A, 188B, 192, 193, 194A, 194B, 199, or the Student Research Program (SRP) through the College of Letters and Science. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

## Honors

### Honors Courses

Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

### Honors Program

Psychology, Cognitive Science, and Psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 190A, 190B, 190C) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. Other requirements may apply. Consult the Undergraduate Advising Office during Spring Quarter for further information and application forms. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors.

## Psychology Research Opportunity Programs

The Psychology Research Opportunity Programs (PROPS) represent a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of PROPS is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for PROPS takes place each Fall Quarter. Students selected to participate are awarded stipends for Winter and Spring Quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, stu-

dents are required to attend weekly seminars covering such topics as graduate school, careers in academia, and research opportunities in various fields of psychology. Prior research experience is not required. This is an excellent opportunity for students to begin their research careers and acquire the needed experience to pursue advanced studies.

## Developmental Disabilities Immersion Program and Concentration

The Developmental Disabilities Immersion Program (DDIP), cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Center for Experiential Education and Service Learning (CEESL), provides a community learning environment for undergraduate students who devote two quarters to the intensive study of developmental disabilities. Each year a group of 30 students is selected for the program which runs during Winter and Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required courses include Psychology/Psychiatry M180A, M180B, M181A, M181B. Courses are designed to foster discussions integrating students' field and research experiences. Lectures and discussions explore biological, psychological, and social questions concerning causes and treatment of developmental disabilities. Also covered is an analysis of programs for the care and training of individuals with developmental disabilities. The fieldwork component gives students the opportunity to apply theories and concepts learned in their coursework to actual settings involving individuals with developmental disabilities. Students also undertake a two-quarter research project under the guidance of a UCLA faculty member.

To earn a concentration, majors in Psychology, Cognitive Science, and Psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from the Center for Experiential Education and Service Learning, 160 Powell Library. Applications are due the Spring Quarter prior to the academic year in which students wish to participate in DDIP.

The following courses are required for the concentration: Psychology 127 (may also be applied as one of the three upper division electives required for the Psychology major), 130 or one course from 133A through 133I (also satisfies a core requirement for the Psychology major), M180A, M180B, M181A, M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. If a psychology major earns the DDIP concentration, upper division elective credit for Psychology M180A, M180B, M181A, M181B does not apply toward the major. Students in the department who complete the requirements receive a

departmental certificate of completion at graduation; they must notify the department during the term they plan to graduate to receive the certificate. The concentration does not appear on the diploma or transcript.

Interested students should contact the DDIP coordinator at the Center for Experiential Education and Service Learning, 160 Powell Library, (310) 825-7867, for information regarding admission and an application.

## Computing Specialization

Majors in Psychology, Psychobiology, and Cognitive Science may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15, 20, 30, 40, or 60, and (3) completing at least three courses from Psychology 85, 121, 142H, 150, 186A, 186B, 186C (one 199 course may be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor's degree in their major and a specialization in Computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.

## Applied Developmental Psychology Minor

The Applied Developmental Psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduates how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including Cognitive Science, Psychobiology, and Psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1611 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.

*Required Lower Division Course (4 units):* Psychology 10.

*Required Upper Division Courses (24 units):* Psychology 133X and 133Y (to be taken concurrently with the two-term internship described below) and four additional courses, of which at least three must be upper division, from Education 125A, Linguistics C130, C135, Psychology 129F, 130, 131, 132, 133A through 133I, M176, 197 (content must be approved by the Undergraduate Advising Office), 199 (content must be approved by the Undergraduate

Advising Office), Sociology 136, M174. One of the four additional courses must include either Psychology 130, one course in the 133 series, or 197 (content must be approved by the Undergraduate Advising Office).

*Internship Requirement:* Students work as interns for two academic terms at an approved daycare center/school and enroll concurrently in Psychology 133X and 133Y. The internship provides hands-on experience working with young children as teacher's aids and opportunities for observing children. By completing an additional one-term internship (see the director of the Infant Development Program, 1611 Franz Hall, for details), students may meet many of the "Teacher Qualifications and Duties" outlined in Section 101316.2 under Title 22, Division 12, California Department of Social Services.

No more than two courses may be applied toward both the students' majors and this minor. All minor courses, except for the internship courses, must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Cognitive Science Minor

The Cognitive Science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster from four clusters of upper division courses that have been organized to reflect different aspects of cognitive science. Students take three courses within their primary cluster and two additional courses from the remaining clusters (secondary clusters).

The minor is open to all enrolled UCLA students, other than Cognitive Science majors, who have an overall grade-point average of 2.0 or better. Students must make an appointment with a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730, to enter the minor and receive counseling on how to select a primary cluster.

*Required Courses (28 units):* Psychology 85 and one course from 15, 100B, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

Students must also select (with approval of the Undergraduate Advising Office) and complete one of the following four primary clusters: (1) *biological basis of cognition cluster* — three

courses from Linguistics C135, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), M117K, 119B, 119F, M119L, M119N; (2) *computation and modeling cluster*— three courses from Biomathematics 108, Computer Science 161, 163, Psychology 150, 151, 186A, 186B, 186C (at least one course must be from Computer Science 161, Psychology 186A, 186B, 186C); (3) *human cognition cluster*— Psychology 121 and two courses from 112C, 120A or 120B, 124A through 124F, 133B, 133BH, 133C, 133E; (4) *mind and language cluster*— three courses from Linguistics 120A, 120B, 125, C130, C132, C135, C185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 122, 123, 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

No more than two courses may be applied toward both the students' majors and this minor. All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Infant Development Program

The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 133X, 133Y, and 193. The program is located in Franz Hall and provides child care for about 15 infants ranging in age from three months to three years.

## Clinic for the Behavioral Treatment of Children

The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as children with autism and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relation to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

## UCLA Psychology Clinic

The UCLA Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to children and adults, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of research projects through the clinic.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Psychology offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Psychology.

### Admission

The department does not admit candidates for the M.A. degree only, although students may be awarded the M.A. en route to the Ph.D. A departmental brochure describing the graduate program in psychology in detail is available from the department.

Admission to the Ph.D. program normally requires an undergraduate degree in psychology. However, students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only.

Applicants should mail the following documents directly to the department (by December 15 for clinical area applicants and December 30 for applicants to other areas) to be considered for admission the following Fall Quarter: (1) *UCLA Application for Graduate Admission*, available in 3453 Franz Hall, (2) three letters of recommendation, (3) two official transcripts from each college attended, (4) scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last five years), (5) scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing system (IELTS) examina-

tion, required of all international applicants whose native language is not English.

Interviews (in person or by phone) are required for clinical area finalists.

Students entering the graduate program must demonstrate adequate breadth of preparation in psychology and related disciplines. Students are expected to have taken courses equivalent to the following: (1) Psychology 100A, (2) two courses from Psychology 110, 115, and either 120A or 120B, and (3) two courses from Psychology 127, 130, 135. In addition, it is recommended that students have the following college-level coursework: one course in biology or zoology, one course in mathematics (such as calculus), and two courses in the physical sciences (physics and/or chemistry). A course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses. The recommended courses may be waived by the student's adviser.

Students who have completed any of the undergraduate majors offered by the UCLA Department of Psychology have satisfied the undergraduate preparation requirements. Students who have not had training in the areas cited above may either take the missing courses or have their area evaluate their preparation and, in consultation with the area, plan a program of study that provides the appropriate breadth.

The individual program may include undergraduate coursework, graduate coursework, readings followed by an examination, or some combination of these. Emphasis is on breadth and preparation, both within and outside the department. The plan of study should include a firm date of completion and requires approval of the graduate affairs committee. Continuation in the Ph.D. program is contingent on satisfactorily clearing undergraduate deficiencies by the end of the fourth quarter in residence.

## Master's Degree

The M.A. degree is awarded through the comprehensive examination plan. Requirements are nine graduate courses, including required courses in statistics and in research methods (research project must be completed) and at least three of the four required Ph.D. core courses.

## Doctoral Degree

Ph.D. students are required to obtain a thorough background in research methodology and psychological theory. Major specialized training is available in the following areas of psychology: behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, learning and behavior, measurement and psychometrics, or social psychology. Students admitted in either the behavioral neuroscience or cognitive area may take the program in cognitive neuroscience. The course requirements serve as a combined major and minor. Students who select this option remain

in their area of admission for administrative purposes.

Students are required to complete core and major and minor area course requirements for the Ph.D. Details are included in *Program Requirements for UCLA Graduate Degrees*. In addition to major area course requirements, students in clinical psychology must complete supervised preinternship practicum and supervised internship requirements. All students are required to complete a teaching practicum.

Written and oral qualifying examinations are required. The first is an examination administered by the major area that examines in breadth the student's knowledge of the major field. The second is an individualized examination in the area of specialization and is required by the behavioral neuroscience, clinical, measurement, and social areas.

Following successful completion of these examinations, students take the University Oral Qualifying Examination.

## Psychology

### Lower Division Courses

**10. Introductory Psychology. (4)** Lecture, four hours. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research. P/NP or letter grading.

**15. Introductory Psychobiology. (4)** Lecture, three hours. Designed for nonmajors. Survey of genetic, evolutionary, physiological, pharmacological, and experiential factors affecting behavior. Using comparative approach where appropriate, emphasis on relevance of biological mechanisms to understanding of humans and their interaction with their environment.

**85. Introduction to Cognitive Science. (4)** Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

**88A-88Z. Lower Division Seminars. (4 each)** Seminar, three hours. Enforced requisite: course 10. Limited to freshmen/sophomores. Intensive analysis in seminar situations of selected topics of current psychological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit:

**88A. Stress, Adaptation, and Coping.** Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

**97. Variable Topics in Psychology. (4)** Lecture, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; lecture format designed for freshmen/sophomores. P/NP or letter grading.

### Upper Division Courses

**100A. Psychological Statistics. (4)** (Formerly numbered 41.) Lecture, three hours; laboratory, two hours. Requisites: course 10, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for pre-majors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

**100B. Research Methods in Psychology. (6)** (Formerly numbered 42.) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10, 100A with grades of C- or better for prepsychology and prepsychobiology, C or better for precognitive science. Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and non-experimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

**M107. Asian American Personality and Mental Health. (4)** (Same as Asian American Studies M117.) Lecture, three hours. Requisite: course 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

**110. Fundamentals of Learning. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in this area. P/NP or letter grading.

**111. Learning Laboratory. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B, 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals. Letter grading.

**112A. Basic Processes of Motivated Behavior. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 110. Designed for juniors/seniors. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals. P/NP or letter grading.

**112B. Psychobiology of Fear and Anxiety. (4)** Lecture, three hours. Requisites: courses 10, 100A, 110. Recommended: course 115. Designed for juniors/seniors. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

**112C. Principles of Skill Acquisition. (4)** Lecture, three hours. Requisite: course 110 or 120A or 120B (recommended). Designed for Psychology majors. Investigation into principles of human skill learning, with focus on general principles of skill learning derived from laboratory settings. These principles have relevance to various industrial or occupational settings, musical performances, vehicle control, sport, and other activities in which complex perceptual-motor skills must be acquired with practice. Major topics include laboratory measurement procedures, effective structure of practice settings, feedback and knowledge of results, learning of automaticity, individual differences, and evaluation of various theories of skill learning. P/NP or letter grading.

**113. Behavior and Alcohol Laboratory. (4)** Discussion, two hours; laboratory, four hours. Requisites: courses 10, 100A, 100B. Students conduct an experiment studying effects of alcohol on learning and complex processes using paid volunteers. Examination of set and setting and role of individual differences in relation to current theories of alcohol use and abuse. P/NP or letter grading.

**113H. Behavior and Alcohol Laboratory (Honors). (4)** Discussion, two hours; laboratory, four hours. Requisites: courses 10, 100A, 100B. Honors course parallel to course 113. P/NP or letter grading.

**114. Alcoholism. (4)** Designed for juniors/seniors. Theories and research on impact, causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.

**115. Principles of Behavioral Neuroscience. (4)** Lecture, three hours; discussion, one hour. Requisites: course 100A, Life Sciences 2 or 15. Not open to students with credit for course M117A. Designed for juniors/seniors. Nervous system anatomy, physiology, pharmacology, and their relationship to behavior. P/NP or letter grading.

**116. Behavioral Neuroscience Laboratory. (4)** Lecture, one hour; laboratory, three hours. Requisites: courses 100A, 100B, 115 (may be taken concurrently). Designed for Psychobiology and Psychology majors. Laboratory experience with various topics in behavioral neuroscience. P/NP or letter grading.

**M117A-M117B-M117C. Neuroscience: From Molecules to Mind. (5-5-5)** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Physiological Science M180A-M180B-M180C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading:

**M117A. Cellular and Systems Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A or former course 10D or 30 (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

**M117B. Molecular and Developmental Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

**M117C. Behavioral and Cognitive Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisite: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

**M117J. Biological Bases of Psychiatric Disorders. (4)** (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychiatry M191.) Lecture, three hours. Requisite: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**M117K. Introduction to Functional Anatomy of Central Nervous System. (4)** (Same as Neuroscience M102.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

**118. Comparative Psychobiology. (4)** Requisite: course 115. Designed for junior/senior majors. Survey of determinants of species-specific behavior, including genetic influences and learning.

**119A. Neuropsychopharmacology. (4)** Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Analysis of basic pharmacologic principles to include interaction of drugs with neurochemically significant substances in the brain.

**119AH. Neuropsychopharmacology (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 119A.

**119B. Human Neurophysiology. (4)** Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Exploration of biological basis of human cognitive processing, with emphasis on function of cerebral cortex.

**119D. Behavioral Pharmacology. (4)** Requisite: course 115. Designed for juniors/seniors. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neuronal function.

**119DH. Behavioral Pharmacology (Honors). (4)** Lecture, three hours; discussion, one hour. Experimental and theoretical treatment of drug-behavior relationships; pharmacological approaches to mood, aggression, learning, motivation; experimental studies of addiction.

**119E. Stress and Bodily Disease. (4)** Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Psychobiological processes as they pertain to development of stress responses and disease states. Consideration of stress-related topics, including behavioral and pharmacological variables in stress and stress management.

**119F. Neuron Circuitry and Behavior. (4)** Requisites: course 115, Molecular, Cell, and Developmental Biology 171. Designed for juniors/seniors. Presentation of current data and theory concerning how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on operation of these processes in well-defined neural circuits.

**119G. Psychobiology of Pain and Pain Inhibition. (4)** Lecture, three hours. Requisite: course 115. Designed for seniors. Lectures and discussions on neural mechanisms of pain and problem of chronic pain disease.

**119I. Psychophysiology of Motivation. (4)** Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Basic psychophysiology, including brain and endocrine mechanisms, involved in control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

**119J. Ethology: Behavior and Learning. (4)** (Formerly numbered M119J.) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective. P/NP or letter grading.

**M119L. Human Neuropsychology. (4)** (Same as Neuroscience M119L.) Lecture, three hours. Requisites: courses 115 (or M117A and M117C), 120A or 120B. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

**119M. Physiological Psychology of Learning. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 115. Designed for juniors/seniors. Introduction to classical and current literature on mechanisms of learning, considering both cell-biological mechanisms and brain circuitry.

**M119N. The Visual System. (4)** (Same as Neuroscience M119N.) Lecture, three hours. Requisite: course 115 or Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Physiological Science 111A. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

**M119O. Psychology of Aging. (4)** (Same as Gerontology M119O.) Requisite: course 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

**119P. Mapping Mind through Its Molecules. (4)** Lecture, four hours. Requisite: course 15 or 115. Designed for juniors/seniors. Explanation of how neural molecules provide unique window into mind. Topics include neurotransmitters, receptors, ion channels, and signal transduction molecules. Roles these molecules play in information processing, consciousness, learning, memory, neural plasticity, degeneration, and psychiatric disorders. P/NP or letter grading.

**120A. Cognitive Psychology. (4)** (Formerly numbered 120.) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Survey of cognitive psychology: how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking. P/NP or letter grading.

**120B. Sensation and Perception. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Acquisition of information about physical world through basic sensory mechanisms and perceptual processes. Perception of objects, surfaces, space, motion, and events. Connections between information, computations, and biological mechanisms in vision, audition, and other systems. P/NP or letter grading.

**121. Laboratory in Cognitive Psychology. (4)** Laboratory, four hours. Requisites: courses 10, 100A, 100B, 120A or 120B (may be taken concurrently). Designed for Psychology and Cognitive Science majors. Laboratory experience with methods and phenomena from research on human perception, memory, and cognition. P/NP or letter grading.

**122. Language and Communication. (4)** Lecture, three hours. Requisite: course 10. Introduction to psychology of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

**123. Psycholinguistics. (4)** Designed for juniors/seniors. Current theory and research in psycholinguistics: survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

**124A. Advanced Topics in Sensation and Perception. (4)** Lecture, three hours. Requisites: courses 10, 100A, 120A or 120B. Designed for juniors/seniors. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches. P/NP or letter grading.

**124AH. Sensation and Perception (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 124A.

**124B. Visual Information Processing. (4)** Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A, 120A or 120B. Exploration of issues in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects. P/NP or letter grading.

**124C. Human Memory. (4)** Lecture, two hours; discussion, one hour. Requisite: course 120A or 120B. Designed for juniors/seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

**124D. Principles of Human Performance. (4)** Designed for Psychology majors. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesthesia, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performances, vehicle control, and sport.

**124E. Language and Cognition. (4)** Lecture, three hours. Requisites: courses 10, and 120A or 120B. Designed for juniors/seniors. Recent theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition. P/NP or letter grading.

**124F. Thinking. (4)** Lecture, three hours. Requisite: course 120A or 120B. Analysis of experimental studies of human categorization, reasonings, decision making, problem solving, creativity, and related topics. P/NP or letter grading.

**124FH. Thinking (Honors). (4)** Lecture, three hours. Honors course parallel to course 124F. P/NP or letter grading.

**124G. Cognitive Aging. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 120A or 120B. Designed for juniors/seniors. Recent facts and theories on relations between normal aging and cognition, including perception, language comprehension, learning, memory, thinking, inhibitory processes in attention, sequential processes in action, general slowing phenomenon, and related neuropsychological issues. P/NP or letter grading.

**126. Clinical Psychology Laboratory. (4)** Laboratory, four hours. Requisites: courses 10, 100A, 100B, 127. Designed for departmental majors. Methods, designs, and issues in conduct of clinical psychology research. Students develop and conduct research. Content varies by instructor, with concentration on one of following: schizophrenia, mood disorders, anxiety disorders, childhood disorders, psychophysiological methods, observational methods with couples and families. Letter grading.

**127. Abnormal Psychology. (4)** Lecture, three hours. Requisite: course 10. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns.

**127H. Abnormal Psychology (Honors). (4)** Lecture, three hours. Overview of characteristics of major forms of psychopathology, theories and research on causes of disorder, types of treatment, social and legal issues in mental illness.

**129A. Personality Measurement. (4)** Lecture, three hours. Requisites: courses 10, 100A. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions. P/NP or letter grading.

**129B. Introduction to Psychoanalysis. (4)** Lecture, three hours. Requisites: courses 10, 100A. Development of Freud's ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicott, and Bim. P/NP or letter grading.

**129C. Culture and Mental Health. (4)** Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and American Indians). P/NP or letter grading.

**129D. Personality. (4)** Lecture, three hours. Requisite: course 10. Survey of major topics in field of personality, including personality theory, personality assessment, and physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

**129E. Human Sexuality. (4)** Lecture, three hours. Designed for senior Psychology majors. Overview of psychology of human sexuality. Psychological research, assessment, and therapy described in a format which highlights their significance for understanding human sexual functioning. Psychological mechanisms underlying expression of human sexuality.

**129F. Clinical Psychology of Childhood and Adolescence. (4)** Lecture, two hours; discussion, one hour. Requisite: course 127. Survey of child and adolescent psychopathology and psychotherapy from a developmental perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, and autism, with information on prevalence, causes, common treatments and their effects. P/NP or letter grading.

**130. Developmental Psychology. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence. P/NP or letter grading.

**131. Research in Developmental Psychology. (4)** Discussion, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B, and 130 or one course from 133A through 133I. Designed for Psychology and Cognitive Science majors. Forms of scientific writing; ethics of research, especially with minors; special advantages and problems of asking developmental research questions; relevant methodologies for experimental and observational work; data analyses and data presentation options. Letter grading.

**132. Learning Disabilities in Perspective. (4)** Lecture, three hours. Designed for juniors/seniors. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Topics include interaction of learner and environment, sociopolitical nature of classroom, psychological impact of schooling, grades, and evaluations, process vs. goal focus in learning.

**133A. Adolescent Development. (4)** Lecture, three hours. Requisites: courses 10, 100A. Examination of cognitive, social, physical, and physiological development of the adolescent. P/NP or letter grading.

**133B. Cognitive Development. (4)** Lecture, three hours. Requisites: courses 10, 100A. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. P/NP or letter grading.

**133BH. Seminar: Cognitive Development (Honors). (4)** Seminar, three hours. Honors course parallel to course 133B.

**133C. Language Development. (4)** Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children. P/NP or letter grading.

**133D. Social and Personality Development. (4)** Lecture, three hours. Requisites: courses 10, 100A. Theory and research on social and personality development during childhood. Topics include parent/child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations. P/NP or letter grading.

**133E. Perceptual Development. (4)** Lecture, three hours. Requisites: courses 10, 100A. Topics include origins and development of human perceptual abilities, origins of knowledge about functionally important aspects of the environment, ecological and computational issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

**133F. Psychology and Education. (4)** Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged. P/NP or letter grading.

**133G. Culture and Human Development. (4)** Lecture, three hours. Requisites: courses 10, 100A. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

**133I. Applied Developmental Psychology. (4)** Lecture, three hours. Requisites: courses 10, 100A. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include quality of child care, patterns and ranges of normal child behaviors, developmental disabilities, safety, legal, and public policy issues, child-rearing practices. P/NP or letter grading.

**133X. Applied Developmental Psychology. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 10. Designed for Applied Developmental Psychology minors. Issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing daycare curricula. P/NP or letter grading.

**133Y. Advanced Applied Developmental Psychology. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 133X. Designed for Applied Developmental Psychology minors. Advanced issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing daycare curricula. P/NP or letter grading.

**135. Social Psychology. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Interrelationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena. P/NP or letter grading.

**136A. Social Psychology Laboratory. (4)** Lecture, one hour; laboratory, four hours. Requisites: courses 100A, 100B, 135 (may be taken concurrently). Designed for Psychology majors. Introduction to research designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires. P/NP or letter grading.

**136B. Nonexperimental Methods in Social Psychology. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Research experience with nonexperimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires. P/NP or letter grading.

**136C. Survey Methods in Psychology. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Survey research in psychology, with particular emphasis on surveys of social and political attitudes. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, response rates, questionnaire design, data coding, and analysis. Training in telephone interviewing techniques in laboratories. P/NP or letter grading.

**137A. Sport Psychology. (4)** Lecture, three hours. Designed for junior/senior Psychology majors. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

**137AH. Sport Psychology (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 137A.

**137B. Attitude Formation and Change. (4)** Lecture, three hours. Requisites: courses 10, 100A, 135. Structure and functions of attitudes, their measurement, how they develop, and methods for changing them. P/NP or letter grading.

**137C. Close Relationships. (4)** Lecture, three hours. Requisites: courses 10, 100A, 135. Examination of research and theory about friendship, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles. P/NP or letter grading.

**137D. Introduction to Health Psychology. (4)** Requisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

**M137E. Work Behavior of Women and Men. (4)** (Same as Women's Studies M137E.) Lecture, two and one-half hours. Requisite: course 10 or Women's Studies 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles. P/NP or letter grading.

**137F. Introduction to Sport Psychology. (4)** Lecture, three hours. Designed for juniors/seniors. Survey of topics in sport psychology, including leadership and team dynamics, moral development and aggression, personality, motivation, fan behavior, and performance enhancement. Consideration of youth sport through world-class athletics. P/NP or letter grading.

**137I. Interpersonal Influence and Social Power. (4)** Lecture, three hours. Requisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power relationships in the family, interpersonal influence in everyday life, social power of political figures.

**M137J. Psychology of Language and Gender. (4)** (Same as Communication Studies M124 and Women's Studies M137J.) Lecture, three hours. Requisite: course 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction. P/NP or letter grading.

**M138. Electoral Politics: Political Psychology. (4)** (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 10. Designed for juniors/seniors. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

**M140. Introduction to Study of Aging. (4)** (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**142H. Advanced Statistical Methods in Psychology (Honors). (4)** (Formerly numbered 142.) Lecture, three hours; laboratory, two hours. Requisites: courses 100A, 100B. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression. P/NP or letter grading.

**144. Psychological Tests and Evaluation. (4)** Lecture, three hours. Requisite: course 100A. Further study of principles of measurement, stressing basic concepts. Application to problems of test construction, administration, and interpretation. P/NP or letter grading.

**150. Mathematical Models in Psychology. (4)** Lecture, two hours; discussion, two hours. Requisites: Mathematics 3C or 31B, Computer Science 10C or 10F. Review of theoretical models and experimental evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

**151. Computer Applications in Psychology. (4)** Lecture, two hours; discussion, two hours. Requisite: Computer Science 10C or 10F. Topics include hardware and software computer problems in design, control, and analysis of experiments; programming problems arising in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

**M163. Death, Suicide, and Trauma. (4)** (Same as Sociology M138.) Lecture, three hours. Designed for juniors/seniors. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP or letter grading (letter grading required if course to be applied toward Psychology or Sociology major).

**M165. Psychology of Gender. (4)** (Same as Women's Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

**168. Environmental Psychology. (4)** Lecture, three hours. Requisites: courses 10, 100A. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of basic dimensions of emotional response to physical and social environments, measurement of information of rate of situations, and personality variables that are relevant to environmental theory. Residential, therapeutic, work, and recreational environments within a unified framework. P/NP or letter grading.

**170A. Behavior Modification. (4)** Lecture, three hours. Designed for juniors/seniors. Applied behavior theory; study of application of principles derived from learning theory, as in classical and instrumental (operant) conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug abuse, marital discord, etc. Lectures, discussions, and demonstrations.

**170B. Fieldwork in Behavior Modification. (4)** Discussion, two hours; fieldwork, six hours. Requisite: course 110 with a grade of A or 170A. Fieldwork in applied behavior theory, especially to problems of retarded and autistic children.

**170C. Advanced Fieldwork in Behavior Modification for Nonpsychology Majors. (4)** Lecture, two hours; fieldwork, six hours. Requisite: course 170B. Not open to students with credit for course 171A. Does not fulfill laboratory requirement for majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Review of current research in the field. May not be applied as an elective toward any Psychology Department major.

**171A. Advanced Fieldwork in Behavior Modification for Psychology Majors. (4)** Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Requisite: course 170B. Designed for Psychology majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

**171B. Practicum: Design and Implementation of Behavioral Interventions. (4)** Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Requisite: course 171A. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

**M172. The Afro-American Woman in the U.S. (4)** (Same as Afro-American Studies M172 and Women's Studies M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group. P/NP or letter grading.

**173. Advanced Abnormal Psychology. (4)** Lecture, three hours. Requisites: courses 10, 100A, 127. Examination of research and theory concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety and stress, the schizophrenias, or mood disorders. P/NP or letter grading.

**174. Interpersonal Process Analysis. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B, 127. Designed for Psychology majors. Introduction to conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtship, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged). P/NP or letter grading.

**175. Community Psychology. (4)** Designed for junior/senior Psychology majors. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

**175H. Community Psychology (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 175.

**M176. Communication and Conflict in Couples and Families. (4)** (Same as Communication Studies M116.) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 127. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce). P/NP or letter grading.

**177. Counseling Relationships. (4)** Lecture, three hours. Requisites: courses 10, 100A, 127. Designed for junior/senior Psychology majors. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention. P/NP or letter grading.

**178. Human Motivation. (4)** Lecture, three hours. Designed for juniors/seniors. Examination of theories of human motivation, experimental findings supporting the theories, and history of study of motivation. Topics include sociobiology, conflict, aspiration level, achievement strivings, and causal attributions.

**178H. Human Motivation (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 178.

**179A. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective. (4)** Lecture, three hours. Requisite: course 10. Designed for juniors/seniors. Survey course of psychological aspects of health behavior and health status in major ethnic groups in the U.S. Emphasis on major diseases outlined by the U.S. Public Health Service (USPHS).

**179B. Biomedical and Psychosocial Aspects of AIDS/HIV. (4)** Lecture, three hours. Requisite: course 137D or 179A or Health Services 100. Designed for juniors/seniors. Basics of epidemiology of the disease, routes of transmission, clinical characteristics of AIDS, neurological and psychological aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions.

**M180A. Contemporary Problems in Mental Retardation. (4)** (Same as Psychiatry M180A.) Lecture, three hours. Requisites: courses 10, 100A, and 127 or 130 or 133A through 133I. Corequisite: course M181A. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. P/NP or letter grading.

**M180B. Contemporary Issues in Mental Retardation. (4)** (Same as Psychiatry M180B.) Lecture, three hours. Requisite: course M180A. Corequisite: course M181B. Limited to Immersion Program students. Psycho-educational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. P/NP or letter grading.

**M181A-M181B. Research in Contemporary Problems in Mental Retardation. (4-4)** (Same as Psychiatry M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress and P/NP or letter grading.

**186A. Cognitive Science Laboratory: Introduction to Theory and Simulation. (4)** Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Requisites: course 85, Program in Computing 15. Designed for junior/senior departmental majors. Models in several psychological domains (e.g., visual perception, categorization, reasoning, and problem solving). Types of models include semantic networks, search, production systems, connectionist networks, and mathematical models. Lectures and discussions interwoven with computer simulations written in common LISP.

**186B. Cognitive Science Laboratory: Neural Networks. (4)** Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Recommended preparation: knowledge of calculus. Requisites: course 85, Program in Computing 10A, 10B (or PASCAL). Designed for junior/senior departmental majors. Lectures and laboratory work in neural network modeling of perception and cognition. Specific topics include essential neurophysiology, basic architectures, learning, and programming techniques. Principles illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in PASCAL.

**186C. Cognitive Science Laboratory: Psychophysical Theories and Methods. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 100A, 100B. Designed for junior/senior departmental majors. Lectures and laboratory work that examine perceptual measurement procedures (psychophysical methods) and cognitive processing and decision models on which procedures are based, with particular emphasis on signal detection theory and its applications. Letter grading.

**187A. Psychology and Law. (4)** Lecture, two hours; discussion, two hours. Designed for juniors/seniors. Study of new topics on legal psychology, including suspect identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

**187AH. Psychology and Law (Honors). (4)** Lecture, two hours; discussion, two hours. Honors course parallel to course 187A.

**187B. Advanced Psychology and Law. (4)** Lecture, three hours; discussion, one hour. Requisite: course 187A. Designed for juniors/seniors. Study of additional topics on legal psychology, including gang violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

**188A. Research in Cognitive Science. (4)** Seminar, two hours; laboratory, six hours. Designed for Cognitive Science majors. Practical applications of cognitive science through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

**188B. Fieldwork in Cognitive Science. (4)** Seminar, two hours; fieldwork, six hours. Designed for Cognitive Science majors. Practical applications of cognitive science through fieldwork. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

**189. Ergonomics and Human Factors. (4)** Lecture, three hours. Requisites: courses 10, and 120A or 120B. Designed for juniors/seniors. Examination of human capabilities and limitations in design of human/machine systems such as vehicles, workspaces, and computer software for goals of safety and efficiency. Topics include sources of error, information processing, manual control, training, and personnel selection. P/NP or letter grading.

**189H. Ergonomics and Human Factors (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 189. P/NP or letter grading.

**190A-190B-190C. Honors Course. (4-4-4)** Seminar, two hours. Limited to psychology honors program students. Opportunity for development and analysis of creative ideas through individual research projects with a faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, course 190C may be applied toward elective course requirement for any Psychology Department major.

**192. Practicum in Teaching Psychology. (4)** Laboratory, to be arranged. Limited to junior/senior Psychology, Cognitive Science, and Psychobiology majors. Training and supervised practicum for advanced undergraduates in teaching courses related to psychology. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**193. Fieldwork in Psychology. (4)** Seminar, two hours; fieldwork (approved community setting), six hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Fieldwork in applications of psychology. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**194A. Research in Psychology. (4)** Seminar, one hour; internship (approved research setting), seven hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**194B-194C. Ongoing Research in Psychology. (4-4)** Seminar, one hour; internship (approved research setting), seven hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Minimum of two terms required. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. In Progress and P/NP grading.

**197. Current Issues in Psychology. (4)** Lecture, three hours. Designed for junior/senior majors. Study of selected current topics of psychological interest. Consult *Schedule of Classes* for topics and instructors. Only one graded 197 course may be applied as an elective toward Psychology major. If content is approved in advance by Undergraduate Advising Office, Psychobiology and Cognitive Science majors can petition to use course to satisfy an elective requirement. May be repeated for credit with consent of department.

**199. Directed Individual Research and Studies. (4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to junior/senior Psychology, Psychobiology, and Cognitive Science majors (juniors must have at least 3.0 grade-point average in major). Consult Undergraduate Advising Office, 1531 Franz Hall, for further information and approval forms. Only one 4-unit 199 course may be taken per term and only one for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by Undergraduate Advising Office, 4 units of course 199 may be applied toward elective course requirement for Psychology major and toward Psychology 188 requirement for Cognitive Science major.

## Graduate Courses

**200A. Pavlovian Processes. (4)** Lecture, three hours. Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior. S/U or letter grading.

**200B. Instrumental Conditioning. (4)** Lecture, three hours. Topics include animal learning and conditioning and application of learning principles to goal-directed action, motivational processes, and goal selection in non-human animals. S/U or letter grading.

**200C. Representational Processes. (4)** (Formerly numbered 204F) Lecture, three hours. Preparation: undergraduate learning and physiological psychology courses. Review of experimental data on and models of construction of spatial, temporal, and numerical representations. Explicitly symbolic models compared and contrasted with associative models. Implications for neurobiology of learning and memory. S/U or letter grading.

**201. Current Issues in Learning and Behavior. (1)** Discussion, 90 minutes. Designed for graduate students. Required of learning and behavior students a minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning, behavior, or applied behavioral analyses by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. S/U grading.

**202. Research in Learning and Behavior. (2)** Forum in which graduate students discuss the literature and methodological, analytical, and interpretational issues related to specific topics of research in learning and behavior. S/U grading.

**204A. Basic Motivational Processes. (4)** (Formerly numbered 204E.) Lecture, three hours. Designed for graduate students. Analysis, using a behavioral systems approach, of basic motivated behavior such as feeding, drinking, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior. S/U or letter grading.

**204B. Theories of Learning. (4)** Discussion, three hours. Requisite: course 200A. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

**204C. Evaluative Processes. (4)** Lecture, three hours. Designed for graduate psychology students. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc. S/U or letter grading.

**204D. Fear and Anxiety. (4)** Lecture, three hours. Preparation: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research.

**205A. Behavioral Neuroendocrinology. (2)** Lecture, three hours. Designed for graduate students. Mechanisms of hormone action on the brain that influence behavior, including permanent actions in development and transient actions in adulthood. Using a comparative approach, topics include sexual differentiation, long-term effects of stress, seasonal and other changes in adulthood, and aging.

**205B. Human Neurophysiology. (2)** Lecture, three hours. Designed for graduate students. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modularity and organization, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems.

**205C. Neurotransmitters in Human Disorders of Motor and Cognitive Function. (2)** Lecture, three hours. Designed for graduate students. Detailed analysis of molecules involved in interneuronal communication processes (i.e., neurotransmitters, neurohormones, "neuromodulators," neurotropic agents). Discussion of their roles in normal brain physiology, followed by detailed analyses of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer's disease, Parkinsonism, Huntington's disease, and Down's syndrome dementia.

**205D. Clinical Psychopharmacology. (2)** Lecture, three hours. Designed for graduate students. General principles of brain neurotransmitters, including synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and "atypical" compounds.

**205E. Psychobiology of Emotion and Stress. (2)** Lecture, three hours. Designed for graduate students. Overview of literature on role of the brain and autonomic and endocrine systems in emotion and stress-related responses. Some emphasis on involvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases.

**205F. Physiology of Learning. (2)** Lecture, three hours. Designed for graduate students. Search for anatomical loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible.

**205G. Pain. (2)** Lecture, three hours. Designed for graduate students. Consideration of pain from both basic science and clinical perspectives. Discussion of nociceptors, spinal cord, brain mechanisms, pain inhibition, and role of endogenous opioids. Effects of pain and stress on immunity.

**205I. Motor Coordination. (2)** Lecture, three hours. Designed for graduate students. Elementary and complex units of behavior: reflexes, servomechanisms, oscillators, and central pattern generators. Principles of coordination: efference copy, oscillator coupling, potentiation, and depotentiation. Relation between levels of integration and anatomical levels: transections, lesions, focal stimulation, and single unit recording.

**205J. Homeostatic Drive, Hunger, and Thirst. (2)** Lecture, three hours. Designed for graduate students. Homeostasis used as framework within which ingestive behavior is discussed. Analysis of thirst on basis of depletions of body fluid compartments. Consideration of hunger, focusing on two theories — "Glucostatic" and "Energostatic."

**205K. Vision Neurobiology. (2)** Lecture, three hours. Designed for graduate students. Exploration of anatomy, physiology, and computation in visual system, focusing on retina, visual cortex, and overall performance.

**205L. Cognitive Neuroscience. (2)** Lecture, three hours. Designed for graduate students. Overview of neural basis of higher cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization.

**205M. Neuropsychology of Perception. (2)** Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics include agnosias and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. S/U or letter grading.

**205N. Functional Neuroimaging. (4)** Lecture, three hours. Designed for graduate students. Theory and practice of measuring neural activity in human brain. Methods include electroencephalography, positron emission tomography, and functional magnetic resonance imaging. Domains include memory, vision, language, attention, and emotion. S/U or letter grading.

**M205Z. Behavioral and Systems Neuroscience. (4)** (Same as Neuroscience M205 and Physiological Science M205.) Lecture, three hours. Requisites: Neuroscience M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**207A-207B-207C. Seminars: Physiological Psychology. (4-4-4)** Requisite: course 115.

**210. Comparative Psychobiology. (4)** Requisite: course 115. Survey of determinants of species-specific behavior, including genetic influences and learning.

**212. Evaluation of Research Literature in Physiological Psychology. (1)** Discussion, 90 minutes. Papers of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

**M213. Neuroimaging and Brain Mapping. (4)** (Same as Neuroscience CM272 and Physiological Science M272.) Lecture, three hours. Requisites: Neuroscience M201, M202. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging. Letter grading.

**220A. Social Psychology. (4)** Lecture, three hours. Designed for graduate psychology students. Intensive consideration of concepts, theories, and major problems in social psychology.

**220B. Research Methods in Social Psychology. (4)** Lecture, three hours. Designed for graduate psychology students. Research design and methodological issues in experimental and nonexperimental social research.

**220C. Advanced Social Psychology. (4)** Lecture, three hours. Requisite: course 220A or 220D. Review of contemporary topics and issues in social psychological research and theory.

**220D. Introduction to Social Psychology. (4)** Lecture, three hours. Designed for graduate students. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

**221. Seminar: Attitude Formation and Change. (4)** Discussion, three hours. Requisites: courses 220A, 220B. Social psychological research and theories on opinions and attitudes. Effects of mass communication, social factors in assimilation of information and influence.

**222A. Interpersonal Relations. (4)** Discussion, three hours. Requisite: course 220A. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

**222B. Interpersonal Influence and Social Power. (4)** Seminar, three hours. Preparation: advanced social psychology course (psychological or sociological). Review of theory and research on interpersonal influence and social power, with applications to various power relationships such as supervisor/subordinate, health care professional/patient, doctor/nurse, parent/child, wife/husband, teacher/student, political figures, etc.

**223. Seminar: Social Survey Research. (4)** Seminar, three hours. Requisite: course 220B. Contemporary issues and topics in social survey research methodology.

**225. Seminar: Critical Problems in Social Psychology. (4)** Discussion, three hours. Requisites: courses 220A, 220B. May be repeated for credit with consent of instructor.

**226A-226B-226C. Current Literature in Social Psychology. (2-2-2)** Discussion, 90 minutes. Course 226A is limited to first-year social psychology students. Courses 226B and 226C are open to nonsocial psychology students with consent of instructor. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. S/U grading.

**227. Health Psychology. (4)** Lecture, two hours; discussion, one hour. Preparation: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

**M228A. Proseminar: Political Psychology. (4)** (Same as History M236A and Political Science M261A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**M228B. Seminar: Political Psychology. (4)** (Same as Political Science M261D.) Discussion, three hours. Requisite: course 220A or Political Science M261A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

**M228C. Critical Problems in Political Psychology. (4)** (Same as Political Science M261E.) Discussion, three hours.

**229. Social Cognition. (4)** Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.

**231. Psychology of Gender. (4)** Seminar, three hours. Preparation: one prior course on gender/women's studies. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

**232. Human Sexuality. (4)** Lecture, three hours. Designed for graduate students. Intended to teach students how to carry out research on human sexual behavior. Contents include theory construction, scale development, physiological and endocrinological implications, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.

**233. Seminar: Environmental Psychology. (4)** Requisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man/environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating information rate from environments to arousal and preferences for those environments.

**234. Social Psychological Aspects of Competitive Youth Sport. (4)** Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.

**235. Personality. (4)** Survey of cognitive, analytic, and learning theory approaches to study of personality. Emphasis on intensive exploration of selected concepts and related research.

**M238. Survey Research Techniques in Psychocultural Studies. (4)** (Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

**M239. Personality, Motivation, and Attribution. (4)** (Same as Education M215.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

**240A-240B. Developmental Psychology. (4-4)** Lecture, three hours. Preparation: one undergraduate developmental psychology course. Designed for graduate students. Consideration of variables influencing cognitive social and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.

**241. Current Developments in Developmental Psychology. (1)** Discussion, 90 minutes. Designed for graduate developmental psychology students. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to interweave presentations by graduate students.

**242A-M242G. Seminars: Developmental Psychology. (4 each)** Each course may be taken independently and may be repeated for credit:

**242A. Perceptual Development. (4)** Seminar, three hours. Requisites: courses 240A, 240B. S/U or letter grading.

**242B. Cognitive Development. (4)** Seminar, three hours. Requisites: courses 240A, 240B. S/U or letter grading.

**242C. Socialization. (4)** Seminar, three hours. Requisites: courses 240A, 240B. S/U or letter grading.

**M242D. Social Development and Education. (4)** (Same as Education M217A.) Seminar, four hours. Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice. S/U or letter grading.

**242F. Development of Language and Communication. (4)** Seminar, three hours. Requisites: courses 240A, 240B. S/U or letter grading.

**M242G. Adolescent Development. (4)** (Same as Education M217F.) Seminar, four hours. Designed for graduate students. Review of recent research on physical, cognitive, social, and psychological development during second decade of life. Topics include pubertal development, changes in parent/adolescent relationships, role of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.

**243A-243B. Seminars: Practical and Societal Issues in Developmental Psychology. (4-4)** Seminar, three hours. Requisites: courses 240A, 240B. Socialization processes in human development and implication for social/political, educational, research issues, values, and societal change. In Progress grading.

**244. Critical Problems in Developmental Psychology. (4)** Lecture, three hours. Requisites: courses 240A, 240B. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

**M245. Personality Development and Education. (4)** (Same as Education M217C.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

**M246. Psychological Aspects of Mental Retardation. (4)** (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

**249. Evaluation Research. (4)** Requisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

**250A. Advanced Psychological Statistics. (4)** Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.

**250B. Advanced Psychological Statistics. (4)** Advanced experimental design and planning of investigations.

**251A-251B-251C. Research Methods. (4-4-4)** Designed for graduate psychology students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading (course 251A only).

**252A. Multivariate Analysis. (4)** Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of data having multiple dependent variables. Topics include continuous multivariate distributions, multiple regression, multivariate analysis of variance, discriminant analysis, canonical correlation, principal component analysis. Applications from clinical, cognitive, physiological, and social psychology. Computer methods.

**252B. Discrete Multivariate Analysis. (4)** Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear models, multivariate categorical designs, and ordered categorical variables. Applications from various areas of psychology.

**253. Factor Analysis. (4)** Theory and practice of factor analysis in psychological research. Methods of factor extraction and rotation. Applications of computers to computations in factor analysis.

**254A. Psychological Scaling. (4)** Lecture, three hours. Designed for graduate students. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest.

**254B. Cluster Analysis. (4)** Lecture, three hours. Designed for graduate students. Quantitative methods for classification. Theories and assumptions underlying major clustering methods. Use of methods in exploratory data analysis.

**255. Quantitative Aspects of Assessment. (4)** Fundamental assumptions and equations of test theory. Current problems in assessment.

**M256. Advanced Regression Analysis. (4)** (Same as Political Science M200E.) Seminar, three hours. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

**M257. Multivariate Analysis with Latent Variables. (4)** (Same as Political Science M208D.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factory analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

**258. Special Problems in Psychological Statistics. (4)** Lecture, three hours. Requisites: courses 250A, 250B. Special problems in psychological statistics and data analysis.

**259. Quantitative Methods in Cognitive Psychology. (4)** Requisites: courses 250A, 250B. Number of non-statistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queuing theory, information theory, frequency analysis, etc.

**260A-260B-260C. Proseminars: Cognitive Psychology. (1-1-1)** Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

**261. Perception. (4)** Lecture, three hours. Concepts, theories, and research in study of perception. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

- 262. Human Learning and Memory. (4)** Lecture, three hours. Contemporary theory and research in human verbal learning and memory; verbal and nonverbal learning and memory processes, structure and organization of short- and long-term memory.
- 263. Psycholinguistics. (4)** Lecture, three hours. Contemporary theory and research in psycholinguistics: coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.
- 265. Thinking. (4)** Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, imagery, concepts.
- 266. Cognitive Science. (4)** Lecture, three hours. Major issues in cognitive science. Representation of cognitive structures and higher-level processes. Specific areas include perception, learning and memory, problem solving, and reasoning. Relationships to artificial intelligence.
- 268A-268E. Seminars: Human Information Processing. (4 each)** Seminar, three hours. Topics vary with interests of instructor. Each course may be taken independently and may be repeated for credit. **268A.** Perception; **268B.** Human Learning and Memory; **268C.** Judgment and Decision Processes; **268D.** Language and Cognition; **268E.** Human Performance.
- 269. Seminar: Cognitive Psychology. (4)** Seminar, three hours. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.
- 270A-270B-270C. Foundations of Clinical Psychology. (4-4-4)** Corequisites: courses 271A, 271B, 271C. Designed for graduate clinical psychology students. **270A.** Analysis of phenomenological, theoretical, and research issues regarding etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances. **270B.** Principles and methods of psychological assessment and evaluation. **270C.** Principles and methods of psychological intervention in individuals, families, and community settings.
- 271A-271B-271C. Clinical Psychological Methods. (2-2-2)** Corequisites: courses 270A, 270B, 270C. Procedures in clinical psychology as applied in clinical and community settings. Supervised exposure to psychological attributes of psychopathology and procedures for psychological assessment, intervention, and research with clinical populations. Experience closely coordinated with content in courses 270A, 270B, 270C. S/U grading.
- 271D. Clinical Research Laboratory. (2)** Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Designed for graduate clinical psychology students. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage to insure completion. S/U grading.
- 271E-271F. Clinical Research Laboratories. (2-2)** Requisite: course 271D. Designed for graduate clinical psychology students. Required of first-year clinical psychology students. S/U grading. **271E.** Brief overview of research design issued in clinical psychology and practical issues in students' own research activities. **271F.** Discussions of students' particular research activities and issues, plus laboratories in computer analysis of statistical data.
- 272A-272G. Advanced Clinical Psychological Methods. (4 each)** Seminar, three hours. Requisite or corequisite: course 401 or 451. Each course may be taken independently for credit:
- 272A.** Behavior Modification with Children. Requisites: courses 271A, 271B, 271C. Course in series of clinical intervention and assessment offerings for second- and third-year clinical students that covers behavior modification research and practice in clinic, school, institution, and home settings.
- 272C.** Clinical Interventions for Psychological Problems of Children.
- 272D.** Family Therapy and Family Dynamics.
- 272E.** Special Problems.
- 272F.** Behavior Modification with Adults. Designed for second-year graduate clinical psychology students. Current cognitive behavior modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems.
- 272G.** Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 270A, 270B, 270C, 271A, 271B, 271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings.
- 273A-273B-273C. Professional and Ethical Issues in Clinical Psychology. (2-2-2)** Lecture, one hour; discussion, one hour. Designed for graduate clinical psychology students. Year-long course sequence covering variety of topics necessary for clinical psychologists in their clinical work, including legal and ethical issues, child abuse, suicide assessment, issues in empirically validated treatments, psychiatric consultation and psychoactive medications, working with diverse client populations, etc. S/U or letter grading.
- 275. Family Process: Psychological and Social Perspectives on the Family. (4)** Various theoretical perspectives applicable to analysis of family structure and dynamics. Critical issues in application of family constructs to clinical problems.
- 276. Clinical Approaches to Children with Learning and Related Behavior Problems. (4)** Lecture, three hours; discussion, one hour. Designed for Ph.D. students. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence.
- 277. Advanced Clinical Assessment. (4)** (Formerly numbered 277A-277B.) Lecture, four hours; laboratory, three hours. Designed for graduate clinical psychology students. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopathology, and application of assessment to problems in psychotherapy. S/U or letter grading.
- 279. Seminar: Research in Psychopathology. (4)** Seminar, four hours. S/U or letter grading.
- M280. Affective Disorders. (2 or 4)** (Same as Psychiatry M234.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.
- 283. Psychopathology. (4)** Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.
- 284. Seminar: Clinical Psychology and Communication. (4)** Seminar, four hours. S/U or letter grading.
- M285. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4)** (Same as Psychiatry M277.) Seminar, 90 minutes. Designed for graduate students. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.
- 286. Issues and Concepts of Clinical Psychology. (4)** Open to graduate students in majors other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases for current trends.
- 287. Critical Problems in Clinical Research Methodology. (4)** Requisites: courses 250A, 250B. Special problems of measurement and design in clinical research.
- 289A-289B-289C. Current Issues in Clinical Psychology. (1-1-1)** Discussion, two hours. Designed for first-year graduate clinical psychology students. Presentation of research and applied topics relevant to clinical psychology. In Progress and S/U grading.
- 290. History of Psychology. (4)** Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues.
- 291. Principles of Behavioral Pharmacology. (4)** Intensive analysis of drug, brain, and behavior relationships. Discussion of nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological.
- 292. Biobehavioral Mechanisms of Stress and Disease. (4)** Lecture, three hours. Designed for graduate psychology students. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement.
- 293. Behavioral and Psychophysiological Problems of Alcoholism. (4)** Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning their etiology and treatment. Experimental approaches.
- M294. Seminar: Neural and Behavioral Endocrinology. (2)** (Same as Neurobiology M255 and Physiological Science M255.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.
- M295. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4)** (Same as Anthropology M236Q, Education M222A, and Psychiatry M235.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.
- M296. Neurobiology of Sleep. (3)** (Same as Neuroscience M259 and Psychiatry M249.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.
- 297. Issues in Social Development of the Minority Child. (4)** Seminar, three hours. Designed for graduate students. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study.
- 298. Special Problems in Psychology. (4)** Content depends on interests of particular instructor. May be repeated for credit.
- 299. Developmental Methodology. (4)** Coverage of both theory and methods in measuring age-related changes in behavior. Experimental designs and data-analytic solutions to problems in measurement of change. Some experience in analysis of actual data sets.
- 375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
- 401. Fieldwork in Clinical Psychology. (1 to 12)** Requisites: courses 271A, 271B, 271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee).
- 402. Clinical Research Practicum. (2)** Faculty and graduate students who share interests discuss current literature, new ideas, methodological issues, and preliminary findings. Meetings include research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned reading included. S/U grading.

**403. Special Topics Study Course. (1 to 4)** Under faculty supervision, group of students meets each week for a quarter in a self-led study group to pursue a specific topic of their choice that is not covered in other department courses. S/U grading.

**410A-410B-410C. Clinical Teaching and Supervision. (4-4-4)** Preparation: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology.

**410D-410E-410F. Clinical Assessment Supervision. (4-4-4)** Discussion, two hours; other, one hour. Designed for third-year graduate clinical psychology students. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment.

**420A-420B. Health Psychology Practicum. (2-2)** Designed for graduate students. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in the field.

**421. Research in Social Psychology. (2)** Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

**423. Social Survey Research Practicum. (4)** Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys.

**425. Health Psychology Lecture Series. (2)** Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

**451. Internship in Clinical Psychology. (6 to 12)** Preparation: successful completion of departmental qualifying examinations. Prerequisite: course 401. May be repeated for credit. S/U grading.

**454. Internship in Industrial Psychology. (2 to 4)** Fieldwork, to be arranged. S/U or letter grading.

**495. Presentation of Psychological Materials. (4)** Seminar, to be arranged. Supervised practicum in undergraduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Research and Study in Psychology. (2 to 12)** Tutorial, to be arranged. One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

**597. Individual Studies. (2 to 12)** Tutorial, to be arranged. Designed primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as a requisite for taking examinations. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. Preparation: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

## PUBLIC HEALTH SCHOOLWIDE PROGRAMS

*School of Public Health*

UCLA  
16-071 Center for the Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772

(310) 825-5524  
<http://www.ph.ucla.edu>

### Scope and Objectives

The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with an understanding of the health status of the population through data gathering and analysis, as well as knowledge of the complex relationships between disease process in the social and biological environment of the community.

The field of public health today needs practitioners from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds, training, or experience, including both the natural and social sciences.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The School of Public Health offers the Master of Public Health (M.P.H.) and Doctor of Public Health (Dr.P.H.) degrees.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; three concurrent degree programs: M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and M.A./M.P.H. with Asian American Studies and with Islamic Studies; and three articulated degree programs: M.D./M.P.H. with the School of

Medicine and M.A./M.P.H. with African Studies and with Latin American Studies.

For information on the M.S. and Ph.D. degrees in Biostatistics, Environmental Health Sciences, Epidemiology, or Health Services, or the M.S. and Ph.D. degrees in Public Health within the Department of Community Health Sciences, see the listings for those departments. For information on the interdepartmental D.Env. degree program housed in the Department of Environmental Health Sciences, see the listing for Environmental Science and Engineering. See the listing for Molecular Toxicology for information on the interdepartmental Ph.D. program in Molecular Toxicology.

The M.S. program in Preventive Medicine and Public Health is not admitting new students at this time.

### Admission

#### Master of Public Health

The M.P.H. is a professional degree in the field of public health. Students are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

For admission to the M.P.H. program, both the supplemental School of Public Health Application for Admission to Graduate Status and the *UCLA Application for Graduate Admission* must be completed. Three letters of recommendation, two from former professors and one from an employer (if no employer, three former professors), test scores, and transcripts are required before an application is considered complete. Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by visiting <http://www.ph.ucla.edu/sao/> or by writing to the Student Services Office, School of Public Health, 16-071 CHS, UCLA, Box 951772, Los Angeles, CA 90095-1772. It is the applicant's responsibility to ensure that the application file is complete.

The preferred date for receipt of applications for the following Fall Quarter is December 15. Applications received after this date have reduced opportunities for admission and financial aid.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered. In addition, applicants must be accepted by and accommodated in the department of the School of Public Health in which they wish to study. Applicants who need help in deciding on a department should speak either to the department administrators or to the staff in the Student Services Office.

Applicants to the School of Public Health must perform satisfactorily on the verbal and quantitative sections (analytical section is not re-

quired) of a recent Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admission Test (DAT). MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees. Graduate Management Admission Test (GMAT) scores are accepted only for applicants to the joint M.B.A./M.P.H. program.

The Biostatistics Department has different criteria for evaluating performance on aptitude tests for its M.S. and Ph.D. degrees. Those applying to the biostatistics program should contact that department. No screening examination is required for admission; however, specified courses are required by the Departments of Biostatistics and Environmental Health Sciences. Applicants whose undergraduate coursework has been deficient in breadth of fundamental training have to take specified undergraduate courses after admission.

At the discretion of the associate dean for Student Affairs, the GRE requirement may be waived for applicants who hold a doctoral degree from a U.S. university and have five years of relevant postdoctoral experience.

The prior program of study for applicants to the M.P.H. degree should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and other courses that constitute an adequate preparation for the proposed area of specialization.

Applicants whose prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for the proposed area of specialization must include courses in those sciences in their graduate programs; these may not be applied toward the minimum requirements for the degree.

*Interdivisional International Health.* The school offers several options for international or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations and cross-cultural settings.

Applicants must specify the department most relevant to their skills area on their application, clearly indicating their international interests. Once admitted, students are given an appropriate adviser and directed to the international health committee, which is interdepartmental and promotes internationally oriented training and research. Its members consult with interested students and attempt to optimize the learning experience.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to

apply to the Community Health Sciences Department.

#### **Biostatistics**

Students concentrating in biostatistics should have completed at least one year of calculus. Students whose mathematical preparation does not include sufficient calculus must take courses in the Mathematics Department while in the M.P.H. program. Majors in mathematics, statistics, computer science, or a field of application in biostatistics are preferred.

#### **Environmental Health Sciences**

Students concentrating in environmental health sciences should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for the requirements are considered for applicants with an otherwise superior academic background.

#### **Health Services**

Applicants interested in the joint M.P.H./M.B.A. program in the Health Services Department must take the GMAT, not the GRE.

Applicants to the one-year health services organization program must have a prior doctoral degree (M.D., D.D.S., J.D., Ph.D., or equivalent). Applicants with doctoral degrees from other countries should plan to take the two-year program. Satisfactory performance on the GRE is required, and a personal interview is recommended.

#### **Public Health M.P.H./African Studies M.A.**

The School of Public Health and the African Studies Program have an articulated degree program whereby students can work sequentially for the M.A. in African Studies and the M.P.H. By planning the major field emphasis in public health while working toward the M.A. in African Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Studies Program, UCLA African Studies Center, and/or the Student Services Office, UCLA School of Public Health.

#### **Public Health M.P.H./Asian American Studies M.A.**

The Asian American Studies Program and the Department of Community Health Sciences offer a concurrent degree program whereby students can work for the M.A. in Asian American Studies and the M.P.H. Students must complete the program requirements for both degrees. However, a maximum of 12 units of coursework in public health may be applied toward both degrees. When applying, the same statement of purpose may be submitted to

each program. Applicants interested in this concurrent program should contact the Asian American Studies Program and the Student Services Office, UCLA School of Public Health.

#### **Public Health M.P.H./Islamic Studies M.A.**

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the M.A. in Islamic Studies and the M.P.H. A maximum of 12 units of coursework in public health may be applied toward both degrees. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Services Office, UCLA School of Public Health.

