## **UCLA® General Catalog**

Associate Registrar/Publications Manager: Anita Cotter

Assistant Registrar/Catalog Editor: Kathleen Copenhaver

Research Analyst and Text Editor: Leann J. Hennig

Layout and Design, Text Editor, Online Design and Production: James Hudgens

Cover Design: James Hudgens

Photography: James Hudgens. Special thanks to Dawn Setzer, publications manager for the UCLA Library, and to Frank Montana, assistant director of Housing Services, for contributing photographs from their publications archives. Thanks to Universal Studios for permission to reprint the still from *Double Indemnity*. Photograph of *The Trial*, in the School of Theater, Film, and Television section by Craig Schwarz.

Produced by Academic Publications, UCLA Registrar's Office, using FrameMaker 6.0.

Copies of the 2001-2003 *UCLA General Catalog* are available for purchase at the UCLA Store for \$6.50. To obtain a copy by mail, first determine the proper mailing charges by writing the UCLA Store, 308 Westwood Plaza, Los Angeles, CA 90095-8311 or calling (310) 825-6064. Charges vary according to destination and method of shipment. Catalogs may also be ordered online; follow the BookZone link from the store's main menu at <http://www.uclastore.ucla.edu> and look for the link to the General Catalog.

Every effort has been made to ensure the accuracy of the information presented in the *UCLA General Catalog*. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

The departmental websites referenced in department addresses in this catalog are maintained by independent operators and do not necessarily reflect approved curricula and courses information. Consult the online catalog for the most current, officially approved courses and curricula.

Other information about UCLA may be found in the announcements of the Schools of Dentistry, Education and Information Studies, Engineering and Applied Science, Law, Management, Medicine, Nursing, Public Health, and Public Policy and Social Research, and in literature produced by the School of the Arts and Architecture and School of Theater, Film, and Television. The most current information on graduate programs is available online at <http://www.gdnet.ucla.edu>, which contains a link to Graduate Division publications, including *Program Requirements for UCLA Graduate Degrees* which has the complete text for officially approved graduate programs.

## **UCLA Accreditation**

UCLA is accredited by the Western Association of Schools and Colleges and by numerous special agencies. Information regarding the University's accreditation may be obtained in the Planning Office Library, Office of Academic Planning and Budget, 2107 Murphy Hall.

# Chancellor's Message

**T**he *UCLA General Catalog* for 2001-03 presents the vast range of instructional offerings at UCLA's College of Letters and Science and 11 professional schools. These pages document the rich comprehensiveness of UCLA, while reflecting the University's commitment to high standards, curricular innovation, and interdisciplinary approaches to learning.

Faculty and students at UCLA come together in a true community of scholars to advance knowledge, address societal challenges, and pursue intellectual and personal fulfillment. Every facet of scholarly life here benefits immeasurably from the instructional process and its intersection with the research enterprise. In addition, public service is an integral part of our mission, and the University is actively engaged with the surrounding region in myriad ways.

Leadership in teaching, research, and public service make UCLA a beacon of excellence in higher education. I encourage you to peruse this volume—both to learn about one of the world's premier academic programs, and to discover the excitement of the intellectually stimulating and diverse university community that is UCLA.

A handwritten signature in cursive script, reading "Albert Carnesale".

Albert Carnesale  
Chancellor

# Table of Contents

## **UCLA MAJORS AND DEGREES . . . . . 6**

- Undergraduate Minors and Specializations . . . . . 8
- Graduate Concurrent and Articulated Degrees . . . . . 8

## **ABOUT UCLA . . . . . 9**

- Life on Campus . . . . . 11
- Research Programs . . . . . 12
- Supporting Resources . . . . . 16
- Supplementary Educational Programs . . . . . 21
- Student Services . . . . . 22
- Student Activities . . . . . 30

## **UNDERGRADUATE STUDY . . . . . 33**

- Undergraduate Admission . . . . . 33
- Registration . . . . . 38
- Financial Support . . . . . 41
- Majors and Degrees . . . . . 43
- Degree Requirements . . . . . 44
- Undergraduate Research . . . . . 46
- Internships and Service . . . . . 46
- Lower Division Programs . . . . . 48
- Advising and Academic Assistance . . . . . 49
- Academic Excellence . . . . . 51

## **GRADUATE STUDY . . . . . 53**

- Graduate Admission . . . . . 53
- Registration . . . . . 57
- Financial Support . . . . . 60
- Degree Requirements . . . . . 61

## **ACADEMIC POLICIES . . . . . 63**

- Academic Credit . . . . . 63
- Grades . . . . . 64
- Absence and Readmission . . . . . 66
- Transcripts and Records . . . . . 67
- Degrees . . . . . 69
- Graduation . . . . . 71

## **COLLEGE AND SCHOOLS . . . . . 73**

- College of Letters and Science . . . . . 73
- Graduate School of Education and Information Studies . . . . . 87
- Henry Samueli School of Engineering and Applied Science . . . . . 89

# UCLA Majors

## COLLEGE OF LETTERS AND SCIENCE

**African Studies Interdepartmental Program**  
African Studies . . . . . M.A.

**Afro-American Studies Interdepartmental Program**  
Afro-American Studies . . . . . B.A., M.A.

**American Indian Studies Interdepartmental Program**  
American Indian Studies . . . . . M.A.

**Anthropology Department**  
Anthropology . . . . . B.A., B.S., M.A., Ph.D.

**Applied Linguistics and Teaching English as a Second Language Department**  
Applied Linguistics . . . . . C.Phil., Ph.D.  
Applied Linguistics and Teaching English as a Second Language . . . . . M.A.  
Teaching English as a Second Language . M.A.

**Archaeology Interdepartmental Program**  
Archaeology . . . . . M.A., C.Phil., Ph.D.

**Art History Department**  
Art History . . . . . B.A., M.A., Ph.D.

**Asian American Studies Interdepartmental Program**  
Asian American Studies . . . . . B.A., M.A.

**Atmospheric Sciences Department**  
Atmospheric, Oceanic, and Environmental Sciences . . . . . B.S.  
Atmospheric Sciences . . M.S., C.Phil., Ph.D.

**Chemistry and Biochemistry Department**  
Biochemistry . . . . . B.S.  
Biochemistry and Molecular Biology . . . . . M.S., C.Phil., Ph.D.  
Chemistry . . . . . B.S., M.S., C.Phil., Ph.D.  
General Chemistry . . . . . B.S.

**Chemistry/Materials Science Interdepartmental Program**  
Chemistry/Materials Science . . . . . B.S.

**César E. Chávez Center for Chicana and Chicano Studies, Center for Interdisciplinary Instruction**  
Chicana and Chicano Studies . . . . . B.A.

**Classics Department**  
Classics . . . . . M.A., C.Phil., Ph.D.  
Classical Civilization . . . . . B.A.  
Greek . . . . . B.A., M.A.  
Greek and Latin . . . . . B.A.  
Latin . . . . . B.A., M.A.

**Communication Studies Interdepartmental Program**  
Communication Studies . . . . . B.A.

**Comparative Literature Department**  
Comparative Literature. B.A., M.A., C.Phil., Ph.D.

**Cybernetics Interdepartmental Program**  
Cybernetics . . . . . B.S.

**Earth and Space Sciences Department**  
Earth Sciences . . . . . B.A.  
Geochemistry . . . . . M.S., C.Phil., Ph.D.  
Geology . . . . . B.S., M.S., C.Phil., Ph.D.  
Geology/Engineering Geology . . . . . B.S.  
Geology/Paleobiology . . . . . B.S.  
Geophysics/Applied Geophysics . . . . . B.S.  
Geophysics/Geophysics and Space Physics . B.S.  
Geophysics and Space Physics . M.S., Ph.D.

**East Asian Languages and Cultures Department**  
Asian Humanities . . . . . B.A.

Asian Religions . . . . . B.A.  
Chinese . . . . . B.A.  
East Asian Languages and Cultures . . . . . M.A., C.Phil., Ph.D.  
Japanese . . . . . B.A.  
Korean . . . . . B.A.

**East Asian Studies Interdepartmental Program**  
East Asian Studies . . . . . B.A., M.A.

**Economics Department**  
Business Economics . . . . . B.A.  
Economics . . . . . B.A., M.A., C.Phil., Ph.D.  
Economics/International Area Studies. B.A.

**English Department**  
American Literature and Culture . . . . . B.A.  
English . . . . . B.A., M.A., C.Phil., Ph.D.  
English/Greek . . . . . B.A.  
English/Latin . . . . . B.A.

**European Studies Interdepartmental Program**  
European Studies . . . . . B.A.

**Folklore and Mythology Interdepartmental Program**  
Folklore and Mythology . . . . . M.A., Ph.D.

**French and Francophone Studies Department**  
French . . . . . B.A.  
French and Francophone Studies . . . . . M.A., C.Phil., Ph.D.  
French and Linguistics . . . . . B.A.

**Geography Department**  
Geography . . . . . B.A., M.A., C.Phil., Ph.D.  
Geography/Environmental Studies . . . B.A.

**Germanic Languages Department**  
German . . . . . B.A.  
Germanic Languages . . M.A., C.Phil., Ph.D.  
Scandinavian . . . . . M.A.  
Scandinavian Languages . . . . . B.A.

**History Department**  
History . . . . . B.A., M.A., C.Phil., Ph.D.

**History/Art History Interdepartmental Program**  
History/Art History . . . . . B.A.

**Individual Field of Concentration**  
Individual Field of Concentration . . . . B.A.

**Indo-European Studies Interdepartmental Program**  
Indo-European Studies . . . . . C.Phil., Ph.D.

**International Development Studies Interdepartmental Program**  
International Development Studies . . . B.A.

**Islamic Studies Interdepartmental Program**  
Islamic Studies . . . . . M.A., C.Phil., Ph.D.

**Italian Department**  
Italian . . . . . B.A., M.A., C.Phil., Ph.D.  
Italian and Special Fields . . . . . B.A.

**Latin American Studies Interdepartmental Program**  
Latin American Studies . . . . . B.A., M.A.

**Linguistics Department**  
African Languages . . . . . B.A.  
Linguistics . . . . . B.A., M.A., C.Phil., Ph.D.  
Linguistics and Anthropology . . . . . B.A.  
Linguistics and Computer Science . . . . B.A.  
Linguistics and East Asian Languages and Cultures . . . . . B.A.  
Linguistics and English . . . . . B.A.  
Linguistics and French . . . . . B.A.  
Linguistics and Italian . . . . . B.A.

Linguistics and Philosophy . . . . . B.A.  
Linguistics and Psychology . . . . . B.A.  
Linguistics and Scandinavian Languages . . . . . B.A.  
Linguistics and Spanish . . . . . B.A.

**Mathematics Department**  
Applied Mathematics . . . . . B.S.  
General Mathematics . . . . . B.S.  
Mathematics . . B.S., M.A., M.A.T., C.Phil., Ph.D.  
Mathematics/Applied Science . . . . . B.S.  
Mathematics of Computation . . . . . B.S.

**Mathematics/Economics Interdepartmental Program**  
Mathematics/Economics . . . . . B.S.

**Microbiology and Molecular Genetics Department**  
Microbiology and Molecular Genetics . . . . . B.S., M.A., Ph.D.

**Molecular Biology Interdepartmental Program**  
Molecular Biology . . . . . Ph.D.

**Molecular, Cell, and Developmental Biology Department**  
Molecular, Cell, and Developmental Biology . . . . . B.S., M.A., C.Phil., Ph.D.

**Molecular, Cellular, and Integrative Physiology Interdepartmental Program**  
Molecular, Cellular, and Integrative Physiology. . . . . Ph.D.

**Musicology Department**  
Music History . . . . . B.A.  
Musicology . . . . . M.A., C.Phil., Ph.D.

**Near Eastern Languages and Cultures Department**  
Ancient Near Eastern Civilizations . . . . B.A.  
Arabic . . . . . B.A.  
Hebrew . . . . . B.A.  
Iranian Studies . . . . . B.A.  
Jewish Studies . . . . . B.A.  
Near Eastern Languages and Cultures . . . . . M.A., C.Phil., Ph.D.

**Near Eastern Studies Interdepartmental Program**  
Near Eastern Studies . . . . . B.A.

**Neuroscience Interdepartmental Program**  
Neuroscience . . . . . B.S.

**Organismic Biology, Ecology, and Evolution Department**  
Biology . . . . . B.S., M.A., C.Phil., Ph.D.  
Ecology, Behavior, and Evolution . . . . B.S.  
Marine Biology . . . . . B.S.  
Plant Biology . . . . . B.S.

**Philosophy Department**  
Philosophy . . . . . B.A., M.A., C.Phil., Ph.D.

**Physics and Astronomy Department**  
Astronomy . . . . . M.S., M.A.T., Ph.D.  
Astrophysics . . . . . B.S.  
General Physics . . . . . B.A.  
Physics . . . . . B.S., M.S., M.A.T., Ph.D.

**Physiological Science Department**  
Physiological Science . . . . . B.S., M.S., Ph.D.

**Political Science Department**  
Political Science . . . B.A., M.A., C.Phil., Ph.D.  
Public Administration . . . . . M.P.A.

# and Degrees

## Psychology Department

Cognitive Science . . . . . B.S.  
Psychobiology . . . . . B.S.  
Psychology . . . . . B.A., M.A., C.Phil., Ph.D.

## Romance Linguistics and Literature

**Interdepartmental Program**  
Romance Linguistics and  
Literature . . . . . M.A., C.Phil., Ph.D.

## Slavic Languages and Literatures Department

Russian Language and Literature . . . . . B.A.  
Russian Studies . . . . . B.A.  
Slavic Languages and  
Literatures . . . . . B.A., M.A., C.Phil., Ph.D.

## Sociology Department

Sociology . . . . . B.A., M.A., C.Phil., Ph.D.

## Spanish and Portuguese Department

Hispanic Languages and  
Literatures . . . . . C.Phil., Ph.D.  
Portuguese . . . . . B.A., M.A.  
Spanish . . . . . B.A., M.A.  
Spanish and Linguistics . . . . . B.A.  
Spanish and Portuguese . . . . . B.A.

## Statistics Department

Statistics . . . . . M.S., C.Phil., Ph.D.

## Study of Religion Interdepartmental Program

Study of Religion . . . . . B.A.

## Women's Studies Interdepartmental Program

Women's Studies . . . . . B.A., M.A., Ph.D.

## GRADUATE SCHOOL OF EDUCATION AND INFORMATION STUDIES

### Education Department

Education . . . . . M.A., M.Ed., Ed.D., Ph.D.  
Educational  
Administration . . . . . Joint Ed.D. with UCI  
Special Education . . . . . Joint Ph.D. with CSULA

### Information Studies Department

Library and Information  
Science . . . . . M.L.I.S., Ph.D.

## HENRY SAMUELI SCHOOL OF ENGINEERING AND APPLIED SCIENCE

### Biomedical Engineering Interdepartmental Program

Biomedical Engineering . . . . . M.S., Ph.D.

### Chemical Engineering Department

Chemical Engineering . . . . . B.S., M.S., Ph.D.

### Civil and Environmental Engineering Department

Civil Engineering . . . . . B.S., M.S., Ph.D.

### Computer Science Department

Computer Science . . . . . B.S., M.S., Ph.D.  
Computer Science and Engineering . . . . . B.S.

### Electrical Engineering Department

Electrical Engineering . . . . . B.S., M.S., Ph.D.

### Engineering Schoolwide Programs

Engineering . . . . . M. Engr., Engr.

### Integrated Manufacturing Engineering Interdepartmental Program

Integrated Manufacturing Engineering . . . . . M.Engr.

## Materials Science and Engineering

Materials Engineering . . . . . B.S.  
Materials Science and Engineering . . . . . M.S., Ph.D.

## Mechanical and Aerospace Engineering Department

Aerospace Engineering . . . . . B.S., M.S., Ph.D.  
Manufacturing Engineering . . . . . M.S.  
Mechanical Engineering . . . . . B.S., M.S., Ph.D.

## JOHN E. ANDERSON GRADUATE SCHOOL OF MANAGEMENT

### Management Department

Management . . . . . M.B.A., M.S., C.Phil., Ph.D.

## SCHOOL OF THE ARTS AND ARCHITECTURE

### Architecture and Urban Design Department

Architecture M.Arch. I, M.Arch. II, M.A., Ph.D.

### Art Department

Art . . . . . B.A., M.A., M.F.A.

### Design | Media Arts Department

Design | Media Arts . . . . . B.A., M.A., M.F.A.

### Ethnomusicology Department

Ethnomusicology . . . . . B.A., M.A., C.Phil., Ph.D.

### Music Department

Music . . . . . B.A., M.A., M.M., D.M.A., C.Phil.,  
Ph.D.

### World Arts and Cultures Department

Culture and Performance . . . . . M.A., Ph.D.  
Dance . . . . . M.A., M.F.A.  
World Arts and Cultures . . . . . B.A.

## SCHOOL OF DENTISTRY

### Dentistry Department

Dental Surgery . . . . . D.D.S

### Oral Biology Section

Oral Biology . . . . . M.S., Ph.D.

## SCHOOL OF LAW

### Law Department

Law . . . . . LL.M., J.D.

## SCHOOL OF MEDICINE

### Biological Chemistry Department

Biological Chemistry . . . . . M.S., Ph.D.

### Biomathematics Department

Biomathematics . . . . . M.S., Ph.D.

### Biomedical Physics Interdepartmental Program

Biomedical Physics . . . . . M.S., Ph.D.

### Human Genetics Department

Human Genetics . . . . . M.S., Ph.D.

### Microbiology and Immunology Department

Microbiology and Immunology . . . . . M.S., Ph.D.

### Molecular and Medical Pharmacology Department

Molecular and Medical  
Pharmacology . . . . . M.S., Ph.D.

## Neurobiology Department

Anatomy and Cell  
Biology . . . . . M.S., C.Phil., Ph.D.

## Neuroscience Interdepartmental Program

Neuroscience . . . . . Ph.D.

## Pathology and Laboratory Medicine Department

Experimental Pathology . . . . . M.S., Ph.D.

## Physiology Department

Physiology . . . . . M.S., Ph.D.

## SCHOOL OF NURSING

### Nursing Department

Nursing . . . . . B.S., M.S.N., Ph.D.

## SCHOOL OF PUBLIC HEALTH

### Biostatistics Department

Biostatistics . . . . . M.S., Ph.D.

### Community Health Sciences Department

Public Health . . . . . M.S., Ph.D.

### Environmental Health Sciences Department

Environmental Health  
Sciences . . . . . M.S., Ph.D.

### Environmental Science and Engineering Interdepartmental Program

Environmental Science and  
Engineering . . . . . D.Env.

### Epidemiology Department

Epidemiology . . . . . M.S., Ph.D.

### Health Services Department

Health Services . . . . . M.S., Ph.D.

### Molecular Toxicology Interdepartmental Program

Molecular Toxicology . . . . . Ph.D.

### Public Health Schoolwide Programs

Preventive Medicine and Public Health . . . . . M.S.  
Public Health . . . . . M.P.H., Dr.P.H.

## SCHOOL OF PUBLIC POLICY AND SOCIAL RESEARCH

### Policy Studies Department

Public Policy . . . . . M.P.P.

### Social Welfare Department

Social Welfare . . . . . M.S.W., Ph.D.

### Urban Planning Department

Urban Planning . . . . . M.A., Ph.D.

## SCHOOL OF THEATER, FILM, AND TELEVISION

### Film, Television, and Digital Media Department

Film and  
Television . . . . . B.A., M.A., M.F.A., C.Phil., Ph.D.

### Theater Department

Theater . . . . . B.A., M.A., M.F.A., C.Phil., Ph.D.

# Graduate Concurrent and Articulated Degrees

## CONCURRENT DEGREES

Concurrent degree programs allow students to reduce the number of courses required for two degrees, since some courses may apply to both degrees.

Afro-American Studies, Interdepartmental M.A. — Law, J.D.  
American Indian Studies, Interdepartmental M.A. — Law, J.D.  
Architecture and Urban Design, M.Arch. I — Urban Planning, M.A.  
Asian American Studies, Interdepartmental M.A. — Public Health, M.P.H.  
Asian American Studies, Interdepartmental M.A. — Social Welfare, M.S.W.  
Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.  
History, M.A. — Information Studies, M.L.I.S.  
Islamic Studies, Interdepartmental M.A. — Public Health, M.P.H.  
Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.

*Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Students should contact Graduate Admissions/Student and Academic Affairs for information on designing articulated programs.*

## ARTICULATED DEGREES

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

Management, M.B.A. — Computer Science, M.S.  
Management, M.B.A. — Information Studies, M.L.I.S.  
Management, M.B.A. — Latin American Studies, Interdepartmental M.A.  
Management, M.B.A. — Law, J.D.  
Management, M.B.A. — Medicine, M.D.  
Management, M.B.A. — Nursing, M.S.N.  
Management, M.B.A. — Public Health, M.P.H.  
Management, M.B.A. — Urban Planning, M.A.  
Public Policy, M.P.P. — Law, J.D.  
Social Welfare, M.S.W. — Law, J.D.  
Urban Planning, M.A. — Law, J.D.

African Studies, Interdepartmental M.A. — Public Health, M.P.H.  
Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum  
Latin American Studies, Interdepartmental M.A. — Information Studies, M.L.I.S.  
Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.  
Medicine, M.D. — Graduate Division health science major, Ph.D.  
Oral Biology, M.S. or Ph.D. — Dentistry, D.D.S. or Certificate

# About UCLA

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Leadership in teaching, research, and public service make UCLA a beacon of excellence in higher education, as students, faculty, and staff come together in a true community of scholars to advance knowledge, address societal challenges, and pursue intellectual and personal fulfillment.

## TEACHING

The Conference Board of Associated Research Councils, which evaluates the quality of the faculty in 274 American research universities, rates UCLA fourteenth in the nation among both public and private universities. Of the 41 doctoral degree disciplines studied, 13 UCLA academic departments are ranked among the top 10 in the country and 30 are ranked among the top 20.

Distinguished faculty at UCLA includes Nobel prizewinners, Guggenheim fellows, Sloan fellows, and Fulbright scholars, as well as numerous members of the National Academy of Sciences and the American Academy of Arts and Sciences. In fact, UCLA consistently places among the leading universities nationwide in the number of these prestigious awards granted to its faculty members.

This remarkable pool of talent is shared between one college and 11 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts and Architecture, Henry Samueli School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Education and Information Studies, School of Law, John E. Anderson Graduate School of Management, School of Public Policy and Social Research, and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 118 different disciplines; graduate students may earn one of 89 master's and 110 doctoral and professional degrees.

Academic programs undergo continuous review and evaluation to maintain their excellence, and new degree programs are added as they are approved by the Academic Senate or The Regents.

## RESEARCH

Pushing the boundaries of the known, UCLA researchers—faculty and students, both graduate and undergraduate—venture every day into uncharted worlds from the molecular to the galactic.

Whether it's tracing the roots of urban decay, pioneering new drug therapies for cancer, or revealing a black hole at the center of our galaxy, research at UCLA is advancing the frontiers of knowledge.

Among the 10 leading research universities in the country, UCLA received a record \$530.5 million in 1999-00 in extramural grants and contracts to support its research. Each year it hosts hundreds of postdoctoral scholars who share its facilities. Its laboratories have seen major break-

---

*In terms of overall excellence, UCLA is one of America's most prestigious and influential public universities. It is consistently rated among the best universities in the nation*

---

*The Los Angeles branch of the State Normal School welcomed students in 1882. Ground was broken for the Westwood campus in 1927, when construction began on Royce Hall*

## THE UNIVERSITY OF CALIFORNIA SYSTEM

**T**he University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing for California's first "complete University." Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University conferred bachelor's degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its 10 campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Merced, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character and academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and the University's only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law schools, as well as schools of architecture, business administration, education, engineering, and many others.

The UC campuses have a combined enrollment exceeding 173,640 students, over 90 percent of them California residents. About one fourth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The UC faculty is internationally known for its distinguished academic achievements. On its nine campuses the University has 20 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

The UC system is governed by a Board of Regents whose regular members are appointed by the Governor of California. In addition to setting general policy and making budgetary decisions for the UC system, The Regents appoint the President of the University, the 10 chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the Academic Senate, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.

## A BRIEF HISTORY OF UCLA

**W**ith only 11,000 inhabitants in 1880, the pueblo of Los Angeles convinced the state government to establish a State Normal School in Southern California. Enthusiastic citizens contributed between \$2 and \$500 to purchase a site, and on August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students in a Victorian building that had been erected on the site of an orange grove.

By 1914 Los Angeles had grown to a city of 350,000, and the school moved to new quarters — a Hollywood ranch off a dirt road that later became Vermont Avenue. In 1919, the school became the Southern Branch of the University of California and offered two years of instruction in Letters and Science. Third- and fourth-year courses were soon added; the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles. (The name was changed again in 1958 to University of California, Los Angeles.)

Continued growth mandated the selection of a site that could support a larger campus, and in 1927, ground was broken in the chaparral-covered hills of Westwood. The four original buildings — Royce Hall, Powell Library, Haines Hall, and Kinsey Hall — formed a lonesome cluster in the middle of 400 empty acres. The campus hosted some 5,500 students its first term in 1929. The Regents established the master's degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

The most spectacular growth at UCLA occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a \$260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital that is now one of the largest and most highly respected in the world.

throughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in vital areas continue to improve the quality of life for people around the world.

Faculty members teach both undergraduate and graduate courses and, through their research, create knowledge as well as transmit it. At UCLA, students are taught by the people making the discoveries. They exchange ideas with faculty members who are authorities in their fields and, even as undergraduates, are encouraged to participate in research to experience firsthand the discovery of new knowledge.

## SERVICE

As a public university, serving the community is one of UCLA's greatest commitments. Undergraduate and graduate programs, research activities, community outreach programs, and grass-roots participation by students, faculty, staff, and alumni help to forge a partnership between the University and the entire Los Angeles region.

With a new state-of-the-art hospital to open in 2004, UCLA furthers its tradition of medical outreach and assures the highest quality of care to Los Angeles and the world. Low-income families receive top-quality treatment from School of Dentistry clinics on campus, in Venice, or in east Los Angeles. The Santa Monica-UCLA Medical Center's Rape Treatment Center offers 24-hour care to victims. The School of Public Health's Community Health Promotion Program supports community-service projects to benefit poor and underserved communities, and the School of Nursing offers care through its nurse-managed clinic at Skid Row's Union Rescue Mission and its midwifery practice. The University also supports K-12 enhancement programs such as the School of the Arts and Architecture's Music Partnership Program, which funds UCLA students to be academic and musical mentors for at-risk youth.

As UCLA gives to the community, Los Angeles gives something back. The University's arts and cultural programs, for example, attract more than half a million people each year, drawn by everything from world-class acts performing at Royce Hall to classic-film screenings from the School of Theater, Film, and Television's archives. These relationships create opportunities for partnerships and growth that ensure UCLA's preeminence into the twenty-first century and beyond.

## LIFE ON CAMPUS

Just five miles from the ocean, UCLA lies in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and on the

south by Westwood Village. Some 291 buildings on 419 acres house the College of Letters and Science plus 11 professional schools and serve more than 36,890 students.

## A UNIQUE SETTING

The Romanesque architecture of UCLA's early buildings blends with the modern design of new structures and provides a backdrop for diverse campus settings. Bruin Walk continually echoes with the chatter of students and vendors, but nearby, the botanical gardens provide a serene escape. While a hip-hop band energizes lunchtime crowds in the Ackerman quad, a classical recital may be taking place in Schoenberg Hall, and students contemplating a Rodin or Lachaise in the Sculpture Garden may be unaware of a political rally organizing in Meyerhoff Park.

To give a feel for the dynamic atmosphere at UCLA, Undergraduate Admissions and Relations with Schools offers tours tailored to prospective undergraduates. See <http://www.saonet.ucla.edu/uars/prospect/tours.htm>. ☎310-825-8764

The Campus Visits Program, sponsored by the UCLA Alumni Association, arranges individual and group tours throughout the year for everyone else. Reservations are required. ☎310-206-0616

## A LARGE CAMPUS WITH A COMFORTABLE FEEL

The general campus population, some 33,093 students, is enriched by an additional 3,797 in the health sciences schools of Dentistry, Medicine, Nursing, and Public Health. While such numbers sound daunting, the University provides orienta-

tion sessions and innovative academic assistance programs to help acclimate new students, and through a range of services and social programs, new students quickly meet people with common interests in their academic departments, residence halls, or clubs and organizations. Even athletic events help to cement relationships as the campus comes together to celebrate Bruin victories.

Large lecture groups exist, especially in introductory courses; however, 96 percent of lower division lecture classes in 2000-01 had under 200 students, and the University is striving to further reduce class size. Large lecture classes typically include discussion sections of about 25 students or smaller seminars and laboratory classes. There is an overall ratio of one faculty member for approximately 18 students.

Most UCLA faculty members set aside office hours for students and appreciate the opportunity for informal conversation. Professors are often aided by graduate student teaching assistants (TAs) who are available to talk about academic problems.

## A DYNAMIC STUDENT BODY

Students at UCLA pride themselves on academic excellence. The Fall Quarter 2000 entering freshman class had an average high school GPA of 4.05, with an average composite score on the Scholastic Assessment Test (SAT) of 1,277 out of a possible 1,600.

One of the University's highest priorities is to advance the diversity of its students, faculty, staff, and administrators. UCLA's student population—nearly equally divided between men and women—yields the wide range of opinion and perspective essential to a great university.

Although most students are from California, they come from all 50 states and more than 120 foreign countries to study at UCLA. Ethnic minorities comprise 59.5 percent of the undergraduates and 41.9 percent of the graduate student population, and international students and scholars presently number over 3,300, making this one of the most popular American universities for students from abroad.

## RESEARCH PROGRAMS

At any given time, more than 5,000 funded research programs are in progress at UCLA. For information on any of the programs listed below, see <http://www.research.ucla.edu/oru.htm>.

### ORGANIZED RESEARCH UNITS

Organized Research Units (ORUs) are campuswide research programs. Members come from more than one department and normally from more than one school, college, or division.

#### Brain Research Institute

The Brain Research Institute (BRI) has one of the largest programs for neuroscience research and education in the country, with more than 200 scientists involved in every aspect of research on the nervous system from molecular organization to human behavior. The BRI provides facilities with new technologies for research and training and sponsors affinity groups, conferences, and symposia to strengthen ties among neuroscientists. Public service activities include an elementary school outreach program and a joint educational program with UCLA Extension. ☎310-825-1868

#### Center for Medieval and Renaissance Studies

The Center for Medieval and Renaissance Studies supports the research activities of some 20 academic departments dealing with the development of civilization between A.D. 300 and 1650. Programs include appointing visiting professors, organizing conferences, and supporting departments in inviting lecturers. The center sponsors two journals, *Viator*, with emphasis on intercultural and interdisciplinary studies, and *Comitatus*, with articles by graduate students and recent Ph.D. graduates. ☎310-825-1880

#### Center for Seventeenth- and Eighteenth-Century Studies

The Center for Seventeenth- and Eighteenth-Century Studies organizes scholarly programs and workshops, publishes conference results, provides long- and short-term fellowships to students and scholars, offers graduate research assistantships and master classes, and organizes public programs and classical music concerts. ☎310-206-8552

The center helps administer the William Andrews Clark Memorial Library, located about 10 miles from UCLA, which specializes in seventeenth- and eighteenth-century British works. It also has a renowned collection centering on Oscar Wilde and his

*The Clark Library's renowned collection*

*The Dental Research Institute promotes training as it focuses on disease in the orofacial region*

era and significant holdings of modern fine printing and Western Americana. ☎323-731-8529

### Center for the Study of Women

The Center for the Study of Women draws on the energies of more than 240 faculty from 10 professional schools and 34 departments. To facilitate faculty research, the center organizes conferences and lecture series on feminist theory, administers research grants, and offers an affiliation for research and visiting scholars. The center sponsors working groups, produces calendar of events posters, and hosts graduate programs, as well as an annual graduate student research conference. ☎310-825-0590

### Cotsen Institute of Archaeology

The Cotsen Institute of Archaeology studies and seeks to understand the past through artifacts, analysis of field data, and the creation of archives. The institute, the only one of its kind in the U.S., coordinates facilities for more than 40 researchers and many graduate students and volunteers in 10 associated academic departments. Facilities include the Information Center (regional office of the California Archaeological Inventory), Ceramics Laboratory, Computer Imaging of Archaeological Data, Obsidian Hydration and Lithics Analysis Laboratory, Paleoethnobotany Laboratory, Rock Art Archive, and Zooarchaeology Laboratory. It publishes the findings of scholars from UCLA and other archaeology centers and provides a forum for the public presentation of archaeological discoveries and advances. ☎310-206-8934

### Crump Institute for Molecular Imaging

The Crump Institute for Molecular Imaging brings together physical, biomathematical, chemical, biological, and clinical scientists and students to merge the principles of imaging with those of molecular and cellular biology, genetics, and biochemistry. The imaging domains range from the molecular organization of viruses and cellular subunits to the biological processes of organ systems in the living human. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data. The institute has research and educational programs for visiting scientists, postdoctoral scholars, and Ph.D. graduate students which include the development of multimedia computer-based learning technologies. ☎310-825-6539

### Dental Research Institute

The Dental Research Institute (DRI) fosters professional training and public education as it focuses on the basic mechanisms of disease in the orofacial region. Members include scientists in molecular biology, immunology, virology, biochemistry, pharmacology, pathology, genetics, developmental biology, neurobiology, and neurophysiology. Research

includes molecular oncology, viral oncology, molecular mechanisms of periodontal diseases, dental implantology, orofacial pain, neuroimmunology, molecular immunology, HIV immunology, and wound repair. The DRI contributes to educational activities in the form of quarterly seminars in the UCLA Center for the Health Sciences. ☎310-206-8045

### Institute of American Cultures

The Institute of American Cultures oversees four ORUs associated with UCLA ethnic studies centers. Applying the University's capabilities to the analysis and solution of social issues, the institute makes funds available for research and fellowships and promotes the study and illumination of the histories of African Americans, American Indians, Asian Americans, and Chicanas/Chicanos. ☎310-206-2557

### Center for African American Studies

The Center for African American Studies conducts and sponsors research on the African American experience, coordinates the Afro-American studies curriculum, publishes research results, and sponsors community service programming. ☎310-825-7403

### American Indian Studies Center

The American Indian Studies Center serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, a publishing unit that produces books and a quarterly journal, and a student/community relations unit. ☎310-825-7315

### Asian American Studies Center

The Asian American Studies Center seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies. The center includes a library, publications unit, student/community projects unit, postdoctoral fellowships, and B.A., undergraduate minor, and master's programs. ☎310-825-2974

### Chicano Studies Research Center

The Chicano Studies Research Center promotes the study and dissemination of knowledge on the experience of the people of Mexican descent and other Latinos in the U.S. The center supports interdisciplinary and collaborative research and the analysis, understanding, and articulation of issues critical to the development of Chicano and Latino communities in the U.S. It seeks to establish and maintain relationships with communities with similar academic and research interests at the state, national, and international levels. ☎310-825-2363

---

*The Crump Institute uses imaging technologies to collect and analyze biological data*

*The Institute of Archaeology is the only one of its kind in the U.S. and coordinates academic facilities for more than 40 researchers*

---

## Institute of Geophysics and Planetary Physics

The Institute of Geophysics and Planetary Physics is a multicampus research unit of the University of

*The African Studies Center is one of the major inter-disciplinary centers for African studies in the U.S.*

*The Near Eastern Studies center includes the richest variety of Near and Middle Eastern studies courses in the Western Hemisphere*

California; the branch at UCLA researches climate dynamics, geophysics, geochemistry, space physics, biochemistry, and biology. Research topics include the nature of the Earth, moon, and other planetary bodies; global and regional environmental change; the origin of terrestrial life; dynamical properties of the sun and solar wind; and the nonlinear dynamics of complex systems. Facilities include analytical laboratories in geochemistry, mete-

oritics, glaciology, petrology, geochronology, archaeology, and the origins of life; laboratories for experiments in fluid dynamics and high-pressure physics; developmental laboratories for instrumentation in space physics and seismology; and computational laboratories for large-scale numerical modeling. ☎310-825-1580

## Institute of Industrial Relations

The interdisciplinary research program of the Institute of Industrial Relations studies employment relationships, including labor markets, labor law, labor and management relations, equal employment opportunity, occupational safety and health, and related issues. Its Center for Labor Research and Education offers social policy and employment relations programs to the public, unions, and management. ☎310-794-5957

## Institute of Plasma and Fusion Research

The Institute of Plasma and Fusion Research is dedicated to research of plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, space plasma physics and experimental simulation of space plasma phenomena, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings. ☎310-825-1642

## Institute for Social Science Research

The Institute for Social Science Research promotes interdisciplinary research on contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Center for American Politics and Public Policy, Center for the Study of Urban Pov-

erty, Center for the Study of Society and Politics, Center for Social Theory and Comparative History, Survey Research Center, Social Science Data Archive, and Organizational Research Program. Training in survey research methodology is available to students through participation in the annual Los Angeles County Social Survey. The institute publishes the *ISSR Working Papers in the Social Sciences*. ☎310-825-0711

## International Studies and Overseas Programs

International Studies and Overseas Programs oversees four study centers that are designated ORUs.

### African Studies Center

The James S. Coleman African Studies Center coordinates research and teaching on Africa in the humanities, social sciences, and natural sciences, as well as in the schools of Arts and Architecture, Education and Information Studies, Law, Medicine, Public Health, Public Policy and Social Research, and Theater, Film, and Television. The center sponsors public lectures, seminars, publications, and academic exchanges with African institutions and an outreach service to the Southern California community. ☎310-825-3686

### Center for European and Russian Studies

The Center for European and Russian Studies develops and coordinates teaching and research on Russia and the successor states of the former Soviet Union, as well as the countries of western Europe, through conferences, lectures, seminars, and academic exchange programs with European and Russian institutions. It also offers an interdepartmental undergraduate major and provides fellowships to graduate students in European area studies. ☎310-825-4060

### Center for Near Eastern Studies

The von Grunebaum Center for Near Eastern Studies coordinates research and academic programs related to the Near East. It administers the degree programs in Near Eastern Studies and Islamic Studies. Resources of the center include the largest faculty, one of the most comprehensive library holdings, and the richest variety of Near and Middle Eastern studies courses of any institution in the Western Hemisphere. The center conducts publication, community outreach, and scholarly exchange programs. ☎310-825-1181

### Latin American Center

The Latin American Center is a major regional, national, and international resource on Latin America and hemispheric issues. The center sponsors and coordinates research, academic and public programs, and publications on Latin America in the humanities, social sciences, and professional schools and links its programs and activities with developments in the field and in other institutional settings. By combining

instruction, research, and service and by encouraging multidisciplinary and interdisciplinary approaches, the center promotes the use of UCLA Latin American resources for the benefit of the campus, the broader community, and the public at large. ☎310-825-4571

### Jules Stein Eye Institute

The Jules Stein Eye Institute is one of the best equipped centers for research and treatment of eye diseases in the world. This comprehensive facility is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. ☎310-825-5000

The **Doris Stein Eye Research Center** houses clinical facilities as well as new research and training programs concentrating on major eye diseases worldwide.

### Molecular Biology Institute

The Molecular Biology Institute (MBI) promotes molecular biology research and teaching at UCLA. The institute houses the laboratories of 30 MBI members, as well as the administration of the Molecular Biology Interdepartmental Ph.D. Program, the UCLA-DOE Laboratory of Structural Biology and Laboratory Medicine, and the UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences. ☎310-825-1018

### Neuropsychiatric Institute

The Neuropsychiatric Institute and affiliated units—including the Neuropsychiatric Hospital, the Department of Psychiatry and Biobehavioral Sciences, and one organized research unit, the Mental Retardation Research Center—provide UCLA's leadership in the study and treatment of disorders of human behavior, the brain, and the mind.

### Mental Retardation Research Center

The Mental Retardation Research Center provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. ☎310-825-5189

### UCLA-DOE Laboratory of Structural Biology and Molecular Medicine

The UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, funded through a Department of Energy contract, conducts research in molecular nuclear medicine and structural biology and genetics. Laboratory faculty members have joint appointments in academic departments and teach at both undergraduate

and graduate levels. Major facilities include a biomedical cyclotron, advanced scanning equipment, nuclear magnetic resonance, protein expression, and X-ray crystallography facilities. ☎310-825-3754

## SPECIALIZED RESEARCH CENTERS, LABORATORIES, AND INSTITUTES

Additional research centers, laboratories, and institutes advance scholarship in all fields. The breadth of research conducted on campus is reflected in undertakings as diverse as the Center for Astrobiology—which is developing new strategies for Mars exploration—and the Jonsson Comprehensive Cancer Center—one of only 38 comprehensive centers in the nation.

Interdisciplinary activities in the social sciences include the nationally respected Business Forecasting Project in UCLA's John E. Anderson Graduate School of Management and the Center for the Study of Evaluation in the Graduate School of Education and Information Studies, which is at the forefront of efforts to improve the quality of schooling in America.

In the health sciences, research ranges from neurological and neuromuscular diseases at the Reed Neurological Research Center to epidemiology, immunology, and the clinical management of AIDS at the UCLA AIDS Institute and the Center for Clinical AIDS Research and Education. The Fernald Child Study Center focuses on the study and treatment of a variety of childhood behavioral problems and learning disorders.

In the physical sciences and engineering, the Center for Clean Technology in the Henry Samueli School of Engineering and Applied Science fosters research on the interaction between technology and the environment, focusing on pollution prevention and control. On other frontiers, an Artificial Intelligence Laboratory designed exclusively for research in this burgeoning field operates under the wing of the Computer Science Department.

The Center for the Study of Urban Poverty initiates new research on issues related to urban poverty and sponsors seminars in the field. The Center for Communication Policy is a national leader in communications public policy issues such as technological innovations in telecommunications and the social and political impact of these changes.

---

*The Jules Stein Eye Institute is one of the best equipped centers for research and treatment of eye diseases in the world*

*At any given time, over 5,000 funded research programs are in progress at UCLA. Campus research centers, laboratories and Institutes are listed at [www.research.ucla.edu/oru.htm](http://www.research.ucla.edu/oru.htm)*

---

## SUPPORTING RESOURCES

As UCLA students and scholars advance knowledge, illuminate the past, shape the present, and uncover the future, they rely on resources that support their endeavors in all fields. From a top-rated library to outdoor nature reserves, the campus is well-equipped to meet diverse scholastic needs.

### ART GALLERIES AND MUSEUMS

The leading arts and cultural center in the West, UCLA museums, galleries, and gardens provide eclectic resources ranging from the ancient to the avant-garde.

#### Fowler Museum of Cultural History

The Fowler Museum of Cultural History is internationally known for the quality of its collections, which encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. It supports UCLA instruction and research and sponsors major exhibitions, lecture programs, and symposia. The museum is open to the public Wednesday through Sunday. For more information on hours and admission, see <http://www.fmch.ucla.edu>. ☎310-825-4361

#### Grunewald Center for the Graphic Arts

Housed in the UCLA Hammer Museum, the Grunewald Center for the Graphic Arts holds a distinguished collection of over 45,000 prints, drawings, and photographs, including nearly 10,000 works from the prestigious Armand Hammer Daumier and Contemporaries Collection. A study and research facility for the benefit of students and the community, the center's permanent holdings include significant European and American examples from the fifteenth century to the present. It is particularly noted for its collection of German Expressionist prints and works on paper by Matisse and Picasso, as well as the Richard Vogler Cruikshank Collection and the Frank Lloyd Wright Collection of Japanese prints. The center is open only by appointment. ☎310-443-7078

#### Murphy Sculpture Garden

Situated on a picturesque five-acre expanse that spans the heart of north campus, the Murphy Sculpture Garden contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in this distinguished collection are

private gifts to the University. Tours may be arranged. ☎310-443-7000

#### UCLA Hammer Museum

The UCLA Hammer Museum regularly presents its collection of Impressionist and Post-Impressionist paintings by such artists as Monet, Pissarro, Sargent, Cassatt, and Van Gogh. The museum organizes and presents major changing exhibitions devoted to examinations of historical and contemporary art in all periods. Cultural programming, including children's performance and storytelling series, music, poetry readings, and "Dialogues on Art," are presented throughout the week. For information on programming, hours, and docent tours, see <http://www.hammer.ucla.edu>. ☎310-443-7000

#### Wight Art Building

The Wight Art Building, located in the Dickson Art Center on north campus, includes exhibition space of 6,000 square feet dedicated to campus exhibitions and student-organized programs. ☎310-206-6467

### LIBRARIES

The UCLA Library, a campuswide network of libraries serving programs of study and research in many fields, is among the top ten ranked research libraries in the U.S. The total collections number more than 7.4 million volumes, and more than 90,000 serial titles are received regularly.

Reference librarians are available in all library units to answer questions about using online systems and to provide assistance with reference and research topics.

Students locate and identify materials through the library's web-based online information systems. ORION2 contains records for all UCLA Library holdings and other campus collections, including the Research and Study Center of the Film and Television Archive, Chicano Studies Research Center Library, Ethnomusicology Archive, Institute for Social Science Research Data Archives Library, and Instructional Media Library. ORION2 also provides library item location and circulation status.

The California Digital Library, a library for the entire University of California system, provides access to the Melvyl Catalog, the California Periodicals Database, numerous abstracting and indexing databases, and gateways to other systems. The Melvyl Catalog contains information on library holdings at all nine UC campuses.

While continuing to develop and manage collections of traditional printed materials, the UCLA Library also makes a number of digital resources available for campus use through the library site.

---

*The Center for Graphic Arts holds a distinguished collection of over 45,000 prints, drawings, and photographs and artists' books from the Renaissance to the present*

---

These include College Library electronic reserves and electronic journals, texts, reference resources, periodical indexes and abstracts. See <http://www.library.ucla.edu>.

### Arts Library

Housed in the Dickson Art Center, the Arts Library collects material on architecture, art history, design, film, television, history of architecture, photography as fine art, studio art, and theater. It also contains the Elmer Belt Library of Vinciana, a special collection of rare books and incunabula about Leonardo da Vinci and related materials in Renaissance studies. Arts Special Collections, housed in the Young Research Library, contain noncirculating materials, including the Princeton Index of Christian Art, Artists' File, archival records of major Southern California motion picture studios and television production companies, scripts from film, television, and radio, animation art, personal papers of writers, directors, and producers, photographs and production stills, posters, lobby cards, press kits, and West Coast theater playbills. See <http://www.library.ucla.edu/libraries/arts>.

### Charles E. Young Research Library

The Young Research Library primarily serves graduate research in the humanities, social sciences, education, public policy, and urban planning. Most of its collections are arranged in open stacks. The building also houses reference, circulation, graduate reserve, and periodicals services and the Microform and Media Service, with microcopies of newspapers, periodicals, and other materials. The Department of Special Collections contains rare books and pamphlets, primarily in the humanities and social sciences, from the fifteenth to twentieth century, university archives, early maps and atlases, early California newspapers, manuscript collections, transcripts of oral history, ephemera, microfilm, tape recordings, prints, paintings, and drawings, including original architectural drawings. See <http://www.library.ucla.edu/libraries/url>.

### College Library

The College Library, located in the Powell Library Building, features collections and services in support of the undergraduate curriculum in the humanities, social and physical sciences, and mathematics. Course reserve materials, including books, articles, audiotapes, homework solutions, lecture notes, and Academic Publishing Service Readers, are available for loan. The College Library Instructional Computing Commons, located on the first floor of Powell Library, provides students with access to computers and multimedia equipment, and Night Powell provides study space in a late-night reading room. See <http://www.library.ucla.edu/libraries/college>.

### Eugene and Maxine Rosenfeld Management Library

Located in the John E. Anderson Graduate School of Management complex, the Management Library houses materials on accounting information systems, arts management, business history, corporate history, entrepreneurship, finance, general management and management theory, industrial relations, international and comparative management, management information systems, management strategy and policy, marketing, operations, research, production and operations management,

public/not-for-profit management, and real estate. See <http://www.anderson.ucla.edu/resources/library>.

### Hugh and Hazel Darling Law Library

The Law Library collects published case decisions, statutes, and codes of the federal and state governments of the U.S. and other Common Law jurisdictions, legal treatises and periodicals in Anglo-American and international law, and appropriate foreign and comparative law holdings. The Law Library reports to the dean of the School of Law. See <http://www.law.ucla.edu/Library>.

### Louise M. Darling Biomedical Library

The Biomedical Library, located in the Center for the Health Sciences, serves all the UCLA health and sciences departments and schools and the UCLA Medical Center. Its collections focus on materials related to medicine, nursing, dentistry, public health, physiological sciences, biology, molecular biology, biochemistry, zoology, plant sciences, psychology, and life sciences, as well as rare works in the history of health and life sciences, botanical illustration, and Arabic and Persian medical manuscripts. See <http://www.library.ucla.edu/libraries/biomed>.

---

*The UCLA Library is among the top research libraries in the U.S.*

---

## Music Library

The collections of the Music Library in the Schoenberg Music Building include books, music scores, sound recordings, microforms, and interactive media on Western music history and criticism; world music styles, cultures, and traditions; and music theory, aesthetics, philosophy, and organology. Music Special Collections include rare printed and manuscript books, scores, and opera librettos; personal papers of prominent Southern California composers, performers, and writers on music; and archives of film, television, and radio music; it also houses the Archive of Popular American Music, a special collection of published and manuscript sheet music, recordings, and related materials. See <http://www.library.ucla.edu/libraries/music>.

### Richard C. Rudolph East Asian Library

Located in the Young Research Library, the East Asian Library collects Chinese, Japanese, and Korean vernacular-language materials in the humanities and social sciences. The collection is particularly strong in Japanese Buddhism, religion, Chinese and Japanese fine arts, Chinese archaeology, premodern history and classical literature on both China and Japan, and Korean literature and religion. See <http://www.library.ucla.edu/libraries/eastasian>.

*Music Special Collections include rare books, scores, and opera librettos*

## Science and Engineering Library

The Science and Engineering Library (SEL) collections on engineering, mathematics, and the physical sciences are housed in four separate locations. SEL/Chemistry, in Young Hall, houses materials on chemistry, biochemistry, and molecular biology. SEL/Engineering and Mathematical Sciences, in Boelter Hall, houses materials on aeronautics, astronomy, atmospheric sciences, bioengineering, chemical, civil, electrical, environmental, manufacturing, mechanical, and nuclear engineering, computer science, electronics, energy technology, mathematics, metals and materials, and pollution. SEL/Geology-Geophysics, in the Geology Building, houses materials on geology, geophysics, geochemistry, space physics, planetary science, paleobiology, micropaleontology, invertebrate paleontology, ore deposits, geomorphology, hydrology, and chemical oceanography. SEL/Physics, in Kinsey Hall, houses materials on solid-state, elementary particle, high-energy, mathematical, nuclear, and plasma physics, acoustics, spectroscopy, optics, and astrophysics. See <http://www.library.ucla.edu/libraries/sel>.

## SPECIAL ARCHIVES AND COLLECTIONS

In addition to the extensive collections of the University Library, a rich array of other information resources are independently managed by individual UCLA departments and centers.

### Cultural Center Collections

The Center for African American Studies Library contains materials reflecting the African American experience in the social sciences, arts, and humanities. The American Indian Studies Center Library houses a collection on American Indian life, culture, and state of affairs in historical and contemporary perspectives, while the Asian American Studies Center Reading Room features Asian and Pacific American resources.

Materials related to Chicano and Latino cultures are housed in the Chicano Studies Research Center Library, and the Clark Memorial Library contains rare books, manuscripts, and other noncirculating materials on English culture (1640 to 1750). The English Reading Room features a noncirculating collection of English and American literature, literary history, and criticism.

### Instructional Media Library

The Instructional Media Library, located in Powell Library, is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community and beyond. The library monitors compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. See <http://www.oid.ucla.edu/Imlib>. ☎310-825-0755

The Instructional Media Laboratory provides access to course- or textbook-related audio, interactive, and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and time. See <http://www.oid.ucla.edu/Imlab>. ☎310-206-1211

### UCLA Film and Television Archive

The UCLA Film and Television Archive is the world's largest university-based collection of motion pictures and broadcast programming. The archive's holdings of original film and television materials serve both the UCLA community and national and international constituencies.

The Motion Picture Collection, with more than 37,000 films, is the country's largest collection after the Library of Congress. Among its outstand-

ing collections are 27 million feet of Hearst Metro-tone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection is the nation's largest university-based collection of television broadcast materials. Its 35,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1946 to the present, with emphasis on drama, comedy, and variety programming. A special collection of over 100,000 news and public affairs programs is also maintained.

The archive's exhibition program presents evening screenings and discussions that focus on archival materials, new work by independent filmmakers, and an array of international films. See <http://www.cinema.ucla.edu>. ☎310-206-FILM

The Archive Research and Study Center (ARSC), provides on-site viewing of the Film and Television Archive's collections and research consultation to students, faculty, and researchers. ☎310-206-5388

### Other Collections

The Ethnomusicology Archive houses sound recordings of folk, ethnic, and non-Western classical music, while the Institute for Social Science Research Data Archive Library contains a collection of statistical databases for the social sciences. The Seeds University Elementary School Library features contemporary materials for children from kindergarten through junior high school and adult works on children's literature.

## COMPUTER SUPPORT

The exciting pace of computer technology demands an environment where information systems are recognized as a strategic requirement with a strong focus of attention, and where there is a solid technology foundation already in place. UCLA provides that environment and ensures hardware, software, and training to support research and study.

### Academic Technology Services

Academic Technology Services (ATS) provides resources and services that support the UCLA distributed computing environment. Through its five service areas ATS seeks to facilitate cross-departmental information technology initiatives, provide specialized resources to faculty and students in pursuit of their research and instructional goals, and leverage the volume purchasing power of the

University. See <http://www.ats.ucla.edu>. ☎310-825-6635

Training and consulting services include classes in statistical applications, high-performance computing, and scientific visualization. See <http://www.ats.ucla.edu/stat/training.htm>. ☎310-825-7431

Access to over 300 online training courses in topics ranging from basic word processing to programming and local area network management is also available. See <http://computer-training.ucla.edu>.

Through Software Central, ATS informs the UCLA community of software available at educational or special volume discounts and provides technical support for many applications. See <http://www.ats.ucla.edu/software>. ☎310-206-4780

Copyright ©2001 by Universal City Studios, Inc. Courtesy of Universal Studios Publishing Rights, A Division of Universal Studios Licensing, Inc. All rights reserved.

### Advanced Technologies

Advanced Technologies offers integrated services to faculty. Areas of expertise include technical and administrative grant development support; storage and management tools for research and instructional data; analysis and interpretation of complex data sets through statistical and visualization support; high-performance network consulting services for research; and high-performance computing through UCLA's SP/Cluster Program, consulting support for faculty to access the National Supercomputer Centers, and support for the development of central and local commodity-based Linux clusters. See <http://www.ats.ucla.edu/at>. ☎310-825-7426

### Disabilities and Computing Program

The Disabilities and Computing Program (DCP) provides adaptive technology services and support to students, faculty, and staff with disabilities, to faculty who are working with students with disabilities, and to departments. The DCP also coordinates access to computers, local area networks, and online resources for people with disabilities. See <http://www.dcp.ucla.edu>. ☎310-206-7133

### Student Computer Laboratories

Student laboratories are supported through the ATS Commons Laboratory and the College Library Instructional Computing Commons. See Student Services later in this chapter for information.

## PARKS, RESERVES, AND NATURAL SCIENCE RESOURCES

The geography of Southern California is conducive to research in the natural sciences. The diverse region is a natural laboratory supported by numerous UCLA resources for study.

### Biological Collections

The Biological Collections of the Organismic Biology, Ecology, and Evolution Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mammals primarily from the Western U.S., Canada, Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates. See <http://www.obee.ucla.edu.dickey>. ☎310-206-6084

### Division of Laboratory Animal Medicine

The Division of Laboratory Animal Medicine is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus. See <http://www.dlam.ucla.edu>. ☎310-825-7281

### Hannah Carter Japanese Garden

One mile from the UCLA campus in Bel Air, the Japanese Garden provides a unique illustration of art and nature for courses such as landscape architecture, environmental design, East Asian studies, and art classes. The Kyoto-style terraced garden was designed by Japanese artisans using native plants and artifacts. Traditional features such as a teahouse, shrine, antique stone water basins, and a koi pond are enjoyed by faculty, students, school and community groups, and others. Visits are by reservation only. See <http://www.japanesegarden.ucla.edu>. ☎310-825-4574

### Marine Science Center

The Marine Science Center coordinates marine-related teaching and research on campus and facilitates interdepartmental interaction of faculty and students. UCLA offers one of the broadest interdisciplinary educational programs in marine sciences in the U.S. Field trips for marine-related courses and access to research sites in the Santa Monica Bay, Channel Islands, and the Southern California Bight are provided by UCLA's 68-foot research vessel *Sea World UCLA*. See <http://www.msc.ucla.edu>. ☎310-206-8247

### Mathias Botanical Garden

The Mathias Botanical Garden is a living museum with one of the most important botanical collections in the United States. With specimens from all over the world, the seven-acre expanse on south campus specializes in tropical and subtropical plants, including some 5,000 species in 225 families. The botanical garden also has a research herbarium containing 180,000 dried plant specimens. School and community group tours are available as are individual guided tours. See <http://www.botgard.ucla.edu>. ☎310-825-1260

### Stunt Ranch Santa Monica Mountains Reserve

The University of California founded the UC Natural Reserve System (NRS) in 1965 to preserve undisturbed natural areas representing the state's vast ecological diversity for students, teachers, and researchers from public and private educational institutions to use as outdoor classrooms and living laboratories. The Stunt Ranch Santa Monica Mountains Reserve, administered by the Los Angeles campus, officially joined the UC NRS in November 1995. The 310-acre site is a 40-minute drive from UCLA and includes fine examples of chaparral and oak woodland ecosystems. The reserve lends itself to programs that focus on the natural ecosystems and issues of resource management in the urban/wildland interface. Undergraduate and graduate courses in the departments of Anthropology, Earth and Space Sciences, Geography, Organismic Biology, Ecology, and Evolution, and Physics and Astronomy, and the Institute of the Environment utilize Stunt Ranch and other NRS sites. See <http://nrs.ucop.edu/reserves/Stunt.html>. ☎310-206-3887

### UCLA Ocean Discovery Center

The UCLA Ocean Discovery Center at the Santa Monica Pier is a marine science learning center serving K-12 classes from schools in the greater Los Angeles area. Interactive lessons and activities introduce students to the basic concepts of marine environmental studies, marine biology, oceanography, and meteorology. The center is also open to the public, using the same conceptual approach to teach visitors about their connections to Santa Monica Bay and the world ocean. See <http://www.odc.ucla.edu>. ☎310-393-6149

# SUPPLEMENTARY EDUCATIONAL PROGRAMS

In addition to the regular academic programs that are described in the Curricula and Courses section of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

## EDUCATION ABROAD PROGRAM

Each year more than 1,700 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world through the Education Abroad Program (EAP). UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad.

Currently, EAP offers study opportunities at more than 100 different universities in 34 countries: Australia, Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Philippines, Russia, Singapore, South Africa, Spain, Sweden, Taiwan, Thailand, Turkey, United Kingdom, and Vietnam.

Participants can spend up to a full academic year abroad, enjoying a unique opportunity to enhance language skills, take courses in their major, and become involved in the culture of the host country. One-term programs are available in Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Italy, Japan, Korea, Mexico, Netherlands, Russia, Singapore, Spain, Sweden, Taiwan, and Thailand. Summer programs are offered in Denmark and Mexico. In Costa Rica there is a one-term tropical biology field study program, and field study programs are available in Mexico.

For all programs a special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host university assist with scholastic or personal problems.

EAP is open to all undergraduate students who have (1) at least a B average (3.0 GPA) overall at the time of application and (2) the support of the UCLA EAP Selection Committee. Some programs have a language requirement as well. Most programs require junior standing (90 units minimum) at departure; seniors and transfer students are welcome.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the

Graduate Division may participate at most study centers.

Costs for participation in EAP vary, but University financial aid and special EAP scholarships are available to those who qualify. Applications must be filed several months in advance. See <http://www.isop.ucla.edu/eap>. ☎310-825-4995

## SUMMER SESSIONS

Throughout the summer, UCLA offers more than 500 courses from approximately 60 UCLA departments in six-, eight-, nine-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following term, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in the Undergraduate Study and Graduate Study sections of this catalog.

Regularly enrolled undergraduate students may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on the UCLA transcript, and grades earned are computed in the grade-point average. Check with the College or school counselor about applying these courses toward degree requirements and about any limitations the College or school may impose on Summer Sessions study. Financial Aid funds are available to UCLA students.

Regularly enrolled graduate students may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult the graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees.

Unlike enrollment in regular terms, students may attend another college institution for credit while they are enrolled in Summer Sessions. Registra-

## UCLA EXTENSION

With over 100,000 adult student enrollments each year, UCLA Extension is one of the largest

---

*Student computer laboratories are available throughout the campus, each with hardware, peripherals, software, and services that cater to specific areas of study*

---

university continuing education programs in the world. It is designed to bring the benefits of the University—its scholars, research, and resources—to the community and the state as a whole.

Many of UCLA Extension's 4,500 classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline, in many interdisciplinary areas, and in emerging fields.

In addition, Extension offers special programs each term on topical issues as well as those of ongoing public concern. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult a College or school counselor or graduate adviser before enrolling. For more information, refer to UCLA Extension under Transfer Credit in the Academic Policies section of this catalog.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension Building, 10995 Le Conte Avenue. See <http://www.unex.ucla.edu>. ☎310-206-6201

To obtain the current *UCLA Extension Catalog*, contact the Registration Office. ☎310-825-9971

## STUDENT SERVICES

Like a small city, UCLA has its own police department and fire marshal, an equivalent to the phone company, health center, corner restaurants, and shops. Hundreds of services for the campus community facilitate academic and personal endeavors.

### SERVICES FOR STUDY

From academic advising to advanced computer support, UCLA services for study give students the tools they need to achieve academic success.

#### Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in the College and each school help students with major selection, program planning, academic difficulties, degree requirements, and petitions.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see Advising and Academic Assistance in the Undergraduate Study section of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

#### Bruin OnLine

Bruin OnLine (BOL) is the campus internet service provider for UCLA students, faculty, and staff and a vehicle for accessing campus network communication services. Using BOL, students enroll in classes or access student records through URSA, check class availability in the online *Schedule of Classes*, search the UCLA Library collections, access their Study Lists through MyUCLA, and connect to a range of campus events, programs, and services.

Bruin OnLine services include dial-up access to the campus backbone network and the Internet, an e-mail account, and space for personal webpages. BOL internet access software is available at the UCLA Store and can be downloaded from the BOL site. See <http://www.bol.ucla.edu>. ☎310-825-7452

#### Computer Laboratories

Student laboratories are supported through the Academic Technology Services (ATS) Commons Laboratory and the College Library Instructional Computing Commons (CLICC), a collaborative effort between ATS, Humanities Computing, Social Sciences Computing, the Office of Instructional Development, and College Library. Some 16 computer laboratories are available throughout the campus, each with computers, peripherals, software, and services that cater to specific areas of study. See <http://computerlabs.ucla.edu>. ☎310-206-0271

## Course Web Pages

The Instructional Enhancement Initiative, which was launched by the College of Letters and Science, assures that all Letters and Science undergraduate courses, except independent studies and other similar courses, provide an individual course website for faculty, teaching assistants, and enrolled students. The sites facilitate the distribution of supplementary course materials, lecture notes, homework assignments, research links, and electronic communication, including virtual office hours and class bulletin boards for interactive question and answer sessions. Instructors decide which of these online capabilities are best suited to their course websites.

## Lecture Notes and Course Readers

For certain courses, students may subscribe to Lecture Notes, which publishes concise weekly summaries of about 100 lecture classes. See <http://www.uclastore.ucla.edu/textbooks/lecturenotes>. ☎310-206-0882

Academic Publishing provides custom course readers, obtaining 5,000 copyright authorizations each year. See <http://www.uclastore.ucla.edu/textbooks/ap>. ☎310-825-2831

## MyUCLA

MyUCLA provides a portal to individual student information. Features include a personalized Study List showing classes and class information such as grades; a notifications section for important announcements; a subscriptions section to access online information from newspapers, journals, or magazines or from University departments, clubs, and organizations; and links to UCLA online resources, including URSA, the *Schedule of Classes*, and *UCLA General Catalog*. WebMail provides students an intuitive way to access private email accounts from any computer via MyUCLA.

Letters and Science students are able to obtain additional services including the ability to view their counseling appointments, check the status of petitions, and track their honors progress. See <http://my.ucla.edu>.

## University Records System Access

Through University Records System Access (URSA), UCLA students acquire academic, financial, and personal information from their University academic records and enroll in classes. URSA operates Sunday from 6 p.m. through 1 a.m. Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays. See <http://www.ursa.ucla.edu>. ☎310-208-0425

For most students, URSA provides the easiest way to gain real-time access to academic, financial, and personal records. The site is designed with an intuitive visual interface that walks students through the different steps of the procedure they are trying

to accomplish, whether it be to check their billing accounts, change address information, view and print Study Lists or Degree Progress Reports (DPRs), or see term grades. URSA OnLine also provides a convenient way to enroll in classes, to verify enrollment appointment times, and to view real-time enrollment counts.

## Veterans Affairs and Social Security Services

The Veterans Affairs coordinator, 1113 Murphy Hall, provides information for veterans and eligible dependents about veterans' educational benefits and tutorial assistance; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

## SERVICES FOR HEALTH AND SAFETY

### Ashe Student Health and Wellness Center

The Arthur Ashe Student Health and Wellness Center in Westwood Plaza is an outpatient clinic for UCLA students. Most services are prepaid by registration fees, and a current BruinCard is required for service. Core (prepaid) services include visits, most procedures, X rays, and most laboratory procedures. Noncore (fee) services, such as pharmaceuticals, injections, orthopedic devices, and some laboratory procedures, are less costly than elsewhere. If students withdraw during a school term, all Ashe Center services continue to be available on a fee basis for the remainder of that term, effective from the date of withdrawal. ☎310-825-4073

The cost of services received outside the Ashe Center, such as the Emergency Room, is each student's financial responsibility. Students are required to purchase supplemental medical insurance either through the UCLA-sponsored Medical Insurance Plan or other plans that provide adequate coverage.

Consult the Ashe Center site for specific information on its primary care, women's health, and men's health clinics, as well as on dental care which is available to students at discounted rates. See <http://www.studenthealth.ucla.edu>.

For emergency care when the Ashe Center is closed, students may obtain treatment at the UCLA Medical Center Emergency Room or UCLA Family Practice on a fee-for-service basis.

UCLA provides a student Medical Insurance Plan to cover services not offered at the Ashe Center. Adequate medical insurance is a condition of registration. See Registration in the Undergraduate Study and Graduate Study sections of this catalog.

## Mental Health Services

Services for mental health range from routine counseling and psychotherapy to a phone hot line.

### Student Psychological Services

Student Psychological Services offers short-term personal counsel and psychotherapy at two locations: the Mid-Campus Office in 4223 Math Sciences (☎310-825-0768) and the South Campus Office in A3-062 CHS (☎310-825-7985).

Psychologists, clinical social workers, and psychiatrists assist with situational stresses and emotional problems from the most mild to severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

Service is confidential and free to regularly enrolled students. Students are seen individually by appointment or may choose from a number of groups. Emergency counseling is also available. See <http://www.saonet.ucla.edu/sps.htm>.

SPS is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix).

### UCLA Peer Helpline

UCLA Peer Helpline is a crisis intervention and referral hot line staffed by UCLA students and staff members. Students can call and talk to a trained peer counselor about school stress, relationship problems, loneliness, depression, drug problems, suicide, or anything else that is on their mind. See <http://www.ucla.edu/emergency/helpline.html>. ☎310-825-HELP

### Student Safety and Security

Dial 911 from any campus phone for police, fire, or medical emergencies. For nonemergency information, contact the UCLA Police Department. See <http://www.ucpd.ucla.edu>. ☎310-825-1491

The police department provides a free Campus Escort Service every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs)—specially trained UCLA students—walk students, staff, faculty, and visitors between campus and local living areas or Westwood Village. ☎310-794-WALK

The free Evening Van Service provides a safe, accessible, and convenient mode of transportation around campus at night. Vans provide transportation between Ackerman Union, westside apartments, Lot 32, campus libraries, and residence halls. ☎310-825-9800

UCLA Sexual Violence Prevention and Education Services—including workshops, self-defense classes, counseling, and referrals—increase physical and psychological preparedness and heighten awareness of the complex issues of rape, sexual assault, and relationship violence. ☎310-206-8240

Cardiopulmonary resuscitation (CPR) and basic emergency care courses are offered by the Center for Prehospital Care and can be organized most days and times. ☎310-794-8797

The Office of Environment, Health, and Safety (EH&S) works to reduce workplace hazards on campus and to promote safety at all levels of the University community. EH&S is a consulting resource for UCLA departments and personnel who want to learn how to make the workplace safe. It handles requests for safety information and training, regulatory interpretation and applicability, approval for potentially hazardous procedures, resolution of safety problems, and surveillance and monitoring of persons and workplaces. See <http://www.ehs.ucla.edu>. ☎310-825-5689

### UCLA Emergency Numbers

Police, Fire, or Medical Emergency	911
UCLA Police Department (24 hours)	(310) 825-1491
UCLA Emergency Medical Center (24 hours)	(310) 825-2111
Campus Escort Service (dusk to 1 a.m.)	(310) 794-WALK
Helpline (Monday through Thurs- day 5 p.m. to midnight, Fri- day through Sunday 8 p.m. to midnight)	(310) 825-HELP

## ASSOCIATED STUDENT SERVICES

Founded when UCLA opened in 1919, the Associated Students UCLA provides services to the campus community through student government, publications, and services and enterprises. Every registered UCLA student is a member of ASUCLA. See <http://www.asucla.ucla.edu>.

### Student Government

Many facets of student life at UCLA are sponsored or organized by student government. Getting involved in the decision-making process is rewarding and offers avenues of expression students may not find in other aspects of their university experience.

### Graduate Students Association

The Graduate Students Association (GSA) is the official organization representing UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees from the Student Fee Advisory Committee to the committees of the Academic Senate. It sponsors various graduate student journals, programs, and social events, including the Melnitz Movies film program. See <http://gsa.asucla.ucla.edu>. ☎310-206-8512

## Undergraduate Students Association

Undergraduate student government is embodied in the Undergraduate Students Association (USA). Its governing body, the Undergraduate Students Association Council (USAC), is comprised of elected officers as well as appointed administrative, alumni, and faculty representatives. Every UCLA undergraduate is a member of USA.

The breadth of USA activities offers an invaluable service to the campus and surrounding communities and provides students the opportunity to participate in and benefit from these endeavors. For example, USA programs benefit both campus and community through programs to tutor youths and adults, address health needs of ethnic communities, combat poverty and homelessness, and better the environment.

Student government also supports approximately 20 student advocacy groups on campus from the African Student Union to the Union of Students with Disabilities. See <http://students.asu-cla.ucla.edu>.

## Campus Events

Each year approximately 40,000 students, faculty and staff attend programs of the Campus Events Commission (CEC), including a low-cost film program, a speakers' program, and performances by dozens of outstanding entertainers.

The Speakers Program brings entertainers, politicians, and literary figures to campus and presents two annual awards programs—the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Speakers and awardees have included notables as varied as Bill Gates, Whoopie Goldberg, and Tom Hanks.

The Concert Program brings new and name performing artists like Rage against the Machine or A Tribe Called Quest to UCLA for free and affordably priced concerts. See <http://students.asu-cla.ucla.edu/CEC>. ☎310-825-1958

The Cultural Affairs Commission sponsors WorldFest, a celebration of campus diversity, and the Jazz/Reggae Festival. ☎310-825-6564

## Publications and Broadcast Media

Publications and media provide a training ground for aspiring writers, journalists, photographers, and radio announcers while serving the communication needs of the campus community. Most publications offices are in Kerckhoff Hall.

### Daily Bruin

The *Daily Bruin*, with a circulation of 20,000, is one of the largest daily newspapers in Los Angeles. As the principal outlet for campus news, the *Bruin* is published each weekday of the academic year (once a week during the summer) and is distributed free from kiosks around campus and local areas. Students work as reporters, editors, design-

ers, photographers, and advertising sales representatives; new staff members are welcome. See <http://www.dailybruin.ucla.edu>. ☎310-825-9898

### Newsmagazines

Seven newsmagazines reflecting the diversity of the campus community are published twice each term. *Al-Talib*, *Ha'Am*, *La Gente*, *Nommo*, *Pacific Ties*, and *TenPercent* deal respectively with issues relevant to the Muslim; Jewish; Chicano, Latino, and Native American; African; Asian; and gay, lesbian, transsexual, and transgender communities, while *Fem* covers women's issues. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome.

### UCLA Yearbook

The UCLA yearbook, *BruinLife*, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. A separate publication, the *Freshman Record*, is produced for new UCLA students. Students who would like to participate may contact the yearbook staff. ☎310-825-2640

### KLA Radio

The UCLA radio station, KLA Radio, provides music, news, public service programming, and sports coverage during the academic year. Studios are in Ackerman Union; all positions, including on-air, news staff, and advertising representatives, are open to students. ☎310-825-9105

### UCLA Restaurants

ASUCLA operates more than a dozen restaurants and three coffee houses on campus assuring a range of eating options from Taco Bell to sushi. From the residence halls to the student union, a restaurant is never far. Hours vary, especially during summer and holidays. For hours and locations of all the restaurants, see <http://www.uclastore.ucla.edu/information/restaurant.html>.

### UCLA Store

In terms of sales, the UCLA Store is the biggest college store in the nation. There are five locations on campus. Author signings, sales, and other special events are announced in the *Daily Bruin* or on the UCLA Store site. See <http://www.uclastore.ucla.edu>.

The UCLA Store-Ackerman Union has seven departments. The Textbooks department carries required and recommended texts for most under-

---

*With a circulation of 20,000, the Daily Bruin is one of the largest daily newspapers in Los Angeles*

---

graduate and many graduate courses and operates a buyback service so students can sell used texts. BookZone offers reference books and a wide selection of titles in literature, science, history, and technical disciplines, including the UCLA Faculty Authors section. The Computer Store carries personal computers, peripherals, accessories, and software at low academic prices. Essentials offers school and office supplies, including consumables for computer printers. BearWear specializes in UCLA emblematic merchandise. Fast Track carries active footwear and sportswear for men and women, plus an extensive Clinique counter. Market is a convenience store, with snacks, health and beauty aids, and cut flowers. ☎310-825-7711

---

*New freshman and transfer students who are admitted for Fall Quarter and apply for on-campus housing by the stated deadline are guaranteed University housing*

---

UCLA Store–Health Sciences (☎310-825-7721) specializes in books and supplies for students in dentistry, medicine, public health, and related areas. UCLA Store–Lu Valle Commons (☎310-825-7238) carries art supplies and books, as well as textbooks and supplies for all on-campus Extension courses and selected academic programs (architecture and urban design, film, law, management, public policy, social welfare, theater, urban planning). North Campus Shop and Hill Top Shop in Sunset Village are convenience store locations.

### Other Services and Enterprises

ASUCLA oversees a variety of other services ranging from copy centers and a post office to a hair salon. Most are located in Ackerman Union.

Students preparing to graduate can use the Campus Photo Studio for their senior yearbook portraits. Graduation Etc. sells and rents caps, gowns, and hoods for degree ceremonies and provides announcements, diploma mounting, and other graduation-related products and services. ☎310-825-2587

On the lighter side, ASUCLA operates a game room called Xcape with pinball, video, and electronic games. ☎310-206-0829

## SERVICES FOR STUDENT LIFE

From housing to transportation, basic student needs are facilitated by services designed to enhance all aspects of student living.

### Accommodations

The *UCLA Housing* booklet is mailed to all students when they are accepted for admission. It contains a campus housing application plus details of all residence options and is the best guide for finding the right kind of accommodation for different lifestyles and budgets. See <http://www.housing.ucla.edu>. ☎310-825-4271

### On-Campus Housing

Many students, especially those in their first year, choose to live on campus. Besides the convenience, it's a good way to meet other people and to find out about social and academic activities. Four residence halls, two residential suites, and two village-type complexes accommodate nearly 6,700 undergraduates. Four more residential houses accommodate 160 transfer and upper division students. All on-campus housing is coed and within walking distance to classrooms.

Rooms in undergraduate residences are furnished and usually shared between two to three students. Meals are served daily at residential restaurants, and students may choose from a variety of meal plans.

To apply for on-campus housing, the completed application must be postmarked by the deadlines set by the housing office. Students applying for Winter or Spring Quarter are assigned on a space-available basis in the order applications are received. See [http://www.housing.ucla.edu/housing\\_site/oncampus/index.htm](http://www.housing.ucla.edu/housing_site/oncampus/index.htm).

Per-person costs for the academic year start at just under \$6,900. Consult the housing office for the range of price options. See [http://www.housing.ucla.edu/housing\\_site/oncampus/rates.htm](http://www.housing.ucla.edu/housing_site/oncampus/rates.htm)

The Office of Residential Life is responsible for student conduct in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. See <http://www.orl.ucla.edu>. ☎310-825-3401

The office is also a designated Sexual Harassment Information Center and Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

### Off-Campus Housing

The UCLA Community Housing Office provides information and listings for University-owned apartments, cooperatives, private apartments, roommates, rooms in private homes, and short-term housing. Rental listings are updated daily. Fraternity and sorority housing provides another option for members of the Greek system.

Within walking distance of campus, the University maintains five off-campus apartment buildings for full-time undergraduate students. Apartments vary from singles to three-bedroom units, with bedrooms usually shared by two or three students. Not all types of apartment spaces are available to entering students. See [http://www.housing.ucla.edu/housing\\_site/apartments/undergrad.htm](http://www.housing.ucla.edu/housing_site/apartments/undergrad.htm). ☎310-825-4271

Off-campus apartments for married, single-parent, and single graduate students include unfurnished one-, two-, and three-bedroom units about five miles from campus. Assignment to several of the apartment units is by wait list; students should not wait until they have been accepted to UCLA to apply. Verification of marriage and/or copies of children's birth certificates must accompany the application. See [http://www.housing.ucla.edu/housing\\_site/apartments/UASouth.htm](http://www.housing.ucla.edu/housing_site/apartments/UASouth.htm). ☎310-398-4692

Many of the 41 fraternities and sororities at UCLA own chapter houses. Complete information and membership requirements is provided by Fraternity and Sorority Relations. See <http://www.greek-life.ucla.edu/housing.htm>. ☎310-825-6322

The Community Housing Office has bus schedules, area maps, and neighborhood profiles. A current BruinCard or letter of acceptance is required for service. See <http://www.cho.ucla.edu/housing/cho.htm>. ☎310-825-4491

## Banking

Automatic Teller Machines representing most major banks are located in Ackerman Union and near restaurants and shops around campus.

Students at UCLA may join the Westwood Student Federal Credit Union, which has an office in Kerckhoff Hall. See <http://www.fffcu.org>.

The University Credit Union has an office in Westwood Village and a branch office in Ackerman Union. See <http://www.ucu.org>.

## Campus Ombuds Office

The Campus Ombuds Office responds to issues and concerns from students, staff, faculty, and administrators. Acting impartially, ombuds persons may investigate unresolved conflicts or facilitate the resolution of problems for which there are no established guidelines and may also, where possible and when requested by the visitor, assist in resolving an issue through mediation (including sexual harassment cases). The Ombuds Office is in the Strathmore Building. See <http://www.saonet.ucla.edu/ombuds>. ☎310-825-7627

The office is also a designated Sexual Harassment Information Center for students, faculty, and staff, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

## Center for Women and Men

The Center for Women and Men offers services to all UCLA students, with special focus on gender related issues and concerns and reentry/nontraditional student services.

The center presents workshops and support groups on topics such as assertiveness training, child care, career and leadership development, healthy relationships, mentorship for women in the sciences, men's issues, returning to school, single parenting, sexual violence prevention and education, and health and wellness. It also offers referrals for medical, legal, career planning, personal counseling, and other services both on and off campus. In addition, rape services consultants (RSCs)—individuals who provide information, support, and resources for members of the UCLA community who have been raped or sexually assaulted—can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise.

The center is a designated Sexual Harassment Information Center and campus Harassment Information Center available to all UCLA students. See <http://www.thecenter.ucla.edu>.

## Central Ticket Office

Tickets for UCLA events are available at the Central Ticket Office (CTO) in the West Alumni Center. As part of its service, CTO offers students with current BruinCards discount tickets to campus athletic and cultural events and local movies. Students may also purchase tickets to off-campus events through Ticketmaster, as well as student discount tickets for Los Angeles area buses. See <http://www.cto.ucla.edu>. ☎310-825-2101

## Child Care

UCLA Child Care Services operates three child care centers near the University and student housing. Care is provided for children two months to five years old at most centers. Fees range depending on the age of the child, the site, and schedule selected. A limited number of state grants is available for eligible student families. See <http://www.child-care.ucla.edu>. ☎310-825-5086

The Outreach Program helps parents make off-campus child care arrangements and coordinates a Choosing Child Care Forum each month. ☎310-825-8474

The *Working Parents Newsletter* addresses issues of concern to working parents and is available through department subscription. ☎310-206-3078

---

*The UCLA Central Ticket Office offers student discount tickets to campus athletic and cultural events and local movies*

---

The University Parents Nursery School is a multi-cultural cooperative school for two- to five-year-old children of UCLA students, faculty, and staff; priority is given to students living in Family Student Housing. Hours are weekdays 7:30 a.m. to 5:30 p.m. There is also a morning and an afternoon program. The nursery school is located in the UCLA University Village Child Care Complex, 3233 South Sepulveda Boulevard. ☎310-397-2735

### Dean of Students

The Office of the Dean of Students helps students, either directly or by referral, with whatever needs they might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

In addition, the office publishes Official Notices in the *Daily Bruin* at various times during the year. Such notices are important, and all students are held responsible for the information in them.

The Office of the Dean of Students may also administer campus discipline and enforce the standards of citizenship that students are expected to follow at UCLA. Standards involve complying with the policies and regulations governing this campus and being aware that violation of those policies or regulations can result in disciplinary action. Refer to Student Conduct: University Policies in the Appendix for more information. See <http://www.deanofstudents.ucla.edu>. ☎310-825-3871

### International Student Services

International student services in Bradley Hall provide support for UCLA's international community, particularly for nonimmigrant students. An orientation program helps international students plan their academic objectives, and programs throughout the year allows them to share viewpoints with American students and the community. See <http://www.intl.ucla.edu>. ☎310-825-1681

### Office of International Students and Scholars

The Office of International Students and Scholars (OISS) assists students with questions about immigration, employment, government regulations, financial aid, academic and administrative procedures, cultural adjustment, and personal matters. OISS is a designated Sexual Harassment Information Center for international students and a Harassment Information Center available to all UCLA students. In addition, OISS provides visa assistance for faculty researchers and postdoctoral scholars.

### Dashew International Student Center

The Dashew International Student Center seeks to improve student and community relationships and

helps international students with language, housing, and personal concerns. It also sponsors cultural, educational, and social programs.

### Lesbian, Gay, Bisexual, and Transgender Resource Center

The Lesbian, Gay, Bisexual, and Transgender (LGBT) Resource Center provides education, information, and advocacy services for the UCLA community. The center offers support groups, educational workshops, and training seminars and maintains a small library of books and periodicals. The staff provides confidential assistance and support to students, faculty, and staff who feel they have experienced harassment or discrimination or who wish to connect to the campus LGBT community. See <http://www.lgbt.ucla.edu>.

### Office for Students with Disabilities

The Office for Students with Disabilities (OSD) in Murphy Hall provides academic support services to regularly enrolled students with documented permanent or temporary disabilities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Free support services include readers, note takers, sign language interpreters, Learning Disabilities Program, special parking, registration assistance, fee deferments authorized by the California Department of Rehabilitation, on-campus transportation, campus orientation and accessibility, proctor and test-taking arrangements, tutorial referral, housing assistance, support groups, workshops, special materials, adaptive equipment, and referral to the Disabilities and Computing Program. Accommodations are varied and specifically designed to meet the documented disability-related needs of each student. All contact and assistance are confidential. See <http://www.saonet.ucla.edu/osd>. ☎310-825-1501, TDD 310-206-6083, fax 310-825-9656

For information on the Disabilities and Computing Program, see Computer Support under Supporting Resources earlier in this section.

### Parking and Commuter Services

Parking, ridesharing, and other transportation options and services are offered through UCLA Transportation Services. There are several commuting alternatives for students to get to and from campus without driving their cars. Both full-time and part-time riding opportunities are available.

### Commuter Assistance-Ridesharing

The Commuter Assistance-Ridesharing (CAR) Office is the best place for information on transportation options. Many students form or join existing UCLA carpools or vanpools. More than 130 vanpools commute to UCLA from nearly 80 southern California communities. Full- and part-time riding opportunities are available, and regis-

tered two- and three-person student carpools are given top priority to receive parking (see below).

These and other commuting options, including an extensive network of public transit, are described in the *UCLA Commuter Guide* available at Parking Services in the Strathmore Building at Strathmore Place and Westwood Plaza. See <http://www.transportation.ucla.edu>. ☎310-794-RIDE

### Parking Permits

Due to limited availability, parking at UCLA is offered to students who demonstrate the greatest need. Student parking permits are assigned through a point system that considers class standing, commute distance, previous attendance, employment, dependent children, and professional school obligations. Students are encouraged to apply on time and follow all application and payment guidelines in order to increase their chances of receiving a permit. Permits are not guaranteed.

When assigning parking permits to students, UCLA Parking Services gives the highest priority to carpools. Carpool permits are guaranteed to all qualified two- and three-person student carpool groups that apply on time. Student carpools park in central campus parking areas and share a discounted permit fee. Students interested in forming a carpool who need help finding other students living near them should call and ask for a free Ride-Guide. All members of a proposed student carpool must apply in person as a group. ☎310-825-3681

Most student permits are assigned for the academic year and can be paid for annually or quarterly. Renewal forms for students paying quarterly are automatically mailed before the Winter and Spring Quarter payment due dates. Students who are not offered a parking assignment during a given term or who wish to change their parking area need to reapply the following quarter.

Student Parking Request forms, along with important quarterly due dates and information on how to apply for a parking permit, are available by phone or in person at Parking Services. Parking request forms can also be downloaded at <http://www.transportation.ucla.edu>. ☎310-825-9871

Students with permanent disabilities who have disabled persons' placards or DMV-issued disabled persons' license plates and students with short-term disabilities may apply to the Office for Students with Disabilities for parking assignments and on-campus transportation assistance. ☎310-267-2004

Parking permits and access cards to campus lots and structures are not transferable and may be purchased only from UCLA Parking Services. Resale is prohibited and subjects both buyer and seller to disciplinary action.

### Post Offices

Campus mail is handled by UCLA Mail, Documentation, and Distribution Services, which offers full-

service document processing and delivery for the campus community. See <http://www.mail-doc.ucla.edu>. ☎310-794-6371

The United States Postal Service also operates two express post offices for the campus, including a branch in Ackerman Union.

### Student Legal Services

Through Student Legal Services in Dodd Hall, currently registered and enrolled students with legal problems can get assistance from attorneys or law students under direct supervision of attorneys. They help students solve legal problems, including those related to landlord/tenant relations; domestic violence and harassment; divorces and other family law matters; accident and injury problems; criminal matters; automobile purchase, repair, and insurance problems; health care, credit, and financial aid issues; consumer problems; and University-related issues. Assistance is available only by appointment. See <http://www.studentlegal.ucla.edu>. ☎310-825-9894

### UCLA Alumni Association

Celebrating more than 65 years of serving the UCLA community, the UCLA Alumni Association has nearly 75,000 members, making it one of the largest alumni groups in the nation. Whether a person is a recent graduate, a pioneer Bruin, or somewhere in between, membership in the Alumni Association is the best way to stay connected to UCLA and its growing excellence.

Membership dues enable the Alumni Association to serve as an advocate on campus and to play the vital role of guardian of the value of every UCLA degree. Dues also support programs such as Bruin Fest, Spring Sing, class reunions, and the scholarship program.

The association offers many benefits and services, including career services. Members make friends, pursue lifelong learning, save money, and make a difference. UCLA graduates, Bruin parents, and friends of the University are invited to take advantage of all the association has to offer. Offices are in the West Alumni Center on Westwood Plaza. See <http://www.uclalumni.net>. ☎310-825-ALUM or, outside Los Angeles County, 800-825-ALUM

### UCLA BruinCard

The UCLA BruinCard is a mandatory student identification card that is used to electronically confirm student status and eligibility for services. Supportive photo identification, such as a driver's license or passport, is required when the card is issued.

The primary benefit of the BruinCard is convenience. It is a versatile card that serves the follow-

ing functions: confirmation of student status; I.D. card for faculty, staff, and students; residence halls access card; library card; recreation card; debit card (if activated) for purchases at all campus stores and restaurants; AT&T Calling Card (if this feature is elected); and time-management card for departments using the Kronos system.

Students with a hold from an office with which they have an outstanding obligation (financial, academic, or administrative) may not receive services until the hold is released by the initiating office. For details on outstanding holds and initiating offices, check with URSA.

BruinCard centers are in 123 Kerckhoff Hall, 107 UCLA Wilshire Center, and 150A Sproul Hall. See <http://www.bruincard.ucla.edu>. ☎310-825-2336

To report lost or stolen cards, call ☎310-206-3199.

### UCLA Career Center

The UCLA Career Center, located in the Strathmore Building, offers career planning and employment assistance free to all UCLA students. Services are in the Career Center and in two specialized service centers: Engineering and Science Career Services in Boelter Hall and EXPO Internship and Study Abroad Services in the Strathmore Building. See <http://www.career.ucla.edu>.

#### Career Planning and Exploration

Career counselors provide assistance in selecting a major, setting realistic career goals, investigating career options, evaluating graduate and professional school programs, and developing skills to conduct a successful job search. Information on local, national, and international internship opportunities can assist students in exploring different career possibilities, making important professional contacts, and obtaining valuable on-the-job experience. The Career Center Library offers a collection of over 3,000 career-related books and directories, videos, periodicals, and other materials. In addition, the Career Center offers workshops on a variety of career-related topics; many are repeated several times each term.

#### Employment Assistance

Students who need extra money to finance their college degree can find a large volume of part-time, temporary, and seasonal employment leads advertised through the Career Center's 24-hour BruinTraks™ online listings available on the web. Students and recent graduates looking for full-time, entry-level career positions may access hundreds of current professional, managerial, and technical openings in numerous career fields. Seniors and graduate students may participate in BruinView™ campus interviews for positions in corporations, government, not-for-profit organizations, elementary and secondary schools, community colleges, and four-year academic institutions. Annual career fairs and special events offer additional opportunities to meet potential employers.

## STUDENT ACTIVITIES

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited and provide a good way for students to expand their horizons beyond classroom learning.

### CLUBS AND ORGANIZATIONS

Joining a club or organization is a great way to meet other students with shared interests and to get involved in campus life. UCLA has about 600 different organizations recognized by the Center for Student Programming—more than are found on almost any other university campus in the country.

#### Center for Student Programming

Organizations registered with the Center for Student Programming (CSP) include political, recreational, community service, cultural, academic, religious, and residential clubs. It only takes three people to start a new club if their interests are not already represented. CSP also handles complaints of misconduct against officially recognized student organizations. See <http://www.studentactivities.ucla.edu>. ☎310-825-7041

All student organizations are eligible to use the services of Student Event Management, which offers technical and logistical consulting for student events, including cost estimates and event management. ☎310-825-6690

Two major CSP divisions are the Community Programs Office and Fraternity and Sorority Relations.

#### Community Programs Office

The UCLA Community Programs Office (CPO) was established in 1970 by concerned students, staff, and faculty who felt that the pedagogical role of students should not only consist of classroom instruction but should be relevant to social issues as well.

Currently, the CPO houses 30 student-initiated community and student support projects that encompass educational, legal, social, medical, and academic services to underserved communities in the Los Angeles area. CPO is unique in its multicultural and ethnically diverse environment and the experience it offers in campus and community programming. See <http://www.saonet.ucla.edu/cpo>. ☎310-825-5696

#### Fraternity and Sorority Relations

Fraternities and sororities have been at UCLA since the 1920s. Today UCLA counts some 50 national and local Greek-letter organizations that make up one of the largest Greek systems on the West Coast.

Fraternity and Sorority Relations (FSR) interprets University policies, procedures, and regulations and acts as a liaison between established Greek organizations and the University. It coordinates

Greek-letter social organizations, which participate in programs such as the Greek Leadership Conference, Membership Recruitment, Greek Week, New Member Forums, Dating Expectations Programs, intramural tournaments, and University-sponsored programs. See <http://www.greeklife.ucla.edu>.

FSR is a designated campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for information).

## PERFORMING ARTS

Concerts, dance recitals, and theater productions are all part of exceptional programs offered by the Music, Ethnomusicology, Theater, Film, Television, and Digital Media, and World Arts and Cultures departments and by UCLA Performing Arts.

### Department Events

The Ethnomusicology Department provides students with the opportunity to perform in various world music and ethnic ensembles that provide concerts listed in the department's schedule of events. See <http://www.ethnomusic.ucla.edu>.

The Music Department features performances by ensembles ranging from jazz to opera. In addition, the Gluck Fellows Music Performance Program provides community outreach through free performances throughout the Los Angeles and Southern California region. See <http://www.music.ucla.edu>.

The Theater Department presents a series of major productions to the general public, and the Film, Television, and Digital Media Department features student-directed films and television programs throughout the year. The School of Theater, Film, and Television's annual festival is a week long celebration of film, video, new media, animation, screenwriting, and TheaterFest, which features everything from performance art to the classics. See <http://www.tft.ucla.edu>.

The World Arts and Cultures Department presents events and concerts involving departmental faculty, guest artists, and students. Student performances include M.F.A. concerts, an undergraduate and graduate student-produced concert, and the Senior Concert/Colloquium. Students also perform in more informal programs, such as the end-of-term Creative Work showings or *Pau Hana*, that feature many world dance forms. See <http://www.wac.ucla.edu>.

### UCLA Performing Arts

Since 1937, UCLA Performing Arts has served as the premier West Coast showcase for world-class performing artists and ensembles as well as innovative new work in dance, music, theater, and performance art. UCLA Performing Arts presents more than 200 public concerts and events each year, often sponsoring debut performances of new works by major artists. Through UCLA Performing Arts, the campus hosts a varied and active perfor-

mance program, ranging from regular concerts by the Los Angeles Chamber Orchestra to events with Luciano Pavarotti, Yo-Yo Ma, Alvin Ailey American Dance Theater, Kathleen Battle, Mikhail Baryshnikov, Pina Bausch Tanztheater Wuppertal, Twyla Tharp, Stomp, Pinchas Zukerman, and Branford and Wynton Marsalis. Subject to availability, discount tickets are offered to students, faculty, and staff. See <http://www.performingarts.ucla.edu>.  
◆310-825-4401

## SPORTS AND ATHLETICS

Athletics play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports and now ranks first in the U.S. in the number of National Collegiate Athletic Association (NCAA) championships won (85). In 1999-00 the UCLA athletic programs (men and women) placed second in the Sears Directors Cup national all-around excellence survey. In the 23-year history of the former *USA Today* survey, the men's program placed first 11 times, while the women's program placed first five times in the final nine years. UCLA was the first university in the country to win five NCAA men's and women's championships in a single year (1981-82). See <http://www.uclabruins.com>.

UCLA also has produced a record number of professional athletes such as Troy Aikman, Eric Karros, Reggie Miller, Natalie Williams, and Corey Pavin and Olympians such as gold medalists Lisa Fernandez, Karch Kiraly, Gail Devers, and Dot Richardson.

### Athletic Facilities

The major indoor arena at UCLA is the famed Pauley Pavilion, which seats 12,800 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, Drake Stadium is the home of UCLA track and field competitions and site of many outdoor events, including the U.S. Olympic Festival '91. The Los Angeles Tennis Center, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. Easton Softball Stadium, which seats 1,050, is the home of the championship women's softball team. The Morgan Intercollegiate Athletics Center houses the UCLA Athletic Hall of Fame. Off-campus facilities include Jackie Robinson Stadium for varsity baseball and the renowned Rose Bowl in Pasadena, home of the UCLA football team.

---

**UCLA**  
*Performing Arts has served as the premier West Coast showcase for world-class performing artists and ensembles, as well as innovative new work in dance, music, theater, and performance art*

---

## Men's Intercollegiate Sports

UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 66 NCAA men's championships—second highest in the nation—including 18 in volleyball, 15 in tennis, 11 in basketball, eight in track and field, seven in water polo, three in soccer, two in gymnastics, and one each in golf and swimming. Students can participate on the varsity level in football, basketball, track, baseball, tennis, volleyball, water polo, golf, soccer, and cross-country. For more information, contact the Athletic Office. ☎310-825-8699

## Women's Intercollegiate Sports

With 11 different varsity sports, the UCLA women's program is one of the most extensive in the country, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's teams have won an overall total of 19 NCAA titles—fifth highest in the nation—including eight in softball, four in track and field, three each in gymnastics and volleyball, and one in golf. UCLA has also won four collegiate water polo titles. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, and soccer. For more information, contact the Athletic Office. ☎310-825-8699

## UCLA RECREATION

To help students learn new skills, meet people with similar interests, relieve stress, and increase fitness, the Department of Cultural and Recreational

Affairs (CRA) oversees programs from intramural sports to outdoor adventures. See <http://www.recreation.ucla.edu>. ☎310-825-3701

### Intramural and Club Sports

The UCLA Intramural Sports Program consists of team, dual, and individual sports competition in tournament or league play. Over 2,200 teams and 16,000 participants compete throughout the year in various sports activities ranging from basketball to water polo. UCLA Students and RecCard holders are eligible. Varying skill levels are offered in almost all activities, and the emphasis is on friendly competition.

The Club Sports Program offers students the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level. Recognized

teams exist in ice hockey, men's and women's rugby and lacrosse, cycling, snow skiing, and surfing.

## Outdoor Adventures

Outdoor Adventures offer students the chance to get away and enjoy the wonders of local and distant mountains and waterways. Activities designed for beginning to experienced outdoors people include camping, kayaking, and hiking. ☎310-206-1252

## Class Programs

Noncredit recreation classes in aquatics, dance, fine arts, martial arts, outdoor studies, tennis, and sports skills are offered for beginning and intermediate levels. Private lessons in tennis, fitness activities, swimming, racquetball, and golf are also available. Students can also participate in cultural events through art exhibitions, the poetry reading program, museum tours, and theater in Los Angeles outings.

Fitness is offered either as a recreation class or on a drop-in basis. A Fitness Pass must be purchased to participate in drop-in fitness classes.

## Facilities

For registered students who prefer independent recreation and exercise, CRA offers access to many facilities. The Wooden Recreation and Sports Center has multiple gymnasiums, nine racquetball/handball courts, two squash courts, a weight training facility, rock wall, exercise/dance and martial arts rooms, and a games lounge. The Sunset Canyon Recreation Center offers activities in an outdoor park setting that features a 50-meter swimming pool, 25-yard family pool, picnic areas, play fields, outdoor amphitheater, lighted tennis courts, and various meeting rooms and lounges. The UCLA Marina Aquatic Center offers sailing, windsurfing, kayaking, canoeing, scuba diving, and rowing classes and activities. Students also have the use of Pauley Pavilion, Drake Stadium, Sycamore Tennis Courts, Los Angeles Tennis Center, Intramural Fields, Men's Gym, and Kaufman Hall for recreational sports and activities.

## Youth and Family Programs

Youth and Family Programs offer exciting activities for children 18 months to 17 years. Summer programs include Camp Bruin Kids for ages 5 to 10, Camp Explore for ages 7 to 11, UCLA Summer Programs for High School Students, group and private lessons, and special events. Year-round classes are also offered on Saturday mornings. Activities combine play with skill development and deepen the fun in learning.

# Undergraduate Study

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites prospective students to visit UCLA for individual or group tours of the campus. Reservations are required. See <http://www.admissions.ucla.edu/tours.htm>. ☎310-825-8764

## UNDERGRADUATE ADMISSION

Undergraduate Admissions and Relations with Schools  
1147 Murphy Hall  
(310) 825-3101  
<http://www.admissions.ucla.edu>

Prospective UCLA undergraduates should give careful thought to adequate preparation in reading, writing, mathematics, laboratory sciences, languages, and other subject areas related to a degree objective or major. High school honors level and advanced placement courses are good preparation regardless of the desired major. To be competitive, UCLA applicants need to present an academic profile much stronger than that represented by the minimum UC admission requirements.

### APPLYING FOR ADMISSION

To apply for admission to UCLA, obtain the *UC Application for Undergraduate Admission and Scholarships*. It has all necessary forms and instructions and is available from California high school or community college counselors or from any UC undergraduate admissions office. Applicants may also download and print an application from <http://www.ucop.edu/pathways> or, from mid-September to the Fall Quarter deadline, complete the application online.

One application is used for the eight UC campuses with undergraduate programs. Students apply to one UC campus for a nonrefundable application fee; an additional fee is charged for each additional campus.

### When to Apply

All majors are open for Fall Quarter. For Winter Quarter all majors in the College of Letters and Science, except Communication Studies, are open, as are majors in the Henry Samueli School of Engineering and Applied Science, but the schools of Nursing, Arts and Architecture, and Theater, Film, and Television are closed.

### Notification of Admission

The UC Undergraduate Application Processing Service mails out notices to acknowledge receipt of

applications. Subsequently, UCLA UARS notifies students of the admission decision. The length of time before admission notification varies. In general, Fall Quarter freshman applicants are notified in late March and transfers in late April; Winter Quarter applicants are notified in late September.

Students who are offered admission are asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefund-

able deposit, also required at this time, is applied to the University registration fee as long as students register in the term to which they are admitted.

## ENTRANCE REQUIREMENTS

Entrance requirements established by the University follow the guidelines set forth in the California Master Plan for Higher Education, which requires that the top one eighth of the state's high school graduates be eligible for admission to the University of California. Requirements are designed to ensure that all eligible students are adequately prepared for University-level work.

Fulfilling the minimum admission requirements does not assure admission to UCLA. Admission is based on demonstrated high scholarship in preparatory work going well beyond the minimum eligibility requirements. UCLA offers admission to those students with the best overall academic preparation. For details, see <http://www.admissions.ucla.edu>.

### Application Deadlines

See <http://www.registrar.ucla.edu/calendar> for updates.

Winter Quarter 2002	July 1-31, 2001 (Transfers only)
Spring Quarter 2002	Closed to new applicants
Fall Quarter 2002	November 1-30, 2001 (Freshmen and transfers)

## ADMISSION AS A FRESHMAN

Students are considered freshman applicants if they have not enrolled in a regular session of any college-level institution since graduation from high school. Students who attend summer session immediately following high school graduation are still considered freshmen applicants.

### Minimum Admission Requirements

To be considered for admission as a freshman, students must meet the subject requirement, the

scholastic requirement, and the examination requirement.

Changes in the minimum requirements for freshman applicants are being phased in over three years, beginning with students entering UCLA in Fall Quarter 2001. See <http://www.admissions.ucla.edu>.

#### Subject Requirement

a. History/Social Science	2 years
b. English	4 years
c. Mathematics	3 years
d. Laboratory Science	2 years
e. Language Other than English	2 years
f. College Preparatory Electives	2 years
g. Visual and Performing Arts (Fall 2003)	1 year

*To be considered for admission as a freshman, students must meet three main requirements: the subject requirement, the scholastic requirement, and the examination requirement. To be competitive, applicants need to present an academic profile much stronger than that represented by the minimum admission requirements*

### Subject Requirement

The subject requirement, sometimes called A to F requirements, is a sequence of high school academic courses required for admission to the University. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, seven of which must be taken during the last two years in high school. These are the minimum requirements; students should exceed these requirements whenever possible.

- History/Social Science.** Two years of history/social science, including one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government, and one year of world history, cultures, and geography
- English.** Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern literature, poetry, and drama. No more than two semesters of ninth-grade English can be used to meet this requirement
- Mathematics.** Three years of college preparatory mathematics that include the topics covered in elementary algebra, geometry, and advanced algebra (four years are recommended, including trigonometry and calculus). Mathematics courses taken in the seventh and eighth grades may be used to fulfill this requirement if the high school accepts them as equivalent to its own courses
- Laboratory Science.** Two years of laboratory science (three years are recommended) which provide fundamental knowledge in at least two of these areas – biology, chemistry, and physics. Laboratory courses in Earth/space sciences are acceptable if they have prerequisites or provide basic knowledge in biology, chemistry, or physics. No more than one year of ninth-grade lab-

oratory science can be used to meet this requirement

- Language Other than English.** Two years of the same language, other than English (three to four years are recommended). Courses should emphasize speaking and understanding and include instruction in grammar, vocabulary, reading, and composition
- College Preparatory Electives.** Two units (four semesters), in addition to those required above, to be selected from the following subject areas: history, English, advanced mathematics, laboratory science, language other than English, social science, and visual and performing arts. Beginning with applicants for Fall Quarter 2003, the number of college preparatory electives required will be reduced to one unit (two semesters) and augmented by the visual and performing arts (VPA) requirement
- Visual and Performing Arts.** Freshmen entering Fall Quarter 2003 will be required to complete one unit (two semesters) of approved arts courses from any of the four VPA areas (dance, drama/theater, music, and visual arts)

### Scholastic Requirement

Eligibility for admission to the University of California is based on a combination of the grade-point average in the academic subject requirement and the American College Test (ACT) or Scholastic Assessment Test I (SAT I) scores. For details, refer to *Introducing the University* at <http://www.ucop.edu/pathways/infoctr>.

### Examination Requirement

All freshman applicants must submit scores from the following tests:

- Either the ACT composite score OR the SAT I: Reasoning Tests total score
- Three SAT II: Subject Tests which must include
  - Writing AND
  - Mathematics, level 1 or 2, AND
  - One additional test (either English literature, foreign language, science, or social studies)

The tests should be taken by the December test date, as they are part of the review process. Students should request that test results be sent directly to UCLA when they take each test.

### Admission Selection

Many elements are considered in the selection process, but the primary ones are (1) academic grade-point average, (2) scores on the SAT I or ACT and the three required SAT II tests, (3) quality, content, and level of coursework throughout the entire high school program, including the senior year, and (4) number of and performance in honors and advanced placement (AP) courses.

Freshman applicants who are admitted must have an official, final high school transcript (showing the date of graduation) sent to UCLA. Sixth or seventh semester transcripts are not required.

## ADMISSION AS A TRANSFER STUDENT

Students are considered transfer applicants if they have been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) Students may not disregard their college record and apply for admission as a freshman.

In accordance with the California Master Plan for Higher Education, first preference is given to California community college applicants. Applicants transferring from other UC campuses are next in priority, followed by applicants transferring from other colleges and universities. Each application receives a comprehensive review, integrating all available information. Students attaining senior standing are generally not admitted.

Academic criteria are as follows: grade-point average in transferable courses, significant preparation for the major, completion of the English composition and mathematics requirements, and progress toward completion of the Intersegmental General Education Transfer Curriculum (IGETC) or UCLA general education requirements. Applicants who have completed the English composition and mathematics requirements in their academic program and who have 90 transferable quarter units by the time they enroll in the University receive priority admission consideration.

For details on transfer admission requirements, refer to the guidelines in the application. See <http://www.admissions.ucla.edu/transfer>.

### Intercampus Transfers

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Submit the *UC Application for Undergraduate Admission and Scholarships* with the required application fees. The filing periods are the same as those for new applicants. Students who have attended another UC campus and wish to be considered for admission to UCLA must have been in good standing when they left that campus. Intercampus transfers are not automatic; students must compete with all other applicants.

### Transfer Credit and Credit by Examination

The University awards unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by UARS. All courses that meet the criteria are used in determining eligibility for admission.

To convert semester units into quarter units, multiply the semester units by 1.5. For example, 12 semester units  $\times$  1.5 = 18 quarter units.

College credit for examinations given by national testing services is generally not allowed, except for the AP Tests given by the College Board and the International Baccalaureate.

## INTERNATIONAL APPLICANTS

To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certifi-

cate of completion which would enable them to be admitted to a university in the home country.

The application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted as early as possible after the filing period opens. This allows time for the necessary correspondence and, if students are admitted, to obtain passport visas.

**Proficiency in English.** Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, they are required to take the UCLA English as a Second Language Placement Examination (ESLPE) before the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Depending on the ESLPE results, students may be required to successfully complete one or more English as a second language courses. In addition, they are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing their ability. Make arrangements for this test by contacting TOEFL/TSE Publications, P.O. Box 6151, Princeton, NJ 08541-6151 (609-771-7100) or at <http://www.toefl.org>. Have the test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

## SECOND BACHELOR'S DEGREE

By policy, second bachelor's degrees are not generally granted, except in the School of Nursing.

## COLLEGE OF LETTERS AND SCIENCE

### ADVANCED PLACEMENT CREDIT

All UCLA course equivalents consist of lower division advanced placement units. Students may not repeat for units or grade points an AP Test credit that has been given UCLA course number equivalency, such as History 13A-13B-13C.

## REGISTRATION

Enrollment and Degree Services  
1113 Murphy Hall

(310) 825-1091  
<http://www.registrar.ucla.edu>

Registration consists of paying fees and enrolling in classes.

1. Registration fees and other University charges are paid through the UCLA Student Billing Statement, also called the BAR statement, mailed monthly to students' UCLA mailing address by the Student Accounting Office.
2. Enrollment in classes is completed via URSA at (310) 208-0425 or <http://www.ursa.ucla.edu>.

Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

## PAYING FEES

Details on fee payment, enrollment procedures, and deadlines are in the *Schedule of Classes* at <http://www.registrar.ucla.edu/schedule>.

Once students receive their BAR statement, payments can be mailed, deposited in the Administrative Main Cashier's drop slot at 1125 Murphy Hall, or paid by credit card via CyberPay, which is accessed through URSA OnLine. After the published deadline, payments must be made in person at 1125 Murphy Hall and are assessed an additional late fee.

### Annual Fees for 2001-02

Fees are subject to change without notice.  
See <http://www.registrar.ucla.edu/fees> for updates.

University registration fee	\$ 713.00
Educational fee	2,716.00
Ackerman Student Union fee	51.00
Undergraduate Students Association fee	72.27
Wooden Recreation Center fee	36.00
Seismic fee for Ackerman/Kerckhoff	113.00
Student Health Insurance Plan	535.00
<b>Total for California residents</b>	<b>\$4,236.27</b>
Nonresident educational fee	3,086.00
Nonresident tuition fee	10,244.00
<b>Total for nonresidents</b>	<b>\$14,850.27</b>

## Annual Undergraduate Fees

Although the exact cost of attending UCLA varies, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to Undergraduate Admissions and Rela-

tions with Schools (UARS) with the Statement of Intent to Register. Legal residents of California are not required to pay tuition. Students classified as nonresidents must pay annual tuition in addition to registration fees. For a definition of residence and nonresidence, see the Appendix.

Fees are subject to change without notice. See <http://www.registrar.ucla.edu/fees> for updates. The registration fee covers student expenses such as counseling, facilities, registration, graduation, and health services. The fee is charged whether or not students make use of these services.

## Course Materials Fees

The College of Letters and Science and each school are authorized to assess course materials fees. Some course materials fees are assessed based on actual enrollment at the end of the fourth week of classes. Students are responsible for ensuring that all Study List errors and omissions are corrected prior to this time. All students in a course with an approved course materials fee are assessed the fee, regardless of major. The fee is nonrefundable. Students who are approved for a Late Add enrollment in a course after the fourth week are required to pay the course materials fee, which is billed through the BAR statement, for the entire quarter.

For fee amounts and updates, see <http://www.registrar.ucla.edu/fees>.

## Miscellaneous Fees

Miscellaneous fees include charges for late registration fee payment. Late fees also apply if students file their Study List late or do not pay off BAR statement balances on time. Fees are charged if any check is returned by a bank for any reason. Charges are assessed for most petitions and other special requests. A full list of miscellaneous fees is posted at <http://www.registrar.ucla.edu/fees/misc-fee.htm>.

## Student Health Insurance Plan

All UCLA undergraduate students are automatically assessed for and enrolled in the Undergraduate Student Health Insurance Plan (USHIP) as a condition of registration at UCLA. Continued enrollment in adequate medical/health insurance must be maintained during all registered terms.

The USHIP fee is billed each term along with other UCLA fees. USHIP fulfills all of the requirements mandated for adequate medical/health insurance as defined by the University. The Ashe Student Health and Wellness Center is the primary health care provider for USHIP and is where all nonemergency medical care must be initiated for USHIP claim payment consideration. See <http://www.studenthealth.ucla.edu>.

## Waiving Out of USHIP

Students may waive out of USHIP if they (1) maintain active enrollment in an adequate medical/health insurance plan that meets all established requirements, (2) apply for a USHIP waiver

## Annual Budget Estimates for Undergraduate California Residents

Estimates cover three regular session terms, using the 2001-02 academic year as an example. Nonresidents must add annual tuition, which was \$10,244 at the time of publication, but still under review by The Regents. Fees are subject to change without notice. For housing information, see <http://www.housing.ucla.edu>.

	Commuter from Home	On-Campus Housing	Off-Campus Housing
University fees	\$ 4,236.27	\$ 4,236.27	\$ 4,236.27

Transportation	1,053.00	486.00	720.00
Personal	1,977.00	1,764.00	1,902.00
<b>Total Budget Estimate</b>	<b>\$11,307.27</b>	<b>\$16,167.27</b>	<b>\$14,982.27</b>

within established deadlines, and (3) correctly complete the online USHIP waiver form.

Students must apply for a USHIP waiver online. See the Ashe Center website for details, including a definition of qualifying adequate private medical/health insurance. Follow the Online Services link from <http://www.studenthealth.ucla.edu>.

### Deadlines for Waiving Out of USHIP

Third party individuals may not waive out of USHIP for another student. Waivers must be submitted by the stated deadlines whether or not fees have been paid by that date. Deadlines are strictly enforced.

The schedule for waiving out of USHIP is as follows:

Fall Quarter	September 1-20
Winter Quarter	December 1-20
Spring Quarter	March 1-20
Fall Semester	August 1-20
Spring Semester	December 1-20

The above information serves as official notice of the UCLA mandatory medical/health insurance requirement. All students are responsible for providing complete and accurate information that must be submitted by the stated deadlines.

### Hepatitis B Vaccination Requirement

The California State Legislature requires as a condition of enrollment that students 18 years and younger take the hepatitis B vaccination series. The vaccine is given in three doses. The second dose is given one month after the first, and the third is given five months after the second. Students who have not had the vaccine should start the series before their first term begins. Because this is a state requirement, students who have not completed the immunization series by the time their third term begins will not be allowed to enroll.

Students who have already been immunized may fill out the form at <http://www.studenthealth.ucla.edu/student/hepb/hepbreq.asp>.

### Fee Refunds

Students who formally withdraw from the University may receive partial refunds of fees. For information on withdrawal, see the Academic Policies section of this catalog. Consult the *Schedule of Classes* for exact refund amounts and dates.

### Fee Waiver Requests

Late registration, processing, and penalty fees are waivable on request in writing to the office assessing the fees only if they were incurred through the fault of the University or because a student suffered sudden and debilitating injury or accident.

### Reduced Fee Programs

UCLA recognizes the need for part-time study in special circumstances. Undergraduate resident students—when approved for enrollment in 10 units or less by the provost or dean of their program—may be eligible for a one-half reduction in the educational fee. The reduction is based on total units enrolled as of Friday of the third week of classes.

File a Request for Fee Reduction with the academic dean's office by Friday of the second week. Except for these qualified and approved part-time students, there is no reduction in the University registration, educational, student union, or Undergraduate Students Association fee.

Undergraduate nonresident students with College or school approval for enrollment in 10 units or less pay only half the nonresident tuition fee. File a Request for Fee Reduction with the College or school office by Friday of the second week of classes for the applicable term.

Full-time University employees may apply for a reduction of the registration and educational fees at their Campus Human Resources office. Students who use the part-time fee reduction may not also use the UC employee reduction.

## ENROLLING IN CLASSES

New students should see an academic counselor before enrolling in classes (counseling is required in the Henry Samueli School of Engineering and

Applied Science). Counselors help new students choose courses and formulate a schedule tailored to their academic interests or degree objectives.

The Orientation program takes new students through a step-by-step process designed to insure that they enroll in an effective program.

The online *Schedule of Classes* contains listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Use the *Schedule* and academic counseling to assemble a program of courses.

### URSA Enrollment

Students enroll in classes through University Records System Access (URSA), which is accessed online at <http://www.ursa.ucla.edu> or by telephone at (310) 208-0425. For most students, URSA OnLine is the easiest way to enroll in classes and gain real-time access to academic,

financial, and personal records. The site walks students through the enrollment procedure.

Students are assigned specific times—called appointments—when they are allowed to enroll. Use URSA to determine enrollment appointments.

Also use URSA for other enrollment-related tasks, such as adding, dropping, or exchanging classes, signing onto the wait list for a class, or changing the grading basis for a class. For more information, see the URSA and Enrollment sections of the *Schedule of Classes* at <http://www.registrar.ucla.edu/schedule>.

### In-Person Enrollment

For classes that require written approval or specialized processing, students may enroll in person at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

### Study List

A Study List is the record of courses a student is enrolled in for the term. At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes official, and all wait lists are eliminated. Students should verify their Study List through URSA after each enrollment transaction. Students are responsible for all courses and the grading basis as listed on URSA and cannot receive credit for courses not listed.

After Friday of the second week, most changes to the Official Study List can be made with a fee via URSA. Some changes require an Enrollment Petition—along with approval signatures—which is available for purchase in the UCLA Store.

See Enrollment in the online *Schedule of Classes* for deadlines and complete instructions.

Errors or omissions should be corrected before the College or school deadlines for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.

### Concurrent Enrollment

Concurrent enrollment—defined as taking courses during regular sessions for credit at UCLA and, at the same time, at another college institution, including UCLA Extension—is not permitted except in extraordinary circumstances, and no credit is given for such courses unless the approval of the UCLA College or school has been obtained by petition prior to enrollment.

At the discretion of the appropriate campus authorities on both campuses, California Senate Bill 1914 allows undergraduate students enrolled in any campus of the California community colleges, the California State University, or the University of California to enroll without formal admission in a maximum of one course per academic term at a campus of either of the other systems on a space-available basis. Enrollment in precollege courses is excluded.

UCLA Students qualify for concurrent enrollment if they meet all the following requirements:

1. Complete at least one term at UCLA as a matriculated student
2. Enroll for a minimum of 6 units for the current term
3. Earn a grade-point average of 2.0 (C) for work completed
4. Pay appropriate tuition and fees at UCLA for the current term
5. Complete appropriate academic preparation as determined by the host campus
6. Have California residence status

Obtain a concurrent enrollment application from the College or school. An administration fee is charged for each academic term such enrollment is requested.

### Intercampus Visitor Program

Undergraduates enrolled at one campus of the University of California may have the opportunity to attend another UC campus for one quarter or semester on the Intercampus Visitor Program. UCLA students obtain applications from Enrollment and Degree Services, 1113 Murphy Hall. Observe the deadlines on the application. Applications are reviewed by a student's College or school. Letters and Science students should consult Letters and Science Counseling Services in A316 Murphy Hall; students in Arts and Architecture should contact the Student Services Office

in 1100 Dickson; Theater, Film, and Television students should consult the Student Services Office in 103 East Melnitz Building; Engineering students should see the Student Services Office in 6426 Boelter Hall.

### Simultaneous UC Enrollment

Undergraduates may enroll simultaneously in courses offered by another UC campus. Eligible students must be registered (fees paid), in good standing, and enrolled in at least 12 units at UCLA. Students may simultaneously enroll in no more than one UC host-campus course not to exceed 6 units. Before attending the host campus, both campuses must give approval. Approval to enroll simultaneously on another UC campus does not guarantee credit toward specific degree or GE requirements. Application of host-campus courses to UCLA graduation requirements is determined by the College or school. Details are on the application form. Obtain applications and directions for submitting forms from the following offices: honors students, A311 Murphy Hall; student athletes, Morgan Center; AAP students, 1209 Campbell Hall; all other Letters and Science students, Letters and Science Counseling Office, A316 Murphy Hall; Arts and Architecture Theater, Film, and Television, Engineering and Applied Science, and Nursing students, their respective Student Affairs Office.

## FINANCIAL SUPPORT

Financial Aid Office  
A129J Murphy Hall  
(310) 206-0400  
<http://www.fao.ucla.edu>

The deadline for filing all undergraduate financial aid applications is March 2 (or the Friday before that date if March 2 falls on a weekend). Applications received after the deadline are only considered if funds are still available.

The *Financial Aid Handbook* contains complete details on all aid. Obtain a free copy at the Financial Aid Office, A129J Murphy Hall, UCLA, Box 951435, Los Angeles, CA 90095-1435.

### APPLYING FOR FINANCIAL AID

Students do not need to come from low-income families to qualify for financial aid. However, those who apply for need-based aid—including grants, loans, work study, and some scholarships—must demonstrate financial need, which is defined as the difference between the cost of attending UCLA and the amount that they and their families should be able to contribute.

No financial aid can be awarded to international students in their first year of attendance at UCLA.

To qualify for aid, students must also comply with minimum progress standards, which set

unit and grade-point average requirements as defined in the Appendix of this catalog.

### Free Application for Federal Student Aid

To evaluate financial need, all students who apply for need-based aid must provide financial infor-

mation on the Free Application for Federal Student Aid (FAFSA). If students are financially independent according to the federal financial aid guidelines, their own financial circumstances are analyzed rather than those of their parents. The University expects that students and their families bear as much of the cost of a student's education as their circumstances permit.

The FAFSA is used to apply for all federally funded programs, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. Loans that are not need based are also available to all students who complete FAFSA. The FAFSA is available from California high schools and colleges and from the UCLA Financial Aid Office and should be filed by March 2. Be sure to indicate that a report is to be sent to UCLA by using the UCLA Title IV code: 001315.

### Prospective Students

In addition to using the FAFSA to apply for aid, prospective students who apply to UCLA with the *UC Application for Undergraduate Admission and Scholarships* may use the application to apply for undergraduate scholarships.

### Continuing Students

Continuing students, including international students, may obtain financial aid applications beginning in January at the Financial Aid Office.

## TYPES OF FINANCIAL AID

The four basic types of aid are scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination.

Aid can be merit based—awarded on the basis of standards such as academic achievement—or need based—awarded on the basis of financial need as determined by FAFSA. Most scholarships are merit based, while grants, loans, and work study are generally need based.

### Scholarships

Scholarships do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and assists with the expenses of an undergraduate education.

Financial need is required only for University and name (endowed) scholarships other than those listed below. Each year approximately \$300,000 is awarded from the many different scholarship funds. Awards range from \$100 to \$2,000 and are not renewable. Students must reapply each year for continued consideration.

### Regents Scholarships

One of the highest honors conferred on an undergraduate student is the Regents Scholarship, which is awarded for four years to students entering from high school and for two years to entering juniors. A UCLA faculty committee selects Regents Scholars on the basis of exceptional academic achievement and promise. Scholars receive a yearly honorarium if they have no financial need. Scholars who establish financial need by filing the FAFSA receive a yearly stipend to cover the amount of their need. Regents Scholars also receive special privileges.

### National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA's scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from \$500 to \$2,000.

### UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter and to community college transfer students. Students should have demonstrated leadership ability, be involved in extracurricular activities, and show academic excellence and promise. Alumni Scholarships are merit-based and competitively awarded. Freshman award amounts range from \$500 to \$10,000; transfer awards are \$500 each. The Dr. Ralph Bunche Scholarship Awards, also presented by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, are given to students from historically underrepresented communities. In addition to the monetary awards, Alumni Scholars receive special privileges. Recipients who receive work study or loans as part of a financial aid package receive additional alumni grant monies.

### ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income and provide tuition, a book allowance, fees, and a tax-free monthly allowance during the academic year. Obtain applications for four-year scholarships by calling—Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075—or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify if the scholarship is desired for Army, Air Force, or Navy/Marine. Applications for Army scholarships can also be obtained by calling (800) 872-7682. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications are also available and are considered when received.

### Grants

Grants are based on need and do not have to be repaid. When awarding policies and funds permit, the financial aid package includes a grant.

### Federal Pell Grants

Federal Pell Grants are the basis of many financial aid packages, since they are often combined with other forms of aid to meet the full costs of education. Amounts for 2001-02 range from \$400 to \$3,300, depending on federal funding, and are determined by student financial resources and the family's financial resources. U.S. citizens and eligible noncitizens may apply by filing the FAFSA. The University requires all eligible undergraduates to apply for a Federal Pell Grant.

### Cal Grants A and B

California residents who have not completed more than nine quarters or six semesters of college work prior to September 2001 are eligible to apply for a California Student Aid Commission Cal Grant award. The FAFSA and GPA Verification Form are the official applications for these programs. Cal Grant A awards are applied toward registration fees. They are based on need and academic achievement and are renewable each year. Cal Grant B awards are intended to assist low-income families and are renewable annually. First-year freshmen receive a quarterly stipend. In subsequent years recipients receive a stipend plus funds toward educational and registration fees.

### State University Grants

State grants provide eligible students with financial assistance from state funds. Awards range from \$100 to \$4,000. All undergraduate students are considered.

### Federal Supplemental Educational Opportunity Grants

Federal Supplemental Educational Opportunity Grants are for undergraduates with financial need. Awards range from \$100 to \$4,000. Recipients must be U.S. citizens or eligible noncitizens.

## Loans

Loans allow students to postpone paying some of the costs of their education until they have completed school. A financial aid offer includes a long-term, low-interest loan.

Borrowers must realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, students should assess their total educational debt and ability to repay after graduation. The University makes every effort to assist students during the repayment of their obligation, but University services, including registration and the release of official transcripts, are withheld if the loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action. All first-time borrowers must attend a debt management session before funds are released.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview helps students understand their loan agreement and their rights and responsibilities. If students fail to participate in an exit interview, the University places a hold on their academic records and registration materials. Call for an interview before graduating, transferring, or withdrawing from UCLA. ☎310-825-9864

### Federal Perkins Loans

Low-interest Federal Perkins loans are available to all students who are U.S. citizens or eligible non-citizens. Repayment begins six or nine months after students terminate at least half-time study. Repayment terms are fully explained when students accept the loan. Minimum repayment is \$90 per quarter, including interest, up to a maximum of 10 years.

### Federal Nursing Loans

To be eligible for a nursing loan, applicants must be U.S. citizens or eligible noncitizens and students in the School of Nursing. Up to \$3,000 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

### Emergency Educational Loans

Students need not be receiving financial aid to apply for emergency loans. They may borrow up to \$100 for immediate emergency needs; the amount is repayable on the 20th of the month following the month in which the loan was made. To qualify, applicants must be registered UCLA students with satisfactory loan repayment records. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

### Federal Family Education Loan Program

Federal Stafford Loans are long-term need-based loans made by banks and credit unions. They are available to U.S. citizens and eligible noncitizens who are enrolled in at least a half-time program at UCLA. Freshmen may borrow up to \$2,625, sophomores up to \$3,500, and juniors and

seniors up to \$5,500 per academic year, to a maximum of \$23,000.

Unsubsidized Federal Stafford Loans for Middle-Income Borrowers are not based on need. Although repayment can be deferred until after graduation, interest begins to accrue while students are in school. Students must file a FAFSA to be considered for the program.

Through Federal Parent Loans for Undergraduate Students (PLUS) parents may be eligible to borrow up to the cost of a student's education for the academic year minus any estimated financial aid. These loans are not deferrable.

## Work-Study Program

Federal Work-Study (FWS) is a need-based program designed to expand part-time job opportunities for students. The program allows them to work a maximum of 20 hours per week while attending school. An academic year's work-study award may range from \$1,000 to \$2,000, but gross earnings may not exceed the amount awarded.

Under FWS, the federal government pays a portion of the hourly wage; the employer contributes the balance. Whenever possible, work is related to student educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of the work, experience, and capabilities. To be eligible, students must be U.S. citizens or eligible noncitizens.

Off-campus community service positions are also available in nonprofit organizations and governmental agencies. Students who are placed in these positions may petition the Financial Aid Office for an increase in work-study funding up to a maximum of \$5,000.

Whether employed on or off campus, students must maintain full-time enrollment (12 units for undergraduates, 8 units for graduate students) to be exempt from Social Security and Medicare taxation.

## MAJORS AND DEGREES

Students may choose from over 118 majors in a wide variety of disciplines offered through the undergraduate degree programs of the College of Letters and Science, School of the Arts and Architecture, Henry Samueli School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. For a complete list of major programs and degrees, see the table in the front of this catalog.

## PLANNING A MAJOR

New students should obtain academic counseling before enrolling in classes at UCLA. Counselors can help new students formulate degree objectives based on interests, abilities, and career goals. As students begin to decide on a major, counse-

lors can help them start fulfilling College or school requirements as well as the department requirements necessary for completion of the degree program.

## DECLARING A MAJOR

Regulations and procedures for declaring a major vary for the College and each school. Students in the College of Letters and Science do not need to declare a major in their freshman year and can attend with an undeclared major until the end of their sophomore year. Certain schools require students to choose a major when applying for admission, or require early declaration. Check specific policies for declaration with the school or department adviser.

All students must declare a major by the beginning of their junior year (90 quarter units). To declare a major, obtain a Petition for Change of Major at the College or school office. There is no fee for the petition.

## INDIVIDUAL MAJORS

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit. Requirements for individual majors vary among the College and schools.

## CHANGING MAJORS

Changing majors requires the approval of the College or school and the department. To change majors, obtain a Petition for Change of Major at the department office.

## DEGREE REQUIREMENTS

As soon as they are accepted for admission to UCLA, new students should learn the requirements necessary to receive a bachelor's degree and begin planning an appropriate program of study. All undergraduate students must satisfy three types of requirements for a degree:

1. University requirements
2. College or school requirements
3. Department requirements

## UNIVERSITY REQUIREMENTS

The University of California has established two requirements that all undergraduates must satisfy in order to graduate: Subject A or English as a Second Language (ESL), and American History and Institutions. It is each student's responsibility to see that these requirements are fulfilled.

## Subject A

Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that students must satisfy before entering UCLA or during their first year in residence. They may meet this requirement by

1. Scoring 3, 4, or 5 on one of the College Board Advanced Placement Tests in English OR
2. Scoring 680 or better on the SAT II Subject Test in Writing OR
3. Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR
4. Passing the Subject A Examination (all freshmen from California high schools should have taken the Universitywide Subject A Examination during the month of May before they enrolled; others take an examination at UCLA early in their first term)

If students do not meet the requirement in one of the ways described above, Academic Senate regulations require them to enroll in either English Composition A or 2 (determined by performance on the Subject A Examination) as early as possible during their first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. Students receiving a final grade of C– or less must repeat the course during their next term in residence. Satisfaction of the Subject A requirement is a requisite to English Composition 3 and all subsequent English courses.

## English as a Second Language

The English as a Second Language Placement Examination (ESLPE) is required of all entering UCLA students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE. Undergraduate students may take the ESLPE once only. Unauthorized retakes of the examination result in an invalid examination score.

Nonnative-speaking first-year students who have taken the Subject A Examination are evaluated on the basis of their Subject A composition and informed if they need to take the ESLPE before the term in which they are to register. Failure to take the ESLPE results in a hold on student records. Results of the ESLPE and the Subject A Examination are reviewed to determine which track (Subject A or ESL) is a more appropriate placement. Students placed in the Subject A track may satisfy the Subject A requirement by following the guidelines listed above. If students are placed in the ESL track, they must complete the requirement by taking the designated courses through the ESL track.

Nonnative-speaking transfer students with grades of B or better in the English Composition 3 and English 4 equivalent courses at their transfer institution are exempt from the ESL requirement. Other students must take the ESLPE and may be required to take one or more ESL courses beginning in their first term in residence at UCLA to satisfy the ESL requirement.

Results of the ESLPE are used to determine placement into the required sequence of ESL courses or exemption from the ESL requirement. In the case of a nonpassing score on the examination, students are placed in one or more of the credit-bearing courses — English as a Second Language 33A, 33B, 33C, and 35. Students must begin taking courses during their first term in residence at UCLA and must complete the courses in sequence with grades of C or better (C- or a Passed grade is not acceptable). All units are applied toward graduation but cannot be applied toward general education requirements. Certain ESL courses fulfill major requisite requirements and provide upper division elective units.

### American History and Institutions

The American History and Institutions requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor's degree must satisfy the requirement in American History and Institutions by one of the following methods:

1. Completing a year's course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR
2. Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:
  - Afro-American Studies M104A, M104B, M104C, M158A, M158B, M158C, M158E
  - Asian American Studies M153
  - Chicana and Chicano Studies M159A, M159B
  - Economics 183
  - English 80, 85, M104A, M104B, M104C, 115A, 170A, 170B, 171A, 171B, 172A, 172B, 173A, 173B, 173C, 174A, 174B, 174C
  - Geography 136
  - History 13A, 13B, 13C, 145A, 145B, 146, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A, 154B, 154C, 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through M158E, M159A, M159B, 160A, 160B, 161, 162, 163, 164
  - Political Science 40, 114A, 114B, 140A, 140B, 140C, 142A, 143A, 143B, 145B, 145C, 146A

Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR
3. Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR

4. Scoring 500 or better on the SAT II Subject Test in American History OR
5. Scoring 3, 4, or 5 on the College Board Advanced Placement Test in American History.

Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 151A, 151B, Political Science 145B, or 145C.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (310-825-3720).

## COLLEGE OR SCHOOL REQUIREMENTS

The College and each school with undergraduate programs establish their own degree requirements. These generally include a (1) unit requirement, which defines the total number of units to be completed, (2) scholarship requirement, which defines a minimum grade-point average, (3) residence requirement, which defines the amount of study that must be undertaken in residence at the UCLA campus, and (4) course requirements, which may include general education courses, reading and composition courses, foreign language courses, and core courses for the field of study. See the College and Schools section of this catalog for details on requirements set by the College and by each of the schools.

## DEPARTMENT REQUIREMENTS

Each department or interdepartmental program sets its own degree requirements in addition to those established by the College or school. Department requirements generally include (1) preparation for the major, which are lower division courses designed to prepare students for advanced study and (2) the major, which are upper division course requirements. Requirements for each department are listed in the Curricula and Courses section of this catalog.

## DEGREE POLICIES

Students are responsible for degree policies and regulations as described in the Academic Policies section of this catalog.

## UNDERGRADUATE RESEARCH

### UNDERGRADUATE RESEARCH CENTERS

The Undergraduate Research Centers (URC) assist students in the humanities and social sciences (2211 Campbell Hall, 310-825-2935) and in the life and physical sciences (2121 Life Sciences, 310-794-4227) by supporting scholarly, critical, and creative research. The centers provide mentoring and tutorials, house the Student Research Program (SRP), and administer stipends and scholarships. They also sponsor student research groups and two student-run publications—the *Undergraduate Science Journal* and *Westwind, A Journal of Undergraduate Research and Writing*; organize campuswide conferences and events; and coordinate the Summer Research Institute (SRI), which promotes a broader and deeper understanding of university research and helps entry-level student researchers define their place in the larger research community. See <http://www.college.ucla.edu/ugresearch/index.html>.

#### Student Research Program

Housed in each Undergraduate Research Center, the Student Research Program offers undergraduates, especially lower division and first-year transfer students, opportunities to become actively involved in the University research community. Working with faculty members on research projects, SRP students gain valuable research training and experience, as well as preparation for advanced undergraduate work and graduate school. Students enroll in Honors Collegium 99 and receive 1 unit of course credit for each 50 hours of research completed during the quarter. See <http://www.college.ucla.edu/ugresearch/srp.html>.

#### Research Stipends

Undergraduate Research Development Stipend (URDS) awards are available on a competitive basis and by application for undergraduate students who have financial need and who want to participate in two terms of research through SRP. The commitment to the SRP project is for Winter and Spring Quarters, and stipends are set at \$1,000 per term. Applications are accepted during Fall Quarter only, and the deadline for submission of applications is late November.

#### Undergraduate Research Scholars Program

The Undergraduate Research Scholars Program (URSP) offers scholarships from foundations, industry, and individual donors to continuing students (junior-level standing and higher) with financial need. Applicants must have a strong commitment to research and must complete an honors thesis or a comprehensive independent

studies project during the senior year. Applications are accepted during Spring Quarter only.

### ACADEMIC RESEARCH COURSES

All academic departments offer undergraduate research courses that allow students to obtain academic credit for their research experiences. Students enrolled in the courses are often upper division students with Student Research Program experience. Department requirements for credit vary, but all departments require a research proposal to enroll in independent studies and a research report to receive credit when the research project is completed. Senior students working toward honors or highest honors in many majors must complete a two-term (or more) research project that culminates in an honors thesis. Arrangements must be made with a faculty mentor before students can register for the course. See the undergraduate adviser in the department of interest for more information.

### CENTER FOR ACADEMIC AND RESEARCH EXCELLENCE

The Center for Academic and Research Excellence (CARE) provides enrichment opportunities for students majoring in the sciences, engineering, and mathematics who seek careers in scientific research and teaching and whose success through graduate training will increase the numbers of historically underrepresented individuals in academic and technological fields. CARE offers a variety of research opportunities during the academic year and summer that provides students the financial support to dedicate themselves to research. CARE programs, many sponsored by grants through federal agencies such as the National Institutes of Health (NIH) and the National Science Foundation (NSF), are for UCLA students as well as students from other universities. Offices are in 2121 Life Sciences. See <http://www.care.ucla.edu>.

### INTERNSHIPS AND SERVICE

Rewarding opportunities in the form of internships, community service work, industry and business positions, local, national, and international programs, and community-based teaching provide students with insights into a range of professional fields and the chance to apply academic theories firsthand.

### QUARTER IN WASHINGTON, D.C.

The Center for American Politics and Public Policy (CAPPP) selects 30 undergraduates each fall and spring to participate in its Quarter in Washington, D.C. Program, which offers an exciting opportu-

nity to combine UCLA courses with research and field experience in areas related to the policy-making process of the federal government. Students live in Washington for 12 weeks, dividing their time between courses taught by UC faculty and a part-time field placement. They are registered as UCLA students and earn credit for all courses taken. Most courses emphasize politics and public policy. The core course is multiple-listed in political science and sociology. At least one course in a subject other than political science, such as economics or history, is offered each quarter. All courses take advantage of Washington's unique resources for study and research.

Center administrators help students find a field placement, which is central to a research seminar each student takes, in a Washington organization. Placements have included ABC News, the Brookings Institute, CNN, the Department of Justice, the Kennedy Center, Studio Theatre, the Center for Strategic and International Studies, various members of Congress, and the White House. For information, contact the CAPP Office in 4250 Public Policy Building or e-mail [capp@issr.ucla.edu](mailto:capp@issr.ucla.edu). See <http://www.capp.ucla.edu>. ☎310-206-3109

## SERVICE LEARNING

The Center for Experiential Education and Service Learning (CEESL) enhances undergraduate education by providing opportunities to participate in "experiential" learning. In courses supported by CEESL, students work outside the classroom at internships or public service positions. They participate in their communities and gain insights into a range of professional fields, while applying and testing academic theories. CEESL is located in 160 Powell Library. See <http://www.oid.ucla.edu/Ceesl>. ☎310-825-7867

Placements are available in the form of internships or short-term projects such as community service work, local industry and business positions, and out-of-state opportunities. Students combine service experiences with research and writing to receive academic credit. For example, a CEESL student interning at a talent agency researched and wrote a paper on racial stereotypes in the acting profession; a student working with ESL students at an elementary school wrote a paper on the politics of English-only legislation and its impact on teaching; students volunteering at a health clinic researched and produced educational pamphlets on AIDS prevention in Russian and Armenian for recent immigrants in the community.

## Supported Courses

Every term CEESL supports unique courses that incorporate community work with course readings, lectures, and discussions. The courses and seminars create opportunities for students to work with an instructor and to interact with their peers in a structured environment. Courses supported by CEESL are mainly for upper division students. Lower division students may participate

in courses that offer a portion of course credit for community service and fieldwork.

Upper division students looking for a more intensive service or field experience may enroll in immersion programs or in sequential courses. Immersion programs are structured around a block of courses with focus on the study and observation of a single topic (for example, social and cultural stigma). They require a full-time commitment for one or two terms, for which students earn 12 to 16 units per term. The Developmental Disabilities Immersion Program (DDIP) and Sociology Immersion Quarter (with changing themes) are two long-standing immersion programs. Sequential courses are taken consecutively for two or three terms. Students receive prefield training during the first term and conduct service and research in subsequent terms.

Students may also design individualized service learning and internship projects to meet their specific academic, personal, and career goals. These are organized through individual studies courses (199 or 199I), in which a CEESL graduate student coordinator helps students develop suitable projects, secure field placements, and identify faculty sponsors.

The deadline for enrollment in CEESL supported courses is the end of the second week of the term.

## Community Service and Internship Sites

All CEESL participants need to secure academically viable placement sites. Hundreds of local and national opportunities are listed in 160 Powell Library and at EXPO Internship and Study Abroad Services. Students may also initiate contact with a site on their own. However, all community service and internship placements must be approved by a CEESL coordinator.

## EXPO INTERNSHIP AND STUDY ABROAD SERVICES

The EXPO Internship and Study Abroad Services, a branch of the UCLA Career Center, offer access to a variety of off-campus learning experiences. Offices are in 200 Strathmore Building. See <http://www.career.ucla.edu/expo>. ☎310-825-0831

## National Internship Program

More than 10,000 UCLA students have learned about the inner workings of government and

---

*The Quarter in Washington, D.C. Program offers an exciting opportunity to combine UCLA courses with research and field experience in areas directly related to the policy-making process of the federal government*

---

business while serving in the internship program. Bruins serve full-time internships for one or more terms on the staffs of elected officials, public interest groups, government agencies, and media organizations in Sacramento, Washington, DC, and other U.S. cities. Stipends for students in select programs can be arranged.

### Los Angeles Internship Program

Local internships are available throughout the year in fields such as advertising, business, film, media, and politics.

### International Opportunities

EXPO advises students on study, travel, volunteer, international internship, and short-term work opportunities outside the U.S., offering information on overseas study programs open to UCLA students. EXPO maintains a library of current materials related to study, travel, and other opportunities abroad.

## TEACHING OPPORTUNITIES

Exciting teaching programs prepare undergraduate students for careers in teaching or education and allow them to serve in classrooms in the Los Angeles area. Many teaching opportunities are offered in conjunction with the Graduate School of Education and Information Studies (GSEIS), which helps coordinate programs leading to various instructional credentials or to graduate study.

### Diversified Liberal Arts Program

The Diversified Liberal Arts Program prepares students for teaching degrees while they complete a major in the College. The program is described in the Curricula and Courses section of this catalog. For information, contact Letters and Science Counseling Services, A316 Murphy Hall. See <http://www.college.ucla.edu/up/dlap>.

### Education Studies Minor

The Education Studies minor provides an introductory course sequence for students who want to pursue a career in education. The program office is in 1009 Moore Hall. See <http://www.gseis.ucla.edu/edminor>.

### Mathematics/Education Program

The Mathematics/Education Program allows mathematics majors interested in middle and high school teaching to observe and tutor in classrooms in the Los Angeles area and to begin teacher-education courses. After graduation, they teach for a full year under an emergency teaching credential and may work toward a master's in education and a teaching credential. For information, contact Mathematics Student Services, 6356 Math Sciences. See <http://www.math.ucla.edu/undergrad/matheduc.html>.

### Science Education Program

The Science Education Program, cosponsored by the College and GSEIS, allows science majors to observe and participate in classrooms in schools in the Los Angeles area and to begin teacher education courses. Students earn a master's in education and a teaching credential in one academic year and two summers beyond the baccalaureate. For details, e-mail Dr. Arlene Russell at [rus-sell@chem.ucla.edu](mailto:rus-sell@chem.ucla.edu) or contact any science department undergraduate counseling office.

### Teacher Education Program

The Teacher Education Program allows students to obtain both a Master of Education degree and a Bilingual Cross-Cultural Language Academic Development credential (CLAD or BCLAD) in a full-time, two-year program that provides clinical classroom experience. For details, see UCLA Center X at <http://www.centerx.gseis.ucla.edu/tep>.

## RESERVE OFFICERS' TRAINING CORPS

The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows students to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs provide a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in the Curricula and Courses section of this catalog.

## LOWER DIVISION PROGRAMS

### Collegium of University Teaching Fellows

The Collegium of University Teaching Fellows (CUTF) permits the finest UCLA advanced graduate students to develop and teach lower division seminars in their area of expertise. These unique courses cover all areas, from the humanities to the life, physical, and social sciences. Undergraduate students take courses that are at the cutting edge of a discipline and benefit from a small-seminar environment. GE and honors credit is granted for most seminars, which are offered in Winter and Spring quarters only. Enrollment is limited. For further information, contact the Office of Instructional Development in 160 Powell Library. See <http://www.oid.ucla.edu/Cutf>. ☎310-825-5467

## Honors Collegium

The Honors Collegium offers a unique educational experience where students learn how to think critically and creatively and how to communicate effectively. Courses emphasize the breadth of an interdisciplinary approach to learning and focus on small classes and individual attention. See <http://www.college.ucla.edu/up/honors/honorscollegium.html>.

## Lower Division Seminars

Departmentally sponsored, lower division seminars provide students the opportunity to participate in a small classroom setting where they enhance writing, verbal, and analytical skills. Many courses carry GE credit.

## Professional Schools Seminar Program

The Professional Schools Seminar Program (PSSP) offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered Fall, Winter, and Spring quarters. Enrollment is limited to allow close contact with professional school faculty members; lower division students are preferred. Students must satisfy the Subject A requirement before enrolling in these seminars. GE and honors credit is granted for most seminars. For information, contact the PSSP Office in 160 Powell Library. See <http://www.oid.ucla.edu/Pssp/index.html>. ☎310-825-5467

## ADVISING AND ACADEMIC ASSISTANCE

Academic assistance is available in the form of staff and student counselors, faculty advisers, services, tutorials, and special programs.

## ORIENTATION

Orientation introduces students to UCLA campus life. During the summer and before the beginning of Winter Quarter, special programs offer students academic counseling and educational planning. During Orientation students work in small groups with peer counselors and gain insight into necessary academic skills. They learn how to plan their academic program and become familiar with educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help students adjust to University life and fulfill the advising requirements of the College or school. Sessions for family members are also offered.

During the summer, Orientation offers three-day, two-night residence hall live-in programs for

first-year students and one-day programs for transfer students. Prior to Winter Quarter, a one-day program is offered. There is a fee for participation. For more information, contact the Orientation Office in 201 Covell Commons. See <http://www.orientation.ucla.edu>. ☎310-206-6685

## COLLEGE AND SCHOOL ADVISERS

The College and each school and academic department at UCLA have a staff of academic counselors and advisers to help students plan their academic program, monitor their progress toward the bachelor's degree, provide information about degree requirements, and assist with academic problems. See the *Schedule of Classes* for a listing of counselors and advisers.

## ASK Peer Counselors

The ASK Peer Counseling Program is an extension of Letters and Science Counseling Services. ASK peer counselors are College undergraduates trained to provide counseling and respond to student questions and concerns in convenient walk-up settings. No appointments are required. Counselors provide petitions, give directions, make referrals, and bridge the gap between campus life and the College office in Murphy Hall.

Students can find ASK counselors weekdays when school is in session at these campus locations: Campbell Hall (southwest corner), Royce Quad, and Science Quad from 10 a.m. to 2 p.m.; the ASK Web Lab, A316C Murphy Hall, from 10 a.m. to 3 p.m.; and adjacent to 1105 Murphy Hall from 10 a.m. to 4 p.m. Students may also e-mail questions to [ASK@college.ucla.edu](mailto:ASK@college.ucla.edu).

## Counseling Assistants

Letters and Science counseling assistants (CAs) are graduate students who help lower division students with course selection, major requirements, and graduate school information. Many CAs serve as teaching assistants and can give unique perspectives on courses and faculty. For information, see the link from <http://www.college.ucla.edu/up/counseling>.

For appointments, go to Window 1, A316 Murphy Hall. CAs are also available weekday afternoons on a walk-in basis in Covell Commons, in selected departments, and online through <http://my.ucla.edu>.

## ACADEMICS IN THE COMMONS

Academics in the Commons, also called Covell Tutorials, offers registered UCLA students free individual and small-group tutoring aimed at developing academic skills and critical thinking. Programs are staffed by carefully selected and trained peer tutors and conveniently located in Covell Commons in Sunset Village. For details on all the tutorials below, see <http://www.college.ucla.edu/up/CT>.

## Academic Workshops

### UNDERGRADUATE STUDY

In addition to the tutorials below, Academics in the Commons offers the Academic Workshop Program, which promotes academic success through a variety of workshops. For specific top-

ics, dates, and times, see <http://www.college.ucla.edu/up/workshops>. ☎310-825-1379

### Composition and ESL Tutorials

The Composition Tutoring Laboratory and UCLA Writing Programs offer individual assistance to students enrolled in English Composition A, 2, and 3 and to students writing papers for other UCLA courses. The laboratory is staffed by trained undergraduate peer tutors with outstanding ability in advanced composition who can help students at any stage of the writing process.

