**239A-239B-239C. Workshops: Econometrics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Economic History

**241. Economic History of Western Europe. (4)** Lecture, three hours. Designed for graduate students. Seminar on European economic history, with emphasis on evolution of institutions and growth. Serfdom, medieval agriculture and the agricultural revolution, demography, industrial revolution, imperial expansion, and decline of Britain. S/U or letter grading.

**242. Economic History of the U.S. (4)** Lecture, three hours. Seminar on American economic history. Onset of industrialization, relative economic backwardness of the South, slavery, technological change, rise in industrial concentration, women in the labor force, development of financial markets. S/U or letter grading.

**243A-243Z. Topics in Economic History. (4 each)** Lecture, three hours. Current research in economic history. Content varies. May be repeated for credit. S/U or letter grading.

**248A-248B-248C. Proseminars: Economic History. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers. Discussion of advanced topics and recent developments in economic history. Presentation of work-in-progress. Research paper required. S/U grading.

**249A-249B-249C. Von Grep Workshops: History of Entrepreneurship in the U.S. Economy. (4-4-4)** Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by visiting experts, UCLA faculty members, graduate students. S/U grading.

## Public Finance

**251A. Theory and Policy of Taxation. (4)** Lecture, three hours. Examination of influence of taxation on economic efficiency and incidence of taxation in first part of course. Topics include tax equivalences, Ramsey rules, and alternative forms of taxation. Special tax provisions, tax incentives, and progressivity in taxation in second part of course. S/U or letter grading.

**251B. Cost-Benefit Analysis of Public Projects and Programs. (4)** Lecture, three hours. Requisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading.

**252. Economics of Federalism. (4)** Lecture, three hours. Theories of perfect games and social organization. Role of government, collective goods, collective defense, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

**253A-253Z. Topics in Public Finance. (4 each)** Lecture, three hours. Current research in public finance. Content varies. Topics include Social Security taxes and programs, unemployment insurance, public provision of medical care, theory of public goods, and theory of public choice. May be repeated for credit. S/U or letter grading.

**254A-254B-254C. Workshops: Public Economics. (4-4-4)** Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by graduate students, UCLA faculty members, visiting experts. S/U grading.

## Labor Economics

**261A-261B. Labor Economics I, II. (4-4)** Lecture, three hours. S/U or letter grading:

**261A.** Wage determination in competitive labor markets. Extension of wage determination to schooling and occupational choice, life-cycle earnings profiles, discrimination, minimum wage legislation, and unionism. Emphasis on empirical literature.

**261B.** Requisite: course 261A. Models of life-cycle learning and work behavior, with particular emphasis on recent literature examining labor force behavior and experience of women.

**262A-262Z. Topics in Labor Economics. (4 each)** Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

**268A-268B-268C. Proseminars: Labor and Population. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers working on empirical issues in areas of labor and population, broadly defined. Presentation of work-in-progress or background material for proposed thesis topics, to be discussed and criticized by faculty and fellow students. Presentation or research paper required. S/U grading.

**269A-269B-269C. Workshops: Labor Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Industrial Organization

**271A-271B. Industrial Organization, Price Policies, and Regulation I, II. (4-4)** Lecture, three hours. S/U or letter grading:

**271A.** Major economic aspects of property rights system. The firm and the market compared from perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure.

**271B.** Requisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements.

**271C. Mathematical Theory in Industrial Organization. (4)** Lecture, three hours. Requisites: courses 201A, 201B, 201C. Formal modeling of theory of industrial organization: principal-agent problem, entry deterrence, endogenous price discrimination, monopolistic competition, new approaches to rationality. S/U or letter grading.

**272A-272Z. Topics in Industrial Organization. (4 each)** Lecture, three hours. Current research in industrial organization. Content varies. May be repeated for credit. S/U or letter grading.

**273A. Public Utility Regulation. (4)** Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading.

**278A-278B-278C. Proseminars: Industrial Organization and Regulation. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers to discuss advanced topics and recent developments in industrial organization and regulation. Presentation of work-in-progress for feedback from faculty and fellow students. Presentation or research paper required. S/U grading.

**279A-279B-279C. Workshops: Business Organization. (4-4-4)** Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Also see Management 262 (pricing policy)

## International Economics

**281A. International Trade Theory. (4)** Lecture, three hours. Theoretical and empirical analysis of microeconomic relationships among countries. Determinants of commodity and factor flows, prices, and factor rewards. Effects of trade barriers. S/U or letter grading.

**281B. International Finance. (4)** Lecture, three hours. Theory and evidence on balance of payments, exchange rate determination, international transmission of inflation and business cycles, macroeconomic policy in open economies, alternative monetary systems. S/U or letter grading.

**281C. International Economics. (4)** Lecture, three hours. Theoretical and empirical analysis of interrelation between flows of capital, people, and goods. Applications to current policy. S/U or letter grading.

**282A-282Z. Topics in International Economics. (4 each)** Lecture, three hours. Current research in international economics. Content varies. May be repeated for credit. S/U or letter grading.

**284. Soviet Economic Theory and Organization. (4)** Lecture, three hours. Overall strategy of planning used by U.S.S.R. planners and specific planning methods, interpreted broadly to cover not only instructions and objectives but also institutional arrangements. Intended and unintended outcomes of the methods. S/U or letter grading.

**285A-285B-285C. Workshops: International Economics. (4-4-4)** Lecture, three hours. Workshops for pre-dissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

## Development Economics

**286A. Economic Development. (4)** Lecture, three hours. Requisites: courses 201C, 202C. Study of theoretical and empirical problems related to developing countries. Emphasis on relation between international trade and economic development, dynamic aspects of commercial policies, inflation, stabilization, structural adjustment, growth and migration. S/U or letter grading.

**286B. Cost-Benefit Analysis of Development Projects. (4)** Lecture, three hours. Requisite: course 286A. Methodology for evaluating investment projects, with special attention to types of issues that arise in developing countries. Discussion of social versus private evaluation criteria; applications to highway, electricity, and irrigation projects. S/U or letter grading.

**287A-287Z. Topics in Development Economics. (4 each)** Lecture, three hours. Current research in development economics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading:

**287A.** Economic Problems of Latin America. Economic history of Latin America. The great depression, import substitution and industrialization, inflation and growth, free market experiments, and economic integration.

**287B.** Economic Development in East Asia. Recent economic history of East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and trade, especially with the U.S., in area's economic development.

**287C.** Topics in Economic Development. Designed for graduate students. Topics in monetary and exchange rate policy in developing countries. Students expected to develop analytical tools and underlying policy issues.

**288A-288B-288C. Proseminars: International and Development Economics. (4-4-4)** Seminar, three hours. Quarterly seminars for pre-dissertation and dissertation writers on current issues in international trade and finance and development economics. Presentation of work-in-progress for feedback from faculty and other graduate students. Presentation or research paper required. S/U grading.

## Urban Economics

**291A. General Equilibrium and Finance. (4)** Lecture, three hours. Designed for graduate students. Introduction to mathematical finance from general equilibrium viewpoint. CAPM and static equilibrium models. Intertemporal models in discrete and continuous time. Spanning, option prices, and derivatives. Martingales, random walks, and market efficiency. S/U or letter grading.

**291B. Fundamentals and Bubbles in Asset Prices. (4)** Lecture, three hours. Requisite: course 291A. Designed for graduate students. Applications of dynamic general equilibrium to asset pricing in economies with exchange and production. Basic empirical puzzles in U.S. and international asset prices, 1880 to 2000: excess volatility, equity premium and risk-free rate puzzle, predictability. Models of habit formation, asset price bubbles, and limited arbitrage asset pricing theories. Market imperfections and bounded rationality. S/U or letter grading.

**291C. Asset Prices, Forecasting, and Learning. (4)** Lecture, three hours. Requisite: course 291A. Designed for graduate students. Introduction to forecasting methods and applications to asset pricing. Signal-extraction under different uncertainty specifications. Kalman filtering and forecasting. Robust filtering and forecasting. Models of behavioral finance. Stylized facts on forecasts and asset pricing anomalies: short-term momentum and long-term reversals of returns. Option pricing anomalies. S/U or letter grading.

**291D. Econometrics of Asset Prices. (4)** Lecture, three hours. Prerequisite: course 291A. Designed for graduate students. Applications of time-series methods to analysis of asset prices: general method of moments, vector autoregressions, and maximum likelihood estimation. Restrictions imposed by no-arbitrage on time series of returns. Empirical implications of macroeconomic models for asset prices. Response of asset prices to shocks. Incomplete markets. S/U or letter grading.

**293A-293Z. Topics in Urban Economics. (4 each)** Lecture, three hours. Current research in urban and regional economics. Content varies. Serves as forum for presentation of papers on urban economics by students, UCLA faculty members, and visitors. May be repeated for credit. S/U or letter grading.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Economics. (2)** Seminar, one hour; laboratory, three hours. Designed for graduate students. Required of all new teaching assistants. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

**596. Individual Study. (2 to 8)** Directed individual study or research. S/U grading.

**597. Individual Study: Graduate Examinations. (2 to 8)** Directed individual study in preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

**599. Individual Research: Ph.D. Dissertation. (2 to 8)** Preparation: advancement to Ph.D. candidacy. Directed individual research in preparation of Ph.D. dissertation. S/U grading.

# EDUCATION

## Graduate School of Education and Information Studies

Office of Student Services:

UCLA  
1009 Moore Hall  
Box 951521

### Professors

Marvin C. Alkin, Ed.D.  
Alexander W. Astin, Ph.D. (*Allan Murray Cartter Professor of Higher Education*)  
Helen S. Astin, Ph.D.  
Eva L. Baker, Ed.D.  
James E. Bruno, Ph.D.  
James S. Catterall, Ph.D.  
Arthur M. Cohen, Ph.D.  
Sol Cohen, Ph.D.  
Aimée Dorr, Ph.D., *Dean*  
Frederick Erickson, Ph.D. (*George F. Kneller Professor of Education and Anthropology*)  
Ronald Gallimore, Ph.D., *in Residence*  
Sandra Graham, Ph.D.  
Kris D. Gutierrez, Ph.D.  
Sandra Harding, Ph.D.  
John N. Hawkins, Ph.D.  
Charles C. Healy, Ph.D.  
Robert M. Hodapp, Ph.D.  
Carollee Howes, Ph.D.  
Dean T. Jamison, Ph.D.  
Connie L. Kasari, Ph.D.  
Douglas Kellner, Ph.D. (*George F. Kneller Professor of Education and Philosophy*)  
Marilyn L. Kourilsky, Ph.D.

Harold G. Levine, Ph.D.  
Reynaldo F. Macias, Ph.D.  
Peter L. McLaren, Ph.D.  
Bengt Muthén, Ph.D.  
Don T. Nakanishi, Ph.D.  
Jeannie L. Oakes, Ph.D., *Associate Dean*  
Mike Rose, Ph.D.  
Val D. Rust, Ph.D.  
Ronald Stevens, Ph.D.  
Romeria Tidwell, Ph.D.  
Carlos A. Torres, Ph.D.  
Noreen M. Webb, Ph.D.  
Amy S. Wells, Ph.D.  
Wellford Wilms, Ph.D.

### Professors Emeriti

Gordon L. Berry, Ed.D.  
Nicholas Blurton Jones, Ph.D.  
Burton R. Clark, Ph.D.  
Charlotte A. Crabtree, Ph.D.  
Donald A. Erickson, Ph.D.  
Lawrence W. Erickson, Ed.D.  
Norma D. Feshbach, Ph.D.  
Simon González, Ed.D.  
John I. Goodlad, Ph.D., L.H.D., LL.D.  
Wendell P. Jones, Ph.D.  
Evan R. Keislar, Ph.D.  
Barbara K. Keogh, Ph.D.  
Frederick C. Kintzer, Ed.D.  
Dorothy M. Leahy, Ph.D.  
John D. McNeil, Ed.D.  
David O'Shea, Ph.D.  
C. Robert Pace, Ph.D.  
Rosemary Park, Ph.D., LL.D., Litt.D., L.H.D.  
W. James Popham, Ed.D.  
Harry F. Silberman, Ed.D.  
Rodney W. Skager, Ph.D.  
Lewis C. Solmon, Ph.D.  
Louise L. Tyler, Ph.D.  
Carl Weinberg, Ed.D.  
Richard Williams, Ph.D.  
Charles Z. Wilson, Ph.D.  
Merlin C. Wittrock, Ph.D.

### Associate Professors

Alison L. Bailey, Ed.D.  
Megan L. Franke, Ph.D.  
Patricia M. McDonough, Ph.D.  
Robert A. Rhoads, Ph.D.  
Michael H. Seltzer, Ph.D.  
Daniel G. Solorzano, Ph.D.  
James W. Trent, Ph.D.  
Concepción Valadez, Ph.D.

### Assistant Professors.

Mitchell J. Chang, Ph.D.  
Robert Cooper III, Ph.D.  
Noel D. Enyedy, Ph.D.  
Tyrone C. Howard, Ph.D.  
Yasmin B. Kafai, Ed.D.  
Renee Smith Maddox, Ph.D.  
Heinrich A. Mintrop, Ph.D.  
Edith S. Mukudi, Ph.D.  
Jennifer E. Obidah, Ph.D.  
William A. Sandoval, Ph.D.  
Linda J. Sax, Ph.D., *in Residence*  
Yeow Meng Thum, Ph.D.

### Adjunct Professors

Jamal Abedi, Ph.D.  
Jane S. Permaul, Ed.D.  
Harold L. Pruett, Ph.D.  
Eugene Tucker, Ed.D.

### Adjunct Associate Professor

Philip Ender, Ph.D.

### Adjunct Assistant Professor

Bruce Barbee, Ed.D.  
Diane Durkin, Ph.D.  
Linda P. Rose, Ph.D.

## Scope and Objectives

As one of the top-ranked public graduate programs in education in the nation, the Department of Education is guided by a commitment

to integrate theory and practice and to improve educational practice and policy. The department attracts prominent scholars and is internationally recognized for its research centers in evaluation, higher education, child development, and urban education. Whether students choose to pursue a Ph.D., an Ed.D., a master's degree, or a services or instructional credential, they graduate with a broad understanding of educational theory and tested practice.

## Undergraduate Study

For information on the special certificate program through which students may waive the Multiple Subject Assessment for Teachers (MSAT) in California, see the Diversified Liberal Arts Program (DLAP) and contact a DLAP counselor in the College of Letters and Science, A316 Murphy Hall, (310) 206-6681.

## Education Studies Minor

The Education Studies minor is intended to address the diverse information needs of the UCLA undergraduate community to (1) allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, (2) help understand the complex interactions between the legal, social, political, and economic forces which influence and shape educational policies in America, (3) provide an introductory course sequence for students who wish eventually to pursue careers in education either as teachers or researchers, and (4) provide an analysis of current educational practices by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

To enter the minor, students must have completed 32 units with a minimum overall 2.3 (C+) grade-point average and file an admission application with the education studies academic adviser in the Office of Student Services, 1009 Moore Hall, <http://www.gseis.ucla.edu/edminor/default.html>. Applicants are expected to have a real commitment to inquiry into issues vital to education.

### *Required Upper Division Courses (28 units):*

Two policy and issues courses from Education 181A through 181D, with grades of C+ or better; two behavioral and social sciences perspective courses from Education M108, 180, C191A through 191H; two elective courses from M102, 125A, 140, M148; and one professional topics course from 197A through 197Z.

In addition to or in lieu of electives, students may select a concentration in community education leadership by completing three courses from Education 190, 192A through 192E, 193A through 193F, 194A, 194B, 194C.

Students with a 3.0 grade-point average may, after acceptance of a separate application, also select a concentration in advanced studies by taking Education 197X and 199 in addition to the course requirements for the minor.

All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Education offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Education, Master of Education (M.Ed.) degree, Doctor of Education (Ed.D.) degree, and Doctor of Philosophy (Ph.D.) degree in Special Education (with California State University, Los Angeles).

## Admission

### M.A. in Education

The M.A. in Education is an academic master's degree designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores on the quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. No screening examination (other than described above) and no specific coursework are required for admission to a degree program.

Applicants must complete a departmental application form in addition to the *UCLA Application for Graduate Admission*. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

### Master of Education

The M.Ed. is a professional degree program designed for individuals preparing for mid-level professional positions in schooling or for advanced professional graduate study. Qualifications for admission to a program of study in education, in addition to the University requirements for admission are (1) scores on the quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation

documenting qualifications and/or professional experience.

The following requirements are applicable in accordance with selected emphases:

*Administrative and Policy Studies in Education.* Possession of a valid instructional credential is preferred. Applicants with a demonstrated commitment to improving American schooling are particularly encouraged to apply.

*Bilingual/Cross-Cultural Education.* Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience (as a teacher or aide) for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.

*Counseling in Student Affairs.* This is a one-year full-time program. Students proceed through the program as a cohort. The program prepares its graduates for entry-level professional programs in student affairs.

*Curriculum and the Study of Schooling.* Applicants with above-average capabilities and interest in curriculum and instruction are particularly encouraged to apply. Experience as a practitioner in the emphasis field is advantageous.

*Teacher Education.* This is a two-year program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Applicants with the highest qualifications in all subject areas, particularly mathematics, science, and the humanities, are particularly encouraged to apply. Experience in working with children is advantageous.

### Certificate (Credential) Programs

The California Commission on Teacher Credentialing has authorized the Department of Education to offer professional programs that lead to the (1) Multiple Subject Instructional Credential with the Cross-Cultural Language and Academic Development (CLAD)/Bilingual Cross-Cultural Language and Academic Development (BCLAD) emphasis, (2) Single Subject Instructional Credential with the CLAD/BCLAD emphasis, and (3) Administrative Services Credential. Credential programs 1 and 2 are taken concurrently with the M.Ed. in teacher education; credential program 3 is taken with the M.Ed. in administrative and policy studies in education.

### Education M.Ed./Latin American Studies M.A.

The Department of Education and the Latin American Studies Program offer an articulated degree program that allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree. The program is not currently accepting applications.

## Ph.D. in Education

The Ph.D. in Education is a strongly research-oriented academic degree designed for individuals preparing for careers in basic research or college-level instruction. Major foci include theory, research methodology, basic studies, and in-depth knowledge in education and an approved cognate field.

To be admitted to the Ph.D. program, students must have a bachelor's degree or equivalent. Applicants must also have demonstrated academic excellence and the potential for scholarly research. Students are admitted by a division and must formally apply for a change of division.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores on the quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the department. No screening examination (other than described above) and no specific coursework are required for admission to a degree program.

The department has an application form which must be completed in addition to the *UCLA Application for Graduate Admission*. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

### Ph.D. in Special Education, UCLA/CSULA

A joint Ph.D. program in Special Education is offered by UCLA and California State University, Los Angeles. The goals of the joint program are (1) the stimulation and preparation of research workers of high competence in the various fields of special education, (2) improved preparation for potential teachers of exceptional individuals, and (3) improved preparation of personnel for research and in policy formation in the public schools of California. Students seeking information regarding emphases and requirements should consult the joint doctoral adviser at UCLA (1029B Moore Hall) or the chair of the Department of Special Education at CSULA.

### Doctor of Education

The Ed.D. is a professional degree designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major foci include practice, applied studies, and knowledge related to professional skills.

The major foci of the Educational Leadership Program include innovation and change in schools, postsecondary education, and related areas.

To be admitted into the Ed.D. program, applicants must have a bachelor's degree or the equivalent; at least two years of successful professional experience in education or the equivalent (may be completed prior to advancement to candidacy for all divisions except the administration, curriculum, and teaching studies division which requires the experience as a requisite to admission); and demonstrated evidence of potential for professional leadership. Students are admitted by a division or program and must formally apply for a change of division or program.

The only program currently accepting applications for the Ed.D. degree is the Educational Leadership Program.

### **Education Graduate Degree/Law J.D.**

The Department of Education and the School of Law offer a concurrent degree program that allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. The program is not currently accepting applications.

## **Master's Degrees**

### **M.A. in Education**

The M.A. emphases in divisions 2 through 5 are the following:

#### **Psychology Studies in Education**

Developmental studies in education and learning, and instruction

#### **Higher Education and Organizational Change**

Education training, public policy analysis, research in higher education, and teaching in higher education

#### **Social Research Methodology**

Applied statistics and psychometrics, quantitative and qualitative research, evaluation methodology, and economic analysis

#### **Social Sciences and Comparative Education**

Social sciences, comparative and international education

The M.A. degree is offered through the comprehensive examination and thesis plans. A minimum of nine courses are required, six of which must be in the graduate series. Two research methods courses are required. Additional courses to complete the 36-unit requirement may be selected from offerings in education and/or other departments. Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or

course sequencing in each division or emphasis field.

### **Master of Education**

Areas of study include administrative and policy studies in education, bilingual/cross-cultural education, counseling in student affairs, curriculum and the study of schooling, and teacher education.

The M.Ed. degree is offered through the comprehensive examination plan. A minimum of nine courses are required, five of which must be in the professional education series. Information regarding specific course requirements in a selected M.Ed. emphasis may be obtained from the Office of Student Services.

Field experience is required for all students. The type of field experience varies depending on the specialization. Examples of the required field experience include observation and participation in K-12 classrooms and administrative offices, student teaching, and internships in student affairs settings at the postsecondary level.

## **Doctoral Degrees**

### **Ph.D. in Education**

Major fields include all divisions: urban schooling; psychological studies in higher education; higher education and organizational change; social research methodology; social sciences and comparative education.

A program of study for a Ph.D. student is determined by the student and the faculty adviser and must conform to division and department requirements. A minimum of 18 courses is required, 10 of which must be in the 200 series. Required coursework includes a research practicum, courses in the student's selected division, courses from other departments related to the student's proposed area of research (the cognate), research methods courses, and electives. Students in the social sciences and comparative education division are required to demonstrate reading competence in a language other than English.

Written and oral qualifying examinations are required. The written qualifying examination tests the core knowledge of the division and the student's emphasis, and the questions reflect a research and theoretical orientation.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which covers topics from both education and the cognate discipline(s) that are related to the written research proposal.

### **Doctor of Education**

The Ed.D. is offered for emphases in divisions 1 through 4 and in the Educational Leadership Program. Administration, curriculum, and teaching studies emphases are offered for school, postsecondary, and continuing education administrators, education policy analysts, program and curriculum developers, and teacher educators. Educational psychology

emphases are offered for those interested in practical issues related to special education, educational technology, and computer-assisted instruction. Higher education and work emphases focus on administration in relation to corporate or proprietary education and training, community colleges, and continuing education. Social research methodology emphases are applied measurement and evaluation leadership. Educational leadership emphases are kindergarten through postsecondary educational reform and systemic change.

The only program currently accepting applications for the Ed.D. degree is the Educational Leadership Program.

A program of study for an Ed.D. student is determined by the student and faculty adviser and must meet division or program and department requirements. A minimum of 18 courses is required for all areas except the Educational Leadership Program, which requires 21 courses. Required coursework includes research methods courses, education courses, supplemental courses outside the field of emphasis (not for students in the Educational Leadership Program), leadership capacity-building courses (for students in the Educational Leadership Program), a field practicum, and practicums on the development of the culminating project (for students in the Educational Leadership Program).

A doctoral written screening examination is required after completion of appropriate coursework determined by the division. The examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems. All students admitted to a doctoral program without a master's degree and all students in the Educational Leadership Program are required to take the doctoral screening examination.

Written and oral qualifying examinations are required. The written qualifying examination tests the core knowledge of the division and the student's emphasis, and the questions reflect a professional orientation.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which covers topics from education that are related to the written dissertation proposal.

## **Education**

### **Upper Division Courses**

**M102. The Mexican American and the Schools.** (4) (Same as Chicana and Chicano Studies M102.) Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

**M108. Sociology of Education. (4)** (Same as Sociology M175.) Requisite: Sociology 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

**M112. Inner and Outer Worlds of Children: Social Policies. (4)** (Same as Honors Collegium M112.) Seminar, four hours. Practices and analysis of social policies impacting on children. Topics include assessment, social justice and geographical space, temporal orientation, and classical theories of adolescent development. Letter grading.

**125A. Education of Exceptional Individuals. (4)** Requisite: Psychology 10. Introduction to the field of special education, with emphasis on psychology of individual differences, learning characteristics of exceptional individuals, and application of research and theory to special education problems.

**140. Time and Behavior in Educational Organizations. (4)** Designed for juniors/seniors. Overview of role that time plays in understanding behavior in school and social organizations, with specific emphasis on understanding management of change process. Exploration of behavioral issues such as gang membership, midlife crisis, school reform, teacher burnout, and student at-risk behaviors.

**M148. Women in Higher Education. (4)** (Same as Women's Studies M148.) Lecture, three hours. Designed for juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation. P/NP or letter grading.

**180. Social Psychology of Higher Education. (4)** Overview of significant studies in social psychology of higher education. Focus on institutional characteristics and students' interpersonal and intrapersonal processes, with special emphasis on identifying and explaining effects of college experience on student development and achievement.

**181A. Early Childhood Education. (4)** (Formerly numbered 91A.) Lecture, four hours. Variety of issues pertaining to young children and their education. Identification of theoretical approaches to understanding development: psychosocial, cognitive-developmental, and behavioral. Integration of theory into best practices in early childhood programs. Letter grading.

**181B. Introduction to K-12 Issues in American Education. (4)** (Formerly numbered 91C.) Lecture, four hours. Critical inquiry into policies, issues, and changing technologies that define K-12 education and consequent need for reform. Letter grading.

**181C. Perspectives on the American College. (4)** (Formerly numbered 91E.) Lecture, four hours. Examination of historical conditions that have shaped American higher education and consequent differential characteristics, trends, and practices that bear on dynamics and impacts of contemporary colleges. Emphasis on interrelated research, academic, social, and policy issues underlying diverse system of American higher education. Letter grading.

**181D. The Teaching Profession. (4)** (Formerly numbered 91D.) Lecture, four hours. Exploration of role of teacher/professor, continuing professional development, traditional and "challenged" pedagogues, and public responses to teachers teaching and students learning. Coverage of teachers in K-college in terms of credentialing issues, "master-teacher" programs, subject-matter knowledge, use of educational technology, and teachers as political entities in American history. Letter grading.

**183A. Contextual Leadership for Education and Community Service. (4)** (Formerly numbered 197M.) Conceptual, case study, and experiential investigation of leadership within educational environments and the community. Investigation of how context and environment influence leaders, what leadership effectiveness means, and how to become effective leaders.

**183B. Problem Solving for Leadership and Change. (4)** (Formerly numbered 197E.) Study of concepts and tools that contribute to creative problem solving and its relationship to leadership and change, drawing from both life and social sciences disciplines as well as professional studies of education and related fields.

**183C. Strengths-Based Learning. (4)** (Formerly numbered 197E.) Conceptual analysis of theories that point to improved learning and academic achievement. Relevant theory and research from cognitive psychology provide context. Practical applications of theory through classroom activities and experiential assignments.

**190. Community Service Learning for Academic Achievement. (2)** (Formerly numbered 193A.) Lecture, one hour; discussion, one hour. Must be taken prior to or concurrently with courses 193A through 193F. Emphasis on cognitive learning and motivation theories and their relevance to strategies for developing curricular instructional techniques and training that contribute to tutoring, counseling, and other instructional assistance in various school settings. Letter grading.

**C191A. Philosophy of Education: Ethics and Values. (4)** Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C206D.

**191B. Issues in Education: Historical Perspective. (4)** Lecture, three hours; discussion, one hour. Exploration of such controversial issues in American education as access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media in historical perspective.

**C191C. Economics of Education. (4)** Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C244.

**C191D. Politics of Education. (4)** Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C207.

**C191E. Educational Anthropology. (4)** Recommended preparation: Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C203.

**191F. Educational Psychology. (4)** Broad overview of educational psychology, with examination of relationship of teaching and learning; various perspectives as to how children learn; issues of teaching and learning that arise based on child's social class, ethnic background, gender, age, and level of ability.

**191G. Adolescent Psychosocial Development: Problems and Potentialities. (4)** Adolescence as developmental stage involving construction of personal identity, a narrative dialogical mental structure underlying meaning and direction, life choices, and integration of values and commitments. Current prevention approaches to youth deviance and dysfunction.

**191H. Education and Law. (4)** (Formerly numbered 197L.) Exploration of American legal system and how it influences education. Introduction to legal reasoning and analysis and examination of past and current controversies to discover patterns and synthesize policy implications.

**192A. Theory and Practice of Teaching and Learning Function. (4)** (Formerly numbered 192.) Lecture, three hours. Requisite: course 180. Analysis of learning theory and teaching practice in light of research on student characteristics, learning environments, student/instructor interaction, and outcomes of instruction. Application of theory and research to practice.

**192B. Teaching Practicum in Social Psychology of Higher Education. (4)** (Formerly numbered 181.) Lecture, three hours. Requisite: course 192A. Examination of intellectual and personal development of college students through differential environments and instructional experiences. Students assist in teaching and preparation of instructional materials for course 180.

**192C. Dynamics of Peer Teaching. (4)** (Formerly numbered 197N.) Proficiency in learning principles and procedures relevant to peer teaching in a variety of circumstances provided and undergraduates trained to present College of Letters and Science academic support workshops to their peers with intent of enhancing academic and career perspectives.

**192D. Development of Academic Workshops. (4)** (Formerly numbered 197N.) Requisite: course 192C. Survey of issues in bilingualism and language assessment, study of language, linguistic competence/proficiency, biliteracy, review of current language assessment instruments. Preparation and analysis of naturalistic data using concepts developed through readings and discussion.

**192E. Evaluation of Peer Teaching. (4)** (Formerly numbered 197N.) Requisite: course 192D. Continuation of course 192D. Survey of issues in bilingualism and language assessment, study of language, linguistic competence/proficiency, biliteracy, review of current language assessment instruments. Preparation and analysis of naturalistic data using concepts developed through readings and discussion.

**193A-193F. Community Service Outreach for Academic Achievement. (4 each)** Discussion, two hours; fieldwork, four hours. Requisite or corequisite: course 190. Focus on service areas treated in general fashion in course 190. Concentration on theory and practice pertaining to outreach, tutoring, counseling, and various K-12 internships. Each course may be repeated for a maximum of 24 units. Letter grading. **193A.** Learning in Community Service (LINCS); **193B.** Community-Based Outreach Programs (CBOP); **193C.** America Reads; **193D.** Community Service; **193E.** Peer Counseling; **193F.** Teaching Internship (UES).

**194A. Language, Literacy, and Human Development. (6 to 8)** Lecture, three hours; laboratory, two hours (when scheduled); field practicum, two hours. Provides opportunities to combine theory and practice in study of human development in educational contexts. Use of ethnographic methods to document learning. Focus on relationship between theories of development, culture, and language. May be taken independently for credit. Letter grading.

**194B. Culture, Gender, and Human Development. (6 to 8)** Lecture, three hours; laboratory, two hours (when scheduled); field practicum, two hours. Provides opportunities to combine theory and practice in study of human development in educational contexts. Use of ethnographic methods to document learning. Focus on relationship between theories of development, culture, and gender. May be taken independently for credit. Letter grading.

**194C. Culture, Communications, and Human Development. (6 to 8)** Lecture, three hours; laboratory, two hours (when scheduled); field practicum, two hours. Provides opportunities to combine theory and practice in study of human development in educational contexts. Use of ethnographic methods to document learning. Focus on relationship between theories of development, culture, and technologies. May be taken independently for credit. Letter grading.

**195. Philosophical Foundations of Education. (4)** (Formerly numbered 197A.) Lecture, four hours. Variable topics course organized on selected current issues integrating field observations and readings through seminar discussions. Letter grading.

**197A-197Z. Current Issues in Education. (4 each)** Lecture, three to four hours. Limited to juniors/seniors. Variable topics course organized on selected current issues basis, integrating field observations and readings through seminar discussions. Consult *Schedule of Classes* for topics and instructors. Letter grading:

**197D. Advanced Undergraduate Research Seminar. (4)** Seminar, four hours. Limited to juniors/seniors. Advanced independent skills course of joint interest to professor and student. Research topics deal with K-12 American educational experience, with specific emphasis on diversity, assessment, technology, at-risk, geographical space, and psychosocial development of children. Letter grading.

**197F. Laboratory in Education of Exceptional Individuals. (4)** Lecture, one hour; laboratory, six to eight hours. Requisite: course 125A. Six to eight hours per week of observation, research, and teaching of children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

**197G. Advanced Laboratory in Education of Exceptional Individuals. (4)** Lecture, one hour; laboratory, six to eight hours. Requisite: course 197F. Six to eight hours per week of research, teaching, and multidisciplinary team participation with children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

**197J. Academic Success in Undergraduate Experience.** (2) Lecture, one hour; discussion, one hour. Designed to promote understanding of factors involved in making adjustments to college experience, both academic and social. P/NP or letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged with faculty member who directs the study. P/NP or letter grading.

## Graduate Courses

**200A. Historical Research and Writing. (4)** Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of interest.

**200B. Survey Research Methods in Education. (4)** Requisite: course 210A. Problems of conceptualization, organization, and gathering nonexperimental and quasi-experimental quantitative and qualitative data.

**200C. Analysis of Survey Data in Education. (4)** Lecture, three hours; laboratory, two hours. Requisite: course 200B. Introduction to techniques of processing and analyzing nonexperimental and quasi-experimental quantitative data.

**M201C. History of American Education. (4)** (Same as History M264.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

**202. Evaluation Theory. (4)** Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation.

**C203. Educational Anthropology. (4)** Recommended preparation: Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C191E.

**204A. Introduction to Education and the Social Sciences. (4)** Interdisciplinary course intended to introduce students to study of educational issues, texts, and movements of thought through social sciences and comparative perspectives.

**204B. Introduction to Comparative Education. (4)** Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

**204C. Education and National Development. (4)** Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of the world.

**204D. Minority Education in Cross-Cultural Perspective. (4)** Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems.

**204E. International Efforts in Education. (4)** Designed for graduate students. Critical analysis of complex world of "development cooperation," with particular reference to bilateral and multilateral efforts in education.

**204F. Nonformal Education in Comparative Perspective. (4)** Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs.

**205. Computers in the Educational Process. (4)** Introduction to theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and use of computers to teach programming and to foster development of writing, computational, and filing skills.

**206A. Philosophy of Education: Introduction. (4)** Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

**206C. Introduction to Conceptual Analysis. (4)** Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on development of logical and linguistic skills used in analysis of educational problems and issues.

**C206D. Philosophy of Education: Ethics and Values. (4)** Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C191A.

**C207. Politics of Education. (4)** Preparation: one approved research methods course required for master's or doctoral degree. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C191D.

**208A. Perspectives on the Sociology of Education. (4)** Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels.

**208C. Explanation in the Social Sciences and Educational Research. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Overview of basic strategies and forms of explanation relevant to inquiry in education from vantage point of various social and behavioral sciences disciplines.

**209A. History of Higher Education. (4)** Examination of development of postsecondary education in the U.S., with attention to social context and to scope and variety of institutions.

**209C. Problems in Research and Evaluation in Higher Education. (4)** Critical review of research and evaluation studies of higher education, with special attention to need for studies of new programs and problems, and to design and methodology of evaluative research.

**209D. System of Higher Education. (4)** Analysis of structure and function of American postsecondary education from systems perspective. Emphasis on structure of system and comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions.

**210A-210B. Education as a Profession: Theory, Research, and Practice. (2-2)** Lecture, 90 minutes; discussion, two and one-half hours. Introduction to major issues and approaches in educational research through series of faculty presentations, selected readings, and writing assignments. In Progress and letter grading.

**211A. Measurement of Educational Achievement and Aptitude. (4)** Requisite: course 230A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; elements of validity and reliability. S/U or letter grading.

**211B. Measurement in Education: Underlying Theory. (4)** Requisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory.

**211C. Item Response Theory. (4)** Requisites: courses 211B, 230C. Item response theory, applications to educational achievement tests, item bias, test information, test equating, computerized adaptive testing. S/U or letter grading.

**212A. Learning and Education. (4)** Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction.

**212B. Motivation and Affect in Educative Process. (4)** Requisites: courses 212A, 230A. Review of theoretical and empirical literature on motivational factors in school settings and conditions for acquisition of affective outcomes. S/U or letter grading.

**212C. Cognition and Creativity in Education. (4)** Requisite: course 212A. Review of theoretical and empirical literature on cognitive processes in school learning, including knowledge acquisition, comprehension, metacognition, and creativity.

**213C. Group Counseling Theory and Process. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 213A, 214A, 214B. Group productivity, leadership in groups, social perception, attitude formation, and effect of behavior changes in individuals and groups. Evaluation of social, psychological, and educational principles related to therapeutic experiences of individuals in small groups.

**213D. Assessment in Counseling and Student Affairs. (4)** Overview of assessment issues and methods used in counseling and student affairs activities. Emphasis on concepts of testing and measurement, applications of measurement theory, and contemporary issues that are significant in influencing assessment in student affairs programs.

**214A. Counseling Theory and Practice. (4)** Alternatives in counseling practice in relation to theories of personality development and functioning, research on effectiveness of counseling, professional issues in counseling, educational aspects of counseling.

**214E. Substance Abuse and Addiction. (4)** Theory and practice of prevention and intervention in substance abuse and addiction from perspective of counseling and educational practice.

**214F. Student Problems: Social Context. (4)** Designed to assist students in understanding the configuration of social forces that lead to student dysfunctions. Consideration of a number of contemporary social problems that are of concern to school counselors, educators in general, and behavioral scientists.

**M215. Personality, Motivation, and Attribution. (4)** (Same as Psychology M239.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

**216. Counseling Models from a Cross-Cultural Perspective. (4)** Requisite: course 213A. Research related to psychological, educational, and sociological characteristics of counseling clients within a cross-cultural perspective and implications for counseling models. Evaluation of counseling practices through analysis of school, community, and mental health settings.

**M217A. Social Development and Education. (4)** (Same as Psychology M242D.) Seminar, four hours. Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice. S/U or letter grading.

**217B. Cognitive Development and Education. (4)** Designed for graduate students. Critical review of theories and research in cognitive development, focusing on work of Piaget and Vygotsky, and relation of this work to issues in educational practice.

**M217C. Personality Development and Education. (4)** (Same as Psychology M245.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

**217D. Language Development and Education. (4)** Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectal issues.

**M217F. Adolescent Development. (4)** (Same as Psychology M242G.) Seminar, four hours. Designed for graduate students. Review of recent research on physical, cognitive, social, and psychological development during second decade of life. Topics include pubertal development, changes in parent/adolescent relationships, role of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.

**M217G-M217H-M217I. Child Abuse and Neglect. (2-2-1).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300A-M300B-M300C, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M217G is requisite to M217H, which is requisite to M217I. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

**219. Laboratory: Advanced Topics in Research Methodology. (4)** Provides assistance in design of research and interpretation of data to advanced students from other divisions. Coverage of special topics not included in other courses on research methods.

**220A. Inquiry into Schooling: Organization and Change. (4)** Critical analysis of issues in reconstruction of schooling; concepts of function and structure of schooling; organization theory; systems approaches in analysis of organization development and change.

**220B. Inquiry into Schooling: Curricular Problems and Policy Issues. (4)** Inquiry into curriculum of schooling. Critical analysis of relationship of curricular decision making to social system and contextual variables.

**221. Computer Analyses of Empirical Data in Education. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 209C (section 1), 230A. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results. S/U or letter grading.

**M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4)** (Same as Anthropology M236Q, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

**222B. Design Issues in Naturalistic Research. (4)** Lecture, three hours; discussion, one hour. Requisite: course M222A. Issues in conceptualization and design of naturalistic research studies, particularly within educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Special attention to ethnographic studies.

**222C. Qualitative Data Reduction and Analysis. (4)** Lecture, two hours; discussion, two hours. Requisite: course M222A or 222B. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems, data manipulation techniques such as typologies and attribute spaces, and specific analytic perspectives. Interfacing qualitative and quantitative data.

**222D. Qualitative Inquiry: Special Topics. (4)** Lecture, four hours. Special topics course on some field or aspect of qualitative inquiry. Topics may include classroom ethnography, advanced ethnographic writing and/or multimedia design, discourse analysis, and microethnography of social interaction. S/U or letter grading.

**223. Aesthetics and the Curriculum. (4)** Lecture, two hours; discussion, two hours. Examination of various ideas and theories in aesthetics and application of these in schooling contexts.

**224. Problems and Issues in Bilingual and Multicultural Education. (4)** Introduction to development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies, and effectiveness.

**225A. Issues in Education of Exceptional Individuals. (4)** Designed for graduate students. Analysis of major research regarding contemporary trends, issues, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals.

**225B. Advanced Issues in Education of Exceptional Individuals. (4)** Synthesis of developmental and educational theory relevant to study of exceptional individuals, including consideration of historical context of current research and applied issues in special education.

**226. Seminar: Special Topics in Writing, Rhetoric, and Educational Methodology. (4)** Special topics seminar on writing in education that could focus on history of writing about education, social and political dimensions of it, its variation by discipline, and its uses in professional and public contexts.

**227A. Research on Learning Characteristics of Exceptional Individuals. (4)** Requisite: course 225B. Overview of research and theory regarding learning characteristics of exceptional individuals and discussion of application of this work to educational practice.

**227B. Research on Cognitive and Language Characteristics of Exceptional Individuals. (4)** Requisite: course 227A. Review of empirical and theoretical literature regarding language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition.

**227C. Research on Behavioral and Social Characteristics of Exceptional Individuals. (4)** Requisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs.

**228. Observation Methods and Longitudinal Studies. (4)** Lecture, two hours; discussion, two hours. Requisite: course 230A. Design of observational and longitudinal studies. Formulation of study conclusions concerning influences on children's development. Conduct of observations; processing and analysis of data. Use of portable computers for recording observations. S/U or letter grading.

**229. Seminar: Special Topics in Urban Schooling. (4)** Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypotheses and research programs on division topics and issues.

**230A. Introduction to Research Design and Statistics. (4)** Designed for graduate students. Key concepts and issues in design and conduct of social sciences research. Introduction to descriptive statistics and fundamentals of statistical inference.

**230B-230C. Linear Statistical Models in Social Science Research. (4-4)** Lecture, four hours. Requisite: course 230A or passing score on screening examination. Integrated and unified approach to applications of linear statistical models in regression, analysis of variance, and experimental and quasi-experimental designs. In Progress and letter grading (credit to be given only on completion of course 230C).

**230X. Applied Research Design and Statistics for Social Sciences. (4)** Requisite: course 230A or passing score on screening examination. Introduction to commonly used statistical methods in social sciences, including regression, analysis of variance, contingency tables. Emphasis on application and interpretation.

**231A. Multivariate Analysis. (4)** Requisites: courses 230B, 230C. Review of multiple regression analysis, analysis of covariance. Introduction to matrix algebra. Introduction to multivariate normal distribution. Multivariate analysis of variance. Linear discriminant function. Analysis of repeated measurements. Canonical correlation. Principal components.

**231B. Factor Analysis. (4)** Requisites: courses 211B, 231A. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis.

**231C. Analysis of Categorical and Other Nonnormal Data. (4)** Requisites: courses 230B, 230C. Regression analysis with dichotomous and polytomous dependent variables, log-linear modeling, coefficients of association for categorical variables, factor analysis, and structural equation modeling.

**231D. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis. (4)** Requisites: courses 230B, 230C. Examination of conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities); consideration of alternative analytical models.

**M231E. Statistical Analysis with Latent Variables. (4)** (Formerly numbered 231E.) (Same as Statistics M244.) Lecture, three hours. Requisites: courses 231A, 231B. Extends path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and model building considerations. Letter grading.

**232. Instructional Analysis. (4)** Theoretical and empirical analysis of instructional variables as they relate to diverse types of instructional strategies. Development of skill in techniques of conducting instructional research.

**233A. Professional Writing in Education. (4)** Designed for first- and second-year doctoral students and intended to assist in professional development as writers, with focus on style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method.

**233B. Professional Writing in Education. (4)** Designed for students at proposal or dissertation stage, with focus on development, organization, and coherence of these scholarly documents, their conceptualization and method, and issues of audience and style.

**234. Education and Social Stratification. (4)** Relationship between education and components of social stratification, including occupations and earnings. Competing theories used in studying education and social stratification; relevant research. Conclusions regarding individual career decisions, social policies, and theories of society.

**236. Human Abilities. (4)** Requisite: course 230A. Nature, development, and measurement of intellectual abilities and their relations to learning and instruction. Review of research and theory of models of ability and test development. S/U or letter grading.

**237. Law and Urban Education. (4)** (Formerly numbered 229.) Lecture, four hours. Examination of recent legal controversies that may impact ability of urban educators to meet needs of students in a multicultural society, with special emphasis on such equity-related issues as desegregation, school finance, standardized testing, and rights of language minority students. Letter grading.

**238. Cross-National Analysis of Higher Education. (4)** Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change.

**239. Organization and Governance of Educational Systems. (4)** Academic organizations, precollegiate and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy-making.

**240. Cultural Foundations of U.S. Education: Policy and Practice. (4)** Designed for graduate students. Cultural foundations of persistent and troubling issues and tensions in American educational policy-making and practice.

**241. Research Methodology in School Administration. (4)** Examination of research problems and strategies in school administration.

**242. Quantitative Foundations for Educational Policy and Planning. (4)** Introductory research course focusing on quantitative foundations for descriptive, tactical, and strategic policy analysis in education.

**C244. Economics of Education. (4)** Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C191C.

**245. Seminar: Cost-Benefit Analysis in Education. (4)** Conceptual and theoretical underpinnings of cost-benefit analysis, critical analysis of current cost-benefit studies, and procedures for conduct of cost-benefit studies.

**246A. Decision Analysis and Advanced Computer Methods for Educational Policy and Planning. (4)** Requisite: course 242. How information technology and decision analysis impact K-12 schooling, higher education, and technical training/workplace settings. With research paper, oral presentation, and two research briefs, students can pursue decision analysis areas of special interest to their professional and career objectives.

**247. Special Topics in Law and Educational Policy. (4)** (Formerly numbered 447.) Lecture, four hours. Policy-based inquiry with focus on specific law-related debates that inevitably influence both K-12 and higher education communities. Identification of strategies that have been successfully employed by those who have sought to use law to shape educational policy. Letter grading.

**249B. Seminar: Institutional Research and Program Evaluation. (4)** Critical review of institutional evaluation studies, with consideration of scope of information needed for various purposes and problems of interrelating this information to appraise overall institutional functioning and effectiveness.

**250A. Organizations and Systems of Higher Education. (4)** Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division, with emphasis on underlying social and political issues that shape higher education and organizational change.

**250B. Topical Issues in Higher Education. (4)** Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division, with emphasis on underlying social and political issues that shape higher education and organizational change.

**250C. Theoretical Frameworks of Higher Education. (4)** Designed for graduate students. Overview of various social sciences theories used to analyze institutions and issues of contemporary higher education. Explanation of how theory and methodology affect research design and framing of research questions in studies of higher education.

**251A. Seminar: Philosophy of Education, Epistemology. (4)** Seminar, four hours. S/U or letter grading.

**251C. Seminar: Philosophy of Education, Social Science Problems — Methodological Perspectives. (4)** Requisite: course 206C.

**251D. Seminar: Philosophy of Education, Problems in Ethics and Values. (4)** Requisite: course C206D.

**251E. Seminar: Philosophy of Education, Selected Issues. (4)** Seminar, four hours. S/U or letter grading.

**252A. Seminar: Educational Organizations. (4)** Requisite: course 208A.

**252B. Seminar: Education and Social Change. (4)** Requisite: course 208A.

**M252C. Human Resources and Economic Development. (4)** (Same as Community Health Sciences M251.) Lecture, four hours. Examination, in context of developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. S/U or letter grading.

**253A. Seminar: Current Problems in Comparative Education. (4)** Seminar, four hours. S/U or letter grading.

**253B. Seminar: African Education. (4)** Designed for graduate students. Contemporary issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education.

**253C. Seminar: Asian Education. (4)** Seminar, four hours. S/U or letter grading.

**253D. Seminar: Latin American Education. (4)** Seminar, four hours. S/U or letter grading.

**253E. Seminar: European Education. (4)** Seminar, four hours. S/U or letter grading.

**253F. Seminar: Education in Revolutionary Societies. (4)** Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of nonsocialist nations.

**253G. Seminar: The Asian American and Education. (4)** Basic issues and topics related to Asian Americans in the field of education. Examples of issues and topics include Asian Americans and the community, socioeconomic status, education-to-work transition, language and culture question.

**253H. Seminar: The Chicano/Hispanic and Education. (4)** Basic issues and topics related to the Chicano and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; implications for schooling).

**253I. Education and Social Change in the Middle East and Islamic World. (4)** Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of the Middle East and Islamic world (including Pacific Rim, South and Central Asia).

**254. Seminar: History of Education. (4)** Requisite: course M201C. Study of current movements in historiography of education and critical reading of texts in history of education.

**255A-255B-255C. Seminars: Special Topics. (4-4-4)** May be repeated for credit. **255A.** Measurement; **255B.** Design; **255C.** Data Analysis.

**256A. Seminar: Special Topics in School Learning. (4)** Seminar, four hours. S/U or letter grading.

**256B. Seminar: Special Topics in Development. (4)** Seminar, four hours. S/U or letter grading.

**257. Seminar: Research in Counseling Psychology. (4)** In-depth analysis of selected research approaches/areas in counseling psychology.

**258A. Seminar: Problems in Instructional Research. (4)** Seminar, four hours. S/U or letter grading.

**258B. Seminar: Problems in Instructional Development. (4)** Seminar, four hours. S/U or letter grading.

**259A. Seminar: Research on Characteristics of Students. (4)** Analysis of concepts, methodology, and conclusions or implications underlying and resulting from major research on student characteristics. Emphasis on differential impact of higher education on student and faculty development.

**260. Seminar: Principles of Curriculum and Instruction. (4)** Seminar, four hours. S/U or letter grading.

**261F. Seminar: Cognitive and Personal Development of College Students. (4)** Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills.

**262B. Seminar: Reading. (4)** Seminar, four hours. S/U or letter grading.

**262F. Seminar: Research Topics in Bilingual/Multicultural Education. (4)** Seminar, four hours. S/U or letter grading.

**263. Seminar: Higher Education. (4)** Seminar, four hours. S/U or letter grading.

**264. Seminar: Teacher Education. (4)** Research, issues, and practices in preservice and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs.

**265. Higher Education Policy. (4)** Requisites: courses 250A, 250B. Understanding public policy for higher education requires understanding of both issues and policy process. Review of major topics on which the U.S. government is active, as well as key actors and their influence.

**266. Feminist Theory and Social Sciences Research. (4)** Examination of how diverse feminist social theories of last quarter century have both challenged and strengthened conventional social sciences theories and their methodologies. Introduction especially to feminist standpoint theory, a distinctive critical theory methodology now widely used in social sciences.

**267. Seminar: Educational Technology. (4)** Seminar, four hours. S/U or letter grading.

**268. Theorizing Reading: Rhetorics of Academic Discourse. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Introduction to theoretical approaches to reading, such as poststructuralist, feminist, deconstruction, reader reception, and semiotics, and to core ideas of some leading theorists of reading, such as Roland Barthes, Wolfgang Iser, Barbara Johnson, Stanley Fish, and Gayatri Spivak.

**269. Representations of Education in Cinema. (4)** Lecture, two hours; discussion, two hours. Designed for graduate students. Exploration of ways in which we draw on diverse "texts," particularly films set in or around schools, to illuminate contemporary issues in American secondary education (e.g., issues pertaining to representation of teachers, students, parents, and administrators and curriculum in popular films about high school and adolescents).

**270. Introduction to Cultural Studies. (4)** Lecture, four hours. Investigation of current trends in cultural studies through examination of different methods of cultural interpretation, seminal texts in cultural studies, and practical criticism engaging popular artifacts of media culture. Emphasis on developing critical media literacy as a goal of cultural studies. Letter grading.

**271A. Proseminar: Educational Psychology. (2)** Introduction to a variety of research issues in the field of educational psychology, including topics related to human development, learning and instruction, counseling, and special education, and to different methodological approaches used to study them. S/U grading.

**272. Case-Study Research in Education Policy and Practice. (4)** Use of case-study methods in educational research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice.

**273A. Structure and Dynamics of Educational System. (4)** Lecture, two hours; discussion, two hours. Overview of school administration, teaching, curriculum, and policy studies. Focus on American education as an institutional system wherein federal, state, and local policy, school administration, curriculum theory and design, and teaching are inextricably connected in the delivery of education.

**273B. Social Foundations of Education. (4)** Introduction to literature on multiculturalism and teachings in diverse social, cultural, and economic contexts. Exploration of debates over multiculturalism and teaching for democratic citizenship by review of a diverse number of anthropological, sociological, educational curricula and literatures.

**274. Science, Technology, and Social Research after Eurocentrism. (4)** A philosophy of natural sciences for social scientists which examines challenges to conventional research assumptions raised by multicultural and postcolonial science and technology studies that have emerged since World War II. Focus on sciences and technologies in third-world development projects, comparative ethnohistory movements, and new theories of knowledge and how to do maximally objective research emerging from these literatures.

**275. Race and Education. (4)** Designed for graduate students. Examination of role of race in educational policy-making. Exploration of a broad interpretation of how schools contribute to racial stratification and inequality by linking sociological and sociopsychological theories of race, racial attitudes, and conflict to historical policy analysis.

**276. Contemporary Theories of Writing. (4)** Review of current theories of writing and literacy research and examination of relationships among writing and literacy, culture, and human development. In particular, examination of history of writing research over last three decades as part of a broader intellectual history.

**277. Language in the Classroom. (4)** Seminar/fieldwork. Survey of language and literacy theories and examination of relationship between literacy learning and social practices of classrooms/schools. Study and utilization of qualitative methods of inquiry and discourse analysis.

**278. Social Contexts of Literacy Learning. (4)** Survey of range of sociocultural theories of learning and literacy, in particular, theories of literacy and language socialization, cultural historical theories of human development, and their relevance to school-based literacy.

**280A. Seminar: Selected Topics in Special Education. (2 to 6)** Focus on research and clinical problems in special education. Introduction to a range of clinical services and research strategies. Exploration of current topics in the field.

**280B. Seminar: Exceptional Individuals. (4)** Limited to doctoral students.

**282. Students at Risk: Reconsideration. (4)** Designed for second-year graduate students. Notion of "at risk" has become standard element of biomedical/public health and educational/social sciences discourse. Consideration of "risk" from range of disciplines and modes of inquiry.

**283. Social Research in a Multicultural and Postcolonial World. (4)** A philosophy of social sciences that focuses on how to think fruitfully about two issues: (1) inevitability of nonneutral procedures and results of research conducted within a liberal state that must be committed to value-neutrality and (2) challenges that multicultural and postcolonial social theory have raised to conventional research theories and methodologies.

**288. Research Apprenticeship Course. (2)** Discussion, two hours. Course facilitates a mentorship model of training Ph.D. students in education, with focus on development of graduate student research topics. Assignment of common readings related to these topics; students have opportunity to offer and receive feedback. May be repeated for credit. S/U grading.

**290. Educational Policy Analysis: Research, Theory, and Practice. (4)** Broad overview of development of educational policy from the 1950s to the present. Examination of current issues and debates within educational policy in the U.S. through different theoretical lenses. Exploration of major bodies of research on educational policy and alternative paradigms.

**291. Organizational and Leadership Theory in Education. (4)** Introduction to contemporary and historical conceptions of organization and leadership in context of formal schooling. Exploration of these conceptions through inquiry into school and college settings.

**292. Curriculum Theory, Research, and Practice. (4)** Survey of history of theories and perspectives shaping what is taught in schools, providing graduate students broad understanding of various values, beliefs, and power relations shaping K-12 curriculum in the U.S.

**293. Teaching Studies: Research and Theory into Practice. (4)** Exploration of historical, theoretical, and empirical perspectives related to teaching and teacher education, providing graduate students with broad overview of relevant literature and current issues shaping teaching profession in the U.S.

**296A-296F. Seminars: Research Topics in Education. (2 each)** Discussion, three hours. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**299A-299B-299C. Research Practicum: Education. (4 to 8 each)** May be repeated for credit.

**300. Dissertation Writing Workshop: Interdivisional Seminar. (4)** Seminar, one hour; discussion, two hours; laboratory, one hour. Limited enrollment. Introduction for doctoral candidates to dissertation writing as a genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

**305. Health Education for Teachers. (2)** Lecture, two hours. Limited to Teacher Education Program students. Teaching/learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, community health resources, and analysis of state's health framework. S/U grading.

**309. Methodologies for English Language Learners. (4)** (Formerly numbered 309A.) Lecture, two hours; discussion, two hours. Limited to credential program students. Pedagogy for bilingual and English development instruction. Topics include legal foundations of bilingual programs, educational issues, organizational approaches, and communicative approach; strategies and activities. Discussion of competencies needed by all content area teachers of English language, including strategies for teaching in and through English. Letter grading.

**310. Professional Communication for Graduate Students in Education. (2)** Writing workshop on students' papers in progress to ensure professional standards. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

**311. Principles and Methods of Computer Literacy and Classroom Application — K-12. (2)** Lecture, one hour; laboratory, 30 minutes. Introduction to use of computers in educational environment. Discussion of issues on why and how to integrate computers into curriculum and hands-on practice which allows students to demonstrate skills discussed. S/U grading.

**312. Basic Principles of Curriculum and Instruction. (4)** Analysis and practice of basic principles and concepts for planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of a variety of instructional strategies and their application in elementary and secondary schools.

**314A. Principles and Methods for Curriculum, Instruction, and Leadership in Mathematics. (6 to 12)** Problem solving, curriculum development, implementation of California Mathematics Framework, strategies for encouraging women and minorities into mathematics, and leadership development. S/U grading.

**315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction. (2-2)** Course 315A is requisite to 315B. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

**316A-316B. Principles and Methods for Teaching Reading for Single Subject Instruction. (2-2)** Course 316A is requisite to 316B. Reading instruction in secondary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

**318A-318B-318C. Principles and Methods for Multiple Subject Instruction. (2-2-2)** Lecture, two hours; laboratory, one hour. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in elementary schools. S/U grading.

**320A-320B. Principles and Methods for Single Subject Instruction. (2-2)** Course 320A is requisite to 320B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in secondary schools. Observation and participation in schools. S/U grading.

**327. Principles and Methods for Teaching Spanish Effectively. (2 to 6)** Lecture, two to six hours. Emphasis on proficiency-based foreign language teaching methods incorporating language assessment skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

**330A. Observation and Participation. (2 to 6)** Site-based fieldwork, 10 to 15 hours. Students are assigned to school sites with racially, culturally, and linguistically diverse student populations. Throughout observation and participation period, students analyze effective strategies for achieving learning for all students, including sociocultural approaches and appropriate use of educational technology. S/U grading.

**330B-330C. Student Teaching. (4-6)** Site-based fieldwork, 40 and 60 hours. Requisite: course 330A. Students are assigned to student teach in designated school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. Increased daily responsibilities in course 330C. S/U grading.

**330D. Classroom Residency and Teaching. (8)** Site-based fieldwork, 10 to 15 hours. Students are employed by local school districts to teach as residents in school sites with racially, culturally, and linguistically diverse student populations. Students also work in collaborative teams through the Teacher Education Program to initiate a change project in their local school and/or complete a case study on the project. S/U grading.

**360A-360B-360C. Novice Seminars. (2-2-2)** (Formerly numbered 360.) Seminar, two hours. Analysis of basic principles and concepts of planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of constructivist strategies and their application in elementary and secondary schools. Examination of different methods of computer literacy and teaching subject matter. Students conduct ethnographic inquiry of the local community of their designated demonstration school. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Foundations of Education Policy Analysis. (4)** Principles of decision making and policy formation, implementation, and analysis in context of the educational system. Critical perspectives include effectiveness and equity of educational delivery systems and programs, and complex nature of educational governance in contemporary America.

**401. Structure and Functions of Schools as Complex Organizations. (4)** Critical analysis of alternative assumptions about organizations, how they function, and why people in organizations behave as they do. Application to special circumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform.

**402. Curriculum Principles and Practices. (4)** Critical analysis of major concepts, underlying assumptions, policy issues, and processes in development and implementation of curriculum in the educational setting. Problems in formulation of purposes, selection of learning experiences, organization of curriculum, and curriculum evaluation.

**403. Teaching: Principles and Problems. (4)** Current knowledge concerning good teaching and theoretical/conceptual, empirical, and/or ideological bases for these assertions. Alternative models of classroom teaching, their assumptions, and evidence of worth. Current policy issues and problems in generating and sustaining effective teaching.

**406A-406B-406C. Social Foundations and Cultural Diversity in American Education. (2-2-2)** Intensive consideration of American society, particularly its racial and cultural diversity. Topics include historical development of American society, manifestations of cultures, and ways to learn about students' cultures. Examination of issues of racism, ethnic and gender differences, perspectives of cultural diversity, and impact on educational and classroom instruction.

**407A-407B. Psychological Foundations of Education. (2-2)** Analysis of learning processes in school situations. Processes of human motivation, affective, cognitive, social, and personal development of children and adolescents, evaluation of learning, individual differences, and implications of relevant theory and research.

**408A-408U. Language and Culture. (2 each)** Lecture, two hours. Exploration of complex nature of culture and impact of cultural diversity in urban classroom through class discussions, activities, and reflective expression, allowing novice teachers to understand and participate in rich cultural diversity of urban Los Angeles. By exploring culture as tool and target for increasing understanding of multicultural diversity, teachers may construct meaningful connections to students, communities, and home cultures. Each course may be taken independently for credit. Letter grading. **408A.** Spanish BCLAD Emphasis; **408B.** Latino/Latina Emphasis; **408C.** Asian American Emphasis; **408D.** African American Emphasis. **408U.** General Topics.

**409. Language Structure, Acquisition, and Development. (4)** (Formerly numbered 409A.) Lecture, four hours. Limited to credential program students. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research that provide a framework for schooling of English language learners. Rationale for bilingual/English language acquisition and development programs. Historical and current theories and models of language. Letter grading.

**410A-410B. Issues in Higher Education and K-12. (4-4)** Two-course sequence providing overview of higher education systems. **410A.** Designed to develop knowledge, understanding, and sensitivity to contemporary critical and emerging issues that impact higher education, with focus on both theory and practice. Study of relationships between issues in K-12 schooling and higher education. **410B.** Exploration of issues that effect both higher education and K-12 schooling, including restructuring and reform, standards, access and accountability, and new technologies. Emphasis on both theory and practice.

**411. Procedural Problems in Evaluation. (4)** (Formerly numbered 411B.) Lecture, four hours. Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing decision context, and reporting evaluation results. Letter grading.

- 413A. Methodology for Primary Language Instruction. (3)** Lecture, two hours; discussion, one hour. Offered and required for Spanish and Korean BCLAD credential. Consideration of models for developing cultural and language skills of home speakers of language of emphasis; practice in use of activities to develop student ability to use language for real-world and academic purposes in culturally appropriate ways. Consideration of models for teaching academic content in primary language for delivery of core curriculum to bilingual students.
- 413B. Culture of Emphasis. (3)** Lecture, two hours; discussion, one hour. Offered and required for Spanish and Korean BCLAD credential. Conducted in Spanish and Korean. Discussion of commonalities of culture of emphasis in its home country or countries; major historical periods and events; values, belief systems, and expectations; migration and immigration; historical and contemporary demography.
- 414A. Student Affairs Practice and Theory. (4)** (Formerly numbered 213A.) Lecture, two hours; discussion, two hours. Examination of needs for student affairs services, range of services, their philosophical and empirical rationale, and their organization and evaluation to provide a knowledge base for developing theories of practice. Ongoing involvement in a cooperative learning project to examine these issues both as team members and as individuals. Letter grading.
- 414B. Legal and Ethical Issues in Student Affairs. (4)** (Formerly numbered 213B.) Lecture, two hours; discussion, two hours. Examination of legal and ethical issues that affect student affairs practices in higher education. Letter grading.
- 414C. Advanced Counseling Theory and Practice. (4)** (Formerly numbered 214B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Overview of intervention and prevention strategies for student affairs professionals, with emphasis on campus-as-community concept with crisis theory as a model, providing conceptual model for understanding counseling role of student affairs in higher education. Letter grading.
- 414D. Career Development and Interventions in Colleges. (4)** (Formerly numbered 214D.) Lecture, two hours; discussion, one hour; laboratory, one hour. Examination of challenges faced by college students of all ages in preparing for careers in a dynamic multicultural world economy and interventions for assisting them. Emphasis on understanding development and evaluation of interventions. Letter grading.
- 414E. Administration of Student Affairs. (4)** Overview of general knowledge and processes essential to effectively administer a program or service under student affairs. Examination of relationship between environmental factors and strategies for governing, planning, and managing student affairs programs and services.
- 415A. Assessment in Counseling Psychology. (4)** Requisites: courses 211A, 230A. Overview of rationale for and procedures used by counseling psychologists for assessing individuals in a multicultural society. Emphasis on standardized cognitive assessment instruments and specialized techniques for diagnosis, evaluation, and development of counseling strategies for at-risk populations. S/U or letter grading.
- 415B. Advanced Assessment in Counseling Psychology. (4)** Requisite: course 415A. Advanced course in assessment for counseling psychologists. Survey and demonstration of instruments of achievement, affective, and personality appraisal, with emphasis on testing and interplay between assessment and psychological functioning for reducing risks of failure in academic, personal, and social areas.
- 420A. Principles of Curriculum. (4)** Critical examination of basic concepts underlying determination of objectives, selection and organization of learning experiences, and evaluation process.
- 421A. Programs and Research in Early Childhood Education. (4)** Preparation: one course from development series. Examination of child care programs and research in early childhood education, including review of relation of research in developmental psychology and education to goals of early childhood education and day care.
- 421D. Parents and Community Agents in Child Development. (4)** Preparation: one course from development series. Critical review of theoretical basis and effectiveness of training programs for parents of young and elementary school-aged children; relation of preschool parent programs to family development and role of programs in the community.
- 421F. Issues in Application of Child Development and Educational Research to Social Policy. (4)** Relationships among policymakers and social scientists in development, implementation, and evaluation of policies affecting children and their families. Students learn to design and conduct interviews, analyze legislative documents, and present analyses to policymakers.
- 422. Inquiry into Schooling: Basic Issues. (4)** Critical examination of basic issues and problems in organization and reconstruction of precollegiate schooling. Consideration of historical development and changing functions of schooling in American society; school organization; schooling alternatives; problems in management of educational change.
- 423. The Humanistic Curriculum. (4)** Consideration of philosophical and cultural foundations of humanistic curricular strategies. Review of techniques and procedures of affective education with a view to their place in overall theory of teaching and learning.
- 424A. Social Studies in the Curriculum. (4)** Advanced study in social studies curriculum development; problems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on cognitive and affective learning in social science, with emphasis on experimental study of instructional programs.
- 424B. Reading in the Curriculum. (4)** Requisite: course 230A. Study of reading curricula and instructional procedures, with emphasis on rationale and research underlying their development and research comparing their effectiveness. S/U or letter grading.
- 424G. Curriculum Design for Bilingual Education. (4)** Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction applied to bilingual learner; language assessment; development of instructional component; program evaluation.
- 425. Principles for Teaching Exceptional Individuals. (4)** Approaches for teaching exceptional individuals in special and regular education programs. Principles and assumptions underlying alternative approaches. Emphasis on individualizing curriculum and classroom management. Field observation in local schools. Letter grading.
- 431A. Administration in Higher Education. (4)** Overview of college and university administration and introduction to policy research and analysis in postsecondary institutions. Case studies of administrative problems, policies, and practices. Management information systems, resource allocation, and issues related to responsibility, authority, and participation in administrative decisions.
- 431B. Curriculum and Instruction in Higher Education. (4)** Principles of curriculum and instruction in postsecondary programs. Theory and practices in goal setting, testing, media selection, and related instructional responsibilities. Preparing to teach college-level students.
- 432. Seminar: Professional Topics in Higher Education. (4)** Seminar, four hours. S/U or letter grading.
- 433A. Instructional Product Development. (4)** Examination of procedures employed in systematic development of instructional products. Students acquire competencies associated with those procedures.
- 433B. Technological Development in Educational Media. (4)** Requisite: course 433A. Theory, current problems, and anticipated trends in instrumentation and systems development for instructional applications and research, including computer-aided instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in educational research.
- 440C. Administration of the Instructional Program. (4)** Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs.
- 441A. Instructional Supervision A. (4)** Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners.
- 441B. Instructional Supervision B. (4)** Requisite: course 441A. Basic techniques of script-taping instructional episodes, planning teacher conferences through analysis of script-tapes, conducting and analyzing growth-evoking teacher conferences. Conducting mini-lessons to demonstrate elements of good instruction.
- 442B. Legal Aspects of Educational Management and Practice. (4)** Examination of structures and kinds of law governing educational systems in the U.S.; constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights.
- 443. Policy Analysis in Education. (4)** Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subdominants in policy-making process).
- 444B. Equality of Educational Opportunity through Desegregation and Finance Case Law. (4)** Requisite: course 442B. Concentrated review of definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.
- 447. Seminar: Educational Policy and Planning, Special Studies. (1 to 4)** S/U or letter grading.
- 448A. Urban School Leadership. (4)** Analysis of problems of urban school leadership. Emphasis on changing nature of the urban principalship, with considerable attention to role of other school and community agencies that interact with the urban school leader.
- 448B. Urban Leadership Laboratory. (4)** Analysis of and opportunity to practice human and technical skills requisite for success as an urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics.
- 450A. Leadership Capacity Building. (4)** Lecture, one hour; discussion, one hour; small group work, one hour. Limited to Educational Leadership Program students. Course taken in year one of Educational Leadership Program to help students with their communication and leadership capacities. Letter grading.
- 450B. Leadership Capacity Building. (4)** Lecture, one hour; discussion, one hour; small group work, one hour. Limited to Educational Leadership Program students. Course taken in year three of Educational Leadership Program to help students with their communication and leadership capacities. Letter grading.
- 451. Foundations of Organizations and Leadership. (4)** Lecture, four hours. Limited to Ed.D. students. Promotion of understanding of traditional and contemporary conceptions of leadership and organizational theory, with application of these conceptions to student professional work settings. Letter grading.
- 452A-452B. Educational Enterprise. (4-4)** Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to study K-16 education. Letter grading. **452A.** Focus on purposes of education governance, finance, access, and equity. **452B.** Requisite: course 452A. Focus on educational environments, organizations, and curriculum and instruction.
- 453. Technology in Education: Learning and Leading with Technology. (2)** Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Examination of roles of technology in educational institutions and leadership issues associated with these roles. Letter grading.
- 454. Introduction to Action Research. (2)** Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Elements of organization research, including diagnosis forming partnerships, gathering and analyzing data, and designing interventions. Letter grading.
- 455A-455B-455C. Education, Inquiry, and Writing. (2-2-2)** Discussion, one hour; laboratory, one hour; lecture/workshop, eight hours per month. Limited to Educational Leadership Program Ed.D. students. Intended to assist students' professional development as writers, addressing style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method. Letter grading.

**456. Altering Structure and Culture of Schooling. (4)** Lecture, four hours; discussion, four hours. Limited to Educational Leadership Program students. Using applied orientation, examination of variety of approaches to organizational change and ways to sustain change. Letter grading.

**457. Student Development across K-16 Spectrum. (4)** Discussion, four hours. Limited to Educational Leadership Program students. Theories of student development applicable to K-12 and postsecondary education. Focus on educational influences on self and others. Letter grading.

**458A-458D. Practicum: Culminating Project. (2 each)** Discussion, two hours. Preparation: completion of first- and second-year courses. Limited to Educational Leadership Program students. Development of culminating project (Ed.D. dissertation) and its implementation to improve educational practice. S/U grading.

**460. Seminar: Special Issues in Evaluation. (4)** Topics and instructors vary each term. Recent emphases included evaluation utilization and cost-effectiveness evaluation.

**462. Seminar: Community College. (4)** Topics include problems and practices in community college formation, instruction, student flow, administration, and/or evaluation.

**470A. Seminar: Large Systems and Individual Schools. (4)** Seminar, four hours. S/U or letter grading.

**470B. Seminar: Educational Government. (4)** Seminar, four hours. S/U or letter grading.

**481. Knowledge and Inquiry in the Classroom. (4)** Logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations.

**489. Instructional Strategies in Education. (4)** Methods for academic instruction, including research and active participation in the adversary approach, forms of debate, role playing, interaction process analysis, and feedback instruments. Practical emphasis on social sciences and humanities instruction, K-12.

**490A. Instructional Decision Making. (4)** Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies.

**491. Curricular Decision Making. (4)** (Formerly numbered 491A-491B.) Lecture, two hours; discussion, two hours. Examination of alternative solutions for practical problems that classroom teachers face in making curricular decisions. Analysis of influences of psychological, societal, and institutional factors in curricular decisions. Letter grading.

**492. Evaluation of Teaching and Learning. (4)** Relationship between appraisal instruments and information required for making decisions about teachers, pupils, and materials. Recent developments in evaluation of teaching and learning; use of modern appraisal techniques in classroom settings.

**495A-495B-495C. Resident Seminars. (6-6-6)** Seminar, four hours; site-based fieldwork, two hours. Students meet in individual sessions with instructors and other field support faculty and in team and cluster cohorts for university-school partnership, in addition to regular seminars to debrief field experiences and continue study of curriculum, instruction, and assessment issues. Research opportunities, additional methods in content areas for CLAD/BCLAD, and preparation of M.Ed. portfolio and for M.Ed. defense included. Letter grading.

**498A-498B-498C. Directed Field Experience. (2 to 8 each)** Clinic, to be arranged. Field experiences designed to increase understanding of student fields of study. S/U or letter grading.

**499A-499B-499C. Advanced Directed Field Experience. (4 to 8 each)** May be repeated for credit.

**501. Cooperative Program in Special Education. (2 to 8)** Preparation: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Independent Study. (6 to 12)** Individual study or research for graduate students. May be repeated for credit.

**597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations. (6 to 12)** Individual study for master's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U grading.

**598. Thesis Research. (6 to 12)** Research for and preparation of master's thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Dissertation Research. (6 to 12)** Research for and preparation of doctoral dissertation. May be repeated for credit. S/U grading.

## ELECTRICAL ENGINEERING

*Henry Samueli School of Engineering  
and Applied Science*

Oscar M. Stafsudd, Ph.D., *Vice Chair*  
John D. Villasenor, Ph.D., *Vice Chair*

### Professors

Asad A. Abidi, Ph.D.  
Abeer A.H. Alwan, Ph.D.  
A.V. Balakrishnan, Ph.D.  
Elliott R. Brown, Ph.D.  
Frank M.C. Chang, Ph.D.  
Harold R. Fetterman, Ph.D.  
Warren S. Grundfest, M.D., FACS  
Tatsuo Itoh, Ph.D. (*TRW Professor of Electrical Engineering*)  
Stephen E. Jacobsen, Ph.D., *Associate Dean*  
Rajeev Jain, Ph.D.  
Bahram Jalali, Ph.D.  
Chandrashekhar J. Joshi, Ph.D.  
William J. Kaiser, Ph.D.  
Nhan Levan, Ph.D.  
Jia-Ming Liu, Ph.D.  
Warren B. Mori, Ph.D.  
Dee-Son Pan, Ph.D.  
C. Kumar N. Patel, Ph.D.  
Gregory J. Pottie, Ph.D.  
Yahya Rahmat-Samii, Ph.D.  
Behzad Razavi, Ph.D.  
Vwani P. Roychowdhury, Ph.D.  
Izhak Rubin, Ph.D.  
Henry Samueli, Ph.D.  
Oscar M. Stafsudd, Ph.D.  
John D. Villasenor, Ph.D.  
Chand R. Viswanathan, Ph.D.  
Kang L. Wang, Ph.D.  
Paul K.C. Wang, Ph.D.  
Alan N. Willson, Jr., Ph.D., *Associate Dean*  
Jason C.S. Woo, Ph.D.  
Ming-C. Wu, Ph.D.  
Eli Yablonovitch, Ph.D.  
Kung Yao, Ph.D.

### Professors Emeriti

Frederick G. Allen, Ph.D.  
Francis F. Chen, Ph.D.  
Robert S. Elliott, Ph.D.  
Ellis F. King, M.S.  
Richard E. Mortensen, Ph.D.  
H.J. Orchard, M.Sc.  
Frederick W. Schott, Ph.D.  
Gabor C. Temes, Ph.D.  
Donald M. Wiberg, Ph.D.  
Jack Willis, B.Sc.

### Associate Professors

Babak Daneshhrad, Ph.D.  
Ali H. Sayed, Ph.D.  
Mani B. Srivastava, Ph.D.  
Lieven Vandenberghe, Ph.D.  
Ingrid M. Verbauwhede, Ph.D.

### Assistant Professors

Jack W. Judy, Ph.D.  
William H. Mangione-Smith, Ph.D.  
Fernando G. Paganini, Ph.D.  
Richard D. Wesel, Ph.D.  
C.-K. Ken Yang, Ph.D.

### Adjunct Professors

Nicolaos G. Alexopoulos, Ph.D.  
Donald Arnush, Ph.D.  
Giorgio Franceschetti, Ph.D.  
Paul T. Greiling, Ph.D.  
Brian H. Kolner, Ph.D.  
Neville C. Luhmann, Jr., Ph.D.  
Joel Schulman, Ph.D.  
Pyotr Y. Ufimtsev, Ph.D.

### Adjunct Associate Professors

Nicholas Bambos, Ph.D.  
Bijan Houshmand, Ph.D.  
Kenneth W. Iliff, Ph.D.  
Helen R. Na, Ph.D.  
Kristofer S.J. Pister, Ph.D.

### Adjunct Assistant Professors

Charles Chien, Ph.D.  
Robert J. Greenberg, Ph.D.

## Scope and Objectives

The Electrical Engineering Department emphasizes teaching and research in the fields of communications and telecommunications, control systems, electromagnetics, engineering optimization/operations research, integrated circuits and systems, operations research, photonics and optoelectronics, plasma electronics, signal processing, and solid-state electronics. In each of these fields, the department has state-of-the-art research programs exploring exciting new concepts and developments. Undergraduate students receive a B.S. degree in Electrical Engineering. Graduate research and training programs leading to the M.S. and Ph.D. degrees are also offered.

Laboratories are available for research in the following areas: analog and digital electronics, hybrid integrated circuits, integrated semiconductor devices, microwave and millimeter wave electronics, solid-state electronics, fiber optics, lasers and quantum electronics, and applied plasma physics. The department is associated with the Center for High-Frequency Electronics and the Institute of Plasma and Fusion Research, two research centers at UCLA.

## Undergraduate Study

### Electrical Engineering B.S.

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are to provide (1) a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) specialized education in one branch of electrical engineering so that students develop expertise in it.

## The Major

Course requirements are as follows (189 minimum units required):

1. One engineering breadth course from Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A)
2. Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 110L, 113, 115A, 115AL, 121B, 131A, 132A, 141, 161, 172, Mathematics 113 or 132, Mechanical and Aerospace Engineering 192A
3. Any five major field elective courses selected from those offered by the Electrical Engineering Department, including at minimum 4 units of laboratories and one design course. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments
4. Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 32; Electrical Engineering 1, 2, 5C (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements

## Biomedical Engineering Option

Course requirements are as follows (196 minimum units required):

1. Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 110L, 113, 114D, 115A, 115AL, 121B, 131A, 132A, 141, 161, Mathematics 113 or 132, Mechanical and Aerospace Engineering 103, M105A, 192A
2. Life Sciences 1 (satisfies HSSEAS GE life sciences requirement), 2, 3
3. Three technical electives, including one course selected from Electrical Engineering 115B, 115C, 142, 172; the remaining two courses may be selected from the above list and/or from Biomedical Engineering C101, CM102, CM103, Chemical Engineering CM133, Computer Science M196B, CM196L, Electrical Engineering 176
4. Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL; Electrical Engineering 1, 2, 5C (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and

Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements

## Computer Engineering Option

Course requirements are as follows (190 minimum units required):

1. One engineering breadth course from Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A)
2. Computer Science 111, 180, Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 110L, 113, 115A, 115AL, 115C, 116B, M116C (or Computer Science M151B), M116D (or Computer Science M152B), M116L (or Computer Science M152A), 121B, 131A, Mathematics 113 or 132, Mechanical and Aerospace Engineering 192A
3. Three technical elective courses, with at least one from item a and one from item b: (a) Electrical Engineering 132A, either Computer Science 118 or Electrical Engineering 132B; (b) Electrical Engineering 114D, 115B, 115D, 141, 142
4. Chemistry and Biochemistry 20A; Computer Science 32, 33; Electrical Engineering 1, 2, 5C (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Electrical Engineering offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Electrical Engineering.

## Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

Students entering the Engineer or Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Applicants are encouraged to apply online. Application forms, including a departmental supplement to the application, may be found at <http://www.ee.ucla.edu> or by writing to the Electrical Engineering Department, 56-125B Engineering IV, UCLA, Box 951594, Los Angeles, CA 90095-2647 or to the Office of the Associate Dean for Academic and Student Affairs, Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601.

## Master's Degree

For fields, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans, except for the fields of integrated circuits and systems and solid-state electronics which are thesis plan only. At least nine courses are required, five of which must be graduate courses. A majority of the courses must be in or related to electrical engineering and belong to one of the specialized major fields, as outlined in *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and departmental material. Some fields require special requisites, more than five graduate courses, and special conditions for use of 500-series courses.

## Doctoral Degree

Fields include communications and telecommunications; control systems; embedded computing systems; electromagnetics; engineering optimization/operations research; integrated circuits and systems; photonics and optoelectronics; plasma electronics; signal processing; solid-state electronics.

There is no formal course requirement for the Ph.D. degree, and students theoretically may substitute coursework by examinations. Normally, however, students take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields. The major field has a scope corresponding to a

body of knowledge contained in six courses, at least four of which are graduate courses, plus the current literature in the area of specialization. Each major field is described in a Ph.D. major field syllabus. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. If students fail to satisfy the minor field requirements through coursework, a minor field examination may be taken. The minor fields are usually selected to support the major field and are usually subsets of other major fields.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Written and oral qualifying examinations are required. The written qualifying examination is known as the Ph.D. preliminary examination. After mastering the body of knowledge defined in the major field, students take the preliminary examination, which typically consists of both written and oral parts (the oral part may not be required in some major fields).

Following successful completion of the preliminary examination, students take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research, as well as a review of the dissertation prospectus.

## Electrical Engineering

### Lower Division Courses

**1. Physics for Electrical Engineers. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Mathematics 32B, 33B, Physics 1A, 1B. Introduction to modern physics and electromagnetism with an engineering orientation. Emphasis on mathematical tools necessary to express and solve Maxwell equations. Relation of these concepts to waves propagating in free space, including dielectrics and optical systems. Letter grading.

**2. Physics for Electrical Engineers. (4)** (Not the same as course 2 prior to Winter Quarter 1999.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 1. Introduction to modern physics necessary to understand solid-state devices, including elementary quantum theory, Fermi energies, and concept of electrons in solids. Derivation of electrical properties of holes and junctions. Letter grading.

**3. Principles and Advances in Electrical Engineering. (4)** (Formerly numbered 2.) Lecture, three hours; outside study, nine hours. Open to freshmen and sophomores outside the School of Engineering and Applied Science. Designed to meet general education requirements of nonengineering students. Particularly intended for humanities and arts students. Topics include elementary treatment of fundamental concepts and advances in electrical engineering. Letter grading.

**5C. Introduction to UNIX and C. (4)** Lecture, three hours; discussion, one hour; laboratory, five hours; outside study, three hours. Introduction to UNIX environment and C programming language. UNIX basics: file structure and manipulation. Technical document preparation. C-shell programming. Elementary C language concepts: input/output, variable types, operators, statements, arrays, and functions. Letter grading.

**10. Circuit Analysis I. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 1 or Physics 1C. Corequisite: Mathematics 33A. Introduction to linear circuit analysis. Resistive circuits, Kirchhoff laws, operational amplifiers, node and loop analysis, Thevenin and Norton theorem, capacitors and inductors, duality, first-order circuits, step response, second-order circuits, natural response, forced response. Letter grading.

**M16. Logic Design of Digital Systems. (4)** (Same as Computer Science M51A.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Physics 1C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.

### Upper Division Courses

**100. Electrical and Electronic Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 1 or Physics 1C, Mathematics 33A, 33B. Electrical quantities, linear circuit elements, circuit principles, signal waveforms, transient and steady state circuit behavior, semiconductor diodes and transistors, small signal models, and operational amplifiers. Letter grading.

**101. Engineering Electromagnetics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 1 or Physics 1C, Mathematics 32A and 32B, or 33A and 33B. Electromagnetic field concepts, waves and phasors, transmission lines and Smith chart, transient responses, vector analysis, introduction to Maxwell equations, static and quasi-static electric and magnetic fields. Letter grading.

**102. Systems and Signals. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 1 or Physics 1C, Mathematics 33A, 33B. Elements of differential equations, first- and second-order equations, variation of parameters method and method of undetermined coefficients, existence and uniqueness. Systems: input/output description, linearity, time-invariance, and causality. Impulse response functions, superposition and convolution integrals. Laplace transforms and system functions. Fourier series and transforms. Frequency responses, responses of systems to periodic signals. Sampling theorem. Letter grading.

**103. Applied Numerical Computing. (4)** Lecture, three hours; discussion, one hour; outside study, 11 hours. Requisites: course 5C or Computer Science 31 or Civil Engineering 15 or Mechanical and Aerospace Engineering 20, Mathematics 33B. Introduction to numerical analysis and computing techniques: root finding, matrix computations for systems of linear equations, systems of nonlinear equations, numerical methods for ordinary differential equations, least squares, eigenvalue/eigenvector problem, applications to engineering problems. Letter grading.

**110. Circuit Analysis II. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 10. Corequisite: course 102. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Letter grading.

**110L. Circuit Measurements Laboratory. (2)** Laboratory, four hours; outside study, two hours. Requisite: course 10 or 100. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm's law, voltage and current division, Thevenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles. Letter grading.

**113. Digital Signal Processing. (4)** Lecture, three hours; discussion, one hour; outside study, nine hours. Requisites: courses 102, 110. Relationship between continuous-time and discrete-time signals. Z-transform. Discrete Fourier transform. Fast Fourier transform. Structures for digital filtering. Introduction to digital filter design techniques. Letter grading.

**113L. Digital Signal Processing Laboratory. (2)** Laboratory, four hours; outside study, two hours. Requisite: course 113. Recommended: Computer Science M151B. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Letter grading.

**114D. Speech and Image Processing Systems Design. (4)** (Formerly numbered 114.) Lecture, three hours; discussion, one hour; laboratory, two hours; outside study, six hours. Requisite: course 113. Design principles of speech and image processing systems. Speech production, analysis, and modeling in first half of course; design techniques for image enhancement, filtering, and transformation in second half. Lectures supplemented by laboratory implementation of speech and image processing tasks. Letter grading.

**115A. Analog Electronic Circuits I. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 110. Review of physics and operation of diodes and bipolar and MOS transistors. Equivalent circuits and models of semiconductor devices. Analysis and design of single-stage amplifiers. DC biasing circuits. Small-signal analysis. Operational amplifier systems. Letter grading.

**115AL. Analog Electronics Laboratory I. (2)** Laboratory, four hours; outside study, two hours. Requisites: courses 110L, 115A. Experimental determination of device characteristics, resistive diode circuits, single-stage amplifiers, compound transistor stages, effect of feedback on single-stage amplifiers. Letter grading.

**115B. Analog Electronic Circuits II. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 115A. Analysis and design of differential amplifiers in bipolar and CMOS technologies. Current mirrors and active loads. Frequency response of amplifiers. Feedback and its properties. Stability issues and frequency compensation. Letter grading.

**115BL. Analog Electronics Laboratory II. (4)** Laboratory, four hours; outside study, eight hours. Requisites: courses 115AL, 115B. Experimental and computer studies of multistage, wideband, tuned, and power amplifiers, and multiloop feedback amplifiers. Introduction to thick film hybrid techniques. Construction of amplifier using hybrid thick film techniques. Letter grading.

**115C. Digital Electronic Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 115A, Computer Science M51A. Recommended: courses 115B, 121A. Transistor-level digital circuit analysis and design. Modern logic families (TTL, ECL, NMOS, CMOS), integrated circuit (IC) layout, MSI digital circuits (flipflops, registers, counters, PLAs, etc.), computer-aided simulation of digital circuits. Letter grading.

**115D. Design Studies in Electronic Circuits. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 115B, 115C. Applications of distributed circuits. Operational amplifier applications and limitations. Power amplifiers. Feedback and stability. Precision analog circuits. Analysis and design of operational amplifiers. Noise in electronic circuits. Design of oscillators, phase-locked loops, and frequency synthesizers. Introduction to design of analog-to-digital and digital-to-analog converters. Letter grading.

**116B. VLSI System Design. (4)** Lecture, three hours; discussion, one hour; laboratory, four hours; outside study, four hours. Requisites: courses 115C, M116C (or Computer Science M151B), M116D (or Computer Science M152B). Familiarity with digital circuit, logic design, and computer architecture assumed. VLSI design from a system perspective, with focus on (1) core VLSI architecture concepts such as datapath design, clocking, power, speed, area trade-off, input/output packaging, etc. and (2) behavioral, register-transfer, logic, and physical-level structured VLSI design using CAD tools and hardware description languages such as VHDL. Letter grading.

**M116C. Computer Systems Architecture. (4)** (Formerly numbered 116C.) (Same as Computer Science M151B.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course M16 or Computer Science M51A, Computer Science 33. Recommended: course M116L or Computer Science M152A. Machine organization and design, formal descriptions, comparative study of machine instruction sets and formats, data representation and floating-point, addressing structures, mechanization of procedure calls, memory organization and management, microprogramming, input/output (I/O) processing and interrupts, and reliability aspects. Letter grading.

**M116D. Digital Design Project Laboratory. (4)** (Same as Computer Science M152B.) Laboratory, four hours; discussion, two hours; outside study, six hours. Requisite: course M116C or Computer Science M151B. Design and implementation of complex digital sub-systems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement designs and to document and give oral presentations of their work. Letter grading.

**M116L. Introductory Digital Design Laboratory. (2)** (Same as Computer Science M152A.) Laboratory, four hours; outside study, two hours. Requisite: course M16 or Computer Science M51A. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

**121A. Physical Principles of Semiconductor Devices. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 2 or Physics 1C, Materials Science 14. Introduction to physics of semiconductors; survey of equilibrium and nonequilibrium electronic processes in semiconductors; principles of operation and design of p-n junction devices. Fabrication of semiconductor devices. Letter grading.

**121B. Principles of Semiconductor Device Design. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 121A. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Letter grading.

**122AL. Semiconductor Devices Laboratory. (4)** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 121A, 121B (may be taken concurrently). Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography. Letter grading.

**123A. Fundamentals of Solid-State I. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 2 or Physics 1C. Limited to junior/senior engineering majors. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state. Crystal structure, energy levels in solids, and band theory and semiconductor properties. Letter grading.

**123B. Fundamentals of Solid-State II. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric, magnetic, and superconducting properties. Letter grading.

**124. Semiconductor Physical Electronics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 123A. Band structure of semiconductors, experimental probes of basic band structure parameters, statistics of carriers, carrier transport properties at low fields, excess carrier transport properties, carrier recombination mechanisms, heterojunction properties. Letter grading.

**129D. Semiconductor Processing and Device Design. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 121A, 121B. Introduction to CAD tools used in integrated circuit processing and device design. Device structure optimization tool is based on PISCES; process integration tool is based on SUPREM. Course familiarizes students with the tools. Using CAD tools, a CMOS process integration to be designed. Letter grading.

**131A. Probability. (4)** Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisites: course 102, Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and vectors, distributions and densities, moments, characteristic functions, and limit theorems. Applications to communication, control, and signal processing. Introduction to computer simulation and generation of random events. Letter grading.

**131B. Introduction to Stochastic Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Introduction to concepts of stochastic processes, emphasizing continuous- and discrete-time stationary processes, correlation function and spectral density, linear transformation, and mean-square estimation. Applications to communication, control, and signal processing. Introduction to computer simulation and analysis of stochastic processes. Letter grading.

**132A. Introduction to Communication Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 102, 131A. Properties of signals and noise. Baseband pulse and digital signaling. Bandpass signaling techniques. Communication systems: digital transmission, frequency-division multiplexing and telephone systems, satellite communication systems. Performance of communication systems in presence of noise. Letter grading.

**132B. Data Communications and Telecommunication Networks. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Layered communications architectures. Queueing system modeling and analysis. Error control, flow and congestion control. Packet switching, circuit switching, and routing. Network performance analysis and design. Multiple-access communications: TDMA, FDMA, polling, random access. Local, metropolitan, wide area, integrated services networks. Letter grading.

**136. Introduction to Engineering Optimization Techniques. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 103, Mathematics 32A, 33A. Introduction to optimization techniques for engineering and science students. Minimization of unconstrained functions of several variables: steepest descent, Newton/Raphson, conjugate gradient, and quasi-Newton methods. Rates of convergence. Methods for constrained minimization: introduction to linear programming and gradient projection methods. Lagrangian methods. Students expected to use SEASnet computers. Letter grading.

**141. Principles of Feedback Control. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 102. Mathematical modeling of physical control systems in form of differential equations and transfer functions. Design problems, system performance indices of feedback control systems via classical techniques, root-locus and frequency-domain methods. Computer-aided solution of design problems from real world. Letter grading.