#### **Public Health M.P.H./Latin American Studies M.A.**

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. in Latin American Studies and the M.P.H., with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

#### **Public Health M.P.H./Management M.B.A.**

The Department of Health Services and the John E. Anderson Graduate School of Management have a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. GMAT scores are required for admission. Application materials should be requested separately from both schools.

#### **Public Health M.P.H./Medicine M.D.**

The School of Public Health and the School of Medicine have an articulated degree program designed to enable a student to complete both the M.P.H. and the M.D. programs in five years. The program includes four years of medical school and one year plus one additional quarter in the School of Public Health. Additionally, up to 10 weeks of field training (may be an internship) are required for the M.P.H. The field

training is generally completed in the summer after the year of public health coursework.

UCLA medical students apply for admission to the School of Public Health M.P.H. program in Fall Quarter of their junior (third) year. In addition to the regular School of Public Health application requirements, medical students must submit a letter from the associate dean of the School of Medicine as one of the three required letters of recommendation. MCAT results are accepted in lieu of the GRE. Other materials to be submitted include copies of the student's AMCAS application, letters of recommendation for medical school, the medical school transcript, and evaluations from the first two years. Prior to formal matriculation into the M.P.H. program, applicants must also submit the USMLE Step 1 results and successfully complete the first three years of medical school.

After completion of all requirements for both the M.P.H. and the M.D., students receive both degrees. If students decide to complete only the M.P.H. or the M.D. while in the program, all of the requirements must be completed for the degree-granting program.

### M.P.H. Program for Health Professionals

Health and allied professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by the faculty of the School of Public Health, and currently two departments offer a specialization in their area.

Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years of professional experience or its full-time equivalent in a health care setting.

The first year of study is devoted to the specific core requirements in the area of specialization and to the required M.P.H. core courses in biostatistics, community health sciences, epidemiology, health services, and environmental health sciences. The second year of study entails completing required and elective courses in the specialty area, a master's project, and a report on that project. The master's project, which includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integration and application of theoretical and methodological approaches within public health to a specific problem.

Two departments currently accept students into this program: Community Health Sciences offers a concentration in health education/promotion and Health Services offers a concentration in health care management. For further information, contact the department of interest, or the Student Services Office, UCLA School of Public Health.

### Preventive Medicine Residency Program

The School of Public Health offers an accredited residency in public health and general preventive medicine, a speciality recognized by the American board of Preventive Medicine. It is designed to prepare physicians for leadership roles in preventive medicine and public health practice, research, and teaching. Residents participating in the academic phase must enroll in one of the departments within the School of Public Health and fulfill and the requirements for the M.P.H. degree. During the practicum phase, residents obtain practical experience in preventive medicine supervised by onsite preceptors and the residency program director. Application is made both to the department and the residency program simultaneously.

Qualified physicians interested in learning more about the program should contact the School of Public Health Student Services Office, or visit <http://www.ph.ucla.edu/pmr/home/htm>.

### Doctor of Public Health

In addition to the University minimum requirements, for admission to the Dr.P.H. program, the school requires:

1. Satisfactory performance on the Graduate Record Examination (GRE). Applicants to the Department of Community Health Sciences, at the discretion of the department, may substitute equivalent performance on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT)
2. Completion of the M.P.H. or a master's degree in an appropriately related field. If the master's degree is in a field other than public health, applicants must have taken the equivalent of the core mandatory M.P.H. courses or include them in the course of study after admission
3. At least a 3.0 junior/senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses
4. A positive recommendation by a department in the School of Public Health. Applicants to the Department of Community Health Sciences must have acceptance by an initial doctoral adviser in the department
5. Approval by the doctoral admissions committee and the associate dean for Student Affairs. Screening examinations may be required by each department
6. A writing sample is required by the Department of Community Health Sciences
7. The Department of Community Health Sciences requires at least 600 (paper and pencil test) or 250 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or overall band score of

7.0 on the International English Language Testing System (IELTS) examination for students whose native language is not English

8. The Department of Community Health Sciences also requires a statement of purpose that includes a description of research experience, discussion of current substantive interests, a brief description of potential research project that might serve as a dissertation, and a statement of career goals.

It is recommended that applicants to the Department of Community Health Sciences contact one or more members of the faculty whom they are considering as advisers in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

### Master's Degree

Areas of specialization are offered through the departments: Biostatistics, Community Health Sciences, Environmental Health Sciences, Epidemiology, and Health Services.

The M.P.H. degree is offered through the comprehensive examination plan. To meet schoolwide requirements for the degree students must complete a minimum of 11 full courses (44 units), at least six of which must be graduate courses and at least two of which must be 400-series courses. Each area of specialization requires additional coursework. There are required school core courses. Students should consult *Program Requirements for UCLA Graduate Degrees* and the school's *Announcement* for details. In addition to the core courses, at least three courses (2 or 4 units) outside the student's area of specialization are strongly recommended.

Field training in an approved public health program is required of candidates who have not had prior relevant field experience.

### Doctoral Degree

Areas of specialization are offered through the departments: Biostatistics, Community Health Sciences, Environmental Health Sciences, Epidemiology, and Health Services. There may be additional areas of specialization or examination within each department. This and other information on course plans and other requirements are outlined in *Program Requirements for UCLA Graduate Degrees* and the school's *Announcement*.

Course requirements for the Dr.P.H. in the major field depend on the department/program and the field chosen, and students should consult *Program Requirements for UCLA Graduate Degrees* and the school's *Announcement* for details. Students must take a minimum of six full courses (four must be at the 200 or 400

level) in at least two School of Public Health departments outside the major department.

The major department requires an additional area of concentration which may be either inside or outside the school. In departments allowing it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

A field experience is required for students in epidemiology.

Written and oral qualifying examinations are required. Students specializing in community health sciences must take two written examinations and an oral qualifying examination in the major field.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination.

## PUBLIC POLICY AND SOCIAL RESEARCH SCHOOLWIDE PROGRAMS

*School of Public Policy and Social Research*

UCLA  
3250 Public Policy Building  
Box 951656  
Los Angeles, CA 90095-1656

(310) 206-4613  
[http://www.sppsr.ucla.edu/acad/mpp/psm\\_ap.htm](http://www.sppsr.ucla.edu/acad/mpp/psm_ap.htm)

### Scope and Objectives

The School of Public Policy and Social Research offers an undergraduate minor in Public Policy.

### Undergraduate Study

#### Public Policy Minor

The Public Policy minor provides undergraduates with a systematic overview of public policy questions, deals with these questions in theoretical and conceptual ways, and exposes students to practical issues of public policy through the examination of specific policy issues and real-world policy questions.

To enter the minor, students must have an overall grade-point average of 2.0 or better, enroll in Policy Studies 10A, and file a petition at the School of Public Policy and Social Research Office of Academic Services, 3357 Public Policy Building. For further information, contact Professor Eric H. Monkkonen at (310) 206-4613.

*Required Core Courses (8 units):* Policy Studies 10A and one course from 10B, M116, or

Honors Collegium 82. Highly recommended: one statistics course.

*Required Upper Division Courses (20 units):*

(1) Three courses from one of the following clusters: *gender and multiculturalism cluster*— Policy Studies M120, Social Welfare 101, 104A, 104B, M104C, 104F, M108, Urban Planning M194, 197; *labor and work cluster*— Policy Studies 141, C142, C144, 145, 148; *policy studies cluster*— three upper division policy studies courses (190 may be repeated for credit with topic change); *social welfare cluster*— three upper division social welfare courses; *urban policy and planning cluster*— three upper division urban planning courses (193 may be repeated for credit with topic change); (2) one elective course offered by the School of Public Policy and Social Research not used to satisfy the core or cluster requirement; (3) capstone project to be completed during the senior year which may be satisfied by one of the following: (a) Policy Studies 197, (b) one upper division or graduate course and one 199 course requiring a comprehensive policy paper to be taken concurrently with the same instructor in the School of Public Policy and Social Research, (c) Political Science M197W, or (d) one 199 course taken in conjunction with a policy, planning, or social work internship, and a comprehensive policy paper written under the guidance of a School of Public Policy and Social Research faculty member.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## RADIATION ONCOLOGY

*School of Medicine*

UCLA  
B265 UCLA Medical Plaza 200  
Box 956951  
Los Angeles, CA 90095-6951  
(310) 794-1252  
<http://www.radonc.ucla.edu/rowww/rohme.html>

### Chairs

H. Rodney Withers, M.D., D.Sc., *Chair*  
Guy J.F. Juillard, M.D., *Vice Chair, Clinical Affairs*  
William McBride, D.Sc., *Vice Chair, Division of Experimental Radiation Oncology*  
James B. Smathers, Ph.D., *Vice Chair, Physics*

### Scope and Objectives

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Medical Center, West Los Angeles VA Medical Center, and divisions of experimental radiation biology and medical radiation physics. Research and teaching facilities are available at the UCLA Medical Plaza, UCLA Medical Center, and West Los Angeles VA Medical Center.

The primary clinical mission of the department is the management of patients who have cancer. The purpose of using radiation therapy, rather than or in addition to surgery, is to preserve function and/or cosmesis while eliminating the cancer. Other activities include total body irradiation before bone marrow transplantation and stereotactic radiosurgery for A-V malformations, meningiomas, and malignant intracranial lesions. Research interests include clinical trials, radiation biology, radiation modifiers, molecular biology, immunology, and applied physics. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of various radiations is essential.

The educational programs serve medical, dental, basic science (biology and physics), nursing, and radiation therapy students, and community and postgraduate physicians; there also is a four-year program for residents who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## RADIOLOGICAL SCIENCES

*School of Medicine*

UCLA  
BL-428 Center for the Health Sciences  
Box 951721  
Los Angeles, CA 90095-1721  
(310) 825-6800  
fax: (310) 794-6613  
<http://www.radsci.ucla.edu/>

### Chairs

Dieter R. Enzmann, M.D. (*Leo G. Rigler Professor of Radiological Sciences*), *Chair*  
Richard H. Gold, M.D., *Executive Vice Chair*  
Barbara M. Kadell-Wootton, M.D., *Vice Chair*  
Osman Ratib, M.D., Ph.D., *Vice Chair*

### Scope and Objectives

The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging pertaining to thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, nuclear medicine, computed tomography, magnetic resonance imaging, ultrasound, and interventional radiology are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through the

use of Web-based teaching materials. A longitudinal core clerkship is offered during the third year, with a comprehensive examination at the end of the year.

Greater depth of experience is provided by the four weeks of elective clerkship offered to fourth-year medical students which emphasizes training in the subspecialties selected by students from the list above.

For further details on the Department of Radiological Sciences and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## RELIGION, STUDY OF

*Interdepartmental Program  
College of Letters and Science*

UCLA  
329 Dodd Hall  
Box 951451  
Los Angeles, CA 90095-1451  
(310) 206-1356, 825-4641  
<http://www.humnet.ucla.edu/humnet/religion/IDP.HTM>

S. Scott Bartchy, Ph.D., *Chair*

### Faculty Advisory Committee

S. Scott Bartchy, Ph.D., *Chair*  
Irene A. Bierman, Ph.D.  
William M. Bodiford, Ph.D.  
Robert L. Brown, Ph.D.  
Donald J. Cosentino, Ph.D.  
Andrew Dych, Ph.D.  
John H. Evans, Ph.D.  
Eric L. Gans, Ph.D.  
Margaret C. Jacob, Ph.D.  
Herbert E. Plutschow, Ph.D.  
David C. Rapoport, Ph.D., *Emeritus*  
Claudia Rapp, D.Phil.  
William Schniedewind, Ph.D.

### Affiliated Faculty

#### Professors

Robert L. Brown, Ph.D. (*Art History*)  
Donald J. Cosentino, Ph.D. (*English*)  
Andrew Dych, Ph.D. (*Classics*)  
Eric L. Gans, Ph.D. (*French*)  
Margaret C. Jacob, Ph.D. (*History*)  
Herbert E. Plutschow, Ph.D. (*East Asian Languages and Cultures*)

#### Professor Emeritus

David C. Rapoport, Ph.D. (*Political Science*)

#### Associate Professors

Irene A. Bierman, Ph.D. (*Art History*)  
William M. Bodiford, Ph.D. (*East Asian Languages and Cultures*)  
William M. Schniedewind, Ph.D. (*Near Eastern Languages and Cultures*)

#### Assistant Professors

John H. Evans, Ph.D. (*Sociology*)  
Claudia Rapp, D.Phil. (*History*)

#### Senior Lecturer S.O.E.

S. Scott Bartchy, Ph.D. (*History*)

## Scope and Objectives

The UCLA major in the Study of Religion is designed to give students a broad humanistic

perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Cohesion and integrity in the program are furthered by courses dealing with philosophical problems in religion, sociological analysis, and general anthropological theories and reflections.

## Undergraduate Study

### Study of Religion B.A.

#### Preparation for the Major

*Required:* History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

#### Transfer Students

To be admitted as Study of Religion majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one history of religions course, one philosophy of religion course, and two courses from sociocultural anthropology, Buddhism, history of Western civilization, Asian civilizations, civilizations of Africa, and history of China.

#### The Major

*Required:* A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

## Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. Students admitted to honors should take three 199 courses under the guid-

ance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, students should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor S. Scott Bartchy at the program address.

## Study of Religion

### Upper Division Courses

**100. Undergraduate Seminar: Study of Religion.** (4) Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

**110. Religion and Violence.** (4) Seminar, three hours; discussion, one hour. Exploration of capacity of religion to mobilize and legitimize violence. Materials include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and David Rapoport and case studies dealing with religion and violence in India, Northern Ireland, Egypt, Lebanon, Israel, Palestine, Sri Lanka, and the U.S. Letter grading.

**120. Abrahamic Religions: Traditions in Tension.** (4) Seminar, three hours. Examination of Abrahamic tradition as received and developed by Jews, Christians, and Muslims according to rubrics of linkage and interaction, with view both to potential clashes in the 21st century and to resources inherent in these traditions for healing off such clashes and misunderstandings. Letter grading.

**199. Special Studies.** (2 to 4) Tutorial, to be arranged. Designed for juniors/seniors. Intensive directed research program. Twelve units may be applied toward the major. Letter grading.

## Course List

Courses marked with an asterisk have readings in foreign languages. See departmental course listings for requisites.

### Group I: Methods

#### Anthropology

130. Study of Culture  
156. Comparative Religion

#### History

194C. Jesus of Nazareth in Historical Research

#### Philosophy

175. Topics in Philosophy of Religion

#### Study of Religion

100. Undergraduate Seminar: Study of Religion  
110. Religion and Violence  
120. Abrahamic Religions: Traditions in Tension

#### Theater

101A. History of World Theater and Drama: Ritual and Religious Drama

### Group II: Nonliterate and Ancient Religious Traditions

#### Ancient Near East (Near Eastern Languages)

130. Ancient Egyptian Religion

**Anthropology**

- 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)  
 114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)  
 171. Sub-Saharan Africa  
 174P. Ethnography of South American Indians  
 177. Cultures of the Pacific

**Classics**

- 166A. Greek Religion  
 166B. Roman Religion  
 167. Greek and Roman Magic  
 168. Comparative Mythology

**Folklore and Mythology**

- M122. Celtic Mythology  
 M126. Baltic and Slavic Folklore and Mythology  
 130. North American Indian Folklore and Mythology Studies  
 131. Folklore of India  
 M155. Oral Traditions in Africa

**History**

- 193D. Religions of the Ancient Near East

**Iranian (Near Eastern Languages)**

170. Religion in Ancient Iran

**World Arts and Cultures**

- C109B. Dance in Native American Cultures  
 111B. Dance in South Asia  
 112B. Dance in Southeast Asia

**Group III: Western and Near Eastern Religious Traditions****Christianity****Art History**

- 105A. Early Christian Art

**Classics**

- M170. Power and Imagination in Byzantium

**Greek (Classics)**

- \*130. Readings in the New Testament

**History**

- 119M. The Christian Church, 100 to 1517  
 120M. The Christian Religion, 100 to 1350  
 125B. History of Modern Europe: Baroque Culture and Absolutist Politics, 1600 to 1715  
 150C. History of Religion in the U.S.  
 194A. History of Early Christians  
 194B. Religious Environment of Early Christians  
 194C. Jesus of Nazareth in Historical Research

**Philosophy**

- 100B. Medieval and Early Modern Philosophy  
 107. Topics in Medieval Philosophy  
 118. Kierkegaard

**Slavic (Slavic Languages)**

201. Introduction to Old Church Slavonic

**Islam****Arabic (Near Eastern Languages)**

- \*120. Islamic Texts

**Art History**

- C104C. Problems in Islamic Art

**History**

- 107A-107B. Islamic Civilization  
 109A. History of North Africa from the Moslem Conquest: To 1578  
 110A. Iranian History: Islamic Iran to 1800

**Islamic (Near Eastern Languages)**

110. Introduction to Islam

**Judaism****Ancient Near East (Near Eastern Languages)**

162. Archaeology and Religion of the Holy Land  
 170. Introduction to Biblical Studies

**Comparative Literature**

- M101. Hebrew Literature in English — Literary Traditions in Ancient Israel: Bible and Apocrypha

**Hebrew (Near Eastern Languages)**

- \*120. Biblical Texts  
 125. Hebrew Bible with Medieval Commentaries  
 \*130. Rabbinic Texts

**History**

- 111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923  
 M191A-M191B. Survey of Jewish History  
 191G. European Jewry from 1881 to the Present  
 M192A-M192B. Jewish Intellectual History

**Jewish Studies (Near Eastern Languages)**

130. Modern Jewish Religious Movements and Their Ideologies  
 M150A-150B. Hebrew Literature in English

**Sociology**

159. Comparative Studies of Jewish Communities in the U.S. and Abroad

**Group IV: South Asian and East Asian Traditions****Art History**

- 114A. Early Art of India  
 114C. Japanese Art  
 114D. Later Art of India  
 114E. Arts of Korea  
 114F. Arts of Southeast Asia

**Chinese (East Asian Languages)**

160. Chinese Buddhism  
 \*165. Introduction to Chinese Buddhist Texts  
 175. Introduction to Chinese Thought  
 265A-265B. Seminars: Chinese Buddhist Texts

**East Asian Languages and Cultures**

161. Buddhist Literature in Translation  
 162. Buddhist Meditation Traditions

**History**

186. Shinto, Buddhism, and Japanese Folk Religion  
 188A. Early History of India  
 193B, 193C. Religions of South and Southeast Asia

**Indic (East Asian Languages)**

175. Introduction to Indic Philosophy

**Japanese (East Asian Languages)**

- C160. Japanese Buddhism  
 161. Religious Life in Modern Japan  
 175. Introduction to Japanese Thought  
 265A. Seminar: Japanese Buddhist Texts

**Korean (East Asian Languages)**

- C160. Korean Buddhism  
 \*165. Introduction to Korean Buddhist Texts  
 175. Introduction to Traditional Korean Thought

**ROMANCE LINGUISTICS AND LITERATURE**

Edward F. Tuttle, Ph.D., *Chair*

**Professors**

- Luigi Ballerini, Dottore in Lettere (*Italian*)  
 Franco Betti, Ph.D. (*Italian*)  
 Jean-Claude Carron, Docteur ès Lettres (*French and Francophone Studies*)  
 Patrick J. Coleman, Ph.D. (*French and Francophone Studies*)  
 Eric L. Gans, Ph.D. (*French and Francophone Studies*)  
 Peter Haidu, Ph.D. (*French and Francophone Studies*)  
 Bruce P. Hayes, Ph.D. (*Linguistics*)  
 Carroll B. Johnson, Ph.D. (*Spanish and Portuguese*)  
 J. Randal Johnson, Ph.D. (*Spanish and Portuguese*)  
 Hilda J. Koopman, Ph.D. (*Linguistics*)  
 Efrain Kristal, Ph.D. (*Spanish and Portuguese*)  
 Gerardo Luzuriaga, Ph.D. (*Spanish and Portuguese*)  
 José Monleón, Ph.D. (*Spanish and Portuguese*)  
 C. Brian Morris, Litt.D. (*Spanish and Portuguese*)  
 Claudia Parodi-Lewin, Ph.D. (*Spanish and Portuguese*)  
 Susan J. Plann, Ph.D. (*Spanish and Portuguese*)  
 A. Carlos Quicoli, Ph.D. (*Spanish and Portuguese*)  
 Lucia Re, Ph.D., Dottore in Lettere (*Italian*)  
 Enrique Rodríguez-Cepeda, Ph.D. (*Spanish and Portuguese*)  
 Dominique L. Sportiche, Ph.D. (*Linguistics*)  
 Donca Steriade, Ph.D. (*Linguistics*)  
 Timothy A. Stowell, Ph.D. (*Linguistics*)  
 Edward F. Tuttle, Ph.D. (*Italian*)

**Professors Emeriti**

- Shirley L. Arora, Ph.D. (*Spanish and Portuguese*)  
 Rubén A. Benítez, Ph.D. (*Spanish and Portuguese*)  
 Marc Bensimon, Ph.D. (*French and Francophone Studies*)  
 Marga Cottino-Jones, Ph.D., Dottere in Lettere (*Italian*)  
 E. Mayone Dias, Ph.D. (*Portuguese*)  
 Hassan el Nouty, Docteur ès Lettres (*French and Francophone Studies*)  
 Joaquín Gimeno, Ph.D. (*Spanish and Portuguese*)  
 Claude L. Hulet, Ph.D. (*Spanish and Portuguese*)  
 Bengt T.M. Löfstedt, Ph.D. (*Classics*)  
 C.P. Otero, Ph.D. (*Spanish and Portuguese*)  
 José Pascual-Buxó, Ph.D. (*Spanish and Portuguese*)  
 Pier-Maria Pasinetti, Ph.D., Dottore in Lettere (*Italian*)  
 Paul C. Smith, Ph.D. (*Spanish and Portuguese*)

**Associate Professors**

- Adriana Bergero, Ph.D. (*Spanish and Portuguese*)  
 Verónica Cortínez, Ph.D. (*Spanish and Portuguese*)  
 Andrea Loselle, Ph.D. (*French and Francophone Studies*)  
 Sara E. Melzer, Ph.D. (*French and Francophone Studies*)  
 A. John Skirius, Ph.D. (*Spanish and Portuguese*)  
 Malina Stefanovska, Ph.D. (*French and Francophone Studies*)

**Scope and Objectives**

The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance lan-

guages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdisciplinary graduate program.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Romance Linguistics and Literature Program offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Romance Linguistics and Literature.

## Admission

The UCLA B.A. degree in French, Italian, Portuguese, or Spanish, or equivalent, is required. Applicants to the M.A. program are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those considered germane to the proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required.

Applicants admitted from elsewhere with preparation considered deficient in view of the intended specialization are required to take specified upper division courses. Such courses may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree.

Students select two Romance languages, one as their major language and one as their minor language. In each of the languages students may specialize in either linguistics or literature. If students know only the language of their major, they must prepare in at least one other Romance language during the first year so they can take courses in their minor no later than the second year of graduate study.

The UCLA M.A. degree in Romance Linguistics and Literature or the UCLA M.A. degree in French and Francophone Studies, Italian, Portuguese, or Spanish, or equivalent is required of applicants to the Ph.D. program. A strong academic record (normally a grade-point average of 3.4 or better), three letters of recommendation, and the Graduate Record Examination (GRE) General Test (normally a combined verbal/quantitative score of 1,100 or better) are required.

Formal application is required of all candidates for the Ph.D. program. Applicants who have completed the UCLA M.A. degree in Romance Linguistics and Literature with distinction (high

pass) are automatically eligible for admission to the Ph.D. program; those who received a middle pass are reviewed in the same manner as candidates from other institutions; those who received a low pass are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to pass (with grades of B or better) three graduate courses approved by the chair.

## Master's Degree

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. Twelve courses are required for the M.A. and should be taken in at least two of the following academic departments or programs: French and Francophone Studies, Italian, Linguistics, Romance Linguistics and Literature, or Spanish and Portuguese. The distribution of the courses must be approved by the chair of the student's guidance committee or the program chair. An introductory course in linguistics is required as a requisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree.

There is a language requirement for this degree.

## Doctoral Degree

The Ph.D. program recognizes two fields of specialization (linguistics or literature) and three options within each field.

*Linguistics.* (1) The grammar of a Romance language, (2) the relation of the grammar of a Romance language to the grammar of sister languages(s) or to language in general, and (3) the typological relationships of the Romance languages to other Indo-European languages and to language in general.

*Literature.* One of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology, (2) Renaissance and baroque, and (3) modern literature, preferably with emphasis in one century.

The first minor must be in the same field as the major but must differ from it on the choice of language or the choice of option (i.e., it must differ from the major in being either a different option within the same field or the same option but on a different Romance language).

The second minor may be any of the six preceding options as long as it differs from each of them on the choice of language or the choice of option. It may also be in some other related field in the major language or in Romance linguistics.

In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. Five courses are required in the major, three courses in the first minor, and two courses in the second minor. At least one seminar is required in each of the three fields. In addition to those required for the mas-

ter's degree (or equivalent), students are required to take at least 10 other graduate courses, as well as such courses as the guidance committee may prescribe. An introductory course in linguistics is required as a requisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree.

Written and oral qualifying examinations are required. There is a written examination in the major field and separate examinations in the first and second minors. Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which covers the three fields and includes discussion and approval of the dissertation prospectus.

There is a language requirement for this degree.

## Romance Linguistics and Literature

### Graduate Courses

**202A-202B. Topics in Historical Romance. (4-4)** Seminar, three hours. Requisites: Linguistics 120A and 120B, or Spanish 120A and 120B. Course 202A is requisite to 202B. Study of main historical changes in phonology, morphology, and syntax undergone by different Romance languages (mainly Spanish, Italian, and French). S/U or letter grading.

**M204A-M204B. Romance Syntax: French. (4-4)** (Formerly numbered 204A-204B.) (Same as Linguistics CM228A-CM228B.) Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requisite: Linguistics 120B. Course M204A is requisite to M204B. Aspects of structure of French language, with emphasis on properties of construction not found in English. S/U or letter grading.

**206. Romance Language Structure. (4)** Lecture, three hours. Requisite: Linguistics 120B. Aspects of grammatical structure of a selected Romance language. May be repeated for credit with topic change. S/U or letter grading.

**211. Comparative Romance Syntax. (4)** Lecture, three hours. Requisite: French 210A or Portuguese 204A or Spanish 204A. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying linguistic variation.

**255. Topics in Romance Syntax. (1 to 4)** Topics in syntax of Romance languages, with emphasis on recent development in comparative studies; theoretical innovations based on Romance syntax.

**596. Directed Individual Study or Research. (4 to 8)** Tutorial, to be arranged. Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

**597. Preparation for Graduate Examinations. (4 to 12)** Tutorial, to be arranged. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis. (2 to 12)** Tutorial, to be arranged. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. Preparation: successful completion of Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## Course List

In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably

among those listed below and/or their requisites:

## Introductory Courses

### Italian

201. Bibliography and Methods of Research

### Spanish

M200. Research Resources

## Linguistics Courses

### Grammatical Theory: Linguistics

201. Phonological Theory II

206. Syntactic Theory II

## Development of the Romance Languages

### Hispano-Romance: Spanish

M205A-M205B. Development of Portuguese and Spanish Languages

### Indo-European: Indo-European Studies

210. Indo-European Linguistics: Advanced Course II

280A-280B. Seminars: Indo-European Linguistics

### Italic Dialects: Latin

242. Italic Dialects and Latin Historical Grammar

### Italo-Romance: Italian

222A. History of the Italian Language

### Latin History: Latin

240. History of the Latin Language

### Medieval Latin: Latin

231A-231B. Seminars: Medieval Latin

### Paleography: History

218A-218B. Paleography I, II

### Romance Dialectology: Italian

222C. Italian Dialectology

### Spanish

209. Dialectology

### Romance Linguistics: Linguistics

225G. Linguistic Structures

### Vulgar Latin: Latin

232. Vulgar Latin

## Studies in the History of the Romance Languages

### Gallo-Romance: French

214. Problematics of Medieval Language and Literature

### Hispano-Romance: Spanish

M251A-M251B. Studies in Gallegan-Portuguese and Old Spanish

### Italo-Romance: Italian

210. Studies in Early Italian Literature

222A-222B-222C. Studies in History of Italian Language

## Synchronic Linguistics

### Advanced Grammar: French

201. Literary Research and Composition

### Italian

222B. Structure of Modern Italian

### Portuguese

202. Synchronic Morphology and Phonology

204A-204B. Generative Grammar

### Spanish

202A. Phonology

202B. Morphology

204A-204B. Generative Syntax and Semantics

### Studies in Linguistics and Dialectology: Spanish

256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

## Literature Courses

### History of Ideas: French

260A-260B. Studies in History of Ideas

### Literary Criticism: French

202. Historical and Philosophical Background to French Literary Criticism

203. Contemporary Theories

258A-258B. Studies in Literary Criticism

### Italian

205A-205B. Studies in Criticism

### Spanish

M201A-M201B. Literary Theory and Criticism

### Philosophy and Literature: French

259A-259B. Studies in Philosophy and Literature

## Early Romance Literature

### Petrarca: Italian

214C. Studies in Medieval Literature: Petrarca's *Canzoniere*

251. Seminar: Petrarch

### Studies in Early Romance Literature: French

215A-215B. Medieval Literature

250A. Major Medieval Texts

250B. Structures of Medieval Literature

250C. Problems in Medieval Literature

### Italian

210. Studies in Early Italian Literature

214A-214F. Studies in Medieval Literature

215A-215B. Studies in 15th-Century Literature

250A-250D. Seminars: Dante

252. Seminar: Boccaccio

### Portuguese

C224. Early Portuguese Literature

### Spanish

222. Medieval Epic and Narrative Poetry

223. Medieval Prose

262A-262B. Studies in Medieval Spanish Literature

## Modern Romance Literature

### Genre Studies: Portuguese

252. Studies in Early Portuguese Literature

253. Studies in Modern Portuguese Literature

254. Studies in Early Brazilian Literature

255. Studies in Modern Brazilian Literature

### Studies in the 18th Century: French

218. Enlightenment

254A-254B. Studies in the 18th Century

### Italian

218A-218D. Studies in 18th-Century Literature

256A-256B. Seminars: 18th Century

### Portuguese

C227. 19th-Century Portuguese Literature

C232. 19th-Century Brazilian Literature and Culture

### Spanish

229. Romanticism

239. Romanticism and Realism in Spanish-American Literature

270A-270B. Studies in 18th-Century Spanish Literature

277A-277B. Studies in Colonial Spanish-American Literature

### Studies in the 19th Century: French

219. 19th Century

255A-255B. Studies in the 19th Century

### Italian

219A-219D. Studies in 19th-Century Literature

257A-257B. Seminars: Romanticism

### Portuguese

C228. Post-Romanticism and Naturalism in Portuguese Literature

### Spanish

230. Realism and Naturalism

271A-271B. Studies in 19th-Century Spanish Literature

278A-278B. Studies in 19th-Century Spanish-American Literature

### Studies in the 20th Century: French

220. 20th Century

221A-221B-221C. French-African Literature

256A-256B. Studies in Contemporary Literature

257A-257B. Studies in French-African Literature

### Italian

220. Studies in Turn-of-the-Century Literature

221A-221E. Studies in 20th-Century Literature

258A-258B. Seminars: Contemporary Italian Literature

### Portuguese

C229. 20th-Century Portuguese Literature

C234. Brazilian Modernism

C235. 20th-Century Brazilian Literature

### Spanish

232. Spanish Prose Literature from 1898 to the Civil War

233. Spanish Prose Literature after the Civil War

234. Spanish Drama and Poetry from 1898 to the Civil War

235. Spanish Drama and Poetry after the Civil War

240. Major Currents in Modern Spanish-American Literature

243A-243B. Contemporary Spanish-American Poetry

244A-244B. Contemporary Spanish-American Novel

245. Contemporary Spanish-American Essay

272A-272B. Studies in 20th-Century Spanish Literature

280A-280B. Studies in Contemporary Spanish-American Literature

## Renaissance and Baroque Literature

### Cervantes: Spanish

227. Cervantes

### Studies in Renaissance and Baroque Literature: French

216. Renaissance

217. 17th Century

251A-251B. Studies in the Renaissance

253A-253B. Studies in the 17th Century

### Italian

216A-216E. Studies in the Renaissance

217. Studies in 17th-Century Literature

253A-253B-253C. Seminars: Chivalric Poetry in Italy

255A-255B. Seminars: Baroque

### Portuguese

C225. Camões and the Portuguese Renaissance

C226. Baroque and Neoclassical Portuguese Literature

C231. Colonial Brazilian Literature and Culture

### Spanish

224. Poetry of the Golden Age

225. Drama of the Golden Age

226. Prose of the Golden Age

237. Literature of the Spanish Conquest

264A-264B. Studies in Golden Age Spanish Literature

## ROTC PROGRAMS

### *College of Letters and Science*

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officers' Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows students to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of the major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which teach management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

### Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance between \$250 and \$400 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Applications for Army scholarships can also be obtained by calling (800) 872-7682. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.

## AEROSPACE STUDIES

UCLA  
Hershey Hall  
Box 951611  
Los Angeles, CA 90095-1611  
(310) 825-1742  
<http://www.sscnet.ucla.edu/afrotc/>

Richard A. McIntosh, M.A., *Colonel, Chair*

### Professor

Richard A. McIntosh, M.A., *Colonel*

### Adjunct Assistant Professors

Ronald A. DeLap, Ph.D., *Major*

Timothy C. Reynolds, M.B.A., *Captain*

### Scope and Objectives

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

### Undergraduate Study

#### Four-Year Program

The four-year program is available to first-term freshmen and those full-time students with at least three and one half years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A, 1B, 1C, 20A, 20B, and 20C), followed by a two-year Professional Officer Course (POC) described under Two-Year Program. GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

#### Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A, 130B, 130C, 140A, 140B, and 140C. POC participation requires

two hours of leadership laboratory and three hours of academic class each week during the academic year.

Requisites for the two-year program are successful completion of the GMC and a four-week field training course (see Four-Year Program above), or successful completion of a five-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the five-week field training program must apply to the department chair early during Fall Quarter of their sophomore year. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, performance during an officer board interview, and a physical fitness test.

Students selected for the five-week summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see Four-Year Program above).

Students enrolled in the POC incur a military obligation and are paid from \$250 to \$450 per month during the academic year. Additionally, they can qualify for up to \$3,450 for tuition and textbooks. Graduation and successful completion of the POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

## Aerospace Studies

### Lower Division Courses

#### Freshman-Year Courses

**Z. Leadership Laboratory. (No credit)** Laboratory, three hours. Mandatory for and limited to Air Force ROTC cadets. Provides cadets with practical command and staff leadership experiences through performance of various tasks within framework of an organized cadet corps. As integral part of aerospace studies curriculum, provides experiences designed to develop leadership potential and serves as orientation to active duty. P/NP grading.

#### 1A-1B-1C. Foundation of U.S. Air Force. (2-2-2)

Lecture, one hour. Survey course designed to introduce students to the U.S. Air Force and Air Force Reserve Officers' Training Corps. Topics include mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and introduction to communication skills. P/NP or letter grading.

#### Sophomore-Year Courses

**20A-20B-20C. Evolution of U.S. Air Force Air and Space Power. (2-2-2)** Lecture, one hour. Historical survey of air and space power designed to motivate students to transition from Air Force ROTC cadet to officer candidate. Featured topics include Air Force heritage and leaders; introduction to air and space power through examination of competencies, functions, and doctrines; and continued application of communication skills. P/NP or letter grading.

## Upper Division Courses

**130A-130B-130C. Air Force Leadership Studies. (4-4-4)** Lecture, three hours. Requisites: courses 1A, 1B, 1C, 20A, 20B, 20C. Study of leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Use of case studies to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of concepts being studied. P/NP or letter grading.

**140A-140B-140C. National Security Affairs/Preparation for Active Duty. (4-4-4)** Lecture, three hours. Requisites: courses 1A, 1B, 1C, 20A, 20B, 20C. Study of national security processes, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis on refining communication skills. P/NP or letter grading.

**199. Special Studies in Aerospace Studies. (2 or 4)** Tutorial, to be arranged. Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading.

## MILITARY SCIENCE

UCLA  
127 Men's Gym  
Box 951609  
Los Angeles, CA 90095-1609

fax: (310) 363-1588  
<http://www.sscnet.ucla.edu/milsci/>

Philip L. Barnette, M.A., M.S., *Lieutenant Colonel, Chair*

### Professor

Philip L. Barnette M.A., M.S., *Lieutenant Colonel*

### Adjunct Assistant Professors

Stacy M. Babcock, M.S., *Captain*  
Michael C. Berry, M.S., *Major*  
William McCloskey, B.A., *Major*  
Lorenzo R. Phillips, M.B.A., *Major*

## Scope and Objectives

Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes in-depth study of the military establishment, doctrine, leadership principles, management, and the ethical standards demanded of professional and effective leaders.

## Undergraduate Study

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of military science coursework and (2) the Advanced Course, two years of upper division study consisting of 13 units of military science coursework, one of the history courses listed below, and a six-week summer camp.

Army ROTC students must satisfy military history requirements by completing History 125E, 125F, 127A, 127B, 130, 147A, 148A, 148B, 148C, 152A, or 152B in lieu of Military Science 110, with consent of the ROTC adviser.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance between \$350 and \$400 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. Students accepting ROTC Scholarships and a commission in the Regular Army, or who are selected to enter the Active Army, serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

## Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

## Two-Year Program

The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Basic Camp, membership in the Army Reserve or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service.

## Commissioning

Successful completion of the Advanced Course program and a bachelor's degree may lead to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

## Military Science

### Lower Division Courses

**Z. Leadership Laboratory. (No credit)** Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers.

**10. Introduction to Leadership. (2)** Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes.

**11. U.S. Defense Establishment I. (2)** Lecture, one hour; discussion, one hour. Study of evolution and organization of U.S. Department of Defense, including study of military services, with emphasis on the U.S. Army. P/NP or letter grading.

**12. U.S. Defense Establishment II. (2)** Lecture, one hour; discussion, one hour. Fundamentals of national security policy development. P/NP or letter grading.

**14. Principles of Land Navigation Applicable in Maneuver. (2)** Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

**18. Modern Guerrilla Warfare. (2)** Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions.

**21. Psychology of Leadership I. (2)** Lecture, one hour; discussion, one hour. Study of relationship of individual differences, group dynamics, formal organizational constraints, and impact of society on leadership process. Introduction to external environmental pressures on a leader and psychology of the individual as a follower, examined in areas of motivation, peer pressure/conformity, and group norms.

**24. Theory of Warfare. (2)** Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare.

### Upper Division Courses

**110. U.S. Military History. (3)** Lecture, three hours; discussion, one hour. Survey of American military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society.

**112. Psychology of Leadership II. (3)** Lecture, one hour; discussion, one hour. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leader behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader.

**113. Theory of Learning Applied to Teaching. (2)** Lecture, one hour; discussion, one hour. Study of instructional processes, lesson content planning procedures, techniques of applicatory education, role of testing (including evaluation and analysis). Emphasis on development of training programs to maximize organizational effectiveness. P/NP or letter grading.

**123. Military Legal Systems. (2)** Lecture, one hour; discussion, one hour. Introduction to theory and application of military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution.

**125. Decision Making. (2)** Lecture, one hour; discussion, one hour. Designed to present students who become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem analysis and decision making impact and how they fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes.

**126. Military Professionalism and Ethics. (2)** Lecture, 30 minutes; discussion, 90 minutes. Ethical concepts held by America's military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model.

**199. Supervised Independent Studies. (1 to 3)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection.

## NAVAL SCIENCE

James L. Trotter, M.S., *Commander, U.S. Navy*

## Scope and Objectives

The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers' Training Corps (NROTC), scholarship students receive full tuition, fees, books, and \$200 per month subsistence pay. Nonscholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a reserve commission on completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy Scholarships are currently available to students pursuing any major offered by the University, as long as they complete basic technical requirements. In addition to University requirements, midshipmen must complete 28 units of naval science courses, a physical fitness test, and three summer cruises, each about four to eight weeks long. The department also conducts a sail training program for all midshipmen. All naval science courses, from ship systems and management to naval operations and amphibious warfare, are open to students who are not in the program but have an interest in the Navy and related fields,

such as engineering, navigation and naval operations, history, and management.

## Undergraduate Study

### Scholarship Program

The majority of naval science students attend the University on Naval Scholarships which are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. A two-year upper division scholarship program is also available, with a similar selection process, to students who have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition, fees, books, and uniforms, students receive subsistence pay of \$200 per month. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning.

### College Program (Nonscholarship)

Three- and four-year College Program students are selected by the department chair at the beginning of each academic year from applicants of the freshman and sophomore classes. These students must compete for advanced standing prior to their junior year. A two-year program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, subsistence pay of \$200 per month in their junior and senior years. Nonscholarship students serve on active duty for a minimum of three years following graduation and commissioning. College Program students may be recommended for scholarship benefits based on superior academic performance and participation in NROTC.

### Marine Corps Option

Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

### Commissioning

Students must meet UCLA degree requirements in their selected fields and complete the naval science courses as follows: Naval Science 1A, 20B (freshman year), 102B (sophomore year), 103 (junior year), 102C (senior year). Courses 1B, 20A, 101A, and 101B can be taken in either the sophomore or junior year. Courses 103 and 104 are to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A and 101B.

In addition, scholarship students must include in their programs one year of approved calculus, one year of approved calculus-based physics, one year of approved freshman English, one term of American military history, and one term of computer science. Nonscholarship students must include in their programs one year of college algebra or higher mathematics, physical science, and English, and one term of computer science. Of these requirements, Marine Corps option students are only obligated to fulfill the American military history/national security policy requirement.

## Naval Science Minor

The Naval Science minor is designed for students completing a major in a departmental program who wish to augment that major. Naval science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences.

To enter the minor, students must have an overall grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

*Required Lower Division Courses (10 units):*  
Naval Science 1B, 20A, 20B.

*Required Upper Division Courses (20 units):*  
Naval Science 101A, 101B, 102B, 103, 104.

All minor courses must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

## Naval Science

### Lower Division Courses

**1A. Introduction to Naval Science. (2)** Introduction to organization of the Naval Service, various components of the Navy, career opportunities, shipboard damage control, fire fighting, propulsion systems, and some customs and traditions of the Naval Service.

**1B. Naval Ship Systems I. (4)** Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

**20A. Naval Ship Systems II. (4)** Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

**20B. Seapower and Maritime Affairs. (2)** Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

### Upper Division Courses

**101A. Navigation I. (4)** Study of principles of piloting, celestial, and electronic navigation employed in determining a ship's position at sea. Celestial and electronic theory, mathematical analysis, sextant sights, and use of navigational aids.

**101B. Navigation II. (4)** Requisite: course 101A. Study of rules of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft.

**102B. Naval Leadership and Management I. (4)** Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

**102C. Leadership and Ethics. (2)** Requisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and performance and career evaluation.

**103. Evolution of Warfare. (4)** Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

**104. Expeditionary Military Operations. (4)** Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

**199. Supervised Independent Studies. (1 to 4)** Tutorial, to be arranged. Limited to juniors/seniors. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.

## Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

tures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

## Undergraduate Study

### Undergraduate Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Danish, Norwegian, and Swedish grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, and Danish may not enroll in any language course (including courses 105, 110, 115) in the Scandinavian Section except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

## Scandinavian Languages B.A.

### Preparation for the Major

*Required:* Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, or equivalent.

### Transfer Students

To be admitted as Scandinavian Languages majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of either Swedish, Norwegian, or Danish.

### The Major

*Required:* Twelve upper division Scandinavian courses, including 105 or 110 or 115, 141, 142, 143. As an option, three upper division courses in a related field may be taken if approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

## Scandinavian Minor

To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

*Required Courses (28 units):* Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50.

All minor courses must be taken for a letter grade, with an overall grade-point average of

2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Scandinavian Section offers the M.A. degree in Scandinavian.

## Admission

In addition to the University minimum requirements, prospective students for the M.A. program must have an undergraduate major in Scandinavian languages or equivalent. Applicants who have deficiencies in the undergraduate major must complete them by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division. The Scandinavian Section welcomes applications for all three quarters (Fall, Winter, Spring).

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the Ph.D. in Germanic Languages. For a brochure describing the program and requirements, write to the department.

## Master's Degree

There are no specific areas of study, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

The M.A. degree is offered through the comprehensive examination plan. A total of 12 courses is required, including a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses.

Three courses at the upper division or graduate level may be taken in a related field of linguistic or literary study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. A comparative literature course in methodology or an equivalent course in methodology is required as one of the 12 courses.

There is a language requirement for this degree.

## Scandinavian

### Lower Division Courses

- 1. Elementary Swedish. (4)** Discussion, four hours. P/NP or letter grading.
- 2. Elementary Swedish. (4)** Enforced requisite: course 1.
- 3. Elementary Swedish. (4)** Enforced requisite: course 2.
- 4. Intermediate Swedish. (4)** Enforced requisite: course 3.
- 5. Intermediate Swedish. (4)** Enforced requisite: course 4.
- 8. Elementary Swedish: Intensive. (12)** Lecture, 15 course; laboratory, five hours. Intensive basic course in Swedish equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.
- 11. Elementary Norwegian. (4)** Discussion, four hours. P/NP or letter grading.
- 12. Elementary Norwegian. (4)** Enforced requisite: course 11.
- 13. Elementary Norwegian. (4)** Enforced requisite: course 12.
- 14. Intermediate Norwegian. (4)** Discussion, four hours. Enforced requisite: course 13.
- 15. Intermediate Norwegian. (4)** Discussion, four hours. Enforced requisite: course 14.
- 21. Elementary Danish. (4)** Discussion, four hours. P/NP or letter grading.
- 22. Elementary Danish. (4)** Enforced requisite: course 21.
- 23. Elementary Danish. (4)** Enforced requisite: course 22.
- 24. Intermediate Danish. (4)** Enforced requisite: course 23.
- 25. Intermediate Danish. (4)** Enforced requisite: course 24.
- 50. Introduction to Scandinavian Literature. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 50W. Designed for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film, read in English and critically discussed. P/NP or letter grading.
- 50W. Introduction to Scandinavian Literature. (5)** Lecture, two hours; discussion, two hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 50. Designed for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film, read in English and critically discussed. Satisfies Letters and Science Writing II requirement. Letter grading.

### Upper Division Courses

- 105. Advanced Swedish. (4)** Discussion, three hours. Requisite: course 5. Readings, composition, and conversation in Swedish. May be repeated once for credit. P/NP or letter grading.
- 110. Advanced Norwegian. (4)** Discussion, three hours. Requisite: course 15. Readings, composition, and conversation in Norwegian. May be repeated once for credit. P/NP or letter grading.
- 115. Advanced Danish. (4)** Discussion, three hours. Requisite: course 25. Readings, composition, and conversation in Danish. May be repeated once for credit. P/NP or letter grading.
- 141. Backgrounds of Scandinavian Literature. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of representative texts selected from literature of medieval, Renaissance, baroque, and Enlightenment periods. P/NP or letter grading.
- 142. Scandinavian Literature of the 19th Century. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works from Romantic, realistic, and post-Romantic literature of Scandinavia in the 19th century. P/NP or letter grading.

**143. Scandinavian Literature of the 20th Century. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works of modern Scandinavian literature from beginning of the century to the present. P/NP or letter grading.

**C144. Henrik Ibsen on the World Stage. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251. P/NP or letter grading.

**C145. Getting Married: Strindberg and Battle of the Sexes. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. August Strindberg's portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C252. P/NP or letter grading.

**C146. Kierkegaard and Foundations of Existentialism. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works by Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C253. P/NP or letter grading.

**C147. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C254. P/NP or letter grading.

**C180. Literature and Scandinavian Society. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by undergraduate adviser) with topic change. May be concurrently scheduled with course C263. P/NP or letter grading.

**181. Contemporary Swedish Literature. (4)** Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish authors.

**C182. Theory of the Scandinavian Novel. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C264. P/NP or letter grading.

**184. Hans Christian Andersen. (4)** Lecture, two hours; discussion, one hour. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

**C185. Seminar: Scandinavian Literature. (4)** Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265.

**CM186. Voices of Women in Scandinavian Literature. (4)** (Formerly numbered C186.) (Same as Women's Studies M186.) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course C266. P/NP or letter grading.

**187. Scandinavian Film: Bergman and Others. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Designed for students in general and for those preparing for more advanced studies in Scandinavian literature and culture. Viewing and discussion of films by Ingmar Bergman and other Scandinavians. P/NP or letter grading.

**C188. Scandinavian Folk Narrative. (4)** Lecture, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodologies which strive to answer the question "why do people tell the stories that they tell?" Concurrently scheduled with course C267. Letter grading.

**190. Honors Course in Scandinavian. (4)** Limited to seniors with a minimum 3.0 grade-point average in major. Intensive study of a selected special topic in Scandinavian. Discussions, oral and written reports.

**199. Special Studies in Scandinavian. (2 or 4)** Tutorial, to be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see section for I.D. number). Limited to seniors and graduate students. Independent studies designed for graduates and senior undergraduates who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

### Graduate Courses

**C251. Henrik Ibsen on the World Stage. (4)** Discussion, three hours. Preparation: advanced knowledge of a modern Scandinavian language. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C252. Getting Married: Strindberg and Battle of the Sexes. (4)** Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. August Strindberg's portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C145. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C253. Kierkegaard and Foundations of Existentialism. (4)** Discussion, three hours. Preparation: advanced knowledge of a modern Scandinavian language. Readings and discussion of selected works of Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C146. S/U or letter grading.

**C254. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4)** Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C147. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C263. Literature and Scandinavian Society. (4)** Discussion, three hours. Designed for graduate students. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Graduate students may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

**C264. Theory of the Scandinavian Novel. (4)** Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C182. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C265. Seminar: Scandinavian Literature. (4)** Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185.

**C266. Voices of Women in Scandinavian Literature. (4)** Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course CM186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C267. Scandinavian Folk Narrative. (4)** Lecture, three hours. Preparation: advanced knowledge of a modern Scandinavian language. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodologies which strive to answer the question "why do people tell the stories that they tell?" Concurrently scheduled with course C188. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 6)** Tutorial, to be arranged with faculty member who directs the study or research. Limited to graduate Scandinavian students. Twelve units may be applied toward total course requirement, but only 4 units may be applied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4 to 8)** Tutorial, to be arranged with faculty member who directs the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4)** Tutorial, to be arranged with faculty member who directs the study or research. May be repeated. S/U grading.

Peter C. Hodgson, Jr., Ph.D.  
Vladimir Markov, Ph.D.  
Rochelle Stone, Ph.D.  
Dean S. Worth, Ph.D.

### Associate Professor

Roman Koropeckyj, Ph.D.

### Senior Lecturers S.O.E.

Olga Kagan, Ph.D.  
Edward Denzler, M.A., *Emeritus*

### Lecturers

Georgiana Galateanu, Ph.D.  
Susan Kresin, Ph.D.  
Judith Simon, Ph.D.

## Scope and Objectives

The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature and culture or Russian linguistics. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California semester program in Moscow, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early as possible.

The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples.

The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian literature, history, and culture.

The graduate program provides advanced training in the Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

## Undergraduate Study

The department offers three majors: (1) Russian Language and Literature, with concentrations in Russian literature or Russian linguistics, (2) Slavic Languages and Literatures, and (3) Russian Studies. The equivalent of a major in Slavic or Russian Language and Literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the

department. Students not majoring in Slavic or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

## Russian Language and Literature B.A.

### Preparation for the Major

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

### Transfer Students

To be admitted as Russian Language and Literature majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Russian civilization course.

### The Major

*Required:* Russian language skills equivalent to ACTFL level 2 (students usually take Russian 101A, 101B, 101C, 102A, 102B, and 102C to attain level 2 proficiency; consult the undergraduate adviser for information on summer programs and the Moscow semester program), Russian 106, 130A, 140A.

Students also must concentrate in either literature or linguistics. For the *literature* concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year), and two courses from 124C through 124T, 125, 130B, 130C, 140B, 140C, 140D, M150 are required. For the *linguistics* concentration, two courses from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124C through 124T, 125, 130B, 130C, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

## Slavic Languages and Literatures B.A.

### Preparation for the Major

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), Slavic 99.

### Transfer Students

To be admitted as Slavic Languages and Literatures majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Slavic civilization course.

### The Major

*Required:* Russian 101A, 101B, 101C, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+); courses 118, 119, 120 (all three may

be taken in the sophomore year); one three-course sequence from Czech 102A, 102B, and 102C, or 102D, 102E, and 102F, or Polish 102A, 102B, and 102C, or 102D, 102E, and 102F, or Serbian/Croatian 103A, 103B, and 103C, or 103D, 103E, and 103F (placement with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbian/Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 123, 130A, 130B, 130C, 140A through 140D, M150; two courses from Czech 155, Polish 152A, 152B, Serbian/Croatian 154, Slavic 125, 126.

## Russian Studies B.A.

### Preparation for the Major

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

### Transfer Students

To be admitted as Russian Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Russian civilization course.

### The Major

*Required:* Russian 101A, 101B, 101C, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156A, Russian CM170, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design | Media Arts, Film, Television, and Digital Media, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

## Russian Language Minor

To enter the Russian Language minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (13 units):* Russian 6 and two courses from 25, 99A, 99B.

*Required Upper Division Courses (23 units):* Russian 101A, 101B, 101C, and two additional upper division Russian language and literature courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Russian Literature Minor

To enter the Russian Literature minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (10 to 15 units):* Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

*Required Upper Division Courses (20 units):* Five Russian language or literature courses, including at least two from Russian 118, 119, 120, 130A, 130B, 130C, 140A through 140D.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Russian Studies Minor

To enter the Russian Studies minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (10 to 15 units):* Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

*Required Upper Division Courses (20 units):* Five courses dealing directly with Russia, to be selected from any upper division Russian language and literature courses, Economics 182, Geography 184, History 131A through 131D, Political Science 128A, 128B, 156A, Russian CM170. With approval of the undergraduate adviser, other related courses may be applied toward the minor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Slavic Languages and Literatures offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Slavic Languages and Literatures.

### Admission

In addition to the University minimum requirements, the department requires applicants to the M.A. program to hold the equivalent of a UCLA B.A. in Russian Language and Literature, Slavic Languages and Literatures, or Russian Studies, or to have completed three years of Russian language and a variety of courses in Russian history, literature, and linguistics.

All applicants must submit three letters of recommendation from persons capable of judging

their academic potential and a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application; it is not an obligation for international students whose native language is not English, unless they have a bachelor's degree from a university where the instruction is in English. The Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination is required of all international students whose first language is not English.

Applicants are formally admitted to the Ph.D. program after (1) passing the departmental M.A. examination with a grade of high pass, (2) demonstrating reading competency in both French and German, and (3) demonstrating proficiency in modern Slavic languages other than Russian as follows: applicants to the literature area must complete one year of the language of their second Slavic literature; applicants to the linguistics area must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group). Equivalent language proficiency may be demonstrated through written and oral examinations rather than coursework.

Applicants who do not have an M.A. in Slavic Languages and Literatures from UCLA must provide three letters of recommendation from persons capable of judging their academic potential and submit a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

A departmental brochure describing the curriculum in some detail is available from the department.

## Master's Degree

For the M.A. degree students choose a specialization in either literature or linguistics, with Russian usually as the principal language and literature.

The M.A. degree is offered through the comprehensive examination plan. A minimum of 36 units of graduate coursework is required of students in literature and 40 units of graduate coursework for students in linguistics. There are separate requirements for each specialization.

Students with M.A. degrees from other institutions must pass the M.A. comprehensive examination in order to be admitted to the Ph.D. program. Students with M.A. degrees in disciplines other than that of their planned specialization, or students who do not have an M.A. but have taken graduate-level courses equivalent to those required at UCLA for an M.A. degree, must complete the required number of course units.

There is a language requirement for this degree.

## Doctoral Degree

For the Ph.D. degree students choose a specialization in either literature or linguistics, with Russian usually as the principal language and literature. By special arrangement Ph.D. students may specialize in a language or literature other than Russian.

Students whose specialization is linguistics must take two required Slavic courses and three other advanced linguistics courses or seminars. Specific courses in linguistics are recommended preparation for linguists.

Students whose specialization is literature must take two required Slavic courses and four advanced literature courses or seminars. Students are also advised to acquire a sound general knowledge of modern Western European literature.

Written and oral qualifying examinations are required. Prior to the examinations, students are required to submit a qualifying paper that demonstrates their ability to conduct serious and original research. All students are expected to have a sound general knowledge of both Slavic philology and Russian literary history.

Students in linguistics take two written examinations. Usually one of the written examinations is on the structure of modern Russian and the other on comparative Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language.

Students in literature must take a series of written examinations on Russian literature and one on a Slavic literature other than Russian.

Following successful completion of the examinations, all students take the University Oral Qualifying Examination, which is designed to test the fields of major interest and general background and which typically includes discussion of the dissertation topic.

Students are required to deliver a formal lecture in the California Slavic Colloquium after advancement to candidacy.

There is a language requirement for this degree.

## Bulgarian

### Upper Division Courses

**103A-103B-103C. Elementary Bulgarian. (5-5-5)** Recitation, five hours. Basic courses in the Bulgarian language. P/NP or letter grading.

**154. Survey of Bulgarian Literature. (4)** Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

## Czech

### Upper Division Courses

**102A-102B-102C. Elementary Czech. (5-5-5)** Recitation, five hours. Basic courses in the Czech language. P/NP or letter grading.

**102D-102E-102F. Advanced Czech. (4-4-4)** Recitation, three hours. Requisite: course 102C.

**155. Survey of Czech Literature from Middle Ages to the Present. (4)** (Formerly numbered 155A-155B.) Lecture, three hours. Lectures and readings in English. P/NP or letter grading.

## Hungarian

### Upper Division Courses

**101A-101B-101C. Elementary Hungarian. (4-4-4)** Discussion, three to four hours. Course 101A is requisite to 101B, which is requisite to 101C. Introduction to grammar; instruction in speaking, listening, reading, and writing. P/NP or letter grading.

**199. Special Studies in Hungarian. (2 to 4)** Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. P/NP or letter grading.

## Polish

### Upper Division Courses

**102A-102B-102C. Elementary Polish. (5-5-5)** Recitation, five hours. Basic courses in the Polish language. P/NP or letter grading.

**102D-102E-102F. Advanced Polish. (4-4-4)** Recitation, three hours. Requisite: course 102C.

**152A-152B-152C. Survey of Polish Literature. (4-4-4)** Lecture, three hours. Lectures and readings in English. **152A.** From the Middle Ages to Neoclassicism; **152B.** Reimagining a Nation. Readings in 19th-century Polish literature and culture. **152C.** Dreaming, Mocking, and Writing "as if." Readings in modern Polish literature and culture.