The ESL Tutoring Laboratory assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English as a Second Language 33A, 33B, and 33C, and other ESL courses. Most of the ESL tutors are graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Laboratories are in 228 Covell Commons. ☎310-206-1491

### Mathematics/Sciences Tutorials

Mathematics/Sciences Tutorials provide an organized by-appointment tutorial program for most introductory courses in biology, chemistry, mathematics, and physics. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first three weeks of the term; early registration is strongly advised. Drop-in tutoring is also offered. Schedules vary each term. The tutorials are in 230 Covell Commons. ☎310-206-6965

## Tutorials for Student Athletes

Tutorials for Student Athletes provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in other tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the term. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills. The coordinator is in 209 Covell Commons. ☎310-206-8124

## ACADEMIC ADVANCEMENT PROGRAM

The Academic Advancement Program (AAP), a multiracial program, has a threefold mission: (1) to ensure the academic success, retention, and graduation of its more than 5,500 students, (2) to increase the numbers of its students entering graduate and professional schools, and (3) to develop the academic, political, scientific, economic, and community leadership necessary to transform society in the twenty-first century. Programs are oriented toward furthering long-term academic and personal growth.

Students are eligible for AAP if their academic profiles and personal backgrounds may impact their University experience and their retention and graduation from UCLA. Students are also eligible if they are part of any federally funded program that requires counseling, tutoring, or mentoring. For more information, contact the AAP Office in 1232 Campbell Hall. See <http://www.college.ucla.edu/up/aap>. ☎310-206-7777

### Academic Counseling

Counselors at AAP encourage students to explore their talents, believe in themselves, and aspire to academic and personal excellence. Counselors, including two science counselors, work with students to plan their academic programs, monitor progress toward the degree, provide information about degree requirements, and discuss graduate school and career options. ☎310-825-1481

### Graduate Mentor Program

The AAP Graduate Mentor Program (GMP) is grounded in the belief that it is never too early, or too late, to prepare for graduate school. The primary goal of GMP is to increase the number of AAP students who enroll in graduate or professional schools.

### Peer Counselors

Peer counselors are upper division AAP students who assist entering students with the transition

to the University and provide them with a perspective on life at UCLA.

### Program Leading to Undergraduate Success

The Program Leading to Undergraduate Success (PLUS) is a federally funded component of AAP that provides intensive counseling, tutoring, workshops, and social and cultural programs for first-generation college, low-income freshmen. Applications are available at 1229 Campbell Hall. ☎310-825-9276

### Rosa Parks Program

The Rosa Parks Program for Community Development (RPP) assists undergraduate students interested in graduate and professional schools. RPP works with the schools of Public Policy and Social Research, Public Health, Law, and Medicine to increase their enrollment of AAP students committed to working toward social equity. Students work as interns, under the supervision of a professional staff member, at a community-based organization. ☎310-206-1557

### Summer Programs

Two six-week AAP academic summer programs—the Freshman Summer Program and the Transfer Summer Program—prepare students to succeed by exposing them to the rigor and demands of academic life and to undergraduate programs, services, and learning resources.

Students enroll in two University courses that meet UCLA requirements for graduation and receive personal attention, in either small groups or individual sessions, from teaching assistants and tutors. They are encouraged to live on campus and to participate in cultural and social events, interact with students of diverse backgrounds, build a network of friends, and broaden their life experiences and world outlook. ☎310-206-1571

### Teachers for Tomorrow

Teachers for Tomorrow (TFT) aims to advance a new generation of socially conscious leaders interested in careers in education. It provides AAP students with opportunities to meet faculty and students in the Graduate School of Education and Information Studies and to get involved in community service programs, internships, and service learning courses. The Joseph Drown Scholarship Program works with AAP students who want to become teachers of mathematics or science. Students in the program work with teachers at local public schools as volunteers, receive a stipend of up to \$3,000, and participate in educational roundtables. ☎310-206-1557

### Tutorial Services

Providing tutorial services for over 450 courses, AAP fosters academic excellence. Most tutors are upper division AAP students who provide the

intellectual challenge, encouragement, and personal support lower division students need to recognize their own authority as thinkers and learners. Most tutoring is done in small groups that foster discussion and allow students to listen to and articulate new and different perspectives.

## ACADEMIC EXCELLENCE

Eligible students receive the following honors and awards in recognition of academic achievement.

### Dean's Honors List and Provost's Honors

The School of the Arts and Architecture, Henry Samueli School of Engineering and Applied Science, and School of Theater, Film, and Television award Dean's Honors to deserving students each term, while the College of Letters and Science awards Provost's Honors. The School of Nursing awards Dean's Honors on an annual basis. Honors are based on the grade-point average attained within a specified number of units. Consult the College or school for further information.

### Latin Honors

The College and schools award Latin honors according to overall grade-point average at graduation. To be eligible students must have completed at least 90 (98 for the School of Nursing) University of California units for a letter grade. The levels of honors are summa cum laude, magna cum laude, and cum laude. Specific requirements vary for each level and are detailed in the College and Schools section of this catalog. See the *Schedule of Classes* for the most current calculations of Latin Honors.

### Departmental Honors

In the College of Letters and Science, departmental honors and highest honors are awarded at graduation on the recommendation of a student's major department, based on successful completion of a departmental honors program. Students should consult their department for its requirements.

### Departmental Scholar Program

Departments in the College and each school, except the School of Nursing, may nominate exceptionally promising juniors and seniors as Departmental Scholars to pursue bachelor's and

master's degree programs simultaneously. Nominations are submitted to the College provost or school dean for recommendation to the dean of the Graduate Division. Students interested in becoming Departmental Scholars should consult their departments well in advance of application dates for graduate admission (see the calendar at the beginning of this catalog).

### Honor Societies

#### Alpha Lambda Delta and Phi Eta Sigma

Membership in the national freshman honor societies is based solely on academic achievement during the freshman year. To be eligible students must have a 3.5 grade-point average with 12 graded University of California units in the first term of their freshman year, or a cumulative 3.5 GPA at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall. See <http://www.studentgroups.ucla.edu/aldpes>. ☎310-825-3871

#### Golden Key

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria. No more than the top 15 percent of enrolled juniors and seniors may be eligible.

The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study. It unites with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of an annual scholarship for initiates and graduating seniors, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For further information, contact the Office of the Dean of Students, 1206 Murphy Hall. See <http://www.studentgroups.ucla.edu/Goldenkey>. ☎310-825-3871

#### Mortar Board

Mortar Board is a national honor society for college seniors which recognizes outstanding and continual scholarship, leadership, and service to the campus community.

To be considered for membership, candidates must have completed 90 units and must have attained at least a B average or be in the highest 35 percent scholastically of the junior class, whichever is higher. Applications are available from the Center for Student Programming (105 Kerckhoff Hall) early in Winter Quarter and are due by mid-February. Approximately 40 members are selected each spring by the outgoing chapter. See <http://www.studentgroups.ucla.edu/mboard>. ☎310-206-5523

Applications are also available from the Office of the Dean of Students in 1206 Murphy Hall. ☎310-825-3871

#### Outstanding Senior Award

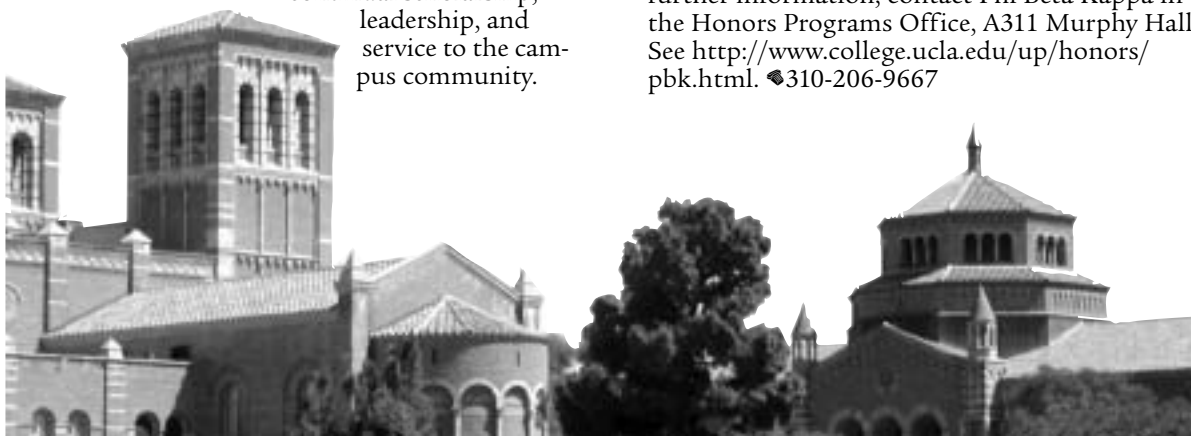

The Outstanding Senior Award recognizes graduating seniors who demonstrate scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations close in late January. Awards are presented at the annual UCLA Alumni Association Awards Ceremony in May. Award recipients receive senior class rings and life memberships in the Alumni Association. For further information, contact the UCLA Alumni Association in the West Alumni Center, 325 Westwood Plaza. See <http://www.uclalumni.net>. ☎310-206-0545

#### Phi Beta Kappa

Phi Beta Kappa is a national honorary society in the humanities, liberal arts, and sciences, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. Students do not apply for Phi Beta Kappa membership.

At UCLA only graduating seniors and selected juniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum grade-point average considered is 3.67 (for 140 or more UC units); the minimum number of UC units considered is 90 (students at the 90-unit level must have at least a 3.85 GPA).

A reasonable distribution of courses in the humanities and sciences is also required. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. Students who are elected are notified by mail. For further information, contact Phi Beta Kappa in the Honors Programs Office, A311 Murphy Hall. See <http://www.college.ucla.edu/up/honors/pbk.html>. ☎310-206-9667

# Graduate Study

Graduate students at UCLA benefit from—and contribute to—the resources of one of the country's outstanding research universities. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline all provide extraordinary opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. Graduate education is enriched by several hundred post-doctoral fellows and visiting scholars from other universities who engage in research and, in some instances, teaching at UCLA every year. This unique research environment promotes the quality of original work and study that is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration, is intended to develop mastery of a field and prepare students for the practice of a profession. The doctoral degree (Ph.D., Ed.D., and so forth) is designed to prepare students for creative activity and original research, often in association with college or university teaching.

## GRADUATE ADMISSION

Graduate Admissions/Student and Academic Affairs  
1255 Murphy Hall  
(310) 825-1711  
<http://www.gdnet.ucla.edu>

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA's graduate programs. Applicants are evaluated on scholastic qualifications and formal preparation for the graduate field of study. Departments may have other requirements for admission, which are listed by department in the Curricula and Courses section of this catalog.

## APPLYING FOR ADMISSION

Prospective students may apply online at <http://www.gdnet.ucla.edu>. Alternatively, a paper *Application for Graduate Admission* may be obtained in person or by mail from the prospective school or department.

## When to Apply

Most departments and schools have deadlines in November and December for the following Fall Quarter. Consult the *Application for Graduate Admission* for specific deadlines for each major. Some departments also accept applications for Winter and Spring quarters; further information is in this catalog's departmental listings and in the application.

Applications may be considered if received after a program's stated deadline, provided the enrollment limits have not been exceeded.

## Application Fee

A nonrefundable application fee is required when the application is submitted.

## ENTRANCE REQUIREMENTS

U.S. applicants to graduate standing must hold a bachelor's degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

Requirements for international applicants are listed below.

## SUPPORTING MATERIALS

Supporting papers and materials to be submitted, including official transcripts of record and the nonrefundable application fee, are specified at <http://www.gdnet.ucla.edu> and in the application. Submitted materials are not returnable.

### About the UCLA Graduate Division

**T**he UCLA Graduate Division administers policy established by the Academic Senate and its Graduate Council for master's, doctoral, and graduate professional degree programs other than the professional degree programs in law, medicine, and dentistry. It oversees graduate recruitment and admissions (including the recruitment of a diverse student body), fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor of academic affairs.

**Graduate Council.** The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University's commitment to the philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistantships.

**Graduate Adviser.** At matriculation, a graduate student usually selects or is assigned a graduate adviser who assists in program planning and completion of degree requirements. Sometimes this role is temporarily assumed by a faculty adviser assigned to the program as a whole. When the student's master's or doctoral committee is established, the chair of the committee assumes the adviser's role.

### Graduate Record Examination

Applicants who apply for admission to a department or school that requires Graduate Record Examination (GRE) scores should arrange to take the examination no later than December so scores arrive on time. GRE scores should be sent directly to the prospective department and not to the Graduate Division.

GRE applications and information about both paper and computer-based testing are available from offices of the Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541-6000. For information on GRE Fee Waivers, write to the associate program director at the above address.

### Letters of Recommendation

Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze students' abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application brochure and at <http://www.gdnet.ucla.edu>.

## INTERNATIONAL APPLICANTS

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average

scholarship, from a university or university-level institution. If their examinations have been graded Excellent, Very Good, Good, and Pass, students must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, and so forth, or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, should not apply for graduate admission. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, and so forth, also do not qualify for graduate admission unless they also hold recognized university-level degrees or titles.

Students should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application brochure.

### Proficiency in English

International students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction are exempt from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. The IELTS examination is administered by IELTS test centers throughout the world. See <http://www.ielts.org> for the nearest test center. TOEFL applications are available from TOEFL Services, P.O. Box 6151, Princeton, NJ 08541-6151 (609-771-7100) or at <http://www.toefl.org>.

Students whose native language is not English are required to take the UCLA English as a Second Language Placement Examination (ESLPE), in addition to the TOEFL or IELTS examination, before the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Those graduate students who believe that their initial ESLPE score is not reflective of their English language proficiency due to having recently arrived in the U.S. may sit for the examination a second time in the subsequent term only (retaking the examination in the same term is not counted as a valid result). In cases where students retake the examination in their second term of study, the most recent examination score is held to be valid. Unauthorized retakes of the examination result in an invalid examination score. Depending on the ESLPE results, students may be required to complete one or more courses in the English as a Second Language 33 series, beginning in their first term in residence at UCLA. The courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. Students should expect to spend a longer period of

time at the University than would normally be necessary to complete a degree program if they are required to take any English as a second language courses. If they do not achieve a minimum score on the ESLPE, their admission is deferred until they have acquired the necessary proficiency in English. Neither the TOEFL, nor IELTS, nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

International students or permanent residents who are not native speakers of English, before they are allowed to serve as teaching assistants, must take and pass either the Test of Spoken English (TSE) offered at TOEFL Centers in their home countries or the SPEAK examination (institutional version of the TSE) on arrival at UCLA. They can “pass” with a score of 50 or “pass conditionally” with a score of 45 if they also are enrolled in an English as a Second Language oral skills course at UCLA. Students should consult with their departments to determine if they require a higher score.

Students who plan to serve as teaching assistants during their first term at UCLA must either take and pass the TSE before arrival or arrive on campus early enough to take the SPEAK examination before instruction begins. UCLA’s Office of Instructional Development (OID) conducts the SPEAK testing. For the examination schedule and other information, see <http://www.oid.ucla.edu/TATP/speak.html>. Students should also contact either their department or the TA Training Program. ☎310-825-3106

## ADMISSION TO THE SCHOOLS OF DENTISTRY, LAW, AND MEDICINE

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for information and application procedures.

## ADMISSION TO PROGRAMS IN MOLECULAR, CELLULAR, AND INTEGRATIVE LIFE SCIENCES

The life and basic biomedical sciences departments at UCLA offer a mechanism for a combined recruitment, admission, and first-year program that provides Ph.D. students in the molecular, cellular, and integrative life sciences with maximal choice and flexibility in selecting a research specialization. Through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, students are able to select research projects from faculty mentors according to changing perceptions, interests, and goals without regard to traditional departmental boundaries. The first year of each degree program has a common curriculum and advising structure.

The following Ph.D. programs use UCLA ACCESS to recruit and admit students: Biochemistry and Molecular Biology, Microbiology and Molecular Genetics, Molecular Biology, Molecular Cell, and Developmental Biology, and Physiological Science in the College of Letters and Science; Anatomy and Cell Biology, Biological Chemistry, Experimental Pathology, Human Genetics, Microbiology and Immunology, Molecular and Medical Pharmacology, and Physiology in the School of Medicine; and Molecular Toxicology in the School of Public Health. For specific information, see the department listing in the Curricula and Courses section of this catalog.

### Admission

Applicants apply to UCLA ACCESS rather than to an individual department and must have completed an undergraduate major in a life or physical sciences discipline with superior scholastic achievement. Students should have preparation in physics, biology, and chemistry, as well as specialized courses within the major which may include cell biology, neurobiology, immunology, structural or computational biology, microbiology, virology, plant molecular biology, developmental biology, biochemistry, or molecular biology. In certain cases, background deficiencies may be remedied concurrently with graduate studies if recommended by the UCLA ACCESS steering committee. In addition to the UCLA *Application for Graduate Admission*, students should submit their scores on the Graduate Record Examination (GRE) General Test (Subject Test is optional) and three letters of recommendation from individuals who can provide direct knowledge of their academic record and potential for superior achievement in independent research. Admission is limited to Fall Quarter.

Obtain applications and information from the Program Coordinator, UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570. See <http://www.uclaaccess.ucla.edu>. ☎310-206-5280

### First-Year Course Requirements

Individual requirements vary based on background and scientific interest and are determined by the steering committee. In general a formal course of study consists of three lecture courses, three laboratory rotations, and three seminar courses. In addition, participation is required in related activities on an informal basis.

Three survey lecture courses to be selected from a list of approved courses maintained in the program office are required (one in molecular biology, one in cellular biology, and an elective in one of several areas).

Students must enroll in one seminar course each term that includes reading and reporting on current research literature.

During their first nine months in residence, students rotate for one term each through three laboratories selected from the UCLA ACCESS fac-

ulty list. They enroll in a 500-level course for 6 units of credit for each rotation.

An additional course in ethics (Microbiology and Molecular Genetics CM234) is required.

All departments participating in UCLA ACCESS consider teaching experience to be an integral part of the graduate program. Students are required to complete two terms of teaching beginning in their second year. They are also required to complete a course on approaches and methods for successful teaching.

### **Transfer to the Degree-Granting Program**

Students are admitted to UCLA graduate standing through UCLA ACCESS on a provisional basis for up to four terms. At the end of Spring Quarter, academic progress is evaluated by the steering committee. Students who receive a satisfactory evaluation select a faculty mentor as their doctoral committee chair. With concurrence of the mentor and the degree-granting program, students then transfer from UCLA ACCESS to that program for the remainder of their Ph.D. studies.

In the event students are unable to identify a suitable mentor and program by the end of their first year, one additional laboratory rotation approved by the steering committee is available during the summer quarter. Students who are unable to arrange for a laboratory after four rotations are recommended for release from their provisional graduate standing.

## **SPECIAL ADMISSION POLICIES**

### **No Degree Objective**

UCLA has no special limited or unclassified categories of graduate admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. For example, teachers with a master's degree who

wish some refresher study, or international students on a year's stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs, and the academic program must agree to accept the student for the no degree objective (NDO) status. All admission to NDO status must be specially approved by the dean of the Graduate Division, as must any University financial assistance for students on NDO status.

### **Duplication of Degrees**

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see Concurrent and Articulated Degree Programs in the front of this catalog). Students who apply for a second academic degree at the same level or lower than the one they already hold are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

### **Summer Sessions Courses**

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. Students who wish to apply Summer Sessions courses to their subsequent graduate program should consult in advance with their departmental adviser. This is also true if they have been readmitted to graduate standing and wish to resume graduate study in Summer Sessions. Information and applications are available from Summer Sessions, 1147 Murphy Hall.

If students take Summer Sessions courses following the award of their bachelor's degree, the grades do not appear on the undergraduate transcript (they are included on a separate transcript). After students are accepted by the Graduate Division, Summer Sessions grades are included on the graduate transcript and computed in the grade-point average.

## **READMISSION**

Students who have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence) must file an *Application for Graduate Admission*.

See the Academic Policies section of this catalog for readmission procedures.

# REGISTRATION

Enrollment and Degree Services  
1113 Murphy Hall

(310) 825-1091  
<http://www.registrar.ucla.edu>

Registration consists of paying fees and enrolling in classes.

1. Registration fees and other University charges are paid through the UCLA Student Billing Statement, also called the BAR statement, mailed monthly to students' UCLA mailing address by the Student Accounting Office.
2. Enrollment in classes is completed via URSA at (310) 208-0425 or <http://www.ursa.ucla.edu>.

Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Graduate students must be either registered and enrolled or on an official leave of absence every term until their degrees are awarded. As an exception, certain graduate students may be eligible to pay the filing fee (see below). Failure to register or be on an official leave of absence for any term constitutes withdrawal from UCLA.

## PAYING FEES

Details on fee payment, enrollment procedures, and deadlines are in the *Schedule of Classes* at <http://www.registrar.ucla.edu/schedule>.

Once students receive their BAR statement, payments can be mailed, deposited in the Administrative Main Cashier's drop slot at 1125 Murphy Hall, or paid by credit card via CyberPay, which is accessed through URSA OnLine. After the published deadline, payments must be made in person at 1125 Murphy Hall and are assessed an additional late fee.

## Annual Graduate Fees

Although the exact cost of attending UCLA varies, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to Graduate Admissions with the Statement of Intent to Register. Legal residents of California are not required to pay tuition. Students classified as nonresidents must pay annual tuition in addition to registration fees. For a definition of residence and nonresidence, see the Appendix.

Fees are subject to change without notice by The Regents. See <http://www.registrar.ucla.edu/fees> for updates.

Students in the Schools of Dentistry, Law, Management M.B.A. program, Medicine, Nursing, and Theater, Film, and Television should refer to the online *Schedule of Classes* for explanation of additional fees.

## Annual Fees for 2001-02

Fees are subject to change without notice.  
See <http://www.registrar.ucla.edu/fees> for updates.

University registration fee	\$ 713.00
Educational fee	2,896.00
Ackerman Student Union fee	51.00
Graduate Students Association fee	16.50
Wooden Recreation Center fee	36.00
Seismic fee for Ackerman/Kerckhoff	113.00
Student Health Insurance Plan	720.00
<b>Total for California residents</b>	<b>\$4,545.50</b>
Nonresident educational fee	3,086.00
Nonresident tuition fee	10,244.00
<b>Total for nonresidents</b>	<b>\$14,979.50</b>

## Miscellaneous Fees

Miscellaneous fees include charges for late registration fee payment. Late fees also apply if students file their Study List late or do not pay off BAR statement balances on time. Fees are charged if any check is returned by a bank for any reason. Charges are assessed for most petitions and other special requests. There is also a fee for advancement to doctoral candidacy. A full list of miscellaneous fees is at <http://www.registrar.ucla.edu/fees/miscfee.htm>.

## Student Health Insurance Plan

All UCLA graduate students are automatically assessed for and enrolled in the Graduate Student Health Insurance Plan (GSHIP) as a condition of registration at UCLA. Continued enrollment in adequate medical/health insurance must be maintained during all registered terms.

The GSHIP fee is billed each term along with other UCLA fees. GSHIP fulfills all of the requirements mandated for adequate medical/health insurance as defined by the University. The Ashe Student Health and Wellness Center is the primary health care provider for GSHIP and is where all nonemergency medical care must be initiated for GSHIP claim payment consideration. See <http://www.studenthealth.ucla.edu>.

## Waiving Out of GSHIP

Students may waive out of GSHIP if they (1) maintain active enrollment in an adequate medical/health insurance plan that meets all established requirements, (2) apply for a GSHIP waiver within established deadlines, and (3) correctly complete the online GSHIP waiver form.

Students must apply for a GSHIP waiver online. See the Ashe Center website for details, including a definition of qualifying adequate private medi-

cal/health insurance. Follow the Online Services link from <http://www.studenthealth.ucla.edu>

### Deadlines for Waiving Out of GSHIP

Third party individuals may not waive out of GSHIP for another student. Waivers must be submitted by the stated deadlines whether or not fees have been paid. Deadlines are strictly enforced.

The schedule for waiving out of GSHIP is as follows:

Fall Quarter	September 1-20
Winter Quarter	December 1-20
Spring Quarter	March 1-20

Fall Semester	August 1-20
Spring Semester	December 1-20

The above information serves as official notice of the UCLA mandatory medical/health insurance requirement. All students are responsible for providing complete and accurate information that must be submitted by the stated deadlines.

### Fee Refunds

Students who formally withdraw from the University or take an approved leave of absence may receive partial refunds of fees. For more information, see Withdrawal in the Academic Policies section of this catalog or consult the *Schedule of Classes* for policy details and specific refund deadlines for each term.

### Fee Deferrals

Academic apprentice personnel are eligible to receive a fee deferral for part or all of the registration fees assessed during the term in which they serve as an academic apprentice. Students are responsible for paying fees by the deferred payment deadline, which is generally two months after the standard term due date. Whether students attend UCLA, take a leave of absence, or withdraw from the University, they are responsible for the fees, but may be eligible to receive a partial fee refund, according to the refund schedule in the *Schedule of Classes*. Fees not paid by the deadline are subject to the late fee charge.

### Reduced Nonresident Tuition

The annual nonresident tuition fee for graduate doctoral students who have advanced to candidacy is reduced by 75 percent, effective the term after the student is advanced. Doctoral students may receive this reduced nonresident tuition rate for a maximum of three years. After three years, the full nonresident rate is assessed.

### Filing Fee

Graduate students may be eligible to pay the filing fee (half the quarterly registration fee) in lieu of full registration fees for the term in which they expect to complete final degree requirements and receive their degree. Doctoral students are not eligible to pay the filing fee unless registered the immediately preceding term.

Students who pay the filing fee are not eligible for University services beyond a maximum of 12 hours of faculty and staff time required to complete degree requirements and are not considered in the same status as registered students.

### Annual Budget Estimates

The table below provides an estimate of a total budget students might expect based on the regular session terms of the 2001-02 academic year, not including Summer Sessions.

Students admitted to the D.D.S., J.D., M.B.A., M.S.N., M.F.A. in Theater, M.F.A. in Film and Television, and M.D. degree programs must add a professional school fee, which varies by school.

Budgets for the Schools of Medicine, Dentistry, and Nursing are higher due to specialized supplies; figures are available from the health professions counselor. Budgets are designed to serve as a guide and are subject to change without notice.

Nonresident tuition and certain University fees were under review at the time of publication. All fees are subject to change without notice by The Regents. See the *Schedule of Classes* Fee Charts for updates at <http://www.registrar.ucla.edu/fees>.

### Annual Budget Estimates for Graduate Students

Estimates cover three regular session terms, using the 2001-02 academic year as an example. The nonresident annual tuition and other University fees cited below were under review at the time of publication. All fees are subject to change without notice by The Regents.

	Resident	Nonresident
University fees	\$ 4,545.00	\$ 4,735.50
Nonresident tuition		10,244.00
Books and supplies	1,452.00	1,452.00
Living expenses	13,275.00	13,275.00
<b>Total Budget Estimate</b>	<b>\$19,272.00</b>	<b>\$29,706.50</b>

## ENROLLING IN CLASSES

The online *Schedule of Classes* contains listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Use the *Schedule* and academic counseling to assemble a program of courses.

### URSA Enrollment

Students enroll in classes through University Records System Access (URSA), which is accessed online at <http://www.ursa.ucla.edu> or by telephone at (310) 208-0425. For most students, URSA OnLine is the easiest way to enroll in classes. The site walks students through the enrollment procedure.

Students are assigned specific times—called appointments—when they are allowed to enroll. Use URSA to determine enrollment appointments.

Also use URSA for other enrollment-related tasks, such as adding, dropping, or exchanging classes, signing onto the wait list for a class and checking waitlist status, or changing the grading basis for a class. For more information, see the URSA and Enrollment sections of the online *Schedule of Classes* at <http://www.registrar.ucla.edu/schedule>.

### In-Person Enrollment

For classes that require written approval or specialized processing, students may enroll in person at 1113 Murphy Hall Monday through Friday, 9 a.m. to 5 p.m.

### Study List

A Study List is the record of courses a student is enrolled in for the term. At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes official, and all wait lists are eliminated. Students should verify their Study List through URSA after each enrollment transaction. Students are responsible for all courses and the grading basis as listed on URSA and cannot receive credit for courses not listed.

After Friday of the second week, most changes to the Official Study List can be made with a fee via URSA. Some changes require an Enrollment Petition—along with approval signatures—which is available for purchase in the UCLA Store.

See Enrollment in the online *Schedule of Classes* for deadlines and complete instructions.

Errors or omissions should be corrected before the College or school deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.

### Full-Time Graduate Program

Three courses (or 12 units) per term are considered the normal enrollment for graduate students and are required for students not in doctoral candidacy to be counted for full-time standing in the University's official enrollment records. There-

fore, students are directed by their departments to enroll full time whenever possible.

Throughout their appointments, teaching assistants (TAs) are required to be registered and enrolled in at least 8 quarter units and graduate student researchers in at least 12 quarter units. TAs or researchers terminate their appointments if they take a leave of absence or withdraw. Course

375 for TAs and independent studies at the 500 level for graduate student researchers may be counted toward the 8- or 12-unit load.

Graduate students holding fellowships must be enrolled in at least 8 units, both before and after advancement to candidacy. The 8-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Department of Veterans Affairs regulations is available from the Veterans Affairs coordinator, 1113 Murphy Hall.

### Continuous Registration Policy

Graduate students must be either registered and enrolled or on an official leave of absence every term until their degrees are awarded. As an exception, certain graduate students may be eligible to pay the filing fee (see above). Failure to register or be on an official leave of absence for any term (Fall, Winter, Spring) constitutes withdrawal from UCLA.

### Registration in the Final Term

If students are completing courses, using faculty time, library facilities, laboratories, or other University resources, or receiving University funds, they are required to register in the final term in which they expect to receive their degree.

When the award of a degree is expected at the end of a given term, but special circumstances (not involving preparation of the manuscript) over which a student has no control prevent the completion of all requirements before the first day of

instruction in the next term, a student may petition for a waiver of registration for that term. Such petitions must be accompanied by a letter from the graduate adviser or department chair elaborating the exceptional circumstances.

Students who were registered for the preceding term and who completed all requirements for a degree in the interval between terms (before the first day of instruction) are not required to register to receive a degree at the end of the following term.

### Health Assessment and Evaluation

New students enrolling in the School of Dentistry, Education and Information Studies, Medicine, or Nursing must complete and return to the Ashe Student Health and Wellness Center the Health Evaluation forms provided by their departments. For clearance information, call (310) 825-4073.

## FINANCIAL SUPPORT

Graduate Student Support  
1228 Murphy Hall

(310) 825-1025

<http://www.gdnet.ucla.edu/asis/infoserv/gdservcs.htm>

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance.

Information on available funding for entering students is included in the *Application for Graduate Admission*. Readmitted students should also request the *Application for Graduate Admission*, and continuing graduate students should complete the *Fellowship and Assistantship Application for Continuing Students*. Completed applications must be returned by the published deadline during the first week in January. Some departments have earlier deadlines; consult the application brochure for details.

*UCLA Graduate Student Support* describes the full range of financial assistance available. It is published annually and distributed by the Graduate

Division. Students should contact their department for more detailed information.

### Fellowships

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three terms, of selected graduate students who are not California residents.

### Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. Teaching assistantships provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the term in the form of an interest-free advance loan check. Interested students should apply to their departments.) Graduate student researcher appointments give students experience working on faculty-supervised research projects.

### Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and financial resources. Financial aid applicants must file the Free Application for Federal Student Aid (FAFSA). The priority filing deadline is March 2.

Students who need financial aid for Summer Sessions must submit a Summer Aid Application in addition to FAFSA. Summer applications are available from the Financial Aid Office beginning in February and should be filed before May 1.

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid package which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.

# DEGREE REQUIREMENTS

The following information is for prospective applicants and those outside the University who are interested in the basic structure of UCLA graduate degree requirements. It is not meant to be comprehensive or to serve as a primary resource for continuing students. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu>. At the same website, *Standards and Procedures for Graduate Study at UCLA* provides detailed information and sets forth general policies, many of which emanate from the Academic Senate and its Graduate Council, regarding completion of degree requirements, master's and doctoral committees, examinations, and foreign language requirements. General regulations concerning graduate courses, standards of scholarship, disqualification, appeal, leave of absence, normal progress toward degree, withdrawal, and a number of other matters also are included.

## MASTER'S AND DOCTORAL STUDY

Graduate students earn a master's or doctoral degree by distinguished achievement in advanced study and research. In addition to coursework, there are various means of evaluating achievement in study, including qualifying and comprehensive examinations and various kinds of laboratory and fieldwork. Achievement in research is primarily assessed through evaluation of the master's thesis or doctoral dissertation. Professional master's and doctoral degree programs require professional training. Demonstration of achievement in these fields may take various forms, including fieldwork, completion of projects, and training that involves professional licensure.

### University Minimum Standards

The requirements described here for master's and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and examinations for their master's degree. Each department also sets additional requirements for doctoral degrees according to the demands of the field of study. See *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu> and the departmental graduate adviser for details. Policies and regulations are outlined in *Standards and Procedures for Graduate Study*, which is available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall or at <http://www.gdnet.ucla.edu>.

### Academic Residence

For the master's degree, the minimum residence requirement consists of three academic terms in graduate standing at the University of California, including at least two terms at UCLA.

For the doctoral degree, the minimum residence requirement is two years (six terms) in graduate standing at the University of California, including one year (usually the second) in continuous

residence at UCLA. If students earned a master's degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (4 units) during a term.

Students may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least 2 units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least 4 units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

### Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If their program has a language requirement, students should fulfill it either before they begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that they can acquire broad knowledge in their field of study and keep abreast of foreign developments in the field. Students are urged to complete language requirements as early as possible in their graduate career. If the department requires two or more foreign languages, stu-

dents must complete at least one before the University Oral Qualifying Examination (unless the department requires that both be completed before the examination).

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not the native language.

For further details on foreign language requirements, consult the departmental graduate adviser.

## CHANGING MAJORS

Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms are available from the departments and should be filed with Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure.

## PROGRAM OF STUDY AND SCHOLARSHIP

### Master's Degree

At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of the nine must be graduate-level courses.

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and students must consult with their department to determine the plan for meeting their degree requirements. University minimum requirements are the same under either plan.

#### Plan I: Master's Thesis

After advancement to candidacy, students under Plan I must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult the Graduate Division for more details on committee members' eligibility requirements). The thesis committee, which must be appointed before students may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and

approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty members have approved the subject for the thesis, work may begin. Students are responsible for preparing the thesis in the proper form and for observing filing deadlines.

#### Plan II: Master's Comprehensive Examination

Following advancement to candidacy, students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its format is available in the departments.

### Doctoral Degree

Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before students take the University Oral Qualifying Examination. Students determine their course of study in consultation with a graduate adviser until the doctoral committee is appointed.

#### Doctoral Examinations before Advancement to Candidacy

Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. They are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after students complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with the student and then nominates a doctoral committee.

#### University Oral Qualifying Examination

The doctoral committee, consisting of at least four faculty members nominated by the department, is appointed by the dean of the Graduate Division (consult the Graduate Division for details on committee membership). To determine qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

# Academic Policies

Students at UCLA are responsible for understanding the policies and regulations established by the Academic Senate. Should any variations exist between explanations in this catalog and regulations in the *Manual of the Academic Senate*, the manual prevails in all cases.

## ACADEMIC CREDIT

Academic work at UCLA is measured by units of credit, which are used to evaluate the amount of time a student has devoted to a particular subject and to determine a student's class level.

## UNITS OF CREDIT

Most University courses are assigned a unit value. One unit represents three hours of work per week per term by the student, including both class attendance and preparation.

## CLASS LEVELS

Undergraduate class levels are determined by the number of units completed as follows:

Freshman (UFR)	0-44.9 units
Sophomore (USO)	45-89.9 units
Junior (UJR)	90-134.9 units
Senior (USR)	135 or more units

Graduate class levels are based on the degree objective and whether or not students are advanced to candidacy for a doctorate.

## REPETITION OF COURSES

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except UCLA Extension) may be repeated only according to the following guidelines:

1. To improve the grade-point average, students may repeat only those courses in which they receive a grade of C- or lower; NP or U grades may be repeated to gain unit credit. Courses in which a letter grade is received may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated on the same basis or for a letter grade.
2. Repetition of a course more than once requires the approval of the College or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.

3. Degree credit for a course is given only once, but the grade assigned each time the course is taken is permanently recorded on the transcript.
4. For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points are computed in the GPA. After repeating 16 units, however, the GPA is based on all letter grades assigned and total units attempted.
5. For graduate students, all courses in which a letter grade is given, including repeated courses, are used in computing the GPA.

## CREDIT BY EXAMINATION

Students with high scholastic standing may earn credit for regular UCLA courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study that may include oral and written work in addition to other requirements. To be eligible, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner.

The results of these courses are entered on the record in the same way as regular courses, and grade points are assigned. Graduate credit earned by examination may be applied to minimum course requirements for master's degrees but cannot apply to academic residence requirements for master's or doctoral degrees.

Students need approval from the instructor, the department, and the College or school or the dean of the Graduate Division, from whom petitions for credit by examination (with fee) are available.

## GRADES

The work of all students at UCLA is reported in terms of grades. Instructors are required to assign a final grade for each student registered in a course.

### UNDERGRADUATE GRADES

The following grades are used to report the quality of undergraduate student work at UCLA:

A+	Extraordinary
A	Superior
B	Good
C	Fair
D	Poor
F	Fail
P	Passed (achievement at grade C level or better)
NP	Not Passed
I	Incomplete
IP	In Progress
DR	Deferred Report

Grades A, B, C, and D may be modified by a plus (+) or minus (-) suffix. Grades A, B, C, and P denote satisfactory progress toward the degree, but a D grade must be offset by higher grades in the same term for students to remain in good academic standing. An F grade yields no unit or course credit.

### GRADUATE GRADES

The following grades are used to report the quality of graduate student work at UCLA:

A	Superior Achievement
B	Satisfactorily demonstrated potentiality for professional achievement in field of study
C	Passed the course but did not do work indicative of potentiality for professional achievement in field of study
F	Fail
S	Satisfactory (achievement at grade B level or better)
U	Unsatisfactory
I	Incomplete
IP	In Progress
DR	Deferred Report

The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for students to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees unless otherwise prohibited by the program requirements.

The Schools of Dentistry, Medicine, and Law use their own grading codes. Students who are interested in programs in any of these schools should consult the appropriate school announcement.

## GRADE POINTS

Grade points per unit are assigned by the Registrar as follows:

A+	4.0	C-	1.7
A	4.0	D+	1.3
A-	3.7	D	1.0
B+	3.3	D-	0.7
B	3.0	F	0.0
B-	2.7	NP	0.0
C+	2.3	U	0.0
C	2.0		

As indicated, a plus (+) or minus (-) suffix added to a grade raises or lowers the grade-point value, except in the case of A+, which carries the same number of grade points as the A grade. Courses in which students receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, IP, and NR, are disregarded in determining the grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent GPAs.) NR indicates that no grade was received from the instructor.

### GRADE-POINT AVERAGE

The grade-point average is determined by dividing the number of grade points earned by the number of units attempted. The total grade points earned for a course equals the number of grade points assigned times the number of course units. For example, if a student takes three four-unit courses and receives grades of A-, B-, and C+, then the GPA for the term equals the total grade points (34.8) divided by the total course units (12). The GPA is 2.9.

Grade	Grade Points	Course Units	Total Grade Points
A-	3.7	4	14.8
B-	2.7	4	10.8
C+	2.3	4	9.2
<b>Total</b>		<b>12</b>	<b>34.8</b>

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension).

Only grades earned in regular session or Summer Sessions at any UC campus and grades earned by Arts and Architecture and Letters and Science undergraduate students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Grades earned at another institution or in UCLA Extension courses other than those prefixed by XLC do not affect the GPA.

Other schools and agencies may calculate GPAs differently from the University when evaluating records for admission to graduate and professional school programs. Students should contact them about their policies in this regard.

## PASSED/NOT PASSED GRADES

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the Henry Samueli School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed (P/NP) basis.

The grade P is assigned for a letter grade of C or better. Units earned this way count toward degree requirements but do not affect the GPA. Students receive neither units nor course credit for an NP grade.

Students may enroll in one course each term on a P/NP basis (two courses if they have not elected the P/NP option in the preceding term). They may not elect the P/NP option for Summer Sessions courses without an approved petition. Their department or school may require that they take some or all courses in their major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult the College or school for details.

Students may make program changes to or from P/NP grading through the sixth week of instruction via URSA.

Courses that are offered only on a P/NP basis are designated PN in the *Schedule of Classes*.

## SATISFACTORY/UNSATISFACTORY GRADES

Graduate students in good standing (minimum 3.0 GPA) may enroll for Satisfactory/Unsatisfactory (S/U) grading in one graduate or upper division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner are not counted in computing the GPA. Students receive neither units nor degree credit for a U grade. They may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction via URSA.

Courses that are offered only on a S/U basis are designated SU in the *Schedule of Classes*.

## INCOMPLETE GRADES

Once an Incomplete (I) grade is assigned, it remains on the transcript along with the passing grade students may later receive for the course. The instructor may assign the I grade when work is of passing quality but is incomplete for a good cause (such as illness or other serious problem). It is the student's responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, students may receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. Students should not reenroll in the course; if they do, it is recorded twice on the transcript. If the work is not completed by the end of the next full term in residence, the I grade lapses to an F, NP, or U as appropriate. The College or school may extend the deadline in unusual cases (not applicable to graduate students).

## IN PROGRESS GRADES

For certain courses extending over more than one term (identified by T1, T2, T3, or T4 in the *Schedule of Classes*), evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of In Progress (IP) are assigned in the intervening term(s) and are replaced with the final grade when students complete the full sequence. The school or College faculty or the Graduate Division determines credit if they do not complete the full sequence and petition for partial credit.

## DEFERRED REPORT GRADES

Students may receive a Deferred Report (DR) grade when the instructor believes their work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If students are given a DR grade, the Office of the Dean of Students assists them in resolving the problem. For graduate students, the dean of the Graduate Division sets a deadline by which the DR lapses to an F if the problem is not resolved and a grade assigned. The DR is changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that the situation is resolved. The DR grade is not included in determining the grade-point average.

## CORRECTION OF GRADES

All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. Students who are dissatisfied with a grade

should review their work with the instructor and receive an explanation of the grade assigned. All grade changes are recorded on the transcript. See the Appendix for further details and procedures for appealing grades.

## ABSENCE AND READMISSION

To be registered for a term, students must enroll in courses and pay fees according to deadlines specified in the *Schedule of Classes*. Students who do not register are subject to the following policies on absence and readmission.

### CANCELLATION

Before the first day of classes, students may cancel registration by (1) mailing a written notice to Enrollment and Degree Services, Attn: Cancellation Clerk, 1113 Murphy Hall, UCLA, Box 951429, Los Angeles, CA 90095-1429 or (2) faxing a written notice to (310) 206-4520. Refund is as follows: fees paid by new undergraduate students are refunded except for the nonrefundable acceptance of admission fee and service fee; fees paid by new M.B.A. and Dentistry students are refunded except for their respective nonrefundable acceptance of admission fee; for new graduate, continuing, and reentering students, a service fee is deducted from the amount of fees paid.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

### WITHDRAWAL

Withdrawing from the University means discontinuing attendance in all courses in which students are enrolled. Students who withdraw during a term need to file a Notice of Withdrawal, available from their academic provost or dean's office (undergraduates) or departmental office (graduate students).

When students officially withdraw, a percentage of the registration fee is refunded depending on the date the withdrawal form is filed.

Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the *Schedule of Classes* for policy details and specific refund dates.

Students may withdraw only if they have not taken any final examinations or otherwise completed the work in any classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if they started the

term in good academic standing. If they withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on their continuance in undergraduate standing. Before withdrawing, they are urged to consult faculty, departmental, or College advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once they have officially graduated from the University.

Students who register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation receive F, NP, or U grades, as appropriate, for all courses in which they are enrolled for that term. A fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. No fees are refunded, and future registration privileges may be curtailed or revoked.

## UNDERGRADUATE READMISSION

Students who complete a term (Fall, Winter, Spring), and do not register the following term, may return to UCLA the subsequent term as a continuing student and be eligible to register and enroll in advance.

### One-Term Absence

Students on a one-term absence who plan to attend another institution—including UCLA Extension—should discuss plans with their College or school counselor before enrolling elsewhere. On returning to UCLA, they must have an official transcript mailed from the institution directly to UCLA Undergraduate Admissions and Relations with Schools (UARS).

Once students request a transcript, they must complete a Transfer Credit Evaluation Request form at UARS, 1147 Murphy Hall, to have coursework evaluated.

### Reentering Students

To return to the University after an absence of more than one term, complete an undergraduate readmission application and file it with the Registrar's Office in accordance with published deadlines. A nonrefundable fee applies.

Students must submit official transcripts from all institutions (including UCLA Extension) with readmission applications. Coursework is evaluated when official transcripts are received. The paper records of nonregistered students, including transcripts submitted for transfer credit, are

#### Readmission Deadlines

Fall Quarter	August 15
Winter Quarter	November 25
Spring Quarter	February 25

retained by the Registrar's Office for five academic years after the last registered term.

Students who have not registered for five years must resubmit official transcripts of all work completed outside UCLA. Readmission is generally approved if students were in good academic standing (2.0 grade-point average) when they left the University, if coursework completed elsewhere in the interim is satisfactory, and if readmission applications are filed on time. The College or school may have other regulations. Contact the readmission clerk for more information. ☎310-825-1091

## GRADUATE READMISSION

For details on the policies below, consult *Standards and Procedures for Graduate Study at UCLA* at <http://www.gdnet.ucla.edu/publications.html>.

### Continuous Registration Policy

Graduate students must be either registered and enrolled or on an official leave of absence every term until their degrees are awarded. As an exception, certain graduate students may be eligible to pay the filing fee. Failure to register or be on an official leave of absence for any term (Fall, Winter, Spring) constitutes withdrawal from UCLA.

### Graduate Leave of Absence

Continuing graduate students in good standing (3.0 GPA or above) who have completed at least one term of UCLA graduate work may, with the support of their department and the approval of the Graduate Division, be eligible for leaves of absence. Graduate students are allowed a maximum of six quarters of official leave of absence.

Students on approved leave of absence are not permitted to use faculty time or make use of University facilities for more than 12 hours since their last registration and are not eligible for apprentice personnel employment or other services normally available to registered students. There is no need to apply for readmission, since the approved leave is for readmission to a specific term. The Registrar's Office notifies students about registration information when their leave is due to expire.

Obtain a Request for Leave of Absence form at Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. See the *Schedule of Classes* calendar for the filing deadline.

### Application for Readmission

Students who are granted a formal leave of absence do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a term

through cancellation or withdrawal, must compete for readmission with new applicants.

Students who have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence) must file an *Application for Graduate Admission*. Forms are available from the departments and should be submitted to Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, UCLA, Box 951428, Los Angeles, CA 90095-1428. The following materials must accompany the application:

1. A check or money order for the amount of the nonrefundable application fee made payable to The Regents of the University of California
2. The Graduate Petition for Change of Major, if appropriate (students who are reapplying in a new major), along with the UCLA graduate transcript
3. Transcripts of all academic work completed since registration at UCLA as a graduate student

## TRANSCRIPTS AND RECORDS

The permanent record is the transcript, which reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically the courses, units, grades, cumulative GPA, transfer credits, and total units.

Official UCLA transcripts are printed on security paper to safeguard against unauthorized duplication, alteration, and misrepresentation. The security paper is blue with a faint background design and a border with the words "University of California, Los Angeles." The reverse of the document includes the transcript legend and authentication details. Transcripts are issued in blue envelopes marked "Official Transcripts Enclosed."

Two versions of official UCLA student records are available from Academic Record Services, 1134 Murphy Hall. These are the academic transcript and the verification transcript. Each is designed to meet specific needs.

## ACADEMIC TRANSCRIPT

The academic transcript is a student's complete academic record, including a listing of courses taken, transfer credit, units, grades, grade-point average (GPA), earned UCLA degrees, and in-progress term information. In-progress information includes a list of the courses that a student enrolled in during the term the document was requested and other in-progress information such as a change in major or the removal of an I grade.

Grades for completed terms are processed immediately following the conclusion of final examinations. Complete academic transcripts are avail-

able approximately 30 working days after the last day of the term. For graduating students, academic transcripts with the graduation date included are available approximately seven weeks after the end of the term. Students who require earlier proof of graduation should contact a degree auditor in 1113 Murphy Hall. A fee may be charged for this service.

The minimum period required for processing and issuing academic transcripts for both registered and former students is three working days.

## VERIFICATION TRANSCRIPT

The verification transcript certifies registration (fee payment), enrollment status, degrees, and “good student” standing for auto insurance. Verification transcripts confirm student status only after registration fees have been paid for the term. Verification of student workload is based on actual enrolled units and does not consider wait-

listed units or list courses for a term.

Verification of degree can be issued after students’ degrees have been posted to their student record approximately seven weeks after the term ends. Students who require verification before their degree is posted should contact their degree auditor in 1113 Murphy Hall.

The fee for a verification transcript is waived if requested for loan or student aid verifications (proof of request required). Most enrollment verifications for loans and creditors, however, are processed for the University by the National Student Loan Clearinghouse. Approved by the U.S.

Department of Education, the clearinghouse is a national organization that facilitates and expedites student enrollment verifications for creditors and other student service-related agencies. The clearinghouse abides by all provisions of the Family Educational Rights and Privacy Act (FERPA).

## ORDERING TRANSCRIPTS

Academic and verification transcripts can be ordered by sending a request to UCLA Registrar’s Office, Attn: [Academic or Verification] Transcripts, 1105 Murphy Hall, Box 951429, Los Angeles, CA 90095-1429.

Requests should include the student’s

1. Name under which they were registered at UCLA
2. Dates of attendance at UCLA
3. Date of birth
4. Social security number and/or student I.D.
5. Complete address and telephone number
6. Number of copies requested
7. Mailing instructions including all details and any special handling
8. Full signature

Transcript request forms containing this information are available in the Murphy Hall North Lobby or at <http://www.registrar.ucla.edu/forms>. Transcripts can also be ordered by faxing a request to (310) 825-6235.

For UCLA Extension courses, order transcripts from UCLA Extension, P.O. Box 24901, Los Angeles, CA 90024.

Requests are not processed if students have outstanding financial, academic, or administrative obligations (holds) to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

More information on ordering transcripts is available by calling (310) 825-3801 or by contacting [transcripts@registrar.ucla.edu](mailto:transcripts@registrar.ucla.edu).

## FEES AND PAYMENT

Current students’ transcript fees are billed to their BAR account. Former students may be billed or may submit a check or money order payable to Regents-UC.

In some cases, special fees may apply. Forms that must be completed by the Registrar’s Office or that require official signatures are charged a special handling fee. Expedited service—processing within 24 hours—is available for an additional fee, or transcripts can be faxed with payment of an additional fee. Transcripts that are faxed are generally not considered official and confidentiality cannot be guaranteed.

Transcript requests are not processed for anyone with outstanding obligations to the University. For exact fees, see <http://www.registrar.ucla.edu/fees>.

## CERTIFICATE OF RESIDENT STUDY

International students who must leave the University and the country before completing a degree or certificate program may request a Certificate of Resident Study in addition to a formal transcript. The certificate cannot be awarded if the studies involved are covered by a diploma or other certificate. The chair of the major department recommends the award of the certificate through a petition to the College, school, or

Graduate Division. To be eligible to receive the certificate, students must have completed a program of at least nine courses with a minimum GPA of 2.0 (2.5 for Graduate Division students) and have satisfactorily completed a research project over a period of nine months or more.

## STUDENT RECORDS

The Registrar prepares, maintains, and permanently retains a record of each student's academic work. Student files of pertinent documents are maintained up to five years following the last date of attendance. Students may view their documents in Academic Record Services, 1134 Murphy Hall. Advance notice of 24 hours is required for viewing. ☎310-825-3801

### University Records System Access

Through University Records System Access (URSA), UCLA students acquire academic, financial, and personal information from their University academic records. Students may access the system for up to 10 years after their graduation or last term of attendance. See <http://www.ursa.ucla.edu>.

As needed, students may obtain a free printout of their grades for the most recent graded term from the Registrar's Office, 1113 or 1134 Murphy Hall, by presenting their valid current-term BruinCard.

### Change of Name or Address

Students who wish to change their name on official University records should fill out a UCLA Correction or Change of Name form (available in the Murphy Hall North Lobby) and submit it to Enrollment and Degree Services, 1113 Murphy Hall. All name changes are recorded on the transcript. If students change their address, they should update their address through URSA OnLine or at Enrollment and Degree Services.

## DEGREES

Students must satisfy (1) University requirements, (2) College or school requirements, and (3) department requirements as described in this catalog.

## UNDERGRADUATE DEGREES

Undergraduate degree requirements are subject to the following degree policies.

### Student Responsibility

It is the responsibility of students to keep informed of and to comply with the rules, regulations, and policies affecting their academic standing. Meeting academic deadlines, monitoring the Study List for accuracy, completing requisites,

and fulfilling degree requirements are all part of their academic duties as students.

### Minimum Scholarship

The grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C– through D– yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades

of C+ or better in other courses. Students must earn at least a C (2.0) average in all courses taken at any University of California campus. Students who fail to maintain this level may be placed on academic probation or may become subject to dismissal. The College and each school may set additional scholarship requirements.

### Academic Probation

Students are placed on probation if their overall or term grade-point average falls between 1.5 and 1.99. While they are on probation, they may not take any course on a Passed/Not Passed basis. Probation ends at the close of a regular term if students have attained a C (2.0) average for the term and a cumulative C average in all University work. Students who do not end probation within two terms are subject to dismissal.

### Academic Dismissal

Students are subject to dismissal from the University under any of the following conditions:

1. If their grade-point average in any one term is less than 1.5 or
2. If they do not earn at least a C (2.0) average in any term when they are on probation or
3. If they do not end probation within two terms

If students are subject to dismissal, their transcripts carry that notation. They should make an appointment with their College or school counselor. Depending on the situation, they are given conditions for continuation or are dismissed from the University.

### Progress toward the Degree

UCLA is a full-time institution, and it is expected that students complete their undergraduate

degree requirements promptly. Normal progress toward graduation in four years is defined as the completion of 45 units per year, or 15 units per term.

### Minimum Progress

The College and each school enforces minimum progress regulations. Students may be subject to disqualification for failing to meet minimum

progress requirements. See the College and Schools section for specific minimum progress and Study List regulations.

### Petitions

A petition is a form submitted to explain an exception from any standard rule or regulation of the University. It is the only way to obtain formal approval from the department, the College or school, the Registrar, or office with authority over the particular request. Some petitions carry a fee.

Some of the uses of petitions are to change the College, school, or major; take more or fewer units than regulations permit; make changes to the Study List after URSA processing ends; or obtain credit by examination. In addition, students may petition for concurrent enrollment, double major, or waiver of scholarship requirements.

### Transfer Credit

Students who take courses at a college or university other than UCLA should consult a College or school adviser about Articulation Agreements to determine how the courses will transfer. Articulation Agreements are lists of transferable courses from institutions other than UCLA.

Once students complete the courses, they must have the other institution send transcripts to Undergraduate Admissions and Relations with Schools (UARS), 1147 Murphy Hall, Box 951436, Los Angeles, CA 90095-1436. They must also go to UARS to submit a Transcript Locator Card (also known as a Transfer Credit Evaluation

Request) to initiate a credit evaluation. Transfer students should discuss transfer credit with their College or school counselor and/or departmental adviser.

### Community College

The maximum number of community college units allowed toward the bachelor's degree is 105 quarter units (70 semester units). The UCLA UARS does not grant transfer credit for community college courses beyond 105 quarter units, but students may still receive subject credit for this coursework to satisfy lower division requirements. Consult the College or school counselors for possible further limitations. To convert semester units into quarter units, multiply the semester units by 1.5 – for example, 12 semester units  $\times$  1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 – for example, 12 quarter units  $\times$  .666 = 7.99 or 8 semester units.

### Summer Sessions

Summer Sessions grades at any UC campus other than UC Santa Cruz (unless the letter-grade option is elected at UCSC) are computed in the UCLA grade-point average.

### UCLA Extension

Students who wish to receive degree credit for work taken through UCLA Extension should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. Grades earned by Arts and Architecture and Letters and Science undergraduate students in courses prefixed by XLC are computed in the UCLA grade-point average. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

### Degree Checks

Anytime prior to graduation students may request a review of degree progress. These official degree checks detail requirements remaining to complete the bachelor's degree. The degree check process is different for the College and each school.

### College of Letters and Science

The Degree Progress Report (DPR) serves as the degree check. The DPR is an assessment of all degree requirements and the courses taken to fulfill them. View and print DPRs through URSA OnLine or order one at a College counseling office (Academic Advancement Program, 1209 Campbell Hall; Honors Programs, A311 Murphy Hall; Letters and Science Counseling Services, A316 Murphy Hall).

Students should review questions about their DPR with departmental undergraduate advisers or College counselors, as appropriate. Students who entered UCLA prior to Fall Quarter 1988 should consult their College counseling office.

### School of the Arts and Architecture

Degree Progress Reports are available via URSA OnLine as well as on request from the Office of Student Services, 1100 Dickson Art Center. Students should consult an adviser in the Office of Student Services when they have questions about degree requirements or when they print a DPR. Questions regarding major requirements should be referred to the departmental counselor.

### Henry Samueli School of Engineering and Applied Science

Students at a high sophomore level and above must submit a "satisfied" Academic Program Proposal to the Office of Academic and Student Affairs, 6426 Boelter Hall. All engineering students may pick up a Graduation Evaluation Report at 6426 Boelter Hall. The report outlines each category requirement for an engineering degree and the courses completed for each category. Students may schedule an appointment at the Office of Academic and Student Affairs to have an official degree check completed one term prior to their graduation term.

### School of Nursing

Students may initiate a request for an updated degree check by contacting the student services coordinator in the Student Affairs Office, 2-200 Factor Building.

### School of Theater, Film, and Television

Students entering as freshmen receive a written degree check on achieving junior standing. Students entering as juniors receive a degree check on entry. Students may initiate or request an updated degree check by making an appointment with their departmental counselor in the Student Services Office, 103 East Melnitz Building.

## GRADUATE DEGREES

For graduate degree requirements and procedures, see *Program Requirements for UCLA Graduate Degrees and Standards and Procedures for Graduate Study at UCLA* at <http://www.gdnet.ucla.edu>.

## GRADUATION

The awarding of degrees is the culmination of several steps that begin when students identify the term they expect to complete degree requirements.

## UNDERGRADUATE STUDENTS

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. One third of all UCLA baccalaureate recipients go on to graduate school.

### Declaration of Candidacy

To initiate the steps leading to the award of a bachelor's degree, students must identify the term they expect to complete degree requirements through URSA Telephone (option 6# on the Student Records Menu) by the time they complete 160 units (172 units for engineering students) to avoid a late candidacy fee. The identified term must fall within the academic year (four quarters) subsequent to the term in which students reach or expect to reach the 160- or 172-unit mark. Once they complete 160/172 or more units, a fee is assessed each time students change the degree expected term.

Current-term or past-term candidates over the unit limit must purchase the UCLA Declaration of Candidacy form at any UCLA Store and file it at 1113 Murphy Hall.

Friday of the second week is the last day to declare candidacy for the current term (with fee depending on units completed). Declaration of candidacy after the second week may result in a degree award date for the following term and additional penalty fees.

Verify the degree expected term through URSA (option 6# on the Student Records Menu of URSA Telephone or in the DPR and Study List of URSA OnLine). For questions about degree candidacy status, Letters and Science students may inquire at 1113 Murphy Hall. Arts and Architecture, Theater, Film, and Television, Engineering, and Nursing students should see their school office. A photo I.D. is required. Declaring candidacy is not a guarantee of graduation.

## In Absentia Graduation

Students who intend to complete degree requirements while nonregistered (those who take a course through UCLA Extension or at another institution, remove an Incomplete grade, and so on) must file a request to graduate “in absentia” with their degree auditor in 1113 Murphy Hall by the second-week candidacy deadline. Students graduating in absentia are assessed the undergraduate in absentia degree service fee in addition to the declaration of candidacy fee if they were also not registered in the term immediately prior to their degree expected term.

## Final Degree Audits and Graduation

Degree auditors in the Registrar's Office for Letters and Science students (1100 Dickson Art Center for Arts and Architecture students, 6426 Boelter Hall for Engineering students, 2-200 Factor Building for Nursing students, and 103 East Melnitz Building for Theater, Film, and Television students) are responsible for verifying each candidate's eligibility for a bachelor's degree. Degree auditors have information pertaining to a student's graduation only if that student declared candidacy and completed 160 quarter units (172 units for engineering students).

During their graduating term, students should inform a degree auditor of grade changes, petitions for substitutions or exemptions, transfer credits, or similar changes that may effect their degree. Degree auditors notify students whose graduation eligibility cannot be verified of any requirements still outstanding and other problems in completing the degree.

A Summary of Shortages for the Bachelor's Degree statement is mailed to each current-term candidate who does not satisfy degree requirements that term. Students who receive such notices should contact a degree auditor immediately. If students expect to satisfy degree requirements in a later term, they must change their degree expected term over URSA Telephone or at 1113 Murphy Hall. They may be assessed applicable fees.

Contact degree auditors only for questions about degree audits. Phone numbers are in the Registrar's Services Guide in the Student Services section of the *Schedule of Classes*. For graduation ceremony procedures, contact the College or schools.

## Degree Date

Degrees are awarded at the end of Fall, Winter, and Spring quarters and at the end of Summer Session C. School of Law and School of Medicine degrees are awarded at the end of Fall and Spring semesters. Consult the UCLA quarter, summer sessions, and semester calendars for the degree award date, which is the final day of the term. See <http://www.registrar.ucla.edu/calendar>.

## Commencement

The College and each school conduct ceremonies for their graduates. Ceremonies feature addresses and recognize candidates who have achieved high academic distinction and honors. Names of students who request that no public information be released do not appear in commencement ceremony programs. Students may change their privacy status on URSA OnLine.

Check with the College or school for eligibility requirements, programs, and time schedules. Further information, including the schedule of ceremonies, maps and parking, and updates is at <http://www.commencement.ucla.edu>.

## Diplomas

Diplomas for both undergraduate and graduate students are available approximately three to four months after the degree award date. Information about obtaining the diploma in person (no fee) or by mail (with fee) is sent to students approximately seven weeks after the end of their final term. To expedite receipt of the diploma, students should return the diploma mailer form and remit the mailing fee. Obtain recorded diploma availability information at (310) 825-8883. The Registrar's Office retains diplomas for five years from graduation date.

## Change of Name

To be reflected on the diploma, name changes must be submitted to Academic Record Services, 1134 Murphy Hall, by the last day of the degree expected term. Students submitting name changes after that date must request a replacement diploma at 1113 Murphy Hall and pay an additional fee.

## Duplicate Diplomas

If the original diploma is destroyed, a duplicate may be ordered by contacting the Registrar's Office, Diploma Reorder, 1113 Murphy Hall. There is a fee for the replacement diploma, and it bears a reissue date and the signatures of the current officials of the state and University.

## GRADUATE STUDENTS

Candidates for both master's and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master's thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (see the *Schedule of Classes* calendar for filing deadlines). For graduate degree requirements and procedures, see *Program Requirements for UCLA Graduate Degrees* and *Standards and Procedures for Graduate Study at UCLA* at <http://www.gdnet.ucla.edu>.

# College and Schools

The UCLA campus has one college and 11 professional schools. Each has its own degree requirements and is headed by a dean or provost who has final academic authority. UCLA students enroll in the University and in the College or one of the schools described in this section.

## COLLEGE OF LETTERS AND SCIENCE

**Brian P. Copenhaver, Provost**

UCLA  
A316 Murphy Hall  
Box 951430  
Los Angeles, CA 90095-1430

(310) 825-1965 (Letters and Science Counseling)  
<http://www.college.ucla.edu>

*“The Idea of a Multiversity” is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom.”*

*Clark Kerr, The Uses of the University*

With over 23,719 students and more than 800 faculty, UCLA’s College of Letters and Science is the largest academic unit in the UC system.

Four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 125 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master’s and doctoral degrees.

The undergraduate programs in the College stress a liberal arts education that brings together perspectives from many fields in a unified approach to learning. Students learn ways that issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they pose their own questions, analyze academic issues of their own making and, through their research, participate in the creation of knowledge.

For a complete list of Letters and Science degrees, see the table in the front of this catalog.

## ORGANIZATION OF THE COLLEGE

The primary units of the College are the academic departments, which are grouped in four divisions: Humanities, Life Sciences, Physical Sciences, and Social Sciences. Each division is

headed by a dean who reports directly to the provost. A fifth division, Honors and Undergraduate Programs, provides academic programs, academic services, and scholarships for undergraduate students. It is headed by the vice provost for undergraduate education.

## Humanities

The Humanities Division promotes, through scholarly inquiry and transmission of ideas, sensitive, imaginative, and rigorous reflection on the human condition. Courses in literature help students understand the enduring power of texts both great and small—from cuneiform to hypertext. Studies of nearly 100 foreign languages create a gateway to civilizations that span the globe and five millennia of human history. Philosophers provide training in the fundamental principles of logic and moral reasoning, and linguists—both theoretical and applied—illuminate the ways we communicate. Historians of religion, music, and art explore with students the forms and media through which humans have sought to express themselves and to challenge and make sense of their worlds. Programs in the humanities teach students to interpret texts with an informed sensitivity, to evaluate ideas critically, to write clearly and effectively about them, and to be able to question and discuss them with their peers. Pauline Yu is the divisional dean.

## Life Sciences

Faculty and students in the Life Sciences Division play an essential role in unlocking the basic mechanisms of life at the most fundamental level. The geography of Southern California is conducive to life sciences research, since the diverse region is a natural laboratory for environmental physiologists, plant and animal ecol-

---

*Undergraduate programs in the College stress a liberal arts education that brings together perspectives from many fields in a unified approach to learning*

---

ogists, and evolutionary biologists. Scientists in biology, microbiology and molecular genetics, and molecular biology conduct research in cell and developmental biology. Neurochemists, neurophysiologists, psychobiologists, and behavior biologists study the underlying mechanisms of the neural basis of behavior. Physiological scientists examine the regulation of human movement, neural control of breathing, and environmental conditions, such as weightlessness, that affect bone and muscle structure and function. Cognitive scientists are concerned with the nature of knowledge—how people learn, remember, associate, and think, and how computers relate to human thought processes. Fred Eiserling is the divisional dean.

### Physical Sciences

Departments in the Physical Sciences Division present the results of human efforts to understand the natural sciences and their physical aspects, including the properties and characteristics of matter and energy; the science of numbers and order; the origin and structure of the universe, solar system, and earth; and climatic change. The bases for the physical sciences are the fundamental laws and proof of mathematics, chemistry, and physics. Studies in the physical sciences are experimental, theoretical, and observational. Faculty and students are interested in such topics as the nature and evolution of the galaxies; ozone depletion; nuclear winter; greenhouse effect; molecular recognition, interactions, design, synthesis, and structure; evolution of life and the continents; computational mathematics and symbolic logic; superconducting materials; plasma fusion, space plasmas; and high-energy accelerator physics. Roberto Peccei is the divisional dean.

### Social Sciences

Departments in the Social Sciences Division are guided by the ideal of creating a deeper understanding of cultures and heritages and helping young people make sense of the rapidly changing world. By studying and comparing diverse cultures with their own, students gain self-knowledge and global awareness. Anthropology students study human communities and social systems, archaeological records, and artifacts. Communication studies students learn about the mass media of today and their technological advances, social uses, and abuses. Leading economists investigate the applications of economic principles to business decisions. The geographic purview extends from studying the effects of location on human behavior to the Earth's ecosystem. Courses in history bring about understanding of the forces that have shaped the many societies and cultures of this country and the world. Political scientists study the motivations of political behavior and the relations between today's superpowers. UCLA sociologists examine subjects ranging from the everyday interaction of people to the complexities of social organizations. Scott L. Waugh is the divisional dean.

### Honors and Undergraduate Programs

The Honors and Undergraduate Programs Division provides academic programs, services, and scholarships through a number of units including:

**Academic Advancement Program.** The Academic Advancement Program (AAP) is a multiracial and multicultural program working to retain and graduate some 7,000 students. ☎310-825-1481

**Academics in the Commons.** Free individual and small-group tutorials are offered through Academics in the Commons at Covell Commons. Staffed by trained peer tutors, the program helps develop critical thinking and independent learning.

**Honors Programs.** The Honors Programs Office provides academic counseling and services to students in the College Honors Program, the Education Abroad Program, and the Individual Majors Program, as well as to Departmental Scholars. It oversees Honors Collegium courses and administers Phi Beta Kappa nominations. ☎310-825-1553

**Letters and Science Counseling Services.** Letters and Science Counseling Services assists students with academic regulations and procedures, help them select courses, and advise them of options available to enhance their university education. Other services include workshops to help students develop their academic strengths. ☎310-825-3382

**Orientation Program.** The Orientation Program prepares new students to face the personal and academic challenges of study at UCLA through individual counseling, small group discussions, workshops, and presentations. ☎310-206-6685

**Preprofessional Advising.** For information on preparing for professional degrees, see the preprofessional advising site at <http://www.college.ucla.edu/up/pao>.

**Scholarship Resource Center.** The Scholarship Resource Center helps UCLA students find scholarships, request applications, draft personal statements, or proofread and prepare applications. Counselors help students with scholarship-related questions and point them to relevant resources.

**Undergraduate Research Centers.** Undergraduate Research Centers assist students in the humanities and social sciences and in the life and physical sciences by supporting scholarly, critical, and creative research. The centers provide individual research counseling, house research and mentoring programs, and administer stipends and scholarships.

## UNDERGRADUATE DEGREE REQUIREMENTS

For a complete list of Letters and Science degrees, see the table in the front of this catalog.

Degree programs in the College offer students a variety of intellectual challenges by combining a wide distribution of courses and the opportunity

to specialize in one particular field. To this end, students are required to select lower division courses that provide general foundations of human knowledge. In upper division courses, they concentrate on one major field of interest.

As described below, UCLA students must meet three types of requirements for the Bachelor of Arts or Bachelor of Science degree:

1. University requirements
2. College requirements
3. Department requirements

## UNIVERSITY REQUIREMENTS

The University of California has two requirements that undergraduates must satisfy in order to graduate: (1) Subject A or English as a Second Language and (2) American History and Institutions. Students who do not satisfy the Subject A requirement prior to enrollment must pass an approved course or other program prescribed by their UC campus of residence. Only after satisfying the Subject A requirement can they take for transfer credit an English composition course after enrolling at UCLA. See Degree Requirements in the Undergraduate Study section for details.

## COLLEGE REQUIREMENTS

The College of Letters and Science has seven requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, English composition, quantitative reasoning, foreign language, and general education.

### STRUCTURE OF A DEGREE

#### University Requirements

1. Subject A or English as a Second Language
2. American History and Institutions

#### College Requirements

1. Unit
2. Scholarship
3. Academic Residence
4. College Writing
  - Writing I Requirement
  - Writing II Requirement
5. Quantitative Reasoning
6. Foreign Language
7. General Education

#### Department Requirements

1. Preparation for the Major
2. The Major

Courses that do not satisfy the University, College, or department requirements are referred to as electives and are used to meet the minimum unit requirement for graduation.

## Unit Requirement

Students must satisfactorily complete for credit a minimum of 180 units for the bachelor's degree. For students entering Fall Quarter 1999 and thereafter, at least 60 of the 180 units must be upper division courses numbered 100 through 199. A maximum of 216 units (228 for double majors and special programs) is permitted. Students with advanced placement (transfer) credit may exceed the unit maximum by the amount of that credit.

## Scholarship Requirement

Students must earn at least a C (2.0) grade-point average in all courses undertaken at UCLA for receipt of the bachelor's degree. They must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements for that major, including preparation for the major.

## Academic Residence Requirement

Sixty-eight of the last 80 units completed for the bachelor's degree must be earned in residence in the College. No more than 16 of the 68 units may be completed in UCLA Summer Sessions. While enrolled in the College, students must complete at least 40 upper division units, including 24 upper division units in the major. These academic residence requirements apply to all students, both continuing and transfer.

## College Writing Requirement

Students must complete the University's Subject A or English as a Second Language (ESL) requirement prior to completing the College writing requirement.

Beginning Fall Quarter 1999, new students admitted to the College are required to complete a two-quarter College writing requirement—Writing I and Writing II. Continuing and returning students fulfill the requirements in effect prior to Fall Quarter 1999. Under the new requirement, two courses in English composition are required for graduation. Both courses must be taken for a letter grade, and students must receive grades of C or better (C-grades are not acceptable).

**Writing I.** The Writing I requirement must be satisfied by completing English Composition 3, or an equivalent course approved by the College Faculty Executive Committee, within the first three quarters of enrollment.

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Tests in English or a combination of a score of 720 or better on the SAT II Subject Test in Writing and superior performance on the English Composition 3 Proficiency Examination.

Students whose native language is not English may satisfy the Writing I requirement by completing English as a Second Language 36 with a grade of C or better (C- or a Passed grade is not acceptable). Admission into the course is determined by completion of English as a Second Language 35 with a passing grade or proficiency demonstrated on the English as a Second Language Placement Examination (ESLPE).

**Writing II.** The Writing II requirement is satisfied by selecting a course from a list of courses approved by the College Faculty Executive Committee. Writing II courses are listed in the *Schedule of Classes* at <http://www.registrar.ucla.edu/schedule> and are available in Letters and Science Counseling Services offices. Most Writing II courses may also be applied toward General Education (GE) requirements or toward some preparation for the major requirements. It is strongly recommended that the requirement be fulfilled within the first six quarters of enrollment.

Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum will have satisfied the Writing I and Writing II requirements. No transfer student is admitted to the College without completing, with a grade of C or better (a grade of C- is not acceptable), a college-level writing course that the Office of Undergraduate Admissions and Relations with Schools accepts as equivalent to English Composition 3.

### Quantitative Reasoning Requirement

In the College of Letters and Science, students must demonstrate basic skills in quantitative reasoning. All courses taken to satisfy the Quantitative Reasoning requirement must be completed with a grade of Passed or C or better. The Quantitative Reasoning requirement can be satisfied by achieving a SAT I mathematics score of 600 or better, a SAT II mathematics subject test score of 550 or better, or by completing one of the following courses: Anthropology M80, Biostatistics 100A, 100B, Computer Science 10C, 10F, Economics M40, Geography M40, Mathematics 2 (or any higher numbered course except 38A, 38B, and 104), Philosophy 31, Political Science 6, Program in Computing 10A, 10B, 10C, Sociology M18, 109A, Statistics 10, M11, M12.

### Foreign Language Requirement

The Foreign Language requirement can be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA's level three or above or (2) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning College credit or (3) presenting a UCLA foreign language departmental examination score indicating competency through level three. Consult the *Schedule of Classes* for times and places of these regularly scheduled examinations. Students who wish to demonstrate proficiency in a language which is taught in a UCLA department that has no scheduled examination should contact the appropriate department to arrange for one. Students wishing to take an examination in a language not taught at UCLA should contact a College counselor.

The following language courses may be used to fulfill the foreign language requirement:

African Languages (Linguistics) 1A-1B-1C or 15 (Swahili); 7A-7B-7C or 17 (Zulu); 11A-11B-11C or 25 (Yoruba); 31A-31B-31C or 35 (Bambara); 41A-41B-41C or 45 (Hausa); 51A-51B-51C (Amharic); 61A-61B-61C (Wolof); 75 (Chichewa); 85 (Setswana)

Afrikaans (Germanic Languages) 105A, 105B

Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B-140C (Sumerian)

Arabic (Near Eastern Languages) 1A-1B-1C

Armenian (Near Eastern Languages) 101A-101B-101C or 104A-104B-104C

Berber (Near Eastern Languages) 101A-101B-101C

Bulgarian (Slavic Languages) 103A-103B-103C

Chinese (East Asian Languages) 1, 2, and 3, or 1A and 2A, or 3R or 8

Czech (Slavic Languages) 102A-102B-102C

Dutch (Germanic Languages) 103A-103B, and 103C, or 104A-104B

French 1, 2, and 3, or 8

German (Germanic Languages) 1, 2, and 3, or 8

Greek (Classics) 1, 2, and 3, or 16; 15 (Modern Greek)

Hebrew (Near Eastern Languages) 1A-1B-1C or 10A-10B-10C

Hungarian (Slavic Languages) 101A-101B-101C

Indigenous Languages of the Americas (Linguistics) 17 or 18A-18B-18C (Quechua)

Iranian (Near Eastern Languages) 1A-1B-1C or 20A-20B-20C (Persian)

Italian 1, 2, and 3, or 1A and 2A

Japanese (East Asian Languages) 1, 2, and 3, or 8

Korean (East Asian Languages) 1, 2, and 3, or 1A, 2A, and 3A, or 8

Latin (Classics) 1, 2, and 3, or 16

Polish (Slavic Languages) 102A-102B-102C

Portuguese (Spanish and Portuguese) 1, 2, 3

Romanian (Slavic Languages) 101A-101B-101C or 104

Russian (Slavic Languages) 1, 2, and 3, or 10 or 11A-13B (two units each) or 15A-15B

Scandinavian 1, 2, and 3, or 8 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)

Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)

Serbian/Croatian (Slavic Languages) 103A-103B-103C

South and Southeast Asian Languages (East Asian Languages) 40A-40B-40C (Hindi); 50A-50B-50C (Vietnamese); 60A-60B-60C (Thai); 70A-70B-70C (Tagalog); 80A-80B-80C (Indonesian)

Spanish (Spanish and Portuguese) 1, 2, and 3, or 2A and 3A

Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek); 115A-115B-115C (Azeri)

Ukrainian (Slavic Languages) 101A-101B-101C

Yiddish (English) 101A, 101B, and 101C, or 102B

## General Education Requirements

The general education (GE) requirements of the College introduce undergraduates to the richness and diversity of the various academic disciplines, broaden their intellectual perspective, and prepare them to be educated members of society. Within four of the divisions of the College—Humanities, Physical Sciences, Social Sciences, and Life Sciences—students are encouraged to explore the different possibilities for further university study.

### Advanced Placement Credit

To apply advanced placement (AP) credit toward GE requirements, see the AP chart in the Undergraduate Study section of this catalog or consult a College counselor.

### Reciprocity with Other UC Campuses

Students who transfer to UCLA from other UC campuses and have met all GE requirements prior to enrolling at UCLA are not required to complete the College GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a College counselor regarding eligibility for this option.

### Intersegmental GE Transfer Curriculum

Transfer students from California community colleges have the option to fulfill UCLA lower divi-

sion GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses that have been agreed on by the University of California and the California community colleges. Although GE or transfer core courses are degree requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all UCLA GE requirements are fulfilled when students complete the IGETC courses. Students who select to use IGETC must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the Letters and Science GE requirements.

Students who are unable to complete one or two IGETC courses for good cause may petition the community college for partial completion of IGETC. If the petition is approved by the community college, the remaining courses must be completed with a minimum grade of C within one calendar year of admission to UCLA. Failure to complete IGETC coursework within the specified time period results in a permanent denial of IGETC certification, and students are required to complete the Letters and Science GE requirements.

## GENERAL EDUCATION REQUIREMENTS

**Humanities Division** — Four (4) courses. One course must be from the literature subgroup and no more than two courses may be from any single subgroup.

Humanities – Literature  
Humanities – Philosophy  
Humanities – Language and Linguistics  
Humanities – Culture and Civilization  
Humanities – The Arts

**Physical Sciences Division** — Three (3) courses. Two courses must be complementary and one must include a laboratory and/or demonstration component. (Students who entered prior to Fall Quarter 1999 with 45 units or more are exempt from the complementary requirement.)

**Social Sciences Division** — Four (4) courses. Two courses must be from each subgroup.

Social Sciences — Historical Analysis  
Social Sciences — Social Analysis

**Life Sciences Division** — Three (3) courses. One course must include a laboratory and/or demonstration component.

**Exemptions** — Each student is exempt from two GE courses. Exemptions depend on the major selected and which division that major is in. Special programs such as the GE Cluster courses also carry exemptions.

Students with a major in the Humanities Division are exempt from two courses, one in the subgroup of their major and one in another humanities subgroup. Students with a major in the Physical Sciences Division are exempt from two courses in the physical sciences group. Students with a major in the Social Sciences Division are exempt from two courses in the subgroup of their major. Students with a major in the Life Sciences Division are exempt from two courses in the life sciences group.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for the major may be used to satisfy these requirements.

**Substitutions** — Two lower division seminars which have been approved for general education credit may be substituted for courses on the GE course list. Students may make no more than one such substitution per GE group (Humanities, Physical Sciences, Social Sciences, Life Sciences). An annual list of GE seminars is published in the *General Education Handbook*, and descriptions are listed in the *Schedule of Classes* under Special Programs.

78 COLLEGE OF LETTERS AND SCIENCE GENERAL EDUCATION COURSE EXEMPTIONS

Each student is exempt from two GE courses. Exemptions depend on the major selected and which division that major is in, as outlined in the tables below.

Courses marked with an asterisk (e.g., Honors Collegium \*9. Greeks and Barbarians: Multiculturalism in the Ancient World) are listed in more than one category and can fulfill GE requirements in only one of the cross-listed categories. All honors sections of courses listed below also fulfill GE requirements.

## A. HUMANITIES

Four courses, with at least one from Group A1 and no more than two courses from any single subgroup:

### A1. LITERATURE

#### Afrikaans (Germanic Languages)

114. German Exile Culture in Los Angeles

#### Classics

40. Survey of Greek Literature in Translation  
41. Survey of Latin Literature in Translation  
41W. Discovering Roman Literature

#### Comparative Literature

1A. World Literature: Antiquity to Early Middle Ages  
1B. World Literature: Late Middle Ages to the 17th Century  
1C. World Literature: Age of Enlightenment to the 20th Century  
1D. Great Books from the World at Large  
2AW. Survey of Literature: Antiquity to Early Middle Ages  
2BW. Survey of Literature: Late Middle Ages to the 17th Century  
2CW. Survey of Literature: Age of Enlightenment to the 20th Century  
2DW. Survey of Literature: Great Books from the World at Large  
4AW. Literature and Writing: Antiquity to Early Middle Ages  
4BW. Literature and Writing: Late Middle Ages to the 17th Century  
4CW. Literature and Writing: Age of Enlightenment to the 20th Century  
4DW. Literature and Writing: Great Books from the World at Large

#### English

4W. Critical Reading and Writing  
4HW. Critical Reading and Writing (Honors)  
10A. English Literature to 1660  
10B. English Literature, 1660 to 1832  
70. Major British Authors before 1800  
75. Major British Authors, 1800 to the Present  
80. Major American Authors  
85. American Novel  
88J. Lower Division Seminar: Introduction to Asian American Fiction  
88L. Lower Division Seminar: Poetics of Myth  
88M. Lower Division Seminar: Three Philosophical Novels  
88M. Lower Division Seminar: When Myth Systems Collide -- 20th-Century Literature and Culture Confront Traditional Myths  
90. Shakespeare  
95A. Introduction to Poetry  
95B. Introduction to Drama  
95C. Introduction to Fiction  
96. The Short Story in England and America

#### Folklore and Mythology

88. Poetics of Myth

#### French (French and Francophone Studies)

12. Introduction to Study of French Literature (in French)  
114A, 114B, 114C. Survey of French Literature (in French)

#### German (Germanic Languages)

50A. Great Works of German Literature in Translation: Medieval Period through Classicism  
50B. Great Works of German Literature in Translation: Romanticism to the Present  
140A. Introduction to German Poetry (in German)  
140B. Introduction to German Drama (in German)  
140C. Introduction to German Narrative Prose (in German)

#### Honors Collegium

\*9. Greeks and Barbarians: Multiculturalism in the Ancient World  
16. Contemporary Fiction and Psychology of the Self  
21W. Rise and Fall of Modernism  
\*28. Misleading Mirror: Self-Portraits in Word and Image  
33W. Art of Engagement

40W. Transformations of Cultural Stories across Disciplines and Texts  
\*43. Male Identity and Sexuality in Ancient Rome  
46W. Literature of Testimony  
47. Literature of Colonization and Colonization of Literature  
\*50A. Greek Views of Humanity  
\*55. Culture and History of Utopias  
59W. Literature and Culture of the American South  
74. Life Crises in Literature  
80. Literature of Diversity: Cultural Experience in America  
83W. Politics and Rhetoric of Literature  
86. Federico Garcia Lorca and Literature of New York  
134. Quest for Identity and the American Dream

#### Italian

50A. Masterpieces of Italian Literature in English: Middle Ages and Renaissance  
50B. Masterpieces of Italian Literature in English: Baroque Period to the Present

#### Japanese (East Asian Languages)

60. Images of Japan: Humanistic Tradition

#### Jewish Studies (Near Eastern Languages)

175. Modern Hebrew Novel as a Film

#### Portuguese (Spanish and Portuguese)

40A, 40B. Portuguese, Brazilian, and African Literature in Translation  
120A, 120B. Introduction to Portuguese Literature (in Portuguese)  
130A, 130B. Brazilian Literature and Identity: Introduction (in Portuguese)

#### Russian (Slavic Languages)

25. Russian Novel in Translation  
25W. Russian Novel in Translation

#### Scandinavian

50. Introduction to Scandinavian Literature  
50W. Introduction to Scandinavian Literature

#### Spanish (Spanish and Portuguese)

60A, 60B, 60C. Hispanic Literatures in Translation  
88A. Lower Division Seminar: Reaching 2001 (Fantasy of Reality and Reality of Fantasy)

## A2. PHILOSOPHY

### Honors Collegium

\*6. Historical Construction of Reality  
32W. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences  
\*50A. Greek Views of Humanity

### Philosophy

1. Beginnings of Western Philosophy  
2. Introduction to Philosophy of Religion  
4. Philosophical Analysis of Contemporary Moral Issues  
5A. Philosophy in Literature  
6. Introduction to Political Philosophy  
7. Introduction to Philosophy of Mind  
8. Introduction to Philosophy of Science  
21. Skepticism and Rationality  
22. Introduction to Ethical Theory  
22W. Introduction to Ethical Theory

## A3. LANGUAGE AND LINGUISTICS

### Chicana and Chicano Studies

M170. Latinos and Literacy

### Classics

55. Origins and Nature of English Vocabulary

### Communication Studies

M40. Language and Gender: Introduction to Gender and Stereotypes in English, Japanese, and Russian

**English**

88K. Lower Division Seminar: Introduction to English Etymology

**German (Germanic Languages)**

70. Origin of Language

**Honors Collegium**

19. Rhetoric on Trial: Legal Advocacy, Ancient and Modern

56. Language as a Window to the Mind

M128. Latinos and Literacy

131. Beating Time through Time: Language, Verse, and Culture

**Japanese (East Asian Languages)**

M40. Language and Gender: Introduction to Gender and Stereotypes in English, Japanese, and Russian

**Language**

Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used

**Linguistics**

1. Introduction to Study of Language

2. Language in the U.S.

3. American Sign Language: Structure and Culture

10. Structure of English Words

20. Introduction to Linguistics

**Portuguese (Spanish and Portuguese)**

M35. Spanish, Portuguese, and Nature of Language

**Russian (Slavic Languages)**

M40. Language and Gender: Introduction to Gender and Stereotypes in English, Japanese, and Russian

**Spanish (Spanish and Portuguese)**

M35. Spanish, Portuguese, and Nature of Language

**A4. CULTURE AND CIVILIZATION****Ancient Near East (Near Eastern Languages)**

10W. Jerusalem: The Holy City

**Art History**

\*88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship

**Chinese (East Asian Languages)**

50. Chinese Civilization

**Classics**

\*10. Survey of Classical Greek Culture

\*20. Survey of Roman Civilization

30. Introduction to Classical Mythology

51A. Art and Archaeology of Classical World: Greece

51B. Art and Archaeology of Classical World: Rome

**East Asian Languages and Cultures**

60. Introduction to Buddhism

60W. Introduction to Buddhism

**Folklore and Mythology**

M15. Introduction to American Folklore Studies

**French (French and Francophone Studies)**

14. Introduction to French Civilization, in English

14W. Introduction to French Civilization

41. French Cinema and Culture

\*112. Medieval Foundations of European Civilization

**German (Germanic Languages)**

55. The City as Text: German Exile Culture in Los Angeles

60W. War

62W. Technoscience and German Culture

100A. German History and Culture before 1500

100B. German History and Culture from 1500 to 1914

100C. German History and Culture from 1914 to the Present

**History**

\*9A. Introduction to Asian Civilizations: History of India

\*9C. Introduction to Asian Civilizations: History of Japan

\*9D. Introduction to Asian Civilizations: History of the Near and Middle East

\*10A, \*10B. Introduction to Civilizations of Africa

\*10BW. Introduction to Civilizations of Africa since 1800

\*11A, \*11B. History of China

**Honors Collegium**

4. Surrealist Challenge

\*9. Greeks and Barbarians: Multiculturalism in the Ancient World

\*13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s

\*26. Representing Medicine: Art, Literature, and Film

\*30. Vietnam War and American Culture

\*38. Frida Khalo: Multidisciplinary Construction of an Artist's Life

\*43. Male Identity and Sexuality in Ancient Rome

\*50A. Greek Views of Humanity

50B. Gender and Race: Constructions of Greek Political Thought

78. Writing in Age of Revolution

\*96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa

\*132. Bible as Political Theory

**Italian**

42A. Italy through the Ages in English: Holy Roman Empire to Sack of Rome

42B. Italy through the Ages in English: Late Renaissance to Post-modern Period

46. Italian Cinema and Culture

**Japanese (East Asian Languages)**

50. Japanese Civilization

**Jewish Studies (Near Eastern Languages)**

10. Social, Cultural, and Religious Institutions of Judaism

**Korean (East Asian Languages)**

50. Korean Civilization

**Near Eastern Languages**

50A. First Civilizations

50B. Ascendance of Monotheism

50C. Modern Middle Eastern Cultures

**Portuguese (Spanish and Portuguese)**

M42. Civilization of Spain and Portugal

M44. Civilization of Spanish America and Brazil

46. Brazilian Culture and Civilization

**Russian (Slavic Languages)**

30. Russian Literature and World Cinema

99A. Introduction to Russian Civilization

99B. Russian Civilization in the 20th Century

99BW. Russian Civilization in the 20th Century

**Slavic (Slavic Languages)**

99. Introduction to Slavic Civilization

**Spanish (Spanish and Portuguese)**

M42. Civilization of Spain and Portugal

M44. Civilization of Spanish America and Brazil

**World Arts and Cultures**

M22. Introduction to American Folklore Studies

**A5. THE ARTS****Afro-American Studies**

M110A, M110B. African American Musical Heritage

**Art History**

50. Ancient Art

51. Medieval Art

54. Modern Art

55A. Introduction to African Art

55B. Arts of Pre-Columbian America

56A. Art of India and Southeast Asia

56B. Introduction to Chinese Art

57. Renaissance and Baroque Art

\*88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship

**Arts and Architecture**

10. Arts Encounters: Exploring Arts Literacy in the 21st Century

**Chicana and Chicano Studies**

M108A. Music of Latin America

**Classics**

42. Cinema and the Ancient World

**Design | Media Arts**

10. Nature of Design

**Ethnomusicology**

20A, 20B, 20C. Musical Cultures of the World

- M108A, 108B. Music of Latin America  
 M110A, M110B. African American Musical Heritage  
 113. Music of Brazil  
 C136A, C136B. Music of Africa  
 147. Survey of Classical Music in India  
 174. Aesthetics of Music

#### Film and Television

- 106A. History of the American Motion Picture  
 106B. History of the European Motion Picture  
 106C. History of African, Asian, and Latin American Film  
 108. History of Documentary Film  
 112. Film and Social Change

#### Folklore and Mythology

- M154A, M154B. African American Musical Heritage

#### Honors Collegium

- \*3. History and Visual Culture from Engraving to Film and Television  
 \*13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s  
 \*26. Representing Medicine: Art, Literature, and Film  
 \*28. Misleading Mirror: Self-Portraits in Word and Image  
 \*29. Critical Vision: History of Art as a Social and Political Commentary  
 34. Film and Society: The Hollywood Myth of Ancient Rome  
 \*38. Frida Khalo: Multidisciplinary Construction of an Artist's Life  
 125. Interpretations of Shakespeare in Theater and Film in the 20th Century

#### Music

15. Art of Listening

#### Music History (Musicology)

- 2A, 2B. Introduction to Literature of Music  
 5. History of Rock and Roll  
 7. Film and Music  
 10. Music Now  
 12W. Writing about Music  
 13. 20th-Century Music of the Western World  
 133. Bach  
 134. Beethoven  
 135A, 135B, 135C. History of Opera

#### Theater

- 102E. Theater of Non-European World  
 104C. History of American Theater: WWI to the Present

#### World Arts and Cultures

- 106B. Dance in Africa and African Diaspora  
 C109B. Dance in Native American Cultures  
 149. Dance in the Multicultural U.S.  
 150. History of Dance in Culture and Performance

## B. PHYSICAL SCIENCES

Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:

#### Astronomy (Physics and Astronomy)

- 2A, 2B. Introduction to the Physical Universe  
 3. Astronomy: Nature of the Universe  
 4. Universe of Stars and Stellar Systems  
 5. Life in the Universe  
 6. Cosmology: Our Changing Concepts of the Universe  
 7. Astronomy and the Media  
 8A-8B. Astronomy with Physics: Exploring the Universe. See Special General Education Programs below  
 81. Astrophysics I: Stars and Nebulae  
 82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology  
 88A. Lower Division Seminar: Cosmic Evolution

#### Atmospheric Sciences

- 2, 2E. Air Pollution  
 3, 3E. Introduction to the Atmospheric Environment  
 4. California Weather and Climate  
 5. Climates of Other Worlds  
 6, 6E. Climate and Climatic Change  
 10. Introduction to the Earth System

#### Chemical Engineering

2. Technology and the Environment

#### Chemistry and Biochemistry

2. Introductory Chemistry

- 14A. Chemical Structures and Equilibria  
 14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy  
 14BL. General and Organic Chemistry Laboratory  
 15. Survey of Organic Chemistry and Biochemistry  
 15L. Laboratory in Elementary Organic Chemistry and Biochemistry  
 20A. Chemical Structure  
 20B. Chemical Energetics and Change  
 20L. General Chemistry Laboratory

#### Civil and Environmental Engineering

3. Fundamentals of Environmental Engineering Science

#### Computer Science

2. Great Ideas In Computer Science

#### Earth and Space Sciences

1. Introduction to Earth Science  
 5. Environmental Geology of Los Angeles  
 8. Earthquakes  
 9. Origin and Evolution of Solar System  
 \*15. Introduction to Oceanography  
 \*20. Natural History of Southern California

#### Geography

1. Physical Environment

#### Honors Collegium

1. Systems Thinking: Exploring Order and Chaos in Everyday Life  
 \*5. Science and the Human Condition  
 20. Artificial Intelligence: Machines as People, People as Machines  
 22. Short History of Science: Reading the Great Book of the Universe  
 \*24. 21st Century: Society, Environment, and Ethics  
 31. Current Environmental Problems  
 35. Scientific Method: Critical Inquiry into Question of Extraterrestrial Life  
 42. Physics of Music  
 44. Trail of Light  
 \*57. Life and Sciences of Complexity  
 67. Structure of Physical Reality  
 \*70B. Nonlife to Life, Microbes to Man: Nature Is Not Compartmentalized  
 73. Elementary Particles in the Universe  
 75. On Nature of Things: Comparative Reading of Poem by Lucretius and Modern Science  
 77. Space Science: Active Sun and Its Effects on Earth  
 85. Science and Art: Concepts and Connections

#### Mathematics

2. Finite Mathematics  
 3A, 3B. Calculus for Life Sciences Students  
 31A, 31B. Calculus and Analytic Geometry  
 31E. Calculus for Economics Students

#### Physics (Physics and Astronomy)

- 1A. Physics for Scientists and Engineers: Mechanics  
 1AH. Physics for Scientists and Engineers: Mechanics (Honors)  
 1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields  
 1BH. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields (Honors)  
 1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity  
 1CH. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity (Honors)  
 6A. Physics for Life Sciences Majors: Statics and Dynamics  
 6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics  
 6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport  
 10. Physics

Complementary courses include Astronomy 2A/2B, 3/4, 3/5, 3/6, 3/7, 8A/8B, 81/82, Astronomy 3/Honors Collegium 77; Atmospheric Sciences 2/3, 2E/3E, 3/4, 3/5, 3/6, 3E/6E, 5/6; Chemistry and Biochemistry 14A/14B, 15/20A, 20A/20B; Earth and Space Sciences 1/8, 1/9, 1/15, 1/Geography 1, 20/Geography 1; Mathematics 3A/3B, 3A/31B, 3A/31E, 3B/31A, 31A/31B, 31A/31E; Physics 1A/1B, 1A/1C, 1AH/1BH/1CH, 1B/1C, 6A/6B, 6A/6C, 6B/6C.

Courses with a laboratory and/or demonstration component include Astronomy 2A, 2B, 3, 8B, 81, 82, Atmospheric Sciences 2, 3, 3E, 4, 6E, Chemistry and Biochemistry 14BL, 15L, 20L, Earth and Space Sciences 1, 15, 20, Geography 1, Honors Collegium 20, 67, 70B, 77, Physics 1A, 1AH, 1B, 1BH, 1C, 1CH, 6A, 6B, 6C, 10.

## C. SOCIAL SCIENCES

Four courses (two each from Groups C1 and C2):

### C1. HISTORICAL ANALYSIS

Two courses from a single sequence are recommended:

#### Classics

- \*10. Survey of Classical Greek Culture
- \*20. Survey of Roman Civilization

#### French (French and Francophone Studies)

- \*112. Medieval Foundations of European Civilization

#### History

- 1A, 1B, 1C. Introduction to Western Civilization
- \*2A. Power, Ethics, and Technological Change
- \*2B. Social Knowledge and Social Power
- 2C, 2D. Religion, the Occult, and Science
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
- 4. Introduction to History of Religions
- 8A. Colonial Latin America
- 8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
- 8C. Latin American Social History
- \*9A. Introduction to Asian Civilizations: History of India
- \*9C. Introduction to Asian Civilizations: History of Japan
- \*9D. Introduction to Asian Civilizations: History of the Near and Middle East
- 9E. Introduction to Asian Civilizations: Southeast Asian Crossroads
- \*10A, \*10B. Introduction to Civilizations of Africa
- \*10BW. Introduction to Civilizations of Africa since 1800
- \*11A, \*11B. History of China
- 13A. History of the U.S. and Its Colonial Origins: Colonial Origins and First Nation Building Acts
- 13B. History of the U.S. and Its Colonial Origins: 19th Century
- 13C. History of the U.S. and Its Colonial Origins: 20th Century
- 20. World History to A.D. 600
- 21. World History, Circa 600 to 1760
- 22. Contemporary World History, 1760 to the Present

#### Honors Collegium

- \*2. Comparative Genocide
- \*3. History and Visual Culture from Engraving to Film and Television
- \*6. Historical Construction of Reality
- 11. Reinventing African History
- 12. Sacred Form: Literature and Poetry in India from Bronze Age to Premodern Times
- \*14. Interaction of Science and Society
- 52. Madness in the Enlightenment: Care and Cure of Mental Illness
- \*55. Culture and History of Utopias
- 62. Community and Self-Interest in History of American Culture
- 68. History of Social Thought
- 84. Los Angeles, 1900 to 2000: History of a 20th-Century City
- 90. French Revolution: Ideologies and Images
- 95. Art, Politics, and Social Change in 19th-Century England and France
- \*96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa
- \*130. How Cold War Was Played

#### Political Science

- 10. Introduction to Political Theory

### C2. SOCIAL ANALYSIS

#### Afro-American Studies

- M5. Social Organization of Black Communities

#### American Indian Studies

- 10. Introduction to American Indian Studies

#### Anthropology

- 8. Archaeology: An Introduction
- 9. Culture and Society
- 33. Culture and Communication
- M134. Cultural Construction of Gender and Sexuality: Homosexualities

#### Asian American Studies

- 21. Asians and Pacific Islanders in American Society

#### Communication Studies

- 10. Introduction to Communication Studies
- 88C. Lower Division Seminar: Future of Mass Communication

#### Economics

- 1, 2. Principles of Economics
- 5. Introductory Economics

#### Geography

- 3. Cultural Geography
- 4. Globalization: Regional Development and World Economy

#### History

- \*2A. Power, Ethics, and Technological Change
- \*2B. Social Knowledge and Social Power

#### Honors Collegium

- \*2. Comparative Genocide
- 7A, 7B. Urban Poverty and Public Policy in the U.S.
- 10. Social Classification and Categorization
- 17. Civil Rights, Women's Rights, Human Rights
- 23. Globalization
- \*24. 21st Century: Society, Environment, and Ethics
- 27. Theories of Exchange: Social Life of Gifts and Commodities
- \*29. Critical Vision: History of Art as a Social and Political Commentary
- \*30. Vietnam War and American Culture
- 36. Ethnicity and Social Class in America
- 37A. Ethnicity, Social Class, and Social Mobility in the U.S. and Other Societies
- 37B. Ethnicity, Social Class, and Social Mobility in Los Angeles
- \*43. Male Identity and Sexuality in Ancient Rome
- 48. Politics of Reproduction
- 49. Evidence in Law, Science, History, and Journalism
- 51. Childhood in Historical and Sociological Perspective
- 54. Human Lives: Psychocultural Perspective
- 58. Apartheid and Social Stratification in South Africa: Theory and Data
- 60. Immigration and New Second Generation
- 61. Social Theory in the 20th Century
- 70C. Culture, Ethnicity, Race, and Development: Multimedia and Multidisciplinary Approach
- 76. Race, Class, and Gender
- 82. Community and Labor Development from Ground Up
- \*87. Humans and Other Animals
- 89. Freud, Fairytales, and Feminism
- \*92. Genes, Genomics, and Internet
- \*94. Historic Roots of Healing Arts
- 97. Issues in American Foreign Policy: Methodology of Assessment
- M119. Nuclear Weapons: Critical Decisions
- 126. Making Citizens/Making Societies: Political Cultivation in Cross-Cultural Perspective
- 127. Citizenship, Leadership, and Service
- M129. Cultural Construction of Gender and Sexuality: Homosexualities
- \*130. How Cold War Was Played
- \*132. Bible as Political Theory

#### Lesbian, Gay, Bisexual, and Transgender Studies

- M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies
- M134. Cultural Construction of Gender and Sexuality: Homosexualities

#### Organismic Biology, Ecology, and Evolution

- \*11. Biomedical Research Issues in Minority Communities

#### Policy Studies

- M116. Nuclear Weapons: Critical Decisions

#### Political Science

- 20. World Politics
- 30. Introduction to Political Economy
- 40. Introduction to American Politics
- 50. Introduction to Comparative Politics

#### Psychology

- 10. Introductory Psychology
- \*88A. Lower Division Seminar: Stress, Adaptation, and Coping

#### Sociology

- 1. Introductory Sociology
- 2. Changing Society and Making History
- 3. Sociology of Everyday Life
- 4. Jobs and Careers: Sociological Approach
- M5. Social Organization of Black Communities

31. Dilemmas of Third World Development

### Women's Studies

10. Introduction to Women's Studies: Feminist Perspectives on Women and Society  
M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

## D. LIFE SCIENCES

Three courses from the following, one of which must have a laboratory and/or demonstration component:

### Anthropology

- 7 or 12 Human Evolution or Principles of Human Evolution: Comparative Analysis  
10. Principles of Human Evolution: Genetic Basis

### Earth and Space Sciences

- \*15. Introduction to Oceanography  
16. Major Events in History of Life  
17. Dinosaurs and Their Relatives  
\*20. Natural History of Southern California

### Geography

2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World  
5. People and the Earth's Ecosystems

### Honors Collegium

- \*5. Science and the Human Condition  
8. Communication among Organisms  
\*14. Interaction of Science and Society  
25. Human Genome: Prospects for a Super Race?  
\*57. Life and Sciences of Complexity  
63. Emerging Infections and Their Effects on Society: Past, Present, and Future  
70. Genetic Engineering in Medicine and Agriculture  
70A. Genetic Engineering in Medicine, Agriculture, and Law  
\*70B. Nonlife to Life, Microbes to Man: Nature Is Not Compartmentalized  
79. Genome: Blueprint, Controversy, Destiny  
\*87. Humans and Other Animals  
\*92. Genes, Genomics, and Internet  
\*94. Historic Roots of Healing Arts  
136. History of Evolutionary Views

### Life Sciences

1. Evolution, Ecology, and Biodiversity  
2. Cells, Tissues, and Organs  
2W. Cells, Tissues, and Organs

3. Introduction to Molecular Biology  
4. Genetics  
15. Life, Concepts, and Issues

### Microbiology and Molecular Genetics

6. Introduction to Microbiology  
7. Developments in Biotechnology  
12. Biological Threats to Society: Bioterrorism and Emerging Infections

### Molecular, Cell, and Developmental Biology

30. Biology of Cancer  
40. AIDS and Other Sexually Transmitted Diseases  
70. Genetic Engineering and Society  
80. The Green World: Plant Biology for Now and the Future  
88C. Lower Division Seminar: Frontiers of Molecular Biology – Historical Perspective  
88E. Lower Division Seminar: Genetics and Society – Current Status and Future Applications  
88F. Lower Division Seminar: Science and Scientists – Expectations and Realities

### Organismic Biology, Ecology, and Evolution

10. Plants and Civilization  
\*11. Biomedical Research Issues in Minority Communities  
12. Biodiversity and Extinction: Crisis and Conservation  
13. Evolution of Life  
21. Field Biology  
25. Marine Biology  
50. Desert Life

### Physiological Science

3. Introduction to Human Physiology  
5. Issues in Human Physiology: Diet and Exercise  
6. The Human Machine: Physiological Processes  
13. Introduction to Human Anatomy

### Psychology

15. Introductory Psychobiology  
\*88A. Lower Division Seminar: Stress, Adaptation, and Coping  
88B. Lower Division Seminar: Feeding, Food Fads, and Fat

Courses with a laboratory and/or demonstration component include Earth and Space Sciences 15, 16, 17, 20, Geography 2, 5, Honors Collegium 70A, 70B, 79, 92, Life Sciences 1, 2, 2W, 3, 4, 15, Microbiology and Molecular Genetics 7, Molecular, Cell, and Developmental Biology 80, Organismic Biology, Ecology, and Evolution 10, 21, 50, Physiological Science 3, 5, 13.

## SPECIAL GENERAL EDUCATION PROGRAMS

### General Education Clusters

General Education cluster classes, available to entering freshmen only, are one option for satisfying several GE requirements. The clusters span three quarters and are interdisciplinary team-taught courses designed to introduce students to multiple areas of knowledge. They focus on a common topic and are organized in such a way that students can explore how different disciplines converge and diverge in their approach to a particular problem.

Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program. Specific GE credit varies by cluster content. Inquire at the General Education Office, A265 Murphy Hall, or see <http://www.college.ucla.edu/ge>.

- M1A-M1B-M1C. Global Environment (Same as Environment M1A-M1B-M1C.)  
20A-20B-20C. Interracial Dynamics in American Culture, Society, and Literature  
21A-21B-21C. History of Modern Thought  
22A-22B-22C. Toward World Economy: Perils and Promise of Globalization

### Physical Sciences Sequence

Students who complete both Astronomy 8A and 8B (10 units total) receive GE credit for the entire physical sciences requirement (three courses), as well as the laboratory and/or demonstration component and the complementary course requirement. Students who complete only 8A receive GE credit for one physical sciences course, but do not receive credit for the laboratory and/or demonstration component nor the complementary course requirement.

## DEPARTMENT REQUIREMENTS

College of Letters and Science departments generally set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major and (2) the Major. Departments also set requirements for minors and specializations.

### Preparation for the Major

Admission to a major often requires completion of a set of courses known as Preparation for the Major. Students with majors in the life sciences must complete a set of preparatory courses known as the Life Sciences Core Curriculum. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

### The Major

A major in the College of Letters and Science consists of a group of coordinated upper division courses and is designated as departmental, interdepartmental, or individual. All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. Students who have been away from the University for several terms should consult with their major department or curriculum adviser concerning the requirements under which they are to graduate.

Each department sets its own major requirements; see the Curricula and Courses section of this catalog.

**Departmental Majors.** A departmental major consists of a minimum of 36 upper division units and a maximum of 60 upper division units. These majors are established and supervised by campus departments.

**Interdepartmental Majors.** An interdepartmental major consists of a minimum of 48 upper division units and a maximum of 75 upper division units of which no more than 32 units may be coursework in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

**Individual Majors.** If students have some unusual but definite academic interest for which no suitable major is offered at the University and have completed at least three terms of work (a minimum of 45 units) at the University with a grade-point average of 3.4 or better, they may petition for an individual major. The consent of the Honors and Undergraduate Programs Division and the assistance of a faculty adviser are required.

The individual major must consist of at least 48 and no more than 60 upper division units, a majority of which must be in departments offering a major in the College. A senior thesis of at least 8 but no more than 12 units is required. For details about individual majors, contact the Honors Programs Office, A311 Murphy Hall. ☎310-825-1553

**Double Majors.** Students in good academic standing may be permitted to have a double major consisting of departmental majors from two departments within the College. Both majors must be completed within the maximum limit of 228 units, and students must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. Students must designate one of the two majors as the principal one for the purpose of satisfying GE requirements. No more than 20 upper division units may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy GE requirements. Courses required for the secondary major (including preparation for the major) also may satisfy GE requirements.

### Minors and Specializations

Students may choose to pursue a minor to complement their major program of study. Minors consist of no fewer than seven courses (28 units) and no more than nine courses (36 units). Some minors also have admission requirements.

Specializations are sequences of supplemental courses that enhance work in a particular area.

For a list of minors and specializations see the chart at the beginning of this catalog; descriptions are in the Curricula and Courses section.

## POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations, including the following.

### Student Responsibility

Students should take advantage of academic support resources, but students are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

### Study List

The Study List is a record of classes that a student is taking for a particular term. The allowable Study List load is up to 18 units. After the first term, students may petition to enroll in as many as 20 units if they attained at least a B average the preceding term in a program of at least three graded courses.

First-term transfer students from any other campus of the University may carry excess units on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

### Progress toward the Degree

UCLA is a full-time institution, and it is expected that students complete their undergraduate degree requirements promptly. Normal progress toward graduation in four years is defined as the completion of 45 units per year, or 15 units per quarter.

The Degree Progress Report (DPR) is a record of degree requirements and the courses taken to fulfill them. Students are responsible for monitoring their progress toward the degree. They must read and understand the catalog, check the online catalog for updates, and consult regularly with the College and department counselors to confirm they are satisfying all program requirements. Department counselors advise students on progress and completion of the major requirements. Letters and Science counseling staff assist students with College requirements and degree planning. To assist in degree planning, Letters and Science Counseling provides DPRs on request. Students can also view DPRs through URSA or MyUCLA.

### Minimum Progress

According to UCLA Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms are placed on probation, and students who do not pass at least 32 units during three consecutive terms are subject to disqualification from registration at the University. Exceptions may be granted by the College due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

### Declaring a Major

Students are expected to select a major by the beginning of their junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet a special need (individual major).

Most entering freshmen are unsure about specific academic goals and request to be admitted to the College as “undeclared.” These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest.

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When they are ready to do so, they obtain approval on a

Petition for Declaration of Major from the department or interdepartmental degree committee which governs their intended major.

### Changing a Major

Students in good academic standing who wish to change their major may petition to do so provided they can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if students are on probation or have begun their last term.

Students who fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

### Reentering Students and Their Majors

Students returning to the University to resume their studies after an absence of several years may find their previous major area of study no longer available. They then must select a current major in which to complete their studies. Consult Letters and Science Counseling Services for assistance.

### Credit Limitations

The following credit limitations apply for all undergraduates enrolled in the College. In most cases units are not deducted until the final term before graduation. Students with questions should consult a counselor in the Letters and Science Counseling Services.

Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) from Undergraduate Admissions and Relations with Schools indicating the transferable units from former institutions; however, the following credit limitations may reduce the total number of transferred units that apply toward the degree in the College of Letters and Science. Consult a counselor in Letters and Science Counseling Services about these limitations.

**Advanced Placement Tests.** Advanced Placement (AP) Test credit may not be applied toward a degree unless students had less than 36 units of credit at the time of the examination(s). See the AP chart in the Undergraduate Study section of this catalog for UCLA course equivalents and credit allowed for GE requirements.

**College Level Examination Program.** Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor's degree.

**Community College Unit Limit.** After completing 105 quarter units toward the degree in all institutions attended, students are allowed no further unit credit for courses completed at a community college.

**Credit by Examination.** Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or UCLA Honors Programs. Students may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before they may petition for credit by examination in another course. Petitions for credit by examination (with fee) are available only through an appointment with a counselor in the Honors Programs Office, A311 Murphy Hall.

**Education Abroad Program.** Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the 8 units maximum allowable for the Intensive Language Program.

**Physical Education.** No more than 4 units in physical education activities courses may be applied toward the bachelor's degree.

**Foreign Language.** Credit is not allowed for completing a less advanced course in grammar and/or composition after students have completed a more advanced course. College credit for an international student's native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing. No credit is allowed for lower division courses.

**Independent Study Courses.** No more than 8 units of credit may be taken per term in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

**Performance Courses.** No more than 12 units of music and/or dance performance courses (Ethnomusicology 91A through 91Z, 191A through 191Z, Music C90A through 90P, and World Arts and Cultures 5 through 16, 56 through 65, C109A, C113A, C115) may be applied toward the bachelor's degree whether taken at UCLA or another institution.

**Physics Courses.** Any two or more courses from Physics 1A, 1AH, 6A, and 10 are limited to a total of 6 units of credit.

**ROTC Courses.** For students contracted in the Aerospace Studies Department, 36 units of aerospace studies credit may be applied toward the requirements for the bachelor's degree; for students contracted in the Military Science Department, 26 units of military science credit may be applied; for students contracted in the Naval Sci-

ence Department, 26 units of naval science credit may be applied.

**Statistics Courses.** No credit is allowed for more than one lower division course in statistics (Anthropology M80, Economics M40, Geography M40, Political Science 6, Sociology M18, Statistics 10, M11, M12) or for more than one sequence of such courses whether taken at UCLA or another institution.

**300- and 400-Level Courses.** No more than 8 units in the 300 and 400 series of courses may be applied toward the bachelor's degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

## HONORS

Letters and Science undergraduate students who achieve scholastic distinction may qualify for the following honors and programs.

### College Honors

The highest academic recognition the College of Letters and Science confers on its undergraduates is College Honors, which is awarded to graduating seniors who successfully complete the College Honors Program and who have an overall University of California grade-point average of 3.5 or better. The program provides exceptional Letters and Science undergraduates an opportunity to pursue individual excellence.

For details on the College Honors Program and entry requirements, see <http://www.college.ucla.edu/up>.

### Provost's Honors

The Provost's Honors list recognizes high scholastic achievement in any one term. The following criteria are used to note Provost's Honors on the student records: (1) a 3.75 GPA in any one term with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Provost's Honors are automatically recorded on the transcript.

### Departmental Honors

Individual departments and programs in the College offer departmental honors programs. Admission and curricular requirements vary according to the department or program. See the Curricula and Courses section of this catalog for details, and consult the departmental adviser about procedures and arrangements. Students who successfully complete the requirements graduate with departmental honors.

## Latin Honors

Students who have achieved scholastic distinction may be awarded the bachelor's degree with Latin honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation that places them in the top five percent of College of Letters and Science graduates (GPA of 3.844 or better) for summa cum laude, the next five percent (GPA of 3.736 or better) for magna cum laude, and the next 10 percent (GPA of 3.588 or better) for cum laude. Coursework taken on the Education Abroad Program is applied toward Latin honors at graduation. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year (fall, winter, spring, summer) determine eligibility. Students should consult their Degree Progress Report or the *Schedule of Classes* for the most current calculations of Latin honors.

## Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously. Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and eligibility to participate in the College Honors Program. Students must also have at least one term's coursework remaining at UCLA. To obtain both the bachelor's and master's degrees students must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. Students interested in becoming Departmental Scholars should consult their department well in advance of application dates for graduate admission. For further information, consult the Honors Programs Office in A311 Murphy Hall.

## GRADUATE STUDY

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master's and doctoral degrees. See the Curricula and Courses section for introductory information and procedures. For complete degree requirements, see *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu/publications.html>.

For information on requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

# GRADUATE SCHOOL OF EDUCATION AND INFORMATION STUDIES

**Aimée Dorr, Dean**

UCLA  
2320 Moore Hall  
Box 951521  
Los Angeles, CA 90095-1521

(310) 825-8326  
<http://www.gseis.ucla.edu>

The Graduate School of Education and Information Studies (GSEIS) develops expertise in both old and new methods of information storage and retrieval and brings innovative approaches in educational technology and information access to the schools and classrooms of the state and nation. In addition, GSEIS faculty members engage in research, teaching, and program development in the areas of management and leadership of schools and libraries, information policy, and information systems designs in organizations of all kinds.

Through its scholarship, its graduate training programs, and its partnerships with schools and educational professionals, GSEIS honors its commitment to improve practice in schools, universities, and libraries, enhance theoretical and applied research, expand the role of the university in policy creation, and advance the careers of professional leaders and specialists.

GSEIS is committed to the highest quality professional education and to the application of research to the challenges facing a diverse and increasingly urbanized world.

---

*The Graduate School of Education and Information Studies is committed to understanding and improving teaching and learning, educational practice, information policy, and information systems in a diverse society*

---

## DEPARTMENTS AND PROGRAMS

The school has two departments—the Department of Education and the Department of Information Studies. Together, they embody the school's commitment to understand and improve teaching and learning, educational practice, information policy, and information systems in a diverse society.

Research and doctoral training programs bring together faculties committed to expanding the range of knowledge in education, information science, and associated disciplines. The professional training programs develop librarians, teachers, and administrators within the enriched context of a research university.

## DEGREES

The school offers the following degrees:

Education (M.A., M.Ed., Ed.D., Ph.D.)

Educational Administration (Joint Ed.D. with UC Irvine)

Library and Information Science (M.L.I.S., Ph.D.)

Special Education (Joint Ph.D. with California State University, Los Angeles)

## ADMISSION

Admission criteria established by the UCLA Graduate Division require a bachelor's degree from a regionally accredited institution comparable in standard and content to a bachelor's degree from the University of California. A scholastic average of B (3.0 on a 4.0 scale) or better is required—or its equivalent if the letter grade system is not used—for the last 60 semester units or last 90 quarter units of undergraduate study and in any postbaccalaureate study. Further requirements for international students are explained in the Graduate Study section. See <http://www.gdnet.ucla.edu/gasaa/admissions>.

Graduate School of Education and Information Studies departments set additional admission requirements that are explained in the Curricula and Courses section of this catalog.

## DEGREE REQUIREMENTS

Specific degree requirements vary according to the department and program. See the departmental listings in the Curricula and Courses section for details or refer to *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu/publications.html>.

## RESEARCH CENTERS

The centers outlined below provide GSEIS with valuable resources that support school programs and research. See <http://www.gseis.ucla.edu/research>.

### Center X

Backed by the extraordinary talent of UCLA, K-12 schools, community colleges, and the diverse cultural and language communities of Los Angeles, Center X seeks to demonstrate that schools and teaching for low-income, minority, or limited English proficient children can be rich, rigorous, socially just, and caring.

The center draws from the resources of GSEIS, including the school's contributions to education scholarship, its national research centers, and its schooling research and policy analysis programs.

Center X transforms UCLA's pre-service Teacher Education Program, its professional development programs for practicing professional educators, and its Ed.D. program in educational leadership into a new configuration of collaborative activities among UCLA faculty, K-12 teachers, and community college educators. It provides rigorous professional education as it seeks to improve urban schooling for Los Angeles children. See <http://www.centerx.gseis.ucla.edu>.

### Center for the Study of Evaluation

The Center for the Study of Evaluation (CSE) is devoted to educational research, development, training, and dissemination. For over 25 years, CSE has been at the forefront of efforts to improve the quality of education in America through systematic evaluation practices. As it helps pioneer valid and sensitive evaluation and testing techniques and promotes the use of evaluation for reasoned decision making, CSE ensures the best use of student time and taxpayer money.

Focusing on questions basic to public education and its accountability, CSE provides leadership to the field in these areas by creating new methodologies for evaluating educational quality; creating new designs for assessing student learning; promoting the sound use of assessment data; setting the national research agenda; influencing practice. See <http://www.gseis.ucla.edu/research/cse.html>.

### Center for Research on Evaluation, Standards, and Student Testing

Funded by the U.S. Department of Education and the Office of Educational Research and Improvement, the National Center for Research on Evaluation, Standards, and Student Testing (CRESST) conducts research on topics related to K-12 educational testing. Research is dispersed in technical reports, newsletters, videos, assessments, scoring rubrics, guidebooks, and research articles. See <http://www.cse.ucla.edu>.

## Center for Entrepreneurial Leadership Clearinghouse on Entrepreneurship Education

The Center for Entrepreneurial Leadership Clearinghouse on Entrepreneurship Education (CEL-CEE) is a joint project of UCLA and the Kauffman Center for Entrepreneurial Leadership. CEL-CEE acquires information from diverse sources—journal articles, websites, syllabi, conferences, curriculum guides, government publications, videos, books, and software—that pertain to entrepreneurship education and related topics from K-12 to postgraduate studies and from rural America to urban Asia. The CELCEE staff provides abstracts of the resources, which are indexed and organized in an online database that meets all national Library of Education standards for web pages. See <http://www.celcee.edu>.

## Urban Education Studies Center

The Urban Education Studies Center (UESC) provides a unique setting where nationally recognized scholars work together with teachers and administrators to improve education for the nation's children. Recognizing the dramatic changes in the demographics of the American classroom and the challenges they present to public schools, the center combines the resources of UCLA and its laboratory elementary school to foster collaboration between researchers and practitioners who search for solutions to the problems facing schools as well as strategies for capitalizing on diversity.

Research recognizes the role that family and the community play in children's lives and how pressures and changes in these institutions affect teaching and learning. UESC is committed to developing knowledge of how schools and other institutions can be improved to meet the changing needs of children and society. See <http://www.gseis.ucla.edu/research/uesc>.

## UCLA Online Institute for Cyberspace Law and Policy

With the growth and development of cyberspace law as a separate discipline, a dynamic new body of scholarship has emerged. The Online Institute's Cyberspace Law Bibliography—updated regularly since 1995—provides an overview of recent books and journal articles in this area and includes a growing number of links to the works themselves. See <http://www.gseis.ucla.edu/iclp>.

# HENRY SAMUELI SCHOOL OF ENGINEERING AND APPLIED SCIENCE

**A.R. Frank Wazzan, Dean**

UCLA  
6426 Boelter Hall  
Box 951600  
Los Angeles, CA 90095-1600  
(310) 825-2826  
<http://www.seas.ucla.edu>

Since its inception as the College of Engineering in 1945, the Henry Samueli School of Engineering and Applied Science (HSSEAS) has been on the cutting edge of technological advances. With strong programs in traditional engineering, the school also advances research in the evolving fields of biomedical engineering, wireless communications and networking, and micromachines.

Today's rapidly developing technologies require engineers to adapt quickly to meet society's needs and maintain U.S. leadership in the marketplace. Laboratory breakthroughs at HSSEAS translate into new technologies and products, as faculty members collaborate with their counterparts in industry on everything from applied research to technology goal setting. The school's educational mission nurtures innovation and provides a balanced approach to teaching and research.

---

*With strong programs in traditional engineering, the Henry Samueli School of Engineering and Applied Science also advances research in the evolving fields of biomedical engineering, wireless communications and networking, and micromachines*

---

Henry Samueli School of Engineering and Applied Science students receive their professional education through classroom investigation and real-world applications. The curriculum provides exposure to the humanities, social sciences, and fine arts and recognizes the responsibility of engineers to create, protect, and manage technology with due regard for ethics and human values. Students committed to a high standard of achievement are invited to contribute to the great success of engineering at UCLA.

## DEPARTMENTS AND PROGRAMS

The Henry Samueli School of Engineering and Applied Science has six departments and two inter-departmental programs offering study in aerospace engineering, biomedical engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, manufacturing engineering, materials engineering, and mechanical engineering—all of which are accredited by the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering programs. An additional program in computer science is accredited by the nationally recognized accrediting body for computer science programs—the Computing Sciences Accreditation Board (CSAB)—as is the program in computer science and engineering.

For specific programs, see the department information in Curricula and Courses or refer to the school *Announcement* available from the Office of Academic and Student Affairs, 6426 Boelter Hall.

## DEGREES

The school offers the following degrees:

Aerospace Engineering (B.S., M.S., Ph.D.)  
Biomedical Engineering (M.S., Ph.D.)  
Chemical Engineering (B.S., M.S., Ph.D.)  
Civil Engineering (B.S., M.S., Ph.D.)  
Computer Science (B.S., M.S., Ph.D.)  
Computer Science and Engineering (B.S.)  
Electrical Engineering (B.S., M.S., Ph.D.)  
Engineering (M.Engr., Engr.)  
Engineering and Applied Science (Graduate Certificate of Specialization)  
Integrated Manufacturing Engineering (M.Engr.)  
Manufacturing Engineering (M.S.)  
Materials Engineering (B.S.)  
Materials Science and Engineering (M.S., Ph.D.)  
Mechanical Engineering (B.S., M.S., Ph.D.)

## UNDERGRADUATE ADMISSION

Applicants for admission to the school must satisfy the University admission requirements as outlined in the Undergraduate Study section. Students must select a major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Applicants are accepted at either the freshman or junior level.

### Admission as a Freshman

Freshman applicants must satisfy the examination requirement described in the Undergraduate Study section and should take required tests by the December test date, since scores are part of the review process. Instruct the testing agencies to send results directly to UCLA Undergraduate Admissions and Relations with Schools.

Applicants seeking admission to the school in freshman standing must also satisfy the University admission requirements, as follows:

United States History (one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government)	1 year
English	4 years
Mathematics	4 years
Physics	1 year
Chemistry	1 year
Foreign language	2 years
Other college preparatory requirements	2 years

**Credit for Advanced Placement Tests.** Students may fulfill part of the school requirements with credit allowed at the time of admission for College Board Advanced Placement (AP) Tests with scores of 5, 4, or 3. Students with AP Test credit may exceed the 213-unit maximum by the amount of this credit. AP Test credit for freshmen entering in Fall Quarter 2001 fulfills HSSEAS requirements as indicated on the school AP chart in the Undergraduate Study section of this catalog.

Students who have completed 36 quarter units after high school graduation at the time of the examination receive no AP Test credit.

### Admission as a Junior

Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, computer programming, English composition, and the recommended engineering courses before transferring to UCLA. Transfer students who have completed the recommended lower division program in engineering at California community colleges normally complete the remaining requirements for one of the B.S. degrees in six terms (two academic years) of full-time study. Students who select certain majors, such as Computer Science and Engineering or Chemical Engineering, may be required to complete additional lower division courses for the major sequence.

### Lower Division Requirements

Applicants to the school in junior standing should have completed 90 quarter units (60 semester units) in good standing, including the following lower division minimum subject requirements:

1. Chemistry courses equivalent to UCLA's Chemistry and Biochemistry 20A, 20B, 20L (only Chemistry and Biochemistry 20A is required for the Computer Science and Engineering degree; the Computer Science degree does not require chemistry; the Chemical Engineering curriculum also requires Chemistry and Biochemistry 30A, 30AL, 30B, 30BL, which do not need to be taken prior to admission to UCLA)
2. Mathematics courses equivalent to UCLA's Mathematics 31A, 31B, 32A, 32B, 33A, 33B

3. Physics courses equivalent to UCLA's Physics 1A, 1B, 1C, 4AL, 4BL, depending on curriculum selected
4. Engineering courses equivalent to Civil and Environmental Engineering 15 or Computer Science 31 or Mechanical and Aerospace Engineering 20
5. Additional life sciences (4 units), English composition (5 units), and humanities/social sciences courses (total of 16 quarter units minimum) equivalent to HSSEAS general education (GE) courses

Transfer students must also complete a course equivalent to UCLA's English Composition 3 and a second more advanced course in English composition.

All lower division requirements should be completed by the end of the spring term prior to anticipated enrollment at UCLA.

### Transfer Credit

Students transferring to the school from institutions that offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

A course in digital computer programming, using a higher-level language such as FORTRAN, PASCAL, C, or C++, satisfies the computer programming requirement. Applicants to majors in Computer Science, Computer Science and Engineering, and Electrical Engineering should take C++.

Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil and Environmental Engineering 108, and Materials Science and Engineering 14 requirements respectively. Check with the Office of Academic and Student Affairs.

After students have completed 105 quarter units (regardless of where the units are completed), they do not receive unit credit or subject credit for courses completed at a community college.

## UNDERGRADUATE DEGREE REQUIREMENTS

Henry Samuelli School of Engineering and Applied Science students must meet three types of requirements for the Bachelor of Science degree:

1. University requirements
2. School requirements
3. Department requirements

### UNIVERSITY REQUIREMENTS

The University of California has two requirements that undergraduates must satisfy in order to graduate: (1) Subject A or English as a Second Language and (2) American History and Institutions. See Degree Requirements in the Undergraduate Study section for details.

## STRUCTURE OF A DEGREE

### University Requirements

1. Subject A or English as a Second Language
2. American History and Institutions

### HSSEAS School Requirements

1. Unit
2. Scholarship
3. Academic Residence
4. English Composition
5. General Education

### Department Requirements

1. Major Field Courses
2. Core Courses
3. Mathematics Courses

Courses that do not satisfy University, school, or department requirements are referred to as electives and are used to meet the minimum unit requirement for graduation.

## SCHOOL REQUIREMENTS

The school has five requirements that must be satisfied for the award of the degree.

### Unit Requirement

The minimum units allowed for HSSEAS students is between 180 and 202, depending on the program. The maximum allowed is 213 units.

After 213 quarter units, enrollment may not normally be continued in the school. Students who are approaching the 213 unit limit should see the degree check counselor in 6426 Boelter Hall. This regulation does not apply to Departmental Scholars.

### Scholarship Requirement

Students must earn at least a C (2.0) grade-point average in all courses taken at any UC campus. In addition, at least a 2.0 grade-point average must be achieved in total upper division required courses and total upper division engineering courses. See a counselor in 6426 Boelter Hall for details.

### Academic Residence Requirement

Of the last 48 units completed for the bachelor's degree, 36 must be earned in residence in HSSEAS on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

### English Composition Requirement

Students must attain a minimum grade of C to satisfy the English Composition 3 requirement, which must be met by the end of the second year of enrollment at UCLA (a grade of C- does not satisfy this requirement). Undergraduates who have not taken (or otherwise satisfied the requirement for) English Composition 3 at the time they are admitted must complete the course at UCLA during Fall, Winter, Spring, or Summer term. Students may also com-

plete the equivalent to English Composition 3 at any other UC campus during the Summer term only.

## General Education Requirements

HSSEAS general education (GE) course requirements must be selected from the GE list at <http://www.seasoasa.ucla.edu/ge.html> as follows:

1. Six courses from the humanities and social sciences (eight courses for students in the Computer Science major), with at least two courses from each category
2. One life sciences course (two courses for students in the Computer Science major; this requirement is automatically satisfied for Chemical Engineering majors)

For item #1, at least three courses must be in the same academic department or must otherwise reflect coherence in subject matter. Of the three, at least two must be upper division courses selected from the approved HSSEAS GE list.

One language course at level four or above may be applied toward the humanities section of the HSSEAS GE requirement. See an academic counselor in 6426 Boelter Hall about language courses.

Students may take one course per term on a Passed/Not Passed basis if they are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. Only GE courses (not English Composition 3 nor the ethics course) may be taken on a Passed/Not Passed basis. For details on P/NP grading, see Grading in the Academic Policies section or consult the Office of Academic and Student Affairs.

## DEPARTMENT REQUIREMENTS

Bachelor's degree requirements include the following categories, depending on the program selected:

1. Fourteen to 21 engineering major field courses (56 to 84 units)
2. One to 10 engineering core courses (4 to 40 units)
3. One to three upper division mathematics courses (4 to 12 units)

Computer Science, Computer Science and Engineering, and Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

Lists of courses approved to satisfy specific curricular requirements are available from the Office of Academic and Student Affairs.

## POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations, including the following:

## Student Responsibility

Students should take advantage of academic support resources, but students are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

## Study List

The Study List is a record of classes that a student is taking for a particular term. It is the student's responsibility to present a Study List that reflects satisfactory progress toward the degree. Study Lists or programs of study that do not comply with the standards set by the faculty may result in enforced withdrawal from the University or other academic action. Study Lists require approval of the dean of the school or a designated representative.

Students are expected to enroll in at least 12 units each term. Students enrolling in less than 12 units must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. Students may not enroll in more than 18 units per term unless an Excess Unit Petition is approved in advance by the dean.

## Minimum Progress

Full-time HSSEAS undergraduate students must complete a minimum of 36 units in three consecutive terms in which they are registered.

## Credit Limitations

**Advanced Placement Tests.** Some portions of AP Test credit are evaluated by corresponding UCLA course number. If students take the equivalent UCLA course, a deduction of UCLA unit credit is made prior to graduation. See the HSSEAS AP chart in the Undergraduate Study section.

**College Level Examination Program.** Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor's degree.

**Foreign Language.** No credit is granted toward the bachelor's degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

## COUNSELING SERVICES

New undergraduates must have their course of study approved by an academic counselor. After the first term, curricular and career advising is accomplished on a formal basis. Students are assigned a faculty adviser in their particular specialization in their sophomore year or earlier.

In addition, undergraduates are assigned, by major, to an academic counselor in the Office of Academic and Student Affairs who provides them with advice regarding general requirements for the degrees and University and school regulations and

procedures. It is the students' responsibility to periodically meet with their academic counselor in the Office of Academic and Student Affairs, as well as with their faculty adviser, to discuss curriculum requirements, programs of study, and any other academic matters of concern.

Students normally follow the curriculum in effect when they enter the school. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

Undergraduates may use the computerized HSSEAS Academic Program Planner, an interactive system that lets students know if their programs meet the requirements for graduation. Students beginning upper division coursework in the major are required to submit an Academic Program Proposal to the Office of Academic and Student Affairs for approval by the associate dean.

Academic counselors in the Office of Academic and Student Affairs assist students with University procedures and answer questions related to general requirements.

## HONORS

Undergraduate HSSEAS students who achieve scholastic distinction may qualify for the following honors.

### Dean's Honors List

Students following the engineering curricula are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of at least 15 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7. Students are not eligible for the Dean's Honors List if they receive an Incomplete (I) or Not Passed (NP) grade or repeat a course. Only courses applicable to an undergraduate degree are considered toward eligibility for Dean's Honors.

### Latin Honors

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places them in the top five percent of the school (GPA of 3.833 or better) for summa cum laude, the next five percent (GPA of 3.715 or better) for magna cum laude, and the next 10 percent (GPA of 3.512 or better) for cum laude. See the *Schedule of Classes* for the most current calculations of Latin honors.

Based on grades achieved in upper division courses, engineering students must have a 3.833 grade-point average for summa cum laude, a 3.715 for magna cum laude, and a 3.512 for cum laude. For

all designations of honors, students must have a minimum 3.25 grade-point average in their major field courses. To be eligible for an award, students should have completed at least 80 upper division units at the University of California.

### Tau Beta Pi

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs to foster a spirit of liberal culture in engineering colleges.

### Departmental Scholars

Exceptionally promising juniors or seniors may be nominated as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. For details, consult the Office of Academic and Student Affairs in 6426 Boelter Hall.

## SPECIAL PROGRAMS

### Extracurricular Activities

Students are encouraged to participate in UCLA extracurricular activities, especially those relevant to engineering, such as the student engineering society (the Engineering Society, University of California), student publications, and programs of the technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school's Executive Committee.

### Women in Engineering

Among HSSEAS students, women make up approximately 21 percent of the undergraduate and 16 percent of the graduate enrollment. Today's opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a "males only" field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual résumé book to aid women students in finding jobs and presents a career day for women high school students.

### Continuing Education

Continuing education in engineering is developed and administered by the UCLA Extension (UNEX)

Department of Engineering, Information Systems, and Technical Management in close cooperation with HSSEAS. The department offers evening classes, short courses, certificate programs, special events, and education and training at the workplace. The office (540 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. Call (310) 825-4100 for information systems class programs, (310) 825-3344 for short course programs, (310) 825-0328 for engineering classes, and (310) 825-3858 for technical management programs. See <http://www.uclaextension.org>.

## GRADUATE ADMISSION

In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test of the Graduate Record Examination (GRE). In some cases applicants are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science. Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master's degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

Graduate students without adequate preparation may be admitted provisionally and may be required to take additional coursework which may not be applied toward the degree. After students arrive at UCLA, the adviser helps them plan a program to remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Obtain admission forms, including a department supplement to the application, by writing to the department of interest, Henry Samueli School of Engineering and Applied Science, UCLA, Los Angeles, CA 90095. Students may also apply online at <http://www.seas.ucla.edu>. From there connect to the site of the preferred department or program and go to the online graduate application.

## GRADUATE DEGREE REQUIREMENTS

Graduate degree information is updated annually in *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu/publications.html>.

## Master of Science Degrees

No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199, Civil and Environmental Engineering 106A, 108, 199, Computer Science M152A, M152B, M171L, 199, Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199, Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199, Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with the graduate adviser on departmental requirements and restrictions.

### Major Fields or Subdisciplines

The M.S. program focuses on one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (for example, manufacturing engineering in the Department of Mechanical and Aerospace Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines. Students are free to propose to the school any other field of study, with the support of their adviser.

### Course Requirements

A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from the department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in HSSEAS. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

### Thesis Plan

The thesis must either describe some original piece of research that students have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in their major field of study. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

## Comprehensive Examination Plan

The comprehensive examination, which is offered every term, is required in written form only. The comprehensive examining committee may conduct an oral query after review of the written examination. In case of failure, students may be reexamined once with the consent of their departmental graduate adviser.

## Cooperative Degree Program

A joint degree program between HSSEAS and the John E. Anderson Graduate School of Management allows students to earn two master's degrees simultaneously: the M.B.A. and the M.S. in Computer Science. Contact the Office of Academic and Student Affairs for details.

## Master of Engineering Degree

The Master of Engineering (M.Engr.) degree is granted to graduates of the interdepartmental Integrated Manufacturing Engineering (IME) Program. For information, contact the Student Services Office, 48-121 Engineering IV, UCLA, Box 951597, Los Angeles, CA 90095-1597. ☎310-825-7780

The M.Engr. degree is also granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the HSSEAS Office of Academic and Student Affairs, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601. ☎310-825-1704

## Engineer Degree

HSSEAS offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably, so that a student in the Ph.D. program may exit with an Engineer degree or pick up the Engineer degree en route to the Ph.D. degree; similarly, a student in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

## Doctoral Degrees

The Ph.D. programs prepare students for advanced study and research in the major areas of engineering and computer science. All candidates must fulfill the minimum requirements of the Graduate Division. Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.

### Fields of Study

Established fields of study for the Ph.D. are listed below. With the support of an adviser, students may propose any other field of study to their department. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.

**Biomedical Engineering Interdepartmental Program.** Bioacoustics, speech, and hearing; biocybernetics; biomechanics, biomaterials, and tissue engineering; biomedical instrumentation; biomedical signal and image processing; molecular and cellular bioengineering; neuroengineering

**Chemical Engineering Department.** Chemical engineering

**Civil and Environmental Engineering Department.** Environmental engineering, geotechnical engineering, structures (structural mechanics and earthquake engineering), water resource systems engineering

**Computer Science Department.** Artificial intelligence, computer networks, computer science theory, computer system architecture, scientific computing (biomedical systems, physical systems), software systems

**Electrical Engineering Department.** Applied mathematics (established minor field only), communications and telecommunications, control systems, electromagnetics, engineering optimization/operations research, integrated circuits and systems, photonics and optoelectronics, plasma electronics, signal processing, solid-state electronics

**Materials Science and Engineering Department.** Ceramics and ceramic processing, electronic materials, structural materials

**Mechanical and Aerospace Engineering Department.** Applied mathematics (established minor field only), applied plasma physics and fusion engineering (minor field only), dynamics, fluid mechanics, heat and mass transfer, manufacturing and design, microelectromechanical systems (MEMS), structural and solid mechanics, systems and control

## Graduate Certificate of Specialization

A Certificate of Specialization is available in all areas, except computer science, offered by HSSEAS. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applica-

ble to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed in HSSEAS for a Certificate of Specialization may subsequently be applied toward master's and/or doctoral degrees.

## JOHN E. ANDERSON GRADUATE SCHOOL OF MANAGEMENT

**Bruce G. Willison, Dean**

UCLA  
110 Westwood Plaza, Suite F407  
Box 951481  
Los Angeles, CA 90095-1481

(310) 825-6121  
<http://www.anderson.ucla.edu/>

In today's rapidly changing global marketplace, it is essential that professional managers be conversant with the latest concepts and principles of management. At UCLA's John E. Anderson Graduate School of Management, which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the

*The Anderson School of Management, prepares students to become first-rate managers with specialized skills and a broad understanding of the general economic, business, and managerial environment*

private, public, or not-for-profit sector.

Specifically, the Anderson School offers the business community a wide range of higher education programs that provide state-of-the-art informa-

tion in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in fundamental and cutting-edge research in all fields of management and by educating scholars who can continue to create this new knowledge.

John E. Anderson Graduate School of Management students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.

The school offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school also offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

### DEGREES

The school offers the following degrees:

- Master of Business Administration (M.B.A.)
- Master of Science (M.S.)
- Doctor of Philosophy (Ph.D.)

### RESEARCH CENTERS

Interdisciplinary research centers provide valuable resources that support school programs. See <http://www.anderson.ucla.edu/icenters>.

### Business Forecasting Project

Using large-scale econometric models, the Business Forecasting Project makes quarterly and long-term forecasts of the national and California economies, focusing on unemployment and employment by three-digit SIC code. Results of the forecasts are announced at conferences attended by members of the media and leaders in business and government. See <http://www.anderson.ucla.edu/research/forecast>.

## Center for Health Services Management

The Center for Health Services Management is operated jointly by the Anderson School and the School of Public Health. Organized as a partnership with the health services management community, the center's activities are designed to be supportive of management practitioners in the health care community. The center offers management education programs uniquely suited to managers and executives from health care organizations. In addition, it conducts research carefully identified to further the practice of management of health service organizations. Programs have included a top management course for Cedars-Sinai Medical Center and a management development program for diagnostic radiologists. See <http://www.ph.ucla.edu/hs/hsmgt.html>.

## Center for International Business Education and Research

The Center for International Business Education and Research is dedicated to enhancing the teaching and understanding of issues related to the global marketplace. The center actively increases international business research across the campus through the direct funding of faculty research travel, graduate student research assistantships, and academic conferences. See <http://www.anderson.ucla.edu/research/ciber>.

## Center for Management in the Information Economy

The Center for Management in the Information Economy focuses on current management processes and practices being used in businesses and organizations involved in the creation, management, and delivery of digital information as a key component of their products and services. The center acts as a forum and catalyst to relate the capabilities of the academic community to the needs of the business community. See <http://www.anderson.ucla.edu/research/cmie>.

## Harold Price Center for Entrepreneurial Studies

The Harold Price Center for Entrepreneurial Studies provides academic and extracurricular activities that prepare M.B.A. candidates for the challenge of business management in entrepreneurial environments. These efforts include teaching and curriculum development, student activities, and scholarly research. The interdisciplinary curriculum draws on faculty expertise in many areas. See <http://www.anderson.ucla.edu/research/esc>.

## Human Resources Round Table

The Human Resources Round Table is affiliated with the Anderson School and the UCLA Institute of Industrial Relations. The program's mission is to enhance the profession of human resource

management by linking the academic and practitioner human resource management communities. See <http://www.sppsr.ucla.edu/harrt>.

## Information Systems Research Program

The Information Systems Research Program was established to recognize the importance of maintaining close ties between the activities of practicing professionals and the activities of academics in the information systems area, while at the same time raising money to support education and research activities in the information systems area. The senior managers and technical professionals who belong to the Information Systems Associates participate in a number of activities to facilitate professional interchange and networking, such as the Information Systems Executive Leadership annual award dinner and the annual Information Systems Associates Symposium. See [http://www.anderson.ucla.edu/acad\\_unit/info\\_sys/research/isresearch.htm](http://www.anderson.ucla.edu/acad_unit/info_sys/research/isresearch.htm)

## Leadership, Education, and Development Program

The Leadership, Education, and Development (LEAD) program sponsors four-week residential summer institutes at outstanding business schools, including the Anderson School, and recruits qualified African American, Hispanic, and Native American students between their junior and senior years of high school. LEAD introduces participants to the world of business, economics, finance, and management through a carefully tailored curriculum involving University faculty, guest lecturers from industry, and corporate field trips.

## Office of Executive Education

Lifelong learning plays a critical role in the success of today's business leaders. The Anderson School's Office of Executive Education Programs offers more than 40 innovative open enrollment and customized programs that address complex and rapidly changing business issues. The Executive Program covers such diverse areas as strategic planning, organizational design, and competitive positioning. See <http://www.anderson.ucla.edu/programs/execed>.

## Riordan Programs

The Riordan Programs were established by the Riordan Foundation to address the demand for trained managers who can provide vision and leadership in culturally diverse communities. The programs' success results from the collaborative efforts of Anderson School faculty, students, and alumni, and corporate leaders throughout the community. Together these individuals encourage underrepresented students to pursue higher education in management and to become future leaders in business and society. See <http://www.anderson.ucla.edu/community/riordan>.

# SCHOOL OF THE ARTS AND ARCHITECTURE

**Daniel Neuman, Dean**

UCLA  
303 East Melnitz Building  
Box 951427  
Los Angeles, CA 90095-1427  
(310) 206-6465  
<http://www.arts.ucla.edu>

The School of the Arts and Architecture at UCLA plays a vital role in the cultural and artistic life of the campus and community. Courses and degree programs in six departments provide students

with unparalleled opportunities to learn from and interact with faculty members who rank among the most innovative artists and architects of our time.

A balance of practice and theory, built on the academic foundation of the liberal arts, assures the understanding and appreciation of both the interdependence and integration of creativity, performance, and research. In educating the whole person,

the school strives to empower and inspire the next generation of citizens to serve as cultural leaders of the twenty-first century.

Also under the School of the Arts and Architecture umbrella is an impressive array of public arts units, including the UCLA Performing Arts, one of the largest arts presenters in the nation, UCLA Hammer Museum, which houses the Grunwald Center for the Graphic Arts, the UCLA Fowler Museum of Cultural History, and the renowned Murphy Sculpture Garden. These institutions offer extraordinary access to leading anthropological, historical, and contemporary visual arts exhibitions and collections, and presentations by the world's most outstanding performing artists.

In addition to providing a rich and diverse environment on campus, the school offers students the opportunity to participate in community outreach programs designed around concerts, exhibitions, symposia, and dance productions presented in cooperation with groups throughout the greater Los Angeles area.

## DEPARTMENTS AND PROGRAMS

The six departments of the school are integral to the rich and varied cultural life of the campus. The Department of Architecture and Urban Design provides students with a unique opportunity to study buildings, cities, and their interde-

pendence in one of the most structurally and ethnically diverse cities in the world. Students in the Department of Art learn to understand the broad panorama of the visual arts emphasizing experimentation. The Department of Design | Media Arts focuses on electronic and digital imagery in visual communication design. Students in the Department of Ethnomusicology study the performance and context of music-making from a global perspective, and the Department of Music offers concentrations in composition, music education, performance, and jazz studies. The Department of World Arts and Cultures offers an innovative curriculum focused on the interdisciplinary and intercultural investigation of performance, the arts, and dance, and on establishing connections between cultural theory and artistic practice.

School brochures are available from the Office of Recruitment and Outreach, 303 East Melnitz Building, UCLA, Box 951427, Los Angeles, CA 90095-1427. ☎310-825-9708

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall. ☎310-825-8328

## DEGREES

The school offers the following degrees:

Architecture (M.Arch. I, M.Arch. II, M.A., Ph.D.)  
Art (B.A., M.A., M.F.A.)  
Culture and Performance (M.A., Ph.D.)  
Dance (M.A., M.F.A.)  
Design | Media Arts (B.A., M.A., M.F.A.)  
Ethnomusicology (B.A., M.A., C.Phil., Ph.D.)  
Music (B.A., M.A., M.M., C.Phil., D.M.A., Ph.D.)  
World Arts and Cultures (B.A.)

New students are not being admitted to the M.A. in Design | Media Arts or the M.A. in Dance at this time.

## UNDERGRADUATE ADMISSION

In addition to the University of California Undergraduate Application, departments in the School of the Arts and Architecture require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to students on receipt of their application. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.

## UNDERGRADUATE DEGREE REQUIREMENTS

School of the Arts and Architecture students must meet three types of requirements for the Bachelor of Arts degree:

1. University requirements
2. School requirements
3. Department requirements

*A balance of practice and theory, built on the academic foundation of the liberal arts, assures the understanding and appreciation of both the interdependence and integration of creativity, performance, and research*

## UNIVERSITY REQUIREMENTS

The University of California has two requirements that undergraduates must satisfy in order to graduate: (1) Subject A or English as a Second Language and (2) American History and Institutions. See Degree Requirements in the Undergraduate Study section for details.

School of the Arts and Architecture students enrolled in English as a Second Language 33A, 33B, 33C, 35 must take the courses for a letter grade.

## SCHOOL REQUIREMENTS

The School of the Arts and Architecture has requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, general education, and upper division nonmajor.

### Unit Requirement

Students must complete for credit, with a passing grade, no less than 180 units and no more than 216 units, of which at least 64 units must be upper division courses (numbered 100 through 199). Credit for 199 courses is limited to 16 units, 8 of which may be applied to the major. All 199 courses must be taken for a letter grade.