**142. Linear Systems: State-Space Approach. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. State-space methods of linear system analysis and synthesis, with application to problems in networks, control, and system modeling. Letter grading.

**150DL. Photonic Sensor Design Laboratory. (4)** Lecture, two hours; laboratory, four hours; outside study, eight hours. Limited to seniors. Multidisciplinary course with lectures and laboratory experiments on optical sensors. Fundamentals of intensity and interference-based transducers, polarimeters, multiplexing and sensor networks, physical and biomedical sensors. Design and implementation of optical gyroscope, computer interfacing, and signal processing. Letter grading.

**M150L. Introduction to Micromachining and Microelectromechanical Systems Laboratory. (4)** (Formerly numbered 151A.) (Same as Biomedical Engineering M150L and Mechanical and Aerospace Engineering M180L.) Lecture, three hours; laboratory, four hours; outside study, five hours. Requisites: course 1 or Physics 1C, Chemistry 20A. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce a variety of MEMS, including microstructures, microsensors, and microactuators. Students fabricate set of basic MEMS structures in hands-on microfabrication laboratory. Letter grading.

**151DL. Microelectromechanical Systems Design. (4)** Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisites: courses 115A, 115B. Microelectromechanical systems design, combining lecture and laboratory instruction on microsensor and microactuator fundamental operating principles and high-resolution electronic measurement methods for transducers. Emphasis on design of transducers and interface systems using device and system-level tools. Letter grading.

**161. Electromagnetic Waves. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 101. Time-varying fields and Maxwell equations, plane wave propagation and interaction with media, energy flow and Poynting vector, guided waves in waveguides, phase and group velocity, radiation and antennas. Letter grading.

**162A. Wireless Communication Links and Antennas. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 161. Basic properties of transmitting and receiving antennas and antenna arrays. Array synthesis. Adaptive arrays. Friis transmission formula, radar equations. Cell-site and mobile antennas, bandwidth budget. Noise in communication systems (transmission lines, antennas, atmospheric, etc.). Cell-site and mobile antennas, cell coverage for signal and traffic, interference, multipath fading, ray bending, and other propagation phenomena. Letter grading.

**162B. Antenna Design II. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 162A. Radiation patterns of horns, slots, and microstrip antennas. Equivalent source representations. Synthesis of sum and difference patterns. Dolph/Chebyshev excitation. Design of slot arrays with mutual coupling. Design of traveling wave antennas, reflectors, and lenses. Letter grading.

**163A. Introductory Microwave Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 161. Transmission lines description of waveguides, impedance transformers, power dividers, directional couplers, filters, hybrid junctions, nonreciprocal devices. Letter grading.

**163B. Microwave and Millimeter Wave Active Devices. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: courses 121A, 121B. MESFET, HEMT, HBT, IMPATT, Gunn, small signal models, noise model, large signal model, loadpull method, parameter extraction technique. Letter grading.

**163C. Active Microwave Circuits. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 115A, 161. Theory and design of microwave transistor amplifiers and oscillators; stability, noise, distortion. Letter grading.

**164AL. Microwave Wireless Laboratory I. (2)** Lecture, one hour; laboratory, three hours; outside study, three hours. Requisite: course 161. Measurement techniques and instrumentation for active and passive microwave components; cavity resonators, waveguides, wavemeters, slotted lines, directional couplers. Design, fabrication, and characterization of microwave circuits in microstrip and coaxial systems. Letter grading.

**164BL. Microwave Wireless Laboratory II. (2)** Lecture, one hour; laboratory, two hours; outside study, three hours. Requisite: course 161. Application of contemporary analytic design techniques to development of microwave amplifiers and oscillators incorporating state-of-the-art commercially available microwave transistors (silicon bipolar and GaAs MESFET). Letter grading.

**M171L. Data Communication Systems Laboratory. (2 to 4)** (Same as Computer Science M171L.) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: course M116L, Computer Science 171. Limited to seniors. Interpretation of analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzers, desktop computers, terminals, modems, PCs, and workstations in experiments on pulse transmission impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

**172. Introduction to Lasers and Quantum Electronics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101. Physical applications and principles of lasers, Gaussian optics, resonant cavities, atomic radiation, laser oscillation and amplification, cw and pulsed lasers. Letter grading.

**172L. Laser Laboratory. (4)** Laboratory, four hours; outside study, eight hours. Requisite or corequisite: course 172. Properties of lasers, including saturation, gain, mode structure. Laser applications, including optics, modulation, communication, holography, and interferometry. Letter grading.

**173. Photonic Devices. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101. Introduction to basic principles of photonic devices. Topics include crystal optics, dielectric optical waveguides, waveguide couplers, electro-optic devices, magneto-optic devices, acousto-optic devices, second-harmonic generation, optical Kerr effect, optical switching devices. Letter grading.

**173DL. Photonics and Communication Design Laboratory. (4)** (Formerly numbered 173L.) Laboratory, four hours; outside study, eight hours. Requisite: course 102. Recommended: course 132A. Introduction to measurement of basic photonic devices, including LEDs, lasers, detectors, and amplifiers; fiber-optic fundamentals and measurement of fiber systems. Modulation techniques, including A.M., F.M., phase and suppressed carrier methods. Letter grading.

**174. Semiconductor Optoelectronics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 172. Introduction to semiconductor optoelectronic devices for optical communications, interconnects, and signal processing. Basic optical properties of semiconductors, pin photodiodes, avalanche photodiode detectors (APD), light-emitting diodes (LED), semiconductor lasers, optical modulators and amplifiers, and typical photonic systems. Letter grading.

**175. Fourier Optics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: courses 102, 161. Two-dimensional linear systems and Fourier transforms. Foundation of diffraction theory. Analysis of optical imaging systems. Spatial filtering and optical information processing. Wavefront reconstruction and holography. Letter grading.

**176. Lasers in Biomedical Applications. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101. Study of different types of laser systems and their operation. Examination of their roles in current and projected biomedical applications. Specific capabilities of laser radiation to be related to each example. Letter grading.

**M185. Introduction to Plasma Electronics. (4)** (Same as Physics M122.) Lecture, three hours. Requisite: course 101 or Physics 110A. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

**190D. Systems Design. (4)** Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisites: courses 113, 132A, 141. Advanced systems design integrating communications, control, and signal processing subsystems. Different project to be assigned yearly in which student teams create high-performance designs that manage trade-offs among subsystems. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Only 2 units may be applied toward degree; the 2 units must be approved by petition and can be used only as a replacement for a regular electrical engineering laboratory course. Students may take additional 199 courses, but they may not be applied toward degree. Letter grading.

## Graduate Courses

**201A. VLSI Architectures and Design Methodologies. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M216A or Computer Science M258A. In-depth study of VLSI architectures and VLSI design methodologies for variety of applications in signal processing, communications, networking, embedded systems, etc. VLSI architectures choices range from ASICs, full custom approach, and special purpose processors to general purpose microprocessors. VLSI design methodologies take design specifications to implementation with aid of modern computer-aided design tools. Letter grading.

**202A. Embedded and Real-Time Systems. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. Methodologies and technologies for behavioral synthesis, system synthesis, and real-time issues in embedded systems. Topics include behavioral synthesis, hardware/software codesign, interface synthesis, scheduling, real-time constraints, real-time specification and modeling, transformation and estimations during synthesis and design optimization, concurrency, real-time OS, and embedded processors. Design for low power, verification, and debugging. Letter grading.

**204A. Advanced Compilers. (4)** Lecture, four hours; outside study, eight hours. Requisites: Computer Science 132, 251A. Designed for graduate computer science and electrical engineering students. Efficient allocating of shared resources (buses, function units, register files) is one of most important areas of research in modern computer architecture and compilation research. Consideration of instruction selection and scheduling, register assignment, and low-level transformation in context of concurrent microarchitecture (e.g., VLIW, superscalar, and most DSP). Topics include mapping to specific intro-processor communications buses, making effective use of hardware caches, and targeting special-purpose function units. Letter grading.

**206A. Mobile and Wireless Networked Computing Systems. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. Interdisciplinary course covering mobile computing, wireless networking, and multimedia processing techniques for computing systems capable of ubiquitous transport and processing of multimedia information. Topics include wireless and cellular fundamentals, network mobility management, low-power portable node architecture, mobile IP, wireless TCP, middleware and operating system issues, and context-aware adaptive applications. Letter grading.

**M208A. Analytical Methods of Engineering I. (4)** (Same as Mechanical and Aerospace Engineering M291A.) Lecture, four hours; outside study, eight hours. Requisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L_2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering. Letter grading.

**M208B. Analytical Methods of Engineering II. (4)** (Same as Mechanical and Aerospace Engineering M291B.) Lecture, four hours; outside study, eight hours. Requisite: course M208A or Mechanical and Aerospace Engineering M291A. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems. Letter grading.

**208C. Semigroups of Linear Operators and Applications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M208B. Semigroups of linear operators over Hilbert spaces. Generator and resolvent, generation theorems, Laplace inversion formula. Dissipative operators and contraction semigroups. Analytic semigroups and spectral representation. Semigroups with compact resolvents. Parabolic and hyperbolic systems. Controllability and stabilizability. Applications. Letter grading.

**210A. Adaptive Filtering. (4)** (Formerly numbered 210.) Lecture, four hours; outside study, eight hours. Requisites: courses 113, 131B, Mathematics 115A. Optimal filtering and estimation, Wiener filters, linear prediction. Steepest descent and stochastic gradient algorithms. Frequency-domain adaptive filters. Method of least squares, recursive least squares, fast fixed-order and order-recursive (lattice) filters. Misadjustment, convergence, and tracking analyses, stability issues, finite precision effects. Connections with Kalman filtering. Nonlinear adaptive filters. Letter grading.

**210B. Optimal Linear Estimation. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 113, 131B, 210A, Mathematics 115A. Unified treatment of fundamental concepts and basic notions in adaptive filtering, Wiener filtering, Kalman filtering, and  $H_\infty$  filtering. Emphasis on geometric, equivalence, and duality arguments. Development of array methods and fast algorithms. Discussion of practical issues. Examples of applications from fields of signal processing, communications, biomedical engineering, finance, and control. Letter grading.

**211A. Digital Image Processing I. (4)** Lecture, three hours; laboratory, four hours; outside study, five hours. Preparation: computer programming experience. Requisite: course 113. Fundamentals of digital image processing theory and techniques. Topics include two-dimensional linear system theory, image transforms, and enhancement. Concepts covered in lecture applied in computer laboratory assignments. Letter grading.

**211B. Digital Image Processing II. (4)** Lecture, three hours; laboratory, four hours; outside study, five hours. Requisite: course 211A. Advanced digital image processing theory and techniques. Topics include modeling, restoration, still-frame and video image compression, tomographic imaging, and multiresolution analysis using wavelet transforms. Letter grading.

**212A. Theory and Design of Digital Filters. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 113. Approximation of filter specifications. Use of design charts. Structures for recursive digital filters. FIR filter design techniques. Comparison of IIR and FIR structures. Implementation of digital filters. Limit cycles. Overflow oscillations. Discrete random signals. Wave digital filters. Letter grading.

**212B. Multirate Systems and Filter Banks. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 212A. Fundamentals of multirate systems; polyphase representation; multistage implementations; applications of multirate systems; maximally decimated filter banks; perfect reconstruction systems; paraunitary filter banks; wavelet transform and its relation to multirate filter banks. Letter grading.

**213A. Advanced Digital Signal Processing Circuit Design. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 212A, M216A. Digital filter design and optimization tools, architectures for digital signal processing circuits; integrated circuit modules for digital signal processing; programmable signal processors; CAD tools and cell libraries for application-specific integrated circuit design; case studies of speech and image processing circuits. Letter grading.

**M214A. Digital Speech Processing. (4)** (Formerly numbered 214A.) (Same as Biomedical Engineering M214A.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: course 113. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms, speech analysis/synthesis. Techniques include linear prediction, filter-bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids. Letter grading.

**214B. Advanced Topics in Speech Processing. (4)** Lecture, three hours; computer assignments, two hours; outside study, seven hours. Requisite: course M214A. Advanced techniques used in various speech-processing applications, with focus on speech recognition by humans and machine. Physiology and psychoacoustics of human perception. Dynamic Time Warping (DTW) and Hidden Markov Models (HMM) for automatic speech recognition systems, pattern classification, and search algorithms. Aids for hearing impaired. Letter grading.

**215A. Analog Integrated Circuit Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 115B. Analysis and design of analog integrated circuits. MOS and bipolar device structures and models, single-stage and differential amplifiers, noise, feedback, operational amplifiers, offset and distortion, sampling devices and discrete-time circuits, bandgap references. Letter grading.

**215B. Advanced Digital Integrated Circuits. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 115C, M216A. Analysis and comparison of modern logic families (CMOS, bipolar, BiCMOS, GaAs). MSI digital circuits (flipflops, registers, counters, PLAs). VLSI memories (ROM, RAM, CCD, bubble memories, EPROM, EEPROM) and VLSI systems. Letter grading.

**215C. Analysis and Design of RF Circuits and Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 215A. Principles of RF circuit and system design, with emphasis on monolithic implementation in VLSI technologies. Basic concepts, communications background, transceiver architectures, low-noise amplifiers and mixers, oscillators, frequency synthesizers, power amplifiers. Letter grading.

**215D. Analog Microsystem Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 215A. Analysis and design of data conversion interfaces and filters. Sampling circuits and architectures, D/A conversion techniques, A/D converter architectures, building blocks, precision techniques, discrete- and continuous-time filters. Letter grading.

**M216A. LSI in Computer System Design. (4)** (Same as Computer Science M258A.) Lecture, four hours; laboratory, four hours. Limited to graduate computer science and electrical engineering students. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Letter grading.

**M216B-M216C. LSI in Computer System Design. (4-4)** (Same as Computer Science M258B-M258C.) Lecture, four hours; laboratory, four hours. Requisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress and S/U or letter grading.

**M217. Biomedical Imaging. (4)** (Formerly numbered 217.) (Same as Biomedical Engineering M217.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: course 114D or 211A. Mathematical principles of medical imaging modalities: X-ray, computed tomography, positron emission tomography, single photon emission computed tomography, magnetic resonance imaging. Topics include basic principles of each imaging system, image reconstruction algorithms, system configurations and their effects on reconstruction algorithms, specialized imaging techniques for specific applications such as flow imaging. Letter grading.

**219A. Special Topics in Circuits and Signal Processing. (4)** Lecture, three hours; outside study, nine hours. Advanced treatment of topics selected from research areas in circuit theory, integrated circuits, or signal processing. Letter grading.

**221A. Physics of Semiconductor Devices I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 121A. Physical principles and design considerations of junction devices. Letter grading.

**221B. Physics of Semiconductor Devices II. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 121A. Principles and design considerations of field effect devices and charge-coupled devices. Letter grading.

**221C. Microwave Semiconductor Devices. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 121A. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors. Letter grading.

**222. Integrated Circuits Fabrication Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 2. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metalization. Introduction of advanced process simulation tools. Letter grading.

**223. Solid-State Electronics I. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 124, 270. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors. Recombination mechanisms, transport properties. Letter grading.

**224. Solid-State Electronics II. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties. Letter grading.

**225. Superlattices and Quantum Wells. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor quantum wells, superlattices, and tunnel structures. Quantum size effects and low-dimensional systems. Application to semiconductor devices, including negative resistance diodes, transistors, and detectors. Letter grading.

**229. Seminar: Advanced Topics in Solid-State Electronics. (4)** Seminar, four hours; outside study, eight hours. Requisites: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission. Letter grading.

**229S. Advanced Electrical Engineering Seminar. (2)** Seminar, two hours; outside study, six hours. Preparation: successful completion of Ph.D. major field examination. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on a tutorial topic and on a research topic in their dissertation area. May be repeated for credit. S/U grading.

**230A. Estimation and Detection in Communication and Radar Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Applications of estimation and detection concepts in communication and radar engineering; random signal and noise characterizations by analytical and simulation methods; mean square (MS) and maximum likelihood (ML) estimations and algorithms; detection under ML, Bayes, and Neyman/Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations. Letter grading.

**230B. Digital Communication Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 230A. Basic concepts of digital communication systems; representation of bandpass waveforms; signal space analysis and optimum receivers in Gaussian noise; comparison of digital modulation methods; synchronization and adaptive equalization; applications to modern communication systems. Letter grading.

**230C. Algorithms and Processing in Communication and Radar. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230A. Concepts and implementations of digital signal processing algorithms in communication and radar systems. Optimum dynamic range scaling for random data. Algorithms for fast convolution and transform. Spectral estimation algorithms. Parallel processing, VLSI algorithms, and systolic arrays. Letter grading.

**230D. Signal Processing in Communications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230C. Basic digital signal processing techniques for estimation and detection of signals in communication and radar systems. Optimization of dynamic range, quantization, and state constraints; DFT, convolution, FFT, NTT, Winograd DFT, systolic array; spectral analysis-windowing, AR, and ARMA; system applications. Letter grading.

**231A. Information Theory: Channel and Source Coding. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Fundamental limits on compression and transmission of information. Topics include limits and algorithms for lossless data compression, channel capacity, rate versus distortion in lossy compression, and information theory for multiple users. Letter grading.

**231E. Channel Coding Theory. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Fundamentals of error control codes and decoding algorithms. Topics include block codes, convolutional codes, trellis codes, and turbo codes. Letter grading.

**232A. Stochastic Modeling with Applications to Telecommunication Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Introduction to stochastic processes as applied to study of telecommunication systems and traffic engineering. Renewal theory; discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queueing analysis of basic telecommunication system models. Letter grading.

**232B. Telecommunication Switching and Queueing Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 232A. Queue modeling and analysis with applications to space-time digital switching systems and to integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, busy period, blocking, and stochastic process analysis for Markovian and non-Markovian models. Letter grading.

**232C. Telecommunication Architecture and Networks. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 232B. Analysis and design of integrated-service telecommunication networks and multiple-access procedures. Stochastic analysis of priority-based queueing system models. Queueing networks; network protocol architectures; error control; routing, flow, and access control. Applications to local-area, packet-radio, satellite, and computer communication networks. Letter grading.

**232D. Telecommunication Networks and Multiple-Access Communications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication systems. Topics include architectures, multiplexing and multiple-access, message delays, error/flow control, switching, routing, protocols. Applications to local-area, packet-radio, local-distribution, computer and satellite communication networks. Letter grading.

**232E. Graphs and Network Flows. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 136. Solution to analysis and synthesis problems which may be formulated as flow problems in capacity constrained (or cost constrained) networks. Development of tools of network flow theory using graph theoretic methods; application to communication, transportation, and transmission problems. Letter grading.

**233B. Wireless Communications Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230B. Various aspects of physical layer and medium access design for wireless communications systems. Topics include wireless signal propagation and channel modeling, single carrier and spread spectrum modulation for wireless systems, diversity techniques, multiple-access schemes, transceiver design and effects of nonideal components, hardware partitioning issues. Case study highlights system level trade-offs. Letter grading.

**233C. Mobile Multimedia Information Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 232C, Computer Science 218. Interdisciplinary course covering mobile networked computing, wireless communication, and multimedia processing for systems capable of ubiquitous transport and processing of multimedia information. Topics include radio propagation, wireless channels, cellular systems, network mobility management, low-power portable node architecture, middle ware, OS, and application issues. Letter grading.

**236A. Linear Programming. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear optimization. Geometry of linear programming. Duality. Simplex method. Interior-point methods. Decomposition and large-scale linear programming. Quadratic programming and complementary pivot theory. Engineering applications. Introduction to integer linear programming and computational complexity theory. Letter grading.

**236B. Nonlinear Programming. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 236A. Basic graduate course in nonlinear programming. Convex sets and functions. Engineering applications and convex optimization. Lagrange duality, optimality conditions, and theorems of alternatives. Unconstrained minimization methods. Convex optimization methods (interior-point methods, cutting-plane methods, ellipsoid algorithm). Lagrange multiplier methods and sequential quadratic programming. Letter grading.

**236C. Optimization Methods for Large-Scale Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 236B. Theory and computational procedures for decomposing large-scale optimization problems: cutting-plane methods, column generation, decomposition algorithms. Techniques for global continuous optimization: branch-and-bound methods, reverse convex programming, bilinear and biconvex optimization, genetic algorithms, simulated annealing. Introduction to combinatorial optimization. Letter grading.

**237. Dynamic Programming. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 232A, 236A or 236B. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Examples from inventory theory, finance, optimal control and estimation, Markov decision processes, combinatorial optimization, communications. Letter grading.

**239AS. Topics in Communication. (4)** Lecture, four hours; outside study, eight hours. Topics in one or more special aspects of communication systems, such as phase-coherent communication systems, optical channels, time-varying channels, feedback channels, broadcast channels, networks, coding and decoding techniques. May be repeated for credit with topic change. Letter grading.

**239BS. Topics in Operations Research. (4)** Lecture, four hours; outside study, eight hours. Treatment of one or more selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering, computer science, economics. May be repeated for credit with topic change. Letter grading.

**M240A. Linear Dynamic Systems. (4)** (Formerly numbered 240A.) (Same as Chemical Engineering M280A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: course 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

**240B. Linear Optimal Control. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 141, M240A. Introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design. Letter grading.

**M240C. Optimal Control. (4)** (Formerly numbered 240C.) (Same as Chemical Engineering M280C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: course 240B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

**241A. Stochastic Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131B. Fundamentals and applications of second-order theory stochastic processes. Correlation and spectral density. Gaussian process, processing by dynamic systems, Bayes rule and conditional expectation; mean-square estimation and Kalman filtering. Letter grading.

**241B. Kalman Filtering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M240A, 241A. Statistical estimation theory, estimation of signal parameters in additive noise. Kalman filter theory: basic theory, steady state and frequency domain analyses, on-line estimation and colored noise. Likelihood ratios, Gaussian signals in Gaussian noise. Letter grading.

**241C. Stochastic Control. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 240B, 241B. Estimation and control of linear discrete-time and continuous-time stochastic systems; separation theorem and applications; Kalman filtering. Letter grading.

**M242A. Nonlinear Dynamic Systems. (4)** (Formerly numbered 242.) (Same as Chemical Engineering M282A and Mechanical and Aerospace Engineering M272A.) Lecture, four hours; outside study, eight hours. Requisite: course M240A or Chemical Engineering M280A or Mechanical and Aerospace Engineering M270A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

**243. Robust and Optimal Control by Convex Methods. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M240A. Multivariable robust control, including H2 and H-infinity optimal control and robust performance analysis and synthesis against structured uncertainty. Emphasis on convex methods for analysis and design, in particular linear matrix inequality (LMI) approach to control. Letter grading.

**249S. Topics in Control. (4)** Seminar, four hours; outside study, eight hours. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control, nuclear reactors, process control, biomedical problems. May be repeated for credit with topic change. Letter grading.

**M250A. Microelectromechanical Systems (MEMS) Fabrication. (4)** (Formerly numbered 250A.) (Same as Biomedical Engineering M250A and Mechanical and Aerospace Engineering M280.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M150L. Advanced discussion of micromachining processes used to construct MEMS. Coverage of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

**M250B. Microelectromechanical Systems (MEMS) Device Physics and Design. (4)** (Formerly numbered 250B.) (Same as Biomedical Engineering M250B and Mechanical and Aerospace Engineering M282.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M250A. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

**250C. Microsensors and Microinstruments. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisite: course M250B. Fundamentals of microelectromechanical systems (MEMS) microsensors and microinstruments. Measurement principles for MEMS transducers. Design methods and design constraints for sensitivity and stability. Implementation of control methods for improving measurement sensitivity, linearity, and reproducibility. Design project required, with emphasis on integration of sensors and actuators. Letter grading.

**259S. Seminar: Microelectromechanical Systems. (2)** Seminar, two hours; outside study, four hours. Seminar on microelectromechanical systems (MEMS). Letter grading.

**260A-260B. Advanced Engineering Electrodynamics. (4-4)** Lecture, four hours; outside study, eight hours. Requisites: courses 161, 162A. Advanced treatment of concepts in electrodynamics and their applications to modern engineering problems. Waves in anisotropic, inhomogeneous, and dispersive media. Guided waves in bounded and unbounded regions. Radiation and diffraction, including optical phenomena. Partially coherent waves, statistical media. Letter grading.

**261. Microwave and Millimeter Wave Circuits. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 163A. Rectangular and circular waveguides, microstrip, stripline, finline, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits. Letter grading.

**262. Antenna Theory and Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 162A, 162B. Antenna patterns. Sum and difference patterns. Optimum designs for rectangular and circular apertures. Arbitrary side lobe topography. Discrete arrays. Mutual coupling. Design of feeding networks. Letter grading.

**263. Reflector Antennas Synthesis, Analysis, and Measurement. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 260A, 260B. Reflector pattern analysis techniques. Single and multireflector antenna configurations. Reflector synthesis techniques. Reflector feeds. Reflector tolerance studies, including systematic and random errors. Array-fed reflector antennas. Near-field measurement techniques. Compact range concepts. Microwave diagnostic techniques. Modern satellite and ground antenna applications. Letter grading.

**266. Computational Methods for Electromagnetics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmission lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and antennas. Letter grading.

**270. Applied Quantum Mechanics. (4)** Lecture, four hours; outside study, eight hours. Preparation: modern physics (or course 123A), linear algebra, and ordinary differential equations courses. Principles of quantum mechanics for applications in lasers, solid-state physics, and nonlinear optics. Topics include eigenfunction expansions, observables, Schrödinger equation, uncertainty principle, central force problems, Hilbert spaces, WKB approximation, matrix mechanics, density matrix formalism, and radiation theory. Letter grading.

**271. Classical Laser Theory. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 172. Microscopic and macroscopic laser phenomena and propagation of optical pulses using classical formalism. Letter grading.

**272. Dynamics of Lasers. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271. Ultrashort laser pulse characteristics, generation, and measurement. Gain switching, Q switching, cavity dumping, active and passive mode locking. Pulse compression and soliton pulse formation. Nonlinear pulse generation: soliton laser, additive-pulse mode locking, and parametric oscillators. Pulse measurement techniques. Letter grading.

**273. Nonlinear Optics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 172, 270. Nonlinear optical susceptibilities. Coupled-wave formulation. Crystal optics, electro-optics, and magneto-optics. Sum- and difference-frequency generation. Harmonic and parametric generation. Stimulated Raman and Brillouin scattering. Four-wave mixing and phase conjugation. Field-induced index changes and self-phase modulation. Letter grading.

**274. Fiber Optic System Design. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 173L and/or 174. Top-down introduction to physical layer design in fiber optic communication systems, including Telecom, Datacom, and CATV. Fundamentals of digital and analog optical communication systems, fiber transmission characteristics, and optical modulation techniques, including direct and external modulation and computer-aided design. Architectural-level design of fiber optic transceiver circuits, including preamplifier, quantizer, clock and data recovery, laser driver, and predistortion circuits. Letter grading.

**279S. Special Topics in Quantum Electronics. (4)** Lecture, four hours; outside study, eight hours. Current research topics in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrafast phenomena, fiber optics, and lightwave technology. May be repeated for credit. Letter grading.

**285A. Plasma Waves and Instabilities. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101, and M185 or Physics M122. Wave phenomena in plasmas described by macroscopic fluid equations. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydromagnetic waves, drift waves. Rayleigh-Taylor, Kelvin-Helmholtz, universal, and streaming instabilities. Application to experiments in fully and partially ionized gases. Letter grading.

**285B. Advanced Plasma Waves and Instabilities. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M185, and 285A or Physics 222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasmas, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques. Letter grading.

**M287. Fusion Plasma Physics and Analysis. (4)** (Same as Mechanical and Aerospace Engineering M237B.) Lecture, four hours; outside study, eight hours. Requisite: course M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker-Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts. Letter grading.

**296. Seminar: Research Topics in Electrical Engineering. (2)** Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in electrical engineering. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate electrical engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**475C. Manufacturing Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 475B. Modeling and analysis of manufacturing systems. Assembly and transfer lines. Facility layout and design. Group technology and flexible manufacturing systems. Planning and scheduling. Task management, machine setup, and operation sequencing. Manufacturing system models. Manufacturing information systems. Social, economic, environmental, and regulatory issues. Letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

## ENGINEERING SCHOOLWIDE PROGRAMS

*Henry Samueli School of Engineering  
and Applied Science*

UCLA  
6426 Boelter Hall  
Box 951601  
Los Angeles, CA 90095-1601  
(310) 825-2826  
<http://www.seas.ucla.edu/>

### Professors Emeriti

Edward P. Coleman, Ph.D.  
Herbert B. Nottage, Ph.D.  
Allen B. Rosenstein, Ph.D.  
Bonham Spence-Campbell, E.E.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including lan-

guage requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Henry Samueli School of Engineering and Applied Science offers the Master of Engineering (M.Engr.) degree (through the Engineering Executive Program) and the Engineer (Engr.) degree as schoolwide degrees.

### Admission

For information about degree programs in specific engineering majors, consult the departmental listing for that major.

### Master of Engineering

The Engineering Executive Program, leading to the M.Engr. degree, enrolls a limited number of students in a two-year work-study program. It is specifically designed for experienced professionals who intend to go on to high-level executive positions in industry and government.

In addition to the University minimum requirements, the following are required: (1) five years of responsible full-time professional experience in engineering, (2) some formal study in statistics, and (3) the Graduate Record Examination (GRE) General Test and Subject Test in Engineering, Mathematics, Business, or a related field. A screening interview with the coordinator of the Engineering Executive Program is required.

More information can be obtained from the Office of Academic and Student Affairs, Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall, (310) 825-1704.

### Engineer Degree

For information on admission to the program, see the admission section for the corresponding departmental doctoral program.

### Master's Degree

The field for this degree program is engineering management.

The M.Engr. degree is offered through the comprehensive examination plan. A total of 12 professional (400-series) courses are required for the degree. Students should consult with the graduate adviser for specific courses and departmental requirements and restrictions.

### Engineer Degree

The Henry Samueli School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that students in the Ph.D. program may either exit with an Engineer degree or earn the Engineer degree en route to one of the Ph.D. degrees offered by the school. Similarly, students in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs applies toward the minimum residence requirements and to the time limitation for the other program.

### Graduate Certificate of Specialization

A certificate of specialization is available in all areas of specialization offered by the Henry Samueli School of Engineering and Applied Science, except computer science. Requirements for admission are the same as for the M.S. degree. Details regarding the certificate programs may be obtained from each department office.

## Engineering

### Lower Division Courses

**95. Ethical and Professional Issues in Engineering and Computer Science. (4)** Lecture, four hours; discussion, one hour. Selected lectures, discussions, and oral and written reports related to profession of engineering. Lectures by practicing engineers, case studies, and small group projects on issues that involve conflicting demands on society. Letter grading.

**97. Introduction to Engineering Disciplines. (4)** Lecture, four hours; discussion, four hours; outside study, four hours. Introduction to engineering as a professional opportunity for freshman students by exploring difference between engineering disciplines and functions engineers perform. Development of skills and techniques for academic excellence through the team process. Investigation of national need underlying current effort to increase participation of historically underrepresented groups in the U.S. technological work force. P/NP grading.

### Graduate Courses

**200. Program Management Principles for Engineers and Professionals. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of necessary processes and procedures to successfully manage technology programs. Review of fundamentals of program planning, organizational structure, implementation, and performance tracking methods to provide program manager with necessary information to support decision-making process that provides high-quality products on time and within budget. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**470A-470D. The Engineer in the Technical Environment. (3 each)** Lecture, three hours. Limited to Engineering Executive Program students. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects. S/U or letter grading.

**471A-471B-471C. The Engineer in the General Environment. (3-3-1.5)** Lecture, three hours (courses 471A, 471B)/90 minutes (course 471C). Limited to Engineering Executive Program students. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. S/U or letter grading (course 471A); In Progress and S/U or letter grading (courses 471B, 471C).

**472A-472D. The Engineer in the Business Environment. (3-3-3-1.5)** Lecture, three hours (courses 472A, 472B, 472C)/90 minutes (course 472D). Limited to Engineering Executive Program students. Language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress and S/U or letter grading (credit to be given on completion of courses 472B and 472D).

**473A-473B. Analysis and Synthesis of a Large-Scale System. (3-3)** Lecture, two and one-half hours. Limited to Engineering Executive Program students. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

**495. Teaching Assistant Training Seminar. (4)** Seminar, four hours; outside study, eight hours. Preparation: appointment as a teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

## ENGLISH

Vincent P. Pecora, Ph.D.  
Jonathan F.S. Post, Ph.D.  
Karen E. Rowe, Ph.D.  
Gregory M. Sarris, Ph.D.  
Mark Seltzer, Ph.D.  
Debra K. Shuger, Ph.D.  
Valerie A. Smith, Ph.D.  
Robert N. Watson, Ph.D.  
Thomas R. Wortham, Ph.D.  
Stephen I. Yenser, Ph.D.

### Professors Emeriti

Paula Gunn Allen, Ph.D.  
Martha Banta, Ph.D.  
Charles A. Berst, Ph.D.  
Vinton A. Dearing, Ph.D.  
Robert W. Dent, Ph.D.  
Reginald A. Foakes, Ph.D.  
Patrick K. Ford, Ph.D.  
Robert A. Georges, Ph.D.  
Gerald J. Goldberg, Ph.D.  
Christopher W. Grose, Ph.D.  
George R. Guffey, Ph.D.  
Jascha Kessler, Ph.D.  
Robert S. Kinsman, Ph.D.  
V.A. Kolve, Ph.D.  
Richard A. Lanham, Ph.D.  
Richard D. Lehan, Ph.D.  
Maximilian E. Novak, D.Phil., Ph.D.  
Waldo W. Phelps, Ph.D.  
Florence Ridley, Ph.D.  
Alan Roper, Ph.D.  
William D. Schaefer, Ph.D.  
Paul R. Sellin, Ph.D.  
Paul D. Sheats, Ph.D.  
Peter L. Thorslev, Jr., Ph.D.  
Alexander Welsh, Ph.D.

### Associate Professors

Charles L. Batten, Jr., Ph.D.  
Ali Behdad, Ph.D.  
Helen Deutsch, Ph.D.  
Lowell Gallagher, Ph.D.  
Albert D. Hutter, Ph.D.  
Gwin Jack Kolb, Ph.D.  
Jinqi Ling, Ph.D.  
Arthur L. Little, Jr., Ph.D.  
David Wong Louie, M.F.A.  
Robert M. Maniquis, Ph.D.  
Claire E. McEachern, Ph.D.  
Harryste R. Mullen, Ph.D.  
Rafael Perez-Torres, Ph.D.  
Kenneth Reinhard, Ph.D.  
Sonia Saldivar-Hull, Ph.D.  
Jennifer A. Sharpe, Ph.D.  
Richard A. Yarborough, Ph.D.

### Assistant Professors

Jennifer L. Fleissner, Ph.D.  
Rachel C. Lee, Ph.D.  
Mark J. McGurl, Ph.D.  
Judith A. Rosen, Ph.D.

### Senior Lecturers S.O.E.

Jerome Cushman, A.B., B.S.L.S., *Emeritus*  
David Stuart Rodas, Ph.D.

### Lecturers

Stephen J. Dickey, Ph.D.  
Christopher M. Mott, Ph.D.

### Adjunct Professors

Russell Leong, M.F.A.  
Carolyn See, Ph.D.

### Adjunct Associate Professor

Keorapetse Kgositile, M.F.A.

## Scope and Objectives

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is the primary language, and to the study of the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on British, American, and world literary history and requires of its undergraduate majors a firsthand acquaintance with many of the more influential writers who have helped during the past millennium to make English a global language that possesses richly diverse and highly influential literary cultures. Within the department, students are able to pursue a variety of approaches to the study of literary culture beyond the strictly historical — literary criticism, for example, or those that draw on the resources of such disciplines as sociology, psychology, and philosophy. Within the B.A. degree in English, qualified students may elect a concentration either in creative writing or in world literature. The department also offers a Bachelor of Arts degree in American Literature and Culture.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

## Undergraduate Study

Students must have completed the Subject A requirement before taking any courses in English (other than English Composition A or 2). For further information regarding Subject A, see the Undergraduate Study section of this catalog.

## Extra-Departmental Requirement in Foreign Literature or Foreign Language

All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or foreign literature, including foreign literature in translation (see course list-

ings under Foreign Literature in Translation later in this chapter). Italian 46 may not be applied. Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high school level through the IGETC program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a P/NP grading basis.

## English B.A.

The Bachelor of Arts degree has concentrations in creative writing and in world literature. An international students program in English is also offered.

### Preparation for the Major

*Required:* English Composition 3, English 4W, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

### Transfer Students

To be admitted as English majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

### The Major

*Required:* Twelve upper division English courses, including 141A or 141B, 142A, 142B, 143, at least one course from each of the 150 and 180 series, one course from 160 through 164, and five additional courses of which three must be selected from 140A, 140B, 142C, or 150A through M197D.

Students are encouraged to choose additional electives from courses 140A through M197D. English 140A is especially recommended if they plan graduate work in literature. They may wish to select several courses in the relevant classical and postclassical foreign literatures and thought.

### Optional Concentrations and Special Programs

The department offers optional concentrations in creative writing and in world literature, as well as a special program for international students. For all programs, the regular Preparation for the Major sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students should consult the departmental counselor before selecting and declaring one of them as a concentration.

#### Creative Writing Concentration

The creative writing concentration consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from 133 or 134, taken in a single genre (poetry or short story), three literature courses paralleling the creative

writing genre, and four electives selected from courses 140A through 190. Students may declare this program as a concentration only after they have completed three creative writing workshops in a single genre. Students may not enroll in more than one workshop (course 133, 134, or 135) per term or in more than two workshops with the same instructor. No student may take for credit more than three workshops in any one creative writing genre. Students planning to select this program should contact the departmental counselor for further details.

#### World Literature Concentration

The world literature concentration consists of nine upper division courses in English or American literature and four upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine courses in English must include 141A, 141B, or 143; 142A and 142B; at least one course from the 150 series; and four electives selected from courses 140A through M197D (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

#### International Students Program

The department offers a special program in English to bona fide international students whose native language is other than English. For this program, students must satisfy all requirements listed under Preparation for the Major; they may fulfill the departmental foreign language requirement with their own native language. The following 12 courses are required for the program itself: English as a Second Language 106, 108, 109; two courses from English 100 through 199; 122; 142A, 142B; and four additional courses from 140A through M197D. Students who complete this program and wish to pursue graduate study should consult the departmental counselor about programs of study and requirements for admission.

## American Literature and Culture B.A.

### Preparation for the Major

*Required:* English Composition 3, English 4W, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

### Transfer Students

To be admitted as American Literature and Culture majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

## The Major

*Required:* Twelve upper division courses, including six in American literature selected from English 170A through 179, two of which must be devoted to literature written before 1900 (courses 170A, 170B, 171A, 171B, 173A, 174A); two courses from 142A, 142B, 143; one seminar from 187, 188, 189, or when treating American topics, 180X; one course from M101A, M101B, M102A, M102B, 103, M104A, M104B, M104C, M105A, M105B, 106, M107A (also M107C when treating American topics or figures), or 109; and two courses from 100 through 199 or from courses pertaining to American culture offered by other departments (of those courses applied toward the major from outside the Department of English, both must usually come from one department or program and appear on a list of approved courses for the major).

## English/Greek B.A.

See Classics.

## English/Latin B.A.

See Classics.

## Honors Program

### Admission

The honors program is open to departmental majors with a 3.5 departmental and a 3.25 overall grade-point average. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by Winter Quarter of the junior year. For application forms and further information, contact the departmental counselor.

### Requirements

All honors students are required to take English 140A or 140B during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In Spring Quarter of the junior year, they must take course 199HA. During Fall and Winter Quarters of the senior year, they take courses 199HB and 199HC, in which they write a thesis under the direction of a faculty member. The thesis determines whether they receive highest honors, honors, or no honors.

## Subject Matter Preparation Program for Single Subject Credential in English

Students interested in obtaining a single subject secondary school credential in English should consult with a departmental counselor regarding the requirements for a waiver from the English Single Subject Assessment Test (SSAT) and the Praxis Examination, both of which are required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possi-

ble, because the program does require additional courses beyond the major requirements. Students interested in elementary school education are strongly urged to participate in the Diversified Liberal Arts Program (DLAP), administered by the Letters and Science Counseling Services, A316 Murphy Hall. For additional information on courses leading to the credential, consult the Department of Education at (310) 825-8328.

## English Minor

The English minor is designed for students who wish to enhance their major program with the benefits of intensive study of English language and literatures, including a better understanding and appreciation of literatures in English and improvement in critical thinking, reading, and writing skills.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 requirement and completed English 4W. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 2222 Rolfe Hall, (310) 825-1389. This allows them priority enrollment in many upper division courses.

*Required Lower Division Courses (10 units):* English 10B and 10C, with grades of C or better.

*Required Upper Division Courses (21 to 25 units):* Five courses selected from English 100 through M197D, including course 142A and one other course that focuses on literature in English written before 1900. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of English offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in English.

## Admission

The department only considers applicants whose objective is the Ph.D. Students admitted into the graduate program enter the first phase of the doctoral program, successful completion of which results in the award of the M.A. degree. Those who enter with the master's degree may waive certain course requirements but must pass the first qualifying examination (which also grants admission into the second phase of the doctoral program). Students who choose a terminal M.A. degree must write a thesis.

Admission to the program is based on a thorough review of the applicant's academic record. Ordinarily, holders of the B.A. are expected to meet these minimum requirements: an undergraduate major or program that prepares one for advanced study of literature; a grade-point average in English courses and in the junior and senior years of at least 3.5; and recent scores (taken within the last five years) on the Graduate Record Examination (GRE), including the General Test and the Literature in English Subject Test. Applicants who hold the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and a correspondingly higher score on the Subject Test.

Applicants must submit a minimum of three letters of recommendation attesting to their ability to succeed in graduate study. A writing sample is also required. Care should be taken with the statement of purpose and the writing sample, since the quality of thought and argument these exhibit, as well as their style, weigh significantly in admissions decisions.

## Master's Degree

For fields, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination and thesis plans. The former consists of the first qualifying examination for the Ph.D. Nine 200-series English courses are required for the M.A. degree.

There is a language requirement for this degree.

## Doctoral Degree

Fields include Anglo-Saxon, Middle English, Renaissance, earlier 17th century, Restoration and 18th century, Romantic, Victorian, 20th-century British, earlier American, 19th-century American, 20th-century American. If students wish, a third field may be a genre or a special field: novel, drama, poetry, literary criticism, folklore/mythology, Celtic studies, African American literature, women's writing, history of the language, rhetoric, or Asian American literature.

Fourteen graduate-level courses are required. With special approval, students may take up to three of the courses in departments other than English. Students are required to fulfill breadth and philology requirements.

Written and oral qualifying examinations are required. The first qualifying examination includes written and oral components. Students submit written work from any two seminars. The committee's review of the papers constitutes the first stage of the first qualifying examination. An oral examination in three designated fields constitutes the second stage.

Following successful completion of the first qualifying examination, students prepare a dissertation prospectus and take the University Oral Qualifying Examination, which concentrates on the prospectus and may include discussion of a wide range of works that bear on the proposed dissertation.

There is a language requirement for this degree.

## English

### Lower Division Courses

**4HW. Critical Reading and Writing (Honors). (5)** (Formerly numbered 4H.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 4H. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Letters and Science Writing II requirement. Letter grading.

**4W. Critical Reading and Writing. (5)** (Formerly numbered 4.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 4. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Letters and Science Writing II requirement. Letter grading.

**10A. English Literature to 1660. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of selected works of the period, beginning with selections from Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three papers (three to five pages each) or equivalent. P/NP or letter grading.

**10B. English Literature, 1660 to 1832. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent. P/NP or letter grading.

**10C. English Literature, 1832 to the Present. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of selected works of the period, including writings by Tennyson, Arnold, Browning, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent. P/NP or letter grading.

**20. Introduction to Creative Writing. (4)** Preparation: submission of creative or expository writing samples to a screening committee. Enforced requisites: satisfaction of Subject A requirement, English Composition 3 or 3H. Designed to introduce fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required.

**70. Major British Authors before 1800. (4)** Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. Study of selected masterpieces of English literature before 1800, including works of such writers as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

**75. Major British Authors, 1800 to the Present. (4)** Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. Study of selected masterpieces of English literature from 1800 to the present, including works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

**80. Major American Authors. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Introduction to the chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway. P/NP or letter grading.

**85. American Novel. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, Fitzgerald, Faulkner, Ellison, and Morrison. P/NP or letter grading.

**88A-88Z. Lower Division Seminars: Special Topics in English. (4 each)** Seminar, three hours. Limited to 15 students. Content varies; see departmental counselor for information. P/NP or letter grading. **88A.** Medieval Literature; **88B.** Renaissance Literature; **88C.** 17th-Century Literature; **88D.** 18th-Century Literature; **88E.** Romantic Literature; **88F.** Victorian Literature; **88G.** 20th-Century British Literature; **88H.** Colonial American Literature; **88I.** 19th-Century American Literature; **88J.** 20th-Century American Literature; **88K.** History of English Language; **88L.** Folklore and Mythology; **88M.** Literature and Society.

**90. Shakespeare. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement. P/NP or letter grading.

**95A. Introduction to Poetry. (4)** Enforced requisite: satisfaction of Subject A requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of a selection of representative poems. P/NP or letter grading.

**95B. Introduction to Drama. (4)** Enforced requisite: satisfaction of Subject A requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

**95C. Introduction to Fiction. (4)** Enforced requisite: satisfaction of Subject A requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

**96. The Short Story in England and America. (4)** Enforced requisite: satisfaction of Subject A requirement. Historical survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

**97H. Honors Seminar for Freshmen and Sophomores. (4)** Seminar, three hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information. P/NP or letter grading.

## Upper Division Courses

**100. Introduction to Special Topics and Genres. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of a particular topic, genre, or subgenre in literature such as satire, biography, parody, or a specialized classification of literature. May be repeated for credit. P/NP or letter grading.

Jayne Lewis first became interested in seven-teenth- and eighteenth-century literature through the inspiration of two professors she had in graduate school. "They helped me see how much of our own world took shape during that time," she reflects, "and to appreciate the imaginative responses of writers as varied as Alexander Pope and Samuel Richardson."

Since 1988, Professor Lewis has herself inspired students in her classes at UCLA.

Teaching the great works of English literature from Milton to Austen, she helps them build bridges between the vexatious world of today and the problems and promise of the past. As she sees it, "Literature has two contradictory functions: to make us feel at home in the world and to destroy our complacency."

As a teacher, Lewis thrives on the challenge of sharing life-building images and ideas with students in the process of building their own lives. And she appreciates the openness and intelligence of UCLA undergraduates who "have buoyant, receptive minds and wonderful senses of humor,

with very few preconceptions and biases."

Lewis' classes range from seminars of 15 students to lectures of 300, and although the mood and pace may differ, she always looks to give insight into the complex symbols humans use to communicate their ideas and desires. For her, the pay off is immeasurable. "Undergraduate English majors have the world at their feet. They can use their writing skills for careers in the film and internet industries, in journalism or publishing. Many go on to law school; some become creative writers. The sky is the limit. [But] whatever an English major does will be profoundly enriched by what comes from studying literary expression—a deeper understanding of what it means to be human."

In addition to her books and articles on Restoration and eighteenth-century English literature, Professor Lewis has received fellowships from the National Endowment for the Humanities and the ACLS as well as a UC President's Fellowship and a Luckman Distinguished Teaching Award.

**Jayne Lewis,**  
English Department

*English majors have the world at their feet! They can use their writing skills for careers in the film and internet industries, in journalism, publishing, law, or as creative writers. The sky is the limit...*

---

**M101A. Lesbian and Gay Literature before Stonewall. (5)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101A and Women's Studies M101A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English from earlier periods through the 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, Virginia Woolf, James Baldwin, Christopher Isherwood, William S. Burroughs, John Rechy, Audre Lorde, and Edward Albee. P/NP or letter grading.

**M101B. Lesbian and Gay Literature after Stonewall. (5)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101B and Women's Studies M101B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English since 1969, year of Stonewall Riots in New York City, commonly recognized as beginning of modern lesbian and gay culture. Works by such authors as Adrienne Rich, Jane Rule, Maureen Duffy, Brigid Brophy, Larry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, Alan Hollinghurst, and Emma Donahue. P/NP or letter grading.

**M102A. Asian American Literature to 1980. (5)** (Same as Asian American Studies M112A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of Asian American literature from early period of formation to cultural nationalist movement of late 1960s and 1970s. Works of such authors as Edith Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston included. P/NP or letter grading.

**M102B. Asian American Literature since 1980. (5)** (Same as Asian American Studies M112B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Wong Louie, Garrett Hongo, and Jessica Hagedorn included. P/NP or letter grading.

**103. Jewish American Fiction. (5)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of the fiction of Jewish writers in America, such as Bellow, Malamud, and Roth, focusing on encounter of Jewish ethical ideals and social values with the contemporary environment. P/NP or letter grading.

**M104A. Early Afro-American Literature. (5)** (Same as Afro-American Studies M104A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins. P/NP or letter grading.

**M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (5)** (Same as Afro-American Studies M104B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison. P/NP or letter grading.

**M104C. Afro-American Literature since the 1960s. (5)** (Same as Afro-American Studies M104C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

**M105A. Early Chicana/Chicano Literature. (5)** (Same as Chicana and Chicano Studies M105A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature from the 16th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

**M105B. Recent Chicana/Chicano Literature. (5)** (Same as Chicana and Chicano Studies M105B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Chicana/Chicano Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherrie Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.

**106. Native American Literary Studies. (5)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or images in writing about Native Americans (poetry, fiction, history, anthropology, sociology). P/NP or letter grading.

**M107A. American Women Writers. (5)** (Same as Women's Studies M107A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women. P/NP or letter grading.

**M107B. British Women Writers. (5)** (Same as Women's Studies M107B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women. P/NP or letter grading.

**M107C. Special Topics in Women and Literature. (5)** (Same as Women's Studies M107C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping. P/NP or letter grading.

**108A-108B. English Bible as Literature. (4-4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Principal literary monuments of the Old and New Testaments in King James Version. P/NP or letter grading. **108A.** Old Testament; **108B.** New Testament.

**108C. English Bible as Literature: Special Topics. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit. P/NP or letter grading.

**109. Interdisciplinary Approaches to Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit. P/NP or letter grading.

**110. Studies in Individual Authors. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Specialized study of the work of a single poet, dramatist, prose writer, or novelist. May be repeated for credit. P/NP or letter grading.

**M111A. Literature of Myth and Oral Tradition. (4)** (Same as Folklore M111.) Requisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

**M111C. British Folklore and Mythology. (4)** (Same as Folklore M121.) Requisite: satisfaction of Subject A requirement. Designed for juniors/seniors. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

**M111D. Celtic Mythology. (4)** (Same as Folklore M122.) Lecture, three hours; discussion, one hour. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

**M111E. Survey of Medieval Celtic Literature. (4)** (Same as Folklore M112.) Requisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

**M111F. Celtic Folklore. (4)** (Same as Folklore M127.) Requisite: Folklore M101. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloric research.

**M111G. Oral Traditions in Africa. (4)** (Same as Folklore M155.) Designed for juniors/seniors. Survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

**112. Children's Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography. P/NP or letter grading.

**113. Literature for Adolescents and Young Adults. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Analysis and evaluation of literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of interests and reading habits of young adults. P/NP or letter grading.

**114. World Literatures in English. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of contemporary literature from English-speaking regions of the world, reviewing major genres from several countries and making cross-comparisons with the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit. P/NP or letter grading.

**115A. American Popular Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories. P/NP or letter grading.

**115B. British Popular Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Readings in the literature of the British masses, from 16th-century broadsides to contemporary novels. Examination of social functions of literature. P/NP or letter grading.

**116. Science Fiction. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of science fiction and speculative literatures. P/NP or letter grading.

**117. Detective Fiction. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of British and American detective fiction and the literature of detection. P/NP or letter grading.

**118. Film and Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works. P/NP or letter grading.

**119. Literature of California and the American West. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of the Western U.S. P/NP or letter grading.

**121. History of the English Language. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present. P/NP or letter grading.

**122. Introduction to Structure of Present-Day English. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introduction to techniques of linguistic description as applied to pronunciation, grammar, and vocabulary of modern English. P/NP or letter grading.

**133. Creative Writing: Poetry. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Weekly exercises in writing of poetry, with practice in standard forms and meters and study of techniques. Classroom discussion based on student use. Enrollment in more than one section per term not permitted. May be repeated for a total of 12 units. No more than 8 units may be completed with same instructor. P/NP or letter grading.

**134. Creative Writing: Short Story. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Three average-length stories to be completed each term. Some stories may, with instructor's consent, be substantial revisions of other stories presented. Classroom discussion based on stories presented. Enrollment in more than one section per term not permitted. May be repeated for a total of 12 units. No more than 8 units may be completed with same instructor. P/NP or letter grading.

**135. Creative Writing: Drama. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Exploration of capacity of each student to write for the theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Enrollment in more than one section per term not permitted. May be repeated for a total of 12 units. No more than 8 units may be completed with same instructor. P/NP or letter grading.

**137. Advanced Computer Techniques for Students of English. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Concurrent instruction in writing computer programs for literary study and in the kinds of literary research that can be aided by computers. BASIC is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught. P/NP or letter grading.

**140A. Criticism: History and Theory. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of some major historical documents and theoretical statements in history of literary criticism, including works by such writers as Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T.S. Eliot, with emphasis on major critical positions posed and developed by these writers, basis of their theoretical positions, and practical consequences of those positions. Possible discussion of recent trends in criticism. P/NP or letter grading.

**140B. Criticism: Special Topics. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of limited periods and specialized issues and approaches in history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in *Schedule of Classes*. Some study of literary texts, to illuminate the value and practical application of the approach, may be required. P/NP or letter grading.

**141A. Chaucer: *The Canterbury Tales*. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, *The Canterbury Tales*. Satisfies department's Chaucer requirement. P/NP or letter grading.

- 141B. Chaucer: *Troilus and Criseyde* and Selected Minor Works. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Intensive study of *Troilus and Criseyde* and selected minor works of Chaucer, such as *The Book of the Duchess*, *The House of Fame*, *The Parliament of Fowls*, etc. Satisfies department's Chaucer requirement. P/NP or letter grading.
- 142A. Shakespeare: Poems and Early Plays. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Intensive study of selected poems and representative comedies, histories, and tragedies through *Hamlet*. P/NP or letter grading.
- 142B. Shakespeare: Later Plays. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Intensive study of representative problem plays, major tragedies, Roman plays, and romances. P/NP or letter grading.
- 142C. Shakespeare: Selected Topics. (5)** Lecture, three or four hours. Requisites: courses 10A, 10B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors. P/NP or letter grading.
- 143. Milton. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works of Milton, with emphasis on *Paradise Lost*. P/NP or letter grading.
- 150A. Early Medieval Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Reading knowledge of Old English not required. Major prose and poetry of Anglo-Saxon England (600 to 1100), including epic, romance, history, saints' lives, and travel literature. Texts and topics include *Beowulf*, Vikings, poems on women, Bede, and King Alfred. P/NP or letter grading.
- 150B. Later Medieval Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Reading and historical explication of major writers of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, and lyrics). The more difficult texts read in modernized form. P/NP or letter grading.
- 151. Elizabethan Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of English literature of the 16th century, with special emphasis on development and interrelationships of poetry, prose, fiction, and literary theory and criticism during reign of Elizabeth I. P/NP or letter grading.
- 152A. Drama from Beginning to 1576. (5)** Lecture, four hours. Requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.
- 152B. Drama, 1567 to 1642. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Non-Shakespearean English drama from opening of first public playhouse to closing of the theaters. P/NP or letter grading.
- 153. Literature of Early 17th Century, 1600 to 1660. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of 17th-century thought. Work of Milton excluded. P/NP or letter grading.
- 154. Literature of Restoration and Earlier 18th Century, 1660 to 1730. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of the Restoration and earlier 18th-century thought. P/NP or letter grading.
- 155. Literature of Later 18th Century, 1730 to 1798. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought. P/NP or letter grading.
- 156. Drama, 1660 to 1842. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Survey of English drama from the Restoration to the Licensing Act. P/NP or letter grading.
- 157. The Novel to 1832. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Survey of works of major English novelists from Defoe through Scott. P/NP or letter grading.
- 160. Earlier Romantic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of writings by Blake, Wollstonecraft, W. Wordsworth, Coleridge, and Austen, with collateral readings from such authors as Godwin, Burke, Paine, Radcliffe, Edgeworth, Baillie, C. Smith, Burns, Southey, D. Wordsworth, Lamb, DeQuincey, and Scott. P/NP or letter grading.
- 161. Later Romantic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of writings by Byron, Keats, Percy Shelly, and Mary Shelley, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, Peacock, Landon, Aikin, Hemans, and Prince. P/NP or letter grading.
- 162. Earlier Victorian Poetry and Prose. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of poetry and prose of the Victorian age from passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman. P/NP or letter grading.
- 163. Later Victorian Poetry and Prose. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of poetry and prose of the later Victorian age from Pre-Raphaelitism through the aesthetic and decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats. P/NP or letter grading.
- 164. The Novel, 1832 to 1900. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major English novelists from Dickens through Hardy. P/NP or letter grading.
- 165. 20th-Century British Poetry. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present. P/NP or letter grading.
- 166. 20th-Century British Fiction. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present. P/NP or letter grading.
- 167. Drama, 1842 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C (for Theater and Film and Television majors the 10A, 10B, 10C requisites are waived). Survey of British and American drama, with its principal continental influences, from 1842 through World War II. P/NP or letter grading.
- 168. Drama, 1945 to the Present. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of British and American drama, with its principal continental influences, since World War II. P/NP or letter grading.
- 169. Special Topics in British Studies. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of particular themes, forms, or moments in British and/or Anglophone literature. Satisfies department's pre- or post-19th-century requirement, depending on date of subject matter. P/NP or letter grading.
- 170A. American Literature to 1775. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature through the Colonial period. P/NP or letter grading.
- 170B. American Literature, 1775 to 1832. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature during Revolutionary and early republic periods. P/NP or letter grading.
- 171A. American Literature, 1832 to 1865. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature from Jacksonian era to end of the Civil War. P/NP or letter grading.
- 171B. American Literature, 1866 to 1912. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Historical survey of American literature from end of the Civil War to founding of *Poetry* magazine. P/NP or letter grading.
- 172A. American Literature, 1912 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature from founding of *Poetry* magazine to end of World War II. P/NP or letter grading.
- 172B. American Literature since 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature since end of World War II. P/NP or letter grading.
- 173A. American Fiction to 1900. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American fiction (both novels and short stories) from its beginning to end of the 19th century. P/NP or letter grading.
- 173B. American Fiction, 1900 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American novels and short stories from beginning of the 20th century to end of World War II. P/NP or letter grading.
- 173C. American Fiction since 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American novels and short stories since end of World War II. P/NP or letter grading.
- 174A. American Poetry to 1900. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American poetry from Puritan period through end of the 19th century. P/NP or letter grading.
- 174B. American Poetry, 1900 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American poetry from beginning of the 20th century to end of World War II. P/NP or letter grading.
- 174C. American Poetry since 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American poetry since end of World War II. P/NP or letter grading.
- 175. American Nonfictional Prose. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American nonfictional prose (essays, autobiographies, travel narratives, and other). Particular genre and/or historical period vary with instructor. P/NP or letter grading.
- 176. American Drama. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American drama from its beginning to the present day. Historical period may vary with instructor. P/NP or letter grading.
- 177. Special Topics in American Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Focused study of some aspect or theme in American literature. May be repeated for credit. P/NP or letter grading.
- 178. Perspectives in Study of American Culture. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit. P/NP or letter grading.
- 179. American Literature in Comparative Context. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of some aspect of American literature and its relationships to other national literature. P/NP or letter grading.
- 180. Specialized Studies in Medieval Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 180X. Specialized Studies in Literature. (5)** Seminar, four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 181. Specialized Studies in Renaissance Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 182. Specialized Studies in 17th-Century Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 183. Specialized Studies in 18th-Century Literature. (5)** Seminar, four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 184. Specialized Studies in Romantic Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 185. Specialized Studies in Victorian Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 186. Specialized Studies in 20th-Century British Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**187. Specialized Studies in Colonial American Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**188. Specialized Studies in 19th-Century American Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**189. Specialized Studies in 20th-Century American Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**190. Literature and Society. (5)** Lecture, three or four hours. Requisites: courses 10A, 10B, 10C. Intensive study of some aspect of relationship between literature and social, economic, or political history. May be repeated for credit. P/NP or letter grading.

**196. Interracial Encounters in Contemporary American Literature. (5)** Lecture, three or four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of recent literary and cinematic texts produced by people from different ethnic backgrounds living in the U.S. and providing comparative cultural perspectives on living in a multiethnic society. P/NP or letter grading.

**M197A. Topics in Afro-American Literature. (5)** (Same as Afro-American Studies M197A.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890 to 1914; Contemporary Afro-American Fiction. May be repeated for credit. P/NP or letter grading.

**M197B. Topics in Chicana/Chicano Literature. (5)** (Same as Chicana and Chicano Studies M197B.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Chicana/Chicano literature. Topics include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit. P/NP or letter grading.

**M197C. Topics in Asian American Literature. (5)** (Same as Asian American Studies M197C.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Asian American literature. Topics include specific genres (autobiography, poetry, or drama); specific nationalities within the Asian American community; and themes related to such problems as generational differences, gender politics, or interethnic encounters. May be repeated for credit. P/NP or letter grading.

**M197D. Special Topics in Lesbian and Gay Literature. (5)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M197D.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in lesbian and gay literature. Topics focus on a particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

**199. Special Studies in English. (2 to 4)** Intensive directed research project. To enroll or obtain information, see departmental counselor.

**199HA. Honors Seminar. (5)** Seminar, three hours. Requisite: course 140A. Introduction to research techniques and study of various approaches and applications of critical methodology as it relates to interpretation and evaluation of texts. Letter grading.

**199HB-199HC. Honors Tutorial. (5-5)** Tutorial, to be arranged. Requisite: course 199HA. Tutorial in which students write theses under direction of a faculty member. In Progress and letter grading.

**199I. Independent Studies for Internships. (2 to 4)** Independent studies course to be supervised jointly by Field Studies Office and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP grading.

## Graduate Courses

**200. Approaches to Literary Research. (4)** Bibliographical tools of English and American literary scholarship; introduction to descriptive bibliography and basic methods of research. Periods covered vary.

**201A. Criticism and Interpretation from Classical Era to the Renaissance. (4)** Lecture, three hours. Examination of major texts in history of critical theory and interpretation from pre-Socratics to Descartes, including classical literary criticism (Plato, Aristotle, Horace, Longinus), biblical hermeneutics (Bible, Midrash, St. Paul, St. Augustine, St. Thomas Aquinas), and medieval and Renaissance theories of interpretation (Dante, Boccaccio, Sidney). S/U or letter grading.

**201B. Aesthetics and Criticism from the Enlightenment to Decadence. (4)** Lecture, three hours. Continuation of course 201A, proceeding from neoclassical and Enlightenment critical theory through Victorian and decadent aesthetic and literary criticism. Readings may include texts by Rousseau, Dryden, Pope, Hume, Kant, Schiller, the Schlegels, Coleridge, Hegel, Schelling, Arnold, Pater, Wilde, and Nietzsche. S/U or letter grading.

**201C. Developments and Issues in Modern Critical Thought. (4)** Lecture, three hours. Study of major figures and ideas in modern and contemporary critical theory. Readings vary from year to year but may include such figures as Freud, Durkheim, Saussure, Heidegger, Shkolvskii, Benjamin, Adorno, Levi-Strauss, Lacan, Barthes, Derrida, Deleuze, Fanon, Foucault, Irigaray, Lyotard, Bourdieu, and Bhabha. S/U or letter grading.

**202. Enumerative and Descriptive Bibliography. (4)** Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism.

**203. Computers and Literary Research. (4)** Prior knowledge in this area not required. Practice in writing and using computer programs for analysis of literary style, content, and authorship.

**204. History of Rhetoric. (4)** Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval-to-modern period in alternate years.

**M205. Perspectives in American Folklore Research. (4)** (Same as Folklore CM205.) Lecture, three hours. Requisite: Folklore M101. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society.

**210. History of the English Language. (4)** Detailed study of history, characteristics, and changing forms of the language from its origin until about 1900.

**211. Old English. (4)** Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a term.

**212. Middle English. (4)** Requisite: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of the better prose and poetry.

**213. Early Modern English. (4)** Detailed study of phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of changes in the language in relation to intellectual, political, and social characteristics of the period.

**214. Modern English. (4)** Description and analysis of modern English phonology, grammar, and vocabulary, using theory and techniques of contemporary linguistics. Survey of the evolution of American English and account of characteristic phonological and grammatical features of major regional varieties of English around the world.

**216A-216B. Old Irish. (4)** Studies in grammar. Readings in the glosses and other texts. Comparative considerations.

**217A-217B. Medieval Welsh. (4)** Studies in grammar. Readings in the Mabinogi and other texts. Comparative considerations.

**218. Celtic Linguistics. (4)** Survey of salient features of Celtic linguistic stock in its Gaelic and British branches, with reference to position of Celtic within Indo-European languages.

**230. Workshop: Creative Writing. (2 to 4)** Preparation: submission of writing samples in specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of the nine courses required for first qualifying examination nor any of the five courses required for second qualifying examination.

**M235. African Myth and Ritual. (4)** (Same as Folklore M235.) Seminar on methods of analyzing African and African Diaspora myth and ritual.

**240. Studies in History of the English Language. (4)** Individual seminars dealing with any single historical period from Old English period to the present or development of a particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods. May be repeated for credit.

**241. Studies in Structure of the English Language. (4)** Topics in various aspects of structure of modern English, especially syntax and semantics. May be repeated for credit.

**242. Language and Literature. (4)** Application of linguistics to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. May be repeated for credit.

**M243A. The Ballad. (4)** (Same as Folklore M243A.) Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues. May be repeated for credit.

**M243B. Problems in Ballad Scholarship. (4)** (Same as Folklore M243B.) Requisite: course M243A. Intensive investigation of a problem or problems in study of the popular ballad. May be repeated for credit.

**244. Old and Medieval English Literature. (4)** Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit.

**245. Chaucer. (4)** May be repeated for credit.

**246. Renaissance Literature. (4)** Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. May be repeated for credit.

**247. Shakespeare. (4)** May be repeated for credit.

**248. Earlier 17th-Century Literature. (4)** Studies in poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor. May be repeated for credit.

**249. Milton. (4)** Studies in poetry and prose of John Milton; limits of investigation set by individual instructor. May be repeated for credit.

**250. Restoration and 18th-Century Literature. (4)** Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. May be repeated for credit.

**251. Romantic Writers. (4)** May be repeated for credit.

**252. Victorian Literature. (4)** Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor. May be repeated for credit.

**253. Contemporary British Literature. (4)** May be repeated for credit.

**254. American Literature to 1900. (4)** Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor. May be repeated for credit.

**255. Contemporary American Literature. (4)** Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. May be repeated for credit.

**256. Studies in the Drama. (4)** Studies in drama as a genre from its beginning to the present; limits of investigation set by individual instructor. May be repeated for credit.

**257. Studies in Poetry. (4)** Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor. May be repeated for credit.

**258. Studies in the Novel. (4)** Studies in evolution of the genre from its beginning to the present; limits of investigation set by individual instructor. May be repeated for credit.

**259. Studies in Criticism. (4)** May be repeated for credit.

**260. Studies in Literature and Its Relationship to the Arts and Sciences. (4)** Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor. May be repeated for credit.

**M260A. Topics in Asian American Literature. (4)** (Same as Asian American Studies M260.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

**261. Studies in Chicana/Chicano Literature. (4)** Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and culture. Examination of political, aesthetic, economic, and cultural context that emerges in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit.

**M262. Studies in Afro-American Literature. (4)** (Same as Afro-American Studies M200E.) Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

**263. Celtic Literature. (4)** Lecture, three hours. Preparation: knowledge of one of the ancient or modern Celtic languages. Studies in poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor. May be repeated for credit.

**264. Studies in Rhetoric. (4)** Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts. May be repeated for credit.

**265. Postcolonial Literatures. (4)** Seminar, three hours. Study of aesthetic, historical, and social backgrounds to literatures of former British colonies that became independent after 1947. General issues related to way imperialism, colonialism, and postcolonialism have helped to shape and have been shaped by literature in English. May be repeated for credit.

**M266. Cultural World Views of Native America. (4)** (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms—dance, art, song, religious and medicinal ritual—in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

**272. Current Issues in Teaching English. (4)** Focus on one of a variety of topics of special current interest. May be repeated for credit.

**M298. Interdisciplinary Studies in the 17th and 18th Centuries. (4)** (Same as History M298.) Topics vary according to participating faculty. May be repeated for credit.

**M299. Interdisciplinary American Studies. (6)** (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U grading.

**495E. Teaching with Technology. (2 to 4)** Seminar, two hours. Enables graduate student instructors to approach challenges of teaching with technology on two fronts: by familiarizing them with range of possible applications and by carrying out a research project on a technology topic of their choice. S/U grading.

**496. Publishing the Academic Literary Article. (4)** Discussion, four hours. Structured as a writing workshop and divided into two parts: (1) determination of what a publishable article looks like while students revise work independently and (2) circulation of student papers to class in advance with the writing discussed in seminar room by whole class. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study. (2 to 4)** Limited to students preparing for first qualifying examination or engaging in intensive directed research project. May not be applied toward any course requirement for degree. Consult graduate counselor to enroll or obtain information. S/U grading.

“**S**hakespeare was the lens I tried on that happened to fit my prescription: lots of lovely and terrifying things suddenly came into focus,” reveals Robert Watson, former chair of the English Department and of the Letters and Science faculty. “But others have had the same experience with quantum physics or French Impressionism. So I just try to recognize each student (even in big classes) as a complete and complex individual, and I work for those wonderful moments when a student illuminates: recognizes that she’s actually able to connect to a Shakespearean idea and enjoy it, or that he might actually have something at stake in one of these strange old plays.”

Professor Watson has been creating those moments of illumination for over 20 years, teaching mostly Shakespeare and English Renaissance poetry. Recently, he also began a popular new interdisciplinary GE course on U.S. history and culture from 1963-1974. He serves as head scholar of the Teaching Shakespeare Summer Institute at the Folger Shakespeare Library in Washington, D.C., and has been developing outreach programs to

bring UCLA Shakespeare teachers and students together with their public high school counterparts.

“I want students to discover that intellectual intensity can be pleasurable,” he asserts, and to help students make the breakthrough, he has a way of keeping centuries-old material relevant. “None of that happens if the course is about compulsory reverence for high culture, or (conversely) complacent vilifying of the human past. Ideally, we’re always connecting the past to the present, and finding big lasting ideas in a few well-woven words. I also want students—whatever the topic—always to be aware of the difference between good and bad arguments.”

Watson has won senior research fellowships from the American Council of Learned Societies and the National Endowment for the Humanities, as well as a UC President’s Fellowship. He has written a number of books as well poems, reviews, and scholarly articles on topics ranging from Elizabethan horsemanship to Thomas Pynchon. He received the UCLA Distinguished Teaching Award in 2000.

**Robert Watson,**  
English Department

*I work for those wonderful moments when a student illuminates: recognizes that she's actually able to connect to a Shakespearean idea and enjoy it, or that he might actually have something at stake in one of these strange old plays*

---

**597. Preparation for Ph.D. Examinations. (4 to 12)** Limited to second-stage Ph.D. students preparing for second qualifying examination. S/U grading.

**598. M.A. Research and Thesis Preparation. (4 or 8)** Limited to graduate students. May not be applied toward any course requirement for degree. S/U grading.

**599. Ph.D. Dissertation Research. (4 or 8)** Limited to Ph.D. students unable to enroll in seminars in their fields or to students concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

## Yiddish

### Upper Division Courses

**101A. Elementary Yiddish. (4)** Lecture, four hours. Introduction to grammar; instruction in listening, speaking, reading, and writing skills. P/NP or letter grading.

**101B. Elementary Yiddish. (4)** Lecture, four hours. Requisite: course 101A. P/NP or letter grading.

**101C. Elementary Yiddish. (4)** Lecture, four hours. Requisite: course 101B. P/NP or letter grading.

**102A-102B. Accelerated Elementary Yiddish (6-6).** Lecture, five hours; laboratory, one hour. Covers material in courses 101A, 101B, 101C in two terms rather than three. P/NP or letter grading.

**104. Advanced Yiddish. (4)** Lecture, three hours. Requisite: course 101C. Grammatical exercises, reading and linguistic analysis of texts, conversation. P/NP or letter grading.

**121A. 20th-Century Yiddish Poetry in English Translation. (4)** Lecture, three hours. Designed for juniors/seniors. Readings in 20th-century Yiddish poetry and drama. P/NP or letter grading.

**121B. 20th-Century Yiddish Prose and Drama in English Translation. (4)** Lecture, three hours. Designed for juniors/seniors. Readings in 20th-century Yiddish prose. P/NP or letter grading.

**121C. Special Topics in Yiddish Literature in English Translation. (4)** Lecture, three hours. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. P/NP or letter grading.

**131A. Modern Yiddish Poetry. (4)** Lecture, three hours. Requisite: course 104. Readings in modern Yiddish poetry. P/NP or letter grading.

**131B. Modern Yiddish Prose and Drama. (4)** Lecture, three hours. Requisite: course 104. Readings in modern Yiddish prose and drama. P/NP or letter grading.

**131C. Special Topics in Yiddish Literature. (4)** Lecture, three hours. Requisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. P/NP or letter grading.

**199. Special Studies in Yiddish. (2 to 4)** Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. P/NP or letter grading.

## Graduate Courses

**596. Directed Individual Study or Research in Yiddish. (4)** Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** Tutorial, to be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## Scope and Objectives

Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, this program offers a series of courses introducing the varieties of university discourse and providing instruction in basic to high-level skills. Besides courses which satisfy the University's Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, and language and composition courses for teachers. Special programs include the First-Year Intensive Program (FIPW) and the Transfer Intensive Program (TIP).

## Undergraduate Study

### Subject A

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, either English Composition A or 2. Placement in these courses is determined by performance on the Subject A Examination. For more information regarding Subject A, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

## English Composition

### Lower Division Courses

**A. Introduction to University Discourse. (No credit)** Lecture, five hours. Enforced requisite: appropriate score on Subject A Examination. Displaces 4 units on student's Study List but yields no credit toward a degree. First course in reading university-level texts and framing written responses that employ a range of rhetorical strategies from paraphrase to analysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Completion of course with a grade of C or better or demonstration of minimum competence on Subject A Examination is requisite to course 2.

**2. Approaches to University Writing. (5)** Lecture, four hours. Requisite: course A with a grade of C or better or appropriate score on Subject A Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentative coherence and effective style. Completion of course with a grade of C or better satisfies Subject A requirement. Letter grading.

**3. English Composition, Rhetoric, and Language. (5)** Lecture, three hours. Enforced requisites: satisfaction of Subject A requirement, course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of 20 pages of revised text. Completion of course with a grade of C or better satisfies Letters and Science Writing I requirement. Letter grading.

**3H. English Composition, Rhetoric, and Language (Honors). (5)** Lecture, three hours. Enforced requisites: satisfaction of Subject A requirement, course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of 20 pages of revised text. Completion of course with a grade of C or better satisfies Letters and Science Writing I requirement. Letter grading.

**30W. Intermediate Academic Writing: Various Topics. (5)** Lecture, four hours; discussion, one hour. Enforced requisite: course 3 or 3H. Theme-based interdisciplinary writing course. Assignments involve students in critical reading, application, and integration of sources. Minimum of 20 pages of revised text required. Satisfies Letters and Science Writing II requirement. Letter grading.

## Upper Division Courses

**100W. Interdisciplinary Academic Writing. (5)** (Formerly numbered 100.) Lecture, four hours. Requisite: course 3 or 3H. Not open to students with credit for former course 100. Designed for sophomores/juniors/seniors. Course in academic writing suitable for both lower and upper division students that helps them develop academic papers with a range of complexity and length. Focus on conventions of academic prose and genres across the disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay. Satisfies Letters and Science Writing II requirement. Letter grading.

**110. Writing Adjunct. (4)** (Formerly numbered 110W.) Lecture, four hours. Requisites: satisfaction of Subject A requirement, course 3 or 3H. Students must be concurrently enrolled in a course offered in conjunction with course 110 (consult *Schedule of Classes* for courses so designated). Writing assignments use materials from adjunct course and reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

**120A. Language Study for Teachers: Elementary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature.

**120B. Language Study for Teachers of English: Secondary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Review of terminology of English grammar and survey of development of modern grammars. Introduction to basic concepts in bilingual and multilingual education, sociolinguistics, dialectology, and stylistics, especially as applied to analysis and evaluation of writing assigned in secondary school. P/NP or letter grading.

**120C. Language Study for Teachers of Subjects Other Than English: Secondary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Introduction for teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

**129A-129D. Academic Writing in the Disciplines. (4 each)** Lecture, four hours. Designed for juniors/seniors. Advanced study of writing conventions in specific disciplinary areas, with focus on analysis and development of writing expertise in common discursive forms, stylistic patterns, and research practices in the given discipline. Each course may be taken independently for credit. P/NP or letter grading. **129A.** Literature; **129B.** Social Sciences. Lecture, three hours; discussion, one hour; **129C.** Physical and Life Sciences; **129D.** Fine Arts.

**130A. Composition for Teachers: Elementary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Preparation for future elementary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in primary schools. Letter grading.

**130B. Composition for Teachers: Secondary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Preparation for future secondary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in secondary schools.

**131A-131D. Specialized Writing. (4 each)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Designed for juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical values of major professions and research areas. Each course may be taken independently for credit. P/NP or letter grading. **131A.** Law and Politics; **131B.** Business and Social Policy; **131C.** Medicine and Public Health; **131D.** Media and Communications.

**132A-132D. Topics in Rhetoric and Writing. (4 each)** Lecture, four hours; discussion, one hour. Requisite: satisfaction of Subject A and English Composition requirements. Designed for juniors/seniors. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental requisites must take it for a letter grade. **132A.** Gender and Writing; **132B.** Autobiographical Writing; **132C.** Cultural Studies; **132D.** Variable Topics.

**136A-136B-136C. Practical Writing and Editing. (4-4-4)** Lecture, three hours. Preparation: one course from 131 series. Requisites: satisfaction of Subject A requirement, course 3. Sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined whenever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. In Progress grading for courses 136A-136B only.

**197F. Rhetoric in Modern American Culture. (4)** Seminar, three hours. Requisite: course 100W. One-term field studies course designed to provide students with academic background in and firsthand knowledge of media writing. P/NP or letter grading.

**199. Independent Studies in Writing. (2 to 4)** (Formerly numbered 199W.) Tutorial, to be arranged. Requisites: satisfaction of Subject A requirement, course 3 or 3H. Independent studies course supervised by faculty member. Fieldwork and/or internship may also be supervised by Center for Experiential Education and Service Learning or organization offering internship. P/NP or letter grading.

**199I. Independent Studies for Internships. (2 or 4)** Tutorial, to be arranged. Requisites: course 3 or 3H, satisfaction of Letters and Science Writing II requirement. P/NP grading.

## Graduate Courses

**300. Teaching English. (4)** Lecture, four hours. Required of candidates for single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to secondary school or college English curriculum. S/U or letter grading.

**495A-495B. Supervised Teacher Preparation. (2-2)** Seminar, one hour; laboratory, 30 minutes. In Progress and S/U grading. **495A.** Required of all applicants for a teaching assistantship in English. Practical concerns of designing a course, creating assignments, grading papers, and holding conferences for English Composition 3 classes. **495B.** Must be taken concurrently with first teaching assignment. Examination of specialized problems which occur in teaching English Composition 3 and introduction to techniques for teaching English Composition 2 and ESL.

**495C. Supervised Teacher Preparation. (2)** Seminar, two hours. Requisites: courses 495A-495B. S/U grading.

Diane M. Perry, Ph.D.

## Scope and Objectives

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, and physical hazards in the environment. Its graduates are highly trained scientists and professionals capable of identifying and measuring agents of environmental concern; evaluating the health, environmental, and all other impacts of such agents; developing means for their effective management; and evaluating alternative policies directed at improving and protecting environments. Such training is accomplished through several degree programs which offer specialized study in selected academic areas of environmental health sciences such as air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H.

and Dr.P.H. degrees with a specialization in environmental health sciences (see Public Health Schoolwide Programs). In addition, a unique doctoral degree (Doctor of Environmental Science and Engineering — D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Environmental Health Sciences offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Environmental Health Sciences.

## Admission

Applicants to the M.S. program should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

Applicants should see the Master of Public Health (M.P.H.) admission section under Public Health Schoolwide Programs. Admission requirements for the M.S. in Environmental Health Sciences are the same as for the M.P.H. The M.S. program in industrial hygiene is fully accredited by the Related Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET/RAC).

In addition to the University minimum requirements, the Ph.D. program requires (1) a bachelor's degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least one year of chemistry (including organic chemistry or biochemistry), physics, biology, and mathematics through calculus, (2) a master's degree in a related field with a grade-point average of at least 3.5 for graduate studies, (3) satisfactory performance on the Graduate Record Examination (GRE), and (4) a score of at least 580 (paper and pencil test) or 237 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language

Testing System (IELTS) examination for students whose native language is not English.

Alternatively, for students who do not have a master's degree and wish to pursue a doctoral degree, the department requires (1) a junior/senior grade-point average of 3.25 (or other evidence of exceptional scholarship), (2) satisfactory performance on the Graduate Record Examination (GRE), (3) acceptance by a doctoral adviser in the department subsequent to filing the application for admission, and (4) a score of at least 580 (paper and pencil test) or 237 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band score of 7.0 on the International English Language Testing System (IELTS) examination for students whose native language is not English.

## Master's Degree

For areas of specialization, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. A minimum of 10 courses is required, at least five of which must be graduate courses. No more than 18 full courses are required for the degree. There are mandatory core courses in biostatistics, epidemiology, and environmental health sciences. In addition, at least 22 units of elective courses are selected from the student's area of specialization.

## Doctoral Degree

Students may concentrate in one of the following areas of specialization: air quality, environmental biology, environmental chemistry, environmental management, industrial hygiene, toxicology, or water quality.

Students select a course of study after consultation with their guidance committee. There are required introductory and seminar courses. In addition, students are required to enroll in at least 20 units related to their area of specialization. For students who do not have a master's degree in the field of public health, one full course in epidemiology and two full courses in biostatistics are recommended.

Written and oral qualifying examinations are required. Following successful completion of the written examination in the area of specialization, students take the University Oral Qualifying Examination.

## Environmental Health Sciences

### Upper Division Courses

**100. Introduction to Environmental Health. (4)** Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants. P/NP or letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

## Graduate Courses

**200A-200B. Foundations of Environmental Health Sciences. (6-6)** Lecture, six hours. Multidisciplinary aspects of environmental health sciences in context of public health for environmental health majors. Letter grading.

**200A.** Preparation: one year of undergraduate biology, calculus, chemistry, and physics. **200B.** Requisite: course 200A.

**200C. Environmental Health Sciences for Nursing Students. (3)** (Not the same as course 200C prior to Fall Quarter 1999.) Lecture, three hours. Preparation: one year of undergraduate biology, calculus, chemistry, and physics. Limited to nursing students. Introduction to physical agents, including noise, thermal environment, ionizing radiation, and nonionizing radiation. Exploration of exposure assessment of air pollution in urban areas, occupational exposure assessment for epidemiological inferences, exposure characteristics, air pollution and excess mortality, assessment of exposure to mixture chemicals, multimedia and ecological exposure assessment. Letter grading.

**201. Seminar: Health Effects of Environmental Contaminants. (2)** Seminar, two hours. Requisites: courses 200A, 200B, 210, 230, 250. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit. S/U or letter grading.

**202. Seminar: Environmental Chemistry. (2)** Seminar, one hour. Requisites: courses 200A, 200B, 410A, 410B. Environmental chemistry aspects of environmental health sciences through multimedia analyses and biological and microbiological analyses. May be repeated for credit. Letter grading.

**203. Seminar: Ecotoxicology. (2)** Seminar, two hours. Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental chemistry, toxicology, and ecology. May be repeated for credit. S/U grading.

**204. Seminar: Exposure Assessment. (2)** Seminar, two hours. Discussion of various topics in exposure assessment. Topics vary by term and include aspects of population activity, microenvironments, types of monitoring (outdoor, indoor, personal, biomarkers), and multimedia sources of exposure. S/U grading.

**205. Environmental Health Sciences Doctoral Seminar. (2)** Seminar, two hours. Limited to environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

**206. Seminar: Applied Coastal Ecology. (2)** Seminar, two hours. Discussion of various topics in applied coastal ecology. Topics vary by term and include wetland ecology, restoration ecology, and ecology and management of coastal watersheds. May be repeated for credit. S/U grading.

**210. Public Health and Environmental Microbiology. (4)** Lecture, three hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Basic principles: cycling of matter, fates of natural and man-made compounds in the environment, wastewater and drinking water microorganisms and treatment, and public health microorganisms. S/U or letter grading.

**211. Science and Politics of Environmental Regulation: Coastal Pollution — Sources and Solutions. (4)** Lecture, three hours. Designed for graduate students. Overview of environmental regulations that protect coastal resources, regulatory agencies that have jurisdiction over coastal resources, past and current coastal pollution problems in the U.S., solving pollution problems through treatment, advocacy, enforcement, restoration, remediation, and watershed management. Letter grading.

**212. Applied Ecology. (4)** Lecture, four hours. Preparation: one ecology course. Application of ecological theory and principles to solve environmental problems, including conservation biology, assessment of environmental impacts, and restoration ecology and mitigation of environmental impacts. Letter grading.

**220. Biological Effects of Air Pollution. (4)** Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Survey of biological effects and assessment methods of air contaminants present in urban, industrial, and occupational environments. S/U or letter grading.

**225. Atmospheric Transport and Transformations of Airborne Chemicals. (4)** Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. S/U or letter grading.

**230. Environmental Management. (4)** Lecture, four hours; discussion, one hour. Requisites: Economics 100, Mathematics M112, 115A, Political Science 140A, 142B. Introduction to foundations and principles of environmental management, decision making, and evaluation of environmental policies and programs. Letter grading.

**231. Environmental Decision Systems Analysis. (4)** Lecture, four hours; discussion, one hour. Requisite: course 230. Techniques and models of systems analysis and concepts of general system theory as applied to comprehensive study, planning, evaluation, and management of environmental decision systems. Experimentation with relevant computer programs. S/U or letter grading.

**232. Environmental Policy Decision Making. (4)** Lecture, four hours. Requisites: courses 230, 231. Foundations, principles, and modeling of environmental policy decision making. Critical analysis of normative and behavioral models of action choices for protection and enhancement of environmental health, and development of an alternative model. S/U or letter grading.

**234. Critical Readings in Environmental Policy for Scientists and Engineers. (4)** Lecture, one hour; discussion, three hours. Requisite: course 230 or 235. Designed for graduate science and engineering students. Critical analysis of environmental policies, regulations, and decisions and their scientific basis. Literature revision, classroom presentation, and research paper required. Letter grading.

**235. Quantitative Methods for Environmental Assessment. (4)** Lecture, four hours; discussion, one hour. Preparation: bachelor's degree in science, engineering, or public health, one term of statistics, one year of advanced mathematics. Introduction to quantitative methods for evaluating health effects and environmental impacts of human activities; concepts of environmental assessments and planning. Assignments include statistics analysis, risk assessment, economic methods. Examples from U.S. and California regulations, policy, project environmental assessments. Letter grading.

**M239. Pollution Prevention. (2)** (Same as Urban Planning M262C.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

**240. Fundamentals of Toxicology. (4)** Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on the human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Letter grading.

**241. Environmental Toxicology: Trace Contaminants. (4)** Lecture, three hours; discussion, one hour. Preparation: one organic chemistry course. Essentials of toxicology in relation to trace contaminants. S/U or letter grading.

**242. Toxicodynamics. (4)** Lecture, two hours; discussion, two hours. Requisite: course 240. Examination of biochemical, cellular, and molecular mechanisms by which chemicals induce toxicity in a wide spectrum of organ systems and in a number of pathological conditions. Letter grading.

**243. Embryology and Teratology. (4)** Lecture, four hours. Requisite: course 240. Description of normal mammalian embryology at whole animal, cellular, and molecular levels and of biological, chemical, or physical perturbations of normal processes which produce congenital malformations. Letter grading.

**244. Reproductive and Developmental Toxicology. (4)** Lecture, four hours. Requisite: course 240. Introduction to current theory and research related to reproductive and developmental toxicology. Letter grading.

**M245. Laboratory in Toxicological Methods. (2)** (Same as Pharmacology M234C.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxin to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

**M249. Toxics Reduction: Science, Engineering, and Policy Issues. (4)** (Same as Chemical Engineering M290U and Urban Planning M262A.) Lecture, three hours. Requisites: Urban Planning 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. Letter grading.

**250. Introduction to Occupational Safety and Health. (4)** Lecture, four hours. Scientific, legal policy, and historical issues in occupational health. Introduction to various related disciplines (e.g., occupational medicine, nursing, industrial hygiene, toxicology, epidemiology, health education). S/U or letter grading.

**251. Introduction to Occupational Medicine. (3)** Lecture, three hours. Requisite: course 250. Introduction to health effects of occupational exposures, including recognition, evaluation, and prevention of occupational diseases. Emphasis on concepts of disease mechanisms, manifestations, and prevention. Letter grading.

**252D. Properties and Measurement of Airborne Particles. (4)** Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. S/U or letter grading.

**252E. Identification and Measurement of Gases and Vapors. (4)** Lecture, three hours; discussion, one hour; other, two hours. Preparation: one year each of chemistry, physics, and calculus. Requisite: course 250. Theoretical and practical aspects of industrial hygiene sampling and measurement of gases and vapors. Letter grading.

**252F. Industrial Hygiene Measurements Laboratory. (3)** Laboratory, three hours. Corequisites: courses 252D, 252E. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment. S/U or letter grading.

**252G. Industrial and Environmental Hygiene Assessment. (4)** Lecture, one hour; discussion, two hours; laboratory, two hours; other, four hours. Requisites: courses 200A, 200B, 250, 252D, 252E, 252F. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.

**253A. Physical Agents in Work Environment. (2)** (Formerly numbered 253.) Lecture, two hours. Preparation: one year of physics. Requisite: course 250. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and heat in the workplace environment. S/U or letter grading.

**253B. Physical Agents Laboratory. (2)** Laboratory, two hours. Requisite: course 253A. Hands-on experience in use of survey instruments for evaluation of worker exposure to various physical agents encountered in work environment. Letter grading.

**254. Health Hazards of Industrial Processes. (4)** Lecture, two hours; four field trips. Requisites: courses 250, 255. Industrial processes and operations and occupational health hazards that arise from them. S/U or letter grading.

**255. Control of Airborne Contaminants in Industry. (4)** Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Requisites: courses 250, 252D. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection. S/U or letter grading.

**256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health. (4)** Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological monitoring and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors. Letter grading.

**257. Critical Review of Scientific Basis of Occupational Standards. (4)** Seminar, four hours. Requisites: courses 240, 250, 251, Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational exposures with disease. Special emphasis on critical evaluations of the literature. Attention specifically to interface of science and regulatory standards. S/U or letter grading.

**258. Identification and Analysis of Hazardous Wastes. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Requisites: courses 250, 252E, Biostatistics 100A. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides a critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes. Letter grading.

**259A. Occupational Safety and Ergonomics. (4)** (Formerly numbered 259.) Lecture, four hours. Discussion of design and modification of products and industrial manufacturing processes to eliminate or control hazards arising out of mechanical, electrical, thermal, chemical, and other potential energy sources and ergonomic risk factors. Discussion of case studies in industrial manufacturing, construction, and agriculture. Letter grading.

**259B. Occupational Ergonomics Laboratory. (4)** Laboratory, four hours. Requisite or corequisite: course 259A. Hands-on experience using typical instruments and analytical techniques utilized in professional practice and research in occupational ergonomics. Laboratory exercises cover anthropometry, force and strength measurements, biomechanical modeling and static prediction, energy expenditure prediction, posture and motion analysis, use of goniometer, and computer-aided workstation design. Letter grading.

**259C. Seminar Series: Occupational Ergonomics. (2)** Seminar, two hours. Requisites: courses 250, 259A. Emphasis on research methodology as applied to prevention and control of worker-related musculoskeletal disorders. Topics include applied anthropometry, biomechanical modeling, strength measurement, postural analysis, fatigue, and medical surveillance of cumulative trauma disorders. S/U grading.

**259E. Occupational Safety and Health Program Management. (4)** Lecture, four hours. Designed for graduate students. Introduction to application of management principles and techniques for management of safety and health and loss control programs. Letter grading.

**259F. Accident Investigation and System Safety. (4)** Lecture, four hours. Requisite: course 259D. Introduction to retrospective and prospective safety hazard analysis, system safety, computer-aided hazard analysis, and methodology and process of accident investigation. Letter grading.

**259G. Fire Prevention, Protection, and Facility Design. (3)** Lecture, three hours. Requisite: course 259D. Introduction to application of fire sciences, engineering, and management principles to prevention, suppression, and control of fires and explosions and protection of persons and property from fire or explosion damage and injury. Letter grading.