### Graduate Course

**280. Seminar: Polish Literature. (4)** Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

## Romanian

### Lower Division Course

**99. Introduction to Romanian Civilization. (4)** Lecture, three hours. Introductory survey of social and cultural institutions of the Romanian people and their historical background.

### Upper Division Courses

**101A-101B-101C. Elementary Romanian. (5-5-5)** Recitation, five hours. Basic courses in the Romanian language. P/NP or letter grading.

**101D-101E-101F. Advanced Romanian. (5-5-5)** Recitation, five hours. Requisite: course 101C. Course 101D is requisite to 101E, which is requisite to 101F. Differences between oral and written discourse, expansion of students' general and academic vocabulary, and increase of range of grammatical structures for use in speaking and writing. Cultural information to be included in readings.

**104. Intensive Elementary Romanian. (12)** Intensive basic course in Romanian equivalent to courses 101A, 101B, 101C. P/NP or letter grading.

**152. Survey of Romanian Literature. (4)** Lecture, three hours. Lectures and readings in English. Survey of Romanian literature from the Middle Ages to the present.

### Graduate Course

**201. Romanian as a Romance Language. (4)** Lecture, three hours. Survey of structure and development of the Romanian language, with special emphasis on relationship of Romanian to other members of the Romance group.

## Russian

### Language

**1. Elementary Russian. (5)** Recitation, five hours; laboratory, one hour. P/NP or letter grading.

**2. Elementary Russian. (5)** Recitation, five hours; laboratory, one hour. P/NP or letter grading.

**3. Elementary Russian. (5)** Recitation, five hours; laboratory, one hour. P/NP or letter grading.

**4. Intermediate Russian. (5)** Recitation, five hours; laboratory, one hour. P/NP or letter grading.

**5. Intermediate Russian. (5)** Recitation, five hours; laboratory, one hour. P/NP or letter grading.

**6. Intermediate Russian. (5)** Recitation, five hours; laboratory, one hour. P/NP or letter grading.

**10. Intensive Elementary Russian. (12)** Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.

**11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian. (2 each)** Basic courses in the Russian language; 2 to 4 units per term recommended. Each 2-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/NP or letter grading.

**15A-15B. Accelerated Elementary Russian. (8-7)** Recitation, five hours; laboratory, two hours. Material of first-year Russian course to be covered in two terms, with extensive use of language laboratory and the Russian Room. P/NP or letter grading.

**16. Preintermediate Russian. (2)** Enforced requisite: course 3 or 13B or 15B. Designed for students who have completed first year of Russian (course 3 or 13B or 15B) but cannot take course 4 immediately. Conversation, reading, and composition. P/NP or letter grading.

**20. Intensive Intermediate Russian. (12)** Requisite: course 10 or one year of elementary Russian. Intermediate instruction in reading, writing, and speaking Russian equivalent to courses 4, 5, and 6.

**100A-100B. Literacy in Russian. (4-4)** Discussion, three hours. For students who speak Russian but have difficulty reading and writing. Each course may be taken independently for credit with consent of instructor. P/NP or letter grading.

**101A-101B-101C. Third-Year Russian. (5-5-5)** Recitation, five hours. Requisite: course 6. Advanced grammar, reading, and conversation. P/NP or letter grading.

**101A.** Russia and the West; **101B.** Soviet Russia; **101C.** Contemporary Russia.

**102A-102D. Fourth-Year Russian. (4 each)** (Formerly numbered 102A-102B-102C.) Lecture, three hours. Requisite: course 101C. Advanced conversation and composition, with emphasis on vocabulary development and review of selected grammar topics in fiction, nonfiction, poetry, film. Each course may be taken independently for credit. P/NP or letter grading. **102A.** The Family in Contemporary Russia. (Formerly numbered 102B.); **102B.** The Individual and the State. (Formerly numbered 102A.); **102C.** Growing Up in Russia; **102D.** Emphasis on Social Science.

**103A-103B-103C. Russian for Native and Near-Native Speakers. (4-4-4)** (Formerly numbered 103.) Discussion, three hours. Improvement of oral and written language skills, emphasizing correct and diversified use of language and addressing individual grammatical difficulties. Courses may be taken independently for credit and may be repeated for credit with topic and/or instructor change. P/NP or letter grading. **103A.** Russian National Identity. Readings in literature, philosophy, criticism, film. **103B.** Literature and Film. Film adaptations of Russian literature. Readings and screenings. **103C.** Special Topics.

**106. Russian for Advanced Native and Near-Native Speakers. (4)** Lecture, three hours. Requisite: course 101C. Analysis of literary texts. P/NP or letter grading.

**107. Russian for Social Scientists. (2)** Preparation: three years of Russian. Reading of texts relevant to social scientists: viewing of Soviet TV. May be repeated for credit.

**108. Russian for Business: Language and Culture. (4)** (Formerly numbered 108A-108B-108C.) Recitation, three hours. Discussion of economics and business in Russia, language and advertising, business and official correspondence. P/NP or letter grading.

## Linguistics

**M40. Language and Gender: Introduction to Gender and Stereotypes in English, Japanese, and Russian. (5)** (Same as Communication Studies M40 and Japanese M40.) Lecture, three hours; discussion, one hour. Introduction to language from sociological perspective of gender. Use of research and examples in English, Japanese, and Russian to explore nature of male and female "genderlects" and gendered language, as reflected in lexicon, language behavior, phonetics and intonation, language acquisition. Letter grading.

**123. Historical Commentary on Modern Russian. (4)** Lecture, three hours. Requisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.

## Literature and Civilization

**25. Russian Novel in Translation. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 25W. Designed for nonmajors. Study of major works by the great 19th-century Russian novelists.

**25W. Russian Novel in Translation. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 25. Study of major works by the great 19th-century Russian novelists. Satisfies Letters and Science Writing II requirement. Letter grading.

**30. Russian Literature and World Cinema. (4)** Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, focusing on problems of perception and misperception arising when literature is translated into cinema, and one national culture is viewed through the eyes of another. P/NP or letter grading.

**99A. Introduction to Russian Civilization. (4)** Lecture, three hours. Introductory survey of social and cultural institutions of the Russian people and their historical background.

**99B. Russian Civilization in the 20th Century. (4)** Lecture, three hours. Not open for credit to students with credit for course 99BW. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. P/NP or letter grading.

**99BW. Russian Civilization in the 20th Century. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 99B. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. Weekly discussions focus on varied approaches to writing addressing class topics. Five short papers required. Satisfies Letters and Science Writing II requirement. Letter grading.

**118. Russian Literature of Middle Ages and Enlightenment. (4)** Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of Russian literature from its origins through the Enlightenment, with focus on influence of church, state, and society in evolution of a national literature.

**119. Golden Age and the Great Realists. (4)** Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of 19th-century Russian literature (Pushkin, Gogol, Tolstoy, Dostoevsky, Chekhov) in its cultural, political, and social contexts.

**120. Literature and Revolution. (4)** Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Major works of the 20th century (Belyi, Pasternak, Bulgakov, Solzhenitsyn, and others) from prerevolutionary avant-garde to the present.

**124C-124T. Studies in Russian Literature. (4 each)** (Formerly numbered 124A-124G.) Lecture, three hours. Lectures and readings in English. P/NP or letter grading. Following writers are alternately discussed: **124C.** Chekhov. (Formerly numbered 124F); **124D.** Dostoevsky; **124G.** Gogol. (Formerly numbered 124B.); **124N.** Nabokov. (Formerly numbered 124G.) Nabokov as writer (the European stories and novel *The Gift*, originally written in Russian, and the American novels *Lolita*, *Invitation of a Spring*, and *Pale Fire*, originally written in English) and as critic (with excerpts from his criticism and from works by Pushkin, Gogol, and Lermontov), translator (*Eugene Onegin*), and memoirist (*Speak, Memory*). **124T.** Tolstoy. (Formerly numbered 124E.)

**125. The Russian Novel in Its European Setting. (4)** Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Emphasis on 19th- and 20th-century novelists.

**126. Survey of Russian Drama. (4)** Lecture, three hours. Lectures and readings in English. Introduction to representative selection of most important dramatic works in Russian literary tradition, including works from neoclassical, Romantic, realist, and futurist traditions. P/NP or letter grading.

**M127. Women in Russian Literature. (4)** (Formerly numbered 127.) (Same as Women's Studies M127.) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers. P/NP or letter grading.

**128. Russian Science Fiction. (4)** Lecture, three hours. Readings in English. Introduction to Russian science fiction in the 20th century. Emphasis on function of science fiction in development of Russian culture before and after the October Revolution. P/NP or letter grading.

**130A-130B-130C. Russian Poetry. (4-4-4)** Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change.

**130A.** Introduction to Analysis of Russian Poetry. Role of biography, cultural subtexts, rhetoric, and form in interpreting poetic texts. **130B.** Poetry of Russian Neoclassicism, Romanticism, and Realism. Major works of late 18th and 19th centuries in their historical and cultural contexts. **130C.** Russian Poetry in the 20th Century. Major poetic schools from early modernism (symbolism, futurism, acmeism) to contemporary avant-garde.

**140A-140D. Russian Prose Fiction. (4 each)** Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change.

**140A.** Introduction to Analysis of Russian Narrative Prose. Close analysis of genre, narrative, and rhetorical strategies and interplay of literature, history, and culture.

**140B.** Russian Romantic Prose. Karamzin, Pushkin, Gogol, and others. **140C.** Great Realists. Dostoevsky, Tolstoy, and others. **140D.** 20th-Century Modernism.

**M150. Russian Folk Literature. (4)** (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

**CM170. Russian Folklore. (5)** (Formerly numbered M170.) (Same as Folklore M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Concurrently scheduled with course C240. P/NP or letter grading.

**193. Seminar: Russian Literature. (4)** Seminar, three hours. Requisite: course 6. Recommended: course 101C. Reading and discussion of selected authors; written seminar papers usually required. May be repeated for credit with topic and/or instructor change.

## Graduate Courses

**201A-201B-201C. Russian: Vocabulary, Pronunciation, Style. (4-4-4)** Lecture, three hours. Requisites: courses 102C, 106. Conducted in Russian. Reading and analysis of texts with focus on vocabulary, pronunciation, and style, respectively, in three consecutive terms. S/U or letter grading.

## Linguistics

**202. Structure of Colloquial Russian. (4)** Phonology, morphology, word formation, lexicon, and sentence and discourse structure of contemporary vernacular of Russian intelligentsia in context of linguistic variation. S/U or letter grading.

**203. Practicum in Russian. (2)** Requisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

**204. Introduction to History of the Russian Language. (4)** Lecture, three hours. Requisites: course 220A, Slavic 201. Required for M.A. (linguistics, literature). Survey of history of the Russian language from its beginning to the present.

**210. Readings in Old Russian Texts. (4)** Lecture, three hours. Requisite: Slavic 201. Readings in premodern Russian texts. May be repeated for credit.

**220A-220B. Structure of Modern Russian. (4)** Lecture, three hours. **220A.** Phonology and Morphology. Required for M.A. (literature, linguistics). Advanced study and analysis of problems in Russian phonology, inflection, and derivation. **220B.** Morphosyntax. Requisite: course 220A. Required for M.A. (linguistics). Survey of Russian syntax and grammatical categories.

**241. Topics in Russian Phonology. (4)** Lecture, three hours. Requisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

**242. Topics in Russian Morphology. (4)** Lecture, three hours. Requisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

**243. Topics in Historical Russian Grammar. (4)** Lecture, three hours. Requisites: course 204, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax. May be repeated for credit with consent of instructor.

**261. Discourse Grammar of Russian. (4)** Analysis of phenomena of Contemporary Standard Russian controlled by discourse/pragmatic factors at all levels of linguistic structure from phonology to intersentential syntax. S/U or letter grading.

**263. Russian Dialectology. (4)** Lecture, three hours. Requisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

**264. History of the Russian Literary Language. (4)** Lecture, three hours. Requisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th century. Lectures and analysis of texts.

**265. Topics in Russian Syntax. (4)** Lecture, three hours. Requisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

## Literature and Civilization

**211A. Literature of Medieval Rus'. (4)** Lecture, three hours. Required for M.A. (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to end of the 17th century.

**211B. 18th-Century Russian Literature. (4)** Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers. Analysis of related literary works.

**212A-212B. 19th-Century Russian Literature. (4-4)** Lecture, three hours:

**212A.** The Golden Age. Required for M.A. (literature, linguistics). Survey of major literary movements and schools following demise of neoclassicism: sentimental school, early and late Romanticism, and beginnings of natural school. Discussion of representative works of Karamzin, Zhukovsky, Batyushkov, Pushkin, Baratynsky, Lermontov, Gogol.

**212B.** Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgenev, Goncharov, and Dostoevsky, moving to major novels of Tolstoy, Dostoevsky, and Saltykov-Shchedrin, and concluding with works of the symbolist period, especially the short stories of Chekhov.

**213. 20th-Century Russian Literature. (4)** Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers.

**215. Contemporary Russian Literature. (4)** Discussion, three hours. Requisite: course 213. Close readings in selected texts of poetry and prose, metropolitan and emigre, of recent vintage. May be repeated for credit. S/U or letter grading.

**219. Movements and Genres in Russian Literature. (4)** Lecture, three hours. Required for M.A. (literature). Introduction to most important theoretical issues of Russian literature viewed in diachronic perspective.

**227. Linguistic Approaches to Russian Poetry. (4)**

Lecture, three hours. Designed for graduate students. Introduction to use of linguistic methods in study of Russian poetic texts. May be repeated for credit.

**C240. Russian Folklore. (5)** Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Concurrently scheduled with course CM170. S/U or letter grading.

**251. Topics in Literature of Medieval Rus'. (4)** Lecture, three hours. Requisite: course 211A. Detailed discussion of particular writers, periods, or genres. May be repeated for credit with consent of instructor and graduate adviser.

**270. Russian Poetics. (4)** Lecture, three hours. Introduction to technical study of Russian poetics and versification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th century.

**290. Seminar: Russian Poetry. (4)** Seminar, three hours. Recommended preparation: course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

**291A. Seminar: Literature of Medieval Rus'. (4)** Seminar, three hours. Requisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

**291B. Seminar: 18th-Century Russian Literature. (4)** Seminar, three hours. Requisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**292. Seminar: 19th-Century Russian Literature. (4)** Seminar, three hours. Requisites: courses 212A, 212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**293. Seminar: 20th-Century Russian Literature. (4)** Seminar, three hours. Requisite: course 213. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**294. Seminar: Russian Literary Criticism. (4)** Seminar, three hours. Requisites: courses 211B, 212A, 212B, 213. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

**296. Seminar: History of Russian Culture. (4)** Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

## Serbian/Croatian

### Upper Division Courses

**103A-103B-103C. Elementary Serbian/Croatian. (5-5-5)** Recitation, five hours. Basic courses in Serbian/Croatian. P/NP or letter grading.

**103D-103E-103F. Advanced Serbian/Croatian. (4-4-4)** Recitation, three hours. Requisite: course 103C. P/NP or letter grading.

**154. South Slavic Literature. (4)** (Formerly numbered 154A-154B.) Lecture, three hours. Lectures and readings in English. Survey of South Slavic literature from Middle Ages to the present. P/NP or letter grading.

## Slavic

### Lower Division Courses

**88. Seminar: Literature and Culture. (4)** Seminar, three hours. Variable topics course designed to explore themes and issues pertinent to Slavic literature and culture. Consult *Schedule of Classes* or department for topics to be offered in a specific term. Letter grading.

**99. Introduction to Slavic Civilization. (4)** Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

## Upper Division Courses

**125. Interwar Central European Prose. (4)** (Formerly numbered M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

**126. Postwar Central European Prose. (4)** (Formerly numbered M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

**M179. Baltic and Slavic Folklore and Mythology. (4)** (Same as Folklore M126.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European of antiquities.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors.

## Graduate Courses

### Linguistics

**201. Introduction to Old Church Slavic. (4)** Lecture, three hours. Required for M.A. (linguistics, literature). Introduction to phonology and grammar; readings.

**202. Introduction to Comparative Slavic Linguistics. (4)** Lecture, three hours. Requisite: course 201. Required for M.A. (linguistics). Introduction to comparative phonology and grammar of Slavic languages.

**211. Slavic Gender Linguistics. (4)** Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to females and males. Course contributes to understanding of language, literature, sociolinguistics, gender issues, and Slavic culture in general. S/U or letter grading.

**221. Introduction to East Slavic Languages. (4)** Lecture, three hours. Requisites: Russian 102A, 102B, and 102C, or Ukrainian 101A, 101B, and 101C. Recommended: course 202. Required for Ph.D. (linguistics). Introduction to structure and history of East Slavic languages. Letter grading.

**222. Introduction to West Slavic Languages. (4)** Lecture, three hours. Requisite: course 202. Recommended: Czech 102A, 102B, and 102C, or Polish 102A, 102B, and 102C. Required for Ph.D. (linguistics). Introduction to structure and history of West Slavic languages.

**223. Introduction to South Slavic Languages. (4)** Lecture, three hours. Requisite: course 202. Recommended: Serbian/Croatian 103A, 103B, 103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages. S/U or letter grading.

**M229. Introduction to Slavic Bibliography. (2)** (Same as Information Studies M229C.) Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

**241A-241B. Advanced Old Church Slavic. (4-4)** Lecture, three hours. Requisite: course 201. **241A.** Advanced Readings in Canonical Texts; **241B.** East, West, and South Slavic Recensions of Church Slavic.

**242. Comparative Slavic Linguistics. (4)** Lecture, three hours. Requisite: course 202. Selected topics in development of Common Slavic.

**251. Introduction to Baltic Linguistics. (4)** Lecture, three hours. Requisite: course 202. Introduction to Baltic linguistics, with special attention to relationship between Baltic and Slavic.

**261. Slavic Paleography. (4)** Lecture, three hours. Requisite: course 201. Introduction to Slavic paleography: inscriptions, birchbark letters, Glagolitic and Cyrillic texts.

**281. Seminar: Slavic Linguistics. (4)** Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

**282. Seminar: Structural Analysis. (4)** Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

## Literature

**230A-230B-230C. Topics in Comparative Slavic Literature. (4-4-4)** Lecture, three hours. Recommended preparation: upper division courses in Czech, Polish, Russian, and Yugoslav literatures. Two terms required for Ph.D. (literature). May be repeated for credit with consent of instructor and graduate adviser. **230A.** Middle Ages through Baroque; **230B.** Classicism to Romanticism; **230C.** Realism to Modernism.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Slavic Languages at College Level. (4)** Seminar, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of language teaching. Discussion of contemporary language teaching methodology as well as problems of pedagogical grammar. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. S/U grading.

## Ukrainian

### Upper Division Courses

**101A-101B-101C. Elementary Ukrainian. (5-5-5)** Recitation, five hours. Basic courses in the Ukrainian language. P/NP or letter grading.

**152. Ukrainian Literature. (4)** Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as I. Kotlyarevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tychna.

## Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets

of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student's interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Policy and Social Research, the program affords students instructional opportunities in the other affiliated departments — Policy Studies and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better health care, better job training, and better economic futures.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Social Welfare offers the Master of Social Welfare (M.S.W.) and Doctor of Philosophy (Ph.D.) degrees.

## Admission

### Master of Social Welfare

In addition to Graduate Division requirements, the M.S.W. program requires a minimum of

seven courses in the liberal arts, including three in the sociobehavioral sciences, or a combination of liberal arts and social welfare subjects as requisite undergraduate preparation for graduate study in the field of social work. An elementary statistics course with a grade of B or better and one course with human biology content are also required.

The University requires a grade-point average of 3.0 or better in all courses taken during the junior and senior years. In exceptional cases that require special approval of the Graduate Division if admission is recommended, applicants who have a grade-point average below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the department applies the following criteria in the selection of candidates: personal suitability for professional education and a potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.

The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. In addition, international students whose native language is not English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. The department may request that specified additional examinations are taken to assist in the assessment of candidacy for admission.

Three letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Although a personal interview is not normally required as part of the application procedure, whenever possible a meeting with a member of the faculty is arranged for applicants.

Admission to the department requires simultaneous application to (1) the Department of Social Welfare and (2) the Graduate Division. Both applications and the program brochure can be obtained by writing to the Department of Social Welfare.

### Social Welfare M.S.W./Asian American Studies M.A.

The Department of Social Welfare and the Asian American Studies Program offer a concurrent program whereby students may pursue the M.S.W. and M.A. in Asian American Studies at the same time. Applicants are required to satisfy the regular admission requirements of both programs.

Students complete the Asian American studies courses in the first year and the social welfare courses in the second and third years. The Asian American Studies Program requires a

thesis to be completed by the third year. Students must complete the program requirements for both degrees. However, a maximum of 8 units of coursework in social welfare may be applied toward both degrees.

Applicants may submit the same statement of purpose to each program, but all other parts of the application process are separate to each graduate program. Applicants interested in the concurrent degree program should contact the Asian American Studies Program or the Department of Social Welfare.

### Social Welfare M.S.W./Law J.D.

The Department of Social Welfare and the School of Law offer a concurrent plan of study over four years leading to both a J.D. and an M.S.W. This integrated plan provides preparation for lawyers who want to focus on social welfare law and programs. Social workers interested in legal issues related to social welfare policy would also benefit from this preparation. Applicants are required to satisfy the regular admission requirements of both programs; contact the School of Law and the Social Welfare Department for further information.

### Ph.D. in Social Welfare

Admission requirements for the Ph.D. degree include meeting the general admission requirements of the Graduate Division and an M.S.W. degree from an accredited school of social work with a superior academic record. Students who possess a master's degree in social science and professional experience in a related field may also be admitted under one of the following plans:

1. Applicants who wish to obtain an M.S.W. are required to complete the first-year M.S.W. program. Students can be exempted from some second-year M.S.W. requirements via examinations on the basis of preparation received in Ph.D. courses. The plan is also available to applicants with a B.A. degree who possess an outstanding academic record.
2. Applicants who do not wish to obtain an M.S.W. may be required to take certain M.S.W. courses as requisites to Ph.D. courses.

The Graduate Record Examination (GRE) General Test is required. International applicants whose native language is not English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. The program may request that additional examinations be taken to assist in the assessment of candidacy for admission.

Official transcripts from every school attended since high school are required. Three letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify communication skills, applicants may submit any of the following:

published articles, master's thesis, unpublished papers, or term papers written in graduate courses.

Admission criteria include quality of performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express oneself clearly in writing, success in professional employment and other pertinent experiences, results of the GRE, and other qualifications indicating eligibility for advanced study and research. Enrollment in the Ph.D. program is limited, and it may not be possible to accept all applicants who meet the formal qualifications for admission.

Prospective students must apply separately to the department and to the Graduate Division. Both applications and the school brochure are available by writing to the Department of Social Welfare doctoral program.

### Master's Degree

Social work practice in organizations, communities, and policy settings (SWCOPS), and social work practice with individuals, families, and groups (SWIFG) are offered as social work methods concentrations. Specializations (sub-concentrations) are available in gerontology, child welfare, school and youth services, health services, and mental health services.

The M.S.W. degree is offered through the comprehensive examination plan. A total of 76 units of graduate coursework in the department is required, including two courses in the sequence of social welfare policy and services, three courses in the human behavior and social environment sequence, nine courses in methods of social work practice, two courses in social welfare research, and six quarters of field practicum.

The curriculum requires theoretical courses in research methodology. Students have the option of substituting the second-year required substantive social welfare research course with the satisfactory completion of an individual research project, or participation in a group research project concerned with a social welfare problem.

There is a concurrent field placement in each of the two years.

### Doctoral Degree

The Ph.D. program trains research-oriented scholars to advance the field of social welfare through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas: (1) specialization in a substantive area of social welfare, (2) integration of social and behavioral science knowledge into social welfare, and (3) research methods. Programs of study are planned in relation to the special and individual needs and interests of students.

There is a minimum core of required courses that includes two seminars on practice theory and research, two seminars on social welfare policy, and two graduate-level courses in statistics. In addition, students are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the department related to their specialization in social welfare, (2) three courses in advanced research methods, and (3) three quarters of research internship.

Every effort is made to individualize the curriculum around a student's area of interest and plans for the dissertation. In order to achieve this goal, a variety of patterns is utilized, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University.

Written and oral qualifying examinations are required. The written qualifying examinations consist of an examination in social welfare policy and practice that reviews current theory and research and a major publishable scholarly paper on a social welfare topic, demonstrating the student's mastery of social science theory and methods of scientific inquiry.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which covers the dissertation proposal and related areas.

## Social Welfare

### Upper Division Courses

**100A. Introduction to Social Welfare: Policies and Programs. (4)** Origin and development of major U.S. social welfare programs and policies guiding them, with emphasis on analysis of policy developments/issues related to provision of social welfare services. Study of historical and current responses of the profession to major social problems.

**100B. Social Welfare Policy: Overview. (4)** Requisite: course 100A. Review of existing policy regarding major social issues in the field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of differential impact of policy on various populations.

**101. Social Welfare in a Multicultural Society. (4)** Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recognize similarities and differences in values, perspectives, and beliefs across cultural groups.

**102. Social Welfare Organizations and Community Systems. (4)** Recommended requisites: courses 100A, 100B. Detailed demonstration of implementation of policy via the functioning of human service organizations. Examination of organizational structures/functions. Exploration of characteristics and organization of the community and forces that influence its development and change.

**103. Introduction to Direct Practice with Individuals, Families, and Groups. (4)** Requisites: courses 100A, 100B, 101. Description and demonstration of basic skills employed in direct social work practice via the casework process. Students practice these skills in written, role-play, small group, and video or audio exercises. P/NP or letter grading.

**104A. Filipino American Community and Family. (4)** Examination of interaction of Filipino American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Filipino American families and communities. P/NP or letter grading.

**104B. Japanese American Redress. (4)** Examination of process through which Civil Liberties Act of 1988 was created, pursued, and passed. This act was the official apology from the U.S. government to over 110,000 Japanese Americans incarcerated in concentration camps during World War II. P/NP or letter grading.

**M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4)** (Same as Gerontology M104C and Women's Studies M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

**M104D. Public Policy and Aging. (4)** (Same as Gerontology M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

**M104E. Social Aspects of Aging. (4)** (Same as Gerontology M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

**104F. Japanese American Community and Family. (4)** Examination of interaction of Japanese American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Japanese American families and communities. P/NP or letter grading.

**105. Social Welfare Policy in Modern America: Historical Perspectives. (4)** Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically been public insurance programs or cash transfers such as unemployment insurance, welfare, and Social Security. Collectively these programs are known as "the welfare state"; examination of origins of the U.S. welfare state, its development over time, and features that make it distinctive as compared to welfare states in other nations.

**106. Research Seminar and Field Observation: Social Welfare. (4)** Seminar, three hours; discussion, one hour; outside study, eight hours. Didactic component with focus on development of basic skills in the areas of research. Students select one field of observation experience (module) from a number of field settings. P/NP or letter grading.

**107. Field Practicum: Social Welfare. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 106. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under instructional supervision of an agency mentor and a UCLA faculty member. P/NP or letter grading.

**M108. Violence against Women. (4)** (Same as Women's Studies M187.) Lecture, three hours. Requisites: Women's Studies 10, 110A. Factual information and theoretical analyses regarding various forms of violence against women and girls in their homes, workplaces, and communities through critical examination of social structures and social science research. Letter grading.

**M140. Introduction to Study of Aging. (4)** (Same as Gerontology M140 and Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**199. Special Studies in Social Welfare. (2 or 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Designed for juniors/seniors. Intensive directed research in social welfare. P/NP or letter grading.

## Graduate Courses

**201A-201B. Dynamics of Human Behavior. (3-3)** Lecture, two hours; discussion, one hour. Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development. Letter grading.

**202A-202B. Dynamics of Human Behavior. (2-2)** Requisites: courses 201A, 201B. Deviations and pathologies or stresses in physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

**203A-203B-203C. Integrative Seminars. (2-2-2)** Integrative courses which bring together theory and practice of social work in a variety of topic areas relevant to the profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

**M203D. Supporting Families of Children with Special Needs. (2)** (Same as Psychiatry M254.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

**M203E. Hispanic Mental Health Issues and Treatment. (2)** (Same as Psychiatry M231.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

**M203F-M203G-M203H. Child Abuse and Neglect. (2-2-1)** (Formerly numbered M290E-M290F-M290G.) (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300A-M300B-M300C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Nursing M290A-M290B-M290C.) Lecture, two hours. Course M203F is requisite to M203G, which is requisite to M203H. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

**205. Cross-Cultural Awareness. (4)** Lecture, two hours; discussion, two hours. Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U or letter grading.

**M206A. Homelessness: Housing and Social Service Issues. (4)** (Same as Urban Planning M270.) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless. Letter grading.

**220. History and Philosophy of Social Welfare. (2)** History of social work as a field: body of knowledge, method and process, and point of view analyzed within context of economic, political, social, philosophical, and scientific climate of the period.

**M221A. Foundations of Social Welfare Policy. (4)** (Same as Policy Studies M210 and Urban Planning M241.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

**221B. Social Welfare Policy and Services II. (2)** Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

**223. Seminar: Social Work Profession. (2)** Nature and role of social work in contemporary society; relationships with other professions; probable future trends in the profession; social work ethics, professional organizations, certification licensing; professional responsibility for continued self-criticism and improvement of the profession. S/U grading.

**225A-225B. Social Welfare Policy. (4-4)** Discussion, three hours. Designed for Ph.D. students:

**225A. Formulation and Analysis.** Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies; with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis.

**225B. Implementation and Evaluation.** Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis.

**230A-230B-230C. Theory of Social Welfare Practice with Individuals, Families, and Groups I, II, III. (2-2-2)** Lecture, two hours. Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

**231A-231B-231C. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups IV, V, VI. (4-4-4)** Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced level, critical analysis of theories, concepts, and principles underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

**240A-240B. Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings I, II. (3-3)** (Formerly numbered 240A-240B-240C.) Lecture, three hours. Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system; administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. Letter grading.

**241A-241B-241C. Advanced Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings IV, V, VI. (4-4-4)** Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. S/U or letter grading.

**M241D. Social Advocacy and Domestic Violence. (4)** (Same as Law M359.) Lecture, three hours; fieldwork. Use of domestic violence as a case study to give students skills needed to advocate for individuals or issues. How systems work, how law legitimizes systems, and how advocacy can be used to change the systems.

**M241E. Leadership, Development, and Governance of Nonprofit Organizations. (4)** (Same as Policy Studies M228 and Urban Planning M288.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

**245A-245B. Development of Social Work Practice Theory. (4-4)** Discussion, three hours. Designed for Ph.D. students:

**245A. Epistemology of Practice.** Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science and practice interplay.

**245B. Models of Social Work Practice Research.** Research for practice, with major emphasis on methods of intervention research which seek to design, test, evaluate, and disseminate innovative intervention technologies.

**258. Critical Problems in Social Welfare.** (2) Designed for Ph.D. students. Current problems in the field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

**280. Social Welfare Research.** (3) Lecture, three hours; outside study, six hours. Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge. S/U or letter grading.

**281A-281B-281C. Advanced Social Welfare Research.** (2-2-2) Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress and S/U or letter grading.

**285A-285B-285C. Research in Social Welfare.** (4-4-4) Discussion, three hours. Review of areas of research of concern to social workers, with special attention to design, instrument construction, data collection, data processing, data reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research. S/U or letter grading.

**285D. Research in Child Welfare.** (4) (Formerly numbered 285A.) Lecture, three hours. Integrated examination of development of empirical research in child welfare field. Critical assessment of current approaches to meet needs of children who come to attention of child welfare agencies. Examination of research and theory in child welfare field. Review of student knowledge of research methods and statistics. Letter grading.

**285E. Research in Gerontology.** (4) (Formerly numbered 285B.) Lecture, three hours. Overview of research in aging. Development of research questions, selecting appropriate theoretical frameworks, conducting literature reviews, selecting appropriate research design, identifying sampling methods. Special considerations in aging research, including sampling, questionnaire design, and recruitment issues. Letter grading.

**285F. Research in Health.** (4) (Formerly numbered 285C.) Lecture, three hours. Research in area of health policy and services. Discussions of readings about range of research from field of health services. Identification of research design issues, design of research instruments, analysis of strengths and limitations of current approaches to health services research, consideration of alternative roles for social work practitioners in arena of health services. Letter grading.

**285G. Research in Mental Health.** (4) Lecture, three hours. Research methods in mental health. Application of experimental designs, survey research methods, ethnographic methods, single-subject designs, and observational methods. Operational definition of variables and selection and design of appropriate measures for research in mental health. Practice in critiquing published research related to mental health issues. Letter grading.

**285H. Program Evaluation Research.** (4) Lecture, three hours. Discussion of differences and similarities between evaluation and other research, alternative program evaluation methods, roles and limitations of evaluation research in real world, development of proposals for feasible program evaluation research. Letter grading.

**285I. Research in Youth Populations.** (4) Lecture, three hours. Research methods as applied to problems, issues, and interventions pertaining to youth populations. Instruction and experience in applying experimental and quasi-experimental designs, survey research methods, ethnographic methods, single-subject designs, and observational methods. Operational definition of variables and selection and design of appropriate measures for research with children and adolescents. Letter grading.

**286A. Survey of Research Methods.** (4) Discussion, four hours. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. S/U or letter grading.

**286B. Advanced Research Methods.** (4) Discussion, four hours. Advanced concepts underlying research methods. Continuing study of theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. S/U or letter grading.

**286C. Research Internship.** (4) Discussion, four hours. Supervised study and training through participation in on-going research project or one initiated by students and carried out under faculty supervision, enabling students to apply research skills developed in prior courses. May be repeated for credit. S/U or letter grading.

**290A-290B-290C. Seminars: Social Work.** (4-4-4) Seminar, three hours; outside study, nine hours. Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.

**M290D. Women, Health, and Aging: Policy Issues.** (4) (Same as Health Services CM241.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

**M290I. Children with Special Health Care Needs: Systems Perspective.** (4) (Same as Community Health Sciences M420.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices which have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

**M290J. Child Welfare Policy.** (4) (Same as Policy Studies M212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

**M290K. Mental Health Policy.** (4) (Same as Policy Studies M213.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

**M290L. Poverty, the Poor, and Welfare Reform.** (4) (Same as Policy Studies M214 and Urban Planning M246.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

**M290M. Health Policy.** (4) (Same as Policy Studies M215.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

**M290N. Public Policy for Children and Youth.** (4) (Same as Policy Studies M216.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

**M290P. Aging Policy, Elderly and Families.** (4) (Same as Policy Studies M211.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. Letter grading.

**M290Q. Social Welfare Policy in Asian American Communities.** (4) (Same as Asian American Studies M290Q.) Seminar, three hours. Overview of social welfare policy in Asian American communities. Introduction to major social welfare policies and programs in the U.S. and impact on Asian American communities. Policy development, approaches, processes of implementation, evaluation, and strategies to effect policy. S/U or letter grading.

**M290R. Law and the Poor.** (4) (Same as Law M215, Policy Studies M295, and Urban Planning M248.) Lecture, three hours. Designed for graduate students. Study of major income-maintenance programs in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

**M290S. Nonprofit Sector, State and Civil Society.** (4) (Same as Policy Studies M227 and Urban Planning M287.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in the U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between the U.S. and other countries. Letter grading.

**290T. Social Work and Juvenile Justice System.** (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Exploration of evolution of juvenile justice system in the U.S. and issues that have shaped current-day practice. Role of social workers in system to be theme throughout course. Letter grading.

**M290U. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits.** (4) (Same as Policy Studies M243 and Urban Planning M275.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is the problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

**M290V. Management Challenges and Tools for Nonprofit Sector.** (4) (Same as Policy Studies M226 and Urban Planning M286.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Fundamental building blocks for successful management in nonprofit sector. Students develop management skills in strategic thinking/problem solving, project management, team building, and negotiation. Use of case studies to troubleshoot critical challenges, from finance to crisis management to marketing, that nonprofit managers typically face. Letter grading.

**401A-401B-401C. Practicum: Social Work.** (3-3-3) Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

**402A-402B-402C. Advanced Practicum: Social Work.** (4-4-4) Laboratory, 24 hours. Requisites: courses 401A, 401B, 401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

**490. Professional Communication for Social Welfare.** (2) Writing workshop on students' papers in progress, with an eye toward scholarly publication. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

**501. Cooperative Program.** (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Special Study and Research in Social Welfare.** (2 to 8) Tutorial, to be arranged. Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

**596B. Special Study and Research for Ph.D. Candidates.** (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

**597A. Preparation for M.S.W. Comprehensive Examination.** (2 to 8) Tutorial, to be arranged. S/U grading.

**597B. Preparation for Ph.D. Qualifying Examinations.** (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

**599. Ph.D. Dissertation Research in Social Welfare.** (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

## Professors

Walter R. Allen, Ph.D.  
Rodolfo Alvarez, Ph.D.  
Ronald M. Andersen, Ph.D.  
Francis R. Anderson, B.A., *Acting*  
Kenneth D. Bailey, Ph.D.  
Richard A. Berk, Ph.D.  
Phillip Bonacich, Ph.D.  
Rogers W. Brubaker, Ph.D.  
Duane W. Champagne, Ph.D.  
Lucie C. Cheng, Ph.D.  
Robert M. Emerson, Ph.D.  
Michael S. Goldstein, Ph.D.  
Laura E. Gómez, M.A., J.D., Ph.D.  
Oscar Grusky, Ph.D.  
David Halle, Ph.D.  
M. Nicolette Hart, Ph.D.  
John C. Heritage, Ph.D.  
Jack Katz, Ph.D.  
Gail Kligman, Ph.D.  
Ivan H. Light, Ph.D.  
Michael Mann, Ph.D.  
Robert D. Mare, Ph.D.  
William Mason, Ph.D.  
Ruth M. Milkman, Ph.D.  
Anne R. Pebley, Ph.D.  
Melvin Pollner, Ph.D.  
Jeffrey Prager, Ph.D.  
William G. Roy, Ph.D.  
Emanuel A. Schegloff, Ph.D.  
Judith A. Seltzer, Ph.D.  
Edward E. Telles, Ph.D.  
Warren D. Tenhouten, Ph.D.  
Donald J. Treiman, Ph.D.  
Roger Waldinger, Ph.D.  
Maurice Zeitlin, Ph.D.  
Min Zhou, Ph.D.  
Lynne G. Zucker, Ph.D.

## Professors Emeriti

Jeffrey C. Alexander, Ph.D.  
Burton R. Clark, Ph.D.  
Harold Garfinkel, Ph.D.  
C. Wayne Gordon, Ph.D.  
John E. Horton, Ph.D.  
Harry H.L. Kitano, Ph.D. (*UCLA Alumni and Friends of Japanese Ancestry Professor Emeritus of Japanese American Studies*)  
Gene N. Levine, Ph.D.  
Valerie K. Oppenheimer, Ph.D.  
Jerome Rabow, Ph.D.  
Georges Sabagh, Ph.D.  
Melvin Seeman, Ph.D.  
Edwin S. Shneidman, Ph.D.  
Gerald H. Shure, Ph.D.  
Samuel J. Surace, Ph.D.  
Ivan Szelenyi, Ph.D.  
Ralph H. Turner, Ph.D.

## Associate Professors

Steven E. Clayman, Ph.D.  
Rebecca J. Emigh, Ph.D.  
Peter E. Kollock, Ph.D.  
Barbara Ballis Lal, Ph.D., *in Residence*  
David E. López, Ph.D.  
David D. McFarland, Ph.D.  
Vilma Ortiz, Ph.D.  
Gi-Wook Shin, Ph.D.

## Assistant Professors

Cameron D. Campbell, Ph.D.

John H. Evans, Ph.D.  
Aziza Khazzoom, Ph.D.  
Laura L. Miller, Ph.D.  
Meredith Phillips, Ph.D.  
Abigail Saguy, Ph.D.

## Adjunct Assistant Professors

Zsuzsa Berend, Ph.D.  
Michael F. Johnston, Ph.D.  
Kathleen Johnston Roberts, Ph.D.

## Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a survey conducted by the Conference Board of the Associated Research Councils.

Sociology has a particular appeal to those students whose interests are broad and unspecialized. At both the undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in Sociology is to enhance students' capacity for critical analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

## Undergraduate Study

### Sociology B.A.

#### Preparation for the Major

*Required:* One course from Sociology 1, 2, 3, 4, M5, 31; one course from Mathematics 2, 3A, 31A; Sociology M18 (or Statistics 10, Psychology 100A, or Economics M40).

All courses required for the major in Sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.

#### Transfer Students

To be admitted as Sociology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to sociology course, one finite mathematics or calculus course, and one statistics course.

## The Major

*Required:* Ten upper division sociology courses (40 units), including Sociology 101, 102, and one course from 104, 104H, 106A, 113. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible and before taking other upper division courses. Students must also take seven additional upper division sociology courses.

To complete the major, four upper division allied field courses (16 units) in other departments are required (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology), as is one course from English Composition 100W, 110, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Only 8 units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

## Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

As preparation for the honors major, students must complete Mathematics 2, 3A, or 31A, and an honors section of Sociology 1 and M18.

Prior to taking other upper division sociology courses, students must complete an honors section of Sociology 101 and 102.

Also required are three undergraduate seminars from the Sociology 197 series; any two additional upper division sociology courses; courses 104H, 199HA, 199HB, 199HC (honors thesis seminars); four upper division allied field courses (16 units) in other departments (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology); and one course from English Composition 100W, 110, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 2201 Hershey Hall. Students should apply in the last term of their junior year.

## Computing Specialization

Majors in Sociology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology C112, 113. Students graduate with a bachelor's degree in sociology and a specialization in Computing.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Sociology offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Sociology.

## Admission

The primary aim of the graduate program is the training of scholars who conduct original research that contributes to the advancement of sociological knowledge. Therefore, the department ordinarily only accepts students who are seeking the Ph.D. degree. An M.A. in Sociology is received as part of the process of completing the requirements for the Ph.D.

In addition to the minimum University requirements (an acceptable bachelor's degree and a B average in all upper division and graduate work), the department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with the applicant's written work and research experiences, (2) transcripts from all colleges where applicants have studied (the department's evaluation considers not only the record in sociology, but all undergraduate work, including coursework in English composition, logic, linguistics, and mathematics), (3) a statement of purpose, not to exceed three typewritten double-spaced pages, outlining the reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these, (4) copies of one or two term papers or research reports written by the applicant, (5) an official statement of scores on the Graduate Record Examination (GRE), and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department. Applicants need not be uniformly high on all indicators of potential. The admissions committee, which generally consists of at least five faculty members and two advisory graduate student members, uses a number of indicators of particular skills rather than relying heavily on just one or two. For example, in assessing the level of verbal skills, the committee considers several items, including samples of written work and grades in courses that ordinarily require extensive verbal skills, as well as verbal GRE scores.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women, minorities and other students with diverse backgrounds and experiences are therefore encouraged to apply.

The deadline for receipt of applications is December 1. Application forms and more detailed information are available on request from the graduate affairs assistant in the department.

## Master's Degree

The M.A. degree is offered through the comprehensive examination plan. The examination is in the format of a master's paper. The required 42 units of graduate coursework consist of proseminars introducing the theoretical and research interests of the faculty, theory and research courses, topics courses, a methodology sequence, five additional courses in sociology, and a required course in intermediate statistical methods.

In addition to the 42 units of required coursework, some field examinations have their own course requirements for students who plan to take that field examination.

## Doctoral Degree

Field examinations include class, politics, and society; comparative ethnicity and nationalism; conversation analysis; cultural sociology; economic sociology; ethnographic methodology; ethnomethodology; mathematical sociology; people-processing institutions; political sociology; race/ethnicity; self and society; social demography; social psychology; social stratification and social mobility; sociology of gender; urban and suburban sociology.

In the quarter following acceptance of the master's paper, students submit a proposal specifying two of the field examinations and a timetable for completing the examinations. The department determines whether or not students may proceed directly to preparation for the field examinations, if additional courses need to be taken for breadth purposes, if the submitted paper needs additional work or if an additional paper needs to be done, and if the methodology sequence requirement has been adequately satisfied.

After the master's paper review, all students are required to take two courses of an additional specified methodology sequence that must be completed before award of the Ph.D. degree. In addition, the field examinations have required/recommended courses.

Written and oral qualifying examinations are required. Two specialized field examinations are administered by the area programs.

Following successful completion of the field examinations, students prepare a dissertation proposal and take the University Oral Qualify-

ing Examination, which covers general sociology, their specific fields, and the proposal.

## Sociology

### Lower Division Courses

**1. Introductory Sociology. (4)** Lecture, four hours. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation. P/ NP or letter grading.

**2. Changing Society and Making History. (4)** Lecture, three hours; discussion, one hour. Leading question is how do politics, economics, and culture interact in changing society and making history? Answers provided by introductory level of study of contending substantive theories and contrasting methods of inquiry contained both in classic and exemplary contemporary works.

**3. Sociology of Everyday Life. (4)** Lecture, three hours; discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Cultivation of capacity to critically observe tacit practices through which everyday life is constructed.

**4. Jobs and Careers: Sociological Approach. (4)** Lecture, three hours; discussion, one hour. Application of social science knowledge to common vocational problems. Description and analysis of major trends in employment, job search and hiring, career mobility patterns, forecasting, and entrepreneurship. Analysis of current thrust to worker ownership.

**M5. Social Organization of Black Communities. (4)** (Same as Afro-American Studies M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

**M18. Introduction to Statistical Methods for Social Sciences. (5)** (Same as Anthropology M80, Geography M40, and Statistics M12.) Lecture, four hours; discussion, one hour; laboratory, one hour. Elements of statistical analysis for social sciences. Presentation and interpretation of data, descriptive statistics, theory of probability and basic sampling distributions, statistical inference including principles of estimation and tests of hypotheses, introduction to regression and correlation. P/NP or letter grading.

**24. Conversation and Society. (4)** Lecture, three hours. Examination of social norms that organize conversational interaction in everyday life. Consideration of relationship between conversation and other institutions in society. P/NP or letter grading.

**31. Dilemmas of Third World Development. (4)** Lecture, three hours; discussion, one hour. Introduction to understanding dilemmas of Third World social development and prospects for progress in the future.

**88A-88Z. Lower Division Seminars. (4 each)** Seminar, three hours. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult *Schedule of Classes* or "Department Announcements" for topics and instructors.

### Upper Division Courses

**101. Development of Sociological Theory. (4)** Comparative survey of basic concepts and theories in sociology from 1850 to 1920; codification of analytic schemes; critical analysis of trends in theory construction.

**102. Contemporary Sociological Theory. (4)** Requirement: course 101. Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

**103. Marxist Sociology. (4)** Fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward theory requirement for the major.

**104. Introduction to Sociological Research Methods. (4)** Not open to students with credit for course 104H. Systematic treatment and semiquantitative skills of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

**104H. Honors Thesis Research. (4)** Lecture, one hour; discussion, three hours. In-depth introduction to process of producing scholarly sociological research for students who intend to write an undergraduate honors thesis. Letter grading.

**106A. Introduction to Field Research Methods. (6)** (Formerly numbered 106.) Lecture, two hours; discussion, two hours; fieldwork, eight to 10 hours. Introduction to theory and practice of ethnographic field research, including consideration of fieldwork roles and relations, observing and describing, writing field notes, field interviewing, ethical issues, and preliminary data analysis. Fieldwork and extensive field notes required. Letter grading.

**106B. Intensive Field Research. (8)** Lecture, 90 minutes; discussion, 90 minutes; fieldwork, 15 to 20 hours. Requisite: course 106A. Field research practicum in which students write field notes on their experiences in and observations of intensive internship field placement. Readings focus on detached vs. "insider" fieldwork roles, ethical and political issues in fieldwork, use of qualitative and life history interviews in ethnography, and techniques for initial analysis of field data. Letter grading.

**106C. Analysis of Field Data. (4)** Lecture, two hours; discussion, two hours. Requisite: course 106B. Use of techniques of qualitative data analysis, including qualitative coding, analytic memoing, and grounded theory methods, to analyze field note and interview materials collected in courses 106A and 106B. Letter grading.

**107. Urban Poverty and Public Policy in the U.S. (Field Component). (4)** Requisite: course 144. Corequisite: one course from Geography 150 or 159A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

**109A-109B. Data Analysis for Social Scientists. (4-4)** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for undergraduate students, especially sociology honors students. P/NP or letter grading.

**110. Sociohistorical Methods. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. General problems of scientific abstraction, generalization, inference, and verification and particular problems of historical specification, comparison, and counterfactual reasoning in constructing and testing a replicable explanation of an historical event. P/NP or letter grading.

**C112. Introduction to Mathematical Sociology. (4)** (Formerly numbered 112.) Lecture, three hours; laboratory, two hours. Requisites: course M18, Mathematics 2, 3A (course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus). Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Concurrently scheduled with course C243. Letter grading.

**113. Statistical and Computer Methods for Social Research. (4)** Lecture, three hours; laboratory, one hour. Requisite: course M18. Continuation of course M18, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies. Students learn how to use the computer and write papers analyzing prepared data sets.

**M115. Environmental Sociology. (4)** (Same as Environment M133.) Lecture, three hours. Relationship between society and environment. Analysis in detail of interrelations between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

**116. Social Demography. (4)** Studies of past, present, and future trends in population growth. Sociological theories of causes and consequences of population growth and redistribution. Emphasis on correlates of fertility, mortality, and migration.

**117. Sociology of Family Demographic and Economic Behavior. (4)** Examination of demographic behavior associated with social organization of the family and its relationship to society's economic system. American and European historical studies of family socioeconomic and demographic characteristics and behavior in first half of course; U.S. experience since the 1930s in second half.

**CM124A-CM124B. Conversational Structures I, II. (4-4)** (Same as Communication Studies M144A-M144B.) Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses C244A-C244B. P/NP or letter grading. **CM124A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **CM124B.** Requisite: course CM124A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

**CM125. Talk and Social Institutions. (4)** (Same as Communication Studies M125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course C258. P/NP or letter grading.

**126. Study of Norms. (4)** Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required.

**127. Mind and Society. (4)** Lecture, two and one-half hours; discussion, one hour. Requisite: course 1. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading.

**128. Sociology of Emotions. (4)** Lecture, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and the emotions; the self and emotions; social construction of emotions.

**129. Sociology of Time. (4)** Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; "cyclical" and "linear" time in primitive, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination.

**132. Social Psychology: Sociological Approaches. (4)** Survey of contribution of sociologists to theory and research in social psychology, including theories of social control; conformity and deviation; reference groups; and interaction process.

**133. Collective Behavior. (4)** Requisites: courses 1, M18. Designed for juniors/seniors. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization.

**134. Culture and Personality. (4)** Requisites: courses 1, M18. Designed for juniors/seniors. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior.

**135. Group Processes. (4)** Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques.

**136. Process and Socialization in the Family. (4)** Requisites: courses 1, M18. Designed for juniors/seniors. Examination of processes of interaction, decision making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society.

**137. Psychoanalytic Sociology. (4)** Recommended preparation: one course in theory (course 101 or 102) and in social psychology. Requisites: courses 1, M18. Fieldwork may be required. Designed to review models of integration between psychoanalysis and sociology. Application of this analytical perspective to selected substantive areas and social processes, including but not limited to group development, delinquency, deviance, socialization, identity and self formation, role taking and role making.

**M138. Death, Suicide, and Trauma. (4)** (Same as Psychology M163.) Lecture, three hours. Designed for juniors/seniors. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental problems on witnessing traumatic death, including posttraumatic and grief reactions; partial death; mega-death; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward Psychology or Sociology major).

**143. Human Health and Society. (4)** Lecture, three hours; discussion, one hour. Requisite: course 1. Exploration of long-run historical trends in relationship between human health and social organization, drawing on historical, anthropological, demographic, and sociological concepts, theories, and data.

**144. Urban Poverty and Public Policy in the U.S. (4)** Historical overview of urban poverty and social welfare programs; ongoing debates about causes and consequences of poverty.

**145. Sociology of Deviant Behavior. (4)** Examination of leading sociological approaches to study of deviation and general survey of major types of deviation in American society.

**C146. Sociology of Interpersonal Conflict. (4)** (Formerly numbered 146.) Lecture, three hours; discussion, one hour. Development and transformation of everyday disputes and interpersonal troubles; dispute processing as informal social control in public places, neighborhoods, workplaces, and household settings in contemporary society. Concurrently scheduled with course C229A. Letter grading.

**147A. Sociology of Crime. (4)** Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and meanings of crime and criminal behaviors.

**147B. Sociology of Criminal Justice. (4)** Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons.

**148. Sociology of Mental Illness. (4)** Analysis of major sociological and social psychological models of madness. Study of social processes involved in production, recognition, labeling, and treatment of "mental illness."

**C149. People Processing Institutions. (4)** Discussion, three hours. Theory and research analyzing operation and decision-making processes of a variety of people processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Concurrently scheduled with course C229B. Letter grading.

**M150. Sociology of Aging. (4)** (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

**151. Comparative Immigration. (4)** Lecture, three hours; discussion, one hour. Survey of immigration of Europeans, Asians, and Hispanics to the U.S. since the mid-19th century. Overview of immigration experience on ethno-racial groups that migrated voluntarily to this country, with emphasis on immediate postimmigration settlement. P/NP or letter grading.

**152. Comparative Acculturation and Assimilation. (4)** Lecture, three hours; discussion, one hour. Requisite: course 151. Comparison of acculturation and assimilation of Europeans, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

- M153. Chinese Immigration. (4)** (Same as Asian American Studies M154.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.
- 154. Race and Ethnicity: International Perspectives. (4)** Lecture, three hours; discussion, one hour. Not open to freshmen. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S.
- M155. Latinos in the U.S. (4)** (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Prerequisite: course 1. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.
- 156. Ethnic and Status Groups. (4)** Characteristics of "visible" ethnic groups (e.g., Japanese, Mexican, and black); their organization, acculturation, and differentiation. Development, operation, and effects of selective immigration and population mobility. Status of chief minorities in continental U.S., with comparative materials from Jamaica, Hawaii, and other areas.
- 157. Social Stratification. (4)** Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology.
- 158. Urban Sociology. (4)** Lecture, three hours. Description and analysis of urbanization and urbanism in the U.S. and the world.
- 159. Comparative Studies of Jewish Communities in the U.S. and Abroad. (4)** Lecture, three hours; discussion, one hour. History, distribution, structure, and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelationships and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required. P/NP or letter grading.
- 160. Intergroup Conflict and Prejudice. (4)** Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimination. Special attention to alternative sociological and psychological theories of prejudice; effects of minority status on the individual; and possibilities for attitude and behavior change.
- M161. Comparative American Indian Societies. (4)** (Same as American Indian Studies M161.) Lecture, three hours. Prerequisite: course 1 or American Indian Studies 10. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.
- M162. Sociology of Gender. (4)** (Same as Women's Studies M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 1 or Women's Studies 10. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.
- M163. Gender and Work. (4)** (Same as Women's Studies M163.) Lecture, three hours. Prerequisite: course 1 or Women's Studies 10. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.
- M164. Politics of Reproduction. (4)** (Same as Women's Studies M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, surrogacy, and new reproductive technologies. Letter grading.
- M166. Women in Socialist and Post-Socialist States. (4)** (Same as Women's Studies M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender differences are everywhere central to democratization and marketization. Discussion of ways in which state policies affect women. Letter grading.
- M167. Contested Sexualities. (4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167 and Women's Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.
- 168. Organizations and Society. (4)** Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and research on behavior of organizations in society.
- 169. Law and Society. (4)** Specific topics may include law in preindustrial and industrialized societies, legalization of contemporary social relations, participants' experiences of legal processes, lay perceptions of justice, social movements toward equal justice, roles of lawyers and judges, social impact of court decisions.
- 170. Medical Sociology. (4)** Prerequisite: course 1. Provides majors in Sociology and other social sciences, as well as students preparing for health sciences careers, with understanding of health-seeking behavior and interpersonal and organizational relations that are involved in receipt and delivery of health services.
- 171. Occupations and Professions. (4)** Description and analysis of representative occupations and professions, with emphasis on the contemporary U.S.
- 172. Entrepreneurship. (4)** Lecture, three hours; discussion, one hour. Prerequisite: course 1. Description and analysis of entrepreneurship, with special reference to historical origins, ideology, international comparisons, women and ethnic minority participation, legal and illegal forms, public and private auspices.
- 173. Economy and Society. (4)** Sociology of economic life, with emphasis on principal economic institutions of the U.S.
- M174. Sociology of the Family. (4)** (Formerly numbered 174.) (Same as Women's Studies M174.) Lecture, four hours. Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.
- M175. Sociology of Education. (4)** (Same as Education M108.) Prerequisite: course 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.
- M176. Sociology of Mass Communication. (4)** (Same as Communication Studies M147.) Prerequisite: course 1. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.
- M177. The Military and Society. (4)** (Formerly numbered 177.) (Same as Women's Studies M177.) Lecture, three hours; discussion, one hour. Examination of the military as an organization and profession: personnel issues such as family, class, race, gender, and sexual orientation and postmodern military issues such as civil/military relations, media coverage, peacekeeping operations, and the future of war. P/NP or letter grading.
- M180. Introduction to Development Studies: Political Economy of Development. (4)** (Same as International Development Studies M100B and Political Science M197G.) Seminar, three hours. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.
- 182. Political Sociology. (4)** Contributions of sociology to study of politics, including analysis of political aspects of social systems, social context of action, and social bases of power.
- 183. Comparative and Historical Sociology. (4)** Prerequisite: course 1. Survey of central themes of comparative and historical studies in sociology. Various aspects of development of modern society, including development of nation-state, emergence of capitalism, industrialization, and population growth. Variation in contemporary society, viewed from a variety of theoretical perspectives.
- 184. Social Change. (4)** Study of patterns of social change, resistance to change, and change-producing agencies and processes.
- 185. American Society. (4)** Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, the state, politics, community, the family, religion, and American culture. Theories of social change, conflict, and order applied to the case of the U.S.
- 186. Latin American Societies. (4)** Descriptive survey of major Latin American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to relations between rural and urban life.
- 187. Population and Society in the Middle East. (4)** Designed for juniors/seniors. Survey of Middle Eastern societies; their historic and environmental bases; contemporary demographic and cultural situation.
- 188. Comparative East Asian Societies before World War II. (4)** Lecture, two hours; discussion, one hour. Designed for juniors/seniors. Introductory and comparative survey of traditional societies of East Asia, including China, Japan, Korea, and Vietnam, with focus on dynamic interactions between culture, state, and society in process of change.
- 189. Japanese Society. (4)** Lecture, two and one-half hours; discussion, two hours. Prerequisite: course 1. Analysis of social-structural characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, more than cultural perspectives.
- 190. Capitalism, Socialism, and Alternative Social Systems. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Theories of capitalism and socialism, history of social experiments with socialism and other noncapitalist systems, and assessment of the record of these experiments. P/NP or letter grading.
- 191. Society and Politics in Korea. (4)** Lecture, three hours; discussion, one hour. Examination of society and politics in 20th-century Korea from a comparative/historical perspective; Korean case used to discuss major sociological and theoretical issues in social change and development (political and economic). P/NP or letter grading.
- 192. State and Society in China. (4)** Lecture, three hours. Designed for juniors/seniors. Thematic overview of post-1949 society and politics in China, with emphasis on long-term evolution of China's state and society from 1949 to the present.
- 193. Asia-Pacific Social Transformation since World War II. (4)** Lecture, three hours. Designed for juniors/seniors. Introductory and comparative survey of post-World War II development in Asia-Pacific region, with focus on ascent of Japan, newly industrialized capitalist countries, and emergence of socialist states.
- M194. Senior Seminar: Language, Interaction, and Culture. (4)** (Same as Anthropology M194 and Applied Linguistics and TESL M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.
- 195A-195Z. Special Topics in Sociology. (4 each)** Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Study of selected topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit and may be applied as elective units toward Sociology major. P/NP or letter grading.
- M196A-M196B. Contemporary Issues in Urban Poverty Research. (4-4)** (Same as Anthropology M196A-M196B.) Lecture, three hours. Prerequisites: Honors Collegium 7A, 7B. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. P/NP or letter grading.