### Scholarship Requirement

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper

division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

### Academic Residence Requirement

Students are “in residence” while enrolled and attending classes at UCLA as a major in the School of the Arts and Architecture. Of the last 45 units completed for the bachelor’s degree, 35 must be earned in residence in the School of the Arts and Architecture. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

### General Education Requirements

The general education (GE) requirements of the school include (1) writing, (2) foreign language, (3) computing/mathematics/statistics, and (4) science/social science/humanities courses.

### Writing Requirement

To satisfy school writing requirements students must complete both the English Composition and Rhetoric and the Critical Reading and Writing requirements.

**English Composition and Rhetoric.** English Composition 3 with a minimum grade of C must be completed by the end of the third term at UCLA and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 4 also meets this requirement.

**Critical Reading and Writing.** One course from Ancient Near East 10W, Applied Linguistics and Teaching English as a Second Language 101W, Classics 41W, Comparative Literature 2AW, 2BW, 2CW, 2DW, 4AW, 4BW, 4CW, 4DW, East Asian Languages and Cultures 60W, English 4HW, 4W, English Composition 30W, 100W, French 14W, German 60W, 62W, History 10BW, Honors Collegium 21W, 32W, 33W, 40W, 46W, 59W, 83W, Life Sciences 2W, Music History 12W, Philosophy 22W, Russian 25W, 99BW, or Scandinavian 50W with a minimum grade of C must be completed by the end of the second year at UCLA and may not be taken on a Passed/Not Passed basis. A course taken to meet the critical reading and writing requirement may not also be applied toward a GE requirement.

### Foreign Language Requirement

Students may meet the Foreign Language requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language test in French, German, or Spanish, or scoring 4 or 5 on the AP foreign language test in Latin, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA’s level three or above with a grade of Passed or C or better.

## STRUCTURE OF A DEGREE

### University Requirements

1. Subject A or English as a Second Language
2. American History and Institutions

### School of Arts and Architecture Requirements

1. Unit
2. Scholarship
3. Academic Residence
4. General Education Requirements
  - a. Writing
    - English Composition and Rhetoric
    - Critical Reading and Writing
  - b. Foreign Language
  - c. Computing/Mathematics/Statistics
  - d. Science/Social Sciences/Humanities
5. Upper Division Nonmajor Courses

### Department Requirements

1. Preparation for the Major
2. The Major

Courses that do not satisfy University, school, or department requirements are referred to as electives and are used to meet the minimum unit requirement for graduation.

International students may petition to use an advanced course in their native language for this requirement. Students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

### **Computing/Mathematics/Statistics Requirement**

Students must complete one course (4 units) in mathematics or statistics or an introductory course in computers selected from Anthropology M80, Computer Science 1, 2, Economics M40, Geography M40, Mathematics 1, 2, 3A, 3B, 3C, 31A, 31B, Political Science 6, Program in Computing 1, 10A, 10B, 10C, Sociology M18, Statistics 10, M11, M12, M13. An SAT I mathematics score of 600 or better or an SAT II mathematics subject test score of 550 or better also meets this requirement.

### **Science/Social Sciences/Humanities Requirement**

To satisfy Arts and Architecture Science, Social Science, and Humanities GE course requirements, students must complete two courses from different departments in the sciences, three courses with at least one in each group from the social sciences, and three courses with at least one in three of the four groups from the humanities.

**Reciprocity with Other UC Campuses.** Students who transfer to UCLA from other UC campuses and have met all GE requirements prior to enrolling at UCLA are not required to complete the School of the Arts and Architecture GE requirements. Written verification from the dean at the other UC campus is required. Verification letters should be sent to the Student Services Office, School of the Arts and Architecture, 1100 Dickson Art Center, UCLA, Box 951620, Los Angeles, CA 90095-1620.

**Intersegmental GE Transfer Curriculum.** Transfer students from California community colleges have the option to fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA's GE requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the School of Arts and Architecture GE requirements.

### **Upper Division Nonmajor Requirement**

In addition to the GE requirements, students are required to take a minimum of 12 units of upper division nonmajor courses.

## **DEPARTMENT REQUIREMENTS**

Generally, departments set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major (lower division courses) and (2) the Major (upper division courses). Lower division Preparation for the Major courses should be completed before beginning upper division work.

### **Preparation for the Major**

A major requires completion of a set of lower division courses known as Preparation for the Major. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

### **The Major**

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units).

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the major department must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the department adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts and Architecture may require a general final examination.

**Individual Majors.** Highly motivated students who believe that no single major accommodates their specific interests and goals may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and must explain the intent concerning the anticipated program of study and reasons why the academic goals cannot be achieved within an existing major. Proposals must be submitted no later than the end of the sophomore year. Transfer students must complete at least one term of residency at UCLA before proposing an individual major. Students interested in designing an individual major should consult with the Director of Student Services, School of the Arts and Architecture, 1100 Dickson Art Center. ☎310-825-9707

**Double Majors.** Students may petition to be reviewed for a double major on an individual basis. Contact the Student Services Office for an outline of criteria required.

# SCHOOL OF THE ARTS AND ARCHITECTURE GENERAL EDUCATION

## SCIENCE, SOCIAL SCIENCES, AND HUMANITIES COURSE LIST

Courses marked with one asterisk (e.g., History \*4. Introduction to History of Religions) are listed in more than one category but can fulfill GE requirements in only one of the cross-listed categories. A course taken for the Arts and Architecture critical reading and writing requirement may not also be applied toward a GE requirement.

### A. SCIENCE

Two courses from different departments:

#### Anthropology

- 7. Human Evolution
- 10. Principles of Human Evolution: Genetic Basis
- 12. Principles of Human Evolution: Comparative Analysis

#### Astronomy (Physics and Astronomy)

- 2A, 2B. Introduction to the Physical Universe
- 3. Astronomy: Nature of the Universe
- 3H. Introductory Astronomy and Astrophysics
- 4. Universe of Stars and Stellar Systems
- 5. Life in the Universe
- 6. Cosmology: Our Changing Concepts of the Universe
- 8A, 8B. Astronomy with Physics: Exploring the Universe
- 81. Astrophysics I: Stars and Nebulae
- 82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology

#### Atmospheric Sciences

- 2, 2E. Air Pollution
- 3, 3E. Introduction to the Atmospheric Environment
- 4. California Weather and Climate
- 5. Climates of Other Worlds
- 6, 6E. Climate and Climatic Change
- 8. Clouds, Rain, and Storms
- 10. Introduction to the Earth System

#### Chemical Engineering

- 2. Technology and the Environment

#### Chemistry and Biochemistry

- 2. Introductory Chemistry
- 14A. Chemical Structures and Equilibria
- 14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy
- 15. Survey of Organic Chemistry and Biochemistry
- 20A. Chemical Structure
- 20B. Chemical Energetics and Change

#### Civil and Environmental Engineering

- 3. Fundamentals of Environmental Engineering Science

#### Earth and Space Sciences

- 1. Introduction to Earth Science
- 5. Environmental Geology of Los Angeles
- 8. Earthquakes
- 9. Origin and Evolution of Solar System
- 15. Introduction to Oceanography
- 16. Major Events in History of Life
- 17. Dinosaurs and Their Relatives
- 20. Natural History of Southern California

#### Geography

- 1. Physical Environment
- 2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World
- 5. People and the Earth's Ecosystems

#### Life Sciences

- 1. Evolution, Ecology, and Biodiversity
- 2. Cells, Tissues, and Organs
- 2W. Cells, Tissues, and Organs
- 3. Introduction to Molecular Biology
- 4. Genetics
- 15. Life, Concepts, and Issues

#### Microbiology and Molecular Genetics

- 6. Introduction to Microbiology
- 7. Developments in Biotechnology
- 10. Applied Medical Microbiology
- 12. Biological Threats to Society: Bioterrorism and Emerging Infections

#### Molecular, Cell, and Developmental Biology

- 30. Biology of Cancer
- 40. AIDS and Other Sexually Transmitted Diseases
- 70. Genetic Engineering and Society

- 80. The Green World: Plant Biology for Now and the Future

#### Organismic Biology, Ecology, and Evolution

- 10. Plants and Civilization
- 12. Biodiversity and Extinction: Crisis and Conservation
- 13. Evolution of Life
- 21. Field Biology
- 25. Marine Biology
- 50. Desert Life

#### Physics (Physics and Astronomy)

- 1A. Physics for Scientists and Engineers: Mechanics
- 1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields
- 1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity
- 6A. Physics for Life Sciences Majors: Statics and Dynamics
- 6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics
- 6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport
- 10. Physics

#### Physiological Science

- 3. Introduction to Human Physiology
- 5. Issues in Human Physiology: Diet and Exercise
- 6. The Human Machine: Physiological Processes
- 13. Introduction to Human Anatomy

#### Psychology

- 15. Introductory Psychobiology

### B. SOCIAL SCIENCES

Three courses, with at least one from each group:

#### B1. GROUP A

##### Economics

- 1, 2. Principles of Economics
- 5. Introductory Economics

##### German (Germanic Languages)

- 60W. War

##### History

- 1A, 1B, 1C. Introduction to Western Civilization
- 2A. Power, Ethics, and Technological Change
- 2B. Social Knowledge and Social Power
- 2C, 2D. Religion, the Occult, and Science
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
- \*4. Introduction to History of Religions
- 8A. Colonial Latin America
- 8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
- 8C. Latin American Social History
- 9A. Introduction to Asian Civilizations: History of India
- 9C. Introduction to Asian Civilizations: History of Japan
- 9D. Introduction to Asian Civilizations: History of the Near and Middle East
- 10A, 10B. Introduction to Civilizations of Africa
- 10BW. Introduction to Civilizations of Africa since 1800
- 11A, 11B. History of China
- 13A. History of the U.S. and Its Colonial Origins: Colonial Origins and First Nation Building Acts
- 13B. History of the U.S. and Its Colonial Origins: 19th Century
- 13C. History of the U.S. and Its Colonial Origins: 20th Century
- 20. World History to A.D. 600
- 21. World History, Circa 600 to 1760
- 22. Contemporary World History, 1760 to the Present

##### Political Science

- 10. Introduction to Political Theory
- 20. World Politics
- 30. Introduction to Political Economy
- 40. Introduction to American Politics
- 50. Introduction to Comparative Politics

**B2. GROUP B****Afro-American Studies**

- M5. Social Organization of Black Communities  
\*M107. Cultural History of Rap

**American Indian Studies**

- \*10. Introduction to American Indian Studies

**Ancient Near East (Near Eastern Languages)**

- \*10W. Jerusalem: The Holy City

**Anthropology**

8. Archaeology: An Introduction  
9. Culture and Society  
33. Culture and Communication

**Asian American Studies**

- \*21. Asians and Pacific Islanders in American Society  
\*99. History of Asians in America

**Chicana and Chicano Studies**

- 10B. Introduction to Chicana/Chicano Studies: Social Structure and Contemporary Conditions

**Classics**

- \*M70. Survey of Medieval Greek Culture

**Communication Studies**

10. Introduction to Communication Studies

**Ethnomusicology**

- \*M119. Cultural History of Rap

**Folklore and Mythology**

- \*M110. Cultural History of Rap

**Geography**

3. Cultural Geography  
4. Globalization: Regional Development and World Economy

**History**

- \*M70. Survey of Medieval Greek Culture

**Lesbian, Gay, Bisexual, and Transgender Studies**

- \*M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

**Portuguese (Spanish and Portuguese)**

- \*46. Brazilian Culture and Civilization

**Psychology**

10. Introductory Psychology

**Sociology**

1. Introductory Sociology  
2. Changing Society and Making History  
3. Sociology of Everyday Life  
4. Jobs and Careers: Sociological Approach  
M5. Social Organization of Black Communities  
24. Conversation and Society  
31. Dilemmas of Third World Development

**Women's Studies**

10. Introduction to Women's Studies: Feminist Perspectives on Women and Society  
\*M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

**World Arts and Cultures**

- \*100A. Art as Social Action  
\*100B. Art as Moral Action

**C. HUMANITIES**

Three courses, with at least one course in three of the four groups. Courses in the major or multiple-listed with the major do not apply.

**C1. ARTS****Afro-American Studies**

- M103A. African American Theater History: Slavery to Mid-1800s  
M103B. African American Theater History: Minstrel Stage to Rise of the American Musical  
M103E. African American Theater History: The Depression to the Present  
\*M107. Cultural History of Rap  
M109. Women in Jazz  
M110A, M110B. African American Musical Heritage  
M145. Ellingtonia

**Art**

- 31A, 31B. Modernism  
32. Survey of Critical Thought

**Art History**

50. Ancient Art  
51. Medieval Art  
54. Modern Art  
55A. Introduction to African Art  
55B. Arts of Pre-Columbian America  
56A. Art of India and Southeast Asia  
56B. Introduction to Chinese Art  
57. Renaissance and Baroque Art

**Arts and Architecture**

10. Arts Encounters: Exploring Arts Literacy in the 21st Century

**Chicana and Chicano Studies**

- M103C. Origins and Evolution of Chicano Theater  
M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement  
M103H. Contemporary Chicano Theater: Chicano Theater since 1980  
M108A. Music of Latin America  
M114. Chicanos in Film/Video  
M115. Musical Aesthetics in Los Angeles  
M116. Chicano/Latino Music in the U.S.

**Classics**

42. Cinema and the Ancient World  
51A. Art and Archaeology of Classical World: Greece  
51B. Art and Archaeology of Classical World: Rome

**Design | Media Arts**

10. Nature of Design

**Ethnomusicology**

15. American Life in Music  
20A, 20B, 20C. Musical Cultures of the World  
106A. Traditional North American Indian Music  
106B. Contemporary North American Indian Music  
M108A, 108B. Music of Latin America  
M109. Women in Jazz  
M110A, M110B. African American Musical Heritage  
M111. Ellingtonia  
113. Music of Brazil  
M115. Musical Aesthetics in Los Angeles  
M116. Chicano/Latino Music in the U.S.  
117. American Popular Music  
118. Development of Rock  
\*M119. Cultural History of Rap  
120A, 120B. Development of Jazz  
121. Cross-Cultural Perspectives in Jazz  
123. Music of Bebop  
128. Folk Music of Eastern Europe  
M131. Development of Latin Jazz  
C136A, C136B. Music of Africa  
146. Folk Music of South Asia  
147. Survey of Classical Music in India  
C150. Music and Politics in East Asia  
C156A, 156B. Music in China  
157. History of Chinese Opera  
158A, 158B, 158C. Studies in Chinese Instrumental Music  
C159. Music on China's Periphery  
160A. Survey of Music in Japan  
174. Aesthetics of Music

**Film and Television**

- 106A. History of the American Motion Picture  
106B. History of the European Motion Picture  
106C. History of African, Asian, and Latin American Film  
107. Experimental Film  
108. History of Documentary Film  
110A. American Television History  
110C. World Media Systems  
112. Film and Social Change  
113. Film Authors  
114. Film Genres  
116. Film Criticism  
M117. Chicanos in Film/Video  
127. Problems and Ethical Issues in Film and Telecasting

**Folklore and Mythology**

- \*M110. Cultural History of Rap  
\*M118. Folk Art and Aesthetics  
M154A, M154B. African American Musical Heritage  
CM184. Dance and Folklore

**Lesbian, Gay, Bisexual, and Transgender Studies**

M137. Gay and Lesbian Perspectives in Pop Music

**Music**

- 15. Art of Listening
- 19. Hollywood Musical and the American Dream
- M131. Development of Latin Jazz
- 136A, 136B, 136C. Historical Survey of Music Theater
- 158. New Orleans Jazz

**Music History (Musicology)**

- 1. Introduction to Music History
- 2A, 2B. Introduction to Literature of Music
- 5. History of Rock and Roll
- 7. Film and Music
- 10. Music Now
- 13. 20th-Century Music of the Western World
- 130. Music of the U.S.
- 131. American Popular Song
- 132. Mozart
- 133. Bach
- 134. Beethoven
- 135A, 135B, 135C. History of Opera
- M137. Gay and Lesbian Perspectives in Pop Music
- 138. History of Electronic Dance Music
- 139. History and Literature of Church Music
- 145. American Musical
- 150. History of Jazz
- 156. Studies in Musical Genres
- 189A, 189B. The Symphony

**Russian (Slavic Languages)**

\*30. Russian Literature and World Cinema

**Spanish (Spanish and Portuguese)**

\*62A, \*62B, \*62C. Hispanic Literatures and Film

**Theater**

- 101A, 101B, 101C. History of World Theater and Drama
- 102A. Theater of Japan
- 102B. Theater of Southeast Asia
- 102C. Cross-Cultural Currents in Theater
- 102E. Theater of Non-European World
- M103A. African American Theater History: Slavery to Mid-1800s
- M103B. African American Theater History: Minstrel Stage to Rise of the American Musical
- M103C. Origins and Evolution of Chicano Theater
- M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement
- M103E. African American Theater History: The Depression to the Present
- 103F. Native American Theater
- M103H. Contemporary Chicano Theater: Chicano Theater since 1980
- 104A, 104B, 104C. History of American Theater
- 105. Main Currents in Theater
- 106. History of American Theater and Drama
- 107. Drama of Diversity
- 111A. Selected Topics on History of European Theater from Primitive Times to 1640
- 111B. Selected Topics on History of European Theater from 1640 to 1900
- 111C. Selected Topics on History of European Theater from 1900 to the Present

**Women's Studies**

M109. Women in Jazz

**World Arts and Cultures**

- \*100A. Art as Social Action
- \*100B. Art as Moral Action
- 106B. Dance in Africa and African Diaspora
- 108B. Dance in Latin American Cultures
- C109B. Dance in Native American Cultures
- 110B. Dance in East Asia
- 111B. Dance in South Asia
- 112B. Dance in Southeast Asia
- 127. The City as a Work of Art
- \*M131. Folk Art and Aesthetics
- 135. African Popular Arts
- 149. Dance in the Multicultural U.S.
- 150. History of Dance in Culture and Performance
- CM154. Dance and Folklore
- 172. Costume and Scenic Design Concepts for Dance Theater
- 182. Dance and the Visual Media

**C2. CULTURE AND CIVILIZATION****Afro-American Studies**

\*M107. Cultural History of Rap

**American Indian Studies**

\*10. Introduction to American Indian Studies

**Asian American Studies**

- \*21. Asians and Pacific Islanders in American Society
- \*99. History of Asians in America

**Chicana and Chicano Studies**

10A. Introduction to Chicana/Chicano Studies: History and Culture

**Chinese (East Asian Languages)**

50. Chinese Civilization

**Classics**

- 10. Survey of Classical Greek Culture
- 20. Survey of Roman Civilization
- \*30. Introduction to Classical Mythology
- \*M70. Survey of Medieval Greek Culture

**Ethnomusicology**

\*M119. Cultural History of Rap

**Folklore and Mythology**

- M15. Introduction to American Folklore Studies
- \*M110. Cultural History of Rap
- \*M118. Folk Art and Aesthetics

**French (French and Francophone Studies)**

- 14. Introduction to French Civilization, in English
- 14W. Introduction to French Civilization
- 41. French Cinema and Culture

**German (Germanic Languages)**

- 100A. German History and Culture before 1500
- 100B. German History and Culture from 1500 to 1914
- 100C. German History and Culture from 1914 to the Present

**History**

\*M70. Survey of Medieval Greek Culture

**Italian**

- 42A. Italy through the Ages in English: Holy Roman Empire to Sack of Rome
- 42B. Italy through the Ages in English: Late Renaissance to Post-modern Period
- 46. Italian Cinema and Culture

**Japanese (East Asian Languages)**

50. Japanese Civilization

**Jewish Studies (Near Eastern Languages)**

10. Social, Cultural, and Religious Institutions of Judaism

**Korean (East Asian Languages)**

50. Korean Civilization

**Lesbian, Gay, Bisexual, and Transgender Studies**

\*M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

**Near Eastern Languages**

- 50A. First Civilizations
- 50B. Ascendance of Monotheism
- 50C. Modern Middle Eastern Cultures

**Portuguese (Spanish and Portuguese)**

- M42. Civilization of Spain and Portugal  
 M44. Civilization of Spanish America and Brazil  
 \*46. Brazilian Culture and Civilization

**Romanian (Slavic Languages)**

99. Introduction to Romanian Civilization

**Russian (Slavic Languages)**

- 99A. Introduction to Russian Civilization  
 99B. Russian Civilization in the 20th Century  
 99BW. Russian Civilization in the 20th Century

**Slavic (Slavic Languages)**

99. Introduction to Slavic Civilization

**Spanish (Spanish and Portuguese)**

- M42. Civilization of Spain and Portugal  
 M44. Civilization of Spanish America and Brazil

**Women's Studies**

- \*M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

**World Arts and Cultures**

- M22. Introduction to American Folklore Studies  
 \*M131. Folk Art and Aesthetics

**C3. LITERATURE****Classics**

- \*30. Introduction to Classical Mythology  
 40. Survey of Greek Literature in Translation  
 41. Survey of Latin Literature in Translation  
 41W. Discovering Roman Literature

**Comparative Literature**

- 1A. World Literature: Antiquity to Early Middle Ages  
 1B. World Literature: Late Middle Ages to the 17th Century  
 1C. World Literature: Age of Enlightenment to the 20th Century  
 1D. Great Books from the World at Large  
 1E. Introduction to Classical Traditions of East Asia  
 2AW. Survey of Literature: Antiquity to Early Middle Ages  
 2BW. Survey of Literature: Late Middle Ages to the 17th Century  
 2CW. Survey of Literature: Age of Enlightenment to the 20th Century  
 2DW. Survey of Literature: Great Books from the World at Large  
 4AW. Literature and Writing: Antiquity to Early Middle Ages  
 4BW. Literature and Writing: Late Middle Ages to the 17th Century  
 4CW. Literature and Writing: Age of Enlightenment to the 20th Century  
 4DW. Literature and Writing: Great Books from the World at Large  
 M90. Modern Literatures in Southeast Asia

**English**

- 10A. English Literature to 1660  
 10B. English Literature, 1660 to 1832  
 10C. English Literature, 1832 to the Present  
 70. Major British Authors before 1800  
 75. Major British Authors, 1800 to the Present  
 80. Major American Authors  
 85. American Novel  
 90. Shakespeare  
 95A. Introduction to Poetry  
 95B. Introduction to Drama  
 95C. Introduction to Fiction  
 96. The Short Story in England and America

**French (French and Francophone Studies)**

12. Introduction to Study of French Literature (in French)

**German (Germanic Languages)**

- 50A. Great Works of German Literature in Translation: Medieval Period through Classicism  
 50B. Great Works of German Literature in Translation: Romanticism to the Present

**Italian**

- 50A. Masterpieces of Italian Literature in English: Middle Ages and Renaissance  
 50B. Masterpieces of Italian Literature in English: Baroque Period to the Present

**Japanese (East Asian Languages)**

60. Images of Japan: Humanistic Tradition

**Portuguese (Spanish and Portuguese)**

- 40A, 40B. Portuguese, Brazilian, and African Literature in Translation

**Russian (Slavic Languages)**

25. Russian Novel in Translation  
 25W. Russian Novel in Translation  
 \*30. Russian Literature and World Cinema

**Scandinavian**

50. Introduction to Scandinavian Literature  
 50W. Introduction to Scandinavian Literature

**South and Southeast Asian Languages and Cultures (East Asian Languages)**

- M90. Modern Literatures in Southeast Asia

**Spanish (Spanish and Portuguese)**

- 60A, 60B, 60C. Hispanic Literatures in Translation  
 61A, 61B, 61C. Hispanic Literatures in Spanish  
 \*62A, \*62B, \*62C. Hispanic Literatures and Film

**Selected upper division courses**

in English and in other language and literature departments by petition

**C4. PHILOSOPHY/RELIGION****Ancient Near East (Near Eastern Languages)**

- \*10W. Jerusalem: The Holy City  
 130. Ancient Egyptian Religion

**Anthropology**

156. Comparative Religion

**Chinese (East Asian Languages)**

- C160. Chinese Buddhism  
 175. Introduction to Chinese Thought

**Classics**

- M145A. Ancient Greek and Roman Philosophy  
 M145B. Later Ancient Greek Philosophy  
 166A. Greek Religion  
 166B. Roman Religion

**East Asian Languages and Cultures**

60. Introduction to Buddhism  
 60W. Introduction to Buddhism

**History**

- \*4. Introduction to History of Religions

**Indic (East Asian Languages)**

175. Introduction to Indic Philosophy

**Iranian (Near Eastern Languages)**

170. Religion in Ancient Iran

**Islamic (Near Eastern Languages)**

110. Introduction to Islam

**Japanese (East Asian Languages)**

- C160. Japanese Buddhism  
 161. Religious Life in Modern Japan  
 175. Introduction to Japanese Thought

**Jewish Studies (Near Eastern Languages)**

130. Modern Jewish Religious Movements and Their Ideologies

**Korean (East Asian Languages)**

- C160. Korean Buddhism  
 175. Introduction to Traditional Korean Thought  
 187. Popular and Folk Religion in Korea

**Philosophy**

1. Beginnings of Western Philosophy  
 2. Introduction to Philosophy of Religion  
 4. Philosophical Analysis of Contemporary Moral Issues  
 5A. Philosophy in Literature  
 6. Introduction to Political Philosophy  
 7. Introduction to Philosophy of Mind  
 8. Introduction to Philosophy of Science  
 9. Principles of Critical Reasoning  
 21. Skepticism and Rationality  
 22. Introduction to Ethical Theory  
 22W. Introduction to Ethical Theory  
 31. Logic, First Course  
 32. Logic, Second Course  
 M103A. Ancient Greek and Roman Philosophy  
 M103B. Later Ancient Greek Philosophy

## POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations including the following.

### Student Responsibility

Students should take advantage of academic support resources, but students are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

### Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 17 units if they have an overall grade-point average of 3.0 (B) or better **and** have attained at least a B average in the preceding term with all courses passed. Consult the Student Services Office no later than the end of the third week of instruction.

### Minimum Progress

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

### Concurrent Enrollment

Enrollment at a non-UC institution or at UCLA Extension while enrolled at UCLA is not permitted.

### Credit Limitations

The following credit limitations apply to all undergraduates in the school.

**Advanced Placement Tests.** Credit earned through the College Board Advanced Placement (AP) Tests may be applied toward the general education requirements. Portions of AP Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

**Graduate Courses.** Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

**UCLA Extension.** Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

## COUNSELING SERVICES

The School of the Arts and Architecture offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors. Prior to registration and enrollment in classes, new students are

assigned a counselor in their major department. For counseling information, contact the Student Services Office, School of the Arts and Architecture, 1100 Dickson Art Center. ☎310-206-3564

## HONORS

Undergraduate School of Arts and Architecture students who achieve scholastic distinction may qualify for the following honors and programs.

### Dean's Honors

To receive Dean's Honors in the School of the Arts and Architecture, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean's Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

### Latin Honors

Latin Honors are awarded at graduation to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors are summa cum laude, magna cum laude, and cum laude. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility. See the *Schedule of Classes* for the most current calculations of Latin honors.

## Departmental Scholar Program

Exceptionally promising juniors or seniors may be nominated as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at a similar institution, the requirements in preparation for the major, and eligibility to participate in the school honors program. Students must also have at least one term's coursework remaining at UCLA. To obtain both the bachelors and master's degrees students must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. Interested students should consult their department well in advance of application dates for graduate admission. Contact the Student Services Office in 1100 Dickson Art Center for details.

---

*The UCLA School of Dentistry has an international reputation for its teaching and research activities, which prepare students for professional careers dedicated to patient treatment and service*

---

## GRADUATE STUDY

The advanced degree programs offered in the School of the Arts and Architecture provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, the special collections of the Arts and Music Libraries, and the University's exhibition and performance halls.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division.

## Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of creative work (auditions, portfolios, computer programs, etc.) are required. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

## Degree Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for information and procedures. For complete degree requirements, see *Program Requirements for UCLA Graduate Degrees* available at <http://www.gdnet.ucla.edu/departments.html>.

# SCHOOL OF DENTISTRY

## No-Hee Park, Dean

UCLA  
53-038 Dentistry  
Box 951762  
Los Angeles, CA 90095-1762  
(310) 206-6063  
<http://www.dent.ucla.edu>

The UCLA School of Dentistry has a national and international reputation for its teaching and research activities, which prepare dental students for professional careers dedicated to patient treatment and service. The curriculum prepares students for changes in treatment modalities and health care delivery systems. From the moment training begins, students actively participate in preventive and clinical dental care and soon make valuable contributions to the clinical health team. Clinical instruction emphasizes the comprehensive care of patients. Students interact with their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

School of Dentistry students may undertake programs designed to meet their special needs; mandatory fourth-year selectives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield UCLA Venice Dental Center, the Roybal Children's Dental Center, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. A graduate program and a number of resident specialty programs foster new lines of research which lead to better treatment options. An active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.

## DEGREES

The school offers the following degrees:

Dental Surgery (D.D.S.)  
Oral Biology (M.S., Ph.D.)

In addition, the school has a number of resident programs. Articulated D.D.S. and M.S. or certificate programs are also available. This catalog provides detailed information only on the M.S. and Ph.D. programs in Oral Biology, for which admission to the School of Dentistry is not required.

### Predental Curriculum

For details on the three-year predental curriculum, see <http://www.college.ucla.edu/up/pao>.

### D.D.S. Degree Program

The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with three required Summer Quarters between the first/second, second/third, and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years.

The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic, laboratory, and general clinical coursework. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For details on the D.D.S. program and a listing of the courses offered, see <http://www.dent.ucla.edu> or write to the Office of Student and Alumni Affairs, School of Dentistry, A3-042 Dentistry, UCLA, Box 951762, Los Angeles, CA 90095-1762.

### Resident Programs

School of Dentistry opportunities for resident study include a one-year general practice residency program; a one-year advanced education in general dentistry program; a one-year residency in maxillofacial prosthodontics; a four- or six-year oral and maxillofacial surgery residency training program; a three-year prosthodontics, periodontics, and combined orthodontic/pediatric dentistry program; two-year programs in the specialties of endodontics and orofacial pain and dysfunction; and a 27-month program in orthodontics and pediatric dentistry.

Information on the resident programs can be obtained by writing directly to Resident Programs, School of Dentistry, A3-042 Dentistry, UCLA, Box 951762, Los Angeles, CA 90095-1762.

## SCHOOL OF LAW

### Jonathan D. Varat, Dean

UCLA  
1242 Law  
Box 951476  
Los Angeles, CA 90095-1476  
(310) 825-4841  
<http://www.law.ucla.edu>

By any standard, the UCLA School of Law is recognized as one of the nation's great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of a faculty that includes eminent authorities in all major fields of law. The educational pro-

gram at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment with a genuine spirit of community. The school's student body is intellectually distinguished, interesting, and culturally diverse.

The school's strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what ultimately faces them as lawyers and policymakers. Students and faculty often pioneer new programs together, such as the Environmental Clinic, the Program in Public Interest Law and Policy, and a concentration in business law or critical race studies.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.

The School of Law, one of two academic units at UCLA that operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law

---

*The outstanding reputation of the UCLA School of Law is based on excellence in scholarship, a rigorous educational program, and the quality of a faculty that includes eminent authorities in all major fields of law*

---

Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

## DEGREES

The school offers the following degrees:

Juris Doctor (J.D.)

Master of Laws (LL.M.)

### Concurrent Degree Programs

School of Law concurrent degree programs allow students to fulfill the requirements of the J.D. and another graduate degree simultaneously: the M.B.A./J.D. with the John E. Anderson Graduate School of Management; the M.A./J.D. with the Department of Urban Planning, the M.P.P./J.D. with the Department of Policy Studies, and the M.S.W./J.D. with the Department of Social Welfare in the School of Public Policy and Social Research; the M.A./J.D. with the American Indian Studies Program and the M.A./J.D. with the Afro-American Studies Program in the College of Letters and Science; and either the M.Ed., M.A., Ed.D., or Ph.D./J.D. with the Department of Education in the Graduate School of Education and Information Studies. For details on all degree programs, see Law in the Curriculum and Courses section of this catalog.

In addition to the concurrent programs above, students may design a tailored program from other disciplines in UCLA's curriculum or from another high-quality institution; this must be arranged in consultation with the School of Law and the other selected program.

### Program in Public Interest Law and Policy

The School of Law has long attracted students interested in public interest and policy issues. The school has one of the strongest public interest law faculties in the country and sits next to the School of Public Policy and Social Research in a city that is a living laboratory for every conceivable social problem.

Building on these strengths, the school instituted a Program in Public Interest Law and Policy in Fall Semester 1997. Students take a special lawyering skills class, participate in a public interest workshop in their first year, and take required year-long seminars in their second and third years. Through the three-year program, which leads to the J.D. degree, students work closely with the small group of faculty who designed the program.

The program marks a distinct break with the way law schools have traditionally trained lawyers for public interest careers. Recognizing the need for coordinated and sequenced training and hoping to engage the interest of the most dedicated public interest-minded students, the program offers a challenging approach to legal education that helps aspiring lawyers refine their own career goals while training them for legal and policy work in the public interest.

### Clinical Program

The UCLA School of Law offers one of the finest clinical education programs in the nation. Housed in a technologically sophisticated clinical wing, the program provides extensive and rigorous practical training for student-lawyers interested in litigation and transactional work prior to entry into the legal profession. Through simulated and actual client contact, students learn skills such as interviewing and counseling clients, drafting legal documents, examining and cross-examining witnesses, negotiating commercial agreements and litigation settlements, deposing witnesses, mediating disputes, and arguing before a judge or jury. In addition, students interested in a transactional practice can learn how to finance a start-up company, sell a private company, or cope with a myriad of environmental issues that arise when selling a business.

To give some examples of clinical experience, students in the highly successful Frank G. Wells Environmental Law Clinic work on large and small cases, both federal and state, involving citizen enforcement actions under various environmental statutes, especially actions under the Clean Water Act against polluters of the Santa Monica Bay. Students in Public Policy Advocacy recently exposed the appalling conditions of California public elementary, middle, and high schools and researched the legal accountability of enforcing basic standards in matters such as textbooks and a shortage of trained teachers. Other innovative programs include a complex litigation clinic that concentrates on the discovery process and an Indian Law Clinic where students provide legal assistance to Native American tribes with the focus being on legislative drafting.

In addition to the speciality clinics, students can choose from an extensive array of clinical subjects ranging from trial advocacy and alternative dispute resolution to taking dispositions or renegotiating business agreements. Students in most clinical courses work with real clients under close faculty supervision, either in the school's in-house clinical office or in public interest law settings.

The clinical wing includes a two-story Law Office designed with modern lawyering technology. The student work rooms are equipped with networked computers that have access to legal research databases, the Internet, and leading-edge computer litigation support systems.

The School of Law was a pioneer of clinical legal education, and the program continues on the cutting edge of methods for training lawyers. Clinical faculty members have written numerous influential texts and articles that are used by law schools nationwide.

### Extern Program

The school has one of the most extensive, best established, and most diversified student extern programs in the nation. Under supervision of experienced public interest and governmental lawyers and federal judges, students perform legal work in government offices, public interest law firms, nonprofit agencies, and the chambers of federal judges.

In the semester-long program, students develop legal skills in supervised settings and acquire perspectives about the lawyering process or the judicial decision-making process. They also participate in a faculty-led, law school-based seminar in which they reflect systematically in a classroom setting on their experiences in the placement. Students regularly report that the program is an excellent educational experience.

### Business Law Program

The Business Law Program gives second- and third-year law students a coherent program of focused coursework in an important practice area. Students who successfully complete the program receive an appropriate notation on their transcripts.

The program has several goals. A large part of practice consists of transactions—a term encompassing agreements as diverse as the negotiation of a lease, the financing of low-cost housing, and the mergers of billion-dollar companies. Lawyers structuring those transactions and those engaged in litigation about them need to understand both legal principles and economic dynamics. Yet students interested in such practices are sometimes uncertain how they may best prepare themselves for such careers. The program provides guidance for these students, offering suggested courses and sequences of courses that enable those interested in a career in business law—or another field where such knowledge would be useful—to plan orderly, logical schedules that build from the basic to the advanced.

Business law students take three foundational courses in their second year of law school: financial analysis, business associations, and taxation. Thereafter, students may select one of five cores, or areas of specialization: corporate and securities, commercial and financing, international business, taxation, and a general business field. In each of the fields students choose among a set of relevant courses that build on and reinforce each other. Students then complete the concentration with an advanced transactional course.

## SCHOOL OF MEDICINE

Gerald S. Levey, Dean and Provost

UCLA  
12-105 Center for the Health Sciences  
Box 957035  
Los Angeles, CA 90095-7035  
(310) 825-6081  
<http://www.medsch.ucla.edu>

At the UCLA School of Medicine, faculty and students play a dynamic role in the campus and Los Angeles communities. Not only are they in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, they are also at work in the facili-

ties of the Molecular Biology Institute, the Department of Physiology, the Health Sciences Computer Center, the Neuropsychiatric Institute, and in dozens of other clinical and scientific units. They are in community clinics, health fairs, and schools, and assist at disaster sites in the international community.

Students at the UCLA Medical Center are exposed to the best of many worlds—strong research-oriented basic and clinical science departments, a hospital consistently ranked among the nation's elite, superb affiliated clinical facilities that provide the full spectrum of teaching settings and patient populations, and a biomedical library that is considered one of the world's best.

School of Medicine departments are each staffed by a distinguished faculty of respected researchers and practitioners. They have some of the most technologically advanced equipment and facilities, including two of the nation's 56 hospital-based biomedical cyclotrons producing short-lived radioisotopes for biological research and diagnostic nuclear medicine procedures.

### DEGREES

The School of Medicine offers an M.D. degree program, allied health programs in affiliation with other hospitals and universities, postgraduate medical training programs, and the following master's and doctoral degrees offered through the Graduate Division.

---

*Students at the UCLA Medical School are exposed to the best of many worlds—strong research-oriented basic and clinical science departments, a hospital consistently ranked among the nation's elite, and superb clinical facilities*

 Biological Chemistry (M.S., Ph.D.)  
 Biomathematics (M.S., Ph.D.)  
 Biomedical Physics (M.S., Ph.D.)  
 Human Genetics (M.S., Ph.D.)  
 Microbiology and Immunology (M.S., Ph.D.)  
 Molecular and Medical Pharmacology (M.S., Ph.D.)  
 Neuroscience (Ph.D.)  
 Pathology—Experimental Pathology (M.S., Ph.D.)  
 Physiology (M.S., Ph.D.)  
 Psychiatry and Biobehavioral Sciences Clinical  
 Psychology Internship (Certificate)

### M.D. Degree Program

The Doctor of Medicine (M.D.) degree program develops a comprehensive scientific and humanistic approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, molecular, pathophysiological, and psychosocial factors in health, disease, and treatment.

The curriculum combines traditional teaching with problem-based learning and laboratories to maximize the educational experience. Because medical school is but one phase in a physician's education, the curriculum prepares students for a future in which scientific knowledge, social values, and human needs are ever changing. Formats for instruction include lectures, tutorials, seminars, laboratories, demonstrations, and visits to physicians' offices; students are exposed to patients from their first week through graduation.

The M.D. degree requires a four-year medical curriculum that prepares students broadly for careers in research, practice, or teaching in the medical field of their choice. The curriculum emphasizes issues of growing importance such as primary care, research opportunities for careers in academic medicine, human genetics and the evolving world of gene therapy, psychosocial issues of health and disease, preventive medicine, and medical ethics.

For details on the M.D. curriculum or to apply to the M.D. program, contact the School of Medicine Admissions Office, 12-105 CHS, UCLA, Box 957035, Los Angeles, CA 90095-7035. See <http://www.college.ucla.edu/up/pao> for details on the four-year premedical studies program.

### Special Programs

Special programs address the needs and issues of specific communities and populations.

#### UCR/UCLA Biomedical Sciences Program

The UCR/UCLA Biomedical Sciences Program is a cooperative venture involving UC Riverside, the

UCLA School of Medicine, and selected Riverside community sites. Students may earn both the B.S. and M.D. degrees in seven years through a combined program maximizing the curricula of both. See <http://www.biomed.ucr.edu>.

#### Drew/UCLA Medical Education Program

The Drew/UCLA Medical Education Program is designed to attract students who are interested in addressing the concerns of underserved populations. Students in the program spend their first two years at the UCLA campus and complete their last two years of clinical work at the King/Drew Medical Center on the Charles R. Drew University of Medicine and Science campus. See <http://www.cdrewu.edu>.

### Articulated and Concurrent Degrees

The School of Medicine and the Graduate Division offer an articulated degree program that allows students to earn both the M.D. and Ph.D. in about seven years, depending on the course of study and research. The Ph.D. may be awarded in one of several medical sciences fields. Call the Medical Scientist Training Program for details.

☎310-794-1817

A concurrent program with the John E. Anderson Graduate School of Management allows medical students to earn both the M.D. and M.B.A.

degrees over five years by following a designated course of study and some shared coursework. Separate application must be made to the Anderson School during the third year of medical school.

☎310-825-3970

An arrangement with the School of Public Health enables students to pursue the M.P.H. degree while attending medical school. Interested students should call the School of Public Health.

☎310-825-5516

### Postgraduate Medical Training

Postgraduate medical training programs, including residencies, are offered through all the clinical departments at UCLA and the affiliated training hospitals such as Harbor-UCLA, Cedars-Sinai, and West Los Angeles VA Medical Centers, Sepulveda-San Fernando Valley Program, and many others. Programs at the affiliated institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the individual clinical departments of the School of Medicine or the affiliated hospitals.

### Allied Health Programs

For information on allied health programs in the Center for the Health Sciences call ☎310-794-8352

## Neuropsychiatric Institute

The UCLA Neuropsychiatric Institute (NPI) is one of the world's leading interdisciplinary research and education institutes devoted to the understanding of complex human behavior. Ten research centers, ranging from genetics to human culture, together with research initiatives distributed widely across the academic departments of the School of Medicine and the College of Letters and Science provide a comprehensive and outstanding research and training environment for the study of neuroscience and behavior.

The research portfolio of the 400 faculty, graduate students, and fellows who work in the institute spans behavioral genetics, developmental neurobiology, cognitive neuroscience, neuropharmacology, brain imaging, clinical research, health policy, and sociocultural studies of human behavior and its disorder. For further information, see <http://www.MentalHealth.ucla.edu>.

## SCHOOL OF NURSING

**Marie J. Cowan, Dean**

UCLA  
2-200 Factor Building  
Box 951702  
Los Angeles, CA 90095-1702  
(310) 825-7181  
<http://www.nursing.ucla.edu/son>

The School of Nursing enjoys a national and international reputation for excellence in teaching, research, and clinical practice.

A strong scientific basis underlies the teaching of nursing practice, leadership, and research. Related clinical experiences are arranged within the UCLA Medical Center, its affiliates, or in selected community sites. Education at the master's level provides advanced practice options in primary care, acute care, and nursing administration.

The majority of graduate students acquire expertise as nurse practitioners, with several options for clinical preparation in primary or acute care. The doctoral program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

The school has an exceptionally qualified faculty; many members have national and international reputations for excellence. The school is consistently ranked high for its teaching and research programs. The innovative curriculum is responsive to national needs in health care and the diversity of the patient population. Graduates of the program are sought by health care institutions and educational programs, and many alumni have become leaders in the field. Education in this research University with its full range of academic disciplines provides a rich environment for preparation in the health sciences.

The School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the school *Announcement* by writing to the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Box 951702, Los Angeles, CA 90095-1702. ☎310-825-7181

## HISTORY AND ACCREDITATION

In 1949 The Regents of the University authorized the School of Nursing as one of the professional

schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in nursing leading to the Bachelor of Science (B.S.) degree and made possible the establishment of a graduate program leading to the Master of Science (M.S.) degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The M.S. degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. was approved in 1995.

The B.S. program curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing

---

*The School of Nursing is consistently ranked high for its teaching and research programs. The innovative curriculum is responsive to national needs in health care and the diversity of the patient population*

---

Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master's nurse practitioner and nurse-midwifery programs have Board of Registered Nursing approval. In 2000, the Commission on Collegiate Nursing Education gave preliminary approval of the baccalaureate and master's degree programs.

## DEGREES

The school offers the following degrees:

Bachelor of Science (B.S.)  
Master of Science in Nursing (M.S.N.)  
Doctor of Philosophy (Ph.D.)

## PHILOSOPHY OF THE SCHOOL

The UCLA School of Nursing is guided by a philosophy which embodies the mission and goals of the University of California. The philosophy addresses nursing, the clients of nursing, and nursing students.

Nursing encompasses clinical practice, education,

an advanced practice level, nursing involves comprehensive primary health care which encompasses the responsibility and accountability for continuity of care across the health/illness spectrum.

Nursing research is both applied and basic and has as its core actual or potential human responses to illness and as its goal the development of nursing science. Guided by ethical standards that consider the perspectives of the client, the health care provider, and the larger society, nursing has a social mission which encompasses the right and responsibility to provide health care to all its clients regardless of their age, gender, sexual orientation, race or ethnicity, religion, culture, socioeconomic, or health status.

Persons who receive client-centered nursing care are complex individuals who exist in relationship to others in their family and community. This complexity of person involves biological, behavioral, emotional, sociocultural, and spiritual dimensions. Each individual reflects a unique combination of these dimensions that interact dynamically with the environment. The clients of nursing are autonomous decision makers who have certain values and knowledge about them-

selves that not only are relevant but essential to successful health care outcomes. As a result, persons have a right and a responsibility to participate collaboratively with the nurse and other health professionals in their care.

Successful nursing students are active learners who bring unique life experiences to the professional practice of nursing. Students at all levels learn relevant theory, acquire practice skills, and are socialized into the profession of nursing. Increasing levels of complexity and sophistication of learning and socialization are expected of students in the different programs.

Whether at the beginning practice, advanced practice, or scholar level, nursing students learn to apply knowledge, skills, and professional attitudes in their practice which may include educative, administrative, and research arenas. While students have the right and responsibility to participate in their own learning, faculty members have the right and responsibility to structure the teaching/learning environment to facilitate learning. Individual academic counseling and a variety of one-on-one, small-group, and interactive learning formats assist students to meet program and individual learning goals.

research, consultation, leadership, management, and service to the profession and the community. It involves individuals, families, groups, organizations, and communities as clients. The profession must consider the human and physical environments that interact with these clients who may have health conditions that range from wellness to illness.

Nursing activities must include health promotion and maintenance, intervention and treatment, rehabilitation and restoration, and palliation. At

# SCHOOL OF PUBLIC HEALTH

**Linda Rosenstock, Dean**

UCLA  
16-071 Center for the Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772  
(310) 825-5524  
<http://www.ph.ucla.edu>

Now is a great time to be studying public health. Federal investment in public health has increased, and a strong global economy has brought additional resources and attention to the field. Furthermore, public and media interest in public health topics have created many opportunities for the field and UCLA graduates.

The field of public health strives to create healthier communities. Where medicine treats the individual, public health looks to the larger community. Those working in public health focus on efforts to assess the health of people and their environments and develop policies and programs to protect people and help them lead healthier lives.

To achieve these goals, public health crosses many of the traditional boundaries of academic disciplines, drawing from medicine, law, public policy, economics, and biology to name a few. Making water safe to drink and air safe to breathe, controlling toxic waste, halting the spread of infectious disease, promoting the advantages of healthy lifestyles, and minimizing violence in our communities are all examples of public health in action. Increasingly public health is called on to help determine which clinical approaches to an individual health problem are best (outcomes research), and to assess and identify disparities in access to health care, quality of health care, and health status.

The UCLA School of Public Health is among the top public health schools in the country. Offering superior public health training and real-world experience, the school's classrooms and laboratories are under the same roof as the world-renowned UCLA hospital and its medical, dental, and nursing schools. It also shares access to the University's science facilities and schools for engineering, law, management, and public policy.

The school is enriched by its setting in Los Angeles, where diverse cultures, industries, environmental situations, and urban issues provide unparalleled opportunities for research, teaching, and service. Its location provides students and faculty with a unique opportunity to be involved with cutting-edge health care issues as many of the health system changes currently sweeping the country have origins in Southern California.

School of Public Health students can look forward to working with acclaimed public health experts and innovators. Of the school's 180 faculty members, six are members of the prestigious Institute of

Medicine, three are past presidents of the American Public Health Association, and two are former presidents of the International Epidemiological Association.

The school's 600 students are among the most talented and promising in the nation. Culturally diverse, they represent more than 35 countries and nearly every region of the U.S. UCLA School of Public Health graduates are at the forefront of all major public health efforts.

## DEPARTMENTS AND PROGRAMS

The School of Public Health offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences deals with five areas of study and program implementation, including behaviors which prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health education and promotion, public health policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Services deals with the organization, financing, delivery, quality, and distribution of health care services. The school also administers interdepartmental degree programs in environmental science and engineering and in molecular toxicology.

## DEGREES

The school offers the following degrees:

Biostatistics (M.S., Ph.D.)  
Environmental Health Sciences (M.S., Ph.D.)  
Environmental Science and Engineering (D.Env.)  
Epidemiology (M.S., Ph.D.)  
Health Services (M.S., Ph.D.)  
Molecular Toxicology (Ph.D.)  
Preventive Medicine and Public Health (M.S.)  
Public Health (M.P.H., M.S., Dr.P.H., Ph.D.)

---

*The UCLA School of Public Health is among the top public health schools in the country, offering superior public health training and real-world experience*

---

The M.S. and Ph.D. degrees in Public Health are offered through the Department of Community Health Sciences. New students are not being admitted to the M.S. in Preventive Medicine and Public Health at this time.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health, the Doctor of Public Health, and three concurrent degree programs—M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and M.A./M.P.H. with Asian American Studies and with Islamic Studies. Three articulated degree programs—M.D./M.P.H. with the School of Medicine and M.A./M.P.H. with African Studies and with Latin American Studies—are also schoolwide programs.

## ADMISSION

Admission criteria established by the UCLA Graduate Division require a bachelor's degree from a regionally accredited institution comparable in standard and content to a bachelor's degree from the University of California. A scholastic average of B (3.0 on a 4.0 scale) or better is required—or its equivalent if the letter grade system is not used—for the last 60 semester units or last 90 quarter units of undergraduate study and in any postbaccalaureate study. Further requirements for international students are explained in the Graduate Study section. See <http://www.gdnet.ucla.edu/gasaa/admissions>.

Departments in the school may set additional admission requirements that are explained in the Curricula and Courses section of this catalog.

## DEGREE REQUIREMENTS

School of Public Health degree requirements vary according to the department and program. See Curricula and Courses for details or refer to *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu/publications.html>.

## RESEARCH CENTERS

### Center for Health Policy Research

The Center for Health Policy Research applies the expertise of UCLA faculty and researchers to meet national, state, and local community needs to accomplish three missions: (1) to conduct research on national, state, and local health policy issues, (2) to provide public service to policymakers and community leaders, and (3) to offer educational opportunities for graduate students and postdoctoral fellows.

Sponsored by the School of Public Health and the School of Public Policy and Social Research, the center provides a collaborative health policy

research environment where faculty from the Schools of Public Health, Public Policy and Social Research, and Medicine participate in center research projects and in public service and educational activities. One major project is the California Health Interview Survey (CHIS), one of the largest health surveys in the nation.

The center publishes findings in a series of Policy Briefs and Policy Research Reports that make policy information accessible to policymakers, public health and health care leaders, the media, and the public. The center also sponsors lectures and seminars on health policy as well as major public service programs supported by extramural grants.

The center is directed by Professor E. Richard Brown, with Professor Gerald Kominski as associate director, Roberta Wynn as associate director for research, Steven P. Wallace as associate director for public programs, Hongjian Yu as associate director for statistical support, Charles Disogra as associate director for CHIS, and Bernie Dempsey as associate director for finance and administration. See <http://www.healthpolicy.ucla.edu>. ☎310-794-0909

### Center for Health Promotion and Disease Prevention

The Center for Health Promotion and Disease Prevention is operated jointly by the School of Public Health—which engages in teaching and research activities such as studies on the quality of life for men with prostate cancer, manpower requirements for the care of those with HIV, community interventions for asthma control in Latino children, and systems for smoking cessation used by physicians caring for Latino patients—and the School of Medicine—which is involved in clinical activities and teaching.

Five full-time faculty members have primary appointments in School of Medicine clinical departments such as obstetrics, surgery, family medicine, medicine, or pediatrics. They have joint appointments in School of Public Health departments such as community health sciences, health services, or epidemiology.

The center has ties with local and national managed care organizations, as well as with the Veterans Administration and other hospitals and professional organizations. It is the UCLA site for the Pacific AIDS Education and Training Center. The center, directed by Professor Charles E. Lewis, is also responsible for overseeing the Preventive Medicine Residency Program. Dr. Karen Duvall, an assistant clinical professor of family medicine, is the associate director of the residency program.

### Center for Health Services Management

The Center for Health Services Management was established by the School of Public Health and the John E. Anderson Graduate School of Management as UCLA's response to California's challeng-

ing environment for health care management. It brings together the best in university-based research and education with cutting-edge management practices in the health care community, for the benefit of both.

As a laboratory that identifies new challenges and tests new solutions, the center improves management training not only in the degree and certificate programs at the University, but also in management development programs within health care organizations.

The center operates under the direction of a joint University/community guidance committee, and all activities, whether research, teaching, or consultation, involve intense collaboration between health care practitioners and University faculty and students.

Located in the most active and rapidly changing health care environment in the U.S., the center draws on renowned UCLA scholars and teachers—experts in both the organization of health services and in the latest approaches to modern management—and on a dynamic group of alumni, friends, and colleagues in the Southern California health care community who teach, advise, support, and counsel the development of the center.

Codirected by Professors Paul R. Torrens and Victor C. Tabbush, the center conducts activities in three major areas: applied health services management research; education and teaching in a variety of settings and on a variety of levels; and consultation to organizations and individuals about health services management issues. See <http://www.ph.ucla.edu/hs/hsmgt.html>. ☎310-206-3435

### Center for Healthier Children, Families, and Communities

The Center for Healthier Children, Families, and Communities addresses the challenging health and social problems that face children and families and seeks to improve society's ability to provide children with the best opportunities for health, well-being, and the chance to assume productive roles within families and communities.

This unique interdisciplinary partnership unites UCLA departments, schools, and affiliated institutions, including the schools of Public Health, Medicine, Nursing, Education, Law, and Public Policy and Social Research and the Department of Psychology, as well as providers, community agencies, and affiliated institutions. Their combined expertise has been assembled to conduct activities in five major areas: (1) child health and social services, (2) applied research, (3) training of health and social service providers, (4) public policy research and analysis, and (5) technical assistance and support to community providers, agencies, and policymakers. The center is led by three codirectors, Professors Neal Halfon, Jonathan E. Fielding, and Neal Kaufman. See <http://healthy-child.ucla.edu>. ☎310-206-1898

### Center for Human Nutrition

A joint endeavor of the schools of Public Health and Medicine, the Center for Human Nutrition brings together faculty, postdoctoral research fellows, graduate students, and medical students to focus on the roles of nutrition and food in human health and disease. It is closely affiliated with UCLA's Clinical Nutrition Research Unit, which focuses on nutrition and cancer prevention.

Programs include basic biological research; nutrition education for medical, graduate, undergraduate, and postgraduate students; participation in multicenter clinical trials for primary and secondary disease prevention through dietary intervention; and public health and international nutrition. The center maintains core laboratory and research facilities in body composition, dietary assessment and intervention, micronutrient analysis, lipid and hormone analyses, and stable isotope techniques.

Public health and international aspects of the programs include focus on nutrition surveillance of populations, nutritional status and food supply in developing and transitional countries, and nutrition and food policy. The center provides research and field experience for students from UCLA and elsewhere and has several international visiting scholars in residence at most times.

Participating faculty have their academic appointments in Medicine and/or Public Health. ☎310-206-8444 or 825-3738

### Center for Occupational and Environmental Health

The state of California mandated that the Center for Occupational and Environmental Health (COEH) be formed after 1977, when a group of chemical workers became sterile from exposure to the pesticide DBCP, a known carcinogen and reproductive toxin. With branches in the north and south of the state, COEH trains occupational and environmental health professionals, conducts research, and provides services through consultation, education, and outreach. It is the first state-supported institution to provide occupational and environmental health leadership in the U.S.

The COEH branch at UCLA is housed in the Center for the Health Sciences and involves the schools of Public Health, Medicine, Nursing, and Public Policy and Social Research, as well as the Henry Samueli School of Engineering and Applied Science.

Specific COEH programs within the School of Public Health include:

**Environmental Chemistry.** The environmental chemistry program is concerned with the sampling, analysis, and fate/transport of chemicals in the environment. It interprets data on environmental chemicals and hazardous wastes. Environmental chemists are employed in research, government, and industry associated with environmental management, industrial hygiene chemistry, envi-

ronmental toxicology, air pollution, water quality treatment, and other related areas.

**Occupational and Environmental Epidemiology.** Occupational and environmental epidemiologists conduct research to establish causal links between environmental exposure and adverse health outcomes. The study of exposure-response relationship is central to the role of the epidemiologists.

**Occupational and Environmental Medicine.** An occupational medicine residency provides specialty training for physicians in occupational medicine. The program

leads to a master's degree in public health and board eligibility in occupational medicine. In the first year of the program, students take courses in the School of Public Health that lead to the M.P.H. degree. In the second year, they participate in clinical and field rotations under the supervision of the Department of Family Medicine in the School

of Medicine. A joint residency program in occupational medicine is offered with the UC Irvine COEH.

**Occupational Ergonomics.** Occupational ergonomics is the science of designing a work environment compatible with the capabilities and needs of the workforce. The primary goal of the program is to improve the design of the work environment for the prevention of occupational illnesses and injuries. Current research areas include static and dynamic strength modeling, task analysis, and identification and qualification of risk factors for cumulative trauma disorders.

**Occupational Hygiene.** Occupational hygienists are environmental specialists concerned with evaluation and control of the workplace environment for exposure to potentially dangerous agents, physical stresses, biologic agents, and ergonomic effects. Occupational hygienists provide insight into these problems based on their knowledge of the health effects of exposure to the substances involved and the physics and chemistry of the environment. These specialists work as part of interdisciplinary teams with epidemiologists, physicians, nurses, and toxicologists.

**Service Outreach to the Community.** The center has the task of providing expertise in occupational and environmental health to the community. Available services and opportunity for student activities include (1) consultative assistance to physicians, nurses, and occupational hygienists, (2) faculty evaluation of the work environment with potential occupational health hazards and

surveillance of industrial workers exposed to hazardous substances, and (3) continuing education opportunities for professionals and educational programs for workers exposed to potential occupational health hazards. See <http://www.coeh.ucla.edu>.

**Toxicology.** Toxicology is the study of the adverse effects of chemicals and physical agents on living organisms. The goal of the discipline is to understand what agents provide a threat to organisms and how they function in order to minimize their impact. Toxicologists work collaboratively with physicians, nurses, industrial hygienists, and epidemiologists to determine the causes of occupational and environmental disease.

## Center for Public Health and Disaster Relief

The Center for Public Health and Disaster Relief addresses the critical issues faced when a disaster impacts a community. The center provides a curricular focus and research agenda to examine how natural and human-generated disasters affect the public's health. Staff and faculty have multidisciplinary backgrounds that include emergency medicine, environmental health sciences, epidemiology, gerontology, health services, social work, sociology, urban planning, and public health.

Based in the Community Health Sciences department, the center is the first such program in the U.S. to offer multiple graduate-level courses in public health and natural disasters. Center faculty teach such courses as introduction to public health and disasters, program planning and evaluation of disaster preparedness programs, cooperative interagency management from a public health perspective, post-disaster community health, disaster epidemiology, and public health disasters caused by bioterrorism.

Such courses—also available by concurrent enrollment through UCLA Extension—bring together students who have a strong theoretical and research background with individuals who are experienced in disaster management. The synergy between theory and practice provides lively classroom discussions, and enriches the future pool of public health disaster experts. To expose future professionals to the rigorous challenges of this field, graduate student interns may be placed within emergency and disasters units of the Los Angeles County Department of Health Services, the California Emergency Medical Services Authority, the American Red Cross, local government emergency management agencies, and the World Health Organization.

Center staff and colleagues have studied earthquakes in California since the early 1970s. Recent research contributes to the knowledge of human behavior and disaster preparedness before and after earthquakes, emotional and physical injuries, as well as utilization of both medical and disaster services. Similar factors are under study as a follow up to the 1997-98 el niño season. The center

research agenda also includes a cooperative study of earthquake impacts on the U.S. and Japan, and the projected impact of seismic early warning systems on human behavior and injury. The center also develops training designed to prepare public health professionals for potential emergencies including bioterrorism.

A visiting scholars program allows qualified public health and emergency management professionals to spend from one to three quarters studying in the center and working with faculty in areas of disaster public health and research methods.

The center is directed by Professor Steven Rottman, with Professor Linda Bourque as associate director. Professor Kimberley Shoaf is the center's director of research. See <http://www.ph.ucla.edu/cphdr>. ☎310-794-0864.

### Office of Public Health Practice

The School of Public Health plays a unique role in community-based health promotion and disease prevention. To coordinate this important function, the school established the Office of Public Health Practice in 1992. The goals of the office are to (1) establish firm practice links with local and state departments, (2) strengthen the curriculum with innovative community-based public health practice experience, (3) assist policy development affecting public health, (4) develop model interventions to address the leading public health problems of our diverse and multiethnic communities, and (5) develop continuing education programs, including an M.P.H. degree for working professionals. See <http://www.ph.ucla.edu/php>. ☎310-794-7028

### Pollution Prevention Education and Research Center

The Pollution Prevention Education and Research Center (PPER) was established by the schools of Public Health, Engineering and Applied Science, and Public Policy and Social Research to conserve resources, reduce or eliminate the use of toxic substances, and improve human and environmental health through an interdisciplinary program of education, research, and outreach. Faculty and associates offer classes, develop curricula, conduct research, and sponsor outreach activities to promote the principles of pollution prevention across disciplines and institutions.

The center ranks as a leading academic pollution prevention program with impressive accomplishments. Faculty members and associates collaboratively teach innovative multidisciplinary courses that examine pollution prevention opportunities in a variety of industry sectors; develop curricula, case studies, and problem sets for students and professionals in diverse fields; sponsor public seminars and conferences to share pollution prevention information and stimulate discussion; publish books and articles on technology, health, and

policy issues associated with pollution prevention; and participate in workshops and roundtables on the problems associated with toxics use. See <http://www.oxy.edu/departments/pperc>. For more information, contact Professor John R. Froines. ☎310-206-6141

### Southern California Environmental Health Sciences Center

The Southern California Environmental Health Sciences Center (SCEHSC) was established through funding from the National Institute of Environmental Health Sciences (NIEHS). Researchers and professionals from UCLA, University of Southern California, and California Institute of Technology have collaborated to create an interdisciplinary approach to the study and advancement of research in environmental health. As one of the newest of 19 centers across the nation, the SCEHSC primarily focuses on using epidemiologic methods to study effects of the environment on human health, especially with regard to the multiethnic populations of California and the Pacific Rim.

The SCEHSC is organized into an administrative core, five research cores, and four service cores, with the overall goal to understand how environmental factors affect health and how personal factors modify response. Research cores include exposure assessment, respiratory effects, childhood cancer, adult cancer, and statistical methods, while the service cores include analytical chemistry, molecular biology, biological sample processing, and biostatistics.

The center supports an Environmental Health Research Pilot Projects Program to advance research in environmental health by expanding opportunities to pursue larger-scale projects. It also maintains a Community Outreach and Education Program to develop models for community outreach and school curricula to educate the public on how to control, reduce, or eliminate the threat of living with environmental hazards. Dissemination of research findings to the health care, corporate, and policy-making communities and the public at large enables the SCEHSC to facilitate an informed public debate and, ultimately, improved public policies, making it a regional and national resource on environmental health research. For information, contact Professor John R. Froines at (310) 206-6141 or Professor William C. Hinds at (310) 825-7152. See [http://www.usc.edu/schools/medicine/academic\\_departments/preventive\\_med/occ\\_environmental/scehsc](http://www.usc.edu/schools/medicine/academic_departments/preventive_med/occ_environmental/scehsc).

### Southern California Injury Prevention Research Center

Injuries kill more people under the age of 45 than all other causes of death combined. The Southern California Injury Prevention Research Center (SCIPRC) is one of 10 centers in the U.S. that focus

on the problem of intentional (homicide, suicide, abuse) and unintentional (motor vehicle crash, drowning, falls) injuries through three phases of injury control—prevention, acute care, and rehabilitation—addressed through its research, training, and community service components.

The theme of SCIPRC is to research intentional and unintentional injuries among disadvantaged persons and other underserved populations. Highly focused, multidisciplinary community-based research projects are undertaken in collaboration with professionals from public health, medicine, the social sciences, law, and biomechanics affiliated with UCLA, the University of Southern California, Harbor-UCLA Medical Center, Sharp Memorial Hospital, Rancho Los Amigos Medical Center, California State University (Los Angeles), the Los Angeles County Department of Health Services, the Los Angeles County Department of the Coroner, the California State Department of Health Services, the California Office of Traffic Safety, Cal/OSHA, and the California State Coroners' Association.

Graduate students can affiliate with SCIPRC through academic coursework in injury and research experience with ongoing investigations and can apply for support for independent graduate student research. See <http://www.ph.ucla.edu/sciprc/sciprc1.htm>. ☎310-794-2706

### **Southern California NIOSH Education and Research Center**

The Southern California NIOSH Education and Research Center is one of 15 multidisciplinary centers in the U.S. supported by the National Institute

provides student support (fees and stipends for U.S. citizens or permanent residents) and infrastructure support. The center supports approximately 40 graduate students in the field of occupational health. It also supports a continuing education and outreach program, hazardous substances training for hazardous waste workers and industrial hygiene students, and a Pilot Project Research Training Program for ERC trainees. The continuing education program is primarily for professionals in the occupational health field and covers many topics in industrial hygiene, occupational health nursing, occupational medicine, occupational safety, ergonomics, and environmental areas. The center director is Professor William C. Hinds. For more information, e-mail [niosherc@ucla.edu](mailto:niosherc@ucla.edu). ☎310-206-2304

### **Southern California Particle Center and Supersite**

The Southern California Particle Center and Supersite (SCPCS) was established in 1999 through funding from the U.S. Environmental Protection Agency (EPA) and California Air Resources Board (ARB) to study the nature and health effects of airborne particulate matter (PM). The SCPCS is one of five particulate research centers awarded grants as part of an EPA effort to learn more about the health problems caused by exposure to particle pollution. Based in the UCLA School of Public Health, the center includes faculty from throughout UCLA, as well as researchers from the University of Southern California, University of California campuses at Riverside and Irvine, California Institute of Technology, and Rancho Los Amigos Medical Center.

The major objective of the SCPCS is to identify and conduct the highest priority research for PM to ensure protection of the public health. The center seeks to better determine the sources of particulate pollution, probe the chemical nature of particles, and investigate the health effects of breathing particulates. The SCPCS has created a structure to ensure integration of research and to create a research dynamic where findings facilitate new research that deepens understanding of the mechanisms of particle-related toxicity.

Particulates in the South Coast Air Basin include organic compounds from fuel combustion, heavy metals created by erosion, and materials called bioaerosols such as pollen and fungi. By applying new tools, researchers hope to learn about the relative health hazards posed by the different pollutants. SCPCS projects are done in association with the University of Southern California's Children's Health Study, which is following 3,600 school children in 12 local communities to study the chronic health effects caused by air pollution. See <http://www.scpcs.ucla.edu> ☎310-206-1229

for Occupational Safety and Health for education and research in the field of occupational health. The Southern California center is administratively housed in the Department of Environmental Health Sciences. The center supports academic programs in occupational medicine at UCLA and UCI, occupational health nursing, and industrial hygiene at UCLA. For these programs the center

# SCHOOL OF PUBLIC POLICY AND SOCIAL RESEARCH

**Barbara J. Nelson, Dean**

UCLA  
3250 Public Policy Building  
Box 951656  
Los Angeles, CA 90095-1656  
(310) 206-7568  
<http://www.sppsr.ucla.edu>

Established in 1994, the School of Public Policy and Social Research is a leader in redefining policy education, research, and outreach to solve major problems in an era defined by rapid change, increasing complexity, and remarkable diversity. The school's distinctive approach emphasizes solving problems across boundaries, particularly at the growing intersection of the public, private, and nongovernmental sectors.

## DEPARTMENTS AND PROGRAMS

The school combines three academic departments—Policy Studies, Social Welfare, and Urban Planning—and faculty members from such diverse disciplines as economics, geography, history, law, management, and political science. The school trains policy professionals, planners, and social workers for public, private, and nongovernment service, conducts research on significant regional, national, and international issues with a strong interdisciplinary and cross-cultural focus, and acts as a convener and catalyst for public dialogue on important issues.

## DEGREES

School of Public Policy and Social Research graduate programs lead to the following degrees:

Public Policy (M.P.P.)  
Social Welfare (M.S.W., Ph.D.)  
Urban Planning (M.A., Ph.D.)

In addition, seven concurrent degree programs allow students to fulfill the requirements of two graduate degrees simultaneously: M.A.-Urban Planning/J.D., M.P.P./J.D., and M.S.W./J.D. with the School of Law, M.A.-Urban Planning/M.A.-Latin American Studies, M.S.W./M.A.-Asian American Studies, M.A.-Urban Planning/M.B.A. with the John E. Anderson Graduate School of Management, and M.A.-Urban Planning/M.Arch. I with the Department of Architecture and Urban Design. Details about these programs are in the Curricula and Courses section of this catalog. Obtain brochures about the school's programs from the Office of Academic and Student Services, 3371 Public Policy Building.

The school also offers an undergraduate minor in Public Policy and a wide array of undergraduate

courses in policy studies, social welfare, and urban planning. Enrollment in these courses is open to all undergraduate students.

119

SCHOOL OF PUBLIC  
POLICY AND SOCIAL  
RESEARCH

## ADMISSION

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree or professional title from an international institution, each department in the school has limitations and additional requirements. Individuals interested in concurrent

degrees must be admitted to both programs. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

## DEGREE REQUIREMENTS

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For complete degree requirements, see *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu/publications.html>.

## RESEARCH CENTERS

The school houses 12 research centers where faculty from across the campus pursue issues of mutual interest. In addition to their focus on practical policy problems, the research centers also provide opportunities for student financial aid in the form of research assistant positions, grants, and fellowships.

### California Census Research Data Center

The California Census Research Data Center is a partnership between the U.S. Bureau of the Census and the University of California. With laboratories at the School of Public Policy and Social

Research and at UC Berkeley, the center fosters applied research, much of it California-specific, on a wide range of important economic and public policy issues. It provides researchers, on a project-by-project basis, with confidential data from the Census Bureau's business and household data programs. It is the first such center to be established west of Pittsburgh. See <http://www.ccrdc.ucla.edu>.

### Center for Child and Family Policy Research

The Center for Child and Family Policy Research was established in 1984 to conduct and promote

research, training, and community service programs to inform policy and develop needed programs for children and families. The center has a distinguished history of policy analysis, applied research, and program development in such areas as child abuse and neglect, income maintenance, and services for high-risk teenagers and disabled populations. Major policy research projects include a study of methods of preparing youths in

foster care for emancipation and studies of social support and health care use among Korean Americans and Mexican American elderly. See [http://www.sppsr.ucla.edu/res\\_ctr/family.htm](http://www.sppsr.ucla.edu/res_ctr/family.htm).

### Center for Communication Policy

The Center for Communication Policy was established in 1993 as a forum for the discussion and development of policy alternatives addressing the leading issues in media and communication. The center conducts and facilitates research, courses, seminars, working groups, and conferences designed to have a major impact on policy at the local, national, and international levels. The center has launched a groundbreaking new study of the social, political, and economic effects of computer technology and the Internet. Conferences include the Superhighway Summit with the Academy of Television Arts and Sciences, Religion and Prime Time Television with the American Cinema Foundation, and an annual national media conference with Children Now and Stanford University. See <http://ccp.ucla.edu>.

### Center for Globalization and Policy Research

The Center for Globalization and Policy Research acts as a focal point in the School of Public Policy and Social Research and in the UCLA community at large for critical investigations of global policy issues. The center serves as a clearinghouse for both individual and joint research projects and hosts public lectures and occasional conferences on globalization and its effects. The center's work focuses on five main areas of social inquiry and policy making, including the organization and structure of economic systems; processes of migration and social mobility; systems of cultural expression and conflict; the natural and built environments; and structures of governance. See <http://www.sppsr.ucla.edu/cgpr>.

### Center for Health Policy Research

Jointly sponsored by the School of Public Policy and Social Research and the School of Public Health, the Center for Health Policy Research conducts research on the national, state, and local levels, provides testimony, and conducts seminars and forums for government leaders and policymakers both public and private. Research activities emphasize a community- and population-based perspective to improve health outcomes. Current research areas and programs touch on such issues as access to health services, managed care, health care reform, women's health, disease prevention policy, cost issues, and the health policy-making process itself. See <http://www.health-policy.ucla.edu>.

### Center for International Science, Technology, and Cultural Policy

The Center for International Science, Technology, and Cultural Policy facilitates interdisciplinary research on the influences of government policy on the development of the arts and sciences and their commercial and noncommercial expressions, including technology, the media, fashion/design, and other uses of the nation's knowledge capital. The center's mission is to improve the basis for policy decisions by conducting and supporting solid empirical research designed to examine alternative policy models, including the comparison of systems across countries as well as across substantive areas within the same country. Rigorous policy research on these topics requires discipline-based, but also interdisciplinary, research teams that are informed by social science theory. The center promotes dissemination of policy research to governments seeking to make more empirically informed policy decisions. See [http://www.sppsr.ucla.edu/res\\_ctr/cistcp.cfm](http://www.sppsr.ucla.edu/res_ctr/cistcp.cfm).

### Center for Labor Research and Education

Regarded as the flagship of all U.S. labor centers, the Center for Labor Research and Education

plays a unique role as a bridge between the University and the labor community. As part of the Institute of Industrial Relations, the center is a cosponsor, with the Urban Planning Department, of the Community Scholars Program—a dynamic project that brings labor and community leaders to UCLA to study economic development. The center also serves as the West Coast coordinator for the AFL-CIO's George Meany Center, providing summer residential programs for union leaders, and regularly hosts visiting trade unionists and scholars from around the world. A vital part of the center is the Labor Occupational Safety and Health Program, which provides extensive resources and training in the field of workplace safety and health. See <http://labor.sppsr.ucla.edu>.

### Center for Policy Research on Aging

The Center for Policy Research on Aging was formed to address the significant issues of an aging society through policy analysis, dissemination of information, and technical assistance to the public and private sectors. The demographic challenges of a nation growing older and living longer force us to confront the roles of government and the private sector in serving the increasing number of elderly and their families. The center's mission is to conduct research, inform policymakers, link communities to local, state, and federal governments, and foster collaboration among UCLA faculty members. See [http://www.sppsr.ucla.edu/res\\_ctrs/cpra.html](http://www.sppsr.ucla.edu/res_ctrs/cpra.html).

### Institute of Industrial Relations

Established by the California Legislature in 1945, the Institute of Industrial Relations conducts research and community service programs that focus on all aspects of the modern employment relationship involving workers, management, and unions. These issues run the gamut from technological change and workforce preparedness to collective bargaining and macroeconomic policy. Community service programs are directed at the Southern California region as well as the state and nation. Because of the ongoing globalization of the economy, the institute—both in research and community service—increasingly is focusing on international issues. See [http://www.sppsr.ucla.edu/res\\_ctrs/industri.cfm](http://www.sppsr.ucla.edu/res_ctrs/industri.cfm).

### Institute of Transportation Studies

The Institute of Transportation Studies was created in 1993 to conduct research and provide professional education on the social, economic, environmental, and cultural aspects of transportation policy. Research projects have included measuring the efficiency and effectiveness of transit performance, particularly regional rail and bus transit systems in the Los Angeles area; the development of statistically reliable methods for estimating average vehicle occupancy from sampling in the field; and the first major study comparing the

transportation-related impacts of the 1994 Northridge earthquake to the damage inflicted by the 1989 Loma Prieta and 1995 Kobe earthquakes. See <http://www.sppsr.ucla.edu/its>.

### Lewis Center for Regional Policy Studies

The Lewis Center for Regional Policy Studies was established in 1990 with a \$5-million endowment from Ralph and Goldy Lewis to promote the multidisciplinary study, understanding, and solution of regional policy issues, with special reference to Southern California. Research projects include studies on the impact of the North American Free Trade Agreement on Latinos in the U.S., welfare and work, pollution prevention policies, transportation and parking policies, work-residence relationships in restructuring metropolitan areas, and economic development strategies for local areas. With the support of several foundations, the center also has begun a major research program on ethnic and immigration issues, one product of which is the 1996 volume *Ethnic Los Angeles*. See <http://www.sppsr.ucla.edu/lewis>.

### North American Integration and Development Center

The North American Integration and Development Center was created to provide technical assistance to local communities affected by the North American Free Trade Agreement (NAFTA). The center conducts research and offers continuing education programs in cooperation with non-governmental organizations in selected communities to support local economic development efforts and facilitate their relationship with the North American Development Bank (NADBank). The center is developing a comprehensive online database with essential information for economic development planning and makes it available to the public online through custom-designed Internet sites. See <http://naid.sppsr.ucla.edu>.

### UCLA Policy Forum

As the chief outreach arm of the School of Public Policy and Social Research, the UCLA Policy Forum is a leader in promoting dialogue on major issues through its Center for Public Dialogue and in providing training and other programs through the Advanced Policy Institute and the Center for Executive Policy Education. Policy Forum programs include the Senior Fellows Program, in which distinguished policy practitioners are appointed to spend a year engaged in a dialogue with UCLA scholars and in mentoring graduate students. See [http://www.sppsr.ucla.edu/outrch/out\\_pf.html](http://www.sppsr.ucla.edu/outrch/out_pf.html).

# SCHOOL OF THEATER, FILM, AND TELEVISION

**Robert Rosen, Dean**

UCLA  
202 East Melnitz Building  
Box 951622  
Los Angeles, CA 90095-1622  
(310) 825-5761  
<http://www.tft.ucla.edu/>

The School of Theater, Film, and Television consists of the Department of Theater and the Department of Film, Television, and Digital Media, recognized national centers for higher education in production and performance as well as history, theory, and criticism.

Whether exploring the ancient and sacred roots of theater or the latest secular rituals enacted by popular film, creating a dramatic character on a bare stage or a dramatic narrative on screen, writing scripts or scholarly articles, or making digital movies or designing websites, all students in the school study both the aesthetics and cultural significance of theater, film, and television.

Through an intensive, multidiscipline curriculum, the school defines the inherent differences of theater, film, television, and new media, affirms their similarities, and encourages their interaction. As expressive art forms, modes of communication, and cultural interventions, theater, film and television, and digital media have in common the ability and power to reflect and shape our perception of a complex, diverse, and ever-changing world. We believe—as artists and scholars—that we have an obligation to reflect on this power and to use it responsibly.

Situated in the diverse and culturally rich environment of Los Angeles and drawing on the many resources of the campus at large, including the UCLA Performing Arts, Geffen Playhouse, and UCLA Film and Television Archive, the school provides the ideal setting for students to engage in the study and practice of art forms essential to a healthy and dynamic society.

## DEPARTMENTS AND PROGRAMS

The Department of Theater and the Department of Film, Television, and Digital Media are essential components of the rich intellectual, cultural, and professional life of UCLA. Depending on the degree involved, the school's programs are either strongly professional in nature or oriented toward advanced scholarly study and research in an atmosphere that recognizes and often draws on studio practice.

Students in undergraduate courses receive a broadly based, liberal education within the context of either theater or film and television.

The Master of Fine Arts degree programs prepare talented and highly motivated students for careers in the worlds of theater, film, television, and digital production. The M.A. and Ph.D. programs engage students in the critical study and research of these media, including their history, aesthetics, and theory, and prepare students for advanced research within the context of college and university teaching, as well as for writing and research in a variety of media-related professions.

In the Department of Theater, approximately 350 undergraduate and 125 graduate students interact with over 40 faculty members, outstanding guests of national and international standing, and a professional staff of 35 in an exciting artistic community of theater production and study. Resources include the four theaters of the Macgowan Hall complex, with the latest technologies needed for the creation, control, and integration of scenery, lighting, and sound. Specializations in the Master of Fine Arts program include acting, directing, playwriting, design, technology and production management, and the producers program.

The Department of Film, Television, and Digital Media includes both production and critical studies programs, with approximately 265 graduate and 60 undergraduate students. The 50 faculty members include leading scholars as well as members of the Los Angeles and international film and television professional communities. In production, graduate specializations are offered in the areas of film and television production, screenwriting, animation, and the producers program. The critical studies program offers M.A. and Ph.D. degrees for the advanced scholarly study of film and television. The department's resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, a complete animation laboratory for both traditional and computer-generated animation, and a laboratory and research facility for digital media.

The M.A. and Ph.D. programs are supported by the collections of the University's libraries and the UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress. This archive forms a unique and priceless resource for research and classroom instruction. M.A. and

Ph.D. faculty members and students also participate in various campus organized research units.

School of Theater, Film, and Television brochures are available from the Student Services Office, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall. ☎310-825-8328

## DEGREES

The school offers the following degrees:

Film and Television (B.A., M.A., M.F.A., C.Phil., Ph.D.)

Theater (B.A., M.A., M.F.A., C.Phil., Ph.D.)

## UNDERGRADUATE ADMISSION

In addition to the University of California Undergraduate Application, departments in the School of Theater, Film, and Television require applicants to submit additional supporting materials. Information on departmental requirements is mailed to students on receipt of their application. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.

## UNDERGRADUATE DEGREE REQUIREMENTS

School of Theater, Film, and Television students must meet three types of requirements for the Bachelor of Arts degree:

1. University requirements
2. School requirements
3. Department requirements

## UNIVERSITY REQUIREMENTS

The University of California has two requirements that undergraduates must satisfy in order to graduate: (1) Subject A or English as a Second Language and (2) American History and Institutions. See Degree Requirements in the Undergraduate Study section for details.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

## SCHOOL REQUIREMENTS

The School of Theater, Film, and Television has general requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, and general education.

## Unit Requirement

Students must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and 8 units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, 8 of which may be applied to the major. All 199 courses must be taken for a letter grade.

## Scholarship Requirement

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

### STRUCTURE OF A DEGREE

#### University Requirements

1. Subject A or English as a Second Language
2. American History and Institutions

#### School of Theater, Film, and Television Requirements

1. Unit
2. Scholarship
3. Academic Residence
4. General Education Requirements
  - a. Writing
    - English Composition and Rhetoric
    - Critical Reading and Writing
  - b. Foreign Language
  - c. Literature
  - d. General Education Courses

#### Department Requirements

1. Preparation for the Major
2. The Major

Courses that do not satisfy University, school, or department requirements are referred to as electives and are used to meet the minimum unit requirement for graduation.

## Academic Residence Requirement

Students are in residence while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units

completed for the bachelor's degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

## General Education Requirements

The general education (GE) requirements of the school include (1) writing, (2) foreign language, (3) literature, and (4) general education course requirements.

### Writing Requirement

To satisfy school writing requirements students must complete both the English Composition and Rhetoric and the Critical Reading and Writing requirements.

**English Composition and Rhetoric.** English Composition 3, 3H, or English as a Second Language 36 with a minimum grade of C must be completed by the end of the third term at UCLA and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 4 also meets this requirement.

**Critical Reading and Writing.** One course from the Letters and Science Writing II course list (see <http://www.registrar.ucla.edu/schedule>) with a minimum grade of C should be completed by the end of the sophomore year and may not be taken on a Passed/Not Passed basis. Comparative Literature 2AW, 2BW, or 2CW may not be applied toward the literature requirement if taken to meet this requirement.

### Foreign Language Requirement

The Foreign Language requirement can be satisfied by one of the following methods: (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language test in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA's level three or above with an average grade of C or better.

International students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

### Literature Requirement

Three courses (12 units) in literature are required, at least one of which must be upper division. Any literature course taken in the original language can fulfill this requirement. Letters and Science Writing II courses may not be applied toward the critical reading and writing requirement if taken to meet this requirement.

### GE Courses Requirement

The GE courses requirement of the school introduce undergraduates to the diversity of the various academic disciplines in art and philosophy, the social sciences, and sciences.

**Reciprocity with Other UC Campuses.** Students who transfer to UCLA from other UC campuses and have met all GE requirements prior to enrolling at UCLA are not required to complete the School of Theater, Film, and Television GE requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

**Intersegmental GE Transfer Curriculum.** Transfer students from California community colleges have the option to fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all UCLA GE requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the School of Theater, Film, and Television GE course requirements.

# SCHOOL OF THEATER, FILM, AND TELEVISION GENERAL EDUCATION COURSE LIST

For specific courses that fulfill the general education requirements, refer to the lists below or consult the Student Services Office before enrolling. Courses that include the study of theater, film, or television may not be applied toward any general education requirements.

## A. ART AND PHILOSOPHY

Five courses (20 units), with no more than two courses from any single group:

### A1. GROUP A

#### Art History

- 50. Ancient Art
- 51. Medieval Art
- 54. Modern Art
- 55A. Introduction to African Art
- 55B. Arts of Pre-Columbian America
- 56A. Art of India and Southeast Asia
- 56B. Introduction to Chinese Art
- 57. Renaissance and Baroque Art

#### Classics

- 51A. Art and Archaeology of Classical World: Greece
- 51B. Art and Archaeology of Classical World: Rome

### A2. GROUP B

#### Folklore and Mythology

- CM136. Carnival and Festivity

#### Women's Studies

- CM143. Women Healers, Ritual, and Transformation

#### World Arts and Cultures

- 100A. Art as Social Action
- 100B. Art as Moral Action
- 102. Seminar: Intercultural and Interdisciplinary Performance
- 106B. Dance in Africa and African Diaspora
- C109B. Dance in Native American Cultures
- CM140. Women Healers, Ritual, and Transformation
- CM141. Carnival and Festivity
- 149. Dance in the Multicultural U.S.
- 150. History of Dance in Culture and Performance
- C155. Self and Culture
- 181. Ethnographic Film
- 182. Dance and the Visual Media

### A3. GROUP C

#### Afro-American Studies

- M110A, M110B. African American Musical Heritage

#### Chicana and Chicano Studies

- M108A. Music of Latin America

#### Ethnomusicology

- 20A, 20B, 20C. Musical Cultures of the World
- M108A, 108B. Music of Latin America
- M110A, M110B. African American Musical Heritage
- 113. Music of Brazil
- C136A, C136B. Music of Africa
- 147. Survey of Classical Music in India
- 174. Aesthetics of Music

#### Folklore and Mythology

- M154A, M154B. African American Musical Heritage

#### Music

- 15. Art of Listening

#### Music History (Musicology)

- 2A, 2B. Introduction to Literature of Music
- 13. 20th-Century Music of the Western World
- 133. Bach
- 134. Beethoven
- 135A, 135B, 135C. History of Opera

### A4. GROUP D

#### Philosophy

- 1. Beginnings of Western Philosophy
- 2. Introduction to Philosophy of Religion

- 4. Philosophical Analysis of Contemporary Moral Issues
- 5A. Philosophy in Literature
- 6. Introduction to Political Philosophy
- 7. Introduction to Philosophy of Mind
- 8. Introduction to Philosophy of Science
- 9. Principles of Critical Reasoning
- 21. Skepticism and Rationality
- 22. Introduction to Ethical Theory

## B. SOCIAL SCIENCES

Three courses (12 units), with no more than two courses from any single group. Whenever possible, two courses from a single sequence are recommended:

### B1. GROUP A

#### Chinese (East Asian Languages)

- 50. Chinese Civilization

#### Classics

- 10. Survey of Classical Greek Culture
- 20. Survey of Roman Civilization

#### East Asian Languages and Cultures

- 60. Introduction to Buddhism

#### Folklore and Mythology

- M15. Introduction to American Folklore Studies

#### German (Germanic Languages)

- 100A. German History and Culture before 1500
- 100B. German History and Culture from 1500 to 1914
- 100C. German History and Culture from 1914 to the Present

#### Italian

- 42A. Italy through the Ages in English: Holy Roman Empire to Sack of Rome
- 42B. Italy through the Ages in English: Late Renaissance to Post-modern Period

#### Japanese (East Asian Languages)

- 50. Japanese Civilization

#### Jewish Studies (Near Eastern Languages)

- 10. Social, Cultural, and Religious Institutions of Judaism

#### Korean (East Asian Languages)

- 50. Korean Civilization

#### Portuguese (Spanish and Portuguese)

- M42. Civilization of Spain and Portugal
- M44. Civilization of Spanish America and Brazil

#### Russian (Slavic Languages)

- 99A. Introduction to Russian Civilization
- 99B. Russian Civilization in the 20th Century

#### Spanish (Spanish and Portuguese)

- M42. Civilization of Spain and Portugal
- M44. Civilization of Spanish America and Brazil

#### Women's Studies

- 10. Introduction to Women's Studies: Feminist Perspectives on Women and Society

#### World Arts and Cultures

- M22. Introduction to American Folklore Studies

### B2. GROUP B

#### Communication Studies

- 10. Introduction to Communication Studies

#### History

- 1A, 1B, 1C. Introduction to Western Civilization
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
- 4. Introduction to History of Religions
- 8A. Colonial Latin America

- 126 8B. Political Economy of Latin American Underdevelopment, 1750 to 1930  
 8C. Latin American Social History  
 9A. Introduction to Asian Civilizations: History of India  
 9C. Introduction to Asian Civilizations: History of Japan  
 9D. Introduction to Asian Civilizations: History of the Near and Middle East  
 10A, 10B. Introduction to Civilizations of Africa  
 11A, 11B. History of China  
 13A. History of the U.S. and Its Colonial Origins: Colonial Origins and First Nation Building Acts  
 13B. History of the U.S. and Its Colonial Origins: 19th Century  
 13C. History of the U.S. and Its Colonial Origins: 20th Century  
 148A. U.S., 20th Century: 1900 to 1928  
 148B. U.S., 20th Century: 1929 to 1960  
 148C. U.S. since 1960

#### Political Science

10. Introduction to Political Theory  
 20. World Politics  
 40. Introduction to American Politics  
 50. Introduction to Comparative Politics

### B3. GROUP C

#### Anthropology

8. Archaeology: An Introduction  
 9. Culture and Society  
 33. Culture and Communication

#### Psychology

10. Introductory Psychology

#### Sociology

1. Introductory Sociology  
 2. Changing Society and Making History  
 3. Sociology of Everyday Life  
 4. Jobs and Careers: Sociological Approach  
 31. Dilemmas of Third World Development

## C. SCIENCE

One course (4 units) in physical sciences and one course (4 units) in biological sciences:

### C1. PHYSICAL SCIENCES

#### Astronomy (Physics and Astronomy)

- 2A, 2B. Introduction to the Physical Universe  
 3. Astronomy: Nature of the Universe  
 4. Universe of Stars and Stellar Systems  
 5. Life in the Universe  
 6. Cosmology: Our Changing Concepts of the Universe

#### Atmospheric Sciences

2. Air Pollution  
 3. Introduction to the Atmospheric Environment  
 4. California Weather and Climate  
 5. Climates of Other Worlds  
 6. Climate and Climatic Change

### Chemistry and Biochemistry

2. Introductory Chemistry  
 15. Survey of Organic Chemistry and Biochemistry

### Earth and Space Sciences

1. Introduction to Earth Science  
 5. Environmental Geology of Los Angeles  
 8. Earthquakes  
 9. Origin and Evolution of Solar System  
 15. Introduction to Oceanography

### Geography

1. Physical Environment

### Mathematics

2. Finite Mathematics  
 3A, 3B. Calculus for Life Sciences Students  
 31A, 31B. Calculus and Analytic Geometry

### Physics (Physics and Astronomy)

- 1A. Physics for Scientists and Engineers: Mechanics  
 1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields  
 1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity  
 6A. Physics for Life Sciences Majors: Statics and Dynamics  
 6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics  
 6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport  
 10. Physics

## C2. BIOLOGICAL SCIENCES

### Anthropology

7. Human Evolution  
 10. Principles of Human Evolution: Genetic Basis  
 12. Principles of Human Evolution: Comparative Analysis

### Earth and Space Sciences

16. Major Events in History of Life

### Geography

2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World  
 5. People and the Earth's Ecosystems

### Microbiology and Molecular Genetics

6. Introduction to Microbiology  
 7. Developments in Biotechnology

### Molecular, Cell, and Developmental Biology

30. Biology of Cancer  
 40. AIDS and Other Sexually Transmitted Diseases  
 70. Genetic Engineering and Society

### Organismic Biology, Ecology, and Evolution

10. Plants and Civilization  
 13. Evolution of Life  
 21. Field Biology  
 25. Marine Biology

### Psychology

15. Introductory Psychobiology

## DEPARTMENT REQUIREMENTS

School of Theater, Film, and Television departments generally set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major (lower division courses) and (2) the Major (upper division courses). Lower division Preparation for the Major courses should be completed before beginning upper division work.

### Preparation for the Major

A major requires completion of a set of lower division courses known as Preparation for the Major. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

### The Major

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). The Theater major includes both lower and upper division courses. Those listed under Preparation for the Major (lower division) must be completed before upper division major work is undertaken. The Film and Television major requires upper division work only.

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the school must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

**Individual Majors.** Highly motivated students who believe that no single major accommodates their specific interests and goals may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and must explain the intent concerning the anticipated program of study and reasons why the academic goals cannot be achieved within an existing major. Proposals must be submitted no later than the end of the sophomore year. Transfer students must complete at least one term of residency at UCLA before proposing an individual major. Students interested in designing an individual major should consult the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building. ☎310-206-8441

**Double Majors.** Double majors in the School of Theater, Film, and Television and other academic units are not permitted.

## POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations, including the following:

### Student Responsibility

Students should take advantage of academic support resources, but students are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

### Study List

The Study List is a record of classes that a student is taking for a particular term. Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 17 units (up to 20 units maximum) if they have an overall grade-point average of 3.0 (B) or better **and** have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the third week of instruction.

If students have not filed their Study List by the end of the second week of classes, they must obtain the consent of the dean of the school to continue for that term.

### Minimum Progress

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

### Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted except in extraordinary circumstances. No credit is given for courses taken concurrently elsewhere without the approval of the school.

### Credit Limitations

The following credit limitations apply to all undergraduates in the school.

**Advanced Placement Tests.** Credit earned through the College Board Advanced Placement (AP) Tests may be applied toward GE requirements. Portions of AP Test credit may be evaluated by corresponding UCLA course numbers (such as History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

**UCLA Extension.** UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

**Graduate Courses.** Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet specific requirements. Courses numbered in the 400 and 500 series may not be applied toward the degree.

## COUNSELING SERVICES

The School of Theater, Film, and Television offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check.

Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building. ☎310-206-8441

## HONORS

School of Theater, Film, and Television students who achieve scholastic distinction may qualify for the following honors and programs.

### Dean's Honors

To receive Dean's Honors in the School of Theater, Film, and Television, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean's Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

### Latin Honors

Latin Honors are awarded at graduation to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are cum laude, an overall average of 3.758; magna cum laude, 3.814; summa cum laude, 3.860. See the *Schedule of Classes* for the most current calculations of Latin honors.

## Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously. For details, contact the Student Services Office in 103 East Melnitz Building.

## GRADUATE STUDY

The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, UCLA Film and Television Archive, Geffen Playhouse, special collections of the Arts Library, and the University's exhibition and performance halls.

The producers program is an M.F.A. management program in the Departments of Theater and Film, Television, and Digital Media, with options in either theater or film and television.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of these areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division. Donor awards are available through the School of Theater, Film, and Television.

## Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

## Degree Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for information and procedures. For complete degree requirements, see *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu/publications.html>.

# Curricula and Courses

## COURSE LISTINGS

In the following section, curricula and courses are listed alphabetically with the college or school administering the program identified in the program heading. Every effort has been made to ensure the accuracy of the information presented. However, all courses, course descriptions, instructor designations, and curricular degree requirements described herein are subject to change or deletion without notice. For up-to-date information, consult the *Schedule of Classes* or visit <http://www.registrar.ucla.edu/schedule/>.

For a complete outline of graduate degree requirements, see *Program Requirements for UCLA Graduate Degrees* available on the Graduate Division website at <http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm>.

## Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. **Lower division courses (numbered 1-99)** are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

**Upper division courses (numbered 100-199)** are open to all students who have met the requisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

**Lower division/first-year seminars (numbered 88)** are departmentally sponsored courses designed to provide freshmen and sophomores the opportunity to participate in small classroom settings to enhance writing, verbal, and analytical skills. Many carry general education credit.

**Variable topics courses (numbered 97 and 197)** are offered at both the lower (97) and upper (197) division levels; topics within a defined subject area vary with the instructor and individual offerings. These topics have a fixed and permanent place in the regular curriculum.

**Professional schools seminars (numbered 98)** are designed by the faculty of the professional schools specifically for freshmen and sophomores. Outside the professional schools, 98 courses are often offered as the lower division equivalent of 198 courses, defined below. Because they are temporary in nature, vary in content, and are offered irregularly, they are not

listed in the catalog. Consult the *Schedule of Classes* for respective offerings.

**Group special studies courses (numbered 198)** are structured special studies for groups. They may be departmentally sponsored experimental and/or temporary in nature (e.g., courses taught by a visiting professor) or those which are being tested for permanent inclusion in the curriculum. Because they are temporary in nature, vary in content, and are offered irregularly, they are not listed in the catalog. Consult the *Schedule of Classes* for respective offerings.

**Individual special studies courses (numbered 199, 199F, 199H, and 199I)** involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are structured by the instructor and student at the time they are initiated and are open to juniors (with a minimum 3.0 grade-point average in the major field), seniors, and graduate students. To enroll, students must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, and/or 199I courses per term. After completing 16 units of 199 and/or 199H credit on a letter grade basis, students must take any additional 199 and/or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. Students with an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific requisites and credit limitations.

## Graduate Courses

**Graduate courses numbered 200-299** are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If students take a graduate course as an undergraduate, they may not apply that same course later toward a higher degree.

**Graduate courses numbered 300-399** are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree

only at the discretion of the individual college or school.

**Graduate courses numbered 400-499** are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

**Individual study and research courses (numbered 500-599)** are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596, directed individual study or research; 597, preparation for master's comprehensive or doctoral qualifying examination; 598, master's thesis research and preparation; and 599, doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with USC.) See individual departmental listings for specific limitations on 500-series courses.

Note: These definitions do not apply to the School of Law, which maintains its own course numbering system.

## UCLA Extension Courses

In general, students may not attend UCLA Extension for degree credit if they are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see Concurrent Enrollment in the Academics section of this catalog.

## Concurrent and Multiple Listings

**Concurrently scheduled courses** (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

**Multiple-listed courses** (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Language in Culture is offered by the Department of Anthropology (Anthropology M140) and the Department of Linguistics (Linguistics M146). The course is listed under both departments.

Kereopatse W. Kgositsile, Ph.D. (*English*)

## Scope and Objectives

The basic objective of the African Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including the social sciences, humanities, and professional fields. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in several professional schools on campus. An articulated degree program is also offered.

Academic flexibility draws many students to the program. Because there are more than 30 active faculty members on campus with African interest and experience in many disciplines, students have multiple options to design individualized programs.

According to a recent survey, 45 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 30 percent work with international or foreign organizations in 20 countries.

The program also offers the undergraduate African Studies minor that is designed primarily for students who (1) want to learn more about Africa, (2) plan to live and work in Africa or who are interested in government and public service careers involving African affairs, and/or (3) plan to pursue graduate work related to Africa and international studies.

## Undergraduate Study

### African Studies Minor

The African Studies minor can be taken jointly only with work toward a bachelor's degree, normally in combination with one of the following fields: Afro-American studies, anthropology, art history, comparative literature, English, ethnomusicology, film and television, folklore and mythology, French, geography, Germanic languages, history, linguistics, Near Eastern languages and cultures, political science, theater, or world arts and cultures. The faculty adviser certifies completion of the program.

To enter the minor, students must have an overall grade-point average of 2.0 or better and have completed 45 units and a three-term sequence of an African language prior to or concurrent with coursework in the minor. Languages may include Hausa, Swahili, Wolof, Zulu, and Afrikaans or, by petition to the minor counselor, another African language. Students must file a petition and meet with the student affairs counselor, African Studies Center, 10373 Bunche Hall, (310) 825-2944.

*Required Lower Division Courses (8 to 9 units):* History 10A, 10B (or 10BH or 10BW).

*Required Upper Division Courses (20 to 25 units):* Three courses selected from a list of designated core courses that offer exclusively African content and two courses from either the core list and/or an expanded list that includes courses with African content of at least 50 percent (consult the faculty adviser for recommended African-related courses). Students may petition to apply other topical courses when taught with an African content of 50 percent or more. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

For more information, contact the Student Affairs Counselor, African Studies Center, 10373 Bunche Hall (310-825-2944) or Professor Russell G. Schuh, Linguistics, 3125 Campbell Hall (310-206-2663, 825-0634).

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The African Studies Program offers the Master of Arts (M.A.) degree in African Studies.

## Admission

### M.A. in African Studies

In addition to the University minimum requirements, applicants to the M.A. program are required to (1) submit three letters of recommendation, which normally should be from academic referees, (2) present a dossier containing a résumé describing academic, African-related, and professional experience and a research paper or other writing sample that

well demonstrates their writing and analytical skills, and (3) take the Graduate Record Examination (GRE) General Test.

Also, applicants should have adequate preparation in undergraduate fields related to the program. Required preparation for the M.A. degree most typically consists of a B.A. in the social sciences, humanities, or fine arts.

### African Studies M.A./Public Health M.P.H.

The African Studies Program and the School of Public Health have an articulated degree program whereby students can work sequentially for the M.A. in African Studies and the M.P.H. By planning the major field emphasis in public health while working toward the M.A. in African Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Studies Program, UCLA African Studies Center, and/or the Student Services Office, UCLA School of Public Health.

## Master's Degree

Students choose a disciplinary (or interdisciplinary) concentration that requires at least five courses. Most concentrations are in the social sciences, fine arts, humanities, public health, or urban and regional planning. Sociology and anthropology may be taken as a combined major, as may interdisciplinary courses in development studies.

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires permission from the graduate adviser. A minimum of nine courses is required for the M.A., at least five of which must be at the graduate level. A minimum of four other courses outside the major area is required, of which three must be at the graduate level.

There is a language requirement for this degree.

## African Studies

### Graduate Courses

**201. Africa and the Disciplines. (4)** Seminar, four hours. Major intellectual trends and currents in development of African studies. Emphasis on appreciation of multidisciplinary background of African studies and relevant interpretive strategies. Central questions, critical issues, and current problems affecting Africa. Content varies each year. Letter grading.

**M229B. Africana Bibliography and Research Methods. (4)** (Same as Information Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate African studies students. May be repeated, but only 4 units may be applied toward minimum graduate course requirement. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination. (4)** Tutorial, to be arranged. Limited to graduate African studies students. Normally taken only during term in which student is being examined. May not be applied toward minimum graduate course requirement. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4)** Tutorial, to be arranged. Limited to graduate African studies students. Normally taken only during term in which student intends to complete M.A. thesis. May not be applied toward minimum graduate course requirement. S/U grading.

## Course List

### African Studies

All courses are not offered every academic year. Students should verify courses with the respective departments.

Courses with asterisks are special courses which may be applied toward the M.A. degree requirements with prior approval of the graduate adviser. These courses either do not exclusively focus on Africa or focus on Africa only in certain years.

#### African Languages (Linguistics)

- 1A-1B-1C. Elementary Swahili
- 2A-2B-2C. Intermediate Swahili
- 7A-7B-7C. Elementary Zulu
- 8A-8B-8C. Intermediate Zulu
- 11A-11B-11C. Elementary Yoruba
- 12A-12B-12C. Intermediate Yoruba
- 15. Intensive Elementary Swahili
- 31A-31B-31C. Elementary Bambara
- 32A-32B-32C. Intermediate Bambara
- 41A-41B-41C. Elementary Hausa
- 42A-42B-42C. Intermediate Hausa
- 61A-61B-61C. Elementary Wolof
- 62A-62B-62C. Intermediate Wolof
- 97. Elementary and Intermediate Studies in African Languages
- 103A-103B-103C. Advanced Swahili
- 109A-109B-109C. Advanced Zulu
- 123A-123B-123C. Advanced Yoruba
- 143A-143B-143C. Advanced Hausa
- M190. Survey of African Languages
- 199. Special Studies in African Languages
- 202A-202B-202C. Comparative Bantu

#### Afrikaans (Germanic Languages)

- 105A. Elementary Afrikaans
- 105B. Intermediate Afrikaans
- 114. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Preapartheid to Postapartheid Era, in English Translation
- 135. Introduction to Afrikaans Literature
- 199. Special Studies in Afrikaans

#### Afro-American Studies

- \*M102. Culture, Media, and Los Angeles

#### Anthropology

- \*112. Old Stone Age Archaeology
- \*M115A-M115B. Historical Archaeology
- \*121A. Primate Fossil Record
- \*121B. Australopithecines
- \*121C. Evolution of Genus *Homo*
- \*133R. Aesthetic Systems
- \*150. Study of Social Systems
- \*M154P. Gender Systems: North American

- \*M154Q. Gender Systems: Global
- \*156. Comparative Religion
- \*158. Hunting and Gathering Societies
- \*161. Development Anthropology
- \*M168. Culture, Illness, and Healing
- 171. Sub-Saharan Africa
- \*212P. Selected Topics in Hunter/Gatherer Archaeology
- \*230Q. Theories of Culture
- \*250. Selected Topics in Social Anthropology
- \*252P. Comparative Systems of Social Inequality
- \*254. Kinship
- \*255. Comparative Political Institutions
- 271. Contemporary Problems in Africa

#### Applied Linguistics and Teaching English as a Second Language

- C112. Reading for Second/Foreign Language Education

#### Art History

- \*55A. Introduction to African Art
- \*101A. Egyptian Art and Archaeology
- \*101B. Egyptian Art and Archaeology of the Middle and New Kingdoms
- 118C. Arts of Sub-Saharan Africa
- C119A. Advanced Studies in African Art: Western Africa
- C119B. Advanced Studies in African Art: Central Africa
- \*201. Topics in Historiography of Art History
- \*C203A-\*C203B. Museum Studies
- C216A. Advanced Studies in African Art: Western Africa
- C216B. Advanced Studies in African Art: Central Africa
- 219C. African Art
- \*220. Oceanic, Pre-Columbian, African, and Native North American Art

#### Berber (Near Eastern Languages)

- \*101A-101B-101C. Elementary Berber
- \*102A-102B-102C. Advanced Berber
- \*130. The Berbers
- \*199. Special Studies in Berber Languages

#### Community Health Sciences

- \*200. Global Health Problems
- \*231. Maternal and Child Nutrition
- \*233. Hunger and Food Insecurity as Public Health Issues
- \*246. Women's Roles and Family Health
- \*M251. Human Resources and Economic Development
- \*280. International Health Education: Training and Development
- \*M294. Social and Behavioral Factors of HIV/AIDS: Global Perspective
- \*430B. Advanced Issues in International Health
- \*434A. Maternal and Child Health in Developing Areas
- \*434B. Recent Developments in Maternal and Child Health in Disadvantaged Countries
- \*441. Advanced Program Planning and Evaluation in International Health
- \*443. Assessment of Family Nutrition
- \*445. Food and Nutrition Planning: Policies and Programs in World Context
- \*446. Nutrition Education and Training: Third World Considerations
- \*448. Nutrition Policies and Programs: Domestic and International Perspectives

#### Economics

- \*110. Economic Problems of Underdeveloped Countries
- \*111. Theories of Economic Growth and Development

- \*112. Policies for Economic Development
- \*190. International Economics
- \*191. International Trade Theory
- \*192. International Finance
- \*281A. International Trade Theory
- \*281B. International Finance
- \*281C. International Economics
- \*282A-282Z. Topics in International Economics
- \*286A. Economic Development
- \*286B. Cost-Benefit Analysis of Development Projects
- \*287A-287Z. Topics in Development Economics

**Education**

- \*C203. Educational Anthropology
- \*204B. Introduction to Comparative Education
- \*204C. Education and National Development
- \*204D. Minority Education in Cross-Cultural Perspective
- \*204E. International Efforts in Education
- \*238. Cross-National Analysis of Higher Education
- \*252B. Seminar: Education and Social Change
- \*253A. Seminar: Current Problems in Comparative Education
- 253B. Seminar: African Education
- \*253F. Seminar: Education in Revolutionary Societies

**English**

- M111G. Oral Traditions in Africa

**Scope and Objectives**

Originally born during the late 1960s and early 1970s, the Afro-American Studies major was designed to fill a void that existed at UCLA in terms of scholarly and curricular material relevant to the African American experience. Students and faculty currently associated with the program see the major as meeting a number of academic, personal, and social needs.

The program offers both a Bachelor of Arts and a Master of Arts degree. While it is important that students become expert within a traditional discipline, it is even more important that they examine both the truth and the fiction regarding the African American experience in the U.S. For African American students, this leads to a heightening of self-awareness and self-pride. For non-African American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of African Americans. This goal is achieved in two primary ways. First, it provides an interdisciplinary exposure to particular features of the African American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of African America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

**Undergraduate Study**

**Afro-American Studies B.A.**

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates.

**Preparation for the Major**

*Required:* History 10A and the courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (requisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): *anthropology* — Anthropology 8, 9,

10 (or 7), 12; *economics* — Economics 1, 2, M40, Mathematics 3A, 31E (or 3A and 3B, or 31A and 31B); *English* — English Composition 3, English 4W, 10A, 10B, 10C (all must be taken in sequence); *history* — History 1A, 1B, 1C, 10B, 13A, 13B, 13C, and 99 or 100; *philosophy* — Philosophy 4, 21, 22, 31; *political science* — Economics 1, Political Science 6, 20, 40, Sociology 1; *psychology* — Anthropology 7, Mathematics 2, Physics 10 (or 1A or 6A), Psychology 100A, 100B, one year of high school chemistry (or Chemistry and Biochemistry 2 or 20A); *sociology* — Afro-American Studies M5 or Anthropology 34, Anthropology 9, Mathematics 2, Sociology 1, M18. Students are strongly urged to complete the required lower division courses within the first two years of the major.

**Transfer Students**

To be admitted as Afro-American Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one civilizations of Africa course and additional coursework in one of the eight areas of concentration.

**The Major**

*Required:* (1) Anthropology M164, English M104A or M104B or M104C, History M158B, M158C; (2) four upper division and/or graduate courses in Afro-American studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved courses listed below; (4) two upper division electives outside the department of concentration selected from the approved courses list. Note: Students may petition the committee that administers the degree program to have a course not on the approved list accepted for the major. In arranging a course of study, students should select a combination of courses that best meets their current and future educational and career goals.

**Approved courses** (recommended courses are indicated by an asterisk):

Afro-American Studies \*100B, \*C101, \*M104A, \*M104B, \*M104C, \*M144, \*M145, \*M158A, \*M158B, \*M158C, \*M158E, \*M164, \*M172, \*M197A, \*197B, \*199

Anthropology 110, \*111, 115P, 120, 124, \*130, 135A, 135B, M136Q, 138, \*M140, 142A, 142B, \*M145, \*150, \*M151, \*152, \*153, M154P, M154Q, 158, 161, \*M164, \*167, M168, \*171, 180, 182, 186, \*199

Economics \*11, \*101, \*102, 107, \*110, 111, 112, \*120, 130, 133, M135, M136, 144, 147A, 147B, 150, \*151, 160, 161, \*180, 183, \*M188A through \*188Z, 190, 191, 192, \*199

English 80, 85, 95A, 95B, 95C, 100, \*M104A, \*M104B, \*M104C, M105A, 106, M107A, M107B, M107C, 108A, 108B, \*109, \*M111A, 114, 115A, 118, 140A, 140B, 141A, 141B, 142A, 142B, 143, 171A, 171B, 173B, 174B, \*178, 188, 189, \*190, \*M197A, \*199

English Composition 131A through 131D, 136A, 136B, 136C

History 99, 100, M104A, M104B, 107A, 107B, 109A, 109B, 135A, 135B, \*145A, \*145B, \*146, \*147A, 147B, 148A, 148B, 148C, 149A, 149B, \*154A, \*154B, \*156A through 156D, \*M158A through \*M158E, M159A, M159B, 160A, 160B, 161, 166, \*M175A, \*175B, \*175C, 176A, 176B, 177, 178A, 178B, 179A, 179B, 193A, \*199

Philosophy 100A, 100B, M101A, M101B, M102, \*104, 124, 125, \*126, 129, \*150, 151A, 151B, 153A, C156, 166, \*172, 178, 182, \*M192, \*199

Political Science \*102, \*104A, \*104B, \*M105, \*M106, 111A, 111B, 111C, 113, \*114A, \*114B, \*116, 119A through 119Z, 120, 123A, 123B, 124, 125, 126, 131, \*137A, \*137B, M139A, \*M141A, 141B, \*141C, 142A, \*142B, 142C, 143A, 143B, \*M144B, 145A through 145D, 146E, \*151A, \*151B, \*151C, \*167A, 167B, \*168, \*199

Psychology \*100B, \*110, \*111, 112B, \*115, 116, 119D, \*120A, 121, 123, \*127, 129A, 129B, \*130, \*132, \*135, \*136A, 136B, 137C, 137D, M138, \*142H, 150, \*151, M163, M165, \*170A, \*170B, \*M172, \*175, 177, 179A, \*192, \*193, \*194A, \*197, \*199 (note: courses 110, 115, 120, 125, 127, 135, 142H, and 151 should be taken by students planning to pursue graduate study in psychology)

Sociology \*101, \*102, \*103, \*104, \*113, 116, 132, \*133, \*134, 135, 136, M138, 144, 145, 147A, \*147B, 148, \*156, \*157, \*158, \*160, 169, 170, 171, M174, M175, M176, 182, \*183, \*184, \*185, 186, 195A through 195Z, \*197A through \*197Z, \*199

**Honors Option**

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. Afro-American Studies majors with grade-point averages of 3.5 or better complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

**Double Major Option**

Some students elect to complete the requirements of two majors (Afro-American Studies and another). Students interested in this option must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the College. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, students are encouraged to plan their curriculum early and to do so in consultation with the College counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

## Afro-American Studies Minor

The Afro-American Studies minor is designed for students who wish to augment their major program of study with a group of related courses from various disciplines germane to Afro-American studies. The minor exposes students to African American-related research and literature in a number of different disciplines, such as anthropology, economics, English, history, political science, and sociology.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units, and file a petition at the Center for African American Studies, 2330 Murphy Hall, (310) 825-3776. All degree requirements, including the specific requirements for this minor, must be fulfilled within 228 units.

*Required Lower Division Courses (8 units):* Afro-American Studies M5 and 6, with grades of C or better.

*Required Upper Division Courses (24 units):* Six courses selected from Afro-American Studies 100B, C101, M103A, M103B, M103E, M104A, M104B, M104C, M107, M109, M110A, M110B, M144, M158A through M158E, M164, M172, M197A, 197B, 199, Anthropology M164, 166, English M104A, M104B, M104C, M111A, 178, 190, M197A, Ethnomusicology M109, M110A, M110B, M111, M119, History 156A through 156D, M158A through M158E, M175A through 175E, 176A, 176B, 176C, Philosophy 104, 126, 150, 172, Political Science M105, M106, 116, 137A, 137B, M141A, 141C, 142B, M144B, Psychology 100B, 110, 111, 115, 120A, 127, 130, 132, 135, 136A, 142H, 151, 170A, 170B, M172, 175, 192, 193, 194A, 197, Sociology 101, 102, 103, 104, 113, 133, 134, 156, 157, Theater M103A, M103B, M103E.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases,

even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Afro-American Studies Program offers the Master of Arts (M.A.) degree in Afro-American Studies.

## Admission

### M.A. in Afro-American Studies

Applicants for admission to the M.A. program must hold a bachelor's degree in the social sciences or humanities and demonstrate an interest in African American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) official transcripts, (2) three academic letters of recommendation, (3) a minimum 3.0 or B average in the junior/senior years of college, (4) a statement of purpose describing their background in African American studies, proposed program of study, and future career goals, (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE), (6) an original term paper or research paper which best expresses their interests and abilities, and (7) other evidence of promise that is deemed relevant, such as work experience, accomplishments, or community and public service.

Admission to the program is limited to Fall Quarter. Prospective students may request applications from the program office.

### Afro-American Studies M.A./Law J.D.

The Afro-American Studies Program and the School of Law offer a concurrent degree program whereby students may pursue the M.A. in Afro-American Studies and J.D. degrees at the same time. For admission, applicants are required to satisfy the regular admission requirements of both schools. Twelve units of law coursework may be double-counted toward the M.A. degree. Applicants interested in the program should contact the School of Law and Afro-American Studies Program for further information.

## Master's Degree

The M.A. program in Afro-American Studies is interdepartmental, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: African Area Studies, Art, Dance, Economics, Education, Folklore and Mythology, Geography, Information Studies, Latin American Studies, Management, Psychiatry and Biobehavioral Sciences, Public Health, Social Welfare, Theater, and World Arts and Cultures.

The M.A. degree is offered through the comprehensive examination and thesis plans. A to-

tal of 12 courses are required; eight must be at the graduate level. The program has a structured core of required courses, including one graduate-level course in research methods (for social sciences students) or critical theory (for humanities students). The second year is devoted to acquiring disciplinary competence in the cognate field.

There is a language requirement for this degree.

## Afro-American Studies

### Lower Division Courses

**M5. Social Organization of Black Communities. (4)** (Same as Sociology M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Letter grading.

**6. Trends in Black Intellectual Thought. (4)** Lecture, four hours. Overview of major intellectual trends that have shaped ways in which Afro-American thinkers have interpreted experiences of blacks in the U.S., drawing from such fields as history, philosophy, and literature. Letter grading.

### Upper Division Courses

**100B. Psychology from an Afro-American Perspective. (4)** Lecture, three hours. Survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and future of Afro-American psychology. P/NP or letter grading.

**100C. Creative Writing Workshop: Poetry. (4)** Lecture, three hours. Weekly exercises in poetry writing and criticism. Study of techniques. Classroom discussion based on work produced by students. P/NP or letter grading.

**C101. Special Topics in Afro-American Studies. (4)** Seminar, four hours. Variable topics. May be repeated for credit. Concurrently scheduled with course C201. Letter grading.

**M102. Culture, Media, and Los Angeles. (6)** (Same as Asian American Studies M197H and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

**M103A. African American Theater History: Slavery to Mid-1800s. (4)** (Same as Theater M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s. Letter grading.

**M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (4)** (Same as Theater M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical. Letter grading.

**M103E. African American Theater History: The Depression to the Present. (4)** (Same as Theater M103E.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present. Letter grading.

**M104A. Early Afro-American Literature. (5)** (Same as English M104A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, and Pauline Hopkins. P/NP or letter grading.

**M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (5)** (Same as English M104B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison. P/NP or letter grading.

**M104C. Afro-American Literature since the 1960s. (5)** (Same as English M104C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

**M107. Cultural History of Rap. (4)** (Same as Ethnomusicology M119 and Folklore M110.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

**M109. Women in Jazz. (4)** (Same as Ethnomusicology M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

**M110A-M110B. African American Musical Heritage. (4)** (Same as Ethnomusicology M110A-M110B and Folklore M154A-M154B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America. P/NP or letter grading.

**CM112A. African American Music in California. (4)** (Same as Ethnomusicology CM112.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM212A. P/NP or letter grading.

**CM112D. African American Art. (4)** (Same as Art History CM112D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM212D. P/NP or letter grading.

**CM112E. African American Art. (4)** (Same as Art History CM112E.) Lecture, three hours. Continuation of course CM112D, involving detailed inquiry into work of 20th-century African American artists. Concurrently scheduled with course CM212E. P/NP or letter grading.

**M120. Race, Inequality, and Public Policy. (4)** (Same as Policy Studies M120.) Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America. Letter grading.

**M144. Ethnic Politics: African American Politics. (4)** (Same as Political Science M144B.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: Political Science 40. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills. P/NP or letter grading.

**M145. Ellingtonia. (4)** (Same as Ethnomusicology M111.) Lecture, three hours. Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington. P/NP or letter grading.

**M158A. Comparative Slavery Systems. (4)** (Same as History M158A.) Lecture. Designed for juniors/seniors. Examination of slavery experiences in various New World slave societies, with emphasis on outlining similarities and differences among legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies. P/NP or letter grading.

**M158B-M158C. Introduction to Afro-American History. (4-4)** (Same as History M158B-M158C.) Lecture. Designed for juniors/seniors. Survey of Afro-American experience, with emphasis on three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieus. P/NP or letter grading.

**M158E. African American Nationalism in First Half of the 20th Century. (4)** (Same as History M158E.) Lecture. Designed for juniors/seniors. Critical examination of the African American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.

**M164. Afro-American Experience in the U.S. (4)** (Same as Anthropology M164.) Lecture, three hours. Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans. P/NP or letter grading.

**M166. Afro-American Sociolinguistics: Black English. (4)** (Same as Anthropology M145.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach. Letter grading.

**M172. The Afro-American Woman in the U.S. (4)** (Same as Psychology M172 and Women's Studies M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group. P/NP or letter grading.

**M175. Interracial Work, Friendship, and Love Relationships of African American Men and Women. (4)** (Same as Women's Studies M173.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

**M195. Investigative Journalism and Communities of Color. (4)** (Same as Asian American Studies M163.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverages. P/NP or letter grading.

**M197A. Topics in Afro-American Literature. (5)** (Same as English M197A.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890 to 1914; Contemporary Afro-American Fiction. May be repeated for credit. P/NP or letter grading.

**197B. Special Studies in Comparative Literature: Caribbean Literature. (4)** Seminar, three hours. General introduction to literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) alienation and the search for community, (2) "external" relationships (the ancestor, the kinsman, the other), and (3) form and language. P/NP or letter grading.

**199. Special Studies in Afro-American Studies. (2 to 4)** Tutorial, to be arranged with faculty member who directs the study. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors. Intensive directed research project. Eight units may be applied toward major requirements. P/NP or letter grading.

## Graduate Courses

**M200A. Advanced Historiography: Afro-American. (4)** (Same as History M200V.) Seminar, three hours. May be repeated for credit. S/U or letter grading.

**200B. Seminar: Political Economy of Race. (4)** Seminar, three hours. Seminar on political economy and with special reference to black political economy and with focus on dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international, seminar emphasizes internationalism and transnationalism as well as the uniqueness of the Afro-American condition. Attempts to relate the black condition in the U.S. to the socioeconomic system of this country and to compare it to political, social, and economic conditions of African peoples elsewhere. S/U or letter grading.

**M200C. Selected Problems in Urban Sociology. (4)** (Same as Sociology M262.) Seminar, three hours. S/U or letter grading.

**M200D. Afro-American Sociolinguistics: Black English. (4)** (Same as Anthropology M243Q.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion. S/U or letter grading.

**M200E. Studies in Afro-American Literature. (4)** (Same as English M262.) Lecture, four hours. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit. S/U or letter grading.

**200F. African American Psychology. (4)** Seminar, three hours. Survey of psychological literature as it pertains to persons of African American descent. Critical review of implications of "mainstream" research on African Americans, including discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African American scholars: African philosophy, perspectives on racism in psychology, and research in the black community. S/U or letter grading.

**C201. Special Topics in Afro-American Studies. (4)** Seminar, four hours. Variable topics. May be repeated for credit. Concurrently scheduled with course C101. Letter grading.

**M211. Seminar: African American Music. (4)** (Same as Ethnomusicology M211.) Seminar, three hours. Requisites: Ethnomusicology M110A-M110B. Designed for graduate students. Intensive investigation of problems, theories, and methods of research related to study of African American music. Emphasis on relationship of problems to representative styles of African American music. Letter grading.

**CM212A. African American Music in California. (4)** (Same as Ethnomusicology CM212.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM112A. S/U or letter grading.

**CM212D. African American Art. (4)** (Same as Art History CM212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM112D. S/U or letter grading.

**CM212E. African American Art. (4)** (Same as Art History CM212E.) Lecture, three hours. Continuation of course CM212D, involving detailed inquiry into work of 20th-century African American artists. Concurrently scheduled with course CM112E. Letter grading.

**M240. Assessment and Treatment of African American Families. (3)** (Same as Psychiatry M240.) Seminar, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with an African American child and family. Letter grading.

**241. Special Topics in Afro-American Studies. (4)** Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of Afro-American studies. S/U or letter grading.

**270A. Survey of Afro-American Research. (4)** Seminar, three hours. Overview of research methodologies in humanities and social sciences, with firsthand reports from faculty in various fields. Introduction to research in and related to Afro-American studies and application of such research. Letter grading.

**596. Directed Readings and Tutorials. (4)** Tutorial, to be arranged. Provides students with umbrella under which they can pursue specialized interests from which there is insufficient demand to warrant offering a formal course. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination. (4 or 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward M.A. course requirements. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4 or 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward M.A. course requirements. S/U grading.

## Scope and Objectives

Because UCLA possesses a substantial number of faculty in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. program in American Indian Studies was established here.

The program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. Students graduate with the training they need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program ranks among the top Indian studies programs in the country.

## Undergraduate Study

### American Indian Studies Minor

The American Indian Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Science with a group of related courses from various disciplines germane to American Indian studies. The minor exposes students to Indian-related research and literature in a number of different disciplines, such as anthropology, economics, history, political science, sociology, and theater.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units, and file a petition at the American Indian Studies Center, 3220 Campbell Hall, (310) 206-7511. All degree requirements, including the specific requirements for this minor, must be fulfilled within 228 units.

*Required Lower Division Course (4 units):* American Indian Studies 10 with a grade of C or better.

*Required Upper Division Courses (28 units):* Seven courses selected from the following: (1) one American Indian languages and communication systems course (Anthropology 144 or Linguistics 114); (2) three history and social sciences courses from Anthropology 113Q, 113R, 114P, 114Q, 114R, 158, 172R, History 157A, 157B, 165C, Sociology M161, Women's Studies 130; (3) three humanistic perspectives

on language and expressive culture courses from Art History C117A, C117B, C117C, 118D, English 106, 180X, Ethnomusicology 106A, 106B, Folklore and Mythology 130, Theater 103F, World Arts and Cultures C109B.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The American Indian Studies Program offers the Master of Arts (M.A.) degree in American Indian Studies.

## Admission

### M.A. in American Indian Studies

A bachelor's degree from an accredited undergraduate institution is required for admission to the M.A. program. Applicants must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, applicants must submit a detailed account of their background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Applicants must meet the University's minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but applicants are encouraged to submit test results as part of the documents supporting their application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to Fall Quarter. Application forms and further information may be obtained from the American Indian Studies Program.

## American Indian Studies M.A./Law J.D.

The American Indian Studies Program and the School of Law offer a concurrent degree program whereby students may pursue the M.A. in American Indian Studies and J.D. degrees at the same time. For admission, applicants are required to satisfy the regular admission requirements of both schools. Twelve units of law coursework may be double-counted toward the M.A. degree. Applicants interested in the program should contact the American Indian Studies Program.

## Master's Degree

The American Indian Studies M.A. is an interdepartmental program with 13 participating academic schools and departments: Anthropology, Art, Education, English, Ethnomusicology, Folklore and Mythology, History, Law, Library and Information Science, Linguistics, Music, Sociology, and Theater. Courses related to the M.A. are also offered in the following departments: Political Science, Social Welfare, and Psychology. Students select one area of concentration: (1) history and law, (2) expressive arts, (3) social relations, or (4) language, literature, and folklore.

The M.A. degree is offered through the comprehensive examination and thesis plans. A minimum of 10 courses is required, at least seven of which must be graduate courses. Required coursework includes a core course sequence, a language/linguistics course, and a graduate research methodology course.

There is a language requirement for this degree.

## American Indian Studies

### Lower Division Course

**10. Introduction to American Indian Studies. (4)** Lecture, four hours; discussion, one hour. Survey of selected Native North American cultures from pre-Western contact to the contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

### Upper Division Courses

**M161. Comparative American Indian Societies. (4)** (Same as Sociology M161.) Lecture, three hours. Requisite: course 10 or Sociology 1. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies. Letter grading.

**CM168P. Perspectives on Health of Native North Americans. (4)** (Same as Anthropology CM168P.) Seminar, three hours. Recommended preparation: some knowledge of medical anthropology and/or history and contemporary situation of first peoples of North America. Examination of different perspectives related to health and health care of Native North Americans (within present boundaries of the U.S. and Canada) in relation to cultural, social, political, and economic aspects of changing historical context. Concurrently scheduled with course CM268P. P/NP or letter grading.

**197. Special Topics in American Indian Studies. (4)** Lecture, four hours. Variable topics selected from the following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy. Consult *Schedule of Classes* for topics and instructors. May be repeated twice for credit. Letter grading.

**199. Special Studies in American Indian Studies. (2 to 4)** Tutorial, to be arranged. Special individual studies on topics in American Indian studies. P/NP or letter grading.

## Graduate Courses

**M200A. Advanced Historiography: American Indian Peoples. (4)** (Same as History M200W.) Lecture, 90 minutes; seminar, 90 minutes. Introduction to culture-histories of North American Indians and review of Indian concepts of history. Stereotypical approach to content and methodologies related to the Indian past that is interdisciplinary and multicultural in its scope. Letter grading.

**M200B. Cultural World Views of Native America. (4)** (Same as English M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change. Letter grading.

**M200C. Contemporary Issues of the American Indian. (4)** (Same as Anthropology M269 and Sociology M275.) Seminar, three hours. Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B. Letter grading.

**201. Topics in American Indian Studies. (4)** Discussion, three hours. S/U or letter grading.

**M228. Seminar: Indian Law — Tribal Legal Systems. (4)** (Same as Law M528.) Seminar, two hours (15 weeks). Study of historic and contemporary legal systems of selected tribes, with emphasis on relationships among law, religion, and social order. Letter grading.

**M238. Indian Law Clinic: Legislation. (5)** (Same as Law M428.) Lecture, three hours. Students provide nonlitigation legal assistance to Native American tribal nations, mostly in California. Clinic services include development and modification of tribal legal codes and constitutional provisions, development of tribal courts and other dispute resolution processes, and drafting of intergovernmental agreements. Cross-cultural representation, legislative drafting, and intergovernmental negotiation skills stressed. Letter grading.

**261. Comparative Indigenous Societies. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Investigation of detailed historical and contemporary ethnographic analyses of social change and cultural continuity within indigenous nations, primarily of the U.S., but elsewhere also. Discussion of theories of change, comparative methodologies, and case materials. Letter grading.

**M267. Indian Law. (5)** (Same as Law M267.) Lecture, three hours (15 weeks). Special legal status of American Indians and Indian tribes and tension between moral/legal claims and political forces. Sources and scope of federal, state, and tribal power on Indian reservations; property law concepts unique to Indian tribes and Indians; rights of American Indians in relation to federal, state, and tribal governments and federal trust relationship to Indians. Letter grading.

**CM268P. Perspectives on Health of Native North Americans. (4)** (Same as Anthropology CM268P.) Seminar, three hours. Recommended preparation: some knowledge of medical anthropology and/or history and contemporary situation of first peoples of North America. Examination of different perspectives related to health and health care of Native North Americans (within present boundaries of the U.S. and Canada) in relation to cultural, social, political, and economic aspects of changing historical context. Concurrently scheduled with course CM168P. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Studies. (4 to 8)** Tutorial, to be arranged. S/U or letter grading.

**598. Research for and Preparation of M.A. Thesis. (4 to 8)** Tutorial, to be arranged. Preparation of research data and writing of M.A. thesis. S/U grading.

## ANESTHESIOLOGY

*School of Medicine*

UCLA

### Chairs

Patricia A. Kapur, M.D., *Chair*  
Robert D. Kaufman, M.D., *Vice Chair*  
Randolph H. Steadman, M.D., *Vice Chair*  
Enrico Stefani, Ph.D., M.D., *Vice Chair*  
Selma H. Calmes, M.D., *Chair, Olive View-UCLA*  
Richard Y. Z. Chen, M.D., *Interim Vice Chair, VA Greater Los Angeles Health Care System*  
John S. McDonald, M.D., *Chair, Harbor-UCLA*

### Scope and Objectives

The medical student program in anesthesiology focuses on the delivery of peri-operative care to surgical patients. During their training in the department, students develop clinical skills of medical management of surgical patients, techniques of invasive line and monitor placement, and airway management skills. They are assigned to work with a specific attending anesthesiologist and/or anesthesia resident on a daily basis in one of the operating room locations and participate in the preoperative evaluation and preparation of their patients and development of an anesthetic plan. Students then observe how to prepare for and execute their anesthetic plan. They have opportunity to perform procedures as their abilities and the situation permit. In addition, the department has established the Human Patient Simulator which provides students with a simulated operating room setting where a variety of clinical situations are initiated so they can practice their clinical skills. Students are also expected to attend clinically oriented lectures on a wide range of anesthesia topics, including physiology, pharmacology, and critical care.

For further details on the Department of Anesthesiology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

### Adjunct Professor

Sondra Hale, Ph.D.

## Scope and Objectives

Anthropology, the broadest of the social sciences, is the study of humankind. One of the strengths of anthropology as a discipline is its "holistic" or integrative approach; it links the life sciences and the humanities and has strong ties with disciplines ranging from biology and psychology to linguistics, political science, and the fine arts. Anthropological study is appropriate for people with a wide variety of interests: human cultures and civilizations both present and past, human and animal behavior, particular regions of the world such as Africa, Asia, Latin America, Oceania, etc.

The department recognizes the following four fields in anthropology:

Archaeology is the study of human cultures and the natural, social, ideological, economic, and political environments in which they operated in the recent and distant past. The graduate and undergraduate programs focus on methods of discovery (field and laboratory courses), strategies of analysis and the hows and whys of long-term cultural evolution (theory, analytic, and topical courses), and the unfolding of prehistory in many regions of the world, including North America, Mesoamerica, South America, and several parts of the Old World (regional courses). Faculty members have long-standing interests in the origins and evolution of complexity, including the political organization of complex hunters/gatherers, the origins of early village life, and the emergence and florescence of ancient states. Faculty members maintain programs of field research, involving many students, in the American Pacific Coast, Mesoamerica, and South America.

Biological anthropology is the study of humans and other primates from a Darwinian point of view. The program focuses on the evolutionary ecology of early hominids, extant primates, and contemporary humans and includes training in evolutionary theory, behavioral ecology, evolutionary psychology, paleoanthropology, paleoecology, primate behavior, and mathematical modeling. Faculty members associated with the program have engaged in fieldwork in Africa, Central America, and Southeast Asia where ongoing projects include work on primate behavior, hominid evolution, and evolutionary psychology.

Linguistic anthropology is an interdisciplinary field that addresses the manifold ways in which language, interaction, and culture mutually organize each other in different communities worldwide. Linguistic anthropologists at UCLA have a variety of backgrounds and research interests that include face-to-face communication, language contact and change, language and politics, language socialization across the life span, verbal art and performance, and the relation of language to ideology, mind, emotion, and identity. Courses are offered in ethnographic approaches to discourse analysis, field methods, language ideology, conversation analysis, language socialization, and commu-

nication in urban communities, as well as on cross-cultural language practices.

Sociocultural anthropology concerns the examination and understanding of social and cultural systems and processes, and the human capacities which enable them. Its goal is to understand their operation in specific settings and to understand the experience of individuals who live in these diverse systems. Faculty members have engaged in fieldwork in almost every area of the world, but most notably in Africa, Latin America, East and Southeast Asia, and Oceania. They have also engaged in ethnographic research among Americans with diverse ethnic identities and in various institutional settings.

Cutting across the four fields are three other categories of course offerings: applied anthropology, regional cultures, and history, theory, and method.

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, education, law, medicine, nursing, public health, social welfare, and urban planning. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

## Undergraduate Study

### Anthropology B.A.

#### Preparation for the Major

*Required:* Anthropology 7 (or 10 and 12), 8, 9, 33, and one elective from 10, 12, M80, 88. All courses must be taken for a letter grade, and students must maintain an overall 2.0 grade-point average.

#### Transfer Students

To be admitted as Anthropology B.A. majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one human evolution course, one archaeology course, one sociocultural anthropology course, one culture and communication course, and one lower division elective anthropology course.

#### The Major

The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural "holistic" and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.

To provide a comprehensive understanding of the discipline as a whole, students must take two courses in the sociocultural anthropology field and one course in each of the other three

fields (see "Scope and Objectives"). Students may take any upper division course in the given area to fulfill this requirement. All courses must be taken for a letter grade, and students must maintain an overall 2.0 GPA.

Students must complete 15 4-unit courses as follows:

1. Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology)
2. One upper division region and society course
3. One upper division history/theory course
4. One upper division methodology course
5. Four additional upper division anthropology courses
6. A cluster of three related fields courses that demonstrate cohesion, to be selected in consultation with the undergraduate adviser and approved by the department

### Concentrations for the Major

Concentrations, although not required, may help define and structure an Anthropology major when students want emphasis in one of the four major fields. Whether or not they opt for a concentration, the requirements for the major must still be satisfied. It is possible to use courses within their specified concentration to fulfill overlapping requirements for the major. Exceptions to the requirements below are by petition only. More detailed information on the concentrations is available from the undergraduate adviser.

1. *Archaeology*: Anthropology 115P, 117 (fieldwork); two courses from 110, 111, 183; one methods course from M115A, M115B, C115R, 117P, 129Q, 138; one quantitative methods course from M80, 180, 186; one area course from 112, 113P, 113Q, 113R, 114P, 114Q, 114R; three theory courses from 120, 124, 132, 133Q, 133R, 150, 152, 153, 156, 158, 186P, CM189A, CM189B, Geography 140, 148, Sociology 101
2. *Biological Anthropology*: Anthropology 120; one quantitative methods course from M80, 180, 186; one methods course from 115P, 117, 117P, 143; one human biology and behavioral ecology course from 124, 186P, CM189A, CM189B; one paleoanthropology course from 121A, 121B, 121C, or both 12 and 129Q (credit is not granted for both courses 7 and 12); one human genetics course from Molecular, Cell, and Developmental Biology CM156, Organismic Biology, Ecology, and Evolution C135; one primate behavior course from Anthropology 128A, 128B, Organismic Biology, Ecology, and Evolution 129
3. *Linguistic Anthropology*: Anthropology 33, M140, Linguistics 20, Sociology CM124A; two methods courses from Anthropology

141, 142A, 143, Linguistics 103; one ethnography course from Anthropology 144, M145, 146, Linguistics 114; one course from Anthropology 133Q, 133R, 135A, 135B, 135C, Communication Studies 100, Linguistics 110, 127, Psychology M137J; one term of a non-European language

4. *Sociocultural Anthropology*: Anthropology 130, 150; one primary course from three of the four subconcentrations listed below; two history, theory, and methods courses from M80, 139, 180, 182, 186, Sociology 101; one region and society course from 158, 171, 172R, 173Q, 174P, 175R, 175S, 175T, 175U, 175V, 177; two additional courses from one of the subconcentrations listed below:
  - a. *Applied and Development Subconcentration*: Primary course: Anthropology 161; additional courses: M155Q, 167, M168, 186, International Development Studies M100B
  - b. *Ecological and Evolutionist Subconcentration*: Primary course: Anthropology 153; additional courses: 128A, 128B, 132, 158, 165, 186, 186P, Geography 140
  - c. *Social Processes and Practice Subconcentration*: Primary courses: Anthropology M151, 152, M154P; additional courses: 88, 128A, 128B, 153, M155, 156, 158
  - d. *Psychocultural and Medical Subconcentration*: Primary courses: Anthropology 135A, 135B, 135C, 135T; additional courses: 135S, M168

## Anthropology B.S.

### Preparation for the Major

*Required*: Anthropology 7 (or 10 and 12), 8, 9, 33; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14CL, or 20A, 20B, 20L, 30, and 30L; Life Sciences 1, 2, 3, 4; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, and 6C. All courses must be taken for a letter grade, and students must maintain an overall 2.0 grade-point average.

### Transfer Students

To be admitted as Anthropology B.S. majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one human evolution course, one archaeology course, one sociocultural anthropology course, one culture and communication course, two general biology courses for majors, one year of calculus, one year of general chemistry with laboratory, one year of general physics with laboratory, and one lower division organic chemistry course.

### The Major

The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, public health, and nursing. All courses must be taken

for a letter grade, and students must maintain an overall 2.0 GPA.

Students must complete 10 4-unit courses as follows:

1. Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology)
2. One upper division region and society course
3. One statistics course
4. One upper division history/theory course
5. Two additional upper division anthropology courses

## Honors Program

The honors program provides research-oriented students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors thesis. To be admitted students should have a cumulative grade-point average of 3.0 overall and a 3.5 cumulative GPA in their upper division anthropology courses. The application for admission must be submitted during Fall Quarter. Ideal candidates should have junior or senior standing and have completed at least two upper division anthropology courses. The proposal, research, analysis, and writing of the paper take place over four terms via Anthropology 197HA through 197HD. Course 197HA is taken in Winter Quarter and 197HB in Spring Quarter. Research should be done in summer, and courses 197HC and 197HD are taken in Fall and Winter Quarters of the graduation year. Students should contact the departmental honors adviser early in their studies for more information.

## Computing Specialization

Majors in either anthropology bachelor's degree program may select a specialization in Computing by (1) completing Program in Computing 10A, 10B, and 10C or 15, (2) completing one course from Anthropology 180 or 186, (3) completing either a 199 course that focuses on the integration of computer methods with anthropological studies or one course from Program in Computing 60 or Mathematics 61, or an equivalent course (subject to approval of the departmental computer committee), and (4) satisfying all the other requirements for a bachelor's degree in the specified major. Students graduate with a bachelor's degree in their major and a specialization in Computing. Interested students should contact the undergraduate adviser.

## Anthropology Minor

Students who wish to take a series of courses in anthropology, but major in another discipline, may be interested in the Anthropology minor. Students select courses from the four fields within anthropology (archaeology, biological

anthropology, linguistic anthropology, sociocultural anthropology), although they are encouraged to focus the body of their coursework within one field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* Two courses from Anthropology 7, 8, 9, 10, 12, 33.

*Required Upper Division Courses (20 units):* The core course (Anthropology 111, 120, 130, M140, or 150) from one of the four anthropology fields listed above and four additional courses. Students are encouraged to concentrate their upper division coursework within one field and are required to consult with the undergraduate adviser in planning their program of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Anthropology offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Anthropology.

## Admission

Admission to the graduate program in Anthropology is limited to Fall Quarter. All applicants are required to have a B.A. degree or its equivalent from a recognized college or university. A minimum grade-point average of 3.0 or its equivalent is also required for the last two years of undergraduate work and for any post-baccalaureate work completed. The department does not require an applicant to have a degree in anthropology, but it is highly desirable. If a student with a B.A. or M.A. from another field is admitted, a program of background studies in anthropology is formulated. Knowledge of a foreign language is not required for admission, but completion of the M.A. language requirement is recommended before beginning graduate work. The *UCLA Application for Graduate Admission* must be submitted by December 15 for consideration for the Fall Quarter of the following year. The following supporting material must be submitted directly to the department by January 5: (1) official transcripts, in duplicate, from each college or university at which work has been com-

pleted, (2) statement of purpose, (3) three letters of recommendation (preferably from anthropologists), (4) research or term paper, and (5) Graduate Record Examination (GRE) scores sent by the testing agency.

The department requires that two faculty members sponsor an applicant before admission is recommended. Prospective sponsors are canvassed by the departmental admissions committee, but it is also appropriate for applicants to contact potential sponsors.

For further information on the departmental program, a graduate information syllabus may be obtained without charge by writing to the department.

## Master's Degree

For fields, see Doctoral Degree.

The M.A. degree is offered through the thesis plan. Ten courses are required, five at the graduate level, including a graduate core seminar in the student's field of specialization.

There is a language requirement for this degree.

## Doctoral Degree

Fields of study include archaeology, biological anthropology, linguistic anthropology, and sociocultural anthropology.

Students who received the M.A. degree from the department are expected to enroll in three seminars, each with a different faculty member, between receipt of the M.A. degree and the qualifying examinations. The department does not require any specific courses or number of courses for the Ph.D.

Written and oral qualifying examinations are required. For the written examination, students are examined in three subfields; two fields are drawn from a list and the third is specific to the student's dissertation interests. In addition, students are expected to demonstrate competence in general anthropological theory.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which is primarily a defense of the dissertation proposal.

There is a language requirement for this degree.

## Anthropology

### Lower Division Courses

**7. Human Evolution. (4)** Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Evolutionary processes and evolutionary past of the human species. Letter grading.

**8. Archaeology: An Introduction. (4)** Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several campus archaeologists. Letter grading.

**9. Culture and Society. (4)** Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around the world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is the contribution and knowledge that cultural diversity makes toward understanding the problems of the modern world. P/NP or letter grading.

**10. Principles of Human Evolution: Genetic Basis. (4)** Lecture, three hours; discussion, one hour. Human population biology in the conceptual framework of evolutionary processes. Emphasis on genetic basis of evolution, population biology, and diversity among living populations. P/NP or letter grading.

**12. Principles of Human Evolution: Comparative Analysis. (4)** Lecture, three hours; discussion, one hour. Human population biology in conceptual framework of evolutionary processes. Emphasis on comparative primate behavior, structural anatomy, and the fossil record. Letter grading.

**33. Culture and Communication. (4)** Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to ways in which culture and communication shape each other, with emphasis on importance of language as a symbolic and practical guide to people's behavior and understanding of each other's actions. Topics include language socialization, cross talk, and verbal and nonverbal communication. P/NP or letter grading.

**34. Introduction to Urban Speech Communities. (4)** Lecture, three hours; discussion, one hour. Introduction to study of speech communities in metropolitan areas, with special focus on communities in Los Angeles. Emphasis on ways in which communities share and incorporate speech norms of urban society while maintaining rules for conduct and interpretation of speech within specific speech communities. Topics include language and identity, socialization, social dialects, and communication. Letter grading.

**M80. Introduction to Statistical Methods for Social Sciences. (5)** (Formerly numbered 80.) (Same as Geography M40, Sociology M18, and Statistics M12.) Lecture, four hours; discussion, one hour; laboratory, one hour. Elements of statistical analysis for social sciences. Presentation and interpretation of data, descriptive statistics, theory of probability and basic sampling distributions, statistical inference including principles of estimation and tests of hypotheses, introduction to regression and correlation. P/NP or letter grading.

**88. Lower Division Seminar. (4)** Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

## Upper Division Courses

### Archaeology

**110. World Archaeology. (4)** Lecture, three hours. Requisite: course 8. Designed for juniors/seniors. Broad survey of human culture history from its Stone Age beginnings to establishment of the primary civilizations of the Old and New Worlds. Intended for students with general interest in archaeology and in an anthropological approach to study of the past. Letter grading.

**111. Study of Archaeology. (4)** Lecture, three hours. Requisite: course 8. Survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Core course for archaeology field.) P/NP or letter grading.

**112. Old Stone Age Archaeology. (4)** Lecture, three hours. Requisite: course 8. Development of Paleolithic cultural traditions in Europe, Africa, Asia, and the New World. Emphasis on the ordering and interpretation of archaeological data, Pleistocene geology and chronology, and relationship between human cultural and biological evolution. P/NP or letter grading.

**113P. Archaeology of North America. (4)** Lecture, three hours. Prehistory of North American Indians; evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology. P/NP or letter grading.

**113Q. Prehistory and Ethnography of California.**

**(4)** Lecture, three hours. Requisite: course 8 or 9. From earliest Californians through 10,000 years of history, study of diversity in California's original peoples. Aspects of technology, ideology, ecology, and social/political organization. Historic impacts on California Indians by Euro-Americans. P/NP or letter grading.

**113R. Southwestern Archaeology.** **(4)** Lecture, three hours. Examination of prehistory of American Southwest from 11,000 years ago to historic times. Emphasis on describing and explaining cultural variation and change, employing an evolutionary perspective. Special attention to advent of farming and settled towns, large-scale interactive networks, abandonment of Four Corners area, and historic cultures. P/NP or letter grading.

**114A. Ancient Civilizations of Western Middle America (Nahuatl Sphere).** **(4)** Lecture, three hours. Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec/Aztec and Mixteca civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements. P/NP or letter grading.

**114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere).** **(4)** Lecture, three hours. Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and Highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements. P/NP or letter grading.

**114R. Ancient Civilizations of Andean South America.** **(4)** Lecture, three hours. Requisite: course 8 or 9. Pre-Hispanic and Conquest period native cultures of Andean South America, as revealed by archaeology and early Spanish writing. The Inca and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements. P/NP or letter grading.

**C114S. Comparative Study of Ancient States.** **(4)** Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. Concurrently scheduled with course CM214S. P/NP or letter grading.

**M115A-M115B. Historical Archaeology.** **(4)** (Same as History M103A-M103B.) Lecture, three hours. Designed for juniors/seniors. P/NP or letter grading. **M115A.** World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of discipline both in the Old World and the Americas. **M115B.** American Perspective. Emphasis on historical archaeology in North America, particularly to some of the practical applications.

**115P. Archaeological Field Training.** **(6 or 12)** Lecture, two to three hours; fieldwork, to be arranged (eight hours minimum for 6 units, 50 hours minimum for 12 units). Requisite: course 8. Off-campus field archaeology course offered in either regular session or summer. Procedures of archaeological excavation, recording, mapping, surveying, and initial analysis of archaeological data. P/NP or letter grading.

**C115R. Strategy of Archaeology.** **(4)** Seminar, three hours. Designed for juniors/seniors. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Concurrently scheduled with course C215R. Letter grading.