**M259H. Biomechanics of Traumatic Injury. (4)** (Formerly numbered 259H.) (Same as Biomedical Engineering M259H.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Introduction to applied biomechanics of accidental injury causation and prevention; discussion of mechanisms of injury that result in bone and soft tissue trauma; discussion of mechanisms of healing for effective rehabilitation after traumatic injury. Letter grading.

**261. Chemical Behavior of Aquatic Systems. (4)** Lecture, three hours. Requisites: courses 200A, 200B, Chemistry 20A, 20B, Mathematics 3A. Chemistry of ocean waters, rivers, groundwaters, and water treatment systems. Topics include thermodynamics of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, plus applied problems. Letter grading.

**262. Environmental Microbiology. (4)** Lecture, three hours. Preparation: one course each in microbiology and biochemistry. Basic concepts of eutrophication, indicator organisms, aquatic microbes; assessment of biological treatment practices in water reuse and/or purification. S/U or letter grading.

**263. Geochemistry of Groundwater. (2)** Lecture, two hours. Requisites: Biostatistics 100A, Chemistry 20A, 103, Earth and Space Sciences 1. Geochemistry of groundwater as impacted by geologic environment and other natural factors and changes in composition due to water use. Letter grading.

**264. Fate and Transport of Organic Chemicals in the Aquatic Environment. (4)** Lecture, four hours. Preparation: bachelor's degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. S/U or letter grading.

**296A-296M. Seminars: Research Topics in Environmental Health Sciences. (2 each)** Seminar, two hours. Advanced study and analysis of current topics in environmental health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**296A.** Coastal Ecological Processes and Problems.

**296B.** Teratogenesis.

**296C.** Advances in Environmental Evaluation and Conflict Management.

**296D.** Research Methods in Pollution Prevention Analysis.

**296E.** Molecular Topics in Boron Biology.

**296F.** Toxicology and Exposure Assessment of Toxic Chemicals.

**296G.** Advances in Aerosol Technology.

**296H.** Occupational Safety and Ergonomics.

**296I.** Industrial and Environmental Hygiene.

**296J.** Germ Cell Cytogenetic/Genetic Biomarkers.

**296K.** Aquatic Chemistry.

**296L.** Water Science and Health.

**296M.** Experimental and Modeling Studies of Atmospheric Pollution.

**400. Field Studies in Environmental Health Sciences. (2 or 4)** Fieldwork, to be arranged. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

**401. Environmental Measurements. (4)** Lecture, two hours; laboratory, four hours. Requisites: courses 200A, 200B, Chemistry 20A, 30AL. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Letter grading.

**410A. Instrumental Methods in Environmental Sciences. (4)** Lecture, four hours; discussion, two hours; other, two hours. Preparation: one year each of physics, chemistry, and biology. Theory and principles of instrumental methods through lectures and group discussions. Letter grading.

**410B. Instrumental Methods Laboratory in Environmental Health Sciences. (4)** Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Preparation: one year each of physics, chemistry, and mathematics. Requisites: courses 200A, 200B. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples. Letter grading.

**M411. Environmental Health Sciences Seminar. (2)** (Same as Environmental Science M411.) Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**M412. Effective Technical Writing. (2)** (Same as Environmental Science and Engineering M412.) Lecture, one hour. Essentials of grammar, punctuation, syntax, organization, and format needed to produce well-written journal articles, research reports, memoranda, letters, and résumés. Emphasis on accuracy, clarity, conciseness, and avoidance of common errors in advanced technical writing, using critique, exercises, and examples. S/U grading.

**461. Water Quality and Health. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 200A, 200B, 401. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications. S/U or letter grading.

**462. Environmental Hygiene and Appropriate Technologies. (2)** Lecture, two hours. Environmental sanitation of water supplies in rural and developing areas. Review of water quality problems and solutions for nonurban, developing community. Technical, socioeconomic, and cultural problems associated with maintenance and delivery of high water quality. S/U or letter grading.

**470. Environmental Hygiene Practices. (2)** Lecture, two hours. Requisites: courses 200A, 200B, 230, 401, Epidemiology 100. Field principles and practices of environmental sanitation as applicable to the sanitarian. Topics include theory, code enforcement, and inspection procedures for applicable environmental topic areas. S/U or letter grading.

**495. Teacher Preparation in Environmental Health Sciences. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Professors

Birgitte K. Ahring, Ph.D. (*Civil and Environmental Engineering*)  
 Richard F. Ambrose, Ph.D. (*Environmental Health Sciences*)  
 Richard A. Berk, Ph.D. (*Sociology, Statistics*)  
 Trudy A. Cameron, Ph.D. (*Economics, Policy Studies*)  
 Yoram Cohen, Ph.D. (*Chemical Engineering*)  
 William G. Cumberland, Ph.D. (*Biostatistics*)  
 Climis A. Davos, Ph.D. (*Environmental Health Sciences*)  
 Jody Freeman, LL.B., LL.M., S.J.D. (*Law*)  
 John R. Froines, Ph.D. (*Environmental Health Sciences*)  
 Malcolm S. Gordon, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
 William C. Hinds, Sc.D. (*Environmental Health Sciences*)  
 Raymond V. Ingersoll, Ph.D. (*Earth and Space Sciences*)  
 Antony R. Orme, Ph.D. (*Geography*)  
 Theodore M. Porter, Ph.D. (*History, Statistics*)  
 Shane Que Hee, Ph.D. (*Environmental Health Sciences*)  
 Michael K. Stenstrom, Ph.D. (*Civil and Environmental Engineering*)  
 Irwin H. Suffet, Ph.D. (*Environmental Health Sciences*)  
 Stanley W. Trimble, Ph.D. (*Geography*)  
 Richard Turco, Ph.D. (*Institute of the Environment*)  
 Arthur M. Winer, Ph.D. (*Environmental Health Sciences*)

## Professor Emeritus

Richard L. Perrine, Ph.D. (*Civil and Environmental Engineering*)

J.R. DeShazo, Ph.D. (*Policy Studies*)  
 L. Donald Duke, Ph.D. (*Environmental Health Sciences*)  
 Peggy Fong, Ph.D. (*Organismic Biology, Ecology, and Evolution*)

## Assistant Field Program Supervisor

Diane M. Perry, Ph.D. (*Environmental Health Sciences*)

## Scope and Objectives

The UCLA Environmental Science and Engineering (ESE) Program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional Ph.D. programs. As the program enters its third decade, Dr. Libby's vision has in fact been realized with the evolution of the program from an experimental approach into a key component of the overall effort to train environmental professionals at UCLA.

To date the program has awarded the Doctor of Environmental Science and Engineering (D.Env.) degree to over 180 students, and UCLA remains unique in the country in awarding such a degree. Many graduates have gone on to occupy critical positions in environmental research, remediation, and policy throughout the major environmental agencies in California and the nation. Other graduates have risen to senior positions in private sector companies conducting environmental research and reme-

diation. Still other graduates are applying scientific solutions to environmental problems at national laboratories such as Oak Ridge and Lawrence Livermore Laboratories and at research institutes such as the RAND Corporation.

Although many participating interdepartmental faculty members are from the College of Letters and Science and the Henry Samueli School of Engineering and Applied Science, the program is administered through the School of Public Health where a core faculty is based in the Department of Environmental Health Sciences. No undergraduate major or master's degree is offered.

The program is designed to train multidisciplinary professionals with an appropriate balance of breadth and specific skills, based on a strong master's-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training through nine-month problems courses. Because the D.Env. degree is not a specialized research degree in the manner of a Ph.D., the usual extended research training period in residence at UCLA associated with a Ph.D. is replaced by an 18- to 24-month internship in an appropriate government agency, national laboratory, or private industry, during which in-depth study of an environmental problem leads to a dissertation.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degree

The Environmental Science and Engineering Program offers the Doctor of Environmental Science and Engineering (D.Env.) degree.

## Admission

In general, students entering the D.Env. program should have received a master's degree in some field of the sciences or engineering. Generalist master's degrees in such areas as environmental sciences or public health and master's degrees in the social sciences, or medical degrees may be accepted for admission if the applicant presents a record with appropriate courses in the sciences and mathematics and other special qualifications such as research experience.

In addition to meeting University minimum standards, applicants for the D.Env. degree

<http://www.ph.ucla.edu/ese>

Richard F. Ambrose, Ph.D., *Director*

must have an excellent scholastic record and must be acceptable to the admissions committee. Generally, applicants must have achieved a grade-point average of at least 3.0 in undergraduate work and 3.5 in graduate work. The overall academic record, including Graduate Record Examination (GRE) scores and Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination scores (for students whose native language is not English), must reflect exceptional verbal and quantitative skills and drive toward academic achievement. The program is also interested in special qualities, awards, and achievements not reflected in the student's academic record. All applicants must file a narrative statement indicating how their professional goals can be met through the D.Env. program and submit three letters of recommendation.

Before being accepted unconditionally into the program, all students must have taken the following courses, which are considered preparation for the program: (1) biology — one year of introductory biology with laboratory, (2) chemistry — one year of general chemistry with laboratory, including analytical methods, and one quarter of organic chemistry, no laboratory required, (3) geology — one course in introductory geology with laboratory, (4) mathematics — one year of calculus plus one course in elementary statistics, (5) physics — one year of introductory physics with laboratory. Any of the courses may be taken after students have arrived at UCLA.

Admission to the program is made through recommendation of a faculty committee that has reviewed the applicant's file, and with the concurrence of the program director and the Graduate Division. Subject to funding availability, the program offers fellowships to eligible first-year students. Prospective students may request a descriptive brochure by contacting the program.

## Doctoral Degree

Specialties within the program include, but are not limited to, the assessment and management of hazardous substances in the air, soil, and water environments; migration of contaminants in groundwater; health risks of toxic substances; mitigation of adverse effects on the biological environment; and environmental problems common to the U.S. and Mexico. Also, students may balance their work with a greater emphasis on either the science/engineering or science/policy side of their specialty.

Sixteen course requirements must be satisfied, at least seven of which must be at the graduate level. The course requirements consist of core, breadth, and problems courses, seminars, and a technical writing course.

Written and oral qualifying examinations are required. The purpose of the examinations is to test the student's understanding of the core and breadth areas, the master's field, current issues in the environmental field, and subjects

covered in problems courses. Following successful completion of the written examination, students take the University Oral Qualifying Examination.

Following advancement to candidacy, students begin an internship in their field of interest at an outside institution. No later than nine months after advancement to candidacy, at the beginning of the internship, candidates are required to present a written prospectus of the dissertation and defend it before the doctoral committee.

## Environmental Science and Engineering

### Graduate Courses

**400A. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Primarily designed for environmental science and engineering doctoral students. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400B. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Requisite: course 400A. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400C. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Requisite: course 400B. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. Letter grading.

**400D. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Preparation: successful completion of internship approved by doctoral committee and program director. Requisite: course 400C. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. S/U or letter grading.

**410A-410B-410C. Environmental Science and Engineering Workshops. (2-2-2)** Discussion, two hours. Primarily designed for environmental science and engineering doctoral students who are conducting problems courses. Development of multidisciplinary skills essential to solution of environmental problems studied within courses 400A through 400D. Development of presentation skills. S/U grading.

**M411. Environmental Health Sciences Seminar. (2)** (Same as Environmental Health Sciences M411.) Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**M412. Effective Technical Writing. (2)** (Formerly numbered 412.) (Same as Environmental Health Sciences M412.) Lecture, one hour. Essentials of grammar, punctuation, syntax, organization, and format needed to produce well-written journal articles, research reports, memoranda, letters, and résumés. Emphasis on accuracy, clarity, conciseness, and avoidance of common errors in advanced technical writing, using critique, exercises, and examples. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Supervised investigation of advanced environmental problems. S/U grading.

## Scope and Objectives

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities

that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology which includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology (see Public Health Schoolwide Programs).

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Epidemiology offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Epidemiology.

## Admission

The department admits to the M.S. program only those applicants who hold a prior M.P.H. or doctoral degree (e.g., M.D., D.D.S., D.V.M., Ph.D., or equivalent) or those applicants whose ultimate degree objective is the Ph.D. degree. The M.S. degree may be earned as part of the process of completing requirements for the Ph.D.

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) at least a 3.0 junior/senior

grade-point average and at least a 3.5 grade-point average in graduate studies, and (3) approval by the department admissions committee, an academic adviser, and the department chair.

## Master's Degree

The M.S. degree is offered through the comprehensive examination and thesis plans. Students must complete a minimum of 56 units: 38 units of core courses and 18 units of elective courses. At least 20 units of the coursework must be at the graduate level.

## Doctoral Degree

Students must fulfill the course requirements for the M.S. degree in Epidemiology with an average of no less than 3.3 (B+) in specific core courses in epidemiology. Students must also take one course in theory and methodology and one additional statistics course beyond the M.S. requirements, one course on pathobiology, and at least three quarters of an advanced seminar. The statistics and pathobiology courses must be approved by the department. In addition, students must take at least 12 units of graduate-level courses outside the department.

Written and oral qualifying examinations are required. Following successful completion of the written examination, students take the University Oral Qualifying Examination.

## Epidemiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Epidemiology. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in epidemiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

### Upper Division Courses

**100. Principles of Epidemiology. (4)** Lecture, two hours; discussion, four hours. Preparation: one full biological sciences course. Not open for credit to students with credit for course 200. Introduction to epidemiology, including factors governing health and disease in populations. Letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

### Graduate Courses

**200. Epidemiology I. (4)** Lecture, two hours; laboratory, four hours. Preparation: one full biological sciences course. Requisite: Biostatistics 100A (may be taken concurrently). Not open for credit to students with credit for course 100. Introduction to epidemiology, including factors governing health and disease in populations. Letter grading.

**201A-201B. Epidemiologic Methods I, II. (6-6)** Lecture, four hours; discussion, two hours; outside study, 12 hours. Preparation: at least two upper division biology or social sciences courses. Recommended preparation: course 100 or 200. Requisites: Biostatistics 100A, 100B. Comprehensive coverage of concepts, principles, and methods in epidemiology, with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health. Letter grading.

**202A. Epidemiology: Theory and Methodology. (4)** Lecture, four hours. Requisite: course 201B. Advanced principles and methods of epidemiologic analysis. Topics include relating prevalence and incidence, analysis of clustering and seasonality; measures of effect, sources of bias, regression to the mean, estimation and hypothesis testing in epidemiology; models for risk and rates; cohort analysis. S/U or letter grading.

**203. Topics in Theoretical Epidemiology. (2)** Lecture, two hours. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

**M204. Logic, Causation, and Probability. (4)** (Formerly numbered 204.) (Same as Statistics M243.) Lecture, four hours. Preparation: two terms of statistics or probability and statistics. Recommended requisite: course 201B. Principles of deductive logic and causal logic using counterfactuals. Principles of probability logic and probabilistic induction. Causal probability logic using directed acyclic graphs. S/U or letter grading.

**210. Public Health Research Using Available Data. (2)** Lecture, one hour; discussion, one hour. Requisites: courses 100, 410A or Biostatistics 403, Biostatistics 100A. Presentations and discussions of availability, concepts, content, and usefulness of already collected data in public health research. Major emphasis on public data such as National Center for Health Statistics surveys, vital statistics, census, etc. S/U or letter grading.

**M211. Statistical Methods for Epidemiology. (4)** (Same as Biostatistics M211 and Statistics M250.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: courses 201A, 201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in courses 201A and 201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

**M212. Statistical Modeling in Epidemiology. (4)** (Formerly numbered 202B.) (Same as Biostatistics M209.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course M204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

**M218. Questionnaire Design and Administration. (4)** (Same as Community Health Sciences M218.) Lecture, four hours. Requisites: courses 201A and 201B or Community Health Sciences 211A and 211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

**220. Principles of Infectious Disease Epidemiology. (4)** Lecture, three hours. Requisite: course 100 or 200. Ascertainment of infection, transmission, and epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles. S/U or letter grading.

**221. Prevalent and Emerging Infectious Diseases in the World. (4)** Lecture, four hours. Requisites: course 100 or 200, Biostatistics 100A, 100B. Designed for graduate students and medical doctors seeking broad knowledge and detail on prevalent and emerging infectious diseases, including influenza/acute respiratory infections, cholera/diarrheal disease, tuberculosis, hepatitis B, malaria, measles, neonatal tetanus, HIV/AIDS, pertussis (whooping cough). S/U or letter grading.

**222. Arthropods as Vectors of Human Diseases.**

(4) Lecture, four hours. Requisites: courses 100 or 200, 220. Comprehensive overview of morphology, systematics, natural history, host/vector/pathogen relationships, and spectrum of diseases carried by arthropods for graduate students, public health professionals, and medical doctors seeking information on global prevalence of arthropod-borne diseases. Letter grading.

**223A. Protozoal Diseases of Man.** (4) Lecture, four hours. May be taken concurrently with course 223B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of protozoa parasitic in man and animals. S/U or letter grading.

**223B. Protozoal Diseases of Man.** (2) Laboratory, four hours. Requisite or corequisite: course 223A. Laboratory methods of diagnosis and microscopic recognition of protozoa parasitic in man and animals. Intestinal protozoa and organisms occurring in blood and tissues of their hosts and pathology associated with these infections. S/U or letter grading.

**224A. Helminthic Diseases of Man.** (4) Lecture, four hours. May be taken concurrently with course 224B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of nematodes, trematodes, and cestodes parasitic in man and animals. S/U or letter grading.

**224B. Helminthic Diseases of Man.** (2) Laboratory, four hours. Diagnosis and practical microscopic recognition of nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections. S/U or letter grading.

**226. Public Health Responses to Bioterrorism.** (2) Lecture, two hours. Requisite: course 220 or 221. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand problems and responses. Letter grading.

**227. AIDS: A Major Public Health Challenge.** (4) Lecture, four hours. Requisites: course 100 or 200, Biostatistics 100A or 110A. Presentation of epidemiologic, biologic, psychological, and clinical characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading.

**M228. Biology of HIV.** (4) (Same as Microbiology and Immunology M275.) Lecture, three hours. Preparation: two biology courses. Requisites: course 100, Biostatistics 100A. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory. Letter grading.

**229. Epidemiology of Foodborne Illnesses.** (2) Lecture, two hours. Requisites: course 100 or 200, Biostatistics 100A. Food poisoning is a significant cause of morbidity and mortality in both developing and developed world. Examination of etiologic agents of food poisoning and factors specific to foods that allow them to become agents of disease transmission. S/U or letter grading.

**230. Epidemiology of Sexually Transmitted Diseases.** (4) Lecture, four hours. Requisite: course 100 or 200. Sexually transmitted diseases; medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

**240. Cardiovascular Epidemiology.** (2) Lecture, two hours. Topics include definition, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

**242. Cancer Epidemiology.** (4) Lecture, four hours. Requisite: course 100 or 200. Introduction to basic concepts of cancer and molecular and genetic epidemiology. Review of current epidemiologic research in cancer in recent medical and epidemiological literature. Research proposal on a cancer-related topic required. S/U or letter grading.

**243. Molecular Epidemiology of Cancer.** (4) Lecture, four hours. Requisite: course 242 or 295. Introduction to basic concepts and methodology of molecular epidemiology of cancer and review of current molecular epidemiologic research of cancer in recent medical and epidemiological literature. S/U or letter grading.

**244. Research Methods in Cancer Epidemiology.** (2) Lecture, two hours. Requisites: courses 100 and/or 200, Biostatistics 100A. Biologic, quantitative, philosophical, and administrative considerations in epidemiologic cancer research. Hypothesis specification and choice of study design. Uses of descriptive epidemiology, cohort studies, case control studies. Clustering, screening, and cancer control. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding. S/U or letter grading.

**245. Epidemiological and Clinical Issues in Research on Aging.** (2) Lecture, two hours. Overview of concepts and current epidemiological and clinical issues in research on aging. Presentations by current epidemiological and clinical researchers at UCLA and coverage of range of current research topics on aging, with focus on conceptual and methodological issues related to each topic area. S/U or letter grading.

**246. Epidemiology of Aging.** (2) Lecture, two hours. Requisite: course 100 or 200. Epidemiologic methods of estimating present and future burdens of aging: morbidity, disability, and dependency. Epidemiology of major disabling conditions affecting the elderly. Evaluation of possible intervention strategies. Methodologic issues in geriatric epidemiology. S/U or letter grading.

**247. Epidemiology of Injuries in the Elderly.** (2) Lecture, two hours. Requisite: course 100. Description of frequency of, risk factors for, and possibilities of preventing injuries in the elderly populations. Comparison of injury outcomes (morbidity and mortality) in younger vs. older populations. Emphasis on methodologic issues of studying elderly people. S/U or letter grading.

**248. Psychiatric Epidemiology.** (2) Lecture, two hours. Requisite: course 100 or 200. Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumentation, and epidemiology of selected psychiatric disorders. Letter grading.

**251. Epidemiology of Nonintentional Injuries.** (4) Lecture, three hours; discussion, two hours. Requisites: course 100 or 200, Biostatistics 100A. Pertinent epidemiologic methods for study of nonintentional trauma, including that from motor vehicle crashes, occupational exposures, falls, and other major external causes, which focus on research approaches, data sources, analytical techniques. Substantive findings on related subproblem areas presented for critical review. Letter grading.

**252. Epidemiology of Assault, Homicide, and Suicide.** (2) Lecture, two hours; discussion, one hour. Requisite: course 100 or 200. Presentation and evaluation of epidemiologic research approaches to study of violent injury, including description of incidence, study design, risk factor analysis, and control evaluation. S/U or letter grading.

**253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures.** (2) Lecture, two hours; discussion, one hour. Requisites: course 100, Biostatistics 100A. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.

**M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries.** (2) (Same as Community Health Sciences M255.) Lecture, two hours. Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. Letter grading.

**259. Disaster Epidemiology.** (2) Lecture, two hours. Requisites: course 100 or 200, Community Health Sciences 295. Introduction to epidemiologic methodology to study disasters and their health outcomes, including surveillance, loss estimation, risk factor assessment, intervention, and evaluation. Letter grading.

**260. Environmental Epidemiology.** (2 or 4) Lecture, two hours; discussion, two hours. Requisite: course 100 or 200. Methodological problems and approaches of epidemiology for assessing health impact of major types of environmental exposure. S/U or letter grading.

**261. Occupational Epidemiology.** (4) Lecture, two hours; discussion, two hours. Requisite: course 100 or 200. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments. S/U or letter grading.

**262. Seminar: Environmental and Occupational Cancer Epidemiology.** (2) Seminar, two hours. Requisite: course 100 or 200. Discussion of examples of recent epidemiologic studies, with focus on environmental and occupational exposures, especially in areas where controversies have arisen such as for electromagnetic fields and childhood leukemia, and bladder cancer and trihalomethanes levels of drinking water. S/U or letter grading.

**263. Exposure Assessment in Occupational and Environmental Epidemiology.** (2) Lecture, two hours. Requisite: course 100 or 200. Exposure assessment is often most challenging aspect of epidemiologic studies of occupational and environmental hazards. Focus on integration of industrial hygiene principles and epidemiologic methods to improve exposure assessment protocols and exposure analyses for occupational/environmental health studies. S/U or letter grading.

**268. Introduction to Pharmacoepidemiology.** (2) Lecture, two hours. Requisite: course 200. Pharmacoepidemiology is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U or letter grading.

**270. Epidemiology and Health Policy.** (2) Lecture, two hours. Requisites: courses 100, or 201A and 201B, Biostatistics 100B or 110B, Health Services 100. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide framework for integrating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators. S/U or letter grading.

**280. Parasitic Diseases and Global Health.** (4) Lecture, four hours. Overview of major human parasitic diseases in terms of their biology, occurrence, distribution, and transmission in nature; diseases they cause and impact they have on health of populations; interaction with other disease states; and interventional strategies for their control. S/U or letter grading.

**290. Seminar: Epidemiology — Infectious and Tropical Disease.** (2) Seminar, two hours. Review of research on specific diseases of public health importance. May be repeated for credit. S/U or letter grading.

**291. Seminar: Epidemiology — Methodology.** (2) Seminar, two hours. Requisite: course 100 or 200. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

**292. Advanced Seminar: Epidemiology.** (2) Seminar, two hours. Requisite: course 201B. Current research in epidemiology. May be repeated for credit. S/U grading.

**293. International HIV/AIDS Seminar.** (2) Seminar, two hours. Ongoing discussion of worldwide pandemic of HIV/AIDS, with emphasis on problems of surveillance, reporting, and intervention. Discussion of recent literature. Presentations by fellows from other countries. S/U grading.

**294. Epidemiology and Policy of Occupational and Environmental Health Issues.** (2) Seminar, two hours. Requisite: course 100 or any other epidemiology course. Introduction to demands that go beyond "pure science," with focus on issues such as risk communication, potential influence (and ethics) of oversight panels and external review groups on presenting results and conclusions, and interest of government agencies. S/U or letter grading.

**295. Seminar: Epidemiology — Cancer.** (2) Seminar, two hours. Requisite: course 100 or 200. Introduction of basic concepts of cancer epidemiology and review of current epidemiological research in cancer in recent medical and epidemiological literature. May be repeated for credit. S/U or letter grading.

**400. Field Studies in Epidemiology.** (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

**401. Database Theory and Practical Applications in Injury Epidemiology. (2)** Lecture, two hours. Prerequisite: course 201A. Exploration of theory and practical strategies for database construction and manipulation, selection, and use of desktop-computing database applications using a variety of examples from epidemiological research. Letter grading.

**402. Advanced Data Analysis in Occupational and Environmental Epidemiology. (4)** Lecture, two hours; laboratory, two hours. Preparation: one data management course. Prerequisites: courses 201A and 201B, or 201A and 261. Development of strategies for analyzing data in occupational and environmental settings. Use of multivariate data analysis techniques typically used in occupational cohort studies, nested case-control studies, and ecologic studies in environmental epidemiology. S/U or letter grading.

**M403B. Computer Management and Analysis of Health Data Using SAS. (4)** (Same as Biostatistics M403B.) Lecture, two hours; laboratory, two hours. Prerequisites: Biostatistics 100A, 100B. Introduction to practical issues in management and analysis of health data using SAS programming language. Cross-sectional and longitudinal population-based data sets to be used throughout to illustrate principles of data management and analysis for addressing biomedical and health-related hypotheses. Letter grading.

**410A. Management of Epidemiologic Data. (2)** Lecture, two hours. Prerequisites: course 100, Biostatistics 100A (one course may be taken concurrently with consent of instructor). Concepts, collection, and management of data, with particular emphasis on databases in chronic infectious diseases. Introduction to personal computers and appropriate software for epidemiologic studies. S/U or letter grading.

**410B. Management of Epidemiologic Data. (2)** Lecture, two hours. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer. S/U or letter grading.

**411. Research Resources in Epidemiology. (2)** Lecture, one hour; discussion, one hour. Prerequisites: course 100 or 200, Biostatistics 100A. Instruction and practical experience in use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication. S/U or letter grading.

**412. Public Health Surveillance. (2)** Lecture, two hours. Prerequisites: course 100 or 200, Biostatistics 100A. Overview of public health surveillance methodology, including (1) design, implementation, and evaluation of surveillance systems, (2) analysis and interpretation of surveillance data, and (3) application of surveillance methods to specific health-related outcomes. Letter grading.

**414. Practical Epidemiologic Investigations. (2 to 4)** Lecture, one to two hours; laboratory, one to two hours. Prerequisite: course 100 or 200. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. S/U or letter grading.

**415. Epidemiology for Developing Countries. (4)** Lecture, four hours. Prerequisites: courses 100 and/or 200, Biostatistics 100A. Practical use of epidemiology, microcomputers, and spreadsheet models for estimating morbidity and mortality, developing intervention or prevention strategies, and setting program priorities in Third World settings. Letter grading.

**417. Injury Prevention Strategies and Countermeasures. (2)** Lecture, two hours. Prerequisite: course 100. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U or letter grading.

**M418. Rapid Epidemiologic Surveys in Developing Countries. (4)** (Formerly numbered 418.) (Same as Community Health Sciences M418.) Lecture, four hours. Prerequisites: courses 100 and/or 200, Biostatistics 100A. Presentation of how to do health surveys in Third World countries. Practical assistance for planning and organizing surveys, including use of microcomputers to develop and test the questionnaire, select the sample, process and analyze data, and prepare final report. Letter grading.

**419. Applications in Musculoskeletal Epidemiology. (4)** Lecture, two hours; laboratory, two hours. Prerequisites: course 100 or 200 (may be taken concurrently), Biostatistics 100A. Introduction to principles and practical issues of epidemiologic data analysis for addressing musculoskeletal-related hypotheses. Use of data sets from relevant components of National Health Interview Survey and from musculoskeletal-related epidemiologic studies. Use of SAS programming language, with applications in both UNIX and Windows. Letter grading.

**495. Teacher Preparation in Epidemiology. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## ETHNOMUSICOLOGY

*School of the Arts and Architecture*

UCLA  
2539 Schoenberg Music Building Annex  
Box 951657  
Los Angeles, CA 90095-1657  
(310) 206-3033

Anthony Wilson  
Gerald Wilson  
Ikuko Yuge, B.A., *Emerita*

### Adjunct Professors

Ankica Petrovic, Ph.D.  
Benjamin Suchoff, Ed.D.

### Adjunct Assistant Professors

Francisco Aguabella  
Donald Kim, B.A.  
Kobla Ladzekpo, M.A.  
Chi Li, B.A.  
James Roberson, M.B.A.  
I Nyoman Wenten, Ph.D.

### Visiting Professor

Shujaat Husain Khan

### Visiting Associate Professor

Amy Catlin, Ph.D.

### Visiting Assistant Professors

Jonathon Grasse, Ph.D.  
Jesus Guzman

## Scope and Objectives

Ethnomusicology is a research field that combines the various techniques of musical analysis with the methods of the social sciences and humanities (i.e., the study of cultural systems including music). Although originally focused on folk, tribal, and Asian classical music traditions, ethnomusicology at UCLA includes the study of all styles of music in the world, including popular music, jazz, and even Western classical music when approached from a cultural analysis perspective. The undergraduate and graduate programs in ethnomusicology provide students with broad knowledge of world musics and methods currently used in their study.

The object of systematic musicology, a multidisciplinary field, is to answer fundamental questions on the nature and properties of music, not only as art but as empirical phenomena. At UCLA, this research orientation integrates the perspectives of aesthetics and philosophy, music theory, acoustics, sociology, psychology, organology, and semiotics, any of which can be cross-cultural, focusing on the systems or models discernible through these disciplines.

## Undergraduate Study

### Ethnomusicology B.A.

#### Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a videotape of musical performance, following departmental guidelines.

#### Preparation for the Major

*Required:* Ethnomusicology 10A, 10B, 10C, 20A, 20B, 20C, and 12 units of performance organizations or private instruction in music (courses 91A through 91Z or 92).

#### The Major

##### Ethnomusicology Concentration

*Required:* (1) Group A — Ethnomusicology 175 or 181, M180, 190; (2) group B — seven courses selected from 105 through 121, 128, M131 through 174, C176, C178, C179, C188, 196 through 199S; (3) group C — 12 units from courses 191A through 191Z or 192.

##### Jazz Studies Concentration

*Required:* Ethnomusicology M110A, M111, 120A or 120B, M127, M129A, M129B, M129C, M180 or 181, M186, 12 units of course 171, 12 units of course M177, Music History 150, and three elective courses from Ethnomusicology 105 through 121, 128, M131 through 174, C176, C178, C179, C188, 196 through 199S.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Ethnomusicology offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Ethnomusicology.

#### Admission

Applicants to the M.A. program usually have completed a bachelor's degree in music. Applicants with strong musical backgrounds and bachelor's degrees in other fields are welcome but must provide evidence of their musical training and experience. Dossiers are reviewed by the faculty to assess each applicant's potential as a graduate student in this field and program.

Applicants are required to submit, in addition to the regular Graduate Division requirements, (1) a statement of purpose, (2) three letters of recommendation, and (3) a research paper as a sample of writing and research skill (M.A. thesis, if available). No application can be considered until all of the above materials have been received.

Admission to the Ph.D. program with a specialization in ethnomusicology requires an M.A. in ethnomusicology or in a cognate field such as music, anthropology, or folklore with a significant emphasis in ethnomusicology. Applicants with M.A. degrees but with little or no background in ethnomusicology are encouraged to apply for the M.A. program in ethnomusicology.

Admission to the Ph.D. program with a specialization in systematic musicology requires a master's degree in musicology, music theory, or other cognate discipline.

#### Admission Timetable

December 15 — Application for admission/fellowship is due.

December 30 — Supplementary application materials are due.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

By March 15 — Notice of acceptance or denial is sent.

Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15. Applicants on a waiting list for admission are notified as soon as a decision is reached. Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

## Master's Degree

For specializations, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination plan. Students in ethnomusicology are required to complete a minimum of 52 units of upper division and graduate courses (normally 12 courses), of which 36 units (normally eight courses) must be at the graduate level. There are core and elective courses. Students must enroll in a minimum of six quarters of ethnomusicology performance organizations which are not applied to their degree.

Students in systematic musicology are required to complete a minimum of 52 units of upper division and graduate courses (normally 12 courses), of which 36 units (normally eight courses) must be at the graduate level. There are core and elective courses.

There is a language requirement for this degree.

## Doctoral Degree

The department offers the Ph.D. in Ethnomusicology, with specializations in ethnomusicology and systematic musicology.

The Ph.D. degree requires a minimum of 24 units of graduate and upper division courses (normally six courses). A minimum of 12 units (normally three courses) must be in the department, and a minimum of 16 units (normally four courses) must be graduate-level seminars. Students who do not have an M.A. from UCLA may be required to take extra courses to make up deficiencies.

Students in the ethnomusicology specialization must enroll in a minimum of three quarters of ethnomusicology performance organizations which are not applied to their degree.

Written and oral qualifying examinations are required. The written examinations cover four separate areas. In both specializations some examinations may be take-home examinations or papers.

Following successful completion of the written examinations, student take the University Oral Qualifying Examination, which is primarily a defense of the doctoral dissertation proposal, especially its relation to previous research in the area and to theory and method in ethnomusicology.

There is a language requirement for this degree.

## Ethnomusicology

### Lower Division Courses

**1A-1B. Fundamentals of Sound and Music of the World. (2-4)** Lecture, two hours; laboratory, one hour. Acoustical makeup of sound (pitch, tone quality); tuning systems; modes and scales; harmony and polyphony; rhythm and meter; notational systems; relationships of music to culture. Laboratory includes ear training and instrumental techniques.

**10A-10B-10C. World Music Theory and Musicianship. (4-4-4)** Lecture, two hours; discussion, four hours; laboratory, two hours. Limited to Ethnomusicology and World Arts and Cultures majors. Course 10A is requisite to 10B, which is requisite to 10C. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition.

**15. American Life in Music. (4)** Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in the late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.

**20A-20B-20C. Musical Cultures of the World. (4-4-4)** Lecture, four hours; discussion, one hour. Survey of musical cultures of the world (excluding Western art music), role of music in society and its relationship to other arts; consideration also to scale structure, instruments, musical forms, and performance standards. **20A.** Europe and the Americas; **20B.** Near East and Africa; **20C.** South Asia, Southeast Asia, and the Far East.

**91A-91Z. World Music Performance Organizations. (2 each)** Activity, three hours. Group performance of traditional vocal and instrumental music of world cultures. May be repeated for credit without limitation. P/NP or letter grading. **91A.** Music and Dance of the American Indians; **91B.** Music of Bali; **91C.** Music and Dance of the Balkans; **91D.** Music of China; **91E.** Music and Dance of Ghana; **91F.** Music of India; **91G.** Music of Japan; **91H.** Music of Java; **91J.** Music of Korea; **91K.** Music of Mexico; **91L.** Music of Persia; **91M.** Music of Thailand; **91N.** Music of the Near East; **91P.** Music of African Americans; **91Z.** Open Ensemble.

**92. Private Instruction in Music. (2)** Studio, one hour. Limited to Ethnomusicology majors. Private or semiprivate music instruction with a distinguished community-based musician, which must be arranged by students and approved by course instructor. May be repeated for credit without limitation.

## Upper Division Courses

**105. Music, Musicians, and Music Industry. (4)** Lecture, four hours; outside study, eight hours. Designed for undergraduate nonmajors from wide array of backgrounds and interests. How music industry functions and how products are created, marketed, and consumed. Basic information on production of recordings and legal issues faced by musicians, students, and scholars who use music in their work. Letter grading.

**106A. Traditional North American Indian Music. (4)** Lecture, four hours. Native North American traditional music and its role in tribal societies. California, Southwest, Pacific Northwest, Northern and Southern Plains, Great Lakes/Eastern Woodlands, and Southeastern culture areas included. P/NP or letter grading.

**106B. Contemporary North American Indian Music. (4)** Lecture, three hours; discussion, one hour. Contemporary Native North American musical expression, including popular styles (folk, country, rock), intertribal Indian musical genres (powwow), syncretic religious music, and traditional/historic Pan-Indian music. P/NP or letter grading.

**107. South American Indian Music. (4)** Lecture, four hours; outside study, eight hours. Native South American traditional music and its role in indigenous societies. Topics include relationship between speech and song, use of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular music styles. Letter grading.

**M108A-108B. Music of Latin America. (4-4)** Lecture, four hours; discussion, one hour. Course M108A is not requisite to 108B. Survey of traditional and contemporary musical culture. **M108A.** Mexico, Central America, and the Caribbean Isles. (Same as Chicana and Chicano Studies M108A.); **108B.** Latin South America.

**M109. Women in Jazz. (4)** (Same as Afro-American Studies M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

**M110A-M110B. African American Musical Heritage. (4-4)** (Same as Afro-American Studies M110A-M110B and Folklore M154A-M154B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

**M111. Ellingtonia. (4)** (Same as Afro-American Studies M115.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

**CM112. African American Music in California. (4)** (Same as Afro-American Studies CM112A.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM212. P/NP or letter grading.

**113. Music of Brazil. (4)** Lecture, three hours. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents.

**M115. Musical Aesthetics in Los Angeles. (4)** (Same as Chicana and Chicano Studies M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.

**M116. Chicano/Latino Music in the U.S. (4)** (Same as Chicana and Chicano Studies M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples who have inhabited present geographical boundaries of the U.S.

**117. American Popular Music. (4)** Lecture, four hours; discussion, one hour. Survey of history and characteristics of American popular music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music. P/NP or letter grading.

**118. Development of Rock. (4)** History of rock from the 1950s to the 1970s. In-depth survey of stylistic trends illustrated by pertinent examples and accompanied by extensive musical analysis.

**M119. Cultural History of Rap. (4)** (Same as Afro-American Studies M107 and Folklore M110.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

**120A-120B. Development of Jazz. (4-4)** Lecture, four hours; discussion, one hour. Introduction to jazz; its historical background and its development in the U.S.

**121. Cross-Cultural Perspectives in Jazz. (4)** Exploration of assimilation and retention of jazz from the U.S. in various countries, with particular emphasis on cultural and social features which form the basis for new jazz-ethnic music blends.

**C122A-C122B-C122C. Jazz Styles and Analysis. (4-4-4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Music History majors. In-depth analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with courses C222A-C222B-C222C. Letter grading. **C122A.** Early Jazz to Swing Era; **C122B.** Bebop to Avant-garde; **C122C.** Jazz since the Sixties.

**123. Music of Bebop. (4)** Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present.

**125A-125B-125C. Jazz Composition and Arranging. (2-2-2)** Lecture, two hours; outside study, four hours. Examination of various aspects of jazz composition. Differentiation between improvisation and notated composition, as well as between composition and arranging, and introduction to basic arranging concepts. Letter grading. **125A.** Early Jazz to Swing Era; **125B.** Bebop to Avant-garde; **125C.** Jazz since the Sixties.

**M127. Jazz Keyboard Harmony. (1)** (Same as Music M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

**128. Folk Music of Eastern Europe. (4)** Introduction to forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area.

**M129A-M129B-M129C. Jazz Theory and Improvisation. (2-2-2)** (Same as Music M129A-M129B-M129C.) Lecture, four hours. Elements of jazz theory and improvisation. **M129A.** Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. **M129B.** Requisite: course M129A with a grade of C or better. Medium-level jazz harmonic constructions. **M129C.** Requisite: course M129B with a grade of C or better. Advanced-level jazz harmonic constructions.

**M131. Development of Latin Jazz. (4)** (Same as Music M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as "Latin jazz." P/NP or letter grading.

**C136A-C136B. Music of Africa. (4-4)** (Formerly numbered 136A-136B.) Concurrently scheduled with courses C236A-C236B. Letter grading. **C136A.** Lecture, four hours. Introduction to music of Africa through general discussion of select topics such as the continent and its peoples, function, the musician, instruments, musical structure and related arts, and contemporary music. **C136B.** Lecture, four hours; discussion, one hour. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music.

**146. Folk Music of South Asia. (4)** Lecture, three hours; laboratory, one hour. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence.

**147. Survey of Classical Music in India. (4)** Examination of melodic, metric, and formal structures of Indian classical music in context of religious, sociocultural, and historical background of the country.

**C150. Music and Politics in East Asia. (4)** Lecture, four hours. Limited to Ethnomusicology, Music, Music History, World Arts and Cultures, Chinese, Japanese, Korean, and East Asian Studies majors. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C250. Letter grading.

**C156A-156B. Music in China. (4-4)** Letter grading. **C156A.** (Formerly numbered 156A.) Lecture, four hours. Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C256A. **156B.** Lecture, three hours; laboratory, two hours. Requisite: course C156A. Introduction to various notational systems. Analysis of representative styles.

**157. History of Chinese Opera. (4)** Survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern Peking opera and its relation to Cantonese and other genres.

**158A-158B-158C. Studies in Chinese Instrumental Music. (4-4-4)** Lecture, three hours; laboratory, one hour. **158A.** Study of literature, major sources, paleography, theory, and philosophy of the Ch'in, including transcription and analysis. **158B.** Study of literature, major sources, paleography, theory, and philosophy of the P'i P'a, including transcription and analysis. **158C.** Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society.

**C159. Music on China's Periphery. (4)** Lecture, four hours; outside study, eight hours. Designed for undergraduate Ethnomusicology, Music, Music History, and World Arts and Cultures majors. Survey of musics from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibeto-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

**160A. Survey of Music in Japan. (4)** Lecture, three hours. Survey of main genres of Japanese traditional music, including Gagaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms.

**160B. Studies in Japanese Court Music. (4)** Lecture, two hours; laboratory, one hour. Preparation: minimal musical ability. In-depth study of Japanese court music, including historical background, with emphasis on understanding the instrumental techniques and notation of various instruments of the court orchestra.

**C169. Music, Science, and Technology. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for Ethnomusicology, Music, and Music History majors. Application of science and technology for both creation and dissemination of music. Introduction to tools and techniques such as CD mastering, digital sampling, recording, and music synthesis, as well as scientific principles underlying such technologies. Concurrently scheduled with course C269. Letter grading.

**170. Acoustics. (4)** Lecture, four hours; discussion, one hour. Interrelationship of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tone quality. Lecture, demonstration, and discussion; tours of instrumental collections and acoustical research facilities.

**171. Instruction in Advanced Jazz Performance. (2)** Laboratory, one hour. Preparation: advanced performance ability as demonstrated by audition. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for a maximum of 12 units.

**172A-172B. Cognitive Psychology of Music. (4-4)**

**172A.** Lecture, four hours; discussion, one hour. Designed for nonmajors. Introduction to psychology of music; historical background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. **172B.** Requisite: course 172A. Study of psychological factors and problems in music from points of view of listener, performer, and composer.

**173. Experimental Research in Music. (4)** Recommended for Music majors in all specializations. Theories and processes in various modes of musical experimentation: physical, perceptual, psychological, pedagogical, quantificational, statistical procedures.

**174. Aesthetics of Music. (4)** Lecture, four hours; discussion, one hour. Designed for nonmajors. Historical survey of musical aesthetic thought and practice. Selected readings and musical examples.

**175. Sociology of Music. (4)** Designed for Ethnomusicology, Music History, and Music majors. Introduction to sociology of music, its principles and basic concepts, and its critical significance for sociomusicological inquiry, including study of popular music, ethnomusicology, and cultural politics of music. P/NP or letter grading.

**C176. Psychology of Film Music. (4)** Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C276. Letter grading.

**M177. Jazz Combo. (2)** (Same as Music M177.) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

**C178. Aesthetic and Philosophical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetics and philosophy of music, sociology of music, critical theory, hermeneutics, and music criticism. Concurrently scheduled with course C204. Letter grading.

**C179. Empirical Foundations in Systematic Musicology. (4)** (Not the same as course C179 prior to Fall Quarter 1999.) Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of empirical approaches in systematic musicology. Exploration of theory and philosophy of science and empiricism, experimental semiotics and aesthetics, acoustics, musical learning theory, psychology of music, psycholinguistics, and related disciplines as applied to musical scholarship based on theory and model building. Concurrently scheduled with course C203. Letter grading.

**M180. Analysis of Traditional Music. (4)** (Same as Folklore M180.) Designed for Ethnomusicology, Music History, and Folklore majors. Intensive study of methods and techniques necessary to understand traditional music.

**181. Anthropology of Music. (4)** Designed for Ethnomusicology, Music History, and Anthropology majors. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure.

**M186. Senior Recital or Research Paper. (No credit)** (Same as Music M186.) Preparation and performance of one-hour senior recital of jazz repertoire or preparation of a senior paper (topic and length to be approved by assigned adviser). P/NP grading.

**C188. Music Industry. (4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Music History majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in the 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course C288. Letter grading.

**190. Study of Ethnomusicology. (4)** Lecture, three hours. Requisites: courses 10A, 10B, 10C, 20A, 20B, 20C. Designed for Ethnomusicology majors. Introduction to history of the field, basic fieldwork and analysis methods, and current issues in research.

“In the coming decades, all of us will have to learn to live with a diversity of opinions, ideas, and values,” affirms Ethnomusicology Professor Anthony Seeger. “Students taking ethnomusicology have an opportunity to appreciate those differences while learning how communities create music based on different values and use it for different ends. It’s a good place to appreciate how wonderful difference can be.”

Professor Seeger’s vision of music as a window to many worlds has led to an exciting and far-reaching career that has included service as curator of the Folkways Collection and director of Folkways Recordings at the Smithsonian Institute. His time as an educator and researcher in Rio de Janeiro fostered writings that focus on the Suya Indians of Brazil and issues of land and human rights for Brazilian Indians. Topics of his other publications—including issues of archiving, intellectual property, and music and the law—stem from his experience in the music industry and as an archivist.

**191A-191Z. Advanced World Music Performance Organizations. (2 each)** Activity, three hours. Limited to Ethnomusicology majors. Advanced study of traditional vocal and instrumental world music. May be repeated for credit without limitation. **191A.** Music and Dance of the American Indians; **191B.** Music of Bali; **191C.** Music and Dance of the Balkans; **191D.** Music of China; **191E.** Music and Dance of Ghana; **191F.** Music of India; **191G.** Music of Japan; **191H.** Music of Java; **191J.** Music of Korea; **191K.** Music of Mexico; **191L.** Music of Persia; **191M.** Music of Thailand; **191N.** Music of the Near East; **191P.** Music of African Americans; **191Z.** Open Ensemble.

**192. Advanced Private Instruction in Music. (2)** Studio, one hour. Preparation: two years of courses 91A through 91Z or 92. Limited to Ethnomusicology majors. Advanced private or semiprivate music instruction with a distinguished community-based musician, which must be arranged by students and approved by course instructor. May be repeated for credit without limitation.

“I hope students come out of my courses able to appreciate the different ways people make music—to be enthusiastic about musical diversity and interested in learning more on their own” he says. “I consider my job to be more like that of a match or fuse: if my course can capture a student’s interest and imagination, they can carry on for the rest of their lives.”

Seeger doesn’t seem to have difficulty igniting a spark in students who take his courses in topics such as Latin American or Amerindian music. And at UCLA, he can draw on remarkable resources. “UCLA has one of the largest and best ethnomusicology programs in the world. There are a number of courses to take, musical ensembles to play in, and special events. The students themselves have broad interests. They are excited about the materials they are exposed to, ask tough questions, and learn a lot from each other. My job is to facilitate their interaction with the sources and with one another. After that, they can go as far as they like with their interests and their passions.”

**Anthony Seeger,**

**Department**

---

*I hope students come out of my courses enthusiastic about musical diversity and interested in learning more on their own. I consider my job to be like that of a match or fuse: if my course can capture a student’s interest and imagination, they can carry on for the rest of their lives*

---

**196. World Music Teaching Practicum. (4)** Seminar, two hours; fieldwork, three hours; outside study, seven hours. Limited to junior/senior Ethnomusicology majors. Integration of academic work and hands-on training. Participation in the theoretical discussions of world music education and application of these theories in elementary and secondary music and social studies classrooms. P/NP or letter grading.

**197. Special Topics in Ethnomusicology. (4)** Lecture/seminar, three hours. Selected topics in ethnomusicology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

**199E. Special Studies in Ethnomusicology. (2 to 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in ethnomusicology resulting in research project. May be repeated for a maximum of 8 units.

**199S. Special Studies in Systematic Musicology. (2 to 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in systematic musicology resulting in research project. May be repeated for a maximum of 8 units.

## Graduate Courses

- 201. History of Ethnomusicology. (4)** (Formerly numbered 201A.) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology from the late 19th century to the 1980s. Letter grading.
- 202. Current Issues in Ethnomusicology. (4)** (Formerly numbered 201B.) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Current issues, basic literature, and schools of thought in field of ethnomusicology from the 1980s to the present. Letter grading.
- C203. Empirical Foundations in Systematic Musicology. (4)** (Not the same as course C203 prior to Fall Quarter 1999.) Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of empirical approaches in systematic musicology. Exploration of theory and philosophy of science and empiricism, experimental semiotics and aesthetics, acoustics, musical learning theory, psychology of music, psycholinguistics, and related disciplines as applied to musical scholarship based on theory and model building. Concurrently scheduled with course C179. Letter grading.
- C204. Aesthetic and Philosophical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetics and philosophy of music, sociology of music, critical theory, hermeneutics, and music criticism. Concurrently scheduled with course C178. Letter grading.
- 207. Seminar: North American Indian Music. (4)** Seminar, three hours. Requisite: course 106A or 106B or 106C. Survey of representative musical styles of Native North American Indians, including problems of transcription, methods of analysis, symbolic implications of song texts. Emphasis on interrelationship between music and cultural context. Influence of Western music in acculturative contexts.
- 208. Seminar: Latin American Music. (4)** Seminar, three hours. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression.
- M211. Seminar: African American Music. (4)** (Same as Afro-American Studies M211.) Seminar, three hours. Requisites: courses M110A, M110B. Designed for graduate students. Intensive investigation of problems, theories, and methods of research related to study of African American music. Emphasis on relationship of problems to representative styles of African American music.
- CM212. African American Music in California. (4)** (Same as Afro-American Studies CM212A.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM112. S/U or letter grading.
- C222A-C222B-C222C. Jazz Styles and Analysis. (4-4-4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Musicology majors. In-depth analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with courses C122A-C122B-C122C. Letter grading. **C222A.** Early Jazz to Swing Era; **C222B.** Bebop to Avant-garde; **C222C.** Jazz since the Sixties.
- 228. Seminar: Balkan Music. (4)** Seminar, three hours. Requisite: course 128. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rituals and customs, minorities, and ideology.
- 233A-233B-233C. European Traditional and Popular Music. (0-0-4)** Discussion, one hour. Review of literature on European traditional and popular music, with special attention to modern issues and processes. May be repeated for credit. In Progress and letter grading.
- C236A-C236B. Music of Africa. (4-4)** Concurrently scheduled with courses C136A-C136B. Letter grading. **C236A.** Lecture, four hours. Designed for graduate students. Introduction to music of Africa through general discussion of select topics such as the continent and its peoples, function, the musician, instruments, musical structure and related arts, and contemporary music. **C236B.** (Formerly numbered C236.) Lecture, four hours; discussion, one hour. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music.
- 237. Seminar: African Music. (4)** Seminar, three hours. Requisite: course C136A or C136B. Intensive investigation of musical style; historical, social, and cultural aspects of indigenous musical traditions and related art forms.
- 240. Music of Arabic-Speaking Near East. (4)** Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory. Investigation of historical and cultural backgrounds, main musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required.
- 241. Music of Iran and Other Non-Arabic-Speaking Communities. (4)** Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N) required.
- 248A-248B. Classical Music of India. (4-4)** Lecture, three hours. Requisite: course 146 or 147. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and traditional theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required.
- C250. Music and Politics in East Asia. (4)** Lecture, four hours. Designed for graduate students. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C150. Letter grading.
- 250A-250B. Music of Indonesia. (4-4)** Lecture, three hours. Requisite: course 20C. During first term, emphasis on music and related performing arts of Java. Focus on music and performing arts of Bali and other Indonesian islands during second term. Concurrent participation in one Indonesian performance group (course 91B or 91H) required.
- 252. Seminar: Music of Mainland Southeast Asia. (4)** Seminar, three hours. Requisite: course 20C. Presentation of materials concerning musical performance traditions of Laos, Cambodia, Vietnam, Thailand, and Burma, both in mainland Southeast Asia and in the American context, with perspectives from archaeology, history, performance theory, applied anthropology, and ethnomusicology.
- C256A. Music in China. (4)** Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C156A.
- C259. Music on China's Periphery. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate Ethnomusicology, Music, Musicology, and World Arts and Cultures majors. Survey of musics from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibeto-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C159. S/U or letter grading.
- M261. Gender and Music in Cross-Cultural Perspective. (4)** (Same as Women's Studies M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (de)codification of messages of resistance, and gender representation to gendered politics via musical production. S/U or letter grading.
- 262. Musical Ethnography. (4)** Seminar, three hours; outside study, nine hours. Examination of selected book-length ethnographies, most published in last 10 years, as both literary genre and research procedure. S/U or letter grading.
- 263. Perspectives in Popular Music Research. (4)** Seminar, three hours. Investigation of theoretical paradigms, issues, and research models of popular music, with emphasis on world music genres, local/global markets, mass mediation, appropriation and aesthetics of style, ethnographic methods, and impact of popular music studies on ethnomusicology. Letter grading.
- 264. Urbanism and Music. (4)** Seminar, three hours; outside study, nine hours. Theoretical and methodological issues in study of the city as cultural entity that affects and is affected by music making and of strategies individuals and groups use to remain musically active in an urban area. S/U or letter grading.
- 265. Religion and Music. (4)** Seminar, three hours; outside study, nine hours. Cross-cultural examination of role of musical expression as spiritual medium and as artistic expression in world's religions. S/U or letter grading.
- 266. Charles Seeger's Life and Thought. (4)** Seminar, three hours; outside study, nine hours. Charles Seeger's (1886 to 1979) major writings and influence on three fields he helped to found (ethnomusicology, systematic musicology, historical musicology), as well as his interest in applied musicology and American composition in the 20th century. S/U or letter grading.
- 267. Music and Ecstasy. (4)** Seminar, three hours; outside study, nine hours. Relationship between music and consciousness in different world cultures and role music plays in ecstatic experiences. Phenomena include trance, spirit possession, shamanism, religious ecstasy, mysticism, and artistic inspiration. S/U or letter grading.
- C269. Music, Science, and Technology. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for Ethnomusicology, Music, and Musicology majors. Application of science and technology for both creation and dissemination of music. Introduction to tools and techniques such as CD mastering, digital sampling, recording, and music synthesis, as well as scientific principles underlying such technologies. Concurrently scheduled with course C169. Letter grading.
- 271. Seminar: Acoustics of Music. (6)** Seminar, three hours. Requisite: course 170. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western instruments, tuning systems, psychoacoustics, and methods of spectral analysis. May be repeated once for credit.
- 273. Seminar: Psychology of Music. (6)** Seminar, three hours. Requisite: course 173. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit.
- 275. Seminar: Aesthetics of Music. (6)** Seminar, three hours. Requisite: course 176. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives and critical theory, and interpretation. May be repeated once for credit.
- C276. Psychology of Film Music. (4)** Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C176. Letter grading.
- 279. Seminar: Systematic Musicology. (4)** Seminar, three hours. Requisite: course 170. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit.

**281A-281B. Seminars: Field and Laboratory Methods in Ethnomusicology. (6-6)** Seminar, three hours; laboratory, two hours. Requisites: courses 201A-201B. Fieldwork concepts and methods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects.

**282. Seminar: Analysis. (6)** Seminar, three hours. Requisite: course M180 or graduate ethnomusicology student. Intensive discussion of techniques used in ethnomusicological analysis, including transcription and notation, with emphasis on analysis of musical performance and music events.

**283. Seminar: Study of Musical Instruments (Organology). (6)** Seminar, three hours. Requisites: courses 201A-201B. Musical instruments studied in terms of their structures, performance contexts, cultural significance, and patterns of change.

**284. Seminar: Anthropology of Music. (4)** Requisites: courses 201A-201B. Analysis of current anthropological paradigms and issues that have major impact on ethnomusicology.

**285. Seminar: Comparative Music Theory. (6)** Seminar, three hours. Comparative study of codified music theories of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as a science of music; its place between cultural values and artistic practice in different civilizations.

**M287. Seminar: Folk Music. (4)** (Same as Folklore M258.) Seminar, three hours.

**C288. Music Industry. (4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in the 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course C188. Letter grading.

**289. Research Design and Grant Writing in Ethnomusicology. (4)** Seminar, three hours; outside study, nine hours. Design of dissertation research proposal, locating and applying for dissertation fieldwork grants, organizing and presenting advanced academic proposals with sophisticated methods and professional writing skills. S/U or letter grading.

**290. Seminar: Ethnomusicology. (6)** Seminar, three hours. Requisites: courses 20A, 20B, 20C, 200, 201A, 201B. May be repeated for credit.

**292A-292Z. Seminars: Special Topics in Ethnomusicology. (4 each)** Designed for graduate students. Utilization of special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A. Teaching Apprentice Practicum. (2)** (Formerly numbered 495.) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Ethnomusicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

**495B. Teaching with Technology. (2)** Seminar, three hours; outside study, three hours. Limited to graduate ethnomusicology students. Training in presentation, spreadsheet, web design, and digitization software, and its application in classroom and in preparation of an electronic teaching portfolio. S/U grading.

**596. Directed Individual Studies. (2, 4, or 6)** Only 4 units may be applied toward M.A. minimum course requirements.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4)** May be repeated for credit. S/U grading.

**598. Guidance of M.A. Thesis. (4, 8, or 12)** May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. Dissertation. (4, 8, or 12)** May be repeated for credit. S/U grading.

Michael H. Heim, Ph.D. (*Comparative Literature, Slavic Languages and Literatures*)  
Barbara Herman, Ph.D. (*Philosophy*)  
Vyacheslav Ivanov, Ph.D. (*Slavic Languages and Literatures*)  
Carroll B. Johnson, Ph.D. (*Spanish and Portuguese*)  
Gail Kligman, Ph.D. (*Sociology*)  
Kathleen L. Komar, Ph.D. (*Comparative Literature, Germanic Languages*)  
David M. Kunzle, Ph.D. (*Art History*)  
Deborah W. Larson, Ph.S. (*Political Science*)  
Susanne Lohmann, Ph.D. (*Political Science*)  
Michael Mann, Ph.D. (*Sociology*)  
James R. Massengale, Ph.D. (*Scandinavian Section*)  
José Monleón, Ph.D. (*Spanish and Portuguese*)  
Mary Kay Norseng, Ph.D. (*Scandinavian Section*)  
Aleksandr Ospovat, M.A. (*Slavic Languages and Literatures*)  
Peter H. Reill, Ph.D. (*History*)  
Ronald L. Rogowski, Ph.D. (*Political Science*)  
David Sabeau, Ph.D. (*History*)  
Debra L. Silverman, Ph.D. (*Art History, History*)  
Geoffrey W. Symcox, Ph.D. (*History*)  
Anthony Vidler, Dipl. Arch. (*Architecture and Urban Design, Art History*)  
Ron W. Vroon, Ph.D. (*Slavic Languages and Literatures*)  
Robert Wohl, Ph.D. (*History*)

#### Professor Emeritus

Shuhsi Kao, Ph.D. (*French and Francophone Studies*)

### Associate Professors

Richard D. Anderson, Ph.D. (*Political Science*)  
Janet Bergstrom, Ph.D. (*Film, Television, and Digital Media*)  
Jill Anne Kowalik, Ph.D. (*Germanic Languages*)  
Robert M. Maniquis, Ph.D. (*English*)  
Malina Stefanovska, Ph.D. (*French and Francophone Studies*)

### Assistant Professor

Roman J. Koropeckyj, Ph.D. (*Slavic Languages and Literatures*)

## Scope and Objectives

The European Studies Program provides undergraduates with an opportunity to study Europe from the vantage points of several disciplines in the humanities and social sciences. Its primary goals are twofold: to enable students to cross the existing boundaries between and within the humanities and social sciences and to develop approaches to European society and culture consonant with the dramatic changes taking place in that region. Not only has the Cold War model of distinct eastern and western blocs lost the bulk of its explanatory power, but European culture, economy, and social structure have been transformed by immigration, unification, Americanization, and new developments in the intellectual and political realms.

The events of recent years make it clear that the University and its students require new academic approaches to the region. The demise of the Soviet Bloc, the increased ethnic conflict throughout the region, the migration of peoples within Europe and from other parts of the world, the challenges of a rapidly evolving global economic system, and the uncertainties inherent in the process of unification — all these developments call into question the intellectual configurations that have long dominated our thinking. Today the regions of Europe provide a laboratory for examining — and finding solutions for — everything from efforts to integrate people of color to changes in the family and the status of women. They challenge us to consider new philosophical, artistic, and literary approaches and require us to come to grips with the collapse of socialist command economies in the East and the exhaustion of once-successful welfare states in the West.

To enable students to consider these questions, the European Studies major offers an interdisciplinary program leading to the Bachelor of Arts degree. Students are required to (1) study a European language other than English, (2) develop a historical perspective on European issues, (3) examine European culture, society, politics, and economy, and (4) acquire basic analytical and theoretical skills. Central to this effort are a series of core seminars and a senior essay to encourage majors to delve into a research topic of their choice.

## Undergraduate Study

### European Studies B.A.

The curriculum is designed to serve the needs of students who wish to (1) approach the study of Europe from a structured, interdisciplinary perspective, (2) pursue graduate work in disciplines permitting the study of Europe, (3) orient their professional life toward European affairs in fields such as law, business, diplomacy, journalism, and human services, and (4) acquire valuable skills in foreign languages and writing that will assist them in their careers.

#### Admission

Interested students should meet with the program chair no later than the beginning of the sophomore year to discuss requirements and formulate their course of study. Students are expected to declare the major at the end of their sophomore year, following normal UCLA procedures, and must have a minimum grade-point average of 2.5 in all preparation courses. Transcripts and course plans demonstrating that they will have completed all lower division requirements by the end of their junior year must be presented.

#### Foreign Language Requirement

Students must prepare for the major by studying a European language other than English. This language — the declared foreign language — helps to focus the major and determine options for the period of study abroad. Students are expected to fulfill the specific requisites of their selected language department (French, Germanic Languages, Italian, Slavic Languages and Literatures, Spanish and Portuguese) for entrance into upper division courses. Students who wish to study Latin or Greek are also required to demonstrate proficiency in a modern language. In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement (Spanish has slightly different course numbers and requirements). Students must complete the lower division foreign language requirement by the end of the sophomore year.

#### Preparation for the Major

*Required:* (1) *Humanities and the arts* — one course from Philosophy 1, 2, 4, 5A, 6, 7, 8, 21, or 22; one lower division introductory language department course in literature or civilization that focuses on the declared foreign language; one course from Art History 54, 57, Music History 2B, or 13 and (2) *social sciences* — Economics 1 or 5; two courses from History 1A, 1B, 1C; two courses from Geography 3, 5, Political Science 10, 20, 30, 50, Sociology 1, 2, M18, Women's Studies 10.

By carefully selecting courses for the Preparation for the Major, students can fulfill their general education requirements in the social sciences, foreign language, quantitative reasoning, and humanities.

#### Transfer Students

To be admitted as European Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of a foreign language other than English, one language department course in literature or civilization that focuses on the declared foreign language, one philosophy course, one art history or music history course, one semester or two quarters of history of Western civilization, one economics course, and two courses from geography, political science, sociology, or women's studies.

#### The Major

*Required:* (1) At least one upper division course in the literature of the declared foreign language, with instruction and reading assignments in that language (see the list of approved courses below); (2) one course from History 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 127C, 128A, 128B, 128C, 129A, 129B, 129C, 130, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, or 141C; (3) European Studies 101 and 199; (4) at least eight electives selected from the list of approved courses, with a minimum of three courses from humanities and three from social sciences. Electives must either continue the regional focus, introduce a theoretical and methodological perspective, or introduce a rationally conceived comparative point of view (sample programs are on file in the program office).

During their senior year students must write an extended paper offering original research on a topic of interest to them. Topics must be approved by a faculty adviser selected by the student and endorsed by the program's executive committee.

Students must consult with the program chair to design their upper division coursework.

#### Study in Europe

The program expects students to spend at least one term — and preferably a full academic year — studying in the European country most relevant to their work. This is normally done under the auspices of the University of California Education Abroad Program; however, alternative arrangements can be made at UCLA if students have financial or personal considerations that may prevent them from going overseas. To obtain UCLA credit after returning to campus, students must have their foreign transcripts evaluated by the program faculty and staff.

## European Studies

### Upper Division Courses

**101. Introduction to European Studies. (4)** (Formerly numbered M101.) Discussion, three hours. Limited to and required of European Studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including the individual and the state, cultural life, economic relations, nationalism, and international relations.

**102. Special Topics in European Studies. (4)** Discussion, three hours. Variable topics. May be repeated for credit.

**199. Independent Study for Thesis Writers. (4)** Tutorial, to be arranged. Limited to and required of senior European Studies majors. Independent study under supervision of sponsoring professor. Letter grading.

### Course List

All courses are not offered every academic year. Students should contact the individual departments or the European Studies staff for information about the availability of specific courses. Other appropriate courses may be taken by petition.

#### Anthropology

Appropriate courses may be taken by petition.

#### Art History

- 109C. European Art of the 18th Century
- 109D. Art and Architecture of Georgian England
- 110A. European Art of the 19th Century
- 110B. European Art of the 19th Century: Realism and Impressionism
- 110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism
- 150D. Selected Topics in Contemporary Art

#### Bulgarian (Slavic Languages)

- 154. Survey of Bulgarian Literature

#### Classics

Appropriate courses may be taken by petition.

#### Comparative Literature

- 159. Four Modern Dramatists
- C160. Topics in Literature and Visual Arts
- C161. Fiction and History
- C163. Crisis of Consciousness in Modern Literature
- C164. The Modern Continental Novel
- M165. The Holocaust in Literature
- CM170. Alternate Traditions: In Search of Female Voices in Contemporary Literature
- C172. The Postmodern Novel
- M174. Film and Literature of the Spanish-Speaking World

#### Czech (Slavic Languages)

- 155. Survey of Czech Literature from Middle Ages to the Present

#### Dutch (Germanic Languages)

- 100. Modern Dutch Culture and Society
- 113. Modern Dutch and Flemish Literature in Translation
- 120. Introduction to Dutch Studies
- 131. Introduction to Modern Dutch Literature

#### Economics

- 107. History of Economic Theory
- 110. Economic Problems of Underdeveloped Countries
- 181A, 181B. Development of Economic Institutions in Western Europe
- 190. International Economics

#### English

- 142A. Shakespeare: Poems and Early Plays
- 142B. Shakespeare: Later Plays
- 143. Milton
- 151. Elizabethan Literature
- 152A. Drama from Beginning to 1576
- 152B. Drama, 1576 to 1642
- 153. Literature of Early 17th Century, 1600 to 1660
- 154. Literature of Restoration and Earlier 18th Century, 1660 to 1730
- 155. Literature of Later 18th Century, 1730 to 1798
- 156. Drama, 1660 to 1842

- 157. The Novel to 1832
- 160. Earlier Romantic Literature
- 161. Later Romantic Literature
- 162. Earlier Victorian Poetry and Prose
- 163. Later Victorian Poetry and Prose
- 164. The Novel, 1832 to 1900
- 165. 20th-Century British Poetry
- 166. 20th-Century British Fiction
- 167. Drama, 1842 to 1945
- 168. Drama, 1945 to the Present

#### **Folklore and Mythology**

Appropriate courses may be taken by petition.

#### **French**

- 114A-114B-114C. Survey of French Literature
- 115A-115B-115C. Medieval French Literature
- 116A-116B-116C. Renaissance
- 117A-117B-117C. 17th Century
- 118A-118B-118C. 18th Century
- 119A-119D. 19th Century
- 120A-120B-120C. 20th Century
- 130. Special Topics in French and Francophone Cultures
- 132. Contemporary France
- M140. Women's Studies in French Literature
- 141. Cinema and Literature in France
- 153. Studies in 18th-Century Literature
- 154. Studies in 19th-Century Literature
- 155. Studies in 20th-Century Literature
- 156. Studies in Contemporary French and Francophone Literature
- 157. Studies in French Critical Theory and Philosophy
- 158. Studies in History of Ideas
- 162. Modern French Thought in Translation
- 164A-164B-164C. The French Novel in Translation
- 165. Topics in French Literature in Translation

#### **Geography**

- 133. Cultural Geography of the Modern World
- 134. Space, Place, and Nature in Western Thought
- 140. Political Geography
- 142. Population Geography
- 183. Europe
- 184. Russia

#### **German (Germanic Languages)**

- 100B. German History and Culture from 1500 to 1914
- 100C. German History and Culture from 1914 to the Present
- 102A. German Film in Cultural Context: Early German Film
- 102B. German Film in Cultural Context: New German Film
- 106. The Faust Tradition from the Renaissance to the Modern Age
- M108. Love and Sex in German Literary Tradition
- 112. Jewish Writing and Thought in German Culture from 1755 to the Present
- 116. Special Topics in Modern Literature and Culture
- 118. Feminist Issues in German Literature and Culture
- 120. German Folklore
- 140A. Introduction to German Poetry
- 140B. Introduction to German Drama
- 140C. Introduction to German Narrative Prose
- 142. Introduction to 18th-Century Studies
- 144. Introduction to 19th-Century Studies
- 146. Introduction to Modern Literature
- 148. Introduction to Contemporary Literature
- 154. Goethe
- 156. Goethe's *Faust*
- 158. Romanticism

#### **Greek (Classics)**

Appropriate courses may be taken by petition.

#### **History**

- 102. Explorations in Psychoanalysis and History
- 126A-126F. Cultural and Intellectual History of Modern Europe
- 127A-127B-127C. War and Diplomacy in Europe
- 130. Europe in the Age of Revolution, Circa 1775 to 1815
- 135A-135B. Marxist Theory and History
- 136. Topics in European History
- 137A-137B. History of Women in Europe
- M191A-M191B. Survey of Jewish History
- 191E-191F. The Third Reich and the Jews
- 191G. European Jewry from 1881 to the Present
- M192A-M192B. Jewish Intellectual History
- 195A. History of Medicine: Historic Roots of Healing Arts
- 195B. History of Medicine: Foundations of Modern Medicine
- 195C. Historical Perspectives on Gender and Science
- 195D. Science and Technology in the 20th Century
- 195E. Topics in History of Science

#### **Italian**

- 118. Age of Enlightenment
- 119. Italian *Ottocento*
- 120. Literature in the 20th Century
- 121. Literature and Film
- 122. Italian Theater
- M140. Italian Novella from Boccaccio to Basile
- 150. Modern Fiction in Translation
- M158. Women in Italian Culture
- 190. History of the Italian Language

#### **Jewish Studies (Near Eastern Languages)**

- 130. Modern Jewish Religious Movements and Their Ideologies
- 141. Modern Anti-Semitism
- M143. Introduction to Jewish Folklore
- 150B. Hebrew Literature in English: Rabbinic Judaism
- 151A. Modern Jewish Literature in English: Diaspora Literature
- M187. The Holocaust in Literature

#### **Latin (Classics)**

Appropriate courses may be taken by petition.

#### **Music History**

- 133. Bach
- 134. Beethoven
- 135A-135B-135C. History of Opera
- 139. History and Literature of Church Music
- 156. Studies in Musical Genres
- 188. Topics in Music History
- 189A-189B. The Symphony

#### **Philosophy**

Appropriate courses may be taken by petition.

#### **Polish (Slavic Languages)**

- 152A-152B-152C. Survey of Polish Literature

#### **Political Science**

- 111A-111B-111C. History of Political Thought
- 113. Problems in 20th-Century Political Theory
- 116. Marxism
- 127A-127B. Atlantic Area in World Politics
- 128A. U.S./Soviet Relations
- 128B. International Relations of Post-Communist Russia
- 152A-152B-152C. Government and Politics of West European Countries
- 153A-153B. Comparative Government and Politics of Western Europe
- 155. Advanced Pluralist Democracies

- 156A-156D. Government and Politics of Post-Communist States

#### **Portuguese (Spanish and Portuguese)**

- C127. 19th-Century Portuguese Literature
- C128. Post-Romanticism and Naturalism in Portuguese Literature
- C129. 20th-Century Portuguese Literature

#### **Romanian (Slavic Languages)**

- 152. Survey of Romanian Literature

#### **Russian (Slavic Languages)**

- 119. Golden Age and the Great Realists
- 120. Literature and Revolution
- 124C-124T. Studies in Russian Literature
- 125. The Russian Novel in Its European Setting
- M127. Women in Russian Literature

 Richard P. Usatine, M.D., *Predoctoral Program*

**Scope and Objectives**

The Department of Family Medicine seeks to provide all students with a basic introduction to family-centered care in both the inpatient and ambulatory settings. During the basic clerkship, students develop (1) an appreciation of the breadth and scope of family medicine, (2) a basic knowledge in the broad content areas of family medicine, and (3) fundamental clinical skills appropriate to family medicine. The overall goal is to provide students with the opportunity to gain an understanding and appreciation of the central role of the primary care physician in the health care system, and to offer advanced clinical training for those students interested in pursuing careers in family medicine. Further, the basic curriculum includes an overview of health care issues facing underserved and immigrant populations in urban America, as well as an introduction to health services research in family medicine.

Family medicine faculty members are active both in leadership roles in the doctoring curriculum and in the new Primary Care College. All first-year students are assigned to work with a family medicine preceptor once a month on a longitudinal basis for the entire year as part of the doctoring program. In the third and fourth (clinical) years, required and elective opportunities exist. All students take a required four-

week clerkship in the third year, which is offered at over 10 teaching sites.

For further details on the Department of Family Medicine and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

**Scope and Objectives**

The purpose of the Film, Television, and Digital Media Department is to develop in its students a scholarly, creative, and professional approach to film, television, and digital art forms. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

## Undergraduate Study

### Film and Television B.A.

The undergraduate Film and Television major encourages development of a personal vision which incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 90 quarter units (60 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit two letters of recommendation and a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For more specific information on admission requirements, contact the Student Services Office, School of Theater, Film, and Television, UCLA, 103 East Melnitz Building, Box 951622, Los Angeles, CA 90095-1622.

### Preparation for the Major

*Required:* Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

### The Major

*Required:* Film and Television 115, 130A, 130B, 150, 154, 163, 185, 192; one critical studies elective (not previously taken as preparation for the major) from 106B, 106C, 107, 108, 112, 113, 114; and a senior concentration (at least 20 units) from one of the following areas: (1) *film production* — courses 175A, 175B, 178, (2) *television and video production* — courses 165, 176A, 176B, 186 or 187B, 199, (3) *screenwriting* — courses 130C, 135, 199, (4) *animation* — courses 181A, 181B, 181C, (5) *critical studies* — courses 106A, 106B, 106C, 107, 108, 110C, 112, 113, 114, 116, 127, 199.

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the *Schedule of Classes* for courses limited to majors only.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Film, Television, and Digital Media offers the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) degrees in Film and Television.

## Admission

### M.A. in Film and Television

Students are admitted in Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. Applicants complete the *UCLA Application for Graduate Admission*; there is no additional departmental application, and no screening examination prior to admission is required.

Applicants must submit a sample of scholarly or critical writing, a statement of purpose, three letters of recommendation, and, for international students whose native language is not English, a score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. Other information, such as a résumé or Graduate Record Examination (GRE) scores, may be required to establish the quality of work in the students' specialization.

### M.F.A. in Film and Television

Students are admitted in Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. Applicants complete the *UCLA Application for Graduate Admission*; there is no additional departmental application, and no screening examination prior to admission is required.

Applicants must submit a statement of purpose, three letters of recommendation, and, for international students whose native language is not English, a score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. Applicants with diverse backgrounds and undergraduate majors in areas other than film and television are encouraged. Applicants must state clearly the degree objective (M.F.A.) and the area of specialization desired within the program: animation, film/television production, screenwriting, or producer's program.

Applicants who wish to concentrate in film/television production must submit a description of a film or television project that may possibly be undertaken in graduate study. The description

should be in proposal or treatment form, two to three pages in length. This material is nonreturnable.

Applicants who wish to concentrate in writing must submit samples of creative writing such as screenplays, short stories, plays, or poems.

Applicants who wish to concentrate in animation must submit a description of an animation project that may possibly be undertaken in graduate study, preferably in storyboard form. Other creative work may be submitted.

Applicants who wish to concentrate in the producer's program may submit a portfolio of supporting material which shows evidence of creative background, or a substantial statement of purpose and résumé.

### Ph.D. in Film and Television

Students are admitted in Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. Applicants complete the *UCLA Application for Graduate Admission*; there is no additional departmental application, and no screening examination prior to admission is required.

Completion of an M.A. or M.F.A. degree equivalent to that offered by the UCLA Department of Film, Television, and Digital Media is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. Applicants must submit a dossier that includes a letter describing the reasons for wishing to earn the Ph.D., the master's thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative, three letters of recommendation, and, for international students whose native language is not English, a score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

## Master's Degrees

### M.A. in Film and Television

The M.A. degree is offered through the comprehensive examination plan. A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, and criticism.

### M.F.A. in Film and Television

The M.F.A. degree is offered through the comprehensive examination plan. The examination is in the form of a project appropriate to the student's specialization. A total of 18 courses is required for the degree, five of which must be at the graduate level.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

## Doctoral Degree

Ph.D. students are expected to understand film and television within their social contexts as significant forms of art and communication and

to achieve, by disciplined study, a mastery of film and television history, theory, and criticism.

Each student must take a minimum of 13.5 courses. These include core and other required courses. In addition, a teaching practicum, which counts as the .5 course, is required. Students also select seven additional graduate seminars, at least five of which must be approved critical studies seminars.

Students must create three areas of concentration and take required coursework and seminars related to them. One area is in the specific field of their dissertation. The other two areas are to be composed of three seminars each chosen to indicate focused competence in two areas of expertise. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film history, American film, European film, non-Western film/television, television studies, media and society, authors, genres, film and the other arts, film and television as a business enterprise, film/television production and new media.

Written and oral qualifying examinations are required. The written examination is a take-home examination. Following successful completion of the written examination, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Film and Television

### Upper Division Courses

**100. Undergraduate Symposium. (1 or 2)** Laboratory, three hours. Limited to Film and Television majors. Structured forum in which undergraduate majors meet on a regular basis to discuss curricular issues, meet with faculty, and have exposure to an array of guest speakers from within the film industry. May be repeated for a maximum of 4 units. Letter grading.

**106A. History of the American Motion Picture. (6)** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

**106B. History of the European Motion Picture. (6)** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the European motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

**106C. History of African, Asian, and Latin American Film. (6)** Lecture/screenings, eight hours; discussion, one hour. Critical, historical, aesthetic, and social study — together with exploration of the ethnic significance — of Asian, African, Latin American, and Mexican films.

**107. Experimental Film. (6)** Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.

**108. History of Documentary Film. (6)** Lecture/screenings, eight hours; discussion, one hour. Philosophy of documentary approach in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films.

**110A. American Television History. (4)** Lecture/screenings, six hours; discussion, one hour. Critical survey of broadcasting here and abroad. Consideration of social responsibilities and educational implications of broadcasting. Letter grading.

**110C. World Media Systems. (4)** Lecture/viewing, four hours; discussion, one hour. Requisite: course 110A. Designed for juniors/seniors. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues.

**112. Film and Social Change. (6)** Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development.

**113. Film Authors. (6)** Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film author (director or writer). May be repeated once for credit with consent of department and topic change.

**114. Film Genres. (6)** Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.

**115. Stylistic Studies for the Moving Image: Theory and Practice. (4)** Lecture, four hours; screenings, four to eight hours. Drawing heavily on a wide array of historical examples and using laser disc technologies, examination of many expressive strategies potentially usable in creation of moving image art forms: iconography, editing, composition, kinesthetics, sound, narrative, discourse, and performance.

**116. Film Criticism. (4)** Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.

**M117. Chicanos in Film/Video. (6)** (Same as Chicana and Chicano Studies M114.) Lecture/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent “greaser” films, social problem films, the Western, and the gang film — which are major genres that account for films “about” or “with” Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or “signify” on these Hollywood genres, including *Zoot Suit*, *The Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

**126. Acting for Film and Television. (4)** Laboratory, six hours. Projects in acting for television, video, and film. May be repeated twice for credit.

**127. Problems and Ethical Issues in Film and Telecasting. (4)** Lecture, three hours; laboratory, eight to 10 hours. Relevant and highly interactive lecture/discussion/workshop. Student production teams create multimedia presentations designed to provide meaningful information, raise consciousness, stimulate discussion, and provoke debate about today’s powerful media messages (i.e., news, advertising, violence, sex, minority representation).

**128. Media and Ethnicity. (4)** Utilizing the Asian American experience, exploration of impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production.

**CM129. Contemporary Topics in Theater, Film, and Television. (2)** (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of 6 units. Concurrently scheduled with course CM229.

**130A. Screenwriting Fundamentals. (2)** Lecture, one hour. Corequisite for graduate students enrolled in course 431. Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri.

**130B. Screenwriting Fundamentals Workshop. (4)** Discussion, three hours. Problems in film and television writing.

**130C. Advanced Scene Writing Workshop. (4)** Discussion, three hours. Requisites: courses 130A, 130B. Limited to Film and Television majors. Conception and writing of story, script outline, and first act for feature-length screenplay.

**131. Nontheatrical Screenwriting for Film and Television. (4 or 8)** Discussion, three hours. Research and writing of documentary, technical, educational, industrial, and propaganda scripts. May be repeated for a maximum of 12 units.

**135A-135B-135C. Advanced Screenwriting Workshops. (8-8-8)** (Formerly numbered 135.) Laboratory, three hours. Requisite: course 130B. Course 135A is requisite to 135B, which is requisite to 135C. Courses in film and television writing. First act of original screenplay to be developed in course 135A, followed by second act in course 135B, and third act in course 135C. Letter grading.

**140. Interactive Expression. (4)** Lecture, six hours. Introduction to history and practice of interactive media, with emphasis on uniqueness of computer-mediated expression. Letter grading.

**C142. Digital Imagery and Visualization. (4)** Lecture, three hours; laboratory, three hours. Introductory hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image visualizations. Concurrently scheduled with course C242. Letter grading.

**C143. Moving Digital Image. (4)** Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects. Concurrently scheduled with course C243. Letter grading.

**C144. Interactive Multimedia Authoring. (4)** Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. Concurrently scheduled with course C244. Letter grading.

**C145. Creative Authoring for World Wide Web. (4)** Lecture, three hours; laboratory, three hours. Exploration of creative aspects of World Wide Web as medium for personal/collective expression. Students produce Web works and serve them online. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences. Concurrently scheduled with course C245. Letter grading.

**C148. Advanced Digital Media Workgroup. (4)** Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment. Concurrently scheduled with course C248. Letter grading.

**150. Cinematography. (4)** Lecture, three hours; laboratory, three hours. Limited to Film and Television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture.

**151. Introduction to Experimental Filmmaking. (4)** Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Techniques of image manipulation, design, and art direction. Production and completion of an exercise (no longer than three minutes), using 16mm nonsync sound film. May be repeated twice for credit. Letter grading.

**152. Film and Television Sound Recording. (4)** Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.

**153. Motion Picture Lighting. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 150. Limited to Film and Television majors. Introduction to principles and tools of lighting used in visual storytelling through lectures, discussions, and screenings. Creative lighting techniques covering topics such as people, environment, spatial relationships, movement, color, special effects, and continuity.

**154. Film Editing. (4)** Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronous sound.

**155. Introduction to Digital Media and Tools. (4)** Lecture, six hours; laboratory, to be arranged. Limited to Film and Television majors. Instruction and exercises in basic concepts and software of virtual production environments and digital postproduction tools. Letter grading.

**163. Directing the Camera. (4)** Workshop, eight hours. Limited to Film and Television majors. Investigation of expressive potential of the image within and beyond the narrative from a directorial perspective. Experiments with working methodologies which stimulate visual creativity and positioning the image as the fundamental element of cinematic expression.

**164. Directing the Actor. (4)** Exercises in analysis of script and character for purpose of directing actors. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

**165. Advanced Narrative Television Directing. (4)** Laboratory, six hours. Requisites: courses 130B, 185. Limited to Film and Television majors. Supervised exercises in television multicamera direction, with emphasis on creative use of cameras, sound, composition, and communication with those in front of and behind the camera. May be repeated twice for credit.

**C170A. Introduction to Digital Effects. (4)** Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C470A. Letter grading.

**175A-175B. Undergraduate Film Production. (8-4 to 8)** Limited to Film and Television majors. **175A.** Lecture, four hours; laboratory, eight hours. Writing, preproduction, and production for a short 16mm nonsynch film. **175B.** Lecture, three hours; laboratory, eight hours. Completion of postproduction (editing, creation of nonsynch sound tracks) for short film begun in course 175A.

**176A-176B. Advanced Undergraduate Video Production (8-4 to 8).** Discussion, three hours; laboratory, to be arranged. Requisite: course 185. Limited to Film and Television majors. Completion of a video production (no more than 20 minutes), including its writing, production, and editing.

**M177. Film and Television Acting Workshop. (2)** (Formerly numbered 177.) (Same as Theater M178.) Laboratory, four hours. Workshop providing opportunities for students to rehearse, perform, and evaluate scenes. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.

**178. Film and Television Production Laboratory. (2 or 4)** Laboratory, to be arranged. Supervised laboratory experience in various aspects of film and television production. May be repeated for a maximum of 12 units, but only 8 units may be applied toward Film and Television major.

**181A. Animation Design in Film and Television. (4)** Lecture, three hours; laboratory, three hours. History and use of creative arts used in animation to form effective communication on film.

**181B. Writing for Animation. (4 to 8)** Lecture, six hours; laboratory, to be arranged. Requisite: course 181A. Research and practice in creative writing and planning for animated film. May be repeated for a maximum of 16 units.

**181C. Animation Workshop. (4 or 8)** Lecture, six hours; laboratory, to be arranged. Preparation: storyboard at first class meeting. Requisite: course 181A. Organization and integration of various creative arts used in animation to form a complete study of a selected topic. May be repeated for a maximum of 16 units.

**185. Undergraduate Television and Video Production. (8)** Laboratory, six hours (additional hours to be arranged). Limited to Film and Television majors. Instruction and exercises in basic techniques of television and video production.

**186. Introduction to Documentary Video Production. (4)** Lecture, three hours; laboratory, three hours; fieldwork, 12 hours. Limited to Film and Television majors. Viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of a series of exercises from conceptualization through postproduction, culminating in production of short documentary.

**187A-187B-187C. Producing and Directing Remote Multicamera Production. (4-6-6)** Lecture/laboratory, three hours (additional hours to be arranged).

**187A.** Professionally oriented lecture/laboratory/field workshop course designed to provide disciplined planning, responsible leadership, and organizational and problem-solving skills required in deadline remote production. Emphasis on clarity of vision, storytelling, effective execution of pitch, preproduction, shoot, and editorial. **187B-187C.** Instruction and supervised productions of the remote experience, with focus on development and execution of concept. Experience closely patterned after professional experiences in working with talent, production venues, and production logistics of remote on-location video programs.

**192. Film and Television Internship. (4 to 8)** Field experience, to be arranged. Limited to senior Film and Television majors. Internship at film and television industry organizations. May be taken for a maximum of 8 units.

**193A. Film Curatorship. (4)** Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching.

**193B. Television Curatorship. (4)** Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching.

**199. Special Studies in Film and Television. (2 to 8)** Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of 8 units.

## Graduate Courses

**200. Bibliography and Methods of Research in Film and Television. (6)** Discussion, three hours; laboratory, four to six hours (additional screenings and/or video laboratory work as required). Designed for graduate students. Examination and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, on-line database searching and retrieval and, when appropriate, use of computer/vid-eodisc technology for research.

**203. Seminar: Film and Other Arts. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies in interrelationships between film and fine arts, or performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit.

**206A. Seminar: European Film History. (6)** Seminar, three hours; film screenings, four to six hours. Requisite: course 106B. Designed for graduate students. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neorealism, New Wave, etc. May be repeated twice for credit.

**206B. Selected Topics in American Film History. (6)** Seminar, three hours; film screenings, three hours. Recommended preparation: course 106A or 206C. Advanced critical seminar with focus on specific topic or period in U.S. film history. Letter grading.

**206C. Seminar: American Film History. (6)** Seminar, three hours; film screenings, four hours. Introduction to industrial, social, and aesthetic history of the American film. Letter grading.

**207. Seminar: Experimental Film. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of form, style, politics, and history of experimental, innovative, avant-garde, and minority film and video.

**208A. Seminar: Film Structure. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture. S/U or letter grading.

**208B. Seminar: Classical Film Theory. (6)** Seminar, three hours; film screenings, four hours. Study of principal topics and lines of inquiry that characterize theoretical writings of Arnheim, Eisenstein, Bazin, Kracauer, etc. Letter grading.

**208C. Seminar: Contemporary Film Theory. (6)** Seminar, three hours; film screenings, four to six hours. Requisite: course 208B. Designed for graduate students. Study of redefinition of aims and methods of film theory through contemporary writings. S/U or letter grading.

**209A. Seminar: Documentary Film. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Nonfictional film and its relation to contemporary culture.

**209B. Seminar: Fictional Film. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Film as fiction and its relation to contemporary culture. May be repeated once for credit.

**209D. Seminar: Animated Film. (4)** Seminar, three hours; laboratory, three hours. Designed for graduate students. Critical study of animated film: its historical development, structure, style, use, and relation to contemporary culture.

**210. Seminar: Contemporary Broadcast Media. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Consideration of issues raised by recent developments in television and radio, commercial and public, associated with innovations in satellite, cable, and cartridge systems.

**211A. Seminar: Historiography. (4)** Seminar, three hours. Limited to Film and Television M.A. candidates. Beginning examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

**211B. Seminar: Historiography. (4)** Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of function and methods of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought on the media.

**215. Seminar: Theory and Method. (4)** Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, auteurism, semiology, psychoanalysis, sociology, etc.

**217A. Seminar: American Television History. (6)** (Formerly numbered 217.) Seminar, three hours; screenings, four hours. Critical survey of U.S. television industry from its inception to the present. Examination of programming and changes within the industry by considering range of technological, economic, aesthetic, social, and cultural dimensions. Letter grading.

**217B. Seminar: Selected Topics in Television History. (6)** Seminar, three hours; screenings, three hours. Advanced critical seminar, with focus on specific topic or area (historical period, industry, programming, genre, or social formation) in domestic or international television. Letter grading.

**218. Culture, Media, and Society. (4)** Lecture, four hours; screenings, to be arranged. Emphasis on "discourse of the other(s)." Thematization of the other is concerned with theories of "difference" rather than similarity or identity — with how other cultures enter into politics of representation and representation of politics through metaphors of (1) difference without opposition, (2) heterogeneity without hierarchy, and/or (3) otherness without ethnocentrism. Examination of how women, national minorities, and Third World peoples have been rendered others; place of the cinematic apparatus in this process and how academization of others is positioned vis-à-vis mainstream critical discourse.

**219. Seminar: Film and Society. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

**220. Seminar: Television and Society. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit.

**221. Seminar: Film Authors. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

**222. Seminar: Film Genres. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

**223. Seminar: Visual Perception. (4)** Seminar, three hours; film screenings, two hours. Aesthetic, psychological, physiological, and phenomenological approaches to vision as they relate to ways in which viewers experience and "see" film, television, and digital media. Letter grading.

**224. Computer Applications for Film Study. (4)** Survey of computer applications relevant to film study, principally computer-videodisc systems and image capture technology.

**CM229. Contemporary Topics in Theater, Film, and Television. (2)** (Same as Theater CM229.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of 6 units. Concurrently scheduled with course CM129.

**C242. Digital Imagery and Visualization. (4)** (Formerly numbered 242.) Lecture, three hours; laboratory, three hours. Introductory hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image visualizations. Concurrently scheduled with course C142. Letter grading.

**C243. Moving Digital Image. (4)** (Formerly numbered 243.) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects. Concurrently scheduled with course C143. Letter grading.

**C244. Interactive Multimedia Authoring. (4)** (Formerly numbered 244.) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. Concurrently scheduled with course C144. Letter grading.