**197A-197Z. Undergraduate Seminars. (4 each)** Seminar, three hours. Limited to junior/senior Sociology majors. P/NP or letter grading.

**M197W. CAPP Washington Research Seminar. (8)** (Same as Political Science M197W.) Seminar, three hours; laboratory, 24 hours. Limited to CAPP Program students. Seminar for undergraduates in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Requisites: courses 1, M18. Limited to senior Sociology majors and graduate students. Course of independent studies designed for students who (1) desire a more advanced or specialized treatment of an area covered in regular course list and who present that course as a requisite or (2) desire work in an area of sociological analysis currently not covered by an upper division course. Only 8 units are allowed. See undergraduate counselor for course contract.

**199HA-199HB-199HC. Special Studies for Honors. (4-4-4)** Tutorial, to be arranged. Requisite: course 104H. Limited to sociology honors program students. Letter grading. **199HA.** Design of research project to serve as student's honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required. **199HB.** Continuation of work initiated in course 199HA. Series of progress reports are prepared in consultation with instructor. **199HC.** Completion of written report or honors thesis.

**199I. Independent Studies for Internships. (2 to 4)** Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be applied toward major requirements. Normally only 4 units of internship are allowed. P/NP grading.

## Graduate Courses

**201A-201B-201C. Proseminars: Sociology. (2-2-2)** Seminar, two hours every other week. Required of first-year graduate sociology students. Introduction to range of theoretical and research interests represented by department faculty members. S/U grading.

**202A-202B. Theory and Research in Sociology. (4-4)** Lecture, two hours; discussion, two hours. Required of first-year graduate sociology students. Examination of interrelations of theory, method, and substance in exemplary sociological works, with analytical and skills-centered orientation. In Progress and S/U or letter grading.

**203A. Social Survey Practicum. (4)** Lecture, one hour; discussion, one hour; laboratory, two hours. Designed for graduate students. Training through practice in basic techniques of survey research.

**203B. Social Survey Research Seminar. (4)** Seminar, one hour; discussion, one hour; laboratory, two hours. Designed for graduate students. Development of individual survey research projects under faculty supervision.

**204. Topics in Sociological Theorizing. (4)** (Formerly numbered 255A-255B.) Seminar, four hours. Examination of selected issues and problems in classical or contemporary sociological theory. S/U or letter grading.

**208A-208B. Social Network Methods. (4-4)** Lecture, three hours; laboratory, one hour. Requisites: courses 209A and 209B, or 210A and 210B. Techniques for measuring characteristics of networks and positions in networks. Centrality of positions, centralization and density of networks, structural equivalence, cliques. Readings of exemplars of network research. Computer programs. In Progress and letter grading.

**209A-209B. Data Analysis for Social Scientists. (4-4)** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for graduate social sciences students. In Progress grading.

**209C. Mathematics for Social Statistics. (4)** Lecture, three hours; computer exercises. Designed for graduate students. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

**210A-210B. Intermediate Statistical Methods I, II. (4-4)** Lecture, three hours; discussion, two hours. Requisite: course M18. Intermediate statistical methods using computers: probability theory, sampling distributions, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. S/U or letter grading.

**210C. Intermediate Statistical Methods III. (4)** Lecture, four hours. Requisite: course 210B. Survey of advanced statistical methods used in social research, with focus on problems for which classical linear regression model is inappropriate, including categorical data, structural equations, longitudinal data, incomplete and erroneous data, and complex samples. S/U or letter grading.

**211A-211B. Comparative and Historical Methods. (4-4)** In Progress grading. **211A.** Strategies of Research and Conceptualization. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. **211B.** Research Techniques. Requisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

**212A-212B. Survey Data Analysis. (4-4)** (Not the same as courses 212A-212B prior to Fall Quarter 1998.) Lecture, three hours. Requisites: courses 210A, 210B. Analysis and interpretation of primarily nonexperimental quantitative data, focusing on sample survey and census data. Extensive practice at utilizing statistical methods encountered in previous courses, culminating in term paper in style of *American Sociological Review* or similar journal article. Topics include simple tabular analysis, log-linear analysis, ordinary least squares regression, robust regression, binomial and multinomial logistic regression, and scale construction. Logic of analysis and problems of statistical inference, including diagnostic procedures and methods for handling complex sample survey designs. In Progress and letter grading.

**212C. Study Design and Other Issues in Quantitative Data Analysis. (4)** Lecture, three hours. Designed for graduate and undergraduate students who have had some exposure to statistics and quantitative methods. Introduction to study design, including experimental, longitudinal, cohort, time-series designs, contextual, and other designs. Discussion of suitability of various design classes for specific analytic goals, as well as their comparative strengths and weaknesses. S/U or letter grading.

**M213A. Introduction to Demographic Methods. (4)** (Formerly numbered 213A.) (Same as Biostatistics M208 and Community Health Sciences M208.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

**213B. Techniques of Demographic and Ecological Analysis. (4)** Requisite: course 210A. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of population and ecological structure and change; applications to study of social structure and social change.

**214A-214B. Naturalistic Methods for Recorded Data. (4-4)** Special features of audio and video recordings as sources of data; problems of description and analysis posed by working with recorded data; practical exploration of techniques of data collection and transcription with both audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. In Progress grading.

**215A-215B. Experimental Sociology. (4-4)** Requisite: course 210A. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

**216A-216B. Survey Research Design. (4-4)** Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 210A. History of the survey method; facet meta-theory and concept formation; questionnaire and item design; scales, indices typologies; data collection — planning and management; network, snowball, and experience sampling; multistage probability sampling, stratification and clustering. Students participate in survey research project. Letter grading.

**217A. Analyzing Ethnographies. (4)** Seminar, three hours. Analysis of ethnographic monographs. S/U or letter grading.

**217B-217C. Ethnographic Fieldwork. (4-4)** Seminar, three hours. Recommended requisite: course 217A. Theories and techniques of ethnographic fieldwork. Kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethical problems involved in such research. In Progress grading.

**218A-218B. Ethnomethodological Methods. (4-4)** Examination of techniques used in ethnomethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnomethodological procedures. In Progress grading.

**219A-219B. Advanced Statistical Methods I, II. (4-4)** Lecture, three hours; discussion, two hours. Requisites: courses 210A, 210B. Not required. Advanced multivariate statistical methods: discrete variables and events, logit and log-linear regression, event-history analysis, general linear model, exploratory and confirmatory factor analysis, linear causal models, latent variables, reciprocal causation, classification and clustering, time-series analysis.

**220. Self and Society. (4)** (Not the same as course 220 prior to Fall Quarter 1998.) Lecture, three hours. Examination of social and cultural processes shaping definition and experience of the self, embodied interactional practices through which the self is constructed in everyday and institutional contexts, formation and transformation of self during life course, and construction of collective identity. Letter grading.

**221. Social Ecology. (4)** Requisites: courses M18, 116. Designed for graduate students. Examination of various approaches to both microecology and macroecology, including classical and neoclassical ecology, social area analysis, sociocultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and effects of physical environment on humans.

**222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies. (4)** Lecture, three hours. Designed for graduate students. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the world of everyday life, problem of rationality, rules/norms and tacit knowledge, problem of social order, speaking and discourse, constitutive practices, and production of ordinary interaction in first part; guest presentations by affiliated faculty in second part.

**223. Phenomenological and Interactionist Perspectives on Selected Topics. (4)** Lecture, three hours. Comparison of phenomenological and symbolic and perspectives by examining a particular body of live or currently unresolved substantive issues. Topics vary; attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between the two approaches. When relevant, attention to logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies.

**224A-224B. Problems in Social Psychology. (4-4)** Requisite: course 210A. Basic course for graduate students intending to specialize in social psychology. **224A.** Major theoretical contributions to the field. **224B.** Current work being done in department in several subfields.

**225A-225B. Demographic Perspectives on Relationship of Family and Economic Systems. (4-4)** Requisites: courses 210A, 210B. Examination of interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this two-way process influences relationship of family and economic systems over time. **225A.** Lectures and readings. **225B.** Individual research projects involving term paper and classroom reports of results.

**226A-226B. Introduction to Theory and Major Empirical Research in Social Demography. (4-4)** Lecture, two hours; discussion, one hour. Requisite: course 210A. Survey and critical examination of population theories and related major empirical research. Emphasis on interrelation of cultural, socioeconomic, and demographic factors. Introduction to elementary demographic methods utilizing microcomputers.

**227. Sociology of Knowledge. (4)** Designed for graduate students. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies.

**228A-228B. Critical Issues in Macrosociology. (4-4)** Lecture, two hours; discussion, one hour. Designed for graduate students. Conceptual introduction to the area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. Usually team taught by faculty of varying orientations. In Progress grading.

**C229A. Sociology of Interpersonal Conflict. (4)** (Formerly numbered 229A.) Lecture, three hours; discussion, two hours. Development and transformation of everyday disputes and interpersonal troubles; dispute processing as informal social control in public places, neighborhoods, workplaces, and household settings in contemporary society. Concurrently scheduled with course C146. Letter grading.

**C229B. People Processing Institutions. (4)** (Formerly numbered 229B.) Lecture, three hours; discussion, two hours. Course C229A is not requisite to C229B. Theory and research analyzing operation and decision-making processes of a variety of people processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Concurrently scheduled with course C149. Letter grading.

**230. Nations and Nationalism. (4)** Lecture, three hours. Preparation for independent work in the area of nations and nationalism through close reading of key theoretical and empirical works in this or related areas. S/U or letter grading.

**231. Race and Ethnicity: International Perspectives. (4)** Lecture, one hour; discussion, two hours. Designed for graduate students. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S., with emphasis on theoretical and methodological issues in comparative research.

**232. Class, Politics, and Society. (4)** (Not the same as course 232 prior to Fall Quarter 1998.) Lecture, four hours. Nature of class structure and how it affects relation of class structure to politics and political power. Issue of salience of class versus other identities such as gender, age, race, and nationalism. Examination of contemporary "globalization" tendencies of capitalism. Letter grading.

**233. Foundations of Political Sociology. (4)** Lecture, three hours. Designed for graduate students. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on power, theory of the state, and relationship of class structure to politics.

**234. Sociology of Community Organization. (4)** Designed for graduate students. Survey of recent and classical research and literature dealing with predominantly political institutions, problem of order, and organization of communal life in the village and metropolis.

**235. Theories of Ethnicity. (4)** Lecture, one hour; discussion, two hours. Designed for graduate students. Examination of variety of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralist, primordialist, and rational choice perspectives.

**236. Immigration. (4)** Lecture, three hours. Emphasis on recent immigration to the U.S. in light of historical experience. Examination of patterns of adaptation and ethnic change, with particular attention to new theoretical approaches within multidisciplinary framework. S/U or letter grading.

**237. Seminar: Theory and Research in Comparative Social Analysis. (2)** Designed for graduate students. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and the Third World, and implications for theory construction and social research. S/U grading.

**238. Feminist Theory. (4)** Designed for graduate students. Analysis of current American feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminists and/or feminists of color, feminist scholars from other countries, and recent "antifeminist" feminists. Discussion of directions for future feminist sociology.

**239A-239B. Quantitative Research on Social Stratification and Social Mobility. (4-4)** Lecture, three hours. Requisites: courses 210A, 210B. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress grading.

**240. Mathematics of Population. (4)** Preparation: prior knowledge of matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models.

**241. Theories of Gender in Society. (4)** Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; why gender is absent in classical macrosociology; can masculinist paradigms make space for gender or does a feminist-informed sociology necessitate a fresh approach?

**M242. Analysis of Data with Qualitative and Limited Dependent Variables. (4)** (Formerly numbered 242.) (Same as Statistics M211.) Lecture, three hours. Requisites: courses 210A and 210B, or Statistics 100A, 100B, and 100C. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

**C243. Introduction to Mathematical Sociology. (4)** (Not the same as course 243 prior to Fall Quarter 1998.) Lecture, three hours; discussion, one hour; laboratory, two hours. Requisites: courses 210A, 210B. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Concurrently scheduled with course C112. Graduate students have additional readings, meet as a group one additional hour each week, and learn to use mathematical software such as MATHEMATICA. Letter grading.

**C244A-C244B. Conversational Structures I, II. (4-4)** Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses CM124A-CM124B. Graduate students have additional assignments and/or meet as a group one additional hour each week. S/U or letter grading. **C244A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **C244B.** Requisite: course C244A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

**245. Cultural Sociology: Classical and Contemporary Approaches. (4)** Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural dimension of social life — Weberian, Durkheimian, Parsonian, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies.

**246. Cultural Studies: Hermeneutic, Semiotic, and Poststructural Traditions. (4)** Lecture, one hour; discussion, two hours. Examination of cultural analysis as it has evolved outside the discipline of sociology, on premise that these extra-sociological approaches provide critical resources in advancing the field of cultural sociology today. Theoretical and comparative emphasis, with consideration of case studies.

**247. Sociology of Emotions. (4)** Lecture, two hours; discussion, one hour. Designed for graduate students. Sociological theories of emotional expression; experiential approaches to emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and the emotions; creativity and expressed affect; thought, sensations, and the emotions; specific emotions; cultural differences in emotional expression; measurement of emotions.

**248. Selected Topics in Culture and Society. (4)** Seminar, three hours. Designed for graduate students. Seminar on selected topics on culture and society. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. S/U or letter grading.

**M249A. Health Professions. (4)** (Same as Community Health Sciences M274.) Lecture, three hours. Requisite: Community Health Sciences 210. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings. S/U or letter grading.

**M249B. Health and Illness Behavior. (4)** (Same as Community Health Sciences M275.) Lecture, four hours. Requisites: Community Health Sciences 210, Epidemiology 100. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior. S/U or letter grading.

**250. Methodological Problems. (4)** Lecture, four hours. S/U or letter grading.

**251. Topics in the Problem of Social Order. (4)** Lecture, four hours. S/U or letter grading.

**252. Selected Topics in Sociology of Gender. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit.

**253. Quantitative Methods in Sociology. (4)** Lecture, four hours. S/U or letter grading.

**254. Human Capital, Social Capital, and Cultural Capital. (4)** Lecture, three hours. Designed for graduate students. Intellectual history of these concepts, points of difference and similarity among the concepts, current exemplars of research that utilize these concepts, and critical reflection on research traditions.

**256. Demography. (4)** Lecture, four hours. S/U or letter grading.

**257. Demography of Marriage Formation and Dissolution. (4)** Discussion, three hours. Requisite: course 210A. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature.

**C258. Talk and Social Institutions. (4)** Lecture, four hours; discussion, one hour. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125. S/U or letter grading.

**259. Social Structure and Economic Change: Historical and Comparative Perspectives. (4)** Lecture, four hours. S/U or letter grading.

**260. Economy and Society. Discussion, two hours. (4)** Designed for graduate students. Review and critique of major analytical traditions in economy and society.

**261. Ethnic Minorities. (4)** Lecture, four hours. S/U or letter grading.

**M262. Selected Problems in Urban Sociology. (4)** (Same as Afro-American Studies M200C.) Seminar.

**263. Social Stratification. (4)** Lecture, four hours. S/U or letter grading.

**264. Personal Identity in Historical Perspective. (4)** Lecture, three hours. Designed for graduate students. Examination of distinctive features of personal identity in contemporary society through use of historical materials on various aspects of private life. Topics include home, food, clothing and appearance, personal odor, and cleanliness in everyday life.

**265. Problems in Organization Theory. (4)** Lecture, four hours. S/U or letter grading.

**266. Selected Problems in Analysis of Conversation. (4)** Requisites: courses C244A, C244B. Variable topics/formats course. Consult instructor for topics and formats to be offered in a specific term. May be repeated for credit with topic change. S/U or letter grading.

**267. Selected Problems in Communication. (4)** Lecture, four hours. S/U or letter grading.

**268. Selected Problems in Psychoanalytic Sociology. (4)** Discussion, three hours. Recommended preparation: at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques.

**269. Collective Behavior and Social Movements. (4)** Lecture, three hours. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization. Impact of collective behavior and social movements on social and political change. S/U or letter grading.

**270. Selected Problems in Socialization. (4)** Lecture, four hours. S/U or letter grading.

**271. Ethnomethodology. (4)** Lecture, four hours. S/U or letter grading.

**272. Topics in Political Sociology. (4)** Lecture, four hours. S/U or letter grading.

**273. Attitudes and Social Structure. (4)** Lecture, four hours. S/U or letter grading.

**274. Social Change and Development in Korea. (4)** Seminar, three hours. Requisite: course 191. In-depth understanding of social change and development in 20th-century Korea. Discussion, in comparative/historical perspective, of major theoretical and empirical issues related to social, political, and economic Korean transformation.

**M275. Contemporary Issues of the American Indian. (4)** (Same as American Indian Studies M200C and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

**276. Selected Topics in Sociology of East Asia. (4)** Designed for graduate students. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China's Great Proletarian Cultural Revolution, (2) internal contradictions in Chinese society: male/female relations, city and countryside, minority nationalities, class struggle under socialism, etc., (3) China and Japan: two models of development.

**277. Japanese Society: Selected Topics. (4)** Lecture, two and one-half hours. Designed for graduate students. Social structural characteristics and functioning of contemporary Japanese society, with focus on comparison and evaluations of functional (or rational) and cultural explanations of selected social phenomena. Topics include forms of social interaction, work organization, family, education, and equality.

**278. Sociology of Latin America. (4)** Lecture, one hour; discussion, two hours. Designed for graduate students. Selected topics in sociological study of Latin America. Possible topics include social movements, race and ethnicity, stratification, and social development.

**279. Seminar: Applied Social Research. (4)** Seminar, two hours; discussion, one hour. Opportunities for applied research, distinctive features of applied work, and procedures commonly employed in various areas of research. Examination of representative work in specific areas of applied research.

**280. Seminar: Evaluation Research. (4)** Designed for graduate students. Technical and political aspects of implementing evaluation research studies. Role of evaluation research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading.

**281. Selected Problems in Mathematical Sociology. (4)** Exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, social interaction.

**282. Organizations and the Professions. (4)** Lecture, four hours. S/U or letter grading.

**283. Applied Sociology. (4)** Discussion, two hours. Designed for graduate students. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline.

**284. Topics in Mental Health and Illness. (4)** Requisite: course 148. Designed for graduate students.

**285A-285Z. Special Topics in Sociology. (4 each)** Seminar, three hours. Designed for graduate students. Seminars on selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**M286. Applied Event History Analysis. (4)** (Same as Statistics M213.) Lecture, three hours. Requisites: courses 209A, 209B, and 209C, or 210A and 210B. Introduction to regression-like analyses in which outcome is "time to event." Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; nonproportional hazards; parametric survival models; heterogeneity; multilevel survival models. S/U or letter grading.

**287. Topics in Chinese Society. (4)** Seminar, three hours. Preparation: at least two upper division courses on China in any social sciences discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change before and after 1949. S/U or letter grading.

**288A-288B-288C. Mental Health Services for Persons with AIDS. (4-4-4)** Designed for graduate students. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

**291. Moral Solidarity in Communities. (4)** Comparative analysis of social solidarity and collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidarity types, with special reference to utopian communities and developmental processes.

**292A-292B-292C. Research Development. (4-4-4)** Lecture, four hours. S/U or letter grading.

**M296A-M296B. Social Theory and Comparative History. (4-4)** (Same as History M203A-M203B and Political Science M291A-M291B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**M296C. Theories in Cultural History. (4)** (Same as History M203C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material. Letter grading.

**297B. Urban and Suburban Sociology. (4)** (Not the same as course 297B prior to Fall Quarter 1998.) Lecture, three hours. History and present condition of cities and suburbs in America. Today's urban/suburban neighborhoods contrasted with premodern cities. Examination of process of suburbanization as it began in the early 19th century and as it still continues; house and architectural styles and changing patterns of family and social life associated with them; patterns of racial, ethnic, income, and social class distribution in city and suburb; origin and nature of today's urban ghettos; politics of cities and suburbs. Focus on urban/suburban megalopolises associated with New York City, Los Angeles, Chicago, and Boston. GIS mapping. Letter grading.

**298A-298B-298C. Workshops in Culture and Society. (2-2-2)** Discussion, 90 minutes every other week. Interdisciplinary workshops for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society, whether social, literary, or philosophical in nature. In Progress and S/U or letter grading.

**299A-299B-299C. Seminars: Latin American Sociology. (2-2-2)** Seminar, one hour; discussion, one hour. Regular forum for presentation, reading, and discussion of research on sociology of Latin America, including presentations by invited lecturers in Mellon Seminar in Latin American Sociology series. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**M402. Practices of Evaluation in Health Services: Theory and Methodology. (4)** (Same as Health Services M422.) Lecture, four hours. Requisites: Health Services 200A, 200B. Introduction to evaluation of health services programs and policies. Exposure to basic theoretical concepts and specific evaluation methodologies and designs. Letter grading.

**495A-495B. Supervised Teaching of Sociology. (2-2)** Seminar, to be arranged. Preparation: appointment as teaching assistant in Sociology Department. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**595. Directed Research for Master's Paper. (4 to 12)** Tutorial, to be arranged. Directed research for and writing of M.A. degree paper under guidance of student's M.A. committee chair. S/U grading.

**596. Directed Individual Study and Research in Sociology. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Individual Study for Examinations. (4 to 12)** Tutorial, to be arranged. Preparation for Ph.D. qualifying examinations. S/U grading.

**599. Research in Sociology for Ph.D. Candidates. (4 to 12)** Tutorial, to be arranged. S/U grading.

Claude L. Hulet, Ph.D.  
C.P. Otero, Ph.D.  
José Pascual-Buxó, Ph.D.  
Stanley L. Robe, Ph.D.  
Paul C. Smith, Ph.D.  
Marion A. Zeitlin, Ph.D.

**Associate Professors**

Adriana J. Bergero, Ph.D.  
 Héctor V. Calderón, Ph.D.  
 Verónica Cortínez, Ph.D.  
 Guillermo Hernández, Ph.D.  
 A. John Skirius, Ph.D.  
 Jesús Torrecilla, Ph.D.

**Assistant Professor**

Elizabeth A. Marchant, Ph.D.

**Lecturers S.O.E.**

José M. Cruz-Salvadores, M.A.  
 Isabel L. Herwig, Ph.D., *Emerita*  
 George L. Voyt, J.D., *Emeritus*

**Lecturers**

Susan C. Schaffer, Ph.D.  
 Silvia Sherno, Ph.D.

**Scope and Objectives**

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the four B.A. programs: B.A. in Spanish, B.A. in Spanish and Linguistics, B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the California State Single Subject Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

**Undergraduate Study****Undergraduate Courses**

Spanish 1 through 3 use Garner, Rusch, and Domínguez' *Claro que sí*. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the *Schedule of Classes* or the department office for test dates and location.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Spanish and Portuguese grammar and/or composition.

**Spanish B.A.****Preparation for the Major**

*Required:* Spanish 25 or 27 or equivalent, and M42 and M44 or equivalent as determined by the undergraduate adviser. The courses must be passed with an average grade of C or better prior to beginning upper division work in the major.

**Transfer Students**

To be admitted as Spanish majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

**The Major**

*Required:* (1) Seven core courses, including Spanish 100A or 100B, 105 or 107 (possible exemption granted by passing departmental writing proficiency examination), 119A or 119B, 120A, 120B, 120C, and 127 and (2) six upper division Spanish elective courses in literature, culture, or linguistics.

**Spanish and Linguistics B.A.****Preparation for the Major**

*Required:* Spanish 25 or 27 or equivalent as determined by the placement test; course M35 or Linguistics 20; course M42 or M44 or equivalent as determined by the undergraduate adviser; and three terms of study in one language other than Spanish and English, which may be taken concurrently with the major. The courses must be passed with an average grade of C or better.

**Transfer Students**

To be admitted as Spanish and Linguistics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one introduction to linguistics course, one Spanish civilization course or one Spanish American civilization course, and one year of a language other than Spanish or English.

**The Major**

*Required:* (1) Spanish 100A, 100B, 105, Linguistics 103, 120A, 120B, (2) one course from Linguistics 160 or 165A or 165B, and (3) three upper division Spanish electives, two of which must be in Spanish linguistics.

**Spanish and Portuguese B.A.****Preparation for the Major**

*Required:* Spanish 25, Portuguese 3 or 102B, M42 or M44 or equivalent, 46 or equivalent.

**Transfer Students**

To be admitted as Spanish and Portuguese majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one year of Portuguese, one Spanish civilization course or one Spanish American civilization course, and one Brazilian culture course.

**The Major**

*Required:* (1) Four upper division courses in language and linguistics: Portuguese 100A, 100B, 105, Spanish 105; (2) four upper division courses in literature selected as follows: two courses from Spanish 119A, 119B or from 120A, 120B, 120C and two courses from Portuguese 120A, 120B or from 130A, 130B; (3) six upper division electives, three of which must be in Spanish and three in Portuguese (numbered 124 and above). Only upper division courses taught in the target language may be applied toward the major.

**Portuguese B.A.****Preparation for the Major**

*Required:* Portuguese 3, M35, M42 or M44, 46, or equivalent.

**Transfer Students**

To be admitted as Portuguese majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Portuguese, one nature of language course, one Portuguese civilization course or one Brazilian civilization course, and one Brazilian culture course.

**The Major****Portuguese Language and Literature Concentration**

*Required:* Thirteen upper division courses, including Portuguese 100A, 100B, 105, either 120A and 120B, or 130A and 130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.

**Portuguese and Linguistics Concentration**

*Required:* Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A, M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

## Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

## Study in a Portuguese-Speaking Country

Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

## Honors Program

The honors program is open to all departmental majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project which they pursue under the faculty member's guidance through Spanish 170. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

## Portuguese Minor

To enter the Portuguese minor, students must have an overall grade-point average of 2.0 or better and must complete Portuguese 3 or 102B.

*Required Lower Division Course (4 units):* Portuguese 46.

*Required Upper Division Courses (24 units):* Portuguese 105 and five Portuguese courses selected from 100A through 199 (except 102A, 102B). Only one 4-unit Portuguese 199 course may be selected.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Spanish Minor

To enter the Spanish minor, students must have an overall grade-point average of 2.0 or

better and must complete or show proficiency equivalent to two years of college-level Spanish.

*Required Lower Division Courses (8 units):* Spanish 25 or 27, and M42 or M44.

*Required Upper Division Courses (24 to 25 units):* Six courses in literature, of which four (22 units) must be selected from Spanish 119A through 197 (one of the four must be from either 119A or 119B or from 120A, 120B, or 120C). Only one 4-unit Spanish 199 course may be selected, and only two upper division courses applied toward the minor may overlap with the major.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Spanish Linguistics Minor

To enter the Spanish Linguistics minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

*Required Lower Division Courses (8 units):* Spanish 25 or 25A, and M35.

*Required Upper Division Courses (24 units):* Spanish 100A, 100B, three courses from 107, 115, M118A, M118B, and one other upper division Spanish course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Spanish and Portuguese offers the Master of Arts (M.A.) degree in Spanish, Master of Arts (M.A.) degree in Portuguese, and Doctor of Philosophy (Ph.D.) degree in Hispanic Languages and Literatures.

### Admission

The department considers only applicants whose objective is the Ph.D. degree. Admission to the M.A. program in Spanish or in Portuguese is based on a careful review of the applicant's academic record by the graduate admissions committee. Minimum requirements are the B.A. in Spanish or in Portuguese from

UCLA or another recognized university and a satisfactory score on the Graduate Record Examination (GRE) General Test. If the graduate admissions committee deems that some area of the applicant's preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

The UCLA M.A. in Spanish or in Portuguese, or the equivalent, is required for admission to the Ph.D. program in Hispanic Languages and Literatures. Also required are (1) three letters of recommendation from professors familiar with the applicant's work as a graduate student that address the applicant's capacity for research-oriented doctoral studies and possible entry into the profession and (2) scores from the Graduate Record Examination (GRE) General Test.

Applicants who hold the M.A. in Spanish or in Portuguese from UCLA must have the recommendation of the department to proceed toward the Ph.D. degree; they are notified of their eligibility to continue when they receive the M.A. degree.

## Master's Degrees

### M.A. in Spanish

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. Ten courses, seven of which must be at the graduate level, are required. Up to two graduate courses may be taken in another department with the approval of the graduate adviser.

Students choose a concentration in literature or linguistics.

Students who choose the literature concentration take a required course in literary theory and criticism and one upper division or graduate course in Spanish or Portuguese linguistics. The remaining seven elective courses are selected in consultation with the graduate adviser.

Students who choose the linguistics concentration are required to take one upper division or graduate course in literature offered by the department and nine elective courses to be selected in consultation with the graduate adviser.

### M.A. in Portuguese

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. Ten courses, seven of which must be at the graduate level, are required. Up to two graduate courses may be taken in another department with the approval of the graduate adviser.

Students choose a concentration in literature or linguistics.

Students who choose the linguistics concentration are required to take one upper division or graduate course in literature and nine elective courses to be selected in consultation with the adviser.

## Doctoral Degree

Ph.D. dissertation topics may be selected from any field in Spanish and Portuguese language and literature. Possible fields include Spanish linguistics; Portuguese linguistics; diachronic Hispanic linguistics and philology; medieval Spanish literature; Renaissance and Golden Age Spanish literature; eighteenth- and nineteenth-century Spanish literature; twentieth-century Spanish literature; colonial Spanish American literature; nineteenth-century Spanish American literature; twentieth-century Spanish American literature; Chicano literature; early Portuguese literature; modern Portuguese literature; early Brazilian literature; modern Brazilian literature; Spanish and Luso-Brazilian folklore.

After the B.A., a minimum of 18 graduate courses is required. A two-quarter sequence in Spanish or Portuguese literary theory and criticism may be required if students have not previously taken it or similar courses elsewhere. Students may petition for up to eight graduate courses used for the M.A. degree to count toward the Ph.D. degree.

Written and oral qualifying examinations are required. The written examinations consist of presentations of papers related to the specific and general areas of the dissertation.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which covers the research papers and a dissertation prospectus.

## Portuguese

### Lower Division Courses

**1. Elementary Portuguese. (4)** Discussion, five hours; laboratory, one hour.

**2. Elementary Portuguese. (4)** Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

**3. Intermediate Portuguese. (4)** Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

**8A-8B. Portuguese Conversation. (2-2)** Discussion, three hours. Enforced requisite: course 3 with a grade of B or better.

**25. Advanced Portuguese. (4)** Enforced requisite: course 3.

**M35. Spanish, Portuguese, and Nature of Language. (4)** (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

**40A-40B. Portuguese, Brazilian, and African Literature in Translation. (4-4)** Lecture, three hours. Reading and discussion of selected works in translation. Papers and examinations in English. **40A.** Portuguese and Portuguese-African Literature; **40B.** Brazilian Literature.

**M42. Civilization of Spain and Portugal. (4)** (Same as Spanish M42.) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spain and Portugal, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/ NP or letter grading.

**M44. Civilization of Spanish America and Brazil. (4)** (Same as Spanish M44.) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spanish America and Brazil, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/ NP or letter grading.

**46. Brazilian Culture and Civilization. (4)** Lecture, three hours. Conducted in English. Topical analysis of cultural history of Brazil, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/ NP or letter grading.

### Upper Division Courses

**100A. Phonology and Morphology. (4)** Lecture, three hours. Requisite: course 25. Analysis of phonetic, phonemic, and morphological systems of Portuguese.

**100B. Syntax. (4)** Lecture, three hours. Requisite: course 25. Review of patterns of the Portuguese language.

**102A-102B. Intensive Portuguese. (4-4)** Preparation: foreign language experience (other than Portuguese). Development of speaking and reading skills equivalent to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

**103. Language and Popular Culture. (4)** Lecture, three hours. Requisite: course 102B. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity.

**105. Advanced Composition and Style. (4)** Requisite: course 25. Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns.

**M118A-M118B. History of Portuguese and Spanish. (4-4)** (Same as Spanish M118A-M118B.) Lecture, three hours. Requisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax.

**120A-120B. Introduction to Portuguese Literature. (4-4)** Lecture, three hours. Requisite: course 25. Introduction to principal periods, currents, and authors of Portuguese literature.

**C124. Early Portuguese Literature. (4)** Lecture, three hours. Requisite: course 25. Study of main genres of medieval Portuguese and Galician literature through representative works. Concurrently scheduled with course C224. P/ NP or letter grading.

**C125. Camões and the Portuguese Renaissance. (4)** Lecture, three hours. Requisite: course 25. Study of main genres of Renaissance Portuguese literature, with particular emphasis on the works of Luis de Camões. Concurrently scheduled with course C225. P/ NP or letter grading.

**C126. Baroque and Neoclassical Portuguese Literature. (4)** Lecture, three hours. Requisite: course 25. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

**C127. 19th-Century Portuguese Literature. (4)** Lecture, three hours. Requisite: course 25. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C227. P/ NP or letter grading.

**C128. Post-Romanticism and Naturalism in Portuguese Literature. (4)** Lecture, three hours. Requisite: course 25. Study of principal features through representative works. May be concurrently scheduled with course C228.

**C129. 20th-Century Portuguese Literature. (4)** Lecture, three hours. Requisite: course 25. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C229. P/ NP or letter grading.

**130A-130B. Brazilian Literature and Identity: Introduction. (4-4)** Lecture, three hours. Requisite: course 25. Introduction to principal periods, currents, and authors of Brazilian literature.

**C131. Colonial Brazilian Literature and Culture. (4)** Lecture, three hours. Requisite: course 25. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C231. P/ NP or letter grading.

**C132. 19th-Century Brazilian Literature and Culture. (4)** Lecture, three hours. Requisite: course 25. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C232. P/ NP or letter grading.

**C133. Machado de Assis. (4)** Lecture, three hours. Requisite: course 25. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C233. P/ NP or letter grading.

**C134. Brazilian Modernism. (4)** Lecture, three hours. Requisite: course 25. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C234. P/ NP or letter grading.

**C135. 20th-Century Brazilian Literature. (4)** Lecture, three hours. Requisite: course 25. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C235. P/ NP or letter grading.

**141. Brazilian Film and Literature. (4)** Lecture, three hours. Conducted in English. Topical analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/ NP or letter grading.

**197. Undergraduate Seminar. (4)** Seminar, three hours. Requisite: course 25. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Eight units may be applied toward the major requirements.

### Graduate Courses

**M200. Research Resources. (4)** (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.

**M201A-M201B. Literary Theory and Criticism. (4-4)** (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

**202. Synchronic Morphology and Phonology. (4)** Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese.

**204A-204B. Generative Grammar. (4-4)** Lecture, three hours. Course 204A is requisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semiology, and phonology on style, metaphor, and meter.

**M205A-M205B. Development of Portuguese and Spanish Languages. (4-4)** (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

**C224. Early Portuguese Literature. (4)** Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. Concurrently scheduled with course C124. S/ U or letter grading.

**C225. Camões and the Portuguese Renaissance. (4)** Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on works of Luis de Camões. Concurrently scheduled with course C125. S/ U or letter grading.

**C226. Baroque and Neoclassical Portuguese Literature. (4)** Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C126.

**C227. 19th-Century Portuguese Literature. (4)** Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C127. S/ U or letter grading.

**C228. Post-Romanticism and Naturalism in Portuguese Literature. (4)** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C128.

**C229. 20th-Century Portuguese Literature. (4)** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C129. S/ U or letter grading.

**C231. Colonial Brazilian Literature and Culture. (4)** Lecture, three hours. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C131. S/U or letter grading.

**C232. 19th-Century Brazilian Literature and Culture. (4)** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C132. S/U or letter grading.

**C233. Machado de Assis. (4)** Lecture, three hours. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C133. S/U or letter grading.

**C234. Brazilian Modernism. (4)** Lecture, three hours. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C134. S/U or letter grading.

**C235. 20th-Century Brazilian Literature. (4)** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C135. S/U or letter grading.

**M249. Folk Literature of the Spanish and Portuguese Worlds. (4)** (Same as Folklore M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

**M251A-M251B. Studies in Galegan-Portuguese and Old Spanish. (4-4)** (Same as Spanish M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**252. Studies in Early Portuguese Literature. (4)** Discussion, two hours.

**253. Studies in Modern Portuguese Literature. (4)** Discussion, two hours.

**254. Studies in Early Brazilian Literature. (4)** Discussion, two hours.

**255. Studies in Modern Brazilian Literature. (4)** Discussion, two hours.

**256A-256B. Studies in Portuguese Linguistics. (4-4)** Lecture, two hours. Study of problems in analysis and description of the contemporary Portuguese language.

**290. Special Topics. (4)** Discussion, two hours. Designed for graduate students. Consult *Schedule of Classes* or department counselor for topics to be offered in a specific term. S/U or letter grading.

**370. Teaching Portuguese in Secondary School. (4)** Designed for future teachers in this field.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (4 to 8)** Tutorial, to be arranged. Study or research in areas or subjects not offered as regular courses. No more than 8 units may be applied toward M.A. course requirements.

**597. Preparation for Graduate Examinations. (4 to 12)** Tutorial, to be arranged. Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis. (4 to 12)** Tutorial, to be arranged. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation. (4 to 8)** Tutorial, to be arranged. Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## Spanish

### Lower Division Courses

**1. Elementary Spanish. (4)** Discussion, five hours; laboratory, one hour.

**1G. Reading Course for Graduate Students. (4)** Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.

**2. Elementary Spanish. (4)** Discussion, five hours; laboratory, one hour. Enforced prerequisite: course 1.

**2A. Intensive Spanish. (4)** Lecture, 20 hours; laboratory, five hours. Enforced prerequisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

**2G. Reading Course for Graduate Students. (4)** Lecture, three hours. Enforced prerequisite: course 1G. May not be applied toward degree requirements. S/U grading.

**3. Elementary Spanish. (4)** Discussion, five hours; laboratory, one hour. Enforced prerequisite: course 2.

**3A. Intensive Spanish. (4)** Lecture, 20 hours; laboratory, five hours. Enforced prerequisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

**4. Intermediate Spanish. (4)** Discussion, five hours; laboratory, one hour. Enforced prerequisite: course 3.

**5. Intermediate Spanish. (4)** Discussion, five hours; laboratory, one hour. Enforced prerequisite: course 4.

**6. Intermediate Spanish. (4)** Discussion, five hours. Enforced prerequisite: course 5. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A- or better may enroll directly in course 25.

**7. Intermediate Spanish for Spanish Speakers. (4)** (Formerly numbered 6A.) Discussion, four hours. Preparation: proficiency as determined by placement test. Concentration on formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of course 6. P/NP or letter grading.

**8A-8B. Spanish Conversation. (2-2)** Discussion, three hours. Course 8A is open to students with credit for course 4. Students who have completed course 3 with a grade of B or better may be admitted.

**9A-9B. Advanced Conversation. (2-2)** Discussion, three hours. Enforced prerequisite: course 8B.

**25. Advanced Spanish and Composition. (4)** Lecture, three hours. Enforced prerequisite: course 5. Emphasis on writing grammatically correct, lexically sophisticated, and rhetorically competent expository prose. Course 25 or 25A is requisite to all upper division courses in Spanish.

**27. Composition for Spanish Speakers. (4)** (Formerly numbered 25A.) Lecture, three hours. Enforced prerequisite: course 5. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25). P/NP or letter grading.

**28A. Spanish for Special Purposes: Medical. (4)** Lecture, three hours. Enforced prerequisite: course 25. Practice in speaking, reading, and writing Spanish using appropriate vocabulary and cultural situations for students with special interest in fields such as medicine, business, law, etc. P/NP or letter grading.

**M35. Spanish, Portuguese, and Nature of Language. (4)** (Same as Portuguese M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

**M42. Civilization of Spain and Portugal. (4)** (Same as Portuguese M42.) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spain and Portugal, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

**M44. Civilization of Spanish America and Brazil. (4)** (Same as Portuguese M44.) Lecture, three hours; discussion, one hour. Required of majors. Lectures conducted in English; discussion sections conducted in either Spanish or English. Highlights of civilization of Spanish America and Brazil, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

**60A-60B-60C. Hispanic Literatures in Translation. (4-4-4)** Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. **60A.** Spanish Literature; **60B.** Spanish-American Literature; **60C.** *Don Quijote*.

**61A-61B-61C. Hispanic Literatures in Spanish. (4-4-4)** Lecture, three hours. Not open for credit to students with credit for corresponding course in 60 series. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in Spanish. **61A.** Spanish Literature; **61B.** Spanish-American Literature; **61C.** *Don Quijote*.

**62A-62B-62C. Hispanic Literatures and Film. (4-4-4)** Lecture, three hours; film screenings, two to three hours. Analysis of main aesthetic, cultural, and philosophical questions in the Hispanic world as articulated in literature and film, addressing not only principal currents affecting Hispanic artistic expression but also diverse strategies employed by two distinct modes of representation. **62A.** Spain; **62B.** Spanish America; **62C.** The Chicano Experience.

**88A-88Z. Lower Division Seminars. (4 each)** Seminar, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture:

**88A.** Reaching 2001 (Fantasy of Reality and Reality of Fantasy). Seminar, three hours. Introduction to some specific literary strategies employed by writers of the Hispanic world and analysis of formal characteristics that define categories such as surrealism, magical realism, the fantastic, and realism.

### Upper Division Courses

**100A-100B. Introduction to Study of Spanish Grammar. (4-4)** Lecture, three hours. Requisite: course M35. **100A.** Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish. **100B.** Syntax. Study of syntactical systems of Spanish.

**105. Spanish Composition. (4)** Lecture, three hours. Requisite: course 25. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

**107. Advanced Composition for Spanish Speakers. (4)** Lecture, three hours. Requisite: course 25 or 27. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns (in lieu of course 105). P/NP or letter grading.

**109. Spanish of Southern California. (4)** (Formerly numbered 107.) Lecture, three hours. Requisites: courses M35, 100A, 100B. Analysis of pronunciation, word formation, syntax, and lexicon of the Spanish of Southern California, with attention to regional features, social and age levels of speech, and interference from English. P/NP or letter grading.

**115. Applied Linguistics. (4)** Lecture, three hours. Requisites: courses M35, 100B. Survey of major linguistic problems faced by teachers of Spanish.

**M118A-M118B. History of Portuguese and Spanish. (4-4)** (Same as Portuguese M118A-M118B.) Lecture, three hours. Requisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax.

**119A. Introduction to Study of Literature: Prose. (4)** Lecture, three hours. Requisite: course 25. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

**119B. Introduction to Study of Literature: Poetry and Drama. (4)** Lecture, three hours. Requisite: course 25. Introduction to study of literary devices, figures of speech, versification, and distinctive stylistic features in the poetry and drama of Spain and Spanish America.

**120A-120D. Literature in the Hispanic World. (5 each)** Lecture, four hours; discussion, one hour. Required of Spanish majors; must be taken in sequence. Historical/cultural survey of Hispanic literature from its beginning in medieval Iberia to contemporary writing in Spain, Latin America, and the U.S. Relationship between fundamental unity and astonishing geographic and cultural diversity. Particular attention to relation between literature and multicultural societies in which it is produced, as well as to individual texts which define or create new artistic possibilities:

**120A. Hispanic Literature to 1700.** Requisite: course 25. Multilingual Iberia: first literary texts in Hispanic dialects. Medieval Castilian literature. America: literature of discovery and conquest. Renaissance literature in Spain and America. Spanish Golden Age. Baroque literature in Spain and America.

**120B. Hispanic Literature, 1700 to 1898.** Requisite: course 120A. The Enlightenment, Spanish nationalism, and Spanish-American nation building. Romanticism in Spain and America. Journalism and *costumbrismo* in Spain and America. Historical narrative and sentimental novel in Spain and America. Regionalism in Spain. National diversity in America: *indigenismo*, gaucho literature, Mexican *corrido*, Afro-Americanism.

**120C. Hispanic Literature since 1898.** Requisites: courses 120A, 120B. Unity and divergence. *Modernismo* and Spanish Civil War in Spain and America. Representations of America. Spanish surrealism. American vanguardism. *Franquismo* and after. Mexico and Mexican Revolution. New American narratives, testimony, feminism.

**120D. Hispanic Literature in the U.S.** Requisites: courses 120A, 120B, 120C. Spanish presence in the Southwest. Ethnic diversity: Spaniards, *criollos*, *mestizos*. Mexican War and Mexican American literature. Literature of the Chicano movement: recovering *mestizo* heritage, feminist consciousness.

**122. Medieval Literature: El Camino de Santiago.** (4) Lecture, three hours. Introductory course in medieval Spanish literatures following route of imaginary pilgrimage through northern Spain in the year 1300, from French border near Roncesvalles to shrine of St. James in Santiago de Compostela. Readings works of literature (and viewing slides, listening to music, etc.) associated with each stop along the way. Letter grading.

**123. Medieval Literature: Poetry.** (4) Lecture, three hours. Recommended preparation: course 120A. Study of main genres through representative works.

**124. Golden Age: Poetry and Drama.** (4) Lecture, three hours. Recommended preparation: course 120A. Study, through representative works, of the Golden Age poetry and drama.

**125. Golden Age: Prose.** (4) Lecture, three hours. Recommended preparation: course 120A. Study of 16th- and 17th-century prose writing in Spain, with particular emphasis on *Lazarillo de Tormes* and the picaresque tradition.

**127. Golden Age: *Don Quijote*.** (4) Lecture, three hours. Recommended preparation: course 120A. Development of the novel in the Golden Age, with particular reference to *Don Quijote*.

**128. The Enlightenment and Romanticism in Spain.** (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of main manifestations of thought and literature from 1700 to 1850.

**130. Post-Romanticism, Realism, and Naturalism in Spain.** (4) Lecture, three hours. Recommended preparation: course 120B. Development of main trends of Spanish literature from 1850 to 1898.

**132. 20th-Century Spanish Prose.** (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish prose literature since 1898.

**133. 20th-Century Spanish Poetry and Drama.** (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish poetry and drama since 1898.

**137. Literature of Colonial Spanish America.** (4) Lecture, three hours. Recommended preparation: course 120A. Study of most important genres and authors from the Conquest to 1810.

**139. Romanticism and Realism in Spanish-American Literature.** (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880.

**140. *Modernismo*.** (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of principal characteristics of *modernismo* in Spanish-American literature.

**142. 20th-Century Spanish-American Literature: Fiction and the Essay.** (4) Lecture, three hours. Recommended preparation: course 120C. Study, through representative novels, short stories, and essays, of Spanish-American prose literature since 1910.

**143. 20th-Century Spanish-American Literature: Poetry and Drama.** (4) Lecture, three hours. Recommended preparation: course 120C. Study of principal poets, dramatists, and dramatic movements in Spanish-American literature since 1910.

**144. Mexican Literature.** (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

**M145A-M145B. Introduction to Chicano Literature.** (4-4) (Same as Chicana and Chicano Studies M145A-M145B.) Lecture, three hours. Requisite: course 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. **M145A.** Literature to 1960; **M145B.** Literature after 1960.

**M146. Chicano Narrative.** (4) (Same as Chicana and Chicano Studies M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — *Corrido*, *Semblanza*, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.

**M149. Folk Literature of the Hispanic World.** (4) (Same as Folklore M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

**151A-151B. Women in Hispanic Literature.** (4-4) Discussion, three hours. Recommended preparation: courses 120A, 120B, 120C. Study of works by and about women, with emphasis on portrayal of women, women's roles, and myths of womanhood within the Hispanic socio-ideological context. **151A.** Spain; **151B.** Spanish America.

**M161. Film and Literature of the Spanish-Speaking World.** (4) (Same as Comparative Literature M174.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

**170. Senior Honors Tutorial.** (4) Tutorial, to be arranged. Preparation: completion of required nine upper division major core courses with 3.5 grade-point average. Directed individual research and writing of honors thesis. Letter grading.

**197. Undergraduate Seminar.** (4) Seminar, three hours. Limited to 15 junior/senior Spanish majors. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

**M197A.** Introduction to Caribbean Literature. (4) (Same as Latin American Studies M197A.) Lecture, two hours; discussion, two hours. Interdisciplinary introduction to literature of French, Spanish, and English Caribbean.

**197A. Studies in Hispanic Culture and Civilization.** (4) Lecture, three hours. Required of students preparing for a California State Single Subject Credential in Spanish. Advanced course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, papers, and examinations in Spanish.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Eight units may be applied toward the major requirements.

## Graduate Courses

**M200. Research Resources.** (4) (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students.

**M201A-M201B. Literary Theory and Criticism. (4-4)** (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

**202A. Phonology.** (4) Lecture, three hours. Study of the sound structure of Spanish and main phonological processes that map underlying representations into surface representations. Bearing of phonological theory on study of meter.

**202B. Morphology.** (4) Lecture, three hours. Study of derivational and inflectional word formation processes and their interaction with syntactic structure.

**204A-204B. Generative Syntax and Semantics. (4-4)** Lecture, three hours. Study of syntactic structure of Spanish and relation between underlying representations and logical form within a principles-and-parameters framework. Bearing of syntactic and semantic structure on study of literature.

**M205A-M205B. Development of Portuguese and Spanish Languages. (4-4)** (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

**209. Dialectology.** (4) Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.

**221. Medieval Lyric Poetry.** (4) Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500.

**222. Medieval Epic and Narrative Poetry.** (4) Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to 1500.

**223. Medieval Prose.** (4) Lecture, three hours. Readings of and lectures on Spanish prose from the beginning to 1500.

**224. Poetry of the Golden Age.** (4) Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700.

**225. Drama of the Golden Age.** (4) Lecture, three hours. Readings of and lectures on the *comedia*.

**226. Prose of the Golden Age.** (4) Lecture, three hours. Readings of and lectures on fictional, didactic, religious, and historical writings.

**227. Cervantes.** (4) Lecture, three hours. Readings of and lectures on works of Cervantes.

**228. The Enlightenment.** (4) Lecture, three hours. Readings of and lectures on representative works of the period.

**229. Romanticism.** (4) Lecture, three hours. Readings of and lectures on representative works of the period.

**230. Realism and Naturalism.** (4) Lecture, three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1898.

**231. Major Currents in Modern Spanish Literature.** (4) Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.

**232. Spanish Prose Literature from 1898 to the Civil War.** (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

**233. Spanish Prose Literature after the Civil War.** (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

**234. Spanish Drama and Poetry from 1898 to the Civil War.** (4) Lecture, three hours. Readings of and lectures on representative plays and poems.

**235. Spanish Drama and Poetry after the Civil War.** (4) Lecture, three hours. Readings of and lectures on representative plays and poems of the period.

**237. Literature of the Spanish Conquest.** (4) Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest.

**238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature.** (4) Lecture, three hours. Readings of and lectures on representative texts.

**239. Romanticism and Realism in Spanish-American Literature.** (4) Lecture, three hours. Intensive study of Romanticism and realism in Spanish-American literature.

**240. Major Currents in Modern Spanish-American Literature.** (4) Lecture, three hours. Study of principal trends in modern Spanish-American literature, particularly *naturalismo* and *modernismo*.

**241A-241B. Contemporary Spanish-American Short Story. (4-4)** Lecture, three hours. Study of important short story writers from modernism to the present.

**243A-243B. Contemporary Spanish-American Poetry. (4-4)** Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present.

**244A-244B. Contemporary Spanish-American Novel. (4-4)** Lecture, three hours. Study of important novelists from modernism to the present.

**245. Contemporary Spanish-American Essay. (4)** Lecture, three hours. Study of important Spanish-American essayists of the 20th century.

**246. Contemporary Spanish-American Drama. (4)** Lecture, three hours. Study of principal Spanish-American dramatists and theater movements in the 20th century.

**247. Chicano Literature. (4)** Lecture, three hours. Study of major movements and authors of Mexican American literature.

**M249. Folk Literature of the Spanish and Portuguese Worlds. (4)** (Same as Folklore M249 and Portuguese M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

**M251A-M251B. Studies in Galegan-Portuguese and Old Spanish. (4-4)** (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**256A-256B. Studies in Spanish Linguistics. (4-4)** Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**257. Studies in Dialectology. (4)** Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

**262A-262B. Studies in Medieval Spanish Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**264A-264B. Studies in Golden Age Spanish Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**265. Cervantes. (4)** Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

**270A-270B. Studies in 18th-Century Spanish Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**271A-271B. Studies in 19th-Century Spanish Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**272A-272B. Studies in 20th-Century Spanish Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**277A-277B. Studies in Colonial Spanish-American Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**278A-278B. Studies in 19th-Century Spanish-American Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**280A-280B. Studies in Contemporary Spanish-American Literature. (4-4)** Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**281. Studies in Chicano Literature. (4)** Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

**M286A-M286B. Studies in Hispanic Folk Literature. (4-4)** (Same as Folklore M286A-M286B.) Lecture, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**290. Special Topics. (4)** Lecture, two hours. Variable topics; consult *Schedule of Classes* or department counselor for topics to be offered in a specific term. May be repeated once with topic change and consent of appropriate guidance committee.

**310. Teaching Spanish in Elementary School. (4)** Lecture, three hours.

**370. Teaching Spanish in Secondary School. (4)** Lecture, three hours.

**373. Teaching Composition. (2)** Designed for graduate students. Seminar on teaching writing in Spanish language courses. Introduction to composition theory. Instruction and practice in integrating writing into curriculum, setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**490. Using Technology in Foreign Language Classroom. (2)** Discussion, two hours. Designed for graduate students. Theory and practice of using technology in foreign language classroom. Computer applications that facilitate instruction of grammar, discourse, culture, and composition, as well as evaluation and communication between students and instructor. S/U grading.

**495. Teaching Spanish at College Level. (4)** Seminar, to be arranged. Designed for graduate Spanish and Portuguese students. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

**596. Directed Individual Study or Research. (4 to 8)** Tutorial, to be arranged. Study or research in areas or subjects not offered as regular courses. No more than 4 units may be applied toward M.A. course requirements.

**597. Preparation for Graduate Examinations. (4 to 12)** Tutorial, to be arranged. Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis. (4 to 12)** Tutorial, to be arranged. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation. (4 to 8)** Tutorial, to be arranged. Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## SPEECH

*College of Letters and Science*

UCLA  
334 Kinsey Hall  
Box 951538  
Los Angeles, CA 90095-1538  
(310) 825-3303  
<http://www.commstudies.ucla.edu/>

Neil M. Malamuth, Ph.D., *Chair*

**Professor**  
Neil M. Malamuth, Ph.D.

**Associate Professors**  
Patrice A. French, Ph.D.  
Paul I. Rosenthal, Ph.D.

**Assistant Professor**  
Martie G. Haselton, Ph.D.

**Senior Lecturers**  
Marde S. Gregory, M.A.  
Thomas E. Miller, M.A.

**Lecturers**  
Dee Bridgewater, Ph.D.  
John Kochian, M.A.  
Sonya H. Packer, M.A.

**Adjunct Professor**  
Thomas Plate, Ph.D.

## Scope and Objectives

There is no major in speech; however, several undergraduate courses are offered for interested students.

## Speech

### Lower Division Courses

**A. Oral Communication for Nonnative Speakers. (No credit)** Lecture, four hours. Speech A displaces 4 units on student's Study List but yields no credit toward a degree. Emphasis on public and private speaking skills in American English necessary for social, academic, and professional growth in this country. Provides experiences necessary to remove barriers to communication created by inappropriate oral language usage. Offered in summer only. P/NP grading.

**1. Principles of Oral Communication. (4)** Enforced requisite: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

**1A. English Language Program in Effective Speaking. (4)** Lecture, eight hours and 20 minutes. Combination of courses A and 1 to help nonnative speakers of English increase fluency and vocabulary while also improving presentation skills. Language usage, reasoning, style, and delivery. Conversation and pronunciation practice. Offered in summer only. P/NP or letter grading.

**2. Public Speaking and Discussion. (4)** Enforced requisite: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposia, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

### Upper Division Courses

**107. Principles of Argumentation. (4)** Analysis of propositions, tests of evidence, briefing. Study of hindrances to clear thinking, ambiguity of terms, and prejudices. Critical analysis of selected argumentative speeches.

**190A-190B. Forensics. (2-2)** May be repeated once for credit.

**191. Analysis and Briefing. (2)** Intensive study of selected political or social issues; preparation of bibliography; analysis and evaluation of issues and arguments. May be repeated once for credit.

**197. Proseminar: Rhetoric. (4)** Designed for seniors. Variable topics course involving intensive study of discourse associated with a single major issue or personality.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Limited to seniors.

## STATISTICS

*College of Letters and Science*

UCLA  
8130 Math Sciences  
Box 951554  
Los Angeles, CA 90095-1554  
(310) 825-8430  
<http://www.stat.ucla.edu>

Jan de Leeuw, Ph.D., *Chair*

**Professors**  
Peter M. Bentler, Ph.D.  
Richard A. Berk, Ph.D.  
William A. Clark, Ph.D.  
Susan Cochran, Ph.D.  
Donna M. Dabrowski, Ph.D.  
Jan de Leeuw, Ph.D.  
Sander Greenland, Ph.D.

Edward Leamer, Ph.D.  
 Ker-Chau Li, Ph.D.  
 Robert D. Mare, Ph.D.  
 William Mason, Ph.D.  
 Theodore Porter, Ph.D.  
 Dwight Read, Ph.D.  
 David Rigby, Ph.D.  
 Wing Hung Wong, Ph.D.  
 J. Arthur Woodward, Ph.D.

#### Professors Emeriti

Thomas S. Ferguson, Ph.D.  
 Robert I. Jennrich, Ph.D.  
 James B. MacQueen, Ph.D.  
 Judea Pearl, Ph.D.  
 Sidney C. Port, Ph.D.  
 N. Donald Ylvisaker, Ph.D.

#### Associate Professor

Rebecca J. Emigh, Ph.D.

#### Assistant Professors

Christina Palmer, Ph.D.  
 Janice Reiff, Ph.D.  
 Chiara Sabatti, Ph.D.  
 Frederic R. Schoenberg, Ph.D.  
 Hongquan Vu, Ph.D.  
 Yingnian Wu, Ph.D.