**117. Archaeological Laboratory Methods.** **(6)** Lecture, three hours; laboratory, two to three hours. Requisite: course 8. Introduction to archaeological analysis of range of prehistoric cultural materials. Procedures of classification, analysis, data entry. Extensive laboratory work with lithic artifacts, vertebrate fauna, shellfish, plant remains, bone and shell tools, ceramics. P/NP or letter grading.

**117P. Selected Laboratory Topics in Archaeology.**

**(4)** Lecture, three hours. Requisite: course 8. How archaeological research is furthered by specialized analysis of particular classes of cultural remains. Topics may include animal bones, plants, ceramics, rock art. Hands-on experience working with collections and data. May be repeated for credit with topic change. P/NP or letter grading.

**117Q. Intensive Laboratory Training in Archaeology.** **(6)** (Formerly numbered 117P.) Lecture, three hours; laboratory, three hours. Requisite: course 8. Archaeologists with special expertise in specific analytical techniques and topics oversee intensive laboratory training on one of following topics: zooarchaeology, ethnobotany, lithic analysis, ceramic analysis, etc. May be repeated for credit with topic change. P/NP or letter grading.

**M119. Topics in African History: Prehistoric Africa — Technological and Cultural Traditions.** **(4)** (Same as History M175A.) Lecture, three hours. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

**Biological Anthropology**

**120. Survey of Biological Anthropology.** **(4)** Lecture, three hours. Requisites: courses 7, or 10 and 12. Limited to majors and graduate anthropology students. Survey of biological anthropology including all major subareas. (Core course for biological field.) P/NP or letter grading.

**120G. Biological Anthropology in Review.** **(6)** Lecture, three hours; seminar, three hours. Corequisite: lecture portion of course 7. Limited to graduate anthropology students. Designed for anthropology students who have a deficiency in biological anthropology. Seminar discussion based on basic evolutionary principles, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation. Letter grading.

**121A. Primate Fossil Record.** **(4)** Lecture, three hours. Recommended requisites: courses 7, or 10 and 12. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene. P/NP or letter grading.

**121B. Australopithecines.** **(4)** Lecture, three hours. Recommended requisites: courses 7 (or 10 and 12), 121A. Morphology, ecology, and behavior of the genus *Australopithecus*. History of their discoveries and their place in human evolution. P/NP or letter grading.

**121C. Evolution of Genus *Homo*.** **(4)** Lecture, three hours. Recommended requisites: courses 7 (or 10 and 12), 121A, 121B. Origin and evolution of the genus *Homo*, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man. P/NP or letter grading.

**121P. Reconstructing Hominid Behavior and Paleoecology.** **(4)** Seminar, three hours. Use of paleontological, archaeological, ecological, and geological evidence to infer late Pliocene and early Pleistocene hominid behavior and environmental context of human evolution. P/NP or letter grading.

**121Q. Paleoanthropology in Review.** **(6)** Lecture, three hours; seminar, three hours. Corequisite: course 12. Limited to juniors/seniors. Designed for advanced students with interest in human evolution, fossil evidence, and theoretical constructs. Students attend course 12 lectures, plus three-hour seminar per week. P/NP or letter grading.

**122P. Human Osteology.** **(4)** Lecture, three hours; laboratory, four hours. Examination of human skeletal and muscular systems, concerned with both form and function. Students expected to recognize important anatomical landmarks on human skeleton, identify fragmentary bones, and know origins, insertions, and action of major muscles. How to sex and age skeletons and introduction to paleopathology. Letter grading.

**124. Evolution and Biology of Human Behavior.** **(4)** Lecture, three hours. Recommended requisite: course 7 or Life Sciences 1. Survey of research based on evolutionary psychology and human behavioral ecology. Review of relevant theory. Emphasis on empirical tests of evolutionary theories about human cooperation, social exchange, aggression, kinship, mate choice, marriage, and parental behavior. P/NP or letter grading.

**124P. Evolution of Human Sexual Behavior.**

**(4)** Lecture, three hours; discussion, one hour (when scheduled). Recommended requisite: course 7 or 10 or 12. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, maturation, fertility, mortality, parenting, and relations with members of the opposite sex. Letter grading.

**M127. Animal Communication.** **(5)** (Same as Applied Linguistics and TESL CM127 and Communication Studies M127.) Lecture, four hours. Designed for Anthropology, Applied Linguistics, and Communication Studies majors. Evolution, functions, design, and diversity of animal communication systems such as bird song, dolphin calls, whale song, primate social signals, and human language. Letter grading.

**127P. Primate Evolution.** **(4)** Lecture, three hours. Designed for juniors/seniors. Survey of primate paleontological and evolutionary record, encompassing prosimians, New and Old World monkeys, and hominoids. Attendant aspects of paleoecology and behavior. P/NP or letter grading.

**128A. Primate Behavior Nonhuman to Human.** **(4)** Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Review of primate behavior as known from laboratory and field studies. Theoretical issues of animal behavior, with special reference to nonhuman primates. Discussion of human behavior as the product of such evolutionary processes. P/NP or letter grading.

**128B. Behavioral Ecology of Primates.** **(4)** Lecture, three hours. Requisite: course 128A. Analysis of evolution of sociality, sexual strategies, parenting behavior, fighting and contests, and altruism and cooperation in primate species. Letter grading.

**128P. Primate Behavioral Neurobiology: Evolutionary and Comparative Perspectives.** **(4)** Lecture, three hours. Requisite: course 7 or 12. Strongly recommended: course 128A, Chemistry 14A or 20A, Life Sciences 1. Survey of use of nonhuman primates to model neurobiological bases of complex behavioral and emotional states in nonhuman primates. Attention to empathy, xenophobia, aggression, and social cognition. P/NP or letter grading.

**129Q. Paleopathology.** **(4)** Lecture, one hour; laboratory, three hours. Designed for juniors/seniors. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mutilation (i.e., cranial deformation, trepanation) through analysis of human skeletal materials. Course has worldwide scope, with some emphasis on the New World. Letter grading.

**Cultural Anthropology**

**130. Study of Culture.** **(4)** Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 9. Designed for juniors/seniors. The 20th-century elaboration and development of the concept of culture. Examination of five major paradigms: culture as a human capacity, as patterns and products of behavior, as systems of meaning and cognition, as generative structure and semiotic system, as a component in social action and reality construction. (Core course for cultural field.) P/NP or letter grading.

**132. Technology and Environment.** **(4)** Lecture, three hours. Significance of material culture in archaeology and ethnology; problems of invention and the acceptance of innovations; ecological and sociological concomitants of technological systems; selected problems in material culture. P/NP or letter grading.

**133Q. Symbolic Systems.** **(4)** Lecture, three hours. Designed for juniors/seniors. Analysis of anthropological research and theory on cultural systems of thought, behavior, and communication expressed in a symbolic mode (as distinguished from discursive, instrumental, and causal modes). Methods for study of symbolic meaning, including the experiential approach. P/NP or letter grading.

**133R. Aesthetic Systems.** **(4)** Lecture, three hours. Designed for juniors/seniors. Provides framework for a cross-cultural understanding of aesthetic phenomena that meets the requirements of anthropological research. Human capacities for aesthetic experience; sociocultural formation of aesthetic production; ethno-aesthetics; experiential dimension of aesthetic production. Letter grading.

**M134. Cultural Construction of Gender and Sexuality: Homosexualities. (4)** (Formerly numbered 134.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M134.) Lecture, three hours. Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

**135A-135B. Introduction to Psychological Anthropology. (4-4)** P/NP or letter grading:

**135A.** Historical Development. (4) Lecture, three hours. Requisite: course 9. Survey of the field of psychological anthropology, with emphasis on early foundations and historical development of the field. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading.

**135B.** Current Topics and Research. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Survey of the field of psychological anthropology, with emphasis on current topics and research. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading.

**135C. Seminar: Psychocultural Studies. (4)** Seminar, three hours. Requisite: course 9. Firsthand exposure to current research in psychocultural studies. Various university scholars are brought in to discuss their on-going research. Using these presentations as models, students develop proposals for future research. P/NP or letter grading.

**135S. Anthropology of Deviance and Abnormality. (4)** Lecture, three hours. Requisite: course 9. Relationship between culture and recognition of, responses toward, and forms of deviant and abnormal behavior. Letter grading.

**135T. Psychoanalysis and Anthropology. (4)** Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach. Letter grading.

**M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4)** (Same as Psychiatry M112.) Laboratory, three hours. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences. P/NP or letter grading.

**137. Selected Topics in Cultural Anthropology. (4)** Lecture, three hours. Study of selected topics in cultural anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

**138. Methods and Techniques of Ethnohistory. (4)** Lecture, three hours. Introduction to problems and procedures of extracting cultural data from documentary sources and their interpretation and analysis. Relevant documentary sources of various New World regions are selected as case histories to illustrate more concretely problems and challenges in this major area of anthropological concern. P/NP or letter grading.

**139. Field Methods in Cultural Anthropology. (4)** Lecture, three hours. Designed for juniors/seniors. Introduction to skills and tools of data ascertainment through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison. Letter grading.

## Linguistic Anthropology

**M140. Language in Culture. (4)** (Same as Linguistics M146.) Lecture, three hours; discussion, one hour. Requisite: course 33 or Linguistics 20. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) P/NP or letter grading.

**141. Ethnography of Everyday Speech. (4)** Lecture, three hours. Requisite: course 33. Designed for juniors/seniors. Course has two interrelated objectives: (1) to introduce students to ethnography of communication — description and analysis of situated communicative behavior — and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction. Letter grading.

**142A-142B. Microethnography of Communication. (4)** Lecture, three hours. Requisite: course M140. Course 142A or Sociology CM124A is requisite to 142B. Students make primary records (sound tape, videotape, or film) of naturally occurring social interactions which are analyzed in class for interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance required. P/NP or letter grading.

**143. Field Methods in Linguistic Anthropology. (4)** Lecture, three hours. Requisite: course M140. Practice in eliciting linguistic data from informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and textual analysis. Practice with native speakers of non-Indo-European languages is normally an important aspect of student participation. P/NP or letter grading.

**144. American Indian Ethnolinguistics and Sociolinguistics. (4)** Lecture, three hours. Requisite: course 33 or American Indian Studies 10. Introduction and comparative analysis of sociocultural aspects of language use in Native North American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior and variation within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and its relationship to language change and language in American Indian education. P/NP or letter grading.

**M145. Afro-American Sociolinguistics: Black English. (4)** (Same as Afro-American Studies M166.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach. Letter grading.

**146. Language and Culture of Polynesia: Past, Present, and Future. (4)** Lecture, three hours. Requisite: course M140. Introduction to Polynesian cultures and languages, with particular emphasis on past and present sociocultural systems, patterns of language structure and language use, verbal art, language socialization strategies, and forms of cultural assimilation and resistance to European contact. Fieldwork on contemporary Polynesian cultures in U.S. urban areas. Letter grading.

**147. Selected Topics in Linguistic Anthropology. (4)** Lecture, three hours. Study of selected topics in linguistic anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

**M148. Talk and the Body. (4)** (Same as Applied Linguistics and TESL M161 and Communication Studies M123.) Seminar, four hours. Relationship between language and human body raises a host of interesting topics. New approaches to phenomena such as embodiment become possible when the body is analyzed, not as an isolated entity, but as a visible agent whose talk and action are lodged within both processes of human interaction and rich settings where people pursue courses of action that count in their lives. Letter grading.

**149A. Language and Identity. (4)** Lecture, three hours. Requisite: course 33. Language as social phenomenon. Introduction to several angles from which language use can be critically examined as integral to interactions between individuals and between social groups. Letter grading.

**149B. Gender and Language in Society. (4)** Lecture, three hours. Requisite: course 33. Examination of role language plays in social construction of gender identities and ways in which gender impacts language use and ideologies. Letter grading.

**149C. Multilingualism: Communities and Histories in Contact. (4)** Lecture, three hours. Requisite: course 33. Examination of communicative, political, and poetic aspects of use of two or more languages (multilingualism) by individuals and by groups. Broader themes in social theory, anthropological inquiry, sociolinguistics, and literary studies in lectures to contextualize class readings. Letter grading.

**149D. Language, Culture, and Education. (4)** Lecture, three hours. Requisite: course 33. Examination of various ways in which culture, and language in particular, influence not only educational processes and outcomes, but also the very conceptions of what normal development processes and desirable educational outcomes are. Letter grading.

## Social Anthropology

**150. Study of Social Systems. (4)** Lecture, three hours. Requisite: course 9. Introduction to more specialized social anthropology courses. Evaluation of variation in sociocultural systems and how societies are organized and social relations maintained. Basic frameworks of anthropological analysis; historical context and development of social anthropology discipline. Letter grading.

**M151. Marriage, Family, and Kinship. (4)** (Formerly numbered 151.) (Same as Women's Studies M151.) Lecture, three hours. Requisite: course 9. Examination of understandings of kinship in cross-cultural perspective and impact of kinship on interpersonal relationships, gender roles, and sociocultural systems. Readings from popular materials and formal ethnographic accounts. P/NP or letter grading.

**152. Politics: Tribe, State, Nation. (4)** Lecture, three hours. Cross-cultural examination of politics and political organization. Law and the maintenance of order; corporate groups; ideology. Relations of political institutions to other institutions of society and to issues of identity and representation. Letter grading.

**153. Evolution of Human Societies. (4)** Lecture, three hours. Review of economic and ecological approaches to studying organization of production and exchange. Economic life viewed from three perspectives: adaptation, decision making, and social structure. Comparative theories discussed in context of ethnographic evidence from a wide variety of cultural systems. P/NP or letter grading.

**153P. Economic Anthropology. (4)** Lecture, three hours. Requisite: course 9. Introduction to anthropological perspectives for interpretation of economic life and institutions. Economic facts to be placed in their larger social, political, and cultural contexts; examination of modes of production, distribution, and consumption of goods and services in their relation to social networks, power structures, and institutions of family, kinship, and class. P/NP or letter grading.

**M154P. Gender Systems: North American. (5)** (Same as Women's Studies M154P.) Lecture, three hours; discussion, one hour; fieldwork, three hours. Requisite: Women's Studies 10. Designed for junior/senior social sciences majors. Comparative study of women's lives and gender systems in North American cultures from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case study, student fieldwork, internship, and presentation. P/NP or letter grading.

**M154Q. Gender Systems: Global. (4)** (Same as Women's Studies M154Q.) Lecture, three hours. Requisite: Women's Studies 10. Designed for junior/senior social sciences majors. Comparative study of gender systems globally from an anthropological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relationship of gender to the state, and colonialism and resistance movements. P/NP or letter grading.

**M155. Women's Voices: Their Critique of Anthropology of Japan. (4)** (Formerly numbered 155.) (Same as Women's Studies M155.) Lecture, three hours. Preparation: introductory sociocultural anthropology course. The anthropology of Japan has long viewed Japan as a homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

**M155Q. Women and Social Movements. (4)** (Same as Women's Studies M155Q.) Lecture/discussion, three hours. Recommended preparation: prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

**156. Comparative Religion. (4)** Lecture, three hours. Survey of various methodologies in comparative study of religious ideologies and action systems, including understanding particular religions through descriptive and structural approaches, and identification of social and psychological factors which may account for variation in religious systems cross-culturally. P/NP or letter grading.

**157. Selected Topics in Social Anthropology. (4)** Lecture, three hours. Study of selected topics in social anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

**158. Hunting and Gathering Societies. (4)** Lecture, three hours. Requisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint. Discussion of the possibility of developing a general framework for synthesizing these two viewpoints. Use of this synthesis as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies. P/NP or letter grading.

**158P. Pastoral Nomads. (4)** Lecture, three hours. Requisite: course 9 or 150. Survey of pastoral nomad societies. Consideration of environmental and social demands of livestock domestication and production. Focus on ecological features, cultural practices, and social organization, with special attention to historical interactions between pastoral nomads and settled peoples. Letter grading.

**159. Warfare and Conflict. (4)** Lecture, three hours. Examination of conflict and violent confrontation as these have been treated in anthropological literature. Cross-cultural comparison of institutions such as raids, feuds, ritual warfare. Consideration of application of anthropology to study of militaries, modern warfare, and large-scale ethnic conflict. Letter grading.

## Applied Anthropology

**161. Development Anthropology. (4)** Lecture, three hours. Requisite: course 9. Designed for juniors/seniors. Comparative study of planned and unplanned development, in particular as it affects rural societies. Emphasis on impact of capital, technological change and gender differences, economic differentiation and class, urban/rural relations, and migration. Discussion of theoretical issues in light of case studies. P/NP or letter grading.

**163. Selected Topics in Applied Anthropology. (4)** Lecture, three hours. Study of selected topics in applied anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

**M164. Afro-American Experience in the U.S. (4)** (Same as Afro-American Studies M164.) Lecture, three hours. Promotes understanding of contemporary socio-cultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans. P/NP or letter grading.

**165. Demographic Problems in Nonindustrial Societies. (4)** Lecture, three hours. Requisite: course 9. Dynamic interaction between environment, cultural belief, social structure, and population in hunting and gathering, pastoral, horticultural, and agricultural societies. Principal theories of population change and current issues in population policy considered in light of the anthropological evidence. P/NP or letter grading.

**166. Cross-Cultural Research on Urban Gangs. (4)** Lecture, three hours. Preparation: one anthropology, psychology, or sociology course. Examination of background and contemporary traditions of gangs in three ethnic minority groups — African American, Asian American, and Mexican American. Similarities and differences to be noted in dimensions of gang formation and persistence, subcultural styles, territorial and criminal conflicts, drug use and abuse, personal motivations, dress habits, etc. Cross-cultural look at major social control institutions (e.g., family, schools, peers, law enforcement, religion) which affect their lives. P/NP or letter grading.

**167. Urban Anthropology. (4)** Lecture, three hours; discussion, one hour (when scheduled). Designed for junior/senior social sciences majors. Survey of urbanization throughout the world, with emphasis on urban adaptation of rural migrants. Special focus on problems of rural/urban migration of ethnic minority groups and subsequent adaptation of them within the U.S. explored in terms of methods and perspectives of anthropology. P/NP or letter grading.

**M168. Culture, Illness, and Healing. (4)** (Same as Nursing M158.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

**CM168P. Perspectives on Health of Native North Americans. (4)** (Same as American Indian Studies CM168P.) Seminar, three hours. Recommended preparation: some knowledge of medical anthropology and/or history and contemporary situation of first peoples of North America. Examination of different perspectives related to health and health care of Native North Americans (within present boundaries of the U.S. and Canada) in relation to cultural, social, political, and economic aspects of changing historical context. Concurrently scheduled with course CM268P. P/NP or letter grading.

**C169R. Repatriation of Native American Human Remains and Cultural Objects. (4)** Lecture, two hours; discussion, one hour. Native Americans have recently been successful in obtaining passage of federal and state laws repatriating human remains and cultural objects to them. Examination of this phenomenon. Concurrently scheduled with course C269R. Letter grading.

## Regional Cultures

### Africa

**171. Sub-Saharan Africa. (4)** Lecture, three hours. Issues of ecology and political economy; continuing impacts of colonialism, nationalism, and current challenges for development; changes in social relations. Examination of Africa's significance to development of anthropology. Cultural background for understanding events in contemporary Africa provided. Letter grading.

### North America

**172A. Native North Americans. (4)** Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consideration of diversity of Native American societies north of Mexico, including their origins, formation, and development. Particular attention to subsistence systems and their relationship to social institutions and cultural practices, especially religion. Letter grading.

**172B. Change and Continuity among Native North Americans. (4)** Lecture, three hours. Requisite: course 172A. Consideration of tremendous change Native American societies and cultures have undergone since European contact. Emphasis on patterns of adaptation and continuity as Native Americans confronted colonization and its implications. Letter grading.

**172R. Cultures of the Pueblo Southwest. (4)** Lecture, three hours. Survey of ethnographic and ethnohistorical research of Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on history, languages, social organization, and traditional cultural systems of these groups. P/NP or letter grading.

**M172V. Culture Change and the Mexican People. (4)** (Same as Chicana and Chicano Studies M172V.) Lecture, three hours. Requisite: course 9 or Chicana and Chicano Studies 10A or 10B. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscegenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

### Middle America

**173Q. Latin American Communities. (4)** Lecture, three hours. Overview of social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in context of economic, political, and cultural environments. P/NP or letter grading.

### South America

**174P. Ethnography of South American Indians. (4)** Lecture, three hours. Introduction to ethnography of South American Indians, with special emphasis on Lowland South America. Survey of history and development of man and society in this world area and examination of exemplary cultures symptomatic of various levels of cultural achievement. P/NP or letter grading.

### Asia

**175R. Societies of Central Asia. (4)** Lecture, three hours. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and status of women, religion and the social order in Hindu/Buddhist culture contact zone, and current problems of modernization. P/NP or letter grading.

**175S. Japan. (4)** Lecture, three hours. Overview of contemporary Japanese society. General introduction, kinship, marriage and family life, social mobility and education, norms and values, religions, patterns of interpersonal relations, social deviance. P/NP or letter grading.

**175T. Civilizations of East Asia. (4)** Lecture, three hours. General anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comparative analysis of fundamental institutions such as family, state, and religion and assessing effects of urbanization and industrialization. Letter grading.

**175U. Cultures of the Indonesian Archipelago. (4)** Lecture, three hours. Introduction to past and contemporary civilizations and cultures of Indonesia, including Javanese, Balinese, Toraja, Dayak, and Minangkabau. Geographical, ecological, and historical overview with examination of such topics as religious and political ideas and institutions, art, symbolism and ritual, illness and healing, and psychological issues and themes. P/NP or letter grading.

**175V. Ethnology of Korea: Re-Presenting Lives in Contemporary South Korea. (4)** Lecture, three hours. Examination of South Korea's contemporary structural positioning, with focus on its dynamic development out of a history of colonialism and war to capitalism; multiple and conflicting linkages of Korean people involving class, gender, family/kinship, and nation. Letter grading.

**175W. Ideology and Social Change in Contemporary China. (4)** Lecture, three hours. Introduction to sociocultural changes in China from 1949 to the present. Topics include ideology and politics in everyday life, social stratification and mobility, cultural construction of socialist person, changes in courtship, marriage, and family, and political economy of reforms in post-Mao era. P/NP or letter grading.

### Middle East

**176. Culture Area of the Middle East. (4)** Lecture, three hours. Study of the Middle East has suggested many theories as to developmental history of humankind, evolution of human society, birth of monotheism, and origin of agriculture, trade, and the city. Presentation of anthropological material relevant to understanding the Middle East as a culture area, and Islam as basis of its shared tradition. Letter grading.

### Pacific

**177. Cultures of the Pacific. (4)** Lecture, three hours. Four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. Distinctive sociocultural features of each culture area presented in context of their adaptive significance. P/NP or letter grading.

### History, Theory, and Method

**180. Quantitative Methods in Anthropology. (5).** Lecture, three hours; laboratory, one hour. Requisite: course M80. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, nonparametric tests, and log-linear models. Emphasis on computer-based applications of data analysis techniques. Letter grading.

**182. History of Anthropology. (4)** Lecture, three hours. Brief survey of development of Western social science, particularly anthropology, from Greek and Roman thought to emergence of evolutionary theory and concept of culture in the late 19th century. "Root paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombroso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sexism, racism, perception of deviance, and our view of culture in general. P/NP or letter grading.

**183. History of Archaeology. (4)** Lecture, three hours. Preparation: at least one upper division archaeology course. Development of world archaeology from the Renaissance to the present, stressing how each of the major branches of archaeology has evolved a special character determined by peculiarities of its own data, methods, and intellectual affiliation. P/NP or letter grading.

**186. Models and Modeling in Anthropology. (4)** Lecture, three hours. Modeling from both individual and social structure viewpoints. Introduction to four groups of models, along with ethnographic examples — decision tree models, indifference curve and marginal cost models, adaptation and learning models, and information diffusion models. Letter grading.

**186P. Models of Cultural Evolution. (4)** Lecture, two hours; discussion, one hour. Requisite: course 7 or 10. Introduction to Darwinian models of cultural evolution. How organic evolution has shaped the capacity for culture. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

**CM189A-CM189B. Theoretical Behavioral Ecology. (4-4)** (Same as Organismic Biology CM189A-CM189B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is requisite to CM189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM289A-CM289B. Letter grading.

### Special Studies

**M194. Senior Seminar: Language, Interaction, and Culture. (4)** (Same as Applied Linguistics and TESL M194 and Sociology M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

**M196A-M196B. Contemporary Issues in Urban Poverty Research. (4-4)** (Same as Sociology M196A-M196B.) Lecture, three hours. Requisites: Honors Collegium 7A, 7B. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. P/NP or letter grading.

**197HA. Beginning Seminar. (4)** Seminar, three hours. Limited to anthropology honors program students. Survey of major research strategies in anthropology to aid honors students in developing research proposals. Letter grading.

**197HB. Field Methods. (4)** Seminar, three hours. Limited to anthropology honors program students. Survey of major field methods in anthropology to prepare students to conduct their own field research. Letter grading.

**197HC. Data Analysis. (4)** Seminar, three hours. Limited to anthropology honors program students. Survey of major forms of data analysis in anthropology to aid honors students in analysis of their own research data. Letter grading.

**197HD. Writing for Anthropology. (4)** Seminar, three hours. Limited to anthropology honors program students. Teaching of writing skills, with focus on how to write honors theses. Letter grading.

**197K-197Z. Selected Topics in Anthropology. (2 to 4 each)** Lecture or seminar, three hours. Study of selected topics of anthropological interest taught by resident and visiting faculty members. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

**199. Special Studies in Anthropology. (2 to 8)** Tutorial, to be arranged. Eight units may be applied toward upper division anthropology courses required for the major. P/NP or letter grading.

### Graduate Courses

**200. Proseminar: Practice of Anthropology. (4)** (Formerly numbered 200A.) Seminar, three hours. Required of new graduate students. Discussion of anthropology as a four-field discipline and interconnections among the four major fields. Practice of anthropology as exemplified through faculty presentations of how research is conceived, formulated, and executed. Students develop individual research proposals. Letter grading.

**200P. Cultural Anthropology Field Preparation. (4)** Seminar, three hours. Requisite: course 200. Follows course 200 as field preparation for summer research for cultural anthropologists. Students develop specific research methods and present them in seminar. Practical issues (visas, community entry, health concerns) also addressed. S/U grading.

**M201A-M201B. Graduate Core Seminars: Archaeology. (6-6)** (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in archaeology field. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretive strategies. May be repeated for credit with consent of adviser. S/U or letter grading.

**202. Biological Anthropology Colloquium. (4)** Seminar, three hours. Selected topics on status of current research in biological anthropology. May be repeated for credit. S/U or letter grading.

**203A-203B-203C. Core Seminars: Sociocultural Anthropology. (4-4-4)** Seminar, three hours. Letter grading:

**203A. Historical and Philosophical Foundations of Anthropology. (4)** Seminar, three hours. Preparation: two courses from 130, 135A, 150. Examination of the theoretical writings that shaped foundations of anthropology as a scholarly discipline. Consideration of writings of Durkheim, Weber, Marx, and others. Letter grading.

**203B. Sociocultural Systems and Ethnography: Anthropology at Mid-Century. (4)** Seminar, three hours. Recommended requisite: course 203A. Examination of development of major schools of sociocultural thought during middle decades of the 20th century. Emphasis on formation of sociocultural theories, concepts, and methodologies found in contemporary anthropology. Letter grading.

**203C. Scientific and Interpretive Frameworks in Contemporary Anthropology. (4)** Seminar, three hours. Recommended requisite: course 203B. Examination of selected contemporary works and issues in the field of sociocultural anthropology. Letter grading.

**204. Core Seminar: Linguistic Anthropology. (4)** Seminar, three hours. Theoretical and methodological foundations of study of language structure and language use from a sociocultural perspective. Discussion of linguistic, philosophical, psychological, and anthropological contributions to understanding of verbal communication as a social activity embedded in culture. S/U or letter grading.

### Archaeology

**210. Analytical Methods in Archaeological Studies. (4)** Lecture, three hours. Preparation: one term of statistics. Data analysis procedures in archaeology. Emphasis on conceptual framework for analysis of archaeological data, beginning at level of the attribute and ending at level of the region. S/U or letter grading.

**M211. Regional Analysis in Archaeology. (4)** (Same as Archaeology M201C.) Lecture, three hours. Course 210 is not requisite to M211. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange. Letter grading.

**212P. Selected Topics in Hunter/Gatherer Archaeology. (4)** Seminar, three hours. Prehistory and ethnohistory of hunter/gatherer peoples. Consideration of range of issues, including (but not limited to) technological innovations, exchange systems, settlement and mobility, and social change. May be repeated for credit. S/U or letter grading.

**212Q. Problems in Southwestern Archaeology. (4)** Lecture, three hours. Consideration of prehistoric cultural systems in the American Southwest, with emphasis on description and explanation of organizational variability and change. Specific research questions vary with each course offering. May be repeated for credit. S/U or letter grading.

**212R. Problems in Oceanic Archaeology. (4)** Lecture, three hours. Prehistory of Oceania. Content may vary, but problems considered include history and process of island occupation, island adaptation, and evolution of social stratification. May be repeated for credit. S/U or letter grading.

**M212S. Special Topics in Archaeology. (4)** (Same as Archaeology M205A.) Lecture, three hours. Designed for graduate students in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors. S/U or letter grading.

**M212T. Special Topics in Archaeology. (6)** (Same as Archaeology M205B.) Lecture, three hours; laboratory, two hours. Advanced laboratory training for graduate students. Special laboratory-based topics, including but not limited to lithic analysis, ceramic analysis, zooarchaeology, and paleoethnobotany. May be repeated for credit with topic change. S/U or letter grading.

**213. Selected Topics in Old World Archaeology. (4)** Seminar, three hours. May be repeated for credit. S/U or letter grading.

**214. Selected Topics in Prehistoric Civilizations of the New World. (4)** Lecture, three hours. Mesoamerican and Andean civilizations normally constitute major focus of seminar. May be repeated for credit. S/U or letter grading.

**CM214S. Comparative Study of Ancient States. (4)** (Same as Archaeology M214.) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. Concurrently scheduled with course C114S. S/U or letter grading.

**215. Field Training in Archaeology. (6 or 12)** Lecture, two to three hours; fieldwork, eight to 10 (spring) or over 50 (summer) hours. Off-campus field archaeology course offered for 6 units in Spring Quarter and 12 units in Summer Quarter. Intensive training in archaeological excavation, mapping, surveying, recording, preliminary analysis of field data, and project organization/supervision. May be repeated for credit. S/U or letter grading.

**C215R. Strategy of Archaeology. (4)** Seminar, three hours. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Concurrently scheduled with course C115R. Complete research proposal required of graduate students. Letter grading.

**M216. Topics in Asian Archaeology. (4)** (Same as Art History M262A.) Lecture, three hours. Designed for graduate students. Topics may include identification of ethnic groups in archaeology, archaeology of religion, archaeological reflections of commerce and trade and their influence on social development, archaeology of language dispersal, cultural contact and nature of cultural "influence." Letter grading.

**217. Explanation of Societal Change. (4)** Lecture, three hours. Examination of processes of societal evolution, emphasizing usefulness of a variety of explanatory models from general systems theory, ecology, anthropology, and other sources. Specific research questions vary with each course offering. May be repeated for credit. S/U or letter grading.

**218. Style and Ethnicity. (4)** Seminar, three hours. How stylistic variation in material culture informs on and mediates the shape, boundaries, and interrelations of ethnic groups. Aimed primarily toward archaeologists and ethnographers, seminar also welcomes students specifically interested in either material culture or style as such. Letter grading.

**219. Complex Hunters/Gatherers in Theoretical Perspective. (4)** Seminar, three hours. Examination of economic, political, and social foundations of complex hunter/gatherer societies, with focus on theory of emergence of complex cultural organization and recognition of complex middle-range societies in the archaeological record. Role of craft specialization in cultural evolution. S/U or letter grading.

## Biological Anthropology

**220. Current Problems in Biological Anthropology. (4)** Seminar, three hours. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit. S/U or letter grading.

**221A-221B. Fossil Evidence for Human Evolution. (4-4)** Seminar, four hours. Examination and analysis of fossil evidence for man's evolution. S/U or letter grading.

## Cultural Anthropology

**230Q. Theories of Culture. (4)** Lecture, three hours. Exploration of aspects within culture theory: emergence of culture with modes of production, discovery of culture, and "cultural capital" and cultural change. Investigation of production of culture and transformations of meaning within cultural domains of politics, economy, and religion. S/U or letter grading.

**231. Asian Americans: Personality and Identity. (4)** Lecture, three hours. Designed for graduate students. Effect of class, caste, and race on the Asian American personality within the framework of anthropological theories. S/U or letter grading.

**232V. Current Issues in Ethnography. (4)** Seminar, three hours. Designed for graduate students. S/U or letter grading.

**233P. Symbolic Anthropology. (4)** Seminar, three hours. Requisite: course 133R. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to the causal one) are among questions to be selected for analysis and discussion. May be repeated for credit. S/U or letter grading.

**233Q. Aesthetic Anthropology. (4)** Lecture, three hours. Requisite: course 133R. Selected questions concerning visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit. S/U or letter grading.

**M234. Seminar: Psychocultural Studies and Medical Anthropology. (4)** (Same as Psychiatry M210.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. S/U or letter grading.

**M234P. Transcultural Psychiatry. (4)** (Same as Psychiatry M222.) Lecture, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit. S/U or letter grading.

**M234Q. Psychological Anthropology. (4)** (Same as Psychiatry M272.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**234R. Culture, Cognition, and Being in the World. (4)** Seminar, three hours. Whether and how culture and thought shape each other is a historically enduring and controversial topic. Focus on work challenging prevailing implicit acceptance of theoretical separation between study of mind and study of culture. S/U or letter grading.

**M234T. Anthropology of Human Body. (4)** (Same as Psychiatry M282.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies. Letter grading.

**M235. The Individual in Culture. (4)** (Same as Psychiatry M213.) Seminar, three hours. Designed for graduate students. Letter grading.

**M236P. Cross-Cultural Studies of Socialization and Children. (4)** (Same as Psychiatry M214.) Lecture, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. S/U or letter grading.

**M236Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4)** (Same as Education M222A, Psychiatry M235, and Psychology M295.) Laboratory, four hours. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests. Letter grading.

**M238. Native American Revitalization Movements. (4)** (Same as History M260C.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion. Letter grading.

**239P. Selected Topics in Field Ethnography. (4 to 8)** Seminar, three hours. Discussion and practicum in various techniques for collecting and analyzing ethnographic field data. S/U or letter grading.

## Linguistic Anthropology

**M240. Social Foundations of Language. (4)** (Same as Applied Linguistics and TESL M206.) Seminar, four hours. Requisite: Linguistics 20. Basic grounding in sociolinguistic theory and methodology. Introduction to current issues in study of tested behavior, including varied ways scholars visualize relation between language and social context. S/U or letter grading.

**M241. Topics in Linguistic Anthropology. (4)** (Same as Linguistics M246C.) Lecture, three hours. Problems in relations of language, culture, and society. May be repeated for credit. S/U or letter grading.

**242. Ethnography of Communication. (4)** Lecture, three hours. Designed for graduate students. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behavior. S/U or letter grading.

**243P. American Indian Ethnolinguistics and Sociolinguistics. (4)** Lecture, three hours. Preparation: prior coursework in either anthropology, linguistics, or American Indian studies. Social and cultural aspects of language use in Native North American speech communities. Specific foci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion. S/U or letter grading.

**M243Q. Afro-American Sociolinguistics: Black English. (4)** (Same as Afro-American Studies M200D.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion. S/U or letter grading.

**244. Field Methods in Linguistic Anthropology. (4)** Seminar, three hours; work with informant, one hour. Requisite: Linguistics 20 or prior experience in linguistic analysis. Practice in eliciting and transcribing linguistic data from native informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and pragmatic analysis. Practice with native speakers of non-Indo-European languages is important aspect of student participation. S/U or letter grading.

**245. Linguistic and Intra-cultural Variation. (4)** Lecture, three hours. Problem of variation as it impinges on disciplines of anthropology and linguistics. Among objectives of course are the following: to acknowledge importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship devoted to study of intra-individual and interindividual variation, and to evaluate utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory. Letter grading.

**M246A. Grammar and Discourse. (4)** (Same as Applied Linguistics and TESL M272.) Seminar, four hours. Requisite: Applied Linguistics and TESL 201. Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

**M246B. Grammar and Discourse Practicum. (4)** (Same as Applied Linguistics and TESL M273.) Seminar, four hours. Requisite: course M246A. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

**M247. Topics in Semantics and Pragmatics. (4)** (Same as Applied Linguistics and TESL M266.) Seminar, four hours. Requisite: Applied Linguistics and TESL 201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit with topic change. Letter grading.

**M248. Language Socialization. (4)** (Same as Applied Linguistics and TESL M224.) Seminar, four hours. Requirement: Applied Linguistics and TESL M206. Exploration of process of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Ways in which verbal interaction between novices and experts is structured linguistically and culturally. S/U or letter grading.

**M249A-M249B. Ethnographic Methods in Discourse Analysis I, II. (4-4)** (Same as Applied Linguistics and TESL M270A-M270B.) Seminar, four hours. Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. **M249A.** Requirement: course 242 or Applied Linguistics and TESL 260 or Sociology C244A. Devoted to skills related to collecting socially and culturally meaningful data. Letter grading. **M249B.** Requirement: course M249A. Devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal. S/U or letter grading.

**M249P. Ethnographic Technologies Laboratory I. (4)** (Same as Applied Linguistics and TESL M270P.) Laboratory, four hours. Corequisite: course M249A or Applied Linguistics and TESL M270A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and videorecording verbal interaction. S/U grading.

**M249Q. Ethnographic Technologies Laboratory II. (4)** (Same as Applied Linguistics and TESL M270Q.) Laboratory, four hours. Corequisite: course M249B or Applied Linguistics and TESL M270B. Hands-on mentorship in editing ethnographic video footage, incorporating video frame grabs into transcript and analysis of verbal interaction, writing a grant proposal, and assembling a conference presentation. S/U grading.

## Social Anthropology

**250. Selected Topics in Social Anthropology. (4)** Seminar, three hours. Intensive examination of current theoretical views and literature. S/U or letter grading.

**251P. Cultural Ecology. (4)** Lecture, three hours. May be repeated for credit. S/U or letter grading.

**252P. Comparative Systems of Social Inequality. (4)** Seminar, three hours. Examination in historical and contemporary perspective of particular systems of structured social inequality based on rank, class, caste, ethnicity, gender, age, sexual preference, disability, etc., to develop a unified theory of social inequality. Examples from Asian, Pacific, European, African, and American cultures. S/U or letter grading.

**252Q. Anthropology of Resistance. (4)** Lecture, one hour; discussion, two hours. Preparation: at least one upper division sociocultural anthropology course. Exploration of recent works in anthropology and other disciplines which address practice and resistance, as part of an effort to understand processes that have shaped modern and postcolonial society and culture. Letter grading.

**253. Economic Anthropology. (4)** Lecture, three hours. May be repeated for credit. S/U or letter grading.

**254. Kinship. (4)** Lecture, three hours. May be repeated for credit. S/U or letter grading.

**255. Comparative Political Institutions. (4)** Lecture, three hours. May be repeated for credit. S/U or letter grading.

**255P. Political Economy. (4)** Seminar, three hours. Designed for graduate anthropology students. Introduction to range of approaches anthropologists have used to analyze political economy of capitalism in relation to issues of nation and state building, race, colonialism, and transnationalism. S/U or letter grading.

**256. Anthropology of Conflict. (4)** Seminar, three hours. Open to undergraduates with consent of instructor. Examination of events and institutions associated with large-scale or ongoing conflict in a variety of settings. Particular consideration to roots of violence, violent manifestations and cross-cultural misunderstandings, and nature and content of armed confrontation. S/U or letter grading.

## Applied Anthropology

**260. Urban Anthropology. (4)** Seminar, three hours. Requirement: course 167. Intensive anthropological examination of the urban setting as a human environment. S/U or letter grading.

**261Q. Issues in Applied Anthropology. (4)** Seminar, three hours. Use of seminar format to explore selected domestic and international problems from applied anthropological perspective. Consideration of history of applied anthropology, ethics, and careers strategies. S/U or letter grading.

**263P. Gender Systems. (4)** Seminar, three hours. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideational systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

**M263Q. Advanced Seminar: Medical Anthropology. (4)** (Same as Community Health Sciences M244, Nursing M273, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

**M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4)** (Same as Community Health Sciences M264 and Latin American Studies M264.) Lecture, three hours. Recommended preparation: Community Health Sciences 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with a variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

**M265. Anthropology of Genetic Knowledge. (4)** (Same as Psychiatry M283.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape our understandings of genetic discoveries and how genetic information is used to create conceptions of the self and society. Letter grading.

**M266. Health and Culture in the Americas. (4)** (Same as Community Health Sciences M260 and Latin American Studies M260.) Lecture, three hours; discussion, one hour. Preparation: bilingual skills (English/Spanish) for Spanish discussion section. Recommended preparation: Community Health Sciences 132. Health issues throughout the Americas, especially indigenous/Mestizo Latin American populations. Holistic approach covering politics, economics, history, geography, human rights, maternal/child health, culture. Letter grading.

**CM268P. Perspectives on Health of Native North Americans. (4)** (Same as American Indian Studies CM268P.) Seminar, three hours. Recommended preparation: some knowledge of medical anthropology and/or history and contemporary situation of first peoples of North America. Examination of different perspectives related to health and health care of Native North Americans (within present boundaries of the U.S. and Canada) in relation to cultural, social, political, and economic aspects of changing historical context. Concurrently scheduled with course CM168P. S/U or letter grading.

**M269. Contemporary Issues of the American Indian. (4)** (Same as American Indian Studies M200C and Sociology M275.) Seminar, three hours. Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B. Letter grading.

**M269P. Politics of Reproduction. (4)** (Same as Psychiatry M280.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society. Letter grading.

**C269R. Repatriation of Native American Human Remains and Cultural Objects. (4)** Lecture, two hours; discussion, one hour. Native Americans have recently been successful in obtaining passage of federal and state laws repatriating human remains and cultural objects to them. Examination of this phenomenon. Concurrently scheduled with course C169R. Letter grading.

## Regional Cultures

**271. Contemporary Problems in Africa. (4)** Seminar, three hours. Problematic issues in Africa in light of classical anthropological literature and recent work by anthropologists and other fieldworkers in Africa, with cases from eastern and southern Africa. S/U or letter grading.

**M272. Indians of South America. (4)** (Same as Latin American Studies M250A.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit. S/U or letter grading.

**273. Cultures of the Middle East. (4)** Seminar, three hours. Survey of literature and problems of various cultures of the Middle East. S/U or letter grading.

**277. Anthropology of China. (4)** Seminar, three hours. Designed for graduate students. Survey of selected literature and current developments in field of Chinese social-cultural anthropology. Main topics include family and kinship, interpersonal relations, social differences, local elite and the state, rituals and beliefs, popular culture, consumerism, and cultural globalization. S/U or letter grading.

## History, Theory, and Method

**281. Selected Topics in History of Anthropology. (4)** Lecture, three hours. Particular problems in history of anthropology as dictated by interests of students and faculty. May be repeated for credit. S/U or letter grading.

**282. Research Design in Cultural Anthropology. (4)** Lecture, three hours. Primarily designed for graduate students preparing for fieldwork. Unique position of anthropology among the sciences and resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion. S/U or letter grading.

**283. Formal Methods of Data Analysis in Anthropology. (4)** Seminar, three hours. Current topics and issues related to formal analysis of data and representation of cultural constructs: formal models of kinship terminologies, structural models of cognitive systems, graph theoretic models of networks, models of decision making, hierarchical information systems, stability in complex adaptive systems. S/U or letter grading.

**M284. Qualitative Research Methodology. (4)** (Same as Community Health Sciences M216.) Discussion, three hours; laboratory, one hour. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. Letter grading.

**285. Schools, Domains, and Strategies in World Archaeology. (4)** Seminar, three hours. Comparative examination of schools of world archaeology, contrasting their respective databases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, as are students interested in history or philosophy of science. Letter grading.

**285P. Selected Topics in Anthropological/Archaeological Theory. (4)** Seminar, three hours. Designed for graduate students. Variable topics course on important theoretical subjects in anthropology and archaeology. May be repeated for credit. S/U or letter grading.

**286P. Selected Topics in Computer Simulation and Modeling. (4)** Lecture, three hours. Requirement: course 180. Applications of computer simulations and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic evolutionary, and other theoretical foci. S/U or letter grading.

**287. Poststructural Theories. (4)** Seminar, three hours. Designed for graduate students. Examination of development and application of poststructural theories in anthropology by exploring interdisciplinary connections, especially as they concern the concept of culture, narrative, ethnographic writing, reflexivity, politics of representation, historicity, and study of the self, identity, and the body. S/U or letter grading.

**287P. Anthropology and Colonialism. (4)** Lecture, three hours. Designed for graduate students. Exploration of multifaceted nature of colonialism and its cultural manifestations in a variety of geographical areas. Reconsideration of history of anthropology for, as Talal Asad argues, "anthropology emerged as a distinctive discipline at the beginning of the colonial era." S/U or letter grading.

**M287Q. Native American Historical Demography. (4)** (Same as History M260D.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence. Letter grading.

**CM289A-CM289B. Theoretical Behavioral Ecology. (4)** (Same as Organismic Biology CM295A-CM295B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM289A is requisite to CM289B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B. Letter grading.

**292. Making Oral Presentations. (4)** Lecture/student presentations, two hours; discussion, one hour. Designed for graduate students. How to organize and present seminar reports, papers at scholarly conferences, and lectures to professional audiences. Opportunity for students to develop their speaking skills through actual practice in workshop atmosphere of mutual support and constructive criticism. S/U grading.

**297. Selected Topics in Anthropology. (2 to 4)** Seminar, three hours. Designed for graduate students. Study of selected topics of anthropological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. S/U or letter grading.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Anthropology. (2 to 4)** Seminar/workshop, three hours. Designed for graduate students. Required of all new teaching assistants. Workshop/seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward nine-course requirement for M.A. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Individual Studies for Graduate Students. (2 to 8)** Tutorial, to be arranged. Directed individual studies. S/U or letter grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (2 to 8)** Tutorial, to be arranged. Preparation of research data and writing of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework. S/U grading.

# APPLIED LINGUISTICS AND TEACHING ENGLISH AS A SECOND LANGUAGE

*College of Letters and Science*

UCLA  
3300 Rolfe Hall  
Box 951531  
Los Angeles, CA 90095-1531  
(310) 825-4631  
<http://www.humnet.ucla.edu/humnet/al/frames/alhome.htm>

John H. Schumann, Ed.D., *Chair*

## Professors

Roger W. Andersen, Ph.D.  
Lyle F. Bachman, Ph.D.  
Marianne Celce-Murcia, Ph.D.  
Charles Goodwin, Ph.D.  
Marjorie Harness Goodwin, Ph.D.  
Nina M. Hyams, Ph.D.  
Edward L. Keenan, Ph.D.  
Reynaldo F. Macias, Ph.D.  
Pamela Munro, Ph.D.  
Elinor Ochs, Ph.D.  
Emanuel A. Schegloff, Ph.D.  
John H. Schumann, Ed.D.

## Professors Emeriti

Russell N. Campbell, Ph.D.  
Evelyn R. Hatch, Ph.D.  
Earl J. Rand, Ph.D.

## Lecturers

Donna M. Brinton, M.A.  
Janet Goodwin, M.A.  
Christine Holten, M.A.  
Linda Jensen, M.A.

## Scope and Objectives

UCLA is a dynamic place to study applied linguistics. The Department of Applied Linguistics and Teaching English as a Second Language offers a Ph.D. in Applied Linguistics and a Master of Arts in Applied Linguistics and Teaching English as a Second Language. Three areas have been identified as integral to a thorough understanding of the field of applied linguistics: language acquisition, language assessment, and discourse and grammar analysis. Program participants are encouraged to study themes within these areas from a variety of perspectives.

Departmental faculty members, as well as professors in Anthropology, East Asian Languages and Cultures, Education, Linguistics, Neurobiology, Psychology, and Sociology, among others, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students result in substantial research findings in the areas of specialization within the program, and their participation reinforces the interdisciplinary nature of applied linguistics research. Graduates pursue academic and professional careers at the highest level of service and inquiry.

The goal of the Ph.D. program in Applied Linguistics is to prepare students to apply relevant elements of linguistics, ethnography, psycholinguistics, and sociolinguistics to the investigation of language-related problems and issues in the everyday world. This is to be achieved by providing students with a broad background of information and the investigatory skills needed for teaching at the university level, program planning, and effective quantitative and qualitative research. The program is designed to encourage the mentorship relationship between students and faculty, as students are assigned a faculty adviser with whom they work throughout the program.

The M.A. program in Applied Linguistics and Teaching English as a Second Language (TESL) is designed as a first step in a research career in applied linguistics. It provides both breadth of knowledge in several areas of applied linguistics and the specialized knowledge and skills needed to plan and conduct research in one of the three areas of specialization.

Teacher education is no longer the main focus of the department; however, the department offers opportunities to students interested in pursuing this area as part of their academic program. Elective courses build on existing knowledge acquired in the required coursework in applied linguistics, and thus provide students with guidance in applying theoretical constructs to real-world classroom settings where language is taught and used. Language education skills provide graduate students with a secure means of financial support during their graduate program, and these skills may open doors to professional opportunities in academic and private sectors once students have completed their degree program. As part of the M.A. and Ph.D. programs, students may complete additional coursework to obtain the graduate-level Certificate in Teaching English as a Second Language.

## Language Acquisition

Language acquisition research seeks to (1) describe interlanguage systems, (2) examine underlying cognitive mechanisms that could account for these systems, (3) examine the social, affective, and neurobiological factors that influence second language development, and (4) explore the effect of instruction on the process. Additional areas of inquiry include comparisons between native and nonnative linguistic systems and how speakers use them in natural discourse, and explanations for variable success in second language acquisition in terms of the neural underpinnings of language as well as the neural basis for perception, attention, memory, and emotion.

## Language Assessment

Language assessment is concerned with the empirical investigation of theoretical questions on the one hand, and with providing useful tools for assessment in applied linguistics on the other. Language testing research has as its goals the formulation and empirical investiga-

tion of theories of language test performance and the demonstration of the ways in which performance on language tests is related to communicative language use in its widest sense.

#### Discourse and Grammar Analysis

Discourse and grammar analysis is concerned with how language users produce and interpret language in context. Discourse analysts research the linguistic structures of speech acts, conversational sequences, speech activities, oral and literate registers, and stance (among other constructs) and seek to relate these constructs to social and cultural norms, preferences, and expectations. The field articulates how lexico-grammar and discourse systematically vary across social situations and at the same time help to define those situations.

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Coordinator, ESL Service Courses, 3300 Rolfe Hall, UCLA, Box 951531, Los Angeles, CA 90095-1531.

## Undergraduate Study

### Language, Interaction, and Culture Minor

The Language, Interaction, and Culture minor is designed to train students in the naturalistic study of discourse in everyday interaction.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the minor adviser, 3300A Rolfe Hall, (310) 825-4631.

*Required Lower Division Courses (8 units):* Two courses from the following, with each course from a different group: group 1 — Anthropology 33 or 34; group 2 — Sociology 3 or 24; group 3 — Linguistics 1 or 2 or 20.

*Required Upper Division Courses (28 units):* Applied Linguistics and Teaching English as a Second Language M194 and six courses from the following, with at least one course from each group: group 1 — Anthropology M140, 141, 142A, 143, 144, M145, 146; group 2 — Sociology CM124A, CM124B, CM125, 126, M176; group 3 — Applied Linguistics and Teaching English as a Second Language 100, C116, 121, 125, M161, 170, Chicana and Chicano Studies 160, 161, 162, Japanese M120, CM122, Linguistics 114, 170.

No more than two upper division elective courses may be applied toward both the students' majors and this minor. All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Teaching English as a Second or Foreign Language Minor

The Teaching English as a Second or Foreign Language minor provides students with an overview of current second language pedagogical theories and practices; the experience of observing the second language acquisition process both in and out of the classroom; a supervised practicum experience in a variety of second language classroom settings; and an opportunity to reflect on the interaction of theory and practice in the teaching of English as a second or foreign language.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the minor adviser, 3300A Rolfe Hall, (310) 825-4631.

*Required Lower Division Course (4 units):* Linguistics 20 with a grade of C or better.

*Required Upper Division Courses (28 units):* (1) Three pedagogical foundation courses from Applied Linguistics and Teaching English as a Second Language 101 or 101W or C110, C116, C118; (2) a minimum of two pedagogical skill courses from C111, C112, C113, C115, C117; (3) a maximum of two courses in language and/or educational issues from English 121, English Composition 120A, 120B, 120C, 132C, Linguistics 10, C130, 140, 175. Students may complete all requirements for the minor by taking courses in items 1 and 2 above.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult the minor adviser before enrolling in any courses for the minor.

All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Successful completion of the minor is indicated on the transcript and diploma.

### English as a Second Language

English as a second language (ESL) courses are only for students whose native language is not English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE).

The ESLPE is required of all entering UCLA students whose first language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

The following nonnative-speaking students are exempt from the ESLPE: (1) first-year undergraduate students exempted based on their performance on the Subject A Examination (see Subject A in the Undergraduate Study section of this catalog), (2) undergraduate transfer students with grades of B or better in the English Composition 3 and English 4W equivalent courses at their transfer institutions (see the Undergraduate Study section of this catalog), and (3) graduate students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction (see International Applicants in the Graduate Study section of this catalog).

All other students must sit for the ESLPE and may be required to complete one or more ESL courses to satisfy the ESL requirement. Failure to sit for the ESLPE results in a hold on student records.

Undergraduate students may take the ESLPE once only. Graduate students who believe that their initial ESLPE score is not reflective of their English language proficiency due to having recently arrived in the U.S. may sit for the examination a second time in the subsequent term only (retaking the examination in the same term is not counted as a valid result). In cases where students retake the examination in their second term of study, the most recent examination score is held to be valid. Unauthorized retakes result in an invalid examination score.

Results of the ESLPE are used to determine placement into the required sequence of ESL courses or exemption from the ESL requirement. If held for the ESL requirement, students must begin taking courses during their first term in residence at UCLA and must complete the courses in sequence. The required sequence for undergraduates is English as a Second Language 33A, 33B, 33C, and 35; each course must be passed with a grade of C or better (C– or a Passed grade is not acceptable). The required sequence for graduate students is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If students do not achieve a minimum score on the placement examination, they may be required to spend a term studying elementary English exclusively, through UCLA Extension, before retaking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

College of Letters and Science undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the ELSPE.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Applied Linguistics and Teaching English as a Second Language offers the Master of Arts (M.A.) degree in Applied Linguistics and Teaching English as a Second Language, Master of Arts (M.A.) degree in Teaching English as Second Language, and Ph.D. in Applied Linguistics.

## Admission

### M.A. in Applied Linguistics and Teaching English as a Second Language

Students normally apply for the M.A. program if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only for Fall Quarter. To be admitted to the M.A. program, all applicants, including those who are U.S. citizens and those who are from other countries, must hold the equivalent of an American bachelor's degree. Applicants must also have completed the equivalent of Linguistics 120A and 120B at UCLA (or make them up as deficiency courses).

The admissions committee screens all applications using the following criteria: grade-point average (must be 3.0 or better), scores from the Graduate Record Examination (GRE), the score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination for international applicants whose native language is not English, a relevant research paper; letters of recommendation, and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study applied linguistics at UCLA; (2) area of applied linguistics in which the applicant may want to specialize and do research, the reasons for this interest, and the qualifications and professional experience relevant to doing research in this area; and (3) knowledge of other languages, dialects, or cultures.

International students who hold a bachelor's degree or higher from a university in a country where the official language is English and in which English is the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the TOEFL or IELTS and the UCLA En-

glish as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL or IELTS prior to arrival at UCLA, submitting the score as part of the application process. These students must also take the ESLPE on arrival at UCLA. Depending on the results of this examination, students may be required to take English as a Second Language courses to improve their command of academic English.

Applications for admission may be obtained from the graduate adviser. As noted, the program requires three letters of recommendation in support of the application. Applicants should submit the letters of recommendation directly to the Graduate Adviser, Department of Applied Linguistics and Teaching English as a Second Language, 3300 Rolfe Hall, UCLA, Box 951531, Los Angeles, CA 90095-1531. Because admission is limited to approximately 20 students per year, it is important that completed applications and all supporting material be submitted by December 15.

### M.A. in Teaching English as a Second Language

The M.A. program in Teaching English as a Second Language is not currently accepting applications.

### Ph.D. in Applied Linguistics

The basic requirement for admission to the Ph.D. program is the completion of an M.A. degree in Teaching English as a Second Language (TESL), Linguistics, or Applied Linguistics, or in a related field that is deemed the equivalent of one of these degree programs. Applicants who hold a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from a university other than UCLA may be admitted and may be required to make up deficiencies in course preparation as deemed necessary by the faculty. Applicants whose graduate degree is in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or Applied Linguistics and TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit the following items by the preceding December 15: (1) a statement of purpose describing their research background and the type of dissertation they hope to prepare, (2) three letters of recommendation from professors who are well acquainted with their academic background, (3) the M.A. thesis or related research papers, and (4) Graduate Record Examination (GRE) scores. International applicants whose native language is other than English must submit scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

The admissions committee considers all of the above criteria, as well as undergraduate and graduate grade-point averages.

## Master's Degrees

### M.A. in Applied Linguistics and Teaching English as a Second Language

The three areas of specialization are second language acquisition, assessment, and discourse analysis.

The M.A. degree is offered through the thesis plan. A total of 10 courses is required, seven of which must be in the 200 series. Students lacking a significant foreign language background are required to complete additional foreign language electives. Requisites include introductory courses in phonetics, phonology, and syntax equivalent to courses taught at UCLA and a minimum of two quarters of a foreign language.

Coursework includes a mix of foundation, specialization, and elective courses. Students who wish to obtain a Certificate in Teaching English as a Second Language or desire advanced language education training in order to serve as teaching assistants might choose to take certain professional development electives. Students who come to the program from fields other than linguistics may need to take additional courses in the nature of language and language analysis. In order to enhance an interdisciplinary perspective, students are also encouraged to take relevant electives in other departments and programs.

There is a language requirement for this degree.

### Teaching English as a Second Language Certificate

Graduate students enrolled in degree programs who successfully complete a required list of eight courses and two quarters of a foreign language may qualify for a Teaching English as a Second Language Certificate, which is not a California State Teaching Credential.

### M.A. in Teaching English as a Second Language

The M.A. degree is offered through the thesis plan. A total of 14 courses is required, five of which must be at the graduate level. Requirements include core and elective courses.

One quarter of supervised teaching is required during the first year unless students have had extensive teaching experience. If this requirement is completed at UCLA in an adult education setting, students are eligible for the California Adult Education Credential in English as a Second Language.

There is a language requirement for this degree.

## Doctoral Degree

### Ph.D. in Applied Linguistics

The three areas of specialization are second language acquisition, assessment, and discourse analysis.

For basic preparation in applied linguistics, students can choose either a phonetics and phonology track, a syntax and semantics track, or

a discourse analysis track. There are required courses for each track. As a breadth requirement, students must take at least 32 units of graduate-level coursework. The 32 units may not include courses taken while completing designated basic preparation courses and must include 8 units in one area outside the area of specialization.

Written and oral qualifying examinations are required. The written examination is in the form of two original research papers of publishable quality in different areas of specialization. Following successful completion of the papers, students take the University Oral Qualifying Examination, which focuses on the dissertation prospectus.

There is a language requirement for this degree.

## Applied Linguistics

### Graduate Courses

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study. (4 to 8)** Tutorial, to be arranged. Limited to Ph.D. students. Independent study in an area of applied linguistics. Up to 8 units may be applied toward Ph.D. course requirements. May be repeated for credit. S/U or letter grading.

**597. Preparation for Ph.D. Candidacy Examination. (4 to 8)** Tutorial, to be arranged. Preparation: completion of at least six courses of the 32-unit requirement for Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 16)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each term they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward Ph.D. course requirements. S/U grading.

## Applied Linguistics and Teaching English as a Second Language

### Upper Division Courses

**100. Discourse and Society. (4)** Lecture, four hours; discussion, two hours. Important contemporary perspectives for study of language in its social and cultural matrix. Topics include conversational organization, narrative, repair and grammatical organization, language in cultural settings, language socialization, and language impairment and institutional discourse. Focus on analysis of audio and video recordings of talk in a variety of natural settings. P/NP or letter grading.

**101. Introduction to Language Learning and Language Teaching. (4)** Lecture, two hours; discussion, two hours. Requisite: Linguistics 1. Not open for credit to students with credit for course 101W. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

**101W. Introduction to Language Learning and Language Teaching. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 101. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. Satisfies Letters and Science Writing II requirement. Letter grading.

**C110. Theories of Language Education and Learning. (4)** Lecture, four hours. Requisite: Linguistics 20. Survey of theory and practice in teaching of second languages, including (1) current and historical views of second language instruction, (2) overview of first language acquisition and comparison of second language acquisition, (3) survey of factors which affect second language acquisition process, (4) presentation of language learning and teaching models. Concurrently scheduled with course C210. P/NP or letter grading.

**C111. Writing for Second/Foreign Language Education. (4)** (Formerly numbered C106.) Lecture, four hours. Requisite: course 101 or C110. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C211. P/NP or letter grading.

**C112. Reading for Second/Foreign Language Education. (4)** (Formerly numbered C107.) Lecture, four hours. Requisite: course 101 or C110. Survey of important theoretical and methodological issues related to second/foreign language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C212. P/NP or letter grading.

**C113. Phonetics for Second/Foreign Language Education. (4)** (Formerly numbered C103.) Lecture, four hours. Requisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C213. P/NP or letter grading.

**C115. Media for Second/Foreign Language Education. (4)** Lecture, four hours. Requisite: course 101 or C110. Rationale and pedagogical application for using media equipment and materials in the second/foreign language classroom. Training in standard classroom media equipment operation, basic materials preparation, and production techniques, and review of published media materials, with focus on their application to second/foreign language instruction. Concurrently scheduled with course C215. P/NP or letter grading.

**C116. Structure of Present-Day English. (4)** (Formerly numbered C122.) Lecture, six hours. Requisite: Linguistics 20. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C216. Letter grading.

**C117. Literature in Second/Foreign Language Education. (4)** (Formerly numbered C109.) Lecture, four hours. Requisite: course 101 or C110. Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C217. P/NP or letter grading.

**C118. Language Teaching Practicum. (4)** Seminar, four hours. Requisites: courses 101 or C110, C116. Theoretical and practical concerns regarding second language teaching, with emphasis on fieldwork experiences and grounding of solutions to problems faced in current research in language education and language pedagogy. Concurrently scheduled with course C218. P/NP grading.

**C119. Current Issues in Second/Foreign Language Education. (4)** Seminar, four hours. Requisite: course 101 or C110. Specialized topics in language education. Emphasis varies according to current topics of the theoretical concern in field of second/foreign language education. May be repeated for credit with topic change. Concurrently scheduled with course C219. P/NP or letter grading.

**121. Language Learning and Immigrant Experience. (4)** Seminar, four hours. Exploration of value and relevance of linguistic anthropological, ethnomethodological, sociocultural, pragmatic, and sociolinguistic approaches to study of immigration and second language acquisition. Readings from language learning memoir provide literary account of immigrant experience which illustrates intimate relationship between language and culture in second language learning. Letter grading.

**125. Language Socialization. (4)** Seminar, four hours. Exploration of process of socialization through language, and socialization to use language across life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Examination of ways in which verbal interaction between novices and experts is structured linguistically and culturally. Letter grading.

**CM127. Animal Communication. (5)** (Same as Anthropology M127 and Communication Studies M127.) Lecture, four hours. Designed for Anthropology, Applied Linguistics, and Communication Studies majors. Evolution, functions, design, and diversity of animal communication systems such as bird song, dolphin calls, whale song, primate social signals, and human language. Concurrently scheduled with course C292. Letter grading.

**M161. Talk and the Body. (4)** (Formerly numbered 161.) (Same as Anthropology M148 and Communication Studies M123.) Seminar, four hours. Relationship between language and human body raises a host of interesting topics. New approaches to phenomena such as embodiment become possible when the body is analyzed, not as an isolated entity, but as a visible agent whose talk and action are lodged within both processes of human interaction and rich settings where people pursue courses of action that count in their lives. Letter grading.

**170. Field Methods in Discourse and Society. (4)** Seminar, four hours. Ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in community settings. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. Letter grading.

**M194. Senior Seminar: Language, Interaction, and Culture. (4)** (Same as Anthropology M194 and Sociology M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

### Graduate Courses

**200. Research in Applied Linguistics. (4)** Seminar, four hours. Requisites: courses 201, 202, 204, M206. Within context of a current research area in applied linguistics (language assessment, language acquisition, discourse/functional grammar), all M.A. students prepare and submit viable research proposal for M.A. thesis. Letter grading.

**201. Functional Foundations of Language. (4)** Seminar, four hours. Requisite: Linguistics 20. Introduction to analysis and description of form, meaning, and function of structures (morphological and syntactic), lexical items, and linguistic features of discourse. Exploration of variety of approaches integrating form, meaning, and function. Letter grading.

**202. Foundations of Language Acquisition. (4)** Seminar, four hours. Requisite: Linguistics 20. Introduction to theoretical and empirical research in language acquisition and second language acquisition. Linguistic nature of learners' interlanguage systems and underlying cognitive mechanisms posited to explain them, as well as various social, affective, and neurobiological factors which affect ultimate success of learner. Letter grading.

**204. Foundations of Language Assessment. (4)** Seminar, four hours. Requisite: Linguistics 20. Conceptual foundations of language assessment, including nature of measurement, nature of language ability, uses of language assessment in research, types and characteristics of assessment methods, reliability, and validity. Current issues and problems in language assessment. Letter grading.

**M206. Social Foundations of Language. (4)** (Formerly numbered 206.) (Same as Anthropology M240.) Seminar, four hours. Requisite: Linguistics 20. Basic grounding in sociolinguistic theory and methodology. Introduction to current issues in study of tested behavior, including varied ways scholars visualize relation between language and social context. S/U or letter grading.

**C210. Theories of Language Education and Learning. (4)** (Formerly numbered 210.) Lecture, four hours. Requisite: Linguistics 20. Survey of theory and practice in teaching of second languages, including (1) current and historical views of second language instruction, (2) overview of first language acquisition and comparison of second language acquisition, (3) survey of factors which affect second language acquisition process, (4) presentation of language learning and teaching models. Concurrently scheduled with course C110. S/U or letter grading.

**C211. Writing for Second/Foreign Language Education. (4)** Lecture, four hours. Requisite: course C210. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C111. Additional assignments required of graduate students. S/U or letter grading.

**C212. Reading for Second/Foreign Language Education. (4)** Lecture, four hours. Requisite: course C210. Survey of important theoretical and methodological issues related to second and foreign language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C112. Additional assignments required of graduate students. S/U or letter grading.

**C213. Phonetics for Second/Foreign Language Education. (4)** Lecture, four hours. Requisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C113. Additional assignments required of graduate students. S/U or letter grading.

**214. Materials Development for Language Education. (4)** Seminar, four hours. Preparation: at least two years of second language instruction experience. Requisite: course C210. Planning and preparation of an original set of language teaching materials geared to needs of a specified group of learners. Revisions of first drafts and evaluation of one's own work and that of one's peers. Introduction to process of publishing language teaching materials. S/U or letter grading.

**C215. Media for Second/Foreign Language Education. (4)** (Formerly numbered 215.) Lecture, four hours. Requisite: course C210. Rationale and pedagogical application for using media equipment and materials in the second/foreign language classroom. Training in standard classroom media equipment operation, basic materials preparation, and production techniques, and review of published media materials, with focus on their application to second/foreign language instruction. Concurrently scheduled with course C115. S/U or letter grading.

**C216. Structure of Present-Day English. (4)** Lecture, six hours. Requisite: Linguistics 20. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C116. Additional assignments required of graduate students. Letter grading.

**C217. Literature in Second/Foreign Language Education. (4)** Lecture, four hours. Requisite: course C210. Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C117. Additional assignments required of graduate students. S/U or letter grading.

**C218. Language Teaching Practicum. (4)** (Formerly numbered 218.) Seminar, four hours. Requisites: courses C210, C216. Theoretical and practical concerns regarding second language teaching, with emphasis on field-work experiences and grounding of solutions to problems faced in current research in language education and language pedagogy. Concurrently scheduled with course C118. S/U grading.

**C219. Current Issues in Second/Foreign Language Education. (4)** (Formerly numbered 219.) Seminar, four hours. Requisite: course C210. Specialized topics in language education. Emphasis varies according to current topics of theoretical concern in field of second/foreign language education. May be repeated for credit with topic change. Concurrently scheduled with course C119. Additional assignments required of graduate students. S/U or letter grading.

**220. Language Acquisition. (4)** Seminar, four hours. Requisites: course 202, Linguistics 120B. Designed for advanced graduate students (beginning Ph.D. and second-year M.A.). Hands-on project-oriented survey of research on acquisition of both first and second languages from a crosslinguistic and interdisciplinary perspective. Letter grading.

**221. Experiential Seminar: Second Language Learning. (4)** (Formerly numbered 227.) Requisite: course 202. Students learn an uncommonly taught language with use of authentic language materials (video and audio recordings and print materials). Discussion of experience in terms of issues in language learning and language teaching. S/U or letter grading.

**222. Discourse-Centered Language Learning. (4)** Requisite: course 202. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language acquisition research.

**223. Topics in Psycholinguistics. (4)** Requisite: course 202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognitive science, types and theories of bilingualism, learning theories and their influence on language teaching. May be repeated for credit with topic change.

**M224. Language Socialization. (4)** (Formerly numbered 224.) (Same as Anthropology M248.) Seminar, four hours. Requisite: course M206. Exploration of process of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Ways in which verbal interaction between novices and experts is structured linguistically and culturally. S/U or letter grading.

**229. Current Issues in Language Acquisition. (4)** Requisite: course 202. Designed to explore current issues in language acquisition from both a theoretical and applied research perspective and to provide actual experience in addressing a current topic. Specific topics vary according to trends in the field. May be repeated for credit with topic change.

**230. Advanced Seminar: Interlanguage Analysis. (4)** Seminar, four hours. Requisite: course 220. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with aim of understanding how interlanguage is organized. Original research projects. May be repeated for credit with topic change. Letter grading.

**231. Crosslinguistic Topics in Language Acquisition. (4)** Requisite: course 220. Advanced seminar on language acquisition in which a particular linguistics topic (e.g., development of tense/aspect, reference, subordination, agreement) is pursued from crosslinguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., crosslinguistically valid) mechanisms of language development. May be repeated for credit with topic change.

**240. Design and Development of Language Assessment Procedures. (4)** Requisite: course 204. Considerations in design and development of language assessment procedures and major types of assessment procedures for different language abilities. Practical experience in design and construction of assessment procedures. Project required. S/U or letter grading.

**241. Analysis and Use of Language Assessment Data. (4)** Requisite: course 204. Collection, analysis, and use of data from language assessment procedures. Topics include collecting feedback, descriptive statistics, qualitative data reduction techniques, item analysis and approaches to estimation of reliability and to validation of data-based interpretations. Project required. S/U or letter grading.

**242. Experimental Design and Statistics for Applied Linguistics. (4)** Requisite: course 204. Specialized topics of interest to graduate students in applied linguistics, with focus on design and interpretation of research projects in the field. Exploration of issues in both qualitative and quantitative study design, interpretation of findings, and presentation of results. Emphasis varies according to current theoretical methodological trends in the field. Project required. S/U or letter grading.

**249. Current Issues in Language Assessment. (4)** Requisite: course 204. Designed to explore current issues in language assessment from both theoretical and practical perspectives and to provide actual experience in addressing a current issue. Specific topics vary according to trends in the field. May be repeated for credit with topic change. S/U or letter grading.

**250. Advanced Seminar: Language Assessment. (4)** Requisites: courses 204, 241. Designed to cover application of a technical issue such as reliability, validation, criterion-referenced assessment, generalizability theory, item-response theory, or program evaluation to language assessment in depth. Specific topics vary. Project required. May be repeated for credit with topic change. S/U or letter grading.

**258. Assessment Laboratory. (4)** Collaborative coursework, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in real-world settings. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and interpreting and reporting results. May be repeated for credit. S/U or letter grading.

**260. Discourse Analysis. (4)** Requisite: course M206. Survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.

**263. Crosslinguistic Topics in Functional Grammar I: Typology. (4)** Seminar, four hours. Survey of a particular linguistic area from typological perspective within functional grammar framework. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change. S/U or letter grading.

**264. Crosslinguistic Topics in Functional Grammar II: Discourse. (4)** Requisite: course 263. Crosslinguistic study of discourse function of grammatical devices. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

**265. Topics in Functional Grammar. (4)** Requisite: course 201. Specialized topics in functional grammar of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical import in the field, such as voice, nominal reference, and word order. May be repeated for credit with topic change.

**M266. Topics in Semantics and Pragmatics. (4)** (Same as Anthropology M247.) Requisite: course 201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, eventuality, reported speech, etc. May be repeated for credit with topic change.

**268. Crosslinguistic Research Laboratory. (4)** Advanced procedures in data analysis in crosslinguistic research, including critical reading of relevant publications. Students must work toward a specific program-relevant product, such as thesis, dissertation proposal, qualifying paper, dissertation, research paper, or grant proposal. May be repeated for credit. S/U or letter grading.

**269. Current Issues in Discourse Analysis. (4)** Requisite: course M206. Specialized topics in discourse analysis of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical and practical concern in the field. May be repeated for credit with topic change.

**M270A-M270B. Ethnographic Methods in Discourse Analysis I, II. (4-4)** (Same as Anthropology M249A-M249B.) Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. S/U or letter grading. **M270A.** Seminar, four hours. Prerequisite: course 260 or Anthropology 242 or Sociology C244A. Devoted to skills related to collecting socially and culturally meaningful data. Letter grading. **M270B.** Lecture, four hours. Prerequisite: course M270A. Devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal. S/U or letter grading.

**M270P. Ethnographic Technologies Laboratory I. (4)** (Same as Anthropology M249P.) Corequisite: course M270A or Anthropology M249A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and videorecording verbal interaction. S/U grading.

**M270Q. Ethnographic Technologies Laboratory II. (4)** (Same as Anthropology M249Q.) Corequisite: course M270B or Anthropology M249B. Hands-on mentorship in editing ethnographic video footage, incorporating video frame grabs into transcript and analysis of verbal interaction, writing a grant proposal, and assembling a conference presentation. S/U grading.

**271. Advanced Seminar: Cohesion Analysis of English Structure. (4)** Prerequisite: course C216. Investigation in depth of selected linguistic features of oral and written texts that go beyond sentence level and thus signal cohesion. Study of structures to determine their function in a variety of English texts representing several discourse types.

**M272. Grammar and Discourse. (4)** (Same as Anthropology M246A.) Prerequisite: course 201. Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

**M273. Grammar and Discourse Practicum. (4)** (Same as Anthropology M246B.) Prerequisite: course M272. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

**274. Advanced Seminar: Contextual Analysis of English Structure. (4)** Prerequisite: course C216. Examination of selected words and/or structures in oral and written texts to determine when and why they occur. Beginning with frequency and distribution of the form(s), exploration of meaning and function of the form(s).

**278. Discourse Laboratory. (4)** Prerequisites: courses M206, 260, two other discourse analysis courses. Designed for applied linguistics Ph.D. students. Advanced procedures in data analysis in the field of discourse analysis, including development of a large-scale research project and critical review of current research. May be repeated for credit. S/U or letter grading.

**291. Current Issues in Applied Linguistics. (4)** Specialized topics in applied linguistics of current relevance in two or more of the following areas: language acquisition, language assessment, and discourse analysis/functional grammar, and of interest to students in applied linguistics and TESL. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

**C292. Animal Communication. (5)** Lecture, four hours. Designed for Anthropology, Applied Linguistics, and Communication Studies majors. Evolution, functions, design, and diversity of animal communication systems such as bird song, dolphin calls, whale song, primate social signals, and human language. Concurrently scheduled with course CM127. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Applied Linguistics and TESL M.A. Colloquium. (4)** Discussion, four hours. M.A. candidates present and defend results of their thesis research. Required of all candidates but may not be applied toward M.A. degree requirements. Candidates for Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading.

**495. Training and Supervision of Teaching Assistants. (2)** Seminar, two or more hours. Preparation: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward degree requirements for M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study. (4)** Limited to graduate students. Independent study in an area related to English as a second language. May not be repeated for credit.

**598. M.A. Research and Thesis Preparation. (4 to 8)** Limited to graduate students. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (4 units) toward degree is allowed only once, but all M.A. candidates must enroll in course each term they are registered and engaged in thesis preparation. S/U grading.

## Course List

### Language Acquisition

**Applied Linguistics and Teaching English as a Second Language**

- 221. Experiential Seminar: Second Language Learning
- 222. Discourse-Centered Language Learning
- 223. Topics in Psycholinguistics
- M224. Language Socialization
- 229. Current Issues in Language Acquisition
- 230. Advanced Seminar: Interlanguage Analysis
- 231. Crosslinguistic Topics in Language Acquisition

#### Education

- 217D. Language Development and Education
- 227B. Research on Cognitive and Language Characteristics of Exceptional Individuals

#### Linguistics

- 213A. Grammatical Development
- 213B. Brain Bases for Language
- C233. Language Development
- C235. Neurolinguistics
- 254A. Topics in Linguistics
- 259A, 259B. Topics in Linguistics II: Proseminar
- 264A-264B-264C. Seminars: Special Topics in Linguistic Theory

#### Psychiatry and Biobehavioral Sciences

- 257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders

#### Psychology

- 240A-240B. Developmental Psychology
- 242F. Seminar: Developmental Psychology — Development of Language and Communication
- 260A-260B-260C. Proseminars: Cognitive Psychology
- 268B. Seminar: Human Information Processing — Human Learning and Memory
- 268D. Seminar: Human Information Processing — Language and Cognition

## Language Assessment

**Applied Linguistics and Teaching English as a Second Language**

- 240. Design and Development of Language Assessment Procedures
- 241. Analysis and Use of Language Assessment Data
- 242. Experimental Design and Statistics for Applied Linguistics
- 249. Current Issues in Language Assessment
- 250. Advanced Seminar: Language Assessment
- 258. Assessment Laboratory

#### Education

- 200B. Survey Research Methods in Education
- 200C. Analysis of Survey Data in Education
- 202. Evaluation Theory
- 211A. Measurement of Educational Achievement and Aptitude
- 211B. Measurement in Education: Underlying Theory
- 211C. Item Response Theory
- 219. Laboratory: Advanced Topics in Research Methodology
- 221. Computer Analyses of Empirical Data in Education
- 222C. Qualitative Data Reduction and Analysis
- 230A. Introduction to Research Design and Statistics
- 230B-230C. Linear Statistical Models in Social Science Research
- 230X. Applied Research Design and Statistics for Social Sciences
- 231A. Multivariate Analysis
- 231B. Factor Analysis
- 231C. Analysis of Categorical and Other Nonnormal Data
- 231D. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis
- M231E. Statistical Analysis with Latent Variables

- 252A. Multivariate Analysis
- 252B. Discrete Multivariate Analysis
- 253. Factor Analysis
- 254A. Psychological Scaling
- 254B. Cluster Analysis
- 255. Quantitative Aspects of Assessment
- M257. Multivariate Analysis with Latent Variables
- 259. Quantitative Methods in Cognitive Psychology

- 259. Quantitative Methods in Cognitive Psychology

- 231A. Multivariate Analysis

- 231B. Factor Analysis

- 231C. Analysis of Categorical and Other Nonnormal Data

251A, 251B. Topics in Phonetics and Phonology

252A, 252B. Topics in Syntax and Semantics

253A, 253B. Topics in Language Variation

254A, 254B. Topics in Linguistics

256A, 256B. Topics in Phonetics and Phonology II: Proseminar

257A, 257B. Topics in Syntax and Semantics II: Proseminar

258A, 258B. Topics in Language Variation II: Proseminar

259A, 259B. Topics in Linguistics II: Proseminar

263A-263B-263C. Seminars: Language Variation (only one of these may be applied toward the 32-unit requirement)

#### Sociology

C244A-C244B. Conversational Structures I, II

C258. Talk and Social Institutions

266. Selected Problems in Analysis of Conversation

267. Selected Problems in Communication

#### Spanish (Spanish and Portuguese)

209. Dialectology

256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

## English as a Second Language

### Lower Division Courses

**32. Conversation and Interaction for Academic Purposes. (4)** Lecture, four hours. Development of oral skills that prepare nonnative speakers of English to improve critical listening skills, participate in class discussions, make oral presentations before an audience, ask and answer questions, participate appropriately in conversations with members of the academic community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

**33A. Low Intermediate English as a Second Language. (4)** Recitation, eight hours; laboratory, two hours. Prerequisite: Extension course XL832 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Displaces 8 units on student's Study List but yields only 4 units of credit toward a degree. Intensive instruction in structure of English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

**33B. High Intermediate English as a Second Language. (4)** Recitation, five hours. Prerequisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

**33C. Advanced English as a Second Language. (4)** Recitation, five hours. Prerequisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on academic reading, writing, study skills, and lecture comprehension.

**34. Public Speaking for Academic Purposes. (4)** Lecture, four hours. Prerequisite: course 33B or proficiency demonstrated on English as a Second Language Placement Examination. Designed to help nonnative speakers of English communicate effectively in academic and professional settings. Development of oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions, give lectures or speeches before an audience, respond to questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

**35. Developmental Composition for ESL Students. (5)** Lecture, four hours. Prerequisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination and/or Subject A Examination. Developmental composition skills for ESL students, with focus on the writing process, grammatical structures key to clear and effective style, mechanics of writing, and practice with major forms of academic writing. Additional emphasis on academic reading skills. Completion of course with a grade of C or better satisfies Subject A requirement. Letter grading.

**36. Intermediate Composition for ESL Students. (5)** Lecture, four hours. Prerequisite: course 35 or proficiency demonstrated on English as a Second Language Placement Examination. Focus on academic argumentation and rhetorical techniques found in academic writing. Special attention to individual research, grammatical structures, and style. Satisfies Letters and Science Writing I requirement. Letter grading.

**37. English Grammar and Style for Academic Purposes. (4)** Lecture, four hours. Prerequisite: course 33B (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Review of form and use of common grammatical structures found in academic discourse. Analysis of stylistic function of certain structures and practice in self-editing strategies. P/NP (undergraduates), S/U (graduates), or letter grading.

**38. Pronunciation: Stress and Intonation in English. (4)** Lecture, four hours. Designed to help nonnative speakers of English communicate effectively in social as well as classroom/academic settings and improve critical listening skills. Special focus on three important aspects of pronunciation: stress, rhythm, and intonation. P/NP (undergraduates), S/U (graduates), or letter grading.

**39A. Intensive Language and Fluency Training for International Teaching Assistants. (4)** Lecture, six hours. Recommended for individuals whose SPEAK score is 40 or below. Designed to aid international graduate students who wish to become teaching assistants, with focus on development of general communicative competence and fluency in classroom discourse and improvement of accuracy of pronunciation and spoken grammar. Use of specialized pronunciation software in computer laboratory. P/NP (undergraduates), S/U (graduates), or letter grading.

**39B. Communication Strategies for International Teaching Assistants. (4)** Lecture, four hours. Recommended for individuals whose SPEAK score is 40 or 45. Designed to help nonnative speakers of English communicate effectively as teaching assistants, with focus on presentation skills, classroom language fluency, and pronunciation accuracy. P/NP (undergraduates), S/U (graduates), or letter grading.

**39C. Presentation and Discussion-Leading Skills for International Teaching Assistants. (4)** Lecture, four hours. Recommended for individuals whose SPEAK score is 45 or above. Designed to help nonnative speakers of English communicate effectively as teaching assistants. High-level problems of formal presentations. Activities include giving prepared speeches and leading and participating in discussions. Self and peer feedback provided. P/NP (undergraduates), S/U (graduates), or letter grading.

### Upper Division Courses

**106. Advanced Composition for ESL Students. (4)** Prerequisites: course 36 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

**107. Advanced Reading and Vocabulary for ESL Students. (4)** Lecture, four hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Instruction in and practice of academic reading skills using authentic university texts. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills. P/NP (undergraduates), S/U (graduates), or letter grading.

**108. Pronunciation: Sound System of English. (4)** (Formerly numbered 103.) Lecture, four hours. Prerequisite: course 33B or 33C or 35 or proficiency demonstrated on English as a Second Language Placement Examination. Detailed and systematic study of the sounds of American English and way in which they are put together in connected speech, applied to improvement of student's own accent. P/NP (undergraduates), S/U (graduates), or letter grading.

**109. Introduction to Literature for ESL Students. (4)** Lecture, four hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for students' linguistic and cultural problems and to contribute to increasing command of the English language. P/NP (undergraduates), S/U (graduates), or letter grading.

**199. Special Studies in English as a Second Language. (4)** Independent studies course for undergraduate and graduate students who desire more advanced or specialized treatment of issues in English as a second language beyond those covered in current courses. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

Jesse L. Byock, Ph.D. (*Germanic Languages*)  
Elizabeth Carter, Ph.D. (*Near Eastern Languages and Cultures*)  
Christopher B. Donnan, Ph.D. (*Anthropology*)  
Susan B. Downey, Ph.D. (*Art History*)  
Steven Lattimore, Ph.D. (*Classics*)  
Sarah P. Morris, Ph.D. (*Classics*)  
Donald A. Preziosi, Ph.D. (*Art History*)  
Dwight Read, Ph.D. (*Anthropology*)  
Lothar von Falkenhausen, Ph.D. (*Art History*)

## Professors Emeriti

C. Rainer Berger, Ph.D. (*Anthropology, Geography, Geophysics*)  
Giorgio Buccellati, Ph.D. (*Ancient Near East, History*)  
Merrick Posnansky, Ph.D. (*History, Anthropology*)  
Henry B. Nicholson, Ph.D. (*Anthropology*)  
James R. Sackett, Ph.D. (*Anthropology*)

## Associate Professors

Irene A. Bierman, Ph.D. (*Art History*)  
Hung-hsiang Chou, Ph.D. (*East Asian Languages and Cultures*)  
Gail E. Kennedy, Ph.D. (*Anthropology*)  
Richard Leventhal, Ph.D. (*Anthropology*)  
Charles Standish, Ph.D. (*Anthropology*)

## Assistant Professors

Richard Lesure, Ph.D. (*Anthropology*)

## Scope and Objectives

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, chemistry, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official,

specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Archaeology Program offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Archaeology.

## Admission

Because the Archaeology Program is interdisciplinary, any undergraduate major may be considered for admission to the M.A. program, although those applicants who have had little previous archaeological education may be admitted under provisional status and required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required of all new applicants. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper); three letters of recommendation; and a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants who have not completed a course in the history of archaeology or in quantitative methods in archaeology are required to take corresponding courses at UCLA. The courses do count toward the minimum course requirements for the degree. Applicants are accepted for admission for Fall Quarter only.

Completion of a master's program is required for the Ph.D. degree in Archaeology. Applicants who do not have a UCLA M.A. in Archaeology should refer to the above requirements. Admission to the Ph.D. program for students completing a UCLA M.A. in Archaeology is based on (1) written recommendation by all three members of the M.A. committee, (2) submission of a plan of study, including projected coursework, choice of foreign language, description of qualifying examination components, and dissertation topics, and (3) quality of the M.A. core examination results and M.A. paper.

Ph.D. students entering the program with an M.A. from another university are required to pass the comprehensive core examination. Students entering with an M.A. from another university are required to demonstrate the ability to read at least one foreign language relevant to the area of interest and approved by their adviser. This requirement may be met by taking a reading examination administered by the program.

The program's *Study Guidelines* brochure is sent on request to the Chair, Archaeology Pro-

gram, A148 Fowler Building, UCLA, Box 951510, Los Angeles, CA 90095-1510.

## Master's Degree

For areas of specialization, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination plan. A minimum of 42 units (nine courses, five of which must be graduate) is required, including a laboratory-based course and two additional elective graduate courses.

Both theoretical and practical knowledge of methods and techniques used in the field are necessary for required fieldwork.

There is a language requirement for this degree.

## Doctoral Degree

Areas of specialization include Africa; analysis of archaeological materials; ancient Near East; Andean South America; Egypt; Islamic world; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America. Other areas of specialization are also available.

Formal course requirements include a graduate-level course in research design and core seminars. Other course requirements are decided by the student's committee.

Both theoretical and practical knowledge of methods and techniques used in the field are necessary for required fieldwork.

Written and oral qualifying examinations are required. The written examination covers three areas: (1) topical specialization, (2) analytical theory, method, and technique, and (3) regional culture history.

Following successful completion of the written examination, students submit a dissertation proposal that includes a particular research problem on which they are examined and take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Archaeology

### Upper Division Course

**C110. Archaeological Materials Identification and Characterization.** (6) Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C210. P/NP or letter grading.

## Graduate Courses

**M201A-M201B. Graduate Core Seminars: Archaeology. (6-6)** (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all students. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These compulsory core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser. S/U or letter grading.

**M201C. Regional Analysis in Archaeology. (4)** (Same as Anthropology M211.) Lecture, three hours. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange. Letter grading.

**M205A. Special Topics in Archaeology. (4)** (Formerly numbered M205.) (Same as Anthropology M212S.) Lecture, three hours. Designed for graduate students in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors. S/U or letter grading.

**M205B. Special Topics in Archaeology. (6)** (Same as Anthropology M212T.) Lecture, three hours; laboratory, two hours. Advanced laboratory training for graduate students. Special laboratory-based topics, including but not limited to lithic analysis, ceramic analysis, zooarchaeology, and paleoethnobotany. May be repeated for credit with topic change. S/U or letter grading.

**C210. Archaeological Materials Identification and Characterization. (6)** Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110. S/U or letter grading.

**M214. Comparative Study of Ancient States. (4)** (Same as Anthropology CM214S.) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. S/U or letter grading.

**259. Fieldwork in Archaeology. (2 to 12)** Fieldwork, to be arranged. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser. S/U or letter grading.

**M265. Depositional History and Stratigraphic Analysis. (4)** (Same as Ancient Near East M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Individual Studies for Graduate Students. (2 to 12)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. Preparation: completion of formal coursework, passing of language examinations before enrollment. May be repeated for credit with consent of adviser. S/U grading.

**598. M.A. Paper Preparation. (2 to 12)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 12)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U grading.

## Related Courses

Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the Earth sciences. Also recommended are the appropriate modern and ancient languages for the area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. Students are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

## Methodology and History

### Ancient Near East (Near Eastern Languages)

261. Practical Field Archaeology

### Anthropology

## New World

### Anthropology

113P. Archaeology of North America

113Q. Prehistory and Ethnography of California

113R. Southwestern Archaeology

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)

114R. Ancient Civilizations of Andean South America

212P. Selected Topics in Hunter/Gatherer Archaeology

212Q. Problems in Southwestern Archaeology

214. Selected Topics in Prehistoric Civilizations of the New World

215. Field Training in Archaeology

219. Complex Hunters/Gatherers in Theoretical Perspective

### Art History

C117A. Pre-Columbian Art of Mexico

C117B. Pre-Columbian Art of the Maya

C117C. Pre-Columbian Art of the Andes

118A. Arts of Oceania

118D. Arts of Native North America

220. Oceanic, Pre-Columbian, African, and Native North American Art

## Old World: Africa

### Art History

118C. Arts of Sub-Saharan Africa

C119A. Advanced Studies in African Art: Western Africa

C119B. Advanced Studies in African Art: Central Africa

220. Oceanic, Pre-Columbian, African, and Native North American Art

### History

M175A. Topics in African History: Prehistoric Africa — Technological and Cultural Traditions

197A-197Z. Undergraduate Seminars

201A-201U. Topics in History

## Old World: Europe

### Anthropology

112. Old Stone Age Archaeology

213. Selected Topics in Old World Archaeology

### Art History

M102A. Minoan Art and Archaeology

M102B. Mycenaean Art and Archaeology

M102C. Archaic Greek Art and Archaeology

M102D. Classical Greek Art and Archaeology

M102E. Hellenistic Greek Art and Archaeology

M102F. Etruscan Art

M102G. Roman Art and Archaeology

M102H. Late Roman Art

221. Topics in Classical Art

223. Classical Art

### Classics

M153A. Minoan Art and Archaeology

M153B. Mycenaean Art and Archaeology

M153C. Archaic Greek Art and Archaeology

M153D. Classical Greek Art and Archaeology

M153E. Hellenistic Greek Art and Archaeology

M153F. Etruscan Art

M153G. Roman Art and Archaeology

M153H. Late Roman Art

251A-251D. Seminars: Classical Archaeology

252. Topography and Monuments of Athens

253. Topography and Monuments of Rome

### Indo-European Studies

131. European Archaeology: Proto-Civilizations of Europe

132. European Archaeology: Bronze Age

250A-250B. European Archaeology

## Old World: India and the Far East

### Art History

114A. Early Art of India

114C. Japanese Art

114D. Later Art of India

114E. Arts of Korea

114F. Arts of Southeast Asia

C115A. Advanced Indian Art

C115B. Advanced Chinese Art

C115C. Advanced Japanese Art

C115D. Art and Material Culture, Neolithic to 210 B.C.

C115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906

C115F. Art and Material Culture of Late Imperial China, 906 to 1911

C259. Advanced Japanese Art

260A. Indian Art

260B. Chinese Art

260C. Japanese Art

**Chinese (East Asian Languages)**

190. Archaeology in China

290A-290B. Seminars: Selected Topics in Chinese Archaeology

295A-295B. Seminars: Selected Topics in Chinese Cultural History

**Old World: Islam**

**Art History**

104A. Western Islamic Art

104B. Eastern Islamic Art

C104C. Problems in Islamic Art

213. Advanced Studies in Islamic Art

**Old World: Near East**

**Ancient Near East (Near Eastern Languages)**

160A-160B. Introduction to Near Eastern Archaeology

161A-161B-161C. Archaeology of Mesopotamia

162. Archaeology and Religion of the Holy Land

163A-163B. Archaeology of Iran

164A-164B-164C. Archaeology of Historic Periods in Mesopotamia

220. Seminar: Ancient Egypt

M250. Seminar: Ancient Mesopotamia

250X. Seminar: Ancient Mesopotamia

260. Seminar: Ancient Near Eastern Archaeology

262. Seminar: Object Archaeology

**Anthropology**

110. World Archaeology

**Art History**

101A. Egyptian Art and Archaeology

101B. Egyptian Art and Archaeology of the Middle and New Kingdoms

210. Egyptian Art

**History**

M105. History of Ancient Mesopotamia and Syria

193D. Religions of the Ancient Near East

200A-200U. Advanced Historiography

201A-201U. Topics in History

**Assistant Professor**

Kostas Terzidis, Ph.D.

**Studio Professor**

Greg Lynn, M.Arch.

**Adjunct Professors**

Barton Phelps, M.Arch.

Robert J. Yudell, M.Arch.

**Scope and Objectives**

The Department of Architecture and Urban Design at UCLA offers four degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization.

The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

In the U.S. most state registration boards require a degree from an accredited professional degree program as a requisite for licensure. NAAB, the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: Bachelor of Architecture and Master of Architecture. A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established standards. Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree which, when earned sequentially, comprise an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

**Graduate Study**

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

**Graduate Degrees**

The Department of Architecture and Urban Design offers the Master of Architecture I (M.Arch. I) and Master of Architecture II (M.Arch. II) degrees, and the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Architecture.

**Admission**

**Master of Architecture I**

The M.Arch. I program accepts applications from students holding a bachelor's degree or its equivalent, comparable in standard and content to a bachelor's degree from the University of California. The program accepts applications from students with a broad diversity of backgrounds. Although no formal training in architecture is required, first-year classes assume some familiarity with the history and culture of architecture, possession of basic graphics skills, and understanding of fundamental concepts of mathematics and physics.

Applicants are also strongly advised to become familiar with basic works in the history and theory of architecture before entering the program. Therefore, applicants must have taken at least one college-level course in each of the following areas: Newtonian physics, mathematics (covering algebra plus geometry or trigonometry), a university survey of the history of architecture (minimum one semester or two quarters) encompassing examples from antiquity to the present, and drawing or basic design.

Applicants should contact the graduate adviser for further information on these requisites. The admissions committee considers applications from those who do not have these requisites at the time of application. Such applicants must specify how they plan to complete the requisites before entry into the program. The graduate adviser can provide guidance on how to do so. Admission is only offered on the condition that the applicant produce satisfactory evidence of having completed requisites before commencing classes. Instructors may test background in these areas before admitting students to certain courses. If applicants lack this necessary proficiency, they may need to spend an additional year fulfilling curricular requirements. Students who have had previous architectural training may be allowed to waive certain courses.

**ARCHITECTURE AND URBAN DESIGN**

*School of the Arts and Architecture*

UCLA  
1317 Perloff Hall  
Box 951467  
Los Angeles, CA 90095-1467

(310) 825-0525, 825-7857  
<http://www.aud.ucla.edu/>

Sylvia Lavin, Ph.D., *Chair*

**Professors**

Dana Cuff, Ph.D.

Diane Favro, Ph.D.

Thomas S. Hines, Ph.D.

Craig Hodgetts, M.Arch.

Jurg Lang, Dipl.Arch.

Sylvia Lavin, Ph.D.

Robin Liggett, Ph.D.

Mark Mack, M.Arch.

Thom Mayne, M.Arch.

Barton Myers, M.Arch.

Ben Refuerzo, M.Arch.

Dagmar Richter, Dipl.Arch.

Anthony Vidler, Dipl.Arch.

Applicants are required to submit three letters of recommendation, academic transcripts, Graduate Record Examination (GRE) test scores, a statement of purpose, and a creative portfolio. In addition to the *UCLA Application for Graduate Admission*, the Departmental Supplement must be submitted; it is available from the Admissions Office, Department of Architecture and Urban Design, School of the Arts and Architecture.

The M.Arch. I program is a full-time program and does not accept part-time students. All new students must enter in Fall Quarter. Additional information about the program may be obtained by writing directly to the departmental admissions officer.

For applicants whose native language is not English, a score of at least 580 (paper and pencil test) or 237 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language Testing System (IELTS) examination is required for admission. In addition, on arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, students required to take them must expect to spend additional time in residence.

### **Architecture M.Arch. I/Urban Planning M.A.**

The Department of Architecture and Urban Design and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for architects interested in specializing in social, economic, and environmental policy issues and for urban planners interested in integrating architecture and urban design into policy and planning practice. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in architecture stresses physical, aesthetic, and technical issues in the design of buildings and building complexes. In the program, students pursue studies in both schools/departments and receive both the M.Arch. I and the M.A. in Urban Planning at the end of four years.

Students who are interested in the concurrent degree program must apply and be admitted to the M.Arch. I program in the Department of Architecture and Urban Design and to the M.A. program in the Department of Urban Planning. For additional information, contact the graduate advisers in both departments.

### **Master of Architecture II**

The M.Arch. II is a second professional degree program in architecture and urban design. The degree can be completed in four quarters in residence. The program combines advanced theoretical studies and professional applications. It emphasizes advanced studies in archi-

ture and urban design and requires that applicants hold a five-year Bachelor of Architecture degree or the equivalent.

Applicants are required to submit three letters of recommendation, academic transcripts, Graduate Record Examination (GRE) test scores, a statement of purpose, and a creative portfolio. In addition to the *UCLA Application for Graduate Admission*, the Departmental Supplement must be submitted. It is available from the Admissions Office, Department of Architecture and Urban Design, School of the Arts and Architecture.

For applicants whose native language is not English, see English entrance requirements under Master of Architecture I.

### **M.A. in Architecture**

The M.A. program offers an academic degree and prepares students to do specialized research or teaching in fields related to the architecture profession. Applicants are required to hold a baccalaureate degree (or its equivalent) comparable in standard and content to a bachelor's degree from the University of California. Applicants should possess the experience and knowledge that would allow advanced research in whatever aspect of architecture they plan to explore within the context of the M.A. program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, Graduate Record Examination (GRE) test scores, and a creative portfolio. In addition to the *UCLA Application for Graduate Admission*, the Departmental Supplement must be submitted. It is available from the Admissions Office, Department of Architecture and Urban Design, School of the Arts and Architecture.

For applicants whose native language is not English, see English entrance requirements under Master of Architecture I.

It may be possible for an M.A. student in Architecture to petition to transfer from the M.A. to the Ph.D. program. See below.

### **Ph.D. in Architecture**

Applicants to the Ph.D. program must hold a bachelor's degree from an accredited college or university and should have completed a first professional degree in architecture (a five-year Bachelor of Architecture degree or a professional Master of Architecture degree). Applicants who hold degrees in other fields also are encouraged to apply; however, at the discretion of the Ph.D. program committee, they may be required to complete specific coursework in the department as a condition of admission.

Applicants must meet admission requirements of the Graduate Division and the department. The application dossier must include (1) a short biographical résumé, (2) transcripts of academic record, (3) examples of research and/or creative work, (4) three letters of recommendation, (5) statement of purpose and proposed program of studies, and (6) Graduate

Record Examination (GRE) scores. Where feasible, the Ph.D. program committee may require an interview.

For applicants whose native language is not English, see English entrance requirements under Master of Architecture I.

Admission to the program is granted to a small group each year, according to the following criteria:

1. Evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field
2. Demonstration of an outstanding academic record through the evidence of grades (3.5 minimum grade-point average), GRE scores, and references
3. Demonstration of adequate communication skills, particularly in writing, in the work submitted
4. Presentation of a clear and realistic statement of purpose

Continuing students may petition to transfer from the M.A. to the Ph.D. program before completion of the M.A. thesis, but approval is granted only in exceptional cases. Students should consult their primary adviser to determine the feasibility of transfer from one degree program to another. If the primary adviser so recommends, an M.A. student may petition the Ph.D. program committee at the end of the fourth quarter. The request must be accompanied by a current transcript, a research sample, a research proposal, and a short written report by the primary adviser. Based on these materials the Ph.D. program committee recommends one of the following: (1) immediate admission into the Ph.D. program, (2) completion of a thesis leading to an M.A. degree and the option thereafter to apply separately for admission into the Ph.D. program, or (3) the student takes a terminal M.A. degree.

## **Master's Degrees**

### **Master of Architecture I**

The M.Arch. I degree is offered through the comprehensive examination plan, which includes a formal presentation of the final design project or a formal presentation of the final design project and submission of an exit document. A minimum of 124 units of coursework is required of which at least 24 four-unit courses must be taken at the graduate level. Required coursework includes core courses, design studios, critical studies, and electives.

### **Master of Architecture II**

Areas of study are design, technology, and critical studies in architectural culture.

The M.Arch. II degree is offered through the comprehensive examination plan, which includes a formal presentation of the final design project or a formal presentation of the final design project and submission of an exit document. A minimum of 50 units of coursework is required, 38 units of which must be at the grad-

uate level. All students are required to take at least three advanced studios and a minimum of six electives.

### M.A. in Architecture

Students are required to focus their work on a specific academic area or professional issue. Specializations are currently available in critical studies in architectural culture and technology. In addition, students have the option of the open M.A. whereby they structure their own area of interest from the courses offered by the department.

The M.A. degree is offered through the thesis plan. Students are required to complete a minimum of 16 courses (64 units) of graduate or upper division work. At least five of the courses must be 200-series courses and at least two must be 500-series courses.

### Doctoral Degree

#### Ph.D. in Architecture

Students are required to undertake a program of study that includes one major area, either critical studies in architectural culture or technology. Majors outside these areas, or a combination of the two, may be undertaken, subject to the approval of the Ph.D. program committee, if supported by qualified departmental faculty members who are available and willing to provide the necessary instruction and guidance. Students are required to include in the program of study at least one minor field, which must be chosen from outside the department.

In general, students are required to take sufficient coursework to provide adequate preparation for the qualifying examinations and the dissertation. All candidates are required to complete 72 units of graduate coursework, half of which must be in architecture and urban design.

Students admitted to the Ph.D. program without a professional degree in architecture are required to take at least another 24 units of graduate-level courses in architecture and urban design, as recommended by the adviser and approved by the Ph.D. program committee.

Students who hold a professional degree in architecture before admission to the program are required to complete four quarters in residence and 48 units of coursework in order to establish eligibility to take the qualifying examinations.

Students who hold an M.Arch. I, M.Arch. II, or M.A. degree in Architecture from the department may petition the Ph.D. program committee to reduce these course requirements to a minimum of three quarters in residence and 36 units of coursework.

Written and oral qualifying examinations are required. The purpose of the examinations is to demonstrate a broad mastery of the field of architecture, required levels of competence in the major and minor fields, and the appropri-

ateness of and adequate preparation for the proposed dissertation topic. Students take a written and oral examination in the major field.

Following successful completion of these examinations, students take the University Oral Qualifying Examination, which focuses primarily on the subject of the proposed dissertation.

There is a language/quantitative studies requirement for this degree.

## Architecture and Urban Design

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Architecture and Urban Design. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in architecture and urban design approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**M190. Human Environment: Introduction to Architecture and Urban Planning. (4)** (Same as Urban Planning M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

**CM191. Introduction to Sustainable Architecture and Community Planning. (4)** (Formerly numbered C191.) (Same as Environment M153.) Lecture, three hours. Relationship of built environment to natural environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Concurrently scheduled with course C247A. Letter grading.

**C192. Modern and Postmodern Architecture. (4)** Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C282B.

**C193. City Studies: Culture and City Form. (4)** Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C280.

**194A-194B. History of Architecture and Urban Design. (4-4)** Lecture, three hours. Consideration of architectural and urban projects in relation to their theoretical, philosophical, and sociopolitical contexts, including issues of gender and diversity. **194A.** Introduction to history of architecture and urban design from prehistory to age of mannerism. Discussion of world at large, analyzing synchronic architectural and urban solutions. **194B.** Introduction to history of architecture and urban environments from Baroque period to the present.

**199. Special Studies. (2 to 8)** Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

## Graduate Courses

**201. Theories of Architecture. (4)** (Formerly numbered 201A.) Lecture, three hours. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding the nature of speculative inquiry in an architectural context.

**220. Introduction to Computers. (2)** Lecture, 90 minutes; laboratory, 90 minutes; outside study, three hours. Introduction to basic concepts, skills, and theoretical aspects of computer-aided architecture design microcomputer skills. Applications selected are commonly found in professional offices. Two- and three-dimensional representation (i.e., painting, drafting, multimedia, hypermedia, and modeling). Letter grading.

**M225A-M225B-M225C. Fundamentals of Architectonics. (4-4-4)** (Same as Design | Media Arts CM221, CM222, CM223.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. S/U or letter grading. **M225A.** Proportion; **M225B.** Symmetry; **M225C.** Compartment and Order.

**226A. Introduction to Computer-Aided Architectural Design, Two-Dimensional. (4)** Lecture, three hours; laboratory, one hour. Concepts of hardware, software, and networks; paint, draft, multimedia, DTP, and presentation programs; CAD in an office environment.

**226B. Introduction to Computer-Aided Architectural Design, Three-Dimensional. (4)** Lecture, three hours; laboratory, one hour. Concepts of three-dimensional space, modeling, and virtual reality; file formats; modeling, rendering, and animation programs; video conference.

**226C. Computer Visualization. (4)** Lecture, three hours. Designed for graduate students. Concept and techniques of computer visualization of artifacts, including realistic rendering and animation.

**M227A. Programming Computer Applications in Architecture and Urban Design. (4)** (Same as Design | Media Arts CM241.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. May be repeated for credit with consent of adviser. S/U or letter grading.

**M227B. Introduction to Geometric Modeling. (4)** (Same as Design | Media Arts CM242.) Lecture, three hours; outside study, nine hours. Requisite: course M227A. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. May be repeated for credit with consent of adviser. S/U or letter grading.

**M227C. User Interaction Techniques in Design. (4)** (Same as Design | Media Arts CM243.) Lecture, three hours; outside study, nine hours. Requisite: course M227A or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. May be repeated for credit with consent of adviser. S/U or letter grading.

**227D. Design and Building Models. (4)** Lecture, three hours. Review of range of information and knowledge potentially used in design. Knowledge representation, abstractions, and constructs. Logical structure of design information. Development of knowledge used in areas of design, how it can be identified, analyzed, and structured.

**242. Climate Responsive Design. (4)** Preparation: professional degree in architecture. Theory and method of design of buildings which specifically respond to local climate; intensive course in building climatology for advanced graduate studies students.

**243. Energy Modeling. (4)** Preparation: one course in building climatology and one course in environmental controls. Geometric description of a building and computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B.

**C247A. Introduction to Sustainable Architecture and Community Planning.** (4) Lecture, three hours. Relationship of built environment to natural environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Concurrently scheduled with course CM191. Letter grading.

**247B. Energy/Resource-Conserving Solar Design and Practice.** (4) Lecture, three hours. Preparation: one climatology course. Requisite: course C247A. Extension of concepts and sizing of integrated systems introduced in course C247A; stand-alone approaches particularly in developing countries; impacts of global warming, deforestation on architecture; recycling; programming for project studio 403B.

**248A-248B. Passively Integrated Solar Systems.** (4-4) Requisites: courses 242, 442. Analysis of different passively integrated solar systems for heating and cooling buildings, considering their anticipated performance and suitability for different climates and building types. Focus on quantitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions. **248A.** Heating; **248B.** Cooling.

**255A-255B. Climatic Issues in Urban Design.** (4-4) Seminar, three hours. In-depth examination of impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of urban climate, such as urban temperature, wind field, solar radiation availability, etc.

**M259. Advanced Real Estate Development for Planners and Architects.** (4) (Same as Urban Planning M259.) Discussion, three hours. Requisite: Urban Planning 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

**271. Elements of Urban Design.** (4) Lecture, three hours. Introduction of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socioeconomic, and technological framework of urban systems and its dynamic interrelations.

**M272. Real Estate Development and Finance.** (4) (Same as Urban Planning M272.) Lecture, two hours; workshop, two hours; outside study, eight hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests. S/U or letter grading.

**C280. City Studies: Culture and City Form.** (4) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C193.

**C282B. Modern and Postmodern Architecture.** (4) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C192.

**283. Special Topics in Modern Architecture.** (4) Lecture, three hours. Exploration of topics central to development of modern architecture. Examination of themes such as modernism and psychoanalysis, architecture and environment, modern domestic architecture, and windows, mirrors, and glass in modern architecture through readings from literary, artistic, theoretical, and architectural sources.

**284. Architectural Culture of the French Enlightenment.** (4) Lecture, three hours. Exploration of French architectural culture of the 18th century. Examination of urban places and activities, intersection of new social and architectural formations, transformation of architectural institutions, and developments in theories of architecture, as well as techniques of their dissemination.

**286A-286B. Ancient Architecture.** (4-4) Lecture, three hours. Study of architectural developments from archaic Greece to the late Roman Empire. Examination of ancient buildings as functional constructs whose appearance was determined by aesthetic, religious, social, political, urban, and technological factors.

**287. Architecture in Europe and the Middle East, 400 to 1500.** (4) Lecture, three hours. Study of East/West relationships, cultural concerns, and social interactions as seen through some major urban and architectural developments in Europe and the Middle East.

**288A-288B. Renaissance and Baroque Architecture.** (4-4) Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structures contextually, exploring changing cultural and theoretical values as well as aesthetic characteristics.

**289. Special Topics in Architecture and Urban Design.** (2 to 4) Selected academic topics initiated by students, student teams, or faculty and directed by a faculty member. May be repeated for credit.

**290. Landscape Studies.** (4) Lecture, three hours. Introduction to cultural geography of American built environment. Exploration of key issues through case studies of settlement patterns, vernacular and political landscapes, origin myths, Enlightenment rationales, technological change, market forces, historic preservation, gardens, horticulture, and landscape design. Letter grading.

**291. Theory of Architectural Programming.** (4) Lecture, three hours. Exploration of concepts and methods of architectural programming and its interrelation to design process; planning of design process; various techniques for determination of program contents, basic conditions, resources, and constraints; identification of solution types for given situations.

**292. Social Meaning of Space.** (4) Discussion, three hours. Evolution of concept of space from its origins in ritual and primitive social organizations, concentrating on the child's evolving conception of space, literature on perceptual development, and studies of adaptation to spatial order of the human-made environment.

**293. Politics, Ideology, and Design.** (4) Lecture, three hours. Exploration of cultural and political context of architecture and planning work. Examination of theory and practice from variety of perspectives applied to a set of varied physical environments and to a set of current spatialized concepts. Consideration of theoretical propositions that are shaping present urban and architectural debate and concrete case studies where politics and ideology shape design process.

**294A-294B. Environmental Psychology.** (4-4) Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

**296. Proseminar: Critical Studies in Architectural Culture.** (4) Seminar, three hours. Orientation for Ph.D. students to tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion.

**298A-298B-298C. Research Practicum in Architecture.** (2 to 4 each) (4) (Formerly numbered 298A-298D.) In-depth examination of research methods in the various major fields. May be repeated for credit. **298A.** Research Practicum in Critical Studies in Architectural Culture; **298B.** Research Practicum in Technology; **298C.** Research Practicum in Design Theory and Methods.

**375. Teaching Apprentice Practicum.** (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. Advanced Topics Studio.** (6) Studio, 12 hours; outside study, six hours. Preparation: satisfactory completion of intermediate-level studios (courses 412, 413, 414) or M.Arch. II student. Students may choose (through a lottery) from a number of different projects focusing on special topics in architectural and urban design to be offered by faculty members. May be repeated for credit. Letter grading.

**402. Final Advanced Topics Studio.** (6) (Not the same as course 402 prior to Fall Quarter 1999.) Studio, 12 hours; outside study, six hours. Preparation: satisfactory completion of intermediate- and advanced-level studios for M.Arch. I students; satisfactory completion of advanced-level studios and fourth-term standing for M.Arch. II students. Students may choose (through a lottery) from a number of different advanced studio projects focusing on special topics in architectural and urban design to be offered by faculty members. Exit document (analytic paper with graphic component that critically examines final student design work) required at completion of course. Letter grading.

**M404. Joint Planning/Architecture Studio.** (4) (Same as Urban Planning M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

**411. Introductory Design Studio.** (6) Studio, 12 hours; outside study, six hours. Introduction to sketching, drawing, perspectives, CAD. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students undertake a series of closely controlled exercises dealing with combining the elements and then design small buildings. Letter grading.

**412. Building Design Studio.** (6) Studio, 12 hours; outside study, six hours. Requisite: course 411. Concentration on basic skills, leading to projects exploring architectural program in relation to design process and, particularly, implications of program on architectural forms and concepts. In second phase, introduction of structural elements to fulfill program requirements and to support and further develop intended forms and concepts. Letter grading.

**413. Building Design with Landscape Studio.** (6) Studio, 12 hours; outside study, six hours. Requisite: course 412. Introduction to theoretical and technical issues such as site planning, urban design, landscape design, building typology. Building design and site planning in relation to water, landforms, and plants in natural light, heat, and ventilation. Letter grading.

**414. Major Building Design Studio.** (6) Studio, 12 hours; outside study, six hours. Requisite: course 413. Designed for second-year graduate students. Introduction to issues such as programming and program manipulation, site planning, urban design, and integration of technical systems and architectural expression. Emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure and environmental control and to present their ideas in graphic or model form. Letter grading.

**415. Comprehensive Studio.** (6) Studio, 12 hours; outside study, six hours. Requisite: course 414. Culmination of core sequence (courses 411 through 414), with focus on development phase of a project. Technical concerns such as lighting, material innovation, sustainability, construction documents, and building envelopes to be considered critical to generation of architectural form, integrated in design of a single building project. Letter grading.

**428. Advanced Architectural Drawing.** (4) Discussion, three hours; studio, three hours. Emphasis on exploration of interrelationship between drawing and design. Development of more advanced design strategies and modes of graphic exploration and presentation.

**431. Structures I.** (4) Lecture, three hours. Preparation: basic algebra, geometry, trigonometry. Introduction to structural behavior and structural statics. Operations with forces and factors, both algebraically and graphically. Equilibrium of force systems; polygon of forces and funicular polygon. Internal actions; axial force and bending moment. Reactions, stability, and statical determinacy. Determinate frames. Plane trusses; analysis and design.

**432. Structures II.** (4) Lecture, three hours. Requisite: course 431. Mechanics of structures and structural elements. Elastic materials: stress, strain, and stress-strain relations. Theory of bending: curvature, stress and strain distributions, centroid, moments of inertia, resisting and plastic moments. Design of beams for bending, shear, and deflections. Torsion members. Instability and design of columns. Design for combined bending and compression. Tensile structures; cables, pneumatic structures. Slabs and plates; shells and folded plates.

**433. Structures III. (4)** Lecture, three hours. Requisite: course 432. Introduction to statically indeterminate analysis. Structural materials and loads. Wind loads: distribution with height, design for comfort, structure behavior under lateral loads. Steel construction and concepts for high-rise structures. Structural case studies in timber and steel. Introduction to earthquakes: seismology, magnitude, intensity, history. Seismic instrumentation. Case studies of recent earthquakes and damage. Earthquake design concepts and seismic code requirements.

**436. Introduction to Building Construction. (2)** (Not the same as course 436 prior to Fall Quarter 1999.) Laboratory, two hours; outside study, four hours. Introduction to construction techniques. Study of physical principles and materials for making architecture through series of exercises and field trips. Letter grading.

**437. Building Construction. (4)** (Not the same as course 437 prior to Fall Quarter 1999.) Laboratory, four hours; outside study, eight hours. Principles of structure and enclosure, with focus on production and materials research. Exploration of building elements for formal and functional properties; in addition, design development of project in previous studio may be developed in detail with integration of a range of technical systems. Letter grading.

**441. Environmental Control Systems. (4)** Design of mechanical systems necessary for functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of a building.

**442. Building Climatology. (4)** Preparation: basic physics. Design of buildings which specifically respond to local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate.

**444. Light and the Visual Environment. (4)** Preparation: one course in building climatology. Exploration of extent to which physical form of a building controls the luminous environment of its occupants; design of naturally and artificially illuminated interior spaces; parameters of human visual comfort.

**448. Communication and Diffusion of Innovation. (4)** Seminar, three hours. Innovation in the building industry and design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Visitors and field trips.

**461. Architectural Practice. (4)** Seminar, three hours. Historical development of the profession; role of architect in contemporary society, current forms of practice and emerging trends. Contractual relationships, ethical responsibility, office management and promotion. Case studies of practical process.

**496. Special Projects in Architecture. (2 to 8)** Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

**497. Special Projects in Urban Design. (2 to 8)** Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

**498. Comprehensive Examination Seminar. (4)** Seminar, three hours; outside study, nine hours. Seminar intended to begin process of developing independent proposal with related research and documentation that moves toward production of final document or book for each project. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Research and Study in Architecture and Urban Design. (2 to 8)** May be repeated for credit. S/U grading.

**597. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** May be repeated for credit. S/U grading.

**598. Preparation in Architecture/Urban Design for Master's Thesis. (2 to 8)** May be repeated for credit. S/U grading.

**599. Ph.D. Dissertation Research in Architecture. (2 to 8)** Limited to doctoral students. May be repeated for credit. S/U grading.

William J. Brice  
Raymond B. Brown, M.A.  
Elliot J. Elgart, M.F.A.  
Robert F. Heinecken, M.A.

### Associate Professor

Patricia Wickman, M.F.A.

### Lecturer

Don Suggs, M.F.A.

### Adjunct Assistant Professor

Juli Carson, Ph.D.

## Scope and Objectives

The Department of Art offers professional art training which emphasizes experimentation and encourages students to draw from many disciplines in their creative process. The department provides a strong background in theory and criticism to support contemporary studio practice. Bachelor of Arts and Master of Fine Arts degrees are offered in painting and drawing, new genres, photography, sculpture, and ceramics. An interdisciplinary studio option is offered within the M.F.A. program. In addition, a Master of Arts degree is offered in critical and curatorial studies. All programs have access to the art resources at UCLA and in the Los Angeles community.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

## Undergraduate Study

### Art B.A.

#### Preparation for the Major

*Required:* Art 1A, 1B, 11A, 11B, 11D, 11E, 31A, 31B, 32, and one course from Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57.

## The Major

*Required:* A minimum of 13 upper division courses, including Art 100, 150, six courses from at least four of the following: 130, 133, 137, 140, 145, 147, 148, one course from Art History 101A through C119B, and four art electives.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Art offers the Master of Arts (M.A.) and Master of Fine Arts (M.F.A.) degrees in Art.

## Admission

### M.A. in Art

Students are admitted to the M.A. program in Fall Quarter only. Admission requires a bachelor's degree or the equivalent and faculty approval following a review of the application. Applicants with bachelor's degrees in art or art history are preferred, but those from a diversity of specializations and backgrounds also are encouraged to apply.

Applicants are required to submit a statement of purpose, a writing sample (a brief exhibition or public program proposal, a published criticism, or a short research paper), and a slide portfolio of curatorial work (if applicable). Entry into the program is conditional on having taken the following UCLA courses or their equivalent in coursework or experience in the field: World Arts and Cultures 185A, 185B, and 185C. Applicant finalists should be available for an interview.

### M.F.A. in Art

Students are admitted to the M.F.A. program in Fall Quarter only. Admission requires a bachelor's degree or the equivalent and approval of the faculty following a review of the application. Applicants are evaluated on their creative work and must submit slides (maximum of 20) or videotape (if applicable).

## Master's Degrees

### M.A. in Art

Areas of study include critical and curatorial studies. Students are expected to focus on a specific professional issue and genre of exhibition appropriate to it. The program offers a curatorial option in public programs.

The M.A. degree is offered through the comprehensive examination plan, which includes a formal exhibition or public program, photo records (if appropriate), and the curatorial statement of purpose. A minimum of 36 quarter units is required, 20 at the graduate level.

### M.F.A. in Art

Areas of study include painting and drawing, sculpture, photography, ceramics, new genres, and interdisciplinary studio. There are no limits to the variations, extent, or value of these designations.

The M.F.A. degree is offered through the comprehensive examination plan and is awarded on the basis of the quality of the student's work as demonstrated in the exhibition which accompanies the comprehensive examination, not on the basis of the number of units of credit the student completes.

A minimum of 72 units is required, including 40 units in the 200 series. A minimum of 40 quarter units of art history in undergraduate or graduate study is required. Art history courses completed as an undergraduate count toward fulfilling the department's 40-unit art history requirement but do not count toward the 72 units required for the degree.

## Art

### Lower Division Courses

**1A. Drawing. (4)** Studio, eight hours; five hours arranged. Course in basic drawing skills intended as preparation for work in a variety of media.

**1B. Sculpture. (4)** Studio, eight hours; five hours arranged. Introduction to concepts and forms of contemporary sculpture to become familiar with tools and material to enable students to visually manifest their individual ideas. Presentation of work of contemporary artists.

**11A. Painting. (4)** Studio, eight hours; five hours arranged. Basics of painting: introduction to technical procedures, tools, and materials. Discussion of fundamental conceptual and formal concerns. P/NP or letter grading.

**11B. Photography. (4)** Studio, eight hours; five hours arranged. Fundamentals in technique, with emphasis on individual projects. Varied approaches, processes, and applications of the photographic medium within the context of art, supported by studies in theory, aesthetics, and history of photography. P/NP or letter grading.

**11C. Printmaking. (4)** Studio, eight hours; five hours arranged. Introductory survey of various technical and conceptual concerns in a variety of printmaking media as preparation for more focused study in particular media at upper division level. P/NP or letter grading.

**11D. New Genres. (4)** Studio, eight hours; five hours arranged. Introduction to projects in installation, performance, video, film, intermedia, and other nontraditional media and processes. P/NP or letter grading.

**11E. Ceramics. (4)** Studio, eight hours; five hours arranged. Introduction to ceramic materials and processes, with emphasis on personal and cultural expression in ceramic media. Discussion of ceramics in contemporary artistic practice and social history of ceramic art. Letter grading.

**31A. Modernism. (4)** (Formerly numbered 31.) Discussion, three hours. Survey of 20th-century European/American art, its antecedents, and its social and political context. Letter grading.

**31B. Modernism. (4)** Discussion, three hours. Requisite: course 31A. Continuation of course 31A, with focus primarily on latter half of the 20th century. Letter grading.

**32. Survey of Critical Thought. (4)** Discussion, three hours. Overview of premodern, modern, and postmodern theory as reflected in critical writing and artistic practice, with emphasis on the 1940s to the present.

### Upper Division Courses

**100. Issues in Contemporary Art. (4)** Discussion, three hours. Requisites: courses 31A, 31B, 32. Selected topics in theoretical, critical, aesthetic, and historical studies and their relevance to practicing artists. May be repeated for a maximum of 16 units. Letter grading.

**130. Advanced Drawing. (4)** Studio, eight hours; five hours arranged. Requisite: course 1A. Drawing as both an independent expressive medium and as a means of visualization. May be repeated for a maximum of 16 units. Letter grading.

**133. Advanced Painting. (4)** Studio, eight hours; five hours arranged. Requisite: course 11A. Varied media and subjects to further develop students' technical and expressive means to implement their ideas. May be repeated for a maximum of 16 units. Letter grading.

**137. Advanced New Genres. (4)** Studio, eight hours; five hours arranged. Requisite: course 11D. Emphasis to be selected by faculty from one or more of the following media: installation, performance, video, film, other non-traditional media and processes. May be repeated for a maximum of 16 units. Letter grading.

**140. Advanced Printmaking. (4)** Studio, eight hours; five hours arranged. Requisite: course 11C. Selected studies in fine printmaking, historical and contemporary: woodcut, etching and engraving, lithography, silk screen, mixed media. May be repeated for a maximum of 16 units. Letter grading.

**145. Advanced Sculpture. (4)** Studio, eight hours; five hours arranged. Requisite: course 1B. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units. Letter grading.

**147. Advanced Photography. (4)** Studio, eight hours; five hours arranged. Requisite: course 11B. Selected projects in photography and related media, concentrating on development of individual students' artwork. Studio emphasis with special topics in theory and critical analysis. May be repeated for a maximum of 16 units. Letter grading.

**148. Advanced Ceramics. (4)** Studio, eight hours; five hours arranged. Requisite: course 11E. Selected studies in ceramics, with emphasis on individualized creative experimentation with materials and techniques introduced in course. Methods and processes to be selected from a range of possibilities, including handforming and modeling, preparation and use of molds, slipcasting, and use of potter's wheel. May be repeated for a maximum of 16 units. Letter grading.

**150. Senior Studio. (4)** Studio, eight hours; five hours arranged. Limited to seniors. Advanced studio projects, with emphasis on analysis and criticism of individual creative work and ideas. May be repeated once for credit. Letter grading.

**C181. Exhibition and System. (4)** Seminar, four hours. Preparation: at least one course from 100 through 150. Examination of temporary exhibition and its associated field of publications as an intertextual system of meaning, beginning with individual works and proceeding to on-site analysis of current exhibitions. Concurrently scheduled with course C281. Letter grading.

**C182. Exhibitions and Public Programs. (4)** Seminar, four hours. Preparation: at least one course from 100 through 150. Introduction to principles of program planning and community development in relation to visual arts and work of art museums. Concurrently scheduled with course C282. Letter grading.

**C183. Special Topics in Art. (2 or 4)** Seminar, six hours (2-unit course) or 12 hours (4-unit course). Preparation: at least one course from 100 through 150. Selected topics in art explored through variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Concurrently scheduled with course C283. Letter grading.

**M186A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4)** (Same as Chicana and Chicano Studies M186A and World Arts and Cultures M125A.) Studio/lecture, six hours. Corequisite: course M186AL. Investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

**M186AL-M186BL-M186CL. Beyond the Mexican Mural: Muralism and Community Laboratory. (2-2-2)** (Same as Chicana and Chicano Studies M186AL-M186BL-M186CL and World Arts and Cultures M125AL-M125BL-M125CL.) Laboratory, two hours. Course M186AL is requisite to M186BL, which is requisite to M186CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading. **M186AL.** Beginning; **M186BL.** Intermediate; **M186CL.** Advanced.

**M186B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4)** (Same as Chicana and Chicano Studies M186B and World Arts and Cultures M125B.) Studio/lecture, six hours. Requisites: courses M186A, M186AL. Corequisite: course M186BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

**M186C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4)** (Same as Chicana and Chicano Studies M186C and World Arts and Cultures M125C.) Studio/lecture, six hours. Requisites: courses M186B, M186BL. Corequisite: course M186CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

**M188. Whose Monument Where: Course on Public Art. (4)** (Same as Chicana and Chicano Studies M188 and World Arts and Cultures M126.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

**189. Special Topics in Studio. (4)** Studio/museum visits, eight hours; four hours arranged. Limited to junior/senior Art majors. Current themes in art theory, practice, and criticism, offering students opportunity to explore these issues in studio context through critique of work and discussion of recommended readings. May be repeated once. Letter grading.

**197. Honors Course. (4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors. Individual studies for majors. May be repeated once for credit. P/NP or letter grading.

**199. Special Studies in Art. (2 to 8)** Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. May be taken for a maximum of 8 units. P/NP or letter grading.

### Graduate Courses

**271. Painting. (2 to 8)** Studio, eight hours. Study in painting and associated media. May be repeated for credit with consent of adviser.

**272. Graduate Printmaking. (2 to 8)** Studio, eight hours. Studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media. May be repeated for credit with consent of adviser.

**273. Graduate Sculpture. (2 to 8)** Studio, eight hours. Studies in sculpture with specific attention to ongoing nature, specificity, and approach to each student's particular discipline. Individual studio visits and consultation. May be repeated for credit with consent of adviser.

**274. Photography. (2 to 8)** Studio, eight hours. Studies concentrating on development of individual students' artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art. May be repeated for credit with consent of adviser.

**275. New Genre. (2 to 8)** Studio, eight hours. Studies in alternative media, including installation, performance, video, film, and other nontraditional media and processes. May be repeated for credit with consent of adviser.

**276. Graduate Group Critique. (4)** Discussion, four hours; tutorial, to be arranged. Group critique/discussion of students' research. Additional tutorial meetings by arrangement with instructor. May be repeated for credit.

**277. Graduate Ceramics. (2 to 8)** Studio, eight hours. Studies in ceramics and art with investigation of traditional and experimental processes and intellectual approaches to art practice utilizing ceramic media. Emphasis on development of a significant body of original work reflecting student's expressive and theoretical concerns. May be repeated for credit.

**278. Interdisciplinary Studio. (2 to 8)** Studio, eight hours. Tutorial focused on directed research, studio visits, and group discussions of recommended readings. May be repeated for credit. S/U or letter grading.

**280. Graduate Seminar: Art. (4)** Discussion, three hours. Advanced topics in critical theory and study of contemporary art, with emphasis on individuals, issues, and methodologies. Possible areas of study from structuralism, deconstruction, feminist and psychoanalytic theory, commodification, and censorship. May be repeated for credit.

**C281. Exhibition and System. (4)** (Formerly numbered 281.) Seminar, four hours. Examination of temporary exhibition and its associated field of publications as an intertextual system of meaning, beginning with individual works and proceeding to on-site analysis of current exhibitions. May be repeated for credit. Concurrently scheduled with course C181. Letter grading.

**C282. Exhibitions and Public Programs. (4)** (Formerly numbered 282.) Seminar, four hours. Introduction to principles of program planning and community development in relation to visual arts and work of art museums. May be repeated for credit. Concurrently scheduled with course C182. Letter grading.

**C283. Special Topics in Art. (2 or 4)** (Formerly numbered 283.) Seminar, six hours (2-unit course) or 12 hours (4-unit course). Selected topics in art explored through variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Concurrently scheduled with course C183. Letter grading.

**375. Teaching Apprentice Practicum (1 to 4).** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Assistant Training Practicum. (2)** Seminar, three hours; outside study, three hours. Forum for first-year teaching assistants for discussion and exploration of teaching pedagogy and classroom mechanics. Problems and practices of teaching art at college level, as well as role of teaching assistants within department. Designed to help new teaching assistants develop teaching skills and to orient them to department and University policies and resources. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. May not be applied toward M.A. course requirements. May be repeated. S/U grading.

Charlene Villaseñor Black, Ph.D.

### Lecturers

Shelley M. Bennett, Ph.D.  
Jean S. Weisz, Ph.D., *Senior Emerita*

## Scope and Objectives

The department offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees. Art history courses survey Western and non-Western art from earliest human history to the present. Students learn to treat artistic monuments and trends from a historical point of view, analytically rather than subjectively. The curriculum prepares students for careers in which broad knowledge of art is important and provides students preparing for graduate study with a foundation for research requiring independent critical judgment.

The rich and varied art resources available at UCLA and throughout Southern California offer students extraordinary opportunities to supplement the formal curriculum.

## Undergraduate Study

### Art History B.A.

#### Preparation for the Major

*Required:* Two courses from Art History 50, 51, 54, 57 and two courses from 55A, 55B, 56A, 56B. It is strongly recommended that these

courses be taken prior to enrollment in upper division courses.

### Transfer Students

To be admitted as Art History majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two art history courses in ancient, Renaissance and baroque, medieval, or modern art and two non-Western art history courses.

### The Major

*Required:* Eleven upper division art history courses as follows:

A total of six courses (24 units) from the following 12 areas are required, distributed as follows: one course from three different areas in Group A (three courses total) and one course from three different areas in Group B (three courses total):

Group A: (1) 101A, 101B, M102A through M102E, (2) M102F through M102K, (3) 105A through 105E, (4) 106A through 106D, 108A, 108B, (5) 108C, C109A through 109D, (6) 110A through 110G, C150A through 150D, (7) C112A through CM112D

Group B: (8) 104A, 104B, C104C, (9) 114A, 114D, 114F, C115A, (10) 114C, 114E, C115B through C115F, (11) C117A, C117B, C117C, 118D, 118E, (12) 118A, 118C, C119A, C119B

Five art history electives from the above 12 areas are required; courses 127, 197, and 199 may also be included.

Two terms of one foreign language or equivalent are also required. The language is in addition to the College foreign language requirements.

Art History majors should be aware that the upper division course requirements in the major (44 units) do not meet the upper division requirement of 60 units for graduation. Additional upper division units must be taken to reach the 60-unit total.

It is recommended that students have each term's program approved by the departmental adviser.

### Honors Program

The honors program is designed for Art History majors who are interested in carrying out an independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior Art History majors who have completed a minimum of four upper division art history courses with a departmental grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete Art History 195A and 195B with a grade of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete courses 195A and 195B with a grade of A.

## Museum Studies Minor

The Museum Studies minor introduces undergraduate students to the history, theory, and practice of museums and museology through a group of linked and related courses from various disciplines in the College of Letters and Science and School of the Arts and Architecture. The program exposes students to museum studies as historically and currently practiced in the visual arts, in anthropology and ethnography, and in history and cultural studies more broadly. The minor complements and in part may serve as an introduction to the recently approved M.A. concentration in museum studies.

To enter the minor students must be in good academic standing (minimum 3.0 cumulative grade-point average), have completed 45 units at UCLA, and file a petition with the program adviser, 100 Dodd Hall, (310) 206-6905.

*Required Lower Division Courses (8 units):* Anthropology 9 or 33 and one course from Art History 50 through 57, with grades of B or better.

*Required Upper Division Courses (28 units):* Art History C103A, C103B, World Arts and Cultures 185A, 185B, and three elective courses selected from Art History 100, C103C, World Arts and Cultures 185C, and a wide range of other courses from various departments and programs, with approval of the program director. Courses from other departments and programs may be applied as electives on an individual case basis only.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult the departmental adviser before enrolling in any courses for the minor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the

graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Art History offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Art History.

### Admission

A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required of applicants to the M.A. program. The Graduate Record Examination (GRE) is required, although there is no minimum score. Three letters of recommendation (preferably from art historians) are required. The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about the applicant's interests in art history. Also required are two writing samples (two 10-page research papers). Applicants must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses in Fields A and B as noted under Areas of Study in *Program Requirements for UCLA Graduate Degrees*. Specific areas may not be offered in satisfaction of more than one requirement.

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during the first two quarters in residence and may not be applied toward the required courses for the degree. Instead of taking a course, students may elect to substitute a competency examination in the deficient area.

The M.A. in Art History is usually required for admission to the Ph.D. program. However, students with an M.A. degree in other disciplines may apply for admission. The graduate review committee determines the equivalency of the M.A. on an individual basis. An M.A. in Art History from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the graduate review committee. All incoming Ph.D. students must show evidence of having taken and passed with grades of B or better at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in M.A. course requirements in *Program Requirements for UCLA Graduate Degrees*). Deficiencies must be made up during the first two quarters in residence and may not be applied toward the eight courses required for the Ph.D. degree.

The application must include, in addition to official transcripts, all of the following: (1) a standard statement of purpose (approximately 400 words), (2) a copy of the applicant's M.A. thesis or, if no thesis was written, one major research paper written at the M.A. level in the major or intended major field, (3) three or more letters of recommendation from individuals familiar with the applicant's scholarly work, of which one must be a detailed letter of assessment and endorsement from the individual who served as the major adviser for the M.A., (4) a written statement from the intended Ph.D. major adviser of willingness to supervise the applicant's Ph.D. work, (5) evidence of reading fluency in two appropriate foreign languages, (6) Graduate Record Examination (GRE) scores.

If an applicant is applying directly to the Ph.D. program from the M.A. in Art History program at UCLA, there is a slightly modified procedure. For details, contact the departmental graduate counselor.

A reading knowledge of French and German is requisite for admission at the Ph.D. level for those majoring in all areas except Asian (i.e., Chinese, Japanese, South Asian, Southeast Asian, Korean), pre-Columbian and Latin American, Native North American, oceanic, Islamic, and Italian art history.

### Master's Degree

In addition to the fields under Doctoral Degree, there is a museum studies field for the M.A. degree.

The M.A. degree is offered through the comprehensive examination plan and requires the completion of a major and two minors within the Art History major. Major areas include Western and non-Western, critical theory, and museum studies (field experience is recommended). Course requirements range from 10 to 13 courses, depending on major/minor. All students must take a course in art historical theories and methodologies and a course in the historiography of art history, or theory and criticism in art history.

There is a language requirement for this degree.

### Doctoral Degree

Fields include Aegean, American, baroque, Byzantine, contemporary (post-1945), 18th century, Greek, medieval, 19th century, Renaissance, Roman, 20th century, African, Chinese, Indian, Islamic, Japanese, Native North American, oceanic, pre-Columbian, Southeast Asian, Korean, and critical theory.

At the time of application to the Ph.D. program, the student selects a major field of study within art history; by the end of the second quarter of residence, an additional minor (or minors) is selected. The major and minor faculty advisers are responsible for the student's course of study and completion of requirements within the field. The department offers three options in the selection of majors and minors. Course

requirements vary from a total of eight to 11 graduate and undergraduate courses, depending on major/minor.

Written and oral qualifying examinations are required. The written examination tests knowledge in the major and minor fields of study. Following successful completion of the written examination, students select a dissertation topic and take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Art History

### Lower Division Courses

**50. Ancient Art. (4)** Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture.

**51. Medieval Art. (4)** Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture.

**54. Modern Art. (4)** Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S.

**55A. Introduction to African Art. (4)** Lecture, three hours; discussion, one hour. Introduction to field of African art history, with focus on selected traditions. P/NP or letter grading.

**55B. Arts of Pre-Columbian America. (4)** Lecture, three hours; discussion, one hour. Survey of sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.

**56A. Art of India and Southeast Asia. (4)** Lecture, three hours; discussion, one hour. Survey of major artistic monuments of Indo-Iranian and Southeast Asian cultures, concentrating on formal and iconographical problems, as well as social and political conditions under which artworks were patronized and produced.

**56B. Introduction to Chinese Art. (4)** Lecture, three hours; discussion, one hour. Introduction to discipline of Chinese art history. Fundamentals of formats, methods, and materials of Chinese art, visual and textual sources, peculiarities of patronage, traditional art history and criticism, and approaches to representation in premodern China.

**57. Renaissance and Baroque Art. (4)** Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750.

**88A-88Z. Lower Division Seminars. (4 each)** Seminar, three hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

**88A. Buddha's Life and Teachings in Art, Texts, and Worship. (4)** Development of Buddhist art in India through Buddha's teachings, expressed in art, architecture, texts, and ritual. Re-creation of Buddha's life by analyzing art and reading Buddhist texts of his life.

### Upper Division Courses

**100. Art Historical Theories and Methodologies. (4)** Discussion, three hours. Requisites: three courses from 50 through 57. Critical examination of history of discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts.

**101A. Egyptian Art and Archaeology. (4)** Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during the Predynastic period and Old Kingdom.

**101B. Egyptian Art and Archaeology of the Middle and New Kingdoms. (4)** Lecture, three hours. Requisite: course 50. Study of architecture, sculpture, painting, and minor arts during the Middle and New Kingdoms.

**M102A. Minoan Art and Archaeology. (4)** (Same as Classics M153A.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

**M102B. Mycenaean Art and Archaeology. (4)** (Same as Classics M153B.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 1000 B.C. P/NP or letter grading.

**M102C. Archaic Greek Art and Archaeology. (4)** (Same as Classics M153C.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

**M102D. Classical Greek Art and Archaeology. (4)** (Same as Classics M153D.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

**M102E. Hellenistic Greek Art and Archaeology. (4)** (Same as Classics M153E.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

**M102F. Etruscan Art. (4)** (Same as Classics M153F.) Lecture, three hours. Requisite: course 50 or Classics 20. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

**M102G. Roman Art and Archaeology. (4)** (Same as Classics M153G.) Lecture, three hours. Requisite: course 50 or Classics 20. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

**M102H. Late Roman Art. (4)** (Same as Classics M153H.) Lecture, three hours. Requisites: courses 50, M102G. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

**M102I-M102J-M102K. Classical Archaeology. (4-4-4)** (Same as Classics M153I-M153J-M153K.) Lecture, three or four hours. Requisite: course 50 or Classics 10 or 20 or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. P/NP or letter grading. **M102I.** Greco-Roman Architecture; **M102J.** Greco-Roman Sculpture; **M102K.** Greco-Roman Painting.

**C103A-C103B. Museum Studies. (4-4)** (Formerly numbered 110F.) Lecture, three hours; demonstrations/field trips. Concurrently scheduled with courses C203A-C203B. P/NP or letter grading. **C103A.** Introduction to historical evolution of museums and museology, theories and methods of their operations, historical and critical relationships between museology, art history, and new technologies for archiving and exhibiting artifacts and historical materials. **C103B.** Lectures and discussions organized to foster active critical engagement with museum policies, operations, and productions involving focused study and on-site research on particular museum institutions and exhibitions.

**C103C. Museum Studies Practicum. (2 to 4)** Lecture, three hours. Requisites: courses C103A, C103B. On-site examination and discussion of selected artworks, exhibitions, and associated published and distributed materials, and of museum and gallery institutions, practices, and policies. Concurrently scheduled with course C203C. Letter grading.

**104A. Western Islamic Art. (4)** Lecture, three hours. From the Tigris and Euphrates Rivers to Spain, 7th to 16th century.

**104B. Eastern Islamic Art. (4)** Lecture, three hours. From the Tigris and Euphrates Rivers through Afghanistan and parts of central Asia; Ottoman Empire.

**C104C. Problems in Islamic Art. (4)** Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C214.

**105A. Early Christian Art. (4)** Lecture, three hours. Requisite: course 51. Origins and development of architecture, sculpture, and painting of early Christianity to the iconoclastic controversy.

**105B. Early Medieval Art. (4)** Lecture, three hours. Requisite: course 51. Art and architecture of Western Europe from the Migration period until A.D. 1000.

**105C. Romanesque Art. (4)** Requisite: course 51. Art and architecture of Western Europe in the 11th and 12th centuries.

**105D. Gothic Art. (4)** Lecture, three hours. Requisite: course 51. Art and architecture of Europe in the 13th century.

**105E. Byzantine Art. (4)** Lecture, three hours. Requisite: course 51. Theory and development of Byzantine art from the iconoclastic controversy to 1453 and diffusion of Byzantine art in Armenia, Georgia, the Caucasus, and Russia.

**105F. Late Gothic Art and Architecture. (4)** Lecture, three hours. Strongly recommended preparation: course 51. Art and architecture of Europe in the 14th and early 15th centuries. P/NP or letter grading.

**106A. Italian Art of the Trecento. (4)** Lecture, three hours. Requisite: course 57. Art and architecture of the 14th century.

**106B. Italian Art of the Quattrocento. (4)** Lecture, three hours. Requisite: course 57. Art and architecture of the 15th century.

**106C. Italian Art of the Cinquecento. (4)** Lecture, three hours. Requisite: course 57. Art and architecture of the 16th century.

**106D. Late Renaissance Art: Counter-Reformation. (4)** Lecture, three hours. Requisite: course 57. Painting, sculpture, and architecture of the late 16th and early 17th centuries considered in context of the Counter-Reformation.

**108A-108B. Northern Renaissance Art. (4-4)** Lecture, three hours. Requisite: course 57. Course 108A is requisite to 108B. Painting and sculpture in the Northern Renaissance.

**108C. From Bruegel to Rubens. (4)** Lecture, three hours. Requisite: course 57. Art and history in the Spanish southern Netherlands (i.e., present-day Belgium), circa 1550 to 1650, in context of Spanish rule and revolt against it (1568 to 1585), truce with the northern independent (Dutch) Netherlands (1609 to 1621), and renewal of war (1621 to 1648). P/NP or letter grading.

**C109A. Baroque Art. (4)** (Formerly numbered 109A.) Lecture, three hours. Requisite: course 57. Art and architecture of Spain or Italy, 16th to late 17th century. Concurrently scheduled with course C209A. P/NP or letter grading.

**109B. Baroque Art. (4)** Lecture, three hours. Requisite: course C109A. Art and architecture of Northern Europe, 16th to late 17th century.

**109C. European Art of the 18th Century. (4)** Lecture, three hours. Requisite: course 57. Painting, architecture, and sculpture of the 18th century examined in light of political and intellectual developments. Special emphasis on effect of the rise of democratic institutions, especially the French Revolution.

**109D. Art and Architecture of Georgian England. (4)** Lecture, three hours.

**110A. European Art of the 19th Century. (4)** Lecture, three hours. Requisite: course 54. Neoclassicism and Romanticism, with emphasis on France — development and influence of David, Ingres, and Delacroix.

**110B. European Art of the 19th Century: Realism and Impressionism. (4)** Lecture, three hours. Requisite: course 54. Inquiry into problem of realism, with emphasis on French art, but including developments in England and Germany.

**110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. (4)** Lecture, three hours. Requisite: course 54. Study of major developments in modern art, 1880s to 1930, including Seurat, Cezanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism.

**110E. Art and Politics in the Contemporary Americas: Post-World War II U.S. Art and Politics. (4)** Requisite: course 54. Selective survey of media and art supporting, condoning, and resisting U.S. capitalism and imperialism, with special emphasis on Vietnam era and arts of protest.

**110F. Selected Topics in Modern Art. (4)** Lecture, three hours. Requisite: course 54. Changing topics in modern art (post-1780) which reflect interests of individual regular and visiting faculty members. May be repeated once for credit. P/NP or letter grading.

**110G. Art and Politics in the Contemporary Americas: Latin America. (4)** Requisite: course 54. Nationalist and revolutionary responses of Latin America to U.S. imperialism. Discussion of the cases of Mexico, Cuba, Chile, and Nicaragua.

**C110H. Latin American Art of the 20th Century. (4)** Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. Concurrently scheduled with course C254. P/NP or letter grading.

**C112A. American Art before the Civil War. (4)** Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C212A.

**C112B. American Art in the Gilded Age, 1860 to 1900. (4)** Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C212B.

**C112C. American Art, 1900 to 1945. (4)** Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. Concurrently scheduled with course C212C. P/NP or letter grading.

**CM112D. African American Art. (4)** (Same as Afro-American Studies CM112D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM212D. P/NP or letter grading.

**CM112E. African American Art. (4)** (Same as Afro-American Studies CM112E.) Lecture, three hours. Continuation of course CM112D, involving detailed inquiry into work of 20th-century African American artists. Concurrently scheduled with course CM212E. P/NP or letter grading.

**114A. Early Art of India. (4)** Lecture, three hours. Not open to freshmen. Survey of Indian art from Indus Valley cultures to the 10th century. Emphasis on Buddhist and Hindu backgrounds of the arts.

**114C. Japanese Art. (4)** Lecture, three hours. Not open to freshmen. Japanese art from its beginning in prehistory through the 19th century. Emphasis on development of Buddhist art and its relationship with the culture.

**114D. Later Art of India. (4)** Lecture, three hours. Not open to freshmen. Survey of Indian art from the 10th to 19th century. Decline of Buddhist art, last efflorescence of Hindu architecture, Muslim painting and architecture, and Rajput painting. P/NP or letter grading.

**114E. Arts of Korea. (4)** Lecture, three hours. Art and archaeology of Korea from the Neolithic Period through the Yi dynasty. Particular emphasis on early archaeology and state formation, Buddhist art, Koryo ceramics, and Yi literati painting.

**114F. Arts of Southeast Asia. (4)** Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. Study of art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia.

**C115A. Advanced Indian Art. (4)** Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C257.

**C115B. Advanced Chinese Art. (4)** Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C258.

**C115C. Advanced Japanese Art. (4)** Lecture, three hours. Requisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C259.

**C115D. Art and Material Culture, Neolithic to 210 B.C. (4)** Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). Concurrently scheduled with course C261A. P/NP or letter grading.

**C115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4)** Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. Concurrently scheduled with course C261B. P/NP or letter grading.

**C115F. Art and Material Culture of Late Imperial China, 906 to 1911. (4)** Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). Concurrently scheduled with course C261C. P/NP or letter grading.