**C245. Creative Authoring for World Wide Web. (4)** (Formerly numbered 245.) Lecture, three hours; laboratory, three hours. Exploration of creative aspects of World Wide Web as medium for personal/collective expression. Students produce Web works and serve them online. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences. Concurrently scheduled with course C145. Letter grading.

**246. Issues in Electronic Culture. (6)** Discussion, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores impact of new digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools.

**247. Planning Independent Feature Production. (4)** Lecture, three hours. Analysis of procedure, problems, and budgets in planning feature-length script for film and television production, with emphasis on role of producer and creative organizational techniques of producing. Letter grading.

**C248. Advanced Digital Media Workgroup. (4)** (Formerly numbered 248.) Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment. Concurrently scheduled with course C148. Letter grading.

**249. Digital Revolution. (4)** Lecture, four hours; discussion, one hour; laboratory, one hour. Comprehensive survey to introduce students to emerging digital technologies, resulting new media, and their artistic, economic, and social implications. Topics include digital editing, digital visualization, multimedia, World Wide Web, interactive television, and virtual reality.

**268. Seminar: Short Film. (4)** Seminar, two hours; discussion, two hours. Designed for graduate students. Study of problems presented by conceptualization of form and structure of the short film, with classical and student examples.

**270. Seminar: Film Criticism. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of key aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. May be repeated once for credit.

**271. Seminar: Television Criticism. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit.

**273. Seminar: Contemporary Film and Television Criticism. (6)** Seminar, three hours; film and television screenings, four to six hours. Limited to Film and Television Ph.D. candidates. Study and practice of analytic and critical response, with emphasis on contemporary film and television.

**274. Seminar: Research Design. (4)** Seminar, three hours. Designed for second-year Film and Television Ph.D. students. Examination of general principles that govern formulation of major research projects and preparation of a prospectus for Ph.D. dissertation.

**276. Seminar: Non-Western Films. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America.

**277. Seminar: Narrative Studies. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Study of writings on theory of narrative structure and their significance for analysis of film forms.

**289A-289B-289C. Current Business Practices in Film and Television. (4-4-4)** Requisite: course 247. Designed for graduate students. Examination of current status of financing/production/distribution agreements, union agreements, music, copyright, etc., necessary to understand the film and television industry. May be taken in any sequence.

**291A-291B-291C. Role of Management in Entertainment Industry. (4-4-4)** Requisite: course 247. Designed for graduate students. Study of artistic, social, and economic criteria for decision making in production and distribution of motion pictures and entertainment programs. May be taken in any sequence.

**292A-292B-292C. Network Television Management and Decision Making. (4-4-4)** Lecture, two hours; discussion, two hours. Requisite: course 247. Designed for graduate students. Study of business structure and economic, social, and artistic criteria currently utilized by network television management. Only 8 units may be taken for credit.

**293. Seminar: Film and Television Curatorship. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Study and practice of issues in archival research and administration.

**298A-298B. Special Studies in Film and Television. (2 to 4 each)** Lecture/discussion. Designed for graduate students. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Film Image Design Laboratory. (4)** Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Conception and design of non-narrative film imagery. One-minute experiments in the relation of meaning to technique, including manipulation of optics, photochemistry, elements of electronic processes, and display of time and motion. May be repeated once for credit.

**402A-402B. Advanced Narrative Directing Workshops. (4 or 8-8)** Limited to nine graduate film and television students. Production of a 10- to 15-minute fiction film or project. Letter grading. **402A.** Laboratory, six or 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Students budget and prepurchase their projects by end of first term. **402B.** Laboratory, 12 hours; fieldwork, to be arranged. Requisite: course 402A. In second term students must complete photography on location and/or in studio.

**402C. Advanced Narrative Directing Workshop. (4)** Laboratory, four hours. Requisites: courses 402A, 402B. Completion of postproduction on projects started in courses 402A and 402B. Letter grading.

**403A-403B-403C. Advanced Documentary Workshops. (4 to 8 each)** Lecture/discussion/laboratory, 16 to 24 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Limited to graduate film and television students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

**404A-404B. Advanced Abstract/Experimental Media Workshops. (8-8)** Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Limited to 10 students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

**404C. Advanced Abstract/Experimental Media Workshop. (8)** Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 404A, 404B. Completion of all stages of production and postproduction on projects started in courses 404A and 404B. Letter grading.

**405. Television Production Workshop. (8)** Laboratory, eight hours; other, to be arranged. Limited to graduate film and television students. Basics of television production and direction, focusing on studio multiple camera with minimal use of remote camera. Use of various formats of video production, including scripted and non-scripted projects, culminating in a narrative three-camera project.

**406. Experimental Video Workshop. (4)** Laboratory, six hours; other, to be arranged. Limited to graduate film and television students. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

**407. Video Documentary Workshop. (8)** Laboratory, 12 hours. Limited to graduate film and television students. Exploration of documentary video, including screening a variety of international works and producing a short documentary project using single-camera field production techniques.

**408A-408B. Video Editing. (4-4)** Discussion, four hours; laboratory, to be arranged. Limited to graduate film and television students. Individual instruction in electronic editing. **408A.** On-Line Editing; **408B.** Off-Line Editing.

**409. Directing the Actor for the Camera Workshop. (4)** Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Limited to M.F.A. production program students. Team-taught with five weeks designed to give the director actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

**410A-410B-410C. Film Production Workshops. (8-12-8)** Lecture/discussion/laboratory, 24 hours; fieldwork, to be arranged. Requisites: courses 405, 409. Limited to and required of first-year M.F.A. production program students. Production workshop spanning three terms, designed to give hands-on experience in all aspects of film production (the tools and a practicum of the medium) as each student writes/directs/edits a six-minute film. Letter grading.

**411. Survey of Multimedia Production. (4)** Lecture, three hours; laboratory, three hours. Introduction to various methods of digital production, with focus on photo manipulation, desktop nonlinear postproduction, and distribution on World Wide Web. Letter grading.

**416. Intermediate Cinematography. (4)** Lecture, two hours; laboratory, four hours. Intermediate study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses. Letter grading.

**417. Lighting for Film and Television. (4)** Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Lectures, supervised exercises on a stage or in an exterior, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit. Letter grading.

- 418. Cinematography and Directing. (4)** Lecture, two hours; laboratory, six hours. Requisite: course 417. Limited to graduate film and television students. Supervised filming of short dramatic projects on sound stage and at exterior locations that explore complexity of process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects. Letter grading.
- 419. Advanced Cinematography. (4)** Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 417, 418. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.
- 420. Digital Cinematography. (4)** Lecture, two hours; laboratory, four hours. Advanced study of principles of digital cinematography, with emphasis on electronic exposure control, lighting, formats, cameras, and lenses. Letter grading.
- 423A. Direction of Actors for Film and Television. (4)** Lecture, four hours; workshop. Preparation: first film project. Limited to graduate film and television students. Required of all production majors shooting a fiction thesis. Exercises in analysis of script and character for purpose of directing actors in film and television productions. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.
- 423B. Advanced Direction of Actors for Film and Television. (4)** Studio workshop, six hours. Requisite: course 423A. Limited to graduate film and television students. Advanced study and practice of directing actors before a camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.
- 431. Introduction to Film and Television Screenwriting. (4)** Lecture, three hours. Limited to graduate film and television students. Introductory course in problems of film and television screenwriting.
- 433. Writing the Short Screenplay. (4)** Lecture, three hours. Limited to and required of first-year M.F.A. production program students. Conception, development, and writing of a six-minute dramatic film script to be produced in courses 410A, 410B, 410C. Letter grading.
- 434. Advanced Screenwriting. (8)** Discussion, three hours. Requisite: course 135. Advanced problems in writing of original film and television screenplays. May be repeated twice for credit.
- 435. Advanced Writing for Short Film and Television Screenplays. (4)** Discussion, three hours. Requisite: course 410C. Limited to graduate film and television students. Conception, development, and writing of dramatic film script to be produced as an advanced or thesis project. Letter grading.
- 437. Nontheatrical Writing for Film and Television. (4)** Discussion, three hours. Limited to graduate film and television students. Advanced problems in the field of documentary and special feature programs, with emphasis on research and preproduction. May be repeated for a maximum of 16 units.
- 451. Advanced Design for Film and Television. (4)** Laboratory, to be arranged. Limited to graduate film and television students. Advanced study and practice of techniques and methods of design for motion pictures. Art direction for advanced workshop productions. May be repeated for a maximum of 12 units.
- 452A. Film and Television Sound Recording. (4)** Lecture, three hours; laboratory, four hours. Limited to graduate film and television students. Principles and practices of film and television sound recording, including supervised exercises.
- 452B. Music Recording Workshop. (4)** Lecture, four hours; laboratory, eight hours. Supervised exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television.
- 452C. Film and Television Sound Rerecording. (4)** Lecture, three hours; laboratory, three hours. Limited to graduate film and television students. Recording of sprocketed media: basics of mixing 16mm and 35mm film soundtracks to single stripe or three stripe magnetic film. Overview of prepping tracks for final mix. Fundamentals of Automatic Dialogue Replacement and Foley. Rerecording and video/audio postproduction of unsprocketed media: emphasis on multitrack tape and non-linear disk-based recording and editing systems. Includes all track building approaches, from production sound electronic editing, Automatic Dialogue Replacement, Foley, backgrounds, hard FX and MX through final mix. Techniques of combining sprocketed and unsprocketed media in postproduction.
- 454A-454B. Advanced Film Editing. (4-4)** Lecture, three hours; laboratory, to be arranged. Preparation: submission of a rough cut and/or copy of screenplay. Limited to film and television thesis and advanced project students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process.
- 459A-459B. Directing for Film and Television. (4-4)** Lecture, three hours. Limited to graduate film and television students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in theater, film, and television.
- 464A-464B. Advanced Film Directing. (8-8)** Hours to be arranged. Limited to graduate film and television students. Special problems in direction of fictional and documentary films.
- 465. Narrative Television Workshop. (8)** Laboratory, eight hours. Supervised exercises in television multicamera direction, with emphasis on creative use of composition and sound, and communication with those in front of and behind the camera. Letter grading.
- 466A-466B. Advanced Professional Video Workshops. (8-8)** Lecture, three hours; laboratory, to be arranged. Requisites: courses 405, 410A, 410B, 410C, 423A. Limited to graduate film and television students. Hands-on problems in working with various interrelated disciplines in a professional production experience, including interaction with students of design and acting from Department of Theater.
- 468. Creative Location Film Production. (8)** Lecture, four hours; discussion, four hours; laboratory, to be arranged. Requisites: courses 247, 405, 410A, 410B, 410C, 423A, 433. Limited to graduate directing or producer's program students. Problems of location, production, directing, and cinematography in various "real-life" practical locations. Practical application of solving problems and communication within limitations of production experience.
- C470A. Introduction to Digital Effects. (4)** Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C170A. Letter grading.
- 475. Film I. (8)** Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of film production, including preproduction planning and production of a group short film.
- 476. Video I. (8)** Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of television and video production, including completion of one or more projects.
- 478. Video II. (8)** Discussion, three hours; laboratory, to be arranged. Requisites: courses 185, and 405 or 476. Designed for graduate students. Group experience in video production with each member rotating on crew work in production of individual or collective projects.
- 482A-482B. Advanced Animation Workshops. (4 or 8 each)** Lecture, three hours; laboratory, to be arranged. Requisites: courses 181A, 181B, 181C. Advanced organization and integration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.
- 486. Directed Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production. (2 to 4)** Preparation for thesis production, four to eight hours. Limited to M.F.A. production program students. Specialized development and organization of proposed thesis project prior to advancement to candidacy. Should be taken term before student plans to advance to candidacy.
- 487. Directed Individual Study: Postproduction Laboratory. (4)** Laboratory, eight hours. Limited to M.F.A. production program students. Completion of projects in final stages of postproduction. May not be repeated.
- 488A. Interactive Animation. (4 to 8)** Lecture, six hours; laboratory, to be arranged. Requisites: courses 181A, 181C, 489A. Organization and integration of various creative arts used in animation and interactive media to form complete study of a selective interactive animation project. May be repeated for a maximum of 16 units.
- 488B. Advanced Interactive Animation. (4 to 8)** Lecture, six hours; laboratory, to be arranged. Requisite: course 488A. Organization and integration of various creative arts used in animation and interactive media to form completed project of a selected interactive topic. May be repeated for a maximum of 16 units.
- 489A. Computer Animation in Film and Video. (4 to 8)** Lecture, six hours; laboratory, four to eight hours; other, to be arranged. Preparation: a completed animated film. Requisites: courses 181A, 181C. Instruction in and supervised production of computer animation. May be repeated for a maximum of 16 units.
- 489B. Production in Computer Animation. (4 to 8)** Lecture, six hours; laboratory, four to eight hours. Requisite: course 489A. Instruction in creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.
- 496. Practice of Teaching Film and Television. (2)** Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.
- 498. Professional Internship in Film and Television. (4, 8, or 12)** Full- or part-time at a studio or on a professional project. Designed for M.F.A. program advanced students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.
- 501. Cooperative Program. (2 to 8)** Preparation: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.
- 596A. Directed Individual Studies: Research. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.
- 596B. Directed Individual Studies: Writing. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.
- 596C. Directed Individual Studies: Directing. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.
- 596D. Directed Individual Studies: Design. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.
- 596E. Directed Individual Studies: Acting. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.
- 596F. Directed Individual Studies: Production. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.
- 597. Preparation for Ph.D. Qualifying Examinations in Film and Television. (2 to 12)** Hours to be arranged. May be taken for a maximum of 12 units. S/U grading.
- 598. M.A. Thesis in Film and Television. (2 to 12)** Hours to be arranged. Preparation: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be taken for a maximum of 12 units. S/U grading.
- 599. Ph.D. Dissertation in Film and Television. (2 to 12)** Hours to be arranged. Preparation: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated. S/U grading.

## Scope and Objectives

The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional lifestyles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, music, art, dance, religion, festival, and speech and consider the part they play in human development and cultural existence.

The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, students should consult departmental counselors and the chair of the committee that administers the interdepartmental program.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Folklore and Mythology Program offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Folklore and Mythology.

## Admission

Two letters of recommendation from former instructors or other comparable references are required, as well as a writing sample (such as published work, course paper, or report on research/observations). A score on the verbal section of the Graduate Record Examination (GRE) is desirable.

Requirements for admission to the Ph.D. program include completing the requirements for the M.A. degree in Folklore and Mythology (or the equivalent) and the written and oral comprehensive examinations. A writing sample (such as published work, course paper, or report on research/observations) is required of all applicants. Applicants are admitted to the Ph.D. program on the recommendation of the interdepartmental committee. Students may be admitted on a provisional basis in order to complete the admission requirements.

The program is not currently accepting applications.

## Master's Degree

The M.A. degree is offered through the comprehensive examination and thesis plans. The thesis plan includes an oral examination covering the fields of folklore and mythology studies. Ten courses are required, six at the graduate level. All students must complete specific required courses.

## Doctoral Degree

Ph.D. students must develop a competence in a major field of folklore and mythology and in an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

Students must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in a major field of folklore and mythology. At least five of the minimum number of nine courses required for the Ph.D. must be selected from courses carrying folklore prefixes, and at least two must be folklore seminars.

Written and oral qualifying examinations are required. These examinations cover the student's specialization in folklore and mythology and the related area of concentration. Following successful completion of the written examination, students take the University Oral Qualifying Examination.

## Folklore and Mythology

### Lower Division Courses

**M15. Introduction to American Folklore Studies.**

(4) (Formerly numbered 15.) (Same as World Arts and Cultures M22.) Lecture, four hours. Cultural/historical survey of role of folklore in development of American civilization and of influence of the American experience in shaping folklore in American society; attention also to representative areas of inquiry and analytical procedures. P/NP or letter grading.

**88. Poetics of Myth.** (4) Seminar, three hours. Exploration of categories myth and mythology as they have been formulated, applied, and expanded in both Western and non-Western traditions from time of ancient Sumer to the present.

### Upper Division Courses

**M101. Introduction to Folklore.** (4) (Formerly numbered 101.) (Same as World Arts and Cultures M122.) Lecture, four hours. Survey of various forms of folklore and approaches to their identification, description, and analysis, including their historical and social significance. Introduction to expressive behavior of folk groups from throughout the world and comparison through readings, lectures, film, and fieldwork, with attention to artistic, religious, and other traditions in relation to evolving popular culture. P/NP or letter grading.

**C105. Perspectives in American Folklore Research.** (4) Lecture, three hours. Prerequisite: course M101. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course CM205.

**C107. Folklore in Urban Environments. (4)** Lecture, three hours. Prerequisite: course M15 or M101. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.

**108. Afro-American Folklore and Culture. (4)** Prerequisite: course M101. Study of traditional genres or forms of Afro-American folklore and their cultural functions.

**CM109. Afro-Caribbean Ritual Arts: Vodou and Santeria. (4)** (Same as World Arts and Cultures CM139.) Lecture, three hours. Designed for juniors/seniors. Ethnography of diaspora African religions, including vodou, Santeria, and Candomblé. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM209. P/NP or letter grading.

**M110. Cultural History of Rap. (4)** (Same as Afro-American Studies M107 and Ethnomusicology M119.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

**M111. Literature of Myth and Oral Tradition. (4)** (Same as English M111A.) Prerequisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

**M122. Survey of Medieval Celtic Literature. (4)** (Same as English M111E.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

**113. The Arthurian Tradition. (4)** Survey of traditions related to British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

**M118. Folk Art and Aesthetics. (4)** (Formerly numbered 118.) (Same as World Arts and Cultures M131.) Lecture, four hours. Designed for juniors/seniors. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis. P/NP or letter grading.

**M119. Fairy Tales in Literature and Society. (5)** (Same as German M122.) Lecture, four hours. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimm's tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. Letter grading.

**M121. British Folklore and Mythology. (4)** (Same as English M111C.) Prerequisite: satisfaction of Subject A requirement. Designed for juniors/seniors. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

**M122. Celtic Mythology. (4)** (Same as English M111D.) Lecture, three hours; discussion, one hour. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

**124. Finnish Folk Art and Technology. (4)** Material manifestations of Finnish folk culture: village layout and architecture, folk technology, arts and crafts, textiles, costumes, and design.

**M126. Baltic and Slavic Folklore and Mythology. (4)** (Same as Slavic M179.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

**M127. Celtic Folklore. (4)** (Same as English M111F.) Prerequisite: course M101. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

**130. North American Indian Folklore and Mythology Studies. (4)** Prerequisite: course M101. Examination of folkloristic and mythological data recorded from various North American Indian peoples within contexts of principal ideological frameworks which have been evolved historically for analysis of such data.

**131. Folklore of India. (4)** Prerequisite: course M101. Survey of folklore of India, with special reference to content and dissemination of oral epics, ballads, legends, and beliefs.

**CM136. Carnival and Festivity. (4)** (Formerly numbered C136.) (Same as World Arts and Cultures CM141.) Lecture, three hours; fieldwork, one hour. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and the carnivalesque and politics of celebration. Concurrently scheduled with course CM236. P/NP or letter grading.

**M138. Urban Legend and Popular Culture. (4)** (Same as World Arts and Cultures M136.) Lecture, four hours. Survey of modern belief tales about ghosts, Bigfoot, conspiracies, food contamination, corporate malfeasance, and crime, with attention to popularity of the genre, history of particular legends, meanings and functions of legend telling, and relationship between orally told legends and mass media. P/NP or letter grading.

**M139. Narrative and Oral Performance. (4)** (Same as World Arts and Cultures M132.) Lecture, four hours. Survey of concepts of story as text versus narrating as oral performance, studies of individual narrators, how stories are composed in performance, interaction of narrator and audience, how place and experience become embodied in narratives, modes of representing oral narrating, and politics of stories and oral performance. P/NP or letter grading.

**M140. Italian Novella from Boccaccio to Basile. (4)** (Same as Italian M140.) Lecture, three hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

**M142. Introduction to Jewish Folklore. (4)** (Same as Jewish Studies M143.) Nature of Jewish folklore; narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

**CM145. Applied Folklore. (4)** (Formerly numbered C145.) (Same as World Arts and Cultures CM175.) Lecture, four hours. Designed for juniors/seniors. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course CM245. P/NP or letter grading.

**M149. Folk Literature of the Hispanic World. (4)** (Same as Spanish M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

**M150. Russian Folk Literature. (4)** (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

**M154A-M154B. African American Musical Heritage. (4-4)** (Same as Afro-American Studies M110A-M110B and Ethnomusicology M110A-M110B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

**M155. Oral Traditions in Africa. (4)** (Same as English M111G.) Designed for juniors/seniors. Survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

**161. Beliefs and Tales of the Supernatural. (4)** Lecture, five hours. History of beliefs and legends reporting on encounters with creatures of the supernatural world, such as giants, dwarfs, ghosts, wild men, UFOs. Study of firsthand encounters with such beings and analysis of resulting narratives and contexts of their narration. Analysis of social, psychological, and physical states that contribute to such experiences. P/NP or letter grading.

**163. Folklore and Oral History. (4)** Designed for juniors/seniors. Examination of relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionalize history to reflect their point of view.

**CM165. Film and Folklore. (4)** (Formerly numbered C165.) (Same as World Arts and Cultures CM183.) Lecture, three hours. Designed for juniors/seniors. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course CM265. P/NP or letter grading.

**M170. Russian Folklore. (5)** (Same as Russian CM170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. P/NP or letter grading.

**172. Folklore in Ethnic Context. (4)** Prerequisite: course M15 or M101. Role of folklore in ethnic relations; processes by which ethnic folklore is generated, transmitted, and maintained by immigrant groups and subsequent generations.

**CM175. Food Customs and Symbolism. (4)** (Formerly numbered C175.) (Same as World Arts and Cultures CM129.) Lecture, three hours. Designed for juniors/seniors. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course CM275. P/NP or letter grading.

**M180. Analysis of Traditional Music. (4)** (Same as Ethnomusicology M180.) Designed for Ethnomusicology, Music History, and Folklore majors. Intensive study of methods and techniques necessary to understand traditional music.

**CM182. Japanese Folklore. (4)** (Formerly numbered M182.) (Same as Japanese CM182.) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM282. Letter grading.

**M183. Korean Folklore. (4)** (Formerly numbered 183.) (Same as Korean M183.) Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture. P/NP or letter grading.

**CM184. Dance and Folklore. (4)** (Same as World Arts and Cultures CM154.) Lecture, four hours. Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM284. P/NP or letter grading.

**M185. The Hero in the Bible and the Ancient Near East. (4)** (Same as Ancient Near East M194.) Lecture, three hours. Investigation of concepts of the hero/heroine in literatures of ancient Mesopotamia, Canaan, and Israel. Texts include epics of Gilgamesh and Aghat, Hebrew Bible, and New Testament. All texts read in translation.

**190. Selected Topics in Folklore and Mythology Studies. (4)** Prerequisite: course M15 or M101. Proseminar focusing on selected problems, data, or themes in folklore and mythology studies. May be repeated twice for credit.

**199. Special Studies in Folklore. (2 to 4)** Limited to seniors.

## Graduate Courses

**200A. Folklore Bibliography, Theory, and Research Methods. (4)** Lecture, three hours; discussion, one hour. Designed for graduate folklore and mythology students. Basic course in theory, current trends, and bibliography for folklore graduate students, including research techniques in contemporary folkloristics.

**200B. Fieldwork. (4)** Lecture, three hours. Prerequisite: course 200A. Discussion/demonstration of theoretical concepts and practical techniques of data gathering and field research in folklore.

**CM205. Perspectives in American Folklore Research. (4)** (Same as English M205.) Lecture, three hours. Prerequisite: course M101. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course C105.

**C207. Folklore in Urban Environments. (4)** Lecture, three hours. Prerequisite: course 200A. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107.

**208. Afro-American Folklore and Culture. (4)** Designed for graduate students. Theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S.

**CM209. Afro-Caribbean Ritual Arts: Vodou and Santeria. (4)** (Same as World Arts and Cultures CM239.) Lecture, three hours. Designed for graduate students. Ethnography of diaspora African religions, including vodou, Santeria, and Candomble. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM109. S/U or letter grading.

**213. Folk Belief and Custom. (4)** Preparation: one course from M118, M121, M122, 124, M126, M149, M150, Anthropology 156, German 120. Requisite: course M101. Study of beliefs and customs in the folk community: life cycle, calendrical and agricultural customs, and legal antiquities.

**214. Ethnography of Humor. (4)** (Formerly numbered M214.) Lecture, three hours. Designed for graduate folklore and mythology students. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

**M215. Legend as Folklore, Culture, and Behavior. (5)** (Formerly numbered 215.) (Same as World Arts and Cultures M215.) Lecture, four hours. Designed for graduate students. Examination of folkloristic, psychological, and sociocultural approaches to legends with special attention to texts versus narrating performance, "truth" and "belief," and meanings and significance of legends and legend telling, as well as applications of legend study to civil society (race and ethnic relations and public policy). S/U or letter grading.

**M216. Analyzing Narrative and Oral Performance. (5)** (Formerly numbered 216.) (Same as World Arts and Cultures M216.) Lecture, four hours. Designed for graduate students. Exploration of ways of documenting individual narrators and interpreting their styles and repertoires; how narrators conceptualize and perform narrative discourse, impact of audience and "situated event" on both narrating and "the story," how experiences and values are communicated through narrating, modes of representing oral narrating, and politics of narrative and oral performance. S/U or letter grading.

**217. Folk Speech. (4)** Lecture, three hours. Study of ethnography of communication and its relevance to study of social and regional dialects, proverbs, riddles, onomastics, folk poetry and verse, and traditional humor.

**218. Folk Art, Craft, and Aesthetics. (4)** Lecture, three hours. Requisite: course 200A. Examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from latter part of the 19th century to the present.

**228. Seminar: Topics in Celtic Folklore and Mythology. (4)** Seminar, three hours. Preparation: coursework in Celtic studies. Requisite: course 200A. Preparation for advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Britain/Ireland; comparative Celtic mythology; Celtic origin legends; literary and oral saints' legends; the Irish Fenian (Ossianic) tradition of ballads (*laoidhe/duair*) and prose tales; "fairy" beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism.

**M230A-M230B. Folk Tradition in Italian Literature. (4-4)** (Same as Italian M230A-M230B.) Lecture, two hours.

**M235. African Myth and Ritual. (4)** (Same as English M235.) Seminar on methods of analyzing African and African Diaspora myth and ritual.

**CM236. Carnival and Festivity. (4)** (Formerly numbered C236.) (Same as World Arts and Cultures CM241.) Lecture, three hours; fieldwork, one hour. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and the carnivalesque and politics of celebration. Concurrently scheduled with course CM136. S/U or letter grading.

**240. Introduction to Jewish Folk Literature. (4)** Designed for juniors/seniors and graduate students. Examination of both historic and generic methods used in study of Jewish folk literature.

**M241. Folklore and Mythology of the Near East. (4)** (Same as Near Eastern Languages M241.) Requisite: course M101.

**M243A. The Ballad. (4)** (Same as English M243A.) Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues. May be repeated for credit.

**M243B. Problems in Ballad Scholarship. (4)** (Same as English M243B.) Requisite: course M243A. Intensive investigation of a problem or problems in study of the popular ballad. May be repeated for credit.

**CM245. Applied Folklore. (4)** (Formerly numbered C245.) (Same as World Arts and Cultures CM275.) Lecture, four hours. Designed for graduate students. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course CM145. S/U or letter grading.

**248. Theory and Method in Latin American Folklore Studies. (4)** Historical survey of folklore scholarship in Latin America, with emphasis on theoretical bases, methods, and techniques employed in study and analysis of traditional tales, songs, music, linguistic expression.

**M249. Folk Literature of the Spanish and Portuguese Worlds. (4)** (Same as Portuguese M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

**251. Seminar: Finno-Ugric Folklore and Mythology. (4)** Advanced studies in folk traditions and mythologies of the Finno-Ugric speaking nations.

**M258. Seminar: Folk Music. (4)** (Same as Ethnomusicology M287.) Seminar, three hours.

**259. Seminar: Folklore. (4)** Requisite: course 200A. Seminar focusing on selected topics in folklore and mythology. May be repeated for credit.

**260. Organizational Folklore, Culture, and Symbolism. (4)** Designed for graduate students. Folklore in organizational settings (stories, rituals, rites, metaphors, etc.) and role of folklore in organization development as information source, diagnostic, and intervention to improve personnel practices, climate, and leadership.

**M261. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4)** (Same as Italian M260A.) Lecture, three hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, cures and curses, secular and ritual drama).

**CM265. Film and Folklore. (4)** (Formerly numbered C265.) (Same as World Arts and Cultures CM283.) Lecture, three hours. Designed for graduate students. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course CM165. S/U or letter grading.

**M270A-M270B. Seminars: Japanese Ritual Arts. (4-4)** (Same as Japanese M270A-M270B.) Seminar, three hours. Reading knowledge of Japanese not required. Discussions and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

**CM275. Food Customs and Symbolism. (4)** (Formerly numbered C275.) (Same as World Arts and Cultures CM229.) Lecture, three hours. Designed for graduate students. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course CM175. S/U or letter grading.

**CM282. Japanese Folklore. (4)** (Same as Japanese CM282.) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM182. Letter grading.

**CM284. Dance and Folklore. (4)** (Same as World Arts and Cultures CM254.) Lecture, four hours. Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM184. S/U or letter grading.

**M286A-M286B. Studies in Hispanic Folk Literature. (4-4)** (Same as Spanish M286A-M286B.) Lecture, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400A-400B-400C. Directed Professional Activities. (4-4-4)** Directed individual projects in professional editing, bibliography, discography, filmography, festival direction, and other professional activities. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**495. Teaching Folklore and Mythology. (4)** Seminar, three hours. Requisite: course 200A. Analysis and design of alternative organizational schemes, teaching aids and techniques, and evaluation methods for folklore and mythology courses at the college level, with opportunities for observation and apprentice teaching. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, program chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Studies in Folklore. (2 to 6)** S/U or letter grading.

**597A. Preparation for M.A. Comprehensive Examination. (2 to 4)** Limited to graduate folklore and mythology students. S/U grading.

**597B. Preparation for Ph.D. Qualifying Examinations. (4 to 8)** Preparation: successful completion of M.A. comprehensive examination. S/U grading.

**598. M.A. Thesis Preparation. (2 or 4)** S/U grading.

**599. Ph.D. Dissertation Research. (4 to 8)** Preparation: advancement to Ph.D. candidacy. S/U grading.

# FOREIGN LITERATURE IN TRANSLATION

## Scope and Objectives

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.

## Foreign Literature in Translation

### Course List

#### Afrikaans (Germanic Languages)

114. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Preapartheid to Postapartheid Era, in English Translation

#### Ancient Near East (Near Eastern Languages)

- 150A. Survey of Ancient Near Eastern Literatures in English: Mesopotamia  
150B. Survey of Ancient Near Eastern Literatures in English: Egypt  
150C. Survey of Ancient Near Eastern Literatures in English: Syria and Palestine

#### Arabic (Near Eastern Languages)

150. Introduction to Arabic Literature and Culture  
151. Survey of Modern Arabic Literature in English

#### Armenian (Near Eastern Languages)

- 150A-150B. Survey of Armenian Literature in English  
152. Modern Armenian Drama as Vehicle for Social Critique  
153. Art, Politics, and Nationalism in Modern Armenian Literature

#### Bulgarian (Slavic Languages)

154. Survey of Bulgarian Literature

#### Chinese (East Asian Languages)

- 150A. Lyrical Traditions  
150B. Traditional Narrative and Drama  
151. Chinese Literature in Translation: Modern Literature  
152. Topics in Contemporary Chinese Literature and Culture  
M153. Chinese Immigrant Literature and Film

#### Classics

40. Survey of Greek Literature in Translation  
41. Survey of Latin Literature in Translation  
41W. Discovering Roman Literature  
140. Topics in History of Greek Literature  
141. Topics in History of Latin Literature  
142. Ancient Epic  
143. Ancient Drama  
144. Topical Studies in Ancient Culture

#### Comparative Literature

All undergraduate courses

#### Czech (Slavic Languages)

155. Survey of Czech Literature from Middle Ages to the Present

#### Dutch (Germanic Languages)

113. Modern Dutch and Flemish Literature in Translation

#### East Asian Languages and Cultures

161. Buddhist Literature in Translation

### English

- 108A-108B. English Bible as Literature  
108C. English Bible as Literature: Special Topics

### French

162. Modern French Thought in Translation  
164A-164B-164C. The French Novel in Translation  
165. Topics in French Literature in Translation  
166. French and Francophone Autobiography, in English

### German (Germanic Languages)

- 50A. Great Works of German Literature in Translation: Medieval Period through Classicism  
50B. Great Works of German Literature in Translation: Romanticism to the Present  
106. The Faust Tradition from the Renaissance to the Modern Age  
M108. Love and Sex in German Literary Tradition  
112. Jewish Writing and Thought in German Culture from 1755 to the Present  
116. Special Topics in Modern Literature and Culture

### Iranian (Near Eastern Languages)

- 150A-150B. Survey of Persian Literature in English  
**Italian**  
42A-42B. Italy through the Ages in English  
50A-50B. Masterpieces of Italian Literature in English  
102A-102B-102C. Italian Cultural Experience in English  
110. Dante in English  
121. Literature and Film  
122. Italian Theater

- M140. Italian Novella from Boccaccio to Basile

150. Modern Fiction in Translation

- M158. Women in Italian Culture  
M230A-M230B. Folk Tradition in Italian Literature  
M260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature

### Japanese (East Asian Languages)

150. Japanese Literature in Translation: Classical  
151. Japanese Literature in Translation: Modern  
154. Postwar Japanese Culture through Literature  
M156. Literature and Technology

### Jewish Studies (Near Eastern Languages)

- M150A-150B. Hebrew Literature in English  
151A-151B. Modern Jewish Literature in English

### Korean (East Asian Languages)

150. Korean Literature in Translation: Classical  
151. Korean Literature in Translation: Modern

### Old Norse Studies (Germanic Languages)

40. The Heroic Journey in Northern Myth, Legend, and Epic  
C139. The Saga  
C140. Viking Civilization and Literature

### Polish (Slavic Languages)

- 152A-152B-152C. Survey of Polish Literature

### Portuguese (Spanish and Portuguese)

- 40A-40B. Portuguese, Brazilian, and African Literature in Translation  
46. Brazilian Culture and Civilization

### Romanian (Slavic Languages)

152. Survey of Romanian Literature

### Russian (Slavic Languages)

25. Russian Novel in Translation  
118. Russian Literature of Middle Ages and Enlightenment  
119. Golden Age and the Great Realists  
120. Literature and Revolution  
124C-124T. Studies in Russian Literature  
125. The Russian Novel in Its European Setting  
126. Survey of Russian Drama  
M127. Women in Russian Literature  
128. Russian Science Fiction

CM170. Russian Folklore

**Scandinavian**

50. Introduction to Scandinavian Literature  
 141. Backgrounds of Scandinavian Literature  
 142. Scandinavian Literature of the 19th Century  
 143. Scandinavian Literature of the 20th Century  
 C144. Henrik Ibsen on the World Stage  
 C145. Getting Married: Strindberg and Battle of the Sexes  
 C146. Kierkegaard and Foundations of Existentialism  
 C147. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll  
 C180. Literature and Scandinavian Society  
 C182. Theory of the Scandinavian Novel  
 184. Hans Christian Andersen  
 CM186. Voices of Women in Scandinavian Literature  
 187. Scandinavian Film: Bergman and Others

**Serbian/Croatian (Slavic Languages)**

154. South Slavic Literature

**Slavic (Slavic Languages)**

125. Interwar Central European Prose  
 126. Postwar Central European Prose

**Spanish (Spanish and Portuguese)**

60A-60B-60C. Hispanic Literatures in Translation

**Ukrainian (Slavic Languages)**

152. Ukrainian Literature

**Yiddish (English)**

121A. 20th-Century Yiddish Poetry in English Translation

121B. 20th-Century Yiddish Prose and Drama in English Translation

121C. Special Topics in Yiddish Literature in English Translation

 Nicole Dufresne, Ph.D.  
 Kimberly Jansma, Ph.D.

### Scope and Objectives

The UCLA French and Francophone Studies Department is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French and Francophone studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The undergraduate lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The undergraduate upper division program is chiefly devoted to perfecting linguistic skills and to the study of French and Francophone culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French and Francophone literature and culture. All three plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program offers both M.A. and Ph.D. degrees and comprises training in the various fields of French and Francophone culture, literature, and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered.

### Undergraduate Study

If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

Requisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, or equivalent. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in French grammar and/or composition.

## French B.A./French and Linguistics B.A.

### Preparation for the Majors

*Required:* French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students who receive a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of the instructor. Students in Plan III must also take Linguistics 20.

**Transfer Students**

To be admitted to the French majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of French and one French literature course. Students in Plan III must also complete an introduction to linguistics course.

### The Majors

Three plans are offered by the department:

#### Plan I: French/Francophone Studies in Literature and Culture

Plan I leads to the Bachelor of Arts in French. *Required:* Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least six courses in French and Francophone literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. Two upper division elective courses from outside the department may be substituted in the major program with consent of the undergraduate adviser.

#### Plan II: Interdisciplinary French/Francophone Studies

Plan II, with emphasis on French and Francophone culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. *Required:* Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least two courses in French and Francophone literature; one additional elective course normally selected from upper division offerings in the department in language, civilization, literature, or the arts; five upper division elective courses in fields relevant to French and Francophone studies to be selected in or outside the department in consultation with the undergraduate adviser.

#### Plan III: French and Linguistics

Plan III leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, students are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Linguistics 20 is required as preparation for the major. *Required:* Twelve upper division courses, including French 100, 101, 102; two courses from 105, 107, 108A, 108B, 109; two courses from

114A, 114B, 114C; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students' knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100, 101, or 102, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French and Francophone Studies Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French and Francophone Studies Department. Freshmen and sophomores may take up to two courses taught in English, selected from French 162 through 165, in fulfillment of major requirements (if taken in the junior or senior year, these courses count as electives). A maximum of 8 units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

## Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115A and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form.

On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take courses 170A and 170B where they receive regular personal supervision from a faculty member in the research, methodology, and writing of their approximately 30- to 35-page honors thesis (honors projects and the honors thesis are not to be confused). Courses 170A and 170B count as one course toward the requirements for the French majors.

Students may begin the honors program toward the end of their junior year or during their senior year. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

## French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* French 6 or equivalent and one course from 12, 14, or 15.

*Required Upper Division Courses (20 units):* French 100 or 101, and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of French and Francophone Studies offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in French and Francophone Studies.

## Admission

Applicants to the M.A. program must hold a B.A. in French or the equivalent. The Graduate Record Examination (GRE) General Test, a sample of written work in French, and three letters of recommendation are also required and should be sent to the department.

For UCLA students applying to the Ph.D. program, completion of the M.A. degree in French and Francophone Studies with recommendation for admission to the doctoral program is required. Outside applicants must hold the M.A. degree in French or equivalent, submit three letters of recommendation and a sample of written work in French, and take the Graduate Record Examination (GRE) General Test.

## Master's Degree

For areas of study, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. A total of 11 courses in French is required, eight at the graduate level, including required coursework in literary research and composition and contemporary theories, at least two courses in each of the three periods, and one additional course in the period not covered on the M.A. examination. For thesis plan candidates, this is the period of specialization which is not covered on the oral qualifying examination.

Students are required to consult with the graduate adviser to ensure full historical coverage of French literature.

There is a language requirement for this degree.

## Doctoral Degree

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with Francophone literature as an option).

Required coursework includes courses in literary research and composition and contemporary theories if not already covered at the M.A. level, seminars (a balance should be sought between theoretical and literary-historical relevance to the student's proposed period of specialization), and graduate courses in other departments related to the area of specialization.

Admitted students holding the M.A. or an equivalent degree from another institution must consult the graduate adviser for possible additional course requirements. In addition, students are expected to follow the guidance committee's suggestions in taking courses in preparation for the doctoral qualifying examination.

Written and oral qualifying examinations are required. Two written qualifying examinations are based on individual reading lists and cover the historical area related to the proposed dissertation topic and areas of critical theory relevant to the proposed dissertation topic.

Following successful completion of the written examinations, students prepare a dissertation prospectus and take the University Oral Qualifying Examination, which covers the written examinations and the proposed dissertation subject.

There is a language requirement for this degree.

## French

### Lower Division Courses

**1. Elementary French. (4)** Lecture, five hours.

**1G. Elementary French for Graduate Students. (3)** Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading.

**2. Elementary French. (4)** Lecture, five hours. Enforced requisite: course 1 with a grade of C– or better.

**2G. Elementary French for Graduate Students. (3)** Enforced requisite: course 1G. Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. May be repeated. S/U grading.

**3. Elementary French. (4)** Lecture, five hours. Enforced requisite: course 2 with a grade of C– or better.

**4. Intermediate French. (4)** Lecture, five hours. Enforced requisite: course 3 with a grade of C– or better.

**5. Intermediate French. (4)** Lecture, five hours. Enforced requisite: course 4 with a grade of C– or better.

**6. Intermediate French. (4)** Enforced requisite: course 5 with a grade of C– or better.

**8. Intensive First-Year French. (12)** Lecture, 15 hours. All-in-French intensive language program equivalent to first year of college French and designed to develop basic language skills. Additional work in language and media laboratory required. Offered in summer only. P/NP or letter grading.

**9. Intensive Second-Year French. (8)** Lecture, 10 hours; media laboratory, three hours. Enforced requisite: course 3. Intensive course equivalent to first two terms of intermediate French and designed to improve proficiency in reading, writing, and speaking. Offered in summer only. P/NP or letter grading.

**10A-10D. French Conversation. (2 each)** Discussion, three hours. Enforced requisite: course 3 with a grade of B or better.

**12. Introduction to Study of French Literature. (5)** Lecture, two hours; discussion, one hour. Enforced requisite: course 6. Principles of literary analysis as applied to selected texts in poetry, theater, and prose. P/NP or letter grading.

**14. Introduction to French Civilization, in English. (4)** Lecture, two hours; discussion, one hour. Not open for credit to students with credit for course 14W. Study of contemporary French institutions and issues in political, cultural, and socioeconomic realms. Structure of French society and recent developments. P/NP or letter grading.

**14W. Introduction to French Civilization. (5)** Lecture, two hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 14. Study of contemporary French institutions and issues in political, cultural, and socioeconomic realms. Structure of and recent developments in French society. Satisfies Letters and Science Writing II requirement. Letter grading.

**15. Theory and Correction of Diction. (4)** Enforced requisite: course 6. French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings.

**41. French Cinema and Culture. (4)** Lecture, three hours; film screenings, three hours. Introduction to French culture and literature through study of major films of cultural and literary significance. P/NP or letter grading.

### Upper Division Courses

**100. Written Expression: Techniques of Description. (4)** Lecture, three hours. Requisite: course 6. Writing assignments follow close analysis of relevant texts and study of related grammatical structures. P/NP or letter grading.

**101. Written Expression: Techniques of Narration. (4)** Lecture, three hours. Requisite: course 6. Writing assignments follow close analysis of relevant texts and study of related grammatical structures. P/NP or letter grading.

**102. Advanced Expository Writing: Techniques of Argumentation. (4)** Lecture, three hours. Requisites: courses 100, 101. Study of rhetorical devices and revision of related grammatical structures. Writing assignments follow analysis of relevant texts. P/NP or letter grading.

**105. Structure of French. (4)** Lecture, three hours. Requisite: course 15. Prior background in linguistics not required. Introduction to linguistic analysis of French in areas of phonology, morphology, syntax, and language variation.

**107. Advanced Oral Expression. (4)** Lecture, three hours. Requisite: course 100. Communicative and rhetorical strategies; techniques of oral exposition, argumentation, and analysis.

**108A-108B. Advanced Practical Translation. (4-4)** (Formerly numbered 108A-108B-108C.) Lecture, three hours. P/NP or letter grading:

**108A.** Lecture, three hours. Requisite: course 101. Translation of journalistic texts, including biography and interview, formal and informal reporting, advertising and idiomatic language. Work in techniques of translation. P/NP or letter grading.

**108B.** Lecture, three hours. Requisite: course 102 or 108A. Translation of literary and sociocultural texts, including editorials, polemical issues, film subtitles. Comparative stylistics of translation. P/NP or letter grading.

**109. Language and Communication in Business French. (4)** Lecture, three hours. Requisite: course 6. Oral and written business communication in France, including commercial transactions, banking, job search, correspondence, and management. P/NP or letter grading.

**110. Culture of Business in France. (4)** Lecture, three hours. Requisite: course 100 or 109. Cultural issues in business French, including mentalities, practices and customs, marketing, and advertising strategies. P/NP or letter grading.

**112. Medieval Foundations of European Civilization. (4)** Lecture, three hours; discussion/film screenings, two hours. Medieval texts, culture, social structure, and political history as they lay bases of European modernity. P/NP or letter grading.

**114A-114B-114C. Survey of French Literature. (5-5-5)** Lecture, three hours. Requisite: course 12. Survey of French literature from the medieval period through the 20th century. P/NP or letter grading:

**114A.** Medieval and Renaissance Literature. (5) Lecture, three hours. Requisite: course 12. Masterpieces of medieval and Renaissance literature, including examples of epic (*La Chanson de Roland*), romance (Chrétien de Troyes' *Yvain*), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navarre, and Montaigne). P/NP or letter grading.

**114B.** 17th and 18th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of selections from major works of classicism and the Enlightenment, including those by Racine, Pascal, La Fayette, La Fontaine, Laclot, Diderot, Voltaire, and Rousseau. P/NP or letter grading.

**114C.** 19th and 20th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of major literary movements and writers of the period, including works by Hugo, Baudelaire, Balzac, Stendhal, Flaubert, Zola, Gide, Proust, Sartre, Robbe-Grillet, and Duras. P/NP or letter grading.

**115A-115B-115C. Medieval French Literature. (4-4-4)** Lecture, three hours:

**115A.** Invention of Love in the 12th Century. Selections from the broad range of lyric poetry and narrative romance in which is first elaborated "romantic" (sometimes called "courtly") love. Readings include works of the troubadours and *trouvères*, different versions of the Tristan-myth, a romance of Chrétien de Troyes, and first part of *Romance of the Rose*.

**115B.** Medieval Knight: Heroism and Its Social Problems. Readings in literature and history of medieval warfare and its ideals in relation to social structure of the time. Texts include *La Chanson de Roland*, *Raoul de Cambrai*, *La Mort le roi Artu*, crusade history, and Georges Duby's *Guerriers et paysans*.

**115C.** Comic Structure and Social Class. Medieval comedy, to be studied in relation to class structures and their evolution in the Middle Ages, takes a number of forms. Often obscene in the *fabliaux*, it can turn parodic in the *Roman de Renart*, simultaneously satiric, fantastic, and religious in the bourgeois drama of Arras, and utterly charming in the unclassifiable *Aucassin et Nicolette*.

**116A-116B-116C. Renaissance. (4-4-4)** Lecture, three hours:

**116A.** La Pléiade and 16th-Century Poetry. Study of the linguistic and poetic "revolution" brought about by *Defiance et Illustration* (1549), including texts by Marot, Scève, Labé, Du Bellay, and Ronsard.

**116B.** The Novel and Other Early 16th-Century Prose. Emphasis on Rabelais, with other texts by Marguerite de Navarre and Jean Calvin.

**116C.** Late French Humanism. Emphasis on Montaigne's *Essais*, with other texts from the Religious Wars period.

**117A-117B-117C. 17th Century. (4-4-4)** Lecture, three hours:

**117A.** Theater. Study of French comedy and/or tragedy through representative works, including those by Corneille, Molière, and Racine.

**117B.** Prose. Study of 17th-century philosophers, moralists, and/or novelists such as Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine.

**117C.** Culture and Society. Study of 17th-century political, social, religious, and courtly aspects, including libertine and *salons milleux*, la Fronde, and Versailles.

**118A-118B-118C. 18th Century. (4-4-4)** Lecture, three hours:

**118A.** Satire. Readings include Montesquieu's *Lettres persannes*, Diderot's *Neveu de Rameau* and *Rêve de d'Alembert*, and Voltaire's *Contes*.

**118B.** The Novel. Readings include Prévost's *Manon Lescaut*, Diderot's *La Religieuse* and *Jacques le fataliste*, excerpts from Rousseau's *Julie*, and Laclot's *Les Liaisons dangereuses*.

**118C.** Theater. Readings include selected plays of Marivaux and Beaumarchais, as well as selections from theoretical writings of Diderot and Rousseau.

**119A-119D. 19th Century. (4 each)** Lecture, three hours:

**119A.** Romanticism. Readings of representative poets, novelists, and playwrights of the Romantic era such as Chateaubriand, Lamartine, Hugo, Vigny, Balzac, and Stendhal.

**119B.** Generation of 1848. Readings of representative writers of the 1840s and the Second Empire such as Baudelaire, Nerval, Balzac, Flaubert, and Mérimée. May also include the *théâtre à thèse* and Parnassian poetry.

**119C.** Naturalism and Symbolism. Study of naturalism in the novel and drama as represented by Zola, Maupassant, and Becque, and of symbolism in the poetry of Baudelaire, Verlaine, Rimbaud, and Mallarmé.

**119D.** Turn of the Century. Study of genres and trends from 1885 through World War I, with emphasis on prose writers such as Huysmans, Laforgue, Barrès, Alain-Fournier, Jarry, Roussel, France, and Romain-Roland.

**120A-120B-120C. 20th Century. (4-4-4)** (Formerly numbered 120A-120D.) Lecture, three hours. P/NP or letter grading:

**120A.** Early 20th-Century Writers. (4) Lecture, three hours. Readings of works by Claudel, Apollinaire, Valéry, Gide, and Proust. P/NP or letter grading.

**120B.** Literature from 1918 to 1945. (4) Lecture, three hours. Study of works by surrealists and other major writers such as Céline, Malraux, Giraudoux, and Anouilh. P/NP or letter grading.

**120C.** Post-World War II Literature. (4) Lecture, three hours. Study of works by existentialists and other major writers such as Robbe-Grillet, Beckett, Genet, Ponge, and Duras. P/NP or letter grading.

**121A-C121B. Contemporary Francophone Literature. (4-4)** Lecture, three hours:

**121A.** French-African Literature. Survey of literary works of French expression north and south of the Sahara from World War II to the present.

**C121B.** Quebec Literature. Survey of modern *Québécois* literary works. Concurrently scheduled with course C222. P/NP or letter grading.

**124. The Short Story. (4)** Lecture, three hours. Survey of short fiction forms in France and the French-speaking world.

**125. Evolution of French Comedy. (4)** Lecture, three hours. Study of history and evolution of comedy from the Middle Ages to the theater of the absurd.

**130. Special Topics in French and Francophone Cultures. (4)** (Formerly numbered 130A-130B-130C.) Lecture, three hours. Requisites: courses 6, 12. Study of French and Francophone cultures of Middle Ages, Renaissance, "Ancien Régime," and 19th and 20th centuries. Fourth hour may be required for viewing films and other laboratory activities. May be repeated for credit. Letter grading.

**132. Contemporary France. (4)** Lecture, three hours. Social, cultural, and political institutions and/or movements in 20th-century France.

**M140. Women's Studies in French Literature. (4)** (Formerly numbered 140.) (Same as Women's Studies M140.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc. P/NP or letter grading.

**141. Cinema and Literature in France. (4)** Lecture, three hours (additional hours may be required for viewing films and other laboratory activities). Study of interaction between cinema and literature in its generic, thematic, and sociocultural aspects.

**142. Poetry and Music. (4)** Lecture, three hours. Interdisciplinary study of relation between music and literature, with emphasis on the setting of poetical texts to music, from the troubadours to modern times.

**M143. Rhetoric of Rule. (4)** (Same as Communication Studies M117.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV's and President Clinton's attempts to manipulate their image in the "media" of their respective cultures.

**150. Studies in Medieval Literature. (4)** May be repeated once for credit with consent of major adviser.

**151. Studies in 16th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**152. Studies in 17th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**153. Studies in 18th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**154. Studies in 19th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**155. Studies in 20th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**156. Studies in Contemporary French and Francophone Literature. (4)** Lecture, three hours. May be repeated once for credit with consent of major adviser. P/NP or letter grading.

**157. Studies in French Critical Theory and Philosophy. (4)** Lecture, three hours. Advanced study of major concepts in contemporary French thought, with attention to its influence on French literature and culture, and its application to literary and nonliterary texts.

**158. Studies in History of Ideas. (4)** Lecture, three hours. Specific themes which address a particular problem of French literature, civilization, or ideas. May be repeated for credit with consent of major adviser.

**160. Francophone Cultures, in English. (4)** Lecture, three hours. Study of historical, anthropological, legal, literary, or filmic texts to provide students with broad view of some main issues in field of colonial and postcolonial Francophone studies. P/NP or letter grading.

**162. Modern French Thought in Translation. (4)** Lecture, three hours. Reading and discussion of contemporary works in translation. May be repeated for credit with consent of major adviser. P/NP or letter grading.

**164A-164B-164C. The French Novel in Translation. (4-4-4)** Lecture, three hours. Texts and authors to be studied announced in advance for each offering.

**165. Topics in French Literature in Translation. (4)** Lecture, three hours. Variable topics to be announced each term. May be repeated for credit with consent of major adviser. P/NP or letter grading.

**166. French and Francophone Autobiography, in English. (4)** Lecture, three hours. Genre of self-portrait covers writers from Montaigne and Rousseau to the 20th century. Focus on rhetoric of genre and its relation to broad questions of identity, gender, race, and class. P/NP or letter grading.

**170A-170B. Thesis Tutorial. (4-4)** (Formerly numbered 170.) Tutorial, to be arranged. Limited to senior French majors with 3.5 departmental and 3.25 overall grade-point averages. Letter grading. **170A.** Research Methods. Preparation: completion of one honors project or one seminar. Individual study of research techniques related to a topic leading to an honors thesis. Required work includes bibliography, outline, prospectus. **170B.** Requisite: course 170A. Individual study on a topic leading to an honors thesis of approximately 30 to 35 pages to be written under guidance of a faculty member.

**199. Special Studies in French. (2 to 8)** Preparation: consultation with undergraduate adviser. Limited to juniors/seniors. May be repeated once.

## Graduate Courses

**201. Literary Research and Composition. (4)** Lecture, three hours. Introduction to graduate-level literary research, including writing scholarly papers, compilation and presentation of bibliography, and practical work in computer use of data bank.

**202. Historical and Philosophical Background to French Literary Criticism. (4)** Lecture, three hours.

**203. Contemporary Theories. (4)** Lecture, three hours. Introductory study of representative texts from the works of major modern theoreticians, which may include works by Althusser, Barthes, Derrida, Foucault, Genette, Greimas, Kristeva, and Lacan.

**205. Techniques of Literary Analysis. (4)** Lecture, three hours. Practice in close analysis of literary texts, including *explication de texte*.

**214. Problematics of Medieval Language and Literature. (4)** Lecture, three hours. Requisite to courses 215A, 215B, 250A, 250B, 250C. Introduction to Old French and the problematics of medieval literature.

**215A-215B. Medieval Literature. (4-4)** (Formerly numbered 215A-215D.) Lecture, three hours. Requisite: course 214. Development of a vernacular culture in the Middle Ages. Exploration of social functions of texts designated as "literary" by modernity as part of social, economic, and political evolutions in which those texts played key roles. Letter grading. **215A.** Medieval Subject; **215B.** Narrative Types.

**216. Renaissance. (4)** (Formerly numbered 216A-216B-216C.) Lecture, three hours. French literature of the 16th century studied within historical, intellectual, and cultural contexts. Letter grading.

**217. 17th Century. (4)** (Formerly numbered 217A-217D.) Lecture, three hours. Readings in 17th-century literature studied within historical, cultural, and literary contexts. Letter grading.

**218. Enlightenment. (4)** (Formerly numbered 218A-218B-218C.) Lecture, three hours. Readings in 18th-century French literature and thought: novels, satires, plays, and other key Enlightenment *philosophies*. Letter grading.

**219. 19th Century. (4)** (Formerly numbered 219A-219D.) Lecture, three hours. Readings in 19th-century literature, covering development of the novel, lyric poetry, and theater from Romantic period to *fin-de-siècle*. Letter grading.

**220. 20th Century. (4)** (Formerly numbered 220A-220D.) Lecture, three hours. Overview, both historical and analytical, of 20th-century French literature set in context of several key critical topics that interrogate canonical interpretation. Letter grading.

**221A-221B-221C. French-African Literature. (4-4-4)** Lecture, three hours:

**221A.** Introduction to Study of French-African Literatures. In-depth survey of French-African literatures prior to independence.

**221B.** French-African Literature of Madagascar and Bantu Africa. Readings and analysis of major works since independence.

**221C.** French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa. Readings and analysis of major works since independence.

**C222. Contemporary Francophone Literature: Quebec Literature. (4)** Lecture, three hours. Survey of modern *Québécois* literary works. Concurrently scheduled with course C121B.

**241. Introduction to Generative Anthropology. (4)** Lecture, three hours. Discussion of principles of generative anthropology and their application to study of literary texts and related cultural phenomena.

**242. Introduction to Study of Narrative. (4)** Lecture, three hours. First survey of modern French methodology for critical analysis and interpretation of narrative, with examples from all periods of French literature.

**250A. Major Medieval Texts. (4)** Seminar, three hours. Requisite: course 214. Intensive study of individual texts from multiple perspectives, such as *La Chanson de Roland*, a romance of Chrétien de Troyes, *Le Roman de la rose*, or François Villon's *Grand Testament*. May be repeated for credit.

**250B. Structures of Medieval Literature. (4)** Seminar, three hours. Requisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures. May be repeated for credit.

**250C. Problems in Medieval Literature. (4)** Seminar, three hours. Requisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or nonclassified texts, individuality and convention, or opposition of religion and secularism. May be repeated for credit.

**251A-251B. Studies in the Renaissance. (4-4)** May be repeated for credit.

**253A-253B. Studies in the 17th Century. (4-4)** May be repeated for credit.

**254A-254B. Studies in the 18th Century. (4-4)** May be repeated for credit.

**255A-255B. Studies in the 19th Century. (4-4)** May be repeated for credit.

**256A-256B. Studies in Contemporary Literature. (4-4)** May be repeated for credit.

**257A-257B. Studies in French-African Literature. (4-4)** May be repeated for credit.

**258A-258B. Studies in Literary Criticism. (4-4)** May be repeated for credit.

**259A-259B. Studies in Philosophy and Literature. (4-4)** May be repeated for credit.

**260A-260B. Studies in History of Ideas. (4-4)** Particular problems in French literature and ideas. May be repeated for credit.

**370. Teaching French in Secondary School. (4)** Lecture, three hours; discussion, one hour. Required of all candidates for general secondary instructional credential in French.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching French at College Level. (4)** Seminar, three hours; discussion, one hour. Designed for graduate students. Theory and practice of language teaching. S/U grading.

**596. Directed Individual Studies or Research. (2 to 4)** Tutorial, to be arranged.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** May be repeated for a maximum of 16 units. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (2 to 4)** Maximum of 4 units may be applied toward M.A. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 8)** S/U grading.

## GENERAL EDUCATION CLUSTERS

*College of Letters and Science*

UCLA  
A265 Murphy Hall  
Box 951571  
Los Angeles, CA 90095-1571

(310) 794-2018  
<http://www.college.ucla.edu/ge/>

## Scope and Objectives

Available to entering freshmen only, general education clusters are an option for satisfying general education requirements. The clusters span three quarters and are interdisciplinary team-taught courses designed to introduce students to multiple areas of knowledge. They focus on a common topic and are organized in such a way that students can explore how different disciplines converge and diverge in their approach to a particular problem.

General education clusters are taught by some of the University's most distinguished faculty and are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. During Fall and Winter Quarters, instruction in the clusters consists of lecture courses taught in concert with discussion sections. In Spring Quarter students enroll in one of a number of small satellite seminars whose topics are related to the cluster theme.

On completion of the entire yearlong cluster, students satisfy the equivalent of four general education courses.

For the current cluster course offerings and general education credit, refer to <http://www.college.ucla.edu/ge/>.

## General Education Clusters

### Lower Division Courses

**M1A-M1B-M1C. Global Environment. (5-5-5)** (Same as Environment M1A-M1B-M1C.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1C. Letter grading. **M1A-M1B.** Multidisciplinary Perspective I, II. Lecture, three hours; discussion, two hours. Human effects on Earth's ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. **M1C.** Special Topics. Seminar, three hours. Small groups address environmental topics like smog, deforestation, and recycling. Exercises include field trips and oceanographic cruises.

**20A-20B-20C. Interracial Dynamics in American Culture, Society, and Literature. (5-5-5)** Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Letter grading. **20A-20B.** Lecture, three hours; discussion, two hours. Examination of construction of race and its position in 20th-century American society through interdisciplinary approach that brings together cultural studies and social sciences. Consideration of texts to achieve understanding of how we are produced and positioned in our society by racial categories and ideas. **20C.** Special Topics. Seminar, three hours. Consideration of how experience, debates, and issues of race are represented and understood in historical, legal, cinematic, and literary contexts.

**21A-21B-21C. History of Modern Thought. (5-5-5)** Course 21A is enforced requisite to 21B, which is enforced requisite to 21C. Letter grading. **21A-21B.** Lecture, three hours; discussion, two hours. Introduction to key issues in humanities and social sciences through close reading of prominent theories and texts of past four centuries. Consideration of historical and intellectual significance of writers from Rousseau and Wollstonecraft to Foucault and Beauvoir. **21C.** Special Topics. Seminar, three hours. Examination of cross-section of classical and modern social theories and debates that shape them.

**22A-22B-22C. Toward World Economy: Perils and Promise of Globalization. (5-5-5)** Course 22A is enforced requisite to 22B, which is enforced requisite to 22C. Letter grading. **22A-22B.** Lecture, three hours; discussion, two hours. Exploration of causes and mechanisms of globalization as well as its consequences. Critical examination of globalization theories, international institutions of trade, finance, governance, and overall impact of globalization on human society. **22C.** Special Topics. Seminar, three hours. Examination of global governance, development, and health.

**50A-50B-50C. Perception and Illusion: Cognitive Psychology, Literature, and Art. (5-5-5)** Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Letter grading. **50A-50B.** Lecture, three hours; laboratory, two hours. Through study of cognitive psychology, literature, and visual arts, examination of nature of visual perception, optical illusion, and the many ways in which we use our senses to construct reality. **50C.** Special Topics. Seminar, three hours. Examination in depth of issues related to aesthetics of perception and cognition, computers and consciousness, and narrations of perception.

**60A-60B-60C. The U.S., 1963 to 1974: Politics, Society, and Culture. (5-5-5)** Course 60A is enforced requisite to 60B, which is enforced requisite to 60C. Letter grading. **60A-60B.** Lecture, three hours; discussion, two hours. Interdisciplinary exploration of U.S. society from assassination of Kennedy to resignation of Nixon. Topics include civil rights, Great Society, anti-Vietnam war movement, political and artistic countercultures, and changes in technology, law, and the media. **60C.** Special Topics. Seminar, three hours. In-depth examination of political and cultural issues affecting U.S. society from 1963 to 1974.

**70A-70B-70C. Evolution of Cosmos and Life. (5-5-5)** Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. Letter grading. **70A-70B.** Lecture, three hours; discussion, two hours. Use of concept of evolution, as it applies to biological organisms, Earth, solar system, and the universe itself, to introduce students to both the life and physical sciences. Examination of evolution of the universe, galaxy, solar system, and Earth in course 70A; focus on evolution of life in course 70B. **70C.** Special Topics. Seminar, three hours. Examination in depth of various issues of evolution. Topics may range from creation of California's physical landscape to debate between evolution and creationism.

**80A-80B-80C. Frontiers in Human Aging: Biomedical, Social, and Policy Perspectives. (5-5-5)** Course 80A is enforced requisite to 80B, which is enforced requisite to 80C. Letter grading. **80A-80B.** Lecture, three hours; discussion, two hours. Examination of aging process from vantage points of multiple disciplines, including biology, psychology, sociology, ethics, and public policy. Study of biomedical and biological aging and psychological, social, and ethical implications of the phenomena. **80C.** Special Topics. Seminar, three hours. In-depth examination of gender and aging, cellular aging, cancer, and aging of the brain.

Werner H. Terjung, Ph.D.  
Benjamin E. Thomas, Ph.D.  
Norman J.W. Thrower, Ph.D.

### Associate Professors

Chi-Fun Cindy Fan, Ph.D.  
Marilyn N. Raphael, Ph.D.  
Yongkang Xue, Ph.D.

### Assistant Professors

Stephen A. Bell, Ph.D.  
Joshua S.S. Muldavin, Ph.D.  
Laurence C. Smith, Ph.D.

## Scope and Objectives

Geography is the study of the natural world and how humans have changed it. It examines the physical Earth and life on it, looking at the world's diverse cultures and economies and at the environmental problems they produce.

Geography addresses many issues about the contemporary world. Some are local, such as documenting the development of ethnic neighborhoods within Los Angeles. Others are regional, such as determining the best locations for nature reserves in California. Many are global, such as the study of greenhouse gases and how they affect climates, culture and resource issues in developing countries, and the impact of information technologies on people in different places.

The work of geographers often takes them out of the classroom into the field to collect information on topics that range from the settlement of new immigrants to the distribution of endangered species, the erosion of shorelines, and the location of high-tech businesses. On other occasions, geographers work in laboratories, using techniques such as the computer analysis of satellite photographs to look for changes in river courses and the computer modeling of shifts in global vegetation patterns and the distribution of human populations. Research is also conducted in libraries and archives, probing documentary sources on human interaction with the natural world and how that world is imagined.

Geography graduates have a wide variety of career opportunities because of their combination of geographical/environmental perspectives and technical skills. UCLA geography students have gone on to become university scholars, school teachers, members of governmental and nongovernmental planning, development, and conservation agencies, business executives, lawyers, and specialists in geographical information analysis for government

and private business. Because of its sophisticated focus on the relationship of the global to the local, geography is particularly useful for those who wish to pursue careers with an international focus.

The department has one of the top programs in the U.S. and offers two undergraduate majors that lead to the Bachelor of Arts degree: Geography and Geography/Environmental Studies. The Geography major combines a broad background in the field with specific tracks. The Geography/Environmental Studies major focuses on the impact of humans on the natural environment.

The department also offers M.A. and Ph.D. degrees. Student research projects are conducted in collaboration with a faculty adviser and advisory committee. Graduate students work in most major areas of geography and on projects around the world. Graduate alumni of the department have teaching positions at many leading universities in the U.S. and abroad.

## Undergraduate Study

### Geography B.A.

The Geography major allows students to combine a broad background in the field with more specific interests and career goals. Students can elect to concentrate in one of five different areas of geography. Majors consult with the undergraduate counselor and adviser to plan a program suitable to their personal objectives.

#### Preparation for the Major

*Required:* Geography 1, 2, 3, 4, M40. All courses must be taken for a letter grade.

#### Transfer Students

To be admitted as Geography majors, transfer students with 90 or more units must complete as many of the following courses as possible prior to admission to UCLA: one physical geography course, one biogeography course, one cultural geography course, one economic geography course, and one statistics course.

#### The Major

*Required:* Ten upper division geography courses taken for a letter grade, which must include (1) five courses from one of the Concentrations for the Major listed below, (2) three additional courses in at least two different concentrations, (3) one regions course from Geography 122, 135, 136, 137, 152, 156, 180, 181, 182A, 183, 184, 185, 186, 187, 190, 191, and (4) one procedures course (4 units) from 100A (2 units), 105A (2 units), 163, 167 (6 units), 168, 169, 170, M171.

#### Major Concentrations

By the end of the junior year and no later than the beginning of the senior year, students are required to declare their specific concentration by filing a statement with the undergraduate adviser. The purpose of the concentration requirement is to expose students to systematic in-depth work within a specific area of geography. Completion of a concentration requires

five upper division geography courses. Students must take a concentration's required course(s), if any, before declaring that concentration. They must select one of the following concentrations and meet its course requirements:

1. *Urban and Regional Development Studies:* Five courses from M128, 135, 148, 150, 152, 155, 157, 159A
2. *Spatial Demography and Social Processes in the City:* Course 142 and four courses from 143, 144, 146, 150, 156, 159B
3. *Culture and Environment in the Modern World:* Five courses from 133, 134, 135, 136, 138, 140, 152, 159C
4. *Physical Geography:* Courses 100, 100A, 104, 105, 105A, and two courses from 101, 103, 107, 159D
5. *Biogeography:* Five courses from 108, 111, 112, 116, 118, 122, 123, 159E, 163

#### Allied Fields

Students must develop some competence in an allied field. This requirement consists of at least two upper division courses selected from at least one of the following disciplines: Afro-American studies, anthropology, art history, Asian American studies, atmospheric sciences, biology, chemistry, Chicana and Chicano studies, communication studies, Earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology, women's studies. Urban Planning M190 is also acceptable. Other disciplines require departmental consent.

### Geography/Environmental Studies B.A.

The major in Geography/Environmental Studies develops and deepens students' understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major's uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as of implications of global change on local and regional human systems.

#### Preparation for the Major

*Required:* Geography 1, 2, 3, 4, 5, M40. All courses must be taken for a letter grade. Students are strongly advised to complete all requisites before beginning upper division work in the major. Counselors may suggest other recommended courses.

#### Transfer Students

To be admitted as Geography/Environmental Studies majors, transfer students with 90 or more units must complete as many of the following courses as possible prior to admission to UCLA: one physical geography course, one biogeography course, one cultural geography

course, one economic geography course, one people and ecosystems course, and one statistics course.

#### The Major

*Required:* Twelve upper division geography courses taken for a letter grade which must be distributed as follows: (1) *natural systems core* — two courses from 100, 103, 104, 105, 108, 112; (2) *human systems core* — two courses from 118, 133, 134, 140, 142, 148, 150; (3) *environmental studies cluster* — five courses from 107, 110, 116, 120, 121, 122, 123, 124, 125, 126, M128, 129, 131, 135, 136, 137; (4) *procedures* — two courses (8 units) from 100A (2 units), 105A (2 units), 163, 167 (6 units), 168, 169, 170, M171; and (5) *regions* — one course from 122, 135, 136, 137, 152, 156, 180, 181, 182A, 183, 184, 185, 186, 187, 190, 191.

Geography/Environmental Studies majors are advised to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

### Honors Program

To qualify for graduation with departmental honors in either major, students must have a cumulative grade-point average of 3.5 or better in at least five upper division geography courses and a 3.25 overall GPA, and complete Geography 199HA and 199HB with grades of A– or better. Contact the undergraduate advisers for further information.

### Computing Specialization

Majors in Geography and Geography/Environmental Studies may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, M171. Students graduate with a bachelor's degree in their major and a specialization in Computing.

### Geography Minor

The Geography minor is designed for students who wish to deepen and/or broaden their major program of study with a distinctive yet flexible program of courses encompassing the relationship between environment and society. The minor allows students to develop a coherent strategy for understanding and explaining the manner in which people and the Earth interact. Students have the opportunity to explore the origins, development, morphology, and processes of landscapes inherited from nature, as well as those institutions and cultural, economic, political, and social patterns associated with the human development, occupancy, organization, perception, and use of these landscapes.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1254 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

*Required Lower Division Courses (8 units):* Two courses from Geography 1, 2, 3, 4. Whenever possible the courses should be taken before attempting upper division courses.

*Required Upper Division Courses (20 units):* Three courses from one of the five Geography major concentrations (urban and regional development studies, spatial demography and social processes in the city, culture and environment in the modern world, physical geography, or biogeography) and two courses from outside the selected concentration.

All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

## Geography/Environmental Studies Minor

The Geography/Environmental Studies minor is intended for students interested in environmental issues and emphasizes a systems approach to gaining a causal understanding of major environmental problems facing our society and the world at large. The uniqueness of the minor lies in its geographical perspective on the impact, at various geographical scales, of human activity on natural systems and on the implications of global environmental change on local, regional, and global human systems.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1254 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

*Required Lower Division Courses (8 units):* Geography 5 and one course from 1, 2, 3, or 4. Whenever possible the courses should be taken before attempting upper division courses.

*Required Upper Division Courses (20 units):* Three courses from the environmental studies cluster specified within the major and two geography courses from outside the environmental studies cluster.

All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases,

even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Geography offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Geography.

## Admission

Applicants may apply in any quarter for admission to the M.A. or Ph.D. program.

Applicants must submit the *UCLA Application for Graduate Admission*, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of recommendation. Applicants are normally expected to have (1) completed the undergraduate major in geography or in a related field, (2) received a B.A. or B.S. degree, (3) attained at least a 3.3 grade-point average in courses taken in the junior and senior years in the major, (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies, and (6) for international applicants whose native language is not English, attained a passing score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. Exceptions to these guidelines may be considered for students whose records show other indications of unusual promise.

Applicants to the Ph.D. program usually are required to hold an M.A. or M.S. degree. Applicants must provide clear evidence of ability to conduct substantive research and to articulate ideas clearly in writing. In addition, a faculty member must be willing to serve as interim adviser. Under rare circumstances, students may proceed directly toward the Ph.D. degree without taking a master's degree. Students must have completed one year in the M.A. program, have three department faculty members review their dossiers and unanimously recommend such a course of action, and pass a four-hour qualifying examination set and evaluated by three faculty members competent in their area of specialization. The pass must be unanimous and receive the approval of at least two thirds of the voting faculty in a formal faculty meeting.

## Master's Degree

For areas of study, see Doctoral Degree.

The M.A. degree is offered through the thesis plan. Nine courses are required, including three core courses. Seven courses must be at the graduate level.

## Doctoral Degree

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, cultural/historical, population, and urban geography.

At the M.A. level students emphasize at least one of these specialized areas. The written qualifying examinations for the Ph.D. include one examination each in three of these fields selected by the student in consultation with an adviser. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students, in consultation with faculty, are expected to refine and deepen their research interests further within, across, and beyond these organized research and teaching areas.

The required core courses for the M.A. must be completed. At least three graduate geography courses in addition to the M.A. coursework are required, as are three upper division or graduate courses in one or two fields outside geography allied to the student's major research area or subdisciplinary specialization.

Written and oral qualifying examinations are required. The written examination consists of five written papers. Three papers pertain to three substantive fields of geographical inquiry in which the student is specializing, one general paper addresses the major issues, developments, and debates in the field at large, and one paper involves a field problem.

Following successful completion of the written qualifying examination, students prepare a dissertation proposal and take the University Oral Qualifying Examination, which focuses on the proposal.

## Geography

### Lower Division Courses

**1. Physical Environment. (4)** Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to the nature and distribution of landforms and climate.

**2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World. (4)** Lecture, three hours; discussion, 90 minutes. Study of Earth's biosphere, with particular reference to evolution and disturbance of plants, animals, and soils. P/NP or letter grading.

**3. Cultural Geography. (4)** Lecture, three hours; discussion, 90 minutes. Broad examination of basic cultural variables in human occupation of Earth's surface. Ecological, spatial, and historical approaches.

**4. Globalization: Regional Development and World Economy. (4)** Lecture, three hours; laboratory, one hour. Emergence of global economy and examination of its main characteristics, with focus on economic geography in attempting to understand spatial variation in distribution of all forms of human productive activity at different spatial scales. Students to have understanding of basic features of contemporary global space-economy and have a sense of its historical evolution at end of course. P/NP or letter grading.

**5. People and the Earth's Ecosystems. (4)** Lecture, three hours; laboratory, two hours. Examination of historical and contemporary roles of man as a major agent of biological change in Earth's ecosystems.

**M40. Introduction to Statistical Methods for Social Sciences. (5)** (Formerly numbered 40.) (Same as Anthropology M80, Sociology M18, and Statistics M12.) Lecture, four hours; discussion, one hour; laboratory, one hour. Elements of statistical analysis for social sciences. Presentation and interpretation of data, descriptive statistics, theory of probability and basic sampling distributions, statistical inference including principles of estimation and tests of hypotheses, introduction to regression and correlation. P/NP or letter grading.

**88A-88Z. Lower Division Seminars: Geography. (4 each)** Discussion, three hours; reading period, one hour. Seminars designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in department during previous term. P/NP or letter grading.

## Upper Division Courses

**100. Principles of Geomorphology. (4)** Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 100A. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations.

**100A. Principles of Geomorphology: Field and Laboratory. (2)** Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. P/NP or letter grading.

**101. Coastal Geomorphology. (4)** Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 101A. Study of origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seacliffs, and coral reefs, together with coastal zone management. P/NP or letter grading.

**101A. Coastal Geomorphology: Field and Laboratory. (2)** Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and seacliffs, together with coastal zone management.

**103. Paleoclimatology and Ice-Age Environments. (4)** Lecture, three hours; discussion, one hour. Requisite: course 1. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading.

**104. Climatology. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. P/NP or letter grading.

**105. Hydrology. (4)** Lecture, three hours; reading period, one hour. Corequisite: course 105A. Recommended: courses M40, 104. Designed for juniors/seniors. Role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Field projects required. P/NP or letter grading.

**105A. Hydrology: Field and Laboratory. (2)** Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in laboratory and make hydrologic measurements in the field.

**106. Applied Climatology: Physical Principles and Practice. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Exploration of knowledge and tools to solve complex problems in contemporary applied climatology, including current practices, influence of climate on environment, and human influence on changing climates. P/NP or letter grading.

**107. Soil and Water Conservation. (4)** Lecture, three hours; discussion, one hour. Requisite: course 1. Recommended: course 105 or 106 or Civil Engineering 150. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. P/NP or letter grading.

**108. World Vegetation. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Characteristics, distribution, environmental and cultural relationships of world's principal vegetation patterns. P/NP or letter grading.

**110. Population and Natural Resources. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of debate about environmental change and ability of the planet to maintain a growing population. Introduction and evaluation of basic demographic processes in context of food production, energy use, and environmental degradation. Discussion of major debates about use of resources in context of increasing population in developing countries and decreasing population in Western countries. P/NP or letter grading.

**111. Forest Ecosystems. (4)** Lecture, three hours; reading period, one hour; field trips. Requisites: course 2, Life Sciences 1. Designed for juniors/seniors. Evaluation of ecological principles as they apply to forests. Emphasis on constraints of physical environment, biotic interactions, succession, disturbances, and long-term environmental change. P/NP or letter grading.

**112. Analytical Animal Geography. (4)** Lecture, three hours; reading period, one hour. Requisites: courses 1, 2 or Life Sciences 1, M40. Designed for juniors/seniors. Analysis of processes of expanding and contracting distribution areas. Focus on island biogeography and its implications for biodiversity trends in natural and anthropogenic environments. P/NP or letter grading.

**M115. Environmentalism: Past, Present, and Future. (4 to 6)** (Same as Urban Planning CM189.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. P/NP or letter grading.

**116. Biogeography of Plant and Animal Invasions. (4)** Lecture, three hours; reading period, one hour. Requisite: course 1 or 2 or 5. Examination of theories and examples of invasion of new environments by plants and animals introduced through natural processes or by human activity. P/NP or letter grading.

**118. Medical Geography. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Examination of patterns of population/place/disease interactions and some effects of change and development on disease etiology and problems of health care.

**120. Conservation of Resources: North America. (4)** Requisites: courses 1, 2. Designed for juniors/seniors. Analysis of basic principles and problems associated with conservation of natural resources in the U.S. and Canada.

**121. Conservation of Resources: Underdeveloped World. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of principles and problems of conservation of natural resources of the underdeveloped world. P/NP or letter grading.

**122. Wildlife Conservation in Eastern and Southern Africa. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Designed for juniors/seniors. Analysis of tropical ecosystems of eastern Africa, including wildlife communities, vegetation, climate, and human impact. Discussion of national park systems and their natural and anthropogenic ecological dynamics. P/NP or letter grading.

**123. Bioresource Management. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 2, 5. Recommended: course M40. Designed for juniors/seniors. Theory and practice of management and conservation of bioresources. Introduction to wildlife management, endangered species conservation, and design and maintenance of National Parks and ecological reserves. P/NP or letter grading.

**124. Environmental Impact Analysis. (4)** Lecture, three hours; discussion, one hour. Preparation: two environmental studies cluster courses. Requisite: course M40. Introduction to interdisciplinary analysis of local and regional impacts on environmental systems. Evaluation of state and federal concepts for analysis of environmental impact. P/NP or letter grading.

**125. Health and the Global Environment. (4)** Lecture, three hours; reading period, one hour. Impact of the environment and lifestyle on individual health examined from a geographical perspective, with examples from both developed and developing countries. P/NP or letter grading.

**126. Geography of Extinction. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Designed for juniors/seniors. Geographic and taxonomic survey and analysis of biotic extinctions over the past 15,000 years. Identification of extinction factors and pathways through case studies of extinct and endangered species and communities. P/NP or letter grading.

**M127. Soils and Environment. (5)** (Same as Environment M127 and Organismic Biology M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

**M128. Global Environment and Development: Problems and Issues. (4)** (Same as Urban Planning CM128.) Lecture, three hours; discussion, one hour. Requisite: course 5. Designed for juniors/seniors. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. P/NP or letter grading.

**129. Seminar: Environmental Studies. (4)** Seminar, three hours; reading period, two hours. Preparation: one course each from natural and human systems cores, three environmental studies cluster courses. Limited to seniors. Qualitative/quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others). P/NP or letter grading.

**130. Geographical Discovery and Exploration. (4)** Lecture, three hours; reading period, one hour. Requisites: courses 1, 3. Designed for juniors/seniors. Survey of history of exploration, from earliest times to modern, with emphasis on period from Marco Polo to the present.

**131. Environmental Change. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of natural forces producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Increasing importance of human activity in environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

**132. Food, Environment, and Agriculture. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Historical and thematic orientation to agriculture revolutions and their role in environmental and cultural transformations in human history. P/NP or letter grading.

**133. Cultural Geography of the Modern World. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors and graduate students. Historical and structural approach to cultural geography of modern world system, with particular emphasis on structure and functioning of its core, semi-periphery, and periphery. P/NP or letter grading.

**134. Space, Place, and Nature in Western Thought. (4)** Lecture, three hours. Designed for juniors/seniors. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of science, knowledge, and inquiry. P/NP or letter grading.

**135. African Ecology and Development. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Overview of contemporary ecological and development issues in sub-Saharan Africa. P/NP or letter grading.

**136. Technology, Nature, and the American Landscape. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of evolution of cultural landscapes of the area that is now the U.S. Examination of past geographies and of geographical change through time. P/NP or letter grading.

**137. Historical Geography of American Environment. (4)** Lecture, three hours. Prerequisites: courses 1, 2. Designed for juniors/seniors. Study of systematic changes of natural environment in the U.S. during historical time, with emphasis on interplay between and among natural factors of climate, soils, vegetation, and landforms, and human factors of settlement, economic activity, technology, and cultural traits. P/NP or letter grading.

**138. Place, Identity, and Networked World. (4)** Lecture, three hours; reading period, one hour. Communication technologies, such as personal computers and Internet, seem to be connected to dramatic changes in identities of people, groups, and places. Exploration of those changes and their implications for social institutions and human values and practices. P/NP or letter grading.

**140. Political Geography. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Spatiality of political activity, spatial constitution of political power, control over space as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading.

**142. Population Geography. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relationships and selected case studies. P/NP or letter grading.

**143. Geography of Health Care. (4)** Lecture, three hours. Examination of geography of health care delivery and planning, focusing on factors which influence accessibility and utilization of health services by consumers. Spatial aspects of organization of health care influence who gets care where. P/NP or letter grading.

**144. Ethnicity in the American City. (4)** Lecture, three hours; reading period, two hours. Recommended preparation: course 142. Designed for juniors/seniors. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America, with focus specifically on nonwhite ethnic minorities (blacks, Hispanics, Asian Americans, and Native Americans). Use of a comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems these groups face in the contemporary American city. P/NP or letter grading.

**146. Gender, Race, and Geography of Employment in American Cities. (4)** Lecture, three hours; reading period, two hours. Designed for juniors/seniors. Geography of employment of men and women of different racial and ethnic backgrounds in American cities. Examination of interrelationships between space and division of labor, and spatial restructuring on employment of women and minorities. P/NP or letter grading.

**148. Economic Geography. (4)** Lecture, three hours; reading period, one hour. Prerequisite: course 4. Designed for juniors/seniors. Geographical aspects of economic production and growth. General theory of the space-economy. Land-use processes. Location of industry. Regional development. P/NP or letter grading.

**M149. Transportation Geography. (4)** (Same as Urban Planning M149.) Prerequisite: course 3 or 4. Designed for juniors/seniors. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

**150. Urban Geography. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of development, functions, spatial patterns, and geographic problems of American cities. P/NP or letter grading.

**152. Cities of Europe. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Urbanization of Europe, growth of city systems and internal spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of capital cities such as Rome, Paris, and Berlin. P/NP or letter grading.

**155. Industrial Location and Regional Development. (4)** Lecture, three hours. Prerequisite: course 4 or Economics 1 or 2 or 5 or 11. Designed for juniors/seniors. Reexamination of industrial location theory in light of contemporary theories of industrial organization and local labor markets. Consideration of empirical patterns of industrialization and regional growth, with special reference to Frostbelt/Sunbelt shifts and offshore relocation. P/NP or letter grading.

**156. Metropolitan Los Angeles. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

**157. Models of Regional Growth and Change. (4)** Lecture, three hours; reading period, one hour. Prerequisite: course 4. Recommended: course M40. Examination of empirical and theoretical issues of regional growth and change. Introduction to supply and demand-based models of regional development.

**159A-159E. Problems in Geography. (4 each)** Discussion, three hours; reading period, one hour. Preparation: completion of three courses in a concentration. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses within a concentration. P/NP or letter grading. **159A.** Urban and Regional Development Studies; **159B.** Spatial Demography and Social Processes in the City; **159C.** Culture and Environment in the Modern World; **159D.** Physical Geography; **159E.** Biogeography.

## Procedures

**163. Field Analysis in Biogeography. (4)** Fieldwork, eight hours. Prerequisites: courses 2, 5, 108, 112. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.

**166. Images of Earth: The World from Above. (4)** Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through the ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced the course of events. P/NP or letter grading.

**167. Cartography. (6)** Lecture, two hours; laboratory, six hours. Preparation: three courses from 1 through 5. Designed for juniors/seniors. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

**168. Introduction to Geographic Information Systems. (4)** Lecture, two hours; laboratory, two hours. Designed for juniors/seniors. Introduction to basic geographic information systems (GIS) concepts and spatial analysis. Data structures, topology, and attribute information. Laboratory exercises use database query, manipulation, and spatial analysis to address "real world" problems. P/NP or letter grading.

**169. Satellite Remote Sensing and Imaging Geographic Information Systems. (4)** Lecture, two hours; laboratory, one hour. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observing System satellites to land-use change, oceanography, meteorology, and environmental monitoring. Introduction to digital image-processing and imaging geographic information system (GIS) software. P/NP or letter grading.

**170. Advanced Geographic Information Systems. (4)** Lecture, three hours; discussion, one hour. Prerequisite: course 168. Introduction to full geographic information systems (GIS) functionality, using ARC/INFO on UNIX workstations. Spatial manipulation, query, and computation of datasets carried out in project-oriented approach. P/NP or letter grading.

**M171. Introduction to Spatial Statistics. (4)** (Formerly numbered 171.) (Same as Statistics M140.) Lecture, three hours; laboratory, one hour. Prerequisite: course M40. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

**172. Advanced Remote Sensing and Data Processing. (4)** Lecture, three hours; laboratory, one hour. Prerequisite: course 169. Digital processing methods for manipulating and analyzing image data. Topics include statistical description, geometric and radiometric correction, classification, image enhancement and filtering, and change detection schemes. Reinforcement of procedures presented in lecture with laboratory exercises and student project. P/NP or letter grading.

## Regions

**180. North America. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Delimitation and analysis of principal geographic regions of the U.S. and Canada. P/NP or letter grading.

**181. Mexico, Central America, Caribbean. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Middle America and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies. P/NP or letter grading.

**182A. Spanish South America. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Spanish South America and the contemporary economic and cultural geography of the individual Spanish-speaking countries. P/NP or letter grading.

**182B. Brazil. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary economic and cultural geography of Brazil. P/NP or letter grading.

**183. Europe. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Europe. P/NP or letter grading.

**184. Russia. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Russia and former Soviet lands. P/NP or letter grading.

**185. South and Southeast Asia. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

**186. Contemporary China. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People's Republic of China. Dynamics that have led to China's major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. P/NP or letter grading.

**187. Middle East. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

**190. Australasia. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Regional synthesis of physical and cultural features which characterize Australia, New Zealand, and the islands of the South Pacific. P/NP or letter grading.

**191. California. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic and regional treatment of geography of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

## Special Studies

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to juniors with a B average in the major or seniors.

**199HA-199HB. Honors in Geography I, II. (4-4)** Tutorial, to be arranged. Preparation: 3.25 grade-point average overall, at least five upper division geography courses with a 3.5 grade-point average. **199HA.** Independent study course taught by team of two faculty members who assist student with bibliographic research and/or field research on a topic of mutual interest to student and the faculty members. Successful completion of course 199HA entails preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for writing of a substantial paper during course 199HB. If that work is determined to be of A quality, student is allowed to continue in honors program. If that work is graded B or below, credit is awarded, but student is not permitted to continue in honors program. **199HB.** Devoted to writing of substantial paper researched and outlined in course 199HA. It also is evaluated by the two faculty members. If paper is determined to be of A quality, student graduates with honors in geography. If paper is graded B or below, credit is awarded, but student does not receive honors.

**199I. Independent Studies for Internships. (2 to 4)** Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by placement for which student is doing internship. May not be applied toward major requirements. P/NP grading.

## Graduate Courses

### Environment

**200. History and Paradigms of Geomorphology. (4)** Lecture, two hours; discussion, one hour; reading period, eight hours. Preparation: two courses from 101, 103, 105, 107. Requisite: course 100. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu.

**201. Coastal Geomorphology Seminar. (4)** Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit.

**202. Fluvial Geomorphology Seminar. (4)** Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

**203. Glacial Geomorphology Seminar. (4)** Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

**204A-204B-204C. Advanced Climatology. (4)** Lecture, three hours; laboratory, one hour. Preparation: first year of calculus and acquaintance with FORTRAN IV. Requisite: course 104. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.

**205. Seminar: Climatology. (4)** Discussion, three hours; reading period, one hour. Requisites: courses 204A, 204B, 204C. Selected topics. May be repeated for credit.

**206. Introduction to Biophysical Modeling of Land Surface Processes. (4)** Lecture, two hours; laboratory, one hour; reading period, one hour. Designed for graduate students. Presentation of introductory knowledge for graduate students to understand nature, principles, and scope of biophysical modeling of land surface processes, including ideal canopy model, radiation, heat and CO<sub>2</sub> fluxes transfer, and satellite data application. Laboratory sessions included. S/U or letter grading.

**208. Advanced Biogeography: Plants. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisites: courses 108, and 110 or 116. Intensive review and analysis of physical and cultural factors influencing plant distributions.

**212. Advanced Biogeography: Animals. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 112. Intensive review and analysis of biophysical and cultural factors influencing animal distributions. S/U or letter grading.

**213. Seminar: Biogeography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 208 or 212. Related research projects growing out of course 208 or 212. May be repeated for credit.

**215. Quaternary Studies: Physical Aspects. (4)** Discussion, three hours; reading period, two hours; fieldwork, three hours. Preparation: at least one course from 200 through 205 or an appropriate graduate course in atmospheric sciences or Earth and space sciences. Analysis of the changing physical environment of the Quaternary period. May be repeated for credit.

**217. Quaternary Studies: Ecological Aspects. (4)** Discussion, three hours; reading period, two hours. Requisites: courses 202 or 204A, 204B, and 204C or 208 or 212 or an appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology. Analysis of ecological aspects of environmental change during the Quaternary period. May be repeated for credit.

**218. Advanced Medical Geography. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 118. In-depth study of selected topics in medical geography and intense review of recent research.

**223. Seminar: Humid Tropics. (4)** Seminar, three hours; reading period, two hours. Designed for graduate students. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

**M229. Resource-Based Development. (4)** (Same as Urban Planning M234C.) Discussion, three hours. Recommended preparation: Urban Planning 234A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

### Human Geography

**230. Political Ecology. (4)** Seminar, three hours; reading period, three hours. Designed for graduate students. Exploration of theoretical constructs and approaches to analyses of development and the environment associated with political ecology. Examination of relations between poverty, ecological degradation, and global restructuring. Case studies of changing production organization and ecology of land-use patterns within different and emergent economic and political contexts. S/U or letter grading.

**231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice. (4)** Discussion, three hours; reading period, three hours. Designed for graduate students. Deconstruction of oft-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Attempt to reconstruct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

**232. Advanced Cultural Geography. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 133. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

**233. Seminar: Cultural Geography. (4)** Seminar, three hours; reading period, two hours. Requisite: course 232. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. S/U or letter grading.

**234. Environment and Subsistence in Indigenous Cultures. (4)** Seminar, three hours. Discussion on resource management strategies and environmental issues in indigenous cultures. Topics vary from year to year.

**237. Seminar: Historical Geography. (4)** Seminar, three hours; reading period, two hours. Theory and practice of historical geography in North America and Europe. May be repeated for credit. S/U or letter grading.

**240. Advanced Political Geography: Geopolitics. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Intensive study of theories and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.

**241. Seminar: Political Geography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 240. Related research projects growing out of course 240. May be repeated for credit.