#### Lecturer

Mahtash Esfandiari, Ph.D.  
 Vivian Lew, Ph.D.  
 Juana Sanchez, Ph.D.

#### Adjunct Assistant Professors

Cornelis A. Bernaards, Ph.D.  
 Nicolas Christou, Ph.D.  
 Ivo Dinov, Ph.D.  
 Robert L. Gould, Ph.D.

## Scope and Objectives

The Department of Statistics was formally established in April 1998. One of the departmental goals is to coordinate both the undergraduate and graduate teaching of statistics at UCLA. Statistics is important for all sciences because a great deal of advanced work in each scientific discipline involves statistical analysis for proper interpretation of data. In addition, many laws, proposals, and programs in society require statistics to evaluate collected quantitative data.

## Undergraduate Study

### Undergraduate Courses

Students planning to pursue advanced degrees in statistics should enroll in the Statistics 100A, 100B, 100C sequence. The 110A and 110B sequence is less comprehensive than the 100 series. In particular, probability topics do not receive the same level of coverage. Courses 110A and 110B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the department office in February.

### Statistics Minor

The Statistics minor is designed to provide a solid background in applied and theoretical statistics for students who are majors in another discipline.

To enter the minor, students should have successfully completed one lower or upper divi-

sion Statistics Department course with a letter grade, have an overall grade-point average of 2.0 or better, and file a petition with the undergraduate adviser in 8142A Math Sciences, (310) 206-3742.

#### Required Upper Division Courses (28 units):

Statistics 100A, 100B, 100C, M120A, M120B, and two additional statistics courses. Either Statistics 199 or 199I may be applied toward the additional two courses. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Statistics offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Statistics.

### Admission

Applicants to the M.S. program do not need to have an undergraduate statistics major but should have at least 12 quarter courses (or eight semester courses) in substantial upper division quantitative work, preferably in mathematics and statistics. Applicants must have a cumulative grade-point average of at least 3.2 in the upper division courses.

For direct admission to the Ph.D. program, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master's degree must have maintained an average of better than 3.5 in graduate study.

Applicants must take the Graduate Record Examination (GRE) General Test and a Subject Test, preferably in Mathematics, and must submit at least three letters of recommendation from persons who can attest to their quantitative skills.

### Master's Degree

For areas of study, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. For the former, students must pass the applied and theoretical statistics qualifying examinations at

the M.S. level. Eleven courses are required for the M.S. degree, eight of which must be graduate courses. With consent of the graduate vice chair, students may take up to five of the required 11 courses from other departments.

## Doctoral Degree

The strengths of current and prospective faculty dictate the specific fields of emphasis in the department: computational and computer-intensive statistics, applied multivariate analysis, bioinformatics, social statistics, and program evaluation.

Students are required to pass, with a grade of B or better, approved graduate courses for a total of 60 units of credit. At least 40 of these units must come from courses in the statistics department, with the remaining units from courses in related departments.

Written and oral qualifying examinations are required. The written examinations cover applied and theoretical statistics. Following successful completion of the written examinations, students take the University Oral Qualifying Examination.

## Statistics

### Lower Division Courses

**10. Introduction to Statistical Reasoning. (4)** (Formerly numbered 50.) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Not open for credit to students with credit for course M11, M12, M13, Anthropology M80, Economics M40, Geography M40, Organismic Biology M22, or Sociology M18. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means. P/NP or letter grading.

**M11. Introduction to Statistical Methods for Business and Economics. (5)** (Formerly numbered M51B.) (Same as Economics M40.) Lecture, three hours; discussion, one hour; laboratory, one hour. Not open to students with credit for course 10, M12, M13, 100A, 100B, 100C, Anthropology M80, Geography M40, Mathematics 170A, 170B, Organismic Biology M22, or Sociology M18. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation. P/NP or letter grading.

**M12. Introduction to Statistical Methods for Social Sciences. (5)** (Formerly numbered M51C.) (Same as Anthropology M80, Geography M40, and Sociology M18.) Lecture, four hours; discussion, one hour; laboratory, one hour. Elements of statistical analysis for social sciences. Presentation and interpretation of data, descriptive statistics, theory of probability and basic sampling distributions, statistical inference including principles of estimation and tests of hypotheses, introduction to regression and correlation. P/NP or letter grading.

**M13. Introduction to Statistical Methods for Life and Health Sciences. (5)** (Same as Organismic Biology M22.) Lecture, three hours; discussion, one hour; laboratory, one hour. Presentation and interpretation of data, descriptive statistics, introduction to correlation and regression and to basic statistical inference (estimation, testing of means and proportions, ANOVA) using both Bootstrap methods and parametric models. P/NP or letter grading.

## Upper Division Courses

**100A. Introduction to Probability Theory. (4)** (Formerly numbered M100A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33B. Not open to students with credit for Electrical Engineering 131A or Mathematics 170A. Students may receive credit for only two of the following: courses 100A, 110A, Biostatistics 100A. Probability distributions, random variables and vectors, expectation. P/NP or letter grading.

**100B. Introduction to Mathematical Statistics. (4)** (Formerly numbered 152B.) Lecture, three hours; discussion, one hour. Requisite: course 100A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. P/NP or letter grading.

**100C. Linear Models and Statistical Dimension Reduction. (4)** (Formerly numbered 152C.) Lecture, three hours; discussion, one hour. Requisite: course 100B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference. P/NP or letter grading.

**110A-110B. Applied Statistics. (4-4)** (Formerly numbered 154A-154B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. **110A.** Requisites: Mathematics 32B, 33B. Not open to students with credit for Electrical Engineering 131A. Students may receive credit for only two of the following: courses 100A, 110A, Biostatistics 100A. Probability, distributions, expectation, estimation, central limit theorem, confidence intervals, testing. **110B.** Requisite: course 110A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

**M120A. Introduction to Regression Analysis. (4)** (Formerly numbered M153A.) (Same as Biomathematics M153A and Biostatistics M153A.) Lecture, three hours; discussion, one hour. Requisites: course 100B, Mathematics 115A. Linear regression, diagnostics and model building, general linear model theory, analysis of variance and covariance. Full integration of theory and software. P/NP or letter grading.

**M120B. Introduction to Generalized Linear Models. (4)** (Formerly numbered M153B.) (Same as Biomathematics M153B and Biostatistics M153B.) Lecture, three hours; discussion, one hour. Requisite: course M120A. Nonlinear regression, exponential family, generalized linear models, categorical data analysis, statistical software. P/NP or letter grading.

**125. Introduction to Statistics with Resampling. (4)** Lecture, three hours; discussion, one hour. Simple intuitive introduction to practical application of statistics for experiments and surveys in business and biological, medical, physical, and social sciences. Resampling methods — bootstrap and permutation test — are table-free and distribution-free, require common sense (not calculus), yet have a broader range of applications than classical parametric statistical procedures. P/NP or letter grading.

**130A. Statistical Analysis with STATA. (4)** Lecture, three hours; discussion, one hour. Requisite: course 10 or M11 or M12 or M13. How to manage and analyze quantitative data using STATA statistical software. Graphical analysis and programming and extensions to basic package. P/NP or letter grading.

**130B. Statistical Analysis with SAS. (4)** (Formerly numbered 130.) Lecture, three hours; discussion, one hour. Requisites: courses 10, 130A. How to manage and analyze quantitative data using statistical procedures produced by SAS Institute, Inc. Discussion of many statistical techniques available in SAS and ways to extend basic system by SAS programming. P/NP or letter grading.

**M140. Introduction to Spatial Statistics. (4)** (Same as Geography M171.) Lecture, three hours; laboratory, one hour. Requisite: course M12. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

**150. Data Analysis. (4)** Lecture, three hours. Requisites: courses 100A and 100B, or 110A and 110B, or M120A and M120B, or one course from 10, M11, M12, M13 and one upper division statistics course. Practice in solving statistical problems, with coverage of basics of cleaning and checking data, exploratory analysis, model building, model checking, reporting results, working with "clients." P/NP or letter grading.

**170. Introduction to Time-Series Analysis. (4)** Lecture, three hours; discussion, one hour. Requisite: course 10 or M11 or M12 or M13 or Anthropology M80 or Economics M40 or Geography M40 or Organismic Biology M22 or Sociology M18. Exploration of standard methods in temporal and frequency analysis used in analysis of numerical time-series data. Examples provided throughout, and students implement techniques discussed. P/NP or letter grading.

**180. Introduction to Bayesian Statistics. (4)** Lecture, three hours. Requisites: Mathematics 32B, 33B. Introduction to statistical inference based on use of Bayes theorem, covering foundational aspects, current applications, and computational issues. Topics include Stein paradox, nonparametric Bayes, and statistical learning. Examples of applications include protein alignment algorithms and image denoising procedures. P/NP or letter grading.

**197. Current Topics in Statistics. (4)** Lecture, three hours. Limited to juniors/seniors. Study of selected current topics in statistics. May not be repeated. P/NP or letter grading.

**199. Special Studies in Statistics. (1 to 4)** Tutorial, one to four hours. At discretion of chair and subject to availability of staff, individuals may study topics suitable for undergraduate course credit but not specifically offered as separate courses. No more than 8 units may be applied toward degree requirements. P/NP or letter grading.

**199I. Independent Studies for Internships. (2 to 4)** Tutorial, to be arranged. Independent studies course to be supervised jointly by the Field Studies Office and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP or letter grading.

## Graduate Courses

**200A-200B. Statistical Theory. (4-4)** (Formerly numbered Mathematics 276A-276B.) Lecture, three hours. Requisite: course 100C. Letter grading. **200A.** Sufficiency, exponential families, least squares, maximum likelihood estimation, Fisher information, Cramér/Rao inequality, confidence intervals. **200B.** Asymptotic properties of tests and estimates, consistency and efficiency, likelihood ratio tests, chi-squared tests.

**201. Nonparametric and Robust Statistics. (4)** (Formerly numbered Mathematics 278B.) Lecture, three hours. Requisite: course 200B. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation. Letter grading.

**202. Decision Theory. (4)** (Formerly numbered Mathematics 278C.) Lecture, three hours. Requisites: course 200B, Mathematics 131A. Bayes, admissible, and minimax decision rules. Invariant tests and estimates, best unbiased tests, locally best tests. Application to general linear model. Letter grading.

**203. Sequential Analysis. (4)** (Formerly numbered Mathematics 278D.) Lecture, three hours. Requisites: course 200B, Mathematics 131A. Bayes sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald identity, asymptotic theory, and other topics. Letter grading.

**204. Nonparametric Function Estimation and Modeling. (4)** (Formerly numbered Mathematics 278I.) Lecture, three hours. Requisite: course 200A. Introduction to many useful nonparametric techniques such as nonparametric density estimation, nonparametric regression, and high-dimensional statistical modeling. Some semiparametric techniques and functional data analysis. Letter grading.

**210A. Applied Statistics. (4)** (Formerly numbered Mathematics 277.) Lecture, three hours. Requisites: courses M120A, M120B. Outline of principles of applied statistics, followed by survey of specific data analyses from physical, life, and social sciences. Methods include regression, analysis of variance and covariance, survival analysis, categorical data analysis, and simple time-series analysis. Illustration of transformations, plotting, model selection and evaluation, and estimation and decision procedures. Letter grading.

**210B. Applied Statistics. (4)** Lecture, three hours. Requisite: course 210A. How one uses statistical tools to find answers for empirical questions relative to scientific research and/or public policy. Students work with real datasets, many from projects undertaken by UCLA Statistical Consulting Center, and gain experience constructing datasets that can be properly analyzed. Letter grading.

**M211. Analysis of Data with Qualitative and Limited Dependent Variables. (4)** (Formerly numbered Mathematics M278G.) (Same as Sociology M242.) Lecture, three hours. Requisites: courses 100A, 100B, and 100C, or Sociology 210A and 210B. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

**212. Program Evaluation and Policy Analysis. (4)** (Formerly numbered Mathematics 278E.) Lecture, three hours. Requisite: course M120B. Primary focus on methods of program evaluation. Randomized experiments, observational studies, and topics such as matching, stratification, covariance adjustments, and sensitivity analyses. Letter grading.

**M213. Applied Event History Analysis. (4)** (Formerly numbered Mathematics M278H.) (Same as Sociology M286.) Lecture, three hours. Requisites: Sociology 209A, 209B, and 209C, or 210A and 210B. Introduction to regression-like analyses in which outcome is "time to event." Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; nonproportional hazards; parametric survival models; heterogeneity; multilevel survival models. S/U or letter grading.

**M215A-M215B. Linear Statistical Models. (4-4)** (Formerly numbered Mathematics M279A-M279B.) (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Preparation: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. Letter grading.

**216. High-Dimensional Data Analysis. (4)** Lecture, three hours. Requisites: courses 100A, 100B, 100C. Designed for graduate students. Discussion of several statistical methodologies useful for exploring voluminous data, including principle component analysis, clustering and classification, tree-structured analysis, neural network, hidden Markov models, sliced inverse regression (SIR), and principal Hessian direction (PHD). S/U or letter grading.

**217A-217B. Applied Regression Analysis. (4-4)** Lecture, three hours. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping for statistical inference. S/U or letter grading.

**218. Generalized Linear Models. (4)** Lecture, three hours. Requisite: course 100C or M120A. Nonlinear models, estimation, diagnostics, statistical inference. Applications to models defined by systems of differential equations and robust regression. Introduction to generalized linear models and categorical data analysis. S/U grading.

**M220A-M220B. Applied Probability. (4-4)** (Same as Mathematics M282A-M282B.) Lecture, three hours. Requisite: course 100A or Mathematics 170A. S/U or letter grading. **M220A.** Conditioning, Markov chains, Poisson process, Brownian motion, stationary processes, applications. **M220B.** Simulation, renewal theory, martingale, and selected topics from queuing, reliability, speech recognition, computational biology, mathematical finance, epidemiology.

**221. Time-Series Analysis. (4)** Lecture, three hours. Requisites: courses 100A, 100B, 100C. Exploration of methods for analyzing numerical time-series data. Basic topics in temporal and frequency analysis, followed by more recent topics. Examples in various fields including economics, signal processing, and atmospheric sciences. Letter grading.

**222. Spatial Statistics. (4)** Lecture, three hours. Preparation: statistical computing experience strongly recommended. Requisites: courses 100A, 100B, 100C. Survey of modern methods used in analysis of spatial data. Implementation of various techniques using real data sets from diverse fields, including neuroimaging, geography, seismology, demography, and environmental sciences. S/U or letter grading.

**M230. Statistical Computing. (4)** (Formerly numbered Mathematics M280.) (Same as Biomathematics M280 and Biostatistics M280.) Lecture, three hours. Requisites: course 100C, Mathematics 115A. Introduction to theory and design of statistical programs; computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

**240. Multivariate Analysis. (4)** (Formerly numbered Mathematics 278A.) Lecture, three hours. Requisite: course 200B. Distributions in several dimensions, partial and multiple correlation. Normal distribution theory, Wishart distribution, Hotelling  $T^2$ . Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis. Letter grading.

**M243. Logic, Causation, and Probability. (4)** (Same as Epidemiology M204.) Lecture, four hours. Preparation: two terms of statistics or probability and statistics. Recommended requisite: Epidemiology 201B. Principles of deductive logic and causal logic using counterfactuals. Principles of probability logic and probabilistic induction. Causal probability logic using directed acyclic graphs. S/U or letter grading.

**M244. Statistical Analysis with Latent Variables. (4)** (Same as Education M231E.) Lecture, three hours. Requisites: Education 231A, 231B. Extends path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and model building considerations. Letter grading.

**M245. History of Statistics. (4)** (Same as History M296.) Seminar, three hours. History of statistics ranges over vast and diverse territory. Development of mathematical methods; philosophical, political, and social issues that were linked to their emergence and use. S/U or letter grading.

**M250. Statistical Methods for Epidemiology. (4)** (Same as Biostatistics M211 and Epidemiology M211.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: Epidemiology 201A, 201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in Epidemiology 201A and 201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

**M251. Statistical Methods for Life Sciences. (4)** (Same as Organismic Biology M216.) Lecture, three hours. Requisite: course M13. Fundamentals of statistics as applied in life sciences, including statistical inferences for continuous and categorical data (estimation, testing of means and proportions, ANOVA) study design, linear regression, and introduction to principle components analysis. Methods to be implemented on computer with SAS. S/U or letter grading.

**M252. Statistical Methods for Physical Sciences. (4)** (Same as Atmospheric Sciences CM213.) Lecture, three hours; discussion, one hour. Designed for graduate students. Statistical framework for data analysis in fields of atmospheric sciences, astronomy, geology, and chemistry, depending on class composition. Presentation of popular techniques in all fields, with emphasis on applications and data, not theory, although some understanding of theory is needed. S/U or letter grading.

**M254. Statistical Methods in Computational Biology. (4)** (Same as Biomathematics M271.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Requisite: course 100A. Training in probability and statistics for students interested in pursuing research in computational biology, genomics, and bioinformatics. Letter grading.

**285. Current Topics in Statistics. (2 to 4)** (Formerly numbered Mathematics 285L.) Seminar, one to three hours. Topics in various statistical areas by means of lectures and informal conferences with staff members. S/U grading.

**296. Participating Seminar: Statistics. (1 to 2)** (Formerly numbered Mathematics 296L.) Seminar and discussion by staff and students. S/U grading.

**370. Teaching of Statistics. (4)** Lecture, four hours. Exhaustive review of literature in teaching of statistics followed by analysis of what is missing in this area. Discussion of prevalent education, cognitive psychology, and evaluation theories and strategies that help to improve teaching of statistics. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Statistics. (2)** Seminar, two hours; intensive training at beginning of Fall Quarter. Required of all potential departmental teaching assistants and new Ph.D. students. Practical and theoretical issues in teaching of statistics. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member. May be repeated for credit. Letter grading.

**599. Ph.D. Dissertation Research. (2 to 12)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Study and research for Ph.D. dissertation. May be repeated for credit. S/U grading.

## STUDY OF RELIGION

## SURGERY

*School of Medicine*

UCLA  
72-131 Center for the Health Sciences  
Box 951749  
Los Angeles, CA 90095-1749  
(310) 825-6643  
<http://www.surgery.medsch.ucla.edu/>

### Chairs

E. Carmack Holmes, M.D. (*William P. Longmire, Jr., Professor of Surgery*), *Executive Chair*  
James B. Atkinson, M.D., *Vice Chair Clinical Affairs*  
Edward H. Livingston, M.D., *Vice Chair, Wadsworth VA*  
Bruce E. Stabile, M.D., *Vice Chair, Harbor-UCLA*  
Jesse E. Thompson, Jr., M.D., *Vice Chair, Olive View-UCLA*  
Achilles Demetriou, M.D., Ph.D., *Chief of Surgery, Cedars-Sinai*  
Arthur Fleming, M.D., *Chief of Surgery, Charles R. Drew University of Medicine and Science*

## Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in one 12-week core clerkship in clinical surgery and are as-

signed to rotations at a combination of UCLA, Harbor-UCLA, West Los Angeles VA, and Olive View-UCLA Medical Centers. Each facility has a special orientation depending on the patient population and the individual staff, in addition to the initial surgery clerkship orientation. During the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Surgery

### Upper Division Course

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Individual projects carried out under direction of a faculty member. Special studies in surgery, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

 Amen Santo  
 Benedicte Schoyen  
 David Schweizer  
 Deborah Scott  
 April Shawhan  
 Christopher Vened  
 Paul Wagar  
 Jonathan Wang  
 Jacqueline Wazir  
 Peter Wittrock

## Scope and Objectives

UCLA's theater program offers comprehensive training for the profession, as well as serious study of theater's long history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, directing, history and criticism, musical theater, and playwriting, all within the rigorous liberal arts framework of the B.A. degree. At the graduate level, students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

## Undergraduate Study

### Theater B.A.

The Bachelor of Arts degree provides a liberal education and preprofessional training in a comprehensive program that combines the study of the arts, humanities, and sciences with exploration of the principal areas of theater practice — acting, design, directing, the history and criticism of theater and drama, musical theater, and playwriting. The program is designed to ensure that students graduate with a sound humanistic and experiential base for further pursuits in education and in life beyond the University.

The Theater B.A. provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore acting, design, directing, playwriting, and production to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced elective courses in acting, design and production, directing, musical theater, playwriting, theater history, criticism, dramatic literature, and performance, leading to a culminating research or creative experience in the senior project.

The acting electives include fundamental and advanced courses in all aspects of performance training that prepare students for careers in performance. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, movement, and combat.

The design and production electives introduce design principles and investigate the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Four design and production areas of study are available at the upper division level — scenic design, costume design, lighting design, and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering,

drafting, painting, computer-aided design, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each area of study examines design principles and practice specific to each field.

The directing electives explore the basic theories of play direction, as well as text analysis and craft fundamentals. Advanced courses emphasize psychological aspects of director-actor communication and development of specific directorial and production styles.

The Ray Bolger musical theater program electives train selected students in acting, singing, and dance for the musical theater and provide knowledge of musical theater history. The dance courses (Theater 1A, 1B, 1C) are open to all freshman Theater majors and must be taken as prerequisites to be considered for the musical theater program. Auditions for the program are held during Spring Quarter of the freshman year. Junior transfer students are also eligible for consideration for an audition. Additional courses provide hands-on training with professional artists and a range of performing experiences from workshops to full production.

The history and criticism of theater and drama electives include the study of fundamental cultural, social, ethical, and political issues in the context of artistic expression enriched by historical perspective. The curriculum promotes an awareness of the theater as a global phenomenon embodying the contributions of diverse cultures and explores the verbal and visual elements of its language as revealed through the dynamics of theater production.

The playwriting electives include specialized and advanced courses that prepare students to write one-act and full-length plays, books and lyrics for music theater, and scripts for the one-person show.

### Admission

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. On receipt of the application the department notifies students of the screening process, which includes submission of a written essay on a topic selected annually by faculty members, letters of recommendation, and an interview and/or audition. Information on the scheduling of the audition/interview is sent to each applicant with the departmental request for supplemental materials. Every applicant must complete the interview portion of the application process. The audition is optional for all students except those wishing to qualify for admission on the basis of their ability in performance. Applicants may submit materials for consideration in one or more of the following areas: acting, design and production, directing, history and criticism, musical theater, and playwriting.

All entering students are admitted to the Theater major and may audition and/or interview for elective courses in acting, design and production, directing, history and criticism of theater and drama, musical theater, or playwriting.

### Preparation for the Major

*Required:* Theater 11, 12, 13, 14A, 14B, 14C, 15, 50 (must be taken for 4 units total).

### The Major

*Required:* A total of 58 upper division units, including Theater 101A, 101B, 101C, 106, 150 (must be taken for 4 units total), 180, and 34 upper division elective units selected from courses 101 through 199 not otherwise specified as requirements.

The Ray Bolger musical theater program electives are Theater 104C, 114A, 114B, 114C, 115A, 115B, 115C, 116A, 116B, 116C, 134A, 134B, 134C, 135A, 135B, 135C, 137A, 137B, 137C.

Through certain of these required courses, students are responsible for completing specific production assignments related to production activity of the theater curriculum.

## Graduate Study

.For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs., and included on their websites.

### Graduate Degrees

The Department of Theater offers the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) degrees in Theater.

## Admission

### M.A./Ph.D. in Theater

The M.A. degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree and who do not wish to continue in the Ph.D. program.

Ph.D. applicants must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, criticism, (2) the imagination and quality of scholarly writing and academic achievements, and (3) the grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, and fellowships. Additionally, candidates should demonstrate awareness and experience in one of the major fields of theater.

Applicants may be admitted with an M.F.A., M.A., or B.A. degree. The dossier for admission must contain a statement of purpose indicating areas of interest appropriate to the Ph.D. degree, as well as a thesis or other writing samples, and other information such as a résumé, portfolio, script, production book, and interview that may be required to establish the quality of applicants' work in the specialization.

Admission is competitive, and only a limited number of applicants are accepted each year in each program.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material. For further information, contact the Student Services Office in the department.

### M.F.A. in Theater

Students are admitted to the M.F.A. program in Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the *UCLA Application for Graduate Admission*, and no screening examination prior to admission is required.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose. The Graduate Record Examination (GRE) is not required.

Evidence of creative ability and professional intent is required. When submitting the application, applicants must indicate the M.F.A. degree objective and satisfy the specific admission requirements of one of the following areas of specialization within the M.F.A. program.

*Acting.* Submit a complete résumé and audition for the acting committee or its representative.

*Design and Production (scenic, costume, lighting, and sound design, or production management/technology).* Submit a résumé and evidence of ability appropriate to the area of emphasis as demonstrated by sketches, renderings, photographs, production books, plots, technical papers, reviews, or other appropriate exhibits. An interview and presentation of the portfolio is required.

*Directing.* Submit a résumé and evidence of production work, which may include copies of prompt books, photographs, reviews, and critical commentaries, and an essay outlining a directorial approach to a selected play. If the review committee requests an interview, applicants are notified of city location and dates at which time a full portfolio may be presented. Interviews are conducted at various locations around the country in February.

*Playwriting.* Submit a résumé and two examples of creative writing which may include dra-

matic writing or narrative fiction such as full-length plays, one-act plays, and screenplays. At least one stage play must be included. An interview may be required by the department.

*Producer's Program.* Submit a résumé, examples of related coursework, and a statement outlining areas of specific interest and intent. An interview may be required by the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material. For further information, contact the Student Services Office in the department.

## Master's Degrees

### M.A. in Theater

The program leads to a general graduate degree, though there are opportunities, through electives and thesis or research paper topics, to stress a particular interest such as acting, design, directing, dramatic writing, or theater history and criticism.

The M.A. degree is offered through the comprehensive examination and thesis plans. Students are required to complete a minimum of 10.5 courses (42 units), five of which must be at the graduate level, in at least one year of intensive study and research. There are required courses in theater production management and production and performance laboratory, one in theater history, one in theater production theory, and five courses that emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs take a required course sequence in the background of theatrical art.

### M.F.A. in Theater

The M.F.A. degree is offered through the comprehensive examination plan, which is satisfied by fulfilling a series of creative projects appropriate to student specializations.

*Acting.* A total of 23.5 courses (94 units) is required for the degree; of these, 20.5 courses (82 units) must be graduate-level (200 and 400 series) courses.

*Design and Production (scenic, costume, lighting, and sound design, or production management/technology).* A total of 26 courses (104 units) is required for the degree; of these, 23.5 courses (94 units) must be graduate-level (200 and 400 series) courses.

*Directing.* A total of 26.5 courses (106 units) is required for the degree; of these, 23.5 (94 units) must be graduate-level (200 and 400 series) courses.

Required courses are scheduled to permit completion within a three-year period. Specific course requirements for each program are available in the Student Services Office.

For the design and production program, directing program, and producer's program, a professional internship experience associated

with a theater, film, or television company is required.

## Doctoral Degree

Ph.D. students are expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

Students must complete a minimum of 12 graduate courses and two required professional courses. A course sequence in theory and criticism is required. The remaining nine courses are elective graduate courses, seminars, or tutorials. The dissertation is a historical, critical, analytical, or experimental study of a theater topic. A screening examination is administered during the first week of Fall Quarter based on a reading list supplied at the time of application. At the end of the student's second quarter in residence, a preliminary oral examination is administered by a representative committee of the faculty.

Written and oral qualifying examinations are required. Following successful completion of the written examination, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Theater

### Lower Division Courses

**1A-1B-1C. Introduction to Dance for Music Theater. (1-1-1)** Studio, four hours. Designed for Theater majors. Introduction to basic music theater dance technique. Letter grading.

**11. Contemporary Theater Issues. (4)** Lecture, three hours. Investigation of theater in contemporary American culture and society. Topics illustrated by faculty and guest speakers, visits to off-campus theaters, and reading from contemporary plays. Letter grading.

**12. Introduction to Performance. (4)** Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of the performer in the theatrical event, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills. Letter grading.

**13. Play Reading and Analysis. (4)** Lecture, three hours. Provides a base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of the theater's subdisciplines, including acting, directing, design, playwriting, and critical study. Letter grading.

**14A-14B-14C. Introduction to Design. (4-4-4)** Lecture, three hours; studio, six hours. Exploration of visual interpretation of drama. Study of styles and techniques of design, collaborative role of the designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study. Letter grading.

**15. Introduction to Directing. (4)** Lecture, two hours; studio, four hours. Prerequisite: course 11. Investigation of role of the director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production. Letter grading.

**20. Acting Fundamentals. (4)** Studio, 24 hours. Introduction to interpretation of drama through art of the actor. Development of individual insights, skills, and disciplines in presentation of dramatic material to an audience. P/NP or letter grading.

**28A-28F. Acting, Voice, and Movement Workshops I. (2 each)** Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units. Letter grading.

**50. Theater Production and Performance. (2)** Studio, six hours. Laboratory experience in various aspects of theater production, including scenery, costumes, lighting, stage management, or member of a crew. May be repeated for a maximum of 8 units. Letter grading.

### Upper Division Courses

**101A-101B-101C. History of World Theater and Drama. (4-4-4)** Lecture, three hours; discussion, one hour. Survey of history of influence of different cultures, traditions, and technologies on development of theater as a social institution. Letter grading. **101A.** Ritual and Religious Drama. Study of origins of theater and drama from oral tradition, myth, storytelling, Shamanism, collective ritual, Greek festival drama, and cloister drama of different cultures. **101B.** Rise of Secular Drama. Study of Renaissance secular theater and drama in Europe, Asia, Africa, and the New World. **101C.** Emergence of Realism and 20th-Century Responses. Study of realism and subsequent departures from realism in theater and drama.

**102A. Theater of Japan. (4)** Lecture, three hours. Exploration of major theater traditions of Japan from emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Kabuki performance traditions. Letter grading.

**102B. Theater of Southeast Asia. (4)** Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society. Letter grading.

**102C. Cross-Cultural Currents in Theater. (4)** Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures. Letter grading.

**102E. Theater of Non-European World. (4)** Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of traditional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, the Middle East, and Africa. Analogous forms from European theater included for comparative purposes.

**M103A. African American Theater History: Slavery to Mid-1800s. (4)** (Same as Afro-American Studies M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s. Letter grading.

**M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (4)** (Same as Afro-American Studies M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical. Letter grading.

**M103C. Origins and Evolution of Chicano Theater. (4)** (Same as Chicana and Chicano Studies M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

**M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (4)** (Same as Chicana and Chicano Studies M103D.) Lecture, three hours. Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater. Letter grading.

**M103E. African American Theater History: The Depression to the Present. (4)** (Same as Afro-American Studies M103E.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present. Letter grading.

**103F. Native American Theater. (4)** Study of American Indian theater as an evolving art form.

**M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (4)** (Same as Chicana and Chicano Studies M103H.) Lecture, three hours. Prerequisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art. Letter grading.

**104A-104B-104C. History of American Theater. (4-4-4)** Lecture, three hours. Study of history of influence of different cultures, traditions, and technologies on development of theater as a social institution in America. Letter grading. **104A.** Revolutionary War to the Civil War; **104B.** Civil War to WWI; **104C.** WWI to the Present.

**105. Main Currents in Theater. (4)** Lecture, three hours. Critical examination of leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

**106. History of American Theater and Drama. (4)** Lecture, three hours. Survey of key works of American dramatic literature and landmarks of American theater history. Letter grading.

**107. Drama of Diversity. (4)** Lecture, three hours. Investigation of diversity in American society as manifested in dramatic works and theatrical presentations. Letter grading.

**108. Special Topics in History and Criticism. (4)** Lecture, three hours. Investigation of selected topics of diversity in American society as manifested in dramatic works and theatrical presentations. Letter grading.

**111A. Selected Topics on History of European Theater from Primitive Times to 1640. (4)** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Greeks to 1640. May be repeated twice for credit.

**111B. Selected Topics on History of European Theater from 1640 to 1900. (4)** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Renaissance through 1900. May be repeated twice for credit.

**111C. Selected Topics on History of European Theater from 1900 to the Present. (4)** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the baroque to the present. May be repeated twice for credit.

**114A-114B-114C. Dance and Singing for Music Theater I. (1-1-1)** Studio, five hours. Prerequisite: course 1A. Designed for Theater majors. Sophomore-level course providing foundation for music theater students' voice training, as well as dance and movement technique. Letter grading.

**115A-115B-115C. Acting, Voice, and Movement I. (6-6-5)** Studio, 14 to 17 hours. Study of beginning acting technique: improvisation, games, and sense memory with examination of action and objective exercises, outline of Stanislavsky system, and development of voice and movement skills. Letter grading.

**116A-116B-116C. Acting, Voice, and Movement II. (6-6-5)** Studio, 14 to 17 hours. Development of acting skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to contemporary American scenes. Development of speech, voice, and movement skills. Letter grading.

**118A. Creative Dramatics. (4)** Lecture/laboratory. Studies of principles and procedures of improvisational approach to drama as done with children from nursery school to junior high.

**118B. Advanced Creative Dramatics. (2 to 4)** Lecture, four hours; other, to be arranged. Practical application of creative drama process. Exploration of interrelationships of the arts to traditional disciplines of learning. May be repeated once for credit.

**118C. Interactive Theater. (4)** Laboratory. Active, problem-solving process of theater exercises and games designed to examine racial stereotypes, sexual harassment, gender discrimination, and other issue that divide members of the campus community, as well as issues which divide the campus from the Los Angeles community. Selected to increase social and political awareness of problems and ideas fundamental to intellectual development, exercises and games nurture skills and attitudes useful in facilitating discussions between actors and audience participants. Use of techniques of sensory awareness, movement, pantomime, improvisation, and characterization. Letter grading.

**119A. Theater for the Child Audience: Theory and Criticism. (4)** Lecture/laboratory. Principles of production and performance for the child audience.

**119B. Theater for the Child Audience: Performance. (4)** Lecture, two hours; laboratory, four hours. Preparation: audition prior to first class meeting. Designed to provide opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through ensemble work, rehearsal, pretesting, and evaluation of an original production for possible presentation outside the classroom.

**120A-120B. Acting for Camera. (2-2)** Studio, six hours. Development of performance techniques for camera and interpretation of comedy and drama for television, film, and emerging technologies. Study and practice in single- and multiple-camera productions. Letter grading.

**121. Acting Workshop. (2)** Laboratory, to be arranged. Requisite: course 20. Courses 160, 163A, 163B, and 163C may be taken concurrently. Workshop which provides students with opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit.

**122. Makeup for the Stage. (2)** Art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

**123. Intermediate Acting for the Stage. (4)** Lecture/laboratory. Requisite: course 20. Study and practice of art of acting through perfecting of techniques and application of those techniques to acting problems.

**124A. Advanced Voice. (2)** Studio/laboratory, three to four hours. Requisites: courses 126A, 126B, 126C. Development of voice techniques for the stage, including work in relaxation, limbering, breathing, articulators, and resonators.

**124B. Advanced Speech. (2)** Studio/laboratory, three to four hours. Requisite: course 124A. Designed to acquaint students with International Phonetic Alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and development of diction versatility.

**125A. Advanced Movement. (2)** Studio/laboratory, three hours. Physical awareness for the actor, concentrating on warming up the body, relaxation, control, stunts, and gymnastics.

**125B. Advanced Movement and Combat. (2)** Studio/laboratory, three to four hours. Requisite: course 125A. Advanced and contemporary approach to classical and modern movement for the stage actor.

**126A-126B-126C. Acting, Voice, Movement III. (4-4-4)** Studio, nine hours. Requisite: course 12. Study of characterization, including introduction to Shakespeare. Approach to verse, scansion, use of emolbies in classic texts. Personalization within heightened reality. Further work in voice, speech, and movement. Letter grading.

**127A-127B-127C. Advanced Acting. (2-2-2)** Studio, six hours. Requisites: courses 126A, 126B, 126C. Comedy workshop, stand-up comedy, performance art pieces. Audition and cold reading workshop. Solving individual acting projects. Letter grading.

**128A-128F. Acting, Voice, and Movement Workshops II. (2 each)** Studio, four to six hours. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units. Letter grading.

**CM129. Contemporary Topics in Theater, Film, and Television. (2)** (Same as Film and Television CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of 6 units. Concurrently scheduled with course CM229.

**130A. Fundamentals of Playwriting I. (4)** Lecture, three hours; discussion, one hour. Required of Theater majors. Designed to stimulate students' creative faculties through preparation and completion of a one-act play. Students' critical faculties stimulated by play analysis and scene exercises in discussion section.

**130B. Fundamentals of Playwriting II. (4)** Lecture, three hours plus conference. Requisite: course 130A. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

**130C. Writing for American Musical Theater. (4)** Lecture/laboratory, three hours. Study of practice and techniques used in writing a libretto for musical theater: opening numbers, romance, subplots, and comedy. May be repeated once for credit.

**132. Manuscript Evaluation for Theater. (4)** Lecture, three hours. Requisite: course 130A. Principles and practices in evaluation of manuscripts for theater. May be repeated once for credit.

**C133A-C133B-C133C. Script Development Workshops. (4 to 8 each)** Lecture, four hours; studio, 24 hours. Guided preparation of a script for production, with focus on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Each course may be taken for a maximum of 8 units. Concurrently scheduled with courses C433A-C433B-C433C. Letter grading.

**134A-134B-134C. Dance and Singing for Music Theater II. (1-1-1)** Studio, five hours. Requisites: courses 1A, 114A, 114B, 114C. Designed for Theater majors. Junior-level course providing intermediate-level instruction for music theater students' voice training, as well as dance and movement technique. Letter grading.

**135A-135B-135C. Dance and Singing for Music Theater III. (1-1-1)** Studio, five hours. Requisites: courses 1A, 114A, 114B, 114C, 134A, 134B, 134C. Designed for Theater majors. Senior-level course providing advanced instruction for music theater students' voice training, as well as dance and movement technique. Letter grading.

**136. Advanced Acting for the Stage. (4)** Lecture/laboratory. Requisite: course 123. Study and practice of art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Consecutive enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units. Letter grading.

**137A-137B-137C. Continuum Study in Acting for the Stage. (4-4-4)** Studio, six hours. Requisite: course 123. Technique of characterization and performance in advanced and complex acting styles. May be repeated once for credit.

**138. Special Problems in Performance Techniques. (4)** Lecture/laboratory. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

**141A. Lighting Techniques for the Stage. (4)** Lecture, three hours; laboratory, six hours. Requisite: course 10. Required of Theater majors. Intensive study of theater lighting, with emphasis on relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any sequence, but not concurrently.

**144. Theater Sound Techniques. (2)** Lecture, two hours; laboratory, two hours. Requisites: courses 14A, 14B, 14C. Study of equipment and techniques utilized in recording and reproduction of sound for the theater.

**145. Costume Design for the Theater. (4)** Lecture/laboratory. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit.

**147A. Drafting. (4)** Development of visual communication skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit. Letter grading.

**147B. Rendering. (4)** Introductory course in basic skills necessary for drawing and rendering for scenic, costume, and lighting design for theater, film, and television. May be repeated once for credit. Letter grading.

**148. Special Courses in Design and Technical Theater. (4)** Lecture, three hours. Group study of selected subjects in design and technical theater. May be repeated twice for credit.

**150. Theater Production and Performance. (2)** Studio, six hours. Requisite: course 50. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, member of a crew, or assignment as a designer or assistant on a production. May be repeated for a maximum of 8 units. Letter grading.

**151A-151B. Scenic Design. (4-4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Introduction to principles of study and practice of the design of scenery for theater, film, and television. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design. Letter grading.

**C151C. Production Design for Film and Television. (4)** Lecture/studio. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C451C. Letter grading.

**152A-152B. Lighting Design. (4-4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of principles and techniques of lighting design for theater and television. Study of lighting, with emphasis on imagination, text analysis, metaphor, and conceptualization. Investigation of composition and control of light and color in relation to the actor.

**C152C. Lighting Design for Television. (4)** Lecture/studio. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C452C. Letter grading.

**153A-153B. Costume Design. (4-4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Letter grading.

**153A.** Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process and character analysis leading to visual presentation of the design. **153B.** Study of costume design for period productions, development of conceptual designs, and costume design for music theater.

**C153C. Costume Design for Film and Television. (4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C453C. Letter grading.

**154A-154B. Sound Design. (4-4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Letter grading.

**154A.** Study of recording, mixing, editing, and playback of sound effects, voice, and music in the theater. **154B.** Introduction to use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for musical theater.

**C154C. Sound for Film and Television. (4)** Lecture/studio. Study of current professional sound recording, re-recording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C454C. Letter grading.

**C155A-C155H. Graphic Representation of Design. (2 each)** (Formerly numbered C155A-C155G.) Studio. Concurrently scheduled with courses C455A-C455H. Letter grading:

**C155A.** Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Letter grading.

**C155B.** Watercolor Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Letter grading.

**C155C.** Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers. Letter grading.

**C155D.** Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Letter grading.

**C155E.** Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.

**C155F.** Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

**C155G.** Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Letter grading.

**C155H.** Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated for a maximum of 4 units. Letter grading.

**C156A. Introduction to Computer-Assisted Drafting.** (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C456A. Letter grading.

**C156B. Introduction to Computer-Assisted Design.** (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C456B. Letter grading.

**C156C. Introduction to Computer-Assisted Rendering.** (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C456C. Letter grading.

**C157A-C157B-C157C. Costume Construction Techniques.** (2-2-2) Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-appearing costume using contemporary methods. Concurrently scheduled with courses C457A-C457B-C457C. **C157A.** Requisites: courses 14A, 14B, 14C. Introduction to draping, pattern grading fitting, and slash and spread adaptation. Letter grading. **C157B.** Requisite: course C157A. Introduction to costume drafting, construction of period undergarments. **C157C.** Requisites: courses C157A, C157B. Draping, patterning, and fitting techniques for period garments.

**C158A. Scenic Design Technology.** (4) Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C458A. Letter grading.

**C158B. Lighting Design Technology.** (4) Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C458B. Letter grading.

**C158C. Sound Design Technology.** (4) Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C458C. Letter grading.

**159. Design Portfolio Project.** (4) Lecture/studio. Requisites: courses 14A, 14B, 14C. Preparation of complete designs and drawings for a production and assembly of a design portfolio and résumé. Projects prepared under guidance of a faculty adviser. Letter grading.

**160. Fundamentals of Play Direction.** (5) Lecture, two hours; laboratory, four hours. Required of Theater majors. Course 121 may be taken concurrently. Basic theories of play direction and their application through preparation of scenes under rehearsal conditions.

**163A-163B-163C. Directing for the Stage.** (4-4-4) Lecture/studio. Requisite: course 15. Letter grading:

**163A.** Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions.

**163B.** Further development of craft elements of directorial method, with additional emphasis on psychological aspects of director/actor communication. Students direct scenes under laboratory conditions in alternative stage configurations.

**163C.** Culminating development of directorial methods, with particular emphasis on challenges of style in text and production. Students direct scenes under laboratory conditions in alternative stage configurations.

**C163D. Directing Project for the Stage.** (4) Lecture, four hours; studio, six hours. Requisites: courses 163A, 163B, 163C. Completion of course C163D satisfies course 180 requirement. Application of stage directing techniques in production of a short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C263D. Letter grading.

**171A. Advanced Theater Laboratory.** (1 to 4) Hours to be arranged. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of 4 units.

**171B. Advanced Theater Laboratory.** (1 to 4) Hours to be arranged. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of 4 units.

**C172. Technical Theater Laboratory.** (2) Hours to be arranged. Required of Theater majors. Laboratory in various aspects of theater production. Must be repeated for a maximum of 8 units, but no assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

**173A. Design Assignment: Assistant Designer.** (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as an assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

**173B. Production Design Assignment: Designer.** (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as a designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

**174A. Stage Managing Techniques.** (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Professional duties of stage manager. Problems of unions, professional auditions, organization, scheduling, out-of-town openings, Broadway openings, and responsibilities of a lengthy run. Letter grading.

**174B. Project in Stage Management.** (3) Studio, nine hours. Requisite: course 174A. Laboratory experience in the professional duties of assistant stage manager, including participation as an assistant stage manager in preproduction, rehearsal, and performance phases of a production. May be repeated once for credit. Letter grading.

**174C. Project in Stage Management.** (4) Studio, 12 hours. Requisite: course 174A. Laboratory experience in the professional duties of stage manager, including participation as a stage manager in preproduction, rehearsal, and performance phases of a production. Problems of unions, auditions, organization, scheduling, and responsibilities of a lengthy run. May be repeated once for credit. Letter grading.

**175A-175D. Summer Theater Workshops.** (4 or 8 each) Lecture. Participation in production and performance of full-length plays for general public. Offered in summer only. Letter grading. **175A-175B.** Practice in and observation of complete operation of a summer theater company. **175C-175D.** Specialization in technical theater.

**177. Computer-Assisted Design Techniques.** (4) Studio, six hours. Hands-on exploration of use of computers for design of scenery and lighting in theater, film, and television. May be taken for a maximum of 8 units. Offered in summer only. Letter grading.

**M178. Film and Television Acting Workshop.** (2) (Same as Film and Television M177.) Laboratory, four hours. Workshop providing opportunities for students to rehearse, perform, and evaluate scenes. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.

**180. Senior Project.** (4) Lecture/studio, three hours. Requisites: courses 101A, 101B, 101C. Preparation of a conceptual or creative project to provide a culminating experience in the production of a creative or research work. Letter grading.

**C190A. Role of Producer in Professional Theater.** (2) Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C294A.

**C190B. Role of Management in Educational and Community Theater.** (2) Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C294B.

**191. The Touring Company.** (2 to 12) Lecture, 20 hours; laboratory, 22 hours. Rehearsal and technical preparation of a theatrical work for touring and performance of that work on tour.

**192. Motion Picture, Television, and Theater Internship.** (2, 4, or 8) Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Limited to senior Theater majors. Internship at various studios or theaters accentuating creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of 8 units.

**M193. Art Alive: Art and Improvisation in the Museum.** (4) (Same as Honors Collegium M116.) Seminar, four hours. Offered in collaboration with the Los Angeles County Museum of Art (LACMA). Interpretation of art in the collection through acting, dialogues, movement, and music. Research into history and art history and production of a creative performance piece required. P/NP or letter grading.

**199. Special Studies in Theater Arts.** (2 to 8) Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of 8 units.

## Graduate Courses

**202A. Seminar: Western Classical Theater.** (4) Discussion, three hours. Designed for graduate students. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

**202B. Seminar: Medieval Theater.** (4) Discussion, three hours. Designed for graduate students. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

**202C. Seminar: Renaissance and Baroque Theater.** (4) Discussion, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

**202D. Seminar: Bourgeois and Romantic Theater.** (4) Discussion, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

**202E. Seminar: Modern Consciousness in Theater.** (4) Discussion, three hours. Designed for graduate students. Study of prototypes of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit.

**202F. Seminar: Modern Realism.** (4) Discussion, three hours. Designed for graduate students. Selected studies of theater's response to science and technology, politics, and revolution. May be repeated twice for credit.

**202G. Seminar: Modern Theatricalism.** (4) Discussion, three hours. Designed for graduate students. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

**202M. Seminar: American Theater.** (4) Discussion, three hours. Designed for graduate students. Selected studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

**202P. Seminar: Traditions of African Theater.** (4) Discussion, three hours. Designed for graduate students. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

**202R. Seminar: East Asian Theater.** (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**202S. Seminar: South Asian Theater. (4)** Discussion, three hours. Designed for graduate students. Selected topics in theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**202T. Seminar: Southeast Asian Theater. (4)** Discussion, three hours. Designed for graduate students. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**203. Theater Ethics and Issues. (5)** Seminar, four hours. Designed for graduate students. Investigation of a selected area of theater and drama study that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

**204. Theater Genres. (5)** Seminar, four hours. Designed for graduate students. Investigation of history and literature of the theater as manifested in one or more of its major forms or genres. May be repeated four times for credit.

**205A-205B-205C. Background of Theatrical Art. (4-4-4)** Discussion, three hours. Designed for graduate students. Analysis of major plays, commentaries, and historical materials. S/U or letter grading. **205A.** Classical and Medieval Periods; **205B.** Renaissance, Baroque, and Rococo Periods; **205C.** Romantic, Naturalistic, and Symbolist Periods.

**206. Themes in World Theater and Drama. (5)** Seminar, four hours. Designed for graduate students. Selected topics in world theater history, drama, production, and/or architecture organized on a thematic basis. May be repeated four times for credit.

**207A-207B. Theater Aesthetics. (4-4)** Designed for graduate students. Discussion of essential issues in aesthetics of theater and drama based on philosophy of art and theories of the theater. **207A.** Classical and Medieval Theories of Art and Theater; **207B.** Renaissance Theories of Art and Theater to the Present.

**208A-208B. Dramaturgy I, II. (4-4)** Lecture, three hours; laboratory, one hour. Designed for graduate students. Letter grading. **208A.** (Formerly numbered 208.) Theoretical and practical aspects of the dramaturge's work in contemporary theater. **208B.** Requisite: course 208A. Continuation of study of theory and practice of dramaturgy.

**208C. Practicum in Dramaturgy. (2 to 12)** (Formerly numbered 495B.) Laboratory, to be arranged. Requisites: courses 208A, 208B. Demonstration of competence in practice of dramaturgy through completion of approved dramaturgical assignment. May be repeated for a maximum of 12 units. Letter grading.

**209. Theater Authors. (5)** Designed for graduate students. Investigation of work of a theater artist from history of world theater, with special emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

**210. Topics in World Theater and Drama. (5)** Designed for graduate students. Investigation of selected topics in world theater, drama, production, and architecture. May be repeated four times for credit.

**216A-216B-216C. Theory and Criticism I, II, III. (6-6-6)** Lecture, four hours; laboratory, one hour. Designed for graduate students. Studies in theory and criticism of theater, dramatic literature, and performance. Letter grading. **216A.** Through the 16th Century. **216B.** 16th through 19th Centuries. Requisite: course 216A. **216C.** 19th Century to the Present. Requisite: course 216B.

**220. Graduate Forum. (1)** Seminar, two hours bi-monthly or five times per term. Limited to graduate theater students. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

**CM229. Contemporary Topics in Theater, Film, and Television. (2)** (Same as Film and Television CM229.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of 6 units. Concurrently scheduled with course CM129.

**“M**y mentor—Maidie Norman—was the first person to teach African American theater history on the UCLA campus. That was in 1968,” recalls Professor Beverly Robinson. “Later, as an undergraduate, I took her courses and became excited about American and African theater history and folklore studies. Little did I know I would have an opportunity to demonstrate her influence on my education and subsequent teaching in the areas I love.”

Three decades later, Robinson continues to energize the UCLA Theater Department, enriching it with her broad experience and special focus on American and African American theater.

“Theater is a reflection of ideas,” she likes to say “that beckons an audience to participate. As students learn to look at these ideas, I want them to stimulate their critical and associative learning skills, as well as to enhance their sense of responsibility to share what they have learned with others.”

A commitment to sharing is reflected in her own life not only through her teaching and publications. Robinson serves as a dramaturge, mu-

sic, speech, folklore, and research consultant for theater, film, television, and exhibits. She also developed the teaching curriculum for the Mind Builders Folk Arts Program in New York, which trains students to identify, collect, and preserve cultural traditions in the Bronx, particularly from community elders.

Such a background attests to the possibilities for theater students. “Undergraduate training introduces them to the many fingers that collaborate to make the strong hand of theater. In addition to acting, they have opportunities in areas such as design, directing, community outreach, playwrighting.... Many become involved in film and television, teaching, entrepreneurship, research and consulting, as performers, technicians, and educators.”

“Every student comes with the ability to learn,” Robinson affirms. “I love making them stretch beyond their own intellectual realizations. As an instructor, I believe learning is just as important as teaching, and my students always have something that I can learn to stimulate me to offer my best.”

**Beverly Robinson,  
Theater Department**

*Every student comes with the ability to learn. I love making them stretch beyond their own intellectual realizations. As an instructor, I believe that learning is just as important as teaching, and my students always have something that I can learn to stimulate me to offer my best*

---

**230A-230B-230C. Writing for the Contemporary Theater. (4 to 8 each)** Lecture, three hours; studio, two hours. Designed for graduate students. Letter grading.

**230A.** One-Act Play. Analysis of strategy and dramatic structure of selected contemporary short plays leading to the guided completion and critique of student-written one-act plays. **230B.** Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to the guided completion and critique of a student-written full-length play. **230C.** Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to the guided completion and critique of student work.

**232. Manuscript Analysis. (4)** Lecture, three hours. Designed for graduate students. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

**241. Research in Technical Theater. (4)** Designed for graduate students. Research in technical processes and equipment in theater.

**243A-243B-243C. Scenic Design. (4-4-4)** Advanced study and practice in scenic design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design. May be repeated once for credit.

**244A-244B. Advanced Theater Production. (2 to 8 each)** Studio, 12 to 24 hours. Designed for graduate students. Creative participation in preparation and presentation of a theatrical production. Each course may be taken for a maximum of 8 units. Letter grading.

**245A. Production Management. (4)** Lecture, three hours. Study in production management for the theater. Examination of professional duties of production manager, including preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting while maintaining a creative and collaborative environment. Letter grading.

**245B. Production Management. (4)** Lecture, three hours. Prerequisite: course 245A. Advanced study in production management for the theater, with focus on planning process of professional production manager in a seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling, and budgeting to establish a creative and collaborative environment. Letter grading.

**245C. Projects in Production Management. (4)** Studio/laboratory. Prerequisite: course 245B. Laboratory experience in professional duties of production manager, including participation as a production manager in pre-production, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting. Letter grading.

**246A-246B-246C. History of Costume. (4-4-4)** Lecture/studio. Designed for graduate students. Study of history of costume as a manifestation of cultural, social, economic, and political influences to provide a historical framework for design of costumes for theater, film, and television. Historic survey and in-depth exploration of a selected period, with study of influences of diverse cultures. Letter grading.

**247. Collaborative Project in Design and Production. (3 to 4)** Studio, four hours. Designed for graduate students. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit. Letter grading.

**260. Directing I. (4)** Lecture, four hours; studio, 24 hours. Designed for graduate students. Development of directorial skills of analysis, planning, staging, and criticism through medium of written preparations and directing of scenes. Letter grading.

**261. Directing Post-Realist Drama. (4)** Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in direction of post-realist plays through medium of interpretation and laboratory scene work. Letter grading.

**263. Production Project in Direction for the Stage. (2 to 8)** Discussion, one hour; studio, 12 to 30 hours. Designed for graduate students. Direction of a dramatic work, with discussion and critique of work in progress. May be repeated for a maximum of 20 units. Letter grading.

**C263D. Directing Project for the Stage. (4)** Lecture, four hours; studio, six hours. Prerequisites: courses 163A, 163B, 163C. Application of stage directing techniques in production of short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C163D. Letter grading.

**264. Directing Classical and Historical Drama. (4)** Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work. Letter grading.

**265. Modern Theories of Production. (4)** Examination of modern theories of production from emergence of the director in the 19th century to the present. Investigation of different responses to problems of creating a vital theatrical event in context of ongoing evolution of theater as an art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representation. Letter grading.

**266. Theatrical Conceptualization. (4)** Examination of process of conceptualization in dramatic production; centrality of theatrical conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspect of theatrical production. Letter grading.

**C272. Production and Performance Laboratory. (2)** Lecture, three hours; laboratory, to be arranged. Designed for graduate students. Credit for creative production assignments required of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with courses C172 and C472.

**290A. Role of Management in Artistic Decision Making in the Theater. (4)** Discussion, four hours. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations. S/U or letter grading.

**290B. Programming and Planning Policies in the Theater. (4)** Analysis of social, artistic, and economic roles of the arts as reflected in programming policy. Examination of social goals pursued in establishing relationships between the arts and their environment.

**C294A. Artistic Control of Theatrical Production by Professional Producer. (2)** Designed for graduate students. Study of structure governing economic and artistic decision-making processes in professional theater of America and historical development of involvement of producer in artistic process. Concurrently scheduled with course C190A. Additional research and writing required of graduate students.

**C294B. Organization and Operation of Community Theater. (2)** Designed for graduate students. Study of artistic, social, and economic criteria in administration of educational and community theater, with research in history of current practices in operations, administration, and organization. Concurrently scheduled with course C190B.

**298A-298B. Special Studies in Theater Arts. (2 to 4 each)** Lecture/discussion. Designed for graduate students. Seminar study of problems in theater arts, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**420A-420B-420C. Advanced Acting I. (4 to 8-4-4)** Studio, six to 18 hours. Letter grading:

**420A.** Development of an internal technique, beginning with an autodrama which is a dramatization of one's personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing the circumstances, life of the character, and intentions of the scene.

**420B.** Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how the actor goes about doing research and fieldwork on the character being played.

**420C.** Development of an external technique through comedy and of skits, improvisation, physical humor, delivery of a line, rhythm, timing, and public cabaret. Fusion of the internal; use of action and objective with the external.

**421A-421B-421C. Advanced Acting II. (4 or 8 each)** Studio/laboratory, six to 18 hours. Letter grading.

**421A.** Extending the idea of autobiography and using it as art. The actor as performance artist. Playing characters quite removed from oneself. Using language. Using Shakespeare and oneself to play him. **421B.** Continued character behavior study through language and movement. Further work on actions, objectives, and researching the role. **421C.** Comedy workshop. Exploration of craft of comedy and development of cabaret pieces.

**422. Advanced Acting for Theater, Film, and Television. (8 to 12)** Studio/laboratory. Intensive performance experience. May be repeated for a maximum of 24 units. S/U grading.

**424A-424B-424C. Advanced Voice and Speech I. (2 or 4 each)** Studio/laboratory, three to six hours. Development of voice and speech techniques for the stage, including those of relaxation, breathing, resonance, and development of speaking voice. Speech training uses International Phonetic Alphabet to train students in standard American speech. Text work in poetry and prose. Letter grading.

**424D-424E-424F. Advanced Voice and Speech II. (2 or 4 each)** Studio/laboratory, three to six hours. Advanced voice problems. Extension of first-year work, with increased demands on voice. Range, resonance, and breathing capacity extension. Articulation and phonetic alphabet. Text work in classical verse. Letter grading.

**425A-425B-425C. Advanced Movement I. (2 or 4 each)** Studio/laboratory, three to six hours. Discovery of body's unique language through exercises designed to explore and free the total instrument. Development of a flexible actor with range, expression, and confidence physically. Awakening of the imagination while exploring the worlds of ritual, animal, conceptual, and modern dance movements. Letter grading.

**425D-425E-425F. Advanced Movement II. (2 or 4 each)** Studio/laboratory, three to six hours. Presentation of a more complete picture of stage movement and its relationship to theater, music, and dance. Advancement of physical training of individual actors to their maximum potential. Experience in techniques and discovery of origins of a variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques. Letter grading.

**429. Performance Workshop. (2)** Studio, four hours. Limited to graduate students not enrolled in M.F.A. acting program. Exercises in performance techniques, including autodrama and scene study. Development of performance skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to scenes. Letter grading.