**C117A. Pre-Columbian Art of Mexico. (4)** Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218A.

**C117B. Pre-Columbian Art of the Maya. (4)** Lecture, three hours. Requisite: course 55B. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. Concurrently scheduled with course C218B.

**C117C. Pre-Columbian Art of the Andes. (4)** Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C218C.

**C117D. Aztec Art. (4)** Lecture, three hours. Requisite: course 55B or C117A. Painting, sculpture, architecture, and other arts of Nahuatl-speaking peoples of central Mexico in the centuries before the Spanish conquest, with emphasis on their social and historical context and major scholarly debates. Concurrently scheduled with course C218D. P/NP or letter grading.

**118A. Arts of Oceania. (4)** Lecture, three hours. Requisite: course 55A. Survey of arts of the major island groupings of the Pacific, emphasizing style-regions and broad historical relationships.

**118C. Arts of Sub-Saharan Africa. (4)** Lecture, three hours. Survey, with emphasis on sculpture, of selected traditions within a style-region framework.

**118D. Arts of Native North America. (4)** Lecture, three hours. Requisite: course 55A. Survey of painting, sculpture, and other arts from the Eskimo to peoples of the Caribbean and Southwestern U.S.

**118E. Advanced Studies in Non-Western Art. (4)** Lecture, three hours. Requisite: course 118A or 118C or 118D. Selected topics in arts of non-Western peoples which reflect interests of individual regular and visiting faculty members. P/NP or letter grading.

**C119A. Advanced Studies in African Art: Western Africa. (4)** Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C216A.

**C119B. Advanced Studies in African Art: Central Africa. (4)** Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C216B.

**127. Undergraduate Seminar. (4)** Seminar, three hours. Designed for juniors/seniors. Selected aspects of art history explored through readings, discussion, research papers, and oral presentations. May be repeated twice.

**C140A. History of Korean Painting. (4)** Lecture, three hours. Requisite: course 114E. Korean painting history from Three Kingdom period to the 19th century, with special emphasis on Choson dynasty (1392 to 1910). Concurrently scheduled with course C242A. P/NP or letter grading.

**C140B. History of Korean Ceramics. (4)** Lecture, three hours. Requisite: course 114E. History of Korean ceramics from Neolithic period to the 19th century, with special emphasis on technological and stylistic developments. Concurrently scheduled with course C242B. P/NP or letter grading.

**C140C. History of Korean Buddhist Art. (4)** Lecture, three hours. Requisite: course 114E. History of Korean Buddhist art from Three Kingdom period to Choson dynasty, with special emphasis on Buddhist sculpture, painting, and architecture. Concurrently scheduled with course C242C. P/NP or letter grading.

**C140D. Selected Topics in Korean Art. (4)** Lecture, three hours. Requisite: course 114E. Variable topics in Korean art which reflect interests of individual regular and/or visiting faculty members. Concurrently scheduled with course C242D. P/NP or letter grading.

**C150A. Contemporary Art, 1940s to 1950s. (4)** Lecture, three hours. Requisite: course 54. Study of major artistic and cultural trends following World War II in the U.S. and Europe, covering abstract expressionism to pop art. Concurrently scheduled with course C250A. P/NP or letter grading.

**C150B. Contemporary Art, 1960s to 1970s. (4)** Lecture, three hours. Requisite: course 54. Study of ambitions and contexts of pop art, minimalism, conceptual art, feminist art, performance, land art, and more. Concurrently scheduled with course C250B. P/NP or letter grading.

**C150C. Contemporary Art, 1980s to the Present. (4)** Lecture, three hours. Requisite: course 54. Study of politics of representation at end of the century, covering dominant strategies and trends in postmodernist art. Concurrently scheduled with course C250C. P/NP or letter grading.

**150D. Selected Topics in Contemporary Art. (4)** (Formerly numbered 110D.) Lecture, three hours. Requisite: course 54. Changing topics in contemporary art (post-1945) which reflect interests of individual regular and/or visiting faculty members. May be repeated once for credit. P/NP or letter grading.

**195A-195B. Departmental Honors Courses. (4-4)** Preparation: completion of minimum of four upper division art history courses with 3.5 departmental grade-point average and overall 3.0 grade-point average. Limited to junior/senior Art History and History/Art History majors. Two-term independent research project under supervision of an appropriate faculty member, culminating in departmental honors thesis of approximately 30 pages. In Progress grading.

**197. Honors Course. (4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors. Individual studies for majors. May be repeated once for credit. P/NP or letter grading.

**199. Special Studies in Art. (2 to 8)** Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. Eight units may be applied toward the major. P/NP or letter grading.

## Graduate Courses

**200. Art Historical Theories and Methodologies. (4)** Discussion, three hours. Critical examination of history of the discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to the present. May be repeated for credit with consent of adviser.

**201. Topics in Historiography of Art History. (4)** Discussion, three hours. Critical examination of historiographic traditions of specific areas and fields within the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or the work of one or more authors. May be repeated for credit with consent of adviser.

**202. Topics in Theory and Criticism in Art History. (4)** Discussion, three hours. Focused studies of various theoretical and critical traditions within art history, concentrating on particular issues, authors, or methodologies either within or across historical and cultural areas. May be repeated for credit with consent of adviser.

**C203A-C203B. Museum Studies. (4-4)** (Formerly numbered 203.) Lecture, three hours; demonstrations/field trips. May be repeated for credit with consent of adviser. Concurrently scheduled with courses C103A-C103B. S/U or letter grading. **C203A.** Introduction to historical evolution of museums and museology, theories and methods of their operations, historical and critical relationships between museology, art history, and new technologies for archiving and exhibiting artifacts and historical materials. **C203B.** Lectures and discussions organized to foster active critical engagement with museum policies, operations, and productions involving focused study and on-site research on particular museum institutions and exhibitions.

**C203C. Museum Studies Practicum. (2 to 4)** Lecture, three hours. Requisites: courses C203A, C203B. On-site examination and discussion of selected artworks, exhibitions, and associated published and distributed materials, and of museum and gallery institutions, practices, and policies. Concurrently scheduled with course C103C. Letter grading.

**203D. Selected Topics in Museum Studies. (4)** Discussion, three hours. Changing topics in museological, curatorial, and exhibition practices which reflect interests of regular and visiting faculty members. S/U or letter grading.

**204. Restoration, Preservation, and Conservation. (4)** Seminar, two hours. May not be repeated.

**205. Studies in Prints. (4)** Seminar, two hours. Critical studies in history and connoisseurship of graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by Grunwald Center for the Graphic Arts. May be repeated for credit with consent of adviser.

**206. Studies in Drawings. (4)** Seminar, two hours. Critical studies in history and connoisseurship of draughtsmanship in the Western world. Individual studies emphasizing professional presentation. Group studies may culminate in exhibitions sponsored by Grunwald Center for the Graphic Arts. May be repeated for credit with consent of adviser.

**C209A. Baroque Art. (4)** Lecture, three hours. Requisite: course 57. Art and architecture of Spain or Italy, 16th to late 17th century. Concurrently scheduled with course C109A. S/U or letter grading.

**210. Egyptian Art. (4)** Seminar, two hours. Requisites: courses 101A, 101B, M102A. Art in Egypt during the Late period and Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures. May be repeated for credit with consent of adviser.

**211. Topics in Aegean Art. (4)** Seminar, two hours. Requisites: courses M102A, M102B. Art and architecture of Aegean Bronze Age (3000 to 1000 B.C.). Monuments or theoretical problems related to art and culture of Crete, Greece, the Cyclades, or Western Anatolia. May be repeated for credit with consent of adviser.

**C212A. American Art before the Civil War. (4)** Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112A.

**C212B. American Art in the Gilded Age, 1860 to 1900. (4)** Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112B.

**C212C. American Art, 1900 to 1945. (4)** Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112C. S/U or letter grading.

**CM212D. African American Art. (4)** (Same as Afro-American Studies CM212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. May be repeated for credit with consent of adviser. Concurrently scheduled with course CM112D. S/U or letter grading.

**CM212E. African American Art. (4)** (Same as Afro-American Studies CM212E.) Lecture, three hours. Continuation of course CM212D, involving detailed inquiry into work of 20th-century African American artists. Concurrently scheduled with course CM112E. Letter grading.

**213. Advanced Studies in Islamic Art. (4)** Seminar, two hours. Art and architecture of Islamic world (Spain to Iran) from the 7th to 17th century. Monuments or theoretical problems related to Islamic culture and artistic production. May be repeated for credit with consent of adviser.

**C214. Problems in Islamic Art. (4)** Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. May be repeated for credit with consent of adviser. Concurrently scheduled with course C104C.

**C216A. Advanced Studies in African Art: Western Africa. (4)** Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C119A.

**C216B. Advanced Studies in African Art: Central Africa. (4)** Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C119B.

**217. Primitivism and Art. (4)** Lecture, three hours. History of primitivism in visual arts and its institutional base from ancient Greece to the present, with emphasis on relevance to contemporary issues, critiques, and theory. May be repeated for credit with consent of adviser. S/U or letter grading.

**C218A. Pre-Columbian Art of Mexico. (4)** Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117A.

**C218B. Pre-Columbian Art of the Maya. (4)** Lecture, three hours. Requisite: course 55B. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117B.

**C218C. Pre-Columbian Art of the Andes. (4)** Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117C.

**C218D. Aztec Art. (4)** Lecture, three hours. Requisite: course 55B or C117A. Painting, sculpture, architecture, and other arts of Nahuatl-speaking peoples of central Mexico in the centuries before the Spanish conquest, with emphasis on their social and historical context and major scholarly debates. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117D. S/U or letter grading.

**219A. Oceanic Art. (4)** Discussion, two hours. Studies in selected topics in the art of Pacific islands. May be repeated for credit with consent of adviser.

**219B. Pre-Columbian Art. (4)** Discussion, two hours. Studies in selected topics in art of pre-Hispanic Latin America. May be repeated for credit with consent of adviser.

**219C. African Art. (4)** Discussion, two hours. Studies in selected topics in art of sub-Saharan Africa. May be repeated for credit with consent of adviser.

**219D. Native North American Art. (4)** Discussion, two hours. Studies in selected topics in art of the American Indian. May be repeated for credit with consent of adviser.

**220. Oceanic, Pre-Columbian, African, and Native North American Art. (4)** Discussion, two hours. Studies in selected topics comparing arts of Oceania, Africa, and pre-Columbian and Native North America. May be repeated for credit with consent of adviser.

**221. Topics in Classical Art. (4)** Lecture, two to three hours. Studies in Parthian art. Site-by-site survey of the Near East (Afghanistan, Iran, Iraq, Syria) during period of Greek and Parthian control. May be repeated for credit with consent of adviser.

**223. Classical Art. (4)** Seminar, two hours. Studies in Greco-Roman art and archaeology. Studies of specific periods, sites, or artistic media. May be repeated for credit with consent of adviser.

**225. Medieval Art. (4)** Seminar, two hours. Studies in selected topics in Byzantine and European medieval art. May be repeated for credit with consent of adviser.

**226A-226B. Medieval Art and Architecture. (4-4)** Studies in selected topics in Byzantine and European medieval art. Seminar extends over two consecutive terms. May be repeated for credit with consent of adviser. In Progress grading.

**229. Renaissance and Baroque Paleography. (4)** Seminar. Preparation: knowledge of Italian, working knowledge of Latin. Workshop approach to documents pertaining to artistic commissions from the 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, correspondence, treatises, and inscriptions. May be repeated for credit with consent of adviser.

**230. Italian Renaissance Art. (4)** Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers. May be repeated for credit with consent of adviser.

**231. Leonardo and Renaissance Theory of Art. (4)** Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers. May be repeated for credit with consent of adviser.

**235. Northern Renaissance Art. (4)** Seminar, two hours. Preparation: knowledge of German. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. May be repeated for credit with consent of adviser.

**240. Baroque Art. (4)** Seminar, two hours. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus. May be repeated for credit with consent of adviser.

**M241A-M241B. Seminars: Modern European History. (4-4)** (Same as History M230A-M230B.) Seminar, three hours. May be repeated for credit with consent of adviser. In Progress and S/U or letter grading.

**C242A. History of Korean Painting. (4)** Lecture, three hours. Requisite: course 114E. Korean painting history from Three Kingdom period to the 19th century, with special emphasis on Choson dynasty (1392 to 1910). Concurrently scheduled with course C140A. S/U or letter grading.

**C242B. History of Korean Ceramics. (4)** Lecture, three hours. Requisite: course 114E. History of Korean ceramics from Neolithic period to the 19th century, with special emphasis on technological and stylistic developments. Concurrently scheduled with course C140B. S/U or letter grading.

**C242C. History of Korean Buddhist Art. (4)** Lecture, three hours. Requisite: course 114E. History of Korean Buddhist art from Three Kingdom period to Choson dynasty, with special emphasis on Buddhist sculpture, painting, and architecture. Concurrently scheduled with course C140C. S/U or letter grading.

**C242D. Selected Topics in Korean Art. (4)** Lecture, three hours. Requisite: course 114E. Variable topics in Korean art which reflect interests of individual regular and/or visiting faculty members. Concurrently scheduled with course C140D. S/U or letter grading.

**243. Selected Topics in Korean Art. (4)** Lecture, three hours. Studies of Korean art under different art-historical perspectives, methods, and theories. Individual studies, with emphasis on professional presentation. Group studies may be linked to exhibition projects. May be repeated with consent of instructor. S/U or letter grading.

**244. Topics in European Art from 1700 to 1900. (4)** Lecture, two to three hours. May be repeated for credit with consent of adviser.

**245. European Art from 1700 to 1900. (4)** Seminar, two hours. May be repeated for credit with consent of adviser.

**246. Art and Architecture of Georgian England. (4)** Seminar, two hours. May be repeated for credit with consent of adviser.

**C250A. Contemporary Art, 1940s to 1950s. (4)** Lecture, three hours. Requisite: course 54. Study of major artistic and cultural trends following World War II in the U.S. and Europe, covering abstract expressionism to pop art. Concurrently scheduled with course C150A. S/U or letter grading.

**C250B. Contemporary Art, 1960s to 1970s. (4)** Lecture, three hours. Requisite: course 54. Study of ambitions and contexts of pop art, minimalism, conceptual art, feminist art, performance, land art, and more. Concurrently scheduled with course C150B. S/U or letter grading.

**C250C. Contemporary Art, 1980s to the Present. (4)** Lecture, three hours. Requisite: course 54. Study of politics of representation at end of the century, covering dominant strategies and trends in postmodernist art. Concurrently scheduled with course C150C. S/U or letter grading.

**251. Contemporary Art. (4)** Discussion, three hours. Selected topics in contemporary art, criticism, and theory. S/U or letter grading.

**253. Modern Art. (4)** Seminar, two hours. Changing topics in modern art (including illustration and other popular forms) which reflect interests of particular faculty members. Political and economic factors affecting arts of France and Germany at various times. May be repeated for credit with consent of adviser.

**C254. Latin American Art of the 20th Century. (4)** Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. May be repeated for credit with consent of adviser. Concurrently scheduled with course C110H. S/U or letter grading.

**255. American Art. (4)** Seminar, two hours. Requisite: course C112A or C112B or C112C, depending on topic. Topics in American art from Colonial period to the present. Discussion of weekly readings, student oral presentations, and papers. May be repeated for credit with consent of adviser.

**C257. Advanced Indian Art. (4)** Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115A.

**C258. Advanced Chinese Art. (4)** Lecture, three hours. Study in Chinese painting and sculpture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115B.

**C259. Advanced Japanese Art. (4)** Lecture, three hours. Requisite: course 114C. Study in Japanese painting and sculpture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115C.

**260A. Indian Art. (4)** Lecture, two hours. Advanced studies in secular and religious artistic traditions of India. May be repeated for credit with consent of adviser. S/U or letter grading.

**260B. Chinese Art. (4)** Lecture, two hours. Advanced studies in secular and religious artistic traditions of China. May be repeated for credit with consent of adviser. S/U or letter grading.

**260C. Japanese Art. (4)** Lecture, two hours. Advanced studies in secular and religious artistic traditions of Japan. May be repeated for credit with consent of adviser. S/U or letter grading.

**C261A. Art and Material Culture, Neolithic to 210 B.C. (4)** Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115D. Extensive research paper required of graduate students. S/U or letter grading.

**C261B. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4)** Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115E. S/U or letter grading.

**C261C. Art and Material Culture of Late Imperial China, 906 to 1911. (4)** Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115F. S/U or letter grading.

**M262A. Topics in Asian Archaeology. (4)** (Same as Anthropology M216.) Lecture, three hours. Designed for graduate students. Topics may include identification of ethnic groups in archaeology, archaeology of religion, archaeological reflections of commerce and trade and their influence on social development, archaeology of language dispersal, cultural contact and nature of cultural "influence." Letter grading.

**265. Fieldwork in Archaeology. (2 to 8)** Participation in archaeological excavations or other archaeological research under supervision of the staff. May be repeated for credit with consent of adviser.

**M270. Art Law. (4)** (Same as Law M301.) Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, art in public places, and moral rights. Distinguished guest speakers and one field trip.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Art History. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Designed for graduate students. Required of all new teaching assistants during Fall Quarter of their teaching assistant appointment. Workshop/seminar in teaching techniques and pedagogical issues, consisting of readings, discussions, and guest speakers on selected topics. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** S/U grading.

**598. Research for and Preparation of M.A. Thesis. (2 to 12)** S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 12)** S/U grading.

### Classics

251A. Seminar: Classical Archaeology — Aegean Bronze Age

251B. Seminar: Classical Archaeology — Greco-Roman Architecture

251C. Seminar: Classical Archaeology — Greco-Roman Sculpture

251D. Seminar: Classical Archaeology — Greco-Roman Painting

## ARTS AND ARCHITECTURE

*School of the Arts and Architecture*

UCLA  
303 East Melnitz Building  
Box 951427  
Los Angeles, CA 90095-1427

(310) 206-6465  
<http://www.arts.ucla.edu>

## Scope and Objectives

There is no major in arts and architecture; however, the following courses are part of the schoolwide curriculum.

## Arts and Architecture

### Lower Division Course

**10. Arts Encounters: Exploring Arts Literacy in the 21st Century. (5)** Lecture, four hours; discussion, one hour; outside study/event attendance, 10 hours. Through series of direct encounters with art and artists across a global range of practices, course equips students with kinds of critical skills that enhance their understanding of, and sharpen their appetite for, a wide range of artistic practices. Attendance at performance/art events outside normal class schedule is mandatory. P/ NP or letter grading.

### Upper Division Courses

**100. Selected Topics in the Arts. (4)** Lecture, four hours; discussion and/or laboratory, three hours; outside study, five hours. Selected topics in the arts explored through a variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics to be announced in advance. May be repeated for a maximum of 8 units. P/NP or letter grading.

**101. Aesthetics of Multimedia. (4)** Lecture, three hours; laboratory, one hour; outside study, eight hours. The arts stand at expressive center of new forms of digital expression described as "multimedia." Historical roots of this new expression traced over 1,500 years of world culture as preparation for collaborative multimedia student projects. Letter grading.

## ASIAN AMERICAN STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
3230 Campbell Hall  
Box 951546  
Los Angeles, CA 90095-1546  
(310) 825-2974

Michael Salman, Ph.D.  
Shu-mei Shih, Ph.D.  
Henry Yu, Ph.D.  
Min Zhou, Ph.D., *Chair*

### Affiliated Faculty Professors

Emil Berkanovic, Ph.D. (*Community Health Sciences*)  
Edna Bonacich, Ph.D. (*Sociology, UC Riverside*)  
Lucie C. Cheng, Ph.D. (*Sociology*)  
King-Kok Cheung, Ph.D. (*English*)  
Gaurang Mitu Gulati, J.D., *Acting (Law)*  
Shirley Hune, Ph.D. (*Urban Planning*)  
Jerry Kang, J.D., (*Law*)  
Snehendu B. Kar, Dr.P.H., M.Sc. (*Community Health Sciences*)  
James E. Lubben, D.S.W. (*Social Welfare*)  
Takashi Makinodan, Ph.D., *in Residence (Medicine)*  
Robert A. Nakamura, M.F.A. (*Film, Television, and Digital Media*)  
Don T. Nakanishi, Ph.D. (*Education*)  
Paul Ong, Ph.D. (*Urban Planning*)  
William G. Ouchi, D.Litt., Ph.D. (*Management*)  
Hiromi Lorraine Sakata, Ph.D. (*Ethnomusicology*)  
Min Zhou, Ph.D. (*Sociology*)

### Professors Emeriti

Harry H.L. Kitano, Ph.D. (*Social Welfare*)  
Kazuo Nihira, Ph.D. (*Psychiatry and Behavioral Sciences*)

### Associate Professors

Pauline Agbayani-Siewert, Ph.D. (*Social Welfare*)  
Roshan Bastani, Ph.D. *in Residence (Health Services)*  
Chi-Fun Cindy Fan, Ph.D. (*Geography*)  
Clara Chu, Ph.D. (*Information Studies*)  
Jinqi Ling, Ph.D. (*English*)  
David Wong Louie, M.F.A. (*English*)  
Valerie J. Matsumoto, Ph.D. (*History*)  
Ailee Moon, Ph.D. (*Social Welfare*)

Kyeyoung Park, Ph.D. (*Anthropology*)  
 Michael Salman, Ph.D. (*History*)  
 Shu-mei Shih, Ph.D. (*East Asian Languages and Cultures*)  
 James Tong, Ph.D. (*Political Science*)  
 Cindy Yee-Bradbury, Ph.D. (*Psychology*)

#### Assistant Professors

Mitchell J. Chang, Ph.D. (*Education*)  
 Marjorie Kagawa-Singer, Ph.D. (*Community Health Sciences*)  
 Vinay Lal, Ph.D. (*History*)  
 Rachel C. Lee, Ph.D. (*English*)  
 Mitchell T. Maki, Ph.D. (*Social Welfare*)  
 Ninez Ponce, Ph.D., in *Residence (Health Services)*  
 Henry S.N. Yu, Ph.D. (*History*)

#### Lecturers

Sefa Aina, B.A.  
 Esha De, Ph.D.  
 John Esaki, M.F.A.  
 Stewart Kwoh, J.D.  
 Nobu McCarthy, B.A.  
 Glenn Omatsu, M.A.  
 Duong Pham, Ph.D.  
 Kent Wong, Ph.D.

#### Adjunct Professor

Russell Leong, M.F.A. (*English*)

#### Adjunct Associate Professors

Yuji Ichioka, Ph.D. (*History*)  
 Nancy Harada, Ph.D. (*Medicine*)

## Scope and Objectives

The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian American and Pacific Island peoples in the U.S. from several disciplines. An undergraduate major leading to a B.A. degree is available for those students who wish to pursue their studies about Asian Pacific Americans in more depth, while the graduate program leads to the M.A. degree. Students enrolled in an organized undergraduate major other than Asian American Studies may pursue a minor in the field.

A major goal of the program is to communicate the experiences of Asian Pacific Americans as an ethnic group. Courses examine the important issues and concerns of Asian Pacific Americans, including their history, social organization, and culture.

## Undergraduate Study

### Asian American Studies B.A.

The B.A. program in Asian American Studies provides a general introduction for students who anticipate advanced work at the graduate level or careers in research, public service, and community work related to Asian Pacific Americans. An overall grade-point average of 2.0 is required for admission to the major.

#### Transfer Students

There are no specific preparation courses for the Asian American Studies major readily available at other institutions. Students should concentrate on the Intersegmental General Education Transfer Curriculum (IGETC) or UCLA general education requirements.

## The Major

**Required:** A total of 14 courses (one lower division, 13 upper division), including Asian American Studies 99 and 100, one research methods course, two Asian American theme courses, two courses with focus on an Asian Pacific American ethnic-specific group, two ethnic/race/gender relations courses, two courses on history/culture/social or political institutions of Asia, and three elective courses selected from Asian American studies or the approved list of interdepartmental courses. At least seven of the courses taken for the major must be from the approved list of interdepartmental courses (available in the program office each term) and seven must be Asian American studies courses.

Students must also demonstrate proficiency equivalent to the completion of an elementary/basic one-year course of study in an Asian language prior to graduation.

No more than 8 units of course 199 may be applied toward the major.

All courses applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must maintain an overall grade-point average of 2.0 in all courses.

## Honors Program

The honors program is open to junior and senior Asian American Studies majors who have (1) 90 or more total units, (2) a grade-point average of 3.5 or better in upper division Asian American studies courses and a cumulative GPA of 3.0 or better, and (3) completed Asian American Studies 99, 100, and one research methods course selected from a list maintained in the program office. Applications must be submitted no later than the end of the fifth week of classes during Winter Quarter each academic year. For application forms and further information, contact the undergraduate counselors.

Honors students must take Asian American Studies 199HA during Spring Quarter of the junior year. During Fall and Winter Quarters of the senior year, they take courses 199HB and 199HC, in which they write a thesis or its equivalent under the direction of a faculty member.

### Asian American Studies Minor

The Asian American Studies minor is designed for students who wish to gain understanding of and competence in Asian American studies.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the program counselor, Asian American Studies Center, 3230 Campbell Hall.

**Required Lower Division Course (4 units):** Asian American Studies 99.

**Required Upper Division Courses (24 units):** Asian American Studies 100, one Asian American theme course, one course with focus on an Asian Pacific American ethnic-specific group, and three Asian American studies elective courses. No more than 4 units of course 199 may be applied toward the minor, and only courses in Asian American studies or those multiple-listed with the program may be taken to fulfill requirements for the minor.

All minor courses must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Asian American Studies Program offers the Master of Arts (M.A.) degree in Asian American Studies.

## Admission

### M.A. in Asian American Studies

In addition to the University's minimum requirements, applicants to the M.A. program are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the program as part of the application. Three letters of recommendation are also required.

### Asian American Studies M.A./Public Health M.P.H.

The Asian American Studies Program and the Department of Community Health Sciences offer a concurrent degree program whereby students can work for the M.A. in Asian American Studies and the M.P.H. Students must complete the program requirements for both degrees. However, a maximum of 12 units of coursework in public health may be applied toward both degrees. When applying, the same statement of purpose may be submitted to each program. Applicants interested in this concurrent program should contact the Asian American Studies Program and the Student Services Office, UCLA School of Public Health.

## Asian American Studies M.A./ Social Welfare M.S.W.

The Department of Social Welfare and the Asian American Studies Program offer a concurrent program whereby students may pursue the M.S.W. and M.A. in Asian American Studies at the same time. Applicants are required to satisfy the regular admission requirements of both programs.

Students complete the Asian American studies courses in the first year and the social welfare courses in the second and third years. The Asian American Studies Program requires a thesis to be completed by the third year. Students must complete the program requirements for both degrees. However, a maximum of 8 units of coursework in social welfare may be applied toward both degrees.

Applicants may submit the same statement of purpose to each program, but all other parts of the application process are separate to each graduate program. Applicants interested in the concurrent degree program should contact the Asian American Studies Program or the Department of Social Welfare.

## Master's Degree

The Asian American Studies Program is interdepartmental, and its major fields are determined by the participating faculty from various departments.

The M.A. degree is offered through the comprehensive examination and thesis plans. The thesis plan includes a field research thesis option for students who are interested in the practical application of what they have learned in their graduate coursework or who intend to pursue careers with Asian American community organizations and agencies. A total of 11 courses, seven at the graduate level, is required.

There is a language/research methodology requirement for this degree.

## Asian American Studies

### Lower Division Courses

**21. Asians and Pacific Islanders in American Society. (4)** Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and cultures of Asians and Pacific Islanders in the U.S. Topics include origins and history of migration to the U.S., social movements, ethnic images in literature and art, communities in the U.S. and California, and their current issues. P/NP or letter grading.

**99. History of Asians in America. (4)** (Formerly numbered 100A.) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history of Asians and Pacific Islanders in the U.S. P/NP or letter grading.

### Upper Division Courses

**100. Contemporary Asian American Communities. (4)** (Formerly numbered 100B.) Lecture, three hours; discussion, one hour. Multidisciplinary introduction to Asian American communities in the U.S. Topics include demographics and social, political, and economic issues. P/NP or letter grading.

**101A. Field Studies Methods in Asian Pacific Communities. (4)** Lecture, three hours. Preparation: one course from 100 through 197Z. Development of community profiles on Asian Pacific American communities of students' choice, using various field studies techniques of data collection. P/NP or letter grading.

**101B. Internships in Asian Pacific Communities. (4)** Discussion, 90 minutes; fieldwork, eight hours minimum. Requisite: course 101A or another Asian American studies course (except 199). Integrates academic and empirical work by providing students the challenge of performing public service and community work in Asian Pacific or other multicultural communities, and of bringing their ongoing internship experiences back to classroom. P/NP grading.

**103. Social Science Research Methods. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Introduction to fundamentals of conducting social research on Asian Americans, providing experience in using some research methods and exercises in evaluating nature and quality of scientific research on Asian American issues. P/NP or letter grading.

**105. Asian American Historiography. (4)** Seminar on exploration of how works of history are written about Asian Americans. Focus on problems of historiography and method when considering source materials related to history and experience of Asian Americans. P/NP or letter grading.

**107A. Introductory Video Ethnography and Documentary Workshop. (4)** (Formerly numbered 107.) Laboratory, three hours. Introduction to concepts and methods of video documentation and video ethnography of the Asian Pacific American community. Topics include scriptwriting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, interviewing techniques, and editing. Students required to do off-campus fieldwork and complete video documentary. P/NP or letter grading.

**107B. Advanced Video Ethnography and Documentary Workshop. (4)** Laboratory, three hours. Requisite: course 107A. Advanced concepts and methods of video documentation and video ethnography of the Asian Pacific American community. Topics include scriptwriting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, interviewing techniques, and editing. Students required to do off-campus fieldwork and complete video documentary. P/NP or letter grading.

**M108B. Policy, Planning, and Community. (4)** (Formerly numbered 108B.) (Same as Urban Planning M195.) Lecture, three hours; field laboratory. Project-oriented methods course on conducting needs assessment in Asian American communities. Geographic information systems to be used to define problems and needs. Letter grading.

**M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems. (4)** (Same as Health Services M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S. Letter grading.

**M112A. Asian American Literature to 1980. (5)** (Same as English M102A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of Asian American literature from early period of formation to cultural nationalist movement of late 1960s and 1970s. Works of such authors as Edith Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston included. P/NP or letter grading.

**M112B. Asian American Literature since 1980. (5)** (Same as English M102B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Wong Louie, Garrett Hongo, and Jessica Hagedorn included. P/NP or letter grading.

**113. Asian Americans and the Law. (4)** Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include anti-Asian labor legislation, legal prohibitions against Asians' right to testify, Japanese relocation orders, and equal educational opportunity for Asians. P/NP or letter grading.

**115. Asian American Women. (4)** Lecture, three hours. Condition of Asian women in America. Topics include women in Asian American history, racial and cultural stereotypes, and contemporary issues. Methodological approaches to study of gender issues presented and evaluated. P/NP or letter grading.

**116. Asian American Social Movements. (4)** Lecture, three hours. Designed for juniors/seniors. Examination of several dimensions of Asian American social movements, including grassroots, mass movement character, political and social vision, and social and political relevance to current issues. How movement participants linked struggle for change with own personal transformation and growth. P/NP or letter grading.

**M117. Asian American Personality and Mental Health. (4)** (Same as Psychology M107.) Lecture, three hours. Requisite: Psychology 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

**119. Asian American Aesthetics. (4)** (Formerly numbered M119.) Lecture, four hours. Designed for juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

**121B. Exploring Asian American Theater: Special Problems. (4)** Study of an Asian American play; students required to compose one act based on their own experience using lessons learned in class. Exploration of scene study and acting exercises. P/NP or letter grading.

**M123. Asian Pacific Americans in the U.S. Economy. (4)** (Same as Economics M189.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to linking understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

**M129A. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4)** (Formerly numbered M197.) (Same as Community Health Sciences M140.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

**130A-130E. Asian American History and Experience. (4 each)** Lecture, three hours. Not open to freshmen. Survey of immigration history, settlement patterns, and experiences of specific Asian American populations. Examination of historical and contemporary sociocultural, economic, and political issues as they affect formation and character of various Asian American communities. P/NP or letter grading. **130A.** Filipino American Experience; **130B.** Korean American Experience; **130C.** Vietnamese American Experience; **130D.** Japanese American History; **130E.** Chinese American Experience.

**131A. Filipino American Community and Family. (4)** Lecture, three hours; discussion, one hour. Requisite: course 130A. Introduction to Filipino American families and communities. Examination of interaction of Filipino American families and the larger social and political environment. P/NP or letter grading.

**M132A. Korean American Literature. (4)** (Same as Comparative Literature M168.) Seminar, three hours. Comprehensive introduction to Korean American literature, with emphasis on Korean American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Korean culture on Korean American literature. P/NP or letter grading.

**M132B. Chinese Immigrant Literature and Film. (4)** (Same as Chinese M153 and Comparative Literature M171.) Lecture, two hours; discussion, one hour. Knowledge of Chinese not required. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

**M133. Indian Identity in the U.S. and the Diaspora. (4)** (Same as History M189B.) Lecture, three hours. Designed for juniors/seniors. History of overseas Indian communities; transformations of Hinduism in diaspora; emergence of new diasporic art forms such as bhangra rap and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

**135A. Asian Pacific American Communities in Hawaii: Critical Issues Past and Present. (4)** Lecture, four hours. Through perspectives of history, economy, politics, education, ethnicity, and critical issues in Asian and Pacific Islander communities, study of Hawaii as a model for multiculturalism. Selected guest lectures by prominent Hawaii residents. Interaction with faculty and students at University of Hawaii. Field trips. Conducted at University of Hawaii, Manoa, in summer. P/NP or letter grading.

**135B. Asian Pacific Communities in Hawaii: Field Studies. (4)** Lecture, one hour; discussion, three hours; internship, 10 hours minimum. Requisite or corequisite: course 135A. Participation in academic internships (minimum 50 hours) in social service, cultural, political, educational, and community organizations to gain experiential learning experience in Hawaii's multicultural society. Given in Hawaii. P/NP or letter grading.

**M153. The U.S. and the Philippines. (4)** (Same as History M153.) Lecture, three hours. Recommended preparation: History 190A, 190B, 190C. Designed for juniors/seniors. Examination of complex interrelationship between U.S. colonialism, Philippine nationalism, history of Filipino Americans, and Philippine diaspora in the 20th century.

**M154. Chinese Immigration. (4)** (Same as Sociology M153.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

**M163. Investigative Journalism and Communities of Color. (4)** (Same as Afro-American Studies M195.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverage.

**164. Women, Violence, and Resistance. (4)** (Formerly numbered 197M.) Lecture, four hours; discussion, one hour. Study of various forms of violence done on women not only in and of themselves but in light of larger systems of oppression, with focus on Pilipino, Vietnamese, and South Asian cultures. Letter grading.

**171A-171E. Critical Issues in U.S.-Asia Relations. (4 each)** Lecture/seminar, three hours. Not open to freshmen. Critical examination of U.S. involvement in specific Asian countries, including study of historical, cultural, political, and socioeconomic factors that shape relations between Asia and the U.S. Examination of impact of relationships in the Pacific Rim and Asian Americans and their communities. P/NP or letter grading. **171A.** U.S.-Philippine Relations; **171B.** U.S.-Korea Relations; **171C.** U.S.-Vietnam Relations; **171D.** U.S.-Japan Relations; **171E.** U.S.-China Relations.

**196. Seminar: Asian American Studies. (4)** Seminar, three to four hours. Limited to senior Asian American Studies majors. Organized on a topics basis with readings, discussions, and papers. Consult Asian American Studies Center for topics to be offered in a specific term. P/NP or letter grading.

**197A-197Z. Topics in Asian American Studies. (4 each)** Lecture, three to four hours. Limited to juniors/seniors. Variable topics in Asian American studies on selected issues in education, literature, social process, public policy, and economic development. P/NP or letter grading.

**M197C. Topics in Asian American Literature. (5)** (Same as English M197C.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Asian American literature. Topics include specific genres (autobiography, poetry, or drama); specific nationalities within the Asian American community; and themes related to such problems as generational differences, gender politics, or interethnic encounters. May be repeated for credit. P/NP or letter grading.

**M197H. Culture, Media, and Los Angeles. (6)** (Same as Afro-American Studies M102 and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality.

**199. Special Topics in Asian American Studies. (2 to 4)** Requisite: course 100A or 100B or comparable knowledge in Asian American studies. Limited to juniors/seniors. Special individual studies on topics such as ethnic literature, public policies, economic development, immigrant education, and/or social policies related to Asian American studies. May be repeated for a maximum of 8 units.

**199HA. Honors Seminar. (4)** Seminar, three to four hours. Requisites: courses 99, 100. Introduction to research techniques and applications of critical methodology in study of Asians and Pacific Islanders in the U.S., in which students develop plan for independent research. Coursework may also include writing of proposal for research grant. Letter grading.

**199HB-199HC. Honors Seminars. (4-4)** Tutorial, to be arranged. Requisite: course 199HA. Course 199HB is requisite to 199HC. Tutorials in which students write theses under direction of a faculty member. In Progress and letter grading.

## Graduate Courses

**200A. Critical Issues in Asian American Studies. (4)** Designed for graduate students. Examines and seeks to develop a critical appreciation of research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues.

**200B. Critical Issues in Asian American Communities. (4)** Lecture, three hours. Designed for graduate students. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns.

**200C. Critical Issues in Asian American Studies. (4)** Lecture, three hours. Designed for graduate students. Critical review of research methods, strategies, and philosophies in Asian American studies.

**203. Asian American Research Methods. (4)** Seminar, three hours. Introduction to empirical research methods, stressing uses and relevancy in research with ethnic minority populations. Review of characteristics and logical processes of research and applicability of scientific and scholarly inquiry in advancing knowledge. S/U or letter grading.

**M215. Asian American Jurisprudence. (4)** (Formerly numbered M213.) (Same as Law M315.) Lecture, three hours. Exploration of Asian American legal systems, considering both dominant and oppositional concepts of law. Consideration of primary historical documents to examine ways Asian Americans have been victims of the legal system, as well as astute manipulators of the legal system. S/U or letter grading.

**M239. Race and Ethnicity as a Concept in Practice and Research. (4)** (Same as Community Health Sciences M239.) Discussion, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

**M260. Topics in Asian American Literature. (4)** (Formerly numbered M297A.) (Same as English M260A.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

**M261. Theorizing the Third World. (4)** (Same as Comparative Literature M274.) Seminar, three hours. Investigation of politics of power, gender, and race in complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

**M290Q. Social Welfare Policy in Asian American Communities. (4)** (Same as Social Welfare M290Q.) Seminar, three hours. Overview of social welfare policy in Asian American communities. Introduction to major social welfare policies and programs in the U.S. and impact on Asian American communities. Policy development, approaches, processes of implementation, evaluation, and strategies to effect policy. S/U or letter grading.

**297A-297Z. Topics in Asian American Studies. (4 each)** Seminar, three hours. Designed for graduate students. Selected topics in Asian American studies. S/U or letter grading:

**297B. Asian Migration to the U.S. (4)** Seminar, three hours. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

**297C. Urbanization in Asia — Policy Issues and Problems. (4)** Seminar, three hours. Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**490. Writing Workshop for Graduate Students. (2)** Lecture, one hour; discussion, one hour. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward M.A. degree requirements. May be repeated once for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Hours to be arranged.

**598. Research for and Preparation of M.A. Thesis. (2 to 8)** Preparation of research data and writing of M.A. thesis. S/U grading.

## Scope and Objectives

The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by efforts to improve air quality, deprecations caused by severe storms and floods, attempts to control or modify weather phenomena, problems of long-range weather forecasts and climate change, and expanding scientific frontiers into our outer atmosphere and atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

## Undergraduate Study

### Atmospheric, Oceanic, and Environmental Sciences B.S.

#### Preparation for the Major

*Required:* Two courses from Atmospheric Sciences 2, 3, 6, 10; Chemistry and Biochemistry 20A; Mathematics 3A, 3B, and 3C, or 31A, 31B, 32A, 32B, 33A, and 33B; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL; Program in Computing 10A.

#### Transfer Students

To be admitted as Atmospheric, Oceanic, and Environmental Sciences majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of calculus, one year of calculus-based physics with laboratory, one general chemistry course with laboratory for majors, and one C++ programming course.

#### The Major

*Required:* Atmospheric Sciences 101, 102, 103, 104, three additional upper division atmospheric sciences courses selected in consultation with the undergraduate advisers, and two courses from a list of chemistry, mathematics, and physics courses selected in consultation with the undergraduate advisers.

Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 20B, 103, Mathematics 115A, 135A, 136, Physics 131, 132; students preparing for graduate studies in upper atmosphere and space physics should take Mathematics 115A, 135A, Physics 110A, 110B, M122; students preparing for graduate studies in atmospheric dynamics and physics should take Atmospheric Sciences 101, CM120, C125, Mathematics 115A, 135A, 136, Physics 131, 132.

### Atmospheric and Oceanic Sciences Minor

The Atmospheric and Oceanic Sciences minor provides a formal vehicle for students specializing in other science fields to pursue interests in the atmospheric and oceanic environment. It is designed to be flexible, recognizing that many topics in this field cross traditional disciplinary boundaries.

To enter the minor, students must have an overall grade-point average of 2.0 or better and must make an appointment with a departmental undergraduate adviser for approval in selecting a coordinated program of courses from within the department and related disciplines. For further information, contact the department at (310) 825-1217.

*Required Courses (28 units):* Seven 4-unit courses, including (1) three from Atmospheric Sciences 101, 102, 103, 104, C110, C115, CM120, C125, 130, M140, C145, C160, C165, C170, 180, C185 and (2) four additional

courses, two of which must be upper division, from any of the above atmospheric sciences courses beyond the minimum three required or from Atmospheric Sciences 2, 3, 6, 10, 190 (must be taken twice), Chemistry and Biochemistry 103, 110A, 110B, 113A, C113B, 114, Earth and Space Sciences 15, Mathematics 115A, 115B, 132, 135A, 135B, 136, 146, 170A, 170B, Organismic Biology, Ecology, and Evolution C109, C119, 122, 123, 147, 148, Physics 110A, 110B, 112, M122, 131, 132, Statistics 110A, 110B. Other relevant courses from related disciplines may be substituted with prior approval of the department.

Groups of courses relevant to specific subareas of atmospheric sciences include (1) *atmospheric chemistry*: Atmospheric Sciences 104, M140, Chemistry and Biochemistry 103, 110A, 110B, C113B, 114; (2) *atmospheric chemistry and biology*: Atmospheric Sciences 101, 104, Organismic Biology, Ecology, and Evolution C109, C119, 122; (3) *atmospheric dynamics*: Atmospheric Sciences 101, 102, C125, Physics 112, 131, 132; (4) *atmospheric dynamics and mathematical modeling*: Atmospheric Sciences 101, C125, 180, Mathematics 115A, 115B, 132, 135A, 135B, 136, 142, 146; (5) *oceanography and biology*: Atmospheric Sciences 101, 103, 104, Organismic Biology, Ecology, and Evolution C109, 123, 147, 148; (6) *upper atmosphere*: Atmospheric Sciences 101, CM120, C125, C170, Physics 110A, 110B, M122.

One course may be taken on a Passed/Not Passed basis; all other minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

#### Graduate Degrees

The Department of Atmospheric Sciences offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Atmospheric Sciences.

#### Admission

For the M.S. and Ph.D. programs, applicants are required to meet University minimum requirements and submit the *UCLA Application for Graduate Admission*, the department does not require an additional application. Three letters of recommendation and scores on the

Graduate Record Examination (GRE) General Test are required. In addition to applicants who hold a bachelor's degree in meteorology or atmospheric sciences, those with a degree in related disciplines, such as astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics, are also encouraged to apply. Programs of study are arranged through consultation between the students and the department's graduate advisers, and considerable flexibility is allowed to take maximum advantage of the previous education of students. For departmental brochures and information, write to the department.

### Master's Degree

For areas of specialization, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition process. A total of nine courses, five at the graduate level, is required.

### Doctoral Degree

Areas of specialization include dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

For students entering the department with an M.S. degree, there are no specific course requirements other than a formal seminar course. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background in order to help them pass the comprehensive examination.

Written and oral qualifying examinations are required. Students who select the M.S. comprehensive examination plan, which also serves as the written qualifying examination for the Ph.D., in addition must take an in-depth oral examination in their area of research specialization.

Following successful completion of the examinations, students take the University Oral Qualifying Examination, which covers the selected dissertation topic and related areas.

## Atmospheric Sciences

### Lower Division Courses

**1. Introduction to Weather Maps and Weather Forecasting.** (4) Lecture, three hours. Introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include structure of the National Weather Service and services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.

**2. Air Pollution.** (4) Lecture, three hours; discussion, one hour. Causes and effects of high concentrations of pollution in the atmosphere. Topics include nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution.

**2E. Air Pollution. (5)** Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 2; discussion section focuses on intersection of science and policy for issues in local, regional, and global air pollution; use of case-study approach and participation of experts from social, health, and life sciences in class discussions. Letter (majors) or P/NP or letter (nonmajors) grading.

**3. Introduction to the Atmospheric Environment.**

**(4)** Lecture, three hours; discussion, one hour. Nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornadoes and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; ionosphere and auroras; causes of air pollution; proposed methods and status of weather modification.

**3A. Introduction to the Atmospheric Environment.**

**(5)** Lecture, three hours; discussion, three hours. Enforced prerequisite: Physics 1B. Course for majors parallel to course 3; discussion section includes use of calculus. Discussion topics include atmospheric thermodynamics, extratropical synoptic-scale disturbances, atmospheric aerosol and microphysical processes, clouds and storms, radiative processes, atmospheric dynamics. Letter grading.

**3E. Introduction to the Atmospheric Environment.**

**(5)** Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 3; discussion section emphasizes environmental aspects of atmospheric phenomena, with focus on scientific issues of severe weather and climate change and particular attention to those topics that are relevant to policy issues. Letter (majors) or P/NP or letter (nonmajors) grading.

**4. California Weather and Climate. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisite: course 3 or 3A. Sequel to course 3 dealing in greater detail with atmospheric phenomena relevant to the weather of California, and nature of weather and climate of various regions of the state. Topics include extratropical cyclones and fronts, thunderstorms, severe weather, sea and land breezes, Santa Ana winds, low-level temperature inversions, air pollution, climate change, and discussion of present weather.

**5. Climates of Other Worlds. (4)** Lecture, three hours; discussion, one hour. Introduction to atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. Elementary description of origin and evolution of atmospheres on the planets. Climates on the planets, conditions necessary for evolution of life, and its resulting effect on planetary environment.

**6. Climate and Climatic Change. (4)** Lecture, three hours; discussion, one hour. Introduction to physical causes of climate, classification of climate, and global distribution of climate types. Description of climate changes over time scales ranging from lifetime of Earth to el niño events. Discussion of causes of climatic change (e.g., long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in Earth's orbit, changes in atmospheric composition, volcanoes, anthropogenic changes such as increased CO<sub>x</sub> and nuclear war). State of the art in modeling and predicting climate.

**6A. Climate and Climatic Change. (5)** Lecture, three hours; discussion, three hours. Enforced prerequisite: Physics 1B. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction. Letter grading.

**6E. Climate and Climatic Change. (5)** Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 6; discussion section places scientific and technological aspects of climate and climate change in context of societal impacts of climate variations. Discussion of modern methods used to predict climate change and their impact. Letter (majors) or P/NP or letter (nonmajors) grading.

**8. Clouds, Rain, and Storms. (4)** Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric cloud organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting.

**10. Introduction to the Earth System. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Overview of Earth as a system of distinct, yet connected, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Effects of biological processes in shaping the physical environment. Mechanisms that drive climate of Earth and that have produced a protective ozone shield around the planet. Exploration of possibility of technological solutions to global pollution problems.

**88. Lower Division Seminar. (4)** Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/ NP or letter grading.

## Upper Division Courses

**M100. Earth and Its Environment. (4)** (Same as Environment M111.) Lecture, three hours. Overview of Earth as system of distinct, yet intimately related, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Survey of history of Earth and of life on Earth, particularly in relation to evolution of physical world. Consideration of possibility of technological solutions to global environmental problems using knowledge gained during course. Letter grading.

**101. Fundamentals of Atmospheric Dynamics and Thermodynamics. (5)** (Formerly numbered 104A, 104B, C142.) Lecture, four hours; discussion, one hour. Requisites: Mathematics 3B or 31B, Physics 1B or 6B. Recommended: course 3. Introduction to atmospheric environment, with emphasis on thermodynamics, dynamics, and structure of atmosphere. Laws of thermodynamics; work, heat, and cyclic processes. Adiabatic processes, moisture, and atmospheric stability. Hydrostatic balance. Fundamental equations of motion, with applications to atmospheric flow. Circulation and vorticity. Letter grading.

**102. Climate Change and Climate Modeling. (4)** Lecture, three hours. Requisites: Mathematics 3C or 32A, Physics 1C or 6C. Global environmental issues in climate change due to human activities or natural climate variations. Quantitative introduction to new science of climate modeling to understand and predict these changes. Heat balance of Earth and Greenhouse effect. Physical processes in climate system. Atmospheric and oceanic circulation. El niño and year-to-year climate prediction. P/ NP or letter grading.

**103. Physical Oceanography. (4)** (Formerly numbered 143.) Lecture, three hours; discussion, one hour. Requisite: Mathematics 3B or 31B. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Observations of temperature, salinity, density, and currents. Methods. Wind-driven and geostrophic currents. California Current and Gulf Stream. Internal waves. Surface waves and tides. Air/sea interactions. Coastal upwelling. Biological/physical interactions. El niño. Role of ocean in climate and global change. Santa Monica Bay field trip. Letter grading.

**104. Fundamentals of Air and Water Pollution. (4)** (Formerly numbered 2A, 144.) Lecture, three hours; discussion, one hour. Requisite: Chemistry 20B. Chemistry and physics of air and water pollution, including photochemistry, acid rain, air pollution meteorology and dispersion, groundwater and surface water pollution, chemical cycling, air/water interface, global atmospheric change. Letter grading.

**M105. Introduction to Chemical Oceanography. (4)** (Same as Organismic Biology M139.) Lecture, three hours. Introductory course for physical sciences, life sciences, and engineering majors interested in oceanic environment. Chemical composition of oceans and nature of physical, chemical, and biological processes governing this composition in the past and present. Cycles of major and minor oceanic constituents, with focus on those that are most important for life (i.e., carbon, nitrogen, phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes. Letter grading.

**C110. Advanced Dynamic and Synoptic Meteorology. (6)** (Formerly numbered 104C, C105.) Laboratory, six hours. Requisite: course 101. Weather map analysis, thermodynamic diagrams, satellite interpretation, severe weather forecasting, isentropic analysis, frontogenesis, quasi-geostrophic omega equation. Concurrently scheduled with course C227. P/ NP or letter grading.

**C115. Mesometeorology. (4)** Lecture, three hours. Requisite: course 101. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. Concurrently scheduled with course C228. P/ NP or letter grading.

**CM120. Introduction to Fluid Dynamics. (4)** (Formerly numbered CM140.) (Same as Earth and Space Sciences M140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course C200A. Letter grading.

**C125. Introduction to Geophysical Fluid Dynamics. (4)** (Formerly numbered C141.) Lecture, three hours. Requisite: Physics 131. Recommended: course CM120. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C201A. Letter grading.

**130. Circulation of Santa Monica Basin. (4)** (Formerly numbered 147.) Lecture, four hours. Enforced prerequisite: course 103. Design and construction of physical oceanographic measurement program to describe large-scale geostrophic circulation in Santa Monica Basin, which has depths as large as 1,000 meters and extends 50 kilometers offshore from Los Angeles. Letter grading.

**M140. Environmental Chemistry Laboratory. (4)** (Formerly numbered M151.) (Same as Chemistry M104.) Lecture, two hours; laboratory, three hours. Requisite: Chemistry 20B. Laboratory experience for students who wish to pursue a career in environmental science. Essential laboratory procedures to be performed in context of timely environmental issues involving smog formation, acid rain, and ozone depletion. Hands-on experience using scientific instruments and analytical techniques appropriate for environmental assessment. P/ NP or letter grading.

**C145. Microphysics of Clouds, Precipitation, and Aerosols. (4)** (Formerly numbered C152.) Lecture, three hours; discussion, one hour. Requisites: Physics 1A, 1B, and 1C, or 6A and 6B. Theoretical foundation combined with application and observation data. Topics include cloud formation and structure; condensation processes; thermodynamic equilibrium; nucleation; aerosol processes — formation, diffusion, sedimentation, condensation; precipitation; and thunderstorms. Concurrently scheduled with course C203B. Letter grading.

**C160. Remote Sensing. (4)** (Formerly numbered 160.) Lecture, three hours. Requisite: Physics 1C or 6B. Theory and techniques of remote sensing; atmospheric spectroscopy; methods based on scattering, absorption, and extinction; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters and trace constituents; remote sensing of surfaces and biosphere; remote sensing of planetary atmospheres. Concurrently scheduled with course C240B. P/ NP or letter grading.

**C165. Atmospheric Radiation. (4)** Lecture, three hours. Requisite: Physics 1C or 6B. Principles of radiative transfer. Absorption, emission, and scattering processes. Transfer of solar and thermal infrared radiation in the atmosphere. Radiation and climate. Radiation and ozone formation. Applications of radiation principles to remote sensing. Concurrently scheduled with course C203C. Letter grading.

**C170. Introduction to Solar System Plasmas. (4)** (Formerly numbered C154.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 33A, Physics 1C. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C205A. Letter grading.

**180. Numerical Methods in Atmospheric Sciences. (4)** (Formerly numbered 161.) Lecture, three hours; discussion, one hour. Preparation: one course in C or FORTRAN programming. Requisite: Mathematics 33B. Survey of numerical methods employed in atmospheric and related sciences: theory, application, and programming. Letter grading.

**C185. Statistical Methods for Physical Sciences. (4)** (Formerly numbered C162.) Lecture, three hours; discussion, one hour. Designed for junior/senior departmental majors. Statistical framework for data analysis in fields of atmospheric sciences, astronomy, geology, and chemistry, depending on class composition. Presentation of popular techniques in all fields, with emphasis on applications and data, not theory, although some understanding of theory is needed. Concurrently scheduled with course CM213. P/NP or letter grading.

**190. Operational Meteorology. (2)** (Formerly numbered 198.) Laboratory, six hours. Requisite: course C110. Limited to junior/senior atmospheric sciences majors. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations. Letter grading.

**195. Senior Paper. (4)** Limited to senior atmospheric sciences majors. Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major. May be used for writing honors thesis.

**199. Special Studies in Meteorology. (2 or 4)** Special individual studies.

## Graduate Courses

**C200A. Introduction to Fluid Dynamics. (4)** Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course CM120. Letter grading.

**C201A. Introduction to Geophysical Fluid Dynamics. (4)** Lecture, three hours. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C125. Letter grading.

**201B. Atmospheric Wave Motions. (4)** Lecture, three hours. Requisite: course C125 or C201A. Wave motions in a compressible, stratified, and rotating atmosphere. Acoustic and gravity waves, anelastic and quasi-static approximations. Kelvin/Helmholtz instability. Quasi-static oscillations of a planetary atmosphere. Quasi-geostrophic motions. Baroclinic and barotropic instabilities. Propagation of planetary waves. Letter grading.

**201C. Introduction to Atmospheric Turbulence and Convection. (4)** Lecture, three hours. Requisite: course C200A. Small-scale nonhydrostatic motions in the atmosphere. Introduction to turbulence and thermal convection. Planetary boundary layer, effects of moisture on atmospheric motions, theory of moist convection, cumulus convection.

**M203A. Introduction to Atmospheric Chemistry. (4)** (Same as Civil Engineering M262A.) Lecture, three hours. Requisite for undergraduates: Chemistry 20B. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. S/U or letter grading.

**C203B. Microphysics of Clouds, Precipitation, and Aerosols. (4)** Lecture, three hours; discussion, one hour. Theoretical foundation combined with application and observation data. Topics include cloud formation and structure; condensation processes; thermodynamic equilibrium; nucleation; aerosol processes — formation, diffusion, sedimentation, condensation; precipitation; and thunderstorms. Concurrently scheduled with course C145. Letter grading.

**C203C. Atmospheric Radiation. (4)** (Formerly numbered 203C.) Lecture, three hours. Principles of radiative transfer. Absorption, emission, and scattering processes. Transfer of solar and thermal infrared radiation in the atmosphere. Radiation and climate. Radiation and ozone formation. Applications of radiation principles to remote sensing. Concurrently scheduled with course C165. Letter grading.

**C205A. Introduction to Solar System Plasmas. (4)** Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C170. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**205B. Introduction to Solar-Terrestrial Physics. (4)** Lecture, three hours; discussion, one hour. Solar, interplanetary, magnetospheric, ionospheric, auroral, geomagnetic phenomenological and theoretical background for studies in space physics. Contextual understanding and literacy in space physics terminology provided. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**205C. Planetary Upper Atmospheres. (4)** Lecture, three hours; discussion, one hour. Aeronomy of upper atmospheres of Earth and other planets and some of their satellites — thermospheric structure and morphology, circulations, and disturbances; ionospheres as collisional and magnetized (unmagnetized) plasmas: currents, drifts, and instabilities. Examples of upper atmospheric interaction with lower atmosphere and magnetosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

## Dynamic and Synoptic Meteorology

**210. Dynamics of Planetary Circulations. (4)** Lecture, three hours. Requisite: course C201A. Mean atmospheric circulation and its low-frequency variability. Persistent anomalies and multiple flow regimes. Vacillation in laboratory models of atmospheric flows and intraseasonal oscillations. Wind-driven ocean circulation and its interannual variability. Hierarchical modeling of atmospheric and oceanic flows. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**212A. Numerical Methods in Geophysical Fluid Dynamics. (4)** Lecture, three hours. Requisite or corequisite: course C201A. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite-difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Nonlinear shallow-water equation model. Spectral methods. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**212B. Numerical Modeling of the Atmosphere I. (4)** Lecture, three hours. Requisites: courses 201B, 212A. Dynamics of numerical weather prediction and climate models and their computational design. Basic governing equations. Vertical and horizontal coordinates. Quasi-geostrophic and balanced models. Shallow-water equation model. Three-dimensional primitive equation models. Limited-area modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**212C. Numerical Modeling of the Atmosphere II. (4)** Lecture, three hours. Requisite: course 201C. Formulation of physical processes in numerical weather prediction and climate models. Planetary boundary layer processes. Turbulence closure models. Condensation processes. Parameterization of moist-convective processes. Cloudiness parameterization. Parameterization of gravity wave drag. S/U grading.

**CM213. Statistical Methods for Physical Sciences. (4)** (Formerly numbered C213.) (Same as Statistics M252.) Lecture, three hours; discussion, one hour. Designed for graduate astronomy, atmospheric sciences, chemistry, and geology students. Statistical framework for data analysis in fields of atmospheric sciences, astronomy, geology, and chemistry, depending on class composition. Presentation of popular techniques in all fields, with emphasis on applications and data, not theory, although some understanding of theory is needed. Concurrently scheduled with course C185. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**214. Theoretical Climatic Dynamics. (4)** Lecture, three hours. Radiative transfer and energy-balance models (EBMs). Multiple equilibrium climates and their stability. Coupled EBMs of the atmosphere and oceans. Climatic history of our planet. Continuum mechanics of ice sheets and mantle. Oscillatory models of Quaternary glacial cycles. Transitions from equilibrium to periodic and aperiodic climate behavior. Climatic predictability. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**215. Ocean Circulation. (4)** Lecture, three hours. Requisites: courses C200A, C201A. Phenomena, theory, and modeling of ocean circulations with global to regional scope. Circulation types include thermohaline and wind-driven currents. Examination of relationships between ocean circulations and smaller-scale motions, atmospheric climate, and biogeochemical transport. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**216A. Tropical Motions with Moist Processes. (4)** Lecture, three hours. Requisite: course 201C. Cumulus convection and the boundary layer in the tropics. Cloud clusters and mesoscale convection systems. Interaction of cumulus convection with large-scale environment. Tropical cyclones. Monsoon meteorology. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**216B. Wave Motions in the Tropical Atmosphere. (4)** Lecture, three hours. Requisite: course 201B. Basic theory of equatorially trapped waves. Observations of tropical wave disturbances. Generation mechanisms of tropical waves. Tropical 30-50 day oscillation. Quasi-biennial and semiannual oscillations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**218. Dynamics of the Atmosphere/Ocean System. (4)** Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air/sea interactions. Effects of oceans on climate. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**220. Dynamics of the Middle Atmosphere. (4)** Lecture, three hours. Requisite: course C201A. Structure and composition of the middle atmosphere. Waves in the middle atmosphere, including tides, planetary waves, and gravity waves. Quasi-biennial oscillations. Stratospheric sudden warmings. Semiannual oscillations. Wave-mean flow interactions. Interactions between middle and lower atmosphere. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**221. Geophysical Turbulence. (4)** Lecture, three hours. Requisites: courses C200A, C201A. Phenomena, theory, and modeling of turbulence in Earth's oceans and atmosphere — from fine structure to planetary scale motions. Regimes of turbulence include homogeneous flows in two and three dimensions, shear flows, convection, stably stratified flows, and geostrophic motions. Examination of relationships between turbulence and its transport effects on general circulations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**224A. Atmospheric Turbulence. (4)** Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**M224B. Atmospheric Diffusion and Air Pollution. (4)** (Same as Civil Engineering M262B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**C227. Advanced Dynamic and Synoptic Meteorology. (6)** Laboratory, six hours. Requisite: course 101. Weather map analysis, thermodynamic diagrams, satellite interpretation, severe weather forecasting, isentropic analysis, frontogenesis, quasi-geostrophic omega equation. Concurrently scheduled with course C110. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**C228. Mesometeorology. (4)** (Formerly numbered 228.) Lecture, three hours. Requisite: course 101. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. Concurrently scheduled with course C115. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**229. Mesoscale Modeling. (4)** Lecture, three hours. Requisites: courses 201C, C228. Numerical and analytical modeling of convective and mesoscale motions, from shallow heat sources to large complex systems. Model frameworks, assumptions, parameterizations, and solution techniques. Role of modeling efforts in understanding dynamic structure and behavior of systems. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

## Atmospheric Physics and Chemistry

**230A. Atmospheric Chemistry I. (4)** Lecture, three hours. Requisite: course M203A. Photochemistry of troposphere; physical chemistry of surfaces and solutions; precipitation chemistry and acid rain; atmospheric organic chemistry; regional and global biogeochemical cycles; current issues in global change. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**230B. Atmospheric Chemistry II. (4)** Lecture, three hours. Requisite: course M203A. Photochemistry of stratosphere and mesosphere; basic ionospheric processes; stratospheric pollution and the ozone layer; physical chemistry of upper atmosphere clouds and aerosols; comparative photochemistry of planetary atmospheres; observational techniques and results. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**232. Chemical Transport Modeling. (4)** Lecture, three hours. Requisites: courses M203A, 230A, 230B. Equations of tracer transport and chemical kinetics modeling in three dimensions; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**234A. Cloud and Precipitation Physics I. (4)** Lecture, three hours. Requisite: course C203B. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**234B. Cloud and Precipitation Physics II. (4)** Lecture, three hours. Requisite: course 234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in a viscous medium; hydrodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**M235. Ocean Biogeochemical Dynamics and Climate. (4)** (Same as Organismic Biology M238.) Lecture, three hours. Interaction of ocean biogeochemical cycles with physical climate system. Biogeochemical processes controlling carbon dioxide and oxygen in oceans and atmosphere over time-scales from a few million years to a few years. Anthropogenic perturbation of global carbon cycle and climate. Response of ocean ecosystems to past and future global changes. Use of isotopes to study ocean biogeochemical cycles and climate. Interactions between biogeochemical cycles on land and in ocean. Letter grading.

**240A. Radar Meteorology. (4)** Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying size distributions of cloud and precipitation particles, precipitation intensity and amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squall lines, and fronts; clear air echoes. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**C240B. Remote Sensing. (4)** (Formerly numbered 240B.) Lecture, three hours. Requisites: Physics 1C or 6B. Theory and techniques of remote sensing; atmospheric spectroscopy; methods based on scattering, absorption, and extinction; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters and trace constituents; remote sensing of surfaces and biosphere; remote sensing of planetary atmospheres. Concurrently scheduled with course C160. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

**244. Methods of Radiative Transfer. (4)** Lecture, three hours; laboratory, one hour. Requisites: courses C203C, C240B. Analytical and numerical methods of radiative transfer, pure scattering atmospheres, and Chandrasekhar's solution; discrete ordinates; n-stream representations; exponential sums; Monte Carlo techniques and three-dimensional problems; computational laboratory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

## Upper Atmosphere and Space Physics

**250A. Solar System Magnetohydrodynamics. (4)** Lecture, three hours. Requisite: course C205A. Derivation of MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to statics and dynamics of solar wind and planetary magnetospheres and to solar wind/magnetosphere/ionosphere coupling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**250B. Solar System Microscopic Plasma Processes. (4)** Lecture, three hours. Requisite: course C205A. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electrostatic and electromagnetic waves; introduction to resonant interaction between charged particles and plasma waves. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**256. Ionospheric Electrodynamics. (4)** Lecture, three hours. Ionospheric structure, currents, and electric fields; equatorial and high-latitude ionospheres; ionospheric control of magnetospheric phenomena. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**257. Radiation Belt Plasma Physics. (4)** Lecture, three hours. Requisite: course 250B. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for source, loss, and transport of energetic radiation belt particles. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**258. Sources and Losses of Magnetospheric Plasma. (4)** Lecture, three hours. Transfer of plasma across magnetopause, sources for magnetotail, ionospheric plasma flow to magnetosphere, precipitation of magnetospheric particles, plasmasphere, and ring current. S/U or letter grading.

**259. Space Weather. (4)** Lecture, three hours. Identification, description, and theories for major disturbances in magnetosphere/ionosphere/thermosphere system. Storms, substorms, convection bays, and other disturbances. Connections to interplanetary conditions, particle injection and precipitation, currents and fields. S/U or letter grading.

## Special Studies

**270. Seminar: Atmospheric Sciences. (2)** Seminar, one hour. May be repeated for credit. S/U or letter grading.

**271. Seminar: Atmospheric Dynamics. (2)** Seminar, one hour. May be repeated for credit. S/U or letter grading.

**M272A-M272B-M272C. Seminars: Climate Dynamics. (2 to 4 each)** (Same as Earth and Space Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

**273. Seminar: Atmospheric Physics. (2)** Seminar, one hour. May be repeated for credit. S/U or letter grading.

**274. Seminar: Atmospheric Chemistry. (2)** Seminar, one hour. May be repeated for credit. S/U or letter grading.

**M275A-M275B-M275C. Seminars: Space Physics. (2-2-2)** (Same as Earth and Space Sciences M288A-M288B-M288C.) Seminar, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

**276. Seminar: Mesoscale Processes. (2)** Seminar, one hour. Selected topics of current research interest in convection, extratropical cyclones, and fronts. May be repeated for credit. S/U or letter grading.

**281. Special Topics in Dynamic Meteorology. (2 to 4)** Individual meetings with instructor to be arranged. Content varies from year to year. S/U grading.

**283. Special Topics in Atmospheric Physics. (2 to 4)** Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

**284. Special Topics in Atmospheric Chemistry. (2 to 4)** Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

**285. Special Topics in Solar Planetary Relations. (2 to 4)** Individual meetings with instructor to be arranged. Selected topics of current research interest in solar wind, magnetospheric, or ionospheric physics.

**296A-296L. Advanced Topics in Atmospheric Sciences. (2 each)** Discussion, two hours. Advanced study and analysis of current topics in atmospheric sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading:

**296A.** Numerical Modeling of the Atmosphere.  
**296B.** Synoptic and Mesoscale Meteorology.  
**296C.** Numerical Mesoscale Modeling.  
**296D.** Climate Dynamics.  
**296E.** Numerical Modeling of the Atmosphere and Ocean.

**296F.** Hierarchical Modeling of Ocean/Atmosphere System.

**296G.** Upper Atmosphere and Space Physics.

**296H.** Recent Advances in Atmospheric Chemistry.

**296I.** Upper Atmospheric Dynamics.

**296J.** Experimental Mesoscale Meteorology.

**296K.** Tropical Meteorology.

**296L.** Geophysical Fluid Dynamics, Oceanography, and Climate.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Studies for Graduate Students. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Comprehensive Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

Raymond Deshaies

### Academic Coordinator

Eryn Ujita Lee, Ph.D.

## Scope and Objectives

The biological chemistry graduate program prepares students for careers as independent research scientists and scholars. Laboratory research is the central element. Biological chemistry has grown to include studies of cellular, molecular, and developmental biology, molecular genetics and genetic engineering, and many aspects of the health sciences. The research activities of the department include these areas as well as the "classic" topics of metabolism, enzymology, and biomolecular structure. Courses and seminar programs are designed to provide students with the necessary background and approach to encourage their continuing growth in these rapidly changing areas of science.

## BIOLOGICAL CHEMISTRY

*School of Medicine*

UCLA  
 33-257 Center for the Health Sciences  
 Box 951737  
 Los Angeles, CA 90095-1737  
 (310) 825-6545  
<http://www.medsch.ucla.edu/som/biolchem/>

Interaction with other graduate programs provides access to scientists in a variety of related disciplines. Through its primary affiliation with the School of Medicine, the department is also involved in the basic education of students who will be physicians, dentists, and other health professionals. Many of these students become involved in laboratory research in the department. In part because of this breadth of experience students find careers in many aspects of basic and applied scientific research and education. The department emphasizes study for the Ph.D., but candidates for the M.S. degree may be accepted under special circumstances.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Biological Chemistry offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biological Chemistry.

## Admission

### M.S./Ph.D. in Biological Chemistry

The department only rarely and under special circumstances accepts students into the M.S. program.

Students are admitted to the program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences. Information may be obtained from UCLA ACCESS, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu). Under special circumstances, the department may admit students directly to the program in the first year.

### M.D./Ph.D. Program

Applicants may apply for the M.D./Ph.D. program by making simultaneous applications for graduate status in the Biological Chemistry Department and for admission to the School of Medicine. Acceptance by both programs is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to what is required to complete separate M.D. and Ph.D. degree programs.

## Master's Degree

The M.S. degree is offered through the comprehensive examination and thesis plans; the latter is allowed only in exceptional situations.

All graduate students must take the first-year ACCESS curriculum. In addition to the core course requirements, students take electives to complete the total of nine courses required for the degree.

## Doctoral Degree

Students are required to take four specified didactic courses and one additional graduate-level course selected according to their preference. Three of the courses are taken in the first year as part of the ACCESS curriculum, which also requires two seminar courses and another core course. First-year students must arrange for at least three rotations in the laboratories of different faculty members to help in the selection of a research adviser through ACCESS. After the first year, students spend most of their time on dissertation research.

Students admitted through ACCESS are required to serve as teaching assistants for two quarters.

Written and oral qualifying examinations are required. Students submit two short research proposals, one an original research proposal not directly related to the dissertation research (which serves as the written examination) and the other a discussion of the proposed dissertation research.

Following completion of the proposals, students take the University Oral Qualifying Examination, the purpose of which is to evaluate students' ability to formulate and defend the proposals.

# Biological Chemistry

## Upper Division Courses

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**M140. Cell Biology: Cell Cycle. (5)** (Same as Molecular, Cell, and Developmental Biology M140.) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L, Life Sciences 3, 4. Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or C139. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion. Letter grading.

**CM153G. Macromolecular Structure. (6)** (Same as Chemistry CM153G and Human Genetics CM153G.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Letter grading.

**CM159A. Mechanisms in Regulation of Transcription I. (2)** (Same as Chemistry CM159A.) First five weeks. Lecture, four hours. Requisites: Chemistry 153B, 154. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading.

**CM159B. Mechanisms in Regulation of Transcription II. (2)** (Same as Chemistry CM159B.) Second five weeks. Lecture, four hours. Requisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

**CM169. Cell Structure, Signaling, and Differentiation. (6)** (Same as Human Genetics CM169 and Molecular, Cell, and Developmental Biology CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM267. Letter grading.

**CM178. Molecular Genetics. (6)** (Same as Human Genetics CM178 and Molecular, Cell, and Developmental Biology CM178.) Lecture, five hours. Requisites: Chemistry 153A, 153B, Life Sciences 3, 4, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**195. Current Research in Biological Chemistry. (2)** Limited to juniors/seniors. Personal interview required. Readings, discussion of current research results, and presentation of recent literature on topics under investigation within a research group in biological chemistry. P/NP or letter grading.

**197. Topics in Contemporary Biology. (2)** Seminar, two hours. Designed for undergraduate fellows in Howard Hughes Undergraduate Research Program. Presentation of weekly seminars on research literature in fields of biochemistry and molecular biology. May be repeated for credit. P/NP or letter grading.

**199. Directed Individual Research Studies in Biological Chemistry. (2 to 8)** Laboratory, four to 20 hours. Preparation: submission of written research proposal and consultation with instructor. Limited to juniors/seniors. Individual research projects carried out under direction of a faculty member. P/NP or letter grading.

## Graduate Courses

**201A-201B. Biological Chemistry. (5-5)** Preparation: organic chemistry. Open to nonmedical students with consent of instructor. Primarily for first-year medical students and runs throughout School of Medicine's second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress and S/U grading.

**204. Human Biological Chemistry and Nutrition Laboratory. (3)** Laboratory, four hours. Open to non-medical students with consent of instructor. Experiments illustrating techniques and procedures in medically related biochemistry and nutrition, analysis of experimental results. S/U or letter grading.

**205. Biological Chemistry and Nutrition Lecture (Dental Students). (6)** Lecture, six hours; computer laboratory. Designed for dental students. Biochemical and genetic factors influencing normal and disease states: structure and metabolism of cellular constituents, intermediary metabolism and its regulation, endocrine and neurobiochemical mechanisms, connective tissue/mineralization. Includes computer laboratory and self-instruction on dietary assessment in dentistry.

**220A-220B-220C. Research Laboratory Rotations. (2 to 8 each)** Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in a research project under close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in selection of thesis/research adviser. S/U grading.

**M221. Cellular and Molecular Neurochemistry. (4)** (Same as Neurobiology M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M223. Membrane Molecular Biology. (4)** (Same as Physiology M223.) Lecture, two hours; discussion, two hours. Requisite: course CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

**CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Genetic Control of Development. (4)** (Same as Molecular, Cell, and Developmental Biology M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

**M237. Molecular and Cellular Foundations of Disease. (4)** (Same as Pathology M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

**CM248. Molecular Genetics. (6)** (Same as Human Genetics CM248, Microbiology M248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisite: course CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

**251A-251B-251C. Seminars: Transcriptional Regulation. (2-2-2)** Advanced courses on mechanics of gene transcription in both eukaryotes and prokaryotes intended for students actively working or highly interested in transcription. S/U grading.

**CM253. Macromolecular Structure. (6)** (Same as Chemistry CM253 and Human Genetics CM253.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

**M255. Biological Catalysis. (4)** (Same as Chemistry CM255, Molecular, Cell, and Developmental Biology CM252, and Pharmacology M255.) Requisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level.

**M257. Physical Chemistry of Biological Macromolecules. (2)** (Same as Chemistry M257.) Requisites: Chemistry 110A, 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

**CM259A. Mechanisms in Regulation of Transcription I. (2)** (Same as Chemistry CM259A.) First five weeks. Lecture, four hours. Requisite: course CM253 or CM267. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. S/U or letter grading.

**CM259B. Mechanisms in Regulation of Transcription II. (2)** (Same as Chemistry CM259B.) Second five weeks. Lecture, four hours. Requisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B. S/U or letter grading.

**M263. Metabolism and Its Regulation. (4)** (Same as Chemistry M263.) Lecture, three hours. Requisites: courses 201A and 201B, or Chemistry 153B, 153C, or 156, and 110A. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

**M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics. (2-2-2)** (Same as Chemistry M264A-M264B-M264C and Microbiology M264A-M264B-M264C.) Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

**M266A-M266B-M266C. Seminars: Molecular Embryology. (2-2-2)** (Same as Molecular, Cell, and Developmental Biology M266A-M266B-M266C.) Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

**CM267. Cell Structure, Signaling, and Differentiation. (6)** (Same as Chemistry M267, Human Genetics CM267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study and Research. (2 to 12)** Hours to be arranged. S/U grading.

**597. Preparation for Examinations. (2 to 4)** Individual study for Ph.D. qualifying examinations or M.S. comprehensive examination. S/U grading.

**598. Preparation of M.S. Thesis. (4)** Preparation of research data and writing of M.S. thesis. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 12)** Preparation of research data and writing of Ph.D. dissertation. S/U grading.

Karim F. Hirji, Ph.D.

## Scope and Objectives

As biology advances rapidly in quantitative research methods, both the need for and possibility of closely associated theoretical research increases. On numerous medical and medical science frontiers — such as genetics, molecular biology, oncology, pharmacology, neurosciences, and physiology — biomathematics is contributing both in its basic research and the development of specialized computer software to support investigation and health care. UCLA has one of the few departments in this relatively new, rapidly evolving field.

The Department of Biomathematics welcomes both undergraduate and graduate students in other majors to its courses in biomedical computing, modeling, and statistics. Premedical majors with mathematical/computer interests can receive early guidance toward an M.D./Ph.D. program in Biomathematics. The department is responsible for statistical and biomathematical training in the medical curriculum.

The department's orientation is away from abstract modeling and toward theoretical research vital to the advancement of current biomedical research frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and for the mathematical and computing skills required to contend realistically with complex phenomena encountered in biology and medicine. The art of biomathematical research is developed individually from the first year on. The master's program adapts to the various needs of researchers desiring supplemental biomathematical training, people preparing to provide methodological support to researchers in biology or medicine, or students pursuing a stepwise approach to graduate training in biomathematics.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Biomathematics offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biomathematics.

## Admission

High academic achievement in one scientific or mathematical field is required for admission. It is not necessary for applicants to be proficient in both mathematics and biology, although some prior preparation in both fields is desirable. The General and Subject Tests of the Graduate Record Examination (GRE) are recommended. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the *UCLA Application for Graduate Admission*, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for

the departmental forms, should be sent to the Chair, Graduate Admissions Committee, Department of Biomathematics.

## Master's Degree

The M.S. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. Students must complete a minimum of 36 units of coursework, of which 20 units must be at the graduate level.

## Doctoral Degree

Students must complete the requirements for a field of special emphasis in biology. Approved fields of special emphasis for which courses of study have been developed include genetics, immunology, molecular biology, neurosciences, pharmacology, and physiology. Others may be added in response to requests from students.

Students complete a group of four core courses and an additional 8 units from a specific list of courses. Five graduate courses in applied mathematics are required, with two substitutions possible. There is no formal requirement in biology beyond preparation for the field of major biological emphasis. Students should have strength, at the upper division level, in linear algebra, differential equations, probability and statistics, and real and complex analysis. Additional training in biostatistics is highly recommended. Students must be facile programmers and acquainted with numerical methods needed for their area of research. A broad background in biology and biological chemistry is expected, from molecular to organ-system levels. Students with an M.D. may be exempt from the required coursework.

One teaching preceptorship is required. Students participate fully in the planning and delivery of one course in biomathematics or a related subject.

Written and oral qualifying examinations are required. The written comprehensive examination tests competence in biomathematics. The written qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in the field.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which critically examines their proposed dissertation work and explores the strength and integration of their biomathematical, mathematical, and biological research knowledge in the intended area of research.

# Biomathematics

## Upper Division Courses

**106. Introduction to Cellular Modeling. (4)** Lecture, four hours; computer laboratory, two hours. Preparation: some computer programming. Requisite: Mathematics 32A. Designed for upper division science majors and biomedical graduate students. Introduction to modeling cells and cell systems, including intracellular biochemical networks, applications to cancer research. How to develop one's own computer models using IMSL mathematics subroutines.

**108. Introduction to Modeling in Neurobiology. (4)** Lecture, four hours; computer laboratory, two hours. Preparation: some computer programming. Requisite: Mathematics 32A. Designed for upper division science majors and biomedical graduate students. Survey of wide variety of topics in neurobiological modeling, current neuronal modeling systems. Development of skills to formulate and program one's own studies using IMSL mathematics subroutines. P/NP or letter grading.

**C108C. Introduction to Neural Networks: Modeling and Applications. (4)** Lecture, three hours. Preparation: calculus. Introduction to theory of neural networks and their applications. Survey of current neural-network models of cognitive functions. Concurrently scheduled with course CM208C. P/NP or letter grading.

**110. Elements of Biomathematics. (4)** Lecture, three hours; laboratory, three hours. Preparation: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology.

**M153A. Introduction to Regression Analysis. (4)** (Same as Biostatistics M153A and Statistics M120A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, Statistics 100B. Linear regression, diagnostics and model building, general linear model theory, analysis of variance and covariance. Full integration of theory and software. P/NP or letter grading.

**M153B. Introduction to Generalized Linear Models. (4)** (Same as Biostatistics M153B and Statistics M120B.) Lecture, three hours; discussion, one hour. Requisite: course M153A. Nonlinear regression, exponential family, generalized linear models, categorical data analysis, statistical software. P/NP or letter grading.

**160. Introductory Biomathematics for Medical and Biological Research. (4)** Lecture, four hours; discussion, 90 minutes. Elementary statistics course that focuses on statistical concepts and critiques the literature, with emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use the computer themselves. Topics include descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, article interpretation.

**170A. Computer-Based Introductory Biomathematics for Medical and Biological Experimenters. (4)** Lecture, four hours; discussion, 90 minutes. Intensive elementary statistics course emphasizing design of experiments and analysis of data using statistical packages. Statistical topics similar to course 160 — descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination — but students also shown how to use the computer and run statistical software packages. Practical aspects of data collection and cleaning.

**170B. Statistical and Mathematical Modeling in Medical and Biological Research. (4)** Lecture, four hours; discussion, 90 minutes. Second course in biomathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, nonlinear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on the computer, and to analyze previously collected data.

**172. Clinical Trials. (4)** Lecture, three hours; discussion, two hours. Prerequisite: Biostatistics 100C or Statistics 100B. Topics include steps in bringing a possible therapy to clinical use; design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, stratification, and points; ethics of human experimentation; informed consent; three phases of human studies; indications for various types of controls, prognostic factors, survivorship studies, design of prognostic studies; organization of a clinical trial — administration, comparability, protocols, nursing and clinical standards, data collection and management. P/ NP or letter grading.

**190HA-190HB. Honors Research in Biomathematics. (4-4)** Limited to juniors/seniors. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two terms and for a total of at least 8 units. Thesis required.

**199. Special Studies in Biomathematics. (2 to 8)** Limited to juniors/seniors. Special studies in biomathematics, including either reading assignments or laboratory work or both, designed for proper training of students.

## Graduate Courses

**200. Research Frontiers in Biomathematics. (2)** Series of presentations by faculty members on research frontiers in biomathematics. S/U grading.

**201. Deterministic Models in Biology. (4)** Preparation: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models.

**202. Fourier Analysis in Biology. (4)** Preparation: knowledge of calculus, linear algebra, probability. Introduction to theory of Fourier transforms and Fourier series from point of view of generalized functions. Elementary applications to differential equations, quantum mechanics, image reconstruction, X-ray crystallography, branching processes, and time series. Brief review of computational techniques based on fast Fourier transform.

**M203. Stochastic Models in Biology. (4)** (Formerly numbered 203.) (Same as Human Genetics M203.) Lecture, four hours. Prerequisite: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines. S/U or letter grading.

**204. Biomedical Data Analysis. (4)** Quantity and quality of observations have been greatly affected by present-day extensive use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research.

**205. Electric Potential Problems in Membranes, Cells, and Tissues. (4)** Preparation: knowledge of differential equations and electrostatics. Review of electrostatics; potential problems in rectangular, spherical, and cylindrical coordinates; modeling subthreshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; eigenfunction expansions and singular perturbation analysis of intracellular and extracellular potential distribution in spherical and cylindrical cells and syncytia; computation of potential barriers for ions traversing a membrane pore.

**206. Introduction to Mathematical Oncology. (4)** Lecture, four hours; computer laboratory, two hours. Preparation: ordinary partial differential equations, one computer programming course. Deterministic and stochastic modeling of cell metabolism, colony growth, and responses to radio-, chemo-, and immuno-therapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature review. S/U or letter grading.

**M207A. Theoretical Genetic Modeling. (4)** (Formerly numbered 207.) (Same as Biostatistics M237A and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 131A. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

**M207B. Applied Genetic Modeling. (4)** (Same as Biostatistics M237B and Human Genetics M207B.) Lecture, three hours; laboratory, one hour. Preparation: coursework equivalent to Biostatistics 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

**208A. Modeling in Neurobiology for Mathematicians. (4)** Lecture, four hours; laboratory, two hours. Preparation: introductory ordinary partial differential equations, programming experience. Introduction to electrochemical bases for nerve function and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading.

**208B. Modeling in Neurobiology for Biologists. (4)** Lecture, four hours; laboratory, two hours. Preparation: lower division calculus, some elementary programming experience. Introduction to neuronal modeling, including how to formulate models and study them with existing computer software (e.g., NODUS) or one's own simple programs that use IMSL subroutines. Survey of current leading research areas. S/U or letter grading.

**CM208C. Introduction to Neural Networks: Modeling and Applications. (4)** (Same as Psychiatry M209.) Lecture, three hours. Preparation: calculus. Introduction to theory of neural networks and their applications. Survey of current neural-network models of cognitive functions. Concurrently scheduled with course C108C. S/U or letter grading.

**209. Modeling Infectious Diseases. (4)** Lecture, three hours; discussion, one hour. Preparation: calculus. Recommended: experience with ordinary differential equations, linear algebra, and computer programming. How mathematical models can be used to design vaccination and treatment strategies for controlling and eradicating infectious diseases. Integration of empirical studies with theoretical models in lectures. Letter grading.

**211. Tissue and Cell Dynamics. (4)** Lecture, three hours; discussion, one hour. Preparation: knowledge of differential equations to level of course 201, some mathematical modeling, computer programming. In-depth mathematical modeling of problems in tissue and cell dynamics to level of research literature. Analytical and numerical techniques for solving partial differential equations. S/U or letter grading.

**220. Kinetic and Steady State Models in Pharmacology and Physiology. (4)** Recommended preparation: knowledge of linear algebra, differential equations, statistics. Designed for biologists and theoreticians. Modeling and data analysis in pharmacokinetics, enzyme kinetics, and endocrinology. Topics include compartmental and noncompartmental approaches, steady state analysis of transport and binding processes, and optimal experiment design.

**M230. Computed Tomography: Theory and Applications. (4)** (Same as Biomedical Physics M230.) Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

**M231. Statistical Methods for Categorical Data. (4)** (Same as Biostatistics M210.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

**M232. Statistical Analysis of Incomplete Data. (4)** (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

**M234. Applied Bayesian Inference. (4)** (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: Biostatistics 115 (or Statistics 100C), 200A. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

**M260A-M260B. Methodology in Clinical Research I, II. (6-6)** (Same as Medicine M260A-M260B.) Lecture, three hours; discussion, two hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

**M260C. Methodology in Clinical Research III. (2)** (Same as Medicine M260C.) Discussion, four hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U grading.

**M270. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Biomedical Engineering M296B, Computer Science M296B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Prerequisite: course 220 or Computer Science M296A. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

**M271. Statistical Methods in Computational Biology. (4)** (Same as Statistics M254.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Prerequisite: Statistics 100A. Training in probability and statistics for students interested in pursuing research in computational biology, genomics, and bioinformatics. Letter grading.

**273. Stochastic Modeling in Molecular Cellular Biophysics. (4)** Lecture, three hours; discussion, one hour. Prerequisite: Mathematics 170A or equivalent experience in probability, lower division physics, or physical chemistry. Most molecular systems are large collections of molecules; behavior of such a system is stochastic. Mathematical descriptions of biochemical reactions with and without energy dissipation, molecular structures, and biophysical techniques which measure various biological processes. S/U or letter grading.

**M280. Statistical Computing. (4)** (Same as Biostatistics M280 and Statistics M230.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 100C. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

**M281. Survival Analysis. (4)** (Same as Biostatistics M215.) Lecture, three hours; discussion, one hour. Prerequisite: Biostatistics 115 or Statistics 100C. Statistical methods for analysis of survival data. S/U or letter grading.

**M282. Analysis of Repeated Measures Designs. (4)** (Same as Biostatistics M236.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

**M284. Methodology of Clinical Trials. (4)** (Same as Biostatistics M238.) Lecture, three hours; discussion, two hours. Prerequisites: course M281, Biostatistics 200A. Methodological principles of clinical trials, actual practice and principles of trials. Considerable focus on phase two trials and multiclinical phase three trials. Emphasis on major inferential issues. S/U or letter grading.

**596. Directed Individual Study or Research in Biomathematics. (2 to 12)** Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change.

**597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** Individual study. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) S/U grading.

#### Adjunct Professors

Guido Germano, Ph.D. (*Radiological Sciences*)  
John J. Gilman, Ph.D. (*Materials Science and Engineering*)  
Boris Kogan, Ph.D. (*Computer Science*)

#### Adjunct Associate Professor

Vivek Dixit, Ph.D. (*Medicine*)

### Adjunct Assistant Professors

Robert Close, Ph.D. (*Radiological Sciences*)  
Robert J. Greenberg, M.D., Ph.D. (*Electrical Engineering*)  
Imke Schroeder, Ph.D. (*Microbiology and Molecular Genetics*)

## Scope and Objectives

The Biomedical Engineering Interdepartmental Program trains specially qualified engineers and scientists to work on engineering applications in either medicine or biotechnology.

Graduates apply engineering principles to current needs and contribute to future advances in the fields of medicine and biotechnology. Fostering careers in industry or academia, the program offers students the choice of an M.S. or Ph.D. degree in seven distinct fields of biomedical engineering. In addition to selected advanced engineering courses, students are required to take specially designed biomedical engineering courses to ensure a minimal knowledge of the appropriate biological sciences. Students receive practical training via an M.S. or Ph.D. research thesis in biomedical engineering. Faculty members have principal appointments in departments across campus and have well-equipped laboratories for graduate student research projects.

New courses are currently being developed. In the interim, biomedical engineering students take selected courses in other departments. Students should contact the program office for the latest details.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Biomedical Engineering Program offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biomedical Engineering.

## Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

All applicants must submit a statement of purpose relating their reasons for seeking admission, in addition to three letters of reference detailing their academic preparation, industrial or research laboratory training, and potential for future professional development. To apply for the M.S. program, applicants should have a

B.S. degree in engineering, life sciences, or physical sciences, with a grade-point average of no less than 3.0 in the last two years of undergraduate study.

To apply for the Ph.D. program, applicants should meet the requirements for the M.S. with a grade-point average of no less than 3.25.

Meeting the minimum requirements does not guarantee admission; the actual standard for admission is set by the current pool of applicants and is generally much higher. Applicants are encouraged to apply online.

Application forms, including a departmental supplement to the application, may be found at <http://www.bme.ucla.edu> or by writing to Biomedical Engineering, Henry Samueli School of Engineering and Applied Science, 7523 Boelter Hall, UCLA, Box 951600, Los Angeles, CA 90095-1600 or to the Office of the Associate Dean for Academic and Student Affairs, Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601.

**Neuroengineering.** Applicants who wish to enter the field of neuroengineering apply either to the Ph.D. program in Biomedical Engineering or to the Ph.D. program in Neuroscience (see Neuroscience). Applicants must have an undergraduate degree in engineering, physics, chemistry, or one of the life sciences (for example, biology, microbiology and molecular genetics, molecular, cell, and developmental biology, neuroscience, physiology, or psychology).

Engineering students must have taken at least one undergraduate course in biology, one course in chemistry, and a year of physics. Students from nonengineering backgrounds are required to have taken courses in undergraduate calculus, differential equations, and linear algebra, in addition to at least a year of undergraduate courses in each of the following: organic chemistry and biochemistry, physics, and biology. Students lacking one or more requisite courses may be admitted and provided with appropriate coursework or tutorials during the summer before matriculation.

## Master's Degree

For major fields, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. Students specializing in molecular and cellular bioengineering are required to follow the thesis plan. The comprehensive examination is integrated with the comprehensive preliminary examination for the Ph.D. At least nine courses are required, five of which must be graduate courses. Core and elective courses are required for each field. Remedial courses also may be required in instances where the student's academic preparation is insufficient.

## Doctoral Degree

Major fields include bioacoustics, speech, and hearing; biocybernetics; biomechanics, biomaterials, and tissue engineering; biomedical instrumentation; biomedical signal and image processing and bioinformatics; molecular and cellular bioengineering; and neuroengineering (a joint endeavor between the interdepartmental programs in Neuroscience in the School of Medicine and Biomedical Engineering in the Henry Samueli School of Engineering and Applied Science, with the active involvement of scientists and technologists from the Jet Propulsion Laboratory).

Students must complete the coursework for two minor fields of study. At least one minor field of study should be one of the other major fields of the Biomedical Engineering Program. Coursework consists of core and elective courses and is specific to the field. For the written preliminary examination in the major field, Ph.D. students are responsible for the material covered in required courses specified by the field committee. Students should consult *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and the program for specific information on course requirements.

Written and oral qualifying examinations are required. The written qualifying examination is known as the Ph.D. preliminary examination. After mastering a body of knowledge in core courses, students take the examination in the major field, which typically consists of both a written part and an oral part.

After successful completion of the written qualifying examination, students take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research, as well as a review of the dissertation prospectus.

## Biomedical Engineering

### Upper Division Courses

**C101. Introduction to Biomedical Engineering. (4)** (Formerly numbered 101.) Lecture, three hours; laboratory, three hours; outside study, six hours. Designed for physical sciences, life sciences, and engineering students. Introduction to wide scope of biomedical engineering via treatment of selected important individual topics by small team of specialists. Concurrently scheduled with course C201. Letter grading.

**CM102. Human Anatomy for Biomedical Engineers. (4)** (Formerly numbered M102.) (Same as Physiological Science CM102.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Concurrently scheduled with course CM202. Letter grading.

**CM103. Human Physiology for Biomedical Engineers. (4)** (Formerly numbered M103.) (Same as Physiological Science CM103.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Concurrently scheduled with course CM203. Letter grading.

**CM140. Introduction to Biomechanics. (4)** (Formerly numbered M140.) (Same as Mechanical and Aerospace Engineering CM140.) Lecture, four hours; outside study, eight hours. Requisites: Mechanical and Aerospace Engineering 102 (or Civil Engineering 108), 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM240. Letter grading.

**CM145. Molecular Biotechnology for Engineers. (4)** (Same as Chemical Engineering CM145.) Lecture, four hours; outside study, eight hours. Selected topics in molecular biology that form foundation of biotechnology and biomedical industry today. Topics include recombinant DNA technology, molecular research tools, manipulation of gene expression, directed mutagenesis and protein engineering, DNA-based diagnostics and DNA microarrays, antibody and protein-based diagnostics, genomics and bioinformatics, isolation of human genes, gene therapy, and tissue engineering. Concurrently scheduled with course CM245. Letter grading.

**M150L. Introduction to Micromachining and Microelectromechanical Systems Laboratory. (4)** (Same as Electrical Engineering M150L and Mechanical and Aerospace Engineering M180L.) Lecture, three hours; laboratory, four hours; outside study, five hours. Requisites: Electrical Engineering 1 or Physics 1C, Chemistry 20A. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce a variety of MEMS, including microstructures, microsensors, and microactuators. Students fabricate set of basic MEMS structures in hands-on microfabrication laboratory. Letter grading.

**C170. Laser-Tissue Interaction I. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: Electrical Engineering 172, 175, Life Sciences 3, Physics 17. Introduction to different types of laser-tissue interaction, with emphasis on therapeutics and diagnostics applications. Concurrently scheduled with course C270. Letter grading.

**C171. Laser-Tissue Interaction II: Biologic Spectroscopy. (4)** Lecture, four hours; outside study, eight hours. Requisite: course C170. Designed for physical sciences, life sciences, and engineering majors. Introduction to optical spectroscopy principles, design of spectroscopic measurement devices, optical properties of tissues, and fluorescence spectroscopy biological media. Concurrently scheduled with course C271. Letter grading.

**CM180. Introduction to Biomaterials. (4)** (Formerly numbered M180.) (Same as Materials Science CM180.) Lecture, three hours; outside study, nine hours. Requisites: Chemistry 20A, 20B, and 20L, or Materials Science 14. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM280. Letter grading.

**C185. Introduction to Tissue Engineering. (4)** Lecture, three hours; outside study, nine hours. Requisites: course CM102 or CM202, Chemistry 20A, 20B, 20L. Tissue engineering applies principles of biology and physical sciences with engineering approach to regenerate tissues and organs. Guiding principles for proper selection of three basic components for tissue engineering: cells, scaffolds, and molecular signals. Concurrently scheduled with course C285. Letter grading.

**M196A. Introduction to Cybernetics, Biomodeling, and Biomedical Computing. (2)** (Same as Computer Science M196A and Cybernetics M196A.) Lecture, two hours. Requisites: Mathematics 31A, 31B, Program in Computing 10A. Strongly recommended for students with potential interest in biomedical engineering/biocomputing fields or in Cybernetics as a major. Introduction and survey of topics in cybernetics, biomodeling, biocomputing, and related bioengineering disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

**M196B. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Computer Science M196B, Cybernetics M196B, and Medicine M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematic models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

**CM196L. Biomedical Systems/Biocybernetics Research Laboratory. (2 to 4)** (Same as Computer Science CM196L and Cybernetics M196L.) Lecture, two hours; laboratory, two hours. Requisite: course M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course CM296L. Letter grading.

## Graduate Courses

**C201. Introduction to Biomedical Engineering. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Designed for physical sciences, life sciences, and engineering students. Introduction to wide scope of biomedical engineering via treatment of selected important individual topics by small team of specialists. Concurrently scheduled with course C101. Letter grading.

**CM202. Human Anatomy for Biomedical Engineers. (4)** (Same as Physiological Science CM204.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Concurrently scheduled with course CM102. Letter grading.

**CM203. Human Physiology for Biomedical Engineers. (4)** (Same as Physiological Science CM203.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Concurrently scheduled with course CM103. Letter grading.

**M214A. Digital Speech Processing. (4)** (Same as Electrical Engineering M214A.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: Electrical Engineering 113. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms, speech analysis/synthesis. Techniques include linear prediction, filter-bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids. Letter grading.

**M215. Biochemical Reaction Engineering. (4)** (Same as Chemical Engineering CM215.) Lecture, four hours; outside study, eight hours. Requisites: Chemical Engineering 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. Letter grading.

**M217. Biomedical Imaging. (4)** (Same as Electrical Engineering M217.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: Electrical Engineering 114D or 211A. Mathematical principles of medical imaging modalities: X-ray, computed tomography, positron emission tomography, single photon emission computed tomography, magnetic resonance imaging. Topics include basic principles of each imaging system, image reconstruction algorithms, system configurations and their effects on reconstruction algorithms, specialized imaging techniques for specific applications such as flow imaging. Letter grading.

**M225. Bioseparations and Bioprocess Engineering. (4)** (Same as Chemical Engineering CM225.) Lecture, four hours; outside study, eight hours. Requisites: Chemical Engineering 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Letter grading.

**CM240. Introduction to Biomechanics. (4)** (Same as Mechanical and Aerospace Engineering CM240.) Lecture, four hours; outside study, eight hours. Requisites: Civil Engineering 108 or Mechanical and Aerospace Engineering 102, 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM140. Letter grading.

**CM245. Molecular Biotechnology for Engineers. (4)** (Same as Chemical Engineering CM245.) Lecture, four hours; outside study, eight hours. Selected topics in molecular biology that form foundation of biotechnology and biomedical industry today. Topics include recombinant DNA technology, molecular research tools, manipulation of gene expression, directed mutagenesis and protein engineering, DNA-based diagnostics and DNA microarrays, antibody and protein-based diagnostics, genomics and bioinformatics, isolation of human genes, gene therapy, and tissue engineering. Concurrently scheduled with course CM145. Letter grading.

**M248. Introduction to Biological Imaging. (4)** (Same as Biomedical Physics M248 and Pharmacology M248.) Lecture, three hours; laboratory, one hour; outside study, seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories. Letter grading.

**M250A. Microelectromechanical Systems (MEMS) Fabrication. (4)** (Same as Electrical Engineering M250A and Mechanical and Aerospace Engineering M280.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M150L. Advanced discussion of micromachining processes used to construct MEMS. Coverage of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

**M250B. Microelectromechanical Systems (MEMS) Device Physics and Design. (4)** (Same as Electrical Engineering M250B and Mechanical and Aerospace Engineering M282.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M250A. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

**M259H. Biomechanics of Traumatic Injury. (4)** (Same as Environmental Health Sciences M259H.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Introduction to applied biomechanics of accidental injury causation and prevention; discussion of mechanisms of injury that result in bone and soft tissue trauma; discussion of mechanisms of healing for effective rehabilitation after traumatic injury. Letter grading.

**260. Neuroengineering. (4)** Lecture, three hours; outside study, nine hours. Requisites: Mathematics 32A, Molecular, Cell, and Developmental Biology 100. Recommended: Molecular, Cell, and Developmental Biology 171. Introduction to principles and technologies of neural recording and stimulation. Neurophysiology; clinical electrophysiology (EEG, evoked potentials, inverse problem, preoperative brain recording), extracellular microelectrodes and recording (field potentials and single units), chronic recording with extracellular electrodes; electrode biocompatibility, tissue damage, electrode and cable survival; intracellular recording and glass pipettes electrodes, iontophoresis; imaging neural activity (Ca imaging, voltage-sensitive dyes), intrinsic optical imaging; MRI, fMRI. Letter grading.

**C270. Laser-Tissue Interaction I. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: Electrical Engineering 172, 175, Life Sciences 3, Physics 17. Introduction to different types of laser-tissue interaction, with emphasis on therapeutics and diagnostics applications. Concurrently scheduled with course C170. Letter grading.

**C271. Laser-Tissue Interaction II: Biologic Spectroscopy. (4)** Lecture, four hours; outside study, eight hours. Requisite: course C270. Designed for physical sciences, life sciences, and engineering majors. Introduction to optical spectroscopy principles, design of spectroscopic measurement devices, optical properties of tissues, and fluorescence spectroscopy biologic media. Concurrently scheduled with course C171. Letter grading.

**CM280. Introduction to Biomaterials. (4)** (Same as Materials Science CM280.) Lecture, three hours; outside study, nine hours. Requisites: Chemistry 20A, 20B, and 20L, or Materials Science 14. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM180. Letter grading.

**282. Biomaterial Interfaces. (4)** Lecture, four hours; laboratory, eight hours. Requisite: course CM180 or CM280. Function, utility, and biocompatibility of biomaterials depend critically on their surface and interfacial properties. Discussion of morphology and composition of biomaterials and nanoscales, mesoscales, and macroscales, techniques for characterizing structure and properties of biomaterial interfaces, and methods for designing and fabricating biomaterials with prescribed structure and properties in vitro and in vivo. Letter grading.

**C285. Introduction to Tissue Engineering. (4)** Lecture, three hours; outside study, nine hours. Requisites: course CM102 or CM202, Chemistry 20A, 20B, 20L. Tissue engineering applies principles of biology and physical sciences with engineering approach to regenerate tissues and organs. Guiding principles for proper selection of three basic components for tissue engineering: cells, scaffolds, and molecular signals. Concurrently scheduled with course C185. Letter grading.

**M296A. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4)** (Same as Computer Science M296A and Medicine M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multicompartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

**M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Biomathematics M270, Computer Science M296B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisite: course M296A or Biomathematics 220. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

**M296C. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4)** (Same as Computer Science M296C and Medicine M270E.) Lecture, four hours; outside study, eight hours. Requisite: course M296A. Recommended: course M296B. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training. Letter grading.

**M296D. Introduction to Computational Cardiology. (4)** (Same as Computer Science M296D.) Lecture, four hours; outside study, eight hours. Requisite: course M196B. Introduction to mathematical modeling and computer simulation of cardiac electrophysiological process. Ionic models of action potential (AP). Theory of AP propagation in 1D and 2D cardiac tissue. Simulation on sequential and parallel supercomputers, choice of numerical algorithms, to optimize accuracy and to provide computational stability. Letter grading.

**CM296L. Biomedical Systems/BioCybernetics Research Laboratory. (2 to 4)** (Same as Computer Science CM296L.) Lecture, two hours; laboratory, two hours. Requisite: course M196B. Special laboratory techniques and experience in bioCybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course CM196L. Letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate biomedical engineering students. Petition forms to request enrollment may be obtained from program office. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate biomedical engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate biomedical engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate biomedical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate biomedical engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate biomedical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Jorge R. Barrio, Ph.D. (*Molecular and Medical Pharmacology*)  
Edward J. Hoffman, Ph.D. (*Molecular and Medical Pharmacology, Radiological Sciences*)  
Sung-Cheng (Henry) Huang, D.Sc. (*Molecular and Medical Pharmacology*)  
Hooshang Kangarloo, M.D. (*Radiological Sciences, Pediatrics*)  
Robert B. Lufkin, M.D. (*Radiological Sciences*)  
John C. Mazziotta, M.D., Ph.D. (*Radiological Sciences*)  
William H. McBride, D.Sc. (*Radiation Oncology*)  
Michael E. Phelps, Ph.D. (*Molecular and Medical Pharmacology; Norton Simon Professor of Biophysics*)  
Osman Ratib, M.D., Ph.D., in Residence (*Molecular and Medical Pharmacology, Radiological Sciences*)  
Nagichettiar Satyamurthy, Ph.D., in Residence (*Molecular and Medical Pharmacology*)  
Heinrich R. Schelbert, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
H. Rodney Withers, M.D., D.Sc. (*Radiation Oncology*)

#### Professors Emeriti

Moses A. Greenfield, Ph.D., FACR (*Radiological Sciences*)  
F. Eugene Holly, Ph.D. (*Radiation Oncology*)  
Carolyn Kimme-Smith, Ph.D. (*Radiological Sciences*)  
Amos Norman, Ph.D. (*Radiation Oncology*)  
James B. Smathers, Ph.D. (*Radiation Oncology*)  
Richard J. Steckel, M.D. (*Radiological Sciences*)

#### Associate Professors

Mark S. Cohen, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences, Radiological Sciences*)  
Magnus Dahlbom, Ph.D., in Residence (*Molecular and Medical Pharmacology*)  
Graeme J. Dougherty, Ph.D. (*Radiation Oncology*)  
Sanjiv Gambhir, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
David A. Hovda, Ph.D. (*Surgery*)  
William P. Melega, Ph.D., in Residence (*Molecular and Medical Pharmacology*)  
Shantanu Sinha, Ph.D., in Residence (*Radiological Sciences*)  
Timothy D. Solberg, Ph.D., in Residence (*Radiation Oncology*)  
Phoebe L. Stewart, Ph.D. (*Molecular and Medical Pharmacology*)  
M. Albert Thomas, Ph.D., in Residence (*Radiological Sciences*)

#### Assistant Professors

John J. DeMarco, Ph.D., in Residence (*Radiation Oncology*)  
Keyvan Farahani, Ph.D., in Residence (*Radiological Sciences*)  
Judith M. Ford, M.D. Ph.D., in Residence (*Radiation Oncology*)  
Jonathan G. Goldin, MbChb, Ph.D., FRCR, in Residence (*Radiological Sciences*)  
Keisuke S. Iwamoto, Ph.D., in Residence (*Radiation Oncology*)  
Michael McNitt-Gray, Ph.D., in Residence (*Radiological Sciences*)

#### Associate Clinical Professor

Robert E. Wallace, Ph.D. (*Radiation Oncology*)

#### Assistant Clinical Professors

Shona T. Dougherty, M.D., Ph.D. (*Radiation Oncology*)  
Judith M. Ford, M.D., Ph.D. (*Radiation Oncology*)  
Usha Sinha, Ph.D. (*Radiological Sciences*)  
Daniel J. Valentino, Ph.D. (*Radiological Sciences*)

#### Lecturers

Lan H. Kobe, M.S. (*Radiation Oncology*)  
Marilyn C. Wexler, M.S.

#### Adjunct Professors

L. Stephen Graham, Ph.D. (*Radiological Sciences*)  
James W. Sayre, Dr.P.H.  
Lawrence E. Williams, Ph.D.

#### Adjunct Associate Professors

Guido Germano, Ph.D.  
James S. Whiting, Ph.D.

#### Adjunct Assistant Professors

Arion Chatziioannou, Ph.D. (*Molecular and Medical Pharmacology*)  
Robert Close, Ph.D. (*Radiation Oncology*)  
Virgil N. Cooper, III, Ph.D.  
Jeffrey H. Kleck, Ph.D. (*Radiation Oncology*)  
Min-Yuan Leu, Ph.D. (*Radiation Oncology*)  
Hazel L. Lewis, Ph.D. (*Radiation Oncology*)  
James C. Liu, Ph.D. (*Radiation Oncology*)  
David Metcalf, Ph.D. (*Radiation Oncology*)  
Craig Morioka, Ph.D.  
James A. Roseboro, Ph.D. (*Radiation Oncology, Radiological Sciences*)  
Peter J. Rosemark, Ph.D. (*Radiation Oncology*)

## Scope and Objectives

The Biomedical Physics M.S./Ph.D. Program is an AAPM-accredited interdepartmental graduate program supported by the Departments of Molecular and Medical Pharmacology, Radiation Oncology, and Radiological Sciences. It offers training in four specialties: biophysics, medical imaging, medical physics, and radiation biology. Specialized facilities for training and research are available in the departmental clinical laboratories, the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, the Image Processing Laboratory, and a number of associated hospitals. Highly specialized equipment includes two biomedical cyclotrons, the radiation oncology cyclotron, the picture archiving and communication system (PACS), four positron emission tomography (PET) scanners, the stereotactic gamma irradiator, and many VAX and SUN computers with image processor systems. In addition, clinical equipment is available to supervised students for practicums and research purposes. The program prepares students for careers as independent researchers or professional medical physicists, and graduates are qualified to work in a clinical environment and to pursue board certification as medical physicists or to apply for a clinical medical physics residency.

Graduates in biomedical physics can expect to engage in any combination of research, teaching, clinical service, and consultation. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high-technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications

Zoran L. Barbaric, M.D. (*Radiological Sciences*)

available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Biomedical Physics Program offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biomedical Physics.

## Admission

In addition to the University's minimum requirements, applicants to the M.S. program are required to hold a bachelor's degree with a major in a science or engineering program. Also, it is expected that applicants have completed (1) one year of college physics (calculus-based), (2) two years of college mathematics through differential equations, including calculus equivalent to Mathematics 31A, 31B, 32A, 32B, 33A, 33B at UCLA, (3) one year of college chemistry, and (4) at least one course in computer science. Deficiencies in the above courses must be removed prior to advancement to candidacy.

In addition, applicants to the specialty fields of biophysics, medical imaging, and therapeutic medical physics must have a strong foundation in basic physics or a degree in engineering, mathematics, or other sciences with physics training equivalent to a minor in physics (upper division courses in electricity and magnetism, quantum mechanics, atomic structure, statistical mechanics, and mechanics). Applicants may be accepted with some deficiencies in entrance requirements which must be removed prior to advancement to candidacy.

Scores from the Graduate Record Examination (GRE) General Test, taken within the last three years, should be sent to the program. Three letters of recommendation are required. If applicants already have a master's degree, one of the letters should be from their thesis adviser.

Admission to the Ph.D. program requires a bachelor's degree with a major in a science or engineering program and (1) selection of a specialty, (2) passing either all of the core courses with grades of B or better or the M.S. comprehensive examination, and (3) passing a written specialty qualifying examination which may be repeated once. Biomedical Physics 221 is required of all students. Completion of a master's program is not required.

A brochure describing the program in biomedical physics may be obtained from the program office.

## Master's Degree

For areas of specialty, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. Forty-four units of graduate-level coursework is required, including core and other required courses.

## Doctoral Degree

Areas of specialty include therapeutic medical physics, medical imaging, biological imaging, and radiation biology and experimental radiation therapy.

After selecting a specialty, students acquire sufficient knowledge by taking courses recommended for the specialty; these include the core and required courses. The courses form a basis for the Ph.D. written specialty examination. A more sharply focused curriculum may be advised for students with a medical physics background or with a career objective other than that of a practicing medical physicist.

Written and oral qualifying examinations are required. Each specialty structures its own written qualifying examination and may request its own students to pass a major topic(s) from other specialties. Once the written specialty examination is passed and students have selected a research area for the dissertation, they take the University Oral Qualifying Examination, which is based on the proposed dissertation topic.

## Biomedical Physics

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Biomedical Physics. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in biomedical physics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biological Chemistry CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**199. Directed Individual Studies or Research for Undergraduate Students. (2 to 4)** Preparation: submission of written proposal outlining course of study or research. Directed individual studies in biomedical physics for undergraduate students to be structured by faculty member and student at time of initial enrollment.

### Graduate Courses

**200A. Physics and Chemistry of Nuclear Medicine. (4)** Lecture, three hours; discussion, one hour. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. Physical and chemical properties of radioactive preparations used in nuclear medicine. Basic principles of nuclear medicine imaging, SPECT, and PET.

**200B. Nuclear Medicine Instrumentation. (4)** Lecture, one hour; laboratory, three hours. Requisite: course 200A. Introduction to nuclear medicine instrumentation, including well ionization chambers, probe and well scintillation detectors, scintillation cameras, and single photon and positron emission computed tomography.

**201. Medical Radiation Accelerator Design. (4)** Lecture, three hours. Requisite: course 216. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design.

**202A-202B-202C. Applications of Medical Physics to Clinical Problems. (4-4-4)** Selected studies in clinical use of radioisotopes:

**202A. Nuclear Medicine. (4)** Requisite: course 200B.

**202B. Diagnostic Radiology. (4)** Requisites: courses 200A, 205.

**202C. Radiation Therapy. (4)** Requisites: courses 203, 204, 208B, 221.

**203. Physics of Radiation Therapy. (4)** Lecture, three hours; discussion, one hour. Requisite: course 216. Radiation quantities and units. Radiation dosimetry, clinical applications in treatment planning. Methods of measuring radiation quantities. Calibration of radiation therapy equipment. Letter grading.

**204. Introductory Radiation Biology. (4)** Effect of ionizing radiation on chemical and biological systems.

**205. Physics of Diagnostic Radiology. (4)** Lecture, three hours; discussion, one hour. Production of X rays, basic interactions between X rays and matter, X-ray system components, physics principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory.

**206. Advanced Instrumentation. (4)** Lecture, three hours; discussion, one hour. Requisite: course 205. Introduction to recent advances in digital diagnostic imaging systems, with topics centered on instrumentation including digital subtraction angiography (DSA) methods of producing three-dimensional images.

**208A. Medical Physics Laboratory: Medical Imaging. (4)** Discussion, two hours; laboratory, four hours. Requisite: course 205. Hands-on experience performing acceptance testing and quality control checks of imaging equipment such as fluoroscopy, digital subtraction angiography, mammography, ultrasound, magnetic resonance imaging, computed tomography, and computed radiography.

**208B. Medical Physics Laboratory: Radiation Therapy. (4)** Discussion, two hours; laboratory, four hours. Requisite: course 203. Hands-on experience calibrating treatment planning and radiation therapy equipment.

**209. Digital Techniques in Radiological Sciences. (4)** Lecture, three hours; discussion, one hour. Preparation: one course in C or another computer language. Basic principles of digital technology used in radiological sciences. Concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis. C language programming taught.

**210. Principles of Medical Imaging. (4)** Lecture, three hours; discussion, one hour. Requisite: course 209. Study of image representation, computational structures for imaging, linear systems theory, image enhancement and restoration, image compression, segmentation, and morphology. Special topics include visualization techniques, three-dimensional modeling, computer graphics, and neural net applications. Laboratory projects apply concepts developed in class.

**211. Medical Ultrasound. (4)** Lecture, 90 minutes; laboratory, two hours. Preparation: one calculus course. Production of real-time ultrasound images, transducer modeling and design, Doppler and color flow instrumentation, biohazards of ultrasound, ultrasound phantom design, and ultrasound tissue characterization techniques. Laboratory included.

**212. Biochemical Basis of Positron Emission Tomography (PET). (4)** Lecture, three hours; discussion, one hour. Introduction to biochemical processes and application of radioisotopes to study metabolism noninvasively by positron emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET.

**213. Quantitative Autoradiography. (4)** Lecture, three hours; discussion, one hour. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; iodoantipyrine method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation.

**214. Medical Image Processing Systems. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 209, 210. Advanced image processing and image analysis techniques applied to medical images. Discussion of approaches to computer-aided diagnosis and image quantitation, as well as application of pattern classification techniques (neural networks and discriminant analysis). Examination of problems from several imaging modalities (CT, MR, CR, and mammography).

**215. Breast Imaging Physics and Instrumentation. (4)** Lecture, three hours; laboratory, two hours. Requisite: course 205. Special requirements of mammography, design of dedicated mammography X-ray units from generators and tubes through screen/film cassettes. Stereotactic biopsy units, cost/benefit controversy of screening mammography, digital mammography, computer-aided diagnosis, telemammography, breast MRI, and breast ultrasound.

**216. Fundamentals of Dosimetry. (4)** Lecture, three hours; laboratory, one hour. Review of fundamental interactions of radiation and matter and introduction to fundamentals of radiation dosimetry. Overview of dosimetry instrumentation as well as radiation sources.

**217. Statistics and Data Analysis in Biomedical Physics. (4)** Lecture, three hours; laboratory, two hours. Requisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to computer-based statistical concepts, data analysis, and experimental design within biomedical physics research. Standard statistical packages and various statistical computing algorithms on relevant data sets within the radiological sciences.

**218. Radiologic Functional Anatomy. (4)** Lecture, three hours; discussion, two hours. Introduction to human anatomy as visualized through radiological and nuclear medicine imaging modalities such as X ray, CT, MRI, sonogram, PET, and SPECT.

**219. Principles and Applications of Magnetic Resonance Imaging. (4)** Lecture, three hours; laboratory, one hour. Basic principles of magnetic resonance (MR), imaging physics, and contrast mechanisms. Emphasis on hardware, Fourier transform imaging methods, structure of pulse sequences, various scanning parameters and reduction of artifacts. Introduction to MR spectroscopy, MR angiography, and fast imaging techniques.

**220A-220D. Laboratory Rotations in Biomedical Physics. (2-2)** Laboratory projects to provide students with introduction to the field. One oral and one written presentation required. S/U grading. **220A.** Biophysics; **220B.** Medical Imaging; **220C.** Therapeutic Medical Physics; **220D.** Radiation Biology and Experimental Radiation Therapy.

**221. Applied Health Physics. (4)** Lecture, three hours; discussion, one hour. Requisite: course 216. Basics of radiation safety as applied to medical applications. Introduction to all regulatory issues pertaining to medical uses of radioactivity.

**222. Advances in Medical Magnetic Resonance: Clinical MR Spectroscopy and Fast MRI Techniques. (4)** Lecture, three hours; laboratory, one hour. Requisites: course 219, Physics 8E. Basic principles of NMR spectroscopy, localized spectroscopic sequences on a wholebody environment, single/multishot localization, water/fat suppression, chemical shift imaging sequences, processing with multidimensional Fourier transforms, gradient/spin-echo based echo-planar imaging, diffusion/perfusion imaging techniques.

**223. Seminar: Radiation Biology. (1)** Requisite or corequisite: course 204. Topics of current interest in radiation biology presented by faculty members, postdoctoral fellows, and graduate students from various departments and other universities. Discussion of ongoing research, as well as relevant journal articles. Topics vary from term to term. One student oral presentation required. S/U grading.

**M230. Computed Tomography: Theory and Applications. (4)** (Same as Biomathematics M230.) Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

**CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M248. Introduction to Biological Imaging. (4)** (Same as Biomedical Engineering M248 and Pharmacology M248.) Lecture, three hours; laboratory, one hour; outside study, seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories. Letter grading.

**260A-260B-260C. Seminars: Biomedical Physics. (1-1-1)** Joint critical study by students and instructors in fields of knowledge pertaining to biomedical physics. Periodic contributions by visiting scientists. Discussion of research in progress. Student presentations required in spring term. May be repeated. S/U (260A, 260B) and letter (260C) grading.

**M266. Advanced Magnetic Resonance Imaging. (4)** (Same as Neuroscience M267 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

**268. Radiopharmaceutical Chemistry. (4)** Lecture, two hours; discussion, two hours. Current concepts in radioactive pharmaceutical agents in clinical use, including promising investigational agents. Utilization of short-lived, cyclotron-produced isotopes in radiopharmaceuticals. Rational design of radiodiagnostic agents.

**269. Seminar: Medical Imaging. (1)** Continuous registration required of students in medical imaging specialty. Topics of current interest in medical imaging, with lecturers from the department, other universities, and private industry.

**M285. Functional Neuroimaging: Techniques and Applications. (4)** (Same as Psychiatry M285.) In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U or letter grading.

**M424. Functional Magnetic Resonance Imaging Journal Club. (1)** (Same as Psychiatry M424.) Discussion, 90 minutes. Directed reading and discussion of current topics and developments in functional magnetic resonance imaging. S/U grading.

**495. Special Studies in Biomedical Physics. (4)** Seminar, two hours; laboratory, four hours. Teaching assistance in graduate laboratory courses under supervision of a faculty member. S/U grading.

**596. Research in Biomedical Physics. (4 to 12)** Directed individual study or research. Only one 596 course may be applied toward M.S. degree requirements. May be repeated for credit.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** May not be applied toward M.S. degree requirements. May not be repeated. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (4 to 12)** Two 598 courses (or 598 and 596 combined) may be applied toward M.S. degree requirements. May be repeated. S/U grading.

**599. Research for Ph.D. Dissertation. (4 to 12)** Preparation: successful completion of screening examinations. Research for and preparation of Ph.D. dissertation. May be repeated. S/U grading.

## BIostatistics

William G. Cumberland, Ph.D., *Chair*

### Professors

Abdelmonem A. Afifi, Ph.D.  
William G. Cumberland, Ph.D.  
Dorota M. Dabrowska, Ph.D.  
Naihua Duan, Ph.D., *in Residence*  
Robert M. Elashoff, Ph.D.  
Weng Kee Wong, Ph.D.

### Professors Emeriti

Potter C. Chang, Ph.D.  
Virginia A. Clark, Ph.D.  
Wilfrid J. Dixon, Ph.D.  
Olive Jean Dunn, Ph.D.  
Donald Guthrie, Ph.D., *in Residence*  
Robert I. Jennrich, Ph.D.  
Raymond J. Jensen, Ph.D.

### Associate Professors

Thomas R. Belin, Ph.D.  
Gang Li, Ph.D.  
Robert E. Weiss, Ph.D.

### Assistant Professors

David A. Elashoff, Ph.D.  
Steve Horvath, Ph.D., Sc.D.  
Janet Sinsheimer, Ph.D.

### Lecturers

Jeffrey Gornbein, Dr.P.H.  
Susanne J. May, Ph.D.  
Jean L. Mickey, Ph.D., *Emerita*

### Adjunct Professor

Frederick J. Dorey, Ph.D.  
Martin L. Lee, Ph.D.  
James W. Sayre, Dr.P.H.

### Adjunct and Visiting Associate Professors

Nancy G. Berman, Ph.D., *Adjunct*  
David W. Gjertson, Ph.D., *Adjunct*  
Karim F. Hirji, D.Sc., *Adjunct*

### Adjunct and Visiting Assistant Professors

W. John Boscardin, Ph.D., *Adjunct*  
Enrique Schisterman, Ph.D., *Visiting*

## Scope and Objectives

In recent years biostatistics has become one of the most stimulating areas of applied statistics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They

collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, genetics, bioinformatics, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics (see Public Health Schoolwide Programs). All students receive a balanced education, blending theory and practice.

A degree in biostatistics prepares students for work in a wide variety of challenging positions in government, industry, and education. Graduates have found careers involving teaching, research, and consulting in such fields as medicine, public health, life sciences, survey research, and computer science. There has always been a strong demand for well-trained biostatisticians; graduates have had little difficulty finding employment well suited to their particular interests.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Biostatistics offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biostatistics.

## Admission

Applicants to the M.S. program must have completed a bachelor's degree. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Undergraduate preparation for the program should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus), or equivalent.

Applicants should see the Master of Public Health (M.P.H.) admission section under Public Health Schoolwide Programs. Admission requirements for the M.S. in Biostatistics are the same as for the M.P.H.

Qualifications for admission to the Ph.D. program are those currently specified by the Graduate Division. Consult the department for further information.

## Master's Degree

The M.S. degree is offered through the comprehensive examination plan. A minimum of nine courses are required, at least five of which must be at the graduate level. The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics. Other courses in biostatistics or mathematical statistics, or in related areas, are selected with the adviser's consent and approved by the chair.

## Doctoral Degree

In addition to required courses, the student's full program of study must include three areas of knowledge at the graduate level: biostatistics, mathematical statistics, and a third related field. Students must also enroll in a statistical consulting seminar for three consecutive quarters and an advanced research seminar every quarter.

Written and oral qualifying examinations are required. There are two written examinations. Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which usually consists of a defense of the dissertation proposal.

## Biostatistics

### Upper Division Courses

**100A. Introduction to Biostatistics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: one biological or physical sciences course. Suitable for juniors/seniors. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 110A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size. P/NP or letter grading.

**100B. Introduction to Biostatistics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 100A. Not open for credit to students with credit for course 110B. Introduction to analysis of variance, linear regression, and correlation analysis. P/NP or letter grading.

**110A. Basic Biostatistics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: Mathematics 31B. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimates, statistical inference. P/NP or letter grading.

**110B. Basic Biostatistics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 110A. Not open for credit to students with credit for course 100B. Topics include elementary analysis of variance, simple linear regression; topics related to analysis of variance and experimental designs. P/NP or letter grading.

**115. Topics in Estimation. (4)** Lecture, three hours; discussion, one hour. Requisites: Statistics 100A, 100B. Small and large sample properties of common estimation techniques arising in biostatistical application. Letter grading.

**M153A. Introduction to Regression Analysis. (4)** (Same as Biomathematics M153A and Statistics M120A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, Statistics 100B. Linear regression, diagnostics and model building, general linear model theory, analysis of variance and covariance. Full integration of theory and software. P/NP or letter grading.

**M153B. Introduction to Generalized Linear Models. (4)** (Same as Biomathematics M153B and Statistics M120B.) Lecture, three hours; discussion, one hour. Requisite: course M153A. Nonlinear regression, exponential family, generalized linear models, categorical data analysis, statistical software. P/NP or letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

## Graduate Courses

**200A. Biostatistics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 100A and 100B, or 110A and 110B. Topics in methodology of applied statistics, such as design, analysis of variance, regression. S/U or letter grading.

**200B-200C. Biostatistics. (4-4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses M153A, 200A. S/U or letter grading. **200B.** Multiple linear regression, including model validation, influence of observations, regression diagnostics; discriminant analysis; principal components; factor analysis and clinical trials. **200C.** Measures of association and analysis of categorical data, theory of generalized linear models.

**201. Topics in Applied Regression. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 200A. Further studies in multiple linear regression, including applied multiple regression models, regression diagnostics and model assessment, factorial and repeated measure analysis of variance models, nonlinear regression, logistic regression, propensity scores, matching versus stratification, Poisson regression, and classification trees. Applications to biomedical and public health scientific problems. Letter grading.

**M206A-M206B-M206C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2)** (Same as Psychiatry M286A-M286B-M286C.) Seminar, 90 minutes. Requisite: course 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

**M208. Introduction to Demographic Methods. (4)** (Formerly numbered 405.) (Same as Community Health Sciences M208 and Sociology M213A.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

**M209. Statistical Modeling in Epidemiology. (4)** (Same as Epidemiology M212.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: Epidemiology M204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

**M210. Statistical Methods for Categorical Data. (4)** (Same as Biomathematics M231.) Lecture, three hours; discussion, one hour. Requisites: course 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

**M211. Statistical Methods for Epidemiology. (4)** (Same as Epidemiology M211 and Statistics M250.) Lecture, four hours. Preparation: two terms of statistics (such as courses 100A, 100B). Requisites: Epidemiology 201A, 201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in Epidemiology 201A and 201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

**212. Distribution Free Methods. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 100B or 110B, Statistics 100B. Theory and application of distribution free methods in biostatistics. S/U or letter grading.

**213. Statistical Simulation Techniques. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 110B, Statistics 100B. Techniques for simulating important statistical distributions, with applications in biostatistics. S/U or letter grading.

**214. Finite Population Sampling. (4)** Lecture, three hours. Prerequisites: course 110B, Statistics 100B. Theory and methods for sampling finite populations and estimating population characteristics. S/U or letter grading.

**M215. Survival Analysis. (4)** (Same as Biomathematics M281.) Lecture, three hours; discussion, one hour. Prerequisite: course 115 or Statistics 100C. Statistical methods for analysis of survival data. S/U or letter grading.

**216. Introduction to Statistical Methods for Biological Assays. (4)** Lecture, three hours. Prerequisite: course 110B. Topics include standard statistical procedures for estimation of relative potency, density of microorganisms, and density of radioactivity, models used for these procedures, and statistical considerations for designing such assays. S/U or letter grading.

**219. Special Topics: Supplemental Topics. (4)** Lecture, three hours; discussion, one hour. Prerequisite: course 115. Topics in biostatistics not covered in other courses. Letter grading.

**M220. Experimental Statistics. (4)** (Same as Physiological Science CM200.) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. S/U or letter grading.

**230. Statistical Graphics. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 110A, 110B. Graphical data analysis emphasizes use of visual displays of quantitative data to gain insight into data structure by exploring patterns and relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues. S/U or letter grading.

**231. Simultaneous Statistical Inference. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 200C, Statistics 100B. Methods and theory of simultaneous statistical inference. Letter grading.

**M232. Statistical Analysis of Incomplete Data. (4)** (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

**233. Statistical Methods in AIDS. (2)** Lecture, two hours. Prerequisites: courses 110A, 110B, M215. Coverage of methods necessary to address statistical problems in AIDS research, including projection methods for the size of AIDS epidemic and methods for estimating incubation distribution. S/U or letter grading.

**M234. Applied Bayesian Inference. (4)** (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 115 (or Statistics 100C), 200A. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

**M235. Causal Inference. (4)** (Same as Psychiatry M232.) Lecture, three hours; discussion, one hour. Prerequisite: course 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman. Rubin model for causal inference, propensity scores. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed. Letter grading.

**M236. Analysis of Repeated Measures Designs. (4)** (Same as Biomathematics M282.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

**M237A. Theoretical Genetic Modeling. (4)** (Same as Biomathematics M207A and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 131A. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

**M237B. Applied Genetic Modeling. (4)** (Same as Biomathematics M207B and Human Genetics M207B.) Lecture, three hours; laboratory, one hour. Preparation: coursework equivalent to courses 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M237A; students may take either and are encouraged to take both. S/U or letter grading.

**M238. Methodology of Clinical Trials. (4)** (Same as Biomathematics M284.) Lecture, three hours; discussion, two hours. Prerequisites: courses 200A, M215. Methodological principles of clinical trials, actual practice and principles of trials. Considerable focus on phase two trials and multiclinical phase three trials. Emphasis on major inferential issues. S/U or letter grading.

**240. Master's Seminar and Research Resources for Graduating Biostatistics M.S. Students. (4)** Seminar, three hours. Introduction to resources for finding statistical literature. Discussion of principles of making statistical presentations and how to write statistical reports, including writing abstracts and choice of key words. Discussion of journal article preparation and submission format and refereeing process to help students make progress on their master's reports. Letter grading.

**245. Advanced Seminar: Biostatistics. (2)** Seminar, two hours. Prerequisite: course 200C. Current research in biostatistics. May be repeated for credit. S/U grading.

**M250A-M250B. Linear Statistical Models. (4-4)** (Same as Statistics M215A-M215B.) Lecture, three hours; discussion, one hour. Preparation: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. Letter grading.

**251. Multivariate Biostatistics. (4)** Lecture, three hours; discussion, one hour. Prerequisite: course M250A. Multivariate analysis as used in biological and medical situations. Topics from multivariate distributions, component analysis, factor analysis, discriminant analysis, MANOVA, MANCOVA, longitudinal models with random coefficients. S/U or letter grading.

**255. Advanced Topics and Probability in Biostatistics. (4)** Lecture, three hours; discussion, one hour. Prerequisites: Statistics 200A, 200B. Topics include conditioning, modes of convergence, basic limit results for empirical processes, von-Mises calculus, and notions of efficiency in statistics. Applications cover M-L-R estimation in two-sample and regression models, goodness of fit methods, smoothing techniques, and bootstrap. S/U or letter grading.

**270. Stochastic Processes. (4)** Lecture, three hours. Preparation: upper division mathematics (including statistics and probability). Stochastic processes applicable to medical and biological research. Letter grading.

**271. Mathematical Epidemiology. (4)** Lecture, three hours. Preparation: upper division mathematics (including statistics and probability). Mathematical theory of epidemiology with deterministic and stochastic models and problems involved in applying the theory. Letter grading.

**272. Statistical Genetics. (4)** Lecture, three hours; discussion, one hour. Preparation: upper division probability and statistics; knowledge of basic genetics principles helpful but not required. Introduction to statistical analysis of genetic data from experimental crosses, populations, and human pedigrees. Topics include segregation analysis, recombination and linkage, genetic mapping, inbreeding systems, population genetics, pedigree analysis, quantitative trait analysis, and molecular phylogeny. Letter grading.

**275. Advanced Survival Analysis. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 255, Statistics 200A, 200B. Recommended: course M215. Censoring and truncation, single sample problems, K-sample comparisons, Cox regression model, hazard rate and density estimation, estimation in Markov chains and Markov renewal processes, multivariate models, competing risks. S/U or letter grading.

**276. Inferential Techniques that Use Simulation. (4)** Lecture, three hours; discussion, one hour. Prerequisites: Statistics 200A, 200B. Recommended: Biostatistics 213. Theory and application of recently developed techniques for statistical inference that use computer simulation. Topics include bootstrap, multiple imputation, data augmentation, stochastic relaxation, and sampling/importance resampling algorithm. S/U or letter grading.

**277. Robustness and Modern Nonparametrics. (4)** Lecture, three hours. Prerequisite: Statistics 200A. Topics include M-estimation, influence curves, breakdown point, bootstrap, jackknife, smoothing, nonparametric regression, generalized additive models, density estimation. S/U or letter grading.

**279. Optimal Design Theory and Application. (4)** Lecture, three hours. Preparation: basic programming skills. Prerequisite: Statistics 200B. Presentation of design methodology for regression problems, with applications to biostatistical problems. Letter grading.

**M280. Statistical Computing. (4)** (Same as Biomathematics M280 and Statistics M230.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 100C. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

**285. Advanced Topics: Recent Developments. (4)** Lecture, three hours; discussion, one hour. Advanced topics and developments in biostatistics not covered in Biostatistics M210 through 219 or 270 through 276 or in other courses. Possible topics include time-series analysis, classification procedures, correspondence analysis, etc. S/U or letter grading.

**288. Seminar: Statistics in AIDS. (2)** Seminar: two hours. Prerequisite: course 200C. Designed for doctoral students. Recent statistical developments in analysis of AIDS data. Participants or outside speakers present their own research or discuss articles from the literature. S/U grading.

**295. Application of Statistical Theories in Biomedical Research. (4)** Lecture, three hours; discussion, one hour. Prerequisite: Statistics 100B. Review of statistical theories essential to biostatistics. Illustration of applications by examples. Topics include delta method, order statistics, asymptotic properties of MLEs, iterative algorithms for MLEs, generalized likelihood ratio tests for categorical data, and transformations. Letter grading.

**296. Seminar: Research Topics in Biostatistics. (4)** Seminar, two hours. Advanced study and analysis of current topics in biostatistics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**400. Field Studies in Biostatistics. (2 or 4)** Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

**402A. Principles of Biostatistical Consulting. (2)** Lecture, one hour; discussion, one hour. Prerequisite: course 100B or 110B. Presentation of structural format for statistical consulting. Role of statistician and client. Reviews of actual statistician/client interactions and case studies. S/U or letter grading.

**402B. Biostatistical Consulting. (4)** Discussion, two hours; laboratory, two hours. Prerequisite: course 402A. Principles and practices of biostatistical consulting. May be repeated for credit. S/U grading.

**403A. Computer Management of Health Data. (4)** Lecture, three hours; laboratory, two hours. Preparation: one statistics course. Concepts of health data management, design and maintenance of large databases on various media as well as across networks; computer programming tools and techniques facilitating data entry, transmission, data retrieval for statistical analyses, tabulation and report generation useful to biostatisticians, health planners, and other health professionals. Letter grading.

**M403B. Computer Management and Analysis of Health Data Using SAS. (4)** (Formerly numbered 403B.) (Same as Epidemiology M403B.) Lecture, two hours; laboratory, two hours. Requisites: courses 100A, 100B. Introduction to practical issues in management and analysis of health data using SAS programming language. Cross-sectional and longitudinal population-based data sets to be used throughout to illustrate principles of data management and analysis for addressing biomedical and health-related hypotheses. Letter grading.

**404. Principles of Sampling. (4)** Lecture, three hours; discussion, one hour. Requisites: course 100B, Epidemiology 100. Statistical aspects of design and implementation of a sample survey. Techniques for analysis of data, including estimates and standard errors. Avoiding improper use of survey data. Letter grading.

**406. Applied Multivariate Biostatistics. (4)** Lecture, three hours; laboratory, one hour. Preparation: at least two upper division research courses. Requisite: course 100B. Use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis. S/U (optional only for nondivision majors) or letter grading.

**409. Doctoral Statistical Consulting Seminar. (2)** (Formerly numbered 289.) Seminar, one hour; laboratory, four hours. Designed for doctoral students. Development of experience and expertise in collaborating with faculty in Schools of Public Health and Medicine. Students meet with investigators and develop design and protocol for data analysis, implement data protocol when data is obtained, and write up the study with lead investigators. S/U grading.

**410. Statistical Methods in Clinical Trials. (4)** Lecture, three hours; discussion, two hours. Requisites: courses 100A, 100B. Design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, and stratification in human experimentation; various types of controls; prognostic factors, survivorship studies, and design of prognostic studies; organization of clinical trials — administration, comparability, protocols, clinical standards, data collection and management. S/U (optional only for nonmajors) or letter grading.

**411. Statistical Methods for Longitudinal Data. (4)** Lecture, three hours. Requisite: course 200A. Design and analysis of longitudinal or panel studies. S/U (optional only for nonmajors) or letter grading.

**412. Statistical Methods for Case-Control Studies. (4)** Lecture, three hours. Requisite: course 200A. Statistical designs, sampling statistics, and analytic models of case-control studies. Special topics such as exploratory analyses, multiplicity of analyses, cross-validation, small sample performances of variance estimators, measurement error in the covariates, and incomplete data. S/U or letter grading.

**413. Introduction to Pharmaceutical Statistics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 100A, 100B. Exploration of various types of statistical techniques used in pharmaceutical and related industries. Topics include bioassay and other assay techniques (e.g., ELISAs and FACs analysis), quality control techniques, and pharmacokinetic and pharmacodynamic modeling. S/U or letter grading.

**419. Special Topics: Applied Statistics. (4)** Lecture, three hours; discussion, one hour. Requisite: course 100C. Special topics in applied statistics not covered in other courses in professional series. S/U or letter grading.

**420. Database Management Systems. (4)** Lecture, three hours; laboratory, two hours. Requisite: course 403A. Database and database models applied to medical and public health studies; design of databases for efficient data retrieval and statistical analysis using package database management and statistical package programs. S/U or letter grading.

**495. Teacher Preparation in Biostatistics. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. Letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## CÉSAR E. CHÁVEZ CENTER FOR CHICANA AND CHICANO STUDIES

*Center for Interdisciplinary Instruction  
College of Letters and Science*

UCLA  
7349 Bunche Hall  
Box 951559  
Los Angeles, CA 90095-1559

(310) 206-7695  
fax: (310) 825-2449  
e-mail: chavez-info@csrc.ucla.edu

Reynaldo F. Macías, Ph.D., *Chair*

### Center Faculty Professors

Judith F. Baca, M.A.  
Reynaldo F. Macías, Ph.D.  
James Diego Vigil, Ph.D.

### Associate Professors

Alicia Gaspar de Alba, Ph.D.  
Otto Santa Ana, Ph.D.  
Abel Valenzuela Jr., Ph.D.

### Assistant Professors

Eric Avila, Ph.D.  
María Cristina Pons, Ph.D.

### Affiliated Faculty Professors

Rosina M. Becerra, Ph.D. (*Social Welfare*)  
Laura E. Gómez, M.A. J.D., Ph.D. (*Law, Sociology*)  
Juan Gómez-Quiñones, Ph.D. (*History*)  
Kris D. Gutiérrez, Ph.D. (*Education*)  
David Hayes-Bautista, Ph.D. (*Medicine*)  
Steven J. Loza, Ph.D. (*Ethnomusicology*)  
Susan J. Plann, Ph.D. (*Spanish and Portuguese*)  
Fernando M. Torres-Gil, Ph.D. (*Social Welfare*)  
José Luis Valenzuela, B.A. (*Theater*)

### Associate Professors

Héctor V. Calderón, Ph.D. (*Spanish and Portuguese*)  
Guillermo Hernández, Ph.D. (*Spanish and Portuguese*)  
Chon A. Noriega, Ph.D. (*Film, Television, and Digital Media*)  
Vilma Ortiz, Ph.D. (*Sociology*)  
Rafael Pérez-Torres, Ph.D. (*English*)  
Sonia Saldívar-Hull, Ph.D. (*English*)

Daniel G. Solórzano, Jr. Ph.D. (*Education*)

### Assistant Professor

Raúl A. Hinojosa-Ojeda, Ph.D. (*Urban Planning*)

### Lecturers

Max Benavidez, B.A.  
Adolfo Bermeo, Ph.D.  
Fernando Gapasín, Ph.D.

## Scope and Objectives

The strength of the undergraduate major in Chicana and Chicano Studies is the cross-disciplinary approach to teaching and the critical skills approach to learning. Interdisciplinarity is the mainstay of the Chávez Center's academic objectives, achieved through the strengths and expertise of a core faculty that represents the fields of art, cultural studies, history, Latin American literature, sociolinguistics, and urban planning, and an associated faculty from a variety of disciplines. The center's location in Los Angeles, home to the largest community of Mexican origin in the nation as well as to several other Latino groups, places it in a unique position to draw from this large and diverse population — social experiences, historical realities, cultural practices, linguistic attributes, and literary and artistic productions.

The interdisciplinary program is an effective environment for teaching fundamental academic skills such as critical thinking and writing, as well as for exposing students to the wide range of theories, methodologies, technologies, and pedagogies that intersect the discipline. The major prepares students for graduate education in professional and academic fields and for a variety of positions that involve community and social service in the U.S. and abroad. To that end, the bilingual curriculum is learner-centered, writing-intensive, and academically rigorous.

The Chávez Center is committed to the practice of different forms of scholarship and pedagogy and to the promotion of critical thinking about such issues as gender, sexuality, social action, language, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions. The literary and visual arts often function as vehicles for social change and creative empowerment, and so they constitute one major focus of the center's curriculum. The center, in its teaching, research, and service, aims to strike a balance among the social sciences, humanities, and the arts.

## Undergraduate Study

### Chicana and Chicano Studies B.A.

The B.A. program in Chicana and Chicano Studies is designed to provide systematic instruction for students who wish concentrated study of the Chicana/Chicano experience. Viewed as developmental, the program subjects the Chicana/Chicano reality to critical investigation, including social, economic, educational, historical, and political analysis. The ma-

job is recommended for students preparing for graduate study as well as for public service careers.

### Preparation for the Major

*Required:* Chicana and Chicano Studies 10A, 10B, Spanish 5 or equivalent.

### Transfer Students

To be admitted as Chicana and Chicano Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one Chicana/Chicano life and culture course, one Chicana/Chicano social structure and contemporary conditions course, and five quarter terms of Spanish.

### The Major

*Required:* A total of 15 upper division courses, including Chicana and Chicano Studies 101, nine courses from the approved list of Chicana and Chicano Studies courses (available in the department office each term), one term of field studies, and three related study courses and one advanced seminar from the approved list of courses or by petition to the department chair or undergraduate adviser. Related study includes courses that provide a comparative perspective to Chicana and Chicano studies and/or a contextualization of Chicana and Chicano communities in the world.

*Recommended:* English Composition 110; Information Studies 111C; the introductory course in two of the following: anthropology, economics, history, political science, sociology; one or more courses in Chicana/Chicano history, literature, feminism, social science.

### Optional Multidisciplinary Senior Thesis

Chicana and Chicano Studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing an undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and writing of the thesis.

### Course Limitations

No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the department chair. No more than two CED courses may be applied toward the major concentration.

## Chicana and Chicano Studies Minor

The Chicana and Chicano Studies minor complements study in another traditional field. Students participating in the minor are required to

complete both a departmental major in another discipline and the Chicana and Chicano Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the student adviser in 7351 Bunche Hall.

*Required Lower Division Courses (10 units):* Chicana and Chicano Studies 10A, 10B.

*Required Upper Division Courses (20 units):* Chicana and Chicano Studies 101 and four elective courses selected from the approved list (available in the center office each term).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Chicana and Chicano Studies

### Lower Division Courses

**10A. Introduction to Chicana/Chicano Studies: Life and Culture. (5)** Lecture, three hours; discussion, one hour. Interdisciplinary survey of diverse historical experiences, cultural factors, and ethnic/racial paradigms, including indigenism, gender, sexuality, language, and borders, that help shape Chicana/Chicano identities. Emphasis on critical reading and writing skills. Letter grading.

**10B. Introduction to Chicana/Chicano Studies: Social Structure and Contemporary Conditions. (5)** Lecture, three hours; discussion, one hour. Multidisciplinary examination of representation, ideologies, and material conditions of Chicanas/Chicanos, including colonialism, race, labor, immigration, poverty, assimilation, and patriarchy. Emphasis on critical reading and writing skills. Letter grading.

### Upper Division Courses

**101. Theoretical Concepts in Chicana and Chicano Studies. (4)** Lecture, three hours. Requisite: course 10A or 10B. Survey of different theoretical approaches to field of Chicana and Chicano studies. Letter grading.

**M102. The Mexican American and the Schools. (4)** (Same as Education M102.) Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

**M103C. Origins and Evolution of Chicano Theater. (4)** (Same as Theater M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

**M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (4)** (Same as Theater M103D.) Lecture, three hours. Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater. Letter grading.

**M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (4)** (Same as Theater M103H.) Lecture, three hours. Requisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art. Letter grading.

**M105A. Early Chicana/Chicano Literature. (5)** (Same as English M105A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature from the 16th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

**M105B. Recent Chicana/Chicano Literature. (5)** (Same as English M105B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Chicana/Chicano Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherrie Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.

**106. Health in Latino Population. (4)** (Formerly numbered 197E.) Lecture, three hours. Examination of Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binational review of health effects between the U.S. and Mexico, including issues from Aztec medicine to Chicano health movement. Letter grading.

**M108A. Music of Latin America: Mexico, Central America, and the Caribbean Isles. (4)** (Same as Ethnomusicology M108A.) Lecture, four hours; discussion, one hour. Survey of traditional and contemporary musical culture.

**109. Chicana/Chicano Folklore. (4)** Lecture, four hours. Examination of roots of Chicana/Chicano folklore in Mexican oral tradition in the mid-19th century and development of Chicana/Chicano folklore to the present day. P/NP or letter grading.

**M110. Chicana Feminism. (4)** (Same as Women's Studies M132A.) Lecture, three hours. Requisite: Women's Studies 10. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women. P/NP or letter grading.

**111. Chicana/Chicano and Latina/Latino Intellectual Traditions. (5)** (Formerly numbered 197C.) Lecture, five hours. General view of philosophical, cultural, and social thought as well as intellectual traditions in the Americas. Roles of writers as intellectuals and cultural/political strategists, and as definers of (national) identity, social reality, and struggles of liberation. Letter grading.

**M114. Chicanos in Film/Video. (6)** (Same as Film and Television M117.) Lectures/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent "greaser" films, social problem films, the Western, and the gang films — which are major genres that account for films "about" or "with" Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or "signify" on these Hollywood genres, including *Zoot Suit*, *The Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

**M115. Musical Aesthetics in Los Angeles. (4)** (Same as Ethnomusicology M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.

**M116. Chicano/Latino Music in the U.S. (4)** (Same as Ethnomusicology M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples that have inhabited present geographical boundaries of the U.S.

**120. Immigration and the Chicano Community. (4)** Lecture, three hours. Discussion on relationship between international immigration and development of the Chicana/Chicano community. Examination of U.S. immigration policy and relationship between Mexican-origin population and other Latin American immigrants.

**121. Issues in Latina/Latino Poverty. (4)** Lecture, three hours. Examination of nature and extent of urban and rural poverty confronting Latina/Latino population in the U.S. Special emphasis on antipoverty policies of government and nonprofit organizations and social planning and economic development strategies. Attention also to literature on the underclass.