**242. Advanced Population Geography. (4)** Lecture, three hours; reading period, one hour. Requisite: course 142. Study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology.

**244. Topics in Spatial Demography. (4)** Discussion, three hours; reading period, two hours. Selected topics in migration and mobility, especially the nature of housing choice and neighborhood change. May be repeated for credit. S/U or letter grading.

**248. Location and Space Economy. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading.

**249. Seminar: Economic Geography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 248. Related research projects growing out of course 248. May be repeated for credit.

**250. Urban Systems. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and size distribution of cities. S/U or letter grading.

**251. Seminar: Urban Geography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 250. Related research projects growing out of course 250. May be repeated for credit.

**254. Migration and Residential Mobility. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Description and modeling of national, regional, and intra-urban migration.

### Procedures

**260. Advanced Field and Laboratory Analysis in Geomorphology. (4)** Laboratory/fieldwork, 10 hours. Preparation: two courses from 200, 201, 202, 203, 215. Designed for graduate students. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.

**262. Advanced Field Analysis: Biogeography. (8)** Fieldwork, 10 hours. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

**268. Advanced Projects in Geographic Information Systems (GIS)/Remote Sensing. (4)** Discussion, one hour; laboratory, three hours. Recommended requisite: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image processing package expected. Individualized research projects conducted on UNIX platforms within a structured course environment. All aspects of a modest but original project, including data acquisition, ingestion, and analysis; interpretation of results and presentation in publication-style format.

**269. Remote Sensing of Environment. (4)** Laboratory, three hours; independent study, two hours. Requisite: course 167. Study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural complex.

**M270A-M270B-M270C. Seminars: Climate Dynamics. (2 to 4 each)** (Same as Atmospheric Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

**M272. Spatial Statistics. (4)** (Same as Urban Planning M215.) Lecture, two hours; discussion, one hour; laboratory, one hour. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

## Regions

**282. South America. (4)** Seminar, three hours; reading period, two hours. Introduction to main issues in geography of South America, with focus mainly on cultural/historical geographical perspectives on the national period; themes and periods can be adapted to individual interests. S/U or letter grading.

**283. Europe. (4)** Seminar, two hours; discussion, two hours. Requisite: course 183. May be repeated for credit. S/U or letter grading.

**286. Geography of Contemporary China. (4)** Seminar, three hours; reading period, two hours. Designed for graduate students. May be repeated for credit. S/U or letter grading.

**292. Advanced Regional Geography: Selected Regions. (4)** Lecture, three hours; discussion, one hour. Preparation: appropriate upper division regional course. Lecture series devoted to a specific region at discretion of instructor. May be repeated for credit.

## Seminar

**295. Seminar: Geographic Thought. (4)** Discussion, three hours; reading period, two hours. Designed for graduate students. Discussion and study of topics significant to growth of modern philosophy of geography.

## Core Courses

**298A. Philosophical Issues in Geographical Inquiry. (4)** Lecture, three hours. Discussion of geographical research within context of philosophical debates concerning the nature of scientific inquiry.

**298B. History of Modern Geography. (4)** Lecture, three hours; reading period, one hour. Evolution of the field of geography in the 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as a modern academic discipline.

**298C. Statistical Methods for Geographic Research. (4)** Lecture, three hours; laboratory, two hours. Requisite: course M171. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Geography. (2)** Seminar, one hour; laboratory, three hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** May be repeated for credit. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 8)** Independent study. May be repeated for credit. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (2 to 8)** Independent study. May be repeated for credit. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 8)** Independent study.

### Professors

Ehrhard Bahr, Ph.D.  
Jesse L. Byock, Ph.D.  
Andrew R. Hewitt, Ph.D.  
Robert S. Kirsner, Ph.D.  
Kathleen L. Komar, Ph.D.  
Wolfgang Nehring, Ph.D.  
James A. Schultz, Ph.D.  
Hans Wagener, Ph.D.

### Professors Emeriti

Franz H. Bäuml, Ph.D.  
Marianna D. Birnbaum, Ph.D.  
Kenneth Chapman, Ph.D.  
Carl W. Hagge, Ph.D.  
William J. Mulloy, Ph.D.  
Victor A. Oswald, Jr., Ph.D.  
Erik Wahlgren, Ph.D.  
Donald J. Ward, Ph.D.  
Terence H. Wilbur, Ph.D.

### Associate Professor

Jill Anne Kowalik, Ph.D.  
Christopher M. Stevens, Ph.D.

### Lecturer

Astrid Klocke, Ph.D.  
Jutta Landa, Ph.D.

## Scope and Objectives

The Department of Germanic Languages offers an extraordinary array of courses in languages, literatures, and cultures. This broad range of studies offers training in specialized fields such as film, linguistics, folklore, and critical theory. Courses prepare students for a variety of careers, including law, business, international relations, academic professions, and publishing.

Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. Refer to the Scandinavian Section later in this catalog for information about the degrees in Scandinavian studies.

At all levels of study various specializations are possible. Language, literature, and culture studies are available in Afrikaans, Dutch, Old Norse, and Icelandic, in addition to German. The program also provides opportunity for study, work-study, and internships in a German-speaking country or in a country related to the course of study.

## Undergraduate Study

### Grammar/Composition Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Afrikaans, Dutch, German, and Old Norse grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

## German B.A.

### Preparation for the Major

*Required:* German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed one year of college-level German language courses should enroll in course 4. Students who are in doubt as to their level of language proficiency or who are native speakers should consult the language program supervisor. Students in Plan C must also take Linguistics 20.

### Transfer Students

To be admitted as German majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of German.

### The Major

Three plans are offered by the department:

#### Plan A: Literature and Culture

Plan A is designed for students who are interested in studying German language and thought by selecting courses in literature, film, folklore, and contemporary culture studies.

*Required:* German 130A, 130B, and 11 upper division German courses, at least three of which must be at the 150 level or above. Two of the 11 courses may be upper division courses in other departments. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Students may take up to two courses from the 120 series or below in satisfaction of major requirements. Two additional courses from the 120 series or below may be selected if students elect not to take courses in other departments. All courses must be taken for a letter grade.

#### Plan B: German Studies

Plan B is designed for students whose interests are primarily interdisciplinary in nature. Departmental majors receive credit not only for upper division courses in German literature, film, folklore, and contemporary culture, but for courses in related fields such as history, political science, philosophy, music, and others.

*Required:* German 130A, 130B, seven upper division German courses (at least two of which must be at the 150 level or above), and four upper division courses in a related field or fields selected in consultation with the undergraduate adviser. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Only two such contract courses may be applied toward the major. All courses must be taken for a letter grade.

#### Plan C: Germanic Languages/Linguistics

Plan C is intended for students interested in the study of languages and linguistics and al-

# GERMANIC LANGUAGES

*College of Letters and Science*

UCLA  
212 Royce Hall  
Box 951539  
Los Angeles, CA 90095-1539  
(310) 825-3955

lows students to study more than one Germanic language.

*Required:* German 130A, 130B, 150, 170, C172, and eight additional upper division courses as follows: three courses in one other Germanic language (Scandinavian languages taught in the Scandinavian Section may be applied by petition to the undergraduate adviser), three linguistics courses from outside the department (i.e., anthropology, applied linguistics, linguistics, sociology) selected in consultation with the undergraduate adviser, and two electives from department offerings (excluding German 100A, 100B, 100C, and courses taught in English translation). All courses must be taken for a letter grade.

## Honors Program

To qualify for graduation with departmental honors, students must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

## Single Subject Credential in German

Students desiring the single subject credential in German should consult the Department of Education, 1009 Moore Hall (310-825-8328), and the Department of Germanic Languages.

## German Minor

To enter the German minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* German 5 and 6 or equivalent.

*Required Upper Division Courses (20 units):* Any five German courses (excluding German literature in translation).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Germanic Languages Minor

To enter the Germanic Languages minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses (28 units):* Seven courses in any of the following languages and literatures: Afrikaans, Dutch, German (excluding German literature in translation), Hungarian, Old Norse, Scandinavian languages, Yiddish.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Germanic Languages offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Germanic Languages and Master of Arts (M.A.) degree in Scandinavian (see Scandinavian Section).

### Admission

Though a bachelor's degree in German, Germanic linguistics, or linguistics with a minor in German and a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is preferred for admission to the M.A. program, the department accepts students from a variety of undergraduate backgrounds. Applicants with deficiencies in undergraduate preparation are considered but if admitted are required to take remedial courses, as recommended by the graduate adviser. Three letters of recommendation are required. Graduate Record Examination (GRE) scores are required from applicants from the U.S. and other English-speaking countries.

In addition to these requirements, an M.A. degree in German or a Germanic language from an accredited U.S. institution is required for admission to the Ph.D. program. Also acceptable are European degrees such as German or Austrian *Staatsexam*, a German or Austrian *Magister*, or a Swiss *Lizenziat*. A German *Zwischenprüfung* is not acceptable. In the case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to taking the qualifying examinations.

Applicants with an M.A. in fields other than German (for example, in Comparative Literature or in Linguistics) are required to pass the written part of the M.A. comprehensive examination in German or Scandinavian, as applicable, within three quarters after admission to the department.

### Master's Degree

The M.A. degree is offered through the comprehensive examination and thesis plans. There are three M.A. plans that differ with respect to course requirements and comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are in literature,

culture, or German studies and who plan to proceed toward the Ph.D. Plan C is for students whose main interests are in German linguistics and who plan to proceed toward the Ph.D.

A minimum of nine upper division and graduate courses are required, of which at least six must be graduate-level courses. Course requirements differ by plan. Graduate students are expected to attend and participate in departmental lectures and colloquia.

There is a language requirement for this degree.

## Doctoral Degree

Ph.D. students must complete eight graduate courses (at least four in the department) beyond the M.A. degree, three of which are seminars. If students have already taken a seminar in preparation for their M.A. degree, only two of the eight courses must be seminars.

Written and oral qualifying examinations are required. Students in literature, culture, and German studies are expected to cover six different areas: one author, one genre, one period, one theoretical or historical problem, and two special topics of their choosing. Students in linguistics complete an examination in five target languages and a second examination in linguistic theory.

Students in Old Norse are examined in language, in theoretical problems of interpretation, and on issues concerning social and historical context. Students in Scandinavian complete an examination in their major Scandinavian literature and a second examination in the other two Scandinavian literatures. Alternatively, students in literature may choose to cover the six areas in three examinations, each of which is devoted to two of the six areas they have chosen.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Afrikaans

### Upper Division Courses

**105A. Elementary Afrikaans. (4)** Lecture, four hours; language laboratory. Introduction to a sister language of modern Dutch and a national language of South Africa. Grammar, practice in listening, speaking, reading, and writing. P/NP or letter grading.

**105B. Intermediate Afrikaans. (4)** Lecture, four hours; language laboratory. Requisite: course 105A. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources. P/NP or letter grading.

**114. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Preapartheid to Postapartheid Era, in English Translation. (5)** Lecture, four hours. Development of all literature in Afrikaans, with special attention to authors and poets who protested apartheid — Brink, Breytenbach, Van Heerden, Jonker, Joubert, Krige, Krog, Leroux, Rabie, Small, and Willemsse. Additional readings by Coetzee, De Lange, Krog, and others on censorship, imprisonment, South African history, and postcolonial literary theory. Letter grading.

**135. Introduction to Afrikaans Literature. (4)** Discussion, three hours. Requisite: course 105B. Analysis of selected works from founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Leroux and Brink, as well as work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breytenbach. P/NP or letter grading.

**199. Special Studies in Afrikaans. (2 to 4)** Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. Letter grading.

## Graduate Courses

**596. Directed Individual Study or Research in Afrikaans. (4)** Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** Tutorial, to be arranged with instructor (see department for I.D. number). S/U grading.

## Dutch

### Upper Division Courses

**100. Modern Dutch Culture and Society. (4)** Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch government (including 'Pillarization' — *verzuijing*), the two World Wars, housing policy, mass media, and rise of a multiracial society. Letter grading.

**103A-103B. Elementary Dutch. (4-4)** Lecture, four hours; language laboratory. Course 103A is requisite to 103B. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. P/NP or letter grading.

**103C. Intermediate Dutch. (4)** Lecture, four hours; language laboratory. Requisite: course 103B. Grammatical exercises, conversation, reading and analysis of simple texts. P/NP or letter grading.

**104A-104B. Accelerated Dutch. (6-6)** Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A, 103B, 103C in two terms rather than three. Letter grading.

**113. Modern Dutch and Flemish Literature in Translation. (4)** Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Mulisch, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaïjen, and Vroman. Letter grading.

**120. Introduction to Dutch Studies. (4)** Lecture, three hours. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century Neerlandistiek. P/NP or letter grading.

**131. Introduction to Modern Dutch Literature. (4)** Discussion, three hours. Requisite: course 103B or 120. Selected works of literature of the Netherlands and northern (Flemish) Belgium from the mid-1850s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist *Beweging van Tachtig* and the post-War *Beweging van Vijftig*. P/NP or letter grading.

**199. Special Studies in Dutch. (2 to 4)** Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. Letter grading.

## Graduate Courses

**596. Directed Individual Study or Research in Dutch. (4)** Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** Tutorial, to be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## German

### Lower Division Courses

**1. Elementary German. (4)** Lecture, five hours; laboratory, one hour. P/NP or letter grading.

**1G. Elementary German for graduate students. (4)** Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

**2. Elementary German. (4)** Lecture, five hours; laboratory, one hour. Enforced requisite: course 1. P/NP or letter grading.

**2G. Elementary German for Graduate Students. (4)** Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

**3. Elementary German. (4)** Lecture, five hours; laboratory, one hour. Enforced requisite: course 2. P/NP or letter grading.

**3G. German for Graduate Students. (4)** Reading and translation, three hours. Requisite: course 2G. Preparation for Graduate Division foreign language reading requirement. Intensive reading and translation of humanities and social sciences texts. May not be applied toward degree requirements. S/U grading.

**4. Intermediate German. (4)** Lecture, five hours; laboratory, one hour. Enforced requisite: course 3. P/NP or letter grading.

**5. Intermediate German. (4)** Lecture, four hours; laboratory, one hour. Enforced requisite: course 4. P/NP or letter grading.

**6. Intermediate German. (4)** Lecture, four hours; laboratory, one hour. Enforced requisite: course 5. P/NP or letter grading.

**8. Elementary German: Intensive. (12)** Lecture, 15 hours; laboratory, five hours. Intensive basic course in German equivalent to courses 1, 2, and 3. P/NP or letter grading.

**10. Intermediate German: Intensive. (12)** Lecture, 20 hours; laboratory, four hours. Enforced requisite: course 3. Intensive intermediate course in German equivalent to courses 4, 5, and 6. P/NP or letter grading.

**12. German Conversation. (4)** Discussion, three hours. Enforced requisite: course 3. Conversation course designed for intermediate and advanced students who wish to improve their spoken command of the language. Topics of current student interest to be used as basis for conversation. P/NP or letter grading.

**50A-50B. Great Works of German Literature in Translation. (4-4)** Lecture, three hours. May not be applied toward completion of the major in German. P/NP or letter grading:

**50A. Medieval Period through Classicism. (4)** Lecture, three hours. Study and analysis of selected masterworks in English translation, including works from the earliest period, such as the heroic and courtly epic, to authors such as Grimmshausen, Lessing, Schiller, and Goethe. P/NP or letter grading.

**50B. Romanticism to the Present. (4)** Lecture, three hours. Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffmann, Heine, Fontane, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, and Christa Wolf. P/NP or letter grading.

**55. The City as Text: German Exile Culture in Los Angeles. (4)** Lecture, three hours. Cultural and historical exploration of exile as site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

**60W. War. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Reflection on cultural history of war — on its significance from anthropological, cultural, and philosophical perspectives rather than from perspective of political and historical gains and losses. Emphasis on World War I, a war in which political and military confrontation seemed particularly attuned to a sense of confrontationalism and scandal in cultural life. Satisfies Letters and Science Writing II requirement. Letter grading.

**62W. Technoscience and German Culture. (5)** Seminar, four hours. Enforced requisite: English Composition 3 or 3H. Various responses in German culture to challenges presented by technology and science. From Romanticism to critical theory and postmodernism, from Schiller and Nietzsche to Habermas and Wolf, strands of German intellectual tradition provide illuminating contrasts to American context. Satisfies Letters and Science Writing II requirement. Letter grading.

**70. Origin of Language. (4)** Lecture, three hours. Theoretical and methodological issues surrounding origin of language. Topics include theory of evolution, evolution of man, how language is organized in the brain, and science of language, in particular physiology of speech, phonetics, and comparative reconstruction. Letter grading.

**88. Lower Division Seminar. (4)** Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

### Upper Division Courses

**100A. German History and Culture before 1500. (4)** Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of German culture and society from the beginning to 1500 as represented in literature, art, and architecture. P/NP or letter grading.

**100B. German History and Culture from 1500 to 1914. (4)** Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of German culture and society as represented in literature, art, music, and architecture from Reformation and invention of printing to start of World War I. P/NP or letter grading.

**100C. German History and Culture from 1914 to the Present. (4)** Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German culture and society as represented in literature, art, music, and architecture from 1914 to the present. P/NP or letter grading.

**102A. German Film in Cultural Context: Early German Film. (4)** (Formerly numbered 121B.) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film between 1919 and 1945. Analysis of technological and stylistic development of film from silent Expressionist films to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.

**102B. German Film in Cultural Context: New German Film. (4)** (Formerly numbered 121C.) Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film since 1960 in its thematic and stylistic diversity. Films authored by Werner Herzog, Fassbinder, and Margarethe von Trotta are juxtaposed with commercial comedies of the 1990s. Film discussions enhanced by interactive media. Letter grading.

**M104. Tristan, Isolde, and History of Heterosexuality. (4)** (Formerly numbered M119K.) (Same as Women's Studies M119.) Lecture, three hours. German, French, and English versions of Tristan and Isolde story from Middle Ages to the 20th century. Particular attention to relation between representation of "heterosexual" love in each text and contemporaneous ideas about human sexuality. P/NP or letter grading.

**106. The Faust Tradition from the Renaissance to the Modern Age. (4)** (Formerly numbered 119C.) Lecture, three hours. Readings and discussions of the Faust theme in European literature and intellectual history, including chapbook of *Doktor Faustus*, Marlowe's and Goethe's dramas, and Thomas Mann's and Bulgakow's novels. Letter grading.

**M108. Love and Sex in German Literary Tradition.**

(4) (Formerly numbered 108.) (Same as Women's Studies M108.) Lecture, three hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

**110. Nietzsche and Critique of Western Culture.**

(4) (Formerly numbered 118.) Lecture, two hours; discussion, one hour. Readings that focus on Nietzsche's critique of Christianity, master/slave dynamic, and reciprocal relation between poetry and philosophy. German majors required to complete all readings in German. Letter grading.

**112. Jewish Writing and Thought in German Culture from 1755 to the Present.**

(4) (Formerly numbered 119F.) Lecture, three hours. Analysis of works that represent process of Jewish assimilation, disenfranchisement, and extermination, including authors such as Mendelssohn, Heine, Kafka, Paul Celan, Nelly Sachs, Anne Frank, and others. Letter grading.

**114. German Exile Culture in Los Angeles.**

(4) Lecture, three hours. Cultural and historical exploration of exile as site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

**116. Special Topics in Modern Literature and Culture.**

(4) (Formerly numbered 119E.) Lecture, three hours. Content varies with instructor and may include works by authors such as Thomas Mann, Rilke, Kafka, Brecht, Christa Wolf, and others. May be repeated for credit. Letter grading.

**118. Feminist Issues in German Literature and Culture.**

(4) (Formerly numbered 121E.) Lecture, three hours. Analysis of major issues in German feminism today (e.g., status, creative work, and reception of women writers in various periods such as Romanticism, Fascism, and/or divided/unified Germanies). Letter grading.

**120. German Folklore.**

(4) (Formerly numbered 134.) Lecture, three hours. Survey of various folklore genres in cultural context, including legends, proverbs, and cultural enactments such as carnival. Letter grading.

**M122. Fairy Tales in Literature and Society.**

(5) (Formerly numbered M119I.) (Same as Folklore M119.) Lecture, four hours. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimms' tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. Letter grading.

**130A-130B. Conversation and Composition on Contemporary German Culture and Society I, II.**

(4-4) (Formerly numbered 108A-108B.) Lecture, three hours. Requisite: course 6. Course 130A is requisite to 130B. Structured around themes as they emerge in contemporary German texts ranging from news magazine articles to literature, with emphasis on speaking and writing proficiency. Presentation software featured. P/NP or letter grading.

**132. Business German.**

(4) (Formerly numbered 102.) Lecture, three hours. Requisite: course 6. Specialized language course that teaches German business administration, practices, and correspondence, with attention to cultural nuances. Ongoing developments in European Union analyzed via newspaper articles and the Internet. P/NP or letter grading.

**134. Advanced German Language through Cultural History and Current Affairs.**

(4) (Formerly numbered 128.) Lecture, three hours. Requisites: courses 130A, 130B. Advanced German language course that juxtaposes cultural history with current affairs to teach complex speaking and writing skills of interpretation, analysis, and criticism. Readings may include selections from Luther, Heine, Freud, and current authors. Students create their own interactive media presentations. Letter grading.

**136. Theory and Practice of Translation.**

(4) (Formerly numbered 103.) Lecture, three hours. Requisite: course 130B with a grade of B or better. German/English and English/German translation of literary texts, popular press articles, and business documents, with attention to issues of style. Letter grading.

**140A. Introduction to German Poetry.**

(4) (Formerly numbered 101A.) Lecture, three hours. Close reading of representative examples of German lyric poetry from early as well as recent literary periods, including systematic consideration of poetic conventions and forms, diction, imagery, symbolism, and metrics. Letter grading.

**140B. Introduction to German Drama.** (4) (Formerly numbered 101B.) Lecture, three hours. Analysis of selected dramatic genres (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, historical drama, etc.), including systematic review of dramatic forms, techniques, and theories. Texts selected from both contemporary and earlier periods. Letter grading.

**140C. Introduction to German Narrative Prose.**

(4) (Formerly numbered 101C.) Lecture, three hours. Analysis of narrative prose genres (e.g., short story, novella, fairy tales, etc.), including systematic review of narrative forms, techniques, and styles. Texts selected from both contemporary and earlier periods. Letter grading.

**142. Introduction to 18th-Century Studies.**

(4) (Formerly numbered 104.) Lecture, three hours. Topics in Enlightenment literature, social history, and culture. Works by Goethe, Lessing, Schiller, Kant, Mozart, and others. Letter grading.

**144. Introduction to 19th-Century Studies.**

(4) (Formerly numbered 105.) Lecture, three hours. Presentation of major texts from Romanticism to realism. Works by Kleist, Büchner, Heine, Fontane, and others. Letter grading.

**146. Introduction to Modern Literature.**

(4) (Formerly numbered 106.) Lecture, three hours. Analysis of selected modern works written between 1890 and 1945, including texts by authors such as Thomas Mann, Kafka, Rilke, Brecht, and others. Letter grading.

**148. Introduction to Contemporary Literature.**

(4) (Formerly numbered 107.) Lecture, three hours. Analysis and discussion of German, Austrian, Swiss, and ex-GDR literatures from 1945 to the present. Examination of writers such as Heinrich Böll, Günther Grass, Friedrich Dürrenmatt, Elfriede Jelinek, and Christa Wolf with a view to their specific political and cultural context. Letter grading.

**150. Language and Linguistics.**

(4) (Formerly numbered 129.) Lecture, three hours. Requisite or corequisite: course 130A. Theories and methods of linguistics, with emphasis on structure of modern standard German, its phonology, morphology, syntax, semantics, and pragmatics. Other topics include diachronic, spatial, and social variation of German (i.e., its historical development, dialectology, and sociolinguistic dimensions). Letter grading.

**152. Studies in German Literature before 1750.**

(4) (Formerly numbered 122.) Lecture, three hours. Requisite: course 140A. Readings and analysis of major works from the Middle Ages to the baroque. Letter grading.

**154. Goethe.**

(4) (Formerly numbered 123.) Lecture, three hours. Requisite: course 130A. Reading and discussion of representative works (except *Faust*) from Goethe's early period through maturity and old age. Letter grading.

**156. Goethe's *Faust*.**

(4) (Formerly numbered 132.) Lecture, three hours. Requisite: course 130A. Detailed interpretation of Goethe's major work, Parts I and II, together with general consideration of other treatments of the *Faust* theme in European literature. Letter grading.

**158. Romanticism.**

(4) (Formerly numbered 124.) Lecture, three hours. Requisite: course 130A. Reading and analysis of major works by German Romantics, including Friedrich Schlegel, Novalis, E.T.A. Hoffmann, and Eichendorff. Letter grading.

**160. Advanced Study of Modern Literature.**

(4) (Formerly numbered 126.) Lecture, three hours. Requisite: course 130A. Naturalism, Expressionism, and other early 20th-century literary movements and works. Letter grading.

**162. Advanced Study of Contemporary Literature and Culture.**

(4) (Formerly numbered 127.) Lecture, three hours. Requisite: course 130A. Literature after 1945 in German-speaking countries, including issues such as national borders, ethnic identity, gender relations, and commercialization of culture. Letter grading.

**170. Current Topics in Germanic Linguistics.**

(4) (Formerly numbered 137.) Lecture, three hours. Requisite: course 130A. In-depth investigation of one topic in field of Germanic linguistics, such as phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. Letter grading.

**C172. Linguistic Theory and Grammatical Description.**

(4) (Formerly numbered C138.) Lecture, three hours. Requisite: course 150 or Linguistics 20. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C238. Letter grading.

**190. Undergraduate Seminar.**

(4) Seminar, three hours. Required of all German majors who are candidates for general secondary instructional credential. Content varies by instructor and may include advanced work in folklore, film, and German studies. Letter grading.

**195. Senior Thesis Course.**

(4) Extensive reading, research, and writing of senior thesis. May be used for writing honors thesis.

**199. Independent Studies.**

(2 to 4) Tutorial, to be arranged with faculty member who directs the study (course section to be identified using departmental code number — see department for appropriate faculty code). Course for students who desire more intensive or specialized investigation of material covered in a regular course. Letter grading.

## Graduate Courses

**201A. Bibliography, Research Methods, and Scholarly Writing.**

(4) Lecture, three hours. Introduction to current state of advanced research and analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and special attention to online resources. Practical exercises in analysis of sources, compilation and presentation of bibliographies, and writing of research papers. Letter grading.

**201C. Theories of Literary Interpretation.**

(4) Lecture, three hours. Advanced analysis and discussion of various models of literary interpretation and schools of thought such as hermeneutics, psychoanalytic criticism, social historical approaches, semiotics, structuralism, and post-structuralism. Topics vary with instructor. Letter grading.

**202A. Middle High German.**

(4) Lecture, three hours. Introduction to Middle High German language, with particular emphasis on developing facility in reading. Study of grammar, syntax, and vocabulary combined with introduction to poetic forms and cultural context. Letter grading.

**202B. Readings in Middle High German Literature.**

(4) Lecture, three hours. Introduction to medieval German literature and literary history and to use of contemporary theory in study of medieval texts. Continued practice in reading Middle High German, although most texts to be read in modern translation. Letter grading.

**204. Early Modern German Literature.**

(4) (Formerly numbered 205.) Lecture, three hours. Selected readings from 1500 to 1700, with introduction to development of German as a modern literary language and to literary genres and cultural models. Impact of Thirty Years' War on German literary production and reception in German baroque. Letter grading.

**206. Studies in Enlightenment Literature and Culture.**

(4) (Formerly numbered 206A, 206B.) Lecture, three hours. Analysis of major 18th-century German texts from philosophic, social-historical, psychohistorical, and literary perspectives. Letter grading.

**207. Weimar Classicism.**

(4) (Formerly numbered 207A, 207B.) Lecture, three hours. Reading and interpretation of major works of German classicism. May include problems in reception of classicism by later authors and cultural theorists. Letter grading.

**208. Romanticism.**

(4) Lecture, three hours. Analysis of selected works and theories of German Romantics such as Friedrich Schlegel, Novalis, and Hoffmann, with attention to relationship between Romanticism and other periods. Letter grading.

**209A. 19th-Century Lyrics.**

(4) Lecture, three hours. Discussion and analysis of lyric poetry from the classic/Romantic period through symbolism. Discussion of changes in genre, form, content, and social implication. Letter grading.

**209B. 19th-Century Drama.**

(4) Lecture, three hours. Analysis of selected dramas and their reception from Kleist to Wagner. Discussion of historical drama, socio-political drama, *Volkstheater*, and other forms. Letter grading.

**209C. 19th-Century Narrative Prose. (4)** Lecture, three hours. Analysis of prose works between Romanticism and naturalism. Discussion of development of literary realism and form of the novella. Letter grading.

**210A. Naturalism, Symbolism, and Expressionism. (4)** Lecture, three hours. Analysis of selected works (poetry, drama, prose) of early modernism from Hauptmann to Kafka. Discussion of sociological spectra and pluralism of styles and forms. Letter grading.

**210B. 20th-Century Novel to 1945. (4)** Lecture, three hours. Prose works in first half of the 20th century as they express war experience, crisis of consciousness, and cultural conflicts between wars, as well as innovations in narrative technique. Letter grading.

**211. Postwar Literature. (4)** (Formerly numbered 211A.) Lecture, three hours. Study of major works by German-speaking authors writing since World War II. Examination of issues such as identity crises, nationalism and the divided Germany, gender expectations, and social-political attitudes. Letter grading.

**212. Contemporary Literature and Culture. (4)** (Formerly numbered 211B.) Lecture, three hours. Analysis of current cultural issues and their relation to literary production and interpretation. Topics may include areas such as feminism, postcolonialism, postmodernism, and contemporary theories of textuality. Letter grading.

**213. Topics in Literature and Film. (4)** Lecture, three hours. With focus on two different modes of cultural representation, examination of topics in German literature and film from Weimar Republic to the present. Study of media theory, feminist film theory, and interrelationships between film, literature, and social history. Letter grading.

**217. History of the German Language. (4)** Historical survey of development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, medieval period, Reformation, baroque period, and Enlightenment until its final codification at the end of the 19th century.

**230. Survey of Theory in Historical Linguistics. (4)** Lecture, three hours. Systematic overview of theories of historical linguistics. Letter grading.

**231. Gothic. (4)** Systematic study of phonology and grammar of the Gothic language, with readings in Wulfila's translation of the Bible and introduction to history of the Goths and their place in the development of modern Europe.

**232. Old High German. (4)** Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition.

**233. Old Saxon. (4)** Introduction to study of earliest documents in Old Low German. Readings in the *Heliand* and study of the *Old Saxon Genesis*.

**C238. Linguistic Theory and Grammatical Description. (4)** Lecture, three hours. Prerequisite: course 150 or Linguistics 20. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C172. Graduate students meet as a group one additional hour each week and write research papers of greater length and depth. Letter grading.

**251. Seminar: Germanic Linguistics. (4)** Seminar, three hours. Current topics in synchronic or diachronic linguistics, such as specific issues in generative grammar, sociolinguistics and dialectology, or language contact. Letter grading.

**252. Seminar: Historical and Comparative Germanic Linguistics. (4)** Topics selected from the field of historical German phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of the Germanic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax).

**253. Seminar: Medieval Literature. (4)** Seminar, three hours. Investigation of a selected topic or particular theoretical issue that arises in study of medieval literature. Letter grading.

**256. Seminar: Enlightenment. (4)** Seminar, three hours. Selected problems in cultural, literary, and philosophical history. May include modern critiques of Enlightenment thought. Letter grading.

**257. Seminar: Age of Goethe. (4)** Seminar, three hours. Selected topics in literature and culture between 1775 and 1832, with special emphasis on work of Goethe and Schiller as it relates to philosophic texts such as Hegel's *Phänomenologie des Geistes* or as it relates to historical events such as the French and American Revolutions. Letter grading.

**258. Seminar: Romanticism. (4)** Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 208. Critical review of secondary works.

**259. Seminar: 19th-Century Literature. (4)** Discussion of a specific author or topic of 19th-century literature, possibly in close connection with course 209A, 209B, or 209C. Critical review of secondary works.

**260. Seminar: Modern Period. (4)** Seminar, three hours. In-depth analysis of a particular issue in pre-1945 German literature and culture. Letter grading.

**261. Seminar: Contemporary Literature. (4)** Seminar, three hours. In-depth analysis of a particular issue in post-1945 German literature and culture. Letter grading.

**262. Seminar: Germanic Folklore. (4)** Seminar, three hours. Detailed investigation of individual aspects of Germanic folklore, with emphasis on problems of theory and method in analysis of folkloric material. Letter grading.

**263. Seminar: Literary Theory. (4)** Seminar, three hours. Special focus on particular theoretical school or interpretive paradigm. Content varies with instructor. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Approaches to Foreign Language Pedagogy. (4)** (Formerly numbered 495A, 495B.) Seminar, one hour; discussion, two hours. Issues include development of current theories of second-language acquisition, effects of these theories on language teaching, psycholinguistics, sociolinguistics, assessment techniques, use of multimedia in foreign language pedagogy, and design of syllabi for basic foreign language courses. S/U grading.

**596. Directed Individual Study or Research. (4)** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4)** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be taken only once before and only once after M.A. degree, except for Ph.D. candidates with a formal minor field of studies who may take course twice after M.A., once in the major and once in the minor. Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4 to 12)** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 12)** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated. S/U grading.

## Upper Division Courses

**C139. The Saga. (4)** Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C268.

**C140. Viking Civilization and Literature. (4)** Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and *Eddas*. Concurrently scheduled with course C241.

**C145. Old Norse Literature and Society. (4)** Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C272.

**151. Elementary Old Norse. (4)** Introduction to grammar and pronunciation of Old Norse. Selected readings from the sagas and *Prose Edda*.

**152. Intermediate Old Norse. (4)** Requisite: course 151. Continued grammar, pronunciation, and readings from the *Eddas* and sagas of Icelanders, Norwegian kings, and legendary heroes.

**153. Modern Icelandic. (4)** Requisite: course 152. Grammar, readings, and conversation.

**199. Special Studies in Old Norse. (2 or 4)** Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Graduate Courses

**221. Advanced Old Norse Prose. (4)** Requisite: course 152. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history.

**222. Advanced Old Norse Poetry. (4)** Requisite: course 152. Readings of mythological and heroic poems from *Poetic Edda*. Secondary sources used where appropriate.

**C241. Viking Civilization and Literature. (4)** Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and *Eddas*. Concurrently scheduled with course C140. Graduate students do additional readings and write more extensive research papers.

**245A. Germanic and Scandinavian Mythology. (4)** Seminar, three hours. Study of Northern myth and religion through close reading of Eddic texts and secondary sources.

**C268. The Saga. (4)** Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C139. Graduate students do additional readings and write more extensive research papers.

**C272. Old Norse Literature and Society. (4)** Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Graduate students do additional readings and write more extensive research papers.

**596. Directed Individual Study or Research. (4)** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## Old Norse Studies

### Lower Division Course

**40. The Heroic Journey in Northern Myth, Legend, and Epic. (4)** Comparison of the journeys of heroes. Readings in mythology, legend, folktale, and epic, including *Nibelungenlied*, *Volsunga saga*, *Eddas*, and *Beowulf*. Cultural and historic backgrounds to the texts. All readings in English.

## Scope and Objectives

The explosive expansion of the older population in this country and the world — the “Age Revolution” — insures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in Gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families age.

## Undergraduate Study

### Gerontology Minor

To enter the Gerontology minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses (28 units):* Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M150, Community Health Sciences 90, Psychology M117J, 124G, 189, 193 (only 8 units may be

applied toward the minor; fieldwork placements must be approved by the chair of the minor), Women’s Studies 185 (only when the special topic is women, health, and aging).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Gerontology

### Upper Division Courses

**M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4)** (Same as Social Welfare M104C and Women’s Studies M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

**M104D. Public Policy and Aging. (4)** (Same as Social Welfare M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

**M104E. Social Aspects of Aging. (4)** (Same as Social Welfare M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

**M119O. Psychology of Aging. (4)** (Same as Psychology M119O.) Prerequisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

**M140. Introduction to Study of Aging. (4)** (Same as Psychology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**M141. Women, Health, and Aging: Policy Issues. (4)** (Same as Health Services CM141 and Women’s Studies M141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

**M150. Sociology of Aging. (4)** (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

# HEALTH SERVICES

School of Public Health

UCLA  
31-269 Center for the Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772  
(310) 825-2594, 825-7863

Ronald M. Andersen, Ph.D., *Chair*  
Thomas H. Rice, Ph.D., *Vice Chair*

## Professors

Emily K. Abel, Ph.D.  
Ronald M. Andersen, Ph.D. (*Fred W. and Pamela K.  
Wasserman Professor of Health Services*)  
Robert H. Brook, M.D., Sc.D.  
E. Richard Brown, Ph.D.  
William Comanor, Ph.D.  
Jonathan E. Fielding, M.D., M.P.H.  
Patricia A. Ganz, M.D.  
Ronald Hays, Ph.D.  
Charles E. Lewis, M.D., Sc.D.  
Marvin Marcus, D.D.S.  
Thomas H. Rice, Ph.D.  
Stuart O. Schweitzer, Ph.D.  
Martin Shapiro, M.D.  
Paul R. Torrens, M.D., M.P.H.

## Professors Emeriti

Lester Breslow, M.D., M.P.H.  
Carl E. Hopkins, Ph.D., M.P.H.  
William Shonick, Ph.D.

## Associate Professors

Roshan Bastani, Ph.D., *in Residence*  
William E. Cunningham, M.D., M.P.H.  
Susan L. Ettner, Ph.D.  
Gerald F. Kominski, Ph.D.  
Mark S. Litwin, M.D., M.P.H.  
John Peabody, M.D., Ph.D., *in Residence*

## Assistant Professors

Jeff Luck, Ph.D., M.B.A., *in Residence*  
Patricia Parkerton, Ph.D., *in Residence*  
Ninez Ponce, Ph.D., *in Residence*  
Mark Schuster, M.D., Ph.D., *in Residence*

## Lecturers

Bruce W. Bennett, Ph.D.  
Alain Jourdir  
Richard Sinaiko, M.P.H.

## Adjunct Professors

Ellen Alkon, M.D., M.P.H.  
Michael Bobrow, A.I.A.  
Stuart P. Bowne, M.D.  
Jose Escarce, M.D.  
Arlene Fink, Ph.D.  
Emmett Keeler, Ph.D.  
Jacqueline B. Kosecoff, Ph.D.  
Eric McLaughlin, Ph.D., M.B.A.  
Ruth J. Roemer, J.D., *Emerita*  
Iraj Tabibzadeh, M.D.

## Adjunct Associate Professors

Barbara Berman, Ph.D.  
Dana Goldman, Ph.D.  
Raymond D. Goodman, M.D., M.P.H.  
Nancy D. Harada, Ph.D.  
Antonio Legorreta, Ph.D.  
William McCarthy, Ph.D.  
Anthony Schiff, J.D.

## Adjunct Assistant Professor

Pamela L. Davidson, Ph.D.  
Melissa Farmer, Ph.D.  
F.A. Hagigi, Dr.P.H., M.B.A., C.M.C.  
Diana W. Hilberman, Dr.P.H.  
Nadereh Pourat, Ph.D.  
Jon Riddle, Ph.D.  
Louis Rubino, Ph.D.  
Amardeep Thind, M.D., Ph.D.

Elizabeth M. Yano, Ph.D.

## Scope and Objectives

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H., see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

## Graduate Study

.For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs, and included on their websites.

## Graduate Degrees

The Department of Health Services offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Health Services.

## Admission

Applicants to the M.S. program should see the Master of Public Health (M.P.H.) admission section under Public Health Schoolwide Programs. Admission requirements for the M.S. in Health Services are the same as for the M.P.H.

For the Ph.D. program, in addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) at least a 3.0 junior/senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (3) a positive recommendation by the Health Services Department, (4) approval by the doctoral admissions committee and the department chair, (5) completion of the M.S. in Health Services or an appropriately related field is preferred, (6) submission of a writing sample, preferably a master's thesis or equivalent. Screening examinations may be required by the department.

## Master's Degree

The M.S. degree is offered through the comprehensive examination and thesis plans. Students must complete 16 full courses (64 units). A minimum of five courses must be at the graduate level. Students must complete required coursework in health services, as well as introductory courses in biostatistics and epidemiology. Students are strongly encouraged to take advanced courses in biostatistics and epidemiology. Elective courses should be selected in consultation with an adviser and may be chosen from offerings in the department or other departments in the School of Public Health.

Students with a prior doctoral-level degree (M.D., Ph.D., J.D., D.D.S., or equivalent), and relevant experience, must complete 12 full courses (48 units). Students are encouraged to substitute advanced courses in specific areas if previous academic work provides adequate preparation.

## Doctoral Degree

In addition to the requirements for an M.S. in Health Services, major field course requirements include required courses in health services and biostatistics. A cognate is required with at least three courses from a department that grants a Ph.D. degree. Acceptable cognate areas are chosen from one of the following areas: economics, epidemiology, health care outcomes research, history, management, pharmaceutical economics, policy studies, political science, psychology, and sociology.

Written and oral qualifying examinations are required. Students must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Following successful completion of the

written examination, students take the University Oral Qualifying Examination.

## Health Services

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Health Services. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in health services approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

### Upper Division Courses

**100. Health Services Organization. (4)** Lecture, four hours; discussion, one hour. Preparation: 4 units of social sciences. Structure and function of American health care system; issues and forces shaping its future. P/NP or letter grading.

**M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems. (4)** (Same as Asian American Studies M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S. Letter grading.

**131. Structure and Function of Health Care Facilities. (4)** Lecture, two hours; discussion, two hours. Requisite or corequisite: course 100. Introduction to structure, organization, and function of health care facilities. P/NP or letter grading.

**132. Financial and Managerial Accounting for Health Services Organizations. (4)** Lecture, four hours. Requisite: course 100. Introduction to financial and managerial accounting and its application to the health services industry. P/NP or letter grading.

**133. Introduction to Health Economics. (4)** Lecture, four hours. Presentation of tools of economic analysis. Topics include introductory concepts of microeconomics, theory of demand for health insurance and health care, substitution of health personnel, hospital cost functions, and costs and benefits of health programs. P/NP or letter grading.

**134. Introduction to Comprehensive Health Planning. (4)** Lecture, four hours; fieldwork, four hours. Preparation: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant literature. P/NP or letter grading.

**136. Introduction to Health Services Research. (4)** Lecture, four hours. Requisite: Biostatistics 100A. Review of the field of health services research. Uses of quantitative methods and applications of conceptual/theoretical constructs (as well as methodologies) from social and behavioral sciences and epidemiology to studies of workings of health services. P/NP or letter grading.

**CM141. Women, Health, and Aging: Policy Issues. (4)** (Same as Gerontology M141 and Women's Studies M141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM241. Letter grading.

**150. Contemporary Health Issues. (4)** Lecture, four hours. Designed for juniors/seniors. Exploration of nation's health challenges, epidemiologic basis of public's health, organization and financing of health services in the U.S. and elsewhere, and current strategies for advancing people's health. Letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

## Graduate Courses

**200A-200B. Health Systems Organization and Financing. (4-4)** (Formerly numbered 200A-200B-200C.) Lecture, four hours; discussion, two hours. Limited to graduate health services students. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. S/U or letter grading.

**M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy. (1-1-2)** (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week for three terms. Requisites: course M236, Economics 201A, 201B, 201C. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress and S/U or letter grading.

**205. Pharmaceutical Policy. (4)** Lecture, three hours. Policy issues pertaining to pharmaceutical sector. Topics include determinants of expenditures on drugs, price setting in industry, health insurance coverage for pharmaceuticals, and research and development process. Letter grading.

**214. Measurements of Effectiveness and Outcomes of Health Care. (4)** Lecture, three hours. Requisites: courses 200A, 200B, M422, Biostatistics 100A. Historical perspective for development of health status measures and their utilization in assessment of outcomes and effectiveness in medical care. Review of current methods in context of current research and practice. Letter grading.

**220. Seminar: Cost Containment. (4)** Seminar, three hours. Through lectures and discussion of journal articles, analysis of success and failure of alternative methods of controlling U.S. health care costs. Examination of how other countries have controlled their costs. Letter grading.

**221. Tobacco: Prevention, Use, and Public Policy. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors and graduate students. Study of tobacco use and its health consequences, including interplay of historical, biological, sociocultural, political, and economic forces with knowledge, attitudes, and behavior choices of individuals. Introduction to prevention interventions, cessation interventions, anti-tobacco efforts in the U.S., and international trends in tobacco use. Letter grading.

**231. History of Public Health. (4)** Discussion, three hours. Designed for doctoral students. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health care providers, health care institutions, health care reform movements, public health activities, childbirth, and AIDS. S/U or letter grading.

**232. Governmental Health Services and Trends. (4)** Lecture, four hours. Preparation: two upper division social or behavioral sciences courses. Requisite: course 100. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions. S/U or letter grading.

**M233. Health Policy Analysis. (4)** (Same as Community Health Sciences M252.) Lecture, three hours. Requisites: courses 100 or 200A, M236, M287. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Letter grading.

**234. Health Services Organization and Management Theory. (4)** Lecture, four hours. Preparation: two upper division social sciences courses. Requisites: courses 100, 131. Application of contemporary organization and management theory to systems that provide personal health care services. Environmental characteristics, missions/goals, structure and processes of health services organizations. S/U or letter grading.

**235. Law, Social Change, and Health Service Policy. (4)** Lecture, four hours. Preparation: two upper division political science or sociology courses. Requisite: course 100. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. S/U or letter grading.

**M236. Microeconomic Theory of Health Sector. (4)** (Formerly numbered 236.) (Same as Policy Studies M268.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

**237A-237B. Special Topics in Health Services Research Methodology. (4-4)** Lecture, one hour; discussion, three hours. Requisites: Biostatistics 100A, 100B. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Critique of adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data. Letter grading.

**237C. Issues in Health Services Methodologies. (4)** Lecture, four hours. Requisites: courses 237A, 237B. Designed for doctoral students. Intended to assist students in understanding the research process and its application in study of health services in the U.S. Introduction to issues related to reporting, disseminating, and documenting research findings. Letter grading.

**238. Politics of Health Care. (4)** Lecture, four hours. Requisite: course 100. Concepts and procedures for political analysis; national, state, and local politics in health care; examination of selected case studies. S/U or letter grading.

**239. Aging and Long-Term Care. (4)** Lecture, four hours. Requisites: courses 100, 238, Community Health Sciences 270A, 270B. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including populations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Letter grading.

**240. Health Care Issues in International Perspective. (4)** Lecture, four hours. Preparation: two health administration courses, two upper division social sciences courses. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health service delivery, regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries. S/U or letter grading.

**CM241. Women, Health, and Aging: Policy Issues. (4)** (Formerly numbered M241.) (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM141. Letter grading.

**M242. Determinants of Health. (4)** (Same as Community Health Sciences M232.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

**244. Seminar: Health Services and Policy Evaluation. (4)** Seminar, four hours. Preparation: basic courses in program evaluation and health services organization. Requisites: Biostatistics 100A, 100B. Designed for doctoral students. Seminar applying alternative evaluation research theories and methods to health service organizations and systems. Topics include linking evaluation criteria to policy decisions, theories, and previous research; political and organizational context of evaluation; utilization of findings; and meta-evaluation. S/U or letter grading.

**245. Society's Response to Aging. (4)** Lecture, four hours. Preparation: two health services courses, two upper division social sciences courses. Examination of central issues of health care delivery to the elderly in the U.S. Topics include demographic trends, economic characteristics, health status, demand for care, health care financing, long-term care, and continuum of care for the aged. S/U or letter grading.

**246. Seminar: Special Populations — Health Services Policy Issues. (4)** Seminar, four hours. Requisites: courses 200A, 200B, 232, 238. Limited to doctoral students or M.S. and M.P.H. students with advanced degrees. Doctoral-level seminar which focuses on health services for selected priority population groups, integrating scientific, organizational, economic, ethical, and political evidence as a basis for public policy. Different populations may be selected for attention each year. Letter grading.

**247. Research Topics in Health Economics. (4)** Lecture, four hours. Requisites: courses 100, M236, 446. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health programs. S/U or letter grading.

**249A-249Z. Special Topics in Health Services. (2 to 4 each)** Hours to be arranged. Requisites for each offering announced in advance by department. Advanced seminars covering current issues and special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change.

**249D. Principles of Organization Leadership: Applications in Public Health and Welfare. (4)** Lecture, three hours; discussion, three hours. Designed for graduate students. Examination of principles and models of organization leadership, including presentation by current leaders in the fields of health and welfare. Theories and empirical investigations of leadership qualities. Letter grading.

**M249E. Advanced Topics in Health Economics. (4)** (Formerly numbered 249E.) (Same as Policy Studies M266.) Seminar, four hours. Requisites: courses 200A, 200B, M236. Advanced treatment of a number of topics in health economics, including mental health economics, pharmaceutical economics, and relationship between labor supply, welfare, and health. Letter grading.

**249F. Quality Assessment and Assurance. (4)** Seminar, four hours. Preparation: one health services or epidemiology course. Requisites: course 100, Biostatistics 100A, Epidemiology 100. Fundamental issues in quality assessment, quality assurance, and measurement of health status. S/U or letter grading.

**249G. Techniques in Medical Technology Assessment: Decision Analysis and Cost-Effectiveness. (4)** Seminar, three hours. Requisites: courses 200A, 200B. Doctoral-level seminar focusing on techniques to assess a broad spectrum of medical technologies: therapeutic and diagnostic tests and procedures, clinical practice patterns, public health interventions, and pharmaceuticals. Demonstration of how decision analysis provides basic framework for conducting various economic evaluations. Letter grading.

**249H. Current Research Issues. (2 to 4)** Discussion, two hours. Designed for doctoral students. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

**249I. Seminar Series. (2 to 4)** Seminar, two hours. Designed for doctoral students. Presentation of proposed or ongoing research projects by faculty and students, with discussion to determine relevant methodological and policy issues, as well as to offer constructive criticism. S/U or letter grading.

**M249J. Mental Health Services. (4)** (Same as Psychiatry M251.) Lecture, three hours. Requisites: courses 200A, 200B, 200C. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

**249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes. (4)** Lecture, three hours. Requisites: courses 200A, 200B, M422, Biostatistics 100A, 100B. Designed for graduate students. Participation of students in critical review and discussion of selected papers dealing with course topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. Letter grading.

**M249L. Ethical Issues in Public Health. (4)** (Formerly numbered 249L.) (Same as Community Health Sciences M249L.) Lecture, four hours. Requisites: courses 200A, 200B, 200C. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

**249M. Review of Current Health Services Management Literature. (2)** Lecture, two hours. Designed to help students remain current on recent developments in health services management and to place these current developments in proper context of academic research and theory. Letter grading.

**249N. Accessing, Analyzing, and Presenting Health Care Management Data. (2)** Lecture, two hours. Designed to provide first-year M.P.H. health professional students with basic skills, and acquisition and quantitative analysis of data for health care management, as well as written and oral presentation of those results. Letter grading.

**250. Evolution of Health Professions in the 20th Century. (4)** Lecture, two hours; discussion, two hours. During the 20th century there have been dramatic changes in composition of "helping" professions. Review of forces responsible for these changes and description of processes by which lay persons are educated/socialized into major subgroups of health professions. Review of major social forces external to health care system that affect its composition. Letter grading.

**251. Process Improvement and Information Systems in Health Care Organizations. (4)** Lecture, four hours. Requisites: course 100, Biostatistics 100A. Introduction to concepts of health care quality measurement, process improvement, and information systems, as well as organizational aspects of implementing them. Letter grading.

**M252. Medicare Reform. (4)** (Same as Policy Studies M267.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retirement of baby-boom generation. Letter grading.

**M253. Advanced Topics in Health Services Research: Access to Care. (4)** (Same as Community Health Sciences M253.) Lecture, three hours. Requisites: courses 237A, 237B, and 237C, or Community Health Sciences 210, 270A, and 270B. Doctoral seminar designed to explore health services research regarding access to health care and policies to enhance access. Topics include conceptual frameworks, measurement issues, study designs, analytic approaches, and substantive findings and trends in access and access-related policies. Letter grading.

**260A-260B. World Health. (2-2)** Lecture, two hours. Designed for graduate students. Overview of world health, with emphasis on health care outside the U.S. Key areas include burden of infectious diseases, health economics, and impact of health care policy on health care delivery. In Progress and letter grading.

**265. Challenges in Clinical Health Services Research. (4)** Lecture, four hours. Requisites: courses 200A, 200B. Designed to prepare students for challenges involved in conducting health services research on clinical topics and populations. Topics include formulating appropriate questions, identifying sources, mechanism of conducting field studies, identifying funding sources, writing grants, and publishing findings. S/U or letter grading.

**M269. Health Care Policy and Finance. (4)** (Same as Policy Studies M269.) Seminar, three hours; outside study, nine hours. Requisites: courses 200A, 200B, M236, Biostatistics 100A, 100B. Exploration of demand for health insurance, policies for public insurance (Medicaid and Medicare), the uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer protection movement, and rise of competitive health care markets. Letter grading.

**M287. Politics of Health Policy. (4)** (Same as Community Health Sciences M287.) Lecture, three hours; discussion, one hour. Requisites: courses 200A and 200B, or Community Health Sciences 210. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors. Letter grading.

**400. Field Studies in Health Services. (2 or 4)** Lecture, three hours. Preparation: summer internship. Required of all graduating M.P.H. students. Continuation of summer placement in organizations for delivery, financing, and evaluation of health services. Preparation of consulting report based on organizational problem or project from summer internship. Exposure to selected professional development issues. Letter grading.

**M411. Issues in Cancer Prevention and Control. (4)** (Same as Community Health Sciences M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

**M422. Practices of Evaluation in Health Services: Theory and Methodology. (4)** (Formerly numbered 422.) (Same as Sociology M402.) Lecture, four hours. Requisites: courses 200A, 200B. Introduction to evaluation of health services programs and policies. Exposure to basic theoretical concepts and specific evaluation methodologies and designs. Letter grading.

**425. Law and Epidemiology. (4)** Lecture, four hours. Requisite: course 235 or Epidemiology 100. Examination, generally, of relationship between law and epidemiology, including use of epidemiology to regulate exposure to risk. Letter grading.

**427. Population-Based Health Planning. (4)** Lecture, four hours. Requisites: courses 200A, 200B, Biostatistics 100A. Introduction to techniques of forecasting health care needs, utilization, and expenditures using population-based planning. Letter grading.

**430. New Developments in E-Health and Internet. (4)** Lecture, four hours. Introduction of new technologies in health care e-commerce/Internet/new media area, with emphasis on general background, review of applications, and discussion of organizational and managerial issues dealing with successful use and implementation of technologies. S/U or letter grading.

**431. Managerial Processes in Health Services Organizations. (4)** Lecture, one hour; laboratory, three hours. Requisites: courses 100, 234. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganization. Unique features of health services organizations are stressed as applications are presented. Letter grading.

**432. Integrative Seminar: Health Services Management. (4)** Seminar, four hours. Requisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty. S/U or letter grading.

**433. Health Services Organization Policy and Strategy. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 200A, 200B, 234, M236, Biostatistics 100A, Management 403. Conceptual, analytical, and technical aspects of policy and strategy formulation in health services organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity/innovation. Letter grading.

**434. Employer/Employee Health Management. (4)** Lecture, two hours; discussion, two hours. Preparation: a combination of three graduate courses in health planning, hospital finance, health policy, health insurance, occupational health, health services research, and health information systems. Requisite: course 100. Preview and analysis of how employer and employee groups provide, sponsor, and manage health-related services for others. S/U or letter grading.

**435. Management Science for Health Planning and Administration. (4)** Lecture, three hours; laboratory, two hours. Requisites: Biostatistics 100A and either Biostatistics 403 or Management 404. Introduction to use of quantitative analyses to support managerial and operational decisions in health services organizations. Topics include mathematical models for structuring decisions, resource allocation, inventory control, task sequencing, scheduling, and forecasting. Use of microcomputers. S/U or letter grading.

**436. Financial Management of Health Service Organizations. (4)** Lecture, four hours. Requisites: courses 131, 132, 234. Application of financial management and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management. S/U or letter grading.

**437. Legal Environment of Health Services Management. (2)** Lecture, four hours. Requisite: course 131. General survey of legal aspects of health services management, including governance, agency, informed consent, medical malpractice, contracts, negligence, and case law related to health facility operations. S/U grading.

**438. Issues and Problems of Local Health Administration. (4)** Lecture, three hours. Preparation: one health services course. Requisites: course 100, Epidemiology 100. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions. Letter grading.

**439. Dental Care Administration. (4)** Lecture, three to four hours. Requisites or corequisites: Biostatistics 100A, Epidemiology 100. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms. Letter grading.

**440A. Health Information Systems: Organization and Management. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses 200A, 200B. Principles of and systems related to organization and management of a health facility's health information system. Letter grading.

**440B. Health Information Systems: Organization and Management. (4)** Lecture, two hours; laboratory, three hours. Requisite: course 440A. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services. S/U or letter grading.

**441. Ambulatory Care in the U.S. (4)** Seminar, three hours. Requisites: courses 132, 200A, 200B, Management 403. Introduction to organization and management concepts, problems, and issues in ambulatory health services, including financial management and information systems requirements. Letter grading.

**442A. Managed Health Care: Quality and Cost. (4)** Lecture, three hours. Overview of issues related to growth, management, and planning of managed health care systems. Review of role of HMOs and PPOs, as well as discussion of managed care as a solution. Letter grading.

**442B. Managed Care Practices. (4)** Lecture, four hours. Requisite: course 442A. Introduction to practices and methodologies required of those participating in managed care sector. Attention to pros and cons and advantages and disadvantages of various aspects of managed care. Topics include revenue maximization and cost control, negotiating and contractual relationships among the parties to deliver care, and quality and performance measurement. Letter grading.

**443A. Biological and Social Bases of Prevention. (4)** Lecture, two hours; discussion, two hours. Requisites: courses 100 (or 200A and 200B), Biostatistics 100A, Epidemiology 100. Designed for graduate students. Development, current status, and potential of preventive medicine in public health practice, focusing on risk indicator approach (exercise, alcohol, stress, etc.), with consideration of program settings, delivery problems, and issues. Letter grading.

**443D. Advanced Hospital Financial Management Simulation. (4)** Lecture, one hour; discussion, one hour; laboratory, two hours. Requisites: courses 100, 132, 436. Practical aspects of hospital management decisions in a changing environment examined through computer simulation, with particular attention to economic projections, demand patterns, investment programs, and health care regulations. S/U or letter grading.

**443E. Advanced Hospital Financial Management Seminar. (4)** Seminar, four hours. Requisites: courses 100, 131, 132, 436. Hospital financial management, including reimbursement management, capital financing, and capital investment analysis, discussed and analyzed with respect to students' individual residency sites. S/U or letter grading.

**444. Applied Methodology in Health Planning. (4)**

Lecture, three hours; fieldwork, four hours. Requisites: courses 200A, 200B. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area. Letter grading.

**445. Strategic Planning and Marketing in Health Care. (4)**

Lecture, three hours. Requisites: courses 200A, 200B, Biostatistics 100A, 100B. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Lectures and discussion of case studies for which students must prepare in advance, fieldwork, and microcomputer exercises. Letter grading.

**446. Financing Health Care. (4)** Lecture, four hours. Requisites: course 100, Economics 1, 2. Patterns of health care financing by consumers, providers, third-party intermediaries; trends in health service use; expenditures, national health insurance, and international comparisons of health financing. S/U or letter grading.

**447. State Health Policy Issues. (4)** Seminar, three hours. Requisite: course 238. Focus on health policy development and implementation at state government level, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships. S/U or letter grading.

**447D. Management of Health Maintenance Organizations. (4)** Lecture, three hours. Requisites: courses 100, 134. Alternative approaches to fee-for-service for paying, providing, or arranging for delivery of health care services, and relating these approaches to national health policy. S/U or letter grading.

**447E. Health Insurance Principles and Programs. (4)** Lecture, four hours. Preparation: one health services course. Requisites: courses 100, 232. Examination of social, actuarial, and commercial assumptions underlying private health insurance. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with varied scopes of coverage and benefits and their implications for public and private medical care developments. S/U or letter grading.

**M448. Health Policy Issues for Dental Professionals. (2)** (Same as Dentistry M422.) Lecture, two hours. Requisites: course 100, Biostatistics 100A, Epidemiology 100. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

**M448D. Case Studies in Dental Practice. (2)** (Same as Dentistry M433A.) Lecture, two hours. Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

**M449A-M449B. Child Health, Programs, and Policies. (4-4)** (Same as Community Health Sciences M436A-M436B.) Lecture, four hours. Requisite: course 100. Course M449A is requisite to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

**450. Financial Theory of Health Services Organizations. (4)** Lecture, four hours. Requisites: courses 200A, 200B. Study of health care financial management, including variables of cost of funds, availability of physicians to provide the necessary patients, efficiency of operations, and legal constraints. Letter grading.

**495. Teacher Preparation in Health Services. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Kathryn Norberg, Ph.D.  
Geoffrey Robinson, Ph.D.  
Michael Salman, Ph.D.  
William R. Summerhill, Ph.D.  
Sharon J. Traweek, Ph.D.  
Albion M. Urdank, Ph.D.  
Joan Waugh, Ph.D.  
William H. Worger, Ph.D.  
Mary A. Yeager, Ph.D.

### Assistant Professors

Eric R. Avila, Ph.D.  
Vinay Lal, Ph.D.  
Ghislaine E. Lydon, Ph.D., *in Residence*  
Muriel McClendon, Ph.D.  
David D. Phillips, Ph.D.  
Gabriel Piterberg, Ph.D.  
Claudia Rapp, D.Phil.  
Janice L. Reiff, Ph.D.  
Kevin B. Terraciano, Ph.D.  
Mary Terrall, Ph.D.  
Jessica A. Wang, Ph.D.  
Henry S.N. Yu, Ph.D.

### Senior Lecturer S.O.E.

S. Scott Bartchy, Ph.D.

### Lecturer

Larry Lauerhass, Ph., *Emeritus*  
Paul Vonblum, Ph.D.

### Adjunct Professors

Richard H. Popkin, Ph.D.  
Robert C. Ritchie, Ph.D.

### Adjunct Assistant Professor

Fredelle Zaiman Spiegel, Ph.D.

### Adjunct Associate Professor

Yuji Ichioka, Ph.D.

## Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, History is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a joint master's program with the Graduate School of Education and Information Studies. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

## Undergraduate Study

### History B.A.

The History Department's undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major). All courses must be taken for a letter grade.

### Preparation for the Premajor and Major

*Required for the Premajor:* Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22), and 99.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor's office in 6248 Bunche Hall.

*Required for the Major:* Three additional lower division history courses.

### Transfer Students

To be admitted as History majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one semester or two quarters of history of Western civilization or world history,

one historical practice course, and three additional lower division history courses.

Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counselor before enrolling in any courses for the major.

### The Major

*Required:* At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) History 197.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

### Advanced Placement Credit in History

The College of Letters and Science allows 8 quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the Preparation for the Major as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows 8 units of History 13A, 13B, 13C credit on the history preparation. The excess units may be applied only toward the degree.

## Honors Program

The honors program is designed for History majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

The proposal, research, analysis, and writing of the paper take place over three terms through History 199HA, 199HB, and 199HC. Course 199HA is taken in Spring Quarter of the junior year, followed by courses 199HB and 199HC in Fall and Winter Quarters of the senior year. Contact the undergraduate adviser for more information.

## Single Subject Credential in Social Science

For information on the single subject credential in social science, consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

## History of Science and Medicine Minor

The History of Science and Medicine minor is designed for students who wish to augment their major, perhaps in one of the sciences, with a series of courses that analyze the historical growth, impact, and significance of science and medicine in Western and world culture. The minor consists of a choice of lower division courses that expose students to overviews of science and medicine in large time periods or to specific thematic concerns. Upper division courses offer more focused and often smaller classes that explore crucial episodes or areas with a more rigorous and sophisticated content and methodology.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units and at least one lower division course in the history of science or medicine for a letter grade, and file a petition with the undergraduate adviser in 6248 Bunche Hall.

*Required Lower Division Courses (12 units):* Three courses from History 2B, 2D, 3A through 3D, Philosophy 8.

*Required Upper Division Courses (20 units):* Five courses from Anthropology 182, 183, History 195A through 195E, any upper division Honors Collegium courses with history of science or history of medicine content, Neurobiology M168 (or Physiological Science M168), Philosophy 124.

Each year certain undergraduate seminars in the History 197 sequence are designated as applicable to the upper division minor requirements. Students may also petition to have other relevant courses, including those from other departments, applied toward the upper division requirements.

At least one upper division course, to be selected and approved in consultation with the undergraduate or faculty adviser, must involve writing a research or interpretative paper of significant length and intellectual content. Only one course applied toward the students' majors may also be applied toward this minor. Transfer credit for courses may be subject to departmental approval.

One course may be taken on a Passed/Not Passed basis; all other minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases,

even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of History offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in History.

## Admission

### M.A./Ph.D. in History

For admission to the graduate programs, applicants normally should have completed the undergraduate major or its equivalent, received a Bachelor of Arts degree or its equivalent from an accredited college or university, and maintained at least a B+ average in upper division work. Three letters of recommendation and the scores of the General Test of the Graduate Record Examination (GRE) must be submitted to the department. Applicants to the Ph.D. program are urged to seek an interview or to correspond with a member of the History Department faculty in the field in which they intend to work.

The Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination is required of international applicants whose first language is not English. Applicants may also be admitted with subject deficiencies, but such deficiencies must be removed by completing courses that are in addition to those required for the degree program. Applicants who have had a year or more of graduate study at other institutions should have attained a grade-point average of 3.5 or better (on a 4.0 scale) if they wish to work toward the Ph.D. degree.

### History M.A./Information Studies M.L.I.S

Applicants admitted to the Ph.D. program in History who wish to receive the M.A. in History and the M.L.I.S. in three years may apply to the concurrent degree program by submitting applications to both departments.

## Master's Degrees

The M.A. degree is offered through the comprehensive examination plan. The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. For students in U.S. history, a minimum of seven of the nine courses must be at the 200 level.

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1450 to present (also includes British, Jewish, and Russian history); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) China; (8) Japan; (9) Latin America; (10) U.S.; (11) history of science; (12) special fields (students in the history of religions or his-

tory of Christianity are normally examined in one of the above fields but, with the approval of the faculty in these fields, may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).

There is a language requirement for this degree.

## Doctoral Degree

Major fields include ancient Greece; ancient Rome; medieval constitutional and legal; medieval social and economic; medieval ecclesiastical and religious; medieval intellectual and cultural; Byzantine; Russia since 800; East Central and Southeast Europe since 1450; England prior to 1485; Britain since 1450; the British Empire; ancient Near East; the Near East, 500 to 1500; the Near East since 1500; Armenian; survey of African history; topics in African history (preferably on a regional basis); history of science since 1450; Europe, Renaissance/Reformation; Europe, Renaissance to the French Revolution; Germany since 1450; France since 1450; Italy since 1450; Spain and Portugal since 1450; Europe since 1740; European socioeconomic history; European intellectual and cultural history; psychohistory; China, 900 to 1800; China since 1800; early modern Japan; modern Japan; South Asia; Southeast Asia; Latin America, 1492 to 1830; Latin America since 1759; history of religions; Jewish history; history of Christianity; comparative history; U.S.: Afro-American, American diplomatic, American West, American Indian, Asian Americans, California, history of the South, Civil War and Reconstruction, Colonial, cultural, economic, immigration, intellectual, Jeffersonian and Jacksonian American (1800 to 1850), labor, Mexican-American, social, the new nation (1763 to 1800), 20th century, urban, women's history.

Required coursework is specific to the fields. Completion of at least one continuing two- or three-quarter seminar which includes completion of a substantial research paper is required. Doctoral committees may require such courses as they deem necessary for preparation for qualifying examinations. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

Written and oral qualifying examinations are required. Students are expected to show not only a mastery of their special subject, but also an extensive knowledge covering the wider field of historical knowledge and an ability to correlate historical data and to explain their significance. Details on the examinations, including differences by field and timing, are outlined in *Program Requirements for UCLA Graduate Degrees*.

Following successful completion of the written examinations, students prepare a dissertation prospectus and take the University Oral Qualifying Examination.

There is a language requirement for this degree.

# History

## Lower Division Courses

**1A-1B-1C. Introduction to Western Civilization. (4-4-4)** Lecture, two hours; discussion, two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. **1A.** Ancient Civilizations from Prehistory to Circa A.D. 843; **1B.** Circa A.D. 843 to Circa 1715; **1C.** Circa 1715 to the Present.

**1AH-1BH-1CH. Introduction to Western Civilization (Honors). (4-4-4)** Lecture, two hours; discussion, two hours. Honors sequence parallel to courses 1A, 1B, 1C.

**2A. Power, Ethics, and Technological Change. (4)** Lecture, three hours; discussion, two hours. Examination of historical and theoretical relationships between ethical behavior, corporate power, and technological change. Topics include engineering practice and business profits, gender and engineering cultures, product liability and consumer safety, and engineering and computer ethics. Historical case studies include Three Mile Island, Chernobyl, the DC-10, and Challenger Disaster. P/NP or letter grading.

**2B. Social Knowledge and Social Power. (4)** Lecture, three hours; discussion, two hours. History of social knowledge and social theory in the 19th and 20th centuries. Everyday ideas and practices about human nature, common sense, and community and relation of those practices to social thought, social engineering, and social science. Themes include development of social knowledges through public activities and discourses; how social knowledge differs in agricultural, mercantile, industrial, and information-based political economies; and how social science addresses these issues. P/NP or letter grading.

**2C-2D. Religion, the Occult, and Science. (4-4)** Lecture, three hours; discussion, two hours. P/NP or letter grading:

**2C.** Mystics, Heretics, and Witches in Western Tradition, 1000 to 1600. (4) Lecture, three hours; discussion, two hours. Specific aspects of elite and popular culture in medieval and early modern western Europe. Manner in which men and women sought to explain, order, and escape terrors of their lives by embracing transcendental religious experiences and dreaming of apocalypse and witchcraft. Examination of experiences in context of genesis of the state, birth of a new science, and economic and social change. P/NP or letter grading.

**2D.** Science, Magic, and Religion, 1600 to the Present. (4) Lecture, three hours; discussion, two hours. Science and religion as historical phenomena that have evolved over time. Examination of earlier mind-set before 1700 when into science fitted elements that came eventually to be seen as magical. How Western cosmologies became "disenchanted." Magical tradition transformed into modern mysticisms. Political implications of these movements; science in totalitarian settings as well as "big science" during the Cold War. Discussion of anti-science and cult movements. P/NP or letter grading.

**3A-3B-3C. Introduction to History of Science. (4-4-4)** Lecture, three hours; discussion, two hours. History majors may not apply these courses on science general education requirements:

**3A.** Scientific Revolution. Survey of the beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization of the natural world, rise of experimental science, and origin of scientific societies.

**3B.** Physical Sciences since the Enlightenment. Broad survey of development of ideas in classical and modern physical science since Newton. Theories of matter, but more specifically chemistry, thermodynamics, electromagnetic theory of light, energy conservation, relativity, and quantum mechanics.

**3C.** Biological Sciences, 1800 to 1955. Survey of development of biological sciences from the period of Bichat and Müller to discovery of the double helix.

**3CH. Introduction to History of Science (Honors). (4)** Honors course parallel to course 3C. P/NP or letter grading.

**3D. Themes in History of Medicine. (4)** Lecture, three hours. Not open to freshmen. Limited to 30 students. Examination, through illustrated lectures and focused discussion of primary sources, of five important themes in development of modern medicine: nature of diagnosis, emergence of surgery, epidemics, conception and treatment of insanity, and use of medical technology.

**4. Introduction to History of Religions. (4)** Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greek and early Christian theories to modern history with its discoveries of the religions of India, China, ancient Near East, etc., and the problem of the encounter of various religions in the 19th and 20th centuries.

**8A. Colonial Latin America. (4)** Lecture, three hours; discussion, two hours. General introduction to Latin American history from contact period to independence (1490s to 1820s), with emphasis on convergence of Native American, European, and African cultures in Latin America; issues of ethnicity and gender; development of colonial institutions and societies; and emergence of local and national identities. Readings focus on writings of Latin American men and women from the period studied. P/NP or letter grading.

**8AH. Colonial Latin America (Honors). (4)** Lecture, three hours; discussion, two hours. Honors course parallel to course 8A. P/NP or letter grading.

**8B. Political Economy of Latin American Underdevelopment, 1750 to 1930. (4)** Lecture, three hours. Interaction of precapitalist and modern modes of social organization in Latin American history, particularly during the "long" 19th century, by focusing on relationship between economic change, social and cultural structures, and politics in the region. P/NP or letter grading.

**8BH. Political Economy of Latin American Underdevelopment, 1750 to 1930 (Honors). (4)** Lecture, three hours; discussion, three hours. Honors course parallel to course 8B. P/NP or letter grading.

**8C. Latin American Social History. (4)** Lecture, three hours; discussion, two hours. Historical and contemporary perspective of role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history.

**8CH. Latin American Social History (Honors). (4)** Lecture, three hours; discussion, two hours. Honors course parallel to course 8C.

**9A-9E. Introduction to Asian Civilizations. (4 each)** Lecture, three hours; discussion, two hours. P/NP or letter grading:

**9A. History of India. (4)** Lecture, three hours; discussion, two hours. Introductory survey for beginning students of major cultural, social, and political ideas, traditions, and institutions of Indic civilization. P/NP or letter grading.

**9C. History of Japan. (4)** Lecture, three hours; discussion, two hours. Survey of Japanese history from earliest recorded time to the present, with emphasis on development of Japan as a cultural daughter of China. Attention to manner in which Chinese culture was Japanized and aspects of Japanese civilization which became unique. Creation of the modern state in the last century and impact of Western civilization on Japanese culture. P/NP or letter grading.

**9CH. History of Japan (Honors). (4)** Lecture, three hours; discussion, two hours. Honors course parallel to course 9C. P/NP or letter grading.

**9D. History of the Near and Middle East. (4)** Lecture, three hours; discussion, two hours. Introduction to history of the Muslim world from advent of Islam to the present day. P/NP or letter grading.

**9E. Southeast Asian Crossroads. (4)** Lecture, three hours; discussion, two hours. Overview history of a region united by its wet tropical environment and divided by great religious, cultural, and political pluralism, with focus on Vietnamese, Thai, Filipino, Khmer, Burmese, and Malay-Indonesian patterns. P/NP or letter grading.

**10A-10B. Introduction to Civilizations of Africa. (4-4)** Lecture, three hours; discussion, two hours. Course 10B is not open for credit to students with credit for course 10BH or 10BW. Survey of history of Africa from 1800 to the present, with particular attention to 19th-century historical background, era of colonial rule, and regaining of African independence in postcolonial era. P/NP or letter grading.

**10BH. Introduction to Civilizations of Africa (Honors). (4)** Lecture, three hours; discussion, two hours. Not open for credit to students with credit for course 10B or 10BW. Honors course parallel to course 10B. P/NP or letter grading.

**10BW. Introduction to Civilizations of Africa since 1800. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 10B or 10BH. Survey of social, economic, and political developments in Africa since 1800, with focus on slave trade, imperialism and colonialism, and nationalism and independence. Attention to different ideologies (nationalism, socialism, apartheid), rural/urban tensions, changing role of women. Four papers required. Satisfies Letters and Science Writing II requirement. Letter grading.

**11A-11B. History of China. (4-4)** Lecture, three hours; discussion, two hours. **11A.** To 1000. Survey of early history of China — genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires. **11B.** 1000 to 1950. Survey of later history of China — evolution of characteristic Chinese institutions and modes of thought from 1000 to 1950. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in the contemporary era.

**11AH-11BH. History of China (Honors). (4-4)** Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A, 11B.

**13A-13B-13C. History of the U.S. and Its Colonial Origins. (4-4-4)** Lecture, two hours; discussion, two hours. Strongly recommended for History majors planning to take more advanced courses in U.S. history. Cultural heritages, political institutions, economic developments, and social interactions which created contemporary society. P/NP or letter grading. **13A.** Colonial Origins and First Nation Building Acts; **13B.** 19th Century; **13C.** 20th Century.

**20. World History to A.D. 600. (4)** Lecture, three hours; discussion, two hours. Examination of earliest civilizations of Asia, North Africa, and Europe — Mesopotamia, Egypt, Israel, India, China, Greece, and Rome — from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of society, nature of kingship, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/NP or letter grading.

**21. World History, Circa 600 to 1760. (4)** Lecture, three hours; discussion, two hours. Outline of world history from rise of Islam to start of Industrial Revolution, structured around a broad chronological narrative of salient developments. Use of thematic and comparative approaches, with certain recurring themes and institutions that modulate from culture to culture. Reading of variety of contemporary accounts to look at way people perceived cultures outside their own. P/NP or letter grading.

**22. Contemporary World History, 1760 to the Present. (4)** Lecture, three hours; discussion, two hours. Broad thematic survey of world history since the mid-18th century. Examination, through lecture and discussion, of global implications of imperialism, total war, nationalism, cultural change, decolonization, changes in women's rights and roles, and eclipse of world communism. Designed to introduce students to historical study, help them understand issues and dilemmas facing the world today, and prepare them for more in-depth work in history of specific regions or countries of the world. P/NP or letter grading.

**M70. Survey of Medieval Greek Culture. (4)** (Same as Classics M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

**88A-88U. Lower Division Seminars. (5 each)** Seminar, three hours. Limited to 15 freshmen/sophomores. Open to nonhistory majors. Readings, discussions, papers. Sign-ups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunche Hall). Ten units may be taken for credit. **88A.** Ancient Greece; **88B.** Ancient Rome; **88C.** Medieval; **88D.** Early Modern Europe; **88E.** Modern Europe; **88F.** Russia/Eastern Europe; **88G.** Britain; **88H.** U.S.; **88I.** Latin America; **88J.** Near East; **88K.** India; **88L.** China; **88M.** Japan; **88N.** Africa; **88O.** Science/Technology; **88P.** History of Religions; **88Q.** Theory of History; **88R.** Jewish History; **88S.** Armenia and the Caucasus; **88T.** Southeast Asia; **88U.** Psychohistory.

**97H. Three Trials. (4)** Discussion, three hours. Limited to 20 students. Intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of original trial.

**99. Introduction to Historical Practice. (4)** Seminar, three hours. Discussion classes of no more than 15 students. Introduction to study of history, with emphasis on historical theory and research methods. P/NP or letter grading.

## Upper Division Courses

Upper division lecture courses in the History Department are usually scheduled for three hours. Periodically, additional one-hour discussion sections are offered with the lectures. Consult the quarterly *Schedule of Classes* to determine the offerings for each term.

**100. History and Historians. (4)** (Formerly numbered 100A.) Lecture. Designed for juniors/seniors. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians. P/NP or letter grading.

**102. Explorations in Psychoanalysis and History. (4)** Designed for juniors/seniors. Art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory.

**M103A-M103B. Historical Archaeology. (4-4)** (Same as Anthropology M115A-M115B.) Lecture, three hours. Designed for juniors/seniors. P/NP or letter grading.

**M103A.** World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of the discipline both in the Old World and the Americas. **M103B.** American Perspective. Emphasis on historical archaeology in North America, particularly to some practical applications.

**M104A-M104B. Ancient Egyptian Civilization. (4-4)** (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not requisite to M104B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.

**M105. History of Ancient Mesopotamia and Syria. (4)** (Same as Ancient Near East M105.) Lecture, three hours. Designed for juniors/seniors. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period.

**106A-106B-106C. Survey of the Middle East from 500 to the Present. (4-4-4)** Designed for juniors/seniors. Background and circumstances of rise of Islam, creation of the Islamic Empire, and its development. Rise of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development. **106A.** 500 to 1300; **106B.** 1300 to 1700; **106C.** 1700 to the Present.

**107A-107B. Islamic Civilization. (4-4)** Designed for juniors/seniors. **107A.** Premodern Islam. Origins of Islamic civilization, Muhammad and the Qur'an; development of Islamic doctrine, ritual, piety and law, sectarian Islam, and mysticism. **107B.** Islam in the Modern World. Reform movements, legal issues, sociopolitical trends, movements of opposition.

**108A-108B. History of the Arabs. (4-4)** Course 108A is requisite to 108B. Designed for juniors/seniors. Political, social, intellectual, and economic history of the Arabs from the 18th century to the present.

**109A-109B. History of North Africa from the Moslem Conquest. (4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading. **109A.** To 1578; **109B.** 1578 to the Present.

**109C. History of Islamic Iberia. (4)** Designed for juniors/seniors. Survey of political, social, economic, religious, artistic, and literary history of an Islamic culture in Western Europe, with special attention to ethnic and religious pluralism in premodern society and transmission of science and philosophy to Christian Europe. P/NP or letter grading.

**110A-110B. Iranian History. (4-4)** Designed for juniors/seniors. Political, social, and cultural history of Persia. **110A.** Islamic Iran to 1800; **110B.** Iran from 1800 to the Present.

**111A-111B. History of the Turks. (4-4)** Designed for juniors/seniors. Survey of society, government, and political history of the Turks from earliest times to the present. P/NP or letter grading. **111A.** Origins to 1808. Turkish origins, early Central Asian and Middle Eastern states. Rise and fall of the Ottoman Empire. **111B.** 1808 to the Present. Modernization of the Ottoman Empire, 1808-1923. The Turkish Republic. The Turks in the world.

**111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923. (4)** Designed for juniors/seniors. Preliminary introduction to the Jews in Byzantium and the Islamic world before the Ottoman conquest, followed by discussion of Jewish communities and Judaism in Southwestern Europe, Anatolia, and the Middle East while they were under Ottoman rule (1300 to 1923) and in the Turkish Republic since 1923. P/NP or letter grading.

**112A-112B-112C. Armenian History. (4-4-4)** Designed for juniors/seniors. **112A.** Armenia in Ancient and Medieval Times, 2nd Millennium B.C. to A.D. 11th Century; **112B.** Armenia from Cilician Kingdom through Periods of Foreign Domination and National Stirrings, 11th to 19th Centuries; **112C.** Armenia in Modern and Contemporary Times, 19th and 20th Centuries. Armenian question and genocide, national republic, Soviet Armenia, and the dispersion.

**C112D. Introduction to Armenian Oral History. (4)** Lecture/discussion, three hours. Designed for juniors/seniors. Uses and techniques of Armenian oral history; pre-interview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212.

**113. The Caucasus under Russian and Soviet Rule. (4)** Designed for juniors/seniors. Survey of political, economic, social, and cultural history of the Caucasus region since 1801. Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; the national-identity question and the Soviet national republics.

**114. Topics in Middle Eastern History. (4)** Designed for juniors/seniors. Examination of major issues in history of Middle East. P/NP or letter grading.

**115A-115B-115C. History of Ancient Mediterranean World. (4-4-4)** Designed for juniors/seniors. **115A.** Survey of history of the ancient East from earliest times to foundation of the Persian Empire. **115B.** History and institutions of the Greeks from their arrival to the death of Alexander. **115C.** History and institutions of Rome from founding of the city to the death of Constantine.

**116A-116B. History of Ancient Greece. (4-4)** Designed for juniors/seniors. **116A.** Rise of the Greek City-State. Emphasis on archaic period and early classical age through the Persian Wars. **116B.** Classical Period. Clash between Athens and Sparta, consequent rise of Macedonia, and aftermath of Alexander the Great.

**117A-117B-117C. History of Rome. (4-4-4)** Designed for juniors/seniors. P/NP or letter grading. **117A.** To Death of Caesar. Emphasis on development of imperialism and on constitutional and social struggles of the late republic. **117B.** From Death of Caesar to the Time of Constantine. The early empire treated in more detail, supplemented by survey of social and economic changes in the 3rd century. **117C.** Transformation of the Classical World. Political, cultural, and religious history of the Mediterranean in late antiquity, from crisis of Roman Empire in the 3rd century to barbarian and Arab invasions and beginning of medieval states and societies in the 7th century.

**118. Topics in Ancient History. (4)** Designed for juniors/seniors. Introduction to topics in Greek and Roman history, including Roman law, ancient Greek and Roman slavery, world of Caesar Augustus, Greek democracy, and Alexander the Great. May be repeated for credit. P/NP or letter grading.

**C119A. From Roll to Codex: Manuscripts in Early Middle Ages. (4)** (Formerly numbered C119C.) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society to 1100. Concurrently scheduled with course C219A. P/NP or letter grading.

**C119B. From Parchment to Print: Manuscripts in Later Middle Ages. (4)** (Formerly numbered C119D.) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society from 1100 to 1500. Concurrently scheduled with course C219B. P/NP or letter grading.

**119M. The Christian Church, 100 to 1517. (4)** (Formerly numbered 119.) Lecture. Designed for juniors/seniors. Constitutional, political, and economic history of the Church: Christianization of Roman Empire and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. P/NP or letter grading.

**C120A. Interfaces: Transmission of Roman Literature. (4)** Discussion, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand processes by which Latin literature has been preserved. Concurrently scheduled with course CM220A. P/NP or letter grading.

**120M. The Christian Religion, 100 to 1350. (4)** (Formerly numbered 120.) Lecture. Designed for juniors/seniors. Religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. Religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders. P/NP or letter grading.

**121A-121B. Medieval Europe. (4-4)** Designed for juniors/seniors. Basic introduction to Western Europe from Latin antiquity to the age of discovery, with emphasis on medieval use of Greco-Roman antiquity, history of the manuscript book, and growth of literacy. **121A.** 400 to 1000; **121B.** 1000 to 1500.

**121C. Medieval Civilization: Mediterranean Heartlands. (4)** Designed for juniors/seniors. Survey of Western Mediterranean Europe, social/economic/cultural within a political framework, including its relation with other cultures.

**121D. Medieval People: The 13th Century. (4)** Designed for juniors/seniors. Movements and creative contributions to Western culture in this central century of the Middle Ages, as seen in its representative men and works.

**M122. Power and Imagination in Byzantium. (4)** (Same as Classics M170.) Lecture, three hours. Requisites: courses M70, or 123A and 123B. Designed for juniors/seniors. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

**123A-123B. Byzantine History. (4-4)** Designed for juniors/seniors. Political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. Reforms of Diocletian. Byzantium's relations with Latin Europe, Slavs, Sassanids, Arabs, and Turks.

**124A-124B. East-Central Europe. (4-4)** Designed for juniors/seniors. **124A.** The Long 19th Century, 1780 to 1914. Analysis of characteristics of peripheral 19th-century capitalism, effort to modernize and catch up, and factors and consequences of its partial failure in the economy, politics, and culture. **124B.** The Short 20th Century, 1918 to 1990. Analysis and interpretation of stormy history of crisis zone of Europe where wars, revolts and revolutions, different types of extremisms led to a historical detour: 70 years of departure from Western values and at last an effort to turn back to them.

**124C. East-Central Europe in Transition, 1988 to 1993. (4)** Designed for juniors/seniors. State-socialism and Soviet domination collapsed in East-Central Europe in 1989. Analysis of cause and consequence of the collapse, as well as the road of transformation in seven (now 12) countries of the region; international circumstances and domestic political, social, and economic processes. Ideology of transition versus reality of democratization, marketization, and privatization; free choice versus determinant factors. Scenarios for the future. P/NP or letter grading.

**124D. Film and History: Central and Eastern Europe, 1945 to 1989. (4)** Designed for juniors/seniors. Postwar history of central and eastern Europe (1945 to 1989), using eight Czech, Polish, and Hungarian films to explore life under state socialist "modernization dictatorship." P/NP or letter grading.

**125A-125F. History of Modern Europe. (4 each)** Designed for juniors/seniors. P/NP or letter grading:

**125A.** Renaissance and Reformation, 1450 to 1660. Reorganization of power, new forms of representation, and discourses about rule and obedience in Europe from the mid-15th through 16th century; popular culture; peasant society; refashioning of religion and power; localization.

**125B.** Baroque Culture and Absolutist Politics, 1600 to 1715. Changing nature of state and social domination; redeployment of military violence; strategies of population discipline; absolutism and baroque culture; new forms of bureaucratic intervention; representation of the family, sexuality, and the body; witch persecutions.

**125C.** Old Regime and Revolutionary Era, 1715 to 1815. Enlightened absolutism and reform, challenge of new political and economic ideas, crisis of the Old Regime, impact of French Revolution and Napoleonic empire.

**125D.** Bourgeois Century, 1815 to 1914. Restoration politics, Industrial Revolution, uprisings of 1848, unification of Germany and Italy, imperialism, rise of socialism, population growth, changes in social structure, origins of World War I.

**125E.** Era of Total War, 1914 to 1945. World War I, interwar period, and World War II. Social, cultural, political, and economic aspects, with focus on strain between model of parliamentary democracy and dynamics of mass politics (e.g., Bolshevik Revolution, Italian Fascism, national socialism, and Spanish Civil War).

**125F.** World War II and Its Aftermath, 1939 to the Present. World War II, origins and persistence of the Cold War, reconstruction in the West, de-Stalinization, decolonization, crisis of the welfare state, background to and course of the 1989 revolutions, current political configuration.

**126A-126F. Cultural and Intellectual History of Modern Europe. (4 each)** Designed for juniors/seniors.

Climates of taste and climates of opinion. Educational, moral, and religious attitudes; art, thought, and manners of the time in historical context. P/NP or letter grading. **126A.** 15th Century. Renaissance cultural and intellectual history of Europe. Central themes include comparative history of ideas, theory and practice of art and architecture, civic and religious humanism, religious experience, and new cultural genres of history and philological scholarship. **126B.** 16th Century. **126C.** 17th Century. **126D.** 18th Century. **126E.** 19th Century. **126F.** 20th Century.

**127A-127B-127C. War and Diplomacy in Europe. (4-4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading. **127A.** 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and growth of the state. **127B.** 1815 to 1945. Changing patterns of warfare and diplomatic attempts to contain Great Power rivalries; wars of national unification; imperialism; shifting balance of power and alliances; origins, course, and effects of two World Wars. **127C.** The Cold War. Relations of the West, Soviet Union, and the world from 1945 to 1991. Origins, development, and end of power-political, military, and ideological confrontations between the superpowers and their allies and clients in Europe, Asia, and Latin America.

**128A-128B-128C. History of France. (4-4-4)** Designed for juniors/seniors. **128A.** France, 1500 to 1715. Social history of 16th- and 17th-century France, including growth of monarchy, wars of religion, peasant uprisings, popular culture, Catholic resurgence, Louis XIV and achievements in arts and literature. **128B.** France, 1715 to 1871. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, collapse of the state, Napoleonic era, reconstruction of society through the monarchies and revolutions of the 19th century. **128C.** The Making of Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics.

**129A. Baroque and Enlightenment Germany. (4)** Designed for juniors/seniors. Development of state institutions, culture, and society in Central Europe from end of Thirty Years' War to end of Napoleonic Wars. Consideration of absolutism as a political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

**129B. Nationalism and Modernization in 19th-Century Germany. (4)** Designed for juniors/seniors. Problems of class society and state formation, emancipation, assimilation, growth of national consciousness, emergence of a "bourgeois public sphere," dynamics of gender in civil society and political life, post-Napoleonic tensions between reform and reaction, 1848, and national unification. P/NP or letter grading.

**129C. 20th-Century Germany. (4)** Designed for juniors/seniors. Transitions that Germany has faced during this century: two world wars, shift from monarchy to republic to national socialism to a "divided nation," and finally "reunification." Consideration of political, social, economic, and cultural spheres. P/NP or letter grading.

**129D. History of the Low Countries. (4)** Lecture. Designed for juniors/seniors. Examination of aspects of Dutch (and on occasion Belgian) history from medieval period to period after World War II, with emphasis on political and cultural history. Topics include Middle Ages, Dutch Republic in the 17th and 18th centuries, Low Countries from 1830 to 1918, Netherlands and Belgium in context of Europe after 1945. P/NP or letter grading.

**130. Europe in the Age of Revolution, Circa 1775 to 1815. (4)** (Formerly numbered 130A-130B-130C.) Lecture. Designed for juniors/seniors. Period from revolt of the Thirteen Colonies to French Revolution of 1789, and Napoleonic regime, viewing social and political changes unleashed by these revolutionary movements in a comparative and transnational perspective. P/NP or letter grading.

**131A-131D. History of Russia. (4 each)** Designed for juniors/seniors. P/NP or letter grading:

**131A.** From the Origins to the Rise of Muscovy, Kievan Russia and its culture, Appanage principalities and towns; the Mongol invasion; unification of the Russian state by Muscovy, Autocracy and its Servitors; serfdom.

**131B.** Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; peasant problem; beginnings of industrialization; movements of political and social protest; non-Russian peoples; political reforms and social changes; Revolution of 1905; Russia in World War I; fall of the old regime.

**131C.** Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendancy of Stalin, collectivization and industrialization; foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability?

**131D.** Culture and Society in Imperial Russia. Recommended preparation: course 131B or Russian 99A or 119. Thematic examination of culture and society in Russia during era of state-sponsored Westernization (1689 to 1917). Topics include nobility, peasantry, and village life from serfdom to postemancipation era, urban society, working-class life and thought, women, clergy, religion, popular culture, accommodation, and resistance.