**430A-430B-430C. Advanced Studies in Playwriting. (4 to 8 each)** Lecture, three hours. Limited to M.F.A. playwriting program students. Guided completion of full-length scripts for the stage.

**431. Special Topics in Playwriting. (4)** Discussion, three hours. Designed for M.F.A. playwriting program students. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theater, or improvisational techniques. May be repeated twice for credit.

**C433A-C433B-C433C. Script Development Workshops. (4 to 8 each)** Lecture, four hours; studio, 24 hours. Designed for graduate students. Guided preparation of a script for production, with focus on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Each course may be taken for a maximum of 8 units. Concurrently scheduled with courses C133A-C133B-C133C. Letter grading.

**435AF-435AW-435AS. Problems in Advanced Writing for the Stage. (0-0-2)** Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of 6 units. In Progress and S/U grading.

**441A-441B-441C. Lighting Design. (4-4-4)** Lecture/studio. Letter grading:

**441A.** Study and practice in lighting the actor, emphasizing textual and character analysis from lighting designer's perspective, conceptual development with the director, effect of light on dynamics of staging, use of color in light, and relationship of lighting designer to the actor. May be repeated once for credit.

**441B.** Study of use of light and color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multiscenic productions, lighting patterns, and moving scenery. May be repeated once for credit.

**441C.** Investigation of lighting design in production, musical theater, opera, touring, and repertory situations. Study of analysis of script and score for lighting designer. May be repeated once for credit.

**441D. Scenic Projection and Media Techniques. (4)** Lecture/laboratory. Designed for graduate students. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage.

**442A-442B-442C. Costume Design. (4-4-4)** Lecture/studio. Advanced study and practice in costume design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, period style, and character analysis leading to visual presentation of the design. Study of costume design for theatrical productions, ballet, opera, and musical theater. May be repeated once for credit. Letter grading.

**443. Problems in Design. (2 or 4)** Lecture/laboratory, four hours (additional hours as required). Study and practice in design techniques for theater. May be repeated for a maximum of 12 units.

**444A-444B-444C. Sound Design. (4-4-4)** Lecture/studio. Letter grading:

**444A.** Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of dialogue, effects, and music tracks for theater sound design. May be repeated once for credit.

**444B.** Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and score, conceptual development of the design, and multitrack recording techniques to realize the design. May be repeated once for credit.

**444C.** Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of sound tracks and sound reinforcement in the theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit.

**C451C. Production Design for Film and Television. (4)** Lecture/studio. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C151C. Letter grading.

**C452C. Lighting Design for Television. (4)** Lecture/studio. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C152C. Letter grading.

**C453C. Costume Design for Film and Television. (4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C153C. Letter grading.

**C454C. Sound for Film and Television. (4)** Lecture/studio. Study of current professional sound recording, re-recording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill. Letter grading.

**C455A-C455H. Graphic Representation of Design. (2 each)** (Formerly numbered C455A-C455G.) Studio. Concurrently scheduled with courses C155A-C155H. Letter grading.

**C455A.** Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

**C455B.** Watercolor Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

**C455C.** Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers. Letter grading.

**C455D.** Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill. Letter grading.

**C455E.** Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.

**C455F.** Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

**C455G.** Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Letter grading.

**C455H.** Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated for a maximum of 4 units. Letter grading.

**C456A. Introduction to Computer-Assisted Drafting. (2)** Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C156A. Letter grading.

**C456B. Introduction to Computer-Assisted Design. (2)** Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C156B. Letter grading.

**C456C. Introduction to Computer-Assisted Rendering. (2)** Studio, four hours. Requisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C156C. Letter grading.

**C457A-C457B-C457C. Costume Construction Techniques. (2-2-2)** Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-appearing costume using contemporary methods. Concurrently scheduled with courses C157A-C157B-C157C. **C457A.** Requisites: courses 14A, 14B, 14C. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C457B.** Requisite: course C457A. Introduction to costume drafting, construction of period undergarments. **C457C.** Requisites: courses C457A, C457B. Draping, patterning, and fitting techniques for period garments.

**C458A. Scenic Design Technology. (4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C158A. Letter grading.

**C458B. Lighting Design Technology. (4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C158B. Letter grading.

**C458C. Sound Design Technology. (4)** Lecture/studio. Requisites: courses 14A, 14B, 14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C158C. Letter grading.

**459A-459B. Directing for Theater, Film, and Television. (4-4)** Lecture, three hours. Limited to graduate theater students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to some literary material in three media.

**460AF-460AW-460AS. Contemporary Issues in Direction. (1-1-1)** Discussion, three hours. Designed for graduate students. Discussion of role of director in contemporary professional practice. Review discussion and critique of directing projects. May be repeated for a maximum of 4 units. Letter grading.

**460B-460C. Problems in Advanced Direction for the Stage. (4-4)** Lecture, to be arranged. Limited to M.F.A. candidates. Discussion and critique of work in progress. **460B.** Preparation and presentation of a published play under rehearsal conditions. **460C.** Preparation and presentation of a full-length original play under rehearsal conditions.

**462. Advanced Directing. (8 or 12)** Studio, 12 or 30 hours. Designed for graduate students. Advanced problems in directing for theater, film, and television. May be taken for a maximum of 24 units. Letter grading.

**463. Production Project in Direction for the Stage (8 or 12 units).** Studio, 24 hours. Designed for graduate students. Creative participation as director in conceptualization and preparation of a dramatic work. Letter grading.

**C472. Production and Performance Laboratory. (2 to 8)** Laboratory, to be arranged. Limited to M.F.A. candidates. Credit for creative production projects required of all M.F.A. students. May be repeated three times for a maximum of 16 units. Concurrently scheduled with courses C172 and C272.

**474. Projects in Theater Design. (2 or 4)** Discussion, three hours; laboratory, 12 hours to be arranged. Designed for graduate students. Study and practice in preparation and performance of dramatic works for public performances as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or dramaturge. May be repeated for a maximum of 16 units. Letter grading.

**495A-495B-495C. Practicum and Practice in Teaching Theater. (2-2-2)** (Formerly numbered 495A, 496.) Seminar, to be arranged; discussion, two hours. Limited to Ph.D. students. Study and practice of teaching theater at university level. Orientation and preparation of graduate (Ph.D.) students who have responsibility to assist in teaching undergraduate courses in department. Discussion of problems common to the teaching experience. Letter grading.

**498. Professional Internship in Theater, Film, and Television. (4, 8, or 12)** Full- or part-time at a studio or on a professional project. Designed for advanced M.F.A. students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Individual Studies: Research. (2 to 12)** Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor.

**596B. Directed Individual Studies: Writing. (2 to 12)** Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor.

**596C. Directed Individual Studies: Directing. (2 to 12)** Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor.

**596D. Directed Individual Studies: Design. (2 to 12)** Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor.

**596E. Directed Individual Studies: Acting. (2 to 12)** Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor.

**596F. Directed Individual Studies: Production. (2 to 12)** Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations in Theater Arts. (2 to 8)** Tutorial, to be arranged. May be repeated for a maximum of 12 units. S/U grading.

**598. M.A. Thesis in Theater Arts. (2 to 8)** Tutorial, to be arranged. Preparation: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units. S/U grading.

**599. Ph.D. Dissertation in Theater Arts. (2 to 8)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units. S/U grading.

## Scope and Objectives

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with nonprofit and private companies whose products and services affect the

urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. degree. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, an M.Arch. I in the Department of Architecture and Urban Design, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. Student organizations provide an interesting program of extracurricular activities.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Urban Planning offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Urban Planning.

## Admission

### M.A./Ph.D. in Urban Planning

The department admits students in Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed bulletin and the UCLA Application for Graduate Admission by writing to the Department of Urban Planning, School of Public Policy and Social Research, 3250 Public Policy Building, UCLA, Box 951656, Los Angeles, CA 90095-1656, (310) 825-4025, e-mail: [up-info@spsr.ucla.edu](mailto:up-info@spsr.ucla.edu).

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of

3.0 or B for their junior and senior years. Applicants to the M.A. program are also encouraged to submit Graduate Record Examination (GRE) scores.

The Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination is required for those whose native language is not English, unless at least two years of university-level coursework at an English-language institution have been completed. A score of 600 (paper and pencil test) or 260 (computer-based test) on the TOEFL or overall band score of 7.0 on the IELTS is expected, and applicants with a score below 550 (paper and pencil test) or 220 (computer-based test) on the TOEFL or overall band score of 7.0 on the IELTS are not considered for admission.

For M.A. applicants, work samples such as reports, research papers, and slides are optional. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

Students admitted to the Ph.D. program must have a master's degree in planning or a closely related field. Students in the M.A. program in Urban Planning at UCLA should inform the graduate adviser before December 15 of their second year if they wish to be considered for the Ph.D. program for the following Fall Quarter.

A minimum grade-point average of 3.5 is required in all graduate work completed for consideration for the Ph.D. program. Employment experience in planning or a closely related field is strongly recommended.

Applicants are required to submit two statements of purpose. The first should address how past experiences have shaped the applicant's interest in planning, the applicant's personal career plans, and how a Ph.D. in planning contributes to those plans. The second statement should describe the applicant's intended area of concentration, specific areas of interest in planning, including research interests, and current plans for the dissertation.

Before acceptance into the program, two faculty members must agree to assume responsibility for guiding students in their studies.

### Urban Planning M.A./Architecture M.Arch. I

The Department of Architecture and Urban Design and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for architects interested in specializing in social, economic, and environmental policy issues and for urban planners interested in integrating architecture and urban design into policy and planning practice. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in architecture stresses physical, aesthetic, and

technical issues in the design of buildings and building complexes. In the program, students pursue studies in both schools/departments and receive both the M.Arch. I and the M.A. in Urban Planning at the end of four years.

Students who are interested in the concurrent degree program must apply and be admitted to the M.Arch. I program in the Department of Architecture and Urban Design and to the M.A. program in the Department of Urban Planning. For additional information, contact the graduate advisers in both departments.

### Urban Planning M.A./Latin American Studies M.A.

The Latin American Studies Program and the Department of Urban Planning offer a two and one-half to three-year concurrent degree program leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Further details may be obtained from the graduate advisers in both departments.

### Urban Planning M.A./Law J.D.

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. in Urban Planning degrees at the end of four years.

### Urban Planning M.A./Management M.B.A.

The John E. Anderson Graduate School of Management and the Department of Urban Planning offer a three-year concurrent degree program designed for students who seek careers that draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Application materials should be requested separately from both schools.

## Master's Degree

Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, pro-

fessionally or through research. The areas are not meant to be mutually exclusive. The concentrations are regional and international development, social policy and analysis, environmental policy and analysis, and community development and the built environment. In special circumstances, students may devise their own area in consultation with appropriate faculty members.

The M.A. degree is offered through the comprehensive examination and thesis plans. The comprehensive examination plan offers the option of a client-oriented project in lieu of an examination.

Students must complete a minimum of 72 units of coursework, including 13 graduate courses in urban planning or a related field. Requirements include six core courses and five courses in a selected area of concentration. On entering the program, students must pass proficiency examinations in basic mathematics and microeconomics before enrolling in designated urban planning courses.

Students without substantial prior experience in planning are required to complete a minimum of 300 hours of fieldwork. Fieldwork is defined as clinical or real-world experience with a planning office, a private organization involved in planning, a community action agency, or applied research within a clinical context (excluding conventional university-based research projects).

## Doctoral Degree

Ph.D. students choose a major field by the end of the first quarter in the program. Expertise in the major field is primarily reflected in an ability to teach a sequence of urban planning courses at a major university, from introduction to the field to an advanced research seminar. Within each major field, students should identify two to three subspecializations that reflect their particular interests and approach.

The major fields are history of planning practice, history of planning doctrines, political economy of urban and/or regional development, community development — social, economic, and physical critical studies of cities and regions, comparative social policy, social policy formation (U.S.), public finance of urban services, social services planning, urban transportation planning, housing policy, political economy of the environment, land-use policy and planning, regional resources policy (water, energy, and so forth), pollution and environmental hazards, history of environmental policy, history of the built environment, social policy and the built environment, planning and designing the built environment, comparative international and third world studies — regional development, rural development, urbanization policy, housing policy, resource-based development, and environmental policy.

In special circumstances, students may devise their own field in consultation with appropriate faculty members.

A high level of competence in a major field and in planning theory and history, as measured by coursework and doctoral examinations, is required. In addition, students must satisfy a requirement in research methods and take three related courses in an area outside their major field and a required course in advanced research methods to aid in their preparation for the major field examination.

Written and oral qualifying examinations are required. Following successful completion of the planning theory and history, major field, and research methods requirements, including the written examinations, students take the University Oral Qualifying Examination, which consists of a defense of the dissertation proposal.

## Urban Planning

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Urban Planning. (4)** Seminar, three hours; outside study, nine hours. Prerequisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in urban planning approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**CM128. Global Environment and Development: Problems and Issues. (4)** (Same as Geography M128.) Lecture, three hours; discussion, one hour. Prerequisite: Geography 5. Designed for juniors/seniors. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. Concurrently scheduled with course C266. P/NP or letter grading.

**M149. Transportation Geography. (4)** (Same as Geography M149.) Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

**C184. Looking at Los Angeles. (4)** Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C284. Letter grading.

**CM189. Environmentalism: Past, Present, and Future. (4 to 6)** (Same as Geography M115.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course C265. P/NP or letter grading.

**M190. Human Environment: Introduction to Architecture and Urban Planning. (4)** (Same as Architecture and Urban Design M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

**191. Introduction to Cities and Planning. (4)** Survey of urban history and evolution in the U.S., urban social theory, current growth trends, system of cities, urban economy and economic restructuring, traditional and alternative location theories, urban transportation, and residential location and segregation. P/NP or letter grading.

**192. Urban Policy and Planning. (4)** Examination of current urban planning and policy issues and debates, such as normative theories of good urban form, metropolitan organization and governance, economic development and growth management, edge cities, spatial mismatch hypothesis, urban poverty, racial/ethnic inequality, gender and urban structure, sustainability, and future of cities. P/NP or letter grading.

**193. Special Topics in Urban Policy and Research. (4)** Lecture, three hours. Examination of a particular planning/policy subfield (e.g., economic development, environmental planning, housing and community development, international planning and development, land use, or urban design) in some depth. Specific topic area rotates depending on instructor. May be repeated for credit with topic change. P/NP or letter grading.

**M194. Women and the City. (4)** (Same as Women's Studies M194.) Lecture, three hours. Examination of relationship between women and cities: (1) how cities have affected women's opportunities for economic and social equality, (2) women's contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women's needs and interests. P/NP or letter grading.

**M195. Policy, Planning, and Community. (4)** (Same as Asian American Studies M108B.) Lecture, three hours; field laboratory. Project-oriented methods course on conducting needs assessment in Asian American communities. Geographic information systems to be used to define problems and needs. Letter grading.

**C196. Southern California Regional Economy. (4)** Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and guest lectures by regional experts included. Concurrently scheduled with course C237C. Letter grading.

**197. Planning for Minority Communities. (4)** Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops a comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues which affect implementation.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

## Graduate Courses

**M202A. Public Control of Land Development. (3 to 6)** (Same as Law M286.) Lecture, three hours. Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

**M202C. Seminar: Urban Affairs. (3 to 6)** (Same as Law M526.) Seminar, two hours; two field trips. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antispeculation and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered.

**205. Seminar: Master's Thesis/Comprehensive Examination. (4)** Seminar, three hours. Designed for second-year M.A. students. Preparation for student thesis research and client projects. Through discussion of each other's work, participants learn how to design and implement a research/client project. Administrative issues and common implementation problems. S/U or letter grading.

**M206A. Introduction to Geographic Information Systems. (4)** (Formerly numbered 206A.) (Same as Policy Studies M224A.) Lecture, three hours; laboratory, one hour. Preparation: one graduate-level statistics course, familiarity with one of the packaged statistics programs. Principles of Geographic Information Systems (GIS) and applied techniques of using spatial data for mapping and analysis. Topics include data quality, data manipulation, spatial analysis, and information systems. Use of mapping and spatial analysis to address a planning problem. Letter grading.

**M206B. Advanced Geographic Information Systems. (4)** (Same as Policy Studies M224B.) Lecture, four hours; laboratory, four hours. Prerequisite: course M206A or Policy Studies M224A. Principles and skills of geographic analysis and modeling; managing, processing, and interpreting spatial data. Especially useful for students interested in environmental, demographic, suitability, and transportation-related research. Scripts (Avenue), modeling (Spatial Analyst), network analysis, and transportation modeling (TransCAD). Letter grading.

**207. Public Resource Allocation. (4)** Lecture, three hours. Preparation: passing score on microeconomics examination given first day of class. Practical use of economics in analyzing public resource allocation problems. Topics include review of marginal analysis, difference between equity and efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality.

**208. Seminar: Advanced Research Methods. (4)** Seminar, three hours. Required of Ph.D. students in their first year. Process of developing Ph.D. plan of study in preparation for major field examination. Advanced critical analysis of research methods prominent in social sciences and field of urban planning. S/U grading.

**209. Special Topics in Planning Theory. (2 to 8)** Seminar, three hours. Topics in planning theory selected by faculty. May be repeated for credit.

**210A. Introduction to Planning Theory. (4)** Lecture, three hours. Historical introduction to major ideas and theories of planning which have influenced its development from the early 19th century to the present. Letter grading.

**210B. Comparative History of Planning Practice. (4)** Lecture, three hours. Limited to Ph.D. and advanced M.A. students. History of city planning, its critics, and profession of planning through the 19th and 20th centuries. Comparison of evolution of the field in several countries, especially English-speaking countries.

**210C. Colloquium in Planning Theory. (4)** Lecture, one hour; discussion, two hours. Prerequisite: course 210A. Limited to Ph.D. students. Introduction to some central theoretical issues of contemporary planning.

**211. Law and the Quality of Urban Life. (4)** Lecture, three hours. Introduction to law as an urban system, directed primarily toward those interested in intersection of law and policy: broad array of urban issues examined, as is law's role as a partial cause and cure of urban problems. Examination of law as a changing process rather than a collection of principles, so that students develop facility to interact with law and lawyers in a positive and forceful manner.

**214. Ethics in Planning. (4)** Examination of ethical dimensions of planning at many levels, including issues of bribery and corruption, aspects of client/sponsor and employer/employee relationships, collection, use, and release of information, and ethical aspects of administrative discretion. Ethical aspects of planning methods, concept of environmental ethics, and evolution of code of ethics in planning profession.

**M215. Spatial Statistics. (4)** (Same as Geography M272.) Lecture, two hours; discussion, one hour; laboratory, one hour. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

**217A-217B. Comprehensive Planning Project. (4-4)** Seminar, three hours. Designed for second-year students. Comprehensive project brings together students of varying backgrounds and interests in joint solution of an urban planning problem. Each project spans two terms. Successful completion of project meets requirements of Comprehensive Examination Plan A of master's program. S/U grading.

**218. Graphics and Urban Information. (4)** Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of the built environment. Development of fundamental skills of graphic ideation and communication. Letter grading.

**219. Special Topics in the Built Environment. (2 to 8)** Seminar, three hours. Topics in the built environment selected by the faculty. May be repeated for credit.

**220A. Quantitative Analysis in Urban Planning I. (4)** Lecture, three hours. Preparation: passing score on basic mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as a tool in analysis of planning-related data.

**220B. Quantitative Analysis in Urban Planning II. (4)** Lecture, three hours. Prerequisite: course 220A or equivalent as demonstrated by passing score on mathematics proficiency examination given first day of course 220A. Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, analysis of variance, correlation, and simple and multiple regression. Use of computer as a tool in statistical analysis and modeling.

**221. Evaluation Methods. (4)** Lecture, three hours. Prerequisites: courses 207, 220A. Examination of methods used to evaluate efficiency and effectiveness of government programs and investment projects. Theory and practice of evaluation, with emphasis on techniques of cost-effectiveness analysis, cost-benefit analysis, discounting, sensitivity analysis, target efficiency, fiscal audits, and evaluation design.

**222. Introduction to Histories and Theories of Urban Planning. (4)** Lecture, 90 minutes; discussion, 90 minutes. Exploration of planning thought and practice over time, leading authors and key issues in field of planning, traditional and insurgent histories of planning, and alternative approaches to planning for multiple and pluralistic publics. Generally taken Fall Quarter of first year of M.A. program. Letter grading.

**223. Professional Development Seminar. (4)** Seminar, 90 minutes; discussion, 90 minutes. Recommended preparation: course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's fieldwork experience. Students must be working in a field setting to enroll. Job fair is held at end of Fall Quarter to place students in field settings. Students combine course 223 with one term of course 496 to meet fieldwork requirement. Letter grading.

**229. Special Topics in Planning Methods. (2 to 8)** Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

**M230. Introduction to Regional Planning: Evolution of Regional Planning Doctrines. (4)** (Formerly numbered M232A.) (Same as Policy Studies M241.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space. Letter grading.

**M231. Regional Development, Urbanization, and Industrial Policy. (4)** (Formerly numbered M234.) (Same as Policy Studies M242.) Lecture, three hours; outside study, nine hours. Survey of regional development, with special reference to "new economic geography" and its relevance for formulation of local economic development policies. Letter grading.

**233. Political Economy of Urbanization. (4)** Introduction to basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and role of urban social movements.

**234A. Development Theory. (4)** (Formerly numbered 266.) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonialism, capitalism, and socialism on various urban and rural social and economic structures in the Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses 234B, M234C, and many of the other planning courses addressing Third World issues. Letter grading.

**234B. Rural Development Issues. (4)** (Formerly numbered 267B.) Lecture, three hours. Recommended preparation: course 234A. Development more thoroughly of themes raised in earlier courses. Topics may include peasantries, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor. Letter grading.

**M234C. Resource-Based Development. (4)** (Formerly numbered M267A.) (Same as Geography M229.) Discussion, three hours. Recommended preparation: course 234A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

**235A-235B. Urbanization in Developing World I, II. (4-4)** Lecture, 90 minutes; discussion, 90 minutes. Requisite for course 235A: course 234A; for course 235B: course 235A. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates. Letter grading.

**M236A. Theories of Regional Economic Development I. (4)** (Same as Policy Studies M240.) Lecture, three hours; laboratory, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Letter grading.

**236B. Theories of Regional Economic Development II. (4)** Lecture, three hours. Requisite: course M236A. Application of theories of regional economic development, location, and trade learned in course M236A to contemporary process known as globalization. Examination of nature and effects of globalization on development, employment, and social structure, along with implications for policy. Letter grading.

**236C. Regional World: Territorial Development in Global Economy. (4)** Lecture, three hours. Requisite: course 236B. Advanced course in regional development examining changes in organization of economic systems, their geographies, and scale at which local, national, and international economies operate. Emphasis on importance of rules, information exchanges, and institutional and cognitive processes. Letter grading.

**237A. Sectoral Analysis. (4)** (Formerly numbered 206B.) Lecture, three hours; laboratory, one hour. Introduction to methods and procedures of sectoral investigation as applied to regions, industries, companies, and their labor forces. Current theories and conceptions of industrial structure and industrial change. Investigation of characteristics and trends of industry subsectors in Los Angeles resulting in industry profile that can serve as aid to planning and shaping economic development. Letter grading.

**237B. Urban and Regional Economic Development Applications. (4)** Lecture, three hours. Survey and analysis of economic development strategies in the U.S. Because economic development strategies seek to modify or shape existing conditions, focus on how policies attempt to harness dynamics associated with new forms of industrialization, intensified global competition, and interrelationships among capital, labor, and the state. Letter grading.

**C237C. Southern California Regional Economy. (4)** Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and guest lectures by regional experts included. Concurrently scheduled with course C196. Letter grading.

**238. Advanced Seminar: Urban and Regional Development. (4)** Seminar, two hours; discussion, two hours. Designed for Ph.D. students. Advanced research seminar on major issues in urban and regional development theory and/or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit.

**239. Special Topics in Urban and Regional Development Policy. (2 to 8)** Seminar, three hours. Topics in urban and regional development policy selected by faculty. May be repeated for credit.

**M240. Local Government. (2 to 6)** (Formerly numbered M202B.) (Same as Law M285.) Lecture, three hours. Analysis of structure and function of local, regional, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability. Letter grading.

**M241. Foundations of Social Welfare Policy. (4)** (Same as Policy Studies M210 and Social Welfare M221A.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

**M243. Privatization, Regulation, and Public Finance. (4)** (Same as Policy Studies M293.) Lecture, three hours; outside study, nine hours. Requisite: Policy Studies 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

**245. Urban Public Finance. (4)** Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

**M246. Poverty, the Poor, and Welfare Reform. (4)** (Same as Policy Studies M214 and Social Welfare M290L.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

**247. Race, Gender, Culture, and Cities. (4)** Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their policy implications. Topics relate the new diversity and gender with global restructuring, new urban economy, and policies of workplace, housing, schools, and governance.

**M248. Law and the Poor. (4)** (Same as Law M215, Policy Studies M295, and Social Welfare M290R.) Lecture, three hours. Designed for graduate students. Study of major income-maintenance programs in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

**249. Special Topics in Social Policy and Analysis. (2 to 8)** Seminar, three hours. Topics in social policy and analysis selected by faculty. May be repeated for credit.

**250. Introduction to Social Policy. (4)** Lecture, three hours. Analysis of demographic changes, history, needs, and ideological debates which affect development of social policy in the U.S., compared with Western Europe.

**251. Planning for Multiple Publics. (4)** Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in first year.

**252. Social Impact Analysis. (4)** (Formerly numbered 256.) Lecture, three hours. Exploration of ways of assessing and determining social impacts on communities resulting from large-scale planning projects. Students develop mitigation measures to address identified adverse consequences. S/U or letter grading.

**253. Survey Methods in Planning. (4)** (Formerly numbered 254.) Lecture, three hours. Requisite: course 220B. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning: questionnaire development, sample design, interviewing, data processing, and analysis. Presentation of survey to planners or public agencies. S/U or letter grading.

**M254. Transportation, Land Use, and Urban Form. (4)** (Formerly numbered M286.) (Same as Policy Studies M220.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form. Letter grading.

**M255. Transportation Planning. (4)** (Formerly numbered 255.) (Same as Policy Studies M244.) Lecture, three hours. Examination of how planners analyze, manage, and operate transportation systems. Measuring system performance, intelligent transportation systems, transportation system demand management, parking management, freight movement and facilities, public transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled. Letter grading.

**M256. Travel Behavior Analysis. (4)** (Formerly numbered M287.) (Same as Policy Studies M221.) Lecture, three hours. Requisites: courses 207 and 220B, or Policy Studies 201 and 203. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

**M257. Transportation Economics, Finance, and Policy. (4)** (Formerly numbered M289.) (Same as Policy Studies M222.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services. Letter grading.

**M258. Transportation and Environmental Issues. (4)** (Formerly numbered M290.) (Same as Policy Studies M223.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate. Letter grading.

**M259. Advanced Real Estate Development for Planners and Architects. (4)** (Same as Architecture and Urban Design M259.) Discussion, three hours. Requisite: course 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

**260. Environmental Politics and Governance. (4)** (Formerly numbered 260A, 260B.) Lecture, three hours. Environmental planning is more than simply finding problems and fixing them. Each policy must be negotiated and implemented within multiple, complex systems of governance. Institutions and politics matter deeply. Overview of how environmental governance works in practice and how it might be improved. Letter grading.

**261. Land-Use Control: Economic and Structural Perspectives. (4)** Lecture, two hours; discussion, one hour. Requisites: courses 260A, 260B. Comparison of regulatory methods of land-use control to command or planning methods. Basics of land use as a commodity in first part: land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

**M262A. Toxics Reduction: Science, Engineering, and Policy Issues. (4)** (Same as Chemical Engineering M290U and Environmental Health Sciences M249.) Lecture, three hours. Requisites: courses 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. Letter grading.

**262B. Urban Environmental Problems: Water Resources. (4)** Lecture, three hours. Water is life and wealth in California, which has world's most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and consideration of resource planning.

**M262C. Pollution Prevention. (2)** (Same as Environmental Health Sciences M239.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

**263. Natural Resource Conservation. (4)** Discussion, three hours. Requisites: courses 260A, 260B. Exploration, through reading, discussion, and student presentations, of meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness).

**M264. Environmental Law. (3 to 6)** (Same as Law M290.) Lecture, three to three and one-half hours. Examination of the field of environmental law through analysis of various legal issues and public policy; legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

**C265. Environmentalism: Past, Present, and Future. (4 to 6)** Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course CM189. S/U or letter grading.

**C266. Global Environment and Development: Problems and Issues. (4)** (Formerly numbered C252.) Lecture, three hours; discussion, one hour. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. Concurrently scheduled with course CM128. S/U or letter grading.

**M267. Environmental and Resource Economics and Policy. (4)** (Formerly numbered M280.) (Same as Policy Studies CM250.) Lecture, three hours. Requisites: courses 207 and 220B, or Policy Studies 204 and 208. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Letter grading.

**268. Advanced Seminar: Environmental Analysis and Policy. (4)** Discussion, three hours. Generally designed for second-year M.A. and Ph.D. students. Exploration of broad issues related to environmental and resource planning. May be repeated for credit.

**269. Special Topics in Environmental Analysis and Policy. (2 to 8)** Seminar, three hours. Topics in environmental analysis and policy selected by faculty. May be repeated for credit.

**M270. Homelessness: Housing and Social Service Issues. (4)** (Formerly numbered 270.) (Same as Social Welfare M206A.) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless. Letter grading.

**271. Community Economic Development. (4)** (Formerly numbered 236C.) Lecture, three hours. Requisite: course 236B. Introduction to fundamentals of community economic development and neighborhood development strategies. Overview of basic approaches, important concepts, resources and language of the field, and major strategies for revitalization of low-income neighborhoods. Letter grading.

**M272. Real Estate Development and Finance. (4)** (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours; outside study, eight hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests. S/U or letter grading.

**273. Site Planning. (4)** Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urban areas.

**274. Introduction to Physical Planning. (4)** Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning, land use, site analysis, and surveys; general plans and community plans; environmental review; zoning and ordinances; social impacts.

**M275. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits. (4)** (Formerly numbered 275.) (Same as Policy Studies M243 and Social Welfare M290U.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is the problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

**M276. Urban Housing and Community Development. (3 to 4)** (Formerly numbered M231.) (Same as Law M287.) Lecture, three hours; discussion, one hour. Examination of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant law, urban renewal, and community organizing. Research paper required. Letter grading.

**277. Historic Preservation: Principles and Practices. (4)** Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues.

**278. Qualitative Research Methods for Planners and Designers. (4)** Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include students' own research.

**279. Seminar: Public Space. (4)** Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of socioeconomic, political, and cultural factors that lie behind them. Letter grading.

**280. Nonprofit Development. (4)** (Formerly numbered 216.) Discussion, three hours. Overview of basic concepts and skills utilized in nonprofit development initiatives, especially by community-based organizations. Focus on nonprofit provision of subsidized housing, emphasizing way professionals "broker" debt and equity funding from private, governmental, and philanthropic sources. Use of client projects and negotiation exercises. S/U or letter grading.

**281A. Introduction to History of the Built Environment in the U.S. (4)** Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments.

**281B. Advanced Seminar: History of the Built Environment. (4)** Discussion, three hours. Requisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S.

**282. Urban Design: Theories, Paradigms, Applications. (4)** Lecture, three hours. Discussion and evaluation of philosophical bases, ideologies, and paradigms of urban design in last century; examination of how these are reflected on the built environment of cities. Letter grading.

**283. History of the American Household and American Home. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 281A. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers.

**C284. Looking at Los Angeles. (4)** Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C184.

**285. Women and Community Development: Great Gender Debates. (4)** Seminar, 90 minutes; discussion, 90 minutes. Relationship between planning, community development, and women, with attention to interaction of gender, race, and class/ethnicity. Examples from domestic and international developments. Alternative theories and methods to close gaps between household needs and urban policies. Preparation of written and oral critical reviews of literature and research paper. Letter grading.

**M286. Management Challenges and Tools for Nonprofit Sector. (4)** (Same as Policy Studies M226 and Social Welfare M290V.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Fundamental building blocks for successful management in nonprofit sector. Students develop management skills in strategic thinking/problem solving, project management, team building, and negotiation. Use of case studies to troubleshoot critical challenges, from finance to crisis management to marketing, that nonprofit managers typically face. Letter grading.

**M287. Nonprofit Sector, State and Civil Society. (4)** (Same as Policy Studies M227 and Social Welfare M290S.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in the U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between the U.S. and other countries. Letter grading.

**M288. Leadership, Development, and Governance of Nonprofit Organizations. (4)** (Same as Policy Studies M228 and Social Welfare M241E.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

**298. Special Topics in Emerging Planning Issues. (2 to 4)** Discussion, two to three hours. Topics in newly emerging planning issues such as role of cutting edge technology, innovative policies, and experimental programs. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**M404. Joint Planning/Architecture Studio. (4)** (Same as Architecture and Urban Design M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

**M470. Introduction to Occupational and Environmental Health Education. (2 or 4)** (Same as Community Health Sciences M470.) Lecture, three hours. Preparation: at least three social sciences courses. Designed to provide students with understanding of problem areas of occupational and environmental health and health education interventions which can be applied. Letter grading.

**496. Field Projects. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Research in Planning. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

**598. Preparation for M.A. Thesis in Urban Planning. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

**599. Ph.D. Dissertation Research in Planning. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

## URBAN STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
4256 Bunche Hall  
Box 951472  
Los Angeles, CA 90095-1472  
(310) 825-3862  
<http://www.polisci.ucla.edu/>

Eric H. Monkkonen, Ph.D., *Chair*

### Faculty Advisory Committee Professors

Bryan C. Ellickson, Ph.D. (*Economics*)  
Eric H. Monkkonen, Ph.D. (*History*)

### Assistant Professors

Brian Taylor, Ph.D. (*Urban Planning*)  
Jan Reiff, Ph.D. (*History*)

## Scope and Objectives

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Urban Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

## Undergraduate Study

### Urban Studies Specialization

Students may elect to combine the Urban Studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in Urban Studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Political Science 40; Psychology 10; Sociology 1, M18, 104 or equivalent.

### Upper Division Requirements

*Required:* Nine upper division courses, including (1) at least three courses outside the major department selected from Anthropology 167, Economics 120, Geography 150, Psychology 168, Sociology 158; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 130, 133; Geography 150, 156; History 154A through 154D; Political Science 143A, 143B, 167B; Psychology 127, 135; Sociology 132, 156, 160; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in an urban governmental or community service organization.

Professor Eric H. Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

Robert B. Smith, M.D., *Vice Chair*

### Director

Mark S. Litwin, M.D., M.P.H., *Director of Medical Student Education*

## Scope and Objectives

The fundamental goal of the Department of Urology is to teach medical students the general principles of diagnosis and management in diseases of the genitourinary tract. Urology encompasses a wide scope of human illness, including conditions that are congenital and acquired, pediatric and adult, male and female, malignant and benign. The department functions to acquaint students with the skills necessary to manage these conditions in the initial stages and over the long term.

Instruction spans all four years of the undergraduate medical school curriculum but is concentrated during the clinical rotations. Students spend one week on the urology service during the third year and may return for an additional four-week elective rotation during the fourth year. The clinical experience includes time spent in the faculty and resident clinics, on ward rounds, and in didactic conferences that cover general urology, urological subspecialties, uropathology, and uroradiology. Urology teaching settings include the UCLA, Harbor-UCLA, Olive View-UCLA, UCLA-Santa Monica Hospital, and West Los Angeles VA Medical Centers.

For further details on the Department of Urology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Sondra Hale, Ph.D. (*Anthropology*)

#### Adjunct Associate Professor

Jacqueline D. Goodchilds, Ph.D. (*Psychology*)

#### Adjunct Assistant Professor

Fridelle Spiegel, Ph.D. (*History*)

## Scope and Objectives

The Women's Studies Program, established in 1975, provides interdisciplinary academic programs that span departments, disciplines, and ideologies. The undergraduate program offers a Bachelor of Arts degree and a minor; the graduate program offers the Master of Arts and Ph.D. degrees.

The programs provide students the opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied — women in their racial, class, sexual, and cultural diversity. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power, asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Emphasis on multidisciplinary and multiethnic approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women's studies offers unique contextual validation for today's gender controversies and prepares students for a wide range of career and life choices.

The core faculty members who teach women's studies courses come from various UCLA departments and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. A governance committee composed of the chair, faculty members, and a student representative sets program policies and curricula.

The program sponsors two student associations and assists other student groups with extracurricular programming on feminist issues. Research in women's studies is promoted in cooperation with the Center for the Study of Women.

## Undergraduate Study

### Women's Studies B.A.

The interdisciplinary major in Women's Studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

#### Admission

To be admitted to the major, students must have completed Women's Studies 10, be in good standing, and formally register with the program. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Students are encouraged to draw on the University's diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

All courses applied toward the major must be taken for a letter grade, and students must have a grade-point average of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which they receive a grade of C– or lower may not be applied toward the core requirements in the major.

#### Preparation for the Major

*Required:* Women's Studies 10. Students must also complete departmental lower division requisites, as applicable, for upper division women's studies courses in the disciplines.

#### Transfer Students

To be admitted as Women's Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one feminist perspectives on women and society course and departmental lower division requisite courses.

#### The Major

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable students to acquire a depth of knowledge within one or two disciplinary or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

*Required:* At least 13 upper division courses as follows:

1. Three core courses, including (a) one feminist theory course from Women's Studies 110A or 110B or M192, (b) course 130 or one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued

each term by the program, and (c) course 197 (departmental 197 courses may not be applied)

2. A distribution of at least four courses, each from a different department or discipline, selected from the approved list of women's studies courses
3. Six additional concentration courses from one or two of the disciplines in which the core and distribution courses have been taken. Students may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women's health, or lesbian studies. If two fields are selected, the ratio of the six courses may be divided 3-3 or 4-2

Four units of Women's Studies 199 may be applied toward the concentration requirement for the major. This limit does not apply to Women's Studies 199HA or 199HB.

## Honors Program

The honors program is open to advanced junior and senior Women's Studies majors with a 3.4 grade-point average in women's studies courses and a minimum 3.0 overall GPA who have no outstanding incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the program chair for approval. Students wishing to undertake honors in the major are advised to complete Women's Studies 197 by Spring Quarter of the junior year.

To be eligible for honors at graduation, students must successfully complete course 197 and two successive terms of independent studies (courses 199HA, 199HB) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 199HA may be applied toward the concentration requirement; course 199HB is in addition to the minimum required concentration courses. Further information is available from the undergraduate counselor in the program office.

## Women's Studies Minor

The Women's Studies minor augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the Women's Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 240 Kinsey Hall. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

*Required Lower Division Course (4 units):* Women's Studies 10.

*Required Upper Division Courses (28 units):* One feminist theory course from Women's Studies 110A or 110B or M192; 120 or 197 or an equivalent senior research seminar approved in advance; and five elective courses

from the approved list of women's studies courses issued each term by the program. At least three elective courses must be taken in departments other than the major department. No more than 4 units of any 199 course may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Courses in which students receive a grade of C- or lower may not be applied toward the core requirements in the minor. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Women's Studies Program offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Women's Studies.

### Admission

Applicants to the M.A. and Ph.D. programs must submit the *UCLA Application for Graduate Admission* and meet the requirements of the Graduate Division. In addition to University requirements for admission, scores on the Graduate Record Examination (GRE) General Test are required.

### Master's Degree

For major fields, see Doctoral Degree.

The M.A. degree is offered through the thesis plan. At least 10 courses (40 units) are required, at least nine (36 units) of which must be graduate courses. Coursework includes four required graduate courses in women's studies, including 4 units of independent study, one course in research methods in the student's field of emphasis or another course for training in research, and 20 units of electives selected from a designated group of courses.

### Doctoral Degree

Major fields include feminist theory, women and health, sexuality, comparative gender roles, and women of color.

Ph.D. students are required to complete the 40 units of coursework required for the M.A. degree and 20 additional units, including 12 units of dissertation research. A maximum of 8 units of upper division coursework may be applied toward the degree, including the 4 units allowed for the M.A. degree. Eight elective units

are selected based on the designated specialization and the need for additional courses in research methods. At the discretion of the adviser and in consultation with the student additional work in research methods, including a course in statistical methods, may be required depending on the student's specialization.

Written and oral qualifying examinations are required. The written field examination consists of two parts: a section covering general knowledge of feminist theory, methods, and pedagogy (breadth) and a section covering the student's area of specialization (depth).

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which focuses on the dissertation proposal in relation to the student's specialization.

There is a language requirement for this degree.

## Women's Studies

### Lower Division Course

**10. Introduction to Women's Studies: Feminist Perspectives on Women and Society. (4)** Lecture, two and one-half hours; discussion, one hour. Introduction to study of women and men in society, covering comparative issues of social, political, and economic position in the workplace, family, cultural institutions; historical basis of women's subordination; the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change. P/NP or letter grading.

### Upper Division Courses

#### Core Courses

**110A. Feminist Theories in Social Sciences. (4)** Lecture/discussion, three hours. Requisite: course 10. Multidisciplinary explorations of theorists' attempts to describe, explain, and critique social institutions, considering impact of race, ethnicity, class, etc. Emphasis on relation of theories to change in law, work, politics, education, economics, family, religion, sexuality, etc. Applications of theories to research questions and methodologies. P/NP or letter grading.

**110B. Feminist Theories in the Humanities. (4)** Lecture/discussion, three hours. Requisite: course 10. Examination of theoretical positions on gender and women in study of literature and the arts. Analysis of ways in which women and sexuality have been represented in cultural production, considering impact of race, ethnicity, class, etc. Applications of theories to research questions and methodologies. P/NP or letter grading.

**197. Senior Research Seminar. (4)** Seminar, three hours. Requisites: courses 10, and 110A or 110B. Designed for advanced junior/senior Women's Studies majors or minors. In-depth study of a major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. P/NP or letter grading.

#### Supporting Courses

**M101A. Lesbian and Gay Literature before Stonewall. (5)** (Same as English M101A and Lesbian, Gay, Bisexual, and Transgender Studies M101A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English from earlier periods through the 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, Virginia Woolf, James Baldwin, Christopher Isherwood, William S. Burroughs, John Rechy, Audre Lorde, and Edward Albee. P/NP or letter grading.

**M101B. Lesbian and Gay Literature after Stonewall. (5)** (Same as English M101B and Lesbian, Gay, Bisexual, and Transgender Studies M101B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English since 1969, year of Stonewall Riots in New York City, commonly recognized as beginning of modern lesbian and gay culture. Works by such authors as Adrienne Rich, Jane Rule, Maureen Duffy, Brigid Brophy, Larry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, Alan Hollinghurst, and Emma Donahue. P/NP or letter grading.

**M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4)** (Same as Gerontology M104C and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

**105. Topics in Women and Medicine. (4)** Lecture/discussion, three hours. Examination of medical conditions of women in context of issues that impact women's health, health care, and health care providers. Discussion of basic health concepts and self-care; consideration of a women's health speciality and ways to deliver health care to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading.

**M106. Imaginary Women. (4)** (Same as Honors Collegium M106.) Seminar, four hours. Designed for juniors/seniors. Study of four female cultural archetypes — absconding wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

**M107A. American Women Writers. (5)** (Same as English M107A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women. P/NP or letter grading.

**M107B. British Women Writers. (5)** (Same as English M107B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women. P/NP or letter grading.

**M107C. Special Topics in Women and Literature. (5)** (Same as English M107C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping. P/NP or letter grading.

**M108. Love and Sex in German Literary Tradition. (4)** (Same as German M108.) Lecture, three hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

**M109. Women in Jazz. (4)** (Same as Afro-American Studies M109 and Ethnomusicology M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

**112. Special Topics in Women and the Arts. (4)** (Formerly numbered M112.) Lecture, three hours. Requisite: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward Women's Studies major. P/NP or letter grading.

**M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (4)** (Formerly numbered M14.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgendered people; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

**M115. Topics in Study of Sexual and Gender Orientation. (4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M115.) Lecture/discussion, three hours. Requisite: course 10 or M114. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit. Letter grading.

**M116. Sexuality and the City: Queer Los Angeles. (4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M116.) Lecture, three hours. Requisite: course M114. Investigation of history, culture, and political economy of lesbian, gay, bisexual, and transgender Los Angeles. Letter grading.

**M117. Women and Politics. (4)** (Same as Political Science M107.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to rapidly growing body of empirical and theoretical scholarship on women and politics in both national and international contexts. Topics may include women's movement in the U.S. and globally; women's electoral participation; representation of women in Congress and in legislatures worldwide; women as heads of government and state; feminist critiques of political science; women and human rights; ERA; struggle for suffrage; mothers as political actors; women and the military; women, development, and globalization. P/NP or letter grading.

**M119. Tristan, Isolde, and History of Heterosexuality. (4)** (Same as German M104.) Lecture, three hours. German, French, and English versions of Tristan and Isolde story from Middle Ages to the 20th century. Particular attention to relation between representation of "heterosexual" love in each text and contemporaneous ideas about human sexuality. P/NP or letter grading.

**120. Internship in Women's Studies. (4)** Seminar, three hours; internship, eight hours. Preparation: at least two upper division women's studies courses. Requisites: courses 10, 110A or 110B. Field studies course combining seminar with field placement. Practical experience in working on women's issues and connecting these experiences to methodological and theoretical themes explored in course 110A or 110B. Letter grading.

**M123. International Political Economy of Work and Gender. (4)** (Same as Economics M158.) Lecture, three hours. Requisite: Economics 1 or 5 or 100. Analysis of women's economic status in world economy by taking account of interdependencies between household and market activities and between economic systems and legal and political institutions. Introduction of alternative theoretical approaches in social sciences; presentation of empirical evidence. Letter grading.

**125. Women and Health Care in the U.S. (4)** Lecture/discussion, three hours. Requisite: course 10. Examination in depth of various ways women provide health care in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of health care. P/NP or letter grading.

**M127. Women in Russian Literature. (4)** (Same as Russian M127.) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers. P/NP or letter grading.

**M128. Roots of Patriarchy: Ancient Goddesses and Heroines. (4)** (Formerly numbered 128.) (Same as Honors Collegium M118.) Lecture, three hours. Examination of ancient goddesses and heroines — European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

**130. Women of Color in the U.S. (4)** Lecture/discussion, three hours. Requisite: course 10. Exploration of experiences of African American, Asian American, Chicana, and Native American women in order to assess intersections of race, ethnicity, class, and gender. Contemporary and/or historical and/or theoretical perspectives on racism and its relation to feminism as defined by women of color. P/NP or letter grading.

**M132A. Chicana Feminism. (4)** (Same as Chicana and Chicano Studies M110.) Lecture, three hours. Requisite: course 10. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women. P/NP or letter grading.

**M132B. Contemporary Issues among Chicanas. (4)** (Same as Chicana and Chicano Studies M154.) Lecture, two and one-half hours. Requisite: course 10. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas. P/NP or letter grading.

**M133. Chicana Lesbian Literature. (4)** (Same as Chicana and Chicano Studies M133 and Lesbian, Gay, Bisexual, and Transgender Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of familia in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies. Letter grading.

**134. Gender, Science, and Theory. (4)** Lecture, three hours. Requisite: course 10. Examination of differing theoretical perspectives on relation between ideologies of gender and conceptualization and practice of science and medicine. Study of relations among gender, race, class, and sexual orientation and production and legitimation of scientific knowledge. Applications of theoretical critiques to research design, practice, and interpretation. Letter grading.

**135. Women in Physics and Mathematics. (4)** Lecture, two and one-half hours. Examination of lives and scientific contributions of five women of the 20th century — Lise Meitner, discoverer of nuclear fission; Emmy Noether, mathematician; Maria Goeppert Mayer, discoverer of nuclear shell model; Dorothy Crowfoot Hodgkin, X-ray crystallographer and organic chemist; and Chien-Shiung Wu, nuclear physicist. P/NP or letter grading.

**M136. Music and Gender. (4)** (Same as Music History M136.) Lecture, four hours. Analysis of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods in feminist and gay/lesbian theory and criticism. Letter grading.

**M137E. Work Behavior of Women and Men. (4)** (Same as Psychology M137E.) Lecture, two and one-half hours. Requisite: course 10 or Psychology 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles. P/NP or letter grading.

**M137J. Psychology of Language and Gender. (4)** (Same as Communication Studies M124 and Psychology M137J.) Lecture, three hours. Requisite: Psychology 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction. P/NP or letter grading.

**139. Women and Art in Contemporary U.S. (4)** Lecture/discussion, three hours. Requisite: course 10. Exploration of some significant cultural issues of contemporary American women's art movement. Representation, resistance, and critical intervention in relation to gender, race, and class. Emphasis on visual and performance arts as these reflect various perspectives of feminism. Letter grading.

**M140. Women's Studies in French Literature. (4)** (Same as French M140.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc. P/NP or letter grading.

**M141. Women, Health, and Aging: Policy Issues. (4)** (Same as Gerontology M141 and Health Services CM141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

**142. Maya Women and Contemporary Social Change. (4)** Seminar, three hours. Requisite: course 10. Survey of recent literature on Maya culture in Chiapas, Mexico, and Guatemala. Examination of culture change through study of women as social actors, participating in political, economic, and religious change. Letter grading.

**CM143. Women Healers, Ritual, and Transformation. (4)** (Same as World Arts and Cultures CM140.) Lecture, four hours. Designed for juniors/seniors. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM243. P/NP or letter grading.

**M148. Women in Higher Education. (4)** (Same as Education M148.) Lecture, three hours. Designed for juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation. P/NP or letter grading.

**M151. Marriage, Family, and Kinship. (4)** (Same as Anthropology M151.) Lecture, three hours. Requisite: Anthropology 9. Examination of understandings of kinship in cross-cultural perspective and impact of kinship on interpersonal relationships, gender roles, and socio-cultural systems. Readings from popular materials and formal ethnographic accounts. P/NP or letter grading.

**M153. The Media and Aggression against Women. (4)** (Same as Communication Studies M153.) Lecture, two hours; discussion, two hours. Requisite: Communication Studies 152. Study of the growing body of literature on relationship between mass media and aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media. Letter grading.

**M154P. Gender Systems: North American. (5)** (Same as Anthropology M154P.) Lecture, three hours; discussion, one hour; fieldwork, three hours. Requisite: course 10. Designed for junior/senior social sciences majors. Comparative study of women's lives and gender systems in North American cultures from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case study, and student fieldwork, internship, and presentation. P/NP or letter grading.

**M154Q. Gender Systems: Global. (4)** (Same as Anthropology M154Q.) Lecture, three hours. Requisite: course 10. Designed for junior/senior social sciences majors. Comparative study of gender systems globally from an anthropological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relationship of gender to the state, and colonialism and resistance movements. P/NP or letter grading.

**M155. Women's Voices: Their Critique of Anthropology of Japan. (4)** (Same as Anthropology M155.) Lecture, three hours. Preparation: introductory sociocultural anthropology course. The anthropology of Japan has long viewed Japan as a homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

**M155Q. Women and Social Movements. (4)** (Same as Anthropology M155Q.) Lecture/discussion, three hours. Recommended preparation: prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

**M158. Women in Italian Culture. (4)** (Same as Italian M158.) Lecture, three hours; discussion, one hour. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

**M159. Pornography and Evolution. (4)** (Same as Communication Studies M159.) Lecture, three hours. Discussion of theories and research on why pornography exists and its effects. Use of topic to illustrate value of evolutionary theory to social sciences generally. Letter grading.

**M162. Sociology of Gender. (4)** (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Requisite: course 10 or Sociology 1. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

**M163. Gender and Work. (4)** (Same as Sociology M163.) Lecture, three hours. Requisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.

**M164. Politics of Reproduction. (4)** (Same as Sociology M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, surrogacy, and new reproductive technologies. Letter grading.

**M165. Psychology of Gender. (4)** (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

**M166. Women in Socialist and Post-Socialist States. (4)** (Same as Sociology M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender differences are everywhere central to democratization and marketization. Discussion of ways in which state policies affect women. Letter grading.

**M167. Contested Sexualities. (4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167 and Sociology M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

**M170. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (4)** (Same as Comparative Literature CM170.) Seminar, three hours. Designed for upper division literature majors. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. P/NP or letter grading.

**171. Jurisprudence of Sexual Equality. (4)** (Formerly numbered 170.) Lecture, four hours. Requisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 9. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique. P/NP or letter grading.

**M172. The Afro-American Woman in the U.S. (4)** (Same as Afro-American Studies M172 and Psychology M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group. P/NP or letter grading.

**M173. Interracial Work, Friendship, and Love Relationships of African American Men and Women. (4)** (Same as Afro-American Studies M175.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

**M174. Sociology of the Family. (4)** (Same as Sociology M174.) Lecture, four hours. Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.

**M177. The Military and Society. (4)** (Same as Sociology M177.) Lecture, three hours; discussion, one hour. Examination of the military as an organization and profession: personnel issues such as family, class, race, gender, and sexual orientation and postmodern military issues such as civil/military relations, media coverage, peacekeeping operations, and the future of war. P/NP or letter grading.

**185. Special Topics in Women's Studies. (4)** (Formerly numbered 185A-185Z.) Lecture, three hours. Preparation: one prior women's studies course. Designed for juniors/seniors. Specialized or advanced study in an area within women's studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

**M186. Voices of Women in Scandinavian Literature. (4)** (Same as Scandinavian CM186.) Discussion, three hours. Requisite: Scandinavian 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. P/NP or letter grading.

**M187. Violence against Women. (4)** (Same as Social Welfare M108.) Lecture, three hours. Requisites: courses 10, 110A. Factual information and theoretical analyses regarding various forms of violence against women and girls in their homes, workplaces, and communities through critical examination of social structures and social science research. Letter grading.

**188. Women and Economic Development. (4)** Lecture, three hours. Requisite: course 10. Examination of effects of economic development on women, with primary focus on Third World and transition economies of Eastern Europe and former Soviet Union, including roles of women in policy and practice, disparate effects by economic sector, and socioeconomic groups. Letter grading.

**M190. Bilingual Writing Workshop. (4)** (Same as Chicana and Chicano Studies M190.) Seminar, four hours. Requisite: Chicana and Chicano Studies 10A or 10B. Writing sample required; access to course webpage mandatory. Technical instruction, analysis, and theoretical discussion of bilingual creative expression, with focus on specific genre (i.e., autobiography, poetry, fiction). Emphasis on memory, identity, gender, and sexuality. Central theme of bilingualism as politics and aesthetics. Peer critique of weekly writing assignments. Letter grading.

**M192. Philosophical Analysis of Issues in Feminist Theory. (4)** (Same as Philosophy M192.) Lecture, three hours. Requisite for Women's Studies majors: course 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor. Letter grading.

**M194. Women and the City. (4)** (Same as Urban Planning M194.) Lecture, three hours. Examination of relationship between women and cities: (1) how cities have affected women's opportunities for economic and social equality, (2) women's contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women's needs and interests. P/NP or letter grading.

**199. Special Studies in Women's Studies. (4)** Tutorial, to be arranged. Preparation: at least two upper division women's studies courses, minimum 3.0 grade-point average. Directed program of independent readings and/or research on a specific topic within women's studies. No more than 4 units may be applied toward Women's Studies major or minor. P/NP or letter grading.

**199HA-199HB. Directed Studies for Honors. (4-4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average overall, 3.0 grade-point average in major. Requisite: course 197. Limited to women's studies honors program students. Two-term sequence to research and write honors thesis under direction of faculty sponsor. In Progress and P/NP or letter grading.

## Graduate Courses

**201. Feminist Theories. (4)** Lecture/discussion, three hours. Introduction to field of feminist critical theories in humanities and social sciences disciplines. Concentration on European and U.S. theorists, including women of color. Examination of classic texts, such as creation story in Genesis and essays by Engels, Freud, and others, to analyze how feminist theories articulate counter-discourse to patriarchal intellectual traditions. Letter grading.

**202. Multicultural Perspectives on Women's Issues. (4)** Lecture/discussion, three hours. Requisite: course 201. Examination of issues facing women of color in the U.S. and women living outside Europe and North America today. Issues include reproductive rights, international division of labor, violence toward women, sexuality, women and colonialism, women in social movements, women and the state, feminist organizing throughout the world. Letter grading.

**203. Research Methods in Studies of Women and Gender. (4)** Lecture/discussion, three hours. Preparation: prior or concurrent enrollment in graduate research methods course in discipline or focus area, one or more undergraduate or graduate courses in women's studies. Requisites: courses 201, 202. Topics in advanced critique of sexist research methods, models of inclusion of women in research and theory, nonsexist research methods from conception through interpretation, what constitutes "feminist" research, inclusiveness and attention to diversity issues, appropriate frameworks in comparative research. Supplements disciplinary offerings on research methods. Letter grading.

**204. Current Research in Women's Studies. (1)** Seminar, to be arranged. Designed for graduate students in any discipline conducting research on women/gender-related issues. Attendance and participation in Feminist Research Seminar sponsored by Center for Study of Women; presentations in interdisciplinary women's studies research and theory, with their significance and methodology discussed and critiqued in depth. May be repeated for credit. S/U grading.

**210. Topics in Women and Public Policy. (4)** Lecture, four hours. Designed for graduate women's studies students. Introduction to background, decision-making processes, and current debates over public policy directly affecting women in one or more major spheres of public life (e.g., work, family, political system, health care, legal regulation). Topics may focus on public health, political science, medicine, workplace studies, and social welfare. May be repeated for credit with topic or instructor change. Letter grading.

**CM243. Women Healers, Ritual, and Transformation. (4)** (Same as World Arts and Cultures CM240.) Lecture, four hours. Designed for graduate students. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM143. S/U or letter grading.

**M261. Gender and Music in Cross-Cultural Perspective. (4)** (Same as Ethnomusicology M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (de)codification of messages of resistance, and gender representation to gendered politics via musical production. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Requisite or corequisite: course 495. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Feminist Pedagogy. (2)** Seminar, two hours. Preparation: appointment as teaching assistant in Women's Studies Program. Introduction to feminist methods of teaching, with emphasis on reciprocity and dialogue and de-emphasis on hierarchy. Required of students while serving as teaching assistants (first time only) in undergraduate women's studies courses. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. Requisites: courses 201, 202, 203. Directed individual research and study in area related to women's studies/gender studies, arranged individually by student with instructor. May be repeated for credit. S/U or letter grading.

**598. Research for M.A. Thesis. (2 to 12)** Tutorial, to be arranged. Requisites: courses 201, 202, 203. Research for and writing of M.A. thesis under direction of thesis committee chair. May be repeated for credit. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Research for and writing of Ph.D. dissertation under direction of dissertation committee chair. May be repeated for credit. S/U grading.

**Scope and Objectives**

Guided by an interdisciplinary faculty of artists, dance scholars, and ethnographers, the academic programs in the Department of World Arts and Cultures (WAC) are organized around three fundamental missions: (1) the formulation of critical and intercultural insights into the nature of human creativity, (2) the creation and interdisciplinary study of dance and other body-based modes of performance, and (3) mutually beneficial engagement with the diverse cultural and artistic communities of Los Angeles.