- 122. Planning Issues in Latina/Latino Communities. (4)** Lecture, three hours. Exploration of socioeconomic, demographic, and political forces that shape low-income communities and analyses of planning intervention strategies. Emphasis on community and economic development and environmental equity.
- 123. Applied Research Methods in Latino Communities. (4)** Lecture, three hours. Through combination of lectures, key readings, and several experiments, introduction to several applied research methods that are highly effective in producing sound and methodologically rigorous studies on poor and/or Latino communities, including important data that can be used for critical analysis and policy recommendations.
- 124. From Latin America to the U.S.: Immigration and Latino Identity. (4)** (Formerly numbered 197F.) Lecture, three hours. Overview of 20th-century immigration to the U.S.; social, political, and economic contexts underlying immigration from Latin America; formation of Latina/Latino identities in the U.S.; and anti-immigrant backlash and its consequences. Letter grading.
- 125. U.S./Mexico Relations. (4)** Lecture, three hours. Examination of complex dynamics in relationship between Mexico and the U.S., using a political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries.
- 126. Politics of Crisis: Migration, Identity, and Religion. (4)** (Formerly numbered 197W.) Lecture, three hours. Survey of individual and collective religious response of Latin Americans and Latinas/Latinos in the U.S. to dislocations, displacements, and fragmentation produced by conquest, colonization, underdevelopment, globalization, and migration. Special focus on Catholic theology of liberation and Evangelical Christianity. Letter grading.
- 127. Farmworker Movements, Social Justice, and AFL-CIO. (4)** (Formerly numbered 197A.) Lecture, four hours. Designed for juniors/seniors. Historical and social context of farmworker organizing, including its multiracial origins and its influence on fight for equality of working women. Specific focus on organizing of United Farm Workers and Farm Laborers Organizing Committee, and their relationship to AFL-CIO, other unions, and their influence on Chicano Movement. Letter grading.
- 128. Race, Gender, and U.S. Labor. (4)** (Formerly numbered 197A.) Lecture, four hours. Designed for juniors/seniors. Introduction to history and organization of labor movement in the U.S. and North America. Discussion of race, class, and gender issues raised within the movement, and various strategies for social change and economic equity pursued through organized labor and other means. Letter grading.
- 129. Field Research Methods in Labor and Workplace Studies. (5)** (Formerly numbered 197G.) Lecture, four hours; field studies, two hours. Designed for juniors/seniors. Discussion of roles of union and non-union worker organizations in society and in improvement of quality of life for Latina/Latino communities. Review and application of field research methods to labor organizations and workplace sites, especially participant observation, interview techniques, and grounded theory and other methods of data analysis. Letter grading.
- 131. Barrio Popular Culture. (4)** Lecture, three hours. Construction of a model by which to organize study of Chicano/Chicana popular culture by focusing on the barrio as a metaphor for community. Examination of beliefs, myths, and values of Chicano/Chicana culture and representations in icons, heroes, legends, stereotypes, and popular art forms through literature, film, video, music, mass media, and oral history.
- 132. Border Consciousness. (4)** Lecture, three hours. Investigation through history, popular culture, and mass media of bilingual and bicultural identities produced by geographical and cultural space between Mexico and the U.S. Special attention to border consciousness as site of conflict and resistance.
- M133. Chicana Lesbian Literature. (4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies. Letter grading.
- 134. Exhibiting Cultures. (4)** Lecture, three hours. Analysis, through a cultural studies perspective, of exhibitions of Chicana/Chicano and Latina/Latino art that have occupied space in mainstream museums across the U.S. since the mid-1980s. Examination of how these shows both serve and subvert a multicultural agenda in the art world and how political identities are packaged and produced in process of exhibition-making. Field trips to local museums.
- 141. Chicana and Latin American Women's Narrative. (4)** Lecture, four hours. Preparation: reading knowledge of Spanish (level 4). Analyses, comparisons, and discussion of narrative literary production of U.S. Chicana writers and their Latin American counterparts in English and Spanish, with particular focus on how each group deals with gender, ethnic, and class issues. Letter grading.
- 142. Mesoamerican Literatures. (4)** (Formerly numbered 197F.) Lecture, four hours. Preparation: reading knowledge of Spanish (level 4). Survey of premises of Mesoamerican literatures, including myths, lyrics, poetry, religious celebrations, rituals, and drama, specifically of Aztec and Mayan peoples prior to European contact. Letter grading.
- M145A-M145B. Introduction to Chicano Literature. (4-4)** (Same as Spanish M145A-M145B.) Lecture, three hours. Requisite: Spanish 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. **M145A.** Literature to 1960; **M145B.** Literature after 1960.
- M146. Chicano Narrative. (4)** (Same as Spanish M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — Corrido, Semblanza, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.
- M154. Contemporary Issues among Chicanas. (4)** (Same as Women's Studies M132B.) Lecture, two and one-half hours. Requisite: Women's Studies 10. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas. P/ NP or letter grading.
- M155. Latinos in the U.S. (4)** (Same as Sociology M155.) Lecture, three hours; discussion, one hour. Requisite: Sociology 1. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.
- M159A. History of the Chicano Peoples. (4)** (Same as History M159A.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.
- M159B. History of the Chicano Peoples. (4)** (Same as History M159B.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.
- 160. Introduction to Chicana/Chicano Speech in American Society. (4)** Lecture, three hours. Survey course presenting (1) basic elements of Chicano language use, including history of Chicano languages, types and social functions of Chicano speech (*pachuco*, *caló*, Spanglish), sexist language, and multilingualism and monolingualism and (2) major social issues associated with language use by Chicanos and other urban ethnic populations.
- 161. Chicano Sociolinguistics. (4)** Lecture, three hours. Requisite: course 160. Exploration of various theories of sociolinguistics, social/cultural change, ethnicity, and power to develop a cohesive model of Chicano sociolinguistics. Topics include histories and typology of Chicano language varieties, language change and maintenance/loss, language attitude studies, and American social institutional (media, educational, legal) responses to Chicano presence.
- 162. Language Research in the Barrio. (4)** Lecture/practicum, three hours. Requisite: course 160. Group-oriented practicum to gather, record, and analyze languages spoken in the Chicano community, using scientific methods. Development of research agenda and research instrument, gathering of actual speech and its analysis, and writing of final report under guidance of instructor. Student-selected research topics have included language use in the barrio, media portrayals of Latinos, and societal and educational attitudes toward language use of Latinos. Introduction to oral history, sociolinguistic interviewing, and social science methodology.
- 163. Bilingual Advantage: Spanish Language Topics on Chicana/Chicano and Latin American Cultures. (5)** (Formerly numbered 197C.) Lecture, four hours; discussion, one hour. Requisite: Spanish 4. Review of Spanish language literature, newsprint, radio, and television in the U.S., providing for student development of academic skills in Spanish. Comparison with Spanish language mass media in other parts of the world. Letter grading.
- 165. Language in Education. (4)** Lecture, three hours. Examination of language issues pertinent to educational systems, including language inequity, literacy, testing, and socialization, as well as institutional ideologies.
- 168. Representations of Latinos in Print Media. (4)** Lecture/research, three hours. Examination of systemic (mis)representations of Latinos by a print media source (*Los Angeles Times*) by means of critical discourse analysis and metaphor theory. Investigation of empirical basis for theories of racism in language in this context. Student projects range from immigration to education and crime to culture.
- 169. Representations of Indigenous Peoples in the Americas. (4)** (Formerly numbered 197C.) Lecture, four hours. Strongly recommended prerequisite: course 101. Introduction to different forms of representation of indigenous peoples and their presence in the Americas, with emphasis on Mesoamerica and the Andes. How indigenous images are expressed, perceived, and constructed at point of contact with Europeans during development of indigenismo and in current period. Discussion of how these relate to Chicana/Chicano identity construction. Letter grading.
- M170. Latinos and Literacy. (5)** (Same as Honors Collegium M128.) Seminar, three hours; field project, three hours. Preparation: Spanish fluency or completion of two years of university-level Spanish. Study of theory and practice of teaching literacy, including field-based work in adult literacy centers in the city. P/NP or letter grading.

**M172V. Culture Change and the Mexican People. (4)** (Same as Anthropology M172V.) Lecture, three hours. Requisite: course 10A or 10B or Anthropology 9. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscegenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

**177. Latino Social Policy. (4)** (Formerly numbered 197B.) Lecture, three hours. Examination of social welfare of Latinos (Chicanos, Puerto Ricans, and Cubans) in the U.S. through assessment and critical analysis of social policy issues affecting them. Survey of social, economic, cultural, and political circumstances affecting ability of Latinos to access public benefits and human services. Letter grading.

**180. City and Community: History of Chicana/Chicano Los Angeles, 1848 to 1945. (4)** Lecture, three hours. Examination of history of Los Angeles from 1848 to 1945, with emphasis on formation of disparate and adverse communities within larger urban region of Southern California.

**181. City and Community: History of Chicana/Chicano Los Angeles, 20th Century. (4)** Lecture, three hours. History of Mexican American people in 20th-century Los Angeles. Readings and lectures emphasize formation of a regional identity among Mexican Americans in Los Angeles and their significance to emergence of a multicultural metropolis.

**182. Understanding Whiteness in American History and Culture. (4)** Seminar, three hours. History, construction, and representation of whiteness in American society. Readings and discussions trace evolution of a "white" identity and explore its significance to historical construction of race class in American history.

**184. Identities in Space and Time: Regional History of U.S./Mexican Borderlands. (4)** Lecture, four hours. Survey of historic and geographic diversity of Chicana/Chicano identity and culture, with emphasis on regional communities of California, New Mexico, and Texas in "Spanish/Mexican" borderlands as situated within the U.S. national context. Letter grading.

**M186A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4)** (Formerly numbered M166.) (Same as Art M186A and World Arts and Cultures M125A.) Studio/lecture, six hours. Corequisite: course M186AL. Investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

**M186AL-M186BL-M186CL. Beyond the Mexican Mural: Muralism and Community Laboratory. (2-2-2)** (Same as Art M186AL-M186BL-M186CL and World Arts and Cultures M125AL-M125BL-M125CL.) Laboratory, two hours. Course M186AL is requisite to M186BL, which is requisite to M186CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading. **M186AL.** Beginning; **M186BL.** Intermediate; **M186CL.** Advanced.

**M186B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4)** (Same as Art M186B and World Arts and Cultures M125B.) Studio/lecture, six hours. Requisites: courses M186A, M186AL. Corequisite: course M186BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

**M186C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4)** (Same as Art M186C and World Arts and Cultures M125C.) Studio/lecture, six hours. Requisites: courses M186B, M186BL. Corequisite: course M186CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

**M188. Whose Monument Where: Course on Public Art. (4)** (Formerly numbered M167.) (Same as Art M188 and World Arts and Cultures M126.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

**M190. Bilingual Writing Workshop. (4)** (Same as Women's Studies M190.) Seminar, four hours. Requisite: course 10A or 10B. Writing sample required; access to course webpage mandatory. Technical instruction, analysis, and theoretical discussion of bilingual creative expression, with focus on specific genre (i.e., autobiography, poetry, fiction). Emphasis on memory, identity, gender, and sexuality. Central theme of bilingualism as politics and aesthetics. Peer critique of weekly writing assignments. Letter grading.

**197A-197Z. Special Topics in Chicana and Chicano Studies. (4 each)** Lecture, three hours. Some sections may require prior coursework. Lecture or seminar format on selected topics in Chicana and Chicano studies. May be repeated for credit:

**M197B.** Topics in Chicana/Chicano Literature. (5) (Same as English M197B.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Chicana/Chicano literature. Topics include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit. P/NP or letter grading.

**199. Independent Studies. (2 to 4)** Requisites: courses 10A, 10B. Limited to juniors/seniors. Intensive directed research program. May be repeated for a maximum of 8 units.

Ken Nobe, Ph.D.  
Selim M. Senkan, Ph.D.  
A.R. Frank Wazzan, Ph.D., *Dean*

#### Professors Emeriti

Traugott H.K. Frederking, Ph.D.  
Eldon L. Knuth, Ph.D.  
Lawrence B. Robinson, Ph.D.  
William D. Van Vorst, Ph.D.

#### Associate Professor

Michael W. Deem, Ph.D.

#### Assistant Professors

Jane P. Chang, Ph.D.  
Panagiotis Christofides, Ph.D.

## Scope and Objectives

The Department of Chemical Engineering conducts undergraduate and graduate programs of teaching and research in the areas of thermodynamics, statistical mechanics, mass transfer, catalysis, semiconductor materials processing, plasma processing, electrochemistry and corrosion, high-temperature chemical kinetics, reaction engineering, combustion science, environmental reaction engineering, cryogenics and low-temperature processes, biochemical engineering, process systems engineering, process integration, computer-aided process design and control, particle technology, pollution control, pollution prevention, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society's needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints.

The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes bioengineering, biomedical engineering, environmental, and semiconductor manufacturing options. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

## Undergraduate Study

### Chemical Engineering B.S.

The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering, biomedical engineering, environmental, and semiconductor manufacturing options exist as subsets of courses within the accredited curriculum. Balance is sought between science and engineering practice.

### The Major

Course requirements are as follows (195 minimum units required):

1. Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100

## CHEMICAL ENGINEERING

*Henry Samueli School of Engineering and Applied Science*

UCLA  
5531 Boelter Hall  
Box 951592  
Los Angeles, CA 90095-1592

Selim M. Senkan, Ph.D., *Chair*  
Vasilios Manousiouthakis, Ph.D., *Vice Chair*

#### Professors

Yoram Cohen, Ph.D.  
James F. Davis, Ph.D.  
Sheldon K. Friedlander, Ph.D. (*Ralph M. Parsons Professor of Chemical Engineering*)  
Robert F. Hicks, Ph.D.  
James C. Liao, Ph.D.  
Vasilios Manousiouthakis, Ph.D.  
Harold G. Monbouquette, Ph.D.

2. Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30A, 30B, 30BL, 113A, 171
  3. Two elective courses from Chemical Engineering 110, C111, 112, 113, C114, C115, C116, C118, C119, C125, C140, CM165, and three upper division chemistry elective courses (except Chemistry and Biochemistry 110A). An upper division life or physical sciences course may be substituted for one chemistry elective with the approval of the faculty adviser
  4. Chemistry and Biochemistry 20A, 20B, 20L, 30AL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A 33B; Physics 1A, 1B, 1C, 4AL, 4BL
  5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details
3. Sciences 4 or Microbiology and Molecular Genetics 101
  3. Two elective courses from Chemical Engineering C115, C125, CM145, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser); one upper division microbiology and molecular genetics or molecular, cell, and developmental biology or organismic biology, ecology, and evolution elective that requires one year of chemistry as a requisite and contains a laboratory component (laboratory component may be taken from a separate course)
  4. Chemistry and Biochemistry 20A, 20B, 20L, 30AL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
  5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

### Bioengineering Option

Course requirements are as follows (202 minimum units required):

1. Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100
2. Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30A, 30B, 30BL, 153A, 156; Life Sciences 4 or Microbiology and Molecular Genetics 101
3. Two elective courses from Chemical Engineering C115, C125, CM145, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser); one upper division microbiology and molecular genetics or molecular, cell, and developmental biology or organismic biology, ecology, and evolution elective that requires one year of chemistry as a requisite
4. Chemistry and Biochemistry 20A, 20B, 20L, 30AL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Life Sciences 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

### Biomedical Engineering Option

Course requirements are as follows (200 minimum units required):

1. One general engineering course: Chemical Engineering M105A
2. Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30A, 30B, 30BL, 153A, 156; Life

### Environmental Option

Course requirements are as follows (199 minimum units required):

1. Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100
2. Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Atmospheric Sciences 104; Chemistry and Biochemistry 30A, 30B, 30BL, 113A, 171
3. Two elective courses from Chemical Engineering 113, C118, C119, C140, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser) and three advanced chemistry electives in the environmental field from Atmospheric Sciences M203A, Chemistry and Biochemistry 103, 110B, Environmental Health Sciences 240, 241, 261, Organismic Biology, Ecology, and Evolution M127 (other advanced chemistry courses may be selected in consultation with the faculty adviser)
4. Chemistry and Biochemistry 20A, 20B, 20L, 30AL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

### Semiconductor Manufacturing Option

Course requirements are as follows (199 minimum units required):

1. Three general engineering courses: Chemical Engineering M105A, Electrical Engineering 100, Materials Science and Engineering 14
2. Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104C, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30A, 30B, 30BL, 113A, 171; Electrical Engineering 2; Materials Science and Engineering 120
3. Two elective courses from Chemical Engineering 112, 113, C114, C116, C118, C119, C140 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser) and two chemistry elective courses (except Chemistry and Biochemistry 110A and 140)
4. Chemistry and Biochemistry 20A, 20B, 20L, 30AL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Chemical Engineering offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Chemical Engineering.

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. and Ph.D. programs are required to take the General Test of the Graduate Record Examination (GRE).

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Applicants are encouraged to apply online. Application forms, including a departmental supplement to the application, may be found at <http://www.chemeng.ucla.edu> or by writing to the Chemical Engineering Department, 5531 Boelter Hall, UCLA, Box 951592, Los Angeles, CA 90095-1592 or to the Office of the Associate Dean for Academic and Student Affairs, Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601.

## Master's Degree

The M.S. degree is offered through the thesis plan. Nine courses are required, six at the graduate level. Course requirements include specific courses in chemical engineering, other departmental courses, and thesis research courses and may include courses in life sciences, physical sciences, mathematics, or engineering.

The nonthesis based M.S. program in the field of semiconductor manufacturing is offered through the comprehensive examination plan and requires 44 units, an additional 8 units of coursework.

## Doctoral Degree

Students should consult *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and the department for information on fields of study.

All Ph.D students are required to take six 200-level courses. Course requirements include specific courses in chemical engineering and other departmental courses and may include courses in life sciences, physical sciences, mathematics, or engineering. Students are encouraged to take more courses in their field of specialization.

Written and oral qualifying examinations are required. A preliminary oral examination tests understanding of chemical engineering fundamentals in the areas of thermodynamics, transport phenomena, chemical kinetics, and reactor design. The written qualifying examination consists of a dissertation research proposal.

Following successful completion of the written examination, student take the University Oral Qualifying Examination, which consists of an oral defense of the dissertation research proposal.

## Chemical Engineering

### Lower Division Course

**2. Technology and the Environment. (4)** Lecture, four hours; outside study, eight hours. Natural and anthropogenic flows of materials at global and regional scales. Case studies of natural cycles include global warming (CO<sub>2</sub> cycles), stratospheric ozone depletion (chlorine and ozone cycles), and global nitrogen cycles. Flow of materials in industrial economies compared and contrasted with natural flows; presentation of life-cycle methods for evaluating environmental impact of processes and products. P/NP or letter grading.

## Upper Division Courses

**100. Introduction to Chemical Engineering. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20B, 20L, Mathematics 32B (may be taken concurrently), Physics 1A. Introduction to analysis and design of industrial chemical processes. Material and energy balances. Letter grading.

**101A. Momentum Transfer. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course M105A, Mathematics 33A, 33B. Corequisite: course 109. Introduction to analysis of fluid flow in systems of interest to chemical engineering practice. Fundamentals of momentum transport, Newton law of viscosity, Navier/Stokes equations, interphase momentum transport and friction factors, flows in conduits and around submerged objects. Letter grading.

**101B. Heat Transfer. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 101A. Introduction to analysis of heat transfer in systems of interest to chemical engineering practice. Fundamentals of thermal energy transport, Fourier law of heat conduction, forced and free convection, radiation, interphase heat transfer, heat exchanger analysis. Letter grading.

**101C. Mass Transfer. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 100, 101B, 102. Introduction to analysis of mass transfer in systems of interest to chemical engineering practice. Fundamentals of mass species transport, Fick law of diffusion, diffusion in chemically reacting flows, interphase mass transfer, multicomponent systems. Letter grading.

**102. Chemical Engineering Thermodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 100, M105A. Thermodynamic properties of pure substances and solutions. Phase equilibrium. Chemical reaction equilibrium. Letter grading.

**103. Separation Processes. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 100, 101B, 102. Application of principles of heat, mass, and momentum transport to design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. Letter grading.

**104A. Chemical Engineering Laboratory I. (6)** Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Requisites: courses 100, 101B, 102. Measurements of temperature, pressure, flow rate, viscosity, and fluid composition in chemical processes. Methods of data acquisition, equipment selection and fabrication, and laboratory safety. Development of written and oral communication skills. Letter grading.

**104B. Chemical Engineering Laboratory II. (6)** Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Requisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis. Letter grading.

**104C. Semiconductor Processing Laboratory. (6)** Lecture, two hours; laboratory, eight hours; outside study, eight hours. Requisites: course 104A, Electrical Engineering 121A. Series of experiments that emphasize basic engineering principles of semiconductor unit operations, including fabrication and characterization of semiconductor devices. Investigation of processing steps used to make CMOS devices, including wafer cleaning, oxidation, diffusion, lithography, chemical vapor deposition, plasma etching, and metallization. Presentation of student results in both written and oral form. Statistical design of experiments and error analysis. Letter grading.

**M105A. Introduction to Engineering Thermodynamics. (4)** (Same as Mechanical and Aerospace Engineering M105A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20B, Mathematics 32B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

**106. Chemical Reaction Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 100, 101C, 102. Fundamentals of chemical kinetics and catalysis. Introduction to analysis and design of homogeneous and heterogeneous chemical reactors. Letter grading.

**107. Process Dynamics and Control. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101C, 103, 106. Fundamentals of dynamics modeling and start-up behavior of chemical engineering processes. Chemical process control elements. Design and applications of chemical process computer control. Letter grading.

**108A. Process Economics and Analysis. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, 104B, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reaction engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives. Letter grading.

**108B. Chemical Process Computer-Aided Design and Analysis. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, 106, 108A, Computer Science 10F. Introduction to application of some mathematical and computing methods to chemical engineering design problems; use of simulation programs as an automated method of performing steady state material and energy balance calculations. Letter grading.

**109. Mathematical Methods in Chemical Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Preparation: working knowledge of FORTRAN programming. Discussion of theory and applications of mathematics to chemical engineering problems, with focus on numerical and analytical techniques encompassing linear and nonlinear algebraic equations, finite difference methods, and ordinary and partial differential equations. Letter grading.

**110. Intermediate Engineering Thermodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. Principles and engineering applications of statistical and phenomenological thermodynamics. Determination of partition function in terms of simple molecular models and spectroscopic data; nonideal gases; phase transitions and adsorption; nonequilibrium thermodynamics and coupled transport processes. Letter grading.

**C111. Cryogenics and Low-Temperature Processes. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryo-systems and other special conditions. Concurrently scheduled with course C211. Letter grading.

**112. Polymer Processes. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 101A, Chemistry 30. Formation of polymers, criteria for selecting a reaction scheme, polymerization techniques. Polymer characterization. Mechanical properties. Rheology of macromolecules, modeling and experimental methods to characterize non-Newtonian fluids. Polymer process engineering. Letter grading.

**113. Air Pollution Engineering. (4)** Lecture, four hours; preparation, two hours; outside study, six hours. Requisites: courses 101C, 102. Integrated approach to air pollution, including concentrations of atmospheric pollutants, air pollution standards, air pollution sources and control technology, and relationship of air quality to emission sources. Links air pollution to multimedia environmental assessment. Letter grading.

**C114. Electrochemical Processes and Corrosion. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electrodeless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C214. Letter grading.

**C115. Biochemical Reaction Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course CM215. Letter grading.

**C116. Surface and Interface Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: Chemistry 113A. Introduction to engineering materials, particularly thin films used to make microelectronic devices. Topics include classification of crystals and surfaces, structures adopted by crystalline materials, analysis of structure and composition of crystals and their surfaces, and processing of thin films for microelectronic devices. May be concurrently scheduled with course C216. Letter grading.

**C118. Multimedia Environmental Assessment. (4)** Lecture, four hours; preparation, two hours; outside study, six hours. Requisites: courses 101C, 102. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C218. Letter grading.

**C119. Pollution Prevention for Chemical Processes. (4)** (Formerly numbered 119.) Lecture, four hours; outside study, eight hours. Requisite: course 108A. Systematic methods for design of environment-friendly processes. Development of the methods at molecular, unit-operation, and network levels. Synthesis of mass exchange, heat exchange, and reactor networks. Concurrently scheduled with course C219. Letter grading.

**C125. Bioseparations and Bioprocess Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course CM225. Letter grading.

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**C140. Fundamentals of Aerosol Technology. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C240. Letter grading.

**CM145. Molecular Biotechnology for Engineers. (4)** (Same as Biomedical Engineering CM145.) Lecture, four hours; outside study, eight hours. Selected topics in molecular biology that form foundation of biotechnology and biomedical industry today. Topics include recombinant DNA technology, molecular research tools, manipulation of gene expression, directed mutagenesis and protein engineering, DNA-based diagnostics and DNA microarrays, antibody and protein-based diagnostics, genomics and bioinformatics, isolation of human genes, gene therapy, and tissue engineering. Concurrently scheduled with course CM245. Letter grading.

**CM165. Bioprocess Technology. (4)** (Same as Microbiology CM165.) Lecture, two hours; laboratory, eight hours. Requisites: course C115, Chemistry 156, Microbiology 101. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

## Graduate Courses

**200. Advanced Engineering Thermodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. Phenomenological and statistical thermodynamics of chemical and physical systems with engineering applications. Presentation of role of atomic and molecular spectra and intermolecular forces in interpretation of thermodynamic properties of gases, liquids, solids, and plasmas. Letter grading.

**201. Methods of Molecular Simulation. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 200 or Chemistry C223A or Physics 215A. Modern simulation techniques for classical molecular systems. Monte Carlo and molecular dynamics in various ensembles. Applications to liquids, solids, and polymers. Letter grading.

**210. Advanced Chemical Reaction Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101C, 106. Principles of chemical reactor analysis and design. Particular emphasis on simultaneous effects of chemical reaction and mass transfer on noncatalytic and catalytic reactions in fixed and fluidized beds. Letter grading.

**C211. Cryogenics and Low-Temperature Processes. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C111. Letter grading.

**C214. Electrochemical Processes and Corrosion. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electrodeless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C114. Letter grading.

**CM215. Biochemical Reaction Engineering. (4)** (Formerly numbered C215.) (Same as Biomedical Engineering M215.) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C115. Letter grading.

**C216. Surface and Interface Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: Chemistry 113A. Introduction to engineering materials, particularly thin films used to make microelectronic devices. Topics include classification of crystals and surfaces, structures adopted by crystalline materials, analysis of structure and composition of crystals and their surfaces, and processing of thin films for microelectronic devices. May be concurrently scheduled with course C116. Letter grading.

**217. Electrochemical Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course C114. Transport phenomena in electrochemical systems; relationships between molecular transport, convection, and electrode kinetics, along with applications to industrial electrochemistry, fuel cell design, and modern battery technology. Letter grading.

**C218. Multimedia Environmental Assessment. (4)** Lecture, four hours; preparation, two hours; outside study, six hours. Requisites: courses 101C, 102. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C118. Letter grading.

**C219. Pollution Prevention for Chemical Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 108A. Systematic methods for design of environment-friendly processes. Development of the methods at molecular, unit-operation, and network levels. Synthesis of mass exchange, heat exchange, and reactor networks. Concurrently scheduled with course C119. Letter grading.

**220. Advanced Mass Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 101C. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport. Letter grading.

**223. Design for Environment. (4)** Lecture, four hours; outside study, eight hours. Limited to graduate chemical engineering, materials science and engineering, or Master of Engineering program students. Design of products for meeting environmental objectives; life-cycle inventories; life-cycle impact assessment; design for energy efficiency; design for waste minimization, computer-aided design tools, materials selection methods. Letter grading.

**CM225. Bioseparations and Bioprocess Engineering. (4)** (Formerly numbered C225.) (Same as Biomedical Engineering M225.) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C125. Letter grading.

**230. Reaction Kinetics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 106, 200. Macroscopic descriptions: reaction rates, relaxation times, thermodynamic correlations of reaction rate constants. Molecular descriptions: kinetic theory of gases, models of elementary processes. Applications: absorption and dispersion measurements, unimolecular reactions, photochemical reactions, hydrocarbon pyrolysis and oxidation, explosions, polymerization. Letter grading.

**231. Molecular Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 106 or 110. Analysis and design of molecular-beam systems. Molecular-beam sampling of reactive mixtures in combustion chambers or gas jets. Molecular-beam studies of gas-surface interactions, including energy accommodations and heterogeneous reactions. Applications to air pollution control and to catalysis. Letter grading.

**232. Combustion Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 106, 200, or Mechanical and Aerospace Engineering 132A. Fundamentals: change equations for multicomponent reactive mixtures, rate laws. Applications: combustion, including burning of (1) premixed gases or (2) condensed fuels. Detonation. Sound absorption and dispersion. Letter grading.

**CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**234. Plasma Chemistry and Engineering. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate chemistry or engineering students. Application of chemistry, physics, and engineering principles to design and operation of plasma and ion-beam reactors used in etching, deposition, oxidation, and cleaning of materials. Examination of atomic, molecular, and ionic phenomena involved in plasma and ion-beam processing of semiconductors, etc. Letter grading.

**CM240. Fundamentals of Aerosol Technology. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C140. Letter grading.

**CM245. Molecular Biotechnology for Engineers. (4)** (Same as Biomedical Engineering CM245.) Lecture, four hours; outside study, eight hours. Selected topics in molecular biology that form foundation of biotechnology and biomedical industry today. Topics include recombinant DNA technology, molecular research tools, manipulation of gene expression, directed mutagenesis and protein engineering, DNA-based diagnostics and DNA microarrays, antibody and protein-based diagnostics, genomics and bioinformatics, isolation of human genes, gene therapy, and tissue engineering. Concurrently scheduled with course CM145. Letter grading.

**250. Computer-Aided Chemical Process Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowsheet invention; process synthesis; optimal design and operation of large-scale chemical processing systems. Letter grading.

**260. Non-Newtonian Fluid Mechanics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M105A. Principles of non-Newtonian fluid mechanics. Stress constitutive equations. Rheology of polymeric liquids and dispersed systems. Applications in viscometry, polymer processing, biorheology, oil recovery, and drag reduction. Letter grading.

**CM265. Bioprocess Technology. (4)** (Same as Microbiology CM265.) Lecture, two hours; laboratory, eight hours. Requisites: course C115, Chemistry 156, Microbiology 101. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165. Letter grading.

**270. Chemical Engineering Principles of Semiconductor Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Limited to graduate chemical engineering students in M.S. semiconductor manufacturing option. Fundamentals of unit operations, transport phenomena, chemical kinetics, thermodynamics, and control in context of semiconductor materials processing. Letter grading.

**270R. Advanced Research in Semiconductor Manufacturing. (6)** Laboratory, nine hours; outside study, nine hours. Limited to graduate chemical engineering students in M.S. semiconductor manufacturing option. Supervised research in processing semiconductor materials and devices. Letter grading.

**M280A. Linear Dynamic Systems. (4)** (Same as Electrical Engineering M240A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

**M280C. Optimal Control. (4)** (Same as Electrical Engineering M240C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 240B or Mechanical and Aerospace Engineering 270B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

**M282A. Nonlinear Dynamic Systems. (4)** (Same as Electrical Engineering M242A and Mechanical and Aerospace Engineering M272A.) Lecture, four hours; outside study, eight hours. Requisite: course M280A or Electrical Engineering M240A or Mechanical and Aerospace Engineering M270A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

**283C. Analysis and Control of Infinite Dimensional Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M280A, M282A. Designed for graduate students. Introduction to advanced dynamical analysis and controller synthesis methods for nonlinear infinite dimensional systems. Topics include (1) linear operator and stability theory (basic results on Banach and Hilbert spaces, semigroup theory, convergence theory in function spaces), (2) nonlinear model reduction (linear and nonlinear Galerkin method, proper orthogonal decomposition), (3) nonlinear and robust control of nonlinear hyperbolic and parabolic partial differential equations (PDEs), (4) applications to transport-reaction processes. Letter grading.

**284A. Optimization in Vector Spaces. (4)** Lecture, four hours; outside study, eight hours. Requisites: Electrical Engineering 236A, 236B. Review of functional analysis concepts. Convexity, convergence, continuity. Minimum distance problems for Hilbert and Banach spaces. Lagrange multiplier theorem in Banach spaces. Nonlinear duality theory. Letter grading.

**290. Special Topics. (2 to 4)** Seminar, four hours. Requisites for each offering announced in advance by department. Advanced and current study of one or more aspects of chemical engineering, such as chemical process dynamics and control, fuel cells and batteries, membrane transport, advanced chemical engineering analysis, polymers, optimization in chemical process design. May be repeated for credit with topic change. Letter grading.

**M290A. Toxics Reduction: Science, Engineering, and Policy Issues. (4)** (Same as Environmental Health Sciences M249 and Urban Planning M262A.) Lecture, three hours. Requisites: Urban Planning 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. Letter grading.

**298A-298Z. Research Seminars. (2 to 4 each)** Seminar, to be arranged. Requisites for each offering announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading.

**299. Departmental Seminar. (2)** Seminar, two hours. Limited to graduate chemical engineering students. Seminars by leading academic and industrial chemical engineers on development or application of recent technological advances in the discipline. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U grading.

**495A. Teaching Assistant Training Seminar. (2)** Seminar, two hours; outside study, four hours; one-day intensive training at beginning of Fall Quarter. Limited to graduate chemical engineering students. Required of all new teaching assistants. Special seminar on communicating chemical engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of grading, advising, and rapport with students. S/U grading.

**495B. Teaching with Technology for Teaching Assistants. (2)** Seminar, two hours; outside study, four hours. Limited to graduate chemical engineering students. Designed for teaching assistants interested in learning more about effective use of technology and ways to incorporate that technology into their classrooms for benefit of student learning. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate chemical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate chemical engineering students in M.S. semiconductor manufacturing option. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Seminar, to be arranged. Limited to graduate chemical engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate chemical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate chemical engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate chemical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

## CHEMISTRY AND BIOCHEMISTRY

*College of Letters and Science*

William M. Gelbart, Ph.D., Chair

### Professors

Mario E. Baur, Ph.D.  
Emily A. Carter, Ph.D.  
Orville L. Chapman, Ph.D.  
Steven G. Clarke, Ph.D.  
Albert J. Courey, Ph.D.  
Richard E. Dickerson, Ph.D.  
David S. Eisenberg, D.Phil.  
Juli F. Feigon, Ph.D.  
Peter M. Felker, Ph.D.  
Christopher S. Foote, Ph.D.  
William M. Gelbart, Ph.D.  
James K. Gimzewski, Ph.D.

Jay D. Gralla, Ph.D.  
 M. Frederick Hawthorne, Ph.D.  
 James R. Heath, Ph.D.  
 Kendall N. Houk, Ph.D.  
 Wayne L. Hubbell, Ph.D. (*Jules Stein Professor of Ophthalmology*)  
 Michael E. Jung, Ph.D.  
 Herbert D. Kaesz, Ph.D.  
 Richard B. Kaner, Ph.D.  
 Charles M. Knobler, Ph.D.  
 Raphael D. Levine, Ph.D.  
 Harold G. Martinson, Ph.D.  
 Sabeeha Merchant, Ph.D.  
 Emil Reisler, Ph.D.  
 David S. Sigman, Ph.D.  
 J. Fraser Stoddart, Ph.D. (*Saul Winstein Professor of Organic Chemistry*)  
 Joan S. Valentine, Ph.D.  
 John T. Wasson, Ph.D.  
 Richard L. Weiss, Ph.D.  
 Fred Wudl, Ph.D. (*Courtauld Professor of Chemistry*)  
 Todd O. Yeates, Ph.D.  
 Jeffrey I. Zink, Ph.D.

#### Professors Emeriti

Frank A.L. Anet, Ph.D.  
 Daniel E. Atkinson, Ph.D.  
 Kyle D. Bayes, Ph.D.  
 Paul D. Boyer, Ph.D.  
 Donald J. Cram, Ph.D. (*Saul Winstein Professor Emeritus of Organic Chemistry, University Professor Emeritus*)  
 Mostafa A. El-Sayed, Ph.D.  
 Paul S. Farrington, Ph.D.  
 Clifford S. Garner, Ph.D., D.Sc.  
 E. Russell Hardwick, Ph.D.  
 Daniel Kivelson, Ph.D.  
 William G. McMillan, Jr., Ph.D.  
 Malcolm F. Nicol, Ph.D.  
 Howard Reiss, Ph.D.  
 Verne N. Schumaker, Ph.D.  
 Robert L. Scott, Ph.D.  
 Roberts A. Smith, Ph.D.  
 Charles E. Strouse, Ph.D.  
 Charles A. West, Ph.D.

#### Associate Professors

Delroy A. Baugh, Ph.D.  
 James U. Bowie, Ph.D., *in Residence*  
 Catherine F. Clarke, Ph.D.  
 Miguel Garcia-Garibay, Ph.D.  
 Robin L. Garrell, Ph.D.  
 James W. Gober, Ph.D.  
 Andrea J. Liu, Ph.D.  
 Craig A. Merlic, Ph.D.  
 Daniel Neuhauser, Ph.D.  
 Yves Rubin, Ph.D.

#### Assistant Professors

Mahdi M. Abu-Omar, Ph.D.  
 Guillaume F. Chanfreau, Ph.D.  
 Robert T. Clubb, Ph.D.  
 Carla M. Koehler, Ph.D.  
 Christopher J. Lee, Ph.D.  
 Benjamin J. Schwartz, Ph.D.  
 Sarah H. Tolbert, Ph.D.

#### Senior Lecturer S.O.E.

Arlene A. Russell, Ph.D.

#### Lecturers

Marjorie A. Bates, Ph.D.  
 Max Kopelevich, Ph.D.  
 Betty A. Luceigh, Ph.D.  
 John K.M. Mouser, Ph.D.

#### Adjunct Professor

R. Stanley Williams, Ph.D.

#### Adjunct Associate Professor

Robert W. Armstrong, Ph.D.

## Scope and Objectives

Chemistry is concerned with the composition, structure, and properties of substances, the

transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

## Undergraduate Study

### Admission

Students entering UCLA directly from high school who declare a Chemistry or Biochemistry major at the time of application are automatically admitted to that major.

UCLA students who wish to enter one of the majors must have a minimum grade of C- in each of the preparation for the major courses completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed courses for the major must also average at least 2.0.

### Transfer Students

To be admitted to the departmental majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general chemistry with laboratory for majors, one and one half years of calculus, and either one year of calculus-based physics with laboratory or one year of organic chemistry for majors. Biochemistry majors must also complete courses equivalent to Life Sciences 2 and 3; Chemistry majors should have completed the equivalent of Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 30A. Transfer students should consult the Undergraduate Advising Office in 4009 Young Hall for assistance with the articulation of transfer coursework.

### Chemistry Diagnostic Examination for First-Quarter General Chemistry

Students planning to enroll in Chemistry and Biochemistry 14A, 17, 20A, or 20AH are required to pass the Chemistry Diagnostic Examination, which is administered at all first-year sessions of the summer Orientation Program and prior to the beginning of each term. For the dates and times of future examinations and a list of topics to be covered on the examination, refer to <http://www.chem.ucla.edu/dept/Ugrad/chemexam.html>. Scores are only valid for two academic years.

Students who do not pass the examination may enroll in Chemistry 17, offered only in Fall Quarter on a Passed/Not Passed basis. Chemistry 17 carries no graduation credit but does

displace 4 units on the UCLA Study List. Students who pass the course are not required to retake the Chemistry Diagnostic Examination.

### Advanced Placement in Chemistry

Students who have taken the Advanced Placement (AP) Chemistry Test and obtained a score of 4 or 5 receive 8 units of chemistry credit and may petition for chemistry and biochemistry equivalency, or may take course 20A at UCLA. Everyone planning to take Chemistry and Biochemistry 14A or 20A or 20AH must take the Chemistry Diagnostic Examination. If students received a score of 3 on the AP Chemistry Test, they receive 8 units of chemistry credit but no course equivalency.

### Credit Limitations

Students may not take or repeat a chemistry or biochemistry course for credit if it is a requisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Chemistry and Biochemistry 20A, they must do so before completing course 20B).

### Undergraduate Majors

The department offers three majors: Chemistry (with concentrations in chemistry and physical chemistry), Biochemistry, and General Chemistry. The Chemistry and Biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The General Chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Requirements for the majors are outlined below. For additional information, contact the Undergraduate Advising Office in 4009 Young Hall.

### Chemistry B.S.

The B.S. degree program is for students who intend to pursue a career in chemistry.

### Chemistry Concentration

#### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4BL.

#### The Major

*Required:* Chemistry and Biochemistry 110A, either 110B or C113B, 113A, 114 (or 114H), either 136 or 144, 153A, 153L, 171, C172, and two other upper division or graduate courses in

the department, including at least one additional laboratory course from 136, 144, 154, C174, 184.

### Physical Chemistry Concentration

The physical chemistry concentration is designed primarily for students who are interested in attending graduate school in physical chemistry/physics.

#### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B, 30BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4BL.

#### The Major

*Required:* Chemistry and Biochemistry 110A, 110B, 113A, C113B, 114 (or 114H), 153A, 171, C172; one additional upper division chemistry, electrical engineering, or physics laboratory course; and three elective upper division or graduate courses approved by the physical chemistry adviser. Refer to the Undergraduate Advising Office website at <http://www.chem.ucla.edu/dept/Ugrad/> for a list of approved electives.

By the junior year, students are strongly encouraged to join a research group within the physical chemistry division to obtain firsthand experience with state-of-the-art physical chemistry research.

### Biochemistry B.S.

The B.S. degree program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

#### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A (33A strongly recommended); Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH) and 4BL, or 6A, 6B, and 6C.

#### The Major

*Required:* Chemistry and Biochemistry 110A, 153A, 153B, 153C, 153L, 154, 156, 171; one additional upper division or graduate course in chemistry and biochemistry; and four elective upper division or graduate courses (16 units) approved by the undergraduate adviser (Microbiology and Molecular Genetics 101 and 101L highly recommended). Refer to the Undergraduate Advising Office website at <http://www.chem.ucla.edu/dept/Ugrad/> for a list of approved electives.

### General Chemistry B.S.

The B.S. degree program is for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of pharmacy, dentistry, or public health. This major cannot be taken as

part of a double major. Students must declare the major before reaching 135 units.

#### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4BL.

Students must complete the preparation courses with at least a 2.0 grade-point average.

#### The Major

*Required:* Chemistry and Biochemistry 110A, 153A, 153L, 171; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 grade-point average is required in all upper division courses in the department. Acceptance into the major is based on an original written proposal that is coherent in terms of student interests and objectives. The proposal should specify which courses students plan to apply toward the major and requires the approval of the faculty adviser.

### Computing Specialization

Majors in Chemistry and Biochemistry may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and one course from 10C, 15, 20A, 30, or 60, and (3) completing two computational chemistry courses from Chemistry and Biochemistry C126A, C145, C160. Courses need to be completed with a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Undergraduate Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

#### Graduate Degrees

The Department of Chemistry and Biochemistry offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Chemistry and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biochemistry and Molecular Biology.

### Admission

Applicants planning to work toward the Ph.D. degree should not seek an M.S. degree first but should apply directly to the Ph.D. program. Application materials may be obtained by contacting the department directly.

In addition to the University minimum requirements, an excellent undergraduate record is required of all applicants. Graduate Record Examination (GRE) General and Subject Tests are recommended. The GRE and the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination are required for international students. A departmental application and statement of purpose are required.

Students admitted to the Ph.D. program in Chemistry are given orientation examinations at the beginning of the first quarter. This is designed to help the student and adviser plan a course of study. The examinations include material covered in upper division courses in physical, organic, and inorganic chemistry. Chemistry students are encouraged to become familiar with research activities of all faculty in their area of interest and to join a research group as soon as possible. Evening or afternoon seminars are given in which faculty members present their research programs. Students should go to each talk in their area and any talks that interest them in other areas.

There are no orientation examinations in biochemistry and molecular biology; students plan a course program in consultation with the biochemistry area adviser. Biochemistry and molecular biology students rotate through three research groups during the Fall, Winter, and Spring Quarters, with a final selection made at the end of Spring Quarter.

### Master's Degrees

For areas of specialization, see Doctoral Degrees.

#### Chemistry

The M.S. degree is offered through the comprehensive examination and thesis plans; the examination plan is available only in exceptional cases. Thirty-six units of coursework are required, of which at least 20 units must be at the graduate level. Students must take a minimum of two courses in their major area and one course in an outside area. Up to 24 units of individual study coursework may be applied toward the total course requirement; up to 20 units may be applied toward the graduate course requirement.

#### Biochemistry and Molecular Biology

The M.S. degree is offered through the comprehensive examination and thesis plans; the examination plan is available only in exceptional cases. Thirty-six units of coursework are required, of which at least 20 units must be at the graduate level. Up to 24 units of individual study coursework may be applied toward the

total course requirement; up to 8 units may be applied toward the graduate course requirement. Up to 6 units of graduate-level seminar courses may be applied toward the graduate course requirement.

## Doctoral Degrees

Areas of specialization include biochemistry and molecular biology; inorganic, organic, and physical chemistry.

## Chemistry

Students should normally complete a required minimum of coursework in each area of specialization (inorganic, organic, and physical). This coursework includes required background material, orientation examinations in the specialization, and required and elective courses. Some of the requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program.

Students in organic chemistry must write a first-year report for their adviser and one other organic chemist covering their progress and accomplishments in the laboratory.

One year of teaching experience is generally required.

Written and oral qualifying examinations are required. Students take a series of written tests called cumulative examinations that are designed to encourage and evaluate the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which consists of the oral presentation of an original research proposal in an area distinct from their research and includes questions on the proposal, general knowledge of the area, and research progress.

## Biochemistry and Molecular Biology

Students should normally complete a required minimum of coursework. This coursework includes required background material (e.g., organic and physical chemistry, biochemistry laboratory experience), required courses in macromolecular structure, safety in chemical and biochemical research, and other research seminars, lecture courses in three specific categories (e.g., cell biology and metabolism), and three laboratory rotations. Some of the requirements can be met on the basis of courses taken prior to entry into the graduate program, with consent of the faculty graduate adviser.

One year of teaching experience is generally required.

Written and oral qualifying examinations are required. The written examination requirement is coupled to the graduate student seminars over three quarters and involves submission of three different types of reports.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which consists of the oral presentation of an original research proposal in an area distinct from their research and includes questions on the proposal, general knowledge of the area, and research progress.

## Chemistry and Biochemistry

### Lower Division Courses

**2. Introductory Chemistry. (4)** Lecture, two hours; discussion, two hours. Not open to students with credit for course 14A or 20A or former course 10A or 11A. Concept of submicroscopic world of chemistry, ranging from protons to proteins in subject matter. P/NP or letter grading.

**14A. Chemical Structures and Equilibria. (4)** (Formerly numbered 10A.) Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of Chemistry Diagnostic Examination. Not open to students with credit for course 20A or former course 11A. Introduction to physical and general chemistry needed for the life sciences. Quantum chemistry, atoms, atomic properties, and chemical bonding in molecules, phase changes, equilibria, and acids and bases. P/NP or letter grading.

**14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisite: course 14A or former course 10A with a grade of C- or better. Not open to students with credit for course 20B or 30A or former course 10B, 10C, 10D, 10E, or 30. Introduction to physical and organic chemistry for life sciences students. First and second laws of thermodynamics, thermochemistry, free energy, electrochemistry, kinetics, mechanisms, and catalysis. General classes of organic molecules and functional groups, stereoisomers, spectroscopy. P/NP or letter grading.

**14BL. General and Organic Chemistry Laboratory I. (2)** (Formerly numbered 10BL.) Lecture, one hour; laboratory, three hours. Enforced prerequisite: course 14A or former course 10A with a grade of C- or better. Enforced corequisite: course 14B. Not open to students with credit for course 20L. Introduction to volumetric, spectrophotometric, and potentiometric analysis. Use and preparation of buffers and pH meters. Synthesis and kinetics techniques using compounds of interest to students in life sciences. P/NP or letter grading.

**14C. Organic Molecular Structures and Interactions. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisites: course 14B or former courses 10B and 10C with grades of C- or better. Not open to students with credit for course 30A or 30B or former course 10D, 10E, 30, or 130A. NMR and mass spectrometry, conformational analysis, aromatics, oxygen- and nitrogen-containing organic molecules, transition metals and organometallics, supramolecular chemistry and molecular interactions. P/NP or letter grading.

**14CL. General and Organic Chemistry Laboratory II. (3)** (Formerly numbered 10DL.) Lecture, one hour; laboratory, six hours. Enforced prerequisites: courses 14B (or former courses 10B and 10C) and 14BL (or former course 10BL) with grades of C- or better. Enforced corequisite: course 14C. Synthesis and analysis of compounds; purification by extraction, chromatography, recrystallization, and sublimation; characterization by mass spectroscopy, UV, NMR, and IR spectroscopy, optical activity, electrochemistry, pH titration. P/NP or letter grading.

**14D. Organic Reactions, Pharmaceutical Structures, and Activities. (4)** (Formerly numbered 140.) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 14C with a grade of C- or better. Not open to students with credit for former course 10D or 10E. Organic reactions, nucleophilic and electrophilic substitutions and additions; electrophilic aromatic substitutions, carbonyl reactions, catalysis, molecular basis of drug action, and organic chemistry of pharmaceuticals. P/NP or letter grading.

**15. Survey of Organic Chemistry and Biochemistry. (4)** Enforced prerequisite: former course 11A with a grade of C- or better. Not open to students with credit for former course 132A. Recommended for students in prenursing, prephysical therapy, and pre dental hygiene. Does not satisfy requirements for admission to medical and dental schools. Introduction to structures and reactions of organic compounds, particularly with respect to their roles and transformations in living systems.

**15L. Laboratory in Elementary Organic Chemistry and Biochemistry. (1)** Laboratory, four hours. Enforced corequisite: course 15 with a grade of C- or better. Does not satisfy requirements for admission to medical and dental schools. Introduction to quantitative work with aqueous solutions and to preparation, isolation, and characterization of organic compounds, particularly some of those important in living systems.

**17. Chemical Principles. (No credit)** Lecture, four hours; laboratory, two hours. Chemistry 17 displaces 4 units on student's Study List but yields no credit toward a degree. Introduction to chemical principles: numbers, measurements, chemical calculations, gas laws, solutions, acids, bases, and salts, molecular structure, and nomenclature. Collaborative learning and problem solving; introduction to chemistry laboratory practice. P/NP grading.

**20A. Chemical Structure. (4)** Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics. Recommended: high school physics. Enforced prerequisite: successful completion of Chemistry Diagnostic Examination. First term of general chemistry. Survey of chemical processes, quantum chemistry, atomic and molecular structure and bonding, molecular spectroscopy. P/NP or letter grading.

**20AH. Chemical Structure (Honors). (4)** Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background, high school physics, and three and one-half years of high school mathematics. Enforced prerequisite: successful completion of Chemistry Diagnostic Examination. Honors course parallel to course 20A. P/NP or letter grading.

**20B. Chemical Energetics and Change. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisite: course 20A with a grade of C- or better. Second term of general chemistry. Intermolecular forces and organization, phase behavior, chemical thermodynamics, solutions, equilibria, reaction rates and laws. P/NP or letter grading.

**20BH. Chemical Energetics and Change (Honors). (4)** Lecture, three hours; discussion, one hour. Enforced prerequisite: course 20A with a grade of B+ or better or 20AH with a grade of B or better. Honors course parallel to course 20B. P/NP or letter grading.

**20L. General Chemistry Laboratory. (2)** Lecture, one hour; laboratory, three hours. Enforced prerequisite: course 20A with a grade of C- or better. Enforced corequisite: course 20B. Use of the balance, volumetric techniques, volumetric and potentiometric analysis; Beer's law, applications for environmental analysis and materials science. P/NP or letter grading.

**30A. Chemical Dynamics and Reactivity: Introduction to Organic Chemistry. (4)** (Formerly numbered 30.) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 20B with a grade of C- or better. First term of organic chemistry. Mechanisms of organic and inorganic reactions, including redox, elimination, addition, substitution, and radical processes. P/NP or letter grading.

**30AH. Chemical Dynamics and Reactivity: Introduction to Organic Chemistry (Honors). (4)** (Formerly numbered 30H.) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 20B or 20BH with a grade of B+ or better. Honors course parallel to course 30A. P/NP or letter grading.

**30AL. General Chemistry Laboratory. (3)** (Formerly numbered 30L.) Lecture, one hour; laboratory, six hours. Enforced prerequisites: courses 20B (or 20BH) and 20L with grades of C- or better. Enforced corequisite: course 30A or 30AH. Qualitative and quantitative analysis of chemical reactions and compounds, kinetics, separations, and spectroscopy. P/NP or letter grading.

**30B. Organic Chemistry: Reactivity and Synthesis, Part I. (4)** (Formerly numbered 130A.) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 30A or 30AH with a grade of C– or better. Second term of organic chemistry. Synthesis, properties, and reactions of organic functional groups, including alcohols, alkenes, alkynes, aromatic compounds, aldehydes, ketones, carboxyl derivatives, and amines. P/NP or letter grading.

**30BL. Organic Chemistry Laboratory. (2)** (Formerly numbered 130AL.) Lecture, one hour; laboratory, four hours. Enforced prerequisites: courses 30A (or 30AH) and 30AL with grades of C– or better. Enforced corequisite: course 30B. Basic experimental techniques in organic synthesis (distillation, extraction, crystallization, and performing reactions) and organic analytical chemistry (melting and boiling point, refractive index, chromatography, IR, NMR, GC). Single and multistep synthesis of known organic molecules on microscale level. P/NP or letter grading.

**30C. Organic Chemistry: Reactivity and Synthesis, Part II. (4)** (Formerly numbered 130B.) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 30B with a grade of C– or better. Third term of organic chemistry. Organic spectroscopy, including proton and carbon NMR, infrared mass and UV/Vis; pericyclic reactions and molecular orbital theory; dicarbonyl compounds; polyfunctional aromatic chemistry; heterocyclic compounds; and carbohydrates. P/NP or letter grading.

**30CL. Organic Chemistry Laboratory. (2)** (Formerly numbered 130BL.) Lecture, one hour; laboratory, four hours. Enforced prerequisites: courses 30B and 30BL with grades of C– or better. Enforced corequisite: course 30C. Modern techniques in synthetic organic and analytical organic chemistry. Micro-preparative and semi-preparative scale multistep synthesis of known organic molecules. One- and two-dimensional multinuclear NMR techniques. Written reports and proposals. P/NP or letter grading.

**88A-88Z. Lower Division Seminars. (2-2)** Seminar, two hours. Limited to freshmen/sophomores. General introduction to frontiers of molecular sciences or intensive exploration of a particular theme or topic. Consult *Schedule of Classes* for topics and instructors. P/NP or letter grading.

**88A. Serendipity in Science. (2)** Limited to 20 freshmen. Inquiry into unexpected discoveries in science that have had significant impact on society and analysis of circumstances which brought these about, beginning with discovery of helium in the sun by Janssen in 1868 (using the newly developed field of spectroscopy). Discovery of X rays by Röntgen in 1895 and of radioactivity by Becquerel in 1896. Other topics include discoveries important to medicine, such as penicillin by Fleming in 1928 and *cis*-platin by Rosenberg in 1969.

**96. Special Courses in Chemistry. (1 to 4)** To be arranged. May be repeated for a maximum of 8 units.

## Upper Division Courses

**103. Environmental Chemistry. (4)** Lecture, four hours; discussion, one hour. Requisites: courses 30B, 30BL, 110A, 153A (or 153AH), 153L. Chemical aspects of air and water pollution, solid waste disposal, energy resources, and pesticide effects. Chemical reactions in the environment and effect of chemical processes on the environment. P/NP or letter grading.

**M104. Environmental Chemistry Laboratory. (4)** (Same as Atmospheric Sciences M140.) Lecture, two hours; laboratory, three hours. Requisite: course 20B. Laboratory experience for students who wish to pursue a career in environmental science. Essential laboratory procedures to be performed in context of timely environmental issues involving smog formation, acid rain, and ozone depletion. Hands-on experience using scientific instruments and analytical techniques appropriate for environmental assessment. P/NP or letter grading.

**110A. Physical Chemistry: Chemical Thermodynamics. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 20B, Mathematics 32A or 3C (for life sciences majors), Physics 1A, 1B, and 1C (may be taken concurrently), or 1AH, 1BH, and 1CH (may be taken concurrently), or 6A, 6B, and 6C (may be taken concurrently). Fundamentals of thermodynamics, chemical and phase equilibria, thermodynamics of solutions, electrochemistry. P/NP or letter grading.

**110B. Physical Chemistry: Introduction to Statistical Mechanics and Kinetics. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: courses 110A, 113A, Mathematics 32B. Kinetic theory of gases, principles of statistical mechanics, statistical thermodynamics, equilibrium structure and free energy, relaxation and transport phenomena, macroscopic chemical kinetics, molecular-level reaction dynamics. P/NP or letter grading.

**113A. Physical Chemistry: Introduction to Quantum Mechanics. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 20B, Mathematics 32A, 32B, 33A, Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or 6A, 6B, and 6C. Departure from classical mechanics: Schrödinger vs. Newton equations; model systems: particle-in-a-box, harmonic oscillator, rigid rotor, and hydrogen atom; approximation methods: perturbation and variational methods; many-electron atoms, spin, and Pauli principle, chemical bonding. P/NP or letter grading.

**C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C213B. P/NP or letter grading.

**114. Physical Chemistry Laboratory. (4)** Lecture, two hours; laboratory, eight hours. Requisites: courses 30L (or former course 11CL), 110A, 110B or C113B, 113A. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics. P/NP or letter grading.

**114H. Physical Chemistry Laboratory (Honors). (4)** Lecture, two hours; laboratory, eight hours. Requisites: courses 30L (or former course 11CL), 110A, 110B or C113B, 113A, with grades of B or better. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with instructor. P/NP or letter grading.

**C115A-C115B. Quantum Chemistry. (4-4)** Lecture, four hours; discussion, one hour. Requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is requisite to C115B. Students entering course C115A are normally expected to take course C115B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

**121. Special Topics in Physical Chemistry. (4)** Lecture, four hours. Requisite: course 110B. Recommended: course 113A. Topics of considerable research interest presented at level suitable for students who have completed junior-year courses in physical chemistry. P/NP or letter grading.

**C123A-C123B. Classical and Statistical Thermodynamics. (4-4)** Lecture, four hours; discussion, one hour. Requisite: course 110B or 156. Recommended: course 113A. Rigorous presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C223A-C223B.

**125. Computers in Chemistry. (4)** Lecture, three hours. Preparation: working knowledge of FORTRAN IV or PL/1. Requisites: courses 110A, 110B, 113A. Discussion of computer techniques, including matrix manipulation, solution of differential equations, data acquisition, and instrumental control, and their applications to chemical problems in quantum mechanics, thermodynamics, and kinetics.

**C126A. Computational Methods for Chemists. (4)** Lecture, four hours; laboratory, four hours. Preparation: programming experience in either Basic, Fortran, C, C++, Java, or Pascal. Requisites: course 110A, Mathematics 33A. Theoretical, numerical, and programming tools for constructing new chemical applications, including simple force fields and resulting statistical mechanics for simple molecules, simple ab-initio methods for organic molecules and nanotubes, and classical dynamics and spectroscopy. Concurrently scheduled with course C226A. P/NP or letter grading.

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**136. Organic Structural Methods. (4)** Lecture, two hours; laboratory, eight hours. Requisites: courses 130B/130BL or former courses 132C/132CL with grades of C– or better. Laboratory course in organic structure determination by chemical and spectroscopic methods; micro-techniques. P/NP or letter grading.

**C143A. Structure and Mechanism in Organic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 30C and 30CL (may be taken concurrently), 110B, 113A, with grades of C– or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C243A. P/NP or letter grading.

**C143B. Mechanism and Structure in Organic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisite: course C143A with a grade of C– or better. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B.

**144. Practical and Theoretical Introductory Organic Synthesis. (5)** Lecture, two hours; laboratory, eight hours. Enforced prerequisites: courses 30C and 30CL with grades of C– or better. Lectures on modern synthetic reactions and processes, with emphasis on stereospecific methods for carbon-carbon bond formation. Laboratory methods of synthetic organic chemistry, including reaction techniques, synthesis of natural products, and molecules of theoretical interest. P/NP or letter grading.

**C145. Theoretical and Computational Organic Chemistry. (4)** Lecture, two hours; discussion, one hour; computer laboratory, one hour. Requisites: courses 113A, 130B. Applications of quantum mechanical concepts and methods to understand and predict organic structures and reactivities. Computational modeling methods, including laboratory experience with force-field and quantum mechanical computer calculations. Concurrently scheduled with course C245. P/NP or letter grading.

**153A. Biochemistry: Introduction to Structure, Enzymes, and Metabolism. (4)** Lecture, four hours; discussion, one hour. Requisite: course 14D or 30B with a grade of C– or better. Recommended: Life Sciences 2, 3. Structure of proteins, carbohydrates, and lipids; enzyme catalysis and principles of metabolism, including glycolysis, citric acid cycle, and oxidative phosphorylation. P/NP or letter grading.

**153AH. Biochemistry: Introduction to Structure, Enzymes, and Metabolism (Honors). (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 14D or 30B with a grade of C– or better. Recommended: Life Sciences 2, 3. Honors course parallel to course 153A. P/NP or letter grading.

**153B. Biochemistry: DNA, RNA, and Protein Synthesis. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 153A or 153AH, Life Sciences 2, 3. Nucleotide metabolism; DNA replication; DNA repair; transcription machinery; regulation of transcription; RNA structure and processing; protein synthesis and processing. P/NP or letter grading.

**153BH. Biochemistry: DNA, RNA, and Protein Synthesis (Honors). (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 153A or 153AH, Life Sciences 2, 3. Honors course parallel to course 153B. P/NP or letter grading.

**153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 153A or 153AH. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes. P/NP or letter grading.

**153CH. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation (Honors). (4)** Lecture, three hours; discussion, two hours. Requisite: course 153A or 153AH. Honors course parallel to course 153C. P/NP or letter grading.

**CM153G. Macromolecular Structure. (6)** (Same as Biological Chemistry CM153G and Human Genetics CM153G.) Lecture, five hours. Requisites: courses 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Letter grading.

**153L. Biochemical Methods I. (4)** Lecture, two hours; laboratory, four hours. Enforced requisites: courses 14CL and 14D, or 30B and 30BL, and 153A or 153AH (may be taken concurrently), with grades of C– or better. Integrated term-long project involving characterization of an enzyme purified from meat obtained at local butcher. Techniques include ammonium sulfate fractionation, affinity chromatography, protein and enzyme assays, polyacrylamide gel electrophoresis, gel exclusion chromatography, and enzyme kinetic analysis. P/NP or letter grading.

**154. Biochemical Methods II. (4)** Lecture, two hours; laboratory, eight hours. Requisites: courses 153A or 153AH, 153B or 153BH, 153L. Recommended: course 156. Two to three major laboratory projects using biochemical laboratory techniques to investigate contemporary problems in biochemistry. Topics include transcription activation, molecular basis of DNA-protein interactions, biochemical basis of platelet activation, and initiation of blood clotting cascade. Experiments entail characterizing function of proteins, nucleic acids, and lipids involved in these processes. P/NP or letter grading.

**CM155. Biological Catalysis. (4)** (Same as Molecular, Cell, and Developmental Biology CM160.) Requisites: courses 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM255.

**156. Physical Biochemistry. (4)** Lecture, four hours; discussion, one hour. Requisites: courses 110A, 153A. Biochemical kinetics; solution thermodynamics of biochemical systems; multiple equilibria; hydrodynamics; energy levels, spectroscopy, and bonding; topics from structural, statistical, and electrochemical methods of biochemistry.

**CM159A. Mechanisms in Regulation of Transcription I. (2)** (Same as Biological Chemistry CM159A.) First five weeks. Lecture, four hours. Requisites: courses 153B, 154. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading.

**CM159B. Mechanisms in Regulation of Transcription II. (2)** (Same as Biological Chemistry CM159B.) Second five weeks. Lecture, four hours. Requisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

**C160. Bioinformatics and Genomics. (4)** Lecture, three hours; discussion, one hour. Genomics and bioinformatics results and methodologies, with emphasis on concepts behind rapid development of these fields. Focus on how to think genomically via case studies showing how genomics questions map to computational problems and their solutions. Concurrently scheduled with course CM260. P/NP or letter grading.

**C161A. Plant Biochemistry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 153C. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C261A.

**C165. Metabolic Control by Protein Modification. (2)** First five weeks. Lecture, three hours; discussion, one hour. Requisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C265.

**CM170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4)** (Same as Molecular, Cell, and Developmental Biology M170.) Lecture, two to three hours; discussion, zero to two hours. Requisites: courses 153A and 153B, or Life Sciences 3, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course C270. P/NP or letter grading.

**171. Intermediate Inorganic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 30B with a grade of C– or better. Chemical bonding; structure and bonding in the solid state; main group, transition metal, lanthanide and actinide compounds and reactions; catalysis, spectroscopy, special topics. P/NP or letter grading.

**C172. Advanced Inorganic Chemistry. (4)** (Formerly numbered 172.) Lecture, three hours; discussion, one hour. Requisite: course 171 with a grade of C– or better. Systematic approach to modern inorganic chemistry, structure and bonding of inorganic molecules and solids, structure/reactivity relationships, vibrational spectra of complexes, electronic structure and ligand-field theory, mechanisms of inorganic reactions, bonding and spectroscopy of organometallic compounds, transition metals in catalysis and biology. Concurrently scheduled with course C273. P/NP or letter grading.

**C174. Inorganic and Metalorganic Laboratory Methods. (4)** (Formerly numbered 174.) Lecture, two hours; laboratory, eight hours. Requisites: courses 130A/130AL or former courses 132B/132BL, and C172 or former course 173. Synthesis of inorganic compounds, including air-sensitive materials; Schlenck techniques; chromatographic and ion exchange methods; spectroscopic characterization and literature applications. Concurrently scheduled with course C274. P/NP or letter grading.

**C175. Inorganic Reaction Mechanisms. (4)** Lecture, three hours. Requisites: courses 110A, 110B, 113A, and C172 or former course 173. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C275. P/NP or letter grading.

**C176. Group Theory and Applications to Inorganic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 113A, and C172 or former course 173. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C276A. P/NP or letter grading.

**C180. Solid-State Chemistry. (4)** Lecture, three hours. Requisite: course C172 or former course 173. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C280. P/NP or letter grading.

**C181. Polymer Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 30B, 110A. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C281. P/NP or letter grading.

**184. Chemical Instrumentation. (4)** Lecture/quiz, two hours; laboratory, eight hours. Requisite: course 110A. Theory and practice of instrumental techniques of chemical and structural analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods.

**190. Undergraduate Thesis Research. (4)** Requisites: two terms of course 199 on related material. Final term of integrated one-year research project. May consist of experimental and/or theoretical research or, in some cases, comprehensive review of a given area. Thesis embodying totality of year's work to be submitted and oral presentation made. Course suggested, but not required, for those seeking departmental honors at graduation.

**191. Advanced Undergraduate Research. (1)** Requisite: course 199B (4 units). To be arranged with faculty member who directs the research. Additional information may be obtained from undergraduate office. May be repeated for a maximum of 4 units.

**196A-196F. Special Courses in Chemistry. (1 to 4 each)** Hours to be arranged.

**199A. Directed Individual Studies or Research for Undergraduate Students. (2 to 8)** Designed for departmental juniors with at least 3.0 grade-point average in major and departmental seniors. To be arranged with faculty member who directs the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of 8 units. P/NP grading.

**199B. Directed Individual Studies or Research for Undergraduate Students. (2 to 4)** Requisite: course 199A (8 units). Designed for departmental juniors with at least 3.0 grade-point average in major and departmental seniors. To be arranged with faculty member who directs the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of 4 units. P/NP or letter grading.

## Graduate Courses

**202. Bioinformatics Interdisciplinary Research Seminar. (2)** Seminar, one hour. Concrete examples of how biological questions about genomics data map to and are solved by methodologies from other disciplines, including statistics, computer science, and mathematics. May be repeated for credit. S/U grading.

**203. Research Ethics Seminar. (2)** Seminar, 90 minutes. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Required of all first- and second-year students in program. Informal discussions on case histories for responsible conduct of research. May be repeated for credit. S/U grading.

**204. Student Research Seminar. (2)** Seminar, one hour. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Required of all third-year students. Research seminar presented by students in their third year of support in program. S/U grading.

- 205. Introduction to Chemistry of Biology. (4)** Lecture, three hours. Overview of biochemistry, pharmacology, and physiology, with emphasis on chemical interactions at molecular level.
- 206. Chemistry of Biology Seminar. (2)** Discussion, three hours. Limited to students supported by UCLA program in Chemistry/Biology Interface Predoctoral Training. Current research topics at interface of chemistry and biology. May be repeated for credit. S/U grading.
- 207. Organometallic Chemistry. (4)** Lecture/discussion, three hours. Requisite or corequisite: course C243A. Survey of synthesis, structure, and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis.
- 210. Scientific Glassblowing. (1)** Laboratory, one hour. Instruction in safe handling and manipulation of scientific glassware. Introduction to basic glassblowing techniques such as bending, annealing, and fire-polishing of glass. Proper cutting of glass and repairing of cracks. S/U grading.
- C213B. Physical Chemistry: Molecular Spectroscopy. (4)** Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C113B. Independent study project required of graduate students. S/U or letter grading.
- C215A-C215B. Quantum Chemistry: Methods. (4-4)** Lecture, four hours; discussion, one hour. Requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B is requisite to C215B. Students entering course C215A are normally expected to take course C215B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B.
- 215C. Advanced Quantum Chemistry: Applications. (4)** Lecture, three hours; discussion, one hour. Requisites: course C215B, Physics 131. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.
- 215D. Molecular Spectra, Diffraction, and Structure. (4)** Lecture, three hours; discussion, one hour. Requisites: course C215B, Physics 131. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.
- 218. Physical Chemistry Student Seminar. (2)** Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.
- 219A-219Z. Seminars: Research in Physical Chemistry. (2 each)** Discussion, three hours. Advanced study and analysis of current topics in physical chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:
- 219B.** Chemistry and Physics of Surfaces.
- 219C.** Physical Chemistry of Complex Fluids.
- 219D.** Computer Simulation in Chemistry.
- 219E.** Dynamics of Molecule-Molecule and Molecule-Surface Reactions.
- 219F.** Environmental Chemistry and Global Cycling.
- 219G.** Gas Phase Kinetics and Photochemistry.
- 219H.** Spectroscopy and Dynamics of Molecules, Clusters, and Biological Systems.
- 219I.** Spectroscopy of Isolated Molecules, Complexes, and Clusters.
- 219J.** Chemistry and Biophysics of Interfaces.
- 219K.** Statistical Mechanics of Disordered Systems.
- 219L.** Modern Methods for Molecular Reactions and Structure.
- 219M.** Chemistry of Materials at High Pressures.
- 219N.** Cosmochemistry.
- 219O.** Chemistry and Physics of Nanostructures.
- 219P.** Statistical Mechanics of Complex Fluids.
- 219Q.** Ultrafast Studies of Chemical Reaction Dynamics in Condensed Phase.
- 219R.** Kinetic, Thermodynamic, and Interfacial Effects in Materials.
- 221A-221Z. Advanced Topics in Physical Chemistry. (2 to 4 each)** Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.
- C223A-C223B. Classical and Statistical Thermodynamics. (4-4)** Lecture, four hours; discussion, one hour. Requisite: course 110B or 156. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B.
- 223C. Statistical Mechanics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses C215B, C223B, Physics 131. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.
- 225. Chemical Kinetics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses C215B, C223B. Classical experimental and theoretical approaches to study of rates and mechanisms of chemical reactions. Modern experimental techniques and molecular-level theory of reaction dynamics. Examples of well-studied elementary reactions. S/U or letter grading.
- C226A. Computational Methods for Chemists. (4)** Lecture, four hours; laboratory, four hours. Preparation: programming experience in either Basic, Fortran, C, C++, Java, or Pascal. Requisites: course 110A, Mathematics 33A. Theoretical, numerical, and programming tools for constructing new chemical applications, including simple force fields and resulting statistical mechanics for simple molecules, simple ab-initio methods for organic molecules and nanotubes, and classical dynamics and spectroscopy. Concurrently scheduled with course C126A. S/U or letter grading.
- M227. Molecular Genetics of Bacteria and Phage. (4)** (Same as Microbiology M227, Microbiology and Immunology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Requisite: course CM253 or Biological Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.
- 228. Chemical Physics Seminar. (2)** Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.
- 229. Introduction to Physical Chemistry Research. (2)** Lecture, 90 minutes. Designed primarily for entering graduate physical chemistry students. S/U grading.
- M230B. Structural Molecular Biology. (4)** (Same as Molecular, Cell, and Developmental Biology M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.
- M230D. Structural Molecular Biology Laboratory. (2)** (Same as Molecular, Cell, and Developmental Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.
- 232. Stereochemistry and Conformational Analysis. (4)** Lecture/discussion, three hours. Requisite or corequisite: course C143A. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules.
- CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.
- 235A-235Z. Seminars: Research in Organic Chemistry. (2 each)** Discussion, three hours. Advanced study and analysis of current topics in organic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:
- 235A.** Synthesis of Natural Products and Biopolymers.
- 235B.** Design, Preparation, and Characterization of New Organic Materials.
- 235C.** Supramolecular Chemistry.
- 235D.** Modern Photochemistry and Biooxidants.
- 235E.** Theoretical and Physical Organic Chemistry.
- 235F.** Synthetic Methods and Synthesis of Natural Products.
- 235G.** Organometallic Chemistry and Organic Synthesis.
- 235H.** Reaction Mechanisms in Molecular Biology.
- 235I.** Fullerene Chemistry and Materials Science.
- 235J.** Organic and Bioorganic Chemistry.
- 235K.** Organic Chemistry in Organized and Restricted Media.
- 235L.** Supramolecular and Macromolecular Chemistry.
- 235M.** Organic Solid-State Chemistry.
- 236. Spectroscopic Methods of Organic Chemistry. (4)** Lecture, three hours. Requisite or corequisite: course C243A. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier transform NMR.
- 241A-241Z. Special Topics in Organic Chemistry. (2 to 4 each)** Requisite or corequisite: course C243A. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.
- 242. Organic Photochemistry. (4)** Lecture/discussion, three hours. Requisite or corequisite: course C243A. Interactions of light with organic molecules; mechanistic and preparative photochemistry.
- C243A. Structure and Mechanism in Organic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 30C and 30CL (may be taken concurrently), 110B, 113A, with grades of C- or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.
- C243B. Organic Chemistry: Mechanism and Structure. (4)** Lecture, three hours; discussion, one hour. Requisite: course C243A. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B.
- 244A. Organic Synthesis: Methodology and Stereochemistry. (4)** Modern synthetic reactions and transformations involving organic substrates. Special emphasis on reagents useful in asymmetric induction and stereoselective synthesis of structurally complex target molecules.

**244B. Strategy and Design in Organic Synthesis.**

(4) Lecture, three hours. Requisite or corequisite: course C243A. Theory behind the planning of syntheses of complex molecules from simpler ones. Organic reactions and their use in the synthetic process. Reasoning and art involved in organic synthesis.

**C245. Theoretical and Computational Organic Chemistry.** (4) (Formerly numbered 245.) Lecture, two hours; discussion, one hour; computer laboratory, one hour. Requisites: courses 113A, 130B. Applications of quantum mechanical concepts and methods to understand and predict organic structures and reactivities. Computational modeling methods, including laboratory experience with force-field and quantum mechanical computer calculations. Concurrently scheduled with course C145. S/U or letter grading.

**247. Organic Colloquium.** (2) Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

**248. Organic Chemistry Student Seminar.** (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

**249A. Problems in Advanced Organic Chemistry.** (4) Designed primarily for first-year graduate students as preparation for cumulative examinations. Introduction to organic chemistry research. Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry. S/U grading.

**249B. Problems in Advanced Organic Chemistry.** (2) Designed primarily for first- and second-year graduate students as preparation for cumulative examinations. Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. May be repeated for credit. S/U grading.

**250. Topics in Biochemistry and Molecular Biology of Animal Cells.** (4) Lecture, three hours. Preparation: courses in genetic and molecular biology. Requisites: courses 30C, 30CL, 153A or 153AH, 153B or 153BH, 153C or 153CH. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization. S/U or letter grading.

**251A-251Z. Advanced Topics in Biochemistry.** (2 each) Each course encompasses a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

**CM253. Macromolecular Structure.** (6) (Same as Biological Chemistry CM253 and Human Genetics CM253.) Lecture, five hours. Requisites: courses 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

**254. Advanced Biochemical Methods.** (4) Lecture, two hours; laboratory, eight hours. Requisite: course 156. Recommended: courses 153B, 153C. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems.

**CM255. Biological Catalysis.** (4) (Same as Biological Chemistry M255, Molecular, Cell, and Developmental Biology CM252, and Pharmacology M255.) Requisites: courses 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM155. Graduate students required to write research paper and present oral report on it.

**256A-256Z. Seminars: Research in Biochemistry.** (2 each) Discussion, three hours. Advanced study and analysis of current topics in biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**256A.** Biochemistry of Plasma Proteins.

**256B.** Biochemistry of Protein Function.

**256C.** Biochemistry and Molecular Genetics of Fungi.

**256D.** Transcriptional Control Mechanisms in *Drosophila* Embryogenesis.

**256E.** Secondary Metabolites in Higher Plants: Biosynthesis, Regulation, and Physiological Functions.

**256F.** Current Topics in Prokaryotic Development.

**256G.** Nucleic Acid Structure Determination by NMR.

**256H.** Basic Mechanisms of Promoter Activation.

**256J.** Contractile Proteins in Muscle Contraction and Cell Motility.

**256K.** Biochemistry and Molecular Biology of *Chlamydomonas*.

**256L.** Literature of Structural Biology.

**256M.** Mechanism and Regulation of Transcription Termination in Eukaryotic Organisms.

**256N.** Advanced Topics in Structural Biology.

**256O.** Membrane Biophysics.

**256P.** Analysis of Protein Structure.

**256Q.** Biochemistry and Function of Ubiquinone in Yeast and Higher Eukaryotes.

**256R.** Biomolecular Nuclear Magnetic Resonance Spectroscopy and Protein Structure.

**256S.** Proteome Bioinformatics.

**256T.** RNA Processing and RNA Genomics.

**256U.** Mitochondrial Biogenesis and Link to Disease.

**M257. Physical Chemistry of Biological Macromolecules.** (2) (Same as Biological Chemistry M257.) Requisites: courses 110A, 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

**258. Advanced Topics in Biochemistry and Molecular Biology.** (2) Lecture, two hours. Critical analysis of experimental design and methods in biochemistry and molecular biology. In-depth analysis of literature in one or more areas of current research. May be repeated for credit. S/U or letter grading.

**CM259A. Mechanisms in Regulation of Transcription I.** (2) (Same as Biological Chemistry CM259A.) First five weeks. Lecture, four hours. Requisite: course CM253 or M267. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. S/U or letter grading.

**CM259B. Mechanisms in Regulation of Transcription II.** (2) (Same as Biological Chemistry CM259B.) Second five weeks. Lecture, four hours. Requisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B. S/U or letter grading.

**CM260. Bioinformatics and Genomics.** (4) (Same as Human Genetics M260.) Lecture, three hours; discussion, one hour. Genomics and bioinformatics results and methodologies, with emphasis on concepts behind rapid development of these fields. Focus on how to think genomically via case studies showing how genomics questions map to computational problems and their solutions. Concurrently scheduled with course C160. S/U or letter grading.

**C261A. Plant Biochemistry.** (4) Lecture, three hours; discussion, one hour. Requisite: course 153C. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C161A.

**262. Biological Energy Transductions.** (4) Lecture, three hours. Requisites: courses 153B, 153C. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions.

**M263. Metabolism and Its Regulation.** (4) (Same as Biological Chemistry M263.) Lecture, three hours. Requisites: course 110A, and one course from 153B, 153C, or 156, or Biological Chemistry 201A and 201B. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

**M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics.** (2-2-2) (Same as Biological Chemistry M264A-M264B-M264C and Microbiology M264A-M264B-M264C.) Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

**C265. Metabolic Control by Protein Modification.** (2) First five weeks. Lecture, three hours; discussion, one hour. Requisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C165.

**266. Seminar: Techniques for Study of Gene Regulation.** (2) Requisites: courses CM259A, CM259B. Seminar to discuss specific experimental approaches being taken in study of gene regulation. Emphasis on specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.

**M267. Cell Structure, Signaling, and Differentiation.** (6) (Same as Biological Chemistry CM267, Human Genetics CM267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: courses 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Letter grading.

**268. Biochemistry Research Seminar.** (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U or letter grading.

**C270. Biochemistry and Molecular Biology of Photosynthetic Apparatus.** (2 to 4) Lecture, two to three hours; discussion, zero to two hours. Requisites: courses 153A and 153B, or Life Sciences 3, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course CM170. S/U or letter grading.

**271A-271Z. Advanced Topics in Inorganic Chemistry.** (2 to 4 each) Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.

**272A-272Z. Seminars: Research in Inorganic Chemistry.** (2 each) Discussion, three hours. Advanced study and analysis of current topics in inorganic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**272A.** Chemistry of Materials.

**272B.** Metalorganic, Inorganic Biometalorganic Chemistry.

**272C.** Inorganic Spectroscopy.

**272D.** Bioinorganic Chemistry and Biology of Transition Metals and Oxygen.

**272E.** Organometallic Synthesis and Chemical Vapor Deposition.

**272F.** Porphyrin-Based Lattice Clathrates.

**272G.** Issues in Chemical Education.

**272H.** Catalysis and Small Molecule-Activation Mediated by Transition-Metal Complexes.

**C273. Advanced Inorganic Chemistry.** (4) Lecture, three hours; discussion, one hour. Requisite: course 171 with a grade of C- or better. Systematic approach to modern inorganic chemistry, structure and bonding of inorganic molecules and solids, structure/reactivity relationships, vibrational spectra of complexes, electronic structure and ligand-field theory, mechanisms of inorganic reactions, bonding and spectroscopy of organometallic compounds, transition metals in catalysis and biology. Concurrently scheduled with course C172. S/U or letter grading.

**C274. Inorganic and Metalorganic Laboratory Methods. (4)** Lecture, two hours; laboratory, eight hours. Requisites: courses 130A/130AL or former courses 132B/132BL, and C172 or former course 173. Synthesis of inorganic compounds, including air-sensitive materials; Schlenk techniques; chromatographic and ion exchange methods; spectroscopic characterization and literature applications. Concurrently scheduled with course C174. S/U or letter grading.

**C275. Inorganic Reaction Mechanisms. (4)** Lecture, three hours. Requisites: courses 110A, 110B, 113A, and C172 or former course 173. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175. S/U or letter grading.

**C276A. Group Theory and Applications to Inorganic Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 113A, and C172 or former course 173. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.

**276B. Physical Methods in Inorganic Chemistry. (4)** Lecture, three hours. Requisite: course C276A. Theory and applications of spectroscopic techniques, including magnetic resonance and vibrational and surface science methods, to inorganic compounds and materials. S/U or letter grading.

**277. Crystal Structure Analysis. (4)** Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

**278. Inorganic Chemistry Student Seminar. (2)** Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

**279. Bioinorganic Chemistry. (4)** Lecture, three hours. Requisites: courses 110A, and 156 or C172 or former course 173. Role of metal ions in biology; introduction to metalloenzymes and metalloproteins; metal ion interactions with nucleic acids; metal ion metabolism. S/U or letter grading.

**C280. Solid-State Chemistry. (4)** Lecture, three hours. Requisite: course C172 or former course 173. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C180. S/U or letter grading.

**C281. Polymer Chemistry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 30B, 110A. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C181. S/U or letter grading.

**282. Introduction to Inorganic Chemistry Research. (2)** Lecture, 90 minutes. Discussion of current research in inorganic chemistry, designed primarily for entering graduate inorganic chemistry students. S/U grading.

**M370A. Integrated Science Instruction Methods. (4)** (Same as Earth and Space Sciences M370A and Physics M370A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: one introductory lower division year (including laboratory) each of chemistry, life sciences, and physics and at least two Earth science courses, preferably one with field experience. Classroom management, lesson design, assessment, history of science education. S/U or letter grading.

**M370B. Integrated Science Instruction Methods. (4)** (Same as Earth and Space Sciences M370B and Physics M370B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisite: course M370A or Earth and Space Sciences M370A or Physics M370A (or former course 370). Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Safety in Chemical and Biochemical Research. (2)** Survey of safe laboratory practices for experimental research in organic, inorganic, and physical chemistry and biochemistry. Topics include laser safety, cryogenic hazards, high- and low-pressure experimentation, gas and carcinogen handling, chemical spills, fire extinguishing, and chemical disposal. S/U grading.

**495. Teaching College Chemistry. (2)** Seminar, two hours; discussion, two hours; 20 hours training during week prior to Fall Quarter. Course for teaching assistants designed to deal with problems and techniques of teaching college chemistry. S/U grading.

**596. Directed Individual Study or Research. (2 to 16)** To be arranged with faculty member who directs the study or research. May be repeated for credit. S/U grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 4)** S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 16)** Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with the students.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Each faculty member supervises research of Ph.D. students and holds research group meetings, seminars, and discussions with the students.

## CHEMISTRY/ MATERIALS SCIENCE

*Interdepartmental Program  
College of Letters and Science*

UCLA

### Affiliated Faculty

#### Professors

Bruce S. Dunn, Ph.D. (*Materials Science and Engineering*)  
M. Frederick Hawthorne, Ph.D. (*Chemistry and Biochemistry*)  
James R. Heath, Ph.D. (*Chemistry and Biochemistry*)

Richard B. Kaner, Ph.D. (*Chemistry and Biochemistry*)  
King-Ning Tu, Ph.D. (*Materials Science and Engineering*)

Fred Wudl, Ph.D. (*Chemistry and Biochemistry*)

Jeffrey I. Zink, Ph.D. (*Chemistry and Biochemistry*)

### Associate Professors

Robin L. Garrell, Ph.D. (*Chemistry and Biochemistry*)

Mark S. Goorsky, Ph.D. (*Materials Science and Engineering*)

Yang Yang, Ph.D. (*Materials Science and Engineering*)

### Assistant Professor

Sarah H. Tolbert, Ph.D. (*Chemistry and Biochemistry*)

## Scope and Objectives

The Chemistry/Materials Science major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

## Undergraduate Study

### Chemistry/Materials Science B.S.

#### Preparation for the Major

*Required:* Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L, English Composition 3, Materials Science and Engineering 14, Mathematics 31A, 31B, 32A, 32B, 33A, Physics 1A, 1B, 1C, 4BL, Program in Computing 10A.

#### Transfer Students

To be admitted as Chemistry/Materials Science majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general chemistry with laboratory for majors, one organic chemistry course, one and one half years of calculus, and one year of calculus-based physics with laboratory.

#### The Major

*Required:* Chemistry and Biochemistry 110A, 110B, 113A, C113B or C115A and C115B, 114, 132A, 171, C172, 8 units from C123A, C123B, 130A, 130AL, 130B, 130BL, C174, C175, C176; Materials Science and Engineering 120, 131L or 161L, 131, 150, 160, 8 units from 110, 111, 121, 122, 130, 132, 143A, 162.

For further information, contact Leslie Hinman, Materials Science and Engineering, 6531 Boelter Hall, (310) 825-8916.

# CIVIL AND ENVIRONMENTAL ENGINEERING

Lawrence G. Selna, Ph.D.  
Michael K. Stenstrom, Ph.D.  
Keith D. Stolzenbach, Ph.D.  
William W-G. Yeh, Ph.D.

## Professors Emeriti

Stanley B. Dong, Ph.D.  
Michael E. Fournay, Ph.D.  
Poul V. Lade, Ph.D.  
Tung Hua Lin, D.Sc.  
Chung Yen Liu, Ph.D.  
Rokuro Muki, Ph.D.  
Richard L. Perrine, Ph.D.  
Moshe F. Rubinstein, Ph.D.  
Lucien A. Schmit, Jr., M.S.

## Associate Professors

Joel P. Conte, Ph.D.  
Patrick J. Fox, Ph.D.  
Thomas C. Harmon, Ph.D.  
Mladen Vucetic, Ph.D.  
John W. Wallace, Ph.D.

## Assistant Professor

Jonathan P. Stewart, Ph.D.

## Senior Lecturer

George J. Tauxe, M.S., *Emeritus*

## Adjunct Professors

John A. Dracup, Ph.D.  
Ne-Zheng Sun, Ph.D.

## Adjunct Associate Professor

Daniel E. Pradel, Ph.D.

## Scope and Objectives

The civil and environmental engineering programs at UCLA include structural engineering, structural mechanics, geotechnical engineering, earthquake engineering, water resources engineering, and environmental engineering.

The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, geotechnical engineering, water resources engineering, and environmental engineering. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in the areas of structures (including structural/earthquake engineering

and structural mechanics), geotechnical engineering, water resources engineering, and environmental engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

## Undergraduate Study

### Civil Engineering B.S.

The objective of the civil engineering curriculum is to give graduating seniors an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to produce well-qualified graduates for the engineering profession or for graduate civil engineering schools in the U.S.

### The Major

Course requirements are as follows (180 minimum units required):

1. Eight core courses: Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A, Civil and Environmental Engineering 1, 108, Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103
2. Civil and Environmental Engineering 120, 121, 130, 135A, 151, 153; one course involving a major design project from Civil and Environmental Engineering 135L, 144, 147, 157A, 157B, 157C; one mathematics course from Mechanical and Aerospace Engineering 174, 191A, 192A, 192B, 192C
3. Twenty-eight elective units, to be selected from the courses listed below, which must include 8 units of laboratory:

*Engineering Mechanics:* Civil and Environmental Engineering 130F, 130L, Mechanical and Aerospace Engineering 166C, 168

*Geotechnical Engineering:* Civil and Environmental Engineering 125, 128L, Earth and Space Sciences 100, 139

*Structures:* Civil and Environmental Engineering 135B, 135C, 135L, 137, 137L, 141, 142, 142L, 143, 144, 147

*Systems Analysis:* Civil and Environmental Engineering 106A

*Transportation Engineering:* Civil and Environmental Engineering 180

*Water Resources and Environmental Engineering:* Civil and Environmental Engineering 150, 154, 155, 156A, 156B, 157A, 157B, 157C, 160, 163, 164, 166

4. Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering

15; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL

5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Civil and Environmental Engineering offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Civil Engineering.

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. and Ph.D. programs are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the M.S. degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework that cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Applicants are encouraged to apply online. Application forms, including a departmental supplement to the application, may be found at <http://www.cee.ucla.edu> or by writing to the Student Affairs Office, Civil and Environmental Engineering Department, 5732 Boelter Hall, UCLA, Box 951593, Los Angeles, CA 90095-1593.

### Master's Degree

For major fields, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. At least nine courses are required, a majority of

which must be in the Civil and Environmental Engineering Department. At least five of the courses must be at the 200 level. Each major field has a set of required preparatory courses which are normally completed during undergraduate studies. Students should consult *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and the department for specific information on course requirements.

## Doctoral Degree

Major fields include environmental engineering, geotechnical engineering, structural mechanics, structural/earthquake engineering, and water resources engineering.

There is no formal course requirement for the Ph.D. degree, and students may theoretically substitute coursework by examinations. However, students normally take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields. The minor fields are chosen to support the major field and are usually subsets of other major fields.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Written and oral qualifying examinations are required. Students take a written preliminary examination in the major field. When the examination is passed and all coursework is completed, students take an oral preliminary examination that encompasses the major and minor fields.

After successful completion of both preliminary examinations, students take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research, as well as a review of the dissertation prospectus.

## Civil and Environmental Engineering

### Lower Division Courses

**1. Introduction to Civil Engineering. (2)** Lecture, two hours. Introduction to scope of civil engineering profession, including earthquake, environmental, geotechnical, structural, transportation, and water resources engineering. P/NP grading.

**3. Fundamentals of Environmental Engineering Science. (4)** Lecture, four hours; outside study, eight hours. Quantitative analysis of sources, transformations, and effects of pollutants in water, air, and soil. Topics include drinking water, wastewater, hazardous wastes, radioactive wastes, and atmospheric emissions. P/NP or letter grading.

**11. Patterns of Problem Solving. (4)** Lecture, four hours; outside study, eight hours. Introduction to creative patterns of problem solving and decision making. Discussion of attitudes and techniques productive in problem solving. Heuristic guides for knowledge acquisition, problem presentation, and problem solution. Tools and concepts for decision making that include technology and human values. Letter grading.

**15. Introduction to Computing for Civil Engineers. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering programs. Letter grading.

### Upper Division Courses

**101. Statics. (2)** Lecture, two hours; outside study, four hours. Requisites: Mathematics 31B, Physics 1B. Introduction to equilibrium principles for engineered systems. Study of internal forces and moments in beams, including relationships for shear, axial load, and moment diagrams. Introduction to support conditions and geometric properties of structural members. Letter grading.

**106A. Problem Solving in Engineering Economy. (4)** Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Problem-solving and decision-making framework for economic analysis of engineering projects. Foundation for understanding corporate financial practices and accounting. Decisions on capital investments and choice of alternatives for engineering applications in all fields. Introduction to use of engineering economics in analysis of inflation and public investments. Letter grading.

**108. Introduction to Mechanics of Deformable Solids. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 33A, Mechanical and Aerospace Engineering 102. Review of equilibrium principles; forces and moments transmitted by slender members. Concepts of stress and strain. Material constitution (stress-strain relations). Yield criteria. Structural applications to trusses, beams, shafts, columns, and pressure vessels. Letter grading.

**120. Principles of Soil Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 108. Soil as a foundation for structures and as a material of construction. Soil formation, classification, physical and mechanical properties, soil compaction, earth pressures, consolidation, and shear strength. Letter grading.

**121. Design of Foundations and Earth Structures. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 120. Design methods for foundations and earth structures. Site investigation, including evaluation of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures. Letter grading.

**125. Fundamentals of Earthquake Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 121, 137. Designed for seniors. Representations of earthquake ground motion, including response and Fourier spectra. Response of simple soil deposits and structures to ground motion. Hazard analysis by deterministic and probabilistic methods. Seismic design codes. Letter grading.

**128L. Soil Mechanics Laboratory. (4)** Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite or corequisite: course 120. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Soil classification, grain size distribution, Atterberg limits, specific gravity, compaction, expansion index, consolidation, shear strength determination. Design problems, laboratory report writing. Letter grading.

**130. Elementary Structural Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 108. Analysis of stress and strain, phenomenological material behavior, extension, bending, and transverse shear stresses in beams with general cross-sections, shear center, deflection of beams, torsion of beams, warping, column instability and failure. Letter grading.

**130F. Experimental Fracture Mechanics. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite: course 108. Elementary introduction to fracture mechanics and experimental techniques used in fracture, crack tip stress fields, strain energy release rate, fracture characterization, compliance calibration, surface flaws, fatigue crack growth and fatigue life of structural components, mixed mode fracture, and individual projects. Letter grading.

**130L. Experimental Structural Mechanics. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite or corequisite: course 130. Lecture and experiments in limit analysis of various aspects of structures. Elastic and plastic analysis of structural elements in multiaxial stress states. Buckling of columns, plates, and shells. Effects of actual boundary conditions on structural performance. Evaluation of structural fasteners. Letter grading.

**135A. Elementary Structural Analysis. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 11, 15, 108. Introduction to structural analysis; classification of structural elements; analysis of statically determinate trusses, beams, and frames; deflections in elementary structures; virtual work; analysis of indeterminate structures using force method; introduction to displacement method and energy concepts. Letter grading.

**135B. Intermediate Structural Analysis. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 135A. Analysis of truss and frame structures using matrix methods; matrix force methods; matrix displacement method; analysis concepts based on theorem of virtual work; moment distribution. Letter grading.

**135C. Computer Analysis of Structures. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 135A, 135B. Direct stiffness method of structural analysis, with emphasis on its application in computer analysis. Development of approximate analysis techniques for estimation/verification of computer results. Discussion of structural principles, including symmetry/antisymmetry, superposition, Mueller/Breslau principle for influence lines, and deflected shapes. Numerical procedure for linear algebraic equations. Letter grading.

**135L. Structural Design and Testing Laboratory. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 15, 135A. Limited enrollment. Computer-aided optimum design, construction, instrumentation, and test of a small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretically predicted behavior. Letter grading.

**137. Elementary Structural Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 135B. Basic structural dynamics course for civil engineering students. Elastic free, forced vibration, and earthquake response spectra analysis for single and multidegree of freedom systems. Axial, bending, and torsional vibration of beams. Letter grading.

**137L. Structural Dynamics Laboratory. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite or corequisite: course 137. Calibration of instrumentation for dynamic measurements. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic similitude. Letter grading.

**141. Steel Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 135B. Introduction to building codes. Fundamentals of load and resistance factor design of steel elements. Design of tension and compression members. Design of beams and beam columns. Simple connection design. Introduction to computer modeling methods. Letter grading.

**142. Design of Reinforced Concrete Structures. (4)** Lecture, three hours; discussion, three hours; outside study, six hours. Requisite: course 135A. Beams, columns, and slabs in reinforced concrete structures. Properties of reinforced concrete materials. Design of beams and slabs for flexure, shear, anchorage of reinforcement, and deflection. Design of columns for axial force, bending, and shear. Ultimate strength design methods. Letter grading.

**142L. Reinforced Concrete Structural Laboratory. (4)** Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite: course 142. Limited enrollment. Design considerations used for reinforced concrete beams, columns, slabs, and joints evaluated using analysis and experiments. Links between technical theory, building codes, and experimental results. Letter grading.

**143. Design of Prestressed Concrete Structures.**

(4) Lecture, four hours; outside study, eight hours. Requisite: course 135A. Prestressing and post-tensioning techniques. Properties of concrete and prestressing steels. Loss of prestress. Analysis of sections for flexural stresses and ultimate strength. Design of beams by allowable stress and strength methods. Load balancing design of continuous beams and slabs. Letter grading.

**144. Structural Systems Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 137, 141, 142. Design course for civil engineering students, with focus on design and performance of complete building structural systems. Uniform Building Code dead, live, wind, and earthquake loads. Design of concrete masonry building. Computer analysis of performance of designed building. Letter grading.

**147. Design and Construction of Tall Buildings.**

(4) Lecture, four hours; outside study, eight hours. Requisite: course 141. Limited enrollment. Introduction to total design process and professional participants. Systematic presentation of advantages and limitations of different structural forms and systems. Identification of critical design factors influenced by tallness. Foundation systems. Construction site visits, costing, and scheduling. Letter grading.

**150. Engineering Hydrology. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 103. Recommended: elementary probability. Precipitation, climatology, stream flow analysis, flood frequency analysis, groundwater, snow hydrology, hydrologic simulation. Possible field trips. Letter grading.

**151. Introduction to Water Resources Engineering. (4)**

Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 103. Principles of hydraulics, flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power. Introduction to system analysis and design applied to water resources engineering. Letter grading.

**153. Introduction to Environmental Engineering Science. (4)**

Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 103. Water, air, and soil pollution: sources, transformations, effects, and processes for removal of contaminants. Water quality, water and wastewater treatment, waste disposal, air pollution, global environmental problems. Field trip. Letter grading.

**154. Introduction to Environmental Aquatic Chemistry. (4)**

Lecture, four hours; outside study, eight hours. Requisites: course 153, Chemistry 20A, 20B, Mathematics 31A, 31B, Physics 1A, 1B. Description of chemical behavior of metals and anthropogenic/natural inorganic/organic compounds in natural fresh/marine surface waters and water treatment; acid-base chemistry, alkalinity, complexation, precipitation, sorption, redox, photochemistry, disinfection by-products, ozonation. Selected global chemical cycle(s). Letter grading.

**155. Unit Operations and Processes for Water and Wastewater Treatment. (4)**

Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 153. Biological, chemical, and physical methods used to modify water quality. Fundamentals of phenomena governing design of engineered systems for water and wastewater treatment systems. Field trip. Letter grading.

**156A. Environmental Chemistry Laboratory. (4)**

Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 153 (may be taken concurrently), Chemistry 20A, 20B. Basic laboratory techniques in analytical chemistry related to water and wastewater analysis. Selected experiments include gravimetric analysis, titrimetry spectrophotometry, redox systems, pH and electrical conductivity. Concepts to be applied to analysis of "real" water samples in course 156B. Letter grading.

**156B. Water Quality Control Laboratory. (4)**

Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 156A, Chemistry 20A, 20B. Characterization and analysis of typical natural waters and wastewaters for inorganic and organic constituents. Selected experiments include solids, nitrogen species, oxygen demand, chlorine, alkalinity, hardness, and trace analysis. Discussion of relevance of these measurements to water resource engineering. Letter grading.

**157A. Design of Water Resource Structures. (4)**

Lecture, four hours; outside study, eight hours. Requisites: course 151, Mechanical and Aerospace Engineering 103. Review design of hydraulic structures, pertinent fluid mechanics, and hydraulic theory and applications. Examples of failures and successes of hydraulic structures. Class project and field trip required. Letter grading.

**157B. Design of Water Treatment Plants. (4)**

Lecture, two hours; discussion, two hours; laboratory, four hours; other, four hours. Requisite: course 155. Water quality standards and regulations, overview of water treatment plants, design of unit operations, predesign of water treatment plants, hydraulics of plants, process control, and cost estimation. Letter grading.

**157C. Design of Wastewater Treatment Plants. (4)**

Lecture, four hours; outside study, eight hours. Requisite: course 155. Process design of wastewater treatment plants, including primary and secondary treatment, detailed design review of existing plants, process control, and economics. Letter grading.

**160. Environmental Monitoring and Data Analysis. (4)**

Lecture, four hours; outside study, eight hours. Requisites: courses 11, 15, 153, Mathematics 32A, 33A. Random and multistage sampling of environmental systems, empirical models and curve fitting, estimation of trends and statistical parameters, regression and correlation, factor analysis of multivariate data, kriging, monitoring network design and field experimental design, visual representation and computational mapping of environmental data. Letter grading.

**163. Introduction to Atmospheric Chemistry and Air Pollution. (4)**

Lecture, four hours; outside study, eight hours. Requisites: course 153, Chemistry 20A, 20B, Mathematics 31A, 31B, Physics 1A, 1B. Description of processes affecting chemical composition of troposphere: air pollutant concentrations/standards, urban and regional ozone, aerosol pollution, formation/deposition of acid precipitation, fate of anthropogenic/toxic/natural organic and inorganic compounds, selected global chemical cycle(s). Control technologies. Letter grading.

**164. Hazardous Waste Site Investigation and Remediation. (4)**

Lecture, four hours; outside study, eight hours. Requisites: courses 150, 153, Mechanical and Aerospace Engineering 103. Overview of hazardous waste types and potential sources. Techniques in measuring and modeling subsurface flow and contaminant transport in the subsurface. Design project illustrating a remedial investigation and feasibility study. Letter grading.

**166. Environmental Microbiology. (4)**

Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 153. Microbial cell and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

**166L. Environmental Microbiology and Biotechnology Laboratory. (4)**

Lecture, two hours; discussion, two hours; laboratory, four hours; outside study, four hours. Requisite: course 166. General laboratory practice within environmental microbiology, sampling of environmental samples, classical and modern molecular techniques for enumeration of microbes from environmental samples, techniques for determination of microbial activity in environmental samples, laboratory setups for studying environmental biotechnology. Letter grading.

**180. Introduction to Transportation Engineering. (4)**

Lecture, four hours; discussion, two hours; outside study, six hours. Designed for juniors/seniors. General characteristics of transportation systems, including streets and highways, rail, transit, air, and water. Capacity considerations including time-space diagrams and queueing. Components of transportation system design, including horizontal and vertical alignment, cross sections, earthwork, drainage, and pavements. Letter grading.

**199. Special Studies. (2 to 8)**

Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

**Graduate Courses**

**220. Advanced Soil Mechanics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. State of stress. Consolidation and settlement analysis. Shear strength of granular and cohesive soils. In situ and laboratory methods for soil property evaluation. Letter grading.

**221. Advanced Foundation Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 121, 220. Stress distribution. Bearing capacity and settlement of shallow foundations, including spread footings and mats. Performance of driven pile and drilled shaft foundations under vertical and lateral loading. Construction considerations. Letter grading.

**222. Soil Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. In-depth study of stress-strain behavior of soils under cyclic and dynamic loads caused by earthquakes, ocean waves, machine foundations, and similar items. Analysis of laboratory and field tests for determination of cyclic and dynamic soil properties. Effects of type of soil, degree of saturation, and loading conditions on cyclic properties. Letter grading.

**223. Earth Retaining Structures. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 120, 121. Basic concepts of theory of earth pressures behind retaining structures, with special application to design of retaining walls, bulkheads, sheet piles, and excavation bracing. Effects of flexibility, creep in soils, and construction techniques on stability of bulkheads and sheet piles. Mechanical stabilization of soils, such as with soil nails and geosynthetics. Letter grading.

**225. Geotechnical Earthquake Engineering. (4)**

Lecture, four hours; outside study, eight hours. Requisites: courses 120, 137. Analysis of earthquake ground motions, including seismic source modeling, travel path effects, and site response effects. Probabilistic seismic hazard analysis. Soil liquefaction. Seismic slope stability. Letter grading.

**226. Geoenvironmental Engineering. (4)**

Lecture, four hours; outside study, eight hours. Requisite: course 120. Field of geoenvironmental engineering involves application of geotechnical principles to environmental problems. Topics include environmental regulations, waste characterization, geosynthetics, solid waste landfills, subsurface barrier walls, and disposal of high water content materials. Letter grading.

**227. Numerical Methods in Geotechnical Engineering. (4)**

Lecture, four hours; outside study, eight hours. Requisite: course 220. Introduction to basic concepts of computer modeling of soils using finite element method, and to constitutive modeling based on elasticity and plasticity theories. Special emphasis on numerical applications and identification of modeling concerns such as instability, bifurcation, nonexistence, and nonuniqueness of solutions. Letter grading.

**228L. Advanced Soil Mechanics Laboratory. (4)**

Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 120, 121. Lectures and laboratory studies covering more advanced aspects of laboratory determination of soil properties and their application to design. Tests to determine permeability, consolidation, and shear strength. Review of advanced instrumentation and measurement techniques. Letter grading.

**229. Seminar: Advanced Topics in Soil Mechanics. (4)**

Seminar, four hours; outside study, eight hours. Topics may vary each term to cover subjects such as earth dam design, seepage through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories. Letter grading.

**M230. Elasticity. (4)**

(Same as Mechanical and Aerospace Engineering M256B.) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 256A. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy's stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Letter grading.

**231. Inelastic Effects in Structures and Materials.**

(4) Lecture, four hours; outside study, eight hours. Requisite: course 130. Analogy between inelastic strain and applied force in stress analysis. Mathematical and physical theories of plasticity and creep and their basic assumptions. Static and dynamic analysis of inelastic beams, columns, frames, and plates. Localized plastic deformation in materials. Letter grading.

**232. Theory of Plates and Shells.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 130 or Mechanical and Aerospace Engineering 156B. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells, including bending. Letter grading.

**233. Mechanics of Composite Material Structures.**

(4) Lecture, four hours; outside study, eight hours. Requisites: courses M230, 232. Elastic, anisotropic stress-strain-temperature relations. Analysis of prismatic beams by three-dimensional elasticity. Analysis of laminated anisotropic plates and shells based on classical and first-order shear deformation theories. Elastodynamic behavior of laminated plates and cylinders. Letter grading.

**234. Advanced Topics in Structural Mechanics.**

(4) Lecture, four hours; outside study, eight hours. Limited to graduate engineering students. Current topics in composite materials, computational methods, finite element analysis, structural synthesis, nonlinear mechanics, and structural mechanics in general. Topics may vary from term to term. Letter grading.

**235A. Advanced Structural Analysis.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theorems on stationary value of total and complementary potential energy, minimum total potential energy, Maxwell/Betti theorems, effects of approximations, introduction to finite element analysis. Letter grading.

**235B. Finite Element Analysis of Structures.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 130, 235A. Direct energy formulations for deformable systems; solution methods for linear equations; analysis of structural systems with one-dimensional elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects. Letter grading.

**235C. Nonlinear Structural Analysis.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 235B. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian, Eulerian description of motion; finite element methods in geometrically nonlinear problems; postbuckling behavior of structures; solution of nonlinear equations; incremental, iterative, programming methods. Letter grading.

**236. Stability of Structures I.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 130 or 135B. Elastic buckling of bars. Different approaches to stability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear creep. Combined torsional and flexural buckling of columns. Buckling of plates. Letter grading.

**M237A. Dynamics of Structures.** (4) (Same as Mechanical and Aerospace Engineering M269A.) Lecture, four hours; outside study, eight hours. Requisite: course 137. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. Letter grading.

**238. Structural Reliability Analysis.** (4) Lecture, four hours; outside study, eight hours. Requisites: course 244, Electrical Engineering 131A, Mechanical and Aerospace Engineering 174. Review of probability theory and random processes. Fundamentals of structural reliability theory. First- and second-order, and simulation methods of reliability analysis. Structural component and system reliability. Reliability sensitivity measures. Bayesian reliability and analysis methods. Bases for probabilistic design codes. Time-variant reliability analysis. Finite element reliability methods. Letter grading.

**M239. Plasticity.** (4) (Same as Mechanical and Aerospace Engineering M256C.) Lecture, four hours; outside study, eight hours. Requisites: Mechanical and Aerospace Engineering 256A, M256B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity, Perzyna and Duvant/Lions types of viscoplasticity. Thermoplasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations. Letter grading.

**M240. Optimum Structural Design.** (4) (Same as Mechanical and Aerospace Engineering M267A.) Lecture, four hours; outside study, eight hours. Requisite: course 235A or Mechanical and Aerospace Engineering 261A. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. Letter grading.

**241. Advanced Steel Structures.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 141, 235A. Performance characterization of steel structures for static and earthquake loads. Behavior state analysis and building code provisions for special moment resisting, braced, and eccentric braced frames. Composite steel-concrete structures. Letter grading.

**242. Advanced Reinforced Concrete Design.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 142. Design of building and other structural systems for vertical and lateral loads. Earthquake forces. Ductility in elements and systems. Columns: secondary effects and biaxial bending. Slabs: code and analysis methods. Footings, shear walls, diaphragms, chords, and collectors. Detailing for ductile behavior. Retrofitting. Letter grading.

**243A. Behavior and Design of Reinforced Concrete Structural Elements.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 142. Advanced topics on design of reinforced concrete structures, including stress-strain relationships for plain and confined concrete, moment-curvature analysis of sections, and design for shear. Design of slender and low-rise walls, as well as design of beam-column joints. Introduction to displacement-based design and applications of strut-and-tie models. Letter grading.

**243B. Response and Design of Reinforced Concrete Structural Systems.** (4) (Formerly numbered 243.) Lecture, four hours; outside study, eight hours. Requisites: courses 243A, 246. Information on response and behavior of reinforced concrete buildings to earthquake ground motions. Topics include use of elastic and inelastic response spectra, role of strength, stiffness, and ductility in design, use of prescriptive versus performance-based design methodologies, and application of elastic and inelastic analysis techniques for new and existing construction. Letter grading.

**244. Structural Loads and Safety for Civil Structures.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 141 or 142 or 143 or 144. Modeling of uncertainties in structural loads and structural mechanics; structural safety analysis; and calculation of capacity reduction factors. Letter grading.

**246. Structural Response to Ground Motions.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 141, 142, 235A. Spectral analysis of ground motions: response, time, and Fourier spectra. Response of structures to ground motions due to earthquakes. Computational methods to evaluate structural response. Response analysis, including evaluation of contemporary design standards. Limitations due to idealizations. Letter grading.

**247. Advanced Structural Dynamics for Civil Engineering.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 235A, 235B, M237A or 246. Dynamic response of linear structures with proportional and nonproportional damping using modal superposition methods. Dynamic response of inelastic systems using numerical integration. Introduction to base isolation and active structural control. Earthquake engineering applications. Letter grading.

**248. Probabilistic Structural Dynamics.** (4) Lecture, four hours; outside study, eight hours. Requisites: course 244, Electrical Engineering 131A, Mechanical and Aerospace Engineering 174. Introduction to probability theory and random processes. Dynamic analysis of linear and nonlinear structural systems subjected to stationary and nonstationary random excitations. Reliability studies related to first excursion and fatigue failures. Applications in earthquake, offshore, wind, and aerospace engineering. Letter grading.

**249. Selected Topics in Structural Engineering and Mechanics.** (2) Lecture, two hours; outside study, six hours. Review of recent research and developments in structural engineering and mechanics. Structural analysis, finite elements, structural stability, dynamics of structures, structural design, earthquake engineering, ground motion, elasticity, plasticity, structural mechanics, mechanics of composites, and constitutive modeling. May be repeated for credit. S/U grading.

**250A. Surface Water Hydrology.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 150. In-depth study of surface water components of hydrologic cycle. Hydrologic mass balance analysis, hydrologic error analysis using systems investigation and physical hydrology. Stochastic hydrology: time-series analysis, Markovian streamflow generating models, and generation of multivariate synthetic streamflows. Applications. Letter grading.

**250B. Groundwater Hydrology.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 150. Theory of movement and occurrence of water in subterranean aquifers. Steady flow in confined and unconfined aquifers. Mechanics of wells; steady and unsteady radial flows in confined and unconfined aquifers. Theory of leaky aquifers. Parameter estimation. Seawater intrusion. Numerical methods. Applications. Letter grading.

**250C. Mathematical Modeling of Contaminant Transport in Groundwater.** (4) Lecture, four hours; laboratory, eight hours. Requisites: courses 250B, 253. Phenomena and mechanisms of hydrodynamic dispersion, governing equations of mass transport in porous media, various analytical and numerical solutions, determination of dispersion parameters by laboratory and field experiments, coupled and multiphase pollution problems, computer programs and applications. Letter grading.

**251. Water Resources Systems Engineering.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir management and operation; optimal timing, sequencing and sizing of water resources projects; and multiobjective planning and conjunctive use of surface water and groundwater. Emphasis on management of water quantity. Letter grading.

**252. Engineering Economic Analysis of Water and Environmental Planning.** (4) Lecture, four hours; outside study, eight hours. Requisites: course 106A, one or more courses from Economics 1, 2, 11, 100, 101. Economic theory and applications in analysis and management of water and environmental problems; application of price theory to water resource management and renewable resources; benefit-cost analysis with applications to water resources and environmental planning. Letter grading.

**253. Mathematical Models for Water Quality Management.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 153. Development of mathematical models for simulating environmental engineering problems. Emphasis on numerical techniques to solve nonlinear partial differential equations and their application to environmental engineering problems. Letter grading.

**254A. Environmental Aquatic Inorganic Chemistry.** (4) Lecture, four hours; outside study, eight hours. Requisites: Chemistry 20B, Mathematics 31A, 31B, Physics 1A, 1B. Equilibrium and kinetic descriptions of chemical behavior of metals and inorganic ions in natural fresh/marine surface waters and in water treatment. Processes include acid-base chemistry and alkalinity (carbonate system), complexation, precipitation/dissolution, absorption oxidation/reduction, and photochemistry. Letter grading.

**254B. Environmental Aquatic Organic Chemistry.** (4) Lecture, four hours; outside study, eight hours. Requisites: Chemistry 11A, 11B, Mathematics 31A, 31B, Physics 8A, 8B. Equilibrium and kinetic descriptions of anthropogenic and natural organic compounds in natural fresh/marine surface waters and in water treatment. Processes include sorption, air/water exchange, hydrolysis, photolysis, photooxidation, oxidation/reduction, disinfection, by-products, and ozonation. Letter grading.

**254C. Aerosol, Fog, and Cloud Chemistry of Air Pollution. (4)** Lecture, four hours; outside study, eight hours. Requisite: Chemistry 11A, 11B, Mathematics 31A, 31B, Physics 8A, 8B. Chemical/physical properties of aerosols (inorganic, metals, organic). Ionic composition. Equilibrium/dynamic gas-to-drop partitioning of water and semivolatile inorganic/organic compounds. Aqueous/condensed-phase transformations of inorganic/organic compounds and metals. Condensed-phase oxidant cycles. Letter grading.

**255A. Physical and Chemical Processes for Water and Wastewater Treatment. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 155, 254A. Review of momentum and mass transfer, chemical reaction engineering, coagulation and flocculation, granular filtrations, sedimentation, carbon adsorption, gas transfer, disinfection, oxidation, and membrane processes. Letter grading.

**255B. Biological Processes for Water and Wastewater Treatment. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Fundamentals of environmental engineering microbiology; kinetics of microbial growth and biological oxidation; applications for activated sludge, gas transfer, fixed-film processes, aerobic and anaerobic digestion, sludge disposal, and biological nutrient removal. Letter grading.

**258A. Membrane Separations in Aquatic Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 254A. Applications of membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrodialysis, and ion exchange technologies from both practical and theoretical standpoints. Letter grading.

**259A. Selected Topics in Environmental Engineering. (2)** Lecture, two hours; outside study, four hours. Review of recent research and developments in environmental engineering. Water and wastewater treatment systems, nonpoint pollution, multimedia impacts. May be repeated for credit. S/U grading.

**259B. Selected Topics in Water Resources. (2 to 4)** Lecture, four hours; outside study, eight hours. Review of recent research and developments in water resources. Water supply and hydrology, global climate change, economic planning, optimization of water resources development. May be taken for a maximum of 4 units. Letter grading.

**260. Advanced Topics in Hydrology and Water Resources. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250B, 251. Current research topics in inverse problem of parameter estimation, experimental design, conjunctive use of surface and groundwater, multiobjective water resources planning, and optimization of water resource systems. Topics may vary from term to term. Letter grading.

**261. Colloidal Phenomena in Aquatic Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Colloidal interactions, colloidal stability, colloidal hydrodynamics, surface chemistry, adsorption of pollutants on colloidal surfaces, transport of colloids in porous media, coagulation, and particle deposition. Consideration of applications to colloidal processes in aquatic environments. Letter grading.

**M262A. Introduction to Atmospheric Chemistry. (4)** (Same as Atmospheric Sciences M203A.) Lecture, three hours. Requisite for undergraduates: Chemistry 20B. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. S/U or letter grading.

**M262B. Atmospheric Diffusion and Air Pollution. (4)** (Same as Atmospheric Sciences M224B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**263A. Physics of Environmental Transport. (4)** (Formerly numbered 263.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Transport processes in surface water, groundwater, and atmosphere. Emphasis on exchanges across phase boundaries: sediment/water interface; air/water gas exchange; particles, droplets, and bubbles; small-scale dispersion and mixing; effect of reactions on transport; linkages between physical, chemical, and biological processes. Letter grading.

**263B. Advanced Topics in Transport at Environmental Interfaces. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 263A. In-depth treatment of selected topics involving transport phenomena at environmental interfaces between solid, fluid, and gas phases, such as aquatic sediments, porous aggregates, and vegetative canopies. Discussion of theoretical models and experimental observations. Application to important environmental engineering problems. Letter grading.

**265A. Mass Transfer in Environmental Systems. (4)** Lecture, four hours; computer applications, two hours; outside study, eight hours. Designed for graduate environmental engineering program students. Physical chemistry and mass transfer fundamentals related to contaminant fate and transport in soil, air, and water systems, including soil/water sorption and desorption, contaminant retardation, vaporization and dissolution of non-aqueous phase liquids (NAPL), and other environmental systems. Letter grading.

**265B. Contaminant Transport in Soils and Groundwater. (4)** Lecture, four hours; computer applications, two hours; outside study, six hours. Requisites: courses 250B, 265A. Principles of mass transfer as they apply in soil and groundwater, independent estimation of transport model parameters; remediating hazardous waste sites. Letter grading.

**266. Environmental Biotechnology. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 153, 254A. Environmental biotechnology — concept and potential, biotechnology of pollutional control, bioremediation, biomass conversion: composting, biogas and bioethanol production. Letter grading.

**296. Advanced Topics in Civil Engineering. (2 to 4)** Seminar, to be arranged. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**297. Seminar: Current Topics in Civil Engineering. (2 to 4)** Seminar, to be arranged. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate civil engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Assistant Training Seminar. (2)** Seminar, two hours. Preparation: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate civil engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate civil engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate civil engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate civil engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate civil engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate civil engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

## CLASSICS

*College of Letters and Science*

UCLA  
100 Dodd Hall  
Box 951417  
Los Angeles, CA 90095-1417

(310) 825-4171  
<http://www.humnet.ucla.edu/humnet/classics/home.html>

Robert A. Gurval, Ph.D., *Chair*

### Professors

Ann L.T. Bergren, Ph.D.  
David L. Blank, Ph.D.  
Andrew R. Dyck, Ph.D.  
Bernard D. Frischer, Ph.D.  
Sander M. Goldberg, Ph.D.  
Michael W. Haslam, Ph.D.  
Katherine C. King, Ph.D.  
Steven Lattimore, Ph.D.  
Sarah P. Morris, Ph.D.  
Brent H. Vine, Ph.D.

### Professors Emeriti

Philip Levine, Ph.D.  
Bengt T.M. Löfstedt, Ph.D.  
Jaan Puhvel, Ph.D.  
Albert H. Travis, Ph.D.

### Associate Professors

Robert A. Gurval, Ph.D.  
Kathryn A. Morgan, Ph.D.  
Carole E. Newlands, Ph.D.

## Scope and Objectives

The general objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, linguistics, mythology, philosophy, and religion.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in Greek and Latin. Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

## Undergraduate Study

Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses.

## Classical Civilization B.A.

The civilizations of ancient Greece and Rome have made important contributions to the political, social, artistic, and intellectual development of the Western world. The purpose of the Classical Civilization major is to provide a formal and balanced introduction to the historical and cultural experiences of the ancient Greeks and Romans. The program of study is structured, yet not rigid. Lower division survey courses and requirements in elementary language study, ancient history, and classical art establish an essential background of knowledge, while electives encourage individual and specialized interests. The program offers a broad range of courses in the fields of language, literature, history, mythology, religion, philosophy, art, and archaeology. The major serves as excellent and rewarding preparation for a professional career in medicine, law, business, journalism, communications, or the arts.

### Preparation for the Major

*Required:* Classics 10, 20, and one course from 30, 40, 41, 42, 51A, 51B.

### Transfer Students

To be admitted as Classical Civilization majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one classical Greek culture course, one Roman civilization course, and one course in Greek or Latin literature in translation, classical mythology, or classical archaeology.

### The Major

*Required:* (1) Greek 3 or Latin 3; (2) two courses in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B, 118); (3) two courses in classical art or archaeology (Classics M153A through M153K); (4) seven upper division courses in the department (courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser) — no more than three may be selected from Greek 100 through 133 or Latin 100 through 133, and Classics 195 may be applied as only one course toward the major; (5) one senior seminar (Classics 197); with approval of the undergraduate adviser, a senior paper (Classics 195 or 199) may be substituted for the senior seminar.

## Greek B.A.

### Preparation for the Major

*Required:* Classics 10, 20; Greek 1, 2, 3, or equivalent.

### Transfer Students

To be admitted as Greek majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Greek and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

### The Major

*Required:* Eight upper division Greek courses, including course 110, and four courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

## Greek and Latin B.A.

### Preparation for the Major

*Required:* Classics 10, 20; Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

### Transfer Students

To be admitted as Greek and Latin majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Greek and of Latin and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

### The Major

*Required:* Ten upper division Greek and/or Latin courses (of which at least four must be in each language), including Greek 110 or Latin 110, and three courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

## Latin B.A.

### Preparation for the Major

*Required:* Classics 10, 20; Latin 1, 2, 3, or equivalent.

### Transfer Students

To be admitted as Latin majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Latin and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

### The Major

*Required:* Eight upper division Latin courses, including course 110, and four courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

Note: Students in the Greek, Latin, and Greek and Latin majors are permitted to take Greek

200A, 200B, 200C and Latin 200A, 200B, 200C with consent of the instructor.

## English/Greek B.A.

### Preparation for the Major

*Required:* English 4W, 10A, 10B, 10C, Greek 1, 2, 3.

### Transfer Students

To be admitted as English/Greek majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English critical reading and writing course, one year of English literature survey courses, and one year of Greek.

### The Major

*Required:* (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

## English/Latin B.A.

### Preparation for the Major

*Required:* English 4W, 10A, 10B, 10C, Latin 1, 2, 3.

### Transfer Students

To be admitted as English/Latin majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English critical reading and writing course, one year of English literature survey courses, and one year of Latin.

### The Major

*Required:* (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Latin, including courses 105A and 113, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

## Honors Program

The honors program is open to students in each of the departmental majors. To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete Classics 195 with a grade of A– or better.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA

of 3.65 or better, and (3) complete Classics 195 with a grade of A.

## Classical Civilization Minor

The Classical Civilization minor is designed to recognize a serious commitment to the study of the cultures and civilizations of ancient Greece and Rome. Lower division survey courses in historical studies, classical literature, mythology, and film provide an essential introduction to the imagination and power of the ancient world. Students may fulfill upper division requirements from a variety of courses in classical civilization and related fields, including political and social history, literature, art and archaeology, religion, mythology, philosophy, and cultural studies of ethnicity, gender, and sexuality in antiquity.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (12 units):* Classics 10, 20, and one course from 30, 40, 41, 42.

*Required Upper Division Courses (20 units):* Five courses selected from Classics 140 through 197. One course in a related field may be substituted with approval of the faculty undergraduate adviser.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Greek Minor

The Greek minor is designed to recognize a serious commitment to the study of the Greek language. After a year of elementary Greek (Greek 1, 2, 3) or its equivalent, students select departmental upper division reading courses in ancient Greek prose and poetry which provide close analysis of individual texts, with attention to their historical, literary, and cultural context. Subjects of study include Homeric epic, lyric poetry, tragedy and comedy, history, rhetoric, philosophy, and the New Testament.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (15 units):* Greek 1, 2, 3, or equivalent.

*Required Upper Division Courses (20 units):* Five courses selected from Greek 100 through 133.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Latin Minor

The Latin minor is designed to recognize a serious commitment to the study of the Latin language. After a year of elementary Latin (Latin 1, 2, 3) or its equivalent, students select departmental upper division reading courses in

**W**hen he was an undergraduate student at Brown University in Rhode Island, Professor Robert Gurval studied American history and pursued ambitions of law. But a funny thing happened on the way to his B.A. "I took a course on ancient Greece and Rome as an elective, and the rest, as they say, is history."

Ancient Rome seems like a far away place from the small coal-mining town in northeastern Pennsylvania where Gurval was born. But twenty years after taking that fateful elective, he teaches his own course on Roman Civilization and hopes to inspire students in a similar way. "Issues of politics, religion, race, ethnicity, gender, and sexuality provide an overall framework of analysis in almost all my courses. To understand the past, we must understand our own cultural values, traditions, and practices."

Gurval regularly teaches courses in Latin literature, ancient biography, and epic and cultural constructions

classical (and/or late antique and medieval) Latin prose and poetry which provide close analysis of individual texts, with attention to their historical, literary, and cultural context. Subjects of study include Roman comedy, epic, lyric, elegy, satire, history, rhetoric, philosophy, epistolography, and the novel.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (15 units):* Latin 1, 2, 3, or equivalent.

*Required Upper Division Courses (20 units):* Five courses selected from Latin 100 through 133.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the

of gender in the Roman world. In addition, he has developed two Honors Collegium seminars: The Hollywood Myth of Ancient Rome and Male Identity and Sexuality in Ancient Rome.

Such topics keep the classics relevant and interesting for Gurval's students and so does his trademark approach of examining ancient historical events from the viewpoints of contemporaries and connecting their ideas to immediate political and social issues. "I believe that students should take courses that challenge them to think and to inquire about their own lives and society," he says. "Not everyone has to major or minor in classics, but if they do, that isn't such a bad thing either."

In addition to a book and numerous publications on the politics and literature of the early Roman Empire, Gurval has been a recipient of the Rome Prize awarded by the American Academy in Rome.

graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Classics offers the Master of Arts (M.A.) degree in Greek, Master of Arts (M.A.) degree in Latin, and Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Classics.

## Admission

The department does not admit students whose final degree objective is the M.A. degree. The program that leads to an M.A. in Classics is considered the first step toward the Ph.D. in Classics. The M.A. in Greek or in Latin

may be awarded to students whose academic goals shift during the course of graduate study.

Requirements for admission to the M.A. programs are a UCLA B.A. degree or the equivalent degree from another university, preferably with a major in Classics, Greek, or Latin; a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; a writing sample (research paper); and Graduate Record Examination (GRE) scores.

For the Ph.D., a UCLA M.A. degree in Classics with a comprehensive examination grade of B+ or better or an equivalent degree from another university is required. In addition to an M.A. degree, the department requires a statement of purpose. If applicants do not have a UCLA M.A., they must also submit three letters of recommendation, normally from previous instructors in the classics, a writing sample (research paper), and Graduate Record Examination (GRE) scores. While there is no minimum required score, the GRE may be used as a criterion in uncertain cases, and to assess applications for teaching assistantships and other financial assistance from the department. An application for admission may be obtained by writing to the department.

## Master's Degrees

Areas of study include the M.A. degree in Classics (Greek and Latin) as a preliminary to the Ph.D. Students entering with or earning a single-language M.A. (Greek or Latin) must complete requirements in the other language before proceeding to the Ph.D. track.

The M.A. degree is offered through the comprehensive examination plan. Thirty-eight units of graduate coursework are required, including courses that test for the appropriate part of the departmental reading lists and specific courses designated for the M.A. in Greek and in Latin. The remaining courses are selected in consultation with the graduate adviser.

There is a language requirement for this degree.

## Doctoral Degree

The department offers the Ph.D. in Classics with opportunities to specialize in ancient history, ancient philosophy, archaeology, classical linguistics, and post-classical Latin, as well as in classical literature and philology.

Students who hold the M.A. in Greek or in Latin only must complete the Classics M.A. course requirement by taking a specific course sequence in the history of literature in the other language. A minimum of 32 units of 200-series courses (exclusive of this course) is required.

Written and oral qualifying examinations are required. Written qualifying examinations consist of two translation examinations, a research paper, and a special field examination.

Following successful completion of the written examinations, students take the University Oral

Qualifying Examination, which tests knowledge of the major field and possible stipulated areas outside the specialization and includes a discussion of a formal dissertation proposal.

There is a language requirement for this degree.

## Classics

### Lower Division Courses

**10. Survey of Classical Greek Culture. (4)** Lecture, three hours; discussion, 60 to 90 minutes. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from age of Homer to Roman Conquest. Discussion of art, literature, philosophy, and mythology. P/NP or letter grading.

**20. Survey of Roman Civilization. (4)** Lecture, three hours; discussion, one hour. Knowledge of Latin not required. Study of life and culture of Rome from time of its foundation to end of antiquity. Survey of art, literature, and political thought of the Romans. Selections from Latin authors read in translation. P/NP or letter grading.

**30. Introduction to Classical Mythology. (4)** Lecture, three hours; discussion, one hour. Introduction to myths and legends of ancient Greece and Rome, role of those stories in their societies, and modern approaches to studying them. P/NP or letter grading.

**40. Survey of Greek Literature in Translation. (4)** Lecture, three hours; discussion, one hour. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.

**41. Survey of Latin Literature in Translation. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 41W. Readings in English to emphasize unique achievements of Latin literature, particularly in such areas as drama, epic, satire, oratory, and history. P/NP or letter grading.

**41W. Discovering Roman Literature. (5)** Lecture, two hours; discussion, two hours. Enforced prerequisite: English Composition 3 or 3H. Not open for credit to students with credit for course 41. Exploration in detail and from variety of critical perspectives a carefully selected set of literary texts characteristic of ancient Rome and significant in Western literary tradition. Satisfies Letters and Science Writing II requirement. Letter grading.

**42. Cinema and the Ancient World. (4)** Lecture, three hours; discussion, 90 minutes. Use of popular cinema to introduce students to ancient Greek and Roman culture; limits of investigation set by individual instructor. P/NP or letter grading.

**50F. Power and Imagination in Ancient Rome. (4)** Lecture, 90 minutes; discussion, 90 minutes. Freshman seminar designed to survey major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.

**51A. Art and Archaeology of Classical World: Greece. (4)** Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Greek art and archaeology at discretion of instructor. P/NP or letter grading.

**51B. Art and Archaeology of Classical World: Rome. (4)** Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Roman art and archaeology at discretion of instructor. P/NP or letter grading.

**55. Origins and Nature of English Vocabulary. (4)** Lecture, three hours. Origins and nature of English vocabulary, from Proto-Indo-European prehistory to current slang. Topics include the Greek and Latin component in English (including technical terminology), the alphabet and English spelling, semantic change and word formation, vocabulary in literature and film.

**M70. Survey of Medieval Greek Culture. (4)** (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

**88A-88Z. Lower Division Seminars. (4 each)** Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

## Upper Division Courses

**140. Topics in History of Greek Literature. (4)** Lecture, three hours. Prerequisite: course 10 or 40. Investigation of a specific issue in the understanding of Greek literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

**141. Topics in History of Latin Literature. (4)** Lecture, three hours. Prerequisite: course 20 or 41. Investigation of a specific issue in the interpretation of Latin literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

**142. Ancient Epic. (4)** Lecture, three hours. Prerequisite: one course from 10, 20, 30, 40, or 41. Homer's *Iliad* and *Odyssey*; Vergil's *Aeneid*, and Ovid's *Metamorphoses*, studied in translation. P/NP or letter grading.

**143. Ancient Drama. (4)** Lecture, three hours. Prerequisite: one course from 10, 20, 40, or 41. Study of Greek and/or Latin drama in translation. P/NP or letter grading.

**144. Topical Studies in Ancient Culture. (4)** Lecture, three hours. Prerequisite: one course from 10, 20, 30, 40, or 41. Investigation of a problem in ancient culture that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

**M145A. Ancient Greek and Roman Philosophy. (4)** (Same as Philosophy M103A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

**M145B. Later Ancient Greek Philosophy. (4)** (Same as Philosophy M103B.) Lecture, three hours. Prerequisite: one course from M145A, Philosophy 1, 100A, M101B, M102. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

**M146A. Plato — Earlier Dialogues. (4)** (Same as Philosophy M101A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

**M146B. Plato — Later Dialogues. (4)** (Same as Philosophy M101B.) Lecture, three hours; discussion, one hour. Prerequisite: course M146A. Study of selected topics in middle and later dialogues of Plato.

**M147. Aristotle. (4)** (Same as Philosophy M102.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle.

**150A. Origins of the Western View of Women: The Female in Greek Thought. (4)** Lecture, three hours. Prerequisite: course 10. Interdisciplinary study of concept of the female in various forms of thought developed by the Greeks (e.g., epic, tragedy, comedy, history, political philosophy, gynecology). Special emphasis on how these texts lay the foundation for the Western view of women.

**150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. (4)** Lecture, three hours. Prerequisite: course 20. Interdisciplinary study of concept of the female in Roman and early Christian thought. Special emphasis on status of the female with regard to sexuality, procreation, and the sacred.

**C151E. Archaeological Field Techniques. (12)** Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

**152. The Ancient City. (4)** Lecture, three to four hours. Prerequisite: course 10 or 20 or History 1A. Study of urban planning in the ancient world, with particular attention to cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of form, design, and function of major municipal areas and buildings, and of provision of public amenities by detailed reference to significant archaeological sites and contemporary sources. P/NP or letter grading.

**M153A. Minoan Art and Archaeology. (4)** (Same as Art History M102A.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

**M153B. Mycenaean Art and Archaeology. (4)** (Same as Art History M102B.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture in Mycenaean Greece from 2000 to 1000 B.C. P/NP or letter grading.

**M153C. Archaic Greek Art and Archaeology. (4)** (Same as Art History M102C.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

**M153D. Classical Greek Art and Archaeology. (4)** (Same as Art History M102D.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

**M153E. Hellenistic Greek Art and Archaeology. (4)** (Same as Art History M102E.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

**M153F. Etruscan Art. (4)** (Same as Art History M102F.) Lecture, three hours. Requisite: course 20 or Art History 50. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

**M153G. Roman Art and Archaeology. (4)** (Same as Art History M102G.) Lecture, three hours. Requisite: course 20 or Art History 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

**M153H. Late Roman Art. (4)** (Same as Art History M102H.) Lecture, three hours. Requisites: course M153G, Art History 50. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

**M153I-M153J-M153K. Classical Archaeology. (4-4-4)** (Same as Art History M102I-M102J-M102K.) Lecture, three or four hours. Requisite: course 10 or 20 or Art History 50 or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. P/NP or letter grading. **M153I.** Greco-Roman Architecture; **M153J.** Greco-Roman Sculpture; **M153K.** Greco-Roman Painting.

**160. Legal Advocacy in Ancient World. (4)** Lecture, three hours. Requisite: course 10 or 20. Study of theory and practice of legal advocacy in classical Greece and Rome, with emphasis on speeches of Cicero. Letter grading.

**162. Classical Myth in Literature. (4)** Use of myth in principal authors and genres of Greek and Roman literature, with examples of its influence in later literatures.

**165. Ancient Athletics. (4)** Requisite: course 10 or History 1A. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art.

**166A. Greek Religion. (4)** Requisite: course 10. Study of the religion of the ancient Greeks.

**166B. Roman Religion. (4)** Requisite: course 20. Study of the religion of the ancient Romans.

**167. Greek and Roman Magic. (4)** Lecture, three hours. Requisite: course 10 or 20. Study of beliefs about supernatural phenomena in the ancient world, including witches, ghosts, vampires, and magic spells, attested in both literary and archaeological sources. P/NP or letter grading.

**168. Comparative Mythology. (4)** Lecture, three hours. Requisite: course 30. Religious, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies.

**M170. Power and Imagination in Byzantium. (4)** (Same as History M122.) Lecture, three hours. Requisites: course M70, or History 123A and 123B. Designed for juniors/seniors. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

**180. Introduction to Classical Linguistics. (4)** Lecture, three hours. Requisite: Greek 3 or Latin 3. Linguistic approach to Greek and Latin, including Indo-European background, etymology, pronunciation, alphabets, sociolinguistics (dialects, bilingualism), and applications to classical literature. P/NP or letter grading.

**190. The Medieval Book. (4)** Seminar, three hours. Requisites: courses 10, 20, and 40 or 41. Limited to senior Greek and Latin, Greek, Latin, and Classical Civilization majors. History of the book from manuscript to printing, with attention to construction, layout, decoration, and script, as well as changing cultural and historical contexts, medieval methods of information retrieval, and transition from script to print culture.

**195. Senior Honors Paper. (4)** Supervised through individual consultation with an appropriate faculty member, students revise paper written in a prior upper division course into substantial piece of academic writing.

**197. Senior Seminar. (4)** Seminar, three hours. Limited to seniors. Seminar on important themes, periods, genres of ancient Greek and Roman world that take an innovative interdisciplinary approach to questions old and new. Class presentations and papers.

**199. Special Studies in Classics. (2 to 8)** Limited to seniors.

## Graduate Courses

**200. History of Classical Scholarship. (4)** Lecture, four hours. S/U or letter grading.

**201B. Topics in Ancient History: Roman World. (2 or 4)** Seminar, three hours. Introduction to basic methods and approaches to study of Roman history by intensive examination of selected topics, including readings of ancient texts and modern scholarship. S/U or letter grading.

**M220A. Interfaces: Transmission of Roman Literature. (4)** (Formerly numbered M223.) (Same as History CM220A.) Discussion, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand processes by which Latin literature has been preserved. S/U or letter grading.

**230A-230B. Language in Ancient Asia Minor. (4)** Course 230A is requisite to 230B. Survey of the language situation in Anatolia in 2nd and 1st millennia B.C. Readings in Hittite, Palaic, Luwian, Hieroglyphic, Lycian, and Lydian texts. Anatolian-Greek relationships and survivals in classical and Hellenistic times.

**244. Textual Criticism: Studies in Preparation of a Critical Edition of Greek and/or Latin Texts. (4)** Seminar, three hours. Different steps required in preparation of a critical edition of an ancient text: localizing manuscripts; collation; establishing the stemma; selecting the right reading on basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of *apparatus criticus* and *apparatus fontium*.

**245. Computing and Classics. (4)** Introduction to processing and analysis of digitized texts of classical authors for purposes of literary history and criticism.

**246. Greek and Latin Meter. (4)** Comprehensive study of meter as it functions in classical poetry.

**250. Topics in Greek and Latin Literature. (2 or 4)** Lecture, three hours. Investigation of specific literary genres or historical issues in history of classical literature. May be repeated for credit with topic change. S/U or letter grading.

**251A. Seminar: Classical Archaeology — Aegean Bronze Age. (2 or 4)** Seminar, three hours. S/U or letter grading.

**251B. Seminar: Classical Archaeology — Greco-Roman Architecture. (4)** Seminar, three hours. S/U or letter grading.

**251C. Seminar: Classical Archaeology — Greco-Roman Sculpture. (4)** Seminar, three hours. S/U or letter grading.

**251D. Seminar: Classical Archaeology — Greco-Roman Painting. (2 or 4)** Seminar, three hours. Studies in style and iconography of various periods of Aegean, Greek, and Roman painting. May be repeated for credit with consent of instructor. S/U or letter grading.

**C251E. Archaeological Field Techniques. (12)** Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C151E. S/U or letter grading.

**252. Topography and Monuments of Athens. (2 or 4)** Lecture, two or four hours. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains. S/U or letter grading.

**253. Topography and Monuments of Rome. (4)** Detailed studies in topography and monuments of ancient Rome, combining evidence of literature, inscriptions, and actual remains.

**260. Topics in Ancient Religion. (4)** Seminar, three hours.

**268. Seminar: Comparative Mythology. (4)** Requisite: course 168. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies.

**287. Graduate Colloquium in Classical Literature. (4)** Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

**288. Literary Theory. (2 or 4)** Discussion, three hours. Designed for graduate students. Introduction to chief texts in literary theory and criticism for readers of classical literature, with application to classical texts. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Classics. (2 to 4)** Seminar, three hours. Normally to be taken by all graduate students in term before or during their first assignments as teaching assistants. Seminar/workshop in various pedagogical issues and strategies in preparation for teaching classical civilization, Greek, and/or Latin undergraduate courses. Readings and group discussions in topics related to teaching in field of classics. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Greek

### Lower Division Courses

**1. Elementary Greek. (5)** Lecture, five hours.

**2. Elementary Greek. (5)** Lecture, five hours. Enforced requisite: course 1.

**3. Elementary Greek. (5)** Lecture, five hours. Enforced requisite: course 2.

**15. Elementary Modern Greek. (12)** Lecture, 18 to 19 hours. Eight-week intensive introduction to principles of speaking, reading, and writing modern (demotic) Greek. Offered in summer only. P/NP or letter grading.

**16. Intensive First-Year Greek. (12)** Lecture, 15 hours. Ten-week intensive introduction to Greek language equivalent to courses 1, 2, and 3. Offered in summer only. Letter grading.

### Upper Division Courses

**100. Readings in Greek Prose. (4)** Lecture, three to four hours. Requisite: course 3. Selections from Plato and other classical Greek texts, along with grammar review. P/NP or letter grading.

**101A. Homer: *Odyseey*. (4)** Requisite: course 100.

**101B. Homer: *Iliad*. (4)** Requisite: course 100.

**102. Lyric Poets. (4)** Requisite: course 100. Selections from Archilochus to Bacchylides.

**103. Aeschylus. (4)** Requisite: course 100.

**104. Sophocles. (4)** Requisite: course 100.

**105. Euripides. (4)** Requisite: course 100.

**106. Aristophanes. (4)** Requisite: course 100.

- 107. Hesiod. (4)** Lecture, three hours. Requisite: course 100. Reading of *Theogony* and excerpts from *Works and Days*, with emphasis on Hesiod's place in Greek literature and his role in transmission of Greek mythology.
- 110. Study of Greek Prose. (4)** Requisite: course 100. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose.
- 111. Herodotus. (4)** Requisite: course 100.
- 112. Thucydides. (4)** Requisite: course 100.
- 113. Attic Orators. (4)** Requisite: course 100.
- 115. Xenophon. (4)** Lecture, three hours. Requisite: course 100. Reading of one major work of Xenophon — the *Memorabilia*, *Cyropaedia*, *Anabasis*, *Hellenica*, or *Oeconomicus* — in Greek. P/NP or letter grading.
- 121. Plato. (4)** Requisite: course 100.
- 122. Plato: Republic. (4)** Requisite: course 100.
- 123. Aristotle: Poetics and Rhetoric. (4)** Requisite: course 100.
- 124. Aristotle: Ethics. (4)** Requisite: course 100.
- 130. Readings in the New Testament. (4)** Requisite: course 3.
- 131. Readings in Later Greek. (4)** Requisite: course 100. Topics vary from year to year and include "Longinus," On the Sublime; Marcus Aurelius; Arrian; the Second Sophistic; Plutarch; later epic; epigram; epistolographi Graeci.
- 132. Survey of Byzantine Literature. (4)** Requisite: course 100. Readings based on (1) *Anthology of Byzantine Prose*, ed. Nigel Wilson and (2) *Oxford Book of Medieval and Modern Greek Verse*, ed. C.A. Trypanis, or if unavailable, *Poeti bizantini*, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures.
- 133. Readings in Byzantine Literature. (4)** Requisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the Alexiad of Anna Comnena, and Digenis Akritas.
- 199. Special Studies in Greek. (2 to 8)** Limited to seniors.

## Graduate Courses

- 200A-200B-200C. History of Greek Literature. (6-6-6)** Lecture, three hours. Lectures on history of Greek literature, supplemented by reading of Greek texts in original language. Each course may be taken independently for credit. S/U or letter grading.
- 201A-201B. Homer: Iliad. (2 or 4 each)** Seminar, three hours. Course 201A is requisite to 201B. S/U (2-unit course) or letter (4-unit course) grading.
- 202A-202B. Homer: Odyssey and the Epic Cycle. (2 or 4 each)** Seminar, three hours. Course 202A is requisite to 202B. S/U (2-unit course) or letter (4-unit course) grading.
- 203. Hesiod. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 204. Homeric Hymns. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 205. Aeschylus. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
- 206A-206B. Sophocles. (2 or 4 each)** Seminar, three hours. Course 206A is requisite to 206B. S/U (2-unit course) or letter (4-unit course) grading.
- 207A-207B. Euripides. (2 or 4 each)** Seminar, three hours. Course 207A is requisite to 207B. S/U (2-unit course) or letter (4-unit course) grading.
- 208A-208B. Aristophanes. (2 or 4 each)** Seminar, three hours. Course 208A is requisite to 208B. S/U (2-unit course) or letter (4-unit course) grading.
- 209A-209B. Seminars: Hellenistic Poetry. (2 or 4 each)** Seminar, three hours. Course 209A is requisite to 209B. S/U (2-unit course) or letter (4-unit course) grading.
- 210. Advanced Greek Prose Composition. (4)** Requisite: course 110.
- 211A-211B. Herodotus. (2 or 4 each)** Seminar, three hours. Course 211A is requisite to 211B. S/U (2-unit course) or letter (4-unit course) grading.
- 212A-212B. Thucydides. (2 or 4 each)** Seminar, three hours. Course 212A is requisite to 212B. S/U (2-unit course) or letter (4-unit course) grading.
- 213. Greek Historiography. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
- 214. Demosthenes. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
- 215. Early Greek Orators. (2 or 4)** Studies in works of Antiphon, Andocides, and Lysias. S/U (2-unit course) or letter (4-unit course) grading.
- 216. Menander. (2 or 4)** Preparation: reading knowledge of classical Greek. S/U (2-unit course) or letter (4-unit course) grading.
- 217A-217B. Greek Lyric Poetry. (2 or 4 each)** Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading. **217A.** Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included. **217B.** Pindar and Bacchylides. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of the epinician.
- 220. Greek Novel. (2 or 4)** Seminar, three hours. Study of the Greek romance and its place in Greek literature. Two texts (Chariton: *Chaereas and Callirhoe* and Longus: *Daphnis and Chloë*) studied in some detail. S/U (2-unit course) or letter (4-unit course) grading.
- 221. Pre-Socratic Philosophers. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
- 222A-222B. Plato. (2 or 4 each)** Seminar, three hours. Course 222A is requisite to 222B. S/U (2-unit course) or letter (4-unit course) grading.
- 223A-223B. Aristotle. (2 or 4 each)** Seminar, three hours. Course 223A is requisite to 223B. S/U (2-unit course) or letter (4-unit course) grading.
- 224. Post-Aristotelian Philosophy. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
- 229. Sight Translation. (2 or 4)** Discussion, three hours. Designed for graduate students. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions. S/U or letter grading.
- 231A-231B-231C. Later Greek and Byzantine Literature. (2 or 4 each)** Seminar, three hours. Studies in various aspects of Byzantine Greek language and literature. Topics vary from year to year. Each course may be taken independently and may be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 233. Byzantine Poetry. (2 or 4)** Study of main representatives of both religious and secular poetry. S/U (2-unit course) or letter (4-unit course) grading.
- 240A-240B. History of the Greek Language. (4-4)** Seminar, three hours. S/U or letter grading. **240A.** Linguistic history of classical Greek. **240B.** Requisite: course 240A. Postclassical, medieval, and modern Greek.
- 241. Greek Epigraphy. (4)** Survey of Greek historical inscriptions, chiefly Attic.
- 242. Greek Dialects and Historical Grammar. (4)** Linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in context of common Greek and Indo-European linguistics.
- 243. Mycenaean Greek. (2 or 4)** Seminar, three hours. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. S/U or letter grading.
- 244. Greek Papyrology. (4)** Preparation: reading knowledge of Greek. Introduction to Greek papyri, considered both as historical documents and as carriers of literature.
- 245. Greek Paleography. (4)** Studies in development of book hand in Greek manuscripts earlier than the invention of printing.
- 250. Topical Studies of Ancient Greece. (2 or 4)** Lecture, three hours. Advanced study of some aspect of ancient Greek language, literature, and/or culture. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.
- 597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.
- 599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Latin

### Lower Division Courses

- 1. Elementary Latin. (5)** Lecture, five hours.
- 1G. Elementary Latin for Graduate Students. (No credit)** Concurrently scheduled with course 14.
- 2. Elementary Latin. (5)** Lecture, five hours. Enforced requisite: course 1.
- 3. Elementary Latin. (5)** Lecture, five hours. Enforced requisite: course 2 or 14.
- 14. Elementary Latin: Intensive. (10)** Lecture, 10 hours. Declensions of nouns and adjectives, conjugations in indicative mood, and primary uses of subjunctive mood. Emphasis on development of ability to read easy selections of classical prose. P/NP or letter grading.
- 16. Intensive First-Year Latin. (12)** Lecture, 15 hours. Ten-week intensive introduction to Latin language equivalent to courses 1, 2, and 3. Offered in summer only. Letter grading.