**132A-132B-132C. History of Italy. (4-4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading.

**132A.** 1350 to 1559. Most important social, economic, political, and cultural developments in history of Italy during later Middle Ages and Renaissance. **132B.** 1559 to 1848. (Formerly numbered 132A.) Counter-Reformation and absolutism, Enlightenment reforms, revolutionary era, and first phase of the Risorgimento. **132C.** 1848 to the Present. (Formerly numbered 132B.) Political, economic, social, diplomatic, and ideological developments.

**133A-133B. Social History of Spain and Portugal. (4-4)** Designed for juniors/seniors. **133A.** Age of Silver in Spain and Portugal, 1479 to 1789. Development of popular history in the Iberian Peninsula. Emphasis on peasants and urban history, gold routes, slave trade, history of women, and development of different types of collective violence. **133B.** Rebellion and Revolution in Modern Spain and Portugal, 1789 to the Present. Spain's position in Europe and its potentialities for social change discussed through investigations of urban history, agrarian social structure, history of women, problems of slow industrial development, imperialism, anarchism, and labor history.

**134A. Southeastern Europe, 500 to 1500. (4)** Designed for juniors/seniors. Political, economic, and cultural survey of the independent Balkan states in the Middle Ages.

**134B. Southeastern Europe, 1500 to 1918. (4)** Designed for juniors/seniors. The Balkans under Ottoman rule, movements of national liberation, and formation of nation states.

**135A-135B. Marxist Theory and History. (4-4)** Course 135A is generally requisite to 135B. Designed for juniors/seniors. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist analyses of transition from feudalism to capitalist economy via reading *Capital*; theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises.

**136. Topics in European History. (4)** Designed for juniors/seniors. Integrated introduction to important aspects of European history, with emphasis on a specific topic within a broad framework. May be repeated for credit. P/NP or letter grading.

**137A-137B. History of Women in Europe. (4-4)** (Formerly numbered 137A-137B-137C.) Lecture. Designed for juniors/seniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to the present. P/NP or letter grading. **137A.** 800 to 1715; **137B.** 1715 to the Present.

**138A-138B. Topics in Medieval English History. (4-4)** Designed for juniors/seniors. Topics include the village community and economy, family and landholding, Church and society, war, politics, and feudal relations.

**139B-139C. Economic History of Europe. (4-4)** Designed for juniors/seniors. P/NP or letter grading. **139B.** 1780 to 1914. Analysis of emergence of "European world economy," first Industrial Revolution, revolutionary changes in technology, demographic patterns, education, transportation, and interrelationship between Western core and European peripheries in process of industrialization. **139C.** 20th Century. Changing European economy after World War I and II and in the 1990s; impact of fourth and fifth Industrial Revolutions; Great Depressions of the century during the 1930s, 1970s, and 1980s; and changing modernization strategies; import-substituting industrialization in the peripheries; Soviet "modernization dictatorship" in East Central Europe and its collapse; integration process of second half of the century and rise of European Union; modernization model at end of the century.

**140A-140B-140C. Europe and the World. (4-4-4)** Lecture. P/NP or letter grading:

**140A.** Exploration and Conquest, 1400 to 1700. (4) Lecture. First phase of European expansion in the Americas, Africa, and Eurasia. Analysis of motives and methods of expansion, differing patterns of European settlement, including plantation economy, and development of new commercial networks, including Atlantic slave trade. P/NP or letter grading.

**140B.** Colonialism, Slavery, and Revolution, 1700 to 1870. (4) Lecture. Origins and gradual increase of European dominance of world trade, impact of European colonialism in New World, Africa, and Asia, influence of new revolutionary ideals that took shape in wake of Enlightenment of the 18th century, and beginnings of industrialization. P/NP or letter grading.

**140C.** Imperialism and Post-Colonialism, 1870 to the Present. (4) Lecture. Survey of major European events and trends and their impact on world in modern period. Interrelationship of European and world history, from partition of Africa to founding of India and Pakistan. Global consequences of Cold War and new place of Europe in the world. P/NP or letter grading.

**141A-141B-141C. History of Britain. (4-4-4)** Designed for juniors/seniors. Analysis of British economy, society, and polity, focusing on dynamics of both stability and change. P/NP or letter grading. **141A.** Tudor-Stuart Times, 1485 to 1715. Political, socioeconomic, religious, and cultural history of Britain under the Tudors and Stuarts. Topics include Reformation, transformation of the economy, establishment of overseas colonies, 17th-century political upheavals and their impact on political and socioeconomic structures. **141B.** Making of Modern Britain, 1715 to 1867. Social, economic, political, and cultural history of Britain from Hanoverian revolution in politics to advent of mass democracy in mid-Victorian era. Themes include social change under pressure of industrialization, emergence of first British Empire, loss of America, shifts in religious and social position. **141C.** Modern Britain since 1832.

**142A-142B. British Empire since 1783. (4-4)** Designed for juniors/seniors. Political and economic development of the British Empire, including evolution of colonial nationalism, development of the commonwealth idea, and changes in British colonial policy.

**143. History of Canada. (4)** Designed for juniors/seniors. Survey of growth of Canada into a modern state from its beginnings under the French and British colonial empires.

**144. History of Australasia. (4)** Designed for juniors/seniors. History of Australia and New Zealand from the European settlement, with emphasis on interrelationships between settlers and aborigines; comparisons and contrasts between the Australian and New Zealand experience.

**145A. Colonial America, 1600 to 1763. (4)** Designed for juniors/seniors. Examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on interaction of three converging cultures: Western European, West African, and American Indian.

**145B. Revolutionary America, 1760 to 1800. (4)** Designed for juniors/seniors. Inquiry into origins and consequences of the American Revolution, nature of the revolutionary process, creation of a constitutional national government, and development of a capitalist economy. P/NP or letter grading.

**146. U.S. History, 1800 to 1850. (4)** (Formerly numbered 146A.) Designed for juniors/seniors. Discussion of major social, political, economic, and cultural transformations of first half of the 19th century and how these changes helped to drive a wedge between the North and South. P/NP or letter grading.

**147A. U.S., Civil War and Reconstruction. (4)** Designed for juniors/seniors. Rise of sectionalism, antislavery crusade; formation of the Confederate States; war years; political and social reconstruction.

**147B. U.S., 1875 to 1900. (4)** Designed for juniors/seniors. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of role of government and responses to that alteration.

**147C. American South, 1877 to the Present. (4)** Designed for juniors/seniors. Analysis of political, economic, social, intellectual, and cultural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights movement.

**148A-148B. U.S., 20th Century. (4-4)** Lecture. Designed for juniors/seniors. Political, economic, intellectual, and cultural aspects of American democracy. P/NP or letter grading. **148A.** 1900 to 1928; **148B.** 1929 to 1960.

**148C. U.S. since 1960. (4)** Lecture. Designed for juniors/seniors. History of political, social, and diplomatic developments that have shaped the U.S. since 1960. P/NP or letter grading.

**149A-149B. American Economic History. (4-4)** Designed for juniors/seniors. **149A.** 1790 to 1910. Roles of economic forces, institutions, individuals, and groups in promoting or impeding effective change in the American economy, 1790 to 1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. **149B.** 1910 to the Present. Dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependency between the U.S. and world economy, 1910 to the present.

**150A-150B. Intellectual History of the U.S. (4-4)** Designed for juniors/seniors. Principal ideas about humanity and God, nature and society, which have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought.

**150C. History of Religion in the U.S. (4)** Designed for juniors/seniors. Consideration of the religious dimension of people's experience in the U.S. Examination of a number of religious traditions which have been important in this country, with emphasis on relating developments in religion to other aspects of American culture.

**151A-151B. Constitutional History of the U.S. (4-4)** Designed for juniors/seniors. **151A.** Origins and Development of Constitutionalism in the U.S. Particular emphasis on framing of the Federal Constitution in 1787 and its subsequent interpretation. Judicial review, significance of the Marshall Court, and effects of slavery and the Civil War on the Constitution. **151B.** Constitutionalism since the Civil War. Particular emphasis on development of the Supreme Court, due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

**152A-152B. American Diplomatic History. (4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading. **152A.** Establishment of an independent foreign policy, territorial expansion of the U.S., and emergence of a world power. **152B.** Role of the U.S. in the 20th-Century World.

**152BH. American Diplomatic History (Honors). (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Role of the U.S. in the 20th-century world.

- M153. The U.S. and the Philippines. (4)** (Same as Asian American Studies M153.) Lecture, three hours. Recommended preparation: courses 190A, 190B, 190C. Designed for juniors/seniors. Examination of complex interrelationships between U.S. colonialism, Philippine nationalism, history of Filipino Americans, and Philippine diaspora in the 20th century.
- 154A-154B. U.S. Urban History. (4-4)** Designed for juniors/seniors. **154A.** U.S. Cities: Overview. Demographic, geographic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history. **154B.** Topics in U.S. Urban History. Requisite: course 154A. Exploration of one aspect of U.S. urban history in depth without having to attend to basic chronology or geography. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations.
- 154C-154D. History of American Architecture and Urban Planning, 1600 to the Present. (4-4)** Designed for juniors/seniors. Aspects of American cultural history as explored through architecture, urban planning, and allied arts, with emphasis on development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and extent to which it has reflected their values and ways of living. **154C.** 1600 to 1890; **154D.** 1890 to the Present.
- 155A-155B. American Working Class Movements. (4-4)** Designed for juniors/seniors. Major episodes in social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor politics.
- 156A-156B. American Social History, 1750 to 1960. (4-4)** Designed for juniors/seniors. Historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. **156A.** 1750 to 1860; **156B.** 1860 to 1960.
- 156C. History of Women in Colonial British America and Early U.S., 1600 to 1860. (4)** Lecture. Designed for juniors/seniors. Introduction to major themes in history of early American women from initial confrontation of English and American Indian cultures in the early 17th century to rise of women's rights movement in the mid-19th century. P/NP or letter grading.
- 156D. History of Women in the U.S., 1860 to 1980. (4)** Lecture. Designed for juniors/seniors. Introduction to major themes in history of American women from abolition of slavery and Civil War to rise and consequences of second-wave feminism. P/NP or letter grading.
- 156H. Medicine and Society in 19th-Century America. (4)** Designed for juniors/seniors. Therapeutics, theories of disease, and medical science scrutinized with the understanding that these are never value-neutral, but are shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in the 19th century?
- 157A-157B. North American Indian History. (4-4)** Designed for juniors/seniors. History of Native Americans from contact to the present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. P/NP or letter grading. **157A.** Precontact to 1830; **157B.** 1830 to the Present.
- M158A. Comparative Slavery Systems. (4)** (Same as Afro-American Studies M158A.) Designed for juniors/seniors. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.
- M158B-M158C. Introduction to Afro-American History. (4-4)** (Same as Afro-American Studies M158B-M158C.) Designed for juniors/seniors. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieus.
- 158D. Afro-American Urban History. (4)** Designed for juniors/seniors. Examination of Afro-American urban life prior to 1945, with emphasis on transformation from slavery to freedom and shift from Southern to Northern areas. Forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.
- M158E. African American Nationalism in First Half of the 20th Century. (4)** (Same as Afro-American Studies M158E.) Designed for juniors/seniors. Critical examination of the African American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.
- M159A. History of the Chicano Peoples. (4)** (Same as Chicana and Chicano Studies M159A.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.
- M159B. History of the Chicano Peoples. (4)** (Same as Chicana and Chicano Studies M159B.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.
- 160A-160B. U.S. and Comparative Immigration History. (4-4)** Designed for juniors/seniors. Use of overlapping diaspora model which integrates North Atlantic (Europe), South Atlantic (Afro-Caribbean), Pacific (China/Japan/Hawaii), and Latin (Mexico to Brazil) worlds to provide chronological and analytic survey of American and comparative immigration from 1750 to the present. Special focus on Southern California in course 160B. P/NP or letter grading.
- 161. Asians in American History. (4)** Designed for juniors/seniors. Study of the politically troubling question of entry into the U.S. of immigrants ineligible for citizenship and their citizen children in American history.
- 162. American West. (4)** Designed for juniors/seniors. Study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present.
- 163. History of California. (4)** Designed for juniors/seniors. Economic, social, intellectual, and political development of California from earliest times to the present. P/NP or letter grading.
- 164. History of Los Angeles. (4)** Designed for juniors/seniors. Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to the present. Emphasis on the diverse peoples of the area, changing physical environment, various interpretations of the city, and Los Angeles' place among American urban centers.
- 165A. Early Latin America. (4)** Designed for juniors/seniors. Advanced survey of Latin American history from conquest to independence, with emphasis on society, culture, and ethnic aspects.
- 165C. Indians of Colonial Mexico. (4)** Designed for juniors/seniors. Survey of social and cultural history of the Indians of Mexico, especially central Mexico, from time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves.
- 166. Latin America in the 19th Century. (4)** Designed for juniors/seniors. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910.
- 167A-167D. Latin America in the 20th Century. (4 each)** Designed for juniors/seniors. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized government agencies (emphasized in course 167A), role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "rightist" and "leftist" models of development (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are studied according to the chronological contribution to the theme emphasized. **167A.** Haiti, Uruguay, Costa Rica, Cuba, Chile; **167B.** Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; **167C.** Panama, Colombia, Ecuador, Honduras, El Salvador; **167D.** Brazil, Guatemala, Peru, Nicaragua.
- 168. History of Latin American International Relations. (4)** Designed for juniors/seniors. Emphasis on developing interests of Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence.
- 169. Latin American Eliteloire. (4)** Requisite: course 167A, 167B, 167C, or 171. Designed for juniors/seniors. Eliteloire (defined as oral or noninstitutionalized knowledge involving leaders' conceptual and perceptual life history views) in contrast to folklore (followers' traditional or popular views). Eliteloire genres include oral history, literature, and cinema.
- 170A. Latin American Cultural History. (4)** Designed for juniors/seniors. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique contribution of Latin Americans to develop self-interpretation. Music, films, and slides supplement discussions.
- 170B. Classic Travel Accounts of Latin America since 1735. (4)** Designed for juniors/seniors. Recommended for prospective researchers before they select their region of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area.
- 170C. Issues in Latin America History. (4)** Designed for juniors/seniors. Examination of major issues in history of Latin America. P/NP or letter grading.
- 171. Mexican Revolution since 1910. (4)** Designed for juniors/seniors. Examination of concept of "permanent crisis" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.
- 172. History of Argentina. (4)** Designed for juniors/seniors. History of economic, political, social, and cultural developments that have shaped Argentina from colonial time to the present. Emphasis on 19th-century development of an agro-export economy and 20th-century formation of a mass society.
- 173. Modern Brazil. (4)** Designed for juniors/seniors. Selected topics in political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement lectures.
- 174. Brazilian Intellectual History. (4)** Designed for juniors/seniors. General intellectual development of Brazil, with emphasis on those introspective movements in which Brazilians attempted to interpret themselves, their nation, and their civilization.
- M175A-175Z. Topics in African History. (4 each)** Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Examination of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis. P/NP or letter grading:
- M175A.** Prehistoric Africa — Technological and Cultural Traditions. (4) (Same as Anthropology M119.) Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

**175B. Africa and the Slave Trade. (4)** Social, economic, political, and cultural impact of the slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and the African diaspora. P/NP or letter grading.

**175C. Africa in the Age of Imperialism. (4)** Topics include penetration of precapitalist social formations by capital, emergence of classes, nature of the colonial and postcolonial state, and struggle for national liberation in a global context. P/NP or letter grading.

**175D. Africa and the Diaspora in Global and Comparative Perspective. (4)** Forced migration of Africans through overseas slave trade was formative event of the modern world. Exploration of that experience and its lasting consequences by placing it in its global context — African, American, European, Islamic, and Asian. P/NP or letter grading.

**175E. Africa from 1945 to the Present. (4)** History of Africa south of the Sahara from end of World War II to the present. Last phases of colonial rule in Africa, African nationalism, Pan-Africanism, liberation movements, and achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, experiments in national development, apartheid in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957. P/NP or letter grading.

**176A-176B. History of West Africa. (4-4)** Designed for juniors/seniors. **176A.** West Africa from Earliest Times to 1800; **176B.** West Africa since 1800.

**176C. Social and Economic History of West Africa since 1600. (4)** Designed for juniors/seniors. Analysis of main currents of West African social, cultural, and economic history since the fall of the Songhai Empire, with emphasis on the family, religious values, education, urbanization, migrations, arts, slavery, and the slave trade. Roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and sociopolitical integration; colonial economic systems and efforts at economic planning and development since the 1950s.

**177. History of Northeast Africa. (4)** Lecture. Designed for juniors/seniors. Survey of history of Ethiopia, Sudan, and Somalia in regional context of northeast Africa from earliest times to the present, with emphasis on economy and society, evolution of the state, and significance of Christianity and Islam. P/NP or letter grading.

**178A. History of East Africa. (4)** (Formerly numbered 178A-178B.) Lecture. Designed for juniors/seniors. Survey of cultural diversity of east Africa from earliest times to growth of complex societies, its place within wider Indian Ocean system, and colonial conquest to gaining of independence and postcolonial challenges. P/NP or letter grading.

**178B. History of Central Africa. (4)** (Not the same as course 178B prior to Winter Quarter 1999.) Lecture. Designed for juniors/seniors. Survey of history of central Africa from earliest times, with emphasis on establishment of agriculture, growth of trade, rise of states, and incorporation of region into world economy. P/NP or letter grading.

**179A-179B. History of Southern Africa. (4-4)** Designed for juniors/seniors. Attention to social and economic as well as political aspects. P/NP or letter grading.

**179A.** From the Origins to 1870. Origins of the South African peoples and their interactions to 1870. **179B.** Since 1870. Interactions between inhabitants of southern Africa since 1870.

**182A-182B. Thought and Society in China. (4-4)** Designed for juniors/seniors. **182A.** To 1000. Recommended preparation: course 11A. Elite and popular expressions of Chinese cultural life examined in readings and lectures. Focus on diversities of thought in the classical legacy and their evolution under the impact of Buddhism to 1000. Emphasis on intersections between intellectual life and social, political, and economic conditions. **182B.** Since 1000. Recommended preparation: course 11B. Elite and popular expressions of Chinese cultural life from 1000 to the 20th century. Emphasis on social, political, and economic conditions within which Chinese orthodox and heterodox values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in the 20th century in light of earlier currents of thought.

**183A. Culture and Power in Late Imperial China. (4)** Recommended preparation: courses 11A, 11B. Designed for juniors/seniors. Analysis of relations of power and cultural expressions of dominance and resistance in late imperial China (1000 to 1700), with emphasis on interplay of economic forces, ideas, and social and political institutions. Examination of institutions of state, family, school, and city; idioms of folk religion, death, and the afterlife; political, legal, and medical discourses of body, personhood, and social identity; love, sexuality, and private life. P/NP or letter grading.

**183B. Selected Topics in Chinese History from 1500. (4)** (Not the same as course 183B prior to Fall Quarter 1999.) Recommended requisite: course 11B. Designed for juniors/seniors. Selected topics that may vary from year to year. Recent offerings include law, society, and culture; society and economy; and rural China. P/NP or letter grading.

**183C. History of Women in China, A.D. 1000 to the Present. (4)** Designed for juniors/seniors. Topics include women and the family, women in Confucian ideology, women in literati culture, feminist movement, and women and the communist revolution. P/NP or letter grading.

**184. 20th-Century China. (4)** Recommended preparation: course 11B. Designed for juniors/seniors. Political events and intellectual developments seen in context of social-economic trends; human agency, structural change, and historical conjunctures in the 20th century.

**185A. Japanese Popular Culture. (4)** (Formerly numbered 185.) Lecture. Designed for juniors/seniors. Topics in 18th-, 19th-, and 20th-century Japanese history, including legacy of premodern satire in postmodern comic books, American culture in 1930s' Japanese visual culture, gender in photography, and relationship of monster movies to postwar politics. P/NP or letter grading.

**185B. Women in 20th-Century Japan. (4)** Lecture. Designed for juniors/seniors. Japanese women in Japanese and world history through state documents, autobiographical voices, contemporary television, and other varying historical sources, including topics such as women and new political order (1900 to 1930), women, war, and empire (1930 to 1945), and women in consumer society (1980s to 1990s). P/NP or letter grading.

**186. Shinto, Buddhism, and Japanese Folk Religion. (4)** Designed for juniors/seniors. Social dimension of various "Ways," great and little: Shinto's connection with cultural nationalism, Buddhism's medieval "Reformation" and Zen's relation to the warrior culture, folk religious aspects such as shamanism, ancestor worship, and millenarianism.

**187A-187B-187C. Japanese History. (4-4-4)** Designed for juniors/seniors. Political, economic, and cultural development of Japan from prehistory to the present. P/NP or letter grading. **187A.** Ancient, Prehistory to 1600; **187B.** Early Modern, 1600 to 1868; **187C.** Modern, 1868 to the Present.

**188A. Early History of India. (4)** Designed for juniors/seniors. Introduction to civilization and institutions of India. Survey of history and culture of the South Asian subcontinent from earliest times to founding of the Mughal Empire.

**188B-188C. History of British India I, II. (4-4)** Designed for juniors/seniors. **188B.** Examination of expansion of British rule, theories and practice of governance, constitution of India as an "oriental despotism," epistemological projects of the state, and other modes by which the British achieved the conquest of knowledge. **188C.** Political economy of imperialism and Britain's "civilizing mission." Encounter, especially in terms of race and gender, between the colonized and colonizers and to questions of resistance and nationalism.

**188D. Classical Age of Indian History, A.D. 300 to 1000. (4)** Lecture. Designed for juniors/seniors. Age of glory under Imperial Guptas and subsequent consolidation under Harsha (north India) and Vakatakas, Chalukya, Pallava, and Chola (central and south India); emergence of Sanskrit as Pan-Indian language; spread of Indian culture in central and Southeast Asia. P/NP or letter grading.

**188E. Bhakti Traditions in Indian History. (4)** Lecture. Designed for juniors/seniors. Study of Bhakti or devotional traditions of India as part of "Great Tradition" of classical Hinduism; involvement of women; emergence of Sikhism. P/NP or letter grading.

**189A. Cultural and Political History of Contemporary South Asia. (4)** Designed for juniors/seniors. Problem of modernity; partition of India and emergence of Pakistan; political, social, ecological, and women's movements; struggle for rights and conflicts of identity among Muslims, Hindus, and Sikhs; terrorism in Sri Lanka and Punjab; public culture, popular cinema, and street life. P/NP or letter grading.

**M189B. Indian Identity in the U.S. and the Diaspora. (4)** (Formerly numbered 189B.) (Same as Asian American Studies M133.) Lecture, three hours. Designed for juniors/seniors. History of overseas Indian communities; transformations of Hinduism in diaspora; emergence of new diasporic art forms such as bhangra rap and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

**189C. Special Topics in Contemporary Indian History. (4)** Designed for juniors/seniors. Treatment of major issues in history of contemporary India. P/NP or letter grading.

**190A-190B. History of Southeast Asia. (4-4)** Designed for juniors/seniors. **190A.** Early History of Southeast Asia. Political and cultural history of the peoples of Southeast Asia from earliest times to about 1815. **190B.** Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in political and economic spheres, growth of nationalism, and process of decolonization.

**190C. Philippine History. (4)** Designed for juniors/seniors. Social, cultural, and political history of Philippine societies from the Spanish conquest through independence. Emphasis on questions of identity under colonialism, understanding the Revolutions of 1896 and 1898, and politics of Philippine nationalist discourse. Readings include introduction to major issues in Philippine historiography and literature. P/NP or letter grading.

**190D. Vietnam: Past and Present. (4)** Designed for juniors/seniors. Survey of history and culture of Vietnam from about 700 B.C. to the present, including political, social, and economic developments as well as international relations in post-1954 period. P/NP or letter grading.

**190E. Premodern Vietnamese History. (4)** Lecture. Designed for juniors/seniors. Overview of history of people of Vietnam to beginning of colonial period (circa 1880), covering political, social, economic, cultural, and religious developments. Consideration of impact of Vietnamese past on modern age. P/NP or letter grading.

**M191A-M191B. Survey of Jewish History. (4-4)** (Same as Jewish Studies M191A-M191B.) Designed for juniors/seniors. Survey of social, political, and religious developments. **M191A.** From Biblical Times to End of the Middle Ages; **M191B.** From End of the Middle Ages to the Present.

**M191C-M191D. Focal Themes in Jewish History. (4-4)** (Same as Jewish Studies M191C-M191D.) Designed for juniors/seniors. Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through the ages.

**191E-191F. The Third Reich and the Jews. (4-4)** Designed for juniors/seniors. **191E.** History of modern anti-Semitic ideologies and movements. Rise of national socialism in Germany. Development and execution of Nazi anti-Jewish policy to outbreak of World War II. **191F.** Second World War. Implementation of Nazi plans for extermination of Jews in Nazi-dominated Europe. Life in Nazi-imposed ghettos. Forms of Jewish resistance. Fate of Jewish populations in the occupied territories.

**191G. European Jewry from 1881 to the Present. (4)** Designed for juniors/seniors. Survey of major social, economic, and political factors that shaped the lives of Europe's Jews from outbreak of the First World War to the present. Emphasis on the diverse Jewish communities of interwar Europe, fate of Jews under the Nazis, and character of the postwar Jewish community. P/NP or letter grading.

**M192A-M192B. Jewish Intellectual History. (4-4)** (Same as Jewish Studies M192A-M192B.) Designed for juniors/seniors. **M192A.** Medieval Period. Examination of three intellectual worldviews that competed for hegemony in the medieval Jewish world — rabbinic Judaism, medieval rationalism as embodied in philosophy, and cabala; **M192B.** Modern Period. Exploration of some of most important currents and figures in Jewish intellectual history from the 18th century to the present.

**193A. History of Religions: Myth. (4)** Designed for juniors/seniors. Nature and function of myth in history of religion and culture. Examples selected from nonliterate as well as from other Asian and European traditions.

**193B. Religions of South and Southeast Asia. (4)** Requisite: course 4 or 193A. Designed for juniors/seniors. Topics vary from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

**193C. Religions of South and Southeast Asia. (4)** Requisite: course 4 or 193A. Designed for juniors/seniors. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

**193D. Religions of the Ancient Near East. (4)** Designed for juniors/seniors. Main polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and with reference to the religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct.

**193E. Special Topics in History of Religions. (4)** Designed for juniors/seniors. Topics announced in *Schedule of Classes* and include ancient Germanic cults; Renaissance mysticism; mystics of the low countries; goddesses; religion in a secular age.

**194A. History of Early Christians. (4)** Designed for juniors/seniors. Christian movement from its origins to circa 160 C.E., stressing its continuity/discontinuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, movement's encounters with its religious, social, and political world, and methods of research.

**194B. Religious Environment of Early Christians. (4)** Designed for juniors/seniors. Rich variety in religious practice and thought in the Mediterranean world of the 1st century C.E. as in context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, "mysteries," astrology, magic, gnosticism, and emperor-worship.

**194C. Jesus of Nazareth in Historical Research. (4)** Recommended preparation: course 194A. Designed for juniors/seniors. Stimulated by significant post-Enlightenment historical evaluations, students are led into first-hand knowledge (in translation) of various multilayered sources for reconstruction of the life, teaching, and initial impact of Jesus of Nazareth in his social, economic, political, and religious contexts.

**195A. History of Medicine: Historic Roots of Healing Arts. (4)** (Not the same as course 195A prior to Spring Quarter 2001.) Lecture. Designed for juniors/seniors. Introduction to traditions, practices, goals, and myths of Western healing professions from time of ancient Greeks to the Renaissance. Topics range from Hippocrates, Galen, and scholars at Alexandria to healing at Epidaurus and Salerno, contributions of medieval Muslim and Jewish doctors, rise of healing professions, medical faculties, nursing orders, and hospitals. P/NP or letter grading.

**195B. History of Medicine: Foundations of Modern Medicine. (4)** (Not the same as course 195B prior to Spring Quarter 1999.) Lecture. Designed for juniors/seniors. Cultural, scientific, and social context that shaped modern medicine, from the Renaissance to Romantic era. Topics include establishment of anatomy, physiology, and modern clinical medicine, mapping of human body, medical approach to mental illness, rise of anatomo-clinical method at Paris School. P/NP or letter grading.

**195C. Historical Perspectives on Gender and Science. (4)** (Not the same as course 195C prior to Spring Quarter 1999.) Lecture. Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persona of "man of science," role of women in scientific revolution, scientific investigations of women and the feminine. P/NP or letter grading.

**195D. Science and Technology in the 20th Century. (4)** Lecture. Designed for juniors/seniors. Development of science and technology and their impact on society. Industrialization, global scientific community, social Darwinism, atomic bomb and nuclear proliferation, Cold War and American science, environmentalism, molecular biology and genetic engineering. P/NP or letter grading.

**195E. Topics in History of Science. (4)** Lecture. Designed for juniors/seniors. Topics may include science and colonialism, science and religion, environmental history, science in Enlightenment, development of theory of evolution, science and public policy, public nature of science. P/NP or letter grading.

**196. Field Research Methods. (4)** Lecture, three hours. Designed for juniors/seniors. Provides opportunity for students to learn and practice field research, with particular emphasis on relationship between theory, field methodology, and research findings. P/NP or letter grading.

**197A-197Z. Undergraduate Seminars. (4 each)** Seminar, three hours. Designed for juniors/seniors. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. May be repeated once for credit. When concurrently scheduled with courses 201A through 201U or M203A and M203B, undergraduates must obtain consent of instructor to enroll. P/NP or letter grading.

**199. Special Studies in History. (4)** Designed for juniors/seniors. Intensive directed research program. Eight units may be applied toward major requirements.

**199HA. Directed Study for Honors. (4)** Discussion, three hours. Limited to history honors program students. Must be taken in Spring Quarter of junior year. Seminar on historical research and writing; student meetings with honors adviser to define research and preparation for the project. Extensive reading and research in field of proposed honors thesis.

**199HB. Directed Study for Honors. (4)** Requisite: course 199HA. Must be taken in Fall Quarter of senior year. Independent study and research on honors project under supervision of honors adviser, with presentation of research report and thesis outline to thesis adviser and second reader at end of quarter. Both must approve continuation of honors thesis project. In Progress grading (credit to be given only on completion of course 199HC). Only students approved for course 199HC receive credit for this course.

**199HC. Directed Study for Honors. (4)** Discussion, three hours. Requisite: course 199HB. Must be taken in Winter Quarter of senior year. Preparation of final version of honors thesis and presentation of portions of work-in-progress to other students engaged in honors projects. Completed thesis must be submitted to thesis committee by last day of class in Winter Quarter.

**199I. Independent Studies for Internships. (4)** Preparation: maintenance of 3.0 grade-point average in major. Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 197 or 199. Normally, only 4 units of internship with History Department are allowed. P/NP grading.

## Graduate Courses

**200A-200U. Advanced Historiography. (4 each)** Seminar, three hours. May be repeated for credit. **200A.** Ancient Greece; **200B.** Ancient Rome; **200C.** Medieval; **200D.** Europe; **200H.** U.S.; **200I.** Latin America; **200J.** Near East; **200K.** India; **200L.** China; **200M.** Japan; **200N.** Africa; **200O.** Science/Technology; **200P.** History of Religions; **200Q.** Theory of History; **200R.** Jewish History; **200S.** Armenia and the Caucasus; **200T.** Southeast Asia; **200U.** Psychohistory.

**M200V. Advanced Historiography: Afro-American. (4)** (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

**M200W. Advanced Historiography: American Indian Peoples. (4)** (Same as American Indian Studies M200A.) Lecture, 90 minutes; seminar, 90 minutes. Introduction to culture-histories of North American Indians and review of Indian concepts of history. Stereotypical approach to content and methodologies related to the Indian past that is interdisciplinary and multicultural in its scope. Letter grading.

**200X. Advanced Historiography: Oral History. (4)** Seminar, three hours. Introduction to practice, method, and theory of oral history.

**200Y. Advanced Historiography: Application of Economics to History. (4)** Discussion, three hours.

**200Z. Advanced Historiography: Chicano. (4)** Discussion, three hours. Graduate survey of leading literature in Chicano history, with emphasis on new methodological and theoretical approaches in the field.

**201A-201U. Topics in History. (4 each)** Seminar, three hours. Topic titles are same as for courses 200A through 200U. Graduate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain consent of instructor to enroll.

**202A-202B. Seminars: Comparative Modern Economic History. (4-4)** Discussion, three hours. Designed for graduate students. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress and S/U or letter grading.

**M203A-M203B. Social Theory and Comparative History. (4-4)** (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**M203C. Theories in Cultural History. (4)** (Same as Sociology M296C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material. Letter grading.

**204A-204B. Seminars: Near and Middle Eastern History. (4-4)** Seminar, three hours. Methodology, socioeconomic and political change in the Arab world. In Progress and S/U or letter grading.

**205A-205B. Seminars: Medieval Middle Eastern History. (4-4)** Seminar, three hours. In Progress and S/U or letter grading.

**206A-206B. Seminars: Social History of the Middle East. (4-4)** Seminar, three hours. Interrelationship of city, tribe, and village in the Middle East; role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change. In Progress and S/U or letter grading.

**M207. Seminar: Ancient Mesopotamia. (4)** (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

**209A-209B. Seminars: Ottoman and Modern Turkish History. (4-4)** Seminar, three hours. In Progress and S/U or letter grading.

**211A-211B. Seminars: Armenian History. (4-4)** Seminar, three hours. In Progress and S/U or letter grading.

**C212. Methods in Armenian Oral History. (4)** Seminar, three hours. Preparation: proficiency in Armenian language. Lectures and laboratory in methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including project assignment in the field. May be concurrently scheduled with course C112D.

**214. Topics in World History. (4)** Discussion, three hours. Graduate seminar utilizing world-historical perspective to examine variety of broad themes in human history. Topics vary annually. Letter grading.

**215A-215B. Seminars: Ancient History. (4-4)** Seminar, three hours. In Progress and S/U or letter grading.

**216A-216B. Seminars: Byzantine History. (4-4)** Seminar, three hours. In Progress and S/U or letter grading.

**217. Sources and Handbooks of Medieval History. (4)** Seminar, three hours. Preparation: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them.

**218A-218B. Paleography I, II. (4-4)** (Formerly numbered 219A-219B.) Seminar, three hours; discussion, three hours. Preparation: reading knowledge of Latin and German or French. S/U or letter grading. **218A.** History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading. **218B.** History of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

**C219A. From Roll to Codex: Manuscripts in Early Middle Ages.** (4) (Formerly numbered C219C.) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society to 1100. Concurrently scheduled with course C119A. S/U or letter grading.

**C219B. From Parchment to Print: Manuscripts in Later Middle Ages.** (4) (Formerly numbered C219D.) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society from 1100 to 1500. Concurrently scheduled with course C119B. S/U or letter grading.

**CM220A. Interfaces: Transmission of Roman Literature.** (4) (Formerly numbered M223.) (Same as Classics M220A.) Discussion, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand processes by which Latin literature has been preserved. Concurrently scheduled with course C120A. S/U or letter grading.

**221A-221B. Seminars: Medieval History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**222A-222B. Seminars: Medieval Intellectual History and History of Science.** (4-4) Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology. In Progress and S/U or letter grading.

**225. Colloquium for Entering Graduate Students in Modern European History.** (4) Seminar, three hours. Normally limited to and required of all modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

**226A-226B. Seminars: Italian Renaissance.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**227A-227B. Seminars: Reformation.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**229A-229B. Seminars: Early Modern European History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**M230A-M230B. Seminars: Modern European History.** (4-4) (Same as Art History M241A-M241B.) Seminar, three hours. May be repeated for credit with consent of adviser. In Progress and S/U or letter grading.

**231A-231B. Seminars: Modern European Intellectual and Cultural History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**232A-232B. Seminars: French History of the 19th and 20th Centuries.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**233A-233B. Seminars: Russian/Soviet History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**234A-234B. Seminars: Modern History of Spain, Portugal, and Italy.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**235A-235B. Economic History of Europe, 1780 to 1939.** (4-4) Lecture, three hours. Analysis of internationalization of European world economy, emergence of Western core and its relation with European peripheries. Comparative analysis on different regions, stressing main characteristics of postwar European economy. In Progress and S/U or letter grading.

**M236A. Proseminar: Political Psychology.** (4) (Same as Political Science M261A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**236B-236C. Seminars: Psychohistory.** (4-4) Seminar, three hours. Exploration of individual and group psychological processes and their uses in historical research. In Progress and S/U or letter grading.

**239A-239B. Seminars: English History — Middle Ages.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**240A-240B. Seminars: English History — Modern History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**241A-241B. Seminars: German History.** (4-4) Seminar, three to four hours. Designed for graduate students. In Progress and S/U or letter grading.

**242. Colloquium: European History.** (2) Designed for graduate students. Forum for critical discussion of work of students and invited scholars. Presentation of student dissertation prospectuses during their third or fourth year in residence. S/U grading for students presenting papers.

**244A-244B. Seminars: British Empire History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**245. Colloquium: U.S. History.** (4) Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, use of source materials, and current state of U.S. historiography.

**246A-246B-246C. Introduction to U.S. History.** (4-4-4) Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit. **246A.** Colonial Period; **246B.** 1790 to 1900; **246C.** 20th Century.

**247A-247B. Seminars: Early American History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**249A-249B. Seminars: Jacksonian America.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**250A-250B. Seminars: U.S. History of the Middle 19th Century.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**251A-251B. Collaborative Research Seminars: American History.** (4-4) Seminar, three hours. Research seminars taught jointly by two faculty members. In Progress and S/U or letter grading. **251A.** Common readings and development of individual research projects. **251B.** Research, writing, and critical discussion of draft papers.

**252A-252B. Seminars: Recent U.S. History to 1930.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**253A-253B. Seminars: Recent U.S. History since 1930.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**254A-254B. Seminars: U.S. Social and/or Intellectual History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**255A-255B. Business Enterprise and American Culture.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**256A-256B. Seminars: American Diplomatic History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**257A-257B. Seminars: U.S. Urban History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**258A-258B. Seminars: Working Class History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**259A-259B. History of Women.** (4-4) Seminar, three hours. History of women's social and political issues seen in a U.S. and comparative context. In Progress and S/U or letter grading.

**260A-260B. Seminars: Native American History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**M260C. Native American Revitalization Movements.** (4) (Same as Anthropology M238.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion. Letter grading.

**M260D. Native American Historical Demography.** (4) (Same as Anthropology M287Q.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence. Letter grading.

**261A-261B. Seminars: Afro-American History.** (4-4) Seminar, three hours. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white. In Progress and S/U or letter grading.

**262A-262B. Seminars: Chicano History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**263A-263B. Seminars: History of the American West.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**M264. History of American Education.** (4) (Same as Education M201C.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

**M265. Latin American Research Resources.** (4) (Same as Information Studies M225 and Latin American Studies M200.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**266A-266B. Seminars: Colonial Latin American History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**267A-267B. Seminars: Latin American History, 19th and 20th Centuries.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**M268A-M268B. Seminars: Recent Latin American History.** (4-4) (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress and S/U or letter grading.

**275A-275B-275C. First-Year Colloquia: African History.** (4-4-4) (Formerly numbered 275.) Seminar, three hours. Required of all entering graduate students in African history. Source identification, research methodologies, historiographical traditions, historical interpretation, approaches to teaching, and research design. Each course may be taken independently for credit. S/U or letter grading.

**278A-278B-278C. Research Seminars and Dissertation: African History.** (4-4-4) (Formerly numbered 278A-278B.) Seminar, three hours. Multiple-term seminars/workshops designed to bring together pre-dissertation candidates and dissertation writers for regular presentations and critical assessment of their work in progress. Each course may be taken independently for credit. S/U or letter grading.

**M281. China — Seminar: Classical Historiography and Readings in Classical Studies.** (4) (Same as Chinese M201.) Discussion, three hours. Preparation: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents. Letter grading.

**282A-282B. Seminars: Chinese History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**285A-285B. Seminars: Japanese History.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**288A-288B. Seminars: South Asia.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**289A-289B. Seminars: Southeast Asia.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**291A-291B. Seminars: Jewish History.** (4-4) Seminar, three hours. Studies in intellectual and social history of Jewish people from ancient times to the modern period. In Progress and S/U or letter grading.

**293A-293B. Seminars: History of Religions.** (4-4) Seminar, three hours. In Progress and S/U or letter grading.

**294A-294B. Western Science, Religion, and Political Economy, 1600 to 1830.** (4-4) Seminar, three hours. Study of science integrated within matrix of religious belief commonplace in early modern Europe and, to a lesser extent, in American colonies. Examination of relationship of both cultural matrices to political and economic change. S/U or letter grading.

**295. Theories of Scientific Change.** (4) Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feynabend, and others.

**M296. History of Statistics. (4)** (Same as Statistics M245.) Seminar, three hours. History of statistics ranges over vast and diverse territory. Development of mathematical methods; philosophical, political, and social issues that were linked to their emergence and use. S/U or letter grading.

**297A-297B. Seminars: History of Science. (4-4)** Seminar, three hours. In Progress and S/U or letter grading.

**M298. Interdisciplinary Studies in the 17th and 18th Centuries. (4)** (Same as English M298.) Topics vary according to participating faculty. May be repeated for credit.

**M299. Interdisciplinary American Studies. (6)** (Same as English M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**490. Writing Workshop for Graduate Students. (4)** Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading.

**495. Teaching History. (4)** Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Studies. (1 to 8)** Limited to graduate students. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

**597. Directed Studies for Graduate Examinations. (1 to 8)** Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

**599. Ph.D. Research and Writing. (1 to 8)** Preparation: advancement to Ph.D. candidacy. S/U grading.

## Scope and Objectives

The interdisciplinary major in History/Art History allows students to study the relationship between art history and the history of society, politics, and culture.

## Undergraduate Study

### History/Art History B.A.

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major.

No course for the major may be taken on a P/NP grading basis.

Students wanting to confer with a counselor regarding program planning and major requirements should contact the history/art history counselor at (310) 825-3480.

### Preparation for the Major

*Required:* History 1A, 1B, 1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

### Transfer Students

To be admitted as History/Art History majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of history of Western civilization, two art history courses in ancient, Renaissance and baroque, medieval, or modern art, and one non-Western art history course.

### The Major

*Required:* History 99 or 100; 197 or 199; and courses as indicated in the following groups:

Group A: Two non-European history courses from History M104A, M104B, M105, 106A, 106B, 106C, 107A, 107B, 108A, 108B, 109A, 109B, 109C, 110A, 110B, 111A, 111B, 111C, 112A through C112D, 115A, M122, 123A, 123B, 143, 165A, 165C, 166, 167A through 167D, 168, 169, 170A, 170B, 171, 172, 173, 174, M175A, 175B, 175C, 175E, 176A, 176B, 176C, 177, 178A, 178B, 179A, 179B, 182A, 182B, 183A, 183B, 183C, 184, 185A, 186, 187A, 187B, 187C, 188A, 188B, 188C, 190A, 190B, 193B, 193C, 193D

Group B: Two U.S. history courses from History 145A, 145B, 146, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A through 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through M158E,

M159A, M159B, 160A, 160B, 161, 162, 163, 164, M189B

Group C: Two European history courses from History 115B, 115C, 116A, 116B, 117A, 117B, 117C, 119M, 120M, 121A through 121D, 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 127C, 128A, 128B, 128C, 129A, 129B, 129C, 130, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 135A, 135B, 137A, 137B, 138A, 138B, 141A, 141B, 141C, 142A, 142B, 144, M191A through 191G, M192A, M192B, 194A, 194B, 194C, 195A, 195B, 195C

Group D: Three Western art history courses from Art History 101A, 101B, M102A through M102K, 106A through 106D, 108A, 108B, 108C, C109A through 109D, 110A, 110B, 110C, 110E through C110H, C112A through CM112D, C150A through 150D

Group E: Three non-Western art history courses from Art History 104A, 104B, C104C, 110G, 114A, 114C through 114F, C115A through C115F, C117A through C117D, 118A, 118C, 118D, 118E, C119A, C119B

Group F: Two art history elective courses selected from the above lists. Students may also take Art History 100, C103A, C103B, C103C, 127, 197, 199 to meet this requirement

## Honors Program

The honors program is designed for History/Art History majors who are interested in carrying out an independent research project that culminates in an honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior History/Art History majors who have completed a minimum of four upper division art history courses with a grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the major and an overall GPA of 3.0 or better, and (3) complete Art History 195A and 195B with grades of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the major and an overall GPA of 3.65 or better, and (3) complete Art History 195A and 195B with grades of A.

## Faculty Advisory Committee

Joyce O. Appleby, Ph.D. (*History*), Chair  
Ruth, H. Bloch (*History*)  
Rogers Brubaker, Ph.D. (*Sociology*)  
John P. Carriero (*Philosophy*)  
Patricia M. Greenfield (*Psychology*)  
Janet R. Hadda (*English*)  
William M. Mason (*Sociology*)  
Jeffery H. Miller, Ph.D. (*Microbiology and Molecular Genetics*)  
Claudio Pellegrini, Ph.D. (*Physics and Astronomy*)  
David C. Rapoport, Ph.D., Emeritus (*Political Science*)  
Min Zhou, Ph.D. (*Sociology*)

## Scope and Objectives

The Honors Collegium is an unusual educational alternative, with an interdisciplinary emphasis. The collegium encourages animated discussion among students, as well as between students and professors. It seeks to promote scholarly exchange across the major disciplines in the University. And it offers small classes and individual attention.

## Undergraduate Study

Each Honors Collegium course is staffed by a director who is distinguished in teaching and scholarship and may include a variable number of guest lecturers and additional specialists in their fields. Many courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly interdisciplinary seminars, and the courses vary each year. Refer to the *Schedule of Classes* for current course listings. An Honors Collegium brochure, which gives detailed course descriptions, is available from the program office or see <http://www.college.ucla.edu/up/honors>.

## Honors Collegium

### Lower Division Courses

**1. Systems Thinking: Exploring Order and Chaos in Everyday Life. (5)** (Not the same as course 1 prior to Fall Quarter 2000.) Seminar, three hours; laboratory, one hour. Exploration of neural networks, genetic algorithms, and systems languages as way of defining, measuring, exploring, and creating systems. P/NP or letter grading.

**2. Comparative Genocide. (4)** Lecture, four hours; discussion, one hour. Social comparative study of genocide, combining theoretical concepts with case studies (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

**3. History and Visual Culture from Engraving to Film and Television. (5)** (Not the same as course 3 prior to Fall Quarter 2000.) Seminar, three hours. Interdisciplinary look at relationship between visual imagery and historical developments, tracing evolution of visual culture in relationship to forms of political, social, and cultural authority in media from 17th-century engravings to post-World War II television. P/NP or letter grading.

**4. Surrealist Challenge. (4)** Examination of revolutionary cultural movement of surrealism in France and Spain in the 1920s and 1930s, including films of Buñuel and Dali, paintings of Ernst and Magritte, and writings of Breton, Crevel, and Péret. P/NP or letter grading.

**5. Science and the Human Condition. (4)** (Not the same as course 5 prior to Winter Quarter 1999.) Seminar, three hours. Examination of impact that scientific method has on the human condition and on our concept of humankind through two case studies: processes by which Darwin formulated theory of evolution by natural selection and replacement of Newtonian physics by quantum theory. P/NP or letter grading.

**6. Historical Construction of Reality. (4)** (Not the same as course 6 prior to Fall Quarter 1999.) Seminar, three hours. Examination, through comparative analysis of various societies at various times, of phenomena that are taken for granted as natural but which are actually historically constructed, including perception (time and space) and hierarchy (race and gender). P/NP or letter grading.

**7A. Urban Poverty and Public Policy in the U.S. (4)** Lecture, four hours; discussion, one hour. Focus on social welfare in the U.S., providing historical overview of poverty and the social programs that have attempted to deal with it and addressing current debate on the subject. P/NP or letter grading.

**7B. Urban Poverty and Public Policy in the U.S. (4)** Optional fieldwork and tutorial. Enforced corequisite: course 7A. Field studies in social policy. P/NP or letter grading.

**8. Communication among Organisms. (4)** Lecture, three hours; discussion, two hours. Study of communication among a variety of taxonomic groups ranging from single-celled organisms to plants, whales, and nonhuman primates. P/NP or letter grading.

**9. Greeks and Barbarians: Multiculturalism in the Ancient World. (4)** Seminar, three hours. Through examination of art and literature from prehistoric period (Homer and Bronze Age) through the Hellenistic Age (4th through 2nd century B.C.), exploration of why and how diverse groups and cultures of classical antiquity defined themselves as different and what these expressions of difference have to do with modern perceptions of race and ethnicity. P/NP or letter grading.

**10. Social Classification and Categorization. (4)** Seminar, three hours. Examination of way in which schemes of classification powerfully shape systems of social counting and accounting. Use of recent works from many disciplines to examine how classification constitutes both principles of vision and principles of division. P/NP or letter grading.

**11. Reinventing African History. (5)** (Not the same as course 11 prior to Fall Quarter 2000.) Seminar, three hours. Critical evaluation of historical study of Africa, particularly of two schools defined by old Eurocentric stereotypes of Africa and new stereotypes arising from an Afrocentric model. P/NP or letter grading.

**12. Sacred Form: Literature and Poetry in India from Bronze Age to Premodern Times. (4)** (Not the same as course 12 prior to Fall Quarter 2000.) Seminar, three hours. Exploration of cultural and literary development in India from early religious poetry (prior to 1000 B.C.) to broad range of literary styles and diverse religious and philosophical movements through classical, medieval, and premodern period. P/NP or letter grading.

**13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s. (4)** Lecture, four hours; discussion, one hour. Examination of French and Italian cinema in period around World War II, time marked by social tensions and political unrest. Investigation of French realism, Italian neorealism, and French abstract cinema as they reveal two different European cultures during a critical historical era. P/NP or letter grading.

**14. Interaction of Science and Society. (4)** (Not the same as course 14 prior to Winter Quarter 1998.) Seminar, three hours. Examination of interaction of science and society and effects of this interaction on history, development of societies, evolution of revolutionary ideas as modeled in Galileo, Darwin, and others, and selected contemporary issues such as genetic engineering and war against infectious diseases. P/NP or letter grading.

**15. Acting Myth. (4)** (Not the same as course 15 prior to Fall Quarter 2000.) Seminar, three hours. Interdisciplinary approach to literature and acting through study of texts and mythologies from variety of Indo-European and Near Eastern sources; students learn acting techniques in directed scenes from the texts. P/NP or letter grading.

**16. Contemporary Fiction and Psychology of the Self. (4)** Seminar, three hours. Examination of relationship between personal and interpersonal dynamics in literature as they are illuminated by Heinz Kohut's theories of self-psychology. P/NP or letter grading.

**17. Civil Rights, Women's Rights, Human Rights. (5)** (Not the same as course 17 prior to Fall Quarter 2000.) Seminar, three hours. Investigation of lived history of rights, including context and implications of 14th Amendment, subsequent civil rights activism, women's rights, internationalization of these notions in politics of human rights, and current critiques of "rights talk." P/NP or letter grading.

**19. Rhetoric on Trial: Legal Advocacy, Ancient and Modern. (4)** (Not the same as course 19 prior to Fall Quarter 2000.) Seminar, four hours. Examination of theory and practice of classical rhetoric through readings, discussions, and practical exercises, including field study of contemporary usage in political arena and courts. P/NP or letter grading.

**20. Artificial Intelligence: Machines as People, People as Machines. (4)** (Not the same as course 20 prior to Fall Quarter 1999.) Seminar, three hours; laboratory, one hour. Programming knowledge not required. Examination of human cognitive abilities and study of different historical approaches to programming human cognitive abilities and behaviors into computers, with focus on problem solving. P/NP or letter grading.

**21W. Rise and Fall of Modernism. (6)** (Formerly numbered 21.) Seminar, three hours; writing laboratory, two hours. Enforced prerequisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 21. Study of early and middle 20th-century's attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. Satisfies Letters and Science Writing II requirement. Letter grading.

**22. Short History of Science: Reading the Great Book of the Universe. (4)** (Not the same as course 22 prior to Fall Quarter 2000.) Seminar, four hours. Examination of key concepts of modern science through their historical development, including study of impact of scientific and industrial revolutions on art, economy, environment, religion, and structures of society. P/NP or letter grading.

**23. Globalization. (4)** Seminar, three hours. The making of one world from the 15th century on through exploration, trade, and colonization; revolutions in transportation and communication; regional and global networks of migration; transnational business and finance organizations; and (qualified) emergence of a global culture. P/NP or letter grading.

**24. 21st Century: Society, Environment, and Ethics. (4)** Lecture, two hours; discussion, one hour. Technology, society, and ethics in three major areas: environment and environmental engineering, or large-scale changes in biosphere; effects of technology on people; and effects of technology on nonhuman creatures. P/NP or letter grading.

**25. Human Genome: Prospects for a Super Race? (4)** Lecture, four hours; discussion, one hour. Influence of genetics on human biology, addressing the controversial issue of using genetic engineering to alter genes on human chromosomes. P/NP or letter grading.

**26. Representing Medicine: Art, Literature, and Film. (5)** (Not the same as course 26 prior to Summer Quarter 2000.) Lecture/discussion, 10 hours. Limited to Freshman Summer Program students. Exploration of interdisciplinary dimensions of medical representation, with emphasis on cross-cultural 20th-century portrayals of the profession, including representations of doctor/patient relations, healthcare sites and circumstances, aging, alternative treatments, and mental health. Offered in summer only. P/NP or letter grading.

- 27. Theories of Exchange: Social Life of Gifts and Commodities. (4)** (Not the same as course 27 prior to Fall Quarter 1999.) Seminar, three hours. Study of how creation, maintenance, and dissolution of social and political relations are modulated through exchange of gifts and/or commodities in different contexts and different societies. P/NP or letter grading.
- 28. Misleading Mirror: Self-Portraits in Word and Image. (4)** Self-portraiture as it is represented in the novel, poetry, painting, essay, and film, both from point of view of the artist/representor and from perspective of the reader/viewer. P/NP or letter grading.
- 29. Critical Vision: History of Art as a Social and Political Commentary. (4)** Seminar, three and one-half hours. Study of tradition of visual arts (painting, graphic art, photography, sculpture) as vehicles for social and political commentary. P/NP or letter grading.
- 30. Vietnam War and American Culture. (4)** Seminar, three hours. Cultural, social, and political implications of the Vietnam War on American society through examination of photography, journalism, personal narrative, political commentary, drama, and fiction. P/NP or letter grading.
- 31. Current Environmental Problems. (5)** Lecture/discussion, four hours. Examination of current pressing environmental issues, including overpopulation, greenhouse effect, loss of biodiversity, and toxic waste production and disposal. P/NP or letter grading.
- 32W. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences. (6)** (Formerly numbered 32.) Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 32. Study of creative acts of artists, writers, social scientists, and scientists in relation to their societies, cultures, disciplines, conventions, and art forms. Satisfies Letters and Science Writing II requirement. Letter grading.
- 33W. Art of Engagement. (6)** (Formerly numbered 33.) Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 33. Cross-curricular, cross-cultural examination of literature, art, and film as a way of discovering how writers and artists treat conflict between art as something inward and psychological and personal, and art as a vehicle of social and political import. Satisfies Letters and Science Writing II requirement. Letter grading.
- 34. Film and Society: The Hollywood Myth of Ancient Rome. (4)** Exploration of popular influence of ancient Rome on filmmakers of the 20th century, with eye to separating objective examination of Roman political and social institutions and the myth they have become. P/NP or letter grading.
- 35. Scientific Method: Critical Inquiry into Question of Extraterrestrial Life. (4)** Lecture, three hours; discussion, one hour. Course does not presume to answer question of whether or not there is intelligent life in the universe but rather uses this question as a pedagogic tool to introduce central ideas, techniques, and limitations of the scientific method — what questions would need to be asked, what scientific knowledge would be needed, and what obstacles would have to be overcome just to address this question. P/NP or letter grading.
- 36. Ethnicity and Social Class in America. (4)** Introduction to data analysis, quantitative method, and use of statistics in social sciences, using General Social Survey (GSS) and concentrating particularly on ethnicity and social class. Students conduct statistical research of their own. P/NP or letter grading.
- 37A. Ethnicity, Social Class, and Social Mobility in the U.S. and Other Societies. (4)** Seminar, three hours. Study of the U.S. and other nations in terms of social class, social mobility, ethnicity, and absorption of immigrants, with emphasis on manipulation and analysis of data sets from census and survey data provided through instructional software. P/NP or letter grading.
- 37B. Ethnicity, Social Class, and Social Mobility in Los Angeles. (4)** Seminar, three hours. Course 37A is not requisite to 37B. Study of Los Angeles in terms of social class, social mobility, ethnicity, and absorption of immigrants, with emphasis on manipulation and analysis of data sets from census and survey data provided through instructional software. P/NP or letter grading.
- 38. Frida Khalo: Multidisciplinary Construction of an Artist's Life. (4)** (Not the same as course 38 prior to Fall Quarter 1999.) Seminar, four hours. Comprehensive contextual and interpretive study of artist Frida Khalo's life, art, and character as a way of examining seminal political/historical events and cultural movements. P/NP or letter grading.
- 39. Early Modern French Culture in Film. (5)** (Not the same as course 39 prior to Fall Quarter 2001.) Seminar, three hours. Using films and texts, study of development of courtly culture in France from the Renaissance to its demise in the Enlightenment and its replacement with new ideas of nature, education, and civic virtue. P/NP or letter grading.
- 40W. Transformations of Cultural Stories across Disciplines and Texts. (5)** (Not the same as course 40 prior to Fall Quarter 1999.) Seminar, four hours. Enforced requisite: English Composition 3 or 3H. Tracing of writing and rewriting of traditional story types, specifically the adventure story as represented by Defoe's *Robinson Crusoe* and its remanifestations in Coetzee's *Foe* and the fairy tale as represented by *Cinderella* and its various cross-cultural remanifestations. Satisfies Letters and Science Writing II requirement. Letter grading.
- 41. Mathematical Concepts: Origins and Development. (4)** (Not the same as course 41 prior to Fall Quarter 1999.) Seminar, three hours. Exploration of various concepts in mathematics, especially in algebra, from historical point of view from ancient Babylonian quadratic triples to contemporary game theory and including study of some of the more remarkable applications. P/NP or letter grading.
- 42. Physics of Music. (5)** (Not the same as course 42 prior to Fall Quarter 2000.) Seminar, four hours. Study of physics of sound as it applies to music, including sine waves, relationship of frequency to pitch, harmonics and timbre, scales, tunings, and temperaments — all examined with both musical and physical experiments. P/NP or letter grading.
- 43. Male Identity and Sexuality in Ancient Rome. (4)** Seminar, three hours. Investigation of Roman cultural constructions of male identity and sexuality in context of political and social change in an emergent imperial ideology in the 1st century C.E.; examination of male "virtus," sexual stereotypes, and dynamics of sex and power in imperial politics. P/NP or letter grading.
- 44. Trail of Light. (4)** Lecture, three hours; discussion, two hours. Study of our understanding of light, colors, and vision: physics of light from Newton to Einstein; physics, chemistry, and biology of vision in relation to color; and appearance of light in art. P/NP or letter grading.
- 45. State, Nation, and Nationalism in Modern and Contemporary Europe. (4)** (Formerly numbered M115.) Seminar, four hours. Examination of state, nation, and nationalism in Europe in theoretical, comparative, and historical perspective. P/NP or letter grading.
- 46W. Literature of Testimony. (6)** Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Cross-cultural examination of 19th- and 20th-century literature of testimony functioning as acts of resistance, endorsement of inherited values, political activism, creation of knowledge, personal healing, and nation building. Satisfies Letters and Science Writing II requirement. Letter grading.
- 47. Literature of Colonization and Colonization of Literature. (4)** Seminar, three hours. Examination of various facets of interaction between Western and non-Western cultures since period of high imperialism beginning in the mid-19th century, with focus on the novel as prism through which to observe cultural meeting and interchange and their consequences. P/NP or letter grading.
- 48. Politics of Reproduction. (4)** Seminar, three hours. Examination of complex relations between individual, local, and global interests as they shape and reflect reproductive practices, public policy, and exercise of power. P/NP or letter grading.
- 49. Evidence in Law, Science, History, and Journalism. (4)** Seminar, four hours. Rigorous study of ways in which lawyers, scientists, historians, and journalists handle evidence, with aim of advancing cross-disciplinary inquiry to produce a common vocabulary and set of concepts that allow for discussion of evidentiary issues in differing fields of inquiry. P/NP or letter grading.
- 50A. Greek Views of Humanity. (4)** Lecture, three hours; discussion, one hour. Greek views of human experience as expressed in literary forms invented or developed by the Greeks: epic, history, tragedy, comedy, and philosophy; study of way in which Greek texts provide foundation for subsequent Western literature and thought. P/NP or letter grading.
- 50B. Gender and Race: Constructions of Greek Political Thought. (4)** Lecture, three hours; discussion, one hour. Course 50A is not requisite to 50B. Comprehensive introduction to Greek views of humanity with concentration on gender and race, especially as these issues are manifested in Plato and Aristotle. P/NP or letter grading.
- 51. Childhood in Historical and Sociological Perspective. (4)** Seminar, three hours. Examination of ways in which experience and social expectations of childhood have been transformed over time and of ways in which these experiences and expectations vary according to class, race, and gender. P/NP or letter grading.
- 52. Madness in the Enlightenment: Care and Cure of Mental Illness. (5)** (Not the same as course 52 prior to Fall Quarter 2000.) Seminar, four hours. Not open for credit to students with credit for Psychiatry 98B. Study of physicians and reformers of the Enlightenment who treated the mentally ill, examined in context of social, intellectual, and cultural history of the time. P/NP or letter grading.
- 53. American Folk Music, Protest, and Identity. (5)** (Not the same as course 53 prior to Fall Quarter 2001.) Seminar, three hours. Study of American folk music as a prism to investigate more general relationships among cultural boundaries such as musical genres and social categories (race, ethnicity, nation, and generation). P/NP or letter grading.
- 54. Human Lives: Psychocultural Perspective. (4)** Seminar, three hours. Examination of human life course in psychocultural perspective, following observations of Kluckhohn and Murray, including investigations of (1) psychobiological underpinnings of human life, (2) human life as shaped by social and cultural processes, and (3) humanistic perspective defining uniqueness. P/NP or letter grading.
- 55. Culture and History of Utopias. (4)** (Not the same as course 55 prior to Fall Quarter 1999.) Seminar, three hours. Study of major utopian writings from Thomas More's classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural landscapes underlying quest for a more perfect society. P/NP or letter grading.
- 56. Language as a Window to the Mind. (4)** Lecture, four hours; discussion, one hour. Study of topics in language and the mind, including language acquisition in the child, language representation in the brain, relationship between language and other mental abilities, and autonomous nature of language as a system of knowledge. P/NP or letter grading.
- 57. Life and Sciences of Complexity. (4)** Seminar, four hours. Study of motion and change in systems, including general systems theory, cybernetics, catastrophe theory, and dissipative structure theory, moving toward a view of senescence of complex systems, or an answer to question of why we grow old and die. P/NP or letter grading.
- 58. Apartheid and Social Stratification in South Africa: Theory and Data. (4)** Seminar, three hours. Examination as an empirical question of structure and consequences of apartheid in South Africa, including analyses both of history and of social stratification. P/NP or letter grading.
- 59W. Literature and Culture of the American South. (6)** (Formerly numbered 59.) Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 59. Examination of historical imagination as it is expressed in such writers as William Faulkner, Allen Tate, Flannery O'Connor, Richard Wright, and Zora Neale Hurston; in Civil War and WPA/FSA photography; and in Southern rhetoric and political documentary. Satisfies Letters and Science Writing II requirement. Letter grading.

**60. Immigration and New Second Generation. (4)** (Not the same as course 60 prior to Fall Quarter 1998.) Seminar, three hours. Immigrant children and children of immigrants have become fastest growing and most ethnically diverse segment of the U.S. child population, raising issues of migration processes, contexts of reception, biculturalism, adaptation, and assimilation and impact of these on socioeconomic circumstances and future success. P/NP or letter grading.

**61. Social Theory in the 20th Century. (6)** Lecture, four hours; discussion, one hour; writing seminar, two hours. Examination of strikingly subjective thrust of 20th-century social thought which has emphasized cultural and emotional structures rather than the material, objective world. Focus on psychoanalysis, structuralism, functionalism, existentialism, and phenomenology in readings from Durkheim to Jean-Paul Sartre. P/NP or letter grading.

**62. Community and Self-Interest in History of American Culture. (6)** Lecture, four hours; discussion, one hour. Exploration of historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, collective sense of mission and belief in the autonomous individual. P/NP or letter grading.

**63. Emerging Infections and Their Effects on Society: Past, Present, and Future. (4)** Seminar, four hours. Examination of how people have responded to plagues and infections through early history and "golden age of microbiology" of last 200 years; study of contemporary responses, including genetic engineering, and prophecies regarding what future may hold regarding infectious diseases. P/NP or letter grading.

**64. Neuroscience and Psychology of Art and Biology of Aesthetics. (5)** (Not the same as course 64 prior to Fall Quarter 2001.) Seminar, three hours. Interdisciplinary approach to study of premise that beauty, whether of faces, art works, or other subjects, is processed by the brain and can be understood as a neurological and psychological phenomenon. P/NP or letter grading.

**65. Literature and Culture of Francophone World. (5)** (Not the same as course 65 prior to Fall Quarter 2001.) Seminar, three hours. Study of literary texts from North and sub-Saharan Africa, Guadeloupe, Haiti, Martinique, Vietnam, and France and examination of cultures of colonial and postcolonial Francophone world. P/NP or letter grading.

**66. Art and the Machine: Impact of Technology on Aesthetics. (5)** (Not the same as course 66 prior to Fall Quarter 2001.) Seminar, four hours. Examination of how technology has changed way artists think about their art. P/NP or letter grading.

**67. Structure of Physical Reality. (4)** (Not the same as course 67 prior to Fall Quarter 1998.) Lecture, three hours; discussion, one hour. No special mathematical knowledge required. Course in modern physics, including videos and practical demonstrations, Zen stories, and discussions of what Eastern and Western religions and philosophy in general have to say about forces of nature. Topics include quantum mechanics, microcosm of atoms, and elementary particle physics and philosophical implications. P/NP or letter grading.

**68. History of Social Thought. (4)** Lecture, three hours; discussion, one hour. Study of significant forms of social theory and social change from the English Revolution to beginning of the 20th century, including readings from Hobbes, Rousseau, Smith, Tocqueville, Marx, and Freud. P/NP or letter grading.

**69. Artificial Life and Evolutionary Design: Theory and Practice in Multiagent Modeling. (5)** (Not the same as course 69 prior to Fall Quarter 2001.) Seminar, five hours. No special mathematical or computer knowledge required. Study of artificial life, artificial intelligence, virtual environments, and evolutionary computation through both literature on simulations and practical engagement in simulations themselves. P/NP or letter grading.

**70. Genetic Engineering in Medicine and Agriculture. (4)** Lecture, 90 minutes; discussion, two hours. Overview of principles of cell and molecular biology and of technical details of genetic engineering. Discussion of benefits and detriments of new biotechnology in relation to medicine, agriculture, and general social issues. P/NP or letter grading.

**70A. Genetic Engineering in Medicine, Agriculture, and Law. (5)** Lecture, three hours; discussion, two hours. Not open to students with credit for Life Sciences 3 or 4 or Microbiology 7. Historical and scientific study of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised by new technology. P/NP or letter grading.

**70B. Nonlife to Life, Microbes to Man: Nature Is Not Compartmentalized. (5)** Lecture, two and one-half hours; discussion, two hours. Examination of life on Earth from cosmic perspective through interconnected evolutionary histories of Earth's geology, biology, and atmosphere-ocean systems. P/NP or letter grading.

**70C. Culture, Ethnicity, Race, and Development: Multimedia and Multidisciplinary Approach. (5)** Lecture, four hours; discussion, one hour. Study of cultural apprenticeship, including evolution of cultural learning, ontogeny of cultural learning, changes in cultural learning over history, and conflicts between forms and goals of cultural learning in a multicultural society. P/NP or letter grading.

**71. Cultural Heritage and Virtual Reality. (5)** (Not the same as course 71 prior to Fall Quarter 2001.) Seminar, four hours. Study of application of virtual reality technology to field of cultural heritage, using three-dimensional computer models of such sites as Cathedral of Santiago de Compostela, Colosseum, and Second Temple in Jerusalem. P/NP or letter grading.

**73. Elementary Particles in the Universe. (4)** Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics, including status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading.

**74. Life Crises in Literature. (4)** Seminar, three hours. Examination of typical life upheavals (child abuse, coming of age, death, etc.) as they are portrayed in modern literature and, by comparative analyses of diverse literatures, focus on ways in which universal events are filtered through the prism of distinct cultural perspectives. P/NP or letter grading.

**75. On Nature of Things: Comparative Reading of Poem by Lucretius and Modern Science. (4)** Seminar, three hours. Most important and influential concepts of modern science, including atoms, their movements and nature, origin of the world, evolution of life; comparison with theories of Lucretius as defined in *De Rerum Naturae*. P/NP or letter grading.

**76. Race, Class, and Gender. (4)** Seminar, three hours. Analysis of interrelationship of race, class, and gender and of ways in which these social means of classification shape experience in American society. Research project on this topic into a hobby, sport, or occupation required. P/NP or letter grading.

**77. Space Science: Active Sun and Its Effects on Earth. (4)** (Not the same as course 77 prior to Fall Quarter 1999.) Lecture, 90 minutes. Study of consequences of solar magnetic storms on Earth, using latest NASA and ISAS tools for monitoring the sun and recording, through computer simulations, its effects. Joint course between Kyoto University, using distance learning technology. P/NP or letter grading.

**78. Writing in Age of Revolution. (4)** Lecture, four hours; discussion, one hour. Part of UCLA French Revolution Bicentennial Program. Examination of major debates of 1780 to 1820 in America and Europe through historical, rhetorical, and literary study. P/NP or letter grading.

**79. Genome: Blueprint, Controversy, Destiny. (5)** Lecture, three hours; laboratory, three hours. Not open to students with credit for Life Sciences 3 or 4. Laboratory-based exploration of topics related to Human Genome Project, including DNA coding, impact of Human Genome Project on society, use of DNA in forensic analysis, designer genes, and genomes as basis of new insights into evolution. P/NP or letter grading.

**80. Literature of Diversity: Cultural Experience in America. (4)** Seminar, three hours. Examination of richness and variety of American culture as revealed in literary works generally neglected in traditional surveys. Theories of ethnicity and nationalism presented in such works as *Black Elk Speaks*, *Their Eyes Were Watching God*, Mexican Corridos on immigration, and *China Men*. P/NP or letter grading.

**81. Eastern Christianity in Comparative Perspective: History, Doctrine, Culture. (5)** Lecture, two hours; discussion, two hours. Exploration of philosophical and metaphysical beliefs of Eastern Christianity, comparing and contrasting Eastern churches to those that dominate in the West and examining how Eastern Orthodox outlook has developed within broader Judeo-Christian tradition. P/NP or letter grading.

**82. Community and Labor Development from Ground Up. (4)** Lecture, three hours; discussion, one hour. Introduction to practical applications of community development and outreach efforts in Los Angeles area, with projects from Community Outreach Partnership Center within School of Public Policy and Social Research. P/NP or letter grading.

**83W. Politics and Rhetoric of Literature. (6)** (Formerly numbered 83.) Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 83. Examination of relationship among politics, rhetoric, and literature in study of literature from classical times to the present, broadening into general discussions of development of political discourse in Western thought, particularly conflict between self and state, between ideology and the practical business of living. Satisfies Letters and Science Writing II requirement. Letter grading.

**84. Los Angeles, 1900 to 2000: History of a 20th-Century City. (4)** Seminar, three hours. Interdisciplinary approach to study of Los Angeles, with attention to political and economic issues and emphasis on social and cultural history as reflected in literature, art, film, and architecture. P/NP or letter grading.

**85. Science and Art: Concepts and Connections. (4)** Seminar, four hours. Study of relationships between intellectual problem solving in science and aesthetics, with particular attention to holographs and liquid light displays. P/NP or letter grading.

**86. Federico Garcia Lorca and Literature of New York. (4)** Lecture/discussion, three hours. Designed to place Lorca in the international current of urban literature. Examination of Lorca's poems (in translation) and drawings as representations of New York in art, cinema, and literature. P/NP or letter grading.

**87. Humans and Other Animals. (4)** (Not the same as course 87 prior to Fall Quarter 1998.) Seminar, three hours. Examination of ongoing and historic relations between human beings and animals cross-culturally, including animals perceived as predators, renewable and non-renewable resources, pets, trophies, collectibles, and objects of study. P/NP or letter grading.

**88. Understanding Imperialism in Africa: Slave Trade Antecedents and Colonial Legacies. (5)** Seminar, three hours. Examination of nature of imperialism in Africa, its antecedents in African slave trade and in European exploration and missionary work, and its colonial and postcolonial legacy. P/NP or letter grading.

**89. Freud, Fairy Tales, and Feminism. (4)** Lecture/discussion. Demonstration of both the power of Freud's ideas and vision and vitality of criticisms of Freud that emanate from self-psychology and feminist thinking in contemporary social science. P/NP or letter grading.

**90. French Revolution: Ideologies and Images. (6)** Lecture, two and one-half hours; discussion, one hour; writing seminar, two hours. Examination of history of French Revolution as series of world historical events and as source of dominant ideologies and images that have influenced culture of France, Western Europe, and North and South America. P/NP or letter grading.

**92. Genes, Genomics, and Internet. (4)** (Not the same as course 92 prior to Fall Quarter 1998.) Lecture, two hours; computer laboratory, three hours. New science of genomics (computer analysis of genetic information), dealing with issues related to basic genetics, medicine, biotechnology, evolution, information technology, and their societal impact. P/NP or letter grading.

**94. Historic Roots of Healing Arts. (4)** (Not the same as course 94 prior to Fall Quarter 1998.) Not open to students with credit for Psychiatry 98H. Introduction to traditions, practices, goals, and myths of healing professions in Western medicine. P/NP or letter grading.

**95. Art, Politics, and Social Change in 19th-Century England and France. (4)** Seminar, three hours. Exploration, through analysis of artists and intellectuals in 19th-century England and France, of social factors in cultural expression and way that national traditions and political and social conditions shape each set of literary and artistic innovations. P/NP or letter grading.

**96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa. (4)** Exploration of culture and society of contemporary South Africa through literature of both black and white South African authors and popular cultural forms such as people's theater and workers' poetry. P/NP or letter grading.

**97. Issues in American Foreign Policy: Methodology of Assessment. (4)** Lecture/debate, three hours; discussion, one hour. Exploration in debate format of wide range of views on contemporary foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals. P/NP or letter grading.

**99. Student Research. (1 to 4)** (Not the same as course 99 prior to Fall Quarter 1999.) Tutorial (research or other scholarly work), five hours per week per unit. Entry-level research under guidance of a faculty mentor. Enrollment by contract. Students must be in good standing and enrolled in a minimum of 12 units (excluding this course). May be repeated; consult college/school adviser. P/NP grading.

## Upper Division Courses

**101. Summer Research Forum. (2)** Lecture, one hour; workshop, two hours. Corequisite: course 99. Designed to promote broad and deep understanding of university research, including plenary lectures on research and workshops on grant writing, internet searches, research abstracts, and laws and regulations governing research. P/NP grading.

**M102. Culture, Media, and Los Angeles. (6)** (Same as Afro-American Studies M102 and Asian American Studies M197H.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

**103. Scientific Knowledge, Industrial Growth, and Social Policy. (5)** Lecture, three hours; laboratory, two hours. Examination, using nanotechnology, of both benefits and risks to economy and society when new technologies are in process of development. P/NP or letter grading.

**104. Eurocentrism Debate: Viability of Western Tradition. (4)** Seminar, three hours. Designed for juniors/seniors. Assessment, both historically and critically, of "Western tradition" as a cultural, social, and ideological construct and delineation for discussion of current debates over Eurocentrism, particularism, and multiculturalism. P/NP or letter grading.

**105. Chinese and Greek Heroes, Past and Present. (4)** Seminar, three hours. Designed for juniors/seniors. Comparison of Greek and Chinese notions of the heroic in ancient epics and redefinitions of the heroic in their modern permutations, allowing students to interrogate cultural constructions of manhood. P/NP or letter grading.

**M106. Imaginary Women. (4)** (Same as Women's Studies M106.) Seminar, four hours. Designed for juniors/seniors. Study of four female cultural archetypes — absconding wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

**107. Painful Birth: Rise of Modern Capitalism in Late Medieval Italy. (4)** Seminar, three hours. Through medieval texts and representations of the human figure in art, examination of rise of merchant and banking class in late medieval Italy, focusing on ideological and economic issues rooted in contempt for commerce, prohibition of usury, ideal of the nobility, and choice between Earth and sky. P/NP or letter grading.

**108. History of the Devil in Scripture and Literature. (4)** Seminar, three hours. Following study of supernatural figure "Satan" in Old Testament and its correspondent figure in New Testament, course looks at historical research, literary analysis, and theological thinking to trace evolution of concept of "the devil" in the Bible, 15th-century drama, and poetry of John Milton. P/NP or letter grading.

**109. Language, Meaning, and the Making of Poetry. (4)** Seminar, three hours; workshop, one hour. In words of the august professor, "Semiological warfare against the purveyors of semantic entropy." In context of and comparison with contemporary speech, study of history of philosophic and poetic discourse on language and its potentials, including social and political implications. P/NP or letter grading.

**110. Marxist and Post-Marxist Approaches to Cultural Studies. (4)** Seminar, four hours. Examination of Marxist and post-Marxist approaches to study of culture, including classic texts, theoretical and empirical works, and the Marxist roots of postmodernism. P/NP or letter grading.

**111. Stress and Coping. (4)** Seminar, four hours. Examination of research and theory on stress and coping, with emphasis on physical and mental consequences of stress and moderators of both social support and personality in coping strategies. P/NP or letter grading.

**M112. Inner and Outer Worlds of Children: Social Policies. (4)** (Formerly numbered 112.) (Same as Education M112.) Seminar, four hours. Practices and analysis of social policies impacting on children. Topics include assessment, social justice and geographical space, temporal orientation, and classical theories of adolescent development. Letter grading.

**113. Geographical Encounter and Exploration. (4)** Seminar, four hours. Examination of coming together of various societies, whether preliterate or literate: the encounter. Exploration of both European and non-European travels, with emphasis on new thinking in fields of history and geography. P/NP or letter grading.

**114. Darwin and *The Origin of Species*. (4)** Lecture, three hours; discussion, one hour. Reading of Darwin's *The Origin of Species* in original text, then using it as springboard to investigate history of his period, what influenced him, and how future scientists have used him. P/NP or letter grading.

**M116. Art Alive: Art and Improvisation in the Museum. (4)** (Same as Theater M193.) Seminar, four hours. Offered in collaboration with the Los Angeles County Museum of Art (LACMA). Interpretation of art in the collection through acting, dialogues, movement, and music. Research into history and art history and production of a creative performance piece required. P/NP or letter grading.

**117. Resistance to Evil: Organized Resistance to Nazis in Occupied Europe. (4)** Seminar, three hours. Resistance is not a moral or philosophical issue, but a sociohistorical one. What makes resistance possible are specific historical circumstances and social relations that enable ordinary men and women to oppose their oppressors. Examination of this premise through analysis of organized resistance to Nazi occupation in Europe. P/NP or letter grading.

**M118. Roots of Patriarchy: Ancient Goddesses and Heroines. (4)** (Same as Women's Studies M128.) Lecture, three hours. Examination of ancient goddesses and heroines — European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

**M119. Nuclear Weapons: Critical Decisions. (4)** (Same as Environment M165 and Policy Studies M116.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

**122. Violence against Women in Cross-Cultural Perspectives. (4)** Seminar, three hours. Exploration of sources of violent acts against women in different societies. Topics include wife beating, female sexual slavery, female infanticide, dowry deaths, female genital "circumcision," rape, and emerging global human rights responses to these issues. P/NP or letter grading.

**123. War and Peace in Africa. (4)** Seminar, four hours. Investigation into main causes and forms of warfare on African continent, including relationship between internal war and transborder conflict, historic ethnic antagonism, competition for control of natural resources, and hostilities precipitated by militarism. P/NP or letter grading.

**124. Midwives, Mothers, and Medicine: Perspectives on History of Childbirth. (4)** Seminar, three hours. Using examples from history and anthropology, examination of variety of practices associated with childbirth over time and across cultures, addressing such themes as shifting relations among birthing women, midwives, and medical men and cultural meanings of birth. P/NP or letter grading.

**125. Interpretations of Shakespeare in Theater and Film in the 20th Century. (4)** Seminar, three hours. Textual content of five Shakespearean dramas and their film and stage interpretations in the 20th century, including participation in rehearsals of production of *All's Well that Ends Well*. P/NP or letter grading.

**126. Making Citizens/Making Societies: Political Cultivation in Cross-Cultural Perspective. (4)** (Formerly numbered 31.) Seminar, three hours. Examination of how a society takes active concern in making sure that certain politically relevant dispositions, sensitivities, capacities, and skills are nourished in population at large, including models of both aristocratic and democratic cultivation and their political implications. P/NP or letter grading.

**127. Citizenship, Leadership, and Service. (4)** Seminar, three hours; fieldwork, three hours. Interactive participatory study of interactions between citizenship, leadership, and service, including both theoretical work in classroom and practical work in service organizations in the field. P/NP or letter grading.

**M128. Latinos and Literacy. (5)** (Formerly numbered 128.) (Same as Chicana and Chicano Studies M170.) Seminar, three hours; field project, three hours. Preparation: Spanish fluency or completion of two years of university-level Spanish. Study of theory and practice of teaching literacy, including field-based work in adult literacy centers in the city. P/NP or letter grading.

**129. Cultural Construction of Gender and Sexuality: Homosexualities. (4)** Seminar, three hours. Not open for credit to students with credit for Anthropology M134 or Lesbian, Gay, Bisexual, and Transgender Studies M134. Cross-cultural analysis of construction of gender and sexuality in formation of homosexual, bisexual, transsexual, and transgendered identities and patterns of behavior. P/NP or letter grading.

**130. How Cold War Was Played. (4)** Lecture/discussion, four hours. Examination of what prompted the Cold War, why it lasted so long, what its impact was on political and socioeconomic systems of two main protagonists, and what its legacy has become. P/NP or letter grading.

**131. Beating Time through Time: Language, Verse, and Culture. (5)** Seminar, three hours. Exploration of links among language change, demographic and cultural change, and changing modes of poetic composition in English from 10th-century alliterative tradition to contemporary rap lyrics. P/NP or letter grading.

**132. Bible as Political Theory. (4)** (Formerly numbered 26.) Seminar, four hours. The Bible treated as a political text, addressing the prepolitical condition, formation of a political community, the state, survival without a state, and messianism, with focus both on institutions and on intellectual history. P/NP or letter grading.

**133. Concepts of Nothing in Science, Literature, and Arts: Writing Course. (4)** Seminar, four hours. Limited to juniors/seniors. Writing intensive seminar that invites students to pursue their own interests in concept of Nothing while exploring richness of "non" entities in physics, mathematics, neuroscience, literature, astronomy, and arts. P/NP or letter grading.

**134. Quest for Identity and the American Dream. (5)** Seminar, three hours. Exploration of concepts of equality, identity, individuality, and authenticity in American society through literary and legal texts and selected theory and films. P/NP or letter grading.

**M135. Narrative in Mass Communication. (6)** (Same as Communication Studies M135.) Seminar, four hours. Examination of narrative as a primary function of mass media, beginning with social, psychological, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

**136. History of Evolutionary Views. (5)** Seminar, four hours. Examination of concept of evolution in Western culture, beginning with novelties introduced in the 18th century, specific problems of natural history and taxonomy (in light of their historical and social background), and developments in embryology and morphology, then moving on to Darwin, *The Origin of Species*, and reception of his work. P/NP or letter grading.

**137. Political Satire: Offensive Art. (5)** Seminar, three hours. Study of political satire in several societies and variety of genres, including review of sociopolitical conditions that act to foster or constrain satire. P/NP or letter grading.

**138. Disease and Human Condition. (5)** Seminar, four hours. Exploration of scientific characteristics and historical manifestations of group of diseases that have shaped civilization; discussion of how historical manifestations of each disease are embedded in social and economic conditions of its time. P/NP or letter grading.

**139. African Americans and Africa in Perspective. (5)** Seminar, four hours. Study of saga of how African Americans have struggled to reattach their identity to Africa and Africans in both historical and contemporary perspectives. P/NP or letter grading.

**140. Dominants and Subordinates in Social Psychology of Privilege and Oppression in Public Education. (6)** Lecture, four hours; discussion, one hour; tutoring, three hours. Study of social arrangements and temporary inequalities in contemporary American public school, showing how such entrenched inequalities tend to become permanent. Field component included. P/NP or letter grading.

**141. Hard Choices: Economic and Social Implications of Using Nonrenewable Mineral Resources. (5)** Lecture, two hours; laboratory, three hours. Study of alternatives, opportunities, and constraints imposed on society by peculiarities and distributions of economically usable but nonrenewable earth materials. P/NP or letter grading.

**191. Writing and Editing of Books. (4)** Preparation: submission of approved manuscript. Theory and method in design, organization, writing, and editing of books.

**199. Directed Honors Studies. (4)** Tutorial, two hours. Preparation: minimum of 4 units completed in Honors Collegium with a grade of B or better, overall UCLA grade-point average of 3.0 or better. Special research/writing tutorial with a director of one of the Honors Collegium courses in order to pursue in greater depth a significant topic from one of the collegium courses. P/NP or letter grading.

## HUMAN GENETICS

*School of Medicine*

UCLA  
6506 Gonda Center  
Box 957088  
Los Angeles, CA 90095-7088  
(310) 794-5423

Leena Peltonen, M.D., Ph.D., *Chair*

### Professors

Kenneth L. Lange, Ph.D.  
Stanley F. Nelson, M.D., Ph.D.  
Leena Peltonen, M.D., Ph.D.

### Assistant Professors

Esteban Dell'Angelica, Ph.D.  
Gouping Fan, Ph.D.  
Stephan Horvath, Ph.D.  
York Marahrens, Ph.D.  
Chiara Sabatti, Ph.D.  
N. Carolyn Schanen, M.D., Ph.D.  
Lisa Schimmenti, Ph.D.  
Janet Sinsheimer, Ph.D.  
Eric J. N. Vilain, M.D., Ph.D.

### Adjunct Assistant Professor

Linda L. McCabe, Ph.D.

## Scope and Objectives

The graduate Human Genetics Program prepares students for careers as independent laboratory researchers with a firm grasp of the developments in biological and medical research.

The rapidly evolving field of human genetics now incorporates genetic, biochemical, cell biological, and developmental studies of both humans and model organisms to tackle biomedical problems important for human health and disease. Areas of study include both Mendelian and non-Mendelian hereditary diseases, genomics and mapping, bioinformatics, developmental biology, neurogenetics, sex determination, cytogenetics, human malformation, and chromatin structure and function. Laboratory research is emphasized. Conceptual approaches to medically related biological problems are employed, frequently with the aid of automation and advanced imaging techniques, toward the goal of disease prevention, control, and eradication methods such as gene therapies. Coursework acquaints students with the most current literature and trains students in critical thinking, experimental design, and the ability to anticipate future developments.

Graduate study leading to a doctoral degree is emphasized. Under special circumstances, master's candidates are considered after consultation with faculty members and the chair.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Human Genetics offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Human Genetics.

## Admission

### M.S./Ph.D. in Human Genetics

The department accepts students into the M.S. program only rarely and under special circumstances.

Doctoral students generally are admitted to the program through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences. Information may be obtained from UCLA ACCESS, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu). The department may also admit students directly into the doctoral training program during the first year if positions are available.

Undergraduate requirements for the Ph.D. program are similar to those of ACCESS. The requirements include a bachelor's degree, with preparation in physics, biology, and chemistry, and exposure through upper division courses in specific areas that may include genetics,

biochemistry, molecular biology, cell biology, developmental biology, microbiology, virology, physiology, and immunology. Because of the high mathematical content of some areas of human genetics, advanced courses in mathematics may be substituted for biologically oriented courses. More advanced degrees (M.S., M.D., or equivalent) are also acceptable.

The Graduate Record Examination (GRE) General Test, three letters of recommendation, and a statement of purpose are required. The GRE Subject Test is recommended. International applicants whose first language is not English must take and submit a score on the Test of English as a Foreign Language (TOEFL) or International English Testing System (IELTS) examination and are encouraged to take and submit a score on the Test of Spoken English (TSE).

## M.D./Ph.D. Program

Applicants may apply for the M.D./Ph.D. program by submitting simultaneous applications to the School of Medicine and the Medical Scientist Training Program (MSTP). The application process must include completion of the *UCLA Application for Graduate Admission*. Information regarding the MSTP may be obtained by calling (310) 794-1817, e-mail: [mstp@mednet.ucla.edu](mailto:mstp@mednet.ucla.edu). Acceptance by both programs is necessary. Some common coursework between the programs means that the degrees can be completed together in somewhat less time than when completed separately.

## Master's Degree

For areas of study, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. Students on the comprehensive plan are required to write and orally defend an original proposal formulated on a topic in human genetics that is not directly related to their dissertation research. The thesis plan is for students on the laboratory research track. Those pursuing laboratory research take similar core courses in the first year as doctoral students. Students focused on biomathematics and statistical modeling in human genetics may substitute advanced courses in biomathematics for more biologically oriented courses.

In addition, all M.S. students must take courses in advanced human genetics and ethics in human genetics. Elective courses are taken to complete the minimum 36 units required for the M.S. degree.

## Doctoral Degree

The field of human genetics is a discipline that includes genomics, cytogenetics, biochemical and molecular genetics, medical genetics, immunogenetics, cancer genetics, developmental genetics, population genetics, and bioinformatics. The study of animal models is also an essential part of human genetics.

Students entering the program through UCLA ACCESS follow ACCESS course requirements in the first year. The requirements include a biological chemistry course that provides grounding in the chemical and biological properties of nucleic acids and proteins, and a selection from several courses that emphasize cellular function and organization. Knowledge of nucleic acid and protein structure and function as well as cell biology is essential for genetics. Students may select from several specialty courses; for those who have already decided to specialize in human genetics, a biological chemistry course on basic concepts and techniques in the genetics of lower and higher organisms is recommended.

As part of the ACCESS program during the first year, students also take three 2-unit seminar courses on current research topics, and a course on ethics in research. The Human Genetics Department faculty offers at least one seminar course in the field of human genetics. Courses in advanced human genetics and ethics in human genetics are required of predoctoral students. Four additional units of coursework are required for the Ph.D. degree, preferably in seminar format.

Students who enter the department directly have a choice between two tracks: (1) a laboratory track that has course requirements similar to those of the ACCESS program and (2) a bioinformatics track that has course requirements that include macromolecular structure and function, applied genetic modeling, molecular genetics, advance human genetics, and two courses in a minor in bioinformatics, mathematics/statistics, or computer science.

Students admitted through ACCESS are required to serve as teaching assistants for two quarters.

Written and oral qualifying examinations are required. The written examination consists of two short written research proposals that must be defended orally. Following successful completion of the written examination, students take the University Oral Qualifying Examination, which consists of a discussion of the proposals and of additional questions that probe their general knowledge and understanding of human genetics.

## Human Genetics

### Upper Division Courses

**CM153G. Macromolecular Structure. (6)** (Same as Biological Chemistry CM153G and Chemistry CM153G.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Letter grading.

**CM156. Human Genetics. (4)** (Same as Microbiology CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

**CM169. Cell Structure, Signaling, and Differentiation. (6)** (Same as Biological Chemistry CM169 and Molecular, Cell, and Developmental Biology CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM267. Letter grading.

**CM178. Molecular Genetics. (6)** (Same as Biological Chemistry CM178 and Molecular, Cell, and Developmental Biology CM178.) Lecture, five hours. Requisites: Chemistry 153A, 153B, Life Sciences 3, 4, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**199. Special Studies in Human Genetics. (2 to 8)** Tutorial, to be arranged. Students select instructor among eligible research faculty and carry out independent research project under instructor supervision. P/NP or letter grading.

### Graduate Courses

**M201. Use of the Computer in Biology. (2)** (Same as Microbiology and Immunology M241 and Molecular, Cell, and Developmental Biology M201.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

**M203. Stochastic Models in Biology. (4)** (Same as Biomathematics M203.) Lecture, four hours. Requisite: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines. S/U or letter grading.

**M207A. Theoretical Genetic Modeling. (4)** (Same as Biomathematics M207A and Biostatistics M237A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 131A. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

**M207B. Applied Genetic Modeling. (4)** (Same as Biomathematics M207B and Biostatistics M237B.) Lecture, three hours; laboratory, one hour. Preparation: coursework equivalent to Biostatistics 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

**220. Ethical Issues in Human Genetics. (2)** Discussion, two hours. Topics include consent for genetic research, privacy of genetic information, genetic discrimination, misattribution of parentage, DNA databases, presymptomatic genetic testing, newborn screening, genetic testing of children, preimplantation diagnosis, prenatal diagnosis, manipulation of embryos and cloning, gene therapy, and forensic use of genetic information. S/U or letter grading.