The department is an interdisciplinary unit that finds its *raison d'être* in a set of intellectual and artistic problems rather than an established academic discipline. The programs of teaching, research, and performance are unified around a shared concern with problems of cultural identity and differences, the meaning of tradition in contemporary societies, the forging of connections between critical theory and artistic practices, and the changing social roles and responsibilities of artists and scholars of the arts, both in the U.S. and worldwide.

The undergraduate program offers concentrations in dance and cultural studies. The graduate program offers a Master of Arts in Dance, a Master of Fine Arts in Dance, and a Master of Arts and Ph.D. in Culture and Performance. Students are encouraged to explore relationships among the different curricular emphases, including world arts practices, cultural studies, dance studies, and folklore, as a means to tailor a particular course of study to their professional goals.

Students in the World Arts and Cultures Department at UCLA study with faculty members of international standing engaged in both creative artistic work and research. Students from this unique department have gone on to pursue advanced degrees and/or careers in arts management, education, cultural policy, community outreach, architecture and urban planning, law, and various academic disciplines within the arts, humanities, and social sciences, as well as in the professional fields of dance.

**Undergraduate Study****World Arts and Cultures B.A.**

The World Arts and Cultures major leads to the Bachelor of Arts degree and is designed to offer

choice and flexibility while maintaining balance and rigor. At the outset, students select one of two concentrations: dance or cultural studies. All students take a set of core courses designed to explore a wide range of artistic practices in cultural context. In addition, students selecting the dance concentration are required to study movement techniques of their choice four to five days a week for the first two years of the program, while those concentrating in cultural studies must select 12 units of arts practice electives in movement, music, theater, film, design, or visual art — either within or outside the department. At the end of the sophomore year, students propose a course of study from courses in and outside the department that leads to the senior project — in the form of an academic paper, a video, or a performance, with the student's imagination as the only limit — which serves as the culmination of the undergraduate coursework.

The *dance concentration* offers courses in a wide range of idioms from throughout the world, including special emphasis on modern/postmodern dance. Opportunities for performance, production, videography, and movement studies are augmented by courses in the study of the body and of bodily identity from historical and cultural perspectives, dance theory, and dance in the public sphere, including arts pedagogy. Multimedia forms of expression integrating music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The *cultural studies concentration* provides students with an introduction to key issues, problems, and debates in the study of art and creativity in cultural context. Beyond the required set of core courses, students select from a range of courses offered in the World Arts and Cultures Department and in other departments. Students may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women's studies).

Students who wish to confer with the departmental student affairs officers regarding program planning and major requirements should contact Wendy Temple at (310) 825-8537 or Sandra McKerroll at (310) 206-5467.

**Admission**

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on submission of a written research paper, transcripts, two letters of recommendation, and two personal essays. These materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also

considered. Students interested in the dance concentration must participate in a February audition.

Current UCLA students who petition to change their major are required to meet with one of the student affairs officers prior to application. They are advised to take world arts and cultures courses during the term in which they apply to the program. They must have a minimum 2.0 overall grade-point average and no more than 120 quarter units. Students interested in the cultural studies concentration may apply at the beginning of Fall and Spring Quarters. Those interested in the dance concentration may apply at the beginning of Winter Quarter and are expected to participate in an audition in early February.

**The Major**

The major consists of 97 units of coursework for the dance concentration and 85 units for the cultural studies concentration, including the 8-unit senior project.

*Required:* A core of 10 courses (32 units): World Arts and Cultures 1, 2 (taken twice), 3, 70, 90, 100A or 100B, 101, 102, 103.

Sixteen units of coursework in culture/performance studies are also required, selected from World Arts and Cultures 106B through 185C, 192 through 199, or outside the department subject to consent of the faculty adviser.

In addition, the following courses are required:

*Cultural Studies Concentration:* 12 units of arts practice electives selected from World Arts and Cultures 5 through 16 and 56 through 69 or from courses offered by other departments subject to consent of the faculty adviser; course 20; and 12 units selected from courses 120 through C142.

*Dance Concentration:* 24 units of movement techniques selected from World Arts and Cultures 5 through 16 and 56 through 69, including courses 16 and 67 or 69; course 45; and 12 units selected from courses 116 through 119 and C145 through C168.

World Arts and Cultures 190, 191A, and 191B (9 units total) are required. These courses are the culmination of the major and have three possible areas of focus — performance, applied research, or cultural studies research — as follows: (a) the performance project is a creative project leading to the production and public performance of original or traditional work; (b) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; (c) the cultural studies focus involves students in independent ethnographic research in some aspect of the arts. The subject of study can be found in, but is not restricted to, the Los Angeles community. Field study includes the use of video, slides, and sound recordings.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of World Arts and Cultures offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Culture and Performance and Master of Arts (M.A.) and Master of Fine Arts (M.F.A.) degrees in Dance.

## Admission

### M.A./Ph.D. in Culture and Performance

Application to the M.A. and Ph.D. programs is restricted to Fall Quarter. All applicants are required to have a B.A. degree or its equivalent from a recognized college or university; applicants to the Ph.D. program also are normally expected to hold a master's degree or its equivalent from a recognized college or university.

Applicants for the Ph.D. program whose qualifications do not meet the requirements for the M.A. degree are required to complete the three core courses and any additional remedial coursework recommended by the program faculty.

A minimum grade-point average of 3.0 or its equivalent is required for the last two years of undergraduate work and for any post-baccalaureate work completed.

The application must be submitted by December 15 for consideration for Fall Quarter of the following year. The following support material must be submitted directly to the department: (1) official transcripts, in duplicate, from each college or university at which work was completed, (2) a statement of purpose, (3) three letters of recommendation, (4) a research or term paper (for the M.A. program) or master's thesis or substantial research paper (for the Ph.D. program), as well as evidence of other creative work relevant to the degree program, and (5) scores on the General Test of the Graduate Record Examination (GRE), sent by the testing agency.

### M.A. in Dance

The department is not currently accepting applications for admission to the M.A. program.

### M.F.A. in Dance

In addition to the *UCLA Application for Graduate Admission*, the department has its own screening procedure: three letters of recommendation, an audition, and a personal inter-

view. The audition evaluates applicants' creative potential and technical proficiency with consideration toward their primary focus.

Applicants to the M.F.A. program must demonstrate exceptional promise in either choreography or performance. Auditioners in choreography show three original works; auditioners in performance present three selections already in their repertory. Applicants are required to prepare a statement (no more than one page) describing the works shown.

Prospective students may contact the department for a brochure that provides additional information on the overall graduate program and the specific curriculum for the stated area of specialization.

## Master's Degrees

### M.A. in Culture and Performance

M.A. students may choose to develop specialized skills and knowledge in the fields of dance studies and folklore studies.

The M.A. degree is offered through the comprehensive examination and thesis plans. Ten courses are required, seven at the graduate level, including three core courses. Students specializing in dance studies or folklore studies complete a two-course sequence in the specialization; further specialized training in the fields may be accomplished through additional coursework in the department or in other departments.

There is a language requirement for this degree.

### M.A. in Dance

The M.A. degree is designed for students preparing to continue professionally as researchers and teachers. Unique interests in areas such as dance ethnology, education, history, philosophy and criticism, dance kinesiology, dance production, dance and media, computer-aided dance studies, and music for dance may be pursued with consent of the faculty academic advisers.

The M.A. degree is offered through the comprehensive examination and thesis plans and requires 36 units of coursework, 20 at the graduate level. Required coursework includes a required course in research methods and bibliography, four graduate courses in the department at the graduate level, and four courses in or outside the department at the upper division or graduate level. Specific concentrations within the M.A. may be designed under the direction of faculty advisers.

### M.F.A. in Dance

The M.F.A. degree is designed for students preparing to continue professionally as choreographers and/or performers.

The M.F.A. degree is offered through the comprehensive examination plan, which consists of a written proposal combined with a presentation of proposed works. Beyond basic requirements, course requirements vary for each pro-

gram and are determined under the direction of faculty advisers.

A total of 72 units of coursework is required, 32 at the graduate level. The required coursework includes courses in choreographic/performance training, studio technique, production, movement studies, cultural/critical studies, education, internship, field studies, practicum studies, and electives. Required courses are individually designed through advisement with the faculty academic adviser.

## Doctoral Degree

Ph.D. students may choose to develop specialized skills and knowledge in the fields of dance studies and folklore studies.

Eight graduate courses are required, four within the department. The three core courses for the M.A., or their equivalent, are required. Area studies and field language requirements vary widely among students, and requirements are determined in consultation with the adviser and committee.

Written and oral qualifying examinations are required. The written examination evaluates competence in the three main areas relevant to the dissertation topic: theoretical concepts and problems, the geocultural and/or historical field of specialization, and expressive genre(s) or media.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which is primarily a defense of the dissertation proposal.

There is a language requirement for this degree.

## World Arts and Cultures

### Lower Division Courses

**1. Introduction to World Arts and Cultures. (5)** (Formerly numbered 12.) Lecture, three hours; discussion, one hour. Survey of concepts and theories involved in intercultural, interdisciplinary study of art, aesthetics, and performance. Examination of interactions among various modes of creative expression, role of style in daily life, performative representation of cultural identity and difference, and interaction of diverse artistic traditions. Letter grading.

**2. Lower Division Seminar. (4)** Seminar, three hours. In-depth investigations of variable topics, including the body in cultural context, music and soundscapes, material culture, visual imagery, oral genres, and realm of the spirit, as well as other subjects pertaining to broader discipline of world arts and cultures. May be repeated for credit without limitation. Letter grading.

**3. World Arts Forum. (1)** (Formerly numbered 50.) Lecture, 90 minutes. Introduction to major issues in discipline of world arts and cultures as well as various arts resources on campus. Presentations by faculty, curators, artistic directors, performers, scholars, national leaders in the arts, international guests. Specific presentations vary from term to term. May be repeated for a maximum of 4 units. P/NP grading.

**5. Beginning Global and Transcultural Forms. (2)** Studio, three hours. Beginning-level study of world arts practices crossing national and cultural boundaries. Variable topics, such as body music, crosscultural textile creation, or mural painting, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**6. Beginning World Arts Practices in Sub-Saharan Africa and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from sub-Saharan Africa and extending to cultures of African diaspora, including Brazil and the Afro-Caribbean. Variable topics, such as dance of Guinea, Mali, and Senegal or Afro-Caribbean masking traditions, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**7. Beginning World Arts Practices in Middle East/North Africa and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from the Middle East and North Africa. Variable topics, such as belly dancing or Israeli folk dance, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**8. Beginning World Arts Practices in Latin America and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from Latin America, including cultures of South and Central America. Variable topics, such as Argentine tango and Mexican folkloric dances, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**9. Beginning World Arts Practices in North America and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from North America, including the U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**10. Beginning World Arts Practices in East Asia and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from East Asia, including China, Korea, and Japan. Variable topics, such as movement and music techniques of Beijing Opera, Korean shamanic movement practices, and Kabuki theater, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**11. Beginning World Arts Practices in South Asia and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from South Asia and extending to cultures of South Asian diasporas, including communities in England and West Africa. Variable topics, such as Bharata Natyam (classical dance of India), bhangra (diasporic social dance), and hatha yoga, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**12. Beginning World Arts Practices in Southeast Asia and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from Southeast Asia. Variable topics, such as Cambodian court dance, Indonesian kechak, or Balinese legong, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**13. Beginning World Arts Practices in Europe and Diaspora. (2)** Studio, three hours. Beginning-level study of world arts practices originating from Europe and extending to cultures of European diaspora, including the U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**15. Beginning Modern/Postmodern Dance. (2)** (Formerly numbered 1A.) Laboratory, four hours. Study of dance technique. Critical viewing, reading, and discussion of modern/postmodern dance artists' works. May be repeated twice for credit. P/NP or letter grading.

**16. Beginning Improvisation in Dance. (2)** (Formerly numbered 5.) Lecture, one hour; laboratory, three hours. Introduction to creative exploration in movement through improvisational and compositional exercises that access and develop the imagination, find relationship between imagination and dance making, and enrich movement vocabulary. May be repeated once for credit. P/NP or letter grading.

**20. Introduction to Cultural Studies. (4)** Lecture, three hours. Limited to World Arts and Cultures majors. Introduction to key concepts and major theoretical and methodological debates that characterize field of cultural studies, including discussion of notions of culture, popular culture, subculture, youth culture, hegemony, gender, race, class, and national identity. Letter grading.

**M22. Introduction to American Folklore Studies. (4)** (Same as Folklore M15.) Lecture, four hours. Cultural/historical survey of role of folklore in development of American civilization and of influence of the American experience in shaping folklore in American society; attention also to representative areas of inquiry and analytical procedures. P/NP or letter grading.

**45. Introduction to Dance Studies. (4)** Lecture, three hours. Introduction to discipline of dance studies, with focus on study of corporeality as key contemporary perspective on the body. Multidisciplinary approach to dancing bodies conceptualized as social constructs, including attention to gender, race, class, and national identity. P/NP or letter grading.

**46. Survey of Dancing in Selected Cultures. (2)** (Formerly numbered 70.) Studio, three hours. Introduction to dances and their movement characteristics in global context. P/NP or letter grading.

**55. Intermediate World Arts Practices in Global and Transcultural Forms. (2)** Studio, three hours; outside study, three hours. Intermediate-level study of world arts practices crossing national and cultural boundaries. Variable topics, such as body music, crosscultural textile creation, or mural painting, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**56. Intermediate World Arts Practices in Sub-Saharan Africa and Diaspora. (2)** Studio, three hours. Intermediate-level study of world arts practices originating from sub-Saharan Africa or from cultures of African diaspora, including Brazil and the Afro-Caribbean. Variable topics, such as dance of Guinea, Mali, and Senegal or Afro-Caribbean masking traditions, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**58. Intermediate World Arts Practices in Latin America and Diaspora. (2)** Studio, three hours; outside study, three hours. Intermediate-level study of world arts practices originating from Latin America, including cultures of South and Central America. Variable topics, such as Argentine tango and Mexican folkloric dances, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**59. Intermediate World Arts Practices in North America and Diaspora. (2)** Studio, three hours. Intermediate-level study of world arts practices originating from North America, including the U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**61. Intermediate World Arts Practices in South Asia and Diaspora. (2)** Studio, three hours. Intermediate-level study of world arts practices originating from South Asia or from cultures of South Asian diasporas, including communities in England and West Africa. Variable topics, such as Bharata Natyam (classical dance of India), bhangra (diasporic social dance), and hatha yoga, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**62. Intermediate World Arts Practices in Southeast Asia and Diaspora. (2)** Studio, three hours. Intermediate-level study of world arts practices originating from Southeast Asia. Variable topics, such as Cambodian court dance, Indonesian kechak, or Balinese legong, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**63. Intermediate World Arts Practices in Europe and Diaspora. (2)** Studio, three hours. Intermediate-level study of world arts practices originating from Europe and extending to cultures of European diaspora, including the U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

**65. Intermediate Modern/Postmodern Dance. (2)** (Formerly numbered 101A.) Studio, four hours. Technical training with emphasis on increasing skill. May be repeated twice for credit. P/NP or letter grading.

**67. Introduction to Dance Composition. (2)** (Formerly numbered 105.) Lecture, one hour; laboratory, three hours. Study of processes derived from a Western theatrical tradition by which movement is generated with specific consideration toward shaping/forming of movement materials. May be repeated twice for credit. P/NP or letter grading.

**69. Introduction to Intercultural Composition. (2)** Studio, four hours; outside study, two hours. Study of processes derived from interaction of Western theatrical tradition with non-Western forms, with specific consideration toward shaping/forming of movement materials. May be repeated twice for credit. P/NP or letter grading.

**70. Production. (1)** Laboratory, three hours. Introduction to practical perspectives on producing events in world arts and cultures, including but not limited to theatrical support and planning and executing lecture series. May be repeated once for credit. P/NP grading.

**90. Sophomore-Year Proposal. (1)** Lecture, 90 minutes. Planning and execution of proposal for junior year of study, with attention to exploring resources of department and University as a whole. P/NP grading.

**96. Private Instruction in World Arts and Cultures. (2 to 4)** Studio, three to six hours. Designed for freshmen/sophomores. Private or semiprivate instruction in a world arts practice with a distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for a maximum of 24 units. P/NP or letter grading.

**99. Special Studies in World Arts and Cultures. (2 to 4)** Tutorial, to be arranged. Independent studies course for freshmen/sophomores to be arranged by students in consultation with a faculty member. A contract written during first week of term is basis for evaluating successful completion of course. Topics, readings, and written assignments to be arranged at discretion of sponsoring faculty member. May be taken for a maximum of 8 units. P/NP or letter grading.

## Upper Division Courses

**100A. Art as Social Action. (4)** (Formerly numbered 140A.) Lecture, four hours. Designed for juniors/seniors. Discussion of what constitutes an artist's social responsibility and in what ways art is qualified to engage in direct political action. Study of tension between the powers of this world and the powers of art. P/NP or letter grading.

**100B. Art as Moral Action. (4)** (Formerly numbered 140B.) Lecture, four hours. Designed for juniors/seniors. One's ability to distinguish between right and wrong action is culturally intuited, nurtured, and developed. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

**101. Theories of Performance. (4)** Lecture, three hours. Requisite: course 90. Introduction to a range of contemporary critical theories applicable to analysis of performance, including gaze theory, postcolonial theory, queer theory, and intercultural theory. P/NP or letter grading.

**102. Seminar: Intercultural and Interdisciplinary Performance. (4)** (Formerly numbered 140C.) Seminar, four hours. Recent discussions of multiculturalism have demanded a broader base of cultural literacy for society in general and from artists in particular. Moving beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. P/NP or letter grading.

**103. Arts in the Community. (4)** Lecture, four hours. Requisite: course 90. Following up on discussions of impoverishment of theatrical performance, many artists and scholars have turned attention to full engagement with communities in which they live. Investigation of practical application of those engagement strategies, culminating in a pilot community project. Letter grading.

**106B. Dance in Africa and African Diaspora. (4)** (Formerly numbered 182.) Lecture, four hours. Survey of dance in sub-Saharan cultures and their new world transformations, with consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various African and African American cultures and genres. Letter grading.

**108B. Dance in Latin American Cultures. (4)** (Formerly numbered 183.) Lecture, four hours. Survey of dance in Latin America, with consideration of role of dance in society, its cultural significance, historical background, and relationship to other art forms. Emphasis on various Latin American cultures and dance genres. Letter grading.

**C109A. Advanced World Arts Practices in North America and Diaspora. (2)** Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from North America, including the U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C409A. P/NP or letter grading.

**C109B. Dance in Native American Cultures. (4)** (Formerly numbered C187.) Lecture, four hours. Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C209B. Letter grading.

**110B. Dance in East Asia. (4)** (Formerly numbered 181C.) Lecture, four hours. Survey of dances of Japan, China, and Korea and factors which have influenced their development and social function. Consideration of relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides. P/NP or letter grading.

**111B. Dance in South Asia. (4)** (Formerly numbered 181D.) Lecture, four hours. Survey of dance forms in India and Sri Lanka. Factors influencing development of dance, its social function, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides. P/NP or letter grading.

**112B. Dance in Southeast Asia. (4)** (Formerly numbered 181B.) Lecture, four hours. Survey of selected ritual, social, and court dances of Indonesia, Cambodia, Thailand, and the Philippines. Social, historical, and aesthetic factors. Lectures illustrated with demonstrations, films, and slides. P/NP or letter grading.

**C113A. Advanced World Arts Practices in Europe and Diaspora. (2)** Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from Europe and extending to cultures of European diaspora, including the U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C413A. P/NP or letter grading.

**C115. Advanced Modern/Postmodern Dance. (2)** (Formerly numbered C102A.) Studio, six hours. Requirement: course 65. Studies in advanced modern/postmodern dance technique, with emphasis on performing skills. May be repeated for credit without limitation. Concurrently scheduled with course C415. P/NP or letter grading.

**116. Advanced Improvisation in Dance. (2)** (Formerly numbered 103.) Studio, four hours. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection. May be repeated twice. P/NP or letter grading.

**117. Advanced Topics in Choreography. (4)** (Formerly numbered 115.) Lecture, four hours; studio, two hours. Requisites: courses 16 and 67 or 69. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topic through lectures, readings, and discussion. Thematic topics include contemporary issues and concerns such as image, essence, and abstraction; home, history, and memory; interculturalism; constructing identity. May be repeated for credit without limitation. P/NP or letter grading.

**118. Advanced Interdisciplinary Composition. (4)** Lecture, four hours; studio, two hours. Requisites: courses 16 and 67 or 69. Directed exploration in composition, with focus on developing works that engage two or more disciplines, such as dance, music, visual art, performance art. Theoretical engagement with selected topics through lectures, readings, and discussions. May be repeated for credit without limitation. P/NP or letter grading.

**119. Advanced Intercultural Composition. (4)** Lecture, four hours; studio, two hours. Requisites: courses 16 and 67 or 69. Directed exploration in composition, with focus on works that engage techniques and practices of two or more cultures. Engagement with postcolonial theory through lectures, readings, and discussions. May be repeated for credit without limitation. P/NP or letter grading.

**120. Selected Topics in Cultural Studies. (4)** (Formerly numbered 130.) Lecture, three hours. Designed for juniors/seniors. Selected topics in interdisciplinary study of arts and performance in cultural and historical context. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated for credit without limitation. P/NP or letter grading.

**C121. Ethnography of Performance. (4)** (Formerly numbered C180A.) Lecture, two hours; discussion, two hours; outside study, eight hours. Development of observation and recording skills for study of performance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with course C221. P/NP or letter grading.

**M122. Introduction to Folklore. (4)** (Same as Folklore M101.) Lecture, four hours. Survey of various forms of folklore and approaches to their identification, description, and analysis, including their historical and social significance. Introduction to expressive behavior of folk groups from throughout the world and comparison through readings, lectures, film, and fieldwork, with attention to artistic, religious, and other traditions in relation to evolving popular culture. P/NP or letter grading.

**C123. Arts of Identity: Survey of Expressive Cultures. (4)** (Formerly numbered C164.) Lecture, four hours; outside study, eight hours. Introduction to study of arts, performance, and creativity in cultural context. Special attention to relationship between arts and identity and to role of artists in cultural survival and transformation. Concurrently scheduled with course C223. P/NP or letter grading.

**M125A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4)** (Formerly numbered M166A.) (Same as Art M186A and Chicana and Chicano Studies M186A.) Studio/lecture, six hours. Corequisite: course M125AL. Investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

**M125AL-M125BL-M125CL. Beyond the Mexican Mural: Muralism and Community Laboratory. (2-2-2)** (Formerly numbered M166AL-M166BL-M166CL.) (Same as Art M186AL-M186BL-M186CL and Chicana and Chicano Studies M186AL-M186BL-M186CL.) Laboratory, two hours. Course M125AL is requisite to M125BL, which is requisite to M125CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading. **M125AL.** Beginning; **M125BL.** Intermediate; **M125CL.** Advanced.

**M125B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4)** (Formerly numbered M166B.) (Same as Art M186B and Chicana and Chicano Studies M186B.) Studio/lecture, six hours. Requisites: courses M125A, M125AL. Corequisite: course M125BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

**M125C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4)** (Formerly numbered M166C.) (Same as Art M186C and Chicana and Chicano Studies M186C.) Studio/lecture, six hours. Requisites: courses M125B, M125BL. Corequisite: course M125CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

**M126. Whose Monument Where: Course on Public Art. (4)** (Formerly numbered M167.) (Same as Art M188 and Chicana and Chicano Studies M188.) Lecture, four hours. Recommended corequisite: course M125A or M125B or M125C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

**127. The City as a Work of Art. (4)** (Formerly numbered 141A.) Lecture, three hours. Designed for juniors/seniors. Interdisciplinary approach to complex physical, emotional, psychological, and spiritual dynamics that create and sustain urban life, with emphasis on artist's role in shaping the spaces which affect people's lives. Discussion of religious and social aspirations as expressed in music, poetry, dance, and visual arts, as well as architecture and city planning. P/NP or letter grading.

**CM129. Food Customs and Symbolism. (4)** (Formerly numbered CM168.) (Same as Folklore CM175.) Lecture, three hours. Designed for juniors/seniors. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course CM229. P/NP or letter grading.

**130. Living Vernacular. (4)** (Formerly numbered 163.) Lecture, three hours. Survey of array of spaces and places from a cross-cultural or comparative perspective and with a performance emphasis, which means focus on mutual interaction of human beings and their created environments. Emphasis on "common," "ordinary," "anonymous," or "vernacular" nonbuilt and built environments, which are built and used by members of small-scale, "traditional," and "transitional" communities around the world. P/NP or letter grading.

**M131. Folk Art and Aesthetics. (4)** (Formerly numbered M118.) (Same as Folklore M118.) Lecture, four hours. Designed for juniors/seniors. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis. P/NP or letter grading.

**M132. Narrative and Oral Performance. (4)** (Same as Folklore M139.) Lecture, four hours. Survey of concepts of story as text versus narrating as oral performance, studies of individual narrators, how stories are composed in performance, interaction of narrator and audience, how place and experience become embodied in narratives, modes of representing oral narrating, and politics of stories and oral performance. P/NP or letter grading.

**133. Textiles of the World. (4)** (Formerly numbered 146.) Lecture, four hours; discussion, one hour; laboratory, one hour. How cloth and clothing was and continues to be hand-woven in indigenous societies. Use of textiles from Fowler Museum collection to coordinate hands-on experience with cultural history. May be repeated twice for credit. P/NP or letter grading.

**135. African Popular Arts. (4)** Lecture, three hours. Introduction to problems and issues in study of popular arts in sub-Saharan Africa. Lectures, readings, and audiovisual materials focus on broad spectrum of creative forms and processes, including visual and plastic arts, literature, performed genres such as music, poetry, theater, and dance, and everyday practices such as hair weaving, housepainting, personal adornment, and joke telling. P/NP or letter grading.

**M136. Urban Legend and Popular Culture. (4)** (Same as Folklore M138.) Lecture, four hours. Survey of modern belief tales about ghosts, Bigfoot, conspiracies, food contamination, corporate malfeasance, and crime, with attention to popularity of the genre, history of particular legends, meanings and functions of legend telling, and relationship between orally told legends and mass media. P/NP or letter grading.

**CM139. Afro-Caribbean Ritual Arts: Vodou and Santeria. (4)** (Formerly numbered CM109.) (Same as Folklore CM109.) Lecture, three hours. Designed for juniors/seniors. Ethnography of diaspora African religions, including vodou, Santeria, and Candomble. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM239. P/NP or letter grading.

**CM140. Women Healers, Ritual, and Transformation. (4)** (Formerly numbered C140.) (Same as Women's Studies CM143.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM240. P/NP or letter grading.

**CM141. Carnival and Festivity. (4)** (Same as Folklore CM136.) Lecture, three hours; fieldwork, one hour. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and the carnivalesque and politics of celebration. Concurrently scheduled with course CM241. P/NP or letter grading.

**C142. Myth, Magic, and Mind. (4)** Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Consideration of metaphor and symbol, reflexive anthropology, and notion of culture as text applied to such examples as trickster figures, rhetorical devices including parable and irony, and arguably magical experience of humans "shape-shifting" to become animals. Concurrently scheduled with course C242. P/NP or letter grading.

**C145. Selected Topics in Dance Studies. (2 to 4)** (Formerly numbered C197.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Selected topics in study of dance and corporeality. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated for credit without limitation. Concurrently scheduled with course C245. P/NP or letter grading.

**C146. Politics of Performance. (4)** Seminar, four hours; outside study, eight hours. Designed for juniors/seniors. Opportunity to reflect on artists and intellectuals as cultural workers operating in domains of ideology, aesthetics, and theory. Analysis of such keywords as ideology, aesthetics, theory, art, politics, intervention, intellectuals, and artists. Concurrently scheduled with course C246. P/NP or letter grading.

**C147A-C147B. Movement Dynamics and Group Process. (2-2)** (Formerly numbered C160A-C160B.) Lecture, one hour; laboratory, three hours; outside study, two hours. Designed for juniors/seniors. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C247A-C247B. P/NP grading.

**C148. Dance as Healing and Therapy. (4)** Lecture, two hours; laboratory, two hours; outside study/research, eight hours. Designed for juniors/seniors. Introduction to historical, theoretical, methodological, and ethical considerations involved in practice of dance as healing and therapy. Concurrently scheduled with course C248. Letter grading.

**149. Dance in the Multicultural U.S. (4)** (Formerly numbered 135.) Lecture, two hours; discussion, one hour; laboratory, one hour. Designed for juniors/seniors. Study of dance performance in the U.S., with emphasis on genres that can be viewed in multicultural Los Angeles, from concert modern/postmodern dance, Mexican folklorico, and Japanese butoh to popular idioms and video dance. Attention to genres from Native America, the Americas, Oceania, Asia, Africa, and Europe. Student projects involve creation of in-class performances. P/NP or letter grading.

**150. History of Dance in Culture and Performance. (4)** (Formerly numbered 134.) Lecture, two hours; discussion, one hour; laboratory, one hour. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. P/NP or letter grading.

**C152. History and Theory of Modern/Postmodern Dance. (4)** Lecture, four hours; studio, two hours; outside study, six hours. Introduction to key figures in creation of modern dance, with special attention to their theories and philosophies and tracing of radical shift to postmodern dance that occurred in the mid-20th century. Contemporary developments, both historical and theoretical. Student projects involve choreography and writing. Concurrently scheduled with course C252. P/NP or letter grading.

**CM154. Dance and Folklore. (4)** (Formerly numbered CM184.) (Same as Folklore CM184.) Lecture, four hours. Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM254. P/NP or letter grading.

**C155. Self and Culture. (4)** Lecture, two hours; laboratory, two hours; outside study, eight hours. Designed for juniors/seniors. Examination of critical developmental processes and situational factors contributing to construction of a sense of self and emergence of creativity and subjective relatedness in different cultural contexts. Concurrently scheduled with course C255. P/NP or letter grading.

**158. Choreographing Gender. (4)** Lecture, three hours; laboratory, two hours. Designed for juniors/seniors. Analysis of aesthetic codes and theatrical choreographic approaches as they intersect with construction of gender in the U.S., with close attention to race, class, and sexuality. P/NP or letter grading.

**159. Movement Theories. (2)** (Formerly numbered 122.) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading.

**160. Topics in Body Mechanics. (4)** Lecture, three hours; studio, one hour. Designed for juniors/seniors. Variable topics course with discussion of injury prevention, anatomy for dancers, and study of biological and physical principles of human movement as related to dance. May be repeated for credit without limitation. P/NP or letter grading.

**161. Movement Observation and Analysis. (4)** (Formerly numbered 125.) Lecture, two hours; laboratory, two hours. Designed for juniors/seniors. Use of variable theoretical frameworks and techniques such as laban-analysis to emphasize culturally defined processes of observing, analyzing, and describing human movement. P/NP or letter grading.

**C164. Public Writing in the Arts. (4)** Lecture, four hours; outside study, eight hours. Survey of journalistic approaches to writing about the arts, with eye toward shaping critique of public writing practices and putting that critique into practice. Exploration of new modes of (and venues for) writing that rebalance power differential between art makers and commentators. Concurrently scheduled with course C264. P/NP or letter grading.

**165. Foundations of Dance Education. (4)** (Formerly numbered 151A.) Lecture, two hours; laboratory, three hours. Introduction to movement concepts, skills, and teaching principles for modern/postmodern dance instruction. Supervised teaching practicum included. P/NP or letter grading.

**166. Dance as Culture in Education. (4)** (Formerly numbered 151B.) Lecture, two hours; laboratory, two hours. Prerequisite: course 46. Theoretical and practical aspects of teaching ethnic dance, especially in higher education. P/NP or letter grading.

**167. Creative Dance for Children. (4)** (Formerly numbered 153.) Lecture, three hours; laboratory, one hour. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression. P/NP or letter grading.

**C168. Beyond Academia: Making Art in the Real World. (4)** Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in the real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course C268. P/NP or letter grading.

**170. Advanced Production. (1)** Laboratory, three hours. Prerequisite: course 70. Further development and application of technical and administrative support practices in producing events in world arts and cultures, including but not limited to theatrical support and planning and executing lecture series. May be repeated for credit without limitation. P/NP grading.

**171. Lighting Design for Dance Theater. (4)** (Formerly numbered 141.) Lecture, four hours; laboratory, two hours. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed. P/NP or letter grading.

**172. Costume and Scenic Design Concepts for Dance Theater. (4)** (Formerly numbered 144.) Lecture, four hours. Study of theory for conceptualizing dance performance environments, communication through visual elements, artistic properties of costume and sets media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication. P/NP or letter grading.

**C173. Sound Resources for Performance. (4)** (Formerly numbered C120.) Lecture, three hours; studio, one hour; outside study, eight hours. Designed for juniors/seniors. Exploration of music, in search of the interesting, new, and unusual. Investigation of musical possibilities via record store, Internet, and music library; environmental sounds and patterns; body (clapping, stepping, and singing); and hardware store (found sound). Participants collaborate with fellow students in creative efforts and in presentations of research results. Concurrently scheduled with course C273. P/NP or letter grading.

**CM175. Applied Folklore. (4)** (Same as Folklore CM145.) Lecture, four hours. Designed for juniors/seniors. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course CM275. P/NP or letter grading.

**176. Internship in World Arts and Cultures. (2 to 4)** (Formerly numbered 110.) Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Under faculty supervision, students volunteer at sites in greater Los Angeles where cultural policy is made or where arts are practiced. Required journal writing and final paper. May be taken for a maximum of 8 units. P/NP or letter grading.

**177A-177B. Service Learning. (2-4)** Seminar, two hours; outside study, four to 10 hours. Designed for juniors/seniors. Preparation for students to apply their training in world arts and cultures through outreach with community organizations and institutions. In Progress and P/NP or letter grading. **177A.** Students target an internship and set goals for their service. **177B.** Students volunteer at their selected sites and reflect on impact of their contribution.

**C180. Video Production in the Arts. (4)** (Formerly numbered C127.) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (organizing raw footage, constructing a program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C280. Letter grading.

**181. Ethnographic Film. (4)** Lecture, four hours. Survey of ethnographic film and video, with focus on studies of expressive culture. Emphasis on critical and comparative approaches to visual study of culture, community, and arts. P/NP or letter grading.

**182. Dance and the Visual Media. (4)** (Formerly numbered 128.) Lecture, four hours. Examination of aesthetic differences between dance, film, and video and exploration of the new aesthetic when they are combined. Analysis of the record and documentary dance film, choreo-cinema, and impact of MTV, as well as integration of media with performance. Letter grading.

**CM183. Film and Folklore. (4)** (Formerly numbered CM129.) (Same as Folklore CM165.) Lecture, three hours. Designed for juniors/seniors. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course CM283. P/NP or letter grading.

**185A. Introduction to Museology: Museum Collections and Administration. (5)** (Formerly numbered 165A.) Lecture, six hours. Introduction to history and functions of museums, tracing development to the present. Collection, organization, management, and conservation of objects and legal and ethical issues surrounding these practices. P/NP or letter grading.

**185B. Introduction to Museology: Museum Exhibitions and Education. (5)** (Formerly numbered 165B.) Lecture, six hours. Requisite: course 185A. Conceptual development of exhibitions and formulation of educational and other goals for specified audiences. Design considerations, media applications, and installation process. P/NP or letter grading.

**185C. Introduction to Museology: Selected Topics. (4)** (Formerly numbered 165C.) Discussion, six hours; individual study, six hours. Requisites: courses 185A, 185B. Students pursue projects in an area of museum operations, working with staff members and museum directors to produce papers on contemporary issues in museums. For example, one student might work under a curator and director to examine cultural property issues as they pertain to contemporary museums, following a suggested reading list. P/NP or letter grading.

**190. Junior-Year Proposal. (1)** Lecture, 90 minutes. Requisite: course 90. Limited to World Arts and Cultures majors. Planning and execution of proposal for senior project, with attention to exploring resources of department and University as a whole. P/NP grading.

**191A-191B. Senior Project. (4-4)** (Formerly numbered 190A-190B.) Lecture, four hours. Requisite: course 190. Limited to senior World Arts and Cultures majors. Application of concepts and content from interdisciplinary major to individual projects. Methodologies may include critical, comparative, ethnographic, and performance approaches. Lecture/seminar format with World Arts and Cultures faculty during first term; faculty-directed individual projects during second term. In Progress and letter grading.

**192. Repertory Dance Tour. (2 or 4)** (Formerly numbered 191.) Lecture, two hours; studio, four to six hours. Designed for World Arts and Cultures majors. Creation and performance of dance concerts in the community, with special emphasis on problems of touring dance company with a variable repertoire. May be repeated once. P/NP or letter grading.

**193. Projects in Dance. (2 to 4)** (Formerly numbered 192.) Laboratory, four to six hours (one or two hours may be individualized consultation). Individualized major projects in choreography, performance, production, media. May be repeated for credit. P/NP or letter grading.

**194. Performance Practicum. (1)** (Formerly numbered 149.) Laboratory, four hours. Rehearsal and performance in selected community-based or theatrical work. May be repeated for credit without limitation. P/NP grading.

**196. Advanced Private Instruction in World Arts and Cultures. (2 to 8)** Studio, three to 12 hours. Designed for juniors/seniors. Private or semiprivate instruction in a world arts practice with a distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for a maximum of 24 units. P/NP or letter grading.

**199. Special Studies in World Arts and Cultures. (2 to 8)** Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Designed for juniors/seniors. Individual studies for World Arts and Cultures majors. May be taken for a maximum of 8 units. P/NP or letter grading.

## Graduate Courses

**200. Proseminar: Study of Culture. (4)** Seminar, three hours; outside study, nine hours. Introduction to history of culture concept in arts, humanities, and social sciences. Analysis of contemporary debates concerning ownership and use of word "culture" and critical elucidation of study of culture. S/U or letter grading.

**201. Theories of Performance. (4)** Seminar, three hours; outside study, nine hours. Close reading and analysis of classic and contemporary studies of performance and related aesthetic practices. Familiarization with ways in which "performance" is defined and deployed by scholars working in disciplines of anthropology, dance, folklore, linguistics, literature, musicology, performance studies, philosophy, sociology, and theater. S/U or letter grading.

**202. Ethnography of Performance. (4)** Seminar, three hours; outside study, nine hours. Survey of methods and methodological issues in ethnographic study of performance in cultural context. Field documentation, participant observation, oral history and interview techniques, performative dimensions of ethnographic research, ethics, and politics of ethnographic representation. S/U or letter grading.

**203. Proseminar: Dance Studies. (4)** Seminar, three hours; outside study, nine hours. Survey of theoretical issues and problems in study of dance and body movement in cultural, social, and historical context. S/U or letter grading.

**204. The Body. (4)** Seminar, three hours; outside study, nine hours. Cross-cultural and interdisciplinary perspectives on the human body. Topics include representations of the body, body symbolism, embodiment of identity (including gender, race, ethnicity, and class identities), and analysis of dance and other somatic modes of performance. S/U or letter grading.

**205. Folklore Theories and Methods. (4)** Lecture, three hours; outside study, nine hours. Introductory course in history, analytical perspectives, and current trends, including research techniques in contemporary folkloristics. S/U or letter grading.

**206. Folklore Seminar. (4)** Seminar, three hours; outside study, nine hours. Variable topics. Detailed consideration of particular folk genre, culture area, historical period, and/or theoretical issue in field of folklore. S/U or letter grading.

**C209B. Dance in Native American Cultures. (4)** (Formerly numbered C287.) Lecture, four hours. Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C109B. Letter grading.

**211A-211F. Advanced Choreography. (4 each)** Lecture, two hours; laboratory, two hours. Theoretical aspects of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers. S/U or letter grading.

**M215. Legend as Folklore, Culture, and Behavior. (5)** (Same as Folklore M215.) Lecture, four hours. Designed for graduate students. Examination of folkloristic, psychological, and sociocultural approaches to legends with special attention to texts versus narrating performance, "truth" and "belief," and meanings and significance of legends and legend telling, as well as applications of legend study to civil society (race and ethnic relations and public policy). S/U or letter grading.

**M216. Analyzing Narrative and Oral Performance. (5)** (Same as Folklore M216.) Lecture, four hours. Designed for graduate students. Exploration of ways of documenting individual narrators and interpreting their styles and repertoires; how narrators conceptualize and perform narrative discourse, impact of audience and "situated event" on both narrating and "the story," how experiences and values are communicated through narrating, modes of representing oral narrating, and politics of narrative and oral performance. S/U or letter grading.

**C221. Ethnography of Performance. (4)** (Formerly numbered C279A.) Lecture, two hours; discussion, two hours; outside study, eight hours. Development of observation and recording skills for study of performance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with course C121. S/U or letter grading.

**222. Music for Dance. (4)** (Formerly numbered 221.) Lecture, four hours. Requisite: course C173 or C273. Theory of aesthetic and functional relationship of music to dance. Letter grading.

**C223. Arts of Identity: Survey of Expressive Cultures. (4)** (Formerly numbered C264.) Lecture, four hours; outside study, eight hours. Introduction to study of arts, performance, and creativity in cultural context. Special attention to relationship between arts and identity and to role of artists in cultural survival and transformation. Concurrently scheduled with course C123. S/U or letter grading.

**224. Principles of Dance Kinesiology. (4)** (Formerly numbered 223.) Lecture, four hours. Scientific basis for movement for dance. Study of anatomical, kinesiological, and physical principles and demands of dance. Letter grading.

**225A-225B. Theories of Movement: Labananalysis. (4-4)** Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing. S/U or letter grading.

**226. Advanced Studies in Notation. (2)** Lecture, two hours. Selected problems in directing from notated repertoire; principles of teaching, comparative notation systems, writing projects. S/U or letter grading.

**CM229. Food Customs and Symbolism. (4)** (Formerly numbered CM268.) (Same as Folklore CM275.) Lecture, three hours. Designed for graduate students. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course CM129. S/U or letter grading.

**230. Research Methods and Bibliography in Dance. (4)** Lecture, four hours. Survey of methods for scholarly analysis of dance materials using systems from social sciences, physical sciences, and humanities. S/U or letter grading.

**231A. Basic Issues in Dance and Dance Theory. (4)** Lecture, four hours. Issues common to specialization areas in the field of dance: movement, presentation and transformation, composition, contexts (such as historical, ritual, social, educational, therapeutic), documentation (notation, film, video), production, etc. S/U or letter grading.

**232. Aesthetics of Dance. (4)** Lecture, four hours. Analysis of aesthetic concepts and critical methods used in writing about dance. S/U or letter grading.

**235. History of Ballet. (4)** Lecture, four hours. Development of ballet from 19th-century Romanticism to the present. Stylistic differences in Italy, France, England, Denmark, and Russia. S/U or letter grading.

**236. Dance in the 20th Century. (4)** Lecture, four hours. Seminar in historical development of 20th-century dance. S/U or letter grading.

**CM239. Afro-Caribbean Ritual Arts: Vodou and Santeria. (4)** (Formerly numbered CM209.) (Same as Folklore CM209.) Lecture, three hours. Designed for graduate students. Ethnography of diaspora African religions, including vodou, Santeria, and Candomble. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM139. S/U or letter grading.

**CM240. Women Healers, Ritual, and Transformation. (4)** (Formerly numbered C240.) (Same as Women's Studies CM243.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM140. S/U or letter grading.

**CM241. Carnival and Festivity. (4)** (Same as Folklore CM236.) Lecture, three hours; fieldwork, one hour. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and the carnivalesque and politics of celebration. Concurrently scheduled with course CM141. S/U or letter grading.

**C242. Myth, Magic, and Mind. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Consideration of metaphor and symbol, reflexive anthropology, and notion of culture as text applied to such examples as trickster figures, rhetorical devices including parable and irony, and arguably magical experience of humans "shape-shifting" to become animals. Concurrently scheduled with course C142. S/U or letter grading.

**243A. Production Arts Seminar. (4)** (Formerly numbered 240A.) Seminar, two hours; discussion, two hours; laboratory, two hours. Examination and research of dance and performer/audience relationships in various historic periods and cultural settings. Impact of different aesthetic/directorial approaches to theatrical production of dance. Exploration of selection of locale, style, aural and visual enhancements. Letter grading.

**243B. Production Arts Seminar. (4)** (Formerly numbered 240B.) Seminar, four hours; laboratory, to be arranged. Study of elements of design. Development of vocabulary for analysis of dance movement and choreography. Communication among collaborating artists. Conceptualizing and producing design and sound score for a dance production. Letter grading.

**243C. Production Arts Seminar. (4)** (Formerly numbered 240C.) Seminar, four hours; laboratory, to be arranged. Examination of contemporary art world, including arts organizations, funding sources, legal aspects of arts production, support groups, public relations and publicity. Letter grading.

**243D. Production Arts Seminar. (2)** (Formerly numbered 240D.) Seminar, three hours. Corequisites: courses 441, 490. Topics from current problems of students preparing M.F.A. concert productions. Letter grading.

**C245. Selected Topics in Dance Studies. (2 to 4)** (Formerly numbered C297.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Selected topics in study of dance and corporeality. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated for credit without limitation. Concurrently scheduled with course C145. S/U or letter grading.

**C246. Politics of Performance. (4)** Seminar, four hours; outside study, eight hours. Designed for graduate students. Opportunity to reflect on artists and intellectuals as cultural workers operating in domains of ideology, aesthetics, and theory. Analysis of such keywords as ideology, aesthetics, theory, art, politics, intervention, intellectuals, and artists. Concurrently scheduled with course C146. S/U or letter grading.

**C247A-C247B. Movement Dynamics and Group Process. (2-2)** (Formerly numbered C260A-C260B.) Lecture, one hour; laboratory, three hours; outside study, two hours. Designed for graduate students. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C147A-C147B. S/U grading.

**C248. Dance as Healing and Therapy. (4)** (Formerly numbered 261C.) Lecture, two hours; laboratory, two hours; outside study/research, eight hours. Designed for graduate students. Introduction to historical, theoretical, methodological, and ethical considerations involved in practice of dance as healing and therapy. Concurrently scheduled with course C148. Letter grading.

**251A-251D. Advanced Studies in Dance Education. (4 each)** Lecture, two hours; discussion, two hours. S/U or letter grading:

**251A.** Historical and Theoretical Framework for Dance Education. (4) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. Development of a framework for teaching/learning process in dance and application to varied settings and populations. S/U or letter grading.

**251B.** Theories and Methods. (4) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to teaching dance, including analysis of traditional models for developing alternative methodologies. S/U or letter grading.

**251C.** Curriculum Development in Varied Dance Settings. (4) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. Issues include course/program/materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting decision-making process. S/U or letter grading.

**251D.** Dance Administration. (4) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. Relation of theories and practice to dance settings, clarifying issues of hierarchical structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail. S/U or letter grading.

**C252. History and Theory of Modern/Postmodern Dance. (4)** Lecture, four hours; studio, two hours; outside study, six hours. Introduction to key figures in creation of modern dance, with special attention to their theories and philosophies and tracing of radical shift to post-modern dance that occurred in the mid-20th century. Contemporary developments, both historical and theoretical. Student projects involve choreography and writing. Concurrently scheduled with course C152. S/U or letter grading.

**CM254. Dance and Folklore. (4)** (Formerly numbered CM284.) (Same as Folklore CM284.) Lecture, four hours. Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM154. S/U or letter grading.

**C255. Self and Culture. (4)** (Formerly numbered 261B.) Lecture, two hours; laboratory, two hours; outside study, eight hours. Designed for graduate students. Examination of critical developmental processes and situational factors contributing to construction of a sense of self and emergence of creativity and subjective relatedness in different cultural contexts. Concurrently scheduled with course C155. S/U or letter grading.

**C264. Public Writing in the Arts. (4)** Lecture, four hours; outside study, eight hours. Survey of journalistic approaches to writing about the arts, with eye toward shaping critique of public writing practices and putting that critique into practice. Exploration of new modes of (and venues for) writing that rebalance power differential between art makers and commentators. Concurrently scheduled with course C164. S/U or letter grading.

**C268. Beyond Academia: Making Art in the Real World. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in the real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course C168. S/U or letter grading.

**C273. Sound Resources for Performance. (4)** (Formerly numbered C220.) Lecture, three hours; studio, one hour; outside study, eight hours. Designed for graduate students. Exploration of music, in search of the interesting, new, and unusual. Investigation of musical possibilities via record store, Internet, and music library; environmental sounds and patterns; body (clapping, stepping, and singing); and hardware store (found sound). Participants collaborate with fellow students in creative efforts and in presentations of research results. Concurrently scheduled with course C173. S/U or letter grading.

**CM275. Applied Folklore. (4)** (Same as Folklore CM245.) Lecture, four hours. Designed for graduate students. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course CM175. S/U or letter grading.

**C280. Video Production in the Arts. (4)** (Formerly numbered C227.) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (organizing raw footage, constructing a program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C180. Letter grading.

**281A-281B. Advanced Studies in Dance Ethnology. (4-4)** (Formerly numbered 280A-280B.) Lecture, four hours. Dance viewed as an aspect of culture and human behavior. S/U or letter grading. **281A.** Survey of literature of the field of dance ethnology and in related fields of anthropology, folklore, performance studies, and sociology. **281B.** Advanced studies in methodologies and theories to develop dance-focused ethnographic research.

**CM283. Film and Folklore. (4)** (Formerly numbered CM229.) (Same as Folklore CM265.) Lecture, three hours. Designed for graduate students. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course CM183. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Directed Professional Activities. (2 to 8)** Lecture, to be arranged. Directed projects in professional editing, bibliography, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

**C409A. Advanced World Arts Practices in North America and Diaspora. (2)** Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from North America, including the U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C109A. S/U or letter grading.

**C413A. Advanced World Arts Practices in Europe and Diaspora. (2)** Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from Europe and extending to cultures of European diaspora, including the U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C113A. S/U or letter grading.

**C415. Advanced Modern/Postmodern Dance. (2)** (Formerly numbered C402A.) Studio, six hours. Requirement: course 65. Studies in advanced modern/postmodern dance technique, with emphasis on performing skills. May be repeated for credit without limitation. Concurrently scheduled with course C115. S/U or letter grading.

**441. Dance Production Practicum. (2 to 4)** Laboratory, four to eight hours (one or two hours may be individualized consultation). Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for a maximum of 8 units. S/U grading.

**451. Teaching Assistant Seminar. (2)** Seminar, one hour; laboratory, three hours. Required of all World Arts and Cultures Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

**452. Directed Field Study in Dance Education. (2 to 8)** Seminar, one hour; field study, two hours minimum. Directed field study to provide teaching experience in the community school or other approved site. No more than 4 units may be applied toward M.A. degree requirements. S/U grading.

**460A-460B-460C. Clinical Internship Supervision. (4-4-4)** Lecture, two hours; discussion, two hours; outside study, eight hours. Practicum dealing with student internship: movement/observation, therapeutic goals, therapeutic process, and other clinical uses. S/U grading.

**480. Seminar: Research Topics. (2)** Seminar, two hours. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of 8 units. S/U grading.

**490. Projects in Choreography and Performance. (2 to 8)** Tutorial, one three-hour rehearsal per unit per week minimum. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for a maximum of 16 units. S/U or letter grading.

**496. Advanced Private Instruction in World Arts and Cultures. (2 to 8)** Studio, three to 12 hours; outside study, three to 12 hours. Private or semiprivate instruction with a distinguished community-based artist to be arranged by students and approved by instructor. May be repeated for a maximum of 24 units. S/U grading.

**498. Professional Internship in Dance. (4, 8, or 12)** Seminar, to be arranged. Full- or part-time supervised fieldwork. Limited to M.F.A. students. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties. S/U or letter grading.

**596A. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U or letter grading.

**596R. Directed Study or Research in a Hospital or Clinic. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Master's Comprehensive Examination. (2 to 8)** Tutorial, to be arranged. Preparation for M.A. or M.F.A. comprehensive examination. S/U grading.

**598. Research for and Preparation of Master's Thesis. (2 to 8)** Tutorial, to be arranged. Research for and preparation of M.A. or M.F.A. thesis. S/U grading.

# Appendixes

## APPENDIX A: REGULATIONS AND POLICIES

### Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Box 951405, Los Angeles, CA 90095-1405, (310) 825-4042. Speech- and hearing-impaired persons may call TTY (310) 206-6083.

Inquiries regarding nondiscrimination on the basis of disability covered by the Americans with Disabilities Act (ADA) of 1990 or Section 504 of the Rehabilitation Act of 1973 may be directed to Douglas A. Martin, Special Assistant to the Chancellor/Coordinator of ADA and 504 Compliance, A239 Murphy Hall, UCLA, Box 951405, Los Angeles, CA 90095-1405, voice (310) 825-2242, TTY (310) 206-3349; <http://www.saonet.ucla.edu/ada.htm>.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the

Dean of Students, 1206 Murphy Hall, and/or refer to Section 111.00 of the *University of California Policies Applying to Campus Activities, Organizations, and Students* (available in 1206 Murphy Hall or at <http://www.ucop.edu/ucophome/uwnews/aospol/toc.html>) for further information and procedures.

### Student Conduct Policies

Students are members of both society and the academic community with attendant rights and responsibilities. Students are expected to comply with the general law, University policies, and campus regulations. For further information, refer to the *University of California Policies Applying to Campus Activities, Organizations, and Students* at <http://www.ucop.edu/ucophome/uwnews/aospol/toc.html> and the *UCLA Student Conduct Code* at <http://www.deanofstudents.ucla.edu/SCC-Table%20of%20Contents.htm>.

### A. Jurisdiction

The University shall have jurisdiction over student conduct that occurs on University property, or in connection with official University functions whether on or off University property. Although the University will not routinely invoke its disciplinary processes over student conduct that occurs off campus except in connection with an official University function, the University shall have discretion to exercise jurisdiction over conduct that occurs off campus and that would violate student conduct and discipline policies or regulations if the conduct had occurred on campus when (1) the alleged misconduct indicates the student poses a threat to the safety or security of any member(s) of the University community or (2) the alleged misconduct involves academic work or the forgery, alteration, or misuse of any University

document, record, key, electronic device, or identification.

Specifically, the University may choose to exercise jurisdiction over off-campus incidents under item 1 above where the alleged misconduct involves

- a. Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person;
- b. Stalking (as defined in Section 102.10 of the *University of California Policies Applying to Campus Activities, Organizations, and Students*);
- c. Sexual harassment (as defined in Section 102.09 of the *University of California Policies Applying to Campus Activities, Organizations, and Students*);
- d. Hazing (as defined in Section 102.12 of the *University of California Policies Applying to Campus Activities, Organizations, and Students*).

In determining whether or not to exercise off-campus jurisdiction in cases under item 1 above, the University will consider the seriousness of the alleged misconduct; whether the alleged victim is a member of the campus community; the ability of the University to gather evidence, including the testimony of witnesses; or whether the off-campus conduct is part of a series of actions that occurred both on and off campus.

This section is intended only to provide guidance for the exercise of discretion by the University in invoking its jurisdiction over conduct that occurs off campus. It may not be relied on by any student charged under this section to create any rights, substantive or procedure.

## Salary and Employment Information, University of California

	DEGREE LEVEL OF GRADUATES		
	BACHELOR'S	MASTER'S	DOCTORATE
	AVERAGE MONTHLY SALARY*		
Engineering	\$4,007	\$4,705	\$6,031
Humanities	2,640	1,677	3,531
Life Sciences	2,382	3,120	2,996
Management	3,263	4,984	6,806
Physical Sciences	3,224	4,347	5,122
Social Sciences	2,520	3,167	3,698

\*Source: A national survey of a representative group of colleges conducted by the National Association of Colleges and Employers, representing the 80 percent range of offers for April 2001 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.

dural, or as a basis for a challenge to the exercise of the University's jurisdiction.

## B. Grounds for Discipline

The chancellor may impose discipline for violation of, or an attempt to violate, any University policies or campus regulations. The lack of intent to commit a violation is not a factor in determining if a violation occurred; however, the lack of intent may be considered a mitigating factor in determining the appropriate sanction if it has been determined that a violation has occurred. Violations or attempted violations include, but are not limited to, the following types of misconduct (Sections 102.01 through 102.25 below are adapted from the *University of California Policies Applying to Campus Activities, Organizations, and Students*):

## C. Types of Misconduct

**102.01: Academic Dishonesty.** All forms of academic misconduct, including but not limited to cheating, fabrication, plagiarism, multiple submissions, or facilitating academic dishonesty. For the purposes of this Code, the following definitions apply:

**102.01a: Cheating.** Cheating includes, but is not limited to, the use of unauthorized materials, information, or study aids in any academic exercise; or helping another student commit an act of academic fraud; or the failure to observe the expressed procedures or instructions of an academic exercise (e.g., examination instructions regarding alternate seating or conversation during an examination).

**102.01b: Fabrication.** Fabrication includes, but is not limited to, falsification or invention of any information or citation in an academic exercise.

**102.01c: Plagiarism.** Plagiarism includes, but is not limited to, the use of another's words or ideas as if they were one's own; including but not limited to representing, either with the intent to deceive or by the omission of the true source, part of or an entire work produced by someone other than the student, obtained by purchase or otherwise, as the student's original work; or representing the identifiable but altered ideas, data, or writing of another person as if those ideas, data, or writing were the student's original work.

**102.01d: Multiple Submissions.** Multiple submissions includes, but is not limited to, the resubmission by a student of any work which has been previously submitted for credit in identical or similar form in one course to fulfill the requirements of a second course, without the informed permission/consent of the instructor of the second course; or the submission by a student of any work submitted for credit in identical or similar form in one course to fulfill the requirements of a concurrent course, without the permission/consent of the instructors of both courses.

**102.02: Other Forms of Dishonesty.** Other forms of dishonesty, including but not limited to fabricating information or knowingly furnishing

false information or reporting a false emergency to the University or to University officials acting in the performance of their duties.

**102.03: Forgery.** Forgery, alteration, or misuse of any University document, record, key, electronic device, or identification. Section 102.03 applies to any individual for whom the University maintains records, regardless of current student status.

**102.04: Theft.** Theft of, conversion of, misappropriation of, or damage to or destruction of any property of the University or property of others while on University premises or at official University functions; or possession of any property of the University or others stolen while on University premises or at official University functions.

**102.05: Computers.** Theft or other abuse of computing facilities or computer time, including but not limited to unauthorized entry into a file to use, read, or change the contents or for any other purpose; unauthorized transfer of a file; unauthorized use of another individual's identification or password; use of computing facilities to interfere with the work of another student, faculty member, or University official; use of computing facilities to interfere with a University computing system. Violation of the *University of California Electronic Communications Policy* (available at [www.ucop.edu/ucophome/policies/ec/](http://www.ucop.edu/ucophome/policies/ec/)), or of any UCLA acceptable or allowable use policy, is also considered a violation of Section 102.05.