### Upper Division Courses

- 100. Readings in Latin Prose and Poetry. (4)** Lecture, three hours. Requisite: course 3. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally requisite to other courses in the Latin 100 series.
- 101. Plautus. (4)** Requisite: course 100.
- 102. Terence. (4)** Requisite: course 100.
- 103. Lucretius. (4)** Requisite: course 100.
- 104. Ovid. (4)** Requisite: course 100.
- 105A. Beginning Vergil: Selections from Aeneid I-VI. (4)** Lecture, three hours. Requisite: course 100. Reading of one or more books from first half of the *Aeneid*, designed especially for students with only limited experience in reading Latin poetry.
- 105B. Advanced Vergil. (4)** Lecture, three hours. Requisite: course 105A. Reading and discussion of Vergil's *Eclogues*, *Georgics*, and/or second half of the *Aeneid*. May be repeated for credit with change in readings. P/NP or letter grading.
- 106. Catullus. (4)** Requisite: course 100.
- 107. Horace. (4)** Requisite: course 100.
- 108. Roman Elegy. (4)** Requisite: course 100. Selections from Catullus, Tibullus, and Propertius.
- 109. Roman Satire. (4)** Requisite: course 100. Selections from *Epistles* of Horace, *Satires* of Juvenal, and *Epigrams* of Martial.
- 110. Study of Latin Prose. (4)** Lecture, three hours. Requisite: course 100. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose.
- 111. Livy. (4)** Requisite: course 100.
- 112. Tacitus. (4)** Requisite: course 100.
- 113. Cicero: The Orations. (4)** Requisite: course 100.
- 114. Roman Epistolography: Cicero and Pliny. (4)** Requisite: course 100.
- 115. Caesar. (4)** Requisite: course 100.
- 116. Roman Novel. (4)** Lecture, three hours. Requisite: course 100. Reading and discussion of either Petronius' *Satyricon* or Apuleius' *Metamorphoses* and development of the genre of prose novel in antiquity. May be repeated for credit with change in author and text.
- 117. Sallust. (4)** Requisite: course 100.
- 118. Seneca. (4)** Requisite: course 100. Selection of Seneca's works read in Latin.
- 120. The Vulgate. (4)** Lecture, three hours. Requisite: course 3. Reading of selected chapters of St. Jerome's translation of the Bible, with emphasis on unclassical features of the Latin.
- 121. Patristic Texts. (4)** Lecture, three hours. Requisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin.
- 130. Introduction to Medieval Latin. (4)** Requisite: course 3. Reading of easy prose texts, with emphasis on basic language training.
- 131. Medieval Latin Prose. (4)** Lecture, three to four hours. Requisite: course 100. Extensive reading of selected texts in prose, with emphasis on idiosyncrasies of medieval Latin. P/NP or letter grading.

- 133. Medieval Latin Poetry. (4)** Preparation: one upper division Latin language course.
- 199. Special Studies in Latin. (2 to 8)** Limited to seniors.

## Graduate Courses

- 200A-200B-200C. History of Latin Literature (6-6-6).** Lectures on history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original. Each course may be taken independently for credit.
- 201. Roman Epic Tradition. (2 or 4)** Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 202. Seminar: Catullus. (2 or 4)** Detailed consideration of entire Catullan corpus. S/U (2-unit course) or letter (4-unit course) grading.
- 203A. Elegiac Poetry. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 203B. Propertius. (2 or 4)** Course 203A is not requisite to 203B. S/U (2-unit course) or letter (4-unit course) grading.
- 204A-204B. Vergil's *Aeneid*. (2 or 4 each)** Course 204A is requisite to 204B. S/U (2-unit course) or letter (4-unit course) grading.
- 205A. Seminar: Vergil's *Bucolics*. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 205B. Seminar: Vergil's *Georgics*. (2 or 4)** Course 205A is not requisite to 205B. Close reading of Vergil's text; careful evaluation of influential criticism on the poem, much of it recent; examination of the work's place within the tradition of rural poetry. S/U (2-unit course) or letter (4-unit course) grading.
- 206. Horace. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 207. Roman Comedy. (2 or 4)** Survey of history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. S/U (2-unit course) or letter (4-unit course) grading.
- 208. Ovid. (2 or 4)** Preparation: reading knowledge of classical Latin. Detailed study of poetic works of Ovid. Readings in the original with discussion of secondary literature and scholarship. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 209. Seminar: Roman Satire. (2 or 4)** Detailed study of an individual satirist, with attention to his position in development of the satirical genre in Roman literature. Choice of author varies from year to year. Close study of the text, of characteristics of the writer as a social critic and artist, and of contemporary literary and social environment. S/U (2-unit course) or letter (4-unit course) grading.
- 210. Advanced Latin Prose Composition. (4)** Requisite: course 110.
- 211A-211B-211C. Seminars: Roman Historians. (2 or 4 each)** Study of considerable portions of writings of the following. Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading. **211A.** Sallust; **211B.** Livy; **211C.** Tacitus.
- 215. Seminar: Roman Novel. (2 or 4)** Works such as Petronius' *Satyricon* and Apuleius' *Metamorphoses*. Study of literary problems. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 216. Roman Rhetoric. (2 or 4)** Seminar, three hours. Close study of one rhetorical text (e.g., *Rhetorica ad Herennium*, Cicero's *de Oratore*, Seneca's *Controversiae* or *Suasoriae*, Quintilian's *Institutio*), with attention to its place in rhetorical tradition. May be repeated with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 220. Cicero's Orations. (2 or 4)** Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
- 221A. Cicero's Philosophical Works. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 221B. Cicero: De Natura Deorum. (2 or 4)** Course 221A is not requisite to 221B. S/U (2-unit course) or letter (4-unit course) grading.
- 222. Seminar: Roman Stoicism. (2 or 4)** Preparation: reading knowledge of Greek and Latin. S/U (2-unit course) or letter (4-unit course) grading.

- 223. Lucretius. (2 or 4)** S/U (2-unit course) or letter (4-unit course) grading.
- 224. Seneca. (2 or 4)** Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philological problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. S/U (2-unit course) or letter (4-unit course) grading.
- 229. Sight Translation. (2 or 4)** Discussion, three hours. Designed for graduate students. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions. S/U (2-unit course) or letter (4-unit course) grading.
- 231A-231B. Seminars: Medieval Latin. (2 or 4 each)** Preparation: at least one upper division Latin course. Course 231A is not requisite to 231B. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (2-unit course) or letter (4-unit course) grading.
- 232. Vulgar Latin. (4)** History and characteristics of popular Latin; its development into early forms of the Romance languages.
- 235. Late Latin Poetry. (2 or 4)** Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between the death of Ovid and fall of the Roman Empire. May be repeated with change in author.
- 236. Late Latin Prose. (2 or 4)** Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between the death of Tacitus and fall of the Roman Empire. May be repeated with change in author.
- 240. History of the Latin Language. (4)** Development of Latin from the earliest monuments until its emergence in the Romance languages.
- 242. Italic Dialects and Latin Historical Grammar. (4)** Linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in context of Italic and Indo-European linguistics.
- 243. Seminar: Latin Paleography. (4)** Studies in development of book hand in Latin manuscripts earlier than the invention of printing.
- 245. Neo-Latin. (2 or 4)** Seminar, three hours. Preparation: at least two upper division Latin courses. Requisite: course 100. Survey of texts by one or more authors from Renaissance to the present, written on related topics. S/U or letter grading.
- 495. College Teaching of Latin. (2)** Seminar, to be arranged. Preparation: appointment as a teaching assistant. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading.
- 596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.
- 597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. S/U grading.
- 599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Scope and Objectives

The major in Communication Studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of focus are offered: the concentration in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the concentration in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

## Undergraduate Study

### Communication Studies B.A.

Students selecting the major in Communication Studies must complete the required lower division requisites and a minimum of seven upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available during Spring Quarter in the program office.

#### Preparation for the Major

*Required Lower Division Courses:* Communication Studies 10, Anthropology 33 or Linguistics 1 or Sociology 24, Speech 1, one statistics course from Economics M40 or Sociology M18 or Statistics 10. Three additional courses must be selected from Political Science 40, Psychology 10, Sociology 1, and Economics 1 or 2 or 5 or Political Science 30.

Students are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.

#### Transfer Students

To be admitted as Communication Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one mass and interpersonal communication studies course, one principles of public speaking course, one linguistics course, one statistics course, and three courses from psychology, American government, sociology, microeconomics, macroeconomics, and political economy.

#### Writing Requirement

*Required:* English Composition 131D.

### The Major

*Required Core Courses:* Communication Studies 100, 101, 150.

#### Interpersonal Communication Concentration

*Required:* Eleven courses as follows:

- Seven courses, three of which must be in communication studies and one of which must be Communication Studies 115 or 120, from Anthropology 141, Communication Studies 115, M116, 120, M123, M125, M127, 130, M144A, M144B, 197G, 197J, Psychology 137C, M165, 174, 177, 178, Sociology 132 or Psychology 135, Sociology 135 or Psychology 137I, and Sociology 156 or 160
- Two mass communication elective courses from Communication Studies M135, 140, 146, M147, M148, 152, M153, M155, 156, M157, M159, 165, 170, 177, 180, 187, 197A, 197B, 197K, 197N, 197R, 197T
- Two general interpersonal communication elective courses from one of the following groups: (a) *language theory* — Anthropology M140, M145 (by petition), Communication Studies M123, M124, 197E, Linguistics 103, 170, Philosophy 172, Psychology 122 or 123, (b) *media content/criticism/history* — Communication Studies 160, M161, 171, 175 (or Film and Television 116), 189, 197C, 197R, Film and Television 106A, 108, 110A, (c) *theories of social interaction* — Anthropology 133R, 135A, 135B, 142A, 142B, Communication Studies M125, M144A, M144B, 197F, Sociology 134

#### Mass Communication Concentration

*Required:* Eleven courses as follows:

- Seven courses, three of which must be in communication studies, from Anthropology M140, Communication Studies M135, 140, 146, M147, M148, 152, M153, M155, 156, M157, M159, 160, M161, 165, 170, 171, 175 (or Film and Television 116), 177, 180, 187, 189, 197A, 197B, 197C, 197K, 197N, 197R, 197T, Film and Television 106A, 108, 110A, and Political Science 141B or Psychology 137B or Sociology 133
- Two interpersonal communication elective courses from Communication Studies 115, M116, 120, M123, M124, M125, M127, 130, M144A, M144B, 197G, 197J, Psychology 135 or Sociology 132, Psychology 137I or Sociology 135, Sociology 156 or 160
- Two general mass communication elective courses from one of the following groups: (a) *American studies* — Communication Studies 197D, English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B, (b) *language theory* — Anthropology M140, M145 (by petition), Communication Studies M123, M124, 197E, Linguistics 103,

170, Philosophy 172, Psychology 122 or 123, (c) *theories of social interaction* — Anthropology 133R, 135A, 135B, 142A, 142B, Communication Studies M125, M127, M144A, M144B, 197F, Sociology 134

## Communication Studies

### Lower Division Courses

**10. Introduction to Communication Studies. (4)** Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

**15A. Production of Multimedia Software. (4)** Description of what goes into a multimedia software program; discussion of different platforms (PC, Mac, network computers, servers, and transmitters) and distribution means (CD-ROM, DVD-ROM, Internet), content organization and layout, data structure and management; and overall planning for prototype and final product. P/NP or letter grading.

**M40. Language and Gender: Introduction to Gender and Stereotypes in English, Japanese, and Russian. (5)** (Same as Japanese M40 and Russian M40.) Lecture, three hours; discussion, one hour. Introduction to language from sociological perspective of gender. Use of research and examples in English, Japanese, and Russian to explore nature of male and female "genderlects" and gendered language, as reflected in lexicon, language behavior, phonetics and intonation, language acquisition. Letter grading.

**88A-88Z. Lower Division Seminars: Special Topics in Communication Studies. (4 each)** Seminar, three hours. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading. **88A.** Mass Communication Theory; **88B.** Systems, Institutions, and Policies; **88C.** Media Content/Criticism and History; **88D.** American Studies; **88E.** Language/Interaction Structures; **88F.** Social Systematics; **88G.** Interpersonal Communication Theory; **88J.** Heterogeneous Groups Communication:

### Upper Division Courses

**100. Communication Theory. (4)** Requisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10. Analysis of fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

**101. Freedom of Communication. (4)** Analysis of legal, political, and philosophical issues entailed in rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

**115. Dyadic Communication and Interpersonal Relationships. (4)** Requisite: course 100. Developmental approach to study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.

**M116. Communication and Conflict in Couples and Families. (4)** (Same as Psychology M176.) Lecture, 90 minutes; discussion, 90 minutes. Requisites: Psychology 10, 100A, 127. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce). P/NP or letter grading.

**M117. Rhetoric of Rule. (4)** (Same as French M143.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV's and President Clinton's attempts to manipulate their image in the "media" of their respective cultures.

**120. Principles and Types of Group Communication. (4)** Requisite: course 100. Analysis of purposes, principles, and types of small group communication. Particular emphasis on organization of and participation in problem-solving discussion.

**M123. Talk and the Body. (4)** (Same as Anthropology M148 and Applied Linguistics and TESL M161.) Seminar, four hours. Relationship between language and human body raises a host of interesting topics. New approaches to phenomena such as embodiment become possible when the body is analyzed, not as an isolated entity, but as a visible agent whose talk and action are lodged within both processes of human interaction and rich settings where people pursue courses of action that count in their lives. Letter grading.

**M124. Psychology of Language and Gender. (4)** (Same as Psychology M137J and Women's Studies M137J.) Lecture, three hours. Requisite: Psychology 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction. P/NP or letter grading.

**M125. Talk and Social Institutions. (4)** (Same as Sociology CM125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. P/NP or letter grading.

**M127. Animal Communication. (5)** (Same as Anthropology M127 and Applied Linguistics and TESL CM127.) Lecture, four hours. Designed for Anthropology, Applied Linguistics, and Communication Studies majors. Evolution, functions, design, and diversity of animal communication systems such as bird song, dolphin calls, whale song, primate social signals, and human language. Letter grading.

**130. Cultural Factors in Interpersonal Communication. (4)** Requisite: course 100. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in participation, analysis, and criticism of interethnic and interracial communications in the small group configuration.

**M135. Narrative in Mass Communication. (6)** (Same as Honors Collegium M135.) Seminar, four hours. Examination of narrative as a primary function of mass media, beginning with social, psychological, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

**140. Theory of Persuasive Communication. (4)** Requisite: course 100. Dynamics of communication designed to influence human conduct; analysis of structure of persuasive discourse; integration of theoretical materials from relevant disciplines of humanities and social sciences.

**142. Rhetorical Theory. (4)** Requisite: course 100. Survey of major classical and neoclassical treatises on rhetoric. Analysis of theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in theory of rhetoric.

**M144A-M144B. Conversational Structures I, II. (4-4)** (Same as Sociology CM124A-CM124B.) Lecture, three hours; discussion, one hour. P/NP or letter grading.

**M144A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions.

**M144B.** Requisite: course M144A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

**146. Evolution of Mass Media Images. (5)** (Formerly numbered 197K.) Lecture, four hours; discussion/laboratory, one hour. Analysis of evolutionary psychology as basis for images selected by media portraying women and/or minorities in entertainment, advertising, and informational communication. Letter grading.

**M147. Sociology of Mass Communication. (4)** (Same as Sociology M176.) Requisite: course 100. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

**M148. Marketing, Advertising, and Human Nature. (5)** (Same as Economics M188M.) Seminar, four hours. Limited to Communication Studies and Economics majors. Marketing, advertising, and consumer behavior from viewpoint of evolutionary psychology and biology, including analysis of motives and patterns of consumption, current marketing strategies and marketing myths, and contents and effectiveness of advertising. Letter grading.

**150. Methodologies in Communication Research. (5)** Lecture, three hours; discussion, one hour. Limited to Communication Studies majors. Critical studies of quantitative and qualitative methodologies in communication research. Letter grading.

**152. Analysis of Communication Effects. (4)** Requisite: course 100. Survey of experimental and field research on effects of communications. Study of source, message, and environmental factors affecting audience response.

**M153. The Media and Aggression against Women. (4)** (Formerly numbered 153.) (Same as Women's Studies M153.) Lecture, two hours; discussion, two hours. Requisite: course 152. Study of the growing body of literature on relationship between mass media and aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media. Letter grading.

**M155. Information Superhighway. (4)** (Same as Policy Studies CM110.) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services.

**156. Human/Computer Communication. (4)** Preparation: completion of the seven preparation for the major courses. Limited to Communication Studies majors. Survey of behavioral, design, and evaluation issues in human/computer communication. Readings from disciplines of psychology, sociology, computer science, communication, and library and information science. Students perform several on-line assignments in learning to use different technologies. Term paper required.

**M157. Culture, Identity, and Media. (4)** (Same as Policy Studies M111.) Discussion, three hours. Interplay of national culture and identity with electronic media, both "old" and "new." Examination of how national mythologies, constructive or pernicious, are reinforced through the media in several countries: U.K., France, Germany, Canada; analysis of how media manipulation, especially of radio and television, increasingly paves the way to war: Bosnia, Rwanda, Somalia.

**M159. Pornography and Evolution. (4)** (Formerly numbered 197K.) (Same as Women's Studies M159.) Lecture, three hours. Discussion of theories and research on why pornography exists and its effects. Use of topic to illustrate value of evolutionary theory to social sciences generally. Letter grading.

**160. Political Communication. (4)** Requisites: courses 100, 101. Study of nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns.

**M161. Electoral Politics: Mass Media and Elections. (4)** (Same as Political Science M141D.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 160. Designed for juniors/seniors. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

**165. Agitational Communication. (4)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 100, 101. Theory of agitation; agitation as a force for change in existing institutions and policies in a democratic society. Intensive study of selected agitational movements and the technique and content of their communications. P/NP or letter grading.

**170. Legal Communication. (4)** Requisites: courses 100, 101. Study of trial and appellate processes as systems of communication. Analysis of elements of the juridical process as they affect the quality of communication content. Study of rules of evidence, jury behavior, and structure of legal discourse.

**171. Seminar: Theories of Freedom of Speech and Press. (4)** Requisite: course 101. Exploration of relationship between freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to media, and control of commercial, corporate, and government speech.

**175. Criticism and the Public Arts. (4)** Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 10. Introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include definition of art and criticism, aesthetic media, genre and resources of film, television, theater, and public discourse, varieties of critical method, problems of critical judgment. P/NP or letter grading.

**177. Libel and Freedom of Expression. (4)** Lecture, two hours; discussion, two hours. Requisite: course 101. Intensive study of law of defamation and its relationship to the free flow of information in a democracy. Examination of rationale, scope, and effects of libel laws. Topics include application of libel laws to public official, public figure, and private plaintiffs and media and nonmedia defendants; group libel, privileged libel, and libelous fiction.

**180. Politics of Censorship. (4)** Discussion, two hours; simulation teaching, three hours. Requisite: course 101. Examination of the process and substance of debates over government and private censorship by having students become active participants in a term-long simulated battle over a current issue such as book censorship, pornography, or UNESCO's proposed "New World Information Order."

**185. Field Studies in Communication. (2 to 4)** Requisite: course 10. Designed for juniors/seniors. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each 2 units of credit. May be taken for a maximum of 4 units per term. P/NP grading.

**187. Ethical and Policy Issues in Institutions of Mass Communication. (4)** Requisites: courses 10, 101. Intensive examination of ethical and policy issues arising from interaction of media institutions (print, film, broadcasting, and new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences).

**189. Multicultural Television and Society. (4)** Study and evaluation of cross-cultural, social, and psychological characteristics of selected national and international television programs and their implications for social learning in children. Designed to systematically study multicultural attributes related to sociocultural images and portrayals of television programs using various evaluation models and techniques.

**191HA-191HB-191HC. Departmental Honors Research. (4-4-4)** (Formerly numbered 191H.) Discussion, three hours. Letter grading. **191HA.** Requisites: courses 10, 150. Limited to junior/senior majors. Preparation of research proposal. Detailed bibliography from review of relevant literature and plan for implementation of research study. **191HB.** Requisite: course 191HA. Continuation of work initiated in course 191HA. Presentation of summary of data gathered and report on relevant progress. **191HC.** Requisite: course 191HB. Continuation of work initiated in course 191HB. Completion of research project; oral and written presentation of honors thesis.

**196H. Undergraduate Honors Proseminar. (4)** Preparation: 3.5 grade-point average in communication studies major, 3.3 grade-point average overall. Limited to seniors. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

**197A-197Z. Special Topics in Communication Studies. (4 each)** Lecture, three hours. Preparation: completion of preparation for the major courses. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. **197A.** Mass Communication Theory; **197B.** Systems, Institutions, and Policies; **197C.** Media Content/Criticism and History; **197D.** American Studies; **197E.** Language/Interaction Structures; **197F.** Social Systematics; **197G.** Interpersonal Communication Theory; **197J.** Heterogeneous Groups Communication; **197K.** Communication Policy; **197N.** Humanistic Approaches to Mass Communication; **197R.** Political Factors in Mass Communication; **197T.** Technology in Communication.

**199. Special Studies. (2 to 8)** To be arranged with faculty member who directs the study. Limited to seniors. Independent studies for seniors who desire intensive or specialized investigation of selected research topics.

**199H. Special Studies for Honors Candidates. (2 to 8)** To be arranged with faculty member who directs the study. Limited to senior honors program students. Independent studies for honors undergraduates who desire intensive or specialized investigation of selected research topics.

## COMMUNITY HEALTH SCIENCES

*School of Public Health*

UCLA  
36-071 Center for the Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772

(310) 825-5308  
<http://www.ph.ucla.edu/chs/>

Gail G. Harrison, Ph.D., *Chair*  
Donald E. Morisky, Sc.D., M.S.P.H., *Vice Chair*

### Professors

Carol S. Aneshensel, Ph.D.  
Emil Berkanovic, Ph.D.  
Linda B. Bourque, Ph.D.  
E. Richard Brown, Ph.D.  
Osman M. Galal, M.D., Ph.D.  
Deborah C. Glik, Sc.D.  
Michael S. Goldstein, Ph.D., *Associate Dean for Student Affairs*  
Neal Halfon, M.D., M.P.H.  
Gail G. Harrison, Ph.D.  
David Heber, M.D., Ph.D.  
Dean T. Jamison, Ph.D.  
Snehendu B. Kar, Dr.P.H., M.Sc.  
Joel D. Kopple, M.D., *in Residence*  
Virginia C. Li, Ph.D., M.P.H.  
Donald E. Morisky, Sc.D., M.S.P.H.  
Charlotte G. Neumann, M.D., M.P.H.  
Anne Pebley, Ph.D.  
Michael G. Ross, M.D., M.P.H.  
John F. Schnelle, Ph.D., *in Residence*  
Judith M. Siegel, Ph.D., M.S.Hyg., *Associate Dean for Academic Programs*  
Susan B. Sorenson, Ph.D.  
Steven P. Wallace, Ph.D.

### Professors Emeriti

Roslyn B. Alfin-Slater, Ph.D.  
Isabelle F. Hunt, Dr.P.H., R.D.  
Alfred H. Katz, D.S.W., M.S.  
Alfred K. Neumann, M.D., M.A., M.P.H., F.A.B.P.M.  
Edward L. Rada, Ph.D.  
Marian E. Swendseid, Ph.D.  
Daniel M. Wilner, Ph.D.

### Associate Professor

Dawn M. Upchurch, Ph.D.

### Assistant Professors

Kim Gregory, M.D., M.P.H., *in Residence*  
Marjorie Kagawa-Singer, Ph.D.

Michael Lu, M.D., M.P.H.

### Lecturers

Marianne Parker Brown, M.P.H.  
Susan Edelstein, M.S.W., L.C.S.W.  
Jonathan Freedman, M.P.H.  
Lynn Kersey, M.A., M.P.H.  
Wendy Lazarus, M.S.

### Adjunct Professors

Daniel H. Ershoff, Dr.P.H.  
Neal Kaufman, M.D., M.P.H.  
Steve Rottman, M.D.

### Adjunct Associate Professors

Martin Anderson, Ph.D.  
Carol Archie, M.D.  
Diana Bonta, Dr.P.H.  
Marion Taylor Baer, Ph.D., R.D.  
Daniel H. Ershoff, Dr.P.H.  
Joanne Leslie, Sc.D.  
C. Kevin Malotte, Ph.D.  
Michael Regaldo, M.D.  
Antronette K. Yancey, M.D., M.P.H.

### Adjunct Assistant Professors

Helen DuPlessis, M.D., M.P.H.  
Vicki Ebin, Ph.D.  
Janet Frank, Ph.D.  
Ronald Halbert, M.D.  
Moirra Inkelas, Ph.D.  
Michael Prelip, D.P.A., M.P.H., C.H.E.S.  
Kimberley Shoaf, Dr.P.H.  
Wendelin Slusser, M.D.  
Bonnie Taub, Ph.D.  
Valentine Villa, Ph.D.

## Scope and Objectives

The Department of Community Health Sciences focuses on the determinants of health within the context of the social structure, community, health care systems, and family units. Of particular interest is how health-related behaviors of individuals are influenced by and interact with conditions in the social, cultural, physical, and biological environment to influence health status, with particular emphasis on identifying, evaluating, and discouraging health-damaging behaviors and facilitating health-promoting behaviors. The curriculum seeks to integrate basic and applied public health theories and methods in applying them to real problems of human populations. Assessment, planning, and evaluation are common themes in the department's educational programs. Students specializing in maternal and child health complete additional coursework.

The department offers both professional (M.P.H. and Dr.P.H.) and academic (M.S. and Ph.D.) degree programs. Graduates of the professional programs generally assume positions in the planning, administration, and evaluation of public health programs and policies, both in the U.S. and abroad, which have as their objective the maintenance and improvement of the health of individuals, families, communities, and populations. Graduates of the doctoral programs assume teaching and research positions in a wide variety of settings, including universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Community Health Sciences offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Public Health.

## Admission

Applicants to the M.S. program should see the Master of Public Health (M.P.H.) admission section under Public Health Schoolwide Programs. Admission requirements for the M.S. in Public Health are the same as for the M.P.H.

For the Ph.D. program, in addition to the University minimum requirements, the department requires (1) a master's degree in public health (either an M.P.H. or M.S.) or other appropriate degree in a related field with a grade-point average of at least 3.5 for graduate studies, (2) satisfactory performance on the Graduate Record Examination (GRE) verbal and quantitative sections; equivalent performance on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT) may be substituted at the discretion of the department, (3) a score of at least 600 (paper and pencil test) or 250 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language Testing System (IELTS) examination for students whose undergraduate degree is from an institution whose primary language of instruction is not English, (4) an example of published or other written work, and (5) a statement of purpose that includes a description of research experience, discussion of current substantive interests, a brief description of potential research project that might serve as a dissertation, and a statement of career goals, and (6) approval by the doctoral admissions committee and the department chair. Screening examinations may be required by the department.

It is recommended that applicants contact one or more members of the faculty whom they are considering as advisers in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the Ph.D. program.

## Master's Degree

The M.S. degree is offered through the comprehensive examination and thesis plans. Students must complete a minimum of 10 full courses, at least five of which must be graduate courses. No more than 18 full courses are required for the degree. There are mandatory core introductory courses in biostatistics and epidemiology, as well as other required and elective courses.

## Doctoral Degree

Faculty in the department represent a range of disciplines and focus their research and curriculum in five areas of specialization: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health. Ph.D. students may design their programs in one or more of these areas.

A number of specific introductory courses are required if students have not already taken them or their equivalent in the course of the master's degree or other postgraduate work. This coursework, in biostatistics, community health sciences, environmental health sciences, epidemiology, and health services, is in addition to the 48-unit minimum course requirement. A doctoral roundtable is required every quarter until advancement to candidacy.

Students minor in a Ph.D.-granting department outside the School of Public Health, in a discipline relevant to community health sciences.

Written and oral qualifying examinations are required. There is a written examination administered by the department and an oral qualifying examination in the major field. Additionally, students must complete the requirements for the minor field and pass an examination administered by the minor department or the minor member of the guidance committee.

Following successful completion of the written qualifying examination and the minor requirements, students take the University Oral Qualifying Examination.

## Community Health Sciences

### Lower Division Courses

**19. Peer Health Counselor Training. (4)** Lecture, four hours. Limited to students in Peer Health Counselor Program. Analysis of student health care issues as related to campus health care delivery system and to health care consumer. Identification of health needs, determination of appropriate resources, delivery of preventive and self-care education, and delineation of peer health counselor's role. P/NP or letter grading.

**88. Lower Division Seminar: Special Topics in Community Health Sciences. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in community health sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

**90. Aging Frontier: Public Health Perspective. (4)** (Formerly numbered 190.) Lecture, three hours; discussion, one hour. Introduction to gerontology from public health perspective, emphasizing prevention of illness and promotion of healthy aging. Special attention to health and aging among women and racial/ethnic minorities. Letter grading.

### Upper Division Courses

**100. Introduction to Community Health Sciences. (4)** Lecture, three hours; discussion, one hour. Development of broad appreciation of community, cultural, developmental, and psychosocial factors as they affect health, health-related behavior, and implications for public health. Review of theories, models, and modalities of interventions and policies for health promotion and disease prevention. Letter grading.

**130. Nutrition and Health. (4)** Lecture, three hours; laboratory, one hour. Preparation: one biology course, one chemistry course. Not open for credit to nutrition majors. Basic and clinical nutrition theory and practice for students in health sciences curricula. P/NP or letter grading.

**132. Health, Disease, and Health Services in Latin America. (4)** Lecture, four hours. Introduction to health, disease, and health services in Latin America, with emphasis on epidemiology, health administration, medical anthropology, and nutrition. P/NP or letter grading.

**M140. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4)** (Same as Asian American Studies M129A.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

**195. Field Studies in Cancer Control. (4)** Lecture, two hours; discussion, one hour; fieldwork, four hours. Requisite: Molecular, Cell, and Developmental Biology 30. Designed for juniors/seniors. Opportunity for students to become involved in cancer control through classroom discussion, lectures, service in the field, and guided research. Biology of cancer, its prevention, early detection, treatment, and rehabilitation. Letter grading.

**196A. Introduction to Health Promotion Fieldwork. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours. Designed for juniors/seniors. Training and experience in health promotion and health education in selected ethnic communities, including participation in supervised fieldwork at sites throughout Los Angeles. Letter grading.

**196B. Advanced Health Promotion Fieldwork. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours. Requisite: course 196A. Application of skills and experience gained in course 196A to development and provision of additional health education and health promotion in selected ethnic communities. Letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

### Graduate Courses

**200. Global Health Problems. (4)** Lecture, two hours; discussion, two hours. Overview of health profile of the world in the 20th century. Global health problems and methods by which they have been dealt in context of the Alma Ata goal of "health for all by year 2000." Letter grading.

**M208. Introduction to Demographic Methods. (4)** (Same as Biostatistics M208 and Sociology M213A.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

**210. Community Health Sciences. (4)** Lecture, three hours. Preparation: one social sciences course. Basic concepts, relationships, and policy issues in the field of community health, variability in definitions of health and illness, correlates of health and illness behavior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective. Letter grading.

**211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences. (4-4)** Lecture, three hours; discussion, one hour; outside assignments, eight hours. Requisite: course 210. Course 211A is requisite to 211B. Development, planning, and administration of public health programs in community settings. Introduction to range of research methods and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-based public health programs. Course organized into three modules. Letter grading.

**212. Advanced Social Research Methods in Health. (4)** Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Requisites: courses 211A, 211B, Biostatistics 100B, 406. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Letter grading.

**213. Research in Community and Patient Health Education. (4)** Lecture, three hours; discussion, two hours. Requisite: course 210. Application of conceptual, theoretical, and evaluation skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through microcomputer and mainframe computer management and analysis of program databases. Letter grading.

**214. Issues in Program Evaluation. (4)** Discussion, three hours; reading and research paper, one hour. Requisite: course 212. Advanced seminar which explores problems of planning and implementing evaluation research in context of local demonstration projects. Letter grading.

**M216. Qualitative Research Methodology. (4)** (Same as Anthropology M284.) Discussion, three hours; laboratory, one hour. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. Letter grading.

**M218. Questionnaire Design and Administration. (4)** (Formerly numbered 218.) (Same as Epidemiology M218.) Lecture, four hours. Requisites: courses 211A and 211B, or Epidemiology 201A and 201B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

**219. Strategies for Multivariate Data Analysis. (4)** Discussion, three hours. Preparation: one multivariate statistics course. Designed for graduate students. Translation of theory into a data analytic plan, with special emphasis on social epidemiology; application of this analytic plan to real data; and interpretation of results obtained through multivariate analysis. Letter grading.

**220. Demography of Women. (4)** Lecture, four hours. Overview of demography of women, with focus on the U.S. Areas include trends and differentials in fertility, marital patterns and living arrangements, educational attainment, and labor force participation. Letter grading.

**221. Introduction to Sociocultural Aspects of Health. (4)** Lecture, three hours; discussion, one hour. Examination of how social stratification and culture relate to health and health-related behavior. Consideration of four major status characteristics: age, ethnicity, gender, and socioeconomic status. Description of epidemiological patterns and discussion of social meaning of the four characteristics. Letter grading.

**228. Drug Abuse Prevention. (4)** Discussion, three hours. Identification and discussion of strategies for prevention of drug abuse at individual and community levels, particularly in minority populations. Letter grading.

**229. Policy and Public Health Approaches to Violence Prevention. (4)** Lecture, four hours. How policies relate to violence and development of skills to transmit this knowledge. Examination of wide range of policy topics and how each might be associated with a reduction/increase in violence/violent injury. Letter grading.

**230. Family and Sexual Violence. (4)** Lecture, three hours; community, three to four hours. Examination of rape, incest, and spouse and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as response of social service, medical, and criminal justice systems. Letter grading.

**231. Maternal and Child Nutrition. (4)** Lecture, four hours. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein/calorie malnutrition; relationship between nutrition and mental development; impact of ecological, socioeconomic, and cultural factors on nutrition, nutrition education, and service. Letter grading.

**M232. Determinants of Health. (4)** (Same as Health Services M242.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

**233. Hunger and Food Insecurity as Public Health Issues. (4)** Lecture, three hours. Prerequisite: course 231 or 443. Public health aspects of hunger and food insecurity in historical and international perspectives, including measurement and identification of vulnerability, prevention, and options for relieving acute food shortage. Letter grading.

**234. Obesity and Nutrition: Multidisciplinary Perspective. (2)** Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: admission to UCLA postdoctoral fellowship training program in obesity and nutrition, or graduate public health or biological sciences student. Multidisciplinary introduction at advanced graduate level to research methods and topics on obesity and related conditions in humans and in relevant animal and in vitro models. S/U or letter grading.

**235. The Family and Mental Health. (4)** Lecture, two hours; discussion, two hours; assignments, eight hours. Emphasis on how social organization of the family, relationships among family members, and extrafamilial roles of family members contribute to or detract from psychological well-being of spouses, parents, and children. Letter grading.

**237. Evolving Paradigms of Prevention: Interventions in Early Childhood. (4)** Seminar, three hours; fieldwork, one hour. Designed for graduate students. Introduction to use of early childhood interventions as means of preventing adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues. Letter grading.

**238. Evolving Paradigms of Prevention: Interventions in Adolescence. (4)** Seminar, three hours. Designed for graduate students. Introduction to organizing principles which underlie health assessment and intervention in adolescent populations (identity formation, access to care, knowledge/attitudes/behavior influences) and provide a basis for understanding pivotal issues in health enhancement, morbidity, and mortality. Letter grading.

**M239. Race and Ethnicity as a Concept in Practice and Research. (4)** (Formerly numbered 239.) (Same as Asian American Studies M239.) Discussion, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

**242. Advanced Seminar: Population and Family Health. (2)** Seminar, two hours. Designed for doctoral students. Current research in population and family health. May be repeated for credit. S/U grading.

**243A-243B-243C. Seminars: Public Health Practice. (2-2-2)** Seminar, one hour; laboratory, one hour. Three-term sequence devoted to analysis of current issues, practices, research literature, and policy and trends in public health practice. Discussion of administrative, epidemiologic, and clinical methods. S/U or letter grading.

**M244. Advanced Seminar: Medical Anthropology. (4)** (Same as Anthropology M263Q, Nursing M273, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

**M245A-M245B-M245C. Child Abuse and Neglect. (2-2-1)** (Same as Dentistry M300A-M300B-M300C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M245A is requisite to M245B, which is requisite to M245C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

**246. Women's Roles and Family Health. (4)** Lecture, two hours; discussion, one hour. Rapidly changing roles of women throughout the world are having important effects on women's own health and that of their families. Analysis of multidisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion of programmatic and policy implications. Letter grading.

**247. Population Change and Public Policy. (4)** Lecture, four hours. Examination of international population change, population-related policies, and public health implications of demographic processes. Letter grading.

**248. Women's Mental Health. (4)** Discussion, three hours. Designed for graduate students. Prevalence of psychological distress and psychiatric disorder among women, with emphasis on impact of social and cultural factors, including gender roles and socialization, stratification and inequality, work and family roles, diagnosis, help-seeking behavior, and treatment. Letter grading.

**M249L. Ethical Issues in Public Health. (4)** (Same as Health Services M249L.) Lecture, four hours. Prerequisites: Health Services 200A, 200B, 200C. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

**M251. Human Resources and Economic Development. (4)** (Formerly numbered M236.) (Same as Education M252C.) Lecture, four hours. Examination, in context of developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. S/U or letter grading.

**M252. Health Policy Analysis. (4)** (Same as Health Services M233.) Lecture, three hours. Prerequisites: Health Services 100 or 200A, M236, M287. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Letter grading.

**M253. Advanced Topics in Health Services Research: Access to Care. (4)** (Same as Health Services M253.) Lecture, three hours. Prerequisites: courses 210, 270A, and 270B, or Health Services 237A, 237B, and 237C. Doctoral seminar designed to explore health services research regarding access to health care and policies to enhance access. Topics include conceptual frameworks, measurement issues, study designs, analytic approaches, and substantive findings and trends in access and access-related policies. Letter grading.

**M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries. (2)** (Same as Epidemiology M255.) Lecture, two hours. Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. Letter grading.

**256. Bioterrorism: Deliberate Public Health Disaster. (2)** Lecture, two hours. Designed for graduate students. Public health significance of biological terrorist events and identification of strategies that public health professionals can use to prevent, detect, and intervene in bioterrorist events in order to prevent morbidity and mortality in the population. Letter grading.

**257. Program Planning in Community Disaster Preparedness. (4)** Lecture, four hours; outside study, eight hours. Prerequisites: courses 211A, 211B, 295. Health education and emergency management principles combined to design, plan, implement, and evaluate community disaster preparedness programs, including needs assessment, identification of target population, objective writing, program planning, and process, outcome, and impact evaluation. Letter grading.

**258. Cooperative Interagency Management in Disasters. (4)** Lecture, four hours. Prerequisites: courses 211A, 211B, 295. Overview of interagency disaster management. How different agencies work together to respond to impact of disasters on public's health. Discussion of difficulties inherent in emergency management, as well as policy and program strategies. Letter grading.

**M260. Health and Culture in the Americas. (4)** (Same as Anthropology M266 and Latin American Studies M260.) Lecture, three hours; discussion, one hour. Preparation: bilingual skills (English/Spanish) for Spanish discussion section. Recommended requisite: course 132. Health issues throughout the Americas, especially indigenous/Mestizo Latin American populations. Holistic approach covering politics, economics, history, geography, human rights, maternal/child health, culture. Letter grading.

**M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4)** (Same as Anthropology M264 and Latin American Studies M264.) Lecture, three hours. Recommended preparation: course 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with a variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

**270A-270B. Foundations of Community Health Sciences. (4-4)** Lecture, four hours. Prerequisite: course 210. Course 270A is requisite to 270B. Designed for doctoral students. In-depth analysis of theories, methods, and research on which community health sciences are based. Letter grading.

**271. Health-Related Behavior Change. (4)** Lecture, four hours. Prerequisite: course 210. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels. Letter grading.

**272. Social Epidemiology. (4)** Lecture, two hours; discussion, one hour. Prerequisite: Epidemiology 100. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality. Letter grading.

**273. Social Epidemiology of Chronic Disease. (4)** Lecture, two hours; discussion, one hour. Prerequisite: Epidemiology 100. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on lifestyles and other socioenvironmental factors associated with chronic diseases. Letter grading.

**M274. Health Professions. (4)** (Same as Sociology M249A.) Lecture, three hours. Prerequisite: course 210. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings. S/U or letter grading.

**M275. Health and Illness Behavior. (4)** (Same as Sociology M249B.) Lecture, four hours. Prerequisites: course 210, Epidemiology 100. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior. S/U or letter grading.

**276. Complementary and Alternative Medicine. (4)** Lecture, three hours. Prerequisites: course 100 or 210, Health Services 100. Analysis of use and acceptance of complementary and alternative medicine (CAM) by clients and providers. Core beliefs of CAM, relationship of CAM and spirituality, licensure and certification of CAM providers, relationship of CAM and conventional medicine, impact of CAM on client identity. Letter grading.

**277. Advanced Community Health Education. (4)** Lecture, two hours; discussion, two hours. Prerequisite: course 210. Before planning the educational components of a health program, one must assess behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program. Letter grading.

- 278. Occupational Health Psychology: Work Organization and Health. (4)** Lecture, three hours; practicum, one hour. Recommended preparation: graduate-level methods/statistics course, basic epidemiology. Designed for graduate students. Exploration of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models, measurement (including hands-on experience), contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. Letter grading.
- 280. International Health Education: Training and Development. (4)** Lecture, four hours. Preparation: one upper division research methods or epidemiology course. Requisite: course 210. Introduction to an international perspective of health education and health promotion. Survey of current developments in health education in both developed and developing countries. Letter grading.
- 281. Capstone Seminar: Health Promotion and Education. (4)** Seminar, 90 minutes; discussion, 90 minutes. Requisite: course 210. Current problems and findings in health promotion and education (e.g., nutrition, family health, AIDS/NIV, minority health); learning from presentations and critical discussions of master's project reports completed under faculty supervision. Letter grading.
- 282. Communication in Health Promotion and Education. (4)** Lecture, two hours; discussion, two hours. Requisite: course 210. Design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis on communication theories, models, and empirical research literature and on specific applications in health programs and case studies. Letter grading.
- 283. Aging and Health Behavior. (4)** Discussion, three hours. Requisite: course 210. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among the aged. Letter grading.
- 284. Sociocultural Aspects of Mental Health. (4)** Discussion, three hours. Designed for graduate students. Examination of how society shapes mental health of its members and lives of those who have been identified as mentally ill. Group differences (e.g., gender, ethnicity) in disorder and how it is socially constructed. Letter grading.
- 285. Aging, Health, and Society. (4)** Lecture, three hours; discussion, one hour. General introduction to major social issues affecting health of the elderly in America. Learning gerontological theories and major issues that affect the aged, showing how those theories and issues influence health status, health promotion, and illness among the elderly. S/U or letter grading.
- 286. Doctoral Roundtable in Community Health Sciences. (2 to 4)** Seminar, two hours. Designed for departmental doctoral students. Interactive seminar with focus on research process and social mechanisms in science. May be repeated for credit. S/U grading.
- M287. Politics of Health Policy. (4)** (Same as Health Services M287.) Lecture, three hours; discussion, one hour. Requisites: course 210, or Health Services 200A and 200B. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors. Letter grading.
- 288A-288B. Current Problems in Health Education. (4-4)** Lecture, one hour; discussion, three hours. Preparation: three public health and/or social sciences courses. Requisite: course 210. Current problems and findings in health education content areas, such as nutrition, mental health, family health, consumer health, safety, and communicable and chronic diseases. In Progress and S/U grading.
- 289. Drug Abuse in Pregnancy: Special Focus on Adolescents and Utilizing Secondary Data Sources. (4)** Lecture, three hours; clinical placement. Designed for graduate students. Multidisciplinary graduate seminar combining didactic material on substance abuse in pregnancy, participation in ongoing research, and clinical experience in on- and off-campus settings. Medical, social, economic, and legal issues affecting pregnant substance abusers. Letter grading.
- 290. Race, Class, Culture, and Aging. (4)** Lecture, three hours; discussion, one hour. Experience of aging for African American, Latino, and Asian elderly examined in context of their families, communities, and the nation. Exploration of cultural and structural influences on health and lived experiences of those elders. Letter grading.
- 291. Health Policy and the Aged. (4)** Lecture, three hours; discussion, one hour. Examination of political, economic, and social forces that shape health policy for the aged, identifying failings in those policies within framework of broader health policy problems. Letter grading.
- 292. Communication and Media Development in Health Promotion/Education. (4)** Lecture, three hours; field practice, one hour. Requisites: course 210 or prior social sciences courses. Selected aspects of communications planning, social marketing, mass media, and communications evaluation theory and practice. Letter grading.
- 293. Social and Behavioral Research in AIDS: Roundtable Discussion. (2 to 4)** Discussion, two hours; individual consultation, two hours. Review and discussion of research programs directed toward identification of psychosocial, biobehavioral, environmental, and community factors related to prevention and control of AIDS/HIV. Letter grading.
- M294. Social and Behavioral Factors of HIV/AIDS: Global Perspective. (4)** (Formerly numbered 294.) (Same as Psychiatry M288.) Lecture, four hours. Requisites: course 100 and Epidemiology 100, or prior social sciences courses. Overview of social and behavioral factors which influence both transmission and prevention of HIV/AIDS throughout the world. Letter grading.
- 295. Selected Topics in Disaster Relief and Humanitarian Assistance. (2)** Lecture, two hours. Designed for graduate students. Overview of broad interdisciplinary issues which necessarily converge in fields of disaster preparedness and humanitarian assistance. Introduction to both theoretical and problem-solving strategies. Letter grading.
- 296. Advanced Research Topics in Community Health Sciences. (2 to 4)** Discussion, two to four hours. Advanced study and analysis of current topics in community health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U or letter grading.
- M299. Intervention to Reduce HIV and Its Consequences. (4)** (Same as Psychiatry M289.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations. Letter grading.
- 400. Field Studies in Public Health. (2 or 4)** Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.
- M411. Issues in Cancer Prevention and Control. (4)** (Same as Health Services M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.
- M418. Rapid Epidemiologic Surveys in Developing Countries. (4)** (Same as Epidemiology M418.) Lecture, four hours. Requisites: Biostatistics 100A, Epidemiology 100 and/or 200. Presentation of how to do health surveys in Third World countries. Practical assistance for planning and organizing surveys, including use of microcomputers to develop and test the questionnaire, select the sample, process and analyze data, and prepare final report. Letter grading.
- M420. Children with Special Health Care Needs: Systems Perspective. (4)** (Same as Social Welfare M290I.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices which have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.
- 425. Child Advocacy: Skills for Effective Action. (4)** Seminar, three hours; fieldwork, one hour. Designed for graduate students. Use of case method approach to involve students both in classroom discussions and in fieldwork projects about which they update classmates. Highly respected leaders for children in the community share experiences and offer insight. Letter grading.
- 426. School-Linked Services: Integrated Health, Education, and Social Services for Children in Communities. (4)** Seminar, three hours; fieldwork, one hour. Designed for graduate students. Examination of school services in context of other dramatic changes, scope of problems facing youth, roles that schools may serve as organizers/delivery sites for comprehensive services, and factors that influence development of appropriate school service models. Letter grading.
- 430B. Advanced Issues in International Health. (4)** Lecture, two hours; discussion, two hours. In-depth focus on major health care issues confronting recipient less-developed countries and donors of technical and financial assistance. S/U or letter grading.
- 431. Research in Women's Health: Theories and Methods. (4)** Lecture, four hours. Interdisciplinary perspective critically examining research on women's health. Overview of scientific inquiry and methods; gender roles; status attainment and medical sociology. Review of current data on women's health. Letter grading.
- 432. Perinatal Health Care: Principles, Programs, and Policies. (4)** Lecture, three hours; discussion, one hour. Comprehensive examination of perinatal health care, including perinatal epidemiology, outcome measures, public programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical/legal issues. S/U or letter grading.
- 433. Reproductive Health: Demographic Applications. (4)** Lecture, four hours. Introductory aspects of population dynamics; reproductive biology (male and female); contraceptive methods; fertility-related behaviors and STDs; methods to measure contraceptive (life tables) and program (evaluation) effectiveness. Letter grading.
- 434A. Maternal and Child Health in Developing Areas. (4)** Lecture, four hours. Requisite: course 231. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieu. S/U or letter grading.
- 434B. Recent Developments in Maternal and Child Health in Disadvantaged Countries. (2)** Seminar, two hours. Requisite: course 231. Analytic in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries. S/U or letter grading.
- 435. Seminar: Advanced Issues in Women's Health. (2)** Seminar, two hours. Requisite: course 246 or 431. Provides a more advanced and in-depth understanding of ways in which scientists "know" and considerations of women's place in scientific discourse. Examination of a series of case studies as a starting point for discussion. Letter grading.
- M436A-M436B. Child Health, Programs, and Policies. (4-4)** (Same as Health Services M449A-M449B.) Lecture, four hours. Requisite: Health Services 100. Course M436A is requisite to M436B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.
- 437. Principles and Practice of Preventive Medicine. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Comprehensive review and evaluation of scientific background and application of principles of preventive medicine, with primary focus on the family and the disadvantaged. Letter grading.
- 438. Research Seminar: Community Child Health Services. (2)** Seminar, one hour; laboratory, one hour; field trips, two hours. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation skills, with participation of local health department personnel. S/U or letter grading.
- 441. Advanced Program Planning and Evaluation in International Health. (4)** Lecture, two hours; discussion, two hours. Theory, guidelines, and team exercise for planning community health/family planning projects in the U.S. and in developing countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation. Letter grading.

**443. Assessment of Family Nutrition. (4)** Lecture, four hours. Requisite: course 231. Assessment of nutritional status of families in developing countries, with special reference to limited resources, terrain, and cross-cultural considerations, stressing anthropometric methods and techniques. S/U or letter grading.

**444. Anthropometric and Dietary Aspects of Nutritional Assessment. (4)** Lecture, two hours; laboratory, two hours. Requisite: course 443. Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and handling, and analysis and presentation. Letter grading.

**445. Food and Nutrition Planning: Policies and Programs in World Context. (4)** Lecture, two hours; discussion, two hours. Requisite: course 434A. Discussion of policies regarding improvement of food supplies and their global impact on health of disadvantaged families, including review of effect of many factors, with emphasis on need for multidisciplinary action, food and nutrition planning, and external assistance. S/U or letter grading.

**446. Nutrition Education and Training: Third World Considerations. (4)** Lecture, two hours; discussion, one hour; student participation, one hour. Requisite: course 434A. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary health care services, mass media, communications, and governmental and international interventions. S/U or letter grading.

**447. Health and Social Context in the Middle East. (4)** Lecture, four hours. Recommended preparation: background in Islamic or Middle Eastern studies. Requisite: course 200 or 231 or 434A. Current health issues and problems of countries in the Middle East and implications for socioeconomic development. Review of economic, demographic, and cultural variation of the region to provide background for discussion of trends and patterns of health and nutritional status of population in the area. Letter grading.

**448. Nutrition Policies and Programs: Domestic and International Perspectives. (4)** Lecture, two hours; discussion, two hours; field visits. Preparation: one nutrition sciences course and/or nutrition program experience. Nutrition programs and policies in the U.S. and developing countries compared and contrasted. Analysis of role of major international, governmental, and nongovernmental agencies. Emphasis on meeting needs of vulnerable populations. Letter grading.

**449. Nutrition and Chronic Disease. (4)** Lecture, four hours. Preparation: one graduate or undergraduate course each in chemistry or biochemistry, physiology, and nutritional sciences, or M.D. degree. Advanced-level seminar on nutritional needs of healthy individuals, current knowledge of role of nutrition in disease prevention, nutritional and metabolic responses to disease, and role of nutritional therapy in management of disease. Letter grading.

**451. Post-Disaster Community Health. (4)** Lecture, four hours. Requisite: course 295. Examination of how public health research and practices can be combined to address post-disaster community health needs. Identification of disaster-related health problems, data collection strategies, and service delivery approaches in a post-disaster environment. Letter grading.

**M470. Introduction to Occupational and Environmental Health Education. (2 or 4)** (Formerly numbered 470.) (Same as Urban Planning M470.) Lecture, three hours. Preparation: at least three social sciences courses. Designed to provide students with understanding of problem areas of occupational and environmental health and health education interventions which can be applied. Letter grading.

**474. Self-Care and Self-Help in Community Health. (4)** Lecture, two hours; discussion, two hours. Review of background, principles, concepts, programs, and research concerning the emerging field of self-care in health. S/U or letter grading.

**480. Health Education in Clinical Settings. (4)** Lecture, two hours; discussion, two hours. Requisites: courses 271, 282, Health Services 100. Analysis of role, methods, and techniques of health education pertaining to hospitals, clinics, and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education. S/U or letter grading.

**482. Practicum: Community Health Sciences. (4)** Discussion, two hours; fieldwork, up to 20 hours. Requisites: courses 210, 211A, 211B. Understanding of professional practice in health-related organizations. Letter grading.

**483. Leadership Development and Empowerment for Health Promotion and Health Education. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 210, 211A, 211B. Development of basic understanding of and competency in leadership development and empowerment support for health promotion in multicultural and distressed communities (e.g., south-central Los Angeles). Letter grading.

**485. Resource Development for Community Health Programs. (4)** Lecture, three hours; fieldwork, one hour. Designed for graduate students. Overview course of fund and resource development for public health and community-based programs. Lectures and workshops include developing grant proposals, researching funding sources, evaluating proposals, developing volunteer and in-kind resources, and implementing capital campaigns. Letter grading.

**487. Community Organization for Health. (4)** Lecture, three hours; fieldwork, four to six hours. Preparation: three public health, sociology, or anthropology courses. Requisite: course 210. Theory and practice of community organizations, including models and strategies of community organization and their application to health problems and health policy. Particular attention to use of community organization for health promotion and to change public policy. Letter grading.

**490. Professional Writing for Public Health. (2)** Lecture, two hours. Practice in writing reports, grant proposals, abstracts, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various professional journals to help participants improve both their prose style and their editorial abilities. S/U or letter grading.

**495. Teacher Preparation in Public Health. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

### Lecturer

Marilyn Manners, Ph.D.

## Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Department faculty.

Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods or literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.

Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and

to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

## Undergraduate Study

### Comparative Literature B.A.

#### Preparation for the Major

*Required:* Two courses from the Comparative Literature 1 or 2 series or comparable lower division courses in other departments; completion of the College English Composition requirement; literary proficiency in at least one language other than English, to be demonstrated by successful completion of (1) two years of the college language sequence or its equivalent or (2) an upper division literature course in the original language.

#### Transfer Students

To be admitted as Comparative Literature majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, two world or English literature survey courses, and two years of one foreign language.

#### The Major

*Required:* Thirteen courses, of which (1) a minimum of four must be from comparative literature offerings, including Comparative Literature 100 and at least three additional comparative literature courses selected from M101 through 197; (2) four upper division literature courses using original language texts in the major language area; (3) three upper division literature courses using original language texts in the minor language area (students may petition the undergraduate adviser to take three upper division literature courses in translation if their major area is in a language other than English); (4) two upper division electives in a third language or a field such as anthropology, art, art history, classics, East Asian languages and cultures, film, folklore, history, music, philosophy, or political theory, to be selected in consultation with the undergraduate adviser.

### Honors Program

The honors program is open to Comparative Literature majors with a 3.5 departmental and a 3.25 overall grade-point average. Eligible interested students should contact the undergraduate adviser to enter the program.

Honors candidates must complete all requirements for the major and an honors research paper (in addition to regular course requirements) in two of the four required upper division comparative literature courses. Students must also complete Comparative Literature 197H with a core faculty member in which they write a senior honors thesis of approximately 25 pages.

**E**fraín Kristal decided to study literature after reading Kafka's *The Trial* when he was 16. It wasn't that he was immediately enraptured; in fact, he remembers feeling cheated when Mr. K is executed at the end of the novel without the reason he was tried in the first place ever being revealed. "I felt so annoyed that I threw the book to the ground. A few days later it dawned on me that Kafka purposely does not offer a solution to his mysteries in order to express a poignant insight: we may not ever have a complete picture of the meaning of our lives and yet we must still participate in the flow of human affairs."

After studying literature at UC Berkeley, Kristal earned a degree in philosophy from the University of Rouen and a Ph.D. in Spanish literature from Stanford. He studied analytic philosophy in the United States, literary theory in Paris, and was a Humboldt Foundation fellow in Berlin. "My pursuit of literature is intertwined with an interest in languages, cultures, philosophy, and the arts," he explains. "Even as my views about the significance of literature continue to change, I remain im-

pressed by its transforming potential."

Kristal has a talent for transmitting his enthusiasm to students in courses on poetry or comparative Latin American literature and on topics such as theories of translation or literary theory and the rhetoric of religion. "I enjoy the teaching process most of all when my students learn something that matters to them, and when they make me reconsider what matters to me."

Illustrating the point, he recalls that after a recent lecture on Cervantes, a student asked him to help understand why he felt sad about Don Quijoté's death when the character was obviously a fool. "I asked him to consider that his sadness might reflect his own affinities with Quijoté's apparently foolish dream that one can make our imperfect world a better place. The freshman paused and said, 'professor, that's the best interpretation I've heard.'"

In addition to his essays on Latin American literature and intellectual history, Kristal has written two books and received the UCLA Distinguished Teaching Award.

---

### Comparative Literature Minor

The Comparative Literature minor offers students interested in literature and the humanities the opportunity to gain insight into the critical problems and theories addressed by comparative literature and to apply that knowledge in literature and comparative literature courses.

To enter the minor students must have fulfilled the English Composition requirement, have completed 40 units with an overall grade-point average of 2.0 or better, have taken at least one year or equivalent of a language other than English, and file a petition with either the faculty or staff undergraduate adviser, 212 Royce Hall, (310) 825-4620.

*Required Courses (28 units):* (1) Four upper division comparative literature courses (one

course from Comparative Literature 1A through 2DW may be substituted); (2) two upper division courses in one literature (e.g., Arabic, Chinese, English, French, German, Korean, Russian, Spanish) in the original language; and (3) one upper division course in a second literature in the original language (one level six foreign language course may be substituted). If students complete two upper division courses in a language other than English, they may petition to take one upper division course taught in English translation to fulfill the third requirement.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Comparative Literature offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Comparative Literature.

## Admission

Students are admitted to the Ph.D. program only. A bachelor's degree in literature, ancient or modern, is a requisite for admission to the Ph.D. program. In special cases where a student is admitted with a bachelor's degree in a nonliterature major, following matriculation the student is required to demonstrate the equivalent knowledge and comprehension of one literature before being considered in good standing in the department.

Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, are required to take the Graduate Record Examination (GRE), and must submit three letters of recommendation. Literary proficiency in one foreign language and at least an elementary knowledge of a second one are expected. A writing sample also is required. Care should be taken with the statement of purpose and the writing sample, since the quality of thought and argument these exhibit weigh significantly in admissions decisions.

For students entering with a master's degree, the graduate adviser may agree to waive some of the normal course requirements.

## Master's Degree

During the first two years of study toward the Ph.D., each student's study plan combines the work in the major and minor literatures by focusing on a defined area in which these literatures may be explored. The area may be a literary period such as Romanticism, a genre such as the novel, or a theoretical problem.

The major literature is the area of primary concentration. Students specialize in one historically defined period (such as medieval, Renaissance and baroque, neoclassicism and 18th century, Romanticism to modern), but a general knowledge of the major literature is a requisite for the specialization.

In the minor literature, students focus on a period comparable to the area of specialization in the major literature, although they may not

have as much historical depth and breadth in this area as in the major literature.

The M.A. degree is offered through the comprehensive examination plan. Ph.D. students are required to complete 12 courses, the minimum also required for the M.A. degree. Eight of the courses must be at the graduate level. Required coursework includes courses in comparative literature and in the major and minor literatures. Periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in the major literature are studied.

There is a language requirement for this degree.

## Doctoral Degree

During the third and fourth years of study the study plan combines the work in one major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (for example, a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology. A related field such as art history, film, or gender studies may be substituted for one minor literature after departmental approval of a student's petition.

For the first and second years of required coursework, see Master's Degree. During the third and fourth years of study students are expected to complete courses in comparative literature and courses in the major literature and second minor. Courses in the first minor and the second foreign language may be recommended by the adviser.

Written and oral qualifying examinations are required. The written examination in the major literature is based on a reading list meant to demonstrate competence in the broad historical scope of the student's literature as well as of a more specific period. Before taking the major written examination, students must submit a reading list based on the first and second minor areas.

Following successful completion of the written examination, students take a follow-up oral examination that covers the major and minor areas. After successful completion of the written and follow-up oral examinations, students begin work on the dissertation prospectus, discuss with their adviser the integration of the major literature focus with a comparative literature focus, and take the University Oral Qualifying Examination, which is based primarily on the prospectus.

There is a language requirement for this degree.

# Comparative Literature

## Lower Division Courses

**1A. World Literature: Antiquity to Early Middle Ages. (4)** (Formerly numbered Humanities 1A.) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2AW or 4AW or former course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as *Iliad* or *Odyssey*, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as *Gilgamesh* or *Tristan and Iseult*. P/NP or letter grading.

**1B. World Literature: Late Middle Ages to the 17th Century. (4)** (Formerly numbered Humanities 1B.) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2BW or 4BW or former course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's *Canterbury Tales*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine. P/NP or letter grading.

**1C. World Literature: Age of Enlightenment to the 20th Century. (4)** (Formerly numbered Humanities 1C.) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2CW or 4CW or former course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens. P/NP or letter grading.

**1D. Great Books from the World at Large. (4)** (Formerly numbered Humanities 1D.) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2DW or 4DW or former course 2D. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

**1E. Introduction to Literary Traditions of East and Southeast Asia. (4)** (Formerly numbered Humanities 1E.) Lecture, three hours; discussion, one hour. Through analysis of selected texts, presentation of some main currents in literatures of East and Southeast Asia, including China, Japan, Korea, Thailand, Vietnam, and India. Emphasis and readings may vary per instructor. P/NP or letter grading.

**2AW. Survey of Literature: Antiquity to Early Middle Ages. (5)** (Formerly numbered 2A.) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1A or 4AW or former course 2A. Study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Odyssey*, *Gilgamesh*, Sappho, Greek tragedies, *Aeneid*, Petronius, *Beowulf*, Marie de France, *Tristan and Iseult*, *1001 Nights*, *Popul Vuh*. Satisfies Letters and Science Writing II requirement. Letter grading.

**2BW. Survey of Literature: Late Middle Ages to the 17th Century. (5)** (Formerly numbered 2B.) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1B or 4BW or former course 2B. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Chaucer, Dante, Cervantes, Marguerite de Navarre, Shakespeare, Calderón, Molière, and Racine. Satisfies Letters and Science Writing II requirement. Letter grading.

**2CW. Survey of Literature: Age of Enlightenment to the 20th Century. (5)** (Formerly numbered 2C.)

Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1C or 4CW or former course 2C. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, M. Shelley, Dostoevsky, Kafka, James Joyce, Garcia Marquez, and Jamaica Kincaid. Satisfies Letters and Science Writing II requirement. Letter grading.

**2DW. Survey of Literature: Great Books from the World at Large. (5)** (Formerly numbered 2D.)

Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1D or 4DW or former course 2D. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Satisfies Letters and Science Writing II requirement. Letter grading.

**4AW. Literature and Writing: Antiquity to Early Middle Ages. (5)**

Discussion, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1A or 2AW or former course 2A. Study and discussion of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Iliad*, *Odyssey*, *Gilgamesh*, Sappho, Greek tragedies, *Aeneid*, Petronius, *Beowulf*, or Marie de France. Satisfies Letters and Science Writing II requirement. Letter grading.

**4BW. Literature and Writing: Late Middle Ages to the 17th Century. (5)**

Discussion, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1B or 2BW or former course 2B. Study and discussion of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare, *1001 Nights*, Christine de Pizan, *Popul Vuh*, Molière, and Racine. Satisfies Letters and Science Writing II requirement. Letter grading.

**4CW. Literature and Writing: Age of Enlightenment to the 20th Century. (5)**

Discussion, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1C or 2CW or former course 2C. Study and discussion of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, M. Shelley, Flaubert, Ibsen, Strindberg, Dostoevsky, Gogol, Kafka, Joyce, Beckett, L. Hughes, and Garcia Marquez. Satisfies Letters and Science Writing II requirement. Letter grading.

**4DW. Literature and Writing: Great Books from the World at Large. (5)**

Discussion, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 1B or 2DW or former course 2D. Study and discussion of major literary texts usually overlooked in courses that focus only on the canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Texts may include works by authors such as Ngugi, Desai, Kincaid, Emecheta, El Saadawi, Achebe, Pak, Can Xue, Neruda, and Rushdie. Satisfies Letters and Science Writing II requirement. Letter grading.

**M90. Modern Literature in Southeast Asia. (4)**

(Same as South and Southeast Asian Languages M90.) Lecture, three hours. Knowledge of Southeast Asian languages not required. Exploration of diversity of Southeast Asia in such areas as traditional culture, modernization, politics, and literature through modern literary texts. P/NP or letter grading.

**Upper Division Courses****100. Introduction to Comparative Literature: Histories, Theories, Practices, and Perspectives. (5)**

Lecture, four hours. Preparation: satisfaction of Subject A and English Composition requirements. Requisites: two courses from Comparative Literature 1 or 2 series or English 10 series or Spanish 60 series, etc. Seminar-style introduction to discipline of comparative literature presented through a series of texts illustrative of its formation and practice. Letter grading.

**M101. Hebrew Literature in English — Literary Traditions of Ancient Israel: Bible and Apocrypha. (4)**

(Same as Jewish Studies M150A.) Lecture, three hours. Study of literary culture of ancient Israel through examination of principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation). P/NP or letter grading.

**102. Classical Tradition: Epic. (4)**

Seminar, three hours. Designed for upper division literature majors. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. P/NP or letter grading.

**103. Classical Tradition: Tragedy. (4)**

Seminar, three hours. Designed for juniors/seniors. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. P/NP or letter grading.

**C104. Satire. (4)**

Lecture, three hours. Designed for juniors/seniors. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with course C204. Undergraduates read all texts in translation. P/NP or letter grading.

**C105. Comic Vision. (4)**

Lecture, three hours. Designed for upper division literature majors. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C205. Undergraduates read all works in translation. P/NP or letter grading.

**106. Archetypal Heroes in Literature. (4)**

Seminar, three hours. Designed for juniors/seniors. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. All works read in translation. P/NP or letter grading.

**C108. Saints' Lives as Literature. (4)**

Lecture, three hours. Designed for juniors/seniors. Examination of genre of the saint's life as it develops in Western European tradition from late classical to early modern period; connections between the saint's life and other forms of literature; comparative considerations (e.g., the Western European saint's life and classical Greek and Roman biography, Islamic traditions, and Buddhist traditions). Concurrently scheduled with course C208. P/NP or letter grading.

**C109. Love, Deceit, and Truth: Tristan and Isolde Legend in Literary Tradition. (4)**

Lecture, three hours. Tracing of history and literary treatment of one of most enduring "myths" of medieval and modern storytelling: tale of ill-fated love triangle as exemplified in figures of Tristan, Isolde, and Mark. Literary texts to be read in translation, but comparative literature students encouraged to read texts in original language. Concurrently scheduled with course C209. P/NP or letter grading.

**120. The Individual and Society in the Renaissance. (4)**

Lecture, three hours; discussion, one hour. Requisite: one course from 1A, 1B, 1C, 2AW, 2BW, 2CW, or English Composition 3 or 3H. Explorations of a change in Western man's relationship to his world, himself, and his art; reading of such works as *Don Quixote*, Montaigne's *Essays*, *Gargantua and Pantagruel*, *The Praise of Folly*, *Utopia*. P/NP or letter grading.

**C122. Renaissance Drama. (4)**

Lecture, three hours. Designed for upper division literature majors. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C222. Undergraduates read all works in translation. P/NP or letter grading.

**C140. Dramatic Theory and Criticism in German and English Romanticism. (4)**

Seminar, three hours. Designed for upper division literature majors. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with course C240. Undergraduates read all works in translation. P/NP or letter grading.

**C150. The 19th-Century Novel. (4)**

Seminar, three hours. Designed for upper division literature majors. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with course C250. Undergraduates read all works in translation. P/NP or letter grading.

**C151. Crisis of Authority. (4)**

Seminar, three hours. Designed for juniors/seniors. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(ized) and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with course C251. P/NP or letter grading.

**C152. Symbolist Tradition in Poetry. (4)**

Seminar, three hours. Designed for upper division literature majors. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with course C252. Undergraduates read all works in translation. P/NP or letter grading.

**C153. Poetry and Poetics of Post-Symbolist Period. (4)**

Lecture, three hours. Designed for juniors/seniors. Study of poetic trends, such as surrealism or imagism, and poets in first half of the 20th century. Texts may include poets such as W.B. Yeats, E. Pound, T.S. Eliot, Marianne Moore, Paul Valéry, Stefan George, R.M. Rilke, Gunnar Ekelof, or Wallace Stevens. May be concurrently scheduled with course C253. Undergraduates read all works in translation. P/NP or letter grading.

**154. Adventures of the Avant-Garde. (4)**

Seminar, three hours. Designed for upper division literature majors. Interdisciplinary study of avant-garde literature and art, including futurism, Dadaism, Expressionism, Surrealism, new avant-gardes. Works by Marinetti, Boccioni, Picasso, Stein, Malevich, Popova, Mayakovsky, Brecht, Fritz Lang, Duchamp, Breton, Bunuel, Lisperoch, Warhol, Orlan. Emphasis on cross-fertilization among different kinds of aesthetic expression. P/NP or letter grading.

**158. Colonial Encounters. (4)**

Seminar, three hours. Discussion of how a Western textual system restricts cultures of colonized peoples to an encounter with the European. As a means of understanding limits to a European frame of reference, reading of English literary works alongside their postcolonial counterparts. Investigation of how reversal of perspective affects the telling of a tale. P/NP or letter grading.

**159. Four Modern Dramatists. (4)**

Lecture, three hours. Study of several works by four major modern dramatists, focusing on understanding specific elements in each work and authors' possible interrelations. Pirandello, Beckett, and Pinter are read; fourth author is selected from Ionesco, Giraudoux, Cocteau. P/NP or letter grading.

**C160. Topics in Literature and Visual Arts. (4)**

Lecture, three hours. Designed for juniors/seniors. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C260. Undergraduates read all works in translation. P/NP or letter grading.

**C161. Fiction and History. (4)**

Seminar, three hours. Designed for upper division literature majors. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with course C261. P/NP or letter grading.

**C163. Crisis of Consciousness in Modern Literature. (4)** Seminar, three hours. Designed for upper division literature majors. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C263. Undergraduates read all works in translation. P/NP or letter grading.

**C164. The Modern Continental Novel. (4)** Seminar, three hours. Designed for upper division literature majors. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with course C264. Undergraduates read all works in translation. P/NP or letter grading.

**M165. The Holocaust in Literature. (4)** (Same as Jewish Studies M187.) Lecture, three hours. Prerequisite: History 191E or 191F or 191G. Investigation of how the Holocaust informs a variety of literary and cinema works and raises a wide range of aesthetic and moral questions. P/NP or letter grading.

**C167. Theory and Texts of the Fantastic. (4)** Seminar, three hours. Designed for upper division literature majors. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with course C267. Undergraduates read all works in translation. P/NP or letter grading.

**M168. Korean American Literature. (4)** (Same as Asian American Studies M132A.) Seminar, three hours. Comprehensive introduction to Korean American literature, with emphasis on Korean American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Korean culture on Korean American literature. P/NP or letter grading.

**169. Continental African Authors. (4)** Lecture, three hours. Prerequisite: one course from 1A, 1B, 1C, 2AW, 2BW, 2CW, or English Composition 3 or 3H. Introduction to new set of African authors and attempt to discern similarities or differences they may have with major authors such as Achebe, Ngugi, Armah, Soyinka, etc. P/NP or letter grading.

**CM170. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (4)** (Formerly numbered C170.) (Same as Women's Studies M170.) Seminar, three hours. Designed for upper division literature majors. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with course C270. Undergraduates read all works in translation. P/NP or letter grading.

**M171. Chinese Immigrant Literature and Film. (4)** (Same as Asian American Studies M132B and Chinese M153.) Lecture, two hours; discussion, one hour. Knowledge of Chinese not required. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

**C172. The Postmodern Novel. (4)** Seminar, three hours. Designed for upper division literature majors. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C272. Undergraduates read all works in translation. P/NP or letter grading.

**C173. Postmodernism and the Third World. (4)** Seminar, three hours. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with course C273. P/NP or letter grading.

**M174. Film and Literature of the Spanish-Speaking World. (4)** (Same as Spanish M161.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

**M175. Topics in Southeast Asian Literature. (4)** (Same as South and Southeast Asian Languages M130.) Lecture, three hours. Prerequisite: one course from 1A, 1B, 1C, 1D, 2AW, 2BW, 2CW, or English Composition 3 or 3H. Knowledge of Southeast Asian languages not required. Advanced exploration of Southeast Asia through in-depth reading of texts from the region. Topics include censorship, politics, language, and literature. P/NP or letter grading.

**M176. Literature and Technology. (4)** (Same as Japanese M156.) Lecture, three hours. Knowledge of Japanese not required. Examination of representation of technology in 20th-century fiction. Discussion of impact of technology on shifting images of gender, subjectivity, and national identity. P/NP or letter grading.

**190. Semiotics of Story and Film. (4)** Seminar, three hours. Designed for upper division literature majors. Investigation of theoretical aspects of semiotics and their application to specific narratives in prose and film. P/NP or letter grading.

**192. Walter Benjamin's Literary Criticism. (4)** Seminar, three hours. Designed for juniors/seniors. Some knowledge of German desirable but not required, as all texts are available in English translation. Walter Benjamin has emerged in recent years as one of the most influential critics of the 20th century. Course approaches his work primarily through a reading of his specifically literary criticism which occupies a central place in his work. P/NP or letter grading.

**194. Variable Topics. (4)** Seminar, three hours. Designed for juniors/seniors. Study of limited periods and specialized issues and approaches in literary theory, especially in relation to other modes of discourse such as history, philosophy, psychology, linguistics, anthropology. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated for credit with topic change. P/NP or letter grading.

**C195A. Heidegger, Language, and Literature. (4)** (Formerly numbered C195.) Seminar, three hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with course C295A. P/NP or letter grading.

**C195B. Derrida as a Reader of Heidegger. (4)** (Formerly numbered C196.) Seminar, three hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question* and *Geschlecht*. May be concurrently scheduled with course C295B. P/NP or letter grading.

**C196. Feminist and Gender Theory. (4)** Seminar, three hours. Investigation of particular theoretical issues in feminism and gender studies, including topics such as critical problems of representation, feminism and queer theory, or intersections with postmodernism, post-structuralism, or postcolonialism. Concurrently scheduled with course C296. P/NP or letter grading.

**197. Senior Essay. (4)** Lecture, three hours. Limited to senior Comparative Literature majors. Research essay on a comparative topic selected by the student and written under supervision of a core faculty member. P/NP or letter grading.

**197H. Honors Senior Essay. (2 to 6)** Lecture, two to six hours. Limited to senior comparative literature honors students. Research essay on a comparative topic selected by the student and written under supervision of a core faculty member. Students expected to meet regularly with supervisor throughout term. May be repeated once for a maximum of 8 units. No more than one course may be used to fulfill the four-course requirement for Comparative Literature majors. P/NP or letter grading.

**199. Special Studies in Comparative Literature. (2 to 4)** Prerequisite: course 100. May be repeated for credit with consent of chair. P/NP or letter grading.

## Graduate Courses

**200. Methodology of Comparative Literature. (6)** Seminar, four hours. Study of methodology of comparative literature and theory of literature.

**202. Classical Tradition: Epic. (4)** Seminar, three hours. Preparation: reading knowledge of Greek, Latin, or Italian. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. S/U or letter grading.

**203. Classical Tradition: Tragedy. (4)** Seminar, three hours. Preparation: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. S/U or letter grading.

**C204. Satire. (4)** Lecture, three hours. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with course C104. Graduate students required to prepare papers based on texts read in original languages whenever possible and may meet as a group one additional hour each week. S/U or letter grading.

**C205. Comic Vision. (4)** Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C105. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

**206. Archetypal Heroes in Literature. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. S/U or letter grading.

**207. Allegory and Some Allegories. (4)** Seminar, three hours. Preparation: reading knowledge of French, German, Italian, Latin, Greek, or Chinese. Designed for graduate students. Historical perspective on topic of allegory, with readings from texts traditionally held to be examples of the genre. Defining allegory is simple; saying which works count as examples of allegory, and why, is much harder. Authors include Prudentius, Augustine, Dante, Spenser, Donne, Tung Yueh, Hegel, Baudelaire, and Mallarmé. S/U or letter grading.

**C208. Saints' Lives as Literature. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Designed for graduate students. Examination of genre of the saint's life as it develops in Western European tradition from late classical to early modern period; connections between the saint's life and other forms of literature; comparative considerations (e.g., the Western European saint's life and classical Greek and Roman biography, Islamic traditions, and Buddhist traditions). Concurrently scheduled with course C108. S/U or letter grading.

**C209. Love, Deceit, and Truth: Tristan and Isolde Legend in Literary Tradition. (4)** Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Tracing of history and literary treatment of one of most enduring "myths" of medieval and modern storytelling: tale of ill-fated love triangle as exemplified in figures of Tristan, Isolde, and Mark. Literary texts to be read in translation, but comparative literature students encouraged to read texts in original language. Concurrently scheduled with course C109. S/U or letter grading.

**C222. Renaissance Drama. (4)** Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C122. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

**C240. Dramatic Theory and Criticism in German and English Romanticism.** (4) Seminar, three hours. Preparation: reading knowledge of German. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with course C140. S/U or letter grading.

**C250. The 19th-Century Novel.** (4) Seminar, three hours. Preparation: reading knowledge of French or German. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with course C150. S/U or letter grading.

**C251. Crisis of Authority.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Designed for graduate students. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(ized) and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with course C151. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

**C252. Symbolist Tradition in Poetry.** (4) Seminar, three hours. Preparation: reading knowledge of either French or German. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with course C152. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

**C253. Poetry and Poetics of Post-Symbolist Period.** (4) Lecture, three hours. Study of poetic trends, such as surrealism or imagism, and poets in first half of the 20th century. Texts may include poets such as W.B. Yeats, E. Pound, T.S. Eliot, Marianne Moore, Paul Valery, Stefan George, R.M. Rilke, Gunnar Kjelof, or Wallace Stevens. May be concurrently scheduled with course C153. S/U or letter grading.

**C260. Topics in Literature and Visual Arts.** (4) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C160. Graduate students required to read works in original languages. S/U or letter grading.

**C261. Fiction and History.** (4) Seminar, three hours. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with course C161. Graduate students required to prepare papers based on texts read in original languages. S/U or letter grading.

**262. The Psychological Novel.** (4) Seminar, three hours. Preparation: major in literature, reading knowledge of French. Comparative study of French and English novels which both precede and follow development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. S/U or letter grading.

**C263. Crisis of Consciousness in Modern Literature.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C163. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

**C264. The Modern Continental Novel.** (4) Seminar, three hours. Preparation: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with course C164. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

**265. Intertextuality in Literature and Film.** (4) Discussion, three hours. Study of relationships between literature and film from perspective of intertextuality grounded in theorists Mikhail Bakhtin and Jacques Derrida and elaborated by critics Barthes, Chatman, and Kristeva. Focus on processes of inscription, reiteration, transformation, filiation, and dissemination during consideration of representative types of intertextuality. S/U or letter grading.

**266. Writing and the Photographic Image.** (4) Seminar, three hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Investigation of intertextual relations between writing and photography in American and European contexts. Study rests on premise that a photograph enters public domain framed by writing and discourse and that, in turn, some forms of writing are framed by photographic modes of representation. S/U or letter grading.

**C267. Theory and Texts of the Fantastic.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with course C167. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

**C270. Alternate Traditions: In Search of Female Voices in Contemporary Literature.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with course CM170. Graduate students required to prepare papers based on texts read in original languages whenever possible. S/U or letter grading.

**271. Imaginary Women.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Examination of archetypal female figures in classical/traditional literatures and their reincarnations in modern African American, Anglo-American, Asian American, European, Native American, and Spanish-American literatures. Particular emphasis on position of women in the cultures and ideology of the authors. S/U or letter grading.

**C272. The Postmodern Novel.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C172. Graduate students required to meet as a group one additional hour each week. S/U or letter grading.

**C273. Postmodernism and the Third World.** (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with course C173. S/U or letter grading.

**M274. Theorizing the Third World.** (4) (Same as Asian American Studies M261.) Seminar, three hours. Investigation of politics of power, gender, and race in complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

**275. Nationalism and Immigration Today.** (4) Seminar, three hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Literary and social discourses on issues of nationalism, immigration, and the politics of identity in our postcolonial era, with consideration of broad range of texts (aesthetic representations, theoretical reflections, and legal documents). S/U or letter grading.

**M276. Reading Modern Bodies.** (4) (Same as Japanese M276.) Seminar, three hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from variety of locales, with particular emphasis on Japan. S/U or letter grading.

**277. Caribbean Literature: From Negritude to Diaspora.** (4) Seminar, three hours. Historical approach to modern Anglophone and Francophone Caribbean literature, retracing search for cultural identity, beginning with negritude movement's claim to Africa as expressed in Aime Cesaire's classic poem *Cahier d'un retour au pays natal* and ending with consideration of dispersion of identities in work of writers and intellectuals who contend with problem of diasporic Caribbean culture. S/U or letter grading.

**280. Latin American Literature in Comparative Contexts.** (4) Seminar, three hours. Preparation: reading knowledge of one foreign language. In-depth study of one topic of Latin American literature in a comparative context. May be repeated for credit. S/U or letter grading.

**284. Theories of Translation.** (4) Seminar, three hours. Examination of various approaches to concept of translation and to its significance for literary studies. Readings include authors such as Matthew Arnold, Walter Benjamin, George Steiner, and Susan Bassnett. S/U or letter grading.

**285. Translation Workshop.** (4) Seminar, three hours. Preparation: solid reading knowledge of at least one foreign language. Open to qualified undergraduates with proper language preparation. Theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation technique with genres, periods, and authors at discretion of participants. S/U or letter grading.

**289. Theory of Film and Literature.** (5) Seminar, three hours; film screening, two hours. Study of redefinition and aims of theories of film and literature. Approaches vary by instructor (e.g., postcoloniality, psychoanalysis, semiotics, transnationalism, gender theory). S/U or letter grading.

**290. Contemporary Theories of Criticism.** (4) Seminar, three hours. Prerequisite: course 200. Advanced course in theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches. S/U or letter grading.

**291. Problems in Theory of Literature.** (4) Seminar, three hours. Preparation: reading knowledge of French or German. Prerequisite: course 290. Study of specific topics in theory of literature for advanced students in criticism and literary theory. May be repeated for credit. S/U or letter grading.

**292. Problems of the Sign in Literature.** (4) Seminar, three hours. Inquiry into theoretical bases and implications of the sign as metaphysical, logical, and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Excerpts from Plato, Aristotle, Augustine, Locke, Vico, and Hegel lead to a discussion of "sciences" envisioned by Saussure (semiology) and Peirce (semiotics) and propounded by contemporary theorists such as Barthes, Hjelmslev, and Greimas. S/U or letter grading.

**293. Psychoanalytic Approaches to Literature.** (4) Seminar, three hours. Prerequisite: course 200 or equivalent criticism course in English. Study of development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings include Freud and early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schafer) whose work is applicable to literary theory. S/U or letter grading.

**C295A. Heidegger, Language, and Literature. (4)** (Formerly numbered C295.) Seminar, three hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with course C195A. S/U or letter grading.

**C295B. Derrida as a Reader of Heidegger. (4)** (Formerly numbered C296.) Seminar, three hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question* and *Geschlecht*. May be concurrently scheduled with course C195B. S/U or letter grading.

**C296. Feminist and Gender Theory. (4)** Seminar, three hours. Investigation of particular theoretical issues in feminism and gender studies, including topics such as critical problems of representation, feminism and queer theory, or intersections with postmodernism, post-structuralism, or postcolonialism. Concurrently scheduled with course C196. S/U or letter grading.

**297. Death and the Limits of Representation. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Examination of fundamental shifts in the relationship that obtains between thinking and death which are closely tied to rethinking of the status and structure of representation. May be repeated once for credit. S/U or letter grading.

**299. Analytic Philosophy and Literary Theory. (4)** Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of literary theory through exploration of approaches to literature by philosophers grounded on analytic tradition. Careful attention to concepts of truth, meaning, expression, representation, metaphor, fiction, and literature. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Literature and Composition. (4)** Seminar, three hours. Seminar on problems and methods of presenting literary texts as exemplary materials in the teaching of composition. Deals with theory and classroom practice and involves individual counseling and faculty evaluation of teaching assistants' performance. May not be applied toward M.A. course requirements. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Limited to graduate comparative literature students. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

**596X. Directed Individual Study. (2 to 4)** Preparation for foreign language examination. S/U grading.

**597. Preparation for M.A. and Ph.D. Examinations. (2 to 12)** Limited to graduate students. Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Limited to Ph.D. students. Research for and preparation of Ph.D. dissertation. May be repeated for credit. S/U grading.

## COMPUTER SCIENCE

*Henry Samueli School of Engineering  
and Applied Science*

UCLA  
4732 Boelter Hall  
Box 951596  
Los Angeles, CA 90095-1596

(310) 825-3886

D. Stott Parker, Jr., Ph.D., *Vice Chair*  
David A. Rennels, Ph.D., *Vice Chair*

### Professors

Rajive L. Bagrodia, Ph.D.  
Alfonso F. Cardenas, Ph.D.  
Wesley W. Chu, Ph.D.  
Jason (Jinsheng) Cong, Ph.D.  
Joseph J. DiStefano III, Ph.D.  
Michael G. Dyer, Ph.D.  
Milos D. Ercegovic, Ph.D.  
Deborah L. Estrin, Ph.D.  
Mario Gerla, Ph.D.  
Sheila A. Greibach, Ph.D.  
Richard E. Korf, Ph.D.  
Richard R. Muntz, Ph.D.  
D. Stott Parker, Jr., Ph.D.  
Miodrag Potkonjak, Ph.D.  
Majid Sarrafzadeh, Ph.D.  
Carlo A. Zaniolo, Ph.D. (*Norman E. Friedmann  
Professor of Knowledge Sciences*)  
Lixia Zhang, Ph.D.

### Professors Emeriti

Algirdas A. Avizienis, Ph.D.  
Bertram Bussell, Ph.D.  
Jack W. Carlyle, Ph.D.  
Gerald Estrin, Ph.D.  
Thelma Estrin, Ph.D.  
Walter J. Karplus, Ph.D.  
Leonard Kleinrock, Ph.D.  
Allen Klinger, Ph.D.  
Lawrence P. McNamee, Ph.D.  
Michel A. Melkanoff, Ph.D.  
Judea Pearl, Ph.D.  
Jacques J. Vidal, Ph.D.

### Associate Professors

Eliezer M. Gafni, Ph.D.  
David A. Rennels, Ph.D.  
Yuval Tamir, Ph.D.

### Assistant Professors

Adnan Y. Darwiche, Ph.D.  
Elias Koutsoupias, Ph.D.  
Songwu Lu, Ph.D.  
Stefano Soatto, Ph.D.

### Senior Lecturer

Leon Levine, M.S., *Emeritus*

### Adjunct Professors

Andrew B. Kahng, Ph.D.  
Boris Kogan, Ph.D.  
Gerald J. Popek, Ph.D.

### Adjunct Associate Professors

Leon Alkalai, Ph.D.  
Peter L. Reiher, Ph.D.

## Scope and Objectives

Computer science is concerned with the design, modeling, analysis, and applications of computer-related systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and strongly related studies of subjects in computer system architecture, computer networks, distributed computer systems, programming languages and systems, information and data management, artificial intelligence, computer science theory, and scientific computing.

The undergraduate and graduate studies and research projects in computer science are supported by extensive computing resources. In addition to the departmental computing facility, there are nearly a dozen laboratories specializing in areas such as distributed systems, multimedia computer communications, VLSI sys-

tems, VLSI CAD, and artificial intelligence. The Cognitive Systems Laboratory is engaged in studying computer systems which emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The Bachelor of Science degree may be attained either through the Computer Science and Engineering major or through the Computer Science major described below.

The Henry Samueli School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. In cooperation with the John E. Anderson Graduate School of Management, the Computer Science Department offers a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

## Undergraduate Study

### Computer Science and Engineering B.S.

The ABET- and CSAB-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. The curriculum has major components from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design through logic design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, networking fundamentals, higher-level language skills, and application of these to systems. Students are prepared for employment in the high-technology industries that employ information and digital systems.

### The Major

Course requirements are as follows (186 minimum units required):

- Four core courses: Computer Science 31, 32, 33, M51A (or Electrical Engineering M16)
- Computer Science 111, 118, 131, M151B (or Electrical Engineering M116C), 180, 181, Electrical Engineering 10, 102, 103, 110, 110L, 115A, 115AL, 115C, Statistics 110A; 6 laboratory units from Computer Science M152A (or Electrical Engineering M116L) and M152B (or Electrical Engineering M116D); one computer science/electrical engineering elective (excluding Electrical Engineering 100)
- Four upper division elective courses from the Computer Science Department.

Course 199 may normally be taken only as a free elective; however, students may petition for exceptions in extraordinary situations

4. Chemistry and Biochemistry 20A; Electrical Engineering 1, 2, Physics 1A, 1B, 4AL, 4BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details. Computer Science and Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements

## Computer Science B.S.

The computer science curriculum is designed to accommodate students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of major components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, students study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The program is accredited by the Computer Science Accreditation Commission (CSAC) of the Computing Sciences Accreditation Board (CSAB), a specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation (CORPA).

### The Major

Course requirements are as follows (182 minimum units required):

1. Four core courses: Computer Science 31, 32, 33, M51A (or Electrical Engineering M16)
2. Computer Science 111, 112, 118, 131, 132, M151B (or Electrical Engineering M116C), 180, 181, Statistics 110A; one course from Computer Science 161 or 163; Mathematics 151A or Electrical Engineering 103; 6 laboratory units from Computer Science M152A (or Electrical Engineering M116L) and M152B (or Electrical Engineering M116D)
3. Two elective upper division computer science courses
4. A minor or technical support area composed of three upper division courses selected from one of the following areas: as-

tronomy, atmospheric sciences, biology, chemical engineering, chemistry and biochemistry, civil and environmental engineering, Earth and space sciences, economics, electrical engineering, information studies, linguistics, management, materials science and engineering, mathematics, mechanical and aerospace engineering, molecular biology, physics

5. Electrical Engineering 1, 2, Physics 1A, 1B, 4AL, 4BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61
6. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details. Computer Science majors must also select two additional humanities/social sciences courses and one additional life sciences course and are required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements. Chemistry 20A may be substituted for one of the life sciences courses

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Computer Science offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Computer Science.

## Admission

### M.S./Ph.D. in Computer Science

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE) and the Subject Test in Mathematics or Computer Science.

Applicants to the Ph.D. program who hold the M.S. degree should have completed the requirements for the M.S. degree with at least a 3.25 grade-point average and should also have demonstrated creative ability. The M.S. degree is normally required for admission to the Ph.D. program. However, in some cases exceptional students who do not hold the M.S. degree may be admitted directly to the Ph.D. program.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide

Programs in *Program Requirements for UCLA Graduate Degrees*.

Applicants are encouraged to apply online. Application forms, including a departmental supplement to the application, may be found at <http://www.cs.ucla.edu> or by writing to Student Affairs Office, Computer Science Department, 4732 Boelter Hall, UCLA, Box 951596, Los Angeles, CA 90095-1596, e-mail: [gradadm@cs.ucla.edu](mailto:gradadm@cs.ucla.edu).

### Computer Science M.S./ Management M.B.A.

The John E. Anderson Graduate School of Management and the Department of Computer Science offer a concurrent degree program that enables students to complete the requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Application materials should be requested separately from both schools. Contact the Anderson School for details.

## Master's Degree

For major fields, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. A total of nine courses is required for the M.S. degree, including a minimum of five graduate courses. No specific courses are required, but a majority of the required courses must consist of those offered by the department. Students must satisfy a computer science breadth requirement.

## Doctoral Degree

Major fields include artificial intelligence; computer network modeling and analysis; computer science theory; computer system architecture; information and data management; scientific computing (two subareas: biomedical engineering systems and biocybernetics, and physical systems); and software systems and languages.

Students normally take courses to acquire the knowledge needed to prepare for the written and oral preliminary examinations and for conducting Ph.D. research. The basic program of study is built around the fundamental examination, the major field requirement, and two minor fields. The major field and at least one minor field must be in computer science. To satisfy the major field requirement, students are expected to attain a body of knowledge contained in the coursework, as well as the current literature in the area of specialization. In particular, students are required to take a minimum of four graduate courses in the major field of Ph.D. research, selecting these courses in accordance with guidelines specific to the major field.

Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. By petition and administrative approval, a minor field may be satisfied by examination. For the Ph.D. de-

gree, students must successfully complete at least three quarters of a research seminar, in addition to the three quarters of the seminar that may have been completed for the M.S. degree.

Written and oral qualifying examinations are required. The written examination is known as the fundamental examination. After mastering the body of knowledge defined in a detailed syllabus, students take the fundamental examination.

Following successful completion of the fundamental examination and coursework for the major and minor field requirements, students may also be required to take an oral preliminary examination that encompasses the major and minor fields. If required, the examination is in addition to the required University Oral Qualifying Examination.

The nature and content of the University Oral Qualifying Examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research, as well as a review of the dissertation prospectus.

## Computer Science

### Lower Division Courses

**1. Principles of Computer Science. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Not open for credit to Computer Science majors. Introduction to fundamental scientific principles of computation. Programming in LISP. Systems software, including interpreters, and operating systems. Computer hardware design and implementation. Theory of computation, including computability and complexity. Applications, including artificial intelligence and scientific computing. P/NP or letter grading.

**2. Great Ideas in Computer Science. (4)** Lecture, four hours; outside study, eight hours. Broad coverage for liberal arts and social sciences students of computer science theory, technology, and implications, including artificial and neural machine intelligence, computability limits, virtual reality, cellular automata, artificial life, programming languages survey, and philosophical and societal implications. P/NP or letter grading.

**10C. Introduction to Programming. (4)** Lecture, four hours; discussion, four hours; outside study, four hours. Exposure to computer organization and capabilities. Basic principles of programming: algorithmic, procedural problem solving. Program design and development. Control structures and data structures. Character strings and word processing. Letter grading.

**10F. Introduction to Programming/FORTRAN. (4)** Lecture, four hours; discussion, two hours. Open to Mathematics and Computer Science majors; open to graduate students on S/U grading basis only. Description and use of FORTRAN programming language. Selected topics in programming techniques. Programming and running of several problems. Letter grading.

**11. Introduction to PASCAL. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Limited to majors in Computer Science and Engineering and Computer Science majors. Open to graduate students on S/U grading basis only. Not open to students with credit for course 10C, 10F, or Program in Computing 10A. Human factors in programming and program design. Exposure to computer organization and capabilities, data representation, professional ethics. Principles of programming (using PASCAL as example language): algorithm design and procedural abstraction. Program design and development. Control structures and data structures. Letter grading.

**31. Introduction to Computer Science I. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Limited to Computer Science and Electrical Engineering majors. Introduction to computer science via theory, applications, and programming. Basic data types, operators and control structures. Input/output. Procedural and data abstraction. Introduction to object-oriented software development. Functions, recursion. Arrays, strings, pointers. Abstract data types, object-oriented programming. Examples and exercises from computer science theory and applications. Letter grading.

**32. Introduction to Computer Science II. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 31. Limited to Computer Science and Electrical Engineering majors. Not open to students with credit for former course 23. Object-oriented software development. Abstract data type definition and use. Overloading, inheritance, polymorphism. Object-oriented view of data structures: stacks, queues, lists. Algorithm analysis. Trees, graphs, and associated algorithms. Searching and sorting. Case studies and exercises from computer science applications. Letter grading.

**33. Introduction to Computer Organization. (5)** Lecture, four hours; discussion, two hours; outside study, nine hours. Enforced requisite: course 32. Limited to Computer Science and Electrical Engineering majors. Introductory course on computer architecture, assembly language, and operating systems fundamentals. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating systems concepts: processes and process management, input/output (I/O) programming, memory management, file systems. Letter grading.

**M51A. Logic Design of Digital Systems. (4)** (Formerly numbered 51A.) (Same as Electrical Engineering M16.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Physics 1C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.

### Upper Division Courses

**111. Operating Systems Principles. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 32, 33. Introduction to design and performance evaluations of modern operating systems. Mapping and binding of addresses. Organization of multiprogramming and multiprocessing systems; interrupts, process model, and interlocks. Resource allocation models and problem of deadlocks. Scheduling, synchronization. Memory management, virtual memory. input/output (I/O) control, file systems. Letter grading.

**112. Computer System Modeling Fundamentals. (4)** Lecture, four hours; outside study, eight hours. Requisite: Statistics 110A. Designed for juniors/seniors. Basic tools necessary for performance evaluation and design of distributed computer systems, including such topics as combinatorics, generating functions, probability theory, transforms, Markov chains, baby queueing theory. Presentation of this set of tools in a fashion that is rich with examples from computer systems field. Letter grading.

**118. Computer Network Fundamentals. (4)** Lecture, four hours; discussion, two hours. Designed for juniors/seniors. Investigation of functions required to operate computer communications networks. Development of methodology for implementing these functions in procedures called protocols. Organization around ISO-OSI seven-layer architecture, with review of each layer. Specific functions defined and available alternatives studied. Presentation of several applications and case studies based on existing public and private networks. Letter grading.

**130. Software Engineering. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 32. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming. Letter grading.

**131. Programming Languages. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 32, 33. Study, comparison, and evaluation of alternative strategies for language specification, data description, data control, program modularity, instruction sequencing, and language implementations. Use of a few languages selected from FORTRAN 77, ADA, SNOBOL 14, LISP, MODULA 2, and PROLOG to illustrate particular implementations of some of above features. Letter grading.

**132. Compiler Construction. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 32, 131, 181. Compiler structure; lexical and syntactic analysis; semantic analysis and code generation; theory of parsing. Letter grading.

**133. Parallel and Distributed Computing. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 111 (may be taken concurrently), 131. Distributed memory and shared memory parallel architectures; asynchronous parallel languages: MPI, Maisie; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization; design of parallel programs for scientific computation and distributed systems. Letter grading.

**143. Database Systems. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 32. Information systems and database systems in enterprises. File organization and secondary storage structures. Relational model and relational database systems. Network, hierarchical, and other models. Query languages. Database design principles. Transactions, concurrency, and recovery. Integrity and authorization. Letter grading.

**M151B. Computer Systems Architecture. (4)** (Formerly numbered 151B.) (Same as Electrical Engineering M116C.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 33, and M51A or Electrical Engineering M16. Recommended: course M152A or Electrical Engineering M116L. Machine organization and design, formal descriptions, comparative study of machine instruction sets and formats, data representation and floating-point, addressing structures, mechanization of procedure calls, memory organization and management, microprogramming, input/output (I/O) processing and interrupts, and reliability aspects. Letter grading.

**151C. Design of Digital Systems. (4)** Lecture, four hours; discussion, two hours. Requisites: courses M51A, M151B, M152A. Design of complex digital systems using hierarchical approaches and regular structures. Combinational, sequential, and algorithmic systems. Microprogramming and firmware engineering. Cost/performance measures and technology constraints. Use of design tools. Design project. Letter grading.

**M152A. Introductory Digital Design Laboratory. (2)** (Formerly numbered 152A.) (Same as Electrical Engineering M116L.) Laboratory, four hours; outside study, two hours. Requisite: course M51A or Electrical Engineering M16. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

**M152B. Digital Design Project Laboratory. (4)** (Formerly numbered 152B.) (Same as Electrical Engineering M116D.) Laboratory, four hours; discussion, two hours; outside study, six hours. Requisite: course M151B or Electrical Engineering M116C. Design and implementation of complex digital subsystems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement designs and to document and give oral presentations of their work. Letter grading.

**161. Fundamentals of Artificial Intelligence. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 23. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to LISP with regular programming assignments. State-space and problem reduction methods, brute-force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic nets and primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures. Letter grading.

**163. Introduction to Natural Language Processing. (4)** Lecture, four hours; laboratory, two hours. Requisite: course 130 or 131. Role of syntax, semantics, and pragmatics in human language processing by computers. Natural language generators and parsers, inference, and conceptual analysis. Modeling conceptual processes and representing semantic knowledge by means of computer problems. Letter grading.

**170A. Introduction to Scientific Computing. (4)** Lecture, four hours; laboratory, two hours; outside study, six hours. Designed for senior Computer Science majors. Introduction to scientific modeling and simulation, using the very high-level computer languages MATHEMATICA and MAPLE. Extensive coverage of programming in MATHEMATICA, with applications involving engineering modeling; simulation term project required. Letter grading.

**171. Real-Time Computer Systems. (4)** Lecture, four hours; outside study, eight hours. Designed for seniors. Survey of fundamentals, with emphasis on hardware and systems concepts. Adapting digital computers to interfaces, including multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction. Letter grading.

**M171L. Data Communication Systems Laboratory. (2 to 4)** (Formerly numbered 171L.) (Same as Electrical Engineering M171L.) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: courses M152A, 171. Limited to seniors. Interpretation of analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzer, desktop computers, terminals, modems, PCs, and workstations in experiments on pulse transmission impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

**174. Elements of Computer Graphics. (4)** Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisite: course 32. Hardware and software elements of computer graphics systems. Graphics languages. Graphic workstations and specialized input/output (I/O) devices. Design and development of interactive graphics programs. Letter grading.

**180. Introduction to Algorithms and Complexity. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32, Mathematics 61. Limited to junior/senior Computer Science majors. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness. Letter grading.

**181. Introduction to Formal Languages and Automata Theory. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Mathematics 61. Designed for junior/senior Computer Science majors. Grammars, automata, and languages. Finite-state languages and finite-state automata. Context-free languages and pushdown story automata. Unrestricted rewriting systems, recursively enumerable and recursive languages, and Turing machines. Closure properties, pumping lemmas, and decision algorithms. Introduction to computability. Letter grading.

**190. Computer Science Design Project. (4)** Lecture, four hours; outside study, eight hours. Preparation: adequate background in hardware, software, and computer applications. Limited to senior Computer Science and Engineering majors and senior Computer Science majors. Basic concepts of design of projects in computer science, including interpretation of specifications, subtasking, design of experiments, data analysis and performance evaluation, cost engineering, reliability, and societal and safety considerations. Letter grading.

**M196A. Introduction to Cybernetics, Biomodeling, and Biomedical Computing. (2)** (Formerly numbered 196A.) (Same as Biomedical Engineering M196A and Cybernetics M196A.) Lecture, two hours. Requisites: Mathematics 31A, 31B, Program in Computing 10A. Strongly recommended for students with potential interest in biomedical engineering/biocomputing fields or in Cybernetics as a major. Introduction and survey of topics in cybernetics, biomodeling, biocomputing, and related bioengineering disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

**M196B. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Biomedical Engineering M196B, Cybernetics M196B, and Medicine M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematical models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

**CM196L. Biomedical Systems/Biocybernetics Research Laboratory. (2 to 4)** (Same as Biomedical Engineering CM196L and Cybernetics M196L.) Lecture, two hours; laboratory, two hours. Requisite: course M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course CM296L. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to juniors/seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

## Graduate Courses

**201. Computer Science Seminar. (2)** Seminar, four hours; outside study, two hours. Designed for graduate computer science students. Seminars on current research topics in computer science. May be repeated for credit. S/U grading.

**202. Advanced Computer Science Seminar. (4)** Seminar, four hours; outside study, eight hours. Preparation: completion of major field examination in computer science. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in the specialized area. May be repeated for credit. Letter grading.

**212A. Queueing Systems Theory. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 112, Electrical Engineering 131A. Resource sharing issues and theory of queueing (waiting-line) systems. Review of Markov chains and baby queueing theory. Method of stages.  $M/E_r/1$ ,  $E_r/M/1$ . Bulk arrival and bulk service systems. Series-parallel stages. Fundamentals of open and closed queueing networks. Intermediate queueing theory:  $M/G/1$ ;  $G/M/m$ . Collective marks. Advanced queueing theory:  $G/G/1$ ; Lindley integral equation; spectral solution. Inequalities, bounds, approximations. Letter grading.

**212B. Queueing Applications: Scheduling Algorithms and Queueing Networks. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 212A. Priority queueing. Applications to time-sharing scheduling algorithms: FB, Round Robin, Conservation Law, Bounds. Queueing networks: definitions; job flow balance; product form solutions — local balance,  $M \rightarrow M$ ; computational algorithms for performance measures; asymptotic behavior and bounds; approximation techniques — diffusion — iterative techniques; applications. Letter grading.

**214. Data Transmission in Computer Communications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 112. Limited to graduate computer science students. Discrete data streams, formats, rates, transductions; digital data transmissions via analog signaling in computer communication; media characteristics, systems methodologies, performance analysis; modem designs; physical interfaces in computer communication links; national/international standards; tests and measurements. Letter grading.

**215. Computer Communications and Networks. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 112. Resource sharing; computer traffic characterizations; multiplexing; network structure; packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; routing and flow control; satellite and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; modems; SDLC, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors. Letter grading.

**216. Distributed Multiaccess Control in Networks. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 212A, 215. Topics from the field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. Letter grading.

**217. Advanced Topics in Internet Research. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Overview of Internet development history and fundamental principles underlying TCP/IP protocol design. Discussion of current research topics, including multicast routing protocols, multicast transport protocols (e.g., real-time, transport protocol, RTP, and SRM), support for integrated services, World Wide Web, multimedia applications on Internet. Fundamental issues in network protocol design and implementations. Letter grading.

**218. Advanced Computer Networks. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 112, 118. Review of seven-layer ISO-OSI model. High-speed networks: LANs, MANs, ATM. Flow and congestion control; bandwidth allocation. Internetworking. Letter grading.

**219. Current Topics in Computer System Modeling Analysis. (2 to 12)** Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer system modeling analysis in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Letter grading.

**M222. Control and Coordination in Economics. (4)** (Same as Economics M222A.) Lecture, three hours. Recommended preparation: appropriate mathematics course. Designed for graduate economics and engineering students. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

**230A. Models of Information and Computation. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131, 181. Paradigms, models, frameworks, and problem solving; UML and metamodeling; basic information and computation models; axiomatic systems; domain theory; least fixed point theory; well-founded induction. Logical models: sentences, axioms and rules, normal forms, derivation and proof, models and semantics, propositional logic, first-order logic, logic programming. Functional models: expressions, equations, evaluation; combinators; lambda calculus; functional programming. Program models: program derivation and verification using Hoare logic, object models, standard templates, design patterns, frameworks. Letter grading.

**233A. Parallel Programming. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multiway rendezvous; synchronous and asynchronous languages: CSP, ADA, LINDA, MAISIE, UC, and others; introduction to parallel program verification. Letter grading.

**233B. Verification of Concurrent Programs. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 233A. Formal techniques for verification of concurrent programs. Topics include safety, liveness, program and state assertion-based techniques, weakest precondition semantics, Hoare logic, temporal logic, UNITY, and axiomatic semantics for selected parallel languages. Letter grading.

**239. Current Topics in Computer Science: Programming Languages and Systems. (2 to 12)** Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science programming languages and systems in which instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with topic change. Letter grading.

**240A. Databases and Knowledge Bases. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 143. Theoretical and technological foundation of Intelligent Database Systems, which merge database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this technology. Other topics include object-relational systems and data mining techniques. Letter grading.

**240B. Advanced Data and Knowledge Bases. (4)** (Formerly numbered 249.) Lecture, four hours; outside study, eight hours. Requisites: courses 143, 240A. Logical models for data and knowledge representations. Rule-based languages and nonmonotonic reasoning. Temporal queries, spatial queries, and uncertainty in deductive databases and object relational databases (ORDBs). Abstract data types and user-defined column functions in ORDBs. Data mining algorithms. Semistructured information. Letter grading.

**241A. Object-Oriented and Semantic Database Systems. (4)** Lecture, three and one-half hours; recitation, 30 minutes; laboratory, one hour; outside study, eight hours. Requisite: course 143. Object and database principles. Data models and accessing. Database systems architecture and functional components. Extended relational systems. Object and semantic systems. Systems comparison. Database design, organization, indexing, and performance. Other topics at discretion of instructor. Letter grading.

**241B. Pictorial and Multimedia Database Systems. (4)** Lecture, three and one-half hours; recitation, 30 minutes; outside study, nine hours. Requisites: courses 143, 241A. Pictorial and multimedia information system requirements. Data models and accessing; alternatives. Database systems. Visual languages and communication. Hypertext. Database design and organization, logical and physical. Database heterogeneity and distribution. Other topics at discretion of instructor. Letter grading.

**244A. Distributed Database Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 215 and/or 241A. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic query answering, multidatabase systems, fault recovery techniques, network partitioning, examples, trade-offs, and design experiences. Letter grading.

**245A. Intelligent Information Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 241A, 255A. Knowledge discovery in database, knowledge-base maintenance, knowledge-base and database integration architectures, and scale-up issues and applications to cooperative database systems, intelligent decision support systems, and intelligent planning and scheduling systems; computer architecture for processing large-scale knowledge-base/database systems. Letter grading.

**249. Current Topics in Data Structures. (2 to 12)** Lecture, four hours; outside study, eight hours. Review of current literature in an area of data structures in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Letter grading.

**251A. Advanced Computer Architecture. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M51A, 111, M151B. Functional and structural models of computer systems. Architecture and organization at microprogramming, machine language, and operating system level. Processor organization and system control. Arithmetic processors: algorithms and implementation. Storage system organization: hierarchy and management. Communication organization and control. Letter grading.

**251B. Parallel Computer Architectures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 251A. Parallel algorithmic structures and computer organizations. Effect of sequencing mechanisms, granularity, coupling, and locality. Organizations of control, memory, interconnection, and processing elements. Performance evaluation measures. Detailed discussion of system organization and performance of vector computers, array computers, loop-level multiprocessors, process-level multiprocessors, and dataflow computers. Letter grading.

**252A. Arithmetic Algorithms and Processors. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 251A. Number systems: conventional, redundant, signed-digit, and residue. Types of algorithms and implementations. Complexity measures. Fast algorithms and implementations for two-operand addition, multipierand addition, multiplication, division, and square root. On-line arithmetic. Evaluation of transcendental functions. Floating-point arithmetic and numerical error control. Arithmetic error codes. Residue arithmetic. Examples of contemporary arithmetic ICs and processors. Letter grading.

**253A. Design of Fault-Tolerant Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite or corequisite: course 251A. Fundamental concepts of dependable computing. Design methodology for fault-tolerant systems. Analytic models and measures, modeling tools. Design for critical applications: long-life, real-time, and high-availability systems. Tolerance of design faults: design diversity and fault-tolerant software. Letter grading.

**253B. Advanced Topics in Fault-Tolerant Computing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 253A. Fault tolerance in distributed systems: protocols and network redundancy. Design of fault-tolerant software: N-version programming and recovery blocks. Relationship between fault tolerance and system security. Case studies of contemporary fault-tolerant systems. Review of recent research results. Letter grading.

**253C. Testing and Testable Design of VLSI Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M51A. Detailed study of various problems in testing and testable designs of VLSI systems, including fault modeling, fault simulation, testing for single stuck faults and multiple stuck faults, functional testing, design for testability, compression techniques, and built-in self-test. Letter grading.

**254A. Computer Memories and Memory Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 251A. Generic types of memory systems; control, access modes, hierarchies, and allocation algorithms. Characteristics, system organization, and device considerations of ferrite memories, thin film memories, and semiconductor memories. Letter grading.

**255A. Distributed Processing Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 215 and/or 251A. Task partitioning and allocation, interprocess communications, task response time model, process scheduling, message passing protocols, replicated file systems, interface, cache memory, actor model, fine grain multicomputers, distributed operating system kernel, error recovery strategy, performance monitoring and measurement, scalability and maintainability, prototypes and commercial distributed systems. Letter grading.

**256A. Advanced Scalable Architectures: Systems, Building Blocks, and Technology. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 251A. State-of-the-art scalable multiprocessors and multicomputers. High-performance VLSI building blocks. Capabilities and limitations of VLSI technology. Interdependency among implementation technology, packaging, chip microarchitecture, and system architecture. Mechanisms for exploiting parallelism. Current research areas. Examples of chips and systems. Letter grading.

**M258A. LSI in Computer System Design. (4)** (Same as Electrical Engineering M216A.) Lecture, four hours; laboratory, four hours. Limited to graduate computer science and electrical engineering students. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Letter grading.

**M258B-M258C. LSI in Computer System Design. (4-4)** (Same as Electrical Engineering M216B-M216C.) Lecture, four hours; laboratory, four hours. Requisite: course M258A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress and S/U or letter grading.

**258D. VLSI CAD Techniques. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. In-depth study of latest advances in computer-aided VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization. Letter grading.

**258E. Foundations of VLSI CAD Algorithms. (4)** Lecture, four hours; outside study, eight hours. Preparation: one course in analysis and design of algorithms. Basic theory of combinatorial optimization for VLSI physical layout, including mathematical programming, network flows, matching, greedy and heuristic algorithms, and stochastic methods. Emphasis on practical application to computer-aided physical design of VLSI circuits at high-level phases of layout: partitioning, placement, graph folding, floorplanning, and global routing. Letter grading.

**258F. Physical Design Automation of VLSI Systems. (4)** Lecture, four hours; outside study, eight hours. Detailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floorplanning, placement, global routing, channel and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discussion of applications of a number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and generic algorithms. Letter grading.

**258G. Logic Synthesis of Digital Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M51A, 180. Detailed study of various problems in logic-level synthesis of VLSI digital systems, including two-level Boolean network optimization; multilevel Boolean network optimization; technology mapping for standard cell designs and field-programmable gate-array (FPGA) designs; retiming for sequential circuits; and applications of binary decision diagrams (BDDs). Letter grading.

**258H. Analysis and Design of High-Speed VLSI Interconnects. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M258A, 258F. Detailed study of various problems in analysis and design of high-speed VLSI interconnects at both integrated circuit (IC) and packing levels, including interconnect capacitance and resistance, lossless and lossy transmission lines, cross-talk and power distribution noise, delay models and power dissipation models, interconnect topology and geometry optimization, and clocking for high-speed systems. Letter grading.

**259. Current Topics in Computer Science: System Design/Architecture. (2 to 12)** Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science system design in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

**261A. Problem Solving and Search. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 23. Examination in depth of that part of artificial intelligence concerned with problem-solving behavior, including problem spaces, brute-force search, heuristic search, two-player game searches, planning, subgoaling, GPS, macro-operators, and abstraction. Emphasis on mathematical rigor and complexity analyses of search algorithms. Letter grading.

**262A. Reasoning with Partial Beliefs. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 112 or Electrical Engineering 131A. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. Letter grading.

**262B. Knowledge-Based Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 262A. Machine representation of judgmental knowledge and uncertain relationships. Inference on inexact knowledge bases. Rule-based systems — principles, advantages, and limitations. Signal understanding. Automated planning systems. Knowledge acquisition and explanation producing techniques. Letter grading.

**262C. Computer Methods of Data Analysis and Model Formation. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 112. Techniques of using computers to interpret, summarize, and form theories of empirical observations. Mathematical analysis of trade-offs between computational complexity, storage requirements, and precision of computerized models. Letter grading.

**262Z. Current Topics in Cognitive Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 262A. Additional requisites for each offering announced in advance by department. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. Letter grading.

**263A. Language and Thought. (4)** Lecture, four hours; outside study, eight hours. Recommended preparation: understanding of LISP. Introduction to natural language processing. Representation and manipulation of conceptualizations underlying processes of thought for natural language comprehension and generation. Process models of story comprehension, question answering, paraphrasing, machine translation. Conceptual dependency theory, scripts, plans, goals, expectation-based parsing. Letter grading.

**263B. Language and Memory. (4)** Lecture, four hours; outside study, eight hours. Preparation: knowledge of LISP or PROLOG. Requisite: course 263A. Recommended: course 264A. Advanced natural language processing. Emphasis on organization of human memory for language comprehension. Episodic and semantic memory. Subjective understanding and modeling ideologies. Language acquisition, processes of generalization during comprehension. Cross-contextual reminders and thematic abstraction. Letter grading.

**263C. Animats-Based Modeling. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 130 or 131 or 161. Animats are mobile/sensing animal-like software agents embedded in simulated dynamic environments. Emphasis on modeling: goal-oriented behavior via neurocontrollers, adaptation via reinforcement learning, evolutionary programming. Animat-based tasks include foraging, mate finding, predation, navigation, predator avoidance, cooperative nest construction, communication, and parenting. Letter grading.

**265A. Machine Learning. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 263A, 264A. Introduction to machine learning. Learning by analogy, inductive learning, modeling creativity, learning by experience, role of episodic memory organization in learning. Examination of BACON, AM, EURISKO, HACKER, teachable production systems. Failure-driven learning. Letter grading.

**267A. Neural Models. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Review of major neurophysiological milestones in understanding brain architecture and processes. Focus on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensory-motor coordination, and cerebellar and cerebral structure and function. Students required to prepare a paper analyzing research in one area of interest. Letter grading.

**267B. Artificial Neural Systems and Connectionist Computing. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, general multisensor pattern recognition including speed and vision, and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest. Letter grading.

**268. Machine Perception. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representations in process of image segmentation. Computing multimodal sensory information by "neural-net" architectures. Letter grading.

**268CN. Computational Neuroscience. (4)** Lecture, four hours; discussion, two hours; outside study, eight hours. Computational neuroscience as a paradigm of formal analysis and demonstrations of how to correctly interpret sensory data by discovering constraints from the natural world. Neural networks and connectionist models as a paradigm for parallel and concurrent computation and application to problem of vision, multimodal sensory interpretation, and learning. Letter grading.

**268S. Seminar: Computational Neuroscience. (2)** Seminar, two hours; outside study, six hours. Designed for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as a paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

**269. Seminar: Current Topics in Artificial Intelligence. (2 to 4)** Seminar, to be arranged. Review of current literature and research practicum in an area of artificial intelligence in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

**270A. Computer Methodology: Advanced Numerical Methods. (4)** Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 103 or Mathematics 151B or comparable experience with numerical computing. Designed for graduate computer science and engineering students. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises. Letter grading.

**271A. Modeling and Simulation of Lumped Parameter Systems. (4)** Lecture, eight hours. Recommended preparation: course 270A. Characterization of electrical, electromechanical, and other engineering problems by systems of nonlinear ordinary differential equations. Survey of integration algorithms. Digital simulation languages for continuous systems. Real-time simulation using array processor and multiprocessor computer systems. Letter grading.

**271B. Modeling and Simulation of Distributed Parameter Systems. (4)** Lecture, eight hours. Recommended preparation: course 270A. Mathematical formulation of engineering field problems governed by partial differential equations. Finite difference and finite element approximations. Principal algorithms for solving elliptic, parabolic, and hyperbolic partial differential equations. Supercomputers, vector processors, multiprocessors, and array processors. Letter grading.

**271C. Seminar: Advanced Simulation Methods. (2)** Seminar, two hours; outside study, six hours. Requisite: course 271A. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Topics vary each term. May be repeated for credit. S/U grading.

**272. Advanced Discrete Event Simulation and Modeling Techniques. (4)** Lecture, four hours; outside study, eight hours. In-depth study in discrete event simulation and modeling techniques, including building valid and credible simulation models, output analysis of systems, comparisons of alternative system configurations. Variance reduction techniques, simulation models of computer systems and manufacturing systems. Letter grading.

**273A. Digital Processing of Engineering and Statistical Data. (4)** Lecture, four hours; outside study, eight hours. Computer methods for processing engineering and statistical data. Algorithms to evaluate recursive filter functions, Fourier series, power spectral, analysis correlation computations, and statistical testing. Letter grading.

**276A. Pattern Analysis and Machine Intelligence. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence. Letter grading.

**276B. Structured Computer Vision. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Methods for computer processing of image data. Systems, concepts, and algorithms for image analysis, radiologic and robotic applications. Letter grading.

**276C. Speech and Language Communication in Artificial Intelligence. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 276A or 276B. Topics in human-computer communication: interaction with pictorial information systems, sound and symbol generation by humans and machines, semantics of data, systems for speech recognition and understanding. Use of speech and text for computer input and output in applications. Letter grading.

**279. Current Topics in Computer Science: Methodology. (2 to 12)** Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

**280A-280ZZ. Algorithms. (4 each)** Lecture, four hours; outside study, eight hours. Requisite: course 180. Additional requisites for each offering announced in advance by department. Selections from design, analysis, optimization, and implementation of algorithms; computational complexity and general theory of algorithms; algorithms for particular application areas. Subtitles of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and with topic change. Letter grading.

**281A. Computability and Complexity. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 181 or compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminisms, decidability, unsolvable problems, "easy" and "hard" problems, PTIME/NPTIME. Letter grading.

**281D. Discrete State Systems. (4)** Lecture, four hours; outside study, eight hours. Recommended requisite: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, realizability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation. Letter grading.

**282A. Cryptography. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 180. Basics of cryptography: symmetric and asymmetric cryptosystems; DES, RSA, ElGamal, elliptic curves. Schemes for signature, key distribution and key agreement, identification, authentication, and secret sharing. Advanced topics may include pseudo-random number generation, zero-knowledge proofs, and oblivious traffic. Letter grading.

**284A-284ZZ. Topics in Automata and Languages. (4 each)** Lecture, four hours; outside study, eight hours. Requisite: course 181. Additional requisites for each offering announced in advance by department. Selections from families of formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems; machine-based complexity. Subtitles of some current and planned sections: Context-Free Languages (284A), Parsing Algorithms (284P). May be repeated for credit with consent of instructor and with topic change. Letter grading.

**287A. Theory of Program Structure. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimization, correctness, and translatability of programs; expressive power of program constructs and data structures; selected current topics. Letter grading.

**288S. Seminar: Theoretical Computer Science. (2)** Seminar, two hours; outside study, six hours. Requisites: courses 280A, 281A. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

**289A-289ZZ. Current Topics in Computer Theory. (2 to 12 each)** Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer theory in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. Letter grading:

**289RA. Randomized Algorithms. (4)** Lecture, four hours; outside study, eight hours. Basic concepts and design techniques for randomized algorithms, such as probability theory, Markov chains, random walks, and probabilistic method. Applications to randomized algorithms in data structures, graph theory, computational geometry, number theory, and parallel and distributed systems. Letter grading.

**M296A. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4)** (Same as Biomedical Engineering M296A and Medicine M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multicompartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

**M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Biomathematics M270, Biomedical Engineering M296B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisite: course M296A or Biomathematics 220. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

**M296C. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4)** (Same as Biomedical Engineering M296C and Medicine M270E.) Lecture, four hours; outside study, eight hours. Requisite: course M296A. Recommended: course M296B. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training. Letter grading.

**M296D. Introduction to Computational Cardiology. (4)** (Same as Biomedical Engineering M296D.) Lecture, four hours; outside study, eight hours. Requisite: course M196B. Introduction to mathematical modeling and computer simulation of cardiac electrophysiological process. Ionic models of action potential (AP). Theory of AP propagation in 1D and 2D cardiac tissue. Simulation on sequential and parallel supercomputers, choice of numerical algorithms, to optimize accuracy and to provide computational stability. Letter grading.

**CM296L. Biomedical Systems/Biocybernetics Research Laboratory. (2 to 4)** (Formerly numbered C296L.) (Same as Biomedical Engineering CM296L.) Lecture, two hours; laboratory, two hours. Requisite: course M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course CM196L. Letter grading.

**298. Research Seminar: Computer Science. (2 to 4)** (Formerly numbered 209AA-209ZZ.) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate computer science students. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Assistant Training Seminar. (2)** Seminar, two hours; outside study, six hours. Limited to graduate Computer Science Department students. Seminar on communication of computer science materials in classroom: preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

**495B. Teaching with Technology. (2)** Seminar, two hours; outside study, four hours. Limited to graduate Computer Science Department teaching assistants. Seminar for teaching assistants covering how technology can be used to aid instruction in and out of classroom. S/U grading.

**497D-497E. Field Projects in Computer Science. (4-4)** Fieldwork, to be arranged. Students are divided into teams led by instructor; each team is assigned an external company or organization which they investigate as a candidate for possible computerization, submitting a team report of their findings and recommendations. In Progress and S/U or letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate computer science students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate computer science students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate computer science students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate computer science students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. S/U grading.

Richard K. Vance, Ph.D. (*Organismic Biology, Ecology, and Evolution*)

#### Assistant Professors

Stephen A. Engel, Ph.D. (*Psychology*)  
Christopher J. Lee, Ph.D. (*Chemistry and Biochemistry*)  
Stefano Soatto, Ph.D. (*Computer Science*)

#### Adjunct Associate Professors

Vivek Dixit, M.D. (*Medicine*)  
Valeriy I. Nenov, M.D. (*Neurosurgery*)

## Scope and Objectives

The major in Cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have four options for in-depth studies: life sciences, behavioral sciences, engineering and applied mathematical sciences, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

## Undergraduate Study

### Cybernetics B.S.

#### Precybernetics Major

Students may apply for the precybernetics major via petition if they are sophomores and have taken at least three of the premajor mathematics courses with a 2.7 grade-point average or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses.

#### Transfer Students

To be admitted as Cybernetics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general chemistry with laboratory for majors, two years of calculus for majors, one year of calculus-based physics, one year of biology with laboratory for majors, one psychology course, and one programming course using C++.

Transfer students must meet the same academic requirements as current UCLA students, based on all courses transferred from another institution which satisfy premajor requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

#### Preparation for the Major

*Required:* A minimum of 82 or 83 units (depending on the physics sequence selected), including Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 115A; Physics 1A, 1B, and 1C (or Electrical Engineering 1), or 1AH, 1BH, and 1CH; Program in Computing 10A; Psychology 10.

#### The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 grade-point average in mathematics, 3.0 GPA overall, and a minimum grade of C in all preparation for the major courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be passed with a grade of C or better.

#### Methodology Core

*Required:* Four subject areas as follows:

1. One overview course: Computer Science M196A
2. Two courses in probability and statistics from one of the following groups: (a) Statistics 100A and 100B, or (b) Mathematics 170A and Statistics 100B, or (c) Electrical Engineering 131A and Statistics 100B
3. Two courses in signals and control systems (one from each group): (a) Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A
4. One course in modeling and computer simulation: Computer Science M196B

#### Applications/Specialization Areas

*Required:* A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in physiological or cognitive psychology. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Students may select the **bioinformatics concentration** as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, and 60 are required, in addition to six courses selected from the current approved list. The three-course breadth requirement must also be satisfied by taking courses from the approved list.

#### Cybernetics Breadth Requirement

*Required:* One course from each of the applications/specialization areas selected from the current approved list.

## Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating excep-

tional ability on the senior research thesis are awarded highest honors.

## Computing Specialization

Students may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and 60 are required, in addition to six courses selected from the current approved list. Students graduate with a bachelor's degree in cybernetics and a specialization in Computing.

## Cybernetics

### Upper Division Courses

**195H. Honors Thesis. (4)** Limited to Cybernetics honors majors. Honors thesis preparation and submission, under direction of a faculty sponsor on Cybernetics Interdepartmental Committee. P/NP grading.

**M196A. Introduction to Cybernetics, Biomodeling, and Biomedical Computing. (2)** (Same as Biomedical Engineering M196A and Computer Science M196A.) Lecture, two hours. Requisites: Mathematics 31A, 31B, Program in Computing 10A. Strongly recommended for students with potential interest in biomedical engineering/biocomputing fields or in Cybernetics as a major. Introduction and survey of topics in cybernetics, biomodeling, biocomputing, and related bioengineering disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

**M196B. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Biomedical Engineering M196B, Computer Science M196B, and Medicine M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematic models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

**M196L. Biomedical Systems/Biocybernetics Research Laboratory. (2 to 4)** (Same as Biomedical Engineering CM196L and Computer Science CM196L.) Lecture, two hours; laboratory, two hours. Requisite: Computer Science M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Letter grading.

## DENTISTRY

*School of Dentistry*

UCLA  
A3-042 Dentistry  
Box 951668  
Los Angeles, CA 90095-1668

(310) 825-6401  
<http://www.dent.ucla.edu/>

No-Hee Park, D.D.S., M.S.D., Ph.D., *Dean*

## Scope and Objectives

The UCLA School of Dentistry offers one lower division and two upper division courses for pre-dental students, plus several graduate courses. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of research at (310) 825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty.

## Dentistry

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Dentistry. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in dentistry approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**199. Individual Special Studies. (2 to 8)** Studies in dentistry and related subject areas appropriate for the training of particular students, with required reading assignments or laboratory work leading to a final oral or written examination. P/NP or letter grading.

**199H. Individual Special Studies (Honors). (2 to 8)** Studies in dentistry and related subject areas appropriate for the training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). P/NP or letter grading.

### Graduate Courses

**M300A-M300B-M300C. Child Abuse and Neglect (2-2-1).** (Same as Community Health Sciences M245A-M245B-M245C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M300A is requisite to M300B, which is requisite to M300C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

**M422. Health Policy Issues for Dental Professionals. (2)** (Same as Health Services M448.) Lecture, two hours. Requisites: Biostatistics 100A, Epidemiology 100, Health Services 100. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

**M433A. Case Studies in Dental Practice. (2)** (Same as Health Services M448D.) Lecture, two hours. Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

**441C. Introduction to Health Care. (2)** Lecture, two hours. Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within general provision of health care services in America, with comparisons to dental care provisions in other countries. S/U grading.

## DESIGN | MEDIA ARTS

*School of the Arts and Architecture*

UCLA  
1200 Dickson Art Center  
Box 951456  
Los Angeles, CA 90095-1456

Victoria Vesna, Ph.D., *Chair*

### Professors

Rebecca Allen, M.S.  
N. Katherine Hayles, Ph.D.  
Lionel March, Sc.D.  
Vasa Mihich  
William Seaman, Ph.D.  
Victoria Vesna, Ph.D.

### Professors Emeriti

James W. Bassler, M.A.  
William C. Brown, M.A.  
Jack B. Carter, M.A.  
Thomas Jennings, M.A.  
J. Bernard Kester, M.A.  
Alice E. McCloskey, M.A.  
John A. Neuhart  
Nathan Shapira, Dottore in Architettura  
Madeleine Sunkees, B.Ed

### Associate Professor

Mitsuru Kataoka, M.A.

### Adjunct Assistant Professors

Cameron McNall, M.Arch.  
Jennifer Steinkamp, M.F.A.  
Gail Swanlund, M.F.A.

### Scope and Objectives

The Department of Design | Media Arts offers the Bachelor of Arts and Master of Fine Arts degrees, which focus on visual communication design with emphasis on digital media. These uniquely challenging programs invite students to balance aesthetic sensibility with logical reasoning, formal theories with practical application, and contemporary thought with historical perspective.

The undergraduate program begins with the study of basic design elements and processes: form, color, drawing, letterforms and typography, visual technologies, and the manipulation of photography and video through image-capture technologies. Historical perspectives and social issues are also introduced. At the upper division level, studio courses explore current uses of interactive media and new directions in visual communication design, including the study of time and motion, as well as virtual form and space in computer-generated environments.

Through a balance of courses in theory, criticism, and practice, students develop an understanding of design principles. Most courses are taught as studios of no more than 20 students, which encourages individual growth and fosters a sense of community within the department.

The two-year Master of Fine Arts (M.F.A.) degree fosters mature, professional-quality work utilizing the most current technologies in the

field of media design. The exploration of visual communication in a digital format leads to new concepts and understanding that address the role of design in the rapidly evolving area of digital media. The program focuses on developing an individual thesis project that incorporates in-depth research and theoretical exploration of a topic, culminating in a final exhibition of work. Students have the opportunity to participate in ongoing research projects that may form the basis of their thesis work. Sample topics include design of the interface and design of virtual environments and information spaces that integrate visual elements with sound, movement, time, and space.

Facilities and equipment in the department enable students to create visual designs in two, three, and even four dimensions. The Center for Digital Arts expands opportunities for students to develop interactive media applications in a networked environment, as well as advanced computer graphics involving virtual reality and three-dimensional form. The center's equipment combines high-end PC and Macintosh computers with facilities for sound and nonlinear video editing.

The Department of Design | Media Arts reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

### Undergraduate Study

#### Design | Media Arts B.A.

##### Preparation for the Major

*Required:* Design | Media Arts 10, 21, 22, 23, 24, 25, 26, and one course from Art 31A or 31B or Art History 50 through 57.

##### The Major

*Required:* Thirteen upper division courses, including a minimum of three courses from comparative and theoretical studies (Design | Media Arts 101 through C106) and seven courses from area studies (courses 153 through 160). Three additional upper division courses must be selected from the courses listed above and/or from major electives (courses C121 through C143 and 182 through 199). In consultation with and with approval of the faculty adviser, other nonmajor courses may be applied toward major credit.

It is recommended that students have each term's program approved by the departmental adviser.

Note: Consult the *Schedule of Classes* for courses restricted to majors only.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*,

available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Design | Media Arts offers the Master of Arts (M.A.) and Master of Fine Arts (M.F.A.) degrees in Design | Media Arts.

## Admission

### M.A. in Design | Media Arts

The department is not currently accepting applications for admission to the M.A. program.

### M.F.A. in Design | Media Arts

Applicants for admission to the M.F.A. program are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. Applicants are expected to have working knowledge of graphics software. Additional experience with video, interactive media, and/or three-dimensional modeling and animation is preferred. A portfolio is required in the form of slides (maximum 20) and/or videotape that is no more than five minutes in length. A statement of purpose is also considered. A minimum score of 620 (paper and pencil test) or 260 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language Testing System (IELTS) examination is required for applicants whose native language is not English. Formal faculty review of graduate applicant portfolios takes place toward the end of Winter Quarter. Students are admitted for Fall Quarter only.

## Master's Degrees

### M.A. in Design | Media Arts

The M.A. degree is offered through the comprehensive examination plan. Although a revised curriculum is approved for this degree, the courses that comprise this curriculum have not been established.

### M.F.A. in Design | Media Arts

Areas of study include media design: interface design, interactive media, time-based work, virtual environments, and information spaces.

The M.F.A. degree is offered through the comprehensive examination plan. The comprehensive examination consists of an oral examination and a concentrated body of work which is presented as the master's statement. Also required is an accompanying record of the project, consisting of documentation in the form of slides of physical work, research material, and other visual material; this may include a written statement as determined by the graduate guidance committee.

A minimum of 72 units of upper division and graduate design | media arts coursework is required, including a minimum of 24 units in the 200 series and 32 units in the 400 series. Sixteen units of electives may be applied toward the requirements for the degree.

## Design | Media Arts

### Lower Division Courses

**10. Nature of Design. (4)** Lecture, three hours. Open to nonmajors. Understanding the design process, with emphasis on development of a visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in our physical environment. P/NP or letter grading.

**21. Color. (4)** Studio, six hours. Introduction to theories of color to understand interdependence and interaction of color and form, color and quantity, color and placement, and the after-image. P/NP or letter grading.

**22. Form. (4)** Studio, six hours. Interrelation of two-dimensional surfaces and three-dimensional forms with traditional and experimental materials as a foundation for creativity; origination and solution of problems. P/NP or letter grading.

**23. Drawing. (4)** Studio, six hours. Translation of perception through delineation, drawing, and other descriptive media. Emphasis on development of students' motor control by means of freehand and mechanical drawing and by development of analytical and objective observation from life and three-dimensional objects. P/NP or letter grading.

**24. Visual Technologies. (4)** Lecture/studio, four hours; laboratory, two hours. Introduction and integration of traditional design tools, the camera, and digital technologies for application to visual thinking and fundamentals of design. P/NP or letter grading.

**25. Letterforms and Typography. (4)** Lecture/studio, four hours; laboratory, two hours. Prerequisite: course 24. Introduction to typography as basic element of information design and as it applies to various forms of media; historical basis for development of letterform design and its architecture. P/NP or letter grading.

**26. Image Capture. (4)** Lecture/studio, four hours; laboratory, two hours. Prerequisite: course 24. Introduction to image capture technologies through understanding of photography and video. Studio and field exercises include equipment operation, lighting techniques, and digital image manipulation. P/NP or letter grading.

**35B. Introduction to Tools and Processes. (4)** Lecture, two hours; studio, four hours. Introductory design shop course to develop necessary skills with traditional tools and power equipment, including fundamentals of joining, fastening, and finishing both natural and industrial materials, and their appropriate application in fabrication of design prototypes. Letter grading.

### Upper Division Courses

**101. Introduction to Study of Design. (4)** Lecture, three hours. Preparation: completion of preparation for the major courses. Historical introduction to principles of design, theories about design process, and culture of artifacts from classical times to the present day. P/NP or letter grading.

**102. Introduction to Design and Computation. (4)** Lecture, three hours. Preparation: completion of preparation for the major courses. Introduction to use of computational methods in representation, creation, and study of designs. Discussion of spatial algorithms, recursive procedures, and formal grammars and languages. Presentation of elementary applications in design. P/NP or letter grading.

**103. Introduction to Visual Communication. (4)** Lecture, three hours. Preparation: completion of preparation for the major courses. Designed for juniors/seniors. Introduction to methodology of design in context of visual communication, with focus on integrative themes and representative case studies that encourage independent student investigation. Letter grading.

**104. Design and Society: Society and Design. (4)** Lecture, three hours. Preparation: completion of preparation for the major courses. Open to nonmajors with consent of instructor. Historical and thematic examination of how design affects society from classical antiquity to the 20th century in order to understand historically how each type and application of design related to sociological context in which it existed. Consideration of how various design practices and techniques related to each other. P/NP or letter grading.

**C106. Media Studies. (4)** (Not the same as Design 106 prior to Fall Quarter 1998.) Lecture, three hours. Preparation: completion of preparation for the major courses. Overview and contextual understanding of influences and origins of media, communication paradigms, and technologies of past 150 years through reading and discussion of theoretical and historical works. Concurrently scheduled with course C206. Letter grading.

**C121. Fundamentals of Architectonics: Proportion. (4)** Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM221. P/NP or letter grading.

**C122. Fundamentals of Architectonics: Symmetry. (4)** Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM222. P/NP or letter grading.

**C123. Fundamentals of Architectonics: Compartment and Order. (4)** Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM223. P/NP or letter grading.

**C141. Programming Computer Applications in Architecture and Urban Design. (4)** Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. Concurrently scheduled with course CM241. P/NP or letter grading.

**C142. Introduction to Geometric Modeling. (4)** Lecture, three hours; outside study, nine hours. Prerequisite: course C141 or Computer Science 141. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. Concurrently scheduled with course CM242. P/NP or letter grading.

**C143. User Interaction Techniques in Design. (4)** Lecture, three hours; outside study, nine hours. Prerequisite: course C141 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. Concurrently scheduled with course CM243. P/NP or letter grading.

**153. Design for Video. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Use of video technology (video systems, cameras, displays, editing, and storage) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. P/NP or letter grading.

**154. Design for Print Media. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Prerequisite: course 103 or C106. Introduction to procedures to create, plan, and produce visual communication design. Emphasis on acquiring and working with visual vocabulary to gain mastery of conceptual and creative procedures by learning technical skills to translate ideas and concepts into visual design and graphic imagery. P/NP or letter grading.

**155. Design for Print and Digital Media. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Prerequisites: courses 103 or C106, 154. Integration of print and digital information technology, with continued emphasis on fully integrating visual vocabulary with mastery of conceptual and creative procedures. P/NP or letter grading.

**156A. Three-Dimensional: Design of Virtual Form. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Requisite: course 103 or C106. Through lectures, discussions, and studio work, introduction to basic elements of three-dimensional computer visualization, including modeling, image mapping, lighting, project construction, and rendering. P/NP or letter grading.

**156B. Three-Dimensional: Time and Motion in Virtual Space. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 156A. Extension of study of virtual three-dimensional form to include motion, time, and rhythm. Storyboard development, modeling of articulated characters and objects, virtual camera movement, and motion capture. P/NP or letter grading.

**157A. Design for Interactive Media. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154. Emphasis on graphic and information design for interactive media applications. Introduction to multimedia and hypertext. Focus on learning role of conceptual designer as visual communicator and design manager. P/NP or letter grading.

**157B. Advanced Interactive Media. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154, 157A. Extension of study of interactive media design. Focus on development of advanced conceptual skills in interface design and nonlinear narrative utilizing programming techniques such as lists and objects. Builds on skills and concepts acquired in course 157A. P/NP or letter grading.

**158. Design for Environmental Communication. (4)** Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154. Introduction to environmental communication design through experience in the design studio. Focus on aesthetic issues concerning creation of design elements incorporating concepts of spatial dimension, human/environmental scale, motion, and time. Overview of history, technologies, and future of environmental graphics. P/NP or letter grading.

**159. Senior Project. (4)** Lecture, two hours; discussion, two hours; laboratory, two hours. Preparation: completion of preparation for the major courses. Requisites: courses 103, C106, three courses from 153 through 158. Limited to seniors. Individual studies organized and conceptualized by senior students. Proposal for research and development of design and production of a body of work. May be repeated once for credit. Letter grading.

**160. Special Topics in Area Studies. (2 to 8)** Lecture, to be arranged. Preparation: completion of preparation for the major courses. Requisite: course 103 or C106. Selected topics in design and media arts explored through variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics to be announced in advance. May be repeated for a maximum of 8 units. Letter grading.

**161A. Introduction to Creative Use of Internet. (4)** Lecture, three hours; studio, three hours. Preparation: completion of preparation for the major courses. Emphasis on gaining deeper understanding of technical concepts in networking while learning history of Internet and becoming familiar with state-of-the-art tools of the moment. Storyboard and project development integrated into all aspects of class. Letter grading.

**161B. Dynamic Web. (4)** Lecture, three hours; studio, three hours; outside study, six hours. Requisite: course 161A. Intermediate-level course exploring creative production through networked multimedia environments, with focus on Worldwide Web. Builds on skills and concepts acquired in course 161A. Letter grading.

**161C. Designing Networked Public Spaces. (4)** Lecture, three hours; studio, three hours; outside study, six hours. Requisites: courses 161A, 161B. Advanced-level course exploring creative production through online environments and telepresence. Focus on design of multi-user collaborative spaces. Builds on skills and concepts acquired in course 161B. Letter grading.

**182. Design Processes: World Cultures. (4)** Studio, six hours. Introduction to early development of tools, cloth, shelters, symbols, and embellishments in world cultures. P/NP or letter grading.

**183. Material Processes: Fiber Structure. (4)** Studio, six hours. Use of basic hand methods of construction to develop both two- and three-dimensional forms, utilizing pliable materials but not to exclude other media. P/NP or letter grading.

**184. Material Processes: Surface Pattern. (4)** Studio, six hours. Use of hand processes and a variety of materials to develop simple to complex surface pattern systems as a means for creative expression. P/NP or letter grading.

**189. Topics in Design. (2 to 8)** Lecture, to be arranged. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated for a maximum of 16 units. Letter grading.

**193. Proseminar: Design. (4)** Proseminar, three hours. Open to senior and advanced students. Examination in seminar format of specific problems relevant to design theory and performance. Topics announced in advance. Letter grading.

**197. Honors Course. (4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors. Individual studies for majors. May be repeated once for credit. P/NP or letter grading.

**199. Special Studies in Design. (2 to 8)** Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. May be taken for a maximum of 8 units. P/NP or letter grading.

## Graduate Courses

**C206. Media Studies. (4)** Lecture, three hours. Designed for graduate design | media arts students. Overview and contextual understanding of influences and origins of media, communication paradigms, and technologies of past 150 years through reading and discussion of theoretical and historical works. May be repeated for credit with consent of adviser. Concurrently scheduled with course C106. Letter grading.

**207. Mathematical Techniques in Design and Computation I. (4)** Lecture, three hours. Designed for graduate students. Survey of mathematical techniques used in design and computation theory. Sets, relations, posets, lattices, Boolean and Heyting algebras, formal languages and production systems. May be repeated for credit with consent of adviser. S/U or letter grading.

**208. Mathematical Techniques in Design and Computation II. (4)** Lecture, three hours. Designed for graduate students. Survey of mathematical techniques used in design and computation theory. Theory of descriptive geometry, spatial transformations, matrix representations, symmetry and groups, graphs, maps and triangulations. May be repeated for credit with consent of adviser. S/U or letter grading.

**CM221. Fundamentals of Architectonics: Proportion. (4)** (Same as Architecture and Urban Design M225A.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C121. S/U or letter grading.

**CM222. Fundamentals of Architectonics: Symmetry. (4)** (Same as Architecture and Urban Design M225B.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C122. S/U or letter grading.

**CM223. Fundamentals of Architectonics: Comparison and Order. (4)** (Same as Architecture and Urban Design M225C.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C123. S/U or letter grading.

**229. Advanced Seminar: Architectonics. (4)** Seminar, three hours. Requisites: courses CM221, CM222, CM223. Exploration in depth of an active research question in architectonics. Topics may focus on some aspect of proportion, symmetry, comparison, and order from historical and/or formal point of view. May be repeated for credit with consent of adviser. S/U or letter grading.

**CM241. Programming Computer Applications in Architecture and Urban Design. (4)** (Same as Architecture and Urban Design M227A.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. May be repeated for credit with consent of adviser. Concurrently scheduled with course C141. S/U or letter grading.

**CM242. Introduction to Geometric Modeling. (4)** (Same as Architecture and Urban Design M227B.) Lecture, three hours; outside study, nine hours. Requisite: course CM241. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. May be repeated for credit with consent of adviser. Concurrently scheduled with course C142. S/U or letter grading.

**CM243. User Interaction Techniques in Design. (4)** (Same as Architecture and Urban Design M227C.) Lecture, three hours; outside study, nine hours. Requisite: course CM241 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. May be repeated for credit with consent of adviser. Concurrently scheduled with course C143. S/U or letter grading.

**249. Advanced Seminar: Computer Applications. (4)** Seminar, three hours. Requisite: course C141 or Computer Science 141. Survey of various roles computers may play in design; development of new applications. Topics include representation, search, evaluation functions, and communication. May be repeated for credit with consent of adviser. S/U or letter grading.

**254. Dynamic Media. (4)** Lecture/studio, six hours. Designed for graduate design | media arts majors. Emphasis on creation of dynamic, digital, and linear works through integration of typography, photography, video, graphics, animation, and sound. May be repeated for credit with consent of adviser. Letter grading.

**256. Interactive Environments. (4)** Lecture/studio, six hours. Requisites: courses C206, 254. Designed for graduate design | media arts majors. Emphasis on comprehension of fundamental principles of interactivity and networked environments. May be repeated for credit with consent of adviser. Letter grading.

**258. Current State of Technology. (4)** Lecture/studio, six hours. Designed for graduate design | media arts majors. Introduction to state-of-the-art software programs and techniques necessary for design of interactive and multimedia applications. May be repeated for credit with consent of adviser. Letter grading.

**269. Graduate Seminar. (4)** Seminar, four hours. Designed for graduate design | media arts majors. Survey of critical theories in media art and design. Critical examination of student work by peers, faculty, and expert guests. Must be taken twice for M.F.A. degree. May be repeated for credit with consent of adviser. Letter grading.

**287. Form and Structure. (2 to 8)** Studio or studio/seminar, to be arranged. Exploration of form, with emphasis on expressive experimentation in materials and processes. May be repeated for credit with consent of adviser. Letter grading.

**289. Special Topics in Design. (2 to 8)** Seminar, to be arranged. Examination of specific problems relevant to design theory and performance. Topics announced in advance. May be taken for a maximum of 8 units. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. Design Studio I. (2 to 8)** Studio, to be arranged. Limited to first-year graduate design | media arts students. Introduction to advanced experimentation and integration of media, technologies, and concepts, with emphasis on development of design work of individual graduate students. May be repeated for credit with consent of adviser. Letter grading.

**402. Design Studio II. (2 to 8)** Studio, to be arranged. Requisites: courses C206, 254, 256, 401 (4 units). Continuation of advanced design research based on experimentation integrated into a disciplined approach to design process. Focus on development of comprehensive body of work which forms basis of M.F.A. thesis exhibition. May be repeated for credit with consent of adviser. Letter grading.

**495. Teaching Assistant Training Practicum. (2)** Seminar, three hours; outside study, three hours. Forum for first-year teaching assistants for discussion and exploration of teaching pedagogy and classroom mechanics. Problems and practices of teaching design at college level, as well as role of teaching assistants within department. Designed to help new teaching assistants develop teaching skills and to orient them to department and University policies and resources. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

James W. Trent Ph.D., *Chair*  
Jerome Rabow, Ph.D.

## Scope and Objectives

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which students may waive the Multiple Subject Assessment for Teachers (MSAT) in California. The MSAT examination must be passed (or the DLAP completed) before students in elementary school teaching credential programs may begin their student teaching. To earn an elementary school teaching credential, students must complete an accredited program offered through a graduate school of education.