**236. Advanced Human Genetics. (6)** Lecture, five hours. In-depth overview of human genetics that forms basis for firm grasp of linkage mapping, genomics, development of animal models to study human disease, and current status of gene therapy. S/U or letter grading.

**CM248. Molecular Genetics. (6)** (Same as Biological Chemistry CM248, Microbiology M248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisite: course CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

**CM253. Macromolecular Structure. (6)** (Same as Biological Chemistry CM253 and Chemistry CM253.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

**CM256. Human Genetics. (4)** (Same as Microbiology CM256 and Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

**M260. Bioinformatics and Genomics. (4)** (Same as Chemistry CM260.) Lecture, three hours; discussion, one hour. Genomics and bioinformatics results and methodologies, with emphasis on concepts behind rapid development of these fields. Focus on how to think genomically via case studies showing how genomics questions map to computational problems and their solutions. S/U or letter grading.

**CM267. Cell Structure, Signaling, and Differentiation. (6)** (Same as Biological Chemistry CM267, Chemistry M267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

**596. Directed Individual Study and Research. (2 to 12)** Tutorial, to be arranged. Individual study or research for graduate students. May be repeated for credit. S/U grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. Individual study for M.S. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U or letter grading.

**598. M.S. Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. Preparation of research data and writing of M.S. thesis. May be repeated for credit. S/U or letter grading.

**599. Ph.D. Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. Preparation of research data and writing of Ph.D. dissertation. May be repeated for credit. S/U grading.

### Associate Professor

Christopher M. Stevens, Ph.D. (*Germanic Languages*)

## Scope and Objectives

The prime aim of the interdisciplinary Indo-European Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with two alternative major emphases: Indo-European linguistics and Indo-Iranian or other specialized language area studies.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Indo-European Studies Program offers the Doctor of Philosophy (Ph.D.) degree in Indo-European Studies.

## Admission

To be admitted to the Ph.D. program, applicants must have a B.A. degree with a major in

an Indo-European language field (for example, German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. In addition, all applicants, including those who do not have a B.A. degree in Classics or Latin, should be able to demonstrate competence in classical Latin. Letters of recommendation (at least two, preferably three or four) and a writing sample, normally consisting of a recent term paper (preferably on a linguistic topic) are required. The program does not require the Graduate Record Examination (GRE).

Potential applicants are invited to view the program's website for further information. Admission to the program itself constitutes admission to the doctoral program; there is no master's degree offered. Should deficiencies exist in requisites to specific work at the graduate level, applicants may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

## Doctoral Degree

The Ph.D. degree is offered with three alternative major emphases: (1) Indo-European linguistics, (2) specialized study in an Indo-European language area, such as Indo-Iranian, Anatolian, or Celtic, (3) European and related archaeology. At present, the archaeology specialization is not available.

Course requirements vary among the three major fields of specialization. General requirements for all students include a proseminar in Indo-European studies, knowledge of Vedic Sanskrit and Homeric Greek, and basic competence in Indo-European linguistics, mythology, and archaeology.

For students specializing in linguistics, requirements include an advanced seminar in comparative grammar, Hittite (and one other ancient Anatolian language), a fourth ancient Indo-European language (chosen from a branch other than Indic, Greek, or Anatolian), and additional units in courses offered by the Linguistics Department and related departments.

For students specializing in an Indo-European language area, requirements include an advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different sub-branches, and additional units in the area of specialization.

For students specializing in European and related archaeology, requirements include a minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields. All additional units are to be chosen in consultation with the adviser.

Written and oral qualifying examinations are required. Students must submit a qualifying paper that demonstrates their ability to conduct

original research. Also, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which is based on the written examinations and the dissertation prospectus, and probes their grasp of the entire field.

There is a language requirement for this degree.

## Indo-European Studies

### Upper Division Courses

**131. European Archaeology: Proto-Civilizations of Europe. (4)** Survey of European cultures from beginning of the food-producing economy in the 7th millennium B.C. to beginning of the Bronze Age in the 3rd millennium B.C.

**132. European Archaeology: Bronze Age. (4)** Requirement: course 131. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

**M150. Introduction to Indo-European Linguistics. (4)** (Same as Linguistics M150.) Lecture, three hours. Recommended prerequisite: Linguistics 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of reconstructed Indo-European proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged.

### Graduate Courses

**200. Proseminar: Indo-European Studies. (2)** Seminar, two hours every other week. Required of graduate Indo-European studies students during first year. Introduction to graduate-level research in Indo-European studies. S/U grading.

**205. Indo-European Linguistics: Advanced Course I. (4)** Seminar, three hours. Preparation: one year of college-level study of either Greek or Latin, knowledge of at least one other ancient Indo-European language, reading knowledge of French, German, or Russian. Prerequisites: course M150, Linguistics 110. Comparative study of phonology and nominal morphology. Problems in analysis and reconstruction. S/U or letter grading.

**210. Indo-European Linguistics: Advanced Course II. (4)** Seminar, three hours. Prerequisite: course 205. Comparative study of verbal morphology, syntax, and lexicon. Problems in analysis and reconstruction. S/U or letter grading.

**250A-250B. European Archaeology. (4-4)** Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading.

**260. Indo-European Comparative Mythology and Poetics. (4)** Seminar, three hours. Preparation: ability to read original sources in at least one ancient Indo-European language. Comparison of major Indo-European mythological and poetic traditions and reconstruction of their common sources. Topics include divinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; relations with other traditions; literary continuations of mythopoetic material. S/U or letter grading.

**280A-280B. Seminars: Indo-European Linguistics. (4-4)** Seminar, three hours. Prerequisite: course 210. Selected topics in Indo-European comparative grammar for advanced graduate students. S/U or letter grading.

**596. Directed Individual Studies. (2 to 8)** Tutorial, to be arranged.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged.

**599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged.

Anthony Maddox, Ph.D.

## Scope and Objectives

The Department of Information Studies has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, archives, preservation, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Applicants may write to the Department of Information Studies, 1009 Moore Hall, UCLA, Box 951521, Los Angeles, CA 90095-1521, for the department's announcement and application materials.

Note: Information Studies 110 may not be applied toward the M.L.I.S. degree; courses in the 111 series may be applied toward the M.L.I.S. degree with approval of faculty advisers.

Upper division undergraduate students must obtain consent of instructor to enroll in 200-series courses and consent of the chair to enroll in 400-series courses.

Graduate students from other schools or departments who wish to take courses in the Department of Information Studies must obtain consent of instructor prior to enrolling.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases,

even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Information Studies offers the Master of Library and Information Science (M.L.I.S.) degree and the Doctoral of Philosophy (Ph.D.) degree in Library and Information Science.

## Admission

### Master of Library and Information Science

Students are admitted to the M.L.I.S. program in Fall Quarter only. In addition to Graduate Division requirements and application procedures, the department requires

1. A statement of purpose
2. A resumé
3. An official report of a score on the Graduate Record Examination (GRE) taken within the past five years. For students whose native language is not English, an official report of a score on the Test of Written English (TWE) and the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination is required
4. Three letters of recommendation
5. Satisfaction of the following entrance requirements: (a) a college-level course in statistics (3 semester units or 4 quarter units) within the last five years with a minimum grade of C. The course must have covered descriptive and inferential statistics. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in statistics administered by the department; (b) a college-level course in computer programming (3 semester units or 4 quarter units) within the last five years with a minimum grade of C. Most standard languages such as BASIC, Visual Basic, C++, COBOL, FORTRAN, JAVA, or PERL are acceptable, as is a college-level course in the use of data management systems such as FileMaker, Microsoft Access, or Oracle. At least one third of the course grade should be based on programming assignments. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in computer programming administered by the department

Entrance requirements should be completed before beginning the M.L.I.S. program. However, one requirement may be satisfied in the Fall Quarter of the student's first year.

While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

The admissions committee may request a report of an interview by the chair of the depart-

ment or by a person designated by the chair as qualified to conduct an interview. Interviews are rarely conducted, and only for the purpose of clarifying a candidate's academic background and career objectives.

### Information Studies M.L.I.S./History M.A.

The M.L.I.S./History M.A. is a concurrent degree program within the Department of Information Studies and the Department of History. Students can obtain two degrees: the M.L.I.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from both this department and the History Department.

### Information Studies M.L.I.S./Latin American Studies M.A.

The M.L.I.S./Latin American Studies M.A. is an articulated degree program within the Department of Information Studies and the Latin American Studies Program. Students can obtain two degrees: the M.L.I.S. and the M.A. in Latin American Studies.

### Information Studies M.L.I.S./Management M.B.A.

The John E. Anderson Graduate School of Management and the Department of Information Studies offer a three-year concurrent degree program designed to provide an integrated set of courses for students who seek careers that draw on general and specialized skills in the two professional fields. Application materials should be requested separately from both schools.

### Ph.D. in Library and Information Science

Students are admitted to the Ph.D. program in Fall Quarter only. They may enter with the M.L.S. or M.L.I.S. degree, other advanced degree, or directly from a bachelor's degree program. If the prior graduate degree does not include coursework equivalent to the core identified for the M.L.I.S. program, applicants must complete the core after admission.

In addition to Graduate Division requirements and application procedures, the department requires satisfaction of the following entrance requirements:

1. A statistics requirement, satisfied by completing a college-level course with a minimum grade of C
2. Recommended: Applicants should have general knowledge of and basic experience in the use of computers (e.g., for word processing, statistics, online searches, spreadsheets, graphics, or web browsing)
3. A statement of purpose that identifies the applicant's proposed area of specialization, accompanied by appropriate evidence of qualifications for pursuing a doctoral program
4. A resumé

5. Graduate Record Examination (GRE) scores taken within the last five years. There is no minimum score for the GRE, but high scores are regarded favorably. Admitted students typically score above the 75th percentile in all areas
6. In cases where the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination and the Test of Written English (TWE) are required, the department expects a minimum score of 600 (paper and pencil test) or 250 (computer-based test) on the TOEFL, overall band score of 7.0 on the IELTS, and 4.5 on the TWE. Only in exceptional cases are applicants recommended for provisional admission who do not meet the minimum scores; in such cases, strong evidence of competency in English (such as a high verbal GRE score) must be provided
7. Evidence of research and writing such as published work, master's thesis, or two research papers written in English
8. Three letters of recommendation
9. Favorable consideration may be given to applicants who have made distinguished contributions to the profession while working as a practicing professional, for instance in publications and/or work with professional societies
10. A personal interview is required. The committee seeks evidence of an appreciation of research and knowledge of potential research topics. The committee is particularly interested in the applicant's commitment to a career in library and information science education and research, signs of originality and inquisitiveness, and good communication skills

## Master's Degree

The M.L.I.S. degree is offered through the comprehensive examination and thesis plans. The comprehensive examination consists of a basic component (a portfolio presentation) and a specialization component (a major paper produced in an elective course, normally in the area of specialization).

Eighteen courses (72 units) are required, including core courses, a course in research methods, and 48 units of electives. Coursework must provide evidence both of basic professional competencies and knowledge in a field of specialized competence (completion of 12 additional courses, which may include internships). Completion of a course of study is required as evidence of knowledge of a field of specialization in information policy and management, information access, information systems, or information organization. Relevant coursework in other departments or schools is encouraged.

During the second year, students may apply for an internship of one to three quarters either on

campus or off campus at an approved library or information center.

## Doctoral Degree

Ph.D. students are expected to specialize in a subfield in one of three major areas of the curriculum: information storage and retrieval systems; information seeking and use; policies and issues in library and information science.

A minimum of 18 to 21 courses, depending on the student's previous experience and coursework, is required. Students must take four required courses: a course in research design and methodology and at least three doctoral seminars from among those offered by the department, giving them three areas of specialization; three additional research methods courses; and three additional elective courses. In addition, students are required to participate in the Doctoral Research Colloquium.

Written and oral qualifying examinations are required. Students are required to pass one integrative written examination covering the content of three core doctoral seminars and the major research and theory traditions in information studies, and are required by their major area to submit one paper of publishable quality.

After successful completion of the written qualifying examinations, students take the University Oral Qualifying Examination, which is based on the oral defense of the dissertation proposal.

## Information Studies

### Upper Division Courses

**100. Perspectives on Literacy. (4)** Lecture, two hours; discussion, two hours. Designed for sophomores/juniors/seniors. Open to M.L.I.S. students and to graduate students from other schools/departments. Interdisciplinary introduction to literacy as a historical, social, and political issue. Topics include culture and literacy, historical development of literate societies, social definitions of illiteracy, literacy campaigns, literacy as a national and local policy issue. Letter grading.

**110. Information Resources and Libraries. (4)** Lecture, one hour; discussion, two hours; laboratory, one hour. Designed for sophomores/juniors/seniors. Not open for credit to M.L.I.S. students. Introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology). P/NP or letter grading.

**111A-M111E. Ethnic Groups and Their Bibliographies. (4 each)** Lecture, four hours. Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. Sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit. P/NP or letter grading. **111A.** American Indian History and Culture; **111B.** African American History and Culture; **111C.** Latino History and Culture; **111D.** Asian American History and Culture; **M111E.** Jewish History and Culture. (Same as Jewish Studies M111E.)

**182. Records and Information Resources Management. (4)** Lecture, three hours. Introduction to records and information resources management in corporate, government, and other organizational settings, including analysis of organizational information flow, classification and filing systems, records retention scheduling, records protection and security, reprographics and image management technology, and litigation support. Letter grading.

## Graduate Courses

**200. Information in Society. (4)** Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. Letter grading.

**201. Information Structures. (4)** Lecture, three hours; discussion, one hour. Required core course. Introduction to various systems and tools used to organize materials and provide access to them, with emphasis on generic concepts of organization, classification, hierarchy, arrangement, and display of records. Provides background for further studies in cataloging, reference, information retrieval, and database management. Letter grading.

**203. Design of Library and Information Services. (4)** Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs. Letter grading.

**204. Introduction to Information Technology. (4)** Lecture, four hours. Requisite: course 201. Introduction to theories and principles of information technologies. Topics include social issues of information technologies and design and development of information systems. Background for further studies in information retrieval and design and maintenance of information systems. S/U or letter grading.

**205. Historical Methodology of Library and Information Science. (4)** Lecture, four hours. Requisite: course 200. Introduction to historical research as it relates to library and information science. Identification of key primary and secondary source material for writing history in the field. Critical analysis of selected histories of various areas in the profession. Problem-oriented approach. Letter grading.

**207. International Issues and Comparative Research in Library and Information Science. (4)** Lecture, four hours. History and development of international organizations and programs in library and information science. Identification of key issues in international exchange of information. Introduction to comparative method as procedure for study and research. Letter grading.

**208. Development of Cultural Information Sources Using Digital Multimedia. (4)** Lecture, two hours; laboratory, two hours. Overview of technologies, techniques, and principles underlying development and packaging of cultural information resources into digital multimedia such as digital libraries, World Wide Web homepages, and CD-ROMs, as well as user, policy, presentation, motivation, and evaluation considerations. Letter grading.

**210. Seminar: Descriptive and Bibliographical Cataloging. (4)** Seminar, four hours. Requisites: courses 410, 411. Specialized studies in selected areas of descriptive and bibliographical cataloging (e.g., purposes, principles, instructional development, potentialities of automation). May be repeated once. S/U or letter grading.

**211. Seminar: Subject Control of Library Materials. (4)** Seminar, four hours. Requisites: courses 410, 411. Study of selected problems in design and use of verbal subject headings and classification systems. Manual and mechanized systems. May be repeated once. S/U or letter grading.

**213. Proseminar: Information Storage and Retrieval. (4)** Seminar, three hours. Designed for Ph.D. students. Introduction to principles of information organization, theoretical models for organization and retrieval, and current research in information system design and evaluation, including experimental systems. Letter grading.

**214. Proseminar: Information Policy and Issues. (4)** Seminar, three hours. Designed for Ph.D. students. Introduction to political, economic, legal, and social issues affecting information and institutions, including relevant social theory, historical scholarship, and analytical methods. Introduction to policy-making and players/stakes involved in information creation and use. Letter grading.

**215. Proseminar: Information Seeking and Use. (4)** Seminar, three hours. Designed for Ph.D. students. Introduction to cognitive, affective, and behavioral factors affecting information seeking at individual and social levels; current theory and research on searching, navigation, and information system use; research literature on information seeking and use. Letter grading.

**220. Information Access. (4)** Lecture, four hours. Requisites: courses 200, 201. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources. Letter grading.

**221. Bibliography of Science and Engineering. (4)** Lecture, four hours. Requisite: course 220. Patterns of communication and flow of information among scientists and engineers. Scientific and technical literature, with emphasis on online sources, special types of publications, research material, reference and bibliographical aids to the natural sciences and engineering. Letter grading.

**222. Bibliography of the Health and Life Sciences. (4)** Lecture, four hours. Requisite: course 220. Literature of the medical and life sciences. Information needs of health professionals. Emphasis on online sources, special types of publications, reference and bibliographic aids to the health sciences. Letter grading.

**223. Literature of the Social Sciences. (4)** Seminar, four hours. Requisite: course 220. Seminar on literature of the social sciences, including review of classics in the various fields, monumental source collections, periodicals, bibliographies, catalogs, abstracts, bibliographic and nonbibliographic databases, etc. Trends in scholarly and popular writing. Interdisciplinary nature of the literature. Letter grading.

**224. Literature of the Humanities and Fine Arts. (4)** Seminar, four hours. Requisite: course 220. Seminar on literature of the humanities and fine arts, including review of classics in the various fields, comparisons of editions, periodicals, bibliographical apparatus, and reviewing media. Trends in scholarly and popular writing. Letter grading.

**M225. Latin American Research Resources. (4)** (Same as History M265 and Latin American Studies M200.) Discussion, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results. S/U or letter grading.

**226. General Reference Work. (4)** Lecture, four hours. Requisite: course 220. General reference materials (not specific to subject access), with advanced work in reference process and in cognitive and behavioral aspects of inquirers and expert reference librarians. Letter grading.

**M229B. Africana Bibliography and Research Methods. (4)** (Same as African Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to African studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases. S/U or letter grading.

**M229C. Introduction to Slavic Bibliography. (2)** (Same as Slavic M229.) Lecture, two hours. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

**230. History of Publishing and the Book Trade. (4)** Lecture, four hours. Requisite: course 200. Publishing and book trade history, with particular reference to libraries and book collecting, changing aspects of book production and distribution within the setting of cultural history. Letter grading.

**240. Principles of Information Systems Analysis and Design. (4)** Discussion, four hours. Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization. S/U or letter grading.

**241. Measurement and Evaluation of Information Systems and Services. (4)** Lecture, two hours; discussion, two hours. Preparation: one research methods course. Recommended: one library automation course. Information systems and services from points of view of their cost and effectiveness in meeting desired objectives. Review of principles of costing. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description. S/U or letter grading.

**242. Information Retrieval Systems. (4)** Lecture, four hours. Prerequisites: courses 201, 220. Survey of methods of file organization, retrieval techniques, and search strategies in control of information in computerized form. Letter grading.

**243. Human/Computer Interaction. (4)** Lecture, four hours. Preparation: one programming course, one inferential statistics course. Survey of social, behavioral, design, and evaluation issues in human/computer interaction, with readings from several disciplines. Extensive use of technology demonstrations and class discussions. Recommended for students in any discipline involved in design or implementation of information technologies. Letter grading.

**245. Database Management Systems. (4)** Lecture, three hours; laboratory, two hours. Theories, principles, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security considerations. S/U or letter grading.

**246. Social Aspects of Information-Oriented Society. (4)** Lecture, four hours. Analysis of social evolution of information-oriented societies. Historical factors and current trends explored through discussion of selected international and domestic issues. Implications for information policy. S/U or letter grading.

**247. User-Centered Design of Information Retrieval Systems. (4)** Lecture, two hours; discussion, two hours. Prerequisites: courses 201, 220. Design implications of interaction between users and the features of automated information systems and interfaces that are specific to the information-seeking process. Emphasis on search strategy and subject access through use of thesauri and other vocabularies. Letter grading.

**249. Seminar: Special Topics in Information Science. (4)** Seminar, four hours. Preparation: at least one course from 242, 243, 247, 280, 405. Prerequisites: courses 200, 201. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services. Letter grading.

**253. Contemporary Children's Literature. (4)** Lecture, four hours. Reading interests and correlative types of literature surveyed with reference to growth and development of children. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance. S/U or letter grading.

**260. Historical Bibliography. (4)** Lecture, four hours. Prerequisites: courses 200, 402. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to historiography of the field, including antiquarian, Anglo-American, and *histoire du livre* approaches. Letter grading.

**261. Analytical Bibliography. (4)** Lecture, four hours. The book as a physical object and its relationship to transmission of the text. History and methods of analytical bibliography, with particular emphasis on handpress books. Printing processes as related to bibliography and librarianship. Discussions, demonstrations, and experiments in design, composition, and presswork. Letter grading.

**271. Seminar: Intellectual Freedom and Information Policy Issues. (4)** Seminar, four hours. Investigation of concept of intellectual freedom, information policy issues, civil liberties and civil rights, censorship, and other restraints on access to information. Letter grading.

**272. Research Seminar: Library and Information Science. (1 to 2)** Seminar, one to two hours. Designed for Ph.D. students. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit. S/U grading.

**273. Doctoral Seminar: Information Storage and Retrieval Systems. (4)** Seminar, four hours. Designed for Ph.D. students. Intellectual principles for organization of information, including principles for design of systems for acquiring, organizing, and retrieving information. Also includes system-specific user studies to extent that design of information systems is predicated on their evaluation and use. S/U or letter grading.

**274. Doctoral Seminar: Policies and Issues in Library and Information Science. (4)** Seminar, four hours. Designed for Ph.D. students. Examination of social, political, and economic influences in development of library and information science and management of information organizations and resources. S/U or letter grading.

**275. Doctoral Seminar: Information Seeking and Use. (4)** Seminar, four hours. Designed for Ph.D. students. Examination of behavioral and cognitive aspects of inquirer's information needs and uses, including inquirer's characteristics, information problems, psychological needs, and uses of information and information technologies, and aspects of question negotiation. S/U or letter grading.

**280. Information-Seeking Behavior. (4)** Lecture, three hours; discussion, one hour. Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses. S/U or letter grading.

**281. Information Resources for Business. (4)** Lecture, four hours. Prerequisite: course 220. Introduction to information needs of the business world. Business guides, encyclopedias, directories, yearbooks, indexes, loose-leaf services, government publications, databases, and other sources of business literature. Letter grading.

**282. Management of Digital Records. (4)** Lecture, three hours. Introduction to long-term management of digital administrative, information, communications, imaging, or research systems and records. Topics include electronic recordkeeping, enterprise and risk management, systems analysis and design, metadata development, data preservation, and technological standards and policy development. Letter grading.

**283. Legal Research and Bibliography. (4)** Lecture, four hours. Introduction to source materials of the law, with emphasis on primary authority, but covering as well secondary authority, and indexes and finding aids used to gain access to legal information. Letter grading.

**284. Seminar: Legal Informatics. (4)** Seminar, four hours. Information problems of legal profession, including history of legal information systems, relationship between cognitive authority and legal authority, bibliometrics of law, value-added processes for legal information, and techniques and impact of new legal research technology. Letter grading.

**285. Scholarly Communication and Bibliometrics. (4)** Lecture, four hours. Preparation: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media. Letter grading.

**286. Seminar: Information Access. (4)** Seminar, four hours. Preparation: one course from 221, 223, 224, 226, 281, 283, 425, 473. Prerequisite: course 220. Discussion of policies and issues related to basic and advanced reference materials, reference process, and psychological aspects of inquirers and expert reference librarians. Letter grading.

**287. Seminar: Special Issues in Library and Information Science. (2 to 4)** Seminar, two to four hours. Identification, analysis, and discussion of critical intellectual, social, and technological issues facing the profession. Topics may include (but not limited to) expert systems, literacy, electronic networks, youth at risk, information literacy, historical bibliography, preservation of electronic media, etc. May be repeated with topic change. Letter grading.

**288. Cyberspace Law and Policy. (4)** Lecture, four hours. Legal and policy concerns of networked technologies from international perspective. Emphasis on jurisdictional issues, freedom of expression, intellectual property, privacy, security, equity, and electronic commerce in online environment. S/U or letter grading.

**289. Information Services in Culturally Diverse Communities. (4)** Lecture, four hours. Issues in provision of information services in a multiethnic and multilingual society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage. Letter grading.

**290. Research Methodology. (4)** Lecture, four hours. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical, and descriptive techniques. S/U or letter grading.

**291. Introduction to Research Design and Methodology. (4)** Seminar, three hours. Designed for Ph.D. students. Introduction to research traditions in library and information science: quantitative/qualitative social science methods, ethnographic/field approaches, and historiography/critical approaches. Epistemological foundations of research, formulating research questions, and designing appropriate research studies. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Professional Development and Portfolio Design. (2 to 4)** Lecture, two hours; discussion, two hours. Preparation: completion of information studies core courses. Drawing on literature from many fields, exploration of issues related to professional development, such as career planning, continuing education, mentoring, and reflective practice; students also engage in process of guided portfolio design for M.L.I.S. degree. S/U grading.

**402. Fundamentals of Bibliography. (4)** Lecture, four hours. Prerequisite: course 200. Organization, control, and elements of bibliographical apparatus, new techniques and tools, theory, methods, and trends in bibliographical research in relationship to librarianship. Development and fundamentals of several branches of bibliography: enumerative (or systematic), physical (analytical or critical, descriptive). Letter grading.

**405. Automation of Library Processes. (4)** Lecture, four hours. Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and online services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Developments in standards for information processing and new information technologies. Letter grading.

**410. Descriptive Cataloging. (4)** Lecture, four hours. Entry and description of library materials. Constitution, structure, and form of the library catalog. Cataloging services, tools, and procedures. Cataloging rules and their application. S/U or letter grading.

**411. Introduction to Subject Access: Alphabetic-Subject and Systematic Indexing. (4)** Lecture/discussion, four hours. Prerequisite: course 410. Overview of major alphabetic-subject and systematic indexing languages and their use in manual and online environments, including theory and application of Library of Congress subject headings and of Dewey decimal and Library of Congress classifications. S/U or letter grading.

**412. Cataloging and Classification of Nonbook Materials. (4)** Lecture, four hours. Prerequisites: courses 410, 411. Problems in cataloging and classification of selected nonbook materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections. S/U or letter grading.

**414. Indexing and Thesaurus Construction. (4)** Lecture, four hours. Principles of design and methods of construction of thesauri. Evaluation and overview of thesauri used in manual and online environments. Basic professional techniques for indexing a variety of types of materials and for preparing informative and indicative abstracts. Letter grading.

**425. Computer-Based Information Resources (Online Searching).** (4) Lecture, four hours. Prerequisite: course 220. Emphasis on use of reference and resource databases and different vendor systems. File structure and hardware requirements. Analyses of information needs and investigation of databases addressing those needs. Letter grading.

**426. User Education/Bibliographic Instruction: Theory and Technique.** (4) Lecture, four hours. History, theory, methods, and materials of user education/bibliographic instruction in libraries and other information retrieval environments. Examination of a variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources. S/U or letter grading.

**430. Collection Development and Acquisition of Library Materials.** (4) Lecture, four hours. Background of publishing and the book trade (new and antiquarian) pertinent to collection development in public, school, academic, and special libraries. Theory and practice of collection development and management. Organization and administration of acquisitions departments. S/U or letter grading.

**441. Management Theory and Practice for Information Professionals.** (4) Lecture, two hours; discussion, two hours. Principles and practice of management in all types of organizations where information professionals work. Letter grading.

**442. Library Personnel Administration.** (4) Lecture, four hours. Basic principles of personnel management. Survey of current personnel practices in libraries; how basic principles apply or need to be modified to fit the library setting. S/U or letter grading.

**446. Library Services and Literature for Youth.** (4) Lecture, four hours. Overview of literature and programs which are of interest to young adults (seventh grade and above). Discussion of special problems in working with young people and psychology of the teenager. S/U or letter grading.

**461. College, University, and Research Libraries.** (4) Lecture, four hours. Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars. S/U or letter grading.

**463. Public Libraries.** (4) Lecture, four hours. Government, organization, and administration of municipal, county, and regional public libraries; developments in changing patterns of public library service. S/U or letter grading.

**465. Library Services and Programs for Children.** (4) Lecture, two hours; discussion, two hours. Theory and practice of service to children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service. Letter grading.

**466. Storytelling.** (4) Lecture, two hours; demonstration, two hours. Theory and practice of telling stories to children and adults in public and school libraries. S/U or letter grading.

**470. Special Libraries and Information Centers.** (4) Lecture, four hours. Organization, administration, collections, facilities, finances, and problems of special libraries and of special collections within general libraries. Methods of handling nonbook materials. Current trends in documentation and mechanization. S/U or letter grading.

**471. Health and Life Sciences Libraries.** (4) Lecture, four hours. Prerequisite or corequisite: course 441. Organization, administration, services, and problems of health and life sciences libraries; relationships with institutions of which they are a part and with the community. Letter grading.

**473. Government Information.** (4) Lecture, four hours. Introduction to nature and scope of government information promulgated by the federal government, as well as by state, municipal, international, and foreign governments. Problem-oriented approach. S/U or letter grading.

**485. American Archives and Manuscripts.** (4) Lecture, four hours. Identification, description, subject analysis, and organization of records contained in archives and manuscript collections. Administration. User requirements. Problems of acquisition, legal title, literary property, preservation, accessibility, and use. S/U or letter grading.

**486. Issues and Problems in Preservation of Library Materials.** (4) Lecture, four hours. Introduction to fields of library conservation and preservation, with emphasis on preservation administration. Letter grading.

**488. Seminar: Advanced Issues in Archival Science.** (4) Seminar, three hours. Prerequisite: course 485. In-depth examination of theoretical issues and contemporary problems facing the archival profession. Topics revolve each term and include development and role of archival appraisal, management of audiovisual materials, and management of medical, scientific, and technological documentation. Letter grading.

**491. Interpersonal Communication Issues in Library Systems.** (4) Lecture, four hours. Examination of interpersonal communication patterns in library management and staff relations, in resource sharing, and in providing information services. Emphasis on relationships within an organizational environment and on effective communication styles in decision making, managing conflict, and implementing change. S/U grading.

**497. Fieldwork in Libraries or Information Organizations.** (4 or 8) Fieldwork, to be arranged. Supervised field experience in approved library or information organization. Concentration must be on managerial or other professional problems of the site. Students spend full time in the field for most of the period. S/U grading.

**498. Internship.** (4) Discussion, to be arranged. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

**596. Directed Individual Study or Research.** (2 to 8) Tutorial, to be arranged. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

**597. Directed Studies for Ph.D. Qualifying Examinations.** (2 to 12) Tutorial, to be arranged. S/U grading.

**598. M.L.I.S. Thesis Research and Writing.** (2 to 8) Tutorial, to be arranged. Designed for graduate library and information science students. Supervised independent research for candidates in M.L.I.S. thesis option. S/U grading.

**599. Ph.D. Research and Writing.** (2 to 12) Tutorial, to be arranged. S/U grading.

#### Assistant Professors

Charles J. Corbett, Ph.D. (*Management*)  
J.R. DeShazo, Ph.D. (*Economics, Policy Studies*)  
Rebecca J. Emigh, Ph.D. (*Sociology*)  
Peggy M. Fong, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
David K. Jacobs, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
Laurence C. Smith, Ph.D. (*Geography*)

#### Lecturers

David A. Kirsch, Ph.D. (*Management*)  
Jeffrey K. Lew, Ph.D. (*Atmospheric Sciences*)

#### Visiting Professors

Nikolay Nezlin Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
Terry Root, Ph.D. (*Geography*)  
Stephen Schneider, Ph.D. (*Geography*)

## Scope and Objectives

The UCLA Institute of the Environment (IoE) offers multidisciplinary academic programs that address the full complexity of current environmental problems. The IoE seeks to enhance the educational experience of students by introducing them to virtually every aspect of the environment. The mission is to explore the full complexity of today's environmental problems on local, regional, and global scales through innovative, integrative, multidisciplinary teaching, research, and outreach programs.

Los Angeles is often described as "the world in microcosm." As such, it provides an unparalleled laboratory in which to conduct detailed investigations of a host of complex socioenvironmental issues. Accordingly, the academic program focuses on Southern California and its connections to the Pacific Rim. The educational program is supported by faculty from a broad range of disciplines — the sciences, public policy, engineering, law, business, public health — who are collaborating to develop an interdisciplinary, cutting-edge curriculum.

Students are able to augment their classroom experience with participation in the IoE diverse research programs, including fieldwork at facilities such as the UCLA Stunt Ranch Santa Monica Mountains Reserve and the UCLA Marine Science Center. These opportunities provide valuable hands-on experience in land, air, and water research.

## General Education Cluster

The Institute of the Environment sponsors Environment/General Education Clusters M1A, M1B, M1C on the global environment. The cluster format is a series of three integrated courses taught over the Fall, Winter, and Spring Quarters. The Fall and Winter Quarter courses consist of lectures and discussions. The Spring Quarter consists of seminars and field trips in which students explore specialized environmental topics such as the history of environmental thought, environmental policy, and the impacts of human population. Each course carries 5 units of academic credit, and the cluster satisfies general education credit for four courses.

## Environment

### Lower Division Courses

**M1A-M1B-M1C. Global Environment. (5-5-5)** (Formerly numbered 1A-1B-1C.) (Same as GE Clusters M1A-M1B-M1C.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1C. Letter grading. **M1A-M1B.** Multidisciplinary Perspective I, II. Lecture, three hours; discussion, two hours. Human effects on Earth's ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. **M1C.** Special Topics. Seminar, three hours. Small groups address environmental topics like smog, deforestation, and recycling. Exercises include field trips and oceanographic cruises.

### Upper Division Courses

**M111. Earth and Its Environment. (4)** (Same as Atmospheric Sciences M100.) Lecture, three hours. Overview of Earth as system of distinct, yet intimately related, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Survey of history of Earth and of life on Earth, particularly in relation to evolution of physical world. Consideration of possibility of technological solutions to global environmental problems using knowledge gained during course. Letter grading.

**112. Science of the Environment. (4)** Lecture, three hours. Scientific principles of environmental issues, designed for upper division humanities and social sciences students. Use of case-study approach, covering urban and indoor air pollution, coastal and drinking water pollution, population dynamics, biodiversity, stratospheric ozone depletion, and global climate change. Letter grading.

**113. Los Angeles Watershed. (4)** Lecture, three hours; discussion, one hour. Overview of how varying scales of influence from atmosphere/climate, basin hydrology, runoff, sewage treatment, wetlands ecology and wetlands loss, coastal water circulation, and coastal biogeochemistry affect water resources in Los Angeles. Letter grading.

**122. International Integrated Coastal Management. (4)** Lecture, three hours. The coast is one of most complex and interesting environments because of interactions among several ecosystems. The coast is often densely populated, with high economic and population growth, therefore socioeconomic conflicts are common. Sewage and industrial pollution, overfishing, and poorly planned development often threaten health of environment. Integrated coastal management (ICM) offers framework for resolving the conflicts in manner that allows sustainable development. Focus on how ICM is being used in the U.S. and around the world to solve pressing ecological and socioeconomic problems. Letter grading.

**M127. Soils and Environment. (5)** (Same as Geography M127 and Organismic Biology M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

**M133. Environmental Sociology. (4)** (Same as Sociology M115.) Lecture, three hours. Relationship between society and environment. Analysis in detail of interrelations between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

**M153. Introduction to Sustainable Architecture and Community Planning. (4)** (Same as Architecture and Urban Design CM191.) Lecture, three hours. Relationship of built environment to natural environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Letter grading.

**M161. Global Environment and World Politics. (4)** (Formerly numbered 161.) (Same as Political Science M122B.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 20. Politics and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. P/NP or letter grading.

**163. Management, Technology, and Environment. (4)** Lecture, four hours. Exploration of management of environmental issues by private companies in dynamic context of rapidly changing public expectations; specific focus on industrial ecology framework to evaluate effectiveness of firm-level efforts to moderate environmental impacts of economic activity. Letter grading.

**M165. Nuclear Weapons: Critical Decisions. (4)** (Same as Honors Collegium M119 and Policy Studies M116.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

Daniel C.H. Yang, Ph.D. (*Mechanical and Aerospace Engineering*)  
Jenn-Ming Yang, Ph.D. (*Materials Science and Engineering*)

## Scope and Objectives

The Integrated Manufacturing Engineering (IME) Program is an interdepartmental program based in the Mechanical and Aerospace Engineering Department. The main purpose is to educate future manufacturing engineers.

The curriculum is centered around an integrated approach to product development, while clean environment, agility, and cost-effectiveness are emphasized. Instruction is computer-aided, and teaching/learning laboratories are used to provide students with hands-on experience in advanced manufacturing technologies such as rapid prototyping, robotics, automated material handling, new manufacturing processes, and production planning and scheduling. Team teaching is employed to offer a balanced understanding of principles and methods required.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degree

The Integrated Manufacturing Engineering Program offers the Master of Engineering (M.Engr.) degree in Integrated Manufacturing Engineering.

## Admission

The M.Engr. program is an interdepartmental program within the Departments of Electrical Engineering, Materials Science and Engineering, and Mechanical and Aerospace Engineering.

In addition to meeting the requirements of the Graduate Division, applicants to the M.Engr. program are required to take the General Test of the Graduate Record Examination (GRE). Applicants may be admitted to the program through any one of the three departments listed above.

More information may be obtained at <http://ime.ucla.edu> or by contacting the program coordinator, Integrated Manufacturing and Engineering, 48-121 Engineering IV, UCLA, Box 951597, Los Angeles, 90095-1597, (310) 206-1840.

## Master's Degree

The M.Engr. degree is offered through the comprehensive examination plan. The examination consists of a group project. A total of 12 courses (39 units) is required, including six 400-level core courses, three electives (to be selected in consultation with the faculty adviser), and three seminar courses.

## Scope and Objectives

The undergraduate International Development Studies major aims to provide a liberal education in relation to the critical issues, experiences, and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international development in academia, public or private agencies, or nonprofit organizations.

## Undergraduate Study

### International Development Studies B.A.

#### Preparation for the Major

No specific courses are required as preparation for the major, but students should have some beginning experience in the social sciences at the college level and be in good academic standing. Recommended preparation: Anthropology 9, Economics 1, Geography 3 or

4 or 5, Political Science 20 or 30 or 50, Statistics 10, two years of one modern foreign language.

### Transfer Students

To be admitted as International Development Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one sociocultural anthropology course, one principles of economics course, one course in cultural geography, economic geography, or people and ecosystems, one comparative politics course, one statistics course, and two years of one modern foreign language.

### The Major

*Required:* Fifty-six units of upper division courses (including International Development Studies 100A, M100B, and Economics 110 or 111 or 112), taken for a letter grade, and the foreign language requirement. (For the social statistics and methodology requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in item 5 below. Substitutions may be made only with consent of the chair or program counselor.

The major consists of six parts (courses marked with an asterisk have prerequisites):

1. International Development Studies 100A, M100B
2. Economics \*110 or \*111 or \*112
3. Four core courses (two must be from the same discipline) from Anthropology \*130, \*150, \*161, Economics \*112, \*191, Geography \*M128, 133, Political Science \*124, \*167A, Sociology 173, \*183, 184
4. One course in social statistics and methodology from Anthropology 139, \*180, 186, Biostatistics \*100A, Economics M40, Geography M40, \*M171, Political Science 6, \*102, Sociology \*M18, 104, \*C112, \*113, 211A, \*211B, Statistics 10
5. Twenty-four units of elective courses, including at least 16 units to be divided equally between two of the world's developing areas (e.g., sub-Saharan Africa, Middle East/North Africa, East Asia/East-Central Asia, South and Southeast Asia/Pacific Islands, Eastern Europe/West-Central Asia, Latin America/Caribbean Basin), selected from Anthropology \*130, \*150, \*M151, 152, 153, \*153P, \*M154Q, M155Q, \*161, \*165, 167, M168, 171, 173Q, 174P, 175R, 175T, \*175U, 175V, \*175W, 176, 177, Berber 130, Community Health Sciences 132, 200, M251, \*280, \*434A, Economics \*110, \*111, \*112, \*120, \*130, \*150, \*151, \*M158, \*171, \*180, \*M188A through \*188Z, \*191, \*192, \*286A, \*286B, 287A, 287B, Education \*M108, C191E, 204B through 204F, 234, 238, \*252B, M252C, 253B, 253C, 253D, Epidemiology \*415, Film and Television 106C, 112, Geography 110, 121, \*122, \*124, \*M128, 133, 135, 140, 142, \*148,

\*155, 181, 182A, 182B, 184, 185, 186, 187, 190, 230, 234, Health Services \*240, History 106A, 106B, 106C, 107A, 107B, 109A, 109B, 110A, 110B, 111A, 111B, 111C, 112A, 112B, 112C, 113, 124A, 124B, 124C, 131A through 131D, 134A, 134B, 144, 165A, 165C, 166, 167A through 167D, 168, \*169, 170A, 170C, 171, 172, 173, 174, \*175B, \*175C, \*175E, 176A, 176B, 176C, 177, 178A, 178B, 179A, 179B, 182A, 182B, 183A, 183B, 183C, 184, 188A, 188B, 188C, 189A, 189C, 190A, 190B, 190C, 197 (with counselor approval), International Development Studies \*195A, \*197, Iranian 169, Jewish Studies 142, Korean \*180A, \*180B, \*180C, Latin American Studies 197, \*199, Political Science \*124, 130, 151A, 151B, 151C, 154A, 154B, 156A through 156D, 157, 159A, 159B, \*167A, \*168, \*C197A through \*C197D, M197W, Sociology 101, 116, 156, 157, 160, \*M175, 184, 186, 187, 188, 190, 191, 192, 193, Turkic Languages 170, Urban Planning \*CM128, M230, 234A, \*234B, M234C, \*235A, \*235B, M236A, 269, Women's Studies \*M123, \*M154Q. Consult the program counselor regarding other possible electives that may be applied toward the major

6. Twenty-four quarter units in one modern foreign language or the equivalent in transfer units. Students may also take a proficiency examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to program faculty)

### Honors Program

Majors who have completed International Development Studies 100A and M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 195A, 195B, and 195C, in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 195A, 195B, 195C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 195A, 195B, 195C) with a 3.75 GPA and who produce an exceptional thesis.

## International Development Studies

### Upper Division Courses

**100A-M100B. Introduction to Development Studies. (4-4)** Seminar, three hours. Two-term seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. **100A.** Economic Development and Culture Change. Preparation: some beginning experience in social sciences at college level. Requisite: Anthropology 9. **M100B.** Political Economy of Development. (Same as Political Science M197G and Sociology M180.) Designed for juniors/seniors. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

**195A-195B-195C. Directed Studies for Honors. (4-4-4)** Preparation: 3.5 grade-point average in courses offered for the major, formal application to honors program. Requisites: courses 100A, M100B. **195A.** Research, discussion, and planning of honors thesis. **195B-195C.** Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

**197. Special Topics in International Development. (4)** Seminar, three hours. Preparation: some beginning experience in social sciences at college level. Lecture/seminar format on selected topics in international development. Course either features visiting instructors in field of development studies or allows program's affiliated faculty to engage specific contemporary issues. May be repeated for credit with topic change.

## INTERNATIONAL RELATIONS

*College of Letters and Science*

UCLA  
4256 Bunche Hall  
Box 951472  
Los Angeles, CA 90095-1472

(310) 825-3862  
<http://www.polisci.ucla.edu/>

### Scope and Objectives

The undergraduate specialization in International Relations can only be taken jointly with a major in Political Science, and all requirements for the Political Science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in Political Science and specialization in International Relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or instructional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

## Undergraduate Study

### International Relations Specialization

#### Preparation for the Specialization

*Required:* Political Science 20, 50, and two courses from 10, 30, 40; Anthropology 9; Economics 1 and 2, 5, or 100; Geography 3 or 5; History 1A, 1B, and 1C, or any three courses from 8A, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B; Sociology 1 or 31.

#### Upper Division Requirements

The Political Science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I or III.

Other required social sciences courses include one course from Anthropology 161, 165, 167, 171, 173Q, 174P, 175R, 175T, 175U, 177, Sociology 182, 183, 186, 187, 188, 189, 190; two courses from Economics 110, 111, 112, 180, 181A, 181B, 182, 190, 191, 192; one course from Geography 110, 121, 125, M128, 133, 140, 181, 182A, 182B, 183, 184, 185, 186, 187, 190; two courses from History 116A, 116B, 117A, 127A, 127B, 142A, 142B, 148C, 152A, 152B, 168.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under African Languages, East Asian Languages and Cultures, Germanic Languages, Italian, Near Eastern Languages and Cultures, and Portuguese. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

#### Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia.

For further information, contact the political science undergraduate counselor in the program office.

Irene A. Bierman, Ph.D. (*Art History*)  
Michael G. Morony, Ph.D. (*History*)  
Aamir R. Mufti, Ph.D. (*Comparative Literature*)

#### Assistant Professors

Michael D. Cooperson, Ph.D. (*Near Eastern Languages and Cultures*)  
Ghislaine E. Lydon, Ph.D., *in Residence (History)*  
Steven D. Nelson, Ph.D. (*Art History*)

#### Adjunct Professor

Sondra Hale, Ph.D. (*Anthropology*)

## Scope and Objectives

The undergraduate major in this discipline is called Near Eastern Studies. For details, see the program by that name later in this section.

The designation of the interdepartmental degree program in Islamic Studies is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religion alone. Islam as a culture-forming force in his-

tory may be studied and understood through the literate sources of Islamic civilization and/or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an "idealized" and a "functional" or "practical" Islam does not preclude a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Islamic Studies Program offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Islamic Studies.

## Admission

### M.A./Ph.D. in Islamic Studies

In addition to the general University requirements, a B.A. degree in Near Eastern Studies or in a related field with an emphasis on the Near East is required. Applicants are normally expected to have completed the equivalent of Arabic 102A, 102B, and 102C, or Iranian 102A, 102B, and 102C, or Turkic Languages 101A, 101B, and 101C at the time of application. In addition, applicants should have completed the equivalent of two years of Near Eastern history (classical and modern); some coursework in Islamic culture and institutions may be applied toward the history requirement. Should there be any deficiencies in these requisites, the requirements must be satisfied by taking the appropriate courses without credit toward the advanced degree.

Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Students entering the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. In addition, students are expected to show proficiency in a second Near Eastern language, one of which must be Arabic. Students who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for international applicants. No screening examination is necessary.

A score of 560 (paper and pencil test) or 220 (computer-based test) on the Test of English as a Foreign Language (TOEFL) or overall band score of 7.0 on the International English Language Testing System (IELTS) examination is required of all applicants whose native language is not English and who have not attended English-speaking universities.

The application deadline is March 1. No special application form is required in addition to the *UCLA Application for Graduate Admission*.

### **Islamic Studies M.A./ Public Health M.P.H.**

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the M.A. in Islamic Studies and the M.P.H. A maximum of 12 units of coursework in public health may be applied toward both degrees. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Services Office, UCLA School of Public Health.

### **Master's Degree**

For major fields, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination plan. A minimum of nine courses is required, five of which must be at the graduate level. Students must take no fewer than four courses at the appropriate level in one Near Eastern language of their choice. Additionally, students must take no fewer than five relevant upper division and graduate-level courses selected from two of the major fields and subdisciplines listed below. The omission of history as one of the fields is approved only in exceptional cases.

There is a language requirement for this degree.

### **Doctoral Degree**

Major fields include anthropology, Arabic, economics, geography, history, Islamic art history and architecture, music, Persian, political science, sociology, and Turkish.

For students entering directly into the Ph.D. program, course requirements are the same as

for the M.A. Beyond this students take, on specific advisement of the program, advanced courses in two Near Eastern languages, in Near Eastern history, and in one of the social sciences.

Written and oral qualifying examinations are required. The written examinations are in four fields: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one of the other nonlanguage major fields listed above.

Following successful completion of the written qualifying examinations, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## **Islamic Studies**

### **Course List**

#### **Anthropology**

- 130. Study of Culture
- 150. Study of Social Systems
- M154P. Gender Systems: North American
- M154Q. Gender Systems: Global
- 156. Comparative Religion
- 161. Development Anthropology
- 167. Urban Anthropology
- 215. Field Training in Archaeology
- 230Q. Theories of Culture
- 273. Cultures of the Middle East

#### **Arabic (Near Eastern Languages)**

- 102A-102B-102C. Intermediate Literary Arabic
- 111A-111B-111C. Elementary Spoken Egyptian Arabic
- 112A-112B-112C. Advanced Spoken Egyptian Arabic
- 113A-113B-113C. Elementary Spoken Levantine Arabic
- 114A-114B-114C. Spoken Moroccan Arabic
- 120. Islamic Texts
- 130. Classical Arabic Texts
- 132. Philosophical and Kalam Texts
- 141. Modern Arabic Literature
- 150. Introduction to Arabic Literature and Culture
- 199. Special Studies in Arabic
- 220. Seminar: Islamic Texts
- 230. Medieval Literary Texts
- 240. Seminar: Arab Historians and Geographers
- 250. Seminar: Arabic Literature
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation

#### **Archaeology**

- 259. Fieldwork in Archaeology
- 596. Individual Studies for Graduate Students
- 597. Preparation for Ph.D. Qualifying Examinations

#### **Armenian (Near Eastern Languages)**

- 210. History of the Armenian Language
- 220. Armenian Literature of the Golden Age (A.D. 5th Century)
- 230A-230B-230C. Elementary Classical Armenian
- 231A-231B-231C. Intermediate Classical Armenian
- 232A-232B-232C. Advanced Classical Armenian

#### **Art History**

- 104A. Western Islamic Art
- 104B. Eastern Islamic Art
- C104C. Problems in Islamic Art

- 105E. Byzantine Art
- 213. Advanced Studies in Islamic Art
- C214. Problems in Islamic Art

#### **Berber (Near Eastern Languages)**

- 101A-101B-101C. Elementary Berber
- 102A-102B-102C. Advanced Berber
- 130. The Berbers
- 199. Special Studies in Berber Languages

#### **Classics**

- M170. Power and Imagination in Byzantium

#### **Ethnomusicology**

- 147. Survey of Classical Music in India
- 240. Music of Arabic-Speaking Near East
- 241. Music of Iran and Other Non-Arabic-Speaking Communities
- 248A-248B. Classical Music of India

#### **French**

- 121A. Contemporary Francophone Literature: French-African Literature
- 221A. French-African Literature: Introduction to Study of French-African Literatures
- 221C. French-African Literature: French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa
- 257A-257B. Studies in French-African Literature

#### **Geography**

- 187. Middle East

#### **Greek (Classics)**

- 231A-231B-231C. Later Greek and Byzantine Literature

#### **Hebrew (Near Eastern Languages)**

- 230. Seminar: Medieval Hebrew Literature
- 231. Texts in Judeo-Arabic

#### **History**

- 106A-106B-106C. Survey of the Middle East from 500 to the Present
  - 107A-107B. Islamic Civilization
  - 108A-108B. History of the Arabs
  - 109A-109B. History of North Africa from the Moslem Conquest
  - 110A-110B. Iranian History
  - 111A-111B. History of the Turks
  - 114. Topics in Middle Eastern History
  - 123A-123B. Byzantine History
  - 188B-188C. History of British India I, II
  - 190A-190B. History of Southeast Asia
  - 204A-204B. Seminars: Near and Middle Eastern History
  - 205A-205B. Seminars: Medieval Middle Eastern History
  - 206A-206B. Seminars: Social History of the Middle East
  - 209A-209B. Seminars: Ottoman and Modern Turkish History
  - 216A-216B. Seminars: Byzantine History
  - 596. Directed Studies
  - 597. Directed Studies for Graduate Examinations
  - 599. Ph.D. Research and Writing
- #### **Iranian (Near Eastern Languages)**
- 102A-102B-102C. Intermediate Persian
  - 103A-103B-103C. Advanced Persian
  - 140. Persian Belles Lettres (Adabiyât)
  - 141. Persian Analytical Prose
  - 150A-150B. Survey of Persian Literature in English
  - 169. Civilization of Pre-Islamic Iran
  - 170. Religion in Ancient Iran
  - 190A-190B. Introduction to Modern Iranian Studies
  - 199. Special Studies in Iranian
  - 220A-220B. Classical Persian Texts
  - 221. Rumi, Mystic Poet of Islam
  - 250. Seminar: Classical Persian Literature

251. Seminar: Contemporary Persian Literature  
 596. Directed Individual Study  
 597. Examination Preparation  
 599. Ph.D. Dissertation Research and Preparation

#### Islamic (Near Eastern Languages)

110. Introduction to Islam  
 596. Directed Individual Study  
 597. Examination Preparation  
 599. Ph.D. Dissertation Research and Preparation

#### Linguistics

220. Linguistic Areas  
 225. Linguistic Structures

#### Near Eastern Languages

200. Bibliography and Method of Near Eastern Languages and Literatures  
 210. Survey of Afro-Asiatic Languages  
 M241. Folklore and Mythology of the Near East  
 290. Seminar: Paleography  
 596. Directed Individual Study  
 597. Examination Preparation  
 599. Ph.D. Dissertation Research and Preparation

#### Philosophy

104. Topics in Islamic Philosophy

#### Political Science

132A-132B. International Relations of the Middle East  
 157. Government and Politics in the Middle East  
 C245. Middle Eastern Politics

#### Semitics (Near Eastern Languages)

215B. Syriac

#### Sociology

134. Culture and Personality  
 187. Population and Society in the Middle East

#### Turkic Languages (Near Eastern Languages)

101A-101B-101C. Elementary Turkish  
 102A-102B-102C. Advanced Turkish  
 111A-111B-111C. Elementary Uzbek  
 112A-112B-112C. Advanced Uzbek  
 114A-114B-114C. Bashkir  
 160. Turkish Tradition  
 180. Modern Turkic Languages and Peoples  
 199. Special Studies in Turkic Languages  
 210A-210B-210C. Introduction to Ottoman  
 211. Ottoman Diplomats  
 220A-220B-220C. Classical Uzbek (Chagatay)  
 230A-230B-230C. Historical and Comparative Survey of Turkic Languages  
 235A-235B. Middle Turkic  
 240A-240B-240C. Advanced Ottoman  
 250A-250B-250C. Islamic Texts in Chagatay  
 280A-280B. Seminars: Modern Turkish Literature  
 290A-290B. Seminars: Classical Turkic Literature  
 596. Directed Individual Study  
 597. Examination Preparation  
 599. Ph.D. Dissertation Research and Preparation

#### Assistant Adjunct Professor

Marco Codebo, Dottore in Lettere

## Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

## Undergraduate Study

### Italian B.A.

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is requisite to most upper division literature courses credited toward the major in Italian. The uniqueness of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46.

### Transfer Students

To be admitted as Italian majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and one Italian civilization or culture course.

### The Major

*Required:* Thirteen upper division Italian courses, including 100, 103A, 103B, 113, 114A or 114B, 116A or 116B; one course from 118 or 119; one course from 120 or 121; four courses from 114A through 197; 190. One upper division elective course in a field relevant to Italian studies from outside the department may be substituted with consent of the undergraduate adviser.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

## Italian and Special Fields B.A.

Students with special interests or professional goals may select this major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

### Transfer Students

To be admitted as Italian and Special Fields majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

### Anthropology Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and 33.

#### The Major

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; five courses from Anthropology 110, 111, 112, M115A, M115B, C115R, 130, 132, 133Q, 135A, 135B, 135C, 135S, 135T, 138, 139, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate adviser.

### Art History Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Art History 50 or 51, 54, 57.

**The Major**

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, C109A, 109C, 110A, 110B, 110F, 127, 150D selected in consultation with the undergraduate adviser.

**Classics Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40 or 41, and Greek 1, 2, 3 or Latin 1, 2, 3, or equivalent.

**The Major**

*Required:* Italian 100, 103A or 103B, 190, 195, and two courses from 113 through 197 selected in consultation with the undergraduate adviser; Greek 100 or Latin 100, one course from Classics 141 through 197 (except 195), and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

**English Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; English Composition 3, English 4W, 10A, 10B, 10C.

**The Major**

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; four courses from English 100, M101A through 119, 121, 140A through M197A selected in consultation with the undergraduate adviser.

**Film and Television Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, 46.

**The Major**

*Required:* Italian 100, 103A or 103B, 121, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 127, 193A selected in consultation with the undergraduate adviser.

**French Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; French 1, 2, 3, 4, 5, 6, 12 or 14.

**The Major**

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from French 114A, 114B, 114C, and three courses from 115A through 142 selected in consultation with the undergraduate adviser.

**History Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; one course from History 1A, 1B, 1C, 88B through 88E, 88Q, 88U.

**The Major**

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from History 100, 102, 119M through 121D, 125A through 127B, 132A, 132B, 135A through 137B selected in consultation with the undergraduate adviser.

**Linguistics Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

**The Major**

*Required:* Italian 100, 103A or 103B, 190 or 222A, 195, 222B, and two courses from 113 through 197 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170 selected in consultation with the undergraduate adviser.

**Music History Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, Music History 2A, 2B, 26A, 26B, 26C. *Recommended:* Music 20A, 20B, 20C.

**The Major**

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; five courses from Music History 126A through 127G, 135A, 135B, 135C, 156 selected in consultation with the undergraduate adviser.

**Philosophy Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

**The Major**

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; Philosophy 100A, 100B, 100C, and three courses from M101A through 189 selected in consultation with the undergraduate adviser.

**Political Science Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Political Science 10, 20.

**The Major**

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Political Science 111A

through 113, 116 through 119Z, 137A, 137B, 139A through 139Z, 153A, 155, 167A selected in consultation with the undergraduate adviser.

**Portuguese Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

**The Major**

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A through 197 selected in consultation with the undergraduate adviser.

**Spanish Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), M42 or M44.

**The Major**

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from Spanish 120A, 120B and three courses from 122 through M161 selected in consultation with the undergraduate adviser.

**Theater Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

**The Major**

*Required:* Italian 100, 103A or 103B, 122, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, 111B, 111C, Classics 143, English 142A, 142B, 142C, 168 selected in consultation with the undergraduate adviser.

**Women's Studies Field****Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Women's Studies 10.

**The Major**

*Required:* Italian 100, 103A or 103B, M158, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; Women's Studies 110A or 110B, and five additional upper division courses from any of the women's studies course lists selected in consultation with the undergraduate adviser.

**Study in Italy**

Students are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. They are also urged to take advan-

tage of summer language workshops and study programs, including UCLA's own programs in Italy and Los Angeles. For additional information, contact the Education Abroad Program, 1333 Hershey Hall, or the Summer Sessions Office, 1147 Murphy Hall.

## Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Requirements: Italian 102A, 102B, 102C.

Candidates select three upper division literature courses in which additional readings are required. In the last term of the senior year, they are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses may not fall below A-. Applications should be made during the last term of the junior year.

## Italian Minor

To enter the Italian minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (12 units):* Italian 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

*Required Upper Division Courses (20 units):* Italian 100 and four additional Italian courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Italian offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Italian.

## Admission

Applicants to the M.A. and Ph.D. programs must submit the *UCLA Application for Graduate Admission* and meet University minimum requirements for graduate admission. Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian. Applicant files of those who meet University minimum requirements are screened by the departmental committee on admissions. Admission on a provisional basis may be recommended in the case of applicants with deficiencies in preparation.

For admission to the Ph.D. program, applicants must hold an M.A. degree in Italian literature from UCLA or its equivalent from another university in the U.S.

## Master's Degree

The M.A. degree is available with specializations in Italian literature and Italian language.

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. For the Italian literature specialization, 12 courses are required, including studies in criticism and turn-of-the-century literature. The other nine courses must be distributed in three main literary periods, with at least two courses in each period: Middle Ages, Renaissance, modern.

For the Italian language specialization, requisites include a general grasp of linguistics and a broad familiarity with Italian literary and cultural history. Twelve courses are required, including studies in the history of Italian language and a specified course in linguistics or its equivalent. At least nine courses must be in the 200 series.

There is a language requirement for this degree.

## Doctoral Degree

Two centuries of Italian literature selected from the medieval, Renaissance and baroque, or modern areas comprise the major fields; two other centuries of Italian literature selected from any of these areas comprise the minor fields. Students may select a major or minor in a literary genre outside the department if it is related to their major field of specialization and has the approval of the entire faculty.

In addition to those required for the master's degree, at least 10 more courses are required. Students also must take such courses as their guidance committee prescribes for the qualifying examinations.

Written and oral qualifying examinations are required. The comprehensive examination for the M.A. in Italian also serves as Part I of the written qualifying examinations for the Ph.D. degree. The written examination consists of two parts: an examination in the student's major field and an examination in the minor field.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Italian

### Lower Division Courses

**1. Elementary Italian — Beginning. (4)** Lecture, five hours. P/NP or letter grading.

**1A. Elementary Italian — Accelerated. (8)** Lecture, 10 hours; laboratory, two hours. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2.

**1G. Special Reading Course. (4)** Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.

**2. Elementary Italian — Continued. (4)** Lecture, five hours. Enforced requisite: course 1. P/NP or letter grading.

**2A. Elementary Italian — Accelerated (Continued). (8)** Lecture, 10 hours; laboratory, two hours. Enforced requisite: course 1A or 2. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 3 and 4.

**2G. Special Reading Course. (4)** Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

**3. Elementary Italian — Continued. (4)** Lecture, five hours. Enforced requisite: course 2. P/NP or letter grading.

**3A. Intermediate Italian — Accelerated. (8)** Lecture, six hours; laboratory, two hours. Enforced requisite: course 2A or 3. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 4 and 5.

**4. Intermediate Italian. (4)** Lecture, five hours. Enforced requisite: course 3. P/NP or letter grading.

**5. Intermediate Italian. (4)** Lecture, five hours. Enforced requisite: course 4. P/NP or letter grading.

**6. Intermediate Italian. (4)** (Formerly numbered 25.) Lecture, five hours. Enforced requisite: course 5. Advanced grammar and composition course with readings from select literary works. P/NP or letter grading.

**7. Elementary Italian Conversation. (4)** Lecture, five hours (first six-week summer session). Encompasses conversational material included in course 1, with emphasis on traveler's vocabulary.

**8A-8B-8C. Italian Conversation. (2-2-2)** Discussion, three hours. Enforced requisite: course 2. Each course may be repeated once for credit. P/NP or letter grading.

**42A-42B. Italy through the Ages in English. (4-4)** Lecture, three hours; discussion, one hour. P/NP or letter grading. **42A.** Holy Roman Empire to Sack of Rome. Survey of Italy's unique contribution to Western civilization in history, literature, painting, and politics from time of Charlemagne to High Renaissance. **42B.** Late Renaissance to Postmodern Period. Baroque sculpture and architecture, Galileo, Enlightenment, unification of Italy, Fascism, Communism, terrorism, neorealistic cinema, and "moral revolution" of the 1980s and 1990s.

**46. Italian Cinema and Culture. (4)** Lecture, two hours; discussion, one hour; film screenings, two to three hours. Survey of development of Italian cinema and culture from the 1900s to the present through analysis of principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in works of the nation's filmmakers and writers.

**50A-50B. Masterpieces of Italian Literature in English. (4-4)** Lecture, three hours. P/NP or letter grading.

**50A.** Middle Ages and Renaissance. Philosophical, religious, and sociopolitical issues examined in authors such as St. Francis, Guinizelli, Cavalcanti, Dante, Boccaccio, Petrarca, Poliziano, Lorenzo de' Medici, Machiavelli, Castiglione, and Ariosto. **50B.** Baroque Period to the Present. Close reading of major works selected from such writers as Tasso, Bruno, Campanella, Vico, Parini, Alfieri, Foscolo, Leopardi, Manzoni, Verga, and Pirandello.

## Upper Division Courses

**100. Composition and Style. (4)** Lecture, three hours. Requisite: course 6. Development of writing techniques and proficiency in composition and style, with emphasis on editing for grammar and style. P/NP or letter grading.

**102A-102B-102C. Italian Cultural Experience in English. (4-4-4)** Lecture, three hours. Study of cultural development of Italy. P/NP or letter grading. **102A.** Roots of Western civilization; social and artistic achievements of communal society; Marco Polo, Dante, Boccaccio, Giotto, rise of Italian merchant class. **102B.** Renaissance discovery of human genius; crucial period between Machiavelli and Galileo, leading Italy and Europe to scientific revolution. **102C.** Birth of Italian nation from wars of independence to foundation of modern republic, delineated through narrative and cinema in historical context.

**103A-103B-103C. Introduction to Italian Literature and Literary Analysis. (4-4-4)** Lecture, three hours. Prerequisite: course 100. Italian literature from 1150 to the present, with emphasis on methods of interpreting literary form and meaning in poetry, drama, epic, and novel. P/NP or letter grading:

**103A.** Knights, Saints, and Lovers. Beginning with generation dominated by St. Francis, love poets of court of Frederick II to three classic writers of Italian literature: Dante, Petrarch, and Boccaccio. Renaissance rediscovery of human individuality, dignity, and creativity in works of Pico della Mirandola and Castiglione.

**103B.** Power and Beauty. Classics of High Renaissance in theater, epic, and lyric poetry, followed by surprising developments of baroque period, Counter-Reformation, and Enlightenment. Artists and writers include Leonardo da Vinci, Michelangelo, Machiavelli, Ariosto, Tasso, Bruno, and Vico.

**103C.** Romanticism, Politics, and Disillusionment. Great poetry and dialogues of Giacomo Leopardi; patriotic literature accompanying rise of modern Italian state; futurism, surrealism, neorealism, and postmodernism. Authors may include Foscolo, Manzoni, Verga, Pirandello, Calvino, and Dario Fo.

**110. Dante, in English. (4)** Lecture, three hours. Close study of one of world's greatest literary geniuses, particularly of his masterpiece, *Divine Comedy*, the archetypal medieval journey through the afterworld. P/NP or letter grading.

**113. Dante's *La Divina Commedia*. (4)** Lecture, three hours. Prerequisite: course 100. Study of medieval philosophy, religion, and politics in *La Divina Commedia*, greatest literary achievement of the age. P/NP or letter grading.

**114A-114B. Middle Ages. (4-4)** Lecture, three hours. Prerequisite: course 100. P/NP or letter grading. **114A.** Tradition of Love from Sacred to Profane. Study of major love poets of all time (Dante, *Dolce Stil Novo* poets, and Petrarca) caught between courtly and religious codes. **114B.** Medieval Humor, Moralism, and Society. Novelty of Boccaccio's witty and comic masterpiece, *Decameron*, analyzed within context of moral and social codes of culture of the time.

**116A-116B. Italian Renaissance. (4-4)** Lecture, three hours. Prerequisite: course 100. P/NP or letter grading. **116A.** Renewal of Art and Thought. Study of the *Quattrocento* and its representatives in the arts and humanistic thought (i.e., Mantegna, Botticelli, Pico, Valla, and Ficino). **116B.** Power and Imagination in the Renaissance. Study of artistic world of Leonardo, Raffaello, Michelangelo, Titian, and literary masterpieces of Machiavelli, Castiglione, Ariosto, Tasso, in world molded by powerful political forces, such as the Roman Papacy and Medici, Gonzaga, and D'Este courts.

**118. Age of Enlightenment. (4)** Lecture, three hours. Prerequisite: course 100. Study of philosophical and political prose, satiric poetry, and drama, unveiling birth of modern spirit through writings of Vico, Metastasio, Parini, and Alfieri. P/NP or letter grading.

**119. Italian *Ottocento*. (4)** Lecture, three hours. Prerequisite: course 100. Study of the *Ottocento*, the rich period of Italian history and culture from Romanticism to decadentism when philosophical and political issues affected not only the mind but also the heart. Emergence of unique brand of individualism through poetry and prose writings of Foscolo, Leopardi, Manzoni, Nievo, and Verga. P/NP or letter grading.

**120. Literature in the 20th Century. (4)** Lecture, three hours. Prerequisite: course 100. Analysis of novel, poetry, and drama of the 20th century in connection with modern thought and culture. Authors may include D'Annunzio, Pirandello, Montale, Pasolini, and Calvino. P/NP or letter grading.

**121. Literature and Film. (4)** Lecture, three hours; discussion, one hour. Comparative study of specific literary works and their translation into film and of different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.

**122. Italian Theater. (4)** Lecture, three hours; discussion, one hour. Study of dramatic works from the Renaissance to the present and their theatrical presentation. P/NP or letter grading.

**131. Reading and Reciting. (4)** Lecture, three hours. Preparation: sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.

**M140. Italian Novella from Boccaccio to Basile. (4)** (Same as Folklore M140.) Lecture, three hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

**150. Modern Fiction in Translation. (4)** Lecture, three hours. Select issues in 20th-century thought traced in writers of international fame, with focus on concerns and styles of several prose works such as Umberto Eco's *The Name of the Rose*, Pasolini's *The Ragazzi*; Pirandello's *The Late Mattia Pascal*, and Calvino's *The Cosmicomics*. P/NP or letter grading.

**M158. Women in Italian Culture. (4)** (Same as Women's Studies M158.) Lecture, three hours; discussion, one hour. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

**190. History of the Italian Language. (4)** Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions.

**195. Special Fields Research. (4)** Limited to senior Italian and Special Fields majors. Unscheduled tutorial in which paper (20 to 25 pages) is to be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge. P/NP or letter grading.

**197. Variable Topics in Italian Studies. (4)** Seminar, three hours. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental undergraduate courses. May be repeated for credit. P/NP or letter grading.

**199. Special Studies. (2 to 4)** Course of independent studies for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.

## Graduate Courses

**201. Bibliography and Methods of Research. (4)** Lecture, three hours.

**205A-205B. Studies in Criticism. (4-4)** Lecture, three hours. History, theory, and practice of criticism. S/U or letter grading. **205A.** Brief History of Literary Criticism. Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. **205B.** Discussion of Modern Critical Approaches. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

**210. Studies in Early Italian Literature. (4)** Lecture, three hours. Topics include origins of Italian language and study of early texts, *Scuola Siciliana* and early poetry of Central and Northern Italy, and *Dolce Stil Novo*. S/U or letter grading.

**214A-214F. Studies in Medieval Literature. (4 each)** Lecture, three hours. S/U or letter grading:

**214A.** *La Divina Commedia*. (4) Lecture, three hours. S/U or letter grading.

**214B.** Dante's Other Works. (4) Lecture, three hours. S/U or letter grading.

**214C.** Petrarca's *Canzoniere*. (4) Lecture, three hours. S/U or letter grading.

**214D.** Boccaccio's *Decameron*. (4) Lecture, three hours. S/U or letter grading.

**214E.** Boccaccio's Other Works. (4) Lecture, three hours. S/U or letter grading.

**214F.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of medieval literature, with coverage of authors such as St. Francis of Assisi or Jacopone de Todi. S/U or letter grading.

**215A-215B. Studies in 15th-Century Literature. (4-4)** Lecture, three hours. S/U or letter grading. **215A.** Variable Topics. Variable-content seminar on themes and issues of 15th-century literature, with coverage of authors such as Pulci or Poliziano. **215B.** Age of Lorenzo de' Medici and Poliziano.

**216A-216E. Studies in the Renaissance. (4 each)** Lecture, three hours. S/U or letter grading:

**216A.** Machiavelli and Renaissance Political Thought. (4) Lecture, three hours. S/U or letter grading.

**216B.** Ariosto and Renaissance Epic. (4) Lecture, three hours. S/U or letter grading.

**216C.** Tasso. (4) Lecture, three hours. S/U or letter grading.

**216D.** Renaissance Theater. (4) Lecture, three hours. S/U or letter grading.

**216E.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Vasari, Leonardo, or Benvenuto. S/U or letter grading.

**217. Studies in 17th-Century Literature. (4)** Lecture, three hours. Topics include Galileo and birth of scientific prose, Giordano Bruno, Gian Battista Marino, and baroque poetry. S/U or letter grading.

**218A-218D. Studies in 18th-Century Literature. (4 each)** Lecture, three hours. S/U or letter grading:

**218A.** Vico. (4) Lecture, three hours. S/U or letter grading.

**218B.** Alfieri. (4) Lecture, three hours. S/U or letter grading.

**218C.** Goldoni. (4) Lecture, three hours. S/U or letter grading.

**218D.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico or Ludovico. S/U or letter grading.

**219A-219D. Studies in 19th-Century Literature. (4 each)** Lecture, three hours. S/U or letter grading:

**219A.** Foscolo. (4) Lecture, three hours. S/U or letter grading.

**219B.** Leopardi. (4) Lecture, three hours. S/U or letter grading.

**219C.** Manzoni. (4) Lecture, three hours. S/U or letter grading.

**219D.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 19th-century literature, with coverage of authors such as Carducci, Tommaseo, or Nievo. S/U or letter grading.

**220. Studies in Turn-of-the-Century Literature. (4)** Lecture, three hours. Topics include Verga and *Verismo*, poetry, prose, and theater of D'Annunzio, and poetry of Carducci and Pascoli. S/U or letter grading.

**221A-221E. Studies in 20th-Century Literature. (4 each)** Lecture, three hours. S/U or letter grading:

**221A.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D'Annunzio, Verga, Marinetti, and Pirandello. S/U or letter grading.

**221B.** Contemporary Poetry. (4) Lecture, three hours. Analysis of legacy of two major figures in Italian poetry from World War II — Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s. S/U or letter grading.

**221C.** 20th-Century Narrative to World War II. (4) Lecture, three hours. Assessment of turn-of-the-century narrative pattern (Gabriele D'Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernari, Marinetti, etc. S/U or letter grading.

**221D.** 20th-Century Narrative since World War II. (4) Lecture, three hours. In-depth exploration of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of formalistic modes adopted by the neo-avant-garde. S/U or letter grading.

**221E.** Pirandello and Contemporary Theater. (4) Lecture, three hours. Thorough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Strehler, Ronconi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance. S/U or letter grading.

**222A-222B-222C. Studies in History of Italian Language. (4-4-4)** Lecture, three hours. Designed for graduate students. S/U or letter grading:

**222A.** History of the Italian Language. (4) Lecture, three hours. Designed for graduate students. Historical survey of development of the language from medieval times to unification of the country (1861). *Questione della lingua*, general acceptance of Florentine speech, and its evolution into the national language. S/U or letter grading.

**222B.** Structure of Modern Italian. (4) Lecture, three hours. Designed for graduate students. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between national language and the various dialects. S/U or letter grading.

**222C.** Italian Dialectology. (4) Lecture, three hours. Designed for graduate students. Historical differentiation of Italian dialects considered in its areal dimension. Specific geolinguistic problems and solutions illustrating growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more vertically defined. S/U or letter grading.

**M230A-M230B. Folk Tradition in Italian Literature. (4-4)** (Same as Folklore M230A-M230B.) Lecture, two hours.

**250A-250D. Seminars: Dante. (4 each)** Seminar, three hours.

**251. Seminar: Petrarch. (4)** Seminar, three hours.

**252. Seminar: Boccaccio. (4)** Seminar, three hours.

**253A-253B-253C. Seminars: Chivalric Poetry in Italy. (4-4-4)** Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso.

**254. Seminar: Machiavelli. (4)** Seminar, three hours.

**255A-255B. Seminars: Baroque. (4-4)** Seminar, three hours.

**256A-256B. Seminars: 18th Century. (4-4)** Seminar, three hours.

**257A-257B. Seminars: Romanticism. (4-4)** Seminar, three hours.

**258A-258B. Seminars: Contemporary Italian Literature. (4-4)** Seminar, three hours.

**M260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4)** (Same as Folklore M261.) Lecture, three hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, cures and curses, secular and ritual drama).

**260B. Women in Italian Culture. (4)** Lecture, three hours. Designed for graduate students. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women's conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

**260C. Studies in Italian Cinema. (4)** Lecture, three hours. Designed for graduate students. Italian cinema compared with other European countries' and Hollywood's cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

**298. Variable Topics in Italian Studies. (4)** Lecture, three hours; discussion, one hour. Designed for graduate students. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

**370. Problems and Methods in Teaching Italian. (4)** Lecture, two hours.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A-495B-495C. Teaching Italian at College Level. (2 to 4 each)** (Formerly numbered 495A-495D.) Seminar, to be arranged. S/U grading. **495A.** Study methods in preparation for teaching Italian at college level, with emphasis on teaching proficiency-oriented instruction. May not be applied toward M.A. course requirements. **495B.** Continuation of course 495A; study of contemporary issues in Italian language pedagogy. **495C.** Effective uses of technology in foreign language classroom. Project-based seminar in which students develop materials for classroom instruction as well as an electronic teaching portfolio.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies. (2 to 12)** May be repeated twice for credit. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** S/U grading.

**599. Ph.D. Research and Writing. (2 to 12)** May be repeated. S/U grading.

## Scope and Objectives

The Labor and Workplace Studies undergraduate specialization is intended to coordinate and enrich offerings on the workplace's connections to the social, political, and economic forces that surround it. Students become acquainted with institutions of the labor market such as public policies, employment practices, and unions. Faculty members from various disciplines are actively engaged in research on some aspect of employee relations, employee organizations, or workplace concerns in the U.S. or other countries. Administration of the program is coordinated through the Institute of Industrial Relations.

## Undergraduate Study

### Labor and Workplace Studies Specialization

The Labor and Workplace Studies specialization must be taken in conjunction with a major in the social sciences or in Psychology. Students with other majors may be admitted by petition.

### Upper Division Requirements

*Required:* Management 150; Political Science 142C or History 155B; three other courses selected from Chicana and Chicano Studies 120, Economics 150, 151, 152, 181B, 183, Geography 155, History 155A, 155B, Political Science 142C, 169, Psychology M137E, Sociology M163, 171, 173, Women's Studies M163, 171. All students take a one-term specialization seminar designed for the exchange of disciplinary perspectives and directed research toward the end of the program.

Courses in the specialization may also be applied toward the requirements of the major where appropriate.

For further information, contact the Institute of Industrial Relations (310-794-5983) or Professor Daniel J.B. Mitchell (310-825-1504).

 Duncan Thomas, Ph.D. (*Economics*)  
 Carlos A. Torres, Ph.D. (*Education*)  
 Hartmut Walter, Ph.D. (*Geography*)  
 Carlos Vegh, Ph.D. (*Economics*)  
 James Diego Vigil, Ph.D. (*Anthropology*)  
 James W. Wilkie, Ph.D. (*History*)  
 Maurice Zeitlin, Ph.D. (*Sociology*)

##### Professors Emeriti

Shirley L. Arora, Ph.D. (*Spanish and Portuguese*)  
 Charles F. Bennett, Ph.D. (*Geography*)  
 Lester Breslow, M.D., M.P.H. (*Health Services*)  
 Henry J. Bruman, Ph.D. (*Geography*)  
 Leland S. Burns, Ph.D. (*Urban Planning*)  
 Robert N. Burr, Ph.D. (*History*)  
 Bertram Bussell, Ph.D. (*Computer Science*)

Charlotte A. Crabtree, Ph.D. (*Education*)  
 E. Mayone Dias, Ph.D. (*Spanish and Portuguese*)  
 Elsie Dunin, M.A. (*World Arts and Cultures*)  
 David K. Eiteman, Ph.D. (*Management*)  
 Walter A. Fogel, Ph.D. (*Management*)  
 John Friedmann, Ph.D. (*Urban Planning*)  
 Peter B. Hammond, Ph.D. (*Anthropology*)  
 Thomas R. Howell, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
 Claude L. Hulet, Ph.D. (*Spanish and Portuguese*)  
 Norris C. Hundley, Ph.D. (*History*)  
 Isabelle F. Hunt, Dr.P.H. (*Community Health Sciences*)  
 Frederick C. Kintzer, Ed.D. (*Education*)  
 James Lockhart, Ph.D. (*History*)  
 O. Raynal Hunt, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
 Alfred K. Neumann, M.D. (*Community Health Sciences*)  
 Henry B. Nicholson, Ph.D. (*Anthropology*)  
 Russell R. O'Neill, Ph.D. (*Mechanical and Aerospace Engineering*)  
 David O'Shea, Ph.D. (*Education*)  
 C.P. Otero, Ph.D. (*Spanish and Portuguese*)  
 Richard L. Perrine, Ph.D. (*Civil and Environmental Engineering*)  
 Jorge R. Preloran, B.A. (*Film, Television, and Digital Media*)  
 Douglass R. Price-Williams, Ph.D. (*Anthropology, Psychiatry and Biobehavioral Sciences*)  
 Stanley L. Robe, Ph.D. (*Spanish and Portuguese*)  
 Jonathan D. Sauer, Ph.D. (*Geography*)  
 Charles A. Schroeder, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
 Carol Scothorn, M.A. (*World Arts and Cultures*)  
 Allegra Fuller Snyder, M.A. (*World Arts and Cultures*)  
 Robert M. Stevenson, Ph.D. (*Musicology*)  
 Norman J.W. Thrower, Ph.D. (*Geography*)  
 Johannes Wilbert, Ph.D. (*Anthropology*)

##### Associate Professors

Theodore A. Andersen, Ph.D. (*Management*)  
 Adriana Bergero, Ph.D. (*Spanish and Portuguese*)  
 Verónica Cortínez, Ph.D. (*Spanish and Portuguese*)  
 Leobardo Estrada, Ph.D. (*Urban Planning*)  
 Barbara Geddes, Ph.D. (*Political Science*)  
 Guillermo E. Hernández, Ph.D. (*Spanish and Portuguese*)  
 Richard M. Leventhal, Ph.D. (*Anthropology*)  
 David E. López, Ph.D. (*Sociology*)  
 Steven J. Loza, Ph.D. (*Ethnomusicology*)  
 José Moya, Ph.D. (*History*)  
 Alfred E. Osborne, Jr., Ph.D. (*Management*)  
 John V. Richardson, Ph.D. (*Information Studies*)  
 Raymond A. Rocco, Ph.D. (*Political Science*)  
 Marta Savigliano, Ph.D. (*World Arts and Cultures*)  
 A. John Skirius, Ph.D. (*Spanish and Portuguese*)  
 Charles L. Stanish, Ph.D. (*Anthropology*)  
 William Summerhill, Ph.D. (*History*)  
 Edward E. Telles, Ph.D. (*Sociology*)  
 Aaron Tornell, Ph.D. (*Economics*)  
 Concepción Valadez, Ph.D. (*Education*)  
 Jane L. Valentine, Ph.D. (*Environmental Health Sciences*)  
 Edit Villarreal, Ph.D. (*Theater*)

##### Assistant Professors

Alfredo J. Artiles, Ph.D. (*Education*)  
 Stephen A. Bell, Ph.D. (*Geography*)  
 Clara Chu, Ph.D. (*Information Studies*)  
 Alberto Diaz-Cayeros, Ph.D. (*Political Science*)  
 Raul Hinojosa-Ojeda, Ph.D. (*Urban Planning*)  
 Richard Lesure, Ph.D. (*Anthropology*)  
 Elizabeth A. Marchant, Ph.D. (*Spanish and Portuguese*)  
 Mark Q. Sawyer, Ph.D. (*Political Science*)  
 Kevin B. Terraciano, Ph.D. (*History*)  
 Charlene Villaseñor-Black, Ph.D. (*Art History*)  
 C. Fabian Wagmister, M.F.A. (*Film, Television, and Digital Media*)

##### Lecturers

José M. Cruz-Salvadores, M.A. (*Spanish and Portuguese*)  
 Susan C. Schaffer, Ph.D. (*Spanish and Portuguese*)

##### Adjunct Assistant Professor

Bonnie Taub, Ph.D. (*Community Health Sciences*)

## Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These courses offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Education and Information Studies, Management, Public Health, and Public Policy and Social Research provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

## Undergraduate Study

### Latin American Studies B.A.

Undergraduate studies of the Latin American region are designed to serve the needs of students (1) desiring a general education focused on the Latin American cultural region, (2) planning to enter business, government, or international agency service, (3) preparing to teach social sciences or language, and (4) preparing for advanced academic study of Latin America.

Students must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

### Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, students may take Portuguese 102A and 102B which are designed for those with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

### Transfer Students

To be admitted as Latin American Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: advanced Spanish and one year of elementary Portuguese, or advanced Portuguese and intermediate Spanish, two Latin American history

courses, and additional coursework in the area of concentration.

### Course Limitations

Students may not take more than 8 units of Latin American Studies 199 for letter-grade credit nor more than 8 units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, students must have advanced junior standing and an overall grade-point average of 3.0, or senior standing.

### Double Majors

Through judicious use of electives, students may find it possible to obtain the B.A. degree with two majors (e.g., Latin American Studies and History). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the undergraduate adviser in Latin American Studies.

### Study in Latin America

Students are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. For information on studying in Mexico, Costa Rica, Chile, or Brazil, contact the Education Abroad Program, 1105 Hershey Hall, (310) 794-9820.

### Core Areas for the Major

Students select one of three core areas as the focus of their major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

### Core I: Arts and Humanities

#### Preparation

*Required:* Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55A or 55B or Ethnomusicology 91K and World Arts and Cultures 6 or 8.

#### Core Area

*Required:* Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. *Core Concentration:* Five courses as listed below in either the literature and folklore field or the linguistics field selected from Portuguese or Spanish, or in the fine arts field selected from art history or ethnomusicology. Only one course from the electives list within the arts and humanities core area may be applied toward the core concentration
2. *Theory and Methods:* One course from theory and methods within the core concentration field

3. *Internal Breadth:* Four additional courses from the arts and humanities core area but outside the core concentration field. No more than two of these may be electives

#### External Breadth

*Required:* From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: at least two courses in social sciences (e.g., history) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either social sciences or ecology and environment. No more than three external breadth courses may be electives.

#### Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

#### (1) Literature and Folklore Field

##### Folklore and Mythology

M149. Folk Literature of the Hispanic World

##### History

169. Latin American Eliteloire

##### Portuguese (Spanish and Portuguese)

130A-130B. Brazilian Literature and Identity: Introduction

C132. 19th-Century Brazilian Literature and Culture

C133. Machado de Assis

C134. Brazilian Modernism

C135. 20th-Century Brazilian Literature

141. Brazilian Film and Literature

##### Spanish (Spanish and Portuguese)

120A-120D. Literature in the Hispanic World

137. Literature of Colonial Spanish America

139. Romanticism and Realism in Spanish-American Literature

140. *Modernismo*

142. 20th-Century Spanish-American Literature: Fiction and the Essay

143. 20th-Century Spanish-American Literature: Poetry and Drama

144. Mexican Literature

M149. Folk Literature of the Hispanic World

151B. Women in Hispanic Literature: Spanish America

M161. Film and Literature of the Spanish-Speaking World

170. Senior Honors Tutorial

197A. Studies in Hispanic Culture and Civilization

#### Theory and Methods

##### Folklore and Mythology

M101. Introduction to Folklore

190. Selected Topics in Folklore and Mythology Studies

199. Special Studies in Folklore

##### Portuguese (Spanish and Portuguese)

199. Special Studies

##### Spanish (Spanish and Portuguese)

119A. Introduction to Study of Literature: Prose

119B. Introduction to Study of Literature: Poetry and Drama

199. Special Studies

#### (2) Fine Arts Field

##### Art History

\*110F. Selected Topics in Modern Art: Latin America

\*110G. Art and Politics in the Contemporary Americas: Latin America

\*C110H. Latin American Art of the 20th Century

C117A. Pre-Columbian Art of Mexico

C117B. Pre-Columbian Art of the Maya

C117C. Pre-Columbian Art of the Andes

C117D. Aztec Art

118A. Arts of Oceania

##### Ethnomusicology

M108A-108B. Music of Latin America

113. Music of Brazil

M115. Musical Aesthetics in Los Angeles

M131. Development of Latin Jazz

191K. Advanced Music of Mexico

##### Film and Television

106C. History of African, Asian, and Latin American Film

##### World Arts and Cultures

108B. Dance in Latin American Cultures

120. Selected Topics in Cultural Studies: Latin America

M125A, M125B, M125C. Beyond the Mexican Mural CM139. Afro-Caribbean Ritual Arts, Vodou, and Santería

\*CM140. Women, Healers, Ritual, and Transformation: Latin America

#### Theory and Methods

##### Art History

\*199. Special Studies in Art

##### Ethnomusicology

\*M180. Analysis of Traditional Music

\*190. Study of Ethnomusicology

\*199E. Special Studies in Ethnomusicology

##### Film and Television

199. Special Studies in Film and Television

##### World Arts and Cultures

\*199. Special Studies in World Arts and Cultures

#### (3) Linguistics Field

##### Portuguese (Spanish and Portuguese)

100A. Phonology and Morphology

\*100B. Syntax

\*M118A. History of Portuguese and Spanish: Phonology

\*M118B. History of Portuguese and Spanish: Morphology and Syntax

##### Spanish (Spanish and Portuguese)

\*100A. Introduction to Study of Spanish Grammar: Phonology and Morphology

\*100B. Introduction to Study of Spanish Grammar: Syntax

\*115. Applied Linguistics

\*M118A. History of Portuguese and Spanish: Phonology

\*M118B. History of Portuguese and Spanish: Morphology and Syntax

\*119A. Introduction to Study of Literature: Prose

\*119B. Introduction to Study of Literature: Poetry and Drama

\*170. Senior Honors Tutorial

#### Theory and Methods

##### Linguistics

\*103. Introduction to General Phonetics

\*110. Introduction to Historical Linguistics

\*120A. Phonology I

\*120B. Syntax I

M146. Language in Culture

\*165A. Phonology II

\*165B. Syntax II

\*170. Language and Society: Introduction to Sociolinguistics

\*199. Special Studies in Linguistics

#### Portuguese (Spanish and Portuguese)

\*199. Special Studies

#### Spanish (Spanish and Portuguese)

\*199. Special Studies

### (4) Arts and Humanities Electives

#### Ethnomusicology

\*M110A-M110B. African American Musical Heritage

#### Film and Television

112. Film and Social Change

#### Folklore and Mythology

\*M118. Folk Art and Aesthetics

\*190. Selected Topics in Folklore and Mythology Studies

#### Latin American Studies

197. Interdisciplinary Topics in Latin American Studies

199. Special Studies in Latin American Studies

#### Theater

M103C. Origins and Evolution of Chicano Theater

## Core II: Social Sciences

### Preparation

*Required:* Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics M40 or Sociology M18 or Statistics 10.

### Core Area

*Required:* Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. *Core Concentration:* Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list within the social sciences core area may be applied toward the core concentration
2. *Theory and Methods:* One course from theory and methods within the core concentration field
3. *Internal Breadth:* Four additional courses from the social sciences core area but outside the core concentration field. No more than two of these may be electives

### External Breadth

*Required:* From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

### Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with as-

terisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

### (1) Anthropology and Sociology Field

#### Anthropology

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)

114R. Ancient Civilizations of Andean South America

173Q. Latin American Communities

174P. Ethnography of South American Indians

#### Sociology

186. Latin American Societies

### Theory and Methods

#### Anthropology

C114S. Comparative Study of Ancient States: Latin America

\*115P. Archaeological Field Training

\*C115R. Strategy of Archaeology

\*M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques

\*138. Methods and Techniques of Ethnohistory

\*139. Field Methods in Cultural Anthropology

M140. Language in Culture

\*180. Quantitative Methods in Anthropology

\*186. Models and Modeling in Anthropology

\*199. Special Studies in Anthropology

#### Sociology

\*104. Introduction to Sociological Research Methods

\*C112. Introduction to Mathematical Sociology

\*199. Special Studies

### (2) Economics Field

#### Economics

\*110. Economic Problems of Underdeveloped Countries

\*111. Theories of Economic Growth and Development

\*112. Policies for Economic Development

\*190. International Economics

\*191. International Trade Theory

\*192. International Finance

### Theory and Methods

#### Economics

\*M135. Economic Models of Public Choice

\*M188A-188Z. Upper Division Research Seminars: Applications of Economic Theory

\*199. Special Studies in Economics

#### Management

\*197. Special Topics in Management

### (3) History Field

#### History

165A. Early Latin America

165C. Indians of Colonial Mexico

166. Latin America in the 19th Century

167A-167D. Latin America in the 20th Century

168. History of Latin American International Relations

169. Latin American Eliteloire

170A. Latin American Cultural History

170B. Classic Travel Accounts of Latin America since 1735

170C. Issues in Latin American History

171. Mexican Revolution since 1910

172. History of Argentina

173. Modern Brazil

174. Brazilian Intellectual History

197A-197Z. Undergraduate Seminars: Latin America

### Theory and Methods

#### History

197A-197Z. Undergraduate Seminars: Latin America

\*199. Special Studies in History

#### Information Studies

111C. Ethnic Groups and Their Bibliographies: Latino History and Culture

### (4) Political Science Field

#### Political Science

130. Politics of Latin American Economic Development

131. Latin American International Relations

\*139A-139Z. Special Studies in International Relations: Latin America

\*149. Special Topics in American Government and Politics

154A-154B. Government and Politics in Latin America

\*169. Special Studies in Comparative Politics: Latin America

199. Readings in Political Science: Latin America

### Theory and Methods

#### Political Science

\*102. Statistical Analysis of Political Data

\*104A-104B. Introduction to Survey Research

\*M105. Economic Models of Public Choice

\*113. Problems in 20th-Century Political Theory

\*119A-119Z. Special Studies in Political Theory

\*137A-137B. International Relations Theory

\*168. Comparative Political Analysis

### (5) Geography Field

#### Geography

121. Conservation of Resources: Underdeveloped World

\*126. Geography of Extinction

\*M128. Global Environment and Development: Problems and Issues

133. Cultural Geography of the Modern World

\*142. Population Geography

181. Mexico, Central America, Caribbean

182A. Spanish South America

182B. Brazil

\*199. Special Studies

### Theory and Methods

#### Geography

\*M171. Introduction to Spatial Statistics

### (6) Social Sciences Electives

#### Anthropology

\*153. Evolution of Human Societies

\*M154Q. Gender Systems: Global

\*161. Development Anthropology

\*167. Urban Anthropology

\*M168. Culture, Illness, and Healing

#### Chicana and Chicano Studies

\*142. Mesoamerican Literatures

\*169. Representations of Indigenous Peoples in the Americas

#### Economics

\*120. Introduction to Urban and Regional Economics

\*180. Comparative Systems: Transformation of Socialist Economies

#### Geography

\*108. World Vegetation

\*111. Forest Ecosystems

\*M115. Environmentalism: Past, Present, and Future

\*129. Seminar: Environmental Studies

\*140. Political Geography

**History**

M159A, M159B. History of the Chicano Peoples

**Latin American Studies**

197. Interdisciplinary Topics in Latin American Studies

199. Special Studies in Latin American Studies

**Political Science**

\*M122B. Global Environment and World Politics

\*124. International Political Economy

M144A. Ethnic Politics: Chicano/Latino Politics

\*167A. Ideology and Development in World Politics

\*167B. Comparative Development and Administration

\*168. Comparative Political Analysis

\*M197G. Introduction to Development Studies: Political Economy of Development

**Sociology**

\*116. Social Demography

\*154. Race and Ethnicity: International Perspectives

\*157. Social Stratification

\*182. Political Sociology

184. Social Change

**Core III: Ecology and Environment****Preparation**

*Required:* Two courses from History 8A, 8B, 8C; Latin American Studies 99; Geography 5; Statistics 10.