**102.06: Unauthorized Conduct.** Unauthorized possession of, receipt of, duplication of, or use of the University's name, insignia, or seal. Unauthorized entry to, possession of, receipt of, or use of any University properties, equipment, resources, or services. Selling or distributing course lecture notes, handouts, readers, or other information provided by an instructor, or using them for any commercial purpose, without the express permission of the instructor. Selling commencement tickets.

**102.07: University-Owned Housing.** Violation of policies, regulations, or rules governing University-owned or operated housing facilities or leased housing facilities located on University property.

**102.08: Physical Abuse.** Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person.

**102.08a: Rape.** For the purposes of this Code, rape refers to "rape" as defined by the California Penal Code (as it may be amended from time to time). Among other acts, the Penal Code prohibits the following acts:

1. Sexual intercourse against a person's will accomplished by force or threats of bodily injury
2. Sexual intercourse against a person's will where the person has reasonable fear that

she (or he) or another will be injured if she (or he) does not submit to the intercourse

3. Sexual intercourse where the person is incapable of giving consent, or is prevented from resisting, due to alcohol or drugs, and this condition was known, or reasonably should have been known by the accused
4. Sexual intercourse where the person is incapable of resisting because she (or he), at the time, is unconscious or asleep, and this is known to the accused

**102.08b: Sexual Assault.** The act of sexual assault includes forced sodomy (anal intercourse); forced oral copulation (oral-genital contact); rape by foreign object (forced penetration by a foreign object, including a finger); and sexual battery (the unwanted touching of an intimate part of another person for the purpose of sexual arousal). These also include situations when the accused sexually assaults a complainant incapable of giving consent, including where the complainant is prevented from resisting due to alcohol or drugs and this condition was known, or reasonably should have been known by the accused. NOTE: For the purpose of this regulation, students should understand that

1. Forced intercourse or other unwanted sexual contact is defined as rape or sexual assault whether the assailant is a stranger or an acquaintance of the complainant
2. Intoxication of the assailant shall not diminish the assailant's responsibility for sexual assault

**102.09: Sexual Harassment.** Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when

1. Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity;
2. Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual; or

3. Such conduct has the purpose or effect of unreasonably interfering with an individual's performance or creating an intimidating, hostile, or offensive University environment

In determining whether the alleged conduct constitutes sexual harassment, consideration shall be given to the record of the incident as a whole and to the totality of the circumstances, including the context in which the alleged incidents occurred.

**102.10: Stalking.** Stalking behavior in which an individual willfully, maliciously, and repeatedly engages in a knowing course of conduct directed at a specific person which reasonably and seriously alarms, torments, or terrorizes the person, and which serves no legitimate purpose.

**102.11: “Fighting Words.”** The use of “fighting words” by students to harass any person(s) on University property, on other property to which these policies apply, or in connection with official University functions or University-sponsored programs. “Fighting words” are those personally abusive epithets which, when directly addressed to any ordinary person are, in the context used and as a matter of common knowledge, inherently likely to provoke a violent reaction whether or not they actually do so. Such words include, but are not limited to, those terms widely recognized to be derogatory references to race, ethnicity, religion, sex, sexual orientation, disability, and other personal characteristics. “Fighting words” constitute “harassment” when the circumstances of their utterance create a hostile and intimidating environment which the student uttering them should reasonably know will interfere with the victim’s ability to pursue effectively his or her education or otherwise to participate fully in University programs and activities.

**102.12: Hazing.** Hazing or any method of initiation or preinitiation into a campus organization or any activity engaged in by the organization or members of the organization which causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any student or other person.

**102.13: Obstruction or Disruption.** Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities.

**102.14: Disorderly Conduct.** Disorderly or lewd conduct.

**102.15: Disturbing the Peace.** Participation in a disturbance of the peace or unlawful assembly.

**102.16: Failure to Comply.** Failure to identify oneself to, or comply with directions of, a University official or other public official acting in the performance of their duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties.

**102.17: Controlled Substances.** Unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances, identified in Federal and State laws or regulations.

**102.18: Alcohol.** Manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations.

**102.19: Destructive Devices.** Possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices.

**102.20: Weapons.** Except as expressly permitted by law, possession, use, storage, or

manufacture of a firearm or other weapon capable of causing bodily injury.

**102.21: Violation of Disciplinary Conditions.** Violation of the conditions contained in the terms of a disciplinary action imposed under this Code.

**102.22: Violation of Emergency or Interim Suspension Conditions.** Violation of the conditions contained in a written Notice of Emergency or Interim Suspension issued pursuant to Section IV of this Code.

**102.23: Violation of Campus Restraining Order.** Violation of the conditions contained in a written Campus Restraining Order issued pursuant to Section III.A.2.a.(1) of this Code.

**102.24: University Properties.** Using University properties for the purpose of organizing or carrying out unlawful activity.

**102.25. Violations of Law.** Violation of Federal, State, or local laws.

## Rape and Other Forms of Sexual Assault

UCLA does not tolerate sexual assault in any form, including rape, acquaintance rape, or date rape. Where there is probable cause to believe that the campus regulations prohibiting sexual assault have been violated, the campus pursues disciplinary actions which may include sanctions up to and including dismissal from the University.

A student charged with sexual assault can be prosecuted under California criminal statutes *and* disciplined under the campus student conduct policies and regulations. Even if the criminal justice authorities choose not to prosecute, the campus can pursue disciplinary action.

### Definitions

For explicit definitions of **rape** and **sexual assault**, refer to Sections 102.08a and 102.08b of the Student Conduct Policies listed above.

### If a Person Has Been Raped or Sexually Assaulted

Those who believe that they are the victims of rape or other forms of sexual assault should

1. **Immediately call the police department.** If possible, call 911 or the UCLA Police Department at (310) 825-1491
2. **Get medical attention.** Campus police will provide transportation to the Santa Monica UCLA Medical Center Emergency Room for emergency medical treatment and evidence collection. A counselor from the Santa Monica Rape Treatment Center will be available at that time, free of charge

Utilize campus and community support services:

1. **Contact a Rape Services Consultant (RSC)** at the Center for Women and Men. RSCs have expertise in working with victims of rape or sexual assault. They can discuss options and alternatives, help identify the most appropriate support ser-

vices, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist UCLA faculty, staff, and students regardless of where or when the assault occurred. For assistance, contact the Center for Women and Men at (310) 825-3945 or go to 2 Dodd Hall and ask to speak to an RSC.

2. **Contact the Rape Treatment Center** at Santa Monica UCLA Medical Center (310-319-4000) for free emergency medical treatment and counseling services.

### Campus Discipline Process When the Assailant Is a Student

Those who believe that they are the victims of rape or other forms of sexual assault by a student on University properties or in conjunction with an official University function may file a complaint directly with the Office of the Dean of Students, 1206 Murphy Hall, <http://www.deanofstudents.ucla.edu/>.

Cases referred to the Office of the Dean of Students are treated under the hearing procedures set forth in the *UCLA Student Conduct Code* (<http://www.deanofstudents.ucla.edu/SCC-Table%20of%20Contents.htm>). Where the allegation is of rape or other forms of sexual assault, and the case is referred to the Student Conduct Committee, the following *additional* procedures shall apply:

1. The complainant shall be entitled, for support, to have up to two persons of the complainant’s choice accompany the complainant to the hearing. A support person may be called as a witness, and the fact that he or she is to act as a witness shall not preclude that person’s attendance throughout the entire hearing. If a support person is also a witness, the committee chair (or the hearing officer) may require him or her to testify prior to the complainant. Neither of these persons shall be entitled to represent or defend the complainant. Similar rights shall be afforded to the accused student.
2. The complainant shall have the right to be present during the entire hearing, notwithstanding the fact that the complainant is to be called as a witness.
3. Evidence of the complainant’s past sexual history, including opinion evidence, reputation evidence, and evidence of specific instances of the complainant’s sexual conduct, shall not be admissible by the accused student unless the committee chair or hearing officer makes a specific finding of relevance after an offer of proof by the accused student. Under no circumstances is past sexual history admissible to prove consent. The offer of proof must be made and resolved by the panel before the complainant testifies.
4. The hearing shall be closed to spectators.

## Harassment

### Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

#### Definitions

For explicit definitions of **sexual harassment**, refer to Section 102.09 of the Student Conduct Policies listed above.

#### Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the alleged offender's supervisor and/or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant's status at the University at the time of the alleged incident:

1. Academic Personnel, Assistant to the Vice Chancellor — Academic Personnel, 3109 Murphy Hall, (310) 794-4217
2. Campus Ombuds Office, 105 Strathmore Building, (310) 825-7627, or 924 Westwood Boulevard, Suite 540, (310) 794-6802 (for Medical Enterprises)
3. Center for Student Programming, Associate Director, 105 Kerckhoff Hall, (310) 825-7041
4. Center for Women and Men, Director, 2 Dodd Hall, (310) 825-3945
5. Office of the Dean of Students, Assistant Dean of Students, 1206 Murphy Hall, (310) 825-3871
6. Campus Human Resources/Employee and Labor Relations, Manager, 200 UCLA Wilshire Center, (310) 794-0860
7. Graduate Division, Office Manager, 1237 Murphy Hall, (310) 825-4383
8. Healthcare Human Resources, Employee Relations Manager, 924 Westwood Boulevard, Suite 200, (310) 794-0500
9. Neuropsychiatric Hospital, Administration/ Human Resources Associate Director, B7-370 NPI&H, (310) 206-5258
10. Office of Residential Life, Judicial Coordinator, Residential Life Building, (310) 825-3401
11. School of Dentistry, Assistant Dean, Student and Alumni Affairs, A3-042 Dentistry, (310) 825-7146; Student and Alumni Affairs Counselor, 23-087 Dentistry, (310) 8250-5248

12. School of Medicine, Human Resources Director, 924 Westwood Boulevard, Suite 540, (310) 794-6802; Senior Associate Dean of Student Affairs/Graduate Medical Education, 12-139 Center for the Health Sciences, (310) 825-6774; Dean's Office, Special Projects Director, 12-138 Center for the Health Sciences, (310) 794-1958
13. Staff Affirmative Action Office, Staff Affirmative Action Officer, 1103 Ueberroth Building, (310) 825-0751
14. Student Psychological Services, Director, 4223 Math Sciences, (310) 825-0768
15. UCLA Extension, Human Resources Director, 629 UNEX Building, (310) 825-4287; Student Services Director, 214 UNEX Building, (310) 825-2656
16. Santa Monica UCLA Medical Center, Healthcare Human Resources Manager, 1250 16th Street, Santa Monica 90404, (310) 319-4351

### Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person's sense of worth and interferes with one's ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The *University of California Policies Applying to Campus Activities, Organizations, and Students* (hereafter referred to as *Policies*; <http://www.ucop.edu/ucophome/uwnnews/aospol/toc.html>) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.08 of the *Policies*.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 102.04 of the *Policies*.

Further, under specific circumstances described in the *Universitywide Student Conduct Harassment Policy* (<http://www.deanofstu->

[dents.ucla.edu/](http://www.deanofstu-)), students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this *Policy* are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

1. Campus Ombuds Office, 105 Strathmore Building, (310) 825-7627, <http://www.sao-net.ucla.edu/ombuds/>
2. Center for Women and Men, 2 Dodd Hall, (310) 825-3945, <http://www.the-center.ucla.edu/>
3. Office of Residential Life, Residential Life Building, (310) 825-3401, <http://www.orl.ucla.edu/>
4. Office of International Students and Scholars, 106 Bradley Hall, (310) 825-1681, <http://www.intl.ucla.edu/home.htm>
5. Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985, <http://www.saonet.ucla.edu/sps.htm>
6. Office of Fraternity and Sorority Relations, 105 Kerckhoff Hall, (310) 825-6322, <http://www.greeklife.ucla.edu/>

#### Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of the available options is the most useful for the particular circumstances.

With regard to the *Universitywide Student Conduct Harassment Policy*, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this *Policy* and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

## Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the *UCLA Faculty Handbook* (copies are available in the Academic Personnel Office, 3109 Murphy Hall, and at <http://www.apo.ucla.edu/apoweb/facultyhandbook/9.htm#9c>). Part IIA outlines faculty obligations to students and reads as follows:

### Teaching and Students

Ethical Principles: "As teachers, the professors encourage the free pursuit of learning in their students. They hold before them the best scholarly standards of their discipline. Professors demonstrate respect for students as individuals and adhere to their proper roles as intellectual guides and counselors. Professors make every reasonable effort to foster honest academic conduct and to assure that their evaluations of students reflect each student's true merit. They respect the confidential nature of the relationship between professor and student. They avoid any exploitation, harassment, or discriminatory treatment of students. They acknowledge significant academic and scholarly assistance from them. They protect their academic freedom." (from 1966 AAUP statement, revised 1987)

### Types of Unacceptable Conduct

Failure to meet the responsibilities of instruction, including (1) arbitrary denial of access to instruction, (2) significant intrusion of material unrelated to the course, (3) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (4) evaluation of student work by criteria not directly reflective of course performance, (5) undue and unexcused delay in evaluating student work.

Discrimination against a student on political grounds or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

Knowing violation of University policy, including the pertinent guidelines, applying to nondiscrimination against students on the basis of handicap.

Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

### Charges of Violation

If a student has reason to believe that a faculty member has violated the Faculty Code of Conduct and that formal discipline may be warranted, the alleged violator should be reported

to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with the Campus Ombuds Office and a member of the Academic Senate Grievance and Disciplinary Procedures Committee, file such a charge in person if the student continues to feel it is warranted.

## Residence for Tuition Purposes

Students who have not been living in California with intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the University must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

### Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of The Regents of the University of California. Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

### Who Is a Resident?

Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types — A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence students must be physically present in California for more than one year, and they must have come here with the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California resi-

dents or students were not enrolled in a regular session at any University of California campus prior to fall 1993, they are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse or their parents.

## Requirements for Financial Independence

Students are considered "financially independent" if one or more of the following apply: (1) they are at least 24 years of age by December 31 of the calendar year for which they are requesting residence classification; (2) they are a veteran of the U.S. Armed Forces; (3) they are a ward of the court or both parents are deceased; (4) they have legal dependents other than a spouse; (5) they are married, or a graduate student or a professional student, and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the two tax years immediately preceding the term for which they are requesting resident classification, and they can demonstrate self-sufficiency for those years and the current year. *Note:* Financial dependence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in University-administered funds (e.g., grants, stipends, fellowships) in the term for which classification is sought.

## Establishing Intent to Become a California Resident

Indications of students' intent to make California their permanent residence can include the following: registering to vote and voting in California elections; designating California as their permanent address on all school and employment records, including military records if they are in the military service; obtaining a California driver's license or, if they do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence; establishing a California residence in which they keep their personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which students claim residence can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.

## General Rules Applying to Minors

If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent's right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa which precludes them from establishing domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

## Specific Rules Applying to Minors

### Divorced or Separated Parents

Students may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.

### Parent of Minor Moves from California

Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (1) they remained in California after their parent(s) departed, (2) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (3) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

### Two-Year Care and Control

Students may be entitled to resident status if they are U.S. citizens or eligible aliens and they have lived continuously with an adult who is not their parent for at least two years prior to the residence determination date. The adult with whom they are living must have been responsible for their care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

## Exemptions from Nonresident Tuition

### Member of the Military

If students are members of the U.S. military stationed in California on active duty, unless they are assigned for educational purposes to a state-supported institution of higher education, they may be exempt from the nonresident tuition fees until they have lived in California long enough to become a resident. They must provide the residence deputy on campus with

a statement from their commanding officer or personnel officer stating that their assignment to active duty in California is not for educational purposes. The letter must include the dates of their assignment to the state.

### Spouse or Other Dependents of Military Personnel

Students are exempt from payment of the nonresident tuition fee if they are a spouse or a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until they have lived in California long enough to become a resident. Students must petition for a waiver of the nonresident tuition fee each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

### Child or Spouse of Faculty Member

To the extent funds are available, if students are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

### Child or Spouse of University Employee

Students may be entitled to resident classification if they are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Their parent's or spouse's employment status with the University must be ascertained each term.

### Child of Deceased Public Law Enforcement or Fire Suppression Employee

Students may be entitled to a waiver of the nonresident tuition fee if they are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

### Dependent Child of a California Resident

If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of the nonresident tuition until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

## Temporary Absences

If persons are nonresident students who are in the process of establishing a residence for tuition purposes and they return to their former home during noninstructional periods, their presence in the state is presumed to be solely for educational purposes and only convincing evidence to the contrary rebuts this presumption. Students who are in the state solely for educational purposes are NOT classified as residents for tuition purposes regardless of the length of their stay.

If persons are students who have been classified as residents for tuition purposes and they leave the state temporarily, their absence could result in the loss of their California residence. The burden is on students (or their parents if they are minors) to verify that they did nothing inconsistent with their claim of a continuing California residence during their absence. Steps that students (or their parents) should take to retain a California residence include the following:

1. Continue to use a California permanent address in all records — educational, employment, military, etc.
2. Continue to satisfy California tax obligations. If students are claiming California residence, they are liable for payment of income taxes on their total income from the date they establish their residence in the state, including income earned in another state or country.
3. Retain a California voter's registration and vote by absentee ballot.
4. Maintain a California driver's license and vehicle registration. If it is necessary to change the driver's license or vehicle registration, students must change them back within the time prescribed by law.

## Petition for Resident Classification

Students may obtain a petition at 1113 Murphy Hall for a change of classification from nonresident to resident status. All changes of status must be initiated at least three weeks in advance of the fee payment deadline for that term.

## Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

## Incorrect Classification

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, they are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.

## Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1429 (310-825-3447; <http://www.registrar.ucla.edu/faq/res.htm>) or to the Senior Paralegal — Residence Matters, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the senior paralegal within 45 days of notification of the residence deputy's final decision.

## Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not students are legal residents for tuition purposes. Registration cannot be processed without this information. The Registrar's Office on campus maintains the requested information. Students have the right to inspect University records containing the residence information requested on the form.

## Financial Aid Minimum Progress Standards

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, students expect they cannot meet the satisfactory academic progress requirements listed below, they should contact the Financial Aid Office immediately for further advising.

### Undergraduate Students

#### Qualitative Standard

The qualitative standard is enforced by the college or school. Students are notified by their academic department if they fall below the required grade-point average (GPA).

#### Quantitative Standard

This standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of terms, including summer. It may differ from the college/school requirement.

All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as full-time students, they must successfully complete at least 24 units in their first academic year at UCLA to maintain satisfactory academic progress. Thereafter, students must successfully complete 57 units by the end of the sixth term, 90 units by the end of the ninth term, 123 units by the end of the twelfth term, 156 units by the end of the fifteenth term, and 180 units by the end of the seventeenth term.

After 17 terms of enrollment as a full-time student or the equivalent as a part-time student, no further need-based financial aid is granted.

The measurement of progress occurs at the end of the academic year. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If students enter UCLA in advanced standing, the number of terms for which they are eligible for aid is reduced proportionally to the number of transfer units credited to their record. For example, students who are credited with 90 transfer units would have only 11 terms of financial aid eligibility as an undergraduate at UCLA.

If persons are continuing students at UCLA at the time they apply for financial aid, their progress is measured by the satisfactory academic progress chart to determine their eligibility (i.e., they must have successfully completed 57 units if they attended UCLA for six terms). They would then have only 11 terms of financial aid eligibility.

#### Nonstandard Enrollment

Progress for students approved for part-time enrollment by the Registrar's Office is measured by a modified schedule. Part-time students should inform the Financial Aid Office of their enrollment arrangements so their aid can be adjusted accordingly.

#### Successful Completion

To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students) in a course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

#### Withdrawal and Cancellation

Withdrawal after the first day of classes during a term counts as a term attended when determining overall term and unit count eligibility, unless students do not attend any classes for the given term and receive a 100 percent refund of all fees. Cancellation of registration on or before the first day of classes does not count as a term attended when determining term or unit count eligibility. Administrative cancellation does not count toward the overall term or unit count eligibility.

## Disqualification and Reinstatement

The Financial Aid Office monitors satisfactory progress annually after Winter Quarter grades are recorded. Progress is measured according to the number of terms students have attended and the number of units they have successfully completed.

Students not meeting the requirements shown on the schedule may receive a warning letter or have their financial aid suspended. Once deficiencies are satisfied, financial aid may be reinstated.

Financial aid eligibility is reinstated for the term following the term in which students reestablish compliance with the units-per-term schedule. For example, if they successfully complete 16 units in Fall Quarter and therefore make up the deficiency, they become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of their need and the availability of funds.

## Appeal Process

Students who fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in the immediate family, or other such mitigating circumstances may appeal their disqualification.

To appeal, students should submit a letter and supporting documentation to the Financial Aid Appeal Committee explaining the circumstances and how they affected their ability to meet the requirements. The committee evaluates the request based on the rationale and evidence provided.

## Graduate Students

### Qualitative Standard

The qualitative standard is enforced by the dean of the Graduate Division in consultation with the department.

### Quantitative Standard

Students must successfully complete at least 8 units per term of enrollment to be eligible for financial aid as full-time students. Approved study loads of less than 8 units result in proportionally reduced aid for that term and are charged against the maximum period of eligibility at the appropriate proportional rate.

### Disqualification and Appeal Process

If students fail to meet the qualitative and quantitative requirements, their financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by their academic department, the dean of the Graduate Division, and/or the Financial Aid Appeal Committee.

### Period of Eligibility

The degree program to which students are admitted determines the maximum number of terms for which they can receive need-based financial aid. Terms for which no need-based aid is received are considered when determining the remaining number of terms of financial aid eligibility.

Students who are in a credential program or a professional master's program (other than Master of Fine Arts) are eligible for a maximum of nine terms of need-based financial aid.

Students who are in a Master of Fine Arts program are eligible to apply for aid for the first 12 terms of enrollment. If students are in an M.A. or M.S. program, a doctoral program, or a combination master's/doctoral program, their eligibility expires after 27 terms of enrollment. Students who change their program may be accommodated through an extension of terms of eligibility. The extension should be secured at the time the program change is made.

#### **Professional Schools**

Students attending the Schools of Dentistry, Law, and Medicine are covered by criteria established by the respective school.

## **Grading Regulations**

### **Assigning a Grade**

The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When on an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

### **Grade Complaints**

A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Campus Ombuds Office or may follow the procedures for the formal filing of charges (see Faculty Code of Conduct earlier in the Appendix). If a charge is sustained by the Academic Senate

Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

### **Correction of Grades**

All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. All grade changes are recorded on the transcript.

### **Policy on Alternate Examination Dates**

In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved.

In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

Students unable to reach a satisfactory arrangement with their instructor should contact the Campus Ombuds Office, 105 Strathmore Building, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Campus Ombuds Office or the Office of the Dean of Students for assistance.

### **Undergraduate Final Examinations**

No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and are given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the Undergraduate Council, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

### **Disclosure of Student Records**

Pursuant to the Federal Family Educational Rights and Privacy Act, the California Education Code, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right to (1) inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) have withheld from disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) file complaints with the U.S. Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

UCLA, in accordance with the Federal and State Laws and the University Policies, has designated the following categories of personally identifiable information as "public information" which UCLA may release and publish without the student's prior consent: name, ad-

dress (local/mailling, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailling, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this "public information" released and published may so indicate through URSA OnLine (<http://www.ursa.ucla.edu/>). To restrict the release and publication of the additional items in the category of "public information," complete the Decline to Release form available from Enrollment and Degree Services, 1113 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a variety of offices, including the Registrar's Office, Office of the Dean of Students, UCLA Career Center, Graduate Division, and the offices of a student's college or school and major department. Students are referred to the *UCLA Campus and CHS Directory* which lists all the offices that may maintain student records, together with their campus address and telephone number. Students have the right to inspect their student records in any such office subject to the terms of the Federal and State Laws and the University Policies. Inspection of student records maintained by the Registrar's Office is by appointment only and must be arranged 24 hours in advance. Call (310) 206-0482 or inquire at Academic Record Services, 1134 Murphy Hall.

A copy of the Federal and State Laws, the University Policies, and the *UCLA Campus and CHS Directory* may be inspected in the office of the Information Practices Coordinator, 600 UCLA Wilshire Center. Information concerning students' hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

In addition to the public information described above, information related to students' Social Security number, sex, and marital status, and the name(s), address(es), and telephone number(s) of their parents or next of kin are made available to the UCLA External Affairs Department for use in alumni, development, and public relations activities. To restrict the release of this additional information, complete a Request for External Affairs Information Restriction form available from Enrollment and Degree Services, 1113 Murphy Hall.

## Undergraduate Retention, Graduation, and Time to Degree

Retention and graduation rates are currently the highest on record for UCLA and among the highest for public universities anywhere in the country. For undergraduates entering UCLA over three years from 1997 to 1999, more than 96 percent of new freshmen and 93 percent of new transfers were still enrolled at UCLA one year later.

Over the past three years the four-year, five-year, and six-year graduation rates for entering freshmen averaged 43, 76, and 80 percent respectively. More than 81 percent of all freshmen entering from 1987 to 1994 have graduated from UCLA. Final graduation rates above 84 percent are projected for all freshmen cohorts arriving since 1995.

Over the past three years the two-year, three-year, and four-year graduation rates for entering transfer students have averaged 40, 75, and 82 percent respectively. More than 82 percent of all transfer students entering from 1990 to 1996 have graduated from UCLA. Final graduation rates above 84 percent are projected for all transfer cohorts arriving since 1997. The graduation rates listed above refer exclusively to degrees awarded by UCLA. Students who transfer and graduate from another UC campus or university are not included.

Time to degree for UCLA undergraduates has declined significantly over the past decade. In 1999-00 more than 3,600 baccalaureate degrees were awarded to students who entered directly from high school. The average number of quarters registered at UCLA was 12.95, down from an average of 13.59 quarters for similar graduates in 1990-91. Among recent graduates, 57 percent were registered for 12 quarters or less (i.e., four years or less), 65 percent for 13 quarters or less, 73 percent for 14 quarters or less, and 93 percent for 15 quarters or less (i.e., five years or less).

In 1999-00 more than 2,000 baccalaureate degrees were awarded to students who entered as transfers. The average number of quarters registered at UCLA was 7.42, down from an average of 8.31 quarters for similar graduates in 1990-91. Among recent graduates, 45 percent were registered for six quarters or less (i.e., two years or less), 61 percent for seven quarters or less, 70 percent for eight quarters or less, and 89 percent for nine quarters or less (i.e., three years or less).

Additional information is available at <http://www.apb.ucla.edu>.

## Campus Security Information

### UCLA Police Department

The UCLA Police Department (310-825-1491; <http://www.ucpd.ucla.edu>), located at Westwood Plaza and Circle Drive South, has 56

sworn California State Police Officers empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services and community safety programs.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the city attorney's office.

### Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus, Center for the Health Sciences, and University Apartments South. The City of Los Angeles Police Department does not handle calls for service on campus. All requests for police service should be made to the UCLA Police Department. All crime occurring on campus and in the Center for the Health Sciences should be reported immediately to the department to ensure appropriate action is taken. Crimes occurring off campus should be reported immediately to the local law enforcement agency.

Police, fire, or medical EMERGENCIES can be reported by dialing **911** from any telephone on campus. All telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded or yellow Emergency Reporting Telephones located throughout the campus.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

### Crime Statistics and Reports

As required by the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, UCLA prepares an annual report describing campus security policy and information concerning alcohol and drug use, crime prevention, crime reporting, and related matters. It also includes three years of crime statistics. Printed copies are available by calling (310) 825-1491. The report can be accessed at <http://www.ucpd.ucla.edu/ucpd/clery.htm>.

### Community Service Officers

The UCLA Police Department employs approximately 125 student community service officers (CSOs; [http://www.ucpd.ucla.edu/ucpd/services\\_escort.html](http://www.ucpd.ucla.edu/ucpd/services_escort.html)) who are the "eyes and ears" (trained observers) of the department and act as nonintervention visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department's Communications Center and provide a direct link to police, fire, or medical aid. CSOs provide security service

to a number of campus buildings, including residence halls and libraries. They are most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service operates every day of the year from dusk to 1 a.m. Individuals requesting the service call the Communications Center; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service provides a safe and convenient mode of transportation around campus at night and is accessible to people with disabilities.

### Crime Prevention

An involved community is one of the best defenses against crime. Therefore, the department is committed to a community policing philosophy and supports a proactive Crime Prevention Unit ([http://www.ucpd.ucla.edu/ucpd/services\\_crimeprev.html](http://www.ucpd.ucla.edu/ucpd/services_crimeprev.html)) that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and rape prevention. Other programs are developed to meet the special needs of the campus community. Brochures and literature on crime prevention and personal safety are available. The Center for Women and Men and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, pornography, and the continuum of violence and rape in society. The educational programs, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exercises. The Center for Women and Men reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. The center works closely with the student housing offices and the police department to increase campus safety.

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity which pose a potential threat to the campus are brought immediately to the attention of the community through *Campus Alert Bulletins* ([http://www.ucpd.ucla.edu/ucpd/bulletin\\_crime.html](http://www.ucpd.ucla.edu/ucpd/bulletin_crime.html)).

### Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behav-

ioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs which are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Student Psychological Services (310-825-7985; <http://www.saonet.ucla.edu/sps.htm>) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling is treated in accordance with University Policies and State and Federal Laws. Any decision to seek assistance is not used in connection with any academic determination or as a basis for disciplinary proceedings.

### Policies

UCLA has been designated drug free, and only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the responsibility to better inform the UCLA community about alcohol and substance abuse.

The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment. Refer to the UCLA policies on substance abuse for further information.

The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

### Residential Housing

UCLA is the size of a small city and provides residential housing to approximately 18,000 students. Housing facilities range from apartments designed for students with children to multi-student apartment complexes to high-rise student residence halls. The UCLA Police Department and student housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, *Crime Alert Bulletins* are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple common-sense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are sta-

tioned at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities are under the shared jurisdiction of their local police department and the UCLA Police Department, which provides assistance to students, faculty, and staff and/or referrals to neighboring police departments.

### Safety Tips

The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Angeles community, individuals with criminal intent are able to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be alert and aware of their surroundings and exercise good commonsense safety precautions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and the UCLA Police Department. Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

---

## APPENDIX B: UNIVERSITY ADMINISTRATIVE OFFICERS

Terms of Regents (<http://www.ucop.edu/regents/>) appointed by the Governor expire March 1 of the year in parentheses. The Student Regent (Tracy M. Davis) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

### Regents Ex Officio

*Governor of California*  
Gray Davis  
*Lieutenant Governor of California*  
Cruz M. Bustamante  
*Speaker of the Assembly*  
Robert M. Hertzberg  
*State Superintendent of Public Instruction*  
Delaine Eastin  
*President of the Alumni Association of the University of California*  
Jeffrey A. Seymour  
*Vice President of the Alumni Association of the University of California*  
Robert C. Morrison  
*President of the University*  
Richard C. Atkinson

### Appointed Regents

William T. Bagley (2002)  
Ward Connerly (2005)  
John G. Davies (2004)  
Judith L. Hopkinson (2009)

Odessa P. Johnson (2012)  
 S. Sue Johnson (2002)  
 Joanne C. Kozberg (2010)  
 Sherry L. Lansing (2010)  
 David S. Lee (2006)  
 George Marcus (2012)  
 Velma Montoya (2005)  
 John J. Moores (2009)  
 Gerald L. Parsky (2008)  
 Peter Preuss (2008)  
 Tom Sayles (2006)  
 Tracy M. Davis, Student Regent (2002)

#### **Faculty Representatives to the Board of Regents**

Michael Cowan  
 Chand Viswanathan

#### **Officers of The Regents**

*President of The Regents*  
 Gray Davis  
*Chair of The Regents*  
 S. Sue Johnson  
*Vice Chair of The Regents*  
 Sherry L. Lansing  
*General Counsel*  
 James E. Holst  
*Secretary*  
 Leigh Trivette  
*Treasurer*  
 David H. Russ

#### **Office of the President**

*President of the University*  
 Richard C. Atkinson  
*Provost and Senior Vice President — Academic Affairs*  
 C. Judson King  
*Senior Vice President — Business and Finance*  
 Joseph P. Mullinix  
*Senior Vice President — University and External Relations*  
 Bruce B. Darling  
*Vice President — Agriculture and Natural Resources*  
 W.R. Gomes  
*Vice President — Budget*  
 Lawrence C. Hershman  
*Vice President — Clinical Services Development*  
 William H. Gurtner  
*Interim Vice President — Educational Outreach*  
 Manuel Gomez

*Vice President — Financial Management*  
 Anne C. Broome  
*Vice President — Health Affairs*  
 Michael V. Drake

#### **Chancellors of the Campuses**

*Chancellor at Berkeley*  
 Robert M. Berdahl  
*Chancellor at Davis*  
 Larry N. Vanderhoef  
*Chancellor at Irvine*  
 Ralph J. Cicerone  
*Chancellor at Los Angeles*  
 Albert Carnesale  
*Chancellor at Merced*  
 Carol Tomlinson-Keasey  
*Chancellor at Riverside*  
 Raymond L. Orbach  
*Chancellor at San Diego*  
 Robert C. Dynes  
*Chancellor at San Francisco*  
 J. Michael Bishop  
*Chancellor at Santa Barbara*  
 Henry T. Yang  
*Chancellor at Santa Cruz*  
 M.R.C. Greenwood

#### **University Professors, UCLA**

Donald J. Cram, *University Professor Emeritus*, Los Angeles, Chemistry and Biochemistry  
 Robert B. Edgerton, *University Professor*, Los Angeles, Anthropology, Psychiatry and Biobehavioral Sciences  
 M. Frederick Hawthorne, *University Professor*, Los Angeles, Chemistry and Biochemistry

#### **UCLA Administrative Officers**

*Chancellor*  
 Albert Carnesale, Ph.D.  
*Executive Vice Chancellor*  
 Wyatt R. Hume, B.D.S., Ph.D., D.D.Sc.  
*Administrative Vice Chancellor*  
 Peter W. Blackman, J. D.  
*Vice Chancellor — Academic Personnel*  
 Norman Abrams, J.D.  
*Vice Chancellor — External Affairs*  
 Michael C. Eicher, B.S.  
*Vice Chancellor — Finance and Budget*  
 Steven A. Olsen, M.P.P.  
*Vice Chancellor — Graduate Studies and Dean of Graduate Division*  
 Claudia Mitchell-Kernan, Ph.D.  
*Vice Chancellor — Legal Affairs*  
 Joseph D. Mandel, LL.B.

*Vice Chancellor — Research Programs*  
 Roberto Peccei, Ph.D.  
*Vice Chancellor — Student Affairs*  
 Winston C. Doby, Ed.D.  
*Provost — Letters and Science*  
 Brian P. Copenhagen, Ph.D.  
*Provost — Medical Sciences*  
 Gerald S. Levey, M.D.  
*University Librarian*  
 Gloria S. Werner, M.L.  
*Dean of University Extension*  
 Robert Lapiner, Ph.D.

#### **Deans/Provosts of UCLA Colleges and Schools**

*School of the Arts and Architecture*  
 Daniel Neuman, Ph.D.  
*School of Dentistry*  
 No-Hee Park, D.M.D., Ph.D.  
*Graduate School of Education and Information Studies*  
 Aimée Dorr, Ph.D.  
*School of Engineering and Applied Science*  
 A.R. Frank Wazzan, Ph.D.  
*School of Law*  
 Jonathan D. Varat, J.D.  
*College of Letters and Science*  
*Provost*  
 Brian P. Copenhagen, Ph.D.  
*Division of Humanities*  
 Pauline R. Yu, Ph.D.  
*Division of Life Sciences*  
 Frederick A. Eiserling, Ph.D.  
*Division of Physical Sciences*  
 Roberto Peccei, Ph.D.  
*Division of Social Sciences*  
 Scott L. Waugh, Ph.D.  
*John E. Anderson Graduate School of Management*  
 Bruce G. Willison, M.B.A.  
*School of Medicine*  
 Gerald S. Levey, M.D.  
*School of Nursing*  
 Marie J. Cowan, R.N., Ph.D.  
*School of Public Health*  
 Linda Rosenstock, M.D.  
*School of Public Policy and Social Research*  
 Barbara J. Nelson, Ph.D.  
*School of Theater, Film, and Television*  
 Robert Rosen, M.A.

---

## APPENDIX C: ENDOWED CHAIRS

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University's three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or "chairs," which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 169 endowed chairs which have been approved by the Office of the President of the University of California, as follows. (Asterisks indicate new chairs which have been approved by the Office of the President since publication of the 1999-01 *UCLA General Catalog*.)

### School of the Arts and Architecture

S. Charles Lee Chair in Architecture and Urban Design  
Harvey S. Perloff Chair  
UCLA Art Council Professorship of Art

### School of Dentistry

\*Tarrson Family Endowed Chair in Periodontics

### Graduate School of Education and Information Studies

Allan Murray Cartter Chair in Higher Education  
George F. Kneller Chair in Education and Anthropology  
George F. Kneller Chair in Education and Philosophy  
\*Presidential Chair in Educational Equity

### Henry Samueli School of Engineering and Applied Science

L.M.K. Boelter Chair in Engineering  
Roy and Carol Doumani Chair in Biomedical Engineering  
Norman E. Friedmann Chair in Knowledge Sciences  
Hughes Aircraft Company Chair in Electrical Engineering  
Hughes Aircraft Company Chair in Manufacturing Engineering  
Levi James Knight, Jr., Chair in Engineering  
Nippon Sheet Glass Company Chair in Materials Science  
Northrop Chair in Electrical Engineering/Electromagnetics  
Ralph M. Parsons Chair in Chemical Engineering  
Ben Rich Lockheed Martin Chair in Aeronautics  
Rockwell International Chair in Engineering  
\*William Frederick Seyer Term Chair in Materials Electrochemistry  
TRW Chair in Electrical Engineering

### School of Law

Harry Graham Balter Chair in Law  
Connell Professorship of Law  
Richard C. Maxwell Chair in Law  
Arjay and Frances Fearing Miller Chair in Law  
David G. and Dallas P. Price Chair in Law  
Security Pacific Bank Chair

William D. Warren Chair in Law

### College of Letters and Science

Armen A. Alchian Chair in Economic Theory  
Maurice Amado Chair in Sephardic Studies  
Armenian Educational Foundation Chair in Modern Armenian History  
\*RBSL Bergman Foundation Chair in Business Economics  
Henry J. Bruman Chair in German History  
Ralph Bunche Chair in International Studies  
Edward W. Carter Chair in Netherlandish Art  
James S. Coleman Chair in International Development Studies  
Courtaulds Chair in Chemistry  
Norman Cousins Endowed Chair in Psychoneuroimmunology  
Navin and Pratima Doshi Chair in Premodern Indian History  
Mr. and Mrs. C.N. Flint Professorship of Philosophy  
Evan Frankel Endowed Chair in English  
Gloria and Paul Griffin Chair in Philosophy  
Marvin Hoffenberg Chair in American Politics and Public Policy  
\*Robert Michaels Chair in Behavioral Neuroscience  
\*Robert and Sherry Michaels Chair for Excellence in Psychology  
Franklin D. Murphy Chair in Italian Renaissance Studies  
Narekatsi Chair in Armenian Studies  
"1939" Club Chair  
President's Chair in Developmental Immunology  
Hans Reichenbach Chair in Scientific Philosophy  
\*Musa Sabi Chair in Iranian Studies  
David S. Saxon Presidential Chair in Physics  
Louis B. Slichter Chair in Geophysics and Planetary Physics  
Charles Speroni Chair in Italian Literature and Culture  
\*Staglin Family Chair in Psychology  
\*Steinmetz Chair in Classical Archaeology and Material Culture  
\*Paul I. Terasaki Chair in U.S.-Japanese Relations  
UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies  
UCLA Foundation Chair  
Eugen Weber Chair in Modern European History  
Alexander von Humboldt Endowed Chair in Geography  
Saul Winstein Chair in Organic Chemistry

### John E. Anderson Graduate School of Management

Allstate Chair in Insurance and Finance  
Andersen Worldwide Chair in Management  
John E. Anderson Chair in Management  
Marion Anderson Chair in Management  
California Chair in Real Estate and Land Economics  
Edward W. Carter Chair in Business Administration  
William M. Cockrum Professorship in Entrepreneurial Finance  
James A. Collins Chair in Management  
Warren C. Corder Chair in Money and Financial Markets

Ernst and Young Chair in Accounting  
Henry Ford II Chair in International Management  
\*Lee and Seymour Graff Endowed Professorship  
Goldyne and Irwin Hearsh Chair in Money and Banking  
IBM Chair in Computers and Information Systems  
Joseph Jacobs Chair in Entrepreneurial Studies  
Neil Jacoby Chair in Management  
Betsy Wood Knapp Professorship for Innovation and Creativity  
Bud Knapp Professorship  
Harry and Elsa Kunin Chair in Business and Society  
William E. Leonhard Chair in Management  
Chauncey J. Medberry Chair in Management  
Howard Noble Chair in Management  
Paine Chair in Management  
Price Waterhouse Chair in Accounting  
George Robbins Chair in Management  
Sanford and Betty Sigoloff Chair in Corporate Renewal  
Times Mirror Chair in Management Strategy and Policy  
Ho-Su Wu Chair in Management

### School of Medicine

William S. Adams, M.D., Chair in Medicine  
Louis D. Beaumont Chair in Surgery  
Jerome L. Belzer Chair in Medical Research  
\*Bing Professorship of Urologic Research  
Bowyer Professorship of Medical Oncology  
Judson Braun Chair in Biological Psychiatry  
Rubin Brown Chair in Pediatric Neurology  
Joseph Campbell Chair in Child Psychiatry  
Iris Cantor Chair in Breast Imaging  
Edward W. Carter Chair in Internal Medicine  
Castera Chair in Cardiology  
Tony Coelho Chair in Neurology  
Norman Cousins Endowed Chair in Psychoneuroimmunology  
Crump Chair in Medical Engineering  
M. Philip Davis Chair in Microbiology and Immunology  
\*Roy and Carol Doumani Chair in Urological Oncology  
Dumont-UCLA Chair in Transplantation Surgery  
Max Factor Family Foundation Chair in Nephrology  
Charles Kenneth Feldman Chair in Ophthalmology  
Laraine and David Gerber Chair in Ophthalmology  
\*Joan S. and Ralph N. Goldwyn Chair in Immunobiology and Transplantation  
Dolly Green Chair in Ophthalmology  
Maud Cady Guthman Chair in Cardiology  
Stefan Hatos Endowed Chair in Psychiatry and Biobehavioral Sciences  
Ronald S. Hirschberg Chair in Translational Pancreatic Cancer Research  
Ronald L. Katz, M.D., Endowed Chair in Anesthesiology  
Chizuko Kawata Chair in Cardiology  
\*Karl Kirchgessner Foundation Chair in Vision Science  
George F. Kneller Chair in Family Medicine  
Grace and Walter Lantz Endowed Chair  
Eleanor I. Leslie Chair in Neuroscience

William P. Longmire, Jr., Chair in Surgery  
Gordon and Virginia MacDonald Distinguished  
Chair in Human Genetics  
Charles H. Markham Chair in Neurology  
Della Martin Chair in Psychiatry  
David May II Chair in Ophthalmology  
\*Henry Alvin and Carrie L. Meinhardt Chair in  
Kidney Cancer Research  
Sherman M. Mellinkoff Distinguished Professor  
in Medicine Endowed Chair  
James H. Nicholson Chair in Pediatric  
Cardiology  
\*Helga and Walter Oppenheimer Endowed  
Chair in Orthopaedic Oncology  
Albert F. and David H. Parlow-Soloman Chair  
for UCLA Program on Aging  
Samuel J. Pearlman, M.D., and Della Z.  
Pearlman Chair in Head and Neck Surgery  
\*Carl M. Pearson, M.D., Endowed Chair in  
Rheumatology  
Thomas P. and Katherine K. Pike Chair in  
Alcohol Studies  
Elizabeth R. and Thomas E. Plott Chair in  
Gerontology  
Edith Agnes Plumb Endowed Chair in  
Neurobiology  
\*Harold and Pauline Price Term Endowed  
Chair  
Revlon Chair in Women's Health  
Leo G. Rigler Chair in Radiological Sciences  
Augustus S. Rose Chair in Neurology  
\*Carol and Saul Rosenzweig Endowed Chair  
in Cancer Therapies Development  
Bernard G. Sarnat, M.D., Endowed Chair in  
Craniofacial Biology  
Jennifer Jones Simon Chair in Radiation  
Oncology  
Norton Simon Chair in Biophysics  
Norman F. Sprague Chair in Molecular  
Oncology  
Fran and Ray Stark Foundation Chair in  
Digestive Diseases  
Fran and Ray Stark Foundation Chair in  
Urology  
Frances and Ray Stark Chair in  
Ophthalmology  
Frances Stark Chair in Neurology  
Jules Stein Chair in Ophthalmology  
W. Eugene Stern Chair in Neurosurgery  
Ruth and Raymond H. Stotter Chair in  
Neurosurgery  
Bradley R. Straatsma, M.D., Endowed Chair in  
Ophthalmology  
Dorothy and Leonard Straus Chair in  
Gastroenterology in Memory of Gussie  
Borun  
Streisand Chair in Cardiology  
Leon J. Tiber, M.D., and David S. Alpert, M.D.,  
Chair in Medicine  
Vernon O. Underwood Family Chair In  
Ophthalmology  
\*Variety Club-D. Barry Reardon Endowed  
Chair in Pediatric Hematology/Oncology  
Richard D. and Ruth P. Walter Chair in  
Neurology  
Wasserman Professor of Ophthalmology

**School of Nursing**  
Lulu Wolf Hassenplug Chair in Nursing  
\*Audrienne H. Moseley Chair in Biological  
Nursing Science  
Audrienne H. Moseley Chair in Nursing

\*Audrienne H. Moseley Chair in Women's  
Health

### School of Public Health

Fred H. Bixby Chair in Population Policy  
Fred W. and Pamela K. Wasserman Chair in  
Health Services

### School of Public Policy and Social Research

Marjorie Crump Chair in Social Welfare  
Harvey S. Perloff Chair

### School of Theater, Film, and Television

\*Lew and Pamela Hunter/Jonathan Zakin  
Chair in Screenwriting

## APPENDIX D: DISTINGUISHED TEACHING AWARDS

### Academic Senate Recipients

Each year the UCLA Alumni Association pre-  
sents Distinguished Teaching Awards to five  
Academic Senate faculty members. The highly  
prized awards are presented at the annual  
UCLA Alumni Association Awards Ceremony,  
and selection of recipients is based on recom-  
mendations of the Academic Senate Commit-  
tee on Teaching. Nominations are solicited  
from academic departments during Fall Quar-  
ter.

The Luckman Distinguished Teaching Awards  
Program was established in late 1991 after re-  
ceipt of a generous gift from Harriet and  
Charles Luckman. Awards given for 1992  
through 1997 were named the Luckman Distin-  
guished Teaching Awards.

#### 1961

John F. Barron (*Economics*)  
Hector E. Hall (*Physiology*)  
Kenneth N. Trueblood (*Chemistry and  
Biochemistry*)

#### 1962

Charles W. Hoffman (*Germanic Languages*)  
Thomas P. Jenkin (*Political Science*)  
Ken Nobe (*Chemical Engineering*)

#### 1963

Carl W. Hagge (*Germanic Languages*)  
Wendell P. Jones (*Education*)  
Robert H. Sorgenfrey (*Mathematics*)  
Saul Winstein (*Chemistry and Biochemistry*)

#### 1964

Mostafa A. El-Sayed (*Chemistry and  
Biochemistry*)  
Leon Howard (*English*)  
Moshe F. Rubinstein (*Civil and Environmental  
Engineering*)

#### 1965

E.A. Carlson (*Biology*)  
W.R. Hitchcock (*History*)  
Allen Parducci (*Psychology*)

William R. Romig (*Microbiology and Molecular  
Genetics*)

#### 1966

George A. Bartholomew (*Biology*)  
William P. Gerberding (*Political Science*)  
Hans Meyerhoff (*Philosophy*)  
Joseph E. Spencer (*Geography*)

#### 1967

Basil Gordon (*Mathematics*)  
J.A.C. Grant (*Political Science*)  
William Matthews (*English*)  
David S. Saxon (*Physics and Astronomy*)  
E.K.L. Upton (*Physics and Astronomy*)

#### 1968

Edward W. Graham (*Chemistry and  
Biochemistry*)  
W. James Popham (*Education*)  
Sydney C. Rittenberg (*Microbiology and  
Molecular Genetics*)  
Robert P. Stockwell (*Linguistics*)  
Fred N. White (*Physiology*)

#### 1969

Robert J. Finkelstein (*Physics and Astronomy*)  
Douglas S. Hobbs (*Political Science*)  
J.E. Phillips (*English*)  
Raymond M. Redheffer (*Mathematics*)  
Margret I. Sellers (*Microbiology and  
Immunology*)

#### 1970

Ehrhard Bahr (*Germanic Languages*)  
Joseph Cascarano (*Biology*)  
B. Lamar Johnson (*Education*)  
Daniel Kivelson (*Chemistry and Biochemistry*)  
Richard D. Lehan (*English*)

#### 1971

Vernon E. Denny (*Chemical Engineering*)  
Peter N. Ladefoged (*Linguistics*)  
Arthur D. Schwabe (*Medicine*)  
Duane E. Smith (*Political Science*)  
Andreas Tietze (*Near Eastern Languages and  
Cultures*)

#### 1972

Barbara K. Keogh (*Education*)  
James N. Miller (*Microbiology and  
Immunology*)  
David S. Rodes (*English*)  
Ned A. Shearer (*Speech*)  
Charles A. West (*Chemistry and Biochemistry*)

#### 1973

Kirby A. Baker (*Mathematics*)  
David Evans (*Chemistry and Biochemistry*)  
Albert Hoxie (*History*)  
Nhan Levan (*Electrical Engineering*)  
Judith L. Smith (*Physiological Science*)

#### 1974

Robert B. Edgerton (*Anthropology, Psychiatry  
and Biobehavioral Sciences*)  
David S. Eisenberg (*Chemistry and  
Biochemistry*)  
Victoria A. Fromkin (*Linguistics*)  
Robert C. Neerhout (*Pediatrics*)  
Andrea L. Rich (*Speech*)

#### 1975

Alma M. Hawkins (*World Arts and Cultures*)  
Morris Holland (*Psychology*)  
Paul M. Schachter (*Linguistics*)

- Stanley A. Wolpert (*History*)  
Richard W. Young (*Neurobiology*)
- 1976**  
Marianne Celce-Murcia (*Teaching English as a Second Language and Applied Linguistics*)  
Jesse J. Dukeminier (*Law*)  
George R. Guffey (*English*)  
Marilyn L. Kourilsky (*Education*)  
Chand R. Viswanathan (*Electrical Engineering*)
- 1977**  
Michael J.B. Allen (*English*)  
Henry M. Cherrick (*Dentistry*)  
Richard C. Maxwell (*Law*)  
J. William Schopf (*Earth and Space Sciences*)  
Verne N. Schumaker (*Chemistry and Biochemistry*)
- 1978**  
William R. Allen (*Economics*)  
Michael E. Jung (*Chemistry and Biochemistry*)  
J. Fred Weston (*Management*)  
Thomas D. Wickens (*Psychology*)  
Johannes Wilbert (*Anthropology*)
- 1979**  
Steven Krantz (*Mathematics*)  
Paul I. Rosenthal (*Communication Studies*)  
Christopher Salter (*Geography*)  
James H. White (*Mathematics*)  
Stephen C. Yeazell (*Law*)
- 1980**  
A.R. Braunmuller (*English*)  
Fredi Chiappelli (*Italian*)  
Kenneth L. Karst (*Law*)  
Richard F. Logan (*Geography*)  
Ronald F. Zernicke (*Physiological Science*)
- 1981**  
Arnold J. Band (*Near Eastern Languages and Cultures*)  
Charles L. Batten, Jr. (*English*)  
Lucien B. Guze (*Medicine*)  
Gerald Lopez (*Law*)  
Andy Wong (*Dentistry*)
- 1982**  
Dean Bok (*Neurobiology*)  
Robin S. Liggett (*Architecture and Urban Design, Urban Planning*)  
William Melnitz (*Theater*)  
Joseph K. Perloff (*Medicine*)  
Karen E. Rowe (*English*)
- 1983**  
Claude Bernard (*Physics and Astronomy*)  
Bryan C. Ellickson (*Economics*)  
Robert S. Elliott (*Electrical Engineering*)  
Albert D. Hutter (*English*)  
Charles M. Knobler (*Chemistry and Biochemistry*)
- 1984**  
Robert Dallek (*History*)  
Hooshang Kangerloo (*Radiological Sciences*)  
Jeffrey Prager (*Sociology*)  
Stanley Siegel (*Law*)  
Sandra A. Thompson (*Linguistics*)
- 1985**  
Patricia M. Greenfield (*Psychology*)  
David F. Martin (*Computer Science*)
- Mark W. Plant (*Economics*)  
Ross P. Shideler (*Scandinavian Section, Comparative Literature*)  
William D. Warren (*Law*)
- 1986**  
Roger A. Gorski (*Neurobiology*)  
Patricia A. Keating (*Linguistics*)  
Leonard Kleinrock (*Computer Science*)  
Martin Wachs (*Urban Planning*)  
Scott L. Waugh (*History*)
- 1987**  
Lawrence W. Bassett (*Radiological Sciences*)  
E. Bradford Burns (*History*)  
Kenneth W. Graham, Jr. (*Law*)  
Howard Suber (*Film and Television*)  
Richard A. Yarborough (*English*)
- 1988**  
Alison G. Anderson (*Law*)  
Ann L.T. Bergren (*Classics*)  
Charles A. Berst (*English*)  
Michael J. Goldstein (*Psychology*)  
Richard L. Sklar (*Political Science*)
- 1989**  
John B. Garnett (*Mathematics*)  
Kathleen L. Komar (*Comparative Literature, Germanic Languages*)  
William G. Roy (*Sociology*)  
Stephen Yenser (*English*)  
Eric M. Zolt (*Law*)
- 1990**  
Peter M. Narins (*Physiological Science*)  
Gary B. Nash (*History*)  
John S. Wiley (*Law*)  
Merlin C. Wittrock (*Education*)  
Ruth Yeazell (*English*)
- 1991**  
Michael R. Asimov (*Law*)  
Edward G. Berenson (*History*)  
Robert A. Bjork (*Psychology*)  
Margaret FitzSimmons (*Urban Planning*)  
Kenneth R. Lincoln (*English*)
- 1992**  
Bruce L. Baker (*Psychology*)  
Paul B. Bergman (*Law*)  
Robert B. Goldberg (*Molecular, Cell, and Developmental Biology*)  
Peter E. Kollock (*Sociology*)  
Eugen Weber (*History*)
- 1993**  
Calvin B. Bedient (*English*)  
Richard B. Kaner (*Chemistry and Biochemistry*)  
Katherine C. King (*Classics*)  
William G. Ouchi (*Management*)  
Bruce Schulman (*History*)
- 1994**  
David A. Binder (*Law*)  
Jon P. Davidson (*Earth and Space Sciences*)  
Melvin Oliver (*Sociology*)  
Barbara L. Packer (*English*)  
E. Victor Wolfenstein (*Political Science*)
- 1995**  
Noriko Akatsuka (*East Asian Languages and Cultures*)  
Douglas Hollan (*Anthropology*)  
V.A. Kolve (*English*)
- Jerome Rabow (*Sociology*)  
Paul V. Reale (*Music*)
- 1996**  
Walter Allen (*Sociology*)  
Judith A. Carney (*Geography*)  
William M. Gelbart (*Chemistry and Biochemistry*)  
Phyllis A. Guzé (*Medicine*)  
Peter B. Hammond (*Anthropology*)
- 1997**  
Uptal Banerjee (*Molecular, Cell, and Developmental Biology*)  
Christine D. Gutierrez (*Education*)  
Susan McClary (*Musicology*)  
Arnold B. Scheibel (*Neurobiology, Psychiatry and Biobehavioral Sciences*)  
Ivan Szelenyi (*Sociology*)
- 1998**  
George W. Bernard (*Dentistry*)  
Verónica Cortinez (*Spanish and Portuguese*)  
Wayne A. Dollase (*Earth and Space Sciences*)  
Jayne E. Lewis (*History*)  
Joshua S.S. Muldavin (*Geography*)
- 1999**  
Grace Ganz Blumberg (*Law*)  
Alessandro Duranti (*Anthropology*)  
Richard H. Gold (*Radiological Sciences*)  
N. Katherine Hayles (*English*)  
Bernard Weiner (*Psychology*)
- 2000**  
Scott H. Chandler (*Physiological Science*)  
Efrain Kristal (*Spanish and Portuguese*)  
Hector F. Myers (*Psychology*)  
David Sklansky (*Law*)  
Robert N. Watson (*English*)
- 2001**  
Michael J. Colacurcio (*English*)  
Glen M. MacDonald (*Geography*)  
Kevin Terraciano (*History*)  
James W. Trent (*Education*)  
Brian Walker (*Political Science*)
- Non-Academic Senate Recipients**  
In spring of 1985, the Office of Instructional Development began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments are eligible. Recipients are selected by the Academic Senate Committee on Teaching, utilizing the same criteria as that used for Academic Senate members.  
The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.
- 1985**  
L. Geoffrey Cowan (*Communication Studies*)  
Mary Elizabeth Perry (*History*)  
Linda Diane Venis (*English*)
- 1986**  
David Cohen (*Mathematics*)

Johanna Harris-Heggie (*Music*)  
Paul Von Blum (*Interdisciplinary*)

**1987**

Carol D. Berkowitz (*Pediatrics*)  
Jeffrey I. Cole (*Communication Studies*)  
Cheryl Giuliano (*Writing Programs*)

**1988**

Jeanne Gunner (*Writing Programs*)

## Gold Shield Faculty Prize

The \$30,000 Gold Shield Faculty Prize, an award for academic excellence, was created by the Gold Shield Alumnae of UCLA in celebration of their fiftieth anniversary in 1986. The prize is funded by an endowment of \$250,000

raised by Gold Shield for this purpose, which has grown to over \$400,000. Guidelines provide that the prize "recognize and reward UCLA faculty members who have demonstrated extraordinary accomplishment in teaching and in research or creative activity...and who have made a significant contribution to undergraduate education." Preference for recipients is given to faculty members in mid-career who do not often receive the extra professional incentives available to distinguished senior faculty.

The Gold Shield Faculty Prize is awarded to each recipient for scholarly use. The awardee is selected every two years by a committee of peers appointed by the Academic Senate. Student and Gold Shield representatives are included. Recipients must come from fields that have undergraduate programs at UCLA.

**1986-88**

Michael E. Jung (*Chemistry and Biochemistry*)

**1988-90**

Patricia M. Greenfield (*Psychology*)