## Undergraduate Study

### Diversified Liberal Arts Certificate Program

To earn the certificate in Diversified Liberal Arts, students must complete a major in the College of Letters and Science. (For eligibility of students in other schools, consult a DLAP counselor.) They must also complete DLAP re-

quirements in four main areas: (1) language and literature, (2) mathematics and science, (3) history and social science, (4) arts and culture. Many program requirements can be satisfied by courses taken to fulfill general education requirements.

Students must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The College certifies completion of the program.

Students who do not complete the program prior to graduation must petition out of the program to be eligible to graduate.

For further information about the program and a complete list of courses that apply, contact a DLAP counselor in the College of Letters and Science, A316 Murphy Hall (310-206-6681; e-mail: [dlap@college.ucla.edu](mailto:dlap@college.ucla.edu)). For information regarding the Teacher Credential Program in the Graduate School of Education and Information Studies, see a counselor in 1009 Moore Hall (310-825-8328).

Raymond J. Walker, Ph.D., *in Residence*  
John T. Wasson, Ph.D.  
An Yin, Ph.D.  
Edward D. Young, Ph.D., *Acting*

### Professors Emeriti

Donald Carlisle, Ph.D.  
John M. Christie, Ph.D.  
Paul J. Coleman, Jr., Ph.D.

Wayne A. Dollase, Ph.D.  
Clarence A. Hall, Jr., Ph.D.  
Isaac R. Kaplan, Ph.D.  
Helen Tappan Loeblich, Ph.D.  
Arthur Montana, Ph.D.  
Clemens A. Nelson, Ph.D.  
Gerhard Oertel, Dr.rer.nat.  
Walter E. Reed, Ph.D.  
John L. Rosenfeld, Ph.D.  
Ronald L. Shreve, Ph.D.

### Associate Professors

Craig E. Manning, Ph.D.  
Mark B. Moldwin, Ph.D.  
David A. Paige, Ph.D.  
Mary R. Reid, Ph.D.  
Paul J. Tackley, Ph.D.

### Assistant Professors

Gary J. Axen, Ph.D.  
Laurence Smith, Ph.D.

### Adjunct Professor

Paul M. Merifield, Ph.D.

### Adjunct Associate Professors

Heidi Houston, Ph.D.  
Frank Kyte, Ph.D.

## Scope and Objectives

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, seismology, the Earth's interior, planetary physics, and space plasmas.

The variety of techniques applied lead to several concentrations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth Sciences is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in environmental sciences, law, government, business, journalism, public health, medicine, or dentistry. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the B.S. degrees.

## Undergraduate Study

### Geology B.S.

#### Preparation for the Major

*Required:* Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Life Sciences 1; Mathematics 31A, 31B, 32A; Physics 1A, 1B, 1C, 4AL, 4BL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20 or Program in Computing 10A or knowledge of FORTRAN or C++ demonstrated by examination. All courses must be passed with a minimum grade of C–.

#### Transfer Students

To be admitted as Geology majors, transfer students with 90 or more quarter units (60 semester units) must complete the following introductory courses prior to admission to UCLA: one Earth sciences course, one biology course with laboratory, two general chemistry courses with laboratory for majors, one year of calculus, and one year of calculus-based physics with laboratory. One computer programming course is recommended.

#### The Major

*Required:* Earth and Space Sciences 103A, 103B, 103C, 111, 112, 116, 121, 133, 135, and three additional courses from C106, C107, C109, 119, 125, C126, 129, 134, 136C, 137, 139, 141, 150, 152.

Students with an interest in nonrenewable natural resources are advised to take courses 136C, 137, 139, 141, and/or 150. Those interested in geochemistry are advised to take Earth and Space Sciences 103C, C107, C109, 119, 121, C126, and/or Chemistry and Biochemistry 110A, 110B, 114, 132A, 132B, 153A, 184.

### Geology/Engineering Geology B.S.

#### Preparation for the Major

*Required:* Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, 1C, 4AL, 4BL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20 or Program in Computing 10A or knowledge of FORTRAN or C++ demonstrated by examination. *Recommended:* Mathematics 32B. All courses must be passed with a minimum grade of C–.

#### Transfer Students

To be admitted as Geology/Engineering Geology majors, transfer students with 90 or more quarter units (60 semester units) must complete the following introductory courses prior to admission to UCLA: one Earth sciences course, one biology course with laboratory, two general chemistry courses with laboratory for majors, one year of calculus, and one year of calculus-based physics with laboratory. One

computer programming course is recommended.

#### The Major

*Required:* Earth and Space Sciences 103A, 103B, 111, 112, 121, 135, 139; Civil and Environmental Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences C126, 129, 134, 136C, 137, 141, 150, Civil and Environmental Engineering 151, 155, Geography 100.

### Geology/Paleobiology B.S.

#### Preparation for the Major

*Required:* Earth and Space Sciences 1 or 1H, 16 or 17, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A; Physics 1A, 1B, and 4AL, or 6A and 6B. All courses must be passed with a minimum grade of C–.

#### Transfer Students

To be admitted as Geology/Paleobiology majors, transfer students with 90 or more quarter units (60 semester units) must complete the following introductory courses prior to admission to UCLA: one Earth sciences course, one biology course with laboratory, two general chemistry courses with laboratory for majors, one year of calculus, and one year of calculus-based physics with laboratory. One computer programming course is recommended.

#### The Major

*Required:* Earth and Space Sciences 103B, 111, 112, 116, CM118, 133; seven courses from Biostatistics 110A, 110B, Chemistry and Biochemistry 130A, 130AL, 130B, 130BL, 153A, 153L, Earth and Space Sciences C109, 119, 121, 141, Organismic Biology, Ecology, and Evolution 101A, 101B, 102, 105, 110, 111, 117, 120, 121, 122, 123, 147, 148.

### Geophysics/Applied Geophysics B.S.

#### Preparation for the Major

*Required:* Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20 or Program in Computing 10A or knowledge of FORTRAN or C++ demonstrated by examination. All courses must be passed with a minimum grade of C–.

#### Transfer Students

To be admitted as Geophysics/Applied Geophysics majors, transfer students with 90 or more quarter units (60 semester units) must complete the following introductory courses prior to admission to UCLA: one Earth sciences course, one general chemistry course with laboratory for majors, two years of calculus, and one and one half years of calculus-based physics. One computer programming course is recommended.

#### The Major

*Required:* Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152; Physics 105A, 105B, 110A, 110B, 114; two courses from Earth and Space Sciences 103A, 103B, C107, 134, 137, 139, 153, 154, 155, 205, 265, Physics 112, 115A, 116, 131, 132, Statistics 100A, 100B, or other courses with consent of adviser.

### Geophysics/Geophysics and Space Physics B.S.

#### Preparation for the Major

*Required:* Earth and Space Sciences 1 or 1H, 9; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, and 4BL (or 2AH, 2BH, 4AL, and 4BL), 17, 18L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20 or Program in Computing 10A or knowledge of FORTRAN or C++ demonstrated by examination. All courses must be passed with a minimum grade of C–.

#### Transfer Students

To be admitted as Geophysics/Geophysics and Space Physics majors, transfer students with 90 or more quarter units (60 semester units) must complete the following introductory courses prior to admission to UCLA: one Earth sciences course, one general chemistry course with laboratory for majors, two years of calculus, and one and one half years of calculus-based physics. One computer programming course is recommended.

#### The Major

*Required:* Earth and Space Sciences 134, M140, 152, 153, 154, 155; Physics 105A, 105B, 110A, 110B, 112, 131; two upper division courses from the physical sciences, engineering, or mathematics (must be approved by the undergraduate adviser).

Students planning to do graduate work in specialized careers in Earth sciences should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 248.

### Earth Sciences B.A.

#### Preparation for the Major

*Required:* Earth and Space Sciences 1 or 1H, 9, 15, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Life Sciences 1; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 1A, 1B, 1C, and 4AL, or 2AH, 2BH, and 4AL, or 6A, 6B, and 6C. All courses must be passed with a minimum grade of C–.

### Transfer Students

To be admitted as Earth Sciences majors, transfer students with 90 or more quarter units (60 semester units) must complete the following introductory courses prior to admission to UCLA: courses in Earth sciences, Earth history, origin and evolution of the solar system, and oceanography, one biology course with laboratory, two general chemistry courses with laboratory for majors, one year of calculus, and one year of calculus-based physics with laboratory.

### The Major

*Required:* Earth and Space Sciences 103A, 103B, 111, 112, 116; five additional upper division courses from Earth and Space Sciences other than 100 or 120, English Composition 129C, Geography 100 and 100A, 101 and 101A, 104, 105 and 105A, 106 and 106A, 107, 113, or other upper division physical sciences, life sciences, or engineering courses by petition.

### Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (8 units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

### Geochemistry Minor

Geochemistry emphasizes use of minerals, magmas, elements, and isotopes to date events, determine rates, and track matter through its cycles in the planets and biosphere. These skills are valuable in environmental and natural-resource work and anthropology, as well as in studying the histories of the planets.

To enter the Geochemistry minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (12 units):* Earth and Space Sciences 1, 51A, 51B.

*Required Upper Division Courses (20 to 26 units):* Two courses from Earth and Space Sciences C106, C107, C109, and three courses from 103A, 103B, 103C, C106 or C107 or

C109 (whichever course was not applied above), 152, 153.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Geology Minor

Geology is the study of the surface of the Earth and the rocks and processes which created it. Field methods, interpretation of rocks, and modern plate-tectonic models are emphasized, with the goals of finding valuable or hazardous materials and inferring geologic history. These skills are valuable in engineering, urban planning, and environmental and resource studies.

To enter the Geology minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (12 units):* Earth and Space Sciences 1, 61, and one course from 5, 8, 9, 15, 16, or 17.

*Required Upper Division Courses (22 units):* Earth and Space Sciences 112, 119, and three courses from 116, 129, 133, 137, 139, 150.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Geophysics and Planetary Physics Minor

Classical physics, supported by field data, mathematics, and computing, is used to understand diverse processes from ocean circulation and earthquakes to the formation of planets and the flow of particles and electromagnetic fields in space. These skills are valuable in environmental, engineering, and resource studies and more broadly in any kind of career which requires quantitative analysis.

To enter the Geophysics and Planetary Physics minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (12 units):* Earth and Space Sciences 1, 8, 9.

*Required Upper Division Courses (20 units):* Earth and Space Sciences 134, 135, and three courses from M140, 152, 153, 154, 155.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website,

<http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Earth and Space Sciences offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Geochemistry, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Geology, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Geophysics and Space Physics.

### Admission

#### Geochemistry

A bachelor's degree in chemistry, geology, physics, or a related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required; the Subject Test is optional and may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

#### Geology

A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are optional and may be in any appropriate subject. Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

#### Geophysics and Space Physics

A bachelor's degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are desirable, preferably in Physics, although Mathematics or Geology are also acceptable. Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Undergraduate preparation for admission to the program in geophysics and space physics with specialization in applied geophysics is the equivalent of the B.S. degree in Geophysics – Applied Geophysics, including a common mastery of the subject matter of Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

## Master's Degrees

Areas of study for each major are listed under Doctoral Degrees.

### Geochemistry

The M.S. degree is offered through the comprehensive examination and thesis plans. A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in designated coursework in Earth and space sciences and chemistry and biochemistry, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology.

### Geology

The M.S. degree is offered through the comprehensive examination and thesis plans; the latter is normally reserved for terminal master's students. Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least 4 units must be a geology seminar. The advising committees may require additional courses in light of individual educational objectives and backgrounds. Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments.

### Geophysics and Space Physics

The M.S. degree is offered through the comprehensive examination and thesis plans. Students in geophysics and space physics with a specialization in applied geophysics must follow the thesis plan. Courses applied toward the 36-unit minimum requirement must include a required three-course sequence in Earth and space sciences and at least 12 additional units of 200-series courses, of which at least half must fall within a single field of concentration (geophysics, geophysical fluid dynamics, planetology, or space physics) which students select with the advice and approval of their faculty adviser, and the remainder must contribute to their general competence in geophysics and space physics.

For the program in geophysics and space physics with specialization in applied geophysics, courses applied toward the 36-unit minimum requirement must include a required two-course sequence in Earth and space sciences, plus at least two courses from another list of designated courses. Eight additional units of graduate-level courses are required.

## Doctoral Degrees

### Geochemistry

The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimen-

tal petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Students are expected to complete at least the minimum number of courses required for the M.S. degree. Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in designated courses in Earth and space sciences and chemistry and biochemistry, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology.

Written and oral qualifying examinations are required. The written examination may be given in either a question/answer format or in a proposal format, at the discretion of the student.

Following successful completion of the written qualifying examination, students prepare a written prospectus of their proposed dissertation research and take the University Oral Qualifying Examination. The subject matter covered in the examination includes, but is not limited to, the proposed research.

### Geology

The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Students are expected to complete at least the minimum number of courses required for the M.S. degree and take a geology seminar each year. Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Required coursework can vary depending on the student's previous academic preparation.

Written and oral qualifying examinations are required. The written examination is given in either a question/answer format or a proposal/proposition format, at the discretion of the student.

Following successful completion of the written examination, students prepare a written prospectus of their proposed dissertation research and take the University Oral Qualifying Examination. The subject matter covered in the examination includes, but is not limited to, the proposed research.

### Geophysics and Space Physics

The program in geophysics and space physics offers study in Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system

origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

The objective of the program in geophysics and space physics with specialization in applied geophysics is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly in petroleum exploration.

Six courses are required, three in fundamental physics and three in the major geophysics disciplines. Examinations for both areas must be passed prior to undertaking the departmental written qualifying examination.

Written and oral qualifying examinations are required. The written examination is given in either a question/answer format or a proposal/proposition format, at the discretion of the student.

Following successful completion of the examination, students prepare a written prospectus of their proposed dissertation research and take the University Oral Qualifying Examination. While the examination focuses on the suitability of the chosen problem for the Ph.D. dissertation and students' capacity to pursue research on the problem, it is not limited to these topics.

## Earth and Space Sciences

### Lower Division Courses

**1. Introduction to Earth Science. (4)** Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology.

**1H. Fundamentals of Earth Science. (4)** Lecture, three hours; laboratory, two hours; two field days. Not open to students with credit for or currently enrolled in course 1 or 100. Particularly recommended for future physical sciences majors with strong high school or some lower division preparation. Introduction to Earth materials, physical geology, and tectonics, with examples of geophysical and geochemical methods.

**5. Environmental Geology of Los Angeles. (4)** Lecture, three hours; discussion, two hours; field trips. Geologic hazards and natural resources of greater Los Angeles region. Topics include Los Angeles geologic hazards such as earthquakes, landslides, and floods; Southern California oil fields; gold and gem mining in the region; local beach processes; and Los Angeles water-resource problems. Field trips to San Andreas fault, California aqueduct, active landslides, and historic gold mines. P/NP or letter grading.

**8. Earthquakes. (4)** Lecture, three hours; discussion, one hour. Causes and effects of earthquakes, with special emphasis on problems of living with earthquakes in Southern California. Topics include relationship between earthquakes and local and regional geology, types of earthquakes, past and future earthquakes in California, earthquake engineering, disaster preparedness, and prospects for predicting or controlling earthquakes.

**9. Origin and Evolution of Solar System. (4)** Lecture, three hours; discussion, one hour. Properties of sun, planets, asteroids, and comets. Astronomical observations relevant to understanding the solar system and its origin. Dynamical problems, including examination of fallacious hypotheses. Meteoritic evidence regarding earliest history of the solar system. Chemical models of solar nebula. Space exploration and its planning.

**15. Introduction to Oceanography. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Organismic Biology 25. General introduction to geological, physical, chemical, and biological processes related to characteristics and evolution of ocean system. P/NP or letter grading.

**16. Major Events in History of Life. (4)** Lecture, three hours; laboratory, two hours. Designed for nonmajors. History of life on Earth as revealed through the fossil record. P/NP or letter grading.

**17. Dinosaurs and Their Relatives. (4)** Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Exploration of biology, evolution, and extinction of dinosaurs and close relatives, in context of history of biosphere. Information from paleontology, biology, and geology.

**20. Natural History of Southern California. (4)** Lecture, one hour; laboratory, three hours; four field week-ends. Identification, distribution, diversity of native plants and communities; identification and interpretation of rocks, minerals, and geologic features and geologic history of physiographic regions of Southern California. Emphasis on field-based learning. P/NP or letter grading.

**51A. Mineralogy-Lithology. (4)** Lecture, three hours; laboratory, six hours. Enforced prerequisite: course 1 or 1H. Recommended: completion of chemistry requirement. Mineralogic crystal chemistry; relation of physical properties to structure. Structural classification and petrogenesis of major minerals and rocks. Laboratory study of crystallography and identification of minerals and igneous, sedimentary, and metamorphic rocks in hand sample.

**51B. Optical Mineralogy-Petrography. (4)** Lecture, three hours; laboratory, six hours. Preparation: one introductory high school or college physics course. Enforced prerequisite: course 51A. Principles of optical crystallography. Utilization of optical properties to identify nonopaque minerals in immersion media and in thin section. Study of common igneous, sedimentary, and metamorphic rocks in thin section.

**61. Geologic Maps. (4)** Lecture, two hours; laboratory, three hours; fieldwork, five days. Enforced prerequisites: courses 1 (or 1H), 51A. Planning, creation, and interpretation of geologic maps, including both practical and philosophical problems that arise. Topographic and geologic mapping in the field. Interpretation of published maps in laboratory. P/NP or letter grading.

## Upper Division Courses

**100. Principles of Earth Science. (4)** Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of Earth; physical and biological evolution.

**102. Reflected Light Microscopy. (2 or 4)** Lecture, 90 minutes; laboratory, three hours. Prerequisite: course 51B. Study of opaque and ore minerals in polished section using reflected light methods. Optical theory, qualitative and quantitative measurements, mineral identification, textures and assemblages of reflective metals, oxides, sulfides, and arsenides. Independent project required if taken for 4 units. P/NP or letter grading.

**103A. Igneous Petrology. (6)** Lecture, two to three hours; laboratory, six hours; field trips. Requisites: courses 51A, 51B, Chemistry 20B, 20L, Mathematics 31B. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in earth. Introduction to thermodynamics as applied to petrology. Formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of the crust and mantle and its relation to seismology. Overview of petrological and chemical evolution of Earth, moon, and other planets from their origin to the present. P/NP or letter grading.

**103B. Sedimentary Petrology. (6)** Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on characteristics of sedimentary particles and dynamics of depositional processes. Lectures focus on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies. P/NP or letter grading.

**103C. Metamorphic Petrology. (6)** Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103B. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and application of physical and chemical principles. P/NP or letter grading.

**C106. Physical Geochemistry. (4)** Lecture, three hours. Prerequisite: course 51B. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C206. P/NP or letter grading.

**C107. Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C207. P/NP or letter grading.

**C109. Isotope Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical and biological sciences students. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C209. P/NP or letter grading.

**111. Stratigraphic and Field Geology. (6)** Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Prerequisite: course 61. Principles of stratigraphy; geologic mapping of a selected area; preparation of a geologic report.

**111G. Field Geology. (2 to 4)** Designed for graduate students. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation.

**112. Structural Geology. (6)** Lecture, three hours; laboratory, six hours. Prerequisite: course 1. Recommended: course 51B. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. P/NP or letter grading.

**116. Paleontology. (4)** Lecture, three hours; laboratory, three hours; field trips. Prerequisite: Biology 5. Review of major groups of fossil organisms and their significance in geology and biology.

**CM118. Advanced Paleontology. (4)** (Same as Organismic Biology CM145.) Lecture, three hours. Prerequisite: course 116 or Organismic Biology 110 or 117. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM218. P/NP or letter grading.

**119. Continental Drift and Plate Tectonics. (4)** Lecture, three hours. Prerequisite: course 1 or 1H or 100. Designed for juniors/seniors. Classical concepts of sedimentation and tectonics. Alfred Wegener's theory of continental drift and ensuing controversy. Physiography of continents and oceans. Geophysical evidence regarding nature of ocean floor. Magnetic stratigraphy. Seafloor spreading. Plate tectonic model and its driving mechanisms. Tectonic, igneous, and metamorphic processes at plate boundaries.

**120. Rubey Colloquium: Major Advances in Earth Science. (4)** Lecture, three hours. Designed for juniors/seniors. Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Supervision of continuity and assessment of student performance by a faculty member. Content varies from year to year. If laboratory work is required, course 199 must be taken concurrently.

**121. Advanced Field Geology. (8)** (Formerly numbered 121A-121B.) Lecture, one hour (Spring Quarter); fieldwork, five weeks (Summer Quarter). Requisites: courses 61, 103A, 103B, 111, 112. Problems in field geology; preparation of geologic maps and cross-sections; preparation of written geologic reports in the field and written summary geologic report on the selected area. P/NP or letter grading.

**125. Volcanoes. (4)** Lecture, three hours; laboratory, three hours; field trip(s). Requisites: courses 1, 61. Recommended: courses 51A, 51B, 103A. Origins of magmas and their properties. Physics of volcanism and characteristics of volcanic deposits. Monitoring volcanic hazards and understanding effects of volcanoes on life. Case studies of historical eruptions. P/NP or letter grading.

**C126. Advanced Igneous Petrology. (4)** Lecture, three hours; laboratory, three hours; field trips. Prerequisite: course 103A. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C226. P/NP or letter grading.

**129. Hydrogeology. (4)** Lecture, three hours. Prerequisite: course 1 or 1H or 100. Designed for juniors/seniors. Hydrogeologic controls of groundwater occurrence, movement, quality, and management. Hydrologic equation, groundwater/surface water relationships, water wells, pumping tests, pollution, artificial recharge, seawater intrusion, safe yield of groundwater basins, groundwater models.

**C132. Subsurface Fluid Flow and Geological Processes. (4)** Lecture, three hours; laboratory, one hour. Prerequisite: Mathematics 32A. Quantitative basis for studying fluid flows in geologic processes. Groundwater problems and pore-fluid pressure evolution. Concurrently scheduled with course C232. P/NP or letter grading.

**133. Historical and Regional Geology. (4)** Lecture, three hours; discussion, two hours; field trips. Prerequisite: course 111. Principles of historical geology. Physical evolution of Earth, especially North America. One area of Earth to be investigated in detail, with emphasis on its geologic evolution through time. P/NP or letter grading.

**134. Computing in Earth and Space Sciences. (4)** Lecture, three hours; laboratory, three hours. Prerequisite: Program in Computing 3 or 10A. Original programming and application of software to generate and test hypotheses with nonideal or incomplete data sets. Interpolation/extrapolation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications; probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software used in research and industry.

**135. Introduction to Applied Geophysics. (4)** Lecture, three hours; laboratory, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH), 4AL, 4BL, Program in Computing 3 or 10A. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical methods of exploration for ores, petroleum, and other economic minerals. P/NP or letter grading.

**136A. Applied Geophysics. (4)** Lecture, three hours; laboratory, three hours; field trips. Requisites: Mathematics 33A, Physics 1A, 1B, and 1C (or 2AH and 2BH), 4AL, 4BL, Program in Computing 3 or 10A. Not open for credit to students with credit for course 135. Seismic reflection and refraction, Fourier analysis and deconvolution, vibroseis, synthetic seismograms, marine seismics, seismic interpretation, gravity and magnetic fields, inversion uniqueness and depth rules. P/NP or letter grading.

**136B. Applied Geophysics. (4)** Lecture, three hours; laboratory/field trips, six hours. Requisites: course 136A, Program in Computing 3 or 10A. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics.

**136C. Field Geophysics. (6)** Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Prerequisite: course 135 or 136A. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip).

**137. Petroleum Geology. (4)** Lecture, three hours. Requisites: courses 61, 111. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology.

**139. Engineering and Environmental Geology. (4)**

Lecture, two and one-half hours. Requisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and sub-surface disposal of liquids and solid wastes.

**M140. Introduction to Fluid Dynamics. (4)** (Same as Atmospheric Sciences CM120.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Letter grading.

**141. Basin Analysis. (4)** Lecture, three hours; laboratory, six hours. Requisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Sedimentary patterns in modern plate settings serve to focus interpretations of deformed rocks in complex structural regions.

**150. Remote Sensing for Earth Sciences. (4)** Lecture, three hours. Designed for juniors/seniors and graduate students. Remote sensing related to development of natural resources. Characteristics of electromagnetic spectrum and review of remote sensing devices. Applicability to land-use classification, soil survey, urban studies, vegetation classification; emphasis on geologic interpretation of imagery.

**152. Physics of the Earth. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH). Application of physics to structure and evolution of the solid Earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and relation of these topics to plate tectonics and other problems of current geophysical interest. P/NP or letter grading.

**153. Oceans and Atmospheres. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH). Physics and chemistry of Earth's oceans and atmosphere; origin and evolution of planetary atmospheres; biogeochemical cycles, atmospheric radiation and climate, energetics and dynamics of oceanic and atmospheric circulation systems. P/NP or letter grading.

**154. Solar Terrestrial Physics. (4)** Lecture, three hours; discussion, one hour. Requisite or corequisite: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. Solar wind. Magnetospheres and ionospheres of Earth and other planets. Geomagnetic phenomena and the aurora.

**155. Planetary Physics. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH). Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres. P/NP or letter grading.

**C160. Field Seminar. (2 to 6)** Lecture, one to three hours; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum which varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. Concurrently scheduled with course C260. P/NP or letter grading.

**195G. Field Geology for Graduate Students. (2 to 4)** Lecture, two hours; four to five field trips. Requisite: course 121B. Required of new graduate students in geology program. Advanced techniques in field geologic mapping, exposing students to igneous, metamorphic, and sedimentary terranes with varying amounts of tectonism. May be repeated for credit. P/NP or letter grading.

**199. Special Studies in Earth and Space Sciences. (2 to 8)** May be repeated for credit.

**199H. Honors Research in Earth and Space Sciences. (4)** Limited to seniors. Individual research designed to broaden and deepen students' knowledge of some phase of Earth and space sciences.

## Graduate Courses

**200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. (4)**

Lecture, three hours. Requisites: Physics 105A, 110A, 112, 131. Geochemistry, cosmochemistry, and petrology; geotectonics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; core and geomagnetism; lunar and planetary interiors.

**200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. (4)** Lecture, three hours. Requisites: Physics 105A, 110A, 112, 131. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres.

**200C. Introduction to Geophysics and Space Physics III: Plasmas — Aeronomy and the Interplanetary Medium. (4)** Lecture, three hours. Requisites: Physics 105A, 110B, 112, 131. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with Earth, magnetospheric phenomena.

**201. Classical Mechanics. (4)** Lecture, three hours. Kinematics, variational principles and Lagrange equations, rotational dynamics. Hamilton equations of motion, linear and nonlinear perturbation theory, applications to solar system.

**202. Continuum Mechanics. (4)** Lecture, three hours. Kinematics and dynamics of continuous media. Properties of stress, strain, and rate-of-strain tensors. Conservation laws. Elasticity and viscosity. Heat transfer, boundary layers, and dynamical similarity. S/U or letter grading.

**204. Time-Series Analysis and Spectral Estimation. (4)** Lecture, three hours. Preparation: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis.

**205. Inverse Theory and Data Interpretation. (4)** Lecture, three hours. Requisites: Mathematics 115A, M150A-150B, 151. Inverse modeling problem — determination of model parameters consistent with experimental data, considering effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, principal axis transformation for rectangular matrices, Bachus/Gilbert resolving kernels, and Lagrange multipliers. Examples from a broad range of physical sciences.

**C206. Physical Geochemistry. (4)** Lecture, three hours. Requisite: course 51B. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C106. Additional independent research project and oral presentation required of graduate students. S/U or letter grading.

**C207. Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C107. Additional homework and class presentation required of graduate students. S/U or letter grading.

**208. Geothermics. (4)** Lecture, two and one-half hours; discussion, 30 minutes. Requisite: Mathematics 33A. Basic concepts of heat transfer applied to solutions of geological and geophysical problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions.

**C209. Isotope Geochemistry. (4)** Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical and biological sciences students. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C109. Additional literature survey, which may result in class presentation, expected of graduate students. S/U or letter grading.

**210. Geochemical Kinetics: Thermochronometry. (4)** Lecture, three hours; discussion, one hour. Designed for graduate physical and biological sciences students. Theoretical basis and application of thermochronometry: derivation of diffusion equation and methods of solution, relationship between heat and mass diffusion and their simultaneous solution, Boltzmann/Matano analysis, multicomponent diffusion, closure theory;  $^{40}\text{Ar}/^{39}\text{Ar}$  systematics and interpretive models, multidiffusion domain theory, petrological applications.

**M216. Evolutionary Biology. (4)** (Same as Organismic Biology M200A.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

**M217. Molecular Evolution. (4)** (Same as Organismic Biology M231.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of the genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

**CM218. Advanced Paleontology. (4)** (Same as Organismic Biology CM245.) Lecture, three hours. Requisite: course 116 or Organismic Biology 110 or 117. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM118. S/U or letter grading.

**219. Planetary and Orbital Dynamics. (4)** Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and chaos; spin-orbit and orbit-orbit coupling; planetary rings.

**220. Principles of Paleobiology. (4)** Lecture/discussion, three hours. Limited to graduate science students. Open to qualified undergraduate biological and physical sciences students with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit.

**221. Field Geology. (4)** Lecture, one hour; discussion, one hour; fieldwork, 10 days. Requisite: course 121B or 195G. Planning, execution, and presentation of geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit.

**222. Introduction to Seismology. (4)** Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis.

**M224A. Elastodynamics. (4)** (Same as Mechanical and Aerospace Engineering M257A.) Lecture, four hours. Requisites: Mechanical and Aerospace Engineering 256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes. Letter grading.

**225A. Physics and Chemistry of Planetary Interiors I. (4)** Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution.

**225B. Physics and Chemistry of Planetary Interiors II. (4)** Lateral inhomogeneities in Earth: seismic velocities, petrology, geothermal and gravitational variations; evidences of motion; remanent magnetism, seismic motions; postglacial rebound; plate tectonics; rheology of mantle; thermal convection.

**C226. Advanced Igneous Petrology. (4)** Lecture, three hours; laboratory, three hours; field trips. Requisite: course 103A. Designed for graduate students. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C126. Graduate students required to read more recommended references, make class presentations on particular topics resulting from that reading, and lead seminar-type discussions on their selected topics. S/U or letter grading.

**229. Planetary Atmospheres. (4)** Lecture, three hours. Requisite: course 200B. Planetary atmospheric structure, dynamics, and composition. Topics include spacecraft observations; origin and evolution of atmospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and inversion techniques.

**230. X-Ray Crystallography. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 51B. Point, translation, and space group symmetry, diffraction of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis.

**231. Crystal Chemistry and Structure of Minerals. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 51B. Bonding, interatomic configurations, polymorphic transformations, isotypism, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure.

**C232. Subsurface Fluid Flow and Geological Processes. (4)** Lecture, three hours; laboratory, one hour. Requisite: Mathematics 32A. Quantitative basis for studying fluid flows in geologic processes. Groundwater problems and pore-fluid pressure evolution. Concurrently scheduled with course C132. S/U or letter grading.

**233. Mineral Physics and Equations of State. (4)** Lecture, three hours. Interrelationship of physical properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state.

**234. Petrologic Phase Equilibria. (4)** Lecture, three hours; discussion, three hours. Requisites: course 51B, Chemistry 110B. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases). S/U or letter grading.

**235A-235B-235C. Current Research in Geochemistry. (1-1-1)** Limited to graduate Earth and space sciences students. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U grading.

**238. Metamorphic Petrology. (4)** Lecture, three hours; laboratory, six hours. Preparation: one introductory petrology and petrography course. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemographic relationships, use of piezobaric haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures.

**240. Space Plasma Physics. (4)** Lecture, three hours. Requisite: course 203 or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection; substorm processes; magnetic merging; field-aligned currents and magnetosphere/ionosphere coupling; ring current dynamics; and wave particle instabilities.

**241. Sedimentary Petrology. (4)** Lecture, two hours; laboratory, six hours. Requisites: courses 51B, 103B. Texture, composition, structure, and modes of origin of sedimentary rocks. Content varies from year to year.

**242. Sandstone Petrology. (4)** Lecture, two hours; laboratory, four hours. Requisite or corequisite: course 141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions.

**244. Tectonics of Sedimentary Basins. (4)** Lecture, two hours; discussion, two hours; field trips. Requisites: courses 103B, 119. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironments, sedimentology, and related subjects in context of plate-tectonic controls on basin evolution.

**245A-245B. Stress and Deformation. (4-4)** Lecture, three hours. Requisites: Mathematics 32A, 32B, Physics 1A or 2AH, 4AL. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws. S/U or letter grading.

**246. Stress in the Lithosphere. (4)** Lecture, three hours. Requisite: course 202 or 245A or Civil Engineering 108. Overcoring, hydrofracture, fault plane solutions, seismic stress drops; effects of erosion, cooling, Earth ellipticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determination.

**248. Advanced Structural Geology. (4)** Lecture, three hours; discussion, two hours. Requisite: course 111. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems.

**250. Mars. (4)** Lecture, three hours. Mars geology, geophysics, geochemistry. Cratering history, surface/atmosphere interaction, volatiles, polar caps, atmosphere, climate. S/U or letter grading.

**251. Seminar: Mineralogy. (4)** Seminar, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis.

**252. Seminar: Geochemistry. (4)** Seminar, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochronology, and cosmochronology.

**253. Seminar: Petrology. (4)** Seminar, three hours. Problems of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogical systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading.

**254. Seminar: Sedimentology. (4)** Seminar, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lutites; stratigraphy; paleoenvironmental studies.

**255. Seminar: Structural Geology and Tectonics. (4)** Seminar, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks.

**257. Seminar: Paleontology. (4)** Seminar/discussion, three hours. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines.

**259. Seminar: Paleotectonics. (4)** Seminar, two hours; discussion, two hours. Requisite: course 244. Basin evolution and paleogeography, with emphasis on the Phanerozoic of the Western U.S.

**C260. Field Seminar. (2 to 6)** Lecture, one to three hours; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum which varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. Concurrently scheduled with course C160. S/U or letter grading.

**261. Topics in Magnetospheric Plasma Physics. (4)** Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts.

**265. Instrumentation, Data Processing, and Data Analysis in Space Physics. (4)** Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra.

**M270A-M270B-M270C. Seminars: Climate Dynamics. (2 to 4 each)** (Same as Atmospheric Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

**277. Concepts and Tools for Variability in Natural Sciences. (4)** Lecture, three hours. Introduction to concepts and methods of nonlinearity, chaos theory, fractals, intermittency, self-organization, cooperativity, criticality, spatio-temporal chaos, turbulence, disorder, and fluctuations. Applications to tectonics, earthquakes, geomorphology, meteorology, evolution, biology. S/U or letter grading.

**282. Seminar: Geophysics. (4)** Seminar, two hours; discussion, two hours. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit.

**M285. Origin and Evolution of Solar System. (4)** (Same as Astronomy M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydro-magnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

**286A-286B-286C. Seminars: Planetology. (2-2-2)** Problems of current interest concerning moon, planets, and meteorites. May be repeated for credit. S/U grading.

**287A-287B-287C. Seminars: Seismology and Earth's Interior. (2-2-2)** Problems of current interest in seismology and Earth's interior. May be repeated for credit. S/U grading.

**M288A-M288B-M288C. Seminars: Space Physics. (2-2-2)** (Same as Atmospheric Sciences M275A-M275B-M275C.) Seminar, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

**289. Seminar: Fluid Dynamics. (2)** Seminar, one to two hours. Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

**290. Seminar: Time-Series Analysis. (2)** Discussion, three hours. Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. S/U grading.

**295A-295B-295C. Current Research in Earth and Space Sciences. (1-1-1)** Limited to graduate Earth and space sciences students. Seminars presented by outside speakers, staff, and/or graduate students describing current research. Written reports required. May be repeated for credit. S/U grading.

**296A-296Z. Research Topics in Earth and Space Sciences. (1 each)** Discussion, one to three hours. Designed for graduate Earth and space sciences students. Advanced study and analysis of current topics in Earth and space sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**296A.** Rock Deformation, Structural Geology, Tectonics.

**296B.** Volcanology and Geochemistry of Volcanic Rocks.

**296C.** Seismology and Solid Earth Physics.

**296D.** Thermal Evolution of Lithosphere.

**296E.** Sedimentation and Tectonics.

**296F.** Seismology.

**296G.** Planetary and Orbital Dynamics.

**296H.** Space Plasma Physics.

**296I.** Earthquakes.

- 296J.** Metamorphic Petrology.  
**296K.** Quantitative and Molecular Paleobiology.  
**296L.** Magnetic Phenomena.  
**296M.** Planetary Physics.  
**296N.** Martian Surface and Atmosphere.  
**296O.** Tectonics and Stratigraphy.  
**296P.** Chemical Geodynamics.  
**296Q.** Paleobiology.  
**296R.** Planetary and Space Physics.  
**296S.** Precambrian Paleobiology.  
**296T.** Geophysical Fluid Dynamics.  
**296U.** Geomorphology and Geological Physics.  
**296V.** Cosmochemistry.  
**296W.** Structural Geology, Tectonics.  
**296X.** Earthquakes and Earth Structure.  
**297. Advanced Techniques in Geological Research. (2 to 4)** S/U grading.  
**298. Advanced Topics in Earth and Space Sciences. (2 to 4)** Lecture, two to four hours. S/U or letter grading.  
**M370A. Integrated Science Instruction Methods. (4)** (Same as Chemistry M370A and Physics M370A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: one introductory lower division year (including laboratory) each of chemistry, life sciences, and physics and at least two Earth science courses, preferably one with field experience. Classroom management, lesson design, assessment, history of science education. S/U or letter grading.  
**M370B. Integrated Science Instruction Methods. (4)** (Same as Chemistry M370B and Physics M370B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisite: course M370A or Chemistry M370A or Physics M370A (or former course 370). Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.  
**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.  
**495. Teaching Earth and Space Sciences. (2)** Seminar, one hour; discussion, two hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. Special emphasis on integration of technology in classroom. S/U grading.  
**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.  
**596. Directed Individual Study and/or Research. (2 to 12)** May be repeated. S/U or letter grading.  
**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** S/U grading.  
**598. M.S. Research and Thesis Preparation. (2 to 12)** May be repeated. S/U grading.  
**599. Ph.D. Research and Dissertation Preparation. (2 to 12)** S/U grading.

## EAST ASIAN LANGUAGES AND CULTURES

*College of Letters and Science*

UCLA

Robert E. Buswell, Ph.D., *Chair*

### Professors

Noriko Akatsuka, Ph.D.  
Robert E. Buswell, Ph.D.  
Theodore D. Hutters, Ph.D.  
Shoichi Iwasaki, Ph.D.  
Peter H. Lee, Ph.D.  
Michele F. Marra, Ph.D.  
Herbert E. Plutschow, Ph.D.  
Gregory Schopen, Ph.D.  
Richard E. Strassberg, Ph.D.  
Pauline R. Yu, Ph.D.

### Professors Emeriti

Ben Befu, Ph.D.  
Robert C. Epp, Ph.D.  
Kan Lao, B.A.  
Richard C. Rudolph, Ph.D.  
Hartmut E.F. Scharfe, Ph.D.  
Shirleen S. Wong, Ph.D.

### Associate Professors

William M. Bodiford, Ph.D.  
Hung-hsiang Chou, Ph.D.  
John B. Duncan, Ph.D.  
Shu-mei Shih, Ph.D.  
Sung-Ock Sohn, Ph.D.  
Timothy R. Tangherlini, Ph.D.

### Assistant Professors

Michael K. Bourdaghs, Ph.D.  
Seiji M. Lippit, Ph.D.  
David C. Schaberg, Ph.D.  
Hongyin Tao, Ph.D.

### Lecturers S.O.E.

Y.C. Chu, M.A., *Emeritus*  
Kuo-yi Pao (Unenseßen), M.A., M.S., *Emeritus*

### Lecturers

Supa Angkurawaranon, Ph.D.  
Masako Douglas, Ph.D.  
Eun Hee Lee, Ph.D.  
Gyanam Mahajan, Ph.D.  
Tin Pham, M.A.  
Yihua Wang, M.A.

## Scope and Objectives

The Department of East Asian Languages and Cultures offers a wide range of courses in the languages, literatures, religions, and cultural heritage of China, Japan, and Korea, as well as India and Southeast Asia. The department offers training in many specialized fields such as archaeology, film, folklore, history, linguistics, literature, mythology, religious studies, and cultural studies. Courses prepare students for careers in business, government service, international relations, journalism, law, publishing, teaching, and academic professions.

Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. At all levels of study, various major fields are possible.

For undergraduates, the department offers majors that combine language study with courses taught in English that examine the rich cultural heritage of China, Japan, and Korea, as well as South and Southeast Asia. The majors also provide opportunity for education abroad in an East Asian country. The language courses aim to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner. The lecture and seminar courses aim to develop

critical thinking and writing skills through in-depth study of a culture within a broader historical and comparative context.

Undergraduate majors who wish to pursue graduate degrees are encouraged to apply for admission to the honors program.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or government service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

## Courses for Nonmajors

The department offers many courses in which knowledge of Asian languages is not required. A current list is available in the department office (290 Royce Hall) and at <http://www.humnet.ucla.edu/humnet/ealc/ealcmain.html>.

## Undergraduate Study

The department offers two majors in the study of East Asian cultures — B.A. in Asian Humanities and B.A. in Asian Religions — and three majors in East Asian literatures — B.A. in Chinese, B.A. in Japanese, and B.A. in Korean. All courses in the majors must be taken for a letter grade.

The department also offers two minors — Asian Humanities minor and East Asian Languages minor. All courses in the minors must be taken for a letter grade.

Students considering a major or minor in the department should consult the departmental undergraduate adviser as soon as possible in their University career, but in no case later than the point at which they are about to begin taking upper division courses. Students should select courses to fulfill major or minor requirements in consultation with the undergraduate adviser. The approved list of courses for each category of major or minor requirements is available in the department office (290 Royce Hall) and at <http://www.humnet.ucla.edu/humnet/ealc/ealcmain.html>.

At least 24 upper division units required for the majors must be completed successfully while in residence at UCLA.

## Placement in Language Courses

Students are not placed in Chinese, Japanese, and Korean language courses automatically according to their years of previous study. Students with any prior knowledge or study of an Asian language who wish to take courses in that language at UCLA are required to take the appropriate departmental language placement examination (see the *Schedule of Classes* for more information). The examination determines which course is most appropriate for the student's current level of proficiency. Students who have obtained college credit for Chinese, Japanese, or Korean may not repeat those courses for credit. Prospective majors

who place out of the upper division modern language requirement are expected to substitute an equivalent number of other units to be selected in consultation with the departmental undergraduate adviser.

### Language Acquisition Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Chinese, Japanese, and Korean conversation, grammar, and/or composition.

## Asian Humanities B.A.

### Preparation for the Major

*Required:* Chinese 6 or Japanese 6 or Korean 6 or equivalent; one civilization course (e.g., Chinese 50, Japanese 50, 60, Korean 50) or one introduction to religion course (e.g., East Asian Languages and Cultures 60, 60W, 61) within the department.

### Transfer Students

To be admitted as Asian Humanities majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Chinese, Japanese, or Korean and either one Chinese, Japanese, or Korean civilization course or one introduction to Buddhism course.

### The Major

*Required:* Five upper division language courses in Chinese or Japanese or Korean, and six additional upper division electives within the department, including at least one course each concerning China, Japan, and Korea.

## Asian Religions B.A.

### Preparation for the Major

*Required:* Chinese 6 or Japanese 6 or Korean 6 or equivalent; East Asian Languages and Cultures 60 or 60W or 61.

### Transfer Students

To be admitted as Asian Religions majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Chinese, Japanese, or Korean and one introduction to Buddhism course.

### The Major

*Required:* Five upper division language courses in Chinese or Japanese or Korean (of which at least one must be from Chinese 165, Japanese 165, Korean 165), five additional upper division Asian religions courses within the department, including at least one course each concerning religions in China, Japan, and Korea, and one elective within the department.

## Chinese B.A.

### Preparation for the Major

*Required:* Chinese 6 or equivalent, 50.

### Transfer Students

To be admitted as Chinese majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Chinese and one Chinese civilization course.

### The Major

*Required:* Five upper division Chinese language courses (of which at least two must be in the premodern language or texts), three upper division Chinese literature courses, two upper division electives in Chinese, and one upper division elective in East Asian languages and cultures or Japanese or Korean.

## Japanese B.A.

### Preparation for the Major

*Required:* Japanese 6 or equivalent, and 50 or 60.

### Transfer Students

To be admitted as Japanese majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Japanese and one Japanese civilization or images of Japan course.

### The Major

*Required:* Five upper division Japanese language courses (of which at least two must be in the premodern language or texts), three upper division Japanese literature courses, two upper division electives in Japanese, and one upper division elective in Chinese or East Asian languages and cultures or Korean.

## Korean B.A.

### Preparation for the Major

*Required:* Korean 6 or equivalent, 50.

### Transfer Students

To be admitted as Korean majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Korean and one Korean civilization course.

### The Major

*Required:* Five upper division Korean language courses, three upper division Korean literature courses, two upper division electives in Korean, and one upper division elective in Chinese or East Asian languages and cultures or Japanese.

## Study Abroad

Early acquisition of Asian language skills aids in the timely completion of major requirements and enriches appreciation of Asian cultures. Students are encouraged, therefore, to complete up to a year of language study in approved programs of study abroad.

## Honors Program

### Admission

The honors program is open to departmental majors with a 3.5 grade-point average in upper division courses in the major and a 3.0 overall GPA. Students should apply for admission by Winter Quarter of their junior year. For application forms and further information, contact the departmental undergraduate adviser.

### Requirements

Two honors projects, a seminar, and an honors thesis are required. The honors project consists of special research on a topic selected in consultation with the instructor, resulting in a written report to be completed in addition to the normal course requirements. All honors students are required to demonstrate the ability to conduct research by writing an honors thesis. In preparation for this project, students must take an undergraduate seminar (e.g., Chinese 197B, East Asian Languages and Cultures C197, 197B, Japanese 197A, C197B, Korean 197A, 197B, or an equivalent course) during which they write a seminar paper. After completing the seminar, they must also take East Asian Languages and Cultures 199H during which they revise their seminar paper into an honors thesis under the direction of a faculty member. Course 199H (4 units minimum) must be taken in addition to courses applied toward major requirements. Highest honors, honors, or no honors are awarded as determined by the faculty thesis director and the departmental honors committee.

To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses required for the major and an overall GPA of 3.0 or better, (3) complete an honors project in each of two upper division courses within the department, (4) complete an undergraduate seminar within the department, and (5) complete East Asian Languages and Cultures 199H.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.8 or better in upper division courses required for the major and an overall GPA of 3.5 or better, (3) complete an honors project in each of two upper division courses within the department, (4) complete an undergraduate seminar within the department, and (5) complete East Asian Languages and Cultures 199H with a grade of A.

## Asian Humanities Minor

The Asian Humanities minor is designed to recognize a serious commitment to the study of Asian cultures. Lower division survey courses in civilizations and religious traditions provide students with a solid foundation in the diverse cultural heritages of Asia. Students may fulfill upper division requirements from a

wide variety of courses in all aspects and historical periods of Asian humanities.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 45 units at UCLA, and file a petition with the departmental undergraduate adviser.

*Required Lower Division Courses (8 units):* Two civilization courses (e.g., Chinese 50, Japanese 50, 60, Korean 50) or two introduction to religion courses (e.g., East Asian Languages and Cultures 60, 60W, 61) within the department.

*Required Upper Division Courses (20 units):* Five courses in the department concerning Asian culture (e.g., film, folklore, history, linguistics, literature, mythology, religious studies).

No more than 4 units may be applied toward both the students' majors and this minor, and at least 20 units must be taken in residence at UCLA.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## East Asian Languages Minor

The East Asian Languages minor is designed to recognize a serious commitment to the study of East Asian languages. It is especially suited for students who wish to augment their major program in the College of Letters and Science with mastery of the Chinese, Japanese, or Korean language. The lower division survey course in civilization or religious tradition provides students with an essential introduction to the diverse cultural heritages of Asia. The upper division language courses provide students with advanced skills in speaking, aural comprehension, reading, and writing the Chinese, Japanese, or Korean language.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 45 units at UCLA, and file a petition with the departmental undergraduate adviser.

*Required Lower Division Courses (8 units):* Chinese 6 or Japanese 6 or Korean 6 or equivalent; one civilization course (e.g., Chinese 50, Japanese 50, 60, Korean 50) or one introduction to religion course (e.g., East Asian Languages and Cultures 60, 60W, 61) within the department.

*Required Upper Division Courses (20 units):* Three language courses in Chinese or Japanese or Korean and two electives within the department.

No more than 4 units may be applied toward both the students' majors and this minor, and at least 20 units must be taken in residence at UCLA.

All minor courses must be taken for a letter grade, with an overall grade-point average of

2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of East Asian Languages and Cultures offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in East Asian Languages and Cultures.

### Admission

Applicants to the M.A. program are expected to (1) meet general University requirements for the undergraduate major, (2) present a B.A. degree from a Department of East Asian Languages and Cultures similar to the department at UCLA, and (3) have taken a minimum of three quarter courses or the equivalent in classical Chinese for Chinese majors, classical Japanese for Japanese majors, or a minimum of three years of modern Korean for Korean majors. Applicants with a B.A. in another field or from a department whose requirements are less rigorous are admitted only if they meet the requisite standards within one year. Selection is based on (1) prior scholastic performance (at the junior, senior, and/or graduate levels), (2) recommendations by faculty, (3) scores on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) an undergraduate term paper or comparable writing sample in English. All materials must be complete before the application is considered. Students transferring from other departments must also fulfill the above requirements.

International applicants are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination. A test in translation from Chinese, Japanese, or Korean into English must be taken, either with the comprehensive examinations or earlier.

An M.A. degree in the field or in a related field is required for admission to the Ph.D. program. Selection among qualified applicants from outside the department is based on (1) prior scholastic performance, (2) three letters of recommendation, (3) scores on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) a recent research paper in English. Applicants with an M.A. in the department are judged on their M.A. record.

Students applying from foreign institutions are encouraged to complete an M.A. in the department before proceeding to the Ph.D. program.

## Master's Degree

The department recognizes three areas of specialization at the M.A. level: Chinese language and culture, Japanese language and culture, or Korean language and culture. A comparative or interdisciplinary field may be incorporated into an area of specialization.

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter is recommended for those continuing for the Ph.D. The comprehensive examination consists of the submission of three seminar research papers and a translation examination in the student's area of specialization. Nine courses are required for the degree, six of which must be graduate courses.

There is a language requirement for this degree.

## Doctoral Degree

The department emphasizes six major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature, (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature, (3) Korean language and literature with the subdisciplines of culture, Buddhism, classical poetry and fiction, and modern literature, (4) Buddhist studies with the subdisciplines of Chinese Buddhism, Japanese Buddhism, and Korean Buddhism, (5) Japanese linguistics, and (6) cultural and comparative studies, which is designed to allow students with a primary focus on China, Japan, or Korea to incorporate comparative, interdisciplinary, and/or historical interests. In addition, a program in ancient Chinese civilization may be arranged by petition.

Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five graduate courses beyond the M.A. degree is required for the Ph.D.

In addition, if the student's major field is Chinese, two years of modern Japanese must be taken, as well as a written examination that tests the ability to translate Japanese studies in the student's field of study. If the student's major field is Japanese, two years of modern Chinese, classical Chinese, or modern Korean must be taken, as well as a written examination that tests the ability to translate Chinese or Korean studies in the student's field of study. If the student's major field is Korean, two years of modern Chinese, classical Chinese, or modern Japanese must be taken, as well as a written examination that tests the ability to translate Chinese or Japanese studies in the student's field of study. Those majoring in Buddhist studies are encouraged to take San-

skrit and/or Pali and Parsi. Students in the comparative and cultural studies track must meet the language requirements for their primary area of interest, and must also take a required seminar in cultural and comparative studies.

Written and oral qualifying examinations are required. The written examinations differ by major field. Students are required to take an examination in translation in their area of specialization. Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which covers the dissertation proposal.

There is a language requirement for this degree.

## Chinese

### Lower Division Courses

**1. Elementary Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. P/NP or letter grading.

**1A. Elementary Modern Chinese for Advanced Beginners. (4)** Lecture, two hours; discussion, three hours. Recommended preparation: ability to speak and understand Mandarin or other Chinese dialects at elementary levels. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Training in all four basic language skills (speaking, listening, reading, and writing). P/NP or letter grading.

**2. Elementary Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 1 or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 1. P/NP or letter grading.

**2A. Elementary Modern Chinese for Advanced Beginners. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 1A or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 1A. P/NP or letter grading.

**3. Elementary Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 2 or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 2. P/NP or letter grading.

**3R. Reading and Writing of Elementary Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Recommended preparation: fluent speaking and listening skills in Mandarin Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Training in reading and writing skills at elementary level. P/NP or letter grading.

**4. Intermediate Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 3 or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters. P/NP or letter grading.

**4A. Intermediate Modern Chinese for Advanced Students. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 2A or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at intermediate levels. Training in all four basic language skills (speaking, listening, reading, and writing). P/NP or letter grading.

**5. Intermediate Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 4 or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 4. P/NP or letter grading.

**5A. Intermediate Modern Chinese for Advanced Students. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 4A or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 4A. Completion of course 5A is equivalent to completion of course 6. P/NP or letter grading.

**6. Intermediate Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 5 or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 5. P/NP or letter grading.

**6R. Reading and Writing of Intermediate Modern Chinese. (4)** Lecture, two hours; discussion, three hours. Recommended preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3R or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Modern Chinese for students who understand and speak Mandarin but cannot read and write at intermediate level. Students learn to read texts in traditional and simplified characters and write simple compositions. Readings provide insight into Chinese society. Completion of course 6R is equivalent to completion of course 6. P/NP or letter grading.

**8. Elementary Chinese: Intensive. (12)** Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

**10. Intermediate Modern Chinese: Intensive. (12)** Lecture, 10 hours; discussion, 10 hours. Enforced requisite: course 3 or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters. Completion of course 10 is equivalent to completion of course 6. Offered in summer only. Letter grading.

**50. Chinese Civilization. (4)** Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Survey of development of significant aspects of Chinese culture from prehistoric to modern times. P/NP or letter grading.

### Upper Division Courses

**100A-100B-100C. Advanced Modern Chinese. (4-4-4)** Lecture, two hours; discussion, two hours. Enforced requisite: course 6 or Chinese placement test. Course 100A or Chinese placement test is enforced requisite to 100B; course 100B or Chinese placement test is enforced requisite to 100C. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations. P/NP or letter grading.

**101A-101B. Advanced Readings in Modern Chinese. (4-4)** Lecture, two hours; discussion, two hours. Enforced requisite: course 100C or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Advanced readings and discussion for students planning to do advanced coursework or research on China. Topics from magazines, journals, and books related to humanities and social sciences. Each course may be taken independently for credit. Letter grading.

**102A. Business Chinese. (4)** Lecture, two hours; discussion, two hours. Enforced requisite: course 100C or Chinese placement test. Advanced course designed to develop speaking, listening, reading, and writing skills in modern Chinese in business-related contexts and to gain awareness of cultural concepts and values in Chinese business practice and behavior. P/NP or letter grading.

**110A-110B-110C. Introduction to Classical Chinese. (4-4-4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or Chinese placement test. Course 110A or Chinese placement test is enforced requisite to 110B; course 110B or Chinese placement test is enforced requisite to 110C. Grammar and readings in selected premodern texts. P/NP or letter grading.

**120. Introduction to Chinese Linguistics. (4)** Lecture, three hours. Enforced requisite: course 6 or Chinese placement test. Introduction to Chinese sound system, writing system and its reform, regional differences, major structural features, language in society and in cultural practices. Letter grading.

**130A-130B. Readings in Modern Chinese Literature. (4-4)** Readings/discussion, three hours. Enforced requisite: course 100B or Chinese placement test. Readings and discussion of works of modern Chinese literature. Each course may be taken independently for credit. Letter grading.

**140A-140B-140C. Readings in Classical Chinese Literature. (4-4-4)** Readings/discussion, three hours. Enforced requisite: course 110B or Chinese placement test. Readings and discussion of works of premodern Chinese literature. Each course may be taken independently for credit. Letter grading. **140A.** Poetry; **140B.** Prose; **140C.** Fiction.

**150A. Lyrical Traditions. (4)** Lecture, three hours. Knowledge of Chinese not required. Readings from poetic, critical, and essayistic writings of traditional China, with emphasis on development of subjectivity and modes of address. May be taken independently for credit. Letter grading.

**150B. Traditional Narrative and Drama. (4)** Lecture, three hours. Knowledge of Chinese not required. Readings from narrative and dramatic writings of traditional China, with emphasis on self and society, growth of fictionality, subjectivity, and gender representation. May be taken independently for credit. Letter grading.

**151. Chinese Literature in Translation: Modern Literature. (4)** Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Knowledge of Chinese not required. Lectures and reading of representative works from 1900 to the present in English translation. Letter grading.

**152. Topics in Contemporary Chinese Literature and Culture. (4)** Lecture, two hours; discussion, one hour. Knowledge of Chinese not required. Investigation of various topics in contemporary Chinese literature and culture, including politics and poetics of Chinese postmodernism, nativism, feminism, mass culture, and media. Letter grading.

**M153. Chinese Immigrant Literature and Film. (4)** (Same as Asian American Studies M132B and Comparative Literature M171.) Lecture, two hours; discussion, one hour. Knowledge of Chinese not required. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

**155. Topics in Chinese Cinema. (4)** Lecture, three hours; film viewing, four hours. Knowledge of Chinese not required. Critical understanding of films from Hong Kong, Taiwan, and China to be offered. Examination of questions of cultural identity, transnationalism, postmodernity, and intersections between politics and culture in this "Greater China" region. P/NP or letter grading.

**C160. Chinese Buddhism. (4)** (Formerly numbered 160.) Lecture, three hours. Knowledge of Chinese not required. Introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism. Concurrently scheduled with course C260. Letter grading.

**165. Introduction to Chinese Buddhist Texts. (4)** Lecture, three hours. Enforced prerequisite: course 100A or 110B or Japanese 110 or Korean 100A or Chinese placement test. Readings in premodern Buddhist texts written in literary Chinese and taken from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indo-European languages into Chinese; evolution of Chinese Buddhist terminology. Coverage varies. May be repeated for credit with consent of instructor. Letter grading.

**170. Readings in Chinese Philosophical Texts. (4)** Lecture, three hours. Enforced prerequisite: course 110B or Chinese placement test. Readings in premodern texts written in literary Chinese. Coverage varies. May be repeated for credit with consent of instructor. Letter grading.

**175. Introduction to Chinese Thought. (4)** Lecture, three hours. Knowledge of Chinese not required. General survey of indigenous Chinese thought from Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, legalists, influence of Buddhism, development of neo-Taoism and neo-Confucianism. Letter grading.

**180. Chinese Mythology. (4)** Lecture, three hours. Knowledge of Chinese not required. Survey of corpus of traditional Chinese mythology, with focus on examples preserved in a variety of early texts, later evolutions in dramatic and fictional works, and evidence from visual arts. Letter grading.

**190. Archaeology in China. (4)** Lecture, three hours. Knowledge of Chinese not required. Early Chinese study of their own past, types of artifacts, beginnings of scientific archaeology, and surveys of major excavations of sites of all periods. Letter grading.

**195. Chinese Etymology and Calligraphy. (4)** Lecture, three hours. Enforced prerequisite: course 110B or Chinese placement test. Coverage of (1) development of the Chinese writing system from the "Pottery Inscriptions" 6,000 years ago to modern "Simplified Forms" and the studies of Six Scripts principles which were used to form Chinese characters and (2) aesthetic training of calligraphic art and its appreciation, with focus on ways of recognizing and interpreting the "Cursive Style," a common form of handwriting. Letter grading.

**197B. Undergraduate Seminar: 20th-Century China and Taiwan. (4)** Seminar, three hours. Designed for juniors/seniors. Undergraduate seminar on related topics in modern and contemporary literature and culture from China and Taiwan. Letter grading.

## Graduate Courses

**200. Bibliography and Methods of Research in Chinese. (4)** Required of all graduate students in Chinese. Lectures and discussion on research methodologies for dealing with traditional Chinese materials, with emphasis on bibliography training (including most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions.

**M201. China — Seminar: Classical Historiography and Readings in Classical Studies. (4)** (Same as History M281.) Discussion, three hours. Preparation: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents. Letter grading.

**205. Methods and Issues in 20th-Century Chinese Literature and Culture. (4)** Seminar, three hours. Methodology course for all incoming graduate students in 20th-century Chinese literature and culture. Discussion of major theoretical and textual issues and methods.

**210. Modern Chinese Literary History. (4)** Lecture, three hours. Designed for graduate students. Discussion of history of modern Chinese literature, focusing on sources, controversies, major literary genres, and critical approaches to studying the relationship between literature and history.

**211A-211B. Seminars: Classical Chinese Poetry. (4-4)** (Formerly numbered 211.) Seminar, three hours. Preparation: reading knowledge of literary Chinese. Topics rotate among major textual traditions and chronological periods. Emphasis on philological, critical, and historical approaches. May be repeated for credit with consent of instructor. In Progress and letter grading.

**212. Topics in Chinese Poetry. (4)** Readings/discussion, three hours. Selected readings from classical poetic tradition, with focus on individual poets, themes, or other critical issues. May be repeated for credit with consent of instructor. Letter grading.

**220A-220B. Western Theory and Chinese Texts. (4-4)** Seminar, three hours. Discussions to be framed by Western literary and cultural theory, investigating both challenges and limitations Western theory may pose for Chinese literary and cultural studies. Specific topics vary from year to year. In Progress and S/U or letter grading.

**230A-230B. Seminars: Selected Topics in Modern Chinese Literature. (4-4)** Seminar, three hours. Selected readings in 20th-century Chinese literature, emphasizing fiction. Discussion of individual research projects. May be repeated for credit. In Progress grading.

**241A-241B. Heaven, Earth, and Monarchy in Ancient China. (4-4)** Seminar, three hours. Preparation: working knowledge of classical Chinese. Close reading of chapters from the Han dynasty collection of writings on the forms of music, social interaction, education, marriage, and mourning in the Zhou royal court, with discussion of topics in recent cultural semiology and anthropology. In Progress grading.

**242. Chinese Classics and Exegetical Traditions. (4)** Seminar, three hours. Preparation: command of literary Chinese. Reading and discussions of selections from one of the traditional Chinese classics (Confucian Five Classics, others), with introduction to exegetical history, secondary scholarship, and research methodology. Topics vary from year to year. May be repeated for credit.

**245A-245B. Seminars: Traditional Chinese Narrative and Drama. (4-4)** Seminar, three hours. Preparation: reading knowledge of colloquial and literary Chinese. Seminar topics alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from Chou through Ch'ing periods. Topics in drama selected from *tsa-ch'u* and *ch'uan-ch'i*. May be repeated for credit with consent of instructor. In Progress grading.

**250A-250B. Chinese Literary Criticism. (4-4)** Seminar, three hours. Issues in production and interpretation of literary works, as formulated by Chinese critics from classical age onward.

**C260. Chinese Buddhism. (4)** Lecture, three hours. Knowledge of Chinese not required. Introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism. Concurrently scheduled with course C160. Letter grading.

**265A-265B. Seminars: Chinese Buddhist Texts. (4-4)** Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

**290A-290B. Seminars: Selected Topics in Chinese Archaeology. (4-4)** Seminar, three hours. Requisite: course 190. Discussion and research on major problems about Chinese archaeology and different interpretations to the most important archaeological finds, with emphasis on studies of the Xia and Shang cultures and Xia and Shang dynasties. May be repeated for credit. In Progress grading.

**295A-295B. Seminars: Selected Topics in Chinese Cultural History. (4-4)** Seminar, three hours. Discussion and research on major problems related to Chinese culture, such as beginnings of the Chinese civilization and Chinese dynastic history. Other topics include cultural developments of ancient and medieval China. May be repeated for credit. In Progress grading.

## East Asian Languages and Cultures

### Lower Division Courses

**60. Introduction to Buddhism. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 60W. Knowledge of Asian languages not required. General survey of development of Buddhism in India, focusing on those religious doctrines and meditative practices most essential to various Asian traditions of the religion. Letter grading.

**60W. Introduction to Buddhism. (5)** Lecture, three hours; discussion, one hour. Enforced prerequisite: English Composition 3 or 3H. Not open for credit to students with credit for course 60. Knowledge of Asian languages not required. General survey of Buddhist worldview and lifestyle, with focus on those religious doctrines and meditative practices most essential to various Asian traditions of the religion. Particular attention to problems involved in study of religion. Satisfies Letters and Science Writing II requirement. Letter grading.

**61. Introduction to Zen Buddhism. (4)** Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. Introduction to Zen traditions and to interplay between Zen and other fundamental cultural and religious concerns in East Asia. Topics include role of Zen within Buddhist thought and practice, artistic and literary arts, society, and daily life. Letter grading.

## Upper Division Courses

**138. Travel Writing in East Asia. (4)** Lecture, three hours. Recommended preparation: Chinese 50 or Japanese 50 or 60. Exploration of travel writing about countries of East Asia, primarily China and Japan, with focus on English translations of works by native writers and by foreign visitors through the centuries. Letter grading.

**161. Buddhist Literature in Translation. (4)** Readings, three hours. Recommended preparation: prior course on Buddhism or traditional Asian religions. Knowledge of Asian languages not required. Readings from variety of Buddhist literature of Indic and non-Indic origin, with emphasis on key Buddhist themes and critical issues in cross-cultural interpretations of Asian religious texts. Letter grading.

**162. Buddhist Meditation Traditions. (4)** Lecture, three hours. Knowledge of Asian languages not required. Survey of theory and practice of meditation in Buddhism, with emphasis on Theravada and Zen schools. Topics include various typologies of meditation, symbiotic relationship between meditation and soteriology, and processes by which doctrinal innovation prompts changes in meditative praxis. Letter grading.

**163. Buddhism across Boundaries. (4)** Lecture, two hours; discussion, one hour. Recommended preparation: prior course on Buddhism or traditional Asian religions. Knowledge of Asian languages not required. Investigation of various themes in development of Buddhist traditions across historical periods as well as national and cultural boundaries, including issues of praxis, politics, and translation. Letter grading.

**C197. Life Writing in East Asia. (4)** Seminar, three hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C297. Letter grading.

**197B. Undergraduate Seminar: Buddhist Studies. (4)** Seminar, three hours. Limited to juniors/seniors. Selected topics in Buddhist studies. Letter grading.

**199. Special Studies in East Asian Languages and Cultures. (2 to 4)** Tutorial, to be arranged. Recommended preparation: advanced reading knowledge of Chinese or Japanese or Korean. Special individual studies. May be repeated once with consent of instructor. Letter grading.

**199H. Honors Tutorial. (4)** Tutorial, to be arranged. Preparation: one undergraduate departmental seminar. Tutorial in which students write honors theses under direction of faculty member. Letter grading.

## Graduate Courses

**201. Proseminar: Approaches to Buddhist Studies. (4)** Seminar, three hours. Designed for graduate students in Buddhist studies. Introduction to history of field, bibliography, relations with other disciplines, and current issues and research trends. S/U or letter grading.

**202. Proseminar: Functional Approaches to Japanese/Korean Linguistics. (4)** Seminar, four hours. Preparation: three years of Japanese or Korean, one year of any East Asian language, one functional linguistics course. Survey of recent empirical and theoretical research in syntax, semantics-pragmatics, theory of language change, and comparative sociolinguistics in Japanese/Korean. May be repeated for credit with consent of instructors. S/U or letter grading.

**210. Proseminar: Cultural and Comparative Studies. (4)** Seminar, three hours. Designed for graduate students. Introduction to theoretical topics relevant to comparative study of East Asian cultures in the modern period. Readings include Western theoretical works balanced with texts taking congruent approaches to East Asian topics. S/U or letter grading.

**220A-220B. Seminars: Topics in Cultural Studies. (4-4)** Seminar, three hours. Complements course 210. Further investigation of methodology and materials of cultural studies in connection with specific topics selected by instructors. May be repeated for credit. In Progress and letter grading.

**230A-230B. Seminars: Theoretical Topics in East Asian Literature. (4-4)** Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Concerns of literary theory which are brought to the fore by reading of literature from or about East Asia. Readings from both Western and Eastern theorists; issues of translation, comparison, and categorization. In Progress grading.

**240A-240B. Seminars: Topics in East Asian Literary History. (4-4)** Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Critical issues common to literary historiography in East Asia, including periodization, canon, ideology, interaction between high and low culture, the written and the oral, etc. In Progress grading.

**245A-245B. Seminars: Position of Modernity in East Asian Literature. (4-4)** Seminar, three hours. Preparation: at least five years of an East Asian language. Designed for graduate students. Course 245A concerned with conceptual architecture and archaeology of modernity, with readings largely from European sources. In-class debate probes relevance of these readings for work as Asianists. Focus on Asian writings in course 245B. In Progress grading.

**265A-265B. Seminars: Selected Topics in Buddhist Studies. (4-4)** Seminar, three hours. Coverage varies. May be repeated for credit. In Progress grading.

**C297. Life Writing in East Asia. (4)** Seminar, three hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C197. Additional readings and research required of graduate students. Letter grading.

**299. Independent Study. (2 to 6)** Designed for graduate students. Guided research and writing of a research paper. May be repeated, but only 4 units may be applied toward M.A. degree. May not be applied toward Ph.D. degree. S/U or letter grading.

**301. Teaching an East Asian Language as a Foreign Language. (4)** Lecture, four hours. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495C. Teaching Chinese at College Level. (2 to 4)** Seminar, two hours. Preparation: Chinese language proficiency at advanced level. Study in team-teaching, teaching methodology, developing course and testing materials, teaching of Mandarin pronunciation, grammar, and characters, integrating cultural aspects in Chinese teaching, and comparative analysis between Chinese and English. S/U grading.

**495J. Teaching Japanese at College Level. (2 to 4)** Seminar, to be arranged. Preparation: appointment as teaching assistant in Japanese. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

**495K. Teaching Korean at College Level. (2 to 4)** Seminar, to be arranged. Preparation: appointment as teaching assistant in Korean. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

**495S. Teaching South and Southeast Asian Languages. (4)** Seminar, three hours. Preparation: appointment as teaching assistant in South and Southeast Asian program. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

**496C. Computer Technologies for Teaching College-Level Chinese. (2)** Lecture, two hours. Intended for current or potential teaching assistants in Chinese. Introduction to tools and technology designed to enrich classroom learning, help effectively manage student records, and expose students to current computer software and web resources. May not be applied toward degree requirements. S/U grading.

**496J. Computer Technologies for Teaching College-Level Japanese. (2)** Lecture, two hours. Intended for current or potential teaching assistants in Japanese. Introduction to tools and technology designed to enrich classroom learning, help effectively manage student records, and expose students to current computer software and web resources. May not be applied toward degree requirements. S/U grading.

**496K. Computer Technologies for Teaching College-Level Korean. (2)** Lecture, two hours. Intended for current or potential teaching assistants in Korean. Introduction to tools and technology designed to enrich classroom learning, help effectively manage student records, and expose students to current computer software and web resources. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies. (2 to 4)** S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4 to 8)** S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4 to 8)** Maximum of 8 units may be applied toward M.A. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 8)** S/U grading.

## Indic

### Upper Division Courses

**110A. Elementary Sanskrit. (4)** Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to significance of Sanskrit for the understanding of other Indo-European languages.

**110B. Intermediate Sanskrit. (4)** Lecture, three hours. Prerequisite: course 110A. Advanced aspects of grammar and reading of literary texts.

**110C. Advanced Sanskrit. (4)** Lecture, three hours. Prerequisite: course 110B. Reading of entire *Bhagavadgita* or comparable amount of other Sanskrit literature.

**115. Readings in Sanskrit. (4)** Lecture, three hours. Prerequisite: course 110C. Extensive reading in such texts as best serve students' needs.

**175. Introduction to Indic Philosophy. (4)** Lecture, three hours. Survey of main trends in Indian philosophy from ancient to modern times.

### Graduate Courses

**M222A-M222B. Vedic. (4-4)** (Same as Iranian M222A-M222B.) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to course 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

**230. Selected Readings in Sanskrit Texts. (4)** Lecture, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

**234A-234B. Introduction to Panini's Grammar. (4-4)** Lecture, three hours. Prerequisite: course 110C. Reading of selected passages of the text, with introduction to Panini's technique. S/U or letter grading.

**236A-236B. Pali and Prakrits. (4-4)** Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to course 110B. Grammatical studies and reading of texts. Comparative considerations. S/U or letter grading. **236A.** Pali; **236B.** Prakrits.

## Japanese

### Lower Division Courses

**1. Elementary Modern Japanese. (4)** Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and written forms. Conversation drill based on material covered in class. P/NP or letter grading.

**2. Elementary Modern Japanese. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 1 or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Continuation of course 1. P/NP or letter grading.

**3. Elementary Modern Japanese. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 2 or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Continuation of course 2. P/NP or letter grading.

**4. Intermediate Modern Japanese. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 3 or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, vocabulary building skills, language learning skills, and sociocultural knowledge. P/NP or letter grading.

**5. Intermediate Modern Japanese. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 4 or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Continuation of course 4. P/NP or letter grading.

**6. Intermediate Modern Japanese. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 5 or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Continuation of course 5. P/NP or letter grading.

**8. Elementary Japanese: Intensive. (12)** Lecture, five hours; discussion, 15 hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Japanese, including pronunciation, grammar, and Japanese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

**10. Intermediate Modern Japanese: Intensive. (12)** Lecture, 10 hours; discussion, 10 hours. Enforced prerequisite: course 3 or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Readings in modern Japanese, with emphasis on comprehension and structural analysis. Offered in summer only. Letter grading.

**15. Intermediate Reading and Writing for Japanese-Heritage Speakers. (4)** Lecture, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Designed for intermediate-level Japanese-heritage learners or nonheritage learners who are fluent in daily spoken Japanese. Emphasis on building vocabulary knowledge of *Kanji*, reading and writing, and formal aspects of spoken Japanese (polite and honorific/humble forms). Completion of course 15 is equivalent to completion of course 6. P/NP or letter grading.

**M40. Language and Gender: Introduction to Gender and Stereotypes in English, Japanese, and Russian.** (5) (Same as Communication Studies M40 and Russian M40.) Lecture, three hours; discussion, one hour. Introduction to language from sociological perspective of gender. Use of research and examples in English, Japanese, and Russian to explore nature of male and female "genderlects" and gendered language, as reflected in lexicon, language behavior, phonetics and intonation, language acquisition. Letter grading.

**50. Japanese Civilization.** (4) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Survey of development of Japanese culture and its relationship to the Asiatic mainland. P/NP or letter grading.

**60. Images of Japan: Humanistic Tradition.** (4) Lecture, three hours. Knowledge of Japanese not required. Basic introduction to literary heritage of Japan and to its humanistic tradition through exposure to select literary works and to documentary and feature films based on Japan's literary classics. P/NP or letter grading.

**90. Japanese Aesthetics and Tea Ceremony.** (4) Lecture, three hours. Knowledge of Japanese not required. Introduction to Japanese aesthetics in theory and practice, including study of ritual and specific trends in Japanese aesthetics such as imperfection asymmetry, suggestion, miniaturization, indirectness, *wabi, sabi, hieikare, yugen*, as reflected and practiced in the tea ceremony. P/NP or letter grading.

## Upper Division Courses

**100A-100B-100C. Advanced Modern Japanese.** (4-4-4) Lecture, two hours; discussion, three hours. Enforced requisite: course 6 or Japanese placement test. Course 100A or Japanese placement test is enforced requisite to 100B; course 100B or Japanese placement test is enforced requisite to 100C. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Learning Japanese language with emphasis on sociocultural issues of contemporary Japanese society. Materials selected from contemporary publications, videos, and audiotapes. Reading with focus on linguistics features, writing summaries and opinions, oral activities, and project work. P/NP or letter grading.

**101A-101B. Advanced Readings in Modern Japanese.** (4-4) Lecture, two hours; discussion, 90 minutes. Enforced requisite: course 100C or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Advanced readings and discussion for students planning to do advanced coursework or research on Japan. Topics selected from magazines, journals, and books related to humanities and social sciences. Each course may be taken independently for credit. Letter grading.

**110. Introduction to Classical Japanese.** (4) Lecture, three hours. Enforced requisite: course 100C or Japanese placement test. Introduction to fundamentals of classical Japanese. Grammar and reading of selected premodern texts. Letter grading.

**C112. Japanese Urban History and Culture.** (4) Lecture, three hours. Knowledge of Japanese not required. Japanese urban history and culture, with special emphasis on cities of Nara, Kyoto, Edo/Tokyo, and Nagasaki. Concurrently scheduled with course C212. P/NP or letter grading.

**M120. Introduction to Japanese Linguistics.** (4) (Formerly numbered 120.) (Same as Linguistics M116.) Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or Japanese placement test. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and discourse pragmatics. Letter grading.

**CM122. Structure of Japanese I.** (4) (Same as Linguistics M176A.) Lecture, three hours. Recommended preparation: two years of Japanese. Requisite: course M120. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C222. Letter grading.

**CM123. Structure of Japanese II.** (4) (Same as Linguistics M176B.) Lecture, three hours. Recommended preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — grammatical constructions; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course C223. Letter grading.

**CM127. Contrastive Analysis of Japanese and Korean.** (4) (Same as Korean CM127 and Linguistics M178.) Lecture, three hours. Recommended preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM227. Letter grading.

**130A-130B-130C. Readings in Modern Japanese Literature.** (4-4-4) Readings/discussion, three hours. Enforced requisite: course 100C or Japanese placement test. Course 130A or Japanese placement test is enforced requisite to 130B; course 130B or Japanese placement test is enforced requisite to 130C. Readings and discussion of works by modern Japanese writers. Letter grading.

**140A-140B-140C. Readings in Classical Japanese Literature.** (4-4-4) Discussion, three hours; readings, nine hours. Enforced requisite: course 110 or Japanese placement test. Readings and discussion of works of premodern Japanese literature. Each course may be taken independently for credit. Letter grading. **140A.** Heian; **140B.** Medieval; **140C.** Edo.

**C149. Introduction to Kambun and Other Literary Styles.** (4) Lecture, three hours. Enforced requisite: course 110 or Japanese placement test. Introduction to Kambun, the Japanese literary rendering of premodern Sino-Japanese, and Sorobun, the epistolary style. Concurrently scheduled with course C249. Letter grading.

**150. Japanese Literature in Translation: Classical.** (4) Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Knowledge of Japanese not required. Survey of Japanese literature from the beginning to 1600, emphasizing Chinese, Buddhist, and Western influences. P/NP or letter grading.

**151. Japanese Literature in Translation: Modern.** (4) Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Knowledge of Japanese not required. Survey of Japanese literature from the 16th century to post-World War II. P/NP or letter grading.

**154. Postwar Japanese Culture through Literature.** (4) Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Knowledge of Japanese not required. Use of fiction and film to explore Japanese culture in postwar era in a broad cross-disciplinary and cross-cultural context. P/NP or letter grading.

**155. Topics in Japanese Cinema.** (4) Lecture, three hours; film viewing, four hours. Knowledge of Japanese not required. Critical and historical examination of Japanese cinema. P/NP or letter grading.

**M156. Literature and Technology.** (4) (Same as Comparative Literature M176.) Lecture, three hours. Knowledge of Japanese not required. Examination of representation of technology in 20th-century fiction. Discussion of impact of technology on shifting images of gender, subjectivity, and national identity. P/NP or letter grading.

**C160. Japanese Buddhism.** (4) Lecture, three hours. Knowledge of Japanese not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings. Concurrently scheduled with course C260. Letter grading.

**161. Religious Life in Modern Japan.** (4) Lecture, three hours. Knowledge of Japanese not required. Religious transformations accompanying rapid industrialization, urbanization, militarism, and defeat in the Pacific War, including analyses of Shinto mythology, secular positivism, Buddhist reform movements, new religions, and continuing role of traditional village/family religious rites. Letter grading.

**165. Introduction to Japanese Buddhist Texts.** (4) Lecture, three hours. Enforced requisite: course 110 or Chinese 165 or Japanese placement test. Readings in premodern Buddhist texts written by Japanese in Sino-Japanese or Kambun and mixed Japanese/Chinese literary styles concerning textual commentaries, doctrinal treatises, hagiographies, temple histories, etc. Coverage varies. May be repeated for credit with consent of instructor. Letter grading.

**C171. Topics in Japanese Studies.** (4) Lecture, three hours. Enforced requisite: course 100C or Japanese placement test. Advanced course that explores Japanese culture through in-depth reading of Japanese-language texts and/or visual documents. Topics include literature, religion, folklore, cultural history, language, and society. Concurrently scheduled with course C271. P/NP or letter grading.

**175. Introduction to Japanese Thought.** (4) Lecture, three hours. Knowledge of Japanese not required. General survey of Japanese thought from early to modern times, including analyses of Shinto mythology, forms of Confucianism, ethic of bushido, National Learning School, and modern Japanese philosophers such as Nishida Kitaro and Watsuji Tetsuro. Attention also to representative types of contemporary thinking about Japanese thought, especially the question of what might qualify as recognizably "Japanese" in aesthetics, ethics, and philosophy. Letter grading.

**C180. Readings in Japanese Literary Thought.** (4) Discussion, three hours. Enforced requisite: course 110 or Japanese placement test. Reading and translation of commentaries of *monogatari* and *waka* from Heian, Kamakura, Muromachi, and Edo periods. Introduction to Japanese hermeneutics. Concurrently scheduled with course C280. Letter grading.

**CM182. Japanese Folklore.** (4) (Formerly numbered M182.) (Same as Folklore CM182.) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM282. Letter grading.

**188. Personalities in Japanese Civilization.** (4) Seminar, three hours. Five weeks of introductory lectures and five weeks of student presentations based on instructor-guided student research. Letter grading.

**C195. Japanese Aesthetics and Hermeneutics.** (4) Lecture, three hours. Requisite: course 50 or 60 or 150 or 151. Knowledge of Japanese not required. Introduction to field of modern and premodern Japanese aesthetics, with focus on hermeneutics of literary arts. Analysis of metalanguage in formulation of aesthetic judgment. Concurrently scheduled with course C295. P/NP or letter grading.

**197A. Undergraduate Seminar: Classical Japan.** (4) Seminar, three hours. Selected topics in premodern Japanese literature and thought. Letter grading.

**C197B. Seminar: Modern Japan.** (4) Seminar, three hours. Selected topics on modern Japan. Concurrently scheduled with course C297B. Letter grading.

## Graduate Courses

**200. Bibliography and Methods of Research in Japanese.** (4) Lecture, three hours. Required of all graduate students in Japanese.

**201A-201B. Introduction to Reading Japanese Academic Texts.** (4-4) Lecture, three hours. Requisite: course 100A. Course 201A is requisite to 201B. Designed for graduate students. Introduction to modern Japanese-language academic texts, both prewar and postwar, with focus only on reading; students who need to improve other skills should take additional courses. S/ U or letter grading.

**210. Issues in Modern Japanese Literature.** (4) Lecture, three hours. Introduction to issues in the field of modern Japanese literature, with readings in primary and secondary sources. Topics vary.

**211. No and Kyogen.** (4) Lecture, three hours. Preparation: one year of classical Japanese. Readings of selected No and Kyogen texts from Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor.

**C212. Japanese Urban History and Culture. (4)** (Formerly numbered 212.) Lecture, three hours. Knowledge of Japanese not required. Japanese urban history and culture, with special emphasis on cities of Nara, Kyoto, Edo/Tokyo, and Nagasaki. Concurrently scheduled with course C112. S/U or letter grading.

**C222. Structure of Japanese I. (4)** Lecture, three hours. Recommended preparation: two years of Japanese. Requisite: course M120. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course CM122. Letter grading.

**C223. Structure of Japanese II. (4)** Lecture, three hours. Recommended preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — grammatical constructions; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course CM123. Letter grading.

**224A-224B. Seminars: Selected Topics in Japanese Discourse Linguistics. (4-4)** Seminar, three hours. Requisite: course CM122. Critical reading and discussion of selected topics in Japanese discourse linguistics. May be repeated for credit with consent of instructor. In Progress grading.

**225A-225B. Seminars: Linguistic Analysis of Japanese Narratives. (4-4)** Seminar, three hours. Requisite: course CM122. Analysis of selected modern and classical Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading.

**226. Survey of Functional Linguistics. (4)** Lecture, four hours. Survey of recent empirical and theoretical research in several areas of functional linguistics, which has served as backbone for development of Japanese discourse linguistics. May be repeated for credit with consent of instructor. S/U or letter grading.

**CM227. Contrastive Analysis of Japanese and Korean. (4)** (Same as Korean CM227.) Lecture, three hours. Recommended preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM127. Letter grading.

**228. Fundamentals in Discourse Data Analysis. (4)** Lecture, three hours. Designed to prepare students to conduct research in natural discourse data, both spoken and written, for linguistic analysis. Discussion of discourse taxonomy, data collection methodologies, data organization, analytical frameworks.

**235A-235B. Seminars: Selected Topics in Modern Japanese Fiction. (4-4)** Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

**240A-240B. Seminars: Selected Topics in Japanese Literature. (4-4)** Seminar, three hours. May be repeated for credit. In Progress grading.

**241A-241B. Seminars: Japanese Classics. (4-4)** Seminar, three hours. Prose and poetry from early times to 1868. May be repeated for credit with consent of instructor. In Progress grading.

**245A-245B. Seminars: Medieval Japanese Literature. (4-4)** Seminar, three hours. Preparation: one year of classical Japanese. Selected readings in travel poetry, travel diaries, and other genres of Japanese travel literature of Heian, Kamakura, Nambokucho, and Muromachi periods. May be repeated for credit with consent of instructor. In Progress grading.

**C249. Introduction to Kambun and Other Literary Styles. (4)** Lecture, three hours. Requisite: course 110 or Japanese placement test. Introduction to Kambun, the Japanese literary rendering of premodern Sino-Japanese, and Sorobun, the epistolary style. Concurrently scheduled with course C149. Letter grading.

**C260. Japanese Buddhism. (4)** Lecture, three hours. Knowledge of Japanese not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings. Concurrently scheduled with course C160. Letter grading.

**265A-265B. Seminars: Japanese Buddhist Texts. (4-4)** Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

**M270A-M270B. Seminars: Japanese Ritual Arts. (4-4)** (Same as Folklore M270A-M270B.) Seminar, three hours. Reading knowledge of Japanese not required. Discussions and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religious-magical purposes and symbolic structure of these arts. In Progress grading.

**C271. Topics in Japanese Studies. (4)** Lecture, three hours. Requisite: course 100C or Japanese placement test. Advanced course that explores Japanese culture through in-depth reading of Japanese-language texts and/or visual documents. Topics include literature, religion, folklore, cultural history, language, and society. Concurrently scheduled with course C171. S/U or letter grading.

**M276. Reading Modern Bodies. (4)** (Same as Comparative Literature M276.) Seminar, three hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from variety of locales, with particular emphasis on Japan. S/U or letter grading.

**C280. Readings in Japanese Literary Thought. (4)** Discussion, three hours. Requisite: course 110 or Japanese placement test. Reading and translation of commentaries of *monogatari* and *waka* from Heian, Kamakura, Muromachi, and Edo periods. Introduction to Japanese hermeneutics. Concurrently scheduled with course C180. Letter grading.

**CM282. Japanese Folklore. (4)** (Same as Folklore CM282.) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM182. Letter grading.

**290A-290B. Seminars: Japanese Philosophy of Art. (4-4)** Seminar, three hours. Preparation: reading knowledge of Japanese. Requisite: course 110. Reading and discussion of selected topics on philosophy of literary arts. May be repeated once with consent of instructor. In Progress grading.

**C295. Japanese Aesthetics and Hermeneutics. (4)** Lecture, three hours. Requisite: course 50 or 60 or 150 or 151. Knowledge of Japanese not required. Introduction to field of modern and premodern Japanese aesthetics, with focus on hermeneutics of literary arts. Analysis of metalanguage in formulation of aesthetic judgment. Concurrently scheduled with course C195. S/U or letter grading.

**C297B. Seminar: Modern Japan. (4)** Seminar, three hours. Selected topics in modern Japan. Graduate students to be assigned additional readings and write seminar papers based on research in their own disciplinary areas. Concurrently scheduled with course C197B. Letter grading.

## Korean

### Lower Division Courses

**1. Elementary Modern Korean. (4)** Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Introduction to standard spoken Korean and Korean writing, with emphasis on conversation. P/NP or letter grading.

**1A. Elementary Korean for Korean-Heritage Speakers. (4)** Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for Korean-heritage learners who have very limited knowledge in the Korean language or have had no formal instruction in the language. Emphasis on spelling, basic grammar, reading, writing, and daily conversation. P/NP or letter grading.

**2. Elementary Modern Korean. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 1 or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 1. P/NP or letter grading.

**2A. Elementary Korean for Korean-Heritage Speakers. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 1A or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for students who are from a Korean-speaking family background and have some limited knowledge of Korean. Emphasis on formal aspects of standard Korean (basic grammar, reading, daily conversation, polite forms, basic writing). P/NP or letter grading.

**3. Elementary Modern Korean. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 2 or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 2. P/NP or letter grading.

**3A. Elementary Korean for Korean-Heritage Speakers. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 2A or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 2A. P/NP or letter grading.

**4. Intermediate Modern Korean. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 3 or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 3. Conversation, composition, and readings with structural analysis in modern Korean. P/NP or letter grading.

**4A. Intermediate Korean for Korean Speakers. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 3A or Korean placement test. Not open to students who attended elementary school in Korea for more than one year or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for students who seek training in written components of standard Korean (spelling, reading, writing, and grammar) at intermediate level. Continuation of course 3A. P/NP or letter grading.

**5. Intermediate Modern Korean. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 4 or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 4. P/NP or letter grading.

**5A. Intermediate Korean for Korean Speakers. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 4A or Korean placement test. Not open to students who attended elementary school in Korea for more than one year or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.

**6. Intermediate Modern Korean. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 5 or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 5. P/NP or letter grading.

**6A. Intermediate Korean for Korean Speakers. (4)** Lecture, two hours; discussion, three hours. Enforced prerequisite: course 5A or Korean placement test. Not open to students who attended elementary school in Korea for more than one year or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). Continuation of course 5A. Completion of course 6A is equivalent to completion of course 6. P/NP or letter grading.

**8. Elementary Korean: Intensive. (12)** Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Korean, including pronunciation, grammar, and Korean characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

**10. Intermediate Modern Korean: Intensive. (12)** Lecture, 10 hours; discussion, 10 hours. Enforced requisite: course 3 or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Conversation, composition, and readings with structural analysis in modern Korean. Offered in summer only. Letter grading.

**50. Korean Civilization. (4)** Lecture, three hours; discussion, one hour. Knowledge of Korean not required. General survey of development of Korean culture within context of political, social, and economic history. P/NP or letter grading.

## Upper Division Courses

**100A-100B-100C. Advanced Modern Korean. (4-4-4)** Lecture, two hours; discussion, three hours. Enforced requisite: course 6 or Korean placement test. Course 100A or Korean placement test is enforced requisite to 100B; course 100B or Korean placement test is enforced requisite to 100C. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of courses 6/6A. Readings of modern prose and poetry, with emphasis on grammar and Sino-Korean. P/NP (undergraduates), S/U (graduates), or letter grading.

**101A-101B-101C. Advanced Readings in Modern Korean. (4-4-4)** Lecture, three hours. Enforced requisite: course 100C or Korean placement test. Course 101A or Korean placement test is enforced requisite to 101B; course 101B or Korean placement test is enforced requisite to 101C. Advanced readings and discussion for students planning to do advanced coursework or research on Korea. Topics selected from magazines, journals, and books related to humanities and social sciences. P/NP (undergraduates), S/U (graduates), or letter grading.

**102A-102B-102C. Advanced Korean Conversation. (4-4-4)** Lecture, three hours. Enforced requisite: course 100C or Korean placement test. Course 102A or Korean placement test is enforced requisite to 102B; course 102B or Korean placement test is enforced requisite to 102C. Not open to students who attended elementary school in Korea for more than two years or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Reading and discussion of modern Korean authors, designed to further improve spoken proficiency. P/NP or letter grading.

**C105A-C105B-C105C. Reading Korean Academic Texts. (4-4-4)** Lecture, three hours. Enforced requisite: course 101C or Korean placement test. Intended to improve reading skills for students who have studied Korean to an advanced level, with coverage in Korean of materials on Korean history, culture, and society. Each course may be taken independently for credit. Concurrently scheduled with courses C205A-C205B-C205C. P/NP or letter grading.

**CM120. Structure of Korean. (4)** (Same as Linguistics M177.) Lecture, three hours. Recommended preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course C220. Letter grading.

**CM127. Contrastive Analysis of Japanese and Korean. (4)** (Same as Japanese CM127 and Linguistics M178.) Lecture, three hours. Recommended preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM227. Letter grading.

**130A-130B. Readings in Modern Korean Literature. (4-4)** Readings/discussion, three hours. Enforced requisite: course 101A or Korean placement test. Readings and discussion of major modern Korean literary texts. Each course may be taken independently for credit. Letter grading.

**150. Korean Literature in Translation: Classical. (4)** Lecture, three hours. Requisite: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Knowledge of Korean not required. Survey of premodern Korean literature from the beginning to the 19th century. P/NP or letter grading.

**151. Korean Literature in Translation: Modern. (4)** Lecture, three hours. Requisite: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Knowledge of Korean not required. Survey of Korean literature of the 20th century. P/NP or letter grading.

**155. Topics in Korean Cinema. (4)** Lecture, three hours; film viewing, four hours. Knowledge of Korean not required. Historical and critical survey of Korean cinema, examining intersection between 20th-century Korean history, politics, and filmmaking. P/NP or letter grading.

**C160. Korean Buddhism. (4)** (Formerly numbered 160.) Lecture, three hours. Knowledge of Korean not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and Sinitic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and meditative techniques, and independent Son (Zen) schools of Korea. Concurrently scheduled with course C260. Letter grading.

**165. Introduction to Korean Buddhist Texts. (4)** Lecture, three hours. Enforced requisite: course 100A or Chinese 110C or Korean placement test. Introduction to reading premodern Korean Buddhist texts written in Sino-Korean and taken from indigenous doxographic materials and philosophical writings, Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor. Letter grading.

**172. Topics in Korean Christianity. (4)** Lecture, three hours. Knowledge of Korean not required. Historical development of Christianity in Korea, beliefs and practices, impact of Christianity on modern Korean culture and society. Coverage varies. May be repeated for credit with consent of instructor. Letter grading.

**175. Introduction to Traditional Korean Thought. (4)** Lecture, three hours; discussion, one hour. Knowledge of Korean not required. General survey of Korean thought from the earliest records to the 19th century, including shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and the West. P/NP or letter grading.

**176. Introduction to Korean Confucian Texts. (4)** Lecture, three hours. Enforced requisite: course 100C or Chinese 110C or Korean placement test. Reading in premodern Koryo and Choson texts on politics, society, and culture. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor. P/NP or letter grading.

**177. Introduction to Modern Korean Thought. (4)** Lecture, two hours; discussion, one hour. Requisite: course 50. Knowledge of Korean not required. Survey of Korean thought in the late 19th and 20th centuries, including religious thought, political thought, feminism, nationalism, and economic thinking and practice. P/NP or letter grading.

**178. Introduction to Modern Korean Historiography. (4)** Lecture, three hours. Enforced requisite: course 101A or C105A or Korean placement test. Introduction to major Korean language historiographical works on Korean history in modern period. Coverage varies. May be repeated with consent of instructor. P/NP or letter grading.

**180A-180B-180C. Cultural History of Korea. (4-4-4)** Lecture, three hours; discussion, one hour. Requisite: course 50. Knowledge of Korean not required. Examination of evolution of Korean culture and society within context of political and institutional industry. Consideration of both higher and popular culture. P/NP or letter grading. **180A.** Through 1259; **180B.** 1260 through 1876; **180C.** Since 1876.

**M183. Korean Folklore. (4)** (Same as Folklore M183.) Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture. P/NP or letter grading.

**187. Popular and Folk Religion in Korea. (4)** Lecture, three hours. Knowledge of Korean not required. Introduction to history, forms, and scholarship concerning folk religion in Korea. Exploration of forms of popular and folk religion in Korea, including shamanism, ancestor worship, and contemporary religions. Consideration of fortune-telling, geomancy, and spirit belief. P/NP (undergraduates), S/U (graduates), or letter grading.

**197A. Seminar: Traditional Korea. (4)** Seminar, three hours. Selected issues of interpretation in Korean history from earliest times through the mid-19th century. Coverage varies from term to term and includes such topics as state formation, international relations, or “sprouts of capitalism” thesis. Letter grading.

**197B. Seminar: Contemporary Korean Society and Culture. (4)** Seminar, three hours. Requisite: course 177 or 180C. Selected topics in modern Korean history. Letter grading.

## Graduate Courses

**200. Bibliography and Methods of Research in Korean. (4)** Lecture, three hours. Requisites: course 101C, Chinese 110C. Review of basic Western and modern Korean reference books, with concentration on Korean literature and language, and survey of basic bibliographical material. In addition, introduction to most important primary sources in student's field of specialization. Letter grading.

**C205A-C205B-C205C. Reading Korean Academic Texts. (4-4-4)** Lecture, three hours. Requisite: course 101C or Korean placement test. Intended to improve reading skills for students who have studied Korean to an advanced level, with coverage in Korean of materials on Korean history, culture, and society. Each course may be taken independently for credit. Concurrently scheduled with courses C105A-C105B-C105C. S/U or letter grading.

**210. Thought and Society in Korea. (4)** Readings/discussion, three hours. Preparation: reading knowledge of Korean. Designed for graduate students. Readings in Korean intellectual history and its social, political, and economic background from the rise of neo-Confucianism in the 14th century to the 20th century.

**211. Thought and Society in Modern Korea. (4)** Discussion, three hours. Preparation: reading knowledge of Korean. Designed for graduate students. Critical examination of list of books central to field of modern Korean history, including such topics as Korean capitalism and communism, intellectual history, social movements, and the Korean War.

**215. Korean Literary History. (4)** Seminar, three hours. Designed for graduate students. Critical history of development of traditional Korean literature, with emphasis on canon and ideology, literary systems, hierarchy of genres, rise of literary kinds and forms, periodization, and critical issues in literary history. One particular area of focus to be a nationalist canon that governs literary studies in Korea and the West. Letter grading.

**C220. Structure of Korean. (4)** Lecture, three hours. Recommended preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course CM120. Letter grading.

**224A-224B. Seminars: Selected Topics in Korean Linguistics. (4-4)** Seminar, three hours. Critical reading and discussion of selected topics in Korean functional linguistics (grammaticalization, discourse, pragmatics, sociolinguistics, syntax, morphology) and pedagogy. In Progress and letter grading.

**CM227. Contrastive Analysis of Japanese and Korean. (4)** (Same as Japanese CM227.) Lecture, three hours. Recommended preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM127. Letter grading.

**230A-230B. Seminars: Literary Translation from Korean. (4-4)** Seminar, three hours. Preparation: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. At end of term, students expected to produce publishable translations. May be repeated once with consent of instructor. In Progress grading.

**235A-235B. Seminars: Topics in Modern Korean Literature. (4-4)** Seminar, three hours. Preparation: at least five years of Korean. Recommended: reading knowledge of Chinese or Japanese. Limited to graduate students. Study of a selected period, movement, theme, or author of 20th-century Korean literature, with critical review of secondary works in Western and Korean languages. May be repeated for credit with consent of instructor. In Progress grading.

**240A-240B. Seminars: Classical Korean Fiction. (4-4)** Seminar, three hours. Preparation: reading knowledge of Korean. Formal and thematic study of tales of the marvelous, romance, satirical stories, diaries, and *p'an-sorifiction*. Status of fiction in society and culture, fiction as imaginative representation of the writer's relationship to real conditions of existence. Latest Western theory of narratology applied in analysis. In Progress grading.

**245A-245B. Seminars: Classical Korean Poetry. (4-4)** Seminar, three hours. Preparation: reading knowledge of Korean. Critical reading and analysis of classical Korean poetry, including discussion of literary and cultural contexts of poetic genres. Nature of codes, conventions that make meaning possible. Review of latest Korean scholarship. May be repeated once with consent of instructor. In Progress grading.

**C260. Korean Buddhism. (4)** Lecture, three hours. Knowledge of Korean not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and Sinitic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and meditative techniques, and independent Son (Zen) schools of Korea. Concurrently scheduled with course C160. Letter grading.

**265A-265B. Seminars: Korean Buddhist Texts. (4-4)** Seminar, three hours. Selected topics in Buddhist texts. Coverage varies. In Progress grading.

**295A-295B. Seminars: Topics in Traditional Korean Cultural History. (4-4)** Seminar, three hours. Preparation: reading knowledge of Korean or literary Chinese. Discussion and research on major topics in Korean cultural history, such as Confucianization of Korean society, Practical Learning movement of late Choson dynasty, or Korean reactions to the West in Eastern learning and enlightenment movements of the 19th century. May be repeated for credit. In Progress grading.

**296A-296B. Seminars: Topics in Modern Korean Cultural History. (4-4)** Seminar, three hours. Preparation: reading knowledge of Korean. Designed for graduate students. Graduate research seminar on selected topics in modern Korean history. In Progress and S/U or letter grading.

## South and Southeast Asian Languages and Cultures

### Lower Division Courses

**40A-40B-40C. Introductory Hindi. (5-5-5)** Lecture, two hours; discussion, three hours. Course 40A is enforced requisite to 40B, which is enforced requisite to 40C. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

**41A-41B-41C. Intermediate Hindi. (5-5-5)** Lecture, two hours; discussion, three hours. Enforced requisite: course 40C. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

**50A-50B-50C. Introductory Vietnamese. (5-5-5)** Lecture, two hours; discussion, three hours. Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension. Letter grading.

**51A-51B-51C. Intermediate Vietnamese. (5-5-5)** Lecture, two hours; discussion, three hours. Enforced requisite: course 50C. Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Reinforcement of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. Letter grading.

**60A-60B-60C. Introductory Thai. (5-5-5)** Lecture, two hours; discussion, three hours. Course 60A is enforced requisite to 60B, which is enforced requisite to 60C. Coverage of basic Thai grammar, with equal emphasis on reading, writing, conversation, and comprehension. Letter grading.

**61A-61B-61C. Intermediate Thai. (5-5-5)** Lecture, two hours; discussion, three hours. Enforced requisite: course 60C. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. Letter grading.

**70A-70B-70C. Introductory Tagalog. (5-5-5)** Lecture, two hours; discussion, three hours. Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. Coverage of basic Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension. Letter grading.

**71A-71B-71C. Intermediate Tagalog. (5-5-5)** Lecture, two hours; discussion, three hours. Enforced requisite: course 70C. Course 71A is enforced requisite to 71B, which is enforced requisite to 71C. Reinforcement of basic Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. Letter grading.

**80A-80B-80C. Introductory Indonesian. (5-5-5)** Lecture, two hours; discussion, three hours. Course 80A is enforced requisite to 80B, which is enforced requisite to 80C. Not open to students who have learned enough Indonesian to qualify for more advanced courses. Coverage of basic Indonesian grammar, with equal emphasis on reading, writing, listening, and speaking skills. P/NP or letter grading.

**81A-81B-81C. Intermediate Indonesian. (5-5-5)** Lecture, five hours. Enforced requisite: course 80C. Course 81A is enforced requisite to 81B, which is enforced requisite to 81C. Designed to expand language skills acquired in introductory courses and to equip students with good command of communicative competence in Indonesian. P/NP or letter grading.

**M90. Modern Literature in Southeast Asia. (4)** (Same as Comparative Literature M90.) Lecture, three hours. Knowledge of Southeast Asian languages not required. Exploration of diversity of Southeast Asia in such areas as traditional culture, modernization, politics, and literature through modern literary texts. P/NP or letter grading.

### Upper Division Courses

**M130. Topics in Southeast Asian Literature. (4)** (Same as Comparative Literature M175.) Lecture, three hours. Requisite: one course from Comparative Literature 1A, 1B, 1C, 1D, 2AW, 2BW, 2CW, or English Composition 3 or 3H. Knowledge of Southeast Asian languages not required. Advanced exploration of Southeast Asia through in-depth reading of texts from the region. Topics include censorship, politics, language, and literature. P/NP or letter grading.

**162A-162B-162C. Advanced Thai. (5-5-5)** (Formerly numbered 62A-62B-62C.) Lecture, two hours; discussion, three hours. Requisite: course 61C. Course 162A is requisite to 162B, which is requisite to 162C. Reinforcement of basic grammar and vocabulary acquired at beginning and intermediate levels. Coverage of more advanced topics on various aspects of Thai society. Broadening of skills in conversation and composition. Reading of selected texts and authentic materials. P/NP or letter grading.

**170A-170B-170C. Topics in Southeast Asian Studies. (4-4-4)** Lecture, three hours. Exploration of Southeast Asian culture through in-depth reading of texts and/or visual documents. Topics include literature, religion, folklore, cultural history, and society. P/NP or letter grading.

**182A-182B-182C. Advanced Indonesian. (5-5-5)** (Formerly numbered 82A-82B-82C.) Lecture, five hours. Requisite: course 81C. Course 182A is requisite to 182B, which is requisite to 182C. Preparation for more advanced study of specialized academic subjects, including but not limited to social sciences and humanities. Students read authentic materials in Indonesian concerning various issues. P/NP or letter grading.

**199. Special Studies in South and Southeast Asian Languages. (4)** Tutorial, to be arranged. Independent studies course for juniors/seniors and graduate students who desire more advanced or specialized treatment of one language offered in the program beyond introductory and intermediate courses currently offered. May be repeated for credit. See academic coordinator for course contract. P/NP or letter grading.

## Scope and Objectives

East Asia is one of the most important regions of the world today with its ancient cultures, growing economies, technological progress, and increasing role in global affairs. As the focus of attention continues to shift toward Asia and the Pacific, new career opportunities open up requiring familiarity with the region. The East Asian Studies major is an interdepartmental and interdisciplinary area studies program divided into three areas of concentration — China, Japan, and Korea. Combining both social sciences and humanities approaches with language study, it is a highly flexible major that enables students to construct programs suited to a broad range of individual needs and career interests.

In addition to selecting from the large number of courses offered at UCLA, students are encouraged to participate in the Education Abroad Program (EAP) or other study abroad

programs to enhance understanding of the region through direct contact with its peoples and cultures. East Asian Studies is also useful as a double major. When combined with other majors, it can add greater depth and provide a more intense focus, expanding students' range of expertise. It is suitable for those seeking further academic or professional training as well as for those who plan to enter the job market after graduation.

## Undergraduate Study

### East Asian Studies B.A.

Two years of language and a total of 13 upper division courses are required for graduation. Students must take a minimum of nine courses in the area of their choice. The remainder should be taken in another area of concentration within the major. No more than eight courses may be from a single department. Students should select the courses from the lists below. Courses on East Asia not listed below, offered only on a temporary basis, may also be applied toward the major. Courses marked with an asterisk are those on East Asia in general.

### China Concentration

#### Preparation for the Major

*Required:* Chinese 1, 2, 3, 4, 5, 6, History 11A or 11B, one lower division social sciences course in an area other than history.

#### Transfer Students

To be admitted as East Asian Studies (China) majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Chinese, one history of China course, and one lower division social sciences course in an area other than history.

#### The Major

*Required:* A minimum of nine courses selected from Art History C115B, C115D, C115E, C115F, Chinese 150A, 150B, 151, C160, 175, 190, and up to three upper division language courses or equivalent, East Asian Languages and Cultures 161, 162, Economics \*190, \*191, \*192, Ethnomusicology C156A, 156B, 157, 158A, 158B, 158C, Geography 186, History 182A, 182B, 183A, 183B, 184, Political Science 135, 159A, 159B, Sociology \*188, and a 199 special studies course in Chinese or in any social sciences or humanities department.

### Japan Concentration

#### Preparation for the Major

*Required:* History 9C, Japanese 1, 2, 3, 4, 5, 6, one lower division social sciences course in an area other than history.

#### Transfer Students

To be admitted as East Asian Studies (Japan) majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Japanese, one history of Japan course, and

one lower division social sciences course in an area other than history.

### The Major

*Required:* A minimum of nine courses selected from Anthropology 175S, Art History 114C, C115C, East Asian Languages and Cultures 161, 162, Economics \*190, \*191, \*192, Ethnomusicology 160A, 160B, History 185A, 185B, 186, 187A, 187B, 187C, Japanese 60, 150, 151, C160, 175, CM182, C195, and up to three upper division language courses or equivalent, Political Science 136, 160, Sociology \*188, 189, Theater 102A, and a 199 special studies course in Japanese or in any social sciences or humanities department.

### Korea Concentration

#### Preparation for the Major

*Required:* Korean 1, 2, 3, 4, 5, 6, 50, one lower division social sciences course.

#### Transfer Students

To be admitted as East Asian Studies (Korea) majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Korean, one Korean civilization course, and one lower division social sciences course.

### The Major

*Required:* A minimum of nine courses selected from Anthropology 175V, Art History 114E, East Asian Languages and Cultures 161, 162, Economics \*190, \*191, \*192, Korean 150, 151, C160, 175, 180A, 180B, 180C, and three upper division language courses or equivalent, Sociology \*188, Theater \*102E, and a 199 special studies course in Korean or in any social sciences or humanities department.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The East Asian Studies Program offers the Master of Arts (M.A.) degree in East Asian Studies.

## Admission

Applicants are expected to present a bachelor's degree from a recognized university and meet the standard University requirements for graduate admission. Applicants with East Asian field experience or a degree in another field are given special consideration. Selection criteria include (1) prior scholastic performance, (2) recommendations by professors

and other qualified referents, (3) scores on the Graduate Record Examination (GRE), and (4) a statement of purpose outlining the applicant's background, proposed program of study, and future career goals. UCLA graduate students who wish to transfer from other departments or who apply from the professional schools are judged on the same selection criteria.

International applicants whose first language is not English are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination. All materials must be complete before the application is considered.

Admission is normally limited to the Fall Quarter, and decisions are made by the admissions committee, composed of the program faculty and director. Deadlines for submission of the application are December 15 (to be considered for admission and financial assistance) and May 1 (to be considered for admission but not for financial assistance).

## Master's Degree

Students are expected to concentrate on one cultural area (China, Japan, or Korea), or to combine areas for a cross-cultural program.

The M.A. degree is offered through the comprehensive examination plan. A minimum of nine courses is required for the degree, at least five of which must be at the graduate level. Of the nine courses, at least five must be in the area of concentration, including one survey course; at least one course should be in a national culture other than the area of concentration.

There is a language requirement for this degree.

## Scope and Objectives

The economics undergraduate program is designed for students who wish to gain a thorough understanding of both empirical and theoretical approaches to economics. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in Economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phe-

nomena and provides an excellent theoretical background for those pursuing graduate education in economics, law, management, public administration, journalism, social welfare, architecture and urban planning, and education.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students' ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

## Undergraduate Study

### Economics B.A.

#### Preeconomics Major

While students are completing the lower division preparation courses for the major, they may be classified as Preeconomics majors and are eligible to apply for the major once they have completed the preparation courses and at least one 12-unit term in residence at UCLA. Application for the major should be filed at the undergraduate counselors office in 2263 Bunche Hall by the time students attain 135 quarter units.

#### Preparation for the Major

*Required:* Economics 1, 2, 11, M40 (or Statistics M11); English 4W or English Composition 100W or 129B; Mathematics 31A, and 31B or 31E. All courses must be taken for a letter grade. A 2.0 (C) grade is required in each pre-major course. To enter the major, students must have a minimum 2.5 grade-point average in the economics and mathematics preparation courses and a GPA of at least 2.0 in any upper division courses taken for the major before applying.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major.

#### Transfer Students

To be admitted as Economics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, one statistics course, and one English critical reading and writing course.

Transfer credit for any of the above is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

#### The Major

*Required:* Nine upper division courses in economics which must include Economics 101, 102, 103, and one course from at least three different fields in economics selected from the major fields list below. All courses must be taken for a letter grade. Economics 100, 110,

and 190 may not be included among the nine upper division courses. One or two of the nine courses may be selected from Management 120A, 120B, 130A, 130B, and/or 133.

To graduate, students must have at least a 2.0 grade-point average in their upper division major courses, with grades of C– or better in Economics 101, 102, and 103. All upper division major courses must be taken for a letter grade. Transfer credit is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

#### Major Fields

Economic theory (courses 101, 102, 104, 105AH, 105BH, 107, 188A through 188Z); economic development (courses 111, 112); regional economics (course 120); public finance (courses 130, 133, 134A, 134B, M135, M136); statistics, mathematical economics, and econometrics (courses 103, 141A, 141B, 141C, 142, 143, 144, 145, 146, 147A, 147B, 148); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 106, 170, 171, 172, 173, 174, 175, 176, 177); economic institutions (courses 180, 181A, 181B, 182, 183, 184); international economics (courses 191, 192).

### Economics B.A./Applied Economics M.S. Dual Program

An intercampus dual degree program has been established between UCLA and UC Santa Cruz which allows students to obtain a B.A. in Economics from UCLA and an M.S. in Applied Economics from UC Santa Cruz in five years. Consult the economics undergraduate counselor for additional information.

### Business Economics B.A.

The B.A. program offers a major for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. It is designed to prepare students for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see The Major).

#### Admission

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply, students must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major. In addition, they must (1) be enrolled in UCLA regular session at the time of application, (2) have a 2.0 (C) minimum grade

in each preparation course, (3) have a 3.0 (B) overall average in all preparation courses except English, and (4) have a 2.0 (C) grade-point average in their upper division courses taken for the major before applying (Economics 101 applies on the major preparation grade-point average).

Note: The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration. Students must petition to enter the major at the undergraduate counselors office in 2263 Bunche Hall.

### Prebusiness Economics Major

While students are completing the preparation courses for the major, they may be classified as Prebusiness Economics majors. (Transfer students who wish to enter UCLA as Prebusiness Economics majors must meet the admission screening requirements. For information, contact the Office of Undergraduate Admissions and Relations with Schools.)

#### Preparation for the Major

*Required:* Economics 1, 2, 11, M40 (or Statistics M11), 101; English 4W or English Composition 100W or 129B; Management 1A, 1B; Mathematics 31A, and 31B or 31E. All courses must be taken for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major.

#### Transfer Students

To be admitted as Business Economics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, one statistics course, one English critical reading and writing course, one elementary financial accounting course, and one elementary managerial accounting course.

Transfer credit for any of the above is subject to department approval.

#### The Major

*Required:* Economics 102, 103, and at least two courses from 104, 106, 173, 174, 177, 184; four other upper division courses in economics in at least two different fields (no more than two may be taken in the government and industry field); four upper division courses from Management 108, 120A, 120B, 122, 123, 124, 127A, 130A, 130B, 133, 140, 175. Transfer credit for any of the major courses is subject to department approval. Consult an undergraduate counselor before enrolling in any courses for the major.

To graduate, students must have at least a 2.0 grade-point average in their upper division major courses, with at least a C– in each course. (Economics 101 applies on the preparation for

the major, therefore requiring a minimum grade of C.) All upper division major courses must be taken for a letter grade.

## Economics/International Area Studies B.A.

The B.A. program is for students who wish to attain specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

### Admission

Qualified students must apply for the major through the undergraduate counselors office in 2263 Bunche Hall. To apply, students must have completed at least 72 quarter units (but no more than 135 units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major (except for the second year of foreign language). In addition, they must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 3.0 GPA in the economics and mathematics courses. Students must also have a 2.0 (C) grade-point average in their upper division courses taken for the major before applying. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 193. The program as a whole must be approved by an Economics Department counselor before students are admitted to the major.

### Preeconomics/International Area Studies Major

While students are completing the preparation courses for the major, they may be classified as Preeconomics/International Area Studies majors.

### Preparation for the Major

*Required:* Economics 1, 2, 11, M40 (or Statistics M11), 101, 102; Mathematics 31A, and 31B or 31E. Students also must complete at least the first year (or equivalent) of the two required years of a modern foreign language which is spoken in the geographical area of their major concentration.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major.

### Transfer Students

To be admitted as Economics/International Area Studies majors, transfer students with 90 or more units must complete the following in-

troductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, one statistics course, and two years of a modern foreign language related to the geographical concentration.

Transfer credit for any of the above is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

### The Major

*Required:* A total of 12 upper division courses selected from economics and the approved noneconomics courses listed below for the concentration. Eight economics courses are required, including Economics 103, 191, 192, 193, and five economics courses from at least two different fields (selected from the major fields listed under the Economics major). Economics 101 and 102 (which are required for the premajor) cannot be used to satisfy this requirement. The four remaining upper division courses are social sciences courses related to the concentration and must be chosen from the approved courses listed below. Students are required to include selections from at least two different departments. Economics 193 must be completed in the last year before graduation and includes the preparation of a research paper on the economy of the country or region of the concentration. In addition, students must show two-year proficiency (or equivalent) in a modern foreign language related to their concentration. The noneconomics courses, the research paper, and the language learned must show consistency of purpose.

One or two courses from Management 120A, 120B, 130A, 130B, and/or 133 may be substituted for one or two of the economics electives.

To graduate, students must achieve a minimum 2.0 grade-point average for both economics and noneconomics courses, with a grade of C- or better in each course. All major courses must be taken for a letter grade.

### Major Concentrations

When students declare the major, they must also select a concentration that includes a geographical area where the foreign language they have taken is spoken. They must complete four of the approved noneconomics courses listed, including courses from at least two different departments. Students may not use courses that are not on their concentration list unless they have petitioned and received approval in advance. Consult an undergraduate counselor in 2263 Bunche Hall about the petition process.

#### East Asia

Languages: Chinese, Japanese, Korean

Approved Noneconomics Courses: Anthropology 175S, 175T, Chinese 175, Geography 186, History 182A, 182B, 183A, 183B, 184, 185A, 187A, 187B, 187C, 190A, 190B, Japanese 175, Korean 175, 180A, 180B, 180C, Political

Science 135, 136, 159A, 159B, 160, Sociology M153, 188, 189

#### Europe

Languages: French, German, Italian, Portuguese, Spanish

Approved Noneconomics Courses: French 109, 130, 132, Geography 183, German 100A, 100B, 100C, History 117A, 124A, 124B, 125A, 125C through 125F, 126A through 126F, 128A, 128B, 128C, 129A, 129B, 129C, 130, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, 141C, 142A, 142B, Italian 102B, Political Science 127A, 152A, 152B, 152C, 153A, 153B, 155, 156B

#### Latin America

Languages: Portuguese, Spanish

Approved Noneconomics Courses: Geography 181, 182A, 182B, History 165A, 166, 167A through 167D, 168, 170A, 171, 172, 173, 174, Political Science 130, 131, 154A, 154B, Sociology 186

#### Middle East

Languages: Arabic, Hebrew, Persian, Turkish

Approved Noneconomics Courses: Geography 187, History 106C, 107B, 108A, 110B, 111B, Jewish Studies 142, Political Science 132A, 157, Sociology 187, Turkic Languages 180

#### Former Soviet Union

Languages: Armenian, Russian

Approved Noneconomics Courses: Geography 184, History 112A, 112B, 112C, 113, 124A, 124B, 131A through 131D, Political Science 128A, 128B, 156A, Turkic Languages 180

#### Individual Concentration

Language, geographical area, and noneconomics courses to be approved in advance by the economics/international area studies faculty adviser

## Mathematics/Economics B.S.

See the Mathematics/Economics listing for a description of the major.

## Honors Program

The departmental honors program is open to majors in Economics, Business Economics, and Economics/International Area Studies who have a cumulative grade-point average of at least 3.5 in the major and in all courses taken at UCLA prior to application.

To qualify for departmental honors at graduation, students must (1) select at least seven of the required upper division economics courses from the approved list designated for departmental honors, (2) complete a two-term senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 195H, and (4) complete the major requirements with at least a 3.5 grade-point average in the economics courses. Highest honors are awarded at the discretion of the departmental

honors committee based on grade-point average and quality of the senior thesis.

Economics 195H and 199, the courses required for thesis preparation, may be counted as upper division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). Further information and application forms are available from an undergraduate counselor in 2263 Bunche Hall.

## Computing Specialization

Majors in Economics, Business Economics, and Economics/International Area Studies may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, Mathematics 61, and two courses from Program in Computing 10C, 15, 30, 60, and (3) completing at least two courses from Economics 104, 143, 144, 145, 146, 147A, 147B, 199, with the additional provision that the courses taken must make substantial use of computers. A grade of C– or better is required in each course, with a combined grade-point average of at least 2.0. Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Economics offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Economics.

## Admission

The department only admits applicants whose objective is the Ph.D. Applicants who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that applicants have undergraduate training in economics, mathematics, and statistics. Applicants must also submit a full record of prior university experience, three letters of reference, and scores on the Graduate Record Examination (GRE) General Test. International applicants must also submit scores for the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

The department admits students only for the Fall Quarter of each academic year. The deadline for submitting the *UCLA Application for Graduate Admission* is December 15.

## Master's Degree

For major fields, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination plan. The degree requires nine courses in economics, seven of which must be graduate-level courses.

## Doctoral Degree

Major fields include economic theory; econometrics; information and uncertainty; mathematical economics; monetary theory; economic history; public finance; labor economics; industrial organization; international economics; and development economics.

In order that the program can be tailored to an individual student's background and interests, there are no formal course requirements in the Ph.D. program. In their first year however, students normally enroll in the standard first-year graduate core sequences in microeconomic theory, macroeconomic theory, and quantitative methods. Also, there are required departmental workshops and proseminars.

Written and oral qualifying examinations are required. Written qualifying examinations are offered in a number of specialty areas, with specific preparatory courses, as outlined in *Program Requirements*. Students must pass qualifying examinations in three doctoral elective fields (or two fields plus a breadth option consisting of three graduate-level courses for one of the elective fields).

A written paper requirement must be completed by the end of the student's third year. The materials of this paper may be used as the basis for presentation in a departmental workshop, as well as the basis for the dissertation. Students are required to present a paper in a departmental workshop before taking the University Oral Qualifying Examination, which focuses on, but is not limited to, the dissertation proposal.

## Economics

### Lower Division Courses

**1. Principles of Economics. (4)** Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through the price system.

**2. Principles of Economics. (4)** Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregative economics, including national income, monetary and fiscal policy, and international trade.

**5. Introductory Economics. (4)** Lecture, three hours. Not open to students with credit for course 1, 2, or 100. Principles of economics as tools of analysis. Presentation of a set of concepts with which to analyze a wide range of social problems that economic theory illuminates. May not be used to fulfill entrance requirements for any Economics Department major.

**11. Microeconomic Theory. (4)** Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, one course from Mathematics 31B, 31BH, 31E, 32A. Laws of demand, supply, returns, and costs; price and output determination in different market situations.

**M40. Introduction to Statistical Methods for Business and Economics. (5)** (Same as Statistics M11.) Lecture, three hours; discussion, one hour; laboratory, one hour. Not open to students with credit for Anthropology M80, Geography M40, Mathematics 170A, 170B, Organismic Biology M22, Sociology M18, Statistics 10, M12, M13, 100A, 100B, or 100C. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation. P/NP or letter grading.

**41. Theory and Practice of Econometrics. (4)** (Formerly numbered 103C.) Lecture, three hours; discussion, one hour. Requisite: course M40 or Statistics 10. Introduction to theory and practice of econometrics to provide sufficient knowledge of statistical and econometric theory to make one an effective consumer and producer of empirical research in economics. Emphasis on intuitive understanding rather than rigorous argument and on applications. P/NP or letter grading.

## Upper Division Courses

**100. Economic Principles and Problems. (4)** Lecture, three hours. Designed for juniors/seniors. Not open to students with credit for course 1, 2, or 5. Principles of economics with application to current economic problems. May not be used to fulfill entrance requirements for any Economics Department major.

**101. Microeconomic Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 11. Theory of factor pricing and income distribution; general equilibrium; implications of pricing process for optimum allocation of resources; interest and capital.

**102. Macroeconomic Theory. (4)** Lecture, three hours. Requisite: course 101. Theory of income, employment, and price level. Analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy.

**103. Introduction to Econometrics. (5)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 11. Introduction to theory and practice of econometrics, with goal to make students effective consumers and producers of empirical research in economics. Emphasis on intuitive understanding rather than on rigorous arguments; concepts illustrated with applications in economics. P/NP or letter grading.

**104. Managerial Economics. (4)** Lecture, three hours; discussion, one hour. Requisite: course 11. Enrollment priority to Business Economics majors. Application of economic principles to business decisions. Allocating joint costs. Implicit costs of capacity constraints. Problems in capital budgeting, financing, and pricing. Role of interest rates in business decisions. P/NP or letter grading.

**105AH. Topics in Microeconomics (Honors). (4)** Lecture, three hours. Requisite: course 101. Designed for departmental honors program students. Introduction to Walrasian and Nash equilibrium. Modeling of selected applied topics such as peak load pricing, pricing of externalities, strategic pricing.

**105BH. Topics in Macroeconomics (Honors). (4)** Lecture, three hours. Requisite: course 101. Designed for departmental honors program students. Imperfect information-based models of monetary business cycles: theory and evidence. Real business cycle models: role of shocks and interindustrial technology structure in explaining fluctuations. Policy analysis and policy intervention in a world with rational maximizing agents: recent perspectives.

**106. Special Topics in Business Economics. (4)** Lecture, three hours. Requisite: course 101. Enrollment priority to business economics students. Application of economic analysis to contemporary business. Course may be organized around individual industries or topics of current relevance to business. Alternatively, course may examine problems in major fields of economics (e.g., international, macroeconomics, finance) and their implications for business. May be repeated for credit with topic change.

**107. History of Economic Theory. (4)** Lecture, three hours. Requisite: course 1 or 100. Survey of economic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, marginalists, and Marshall.

**110. Economic Problems of Underdeveloped Countries. (4)** Lecture, three hours. Requisite: course 1 or 100. Limited to non-Economics Department majors. Not open for credit to students with credit for course 111 or 112. Survey of major issues of development economics. Economic structure of low-income countries and primary causes for their limited economic growth. Economic goals and policy alternatives open to their leaders. Possible roles of developed countries. May not be applied toward any Economics Department major.

**111. Theories of Economic Growth and Development. (4)** Lecture, three hours. Requisite: course 11. Growth models, theory of production under constraints, relative factor prices and their impact on choice of technology, investment criteria, role of the market, economic planning in less developed areas.

**112. Policies for Economic Development. (4)** Lecture, three hours. Requisite: course 102 or 111. Suggested strategies for economic development: inflation, balanced growth, industry vs. agriculture, import substitution, export-oriented expansion, foreign aid, and others. Selected case studies.

**120. Introduction to Urban and Regional Economics. (4)** Lecture, three hours. Requisite: course 11. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local public sector.

**130. Public Finance. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101. Role of government in a market economy. Alternative justifications for government intervention. Principles and effects of spending programs (especially social insurance and health), taxation, deficit financing, and federal credit programs. Taxation in an open economy. Properties of public choice mechanisms. P/NP or letter grading.

**133. State and Local Finance. (4)** Lecture, three hours. Requisites: courses 101, 130. Division of functions and revenues between state and local governments; revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems.

**134A. Environmental Economics. (4)** (Formerly numbered 134.) Lecture, three hours; discussion/quiz, one hour. Requisites: courses 11, 101. Application of economic theory to natural and environmental resources problems. Topics include sustainability and natural resource scarcity, steady-state models for renewable resources (land and water, fisheries, forests), externalities and pollution (including use of incentives for pollution control), and nonrenewable resources (minerals). P/NP or letter grading.

**134B. Economics of Environmental Regulation. (4)** Lecture, three hours; discussion, one hour. Requisite: course 134A. Social choice theory, efficiency and markets, public goods and externalities, property rights, Pigovian fees, marketable permits, legal solutions, risk and uncertainty, international and interregional competition, economy-wide effects of environmental regulations, and formal environmental demand theory. P/NP or letter grading.

**M135. Economic Models of Public Choice. (4)** (Same as Political Science M105.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: any lower division political science course. Enforced requisite: course 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

**M136. Economic Models of Political Conflict and Conflict Resolution. (4)** (Same as Political Science M106.) Seminar, three hours; discussion, one hour. Enforced requisite: course 11. Prior political science course desirable but not essential. Designed for juniors/seniors. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of onset and termination of conflict. Conduct of war: strategy and tactics. P/NP or letter grading.

“Early on I was struck by the enormity of the problem of managing environmental scarcity in sensible, yet equitable ways,” confides Trudy Ann Cameron, professor of economics. But when the native of rural British Columbia moved to Los Angeles in the early 1980s, she really confronted the scarcity of environmental amenities. “Where I grew up, rivers had riverbanks. Here, they have walls and floors.”

That sensitivity has fueled a remarkable career teaching students about economic issues as they relate to the environment and to different types of allocation problems. “I strive for tangible examples that are relevant to my students,” she says, adding, “I believe they need to see the power of statistical techniques to support high-stakes arguments.”

For Cameron, the emphasis is on doing. “When I teach introductory regression analysis,” she states, “I eschew the mathematical underpinnings of the subject as much as possible, focusing on the three-dimensional geometrical intuition. I build data sets that are

contrived to clearly illustrate a point, then move to real data where the source of the problem may be confounded by other issues.”

As part of her teaching technique, Cameron likes to tell a story and then weave in why it is important to a specific economic issue. The impact can have a far-reaching impact on the lives and careers of her students. As she sees it, “the need to make sensible decisions regarding the allocation of scarce resources—of any kind—among competing end uses is almost universal.”

While she recognizes that few of her undergraduate students will go on to Ph.D. programs in economics, Cameron maintains that economics offers at least a dozen key insights that can fundamentally change the way that anybody thinks about choices. Whether students go on to pursue an M.B.A. or elect to study law, “a carefully selected curriculum in economics can prepare a student for a very wide range of careers.”

**Trudy Ann Cameron,**  
Economics Department

---

*The need to make sensible decisions regarding the allocation of scarce resources—of any kind—among competing end uses is almost universal. A carefully selected curriculum in economics can prepare a student for a very wide range of careers*

---

**141A. Mathematical Finance A. (4)** Lecture, three hours; computer laboratory, one hour. Requisites: course 11, Mathematics 33A, Statistics 110A. Economics of financial markets, competitive equilibrium with time and uncertainty, one period security market model, market completeness. P/NP or letter grading.

**141B. Mathematical Finance B. (4)** Lecture, three hours; computer laboratory, one hour. Requisite: course 141A. Capital asset pricing model, multiperiod discrete-time security market model, efficient markets, dynamic spanning and market completeness, mathematical models of options, futures, and derivatives. P/NP or letter grading.

**141C. Mathematical Finance C. (4)** Lecture, three hours; computer laboratory, one hour. Requisite: course 141B. Models of term structure of interest rates, interest rate derivatives, optimal consumption and investment. Equity premium puzzle, bubbles. P/NP or letter grading.

**142. Probabilistic Microeconomics. (4)** Lecture, three hours. Requisites: courses 11, 101. Combination of basic probability introduced in course M40 with microeconomic models presented in courses 11 and 101 in order to explain phenomena such as insurance, job search, and stock market behavior. Optimal production and consumption under uncertainty. Review of probability and introduction to alternative measures of risk and risk aversion.

**143. Applied Regression Analysis. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 103. Not open to students with credit for course 147A or 147B. Estimation and inference in multiple regression model; violations of assumptions of classical model (heteroskedasticity, unobserved heterogeneity, measurement error); introduction to limited dependent variable and time-series models. Emphasis on applications of regression analysis and interpretation. P/NP or letter grading.

**144. Introduction to Mathematical Methods in Economics. (4)** Lecture, three hours. Requisite: course 101. Introduction to use of mathematics in economic analysis. Topics include partial differentiation, optimization, integration, and differential and difference equations, with applications to theory of the household and the firm, capital theory, and economic dynamics.

**145. Topics in Mathematical Economics. (4)** Lecture, three hours. Requisites: courses 101, 144. Possible topics include game theory; competitive equilibrium analysis; examination of market failure and role for market intervention.

**146. Linear Models in Economics. (4)** Lecture, three hours. Preparation: one linear or matrix algebra course. Not open for credit to students with credit for Mathematics 164 or Electrical Engineering 136. Possible topics include duality theory of linear programming and simplex algorithm, input/output analysis, and two-person zero-sum games.

**147A. Introduction to Econometric Theory. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: course 103, Mathematics 115A. Introduction to econometric theory using linear algebra; estimation and inference in classical regression, generalized classical regression model; introduction to time series and simultaneous equations models. Emphasis on theoretical analysis and computer programming skills. P/ NP or letter grading.

**147B. Applications of Econometrics. (4)** Lecture, three hours. Requisite: course 147A. Econometric models and data; forecasting, policy analysis, estimation of simultaneous equations models, applications of econometrics. Major original econometric paper required.

**148. Introductory System Theory. (4)** Lecture, three hours. Requisites: Mathematics 33A, 33B. Introduction to modeling and analysis of dynamic systems, with emphasis on examples from social and life sciences. Linearity, impulse responses, stability, state variables, algorithms for filtering and control.

**150. Wage Theory. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 11, 101. Supply and demand for labor. Analysis of government, union, and other constraints on competitive system of wage determination. Wage level and structure. Wages and human capital theory. P/NP or letter grading.

**151. Labor, Wages, and Income. (4)** Lecture, three hours. Requisites: courses 101, 150. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

**152. Trade Unions and Professional Associations. (4)** Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations.

**M158. International Political Economy of Work and Gender. (4)** (Same as Women's Studies M123.) Lecture, three hours. Requisite: course 1 or 5 or 100. Analysis of women's economic status in world economy by taking account of interdependencies between household and market activities and between economic systems and legal and political institutions. Introduction of alternative theoretical approaches in social sciences; presentation of empirical evidence. Letter grading.

**160. Money and Banking. (4)** Lecture, three hours. Requisite: course 102. Principles of money and banking in the U.S.; legal and institutional framework; money supply process; instruments, effects, and practice of monetary policy.

**161. Monetary Theory. (4)** Lecture, three hours. Requisites: courses 101, 160. Nature of money and monetary exchange; level and term structure of interest rates; level and growth rate of money; transmission of monetary shocks; theory and practice of monetary policy.

**170. Monopoly and Competition. (4)** Lecture, three hours. Requisite: course 11. Comparison of economic and legal treatments of the competitive process. Monopoly competition, and collusion as economic theory, as antitrust doctrine, and as fact. Source of monopoly. Predatory behavior. Misleading practices in theory and policy. General problem of relationship between private rights of action and competitive entry.

**171. Industrial Organization: Theory and Tactics. (4)** Lecture, three hours. Requisite: course 11. Study of pricing and output decisions of firms under conditions of less than perfect competition or monopoly; theories of oligopoly and monopolistic competition; information costs and advertising; examination of pricing practices such as price discrimination, tie-in selling, predatory pricing, and resale price maintenance.

**172. Economic Analysis of Laws and Legal Institutions. (4)** Lecture, three hours. Requisite: course 11. Application of economic theory to legal rule formulation: study of economic nature and consequences of alternative legal arrangements, with special reference to property rights. Application of economic theory to analysis of effects of laws relative to property contracts, torts, crimes, taxation, and constitutional issues. Analysis of legal process.

**173. Centralized Markets. (4)** Lecture, three hours. Requisite: course 11. Enrollment priority to Business Economics majors. Organization and function of stock, bond, commodity, and foreign exchange markets. Theory and evidence related to efficiency of these markets in evaluating information, to their role in facilitating risk-bearing and capital allocation. Interrelationship between business finance and organized capital markets.

**174. Organization of the Firm. (4)** Lecture, three hours. Requisite: course 11. Enrollment priority to Business Economics majors. Role of the firm in traditional economic theory and modern developments in the theory of the firm. Functions of ownership and management in face of risk and opportunism. Internal organization of the firm. Problem of separation of ownership from control in the modern corporation. Determinants of firm size, vertical integration, and degree of specialization of activities of firms. Decision making within the firm in a democratic setting.

**175. Economics of Transportation. (4)** Lecture, three hours. Requisite: course 11. Economic characteristics of transport; functions of the different agencies; pricing and resource allocation in transport; public regulation of transport; urban transport; modern transport problem.

**176. Business and Government. (4)** Lecture, three hours. Requisite: course 101. Several aspects of interaction between business and government, including regulation of prices, entry, working conditions, natural resource use, policies of taxation, and subsidy of business.

**177. Contractual Arrangements in Business. (4)** Lecture, three hours. Requisite: course 101. Enrollment priority to Business Economics majors. Economic and legal determinants of contractual arrangements adopted by business. Franchise contracts, rights-of-first refusal, and tie-in contracts. Legal constraints and efficiency of different contractual arrangements.

**180. Comparative Systems: Transformation of Socialist Economies. (4)** Lecture, three hours. Requisite: course 101. Comparative analysis of capitalist and socialist economies. Models of transition from centrally planned to free market economies. Analysis and critique of actual implementation. Future prospects.

**181A. Development of Economic Institutions in Western Europe. (4)** Lecture, three hours. Requisite: course 11. European economic history, 900 to 1700. Custom, command, and market modes of organization. Evolution of property rights, contract forms, and monetary arrangements. Decline of feudal institutions, especially serfdom. Open field village and enclosures. Crafts manufacturing and guild organization. Development of banking. Public finances and role of government.

**181B. Development of Economic Institutions in Western Europe. (4)** Lecture, three hours. Requisite: course 11. European economic history, 1700 to 1914. Industrial revolution in Britain and its spread to the continent. Rise of factories, industrial firms, and unions. Changes in standard of living and demographic consequences. Imperial expansion and decline of Britain. Worldwide diffusion of economic growth and the Gerschenkron hypothesis.

**182. Centralized Economics Systems. (4)** Lecture, three hours. Requisite: course 101. Introduction to theory of centralized systems and examination of some centralized economies. Considerable attention to economy of the U.S.S.R.; some attention to other economies selected in light of the centralized model and with view to the march of current events.

**183. Development of Economic Institutions in the U.S. (4)** Lecture, three hours. Requisite: course 11. Study of changing economic conditions in the U.S. from Colonial times to the early 20th century and effects of these changes on American society. Letter grading.

**184. History of Enterprise and Entrepreneurship in the American Economy. (4)** Lecture, three hours. Enrollment priority to Business Economics majors. Study of role of innovation in history of American enterprise. Examination of specific episodes of salient entrepreneurial innovation, as well as general theoretical and empirical treatments.

**M188A. Political and Economic Issues in Proliferation of Nuclear Weapons. (4)** (Formerly numbered M103A.) (Same as Political Science M139A.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Interdisciplinary approach to problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues. Letter grading.

**188B. Economics of Energy. (4)** (Formerly numbered 103B.) Seminar, three hours. Requisite: course 102. Topics include pricing and taxation of exhaustible resources, interactions between energy and the economy, institutions such as OPEC and oil price controls, oil debt and balance of payments, energy conservation, and future technologies. Letter grading.

**188C-188Z. Upper Division Research Seminars: Applications of Economic Theory. (4 each)** (Formerly numbered 188A-188Z.) Seminar, three hours. Requisite: course 11. Limited enrollment seminars in which students usually write a research paper on a topic selected in consultation with instructor. P/NP or letter grading.

**M188M. Marketing, Advertising, and Human Nature. (5)** (Same as Communication Studies M148.) Seminar, four hours. Limited to Communication Studies and Economics majors. Marketing, advertising, and consumer behavior from viewpoint of evolutionary psychology and biology, including analysis of motives and patterns of consumption, current marketing strategies and marketing myths, and contents and effectiveness of advertising. Letter grading.

**M189. Asian Pacific Americans in the U.S. Economy. (4)** (Same as Asian American Studies M123.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to linking understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

**190. International Economics. (4)** Lecture, three hours. Requisite: course 1 or 100. Limited to non-Economics Department majors. Not open to students with credit for course 191 or 192. General introduction to international economics, based on examination of theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies. May not be applied toward any Economics Department major.

**191. International Trade Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 101. Not open to students with credit for course 190. Theory of international trade: bases, direction, terms, volume, and gains of trade. Effects of tariffs, quantitative restrictions, and international integration. Effects of free and restricted trade on economic welfare and political stability. P/NP or letter grading.

**192. International Finance. (4)** Lecture, three hours; discussion, one hour. Requisite: course 102. Not open to students with credit for course 190. Emphasis on interpretation of the balance of payments and adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization. P/NP or letter grading.

**193. Research in International Area Studies Seminar. (4)** Seminar, three hours. Limited to senior Economics/International Area Studies majors. Students prepare research paper on economy of the country or region of specialization.

**195H. Honors Thesis Seminar. (4)** Seminar, three hours. Limited to senior departmental honors program students. Seminar in which students present results of their senior theses.

**199. Special Studies in Economics. (2 or 4)** Requisites: courses 11, 101. Limited to juniors/seniors. May be repeated but may be applied only once toward the major requirements.

## Graduate Courses

### Foundations of Economics

#### 200. Mathematical Methods in Economics. (4)

Lecture, three hours. Should be taken prior to enrollment in course 201A. Examination of mathematical methods used in graduate-level courses in microeconomics, macroeconomics, and quantitative methods. Topics include real analysis, linear algebra and matrices, calculus of many variables, static optimization, convex analysis, and dynamics and dynamic optimization. S/U or letter grading.

#### 201A-201B-201C. Microeconomics. (4-4-4) Lecture, three hours. S/U or letter grading:

**201A.** Theory of the Firm and Consumer. (4) Lecture, three hours. Two input/two output model. Walrasian equilibrium and Pareto efficiency. Choice over time — consumer savings and firm investment decisions. Choice under uncertainty — state claims model, asset pricing. S/U or letter grading.

**201B.** Basic Concepts and Techniques of Noncooperative Game Theory and Information Economics. (4) (Formerly numbered 201C.) Lecture, three hours. Nash equilibrium and subgame perfection. Games with incomplete information. Models of strategic market behavior. Screening and signaling. Bargaining models. Theory of the firm. S/U or letter grading.

**201C.** General Equilibrium and Welfare Economics. (4) (Formerly numbered 201B.) Lecture, three hours. Meaning of competition in general equilibrium. Decentralization and appropriation roles of prices. Increasing returns. Public goods. Pecuniary and nonpecuniary externalities. Mechanism design. S/U or letter grading.

#### 202A-202B-202C. Macroeconomics. (4-4-4) Lecture, three hours:

**202A.** Dynamics and Growth Theory. Essential techniques and concepts from dynamical mathematics and neoclassical growth theory. Linear and nonlinear dynamical systems. Dynamic programming and control theory. Stochastic dynamics. Determinacy of equilibrium. Descriptive, optimal, and overlapping generations models of accumulation. Stochastic growth theory. Increasing returns and applications to economic development.

**202B.** Business Cycles. Survey of representative agent and complete market models of short-run fluctuations. Facts about fluctuations and long-term growth. Real business cycle theory. Calibrating and simulating dynamic models. Asset prices, money, and inflation. Taxation of factor incomes. Cyclical aspects of employment.

**202C.** Topics in Macroeconomics. Heterogeneous-agent models of endogenous fluctuations and growth. General equilibrium techniques in macroeconomics. Overlapping fluctuations model with national debt. Fiscal policy. Externalities, indeterminacy, and growth. Expectations and business cycles. Money and monetary policy. Historical overview of mainstream macroeconomics. Wicksell and Keynes. Monetarist controversy. New classical and new Keynesian macroeconomics.

#### 203A. Probability and Statistics for Econometrics. (4)

Lecture, three hours. Provides statistical tools necessary to understand econometric techniques. Random variables, distribution and density functions, sampling, estimators, estimation techniques, hypothesis testing, and statistical inference. Use of economic problems and examples. S/U or letter grading.

**203B. Introduction to Econometrics: Single Equation Models. (4)** Lecture, three hours. Estimation of basic linear regression model, testing hypotheses, generalized least squares, serial correlation, heteroskedasticity, multicollinearity, error-in-variables, distributed lags, qualitative dependent variables, and forecasting. S/U or letter grading.

**203C. Introduction to Econometrics: Systems Models. (4)** Lecture, three hours. Multivariate regression, simultaneous equation estimation, identification, and latent variables. S/U or letter grading.

**204A-204Z. Applications of Economic Theory. (4 each)** Lecture, three hours:

**M204L-M204M-M204N.** Seminars: Pharmaceutical Economics and Policy. (1-1-2) (Same as Health Services M204A-M204B-M204C.) Seminar, three hours every other week for three terms. Requisites: courses 201A, 201B, 201C, Health Services M236. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress and S/U or letter grading.

**205. Economic Modeling. (4)** Lecture, three hours. Development of modeling skills by considering a sequence of economic issues (e.g., peak load pricing, regulation, monopoly, capital asset pricing, Pareto efficiency). Emphasis on multivariate constrained optimization. S/U or letter grading.

**207. History of Economic Thought. (4)** Lecture, three hours. Topics from classical economics, including work of Smith, Ricardo, and Mill, and developments from the 1870s, including contributions of major figures of the marginalist revolution, the socialist controversy, and history of welfare economics. S/U or letter grading.

### Economic Theory

**211A-211B. Economics of Uncertainty, Information, and Games. (4-4)** Lecture, three hours. Preparation: introductory probability. Requisite: course 201C. Theory of individual decision making under uncertainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading.

**212A-212Z. Topics in Advanced Theory. (4 each)** Lecture, three hours. Current research in microeconomic theory. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading:

**212A.** Search Theory. Preparation: calculus, introductory probability. Price searching, queueing, Brownian motion, martingales, and applications to the theory of the firm.

**212B.** Applied Game Theory. Preparation: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monetary theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets.

**213A-213B. General Equilibrium and Game Theory. (4-4)** Lecture, three hours. Requisite: course 201C. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading.

**214A-214Z. Topics in Mathematical Economics. (4 each)** Lecture, three hours. Requisite: course 213B. Current research in mathematical economics. Content varies. Ordinarily only two courses in this sequence given every year. May be repeated for credit. S/U or letter grading:

**214A.** General Equilibrium Theory. Requisite: course 201C. Core convergence theorem, cooperative and non-cooperative approach to competitive equilibrium theory, perfectly competitive equilibria, the no-surplus condition, and applications to mechanism theory and incomplete market models.

**M214B.** Game Theory. (Same as Mathematics M261 and Political Science M208A.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs.

**M215. Topics in Applied Game Theory. (4)** (Same as Political Science M208B.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

**218A-218B-218C. Proseminars: Economic Theory. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers. Discussion of advanced topics and recent developments in game theory, information and uncertainty, and general equilibrium theory. Presentation of recent papers published and unpublished in economic theory as well as research of instructor and students. In-class presentation expected. S/U or letter grading.

**219A-219B-219C. Workshops: Economic Theory and Mathematical Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U or letter grading.

Also see Management 200 (game theory and information economics), 203A (decision theory), 203B (economics of information)

### Monetary Economics

**221A-221D. Monetary Economics I to IV. (4 each)** Lecture, three hours. S/U or letter grading:

**221A.** Requisites: courses 202A, 202B, 202C. Dynamic methods in business cycles and economic growth. Multi-period life-cycle models. Sustainable public deficits. Money and inflationary finance. Human capital. Endogenous fluctuations and regime switching. Econometrics of multiple equilibrium models. Political economy of government deficits and inflation.

**221B.** Emphasis on theoretical, historical, and policy aspects of monetary economics. Financial intermediation, bank panics, asset price volatility, game theoretic models of policy, inflation, implication of monopolistic competition, search and coordination failures, central bank operations, and evolution of monetary institutions.

**221C.** Requisites: courses 202A, 202B, 202C. Emphasis on quantitative dynamic models useful in study of equilibrium business cycles and public finance. Recursive competitive equilibria in representative agent overlapping-generation models, including models with money, taxes, liquidity constraints, and other distortions.

**221D.** Requisites: courses 202A, 202B, 202C. Emphasis on applied macroeconomics, with topic change each year. Students select a particular data set to study. Each week class studies an article from recent work in applied macroeconomics or applied econometrics which teaches a technique or suggests a theoretical restriction on the data. Subgroups of students report back to class using the technique on their selected data set.

**222A-222Z. Topics in Monetary Economics. (4 each)** Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading:

**M222A.** Control and Coordination in Economics. (4) (Same as Computer Science M222.) Lecture, three hours. Recommended preparation: appropriate mathematics course. Designed for graduate economics and engineering students. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

**228A-228B-228C. Proseminars: Monetary Economics. (4-4-4)** Seminar, three hours. Workshops for pre-dissertation and dissertation writers. Literature surveys or research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper or presentation required. S/U or letter grading.

**229A-229B-229C. Workshops: Monetary Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U or letter grading.

Also see Management 239A, 239B, 239C (Ph.D. sequence in finance), 239D (advanced topics in finance), 239X-239Y-239Z (finance workshops)

### Econometrics

#### 231A. Econometrics: Single Equation Models. (4)

Lecture, three hours. Linear regression model, specification error, functional form, autocorrelation, nonlinear estimation, distributed lags, nonnormality, univariate time series, qualitative dependent variables, aggregation, structural change, and errors-in-variables. S/U or letter grading.

**231B. System Models. (4)** Lecture, three hours. Multivariate regression, errors-in-variables, simultaneous equations, identification, proxy variables, latent variables, factor analysis of panel data, asymptotic distribution theory. S/U or letter grading.

**232A-232Z. Topics in Econometrics. (4 each)** Lecture, three hours. Requisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading:

**M232A.** Bayesian Econometrics. (Same as Political Science M208E.) Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism.

**232B.** Time Series. Stationary stochastic processes, Box/Jenkins methods, spectral analysis, forecasting, rational expectation models, analysis of macroeconomic data.