**Core Area**

*Required:* Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. *Core Concentration:* Five courses as listed below in geography. Only one course from the electives list within the ecology and environment core area may be applied toward the core concentration
2. *Theory and Methods:* One course from theory and methods within the core concentration field
3. *Internal Breadth:* Four additional courses from the ecology and environment core area to be selected from theory and methods core courses or electives

**External Breadth**

*Required:* From the approved list, six upper division courses outside the ecology and environment core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in social sciences (e.g., history). The two additional courses required may be from either arts and humanities or social sciences. No more than three external breadth courses may be electives.

**Approved Undergraduate Courses**

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

**Community Health Sciences**

132. Health, Disease, and Health Services in Latin America

**Geography**

\*126. Geography of Extinction

\*M128. Global Environment and Development: Problems and Issues

\*129. Seminar: Environmental Studies

\*132. Food, Environment, and Agriculture

\*140. Political Geography

**Latin American Studies**

197. Interdisciplinary Topics in Latin American Studies

199. Special Studies in Latin American Studies

**Sociology**

\*116. Social Demography

**Latin American Studies Minor**

The interdisciplinary program leading to the Latin American Studies minor allows students to choose from a broad range of course offerings in various departments to develop professional and methodological skills with area expertise.

To enter the minor, students must have an overall grade-point average of 2.0 or better and have completed 45 units. For further information, contact Carolyn Ramirez-La Faso at (310) 206-6571.

*Required Lower Division Courses (8 units):* History 8A or 8B or 8C or Latin American Studies 99, Spanish 25 or Portuguese 25.

*Required Upper Division Courses (20 units):* Five courses selected from the approved list of Latin American studies courses in at least two of the following fields: (1) arts and humanities (art history, ethnomusicology, folklore, Spanish and Portuguese), (2) ecology and environment (geography, public health), (3) social sciences

(anthropology, economics, history, political science, sociology). No more than 4 units of course 199 may be applied toward the minor, and at least three upper division courses (12 units) must be taken in residence at UCLA.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

**Graduate Degree**

The Latin American Studies Program offers the Master of Arts (M.A.) degree in Latin American Studies.

**Admission****M.A. in Latin American Studies**

In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission to the M.A. program. Applicants with a degree in another field can be admitted but must complete certain undergraduate requisites subsequent to admission. Applicants with Latin American field experience or special methodological studies background are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

1. Three academic letters of recommendation, unless the applicant has been away from school for some time, in which case one of the letters may be from an employer
2. A minimum 3.0 or B average in the junior/senior years of college
3. A statement of purpose discussing the applicant's background in Latin American studies, proposed program of study, and future career plans
4. A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE)
5. Optional: a résumé or curriculum vitae describing both academic and Latin American experience

Students are admitted each quarter. Application deadlines are November 1 for Winter Quarter, December 31 for Spring Quarter, and

December 15 (to be considered for financial assistance) or May 1 for Fall Quarter.

Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the respective professional school, students may pursue both degrees simultaneously.

### Latin American Studies M.A./ Education M.Ed.

The Department of Education and the Latin American Studies Program offer an articulated degree program that allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree. The program is not currently accepting applications.

### Latin American Studies M.A./ Information Studies M.L.I.S.

The M.L.I.S./Latin American Studies M.A. is an articulated degree program within the Department of Information Studies and the Latin American Studies Program. Students can obtain two degrees: the M.L.I.S. and the M.A. in Latin American Studies. Further details may be obtained from the graduate advisers in both departments.

### Latin American Studies M.A./ Management M.B.A.

The John E. Anderson Graduate School of Management and the Latin American Studies Program offer a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. The program is predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Application materials should be requested separately from both schools.

### Latin American Studies M.A./ Public Health M.P.H.

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. in Latin American Studies and the M.P.H., with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated De-

gree Program Adviser, UCLA School of Public Health.

### Latin American Studies M.A./ Urban Planning M.A.

The Latin American Studies Program and the Department of Urban Planning offer a two and one-half to three-year concurrent degree program leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Further details may be obtained from the graduate advisers in both departments.

## Master's Degree

M.A. students are expected to develop and integrate two or three fields in Latin American studies, to be selected from the following: anthropology, art, economics, education, engineering, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the chosen fields must be a social science.

The M.A. degree is offered through the comprehensive examination and thesis plans; the latter requires a special petition. For students under the comprehensive examination plan a minimum of nine courses is required; five must be at the graduate level. For students under the thesis plan, a minimum of 10 courses is required; five must be at the graduate level. A core course is required of all students.

There is a language requirement for this degree.

## Latin American Studies

### Lower Division Course

**99. Introduction to Latin American Problems. (4)** Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

### Upper Division Courses

**197. Interdisciplinary Topics in Latin American Studies. (4)** Advanced interdisciplinary course for juniors/seniors. May be repeated for credit with topic change.

**M197A.** Introduction to Caribbean Literature. (Same as Spanish M197A.) Lecture, two hours; discussion, two hours. Interdisciplinary introduction to literature of French, Spanish, and English Caribbean.

**199. Special Studies in Latin American Studies. (4 or 8)** Limited to juniors/seniors. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

## Graduate Courses

**M200. Latin American Research Resources. (4)** (Same as History M265 and Information Studies M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**205. Latin Americanist Scholarship. (4)** Lecture, three hours. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

**M250A. Indians of South America. (4)** (Same as Anthropology M272.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

**250B. Interdisciplinary Seminar: Latin American Studies. (4)** Seminar, three hours. Problem-oriented seminar on critical areas stressed in University's cooperative programs in Latin America.

**250C. Interdisciplinary Topics in Latin American Studies. (4)** Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

**M260. Health and Culture in the Americas. (4)** (Same as Anthropology M266 and Community Health Sciences M260.) Lecture, three hours; discussion, one hour. Preparation: bilingual skills (English/Spanish) for Spanish discussion section. Recommended requisite: Community Health Sciences 132. Health issues throughout the Americas, especially indigenous/Mestizo Latin American populations. Holistic approach covering politics, economics, history, geography, human rights, maternal/child health, culture. Letter grading.

**M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4)** (Same as Anthropology M264 and Community Health Sciences M264.) Lecture, three hours. Recommended preparation: Community Health Sciences 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with a variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

**M268A-M268B. Seminars: Recent Latin American History. (4)** (Same as History M268A-M268B.) Seminar, three hours. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. May be repeated, but only 4 units may be applied toward the minimum graduate course requirement. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination. (4)** Tutorial, to be arranged. Ordinarily taken only during term in which student is being examined. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4)** Tutorial, to be arranged. Only 4 units may be applied toward minimum graduate course requirement. S/U grading.

## Course List

### Approved Graduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Refer to the Latin American Studies undergraduate section for the lists of approved undergraduate courses.

## Fine Arts

### Art History

- \*201. Topics in Historiography of Art History
- C218A. Pre-Columbian Art of Mexico
- C218B. Pre-Columbian Art of the Maya
- C218C. Pre-Columbian Art of the Andes
- C218D. Aztec Art
- 219B. Pre-Columbian Art
- 220. Oceanic, Pre-Columbian, African, and Native North American Art
- C254. Latin American Art of the 20th Century
- 596. Directed Individual Study or Research

### Ethnomusicology

- 201. History of Ethnomusicology
- 208. Seminar: Latin American Music
- \*290. Seminar: Ethnomusicology
- 596. Directed Individual Studies

### Film and Television

- 276. Seminar: Non-Western Films — Mexican Cinema
- \*298A-298B. Special Studies in Film and Television

### Theater

- \*210. Topics in World Theater and Drama

### World Arts and Cultures

- \*281A-281B. Advanced Studies in Dance Ethnology

## Languages

### Indigenous Languages of the Americas (Linguistics)

- \*18A-18B-18C. Elementary Quechua

### Portuguese (Spanish and Portuguese)

- \*1. Elementary Portuguese
- 2. Elementary Portuguese
- 3. Intermediate Portuguese
- 25. Advanced Portuguese
- 102A-102B. Intensive Portuguese
- \*105. Advanced Composition and Style

### Spanish (Spanish and Portuguese)

- \*1. Elementary Spanish
- \*1G. Reading Course for Graduate Students
- 2. Elementary Spanish
- 2G. Reading Course for Graduate Students
- 3. Elementary Spanish
- 4. Intermediate Spanish
- 5. Intermediate Spanish
- 25. Advanced Spanish and Composition
- \*105. Spanish Composition

## Linguistics

### Anthropology

- 204. Core Seminar: Linguistic Anthropology

### Linguistics

- \*210A. Field Methods I
- \*210B. Field Methods II
- \*220. Linguistic Areas
- \*225. Linguistic Structures
- M246C. Topics in Linguistic Anthropology

### Portuguese (Spanish and Portuguese)

- \*202. Synchronic Morphology and Phonology
- \*204A-204B. Generative Grammar
- \*M205A-M205B. Development of Portuguese and Spanish Languages

### Spanish (Spanish and Portuguese)

- \*202A. Phonology
- \*202B. Morphology

- \*204A-204B. Generative Syntax and Semantics
- \*M205A-M205B. Development of Portuguese and Spanish Languages
- \*209. Dialectology
- \*256A-256B. Studies in Spanish Linguistics
- \*257. Studies in Dialectology

## Literature

### Portuguese (Spanish and Portuguese)

- C231. Colonial Brazilian Literature and Culture
- C232. 19th-Century Brazilian Literature and Culture
- C233. Machado de Assis
- C234. Brazilian Modernism
- C235. 20th-Century Brazilian Literature
- M249. Folk Literature of the Spanish and Portuguese Worlds
- 254. Studies in Early Brazilian Literature
- 255. Studies in Modern Brazilian Literature

### Spanish (Spanish and Portuguese)

- 237. Literature of the Spanish Conquest
- 238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature
- 239. Romanticism and Realism in Spanish-American Literature
- 240. Major Currents in Modern Spanish-American Literature
- 241A-241B. Contemporary Spanish-American Short Story
- 243A-243B. Contemporary Spanish-American Poetry
- 244A-244B. Contemporary Spanish-American Novel
- 245. Contemporary Spanish-American Essay
- 246. Contemporary Spanish-American Drama
- M249. Folk Literature of the Spanish and Portuguese Worlds
- 277A-277B. Studies in Colonial Spanish-American Literature
- 278A-278B. Studies in 19th-Century Spanish-American Literature
- 280A-280B. Studies in Contemporary Spanish-American Literature
- \*M286A-M286B. Studies in Hispanic Folk Literature
- 290. Special Topics: Latin American Literature

## Professional

### Community Health Sciences

- 200. Global Health Problems
- 210. Community Health Sciences
- M216. Qualitative Research Methodology
- \*231. Maternal and Child Nutrition
- M232. Determinants of Health
- M239. Race and Ethnicity as a Concept in Practice and Research
- M260. Health and Culture in the Americas
- M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness
- 282. Communication in Health Promotion and Education

### Education

- \*C203. Educational Anthropology
- \*204B. Introduction to Comparative Education
- \*204C. Education and National Development
- 204D. Minority Education in Cross-Cultural Perspective
- 204E. International Efforts in Education
- 204F. Nonformal Education in Comparative Perspective
- \*C207. Politics of Education
- \*238. Cross-National Analysis of Higher Education
- \*252B. Seminar: Education and Social Change
- \*253A. Seminar: Current Problems in Comparative Education
- 253D. Seminar: Latin American Education

- \*253F. Seminar: Education in Revolutionary Societies
- \*253H. Seminar: The Chicano/Hispanic and Education
- 262F. Seminar: Research Topics in Bilingual/Multicultural Education
- \*596. Directed Independent Study

### Engineering

- \*596. Directed Individual or Tutorial Studies (selected from any of the engineering departments)

### Epidemiology

- 220. Principles of Infectious Disease Epidemiology
- 227. AIDS: A Major Public Health Challenge
- 280. Parasitic Diseases and Global Health
- 290. Seminar: Epidemiology — Infectious and Tropical Disease
- \*291. Seminar: Epidemiology — Methodology
- 293. International HIV/AIDS Seminar

### Health Services

- \*240. Health Care Issues in International Perspective

### Information Studies

- \*207. International Issues and Comparative Research in Library and Information Science
- \*223. Literature of the Social Sciences
- \*224. Literature of the Humanities and Fine Arts
- M225. Latin American Research Resources
- \*596. Directed Individual Study or Research

### Law

- \*270A. International Trade Law
- \*271. International Business Transactions
- \*290A. International Environmental Law

### Management

- \*205A. International Business Economics
- \*205B. Comparative Market Structure and Competition
- 209. Selected Topics in Business Economics
- \*234A. International Financial Markets
- \*234B. Financial Management of Multinational Corporations
- \*261B. Global Marketing Management
- \*M293B. Morality of Capitalism
- \*296A. International Business Management
- \*297A. Comparative and International Management
- \*297C. International Business Law
- \*297D. International Business Negotiations
- \*298B. Special Topics in International and Comparative Management
- \*298C. Special Topics in Sociotechnical Systems
- \*298D. Special Topics in Management
- 596. Research in Management

### Public Health

- \*596. Directed Individual Study or Research (selected from any of the public health departments)

### Urban Planning

- \*M230. Introduction to Regional Planning: Evolution of Regional Planning Doctrines
- 234A. Development Theory
- 234B. Rural Development Issues
- M234C. Resource-Based Development
- \*235A-235B. Urbanization in Developing World I, II
- \*M236A. Theories of Regional Economic Development I
- \*236B. Theories of Regional Economic Development II
- 236C. Regional World: Territorial Development in Global Economy
- 239. Special Topics in Urban and Regional Development Policy
- \*C265. Environmentalism: Past, Present, and Future
- C266. Global Environment and Development: Problems and Issues

269. Special Topics in Environmental Analysis and Policy  
596. Research in Planning

## Social Sciences

### Anthropology

- \*214. Selected Topics in Prehistoric Civilizations of the New World  
M241. Topics in Linguistic Anthropology  
242. Ethnography of Communication  
\*260. Urban Anthropology  
M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness  
M266. Health and Culture in the Americas  
M272. Indians of South America  
M284. Qualitative Research Methodology  
285P. Selected Topics in Anthropological/Archaeological Theory

### Archaeology

- \*259. Fieldwork in Archaeology  
596. Individual Studies for Graduate Students

### Economics

- \*281A. International Trade Theory  
\*281B. International Finance  
\*282A-282Z. Topics in International Economics: Latin America  
\*286A. Economic Development  
\*286B. Cost-Benefit Analysis of Development Projects  
287A-287Z. Topics in Development Economics  
596. Individual Study

### Folklore and Mythology

- \*200B. Fieldwork  
248. Theory and Method in Latin American Folklore Studies  
\*M249. Folk Literature of the Spanish and Portuguese Worlds  
\*M286A-M286B. Studies in Hispanic Folk Literature

### Geography

- \*223. Seminar: Humid Tropics  
\*M229. Resource-Based Development  
\*231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice  
233. Seminar: Cultural Geography — Latin America  
\*234. Environment and Subsistence in Indigenous Countries  
\*240. Advanced Political Geography: Geopolitics  
\*242. Advanced Population Geography  
\*292. Advanced Regional Geography: Selected Regions — Latin America  
596. Directed Individual Study or Research

### History

- 200I. Advanced Historiography: Latin America  
201I. Topics in History: Latin America  
M265. Latin American Research Resources  
266A-266B. Seminars: Colonial Latin American History  
267A-267B. Seminars: Latin American History, 19th and 20th Centuries  
M268A-M268B. Seminars: Recent Latin American History

### Latin American Studies

- M200. Latin American Research Resources  
205. Latin Americanist Scholarship  
M250A. Indians of South America  
250B. Interdisciplinary Seminar: Latin American Studies  
250C. Interdisciplinary Topics in Latin American Studies

### Political Science

220. International Relations Theory

- \*C227. Foreign Policy Process  
230. Contending Perspectives on International Political Economy  
\*231. International Political Economy I  
\*C239. Selected Topics in International Relations  
240A-240B. Seminars: Comparative Politics  
C244. Latin American Politics  
255. Seminar: Political Change  
\*259. Selected Topics in Comparative Politics  
**Sociology**  
231. Race and Ethnicity: International Perspectives  
\*235. Theories of Ethnicity  
\*259. Social Structure and Economic Change: Historical and Comparative Perspectives  
\*263. Social Stratification  
278. Sociology of Latin America  
285A. Special Topics in Sociology: Social Movements in Latin America  
285C. Special Topics in Sociology: Race Relations in Brazil

### Assistant Professor

- Seana Shriffrin, B.Phil, D.Phil.

### Lecturers.

- Kimberly Hall Barlow, J.D.  
Stuart Biegel, J.D.  
Jill Brown, J.D.  
George S. Cardona, J.D.  
Brian Cartwright, J.D., Ph.D.  
Steven K. Derian, M.A., J.D.  
Bryant Edwards, J.D.  
Scott Epstein, J.D.  
Leanne J. Fisher, J.D.  
Caroline M. Gentile, J.D.  
Susan Cordell Gillig, J.D.  
Bernard Gold, B.S., J.D.  
Thomas Holm, J.D.  
Kristen Holmquist, J.D.  
Lillie Hsu, J.D.  
Andrew M. Katzenstein, J.D., LL.M.  
Kristine S. Knaplund, J.D.  
Kathleen Koch-Weser, M.A., J.D.  
Roderick D. Margo, B.Com., LL.B., Ph.D.  
Clifford Marshall, J.D.  
Edward McAniff, LL.B.  
Schuyler Moore, J.D.  
John J. Power, M.B.A.  
Laurence H. Pretty, B.Sc., J.D.  
Joel Rabinovitz, LL.B.  
Mark Rosenbaum, J.D.  
Catherine Sabatini, M.A., J.D.

Robert Bradley Sears, J.D.  
Kenneth Ziffren, J.D.

#### Visiting Professor

Elliot Dorff, M.H.L., Ph.D.  
Edward McCaffery, M.A., J.D.  
Guy Scoffoni, M.A., LL.M., PH.D.  
Peter Wendel, M.A., J.D.

## Scope and Objectives

The School of Law, one of two academic units at UCLA that operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

## Professional Study

### Juris Doctor Degree

#### Admission

Students beginning their professional work are admitted only for Fall Semester. They must have received a bachelor's degree from a university or college of approved standing before beginning work in the school and are required to take the Law School Admission Test (LSAT).

The school seeks to admit students of outstanding intellectual ability who bring a wide range of backgrounds, experiences, and perspectives to the classroom and the legal profession. The faculty has concluded that the quality of the education of students is affected in significant ways by the presence of vital diverse viewpoints; students of all backgrounds select UCLA in significant part because of the school's outstanding achievement in creating a highly diverse educational environment.

In evaluating applicants the school places substantial weight on traditional measures of academic ability, namely grades and LSAT scores, and recognizes that other factors and attributes contribute greatly to people's ability to succeed as law students and lawyers. When assessing academic promise and achievement, an applicant's entire file is considered, including letters of recommendation, whether economic, physical, or other challenges have been overcome, scholarly achievements such as graduate study, awards, or publications, and the rigor of the undergraduate educational program.

In addition, the school considers attributes that may contribute to assembling a diverse class, placing special emphasis on socioeconomic

disadvantage. Also evaluated are work experience and career achievement, community or public service, career goals (with particular attention to the likelihood of applicants representing underrepresented communities), evidence of and potential for leadership, language ability, unusual life experiences, and any other factors (except those deemed inadmissible by The Regents or by other applicable law) that indicate applicants may significantly diversify the student body or make a distinctive contribution to the school or the legal profession.

UCLA has as one of its central purposes the training of attorneys who attain high levels of professional excellence and integrity and who exercise civic responsibility in myriad ways over long careers.

Detailed information about the academic programs offered by the School of Law, course titles and descriptions, fees, and the semester-system calendar by which it operates are available in the *Bulletin of the UCLA School of Law* or from the School of Law website given at the beginning of this listing.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

### Residence and Unit Requirements

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students. Auditing of courses is not permitted.

#### Attendance and Grades

The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a letter-grade scale of A+ to F, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

## Curriculum

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields which have historically dominated legal thought. Additionally, the first-year required course in lawyering skills provides students the opportunity to explore the relationship between legal analysis and lawyering tasks such as legal writing, oral advocacy, research, and client interviewing and counseling.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study. All of the courses in the second- and third-year curriculum are elective, with the exception of the legal profession requirement which is a requisite for graduation.

## Concurrent Degree Programs

The School of Law offers seven concurrent degree programs that allow students to fulfill the requirements of the J.D. and another graduate degree simultaneously. Students may also design a tailored program from other disciplines in UCLA's curriculum or from another high-quality institution, but must arrange this in consultation with the School of Law and the other program selected. Students interested in pursuing a joint degree must apply simultaneously to both schools.

### Law J.D./Afro-American Studies M.A.

The School of Law and the Afro-American Studies Program offer a concurrent degree program whereby students may pursue the M.A. in Afro-American Studies and J.D. degrees at the same time. For admission, applicants are required to satisfy the regular admission requirements of both schools. Twelve units of law coursework may be double-counted toward the M.A. degree. Applicants interested in the program should contact the School of Law and the Afro-American Studies Program for further information.

### Law J.D./American Indian Studies M.A.

The School of Law and the American Indian Studies Program offer a concurrent plan of study over four years leading to both a J.D. and an M.A. in American Indian Studies. This integrated program is designed to produce law graduates with a rich understanding of tribal cultures that expands their knowledge, facilitates their practice in the field of Indian law, and enhances their service to Indian nations. Legal study includes relevant tribal, U.S., and

international law. Courses in American Indian studies address the diverse histories, world views, values, languages, and practices of North American tribes.

### Law J.D./Education Graduate Degree

The Department of Education and the School of Law offer a concurrent degree program that allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. The program is not currently accepting applications.

### Law J.D./Management M.B.A.

The John E. Anderson School of Management and the School of Law offer a concurrent degree program that enables students to prepare for a career where law and management overlap and where understanding of both fields is necessary. Examples of such areas include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Application should be made to both schools simultaneously.

### Law J.D./Policy Studies M.P.P.

The Department of Policy Studies and the School of Law offer a concurrent degree program whereby students may pursue the M.P.P. and the J.D. at the same time. Applicants are required to satisfy the regular admission requirements for both programs. During the first year students follow the required law curriculum, taking 33 units. The second year is spent in the M.P.P. program taking 36 units toward the M.P.P. degree. During the third and fourth years students take the remaining 24 units of the M.P.P. curriculum and 40 units of law courses to complete the J.D. degree. Applicants interested in the concurrent program should contact the School of Law and the graduate adviser in the Policy Studies Department for further information.

### Law J.D./ Social Welfare M.S.W.

The School of Law and the Department of Social Welfare offer a concurrent plan of study over four years leading to both a J.D. and an M.S.W. This integrated plan provides preparation for lawyers who want to focus on social welfare law and programs. Social workers interested in legal issues related to social welfare policy would also benefit from this preparation. Applicants are required to satisfy the regular admission requirements of both programs; contact the School of Law and the Social Welfare Department for further information.

### Law J.D./Urban Planning M.A.

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers

an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. in Urban Planning degrees at the end of four years.

### Master of Laws Degree

The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact Professor Joel Handler, LL.M. Program, School of Law, 1242 Law, UCLA, Box 951476, Los Angeles, CA 90095-1476, for further information.

## Law

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Law. (4)** Seminar, three hours; outside study, nine hours. Prerequisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in law approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

## Scope and Objectives

Although lesbian, gay, bisexual, and transgender studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelmingly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathologized the invert, and until very recently psychiatry felt called on to "cure" the homosexual. For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained them, often in the face of overwhelming official hostility. The guests at Plato's *Symposium* looked back to Achilles and Patroclus; women-loving-women in early twentieth-century Paris remembered Sappho.

After the birth of the modern gay liberation movement in 1969, this underground knowledge came out of the closet and found a public voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities. This challenge led to a dramatic increase in research on same-sex desire, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming — partly by assimilation, partly by contestation — the previously hostile learned tradition. This originally rather disparate work gradually coalesced into lesbian, gay, bisexual, and transgender studies, which, over the last decade, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges

from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, bisexual, and transgender studies is usually on minority sexualities and genders, it is impossible to study them in any meaningful way without raising questions about sexuality and gender in general. And those questions cannot be responsibly answered without considering class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus lesbian, gay, bisexual, and transgender studies, which may at first seem to concern the private practices of a small number of people, inevitably leads to the much larger study of sexuality, gender, and culture. It represents an important vantage point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, bisexual, and transgender studies is the site of some of the most exciting work being done today on the relation of culture, gender, and sexuality.

First offered in Fall Quarter 1997, UCLA's minor in Lesbian, Gay, Bisexual, and Transgender Studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course each in the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a community organization, thereby acquiring a kind of knowledge not usually available in the classroom. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study sexuality and gender. They should be acquainted with some of the many different ways sexuality and gender have been organized in the past and are organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual and gender diversity of the world in which they live and of the complex ways in which sexuality and gender intersect with other categories of identity and practice.

## Undergraduate Study

### Lesbian, Gay, Bisexual, and Transgender Studies Minor

To enter the Lesbian, Gay, Bisexual, and Transgender Studies minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses (32 units):* Lesbian, Gay, Bisexual, and Transgender Studies M114, 196, and six additional courses, including at least one each in the humanities, life sciences, and social sciences, to be selected

from the approved list of courses available in the program office each term. Students may petition to apply a related course not on the list toward the six-course requirement if they can show that lesbian, gay, bisexual, or transgender issues represent a significant part of the course content. Students are strongly urged to keep in close contact with advisers in the program office who can help them plan their course of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Lesbian, Gay, Bisexual, and Transgender Studies

### Upper Division Courses

**M101A. Lesbian and Gay Literature before Stonewall. (5)** (Same as English M101A and Women's Studies M101A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English from earlier periods through the 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, Virginia Woolf, James Baldwin, Christopher Isherwood, William S. Burroughs, John Rechy, Audre Lorde, and Edward Albee. P/NP or letter grading.

**M101B. Lesbian and Gay Literature after Stonewall. (5)** (Same as English M101B and Women's Studies M101B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English since 1969, year of Stonewall Riots in New York City, commonly recognized as beginning of modern lesbian and gay culture. Works by such authors as Adrienne Rich, Jane Rule, Maureen Duffy, Brigid Brophy, Larry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, Alan Hollinghurst, and Emma Donahue. P/NP or letter grading.

**M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (4)** (Formerly numbered M14.) (Same as Women's Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgendered people; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

**M115. Topics in Study of Sexual and Gender Orientation. (4)** (Same as Women's Studies M115.) Lecture/discussion, three hours. Requisite: course M114 or Women's Studies 10. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit. Letter grading.

**M116. Sexuality and the City: Queer Los Angeles. (4)** (Same as Women's Studies M116.) Lecture, three hours. Requisite: course M114. Investigation of history, culture, and political economy of lesbian, gay, bisexual, and transgender Los Angeles. Letter grading.

**M133. Chicana Lesbian Literature. (4)** (Same as Chicana and Chicano Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies. Letter grading.

**M134. Cultural Construction of Gender and Sexuality: Homosexualities. (4)** (Same as Anthropology M134.) Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

**M137. Gay and Lesbian Perspectives in Pop Music. (4)** (Same as Music History M137.) Lecture, four hours. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

**150. Speaking Out: Public Speaking on Lesbian, Gay, Bisexual, and Transgender Issues. (1)** Discussion. Interdisciplinary course designed to teach leadership and public speaking skills on lesbian, gay, bisexual, and transgender issues. Sexual identity development, personal growth, and lesbian, gay, bisexual, and transgender history intersect with public speaking and leadership skills. Topics include sexual identities, family, leadership, and public speaking performance. P/NP or letter grading.

**M167. Contested Sexualities. (4)** (Same as Sociology M167 and Women's Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

**196. Senior Internship Seminar: Lesbian, Gay, Bisexual, and Transgender Studies. (4)** Seminar, three hours. Preparation: completion of four courses toward the minor. Requisite: course M114. Limited to seniors. Internship in a lesbian, gay, bisexual, or transgender community organization coupled with a weekly seminar. Consideration of theoretical and political issues involved in such work and relation of those issues to ideas explored in minor courses already taken.

**197. Selected Topics in Lesbian, Gay, Bisexual, and Transgender Studies. (4)** Study of selected topics in lesbian, gay, bisexual, and transgender studies. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor.

**M197D. Special Topics in Lesbian and Gay Literature. (5)** (Same as English M197D.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in lesbian and gay literature. Topics focus on a particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

**199. Special Studies in Lesbian, Gay, Bisexual, and Transgender Studies. (2 to 4)** Requisite: course M114. Directed program of independent study or research on a specific topic within lesbian, gay, bisexual, and transgender studies.

## LIFE SCIENCES

*College of Letters and Science*

UCLA  
2305 Life Sciences  
Box 951606  
Los Angeles, CA 90095-1606  
(310) 825-6614  
<http://www.lscore.ucla.edu/>

### Scope and Objectives

Students who wish to study life sciences have a choice of nine majors, all of which lead to a Bachelor of Science degree: Biology, Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology (Organismic Biology, Ecology, and Evolution Department), Microbiology and Molecular Genetics (Microbiology and Molecular Genetics Department), Molecular, Cell, and Developmental Biology (Molecular, Cell, and Developmental Biology Department), Neuroscience (Neuroscience Interdepartmental Program), Physiological Science (Physiological Science Department), and Psychobiology

(Psychology Department). This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses that forms the foundation for any study of life sciences and that is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings in this section of the catalog. For additional information on the life sciences core curriculum, see the website at <http://www.lscore.ucla.edu/>.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the nine majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The Marine Biology and Psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

### Transfer Students

Transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

## Life Sciences

### Lower Division Courses

**1. Evolution, Ecology, and Biodiversity. (4)** Lecture, three hours; demonstration, two hours. Introduction to principles and mechanisms of evolution by natural selection; population, behavioral, and community ecology; and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships. Letter grading.

**2. Cells, Tissues, and Organs. (5)** Lecture, three hours; discussion/laboratory, three hours (alternate weeks). Enforced requisite: Chemistry 14A or 20A or former course 10A. Not open for credit to students with credit for course 2W. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Letter grading.

**2W. Cells, Tissues, and Organs. (6)** Lecture, four hours; discussion/laboratory, three hours (alternate weeks). Enforced requisites: Chemistry 14A or 20A or former course 10A, English Composition 3 or 3H. Not open for credit to students with credit for course 2. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Satisfies Letters and Science Writing II requirement. Letter grading.

**3. Introduction to Molecular Biology. (5)** Lecture, three hours; discussion/laboratory, three hours (alternate weeks). Enforced requisites: course 2 or 2W, Chemistry 14C or 30A or former course 10D or 30. Introduction to basic principles of biochemistry and molecular biology. Letter grading.

**3H. Introduction to Molecular Biology (Honors). (5)** Lecture, two and one-half hours; discussion, 90 minutes; movie section, two and one-half hours. Enforced requisites: course 2 or 2W, Chemistry 14C or 30A or former course 10D or 30. Honors course parallel to course 3, but at a more advanced level. Letter grading.

**4. Genetics. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: course 3. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations. Letter grading.

**15. Life, Concepts, and Issues. (5)** Lecture, three hours; discussion, two hours. Introduction to important concepts and issues in the field for non-life sciences majors. Topics include chemistry of life, genetics, physiology, evolution, and ecology — all explored in lecture and debates, with a writing component. P/NP or letter grading.

### Upper Division Course

**130. Science Classroom Observation and Participation. (1 to 2)** Seminar, one hour; classroom observation and participation, two hours. Observation, participation, or tutoring in science classes at middle school and secondary levels, offered for 1 unit in Fall and Winter Quarters and for 2 units in Spring Quarter (project required). May be repeated for credit. P/NP grading.

**194. Teaching Practicum in Life Sciences. (2 or 4)** Lecture, two hours; discussion, three hours; laboratory, three or six hours. Training and supervised practicum for advanced undergraduates in teaching courses related to life sciences. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Life Sciences Core Curriculum Office for further information. Letter grading.

Daniel Büring, Ph.D., *Acting*  
Carson T. Schütze, Ph.D.  
Colin C. Wilson, Ph.D.

## Scope and Objectives

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

## Undergraduate Study

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

## Linguistics B.A.

The B.A. degree program is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables undergraduates to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

### Preparation for the Major

*Required:* Linguistics 20; two of the following: Philosophy 31, Psychology 10 or 100A, one cultural anthropology course; completion of the equivalent of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are requisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term of work in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

### Transfer Students

To be admitted as Linguistics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course, two courses from symbolic logic, introductory psychology or psychological statistics, or cultural anthropology, and two years of two foreign languages or two years of one foreign language and one year in each of two other foreign languages (at least one year must be in a language other than those in the Romance, Slavic, or Germanic families).

## The Major

*Required:* A minimum of 13 upper division or graduate courses, including Linguistics 103, 110, 120A, 120B, and two courses from 125, 165A, 165B (students may substitute courses 200A and 200B for 165A and 165B respectively if they receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining seven courses are electives, three of which must be linguistics courses. The other four may be in linguistics or in certain other fields as follows: Anthropology 143, Classics 180, English 121, 122, Philosophy 127A, 127B, 172, Psychology 120, 124E, 133C, or upper division courses in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an adviser.

Linguistics 195, or 196A and 196B, are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

## Linguistics and Anthropology B.A.

### Preparation for the Major

*Required:* Linguistics 20, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages (at least three terms must be in a language other than those in the Romance, Slavic, and Germanic families). Anthropology 33 is strongly recommended, when offered.

### Transfer Students

To be admitted as Linguistics and Anthropology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course and two years of two foreign languages or two years of one foreign language and one year in each of two other foreign languages (at least one year must be in a language other than those in the Romance, Slavic, or Germanic families). One cultural and communication course is strongly recommended.

### The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B or 127, 125, 170, one other upper division linguistics course (recommended: 114), Anthropology M140, either 144 or M145, one course from Anthropology 141, 142A, 143, or Sociology CM124A, and three upper division electives from Anthropology 141, 142A, 143, 144, M145, the 130 series (one course only), the 170 series (one course only), Sociology CM124A, CM124B. Linguistics 165A and 165B

(or 200A and 200B with grades of A in 120A and 120B respectively and consent of instructor) are recommended for students planning to pursue graduate work in linguistics.

## Linguistics and Computer Science B.A.

### Preparation for the Major

*Required:* Linguistics 20, Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth term in one foreign language or the third term in each of two foreign languages. Admission to the major is contingent on passing the following courses with grades of C or better and a grade-point average of 3.3 or better: Linguistics 20, Philosophy 31, Program in Computing 10A, 10B, 10C. Mathematics 31A and 31B must also be passed with grades of C or better. Mathematics 61 is recommended.

### Transfer Students

To be admitted as Linguistics and Computer Science majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course, two calculus courses, one symbolic logic course, four computer programming courses, and two years of one foreign language or one year in each of two foreign languages. One discrete structures course is recommended.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 125, 165A or 165B, C180, C185A, Computer Science 131, 132, 161 or 163, 181, and one upper division elective in linguistics or computer science. Linguistics 104 and C185B are strongly recommended.

## Linguistics and East Asian Languages and Cultures B.A.

### Preparation for the Major

*Required:* Completion of the sixth term in either Chinese, Japanese, or Korean; Linguistics 20, Philosophy 31; one cultural anthropology course; either Chinese 50, Japanese 50, or Korean 50, as appropriate; completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### Transfer Students

To be admitted as Linguistics and East Asian Languages and Cultures majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of either Chinese, Japanese, or Korean, one introduction to linguistics course, one symbolic logic course, one cultural anthropology course, one Chinese, Japanese, or Korean civilization course, and two years of one other foreign language or one year in each of two other foreign languages.

## The Major

*Required:* Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics; for the classical Japanese track: Japanese 100A, 100B, CM122, 140A, 140B, 140C, C149; for the modern Japanese track: Japanese 100A, 100B, 100C, M120, CM122, CM123 or CM127, 130B; for the classical Chinese track: Chinese 110A, 110B, 110C, four courses from 140A, 140B, 140C, 165, 170, 195; for the modern Chinese track: Chinese 100A, 100B, 100C, 101A, 101B, 130A, 130B; for the Korean track: Korean 100A, 100B, 100C, CM120, three courses from 101A, 101B, 101C, CM127, 130A, 130B.

## Linguistics and English B.A.

### Preparation for the Major

*Required:* Linguistics 20, English 4W or 4HW, 10A, 10B, 10C, Philosophy 31, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

### Transfer Students

To be admitted as Linguistics and English majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course, one critical reading and writing course, one year of English literature survey courses, one symbolic logic course, and two years of two foreign languages or two years of one foreign language and one year in each of two other foreign languages.

## The Major

*Required:* Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, English 121, 122 (or Applied Linguistics and Teaching English as a Second Language C116), 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

## Linguistics and French B.A.

### Preparation for the Major

*Required:* Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### Transfer Students

To be admitted as Linguistics and French majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of French, one introduction to linguistics course, one French literature course, one French diction course, and two years of one

other foreign language or one year in each of two other foreign languages.

## The Major

*Required:* Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, French 100, 101, 102, 105, 107, and two elective upper division French literature courses.

## Linguistics and Italian B.A.

### Preparation for the Major

*Required:* Linguistics 20, Italian 1, 2, 3, 4, 5, 6, Latin 1, 2, 3, completion of the third term in one other foreign language or the sixth term in Latin, Philosophy 31, one cultural anthropology course.

### Transfer Students

To be admitted as Linguistics and Italian majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian, one year of Latin, one introduction to linguistics course, one symbolic logic course, one cultural anthropology course, and one year of one other foreign language or the second year of Latin.

## The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

## Linguistics and Philosophy B.A.

### Preparation for the Major

*Required:* Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

### Transfer Students

To be admitted as Linguistics and Philosophy majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course, two symbolic logic courses and two courses from Western philosophy, political philosophy, philosophy of mind, or skepticism and rationality, and two years of two foreign languages or two years of one foreign language and one year in each of two other foreign languages.

## The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 165B (or 200B with a grade of A in 120B and consent of instructor), three upper division electives in lin-

guistics; six upper division courses in philosophy, including at least five from Philosophy 124 through 135B, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

## Linguistics and Psychology B.A.

### Preparation for the Major

*Required:* Linguistics 20, Psychology 10, 85, 100A, 100B, completion of the sixth term in one foreign language and the third term in a second foreign language. Program in Computing 10A is strongly recommended.

### Transfer Students

To be admitted as Linguistics and Psychology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, and two years of one foreign language and one year of a second foreign language. One introduction to programming course is strongly recommended.

## The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, C130, C132, two upper division electives in linguistics, Psychology 120, 121, 133B, 133E, and two electives to be selected from 115, 116, M117C, 118, M119L, 124A, 124B, 124C, 124E, 130, 133C, 133E, 133F, 133G, M137J, 186A, 186B. Linguistics C135 and 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) are strongly recommended.

## Linguistics and Scandinavian Languages B.A.

### Preparation for the Major

*Required:* Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### Transfer Students

To be admitted as Linguistics and Scandinavian Languages majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of either Swedish, Norwegian, or Danish, one introduction to linguistics course, and two years of one other foreign language or one year in each of two other foreign languages.

## The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of

instructor), two upper division electives in linguistics, two courses from Scandinavian 105, 110, 115 (or one of these courses twice), 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

## Linguistics and Spanish B.A.

### Preparation for the Major

*Required:* Linguistics 20, Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### Transfer Students

To be admitted as Linguistics and Spanish majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, one Spanish American civilization course, one introduction to linguistics course, and two years of one other foreign language or one year in each of two other foreign languages.

### The Major

*Required:* Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two additional upper division courses in linguistics (preferably C130 and 170), Spanish 100A, 100B, 115 or M118A, 119A, 119B, and two additional upper division Spanish courses.

## African Languages B.A.

### Preparation for the Major

*Required:* Linguistics 20, nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

### Transfer Students

To be admitted as African Languages majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to linguistics course and two years of one language and one year of one other language.

### The Major

*Required:* A minimum of 13 upper division courses, including three courses in an African language; African Languages M190, Linguistics 103; two courses from Film and Television 106C, Folklore M155, French 121A, Theater 102E, or one or more special 4-unit African Languages 199 tutorials focusing on literature in an African language; three courses from English 114, Ethnomusicology C136A, C136B, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170, Political Science 151A, 151B, 151C. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor)

and completion of the sixth term in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

## Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or in 196A and 196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

## Computing Specialization

Students in any of the linguistics majors (except Linguistics and Computer Science) may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Linguistics Minor

The Linguistics minor is designed for students where training in linguistic analysis could be an enhancement to their major programs and to students who are interested in language(s) but do not have time in their undergraduate programs to pursue multiquarter language sequences. In addition, the minor provides students with a way to design "custom" joint degrees with linguistics where the Linguistics Department does not have an existing joint degree program combining linguistics and another field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Course (4 units):* Linguistics 20.

*Required Upper Division Courses (24 units):* Six courses, which must include Linguistics 103, 120A, 120B, two elective courses selected from 104 through C185B, and an additional elective linguistics course, which may be upper or lower division.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined

in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Linguistics offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Linguistics.

## Admission

The department only considers applicants whose degree objective is the Ph.D. Students are normally admitted to begin residence in Fall Quarter only (exceptions may be made by the admissions director). The deadline for submission of applications for Fall Quarter is December 31 of the previous year.

Applicants are required to submit a statement of purpose that includes their background for graduate study in linguistics and immediate and long-range goals in the field; a copy of a research paper or other piece of writing in linguistics or a closely related field; letters of recommendation from three scholars under whom they have studied; and scores (no minimum scores are required) on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE).

While not required for admission, Linguistics 103, 110, 120A, and 120B are requisite to graduate courses in the corresponding areas. An admitted applicant is notified by the department which, if any, of the above courses must be taken or audited. Any question of whether courses taken elsewhere are equivalent to the above courses is discussed with the adviser.

If earlier graduate work was done at UCLA, admission into the Ph.D. program is considered on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty's evaluation of the quality of the M.A. thesis and of overall work and promise.

If applicants previously received an M.A. in Linguistics from another department or institution, all the requirements expected of an M.A. candidate, including the coursework, must be fulfilled unless work elsewhere is deemed equivalent and satisfies the course requirements. Then there are two possible procedures: (1) a master's thesis written at another institution or department may be submitted or (2) if a thesis was not written elsewhere, a paper equal in depth and scope to a thesis may be submitted. In either case an evaluation committee is appointed. The committee makes a recommendation to the entire faculty, which then assesses the applicant's qualifications for admission into the Ph.D. program.

## Master's Degree

For specializations, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination and thesis plans; the former is for terminal M.A. students only. The M.A. degree requires the completion of nine graduate courses in linguistics. All students are

required to take four core courses. The remaining courses must be chosen from a specific list of courses. All first-year students must take a research course sequence, and all second-year students must take a thesis preparation seminar.

There is a language requirement for this degree.

## Doctoral Degree

Students may specialize in syntax, semantics, phonology, phonetics, language change, typology, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

Students are required to take 36 units of graduate coursework beyond the M.A. requirements. The units must include a field methods sequence and 8 units in an area distinct from that of the student's major area of concentration. It is a requirement for some of the student's research to be presented at a meeting of the Linguistics Department Colloquium.

Written and oral qualifying examinations are required. The written examination consists of two substantive research papers in different areas or fields of linguistics.

Following successful completion of the written examinations, students submit a dissertation prospectus and take the University Oral Qualifying Examination, which is based primarily on the topic of the dissertation research and includes all the background necessary to pursue research on the specific topic.

There is a language requirement for this degree.

## African Languages

### Lower Division Courses

**1A-1B-1C. Elementary Swahili. (4-4-4)** Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania. P/NP or letter grading.

**2A-2B-2C. Intermediate Swahili. (4-4-4)** Lecture, four hours. Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C. P/NP or letter grading.

**7A-7B-7C. Elementary Zulu. (4-4-4)** Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. P/NP or letter grading.

**8A-8B-8C. Intermediate Zulu. (4-4-4)** Lecture, four hours. Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C. P/NP or letter grading.

**11A-11B-11C. Elementary Yoruba. (4-4-4)** Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of western Nigeria. P/NP or letter grading.

**12A-12B-12C. Intermediate Yoruba. (4-4-4)** Lecture, four hours. Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C. P/NP or letter grading.

**15. Intensive Elementary Swahili. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 1A, 1B, 1C) in Swahili, major language of East Africa, particularly Tanzania. Letter grading.

**16. Intensive Intermediate Swahili. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 1C or 15. Intensive instruction (equivalent to courses 2A, 2B, 2C) in Swahili, major language of East Africa, particularly Tanzania. Letter grading.

**17. Intensive Elementary Zulu. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 7A, 7B, 7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

**18. Intensive Intermediate Zulu. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 7C or 17. Intensive instruction (equivalent to courses 8A, 8B, 8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

**25. Intensive Eleme3 ntary Yoruba. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 11A, 11B, 11C) in Yoruba, major language of western Nigeria. Letter grading.

**26. Intensive Intermediate Yoruba. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 11C or 25. Intensive instruction (equivalent to courses 12A, 12B, 12C) in Yoruba, major language of western Nigeria. Letter grading.

**31A-31B-31C. Elementary Bambara. (4-4-4)** Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects. P/NP or letter grading.

**32A-32B-32C. Intermediate Bambara. (4-4-4)** Lecture, four hours. Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C. P/NP or letter grading.

**35. Intensive Elementary Bambara. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 31A, 31B, 31C) in Bambara, major language of Mali and contiguous areas. Letter grading.

**36. Intensive Intermediate Bambara. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 31C or 35. Intensive instruction (equivalent to courses 32A, 32B, 32C) in Bambara, major language of Mali and contiguous areas. Letter grading.

**41A-41B-41C. Elementary Hausa. (4-4-4)** Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of northern Nigeria and adjacent areas. P/NP or letter grading.

**42A-42B-42C. Intermediate Hausa. (4-4-4)** Lecture, four hours. Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C. P/NP or letter grading.

**45. Intensive Elementary Hausa. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 41A, 41B, 41C) in Hausa, major language of northern Nigeria and adjacent areas. Letter grading.

**46. Intensive Intermediate Hausa. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 41C or 45. Intensive instruction (equivalent to courses 42A, 42B, 42C) in Hausa, major language of northern Nigeria and adjacent areas. Letter grading.

**51A-51B-51C. Elementary Amharic. (4-4-4)** Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

**52A-52B-52C. Intermediate Amharic. (4-4-4)** Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51C. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/NP (undergraduates), S/U (graduates), or letter grading.

**55. Intensive Elementary Tigrinya. (12)** Lecture, 20 hours. Intensive instruction in Tigrinya, major language of Eritrea and Tigray, province of Ethiopia. Letter grading.

**61A-61B-61C. Elementary Wolof. (4-4-4)** Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia. P/NP or letter grading.

**62A-62B-62C. Intermediate Wolof. (4-4-4)** Lecture, four hours. Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

**75. Intensive Elementary Chichewa. (12)** Lecture, 20 hours. Intensive instruction in Chichewa (ChiNyanja), major language of Malawi and adjacent areas of Zimbabwe, Mozambique, Zambia, and Tanzania. Letter grading.

**85. Intensive Elementary Setswana. (12)** Lecture, 20 hours. Intensive instruction in Setswana, primary language of Botswana and adjacent areas of South Africa. Letter grading.

**97. Elementary and Intermediate Studies in African Languages. (1 to 6)** Seminar, to be arranged. Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa. Letter grading.

## Upper Division Courses

**103A-103B-103C. Advanced Swahili. (4-4-4)** Lecture, four hours. Requisite: course 2C. Course 103A is requisite to 103B, which is requisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. P/NP or letter grading.

**109A-109B-109C. Advanced Zulu. (4-4-4)** Lecture, five hours. Requisite: course 8C. Course 109A is requisite to 109B, which is requisite to 109C. Readings in Zulu literature and the contemporary press. Discussions mainly in Zulu. P/NP or letter grading.

**123A-123B-123C. Advanced Yoruba. (4-4-4)** Lecture, four hours. Requisite: course 12C. Course 123A is requisite to 123B, which is requisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba. P/NP or letter grading.

**133A-133B-133C. Advanced Bambara. (4-4-4)** Lecture, four hours. Requisite: course 32C. Course 133A is requisite to 133B, which is requisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara. P/NP or letter grading.

**143A-143B-143C. Advanced Hausa. (4-4-4)** Lecture, four hours. Requisite: course 42C. Course 143A is requisite to 143B, which is requisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. P/NP or letter grading.

**150A-150B. African Literature in English Translation. (4-4)** Lecture, four hours. Narrative and didactic prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. P/NP or letter grading.

**153A-153B-153C. Advanced Amharic. (4-4-4)** Lecture, five hours (15 hours for intensive course). Requisite: course 52C. Course 153A is requisite to 153B, which is requisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

**M190. Survey of African Languages. (4)** (Same as Linguistics M115.) Lecture, four hours. Requisite: Linguistics 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages. P/NP or letter grading.

**199. Special Studies in African Languages. (1 to 6)** Tutorial, to be arranged. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available. P/NP or letter grading.

## Graduate Courses

**202A-202B-202C. Comparative Bantu. (4-4-4)** Lecture, four hours. Requisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C, 199. Investigation of relationships among the Bantu languages; extent and external relationships of Bantu. S/U or letter grading.

**596. Directed Studies. (1 to 8)** Tutorial, to be arranged. Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Indigenous Languages of the Americas

### Lower Division Courses

**17. Intensive Elementary Quechua. (12)** Lecture, 15 hours; laboratory, five hours. Intensive course equivalent to courses 18A, 18B, 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America. Offered in summer only. Letter grading.

**18A-18B-18C. Elementary Quechua. (4-4-4)** Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America.

## Upper Division Courses

**119A-119B-119C. Advanced Quechua. (4-4-4)** Requisite: course 18C. Course 119A is requisite to 119B, which is requisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua.

## Graduate Course

**596. Directed Studies in Quechua. (1 to 8)** Requisites: courses 119A, 119B, 119C. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Linguistics

### Lower Division Courses

**1. Introduction to Study of Language. (4)** Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.

**2. Language in the U.S. (4)** Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arrival languages) and social and political aspects of American language use.

**3. American Sign Language: Structure and Culture. (4)** Lecture, four hours; discussion, one hour. Knowledge of American Sign Language (ASL) not required. Introduction to principles of linguistics through study of structure of American Sign Language and culture of deaf Americans. Phonology, morphology, syntax of ASL, historical change, signed language universals, education, identity, and ASL literature. P/NP or letter grading.

**10. Structure of English Words. (4)** Lecture, three to four hours. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation.

**20. Introduction to Linguistics. (4)** Lecture, four hours; discussion, one hour. Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar.

**88. Lower Division Seminar. (4)** Seminar, three hours. Limited to freshmen/sophomores. Variable topics; consult *Schedule of Classes*, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit. P/NP or letter grading.

**99. Special Studies in Linguistics. (2 to 4)** Supervised research or training. May be repeated for credit. P/NP or letter grading.

### Upper Division Courses

**103. Introduction to General Phonetics. (4)** Lecture, four hours; discussion, one hour. Preparation: one prior linguistics course or course 20 concurrently. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena.

**104. Experimental Phonetics. (4)** Lecture, four hours; discussion, one hour. Requisite: course 103. Survey of principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena.

**110. Introduction to Historical Linguistics. (4)** Requisites: courses 20, 103, 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change.

**C111. Intonation. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104 or 204. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Concurrently scheduled with course C211.

**114. American Indian Linguistics. (4)** Strongly recommended preparation: course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

**M115. Survey of African Languages. (4)** (Same as African Languages M190.) Requisite: course 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

**M116. Introduction to Japanese Linguistics. (4)** (Same as Japanese M120.) Lecture, three hours; discussion, one hour. Enforced requisite: Japanese 3 or Japanese placement test. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and discourse pragmatics. Letter grading.

**120A. Phonology I. (4)** Requisites: courses 20, 103. Introduction to phonological theory and analysis. Rules, representations, underlying forms, derivations. Justification of phonological analyses. Emphasis on practical skills with problem sets.

**120B. Syntax I. (4)** Requisite: course 20. Course 120A is not requisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistics formalization.

**125. Semantics. (4)** Lecture, four hours; discussion, one hour. Requisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning.

**127. Syntactic Typology and Universals. (4)** Requisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed.

**C128A-C128B. Romance Syntax: French. (4-4)** Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requisite: course 120B. Course C128A is requisite to C128B. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with courses CM228A-CM228B. P/NP or letter grading.

**C130. Language Development. (4)** Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C233.

**C132. Language Processing. (4)** (Formerly numbered 132.) Lecture, four hours; discussion/laboratory, one hour. Requisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferring, speech error models of sentence production, and computation of syntactic structure during production. Concurrently scheduled with course C232.

**C135. Neurolinguistics. (4)** Lecture, four hours; discussion, one hour. Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235.

**140. Linguistics in Relation to Language Teaching. (4)** Requisites: courses 120A, 120B. Aspects of linguistics in relation to teaching of language, with particular focus on special problems entailed in teaching non-European languages.

**M146. Language in Culture. (4)** (Same as Anthropology M140.) Lecture, three hours; discussion, one hour. Requisite: course 20 or Anthropology 33. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. P/NP or letter grading.

**M150. Introduction to Indo-European Linguistics. (4)** (Same as Indo-European Studies M150.) Lecture, three hours. Recommended requisite: course 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of reconstructed Indo-European proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. Letter grading.

**160. Field Methods. (6)** Discussion, four hours; individual or group sessions, one to two hours. Requisites: courses 103, 120A, 120B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

**165A. Phonology II. (4)** Lecture, four hours; discussion, one hour. Requisite: course 120A (undergraduates with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar.

**165B. Syntax II. (4)** Lecture, four hours; discussion, one hour. Requisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics.

**170. Language and Society: Introduction to Sociolinguistics. (4)** Requisite: course 20. Study of patterned covariation of language and society; social dialects and social styles in language; problems of multilingual societies.

**175. Linguistic Change in English. (4)** Requisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexicon, and syntax.

**M176A. Structure of Japanese I. (4)** (Same as Japanese CM122.) Lecture, three hours. Recommended preparation: two years of Japanese. Requisite: Japanese M120. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Letter grading.

**M176B. Structure of Japanese II. (4)** (Same as Japanese CM123.) Lecture, three hours. Recommended preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — grammatical constructions; (3) discourse level — point of view, ellipsis, topicalization. Letter grading.

**M177. Structure of Korean. (4)** (Same as Korean CM120.) Lecture, three hours. Recommended preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Letter grading.

**M178. Contrastive Analysis of Japanese and Korean. (4)** (Same as Japanese CM127 and Korean CM127.) Lecture, three hours. Recommended preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Letter grading.

**C180. Mathematical Structures in Language I. (4)** Lecture, four hours. Requisite: course 120B. Recommended: Philosophy 31. Prior mathematics knowledge not assumed. Mathematical introduction to phonology, syntax, and semantics. Elementary material on logic, sets, functions, relations, and trees. Concurrently scheduled with course C208. P/NP or letter grading.

**C185A. Computational Linguistics I. (4)** Requisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C209A.

**C185B. Computational Linguistics II. (4)** Requisite: course C185A or C209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C209B.

**195. Senior Essay. (4)** Limited to senior linguistics majors. Extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under supervision of a faculty member. Consult professor in charge to enroll.

**196A. Honors Essay. (4)** Preparation: 3.5 grade-point average. Requisite or corequisite: course 165A (or 200A) or 165B (or 200B). Recommended: completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 196A is taken. Draft of extended piece of writing on a linguistic topic selected by the student is prepared under supervision of a faculty member. Consult professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B).

**196B. Honors Essay. (2)** Requisite: course 196A. Piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under supervision of a faculty member. Consult professor in charge to enroll.

**197. Special Topics in Linguistics. (4)** Requisite: course 1 or 20. Variable topics selected from any undergraduate linguistics course area in which students desire greater in-depth knowledge. May be repeated for credit with topic change.

**199. Special Studies in Linguistics. (2 to 4)** Requisites: courses 120A, 120B. May be repeated for credit.

## Graduate Courses

**200A. Phonological Theory I. (4)** Preparation: graduate linguistics student or grade of A in course 120A or equivalent course in phonology. Courses 200A and 201 form two-course survey of current research in phonological theory. Interaction of phonology with morphology and syntax, syllable structure, stress.

**200B. Syntactic Theory I. (4)** Preparation: graduate linguistics student or grade of A in course 120B or equivalent course in syntax. In-depth introduction to selected topics in theory of constituent structure and syntax of predicates, arguments, and grammatical relations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon, grammatical function-changing rules, head-complement relations.

**200C. Semantic Theory I. (4)** Lecture, four hours. Requisite: course C180 or C208. Overview of current results and research methods in linguistic semantics. Topics include generalized quantifiers and semantic universals, predicate argument structures, variable binding and pronominalization, formal semantic interpretation, syntax and LF, tense, ellipsis, and focus. Letter grading.

**201. Phonological Theory II. (4)** Requisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology.

**202. Language Change. (4)** Requisites: courses 110, 200A, 200B. Survey of current theories and research problems in language change.

**203. Phonetic Theory. (4)** Requisite: course 120A. Preliminaries to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of feature systems for phonetic and phonological analysis.

**204. Experimental Phonetics. (4)** Requisite: course 103. Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistics; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech.

**205. Morphological Theory. (4)** Requisites: courses 200A, 200B. Survey of current theories and research problems in morphology. Nature of morphological structure; derivational and inflectional morphology; relation of morphology to phonology, syntax, and the lexicon.

**206. Syntactic Theory II. (4)** Requisite: course 200B. In-depth introduction to selected topics in theory of movement processes and topics selected from following areas: WH-movement and related rules, subjacency and other constraints on movement; ECP and related conditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in movement constructions; LF WH-movement; filters; reconstruction; parasitic gaps; barriers theory; control theory; null subject parameter.

**207. Semantic Theory II. (4)** Lecture, four hours. Requisites: courses C180 or C208, 200C. Survey of current approaches to model-theoretic semantics and its relation to current linguistic theory. Approaches include generalized categorial grammars, Montague grammar, Boolean-based systems, generalized quantifier theory, logical form. Letter grading.

**C208. Mathematical Structures in Language I. (4)** Lecture, four hours. Requisite: course 120B. Recommended: Philosophy 31. Prior mathematics knowledge not assumed. Mathematical introduction to phonology, syntax, and semantics. Elementary material on logic, sets, functions, relations, and trees. Concurrently scheduled with course C180. Graduate students expected to complete additional problem sets. S/U or letter grading.

**C209A. Computational Linguistics I. (4)** Requisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C185A.

**C209B. Computational Linguistics II. (4)** Requisite: course C185A or C209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C185B.

**210A. Field Methods I. (4)** Lecture, four hours. Preparation: grade of B or better in course 103 or in examination on practical phonetics. Requisites: courses 200A, 200B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be relatively full descriptive sketches of the language. May be repeated for credit with topic change. S/U or letter grading.

**210B. Field Methods II. (4)** Lecture, four hours. Requisite: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change. S/U or letter grading.

**C211. Intonation. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104 or 204. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Concurrently scheduled with course C111.

**212. Learnability Theory. (4)** Requisite: course C180 or C208. Survey of some of most significant results on capabilities of learners, given precise assumptions about their memory, time, and computational power, and precise assumptions about information provided by the environment.

**213A. Grammatical Development. (4)** Requisites: courses 200A, 200B. Recommended: course C130 or C233. Survey of theoretical perspectives and contemporary empirical research in development of syntax and other components of grammar, with particular emphasis on acquisition theory, linguistic theory, and issues of learnability.

**213B. Brain Bases for Language. (4)** Requisites: courses 200A, 200B. Recommended: course C135 or C235. Survey of theoretical perspectives and contemporary empirical research in neurological and cognitive bases for language, language development, and language breakdown.

**213C. Linguistic Processing. (4)** Requisites: courses 165B and/or 200B. Recommended: courses C132 or C232, 206. Survey of theoretical perspectives and contemporary empirical research in human processing of language (comprehension and/or production), with emphasis on syntactic processing, ambiguity resolution, effects of memory load, and relationship between grammar and processor.

**214. Survey of Current Syntactic Theories. (4)** Requisite: course 206. Survey of several current syntactic theories, compared with one another and with theory discussed in course 206, from point of view of theories' relative descriptive and explanatory power.

**215. Syntactic Typology. (4)** Requisite: course 200B. Current results in word-order universals; genetic classification of the world's languages; cross-language properties of specific construction types, including relative clauses, passives, positive and negative coreference systems, agreement systems, deixis systems, and types of sentence complements.

**216. Syntactic Theory III. (4)** Requisite: course 206. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; complex quantifier structures.

**218. Mathematical Structures in Language II. (4)** Lecture, four hours. Requisite: course C180 or C208. In-depth study of generalized quantifier theory; selected topics from distinctive feature theory, formal syntax, partial orders and lattices, formal language theory, variable binding operators. May be repeated for credit with consent of instructor. S/U or letter grading.

**220. Linguistic Areas. (4)** Requisites: courses 120A, and 120B or 127. Recommended: courses 165A or 200A, 165B or 200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal South America, Far East, etc.). May be repeated for credit with topic change.

**225. Linguistic Structures. (4)** Requisites: courses 120A, and 120B or 127. Recommended: courses 165A or 200A, 165B or 200B. Phonological and grammatical structure of a selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

**CM228A-CM228B. Romance Syntax: French. (4-4)** (Same as Romance Linguistics M204A-M204B.) Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requisite: course 120B. Course CM228A is requisite to CM228B. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with courses C128A-C128B. S/U or letter grading.

**230. History of Linguistics. (4)** Requisites: courses 200A, 200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

**C232. Language Processing. (4)** Lecture, four hours; discussion/laboratory, one hour. Requisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferencing, speech error models of sentence production, and computation of syntactic structure during production. Concurrently scheduled with course C132. Graduate students expected to read more advanced literature and produce research papers of greater depth. Letter grading.

**C233. Language Development. (4)** Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C130. Graduate students expected to apply more sophisticated knowledge and produce research paper of greater depth.

**C235. Neurolinguistics. (4)** Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C135. Graduate students expected to read more advanced neurolinguistic literature and produce research papers of greater depth.

**236. Computational Phonology. (4)** Lecture, four hours. Introduction to computational models of phonology and phonological acquisition. Topics include finite state machines, probabilistic automata, over-constrained models, dynamic programming methods. Letter grading.

**237. Linguistic Methods Laboratory. (4)** Laboratory, four hours. Variable content, with topics such as computer implementation of linguistic models, corpus studies, experimental methods for linguistic data collection, statistical analysis of results. May be repeated for credit. Letter grading.

**M246C. Topics in Linguistic Anthropology. (4)** (Same as Anthropology M241.) Problems in relations of language, culture, and society. May be repeated for credit.

**251A. Topics in Phonetics and Phonology. (4)** (Formerly numbered 251.) Lecture, four hours. Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. Meets with course 251B. May be repeated for credit.

**251B. Topics in Phonetics and Phonology. (2)** (Formerly numbered 251.) Lecture, four hours. Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 251A. May be repeated for credit. S/U grading.

**252A. Topics in Syntax and Semantics. (4)** (Formerly numbered 252.) Lecture, four hours. Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. Meets with course 252B. May be repeated for credit.

**252B. Topics in Syntax and Semantics. (2)** (Formerly numbered 252.) Lecture, four hours. Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 252A. May be repeated for credit. S/U grading.

**253A. Topics in Language Variation. (4)** (Formerly numbered 253.) Requisite: course 110. Course 202 may be required. Specialized topics in language variation. Meets with course 253B. May be repeated for credit.

**253B. Topics in Language Variation. (2)** (Formerly numbered 253.) Requisite: course 110. Course 202 may be required. Specialized topics in language variation. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 253A. May be repeated for credit. S/U grading.

**254A. Topics in Linguistics. (4)** (Formerly numbered 254.) Lecture, four hours. Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. Meets with course 254B. May be repeated for credit.

**254B. Topics in Linguistics. (2)** (Formerly numbered 254.) Lecture, four hours. Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 254A. May be repeated for credit. S/U grading.

**256A. Topics in Phonetics and Phonology II: Proseminar. (4)** Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. Meets with course 251. In Progress grading (credit to be given only on completion of course 256B).

**256B. Topics in Phonetics and Phonology II: Proseminar. (2)** Requisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

**257A. Topics in Syntax and Semantics II: Proseminar. (4)** Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

**257B. Topics in Syntax and Semantics II: Proseminar. (2)** Requisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

**258A. Topics in Language Variation II: Proseminar. (4)** Requisite: course 110. Course 202 may be required. Specialized topics in language variation. May be repeated for credit. Meets with course 253. In Progress grading (credit to be given only on completion of course 258B).

**258B. Topics in Language Variation II: Proseminar. (2)** Requisite: course 258A. Specialized topics in language variation. May be repeated for credit.

**259A. Topics in Linguistics II: Proseminar. (4)** Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit. Meets with course 254. In Progress grading (credit to be given only on completion of course 259B).

**259B. Topics in Linguistics II: Proseminar. (2)** Requisite: course 259A. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

**260A-260B-260C. Seminars: Phonetics. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**261A-261B-261C. Seminars: Phonology. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**262A-262B-262C. Seminars: Syntax and Semantics. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**263A-263B-263C. Seminars: Language Variation. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**264A-264B-264C. Seminars: Special Topics in Linguistic Theory. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**275. Linguistics Colloquium. (4)** Preparation: completion of M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

**276. Linguistics Colloquium. (No credit)** Designed for graduate students. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**403. Practical Phonetics Training. (1)** Extensive practice in production, perception, and transcription of sounds from a wide range of languages. Concurrently scheduled with practical sections of course 103. S/U grading.

**411A-411B. Research Orientation. (2-2)** Designed for graduate students. Sequence of lectures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**422. Practicum: Phonetic Data Analysis. (2)** Designed for graduate students. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**444. M.A. Thesis Preparation Seminar. (4)** Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**495. College Teaching of Linguistics. (2)** Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Studies. (1 to 8)** Preparation: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**596B. Directed Linguistic Analysis. (1 to 8)** Preparation: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

**597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations. (1 to 8)** Preparation: at least six graduate linguistics courses. May be taken only in terms in which students expect to take comprehensive or qualifying examinations. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**598. Research for M.A. Thesis. (1 to 8)** Research and preparation of M.A. thesis. May not be applied toward M.A. course requirements. May be repeated for a maximum of 8 units. S/U grading.

**599. Research for Ph.D. Dissertation. (1 to 16)** Preparation: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

## Scope and Objectives

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

## Undergraduate Study

### Accounting Minor

Admission to the Accounting minor is competitive and based on a 3.0 grade-point average in the lower division preparation courses. Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the minor. Transfer credit for any of the courses is subject to department approval and is considered only for requisite coursework. Decisions on admission to the minor are made by the Anderson School. The requisite grade-point average and completion of the preparation courses do not guarantee admission to the program. For further information, refer to [http://www.anderson.ucla.edu/acad\\_unit/accounting/undergrad-program.html](http://www.anderson.ucla.edu/acad_unit/accounting/undergrad-program.html).

*Required Lower Division Courses (28 units):* Economics 1, 2, M40 (or Statistics 10 as a substitute for course M40); Management 1A, 1B; Mathematics 3A, 3B (higher-level courses and/or Advanced Placement Test credit may be substituted).

*Required Upper Division Courses (28 units):* Management 120A, 120B, 122, 127A, and three courses from 108, 123, 124, 127B, 128.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website,

<http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The John E. Anderson Graduate School of Management offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Management and the Master of Business Administration (M.B.A.) degree.

In addition, there are a number of degree programs, offered in cooperation with other graduate and professional degree programs on campus, that lead to the M.B.A. and another degree. The school also offers the Executive M.B.A. Program (EMBA) and the M.B.A. for the Fully Employed (FEMBA).

## Admission

### Master of Business Administration

Although no specific undergraduate major is required for entrance, applicants should complete elementary algebra and differential calculus before entering the M.B.A. program. Applicants are required to take the Graduate Management Admission Test (GMAT).

International applicants whose first language is not English and who do not hold a bachelor's or higher degree from a university located in the U.S. or in another country where English is the spoken language and the medium of instruction must certify their proficiency in English by taking the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

The M.B.A. program application, which includes the application for admission to graduate status, is required. Admission is for Fall Quarter only. Completed applications, with full documentation, must be filed directly with the John E. Anderson Graduate School of Management Office of Admissions by April 4. Early application is strongly advised.

Consideration is given to the academic record, score on the GMAT and, for applicants whose native language is not English, score on the TOEFL or IELTS; potential for management as evidenced by work experience and community, extracurricular, or other experience; and several written essays and letters of recommendation. Preference is given to those who have had full-time management-related work experience since completing the bachelor's degree. Those few applicants admitted directly from a baccalaureate program may choose to work for up to three years before entering graduate school. No other admission deferrals are granted.

Applications and information about the M.B.A. program are available from the M.B.A. Program Admissions Office, John E. Anderson Graduate School of Management, B201

Anderson Complex, UCLA, Box 951481, Los Angeles, CA 90095-1481.

### **Management M.B.A./Computer Science M.S.**

The John E. Anderson Graduate School of Management and the Department of Computer Science offer a concurrent degree program that enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Application materials should be requested separately from both schools. Contact the Anderson School for details.

### **Management M.B.A./Information Studies M.L.I.S.**

The John E. Anderson Graduate School of Management and the Department of Information Studies offer a three-year concurrent degree program designed to provide an integrated set of courses for students who seek careers that draw on general and specialized skills in the two professional fields. Application materials should be requested separately from both schools.

### **Management M.B.A./Latin American Studies M.A.**

The John E. Anderson Graduate School of Management and the Latin American Studies Program offer a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. The program is predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Application materials should be requested separately from both schools.

### **Management M.B.A./Law J.D.**

The John E. Anderson School of Management and the School of Law offer a concurrent degree program that enables students to prepare for a career where law and management overlap and where understanding of both fields is necessary. Examples of such areas include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Application should be made to both schools simultaneously.

### **Management M.B.A./Medicine M.D.**

The John E. Anderson Graduate School of Management and the School of Medicine offer a concurrent degree program that enables students to prepare for a career where medicine and management overlap and where understanding of both fields is necessary. Examples of such areas include medical management at a hospital center and management of health care delivery. The program makes it possible to earn the M.D. and the M.B.A. in five academic

years. Applications should be made to the M.B.A. program in the third year of medical school.

### **Management M.B.A./Nursing M.S.N.**

The John E. Anderson Graduate School of Management and the School of Nursing offer a three-year concurrent degree program designed for students who seek careers in hospital and nursing administration. By providing knowledge of both management and clinical care issues, the program prepares individuals for management positions in an increasingly complex environment. Application materials should be requested separately from both schools.

### **Management M.B.A./ Public Health M.P.H.**

The John E. Anderson Graduate School of Management and the Department of Health Services have a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. GMAT scores are required for admission. Application materials should be requested separately from both schools.

### **Management M.B.A./Urban Planning M.A.**

The John E. Anderson Graduate School of Management and the Department of Urban Planning offer a three-year concurrent degree program designed for students who seek careers that draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Application materials should be requested separately from both schools.

### **Executive M.B.A. Program**

Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to study advanced management in a high quality educational environment while continuing to work full time in their professional roles. The program is limited to 70 participants with superior academic records and a minimum of eight to 10 years of work experience with five years at the management level. Further information and application materials may be obtained by writing to the Assistant Dean, Executive M.B.A. Program, UCLA, A101F Anderson Complex, Box 951481, Los Angeles, CA 90095-1481.

### **Fully Employed M.B.A. Program**

The M.B.A. for the Fully Employed (FEMBA) is designed for emerging managers with strong

records of academic and professional achievement who wish to pursue an M.B.A. degree without leaving full-time employment. Each entering class is limited to 135 participants with superior academic records and a minimum of four to six years of work and/or managerial experience. For further information and application, write to the Director, Fully Employed M.B.A. Program, UCLA, A101 Anderson Complex Box 951481, Los Angeles, CA 90095-1481.

### **M.S./Ph.D. in Management**

All applicants to the M.S. and Ph.D. programs are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants whose first language is not English and who do not hold a bachelor's or higher degree from a university located in the U.S. or in another country where English is the spoken language and the medium of instruction must certify their proficiency in English by taking the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. Three letters of recommendation must be submitted with the completed application. Program information and application materials may be obtained from the M.S./Ph.D. Programs Office, C524 Anderson Complex, UCLA, Box 951481, Los Angeles, CA 90095-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 10.

## **Master's Degrees**

### **Master of Business Administration**

Areas of study include accounting; business economics; decision sciences; entertainment management; entrepreneurial studies; finance; human resources and organizational behavior; information systems; international business and comparative management; marketing; operations and technology management; strategy and organization; real estate.

The M.B.A. degree is offered through the comprehensive examination plan. The comprehensive examination requirement is fulfilled by completing the two-quarter core course in field studies. At least 96 units of work toward the degree must be completed in residence in the full-time M.B.A. program at UCLA. The three required elements of the program are the management core, the advanced electives, and the management field study. The management core courses teach the fundamental techniques and disciplines that underlie the practice of management. Advanced electives provide specialized knowledge and skills for one or more fields (typically two) of management work. The management field study allows an opportunity to apply knowledge gained in the program to strategic issues in real organizations.

## Executive M.B.A. Program

The emphasis is on general management training; increased competence in management specialties; management of international businesses; organizational and interpersonal skills; and sophisticated understanding of the integration of businesses and their environments.

The Executive M.B.A. degree is offered through the comprehensive examination plan. A total of 66 units of coursework toward the degree must be completed in residence in the Executive M.B.A. Program at UCLA. Completion of the intensive 24-month course of study leads to a regular M.B.A. degree. Consult the John E. Anderson Graduate School of Management for details on the examination plan and coursework required for the degree.

## Fully Employed M.B.A. Program

The Fully Employed M.B.A. (FEMBA) degree is offered through the comprehensive examination plan. Consult the John E. Anderson Graduate School of Management for details.

Students in the FEMBA Program choose one of two possible formats, with classes meeting either one afternoon per week (from 1:30 to 5 p.m.) and Saturday mornings (from 8:30 a.m. to noon) or all day Saturday (8:30 a.m. to noon and 1:30 to 5 p.m.). A regular M.B.A. degree is awarded on completion of 84 units which are typically completed in three years. The required units are a combination of specified core courses and advanced electives in finance, marketing, or general management.

## M.S. in Management

The area of study for the degree is decision sciences.

The M.S. degree is offered through the comprehensive examination and thesis plans. A minimum of 36 units of coursework, all at the graduate level, is required for the degree.

Students entering the M.S. program are assumed to have taken calculus through differentiation and integration of several variables, two courses in probability and statistics, two quarters of computer programming, and a managerial core of courses in managerial accounting, managerial economics, and managerial finance.

The specialization consists of a five-course methodological core. The specialization also includes three elective courses that typically are supportive of the thesis, along with 4 units of thesis research. The elective courses may be methodological in nature or may relate to management science aspects of a functional field such as operations management, information systems, or finance. Courses from other departments may also be selected.

## Doctoral Degree

Major fields include accounting; business economics; decision sciences; finance; human resources and organization behavior; information systems; international business and com-

parative management studies; marketing; operations and technology management; policy and organization.

Coursework includes research preparation and breadth requirements. The research preparation requirement consists of a course requirement and a research paper. Students are required to take five research courses which are not part of the major field area classes taught in the John E. Anderson Graduate School of Management.

The breadth requirement consists of eight courses that are clearly outside the major field area. Students use the courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field of research and teaching proficiency. Three of the courses may be waived by prior coursework from a previously earned master's degree.

There is no formal major field course requirement. In consultation with a major field adviser, a course of study is designed that prepares students to pass the major field examination.

Written and oral qualifying examinations are required. Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. Students are required to present the substance of their dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

Following successful completion of the written and preliminary oral examinations, students take the University Oral Qualifying Examination.

## Management

### Lower Division Courses

**1A-1B. Elementary Accounting. (4-4)** Lecture, three hours. Not open to freshmen. P/NP or letter grading. **1A.** Introduction to accounting theory and practice. Recording, analyzing, and summarizing procedures used in preparing financial statements, asset side of balance sheet, current liabilities, payroll accounting. **1B.** Requisite: course 1A. Partnership and corporation accounting, statement of cash flows, financial statement analysis, cost and managerial accounting.

**88. Lower Division Seminar: Special Topics in Management. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in management approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**107. Business Communications. (4)** Process and discipline of effective spoken presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Critique of all efforts; certain efforts to be videotaped for review. P/NP or letter grading.

**108. Business Law. (4)** Lecture, three hours. Not open to freshmen. Essentials of contracts, agency, partnerships, corporations, and other select areas of law in a business environment. P/NP or letter grading.

**120A. Intermediate Financial Accounting I. (4)** Requisite: course 1B. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of asset valuation and income measurement. Measurement and reporting of current and long-term assets, including cash and marketable securities, inventories, plant assets and depreciation, and intangibles.

**120B. Intermediate Financial Accounting II. (4)** Requisite: course 120A. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of liability recognition and expense, including leases, bonds, and pensions. Shareholder's equity, including earnings per share. Accounting for changing prices.

**122. Management Accounting. (4)** Requisites: course 1B, Economics M40. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

**123. Auditing. (4)** Lecture, three hours. Requisite: course 120B. Comprehensive study of procedures used in verification of financial statements and related information, including ethical, legal, and other professional issues. Auditing of a complete set of financial statements. P/NP or letter grading.

**124. Advanced Accounting. (4)** Lecture, three hours. Requisite: course 120B. Specialized accounting topics in business combinations, consolidated financial statements, branch accounting, leveraged buyouts, Securities and Exchange Commission, foreign currency transactions, translation of foreign financial statements, partnership ownership changes and liquidations, governmental accounting, and bankruptcy. P/NP or letter grading.

**125. Special Applications in Accounting. (4)** Requisite: course 120B. Recommended: course 122. Designed for seniors. Use of "Strategic Management," a computer program that simulates experience on a senior management team. Under real and sometimes adverse economic conditions, teams must make strategic and tactical decisions, evaluate performance results, and compete for key resources, market share, and business opportunities. Emphasis on theories of return on equity, product life cycles, product line margin analysis, issuing debt versus equity, and other topics that allow students to apply accounting principles learned in previous courses. P/NP or letter grading.

**127A. Tax Principles and Policy. (4)** Requisite: course 1B. Study of fundamental income tax problems encountered by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

**127B. Corporate and Partnership Taxation. (4)** Lecture, three hours. Requisite: course 1B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

**128. Special Topics in Accounting. (4)** Selected topics in public accounting, including mergers and acquisitions, public-company status and the going-public process, role of the partner, serving an entrepreneurial client, and fund accounting. Discussion of a case study of current interest in the accounting profession. Business plan preparation. P/NP or letter grading.

**130A. Basic Managerial Finance. (4)** Lecture, three hours. Requisites: course 120A or 120B, Economics M40. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/NP or letter grading.

**130B. Advanced Managerial Finance. (4)** Lecture, three hours. Requisite: course 130A. Analysis of capital budgeting and working capital management. Review of long-term financing through security markets and lease contracts. Management of financial risk using options, futures, and forward contracts. Study of merger and acquisition processes and reorganization under bankruptcy laws. P/NP or letter grading.

**133. Investment Principles and Policies. (4)** Lecture, three hours. Requisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

**140. Elements of Production and Operations Research. (4)** Requisites: Mathematics 3A, 3B, 3C, 31E, Economics M40. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities. Analytical models and methods for allocation, transportation, inventories, replacement, scheduling, and facilities design.

**150. Elements of Industrial Relations. (4)** Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations.

**175. Elements of Real Estate and Urban Land Economics. (4)** Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

**182. Leadership Principles and Practice. (4)** Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

**190. Management Theory and Policy. (4)** Lecture, three hours. Requisite: course 130A. Study of basic concepts and theory of management. Emphasis on operational analysis of manager's role in all types of organizations. Management issues in areas of planning, organizing, staffing, directing, and controlling. P/NP or letter grading.

**197. Special Topics in Management. (4)** Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit.

**199. Special Studies in Management. (2 to 8)** Discussion: three hours. Designed for juniors/seniors. Undergraduate individual investigation of selected research topic to be arranged with a faculty member. P/NP or letter grading.

## Graduate Courses

**200. Advanced Microeconomics. (4)** Seminar, three hours. Requisite: course 405. Economist's approach to organization and competitive interaction. Topics include game theory, threat credibility, incentive contracts, information advantages, and entry deterrence.

**201A. Business Forecasting: Turning Numbers into Knowledge. (4)** Discussion, three hours. Preparation: familiarity with linear regression. Examination of one approach to analytical thinking — forcing numerical and textual data into carefully formulated alternative models. Data studied include macroeconomic variables (growth, inflation, unemployment, interest rates, and exchange rates), industry data, and firm data. Letter grading.

**201B. Econometrics and Business Forecasting. (4)** Lecture, three hours. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects.

**202A. Regulation. (4)** Lecture, three hours. Requisite: course 405. Reasons for government intervention in theory and practice. Effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process.

**202B. Analytics of Competitive Strategy. (4)** Discussion, three hours. Requisites: courses 402, 405. Development and analysis of strategies to maximize value in competitive and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings.

**203A. Economics of Decision. (4)** Preparation: rudiments of economic theory, calculus, probability, and statistics. Basics of single-person decision theory from a normative viewpoint. Expected utility theory with objective and subjective probability. Departures from expected utility behavior. Introduction to multiperson decision theory.

**203B. Economics of Information. (4)** Discussion, three hours. Preparation: rudiments of economic theory of the firm, calculus, probability, and statistics. Requisite: course 203A. Optimal decision and information rules. Amount, cost, and value of information. Risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment.

**205A. International Business Economics. (4)** Requisite: course 405. International business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and international monetary problems, studied for their influence on organization and operation of the international corporation.

**205B. Comparative Market Structure and Competition. (4)** Requisite: course 205A. Comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries.

**205C. Business Forecasting for Foreign Economies. (4)** Requisite: course 201A. Forecasting changes in business activity, population, industrial structure, productivity, Gross Domestic Product and its components for selected countries. S/U or letter grading.

**207. Resource Administration of Nonmarket Activities. (4)** Seminar, three hours. Requisite: course 405. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

**208. Public Services and Private Functions. (4)** Requisites: courses 405, 406. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financing and provision of public goods and services.

**209. Selected Topics in Business Economics. (4)** Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

**210A. Mathematical Programming. (4)** Discussion, three hours. Preparation: linear algebra. Comprehensive development of theory and computational methods of linear programming, with applications to a variety of areas.

**210B. Applied Stochastic Processes. (4)** Discussion, three hours. Requisite: Mathematics 170A or Electrical Engineering 131A. Fundamentals of stochastic processes, including Poisson processes, renewal theory, and Markov chains. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time. Emphasis on problem formulation and characterization and computations of optimal policies, often via dynamic programming; applications to inventory, queueing, maintenance, reliability, and replacement problems. S/U or letter grading.

**210C. Network Flows and Integer Programming. (4)** Preparation: linear programming. Theory and techniques of discrete and network-related mathematical programming models in management science. Applications to various allocation, coordination, operating, and planning problems. Emphasis on fundamentals, efficient computational methods, and keys to successful practical applications.

**211A. Nonlinear Mathematical Programming. (4)** Requisites: course 210A, Mathematics 32A. Theory, methods, and application of optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; survey of current computer codes and computational experience.

**211B. Large-Scale Mathematical Programming. (4)** Requisite: course 210A. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidimensional, and stochastic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints.

**212A. Decision Sciences Models I. (4)** Requisites: course 407, Mathematics 31B. Broad survey of deterministic models of decision sciences, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management. S/U or letter grading.

**212B. Decision Sciences Models II. (4)** Requisites: course 212A, Mathematics 32A. Broad survey of nonlinear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, facilities design, production, and energy systems. S/U or letter grading.

**212C. Decision Sciences Models III. (4)** Requisites: courses 212A, 212B. In-depth reviews of actual decision sciences applications. Emphasis on professional skills needed for successful practical applications. S/U or letter grading.

**213A. Intermediate Probability and Statistics. (4)** Requisite: course 402. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels.

**213B. Statistical Methods in Management. (4)** Requisite: course 213A. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies.

**213C. Introduction to Multivariate Analysis. (4)** Requisite: course 213B. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminate analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models).

**214B. Behavioral Science Models. (4)** Formulation, analysis, and interpretation of mathematical models in behavioral sciences. Emphasis on stochastic process models for aspects of individual and group behavior such as learning, problem solving, classification, communication, bargaining, and social exchange systems.

**215. Negotiations Analysis. (4)** Discussion, three hours. Series of negotiation exercises to foster development of students' negotiation skills and experience. Use of economic and game-theoretic concepts in debrief to gain insight and develop framework for finding the broad negotiation principles applicable. S/U or letter grading.

**215D. Time-Series Analysis. (4)** Requisite: course 213B. Univariate Box/Jenkins analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models, Granger causality, multiple time-series analysis. Numerous computer applications in modeling and forecasting.

**216A. Simulation of Operational Systems. (4)** Discussion, three hours. Preparation: background in FORTRAN, PL/1, PL/C, or other batch computing language available on campus and in basic statistics (course 402) and modeling (course 407). Computer simulation methodology, including design, validation, operating procedures, and analysis of results of simulation experiments. Applications of simulation to management problems.

**217A. Decision Analysis. (4)** Lecture, three hours. Requisite: course 402. Framework provided for structuring and analyzing decision making under uncertainty. Topics include decision trees, value of information, subjective probability, attitude toward risk, sensitivity analysis, and multicriteria decision making. Applications to a number of business problems, including new product development, litigation, treasure hunting, and bidding. S/U or letter grading.

**217B. Game Theory. (4)** Requisite: course 213A. Nature of models for rational behavior in presence of conflicts of interests, zero-sum and nonzero-sum games, two-person and many-person games, state of the art, philosophical and computational limitations, relations with individual and group decision making.

**218A. Selected Topics in Decision Sciences. (1 to 4)** Newly developing topics and viewpoints. Topics have included reliability and optimal maintenance theory, large-scale distribution/inventory systems, and Markovian decision processes under uncertainty. May be repeated for credit. S/U or letter grading.

**218C. Selected Topics in Business Statistics. (1 to 4)** Special topics in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature. Topics and instructors announced in advance. May be repeated for credit.

**218X-218Y-218Z. Current Issues in Decision Sciences. (1 to 4 each)** Lecture, one hour; discussion, three hours. Current issues and research on a variety of topics in general area of decision sciences. May be repeated for credit. In Progress and S/U grading.

**220A. Intermediate Financial Accounting I. (4)** Requisite: course 403. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on assets and revenue recognition.

**220B. Intermediate Financial Accounting II. (4)** Requisite: course 220A. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on liabilities and owners' equity.

**220C. Advanced Financial Accounting. (4)** Requisites: courses 220A, 220B. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, mergers, combinations, and parent/subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy.

**222. Management Accounting. (4)** Lecture, three hours. Requisite: course 403. Nature, objectives, and procedure of cost accounting and control; job costing and process costing; joint product costing, standard costs; theories of cost allocation and absorption. S/U or letter grading.

**223. Auditing. (4)** Requisite: course 403. Theory and practice underlying auditors' examination and reporting on financial statements, including professional ethics, internal control, and selection and application of auditing procedures, with emphasis on generally accepted auditing standards.

**224. Law for Entrepreneurs. (4)** Lecture, three hours. Examination of various legal issues encountered by entrepreneurs in operating business ventures, including contract negotiation, protecting goodwill, legal issues in marketing, employment law, bankruptcy, enterprise formation, and creditor rights. S/U or letter grading.

**226. International Accounting. (4)** Requisite: course 403. Comparative analysis of accounting concepts and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development.

**227A. Taxation Principles and Policy. (4)** Discussion, three hours. Requisite: course 403. Study of fundamental income tax problems encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy.

**227B. Taxation and Business Planning. (4)** Discussion, three hours. Requisite: course 403. Study of tax issues arising in formation, operation, and termination of a corporation. Specific emphasis on structuring shareholders' transactions involving dividends, redemptions, liquidations, acquisitions, and capital structure.

**228. Financial Statement Analysis. (4)** Lecture, three hours. Requisite: course 403. Issues of accounting information evaluation, with special emphasis on uses of financial statements by decision makers external to the firm (e.g., investors, creditors). Topics include load decisions, bankruptcy prediction, and interpreting earnings.

**229A. Special Topics in Accounting. (4)** Lecture, three hours. Designed for Ph.D. students. Examination in depth of problems or issues of current concern in accounting, such as application of information economics and principal-agent model to accounting.

**229B. Empirical Research in Accounting. (4)** Lecture, three hours. Preparation: training in econometrics. Designed for Ph.D. students. Introduction to empirical accounting literature, focusing on role that accounting information plays in formation of capital market prices.

**229X-229Y-229Z. Accounting Workshops. (1-1-2)** Discussion, two hours. Designed for Ph.D. students. Intended to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting. Active participation and intellectual interchange encouraged through discussion of papers during colloquium. May be repeated for credit. S/U grading.

**230. Theory of Finance. (4)** Lecture, three hours. Requisite: course 408. Primary focus on valuation of corporate liabilities and other securities under uncertainty. Capital asset pricing model presented rigorously and compared with more recent theories of asset pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on analysis of problems in corporate finance such as optimal financing of the corporation and the market for corporate control. S/U or letter grading.

**231A. Topics in Corporate Finance. (4)** Discussion, three hours. Requisite: course 230. Identifying and solving financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion. S/U or letter grading.

**231B. Nonprofit Sector Financial Policy. (4)** Discussion, three hours. Requisite: course 408. Identifying and solving financial problems for all types of nonprofit organizations, with attention to funds accounting, budgeting and control, investment decision making when market valuation cannot be used as a criterion, and sources of funds for nonprofit organizations. Use of cases.

**231D. Takeovers, Restructuring, and Corporate Governance. (4)** Lecture, three hours. Requisite: course 230. Process by which corporate control transactions take place; role of market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Empirical evidence on economic and capital market reactions to control transactions and to defensive measures by management. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of the firm. S/U or letter grading.

**231E. Managing Finance and Financing the Emerging Enterprise. (4)** Requisites: courses 230, 403, 408. Designed for second-year graduate students. Emphasis on financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropriate to securing organizations' money requirements.

**232A. Security Analysis and Investment Management. (4)** Lecture, three hours. Requisite: course 230. Topics include security valuation, application of portfolio theory to investment decisions, performance evaluation, and basics of fixed income portfolio management strategies. S/U or letter grading.

**232B. Fixed-Income Markets. (4)** Lecture, three hours. Preparation: demonstrable training in statistics. Requisites: courses 230, 233A. Introduction to fixed-income markets: institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

**232D. Option Markets. (4)** Requisite: course 230. Organization and role of organized derivative markets, including listed and OTC options and futures: arbitrage and hedging relationships, valuation of derivative trading strategies, and innovations in derivative markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writing a term paper analyzing their strategies. S/U or letter grading.

**233A. Money and Capital Markets. (4)** Requisite: course 230. Application of interest theory and flow funds analysis to price determination process in markets for bonds, mortgages, stocks, and other financial instruments. Study of funds flow from credit markets. Analysis of costs of capital in individual industries.

**233B. Financial Institutions. (4)** Lecture, three hours. Requisite: course 230. Theory and practice of financial institutions and stock exchanges. Main topics include deposit insurance and regulation, international banking, market microstructure, and investment banking. S/U or letter grading.

**234A. International Financial Markets. (4)** Lecture, three hours. Requisites: courses 205A, 230. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of the markets to be dealt with in detail. S/U or letter grading.

**234B. Financial Management of Multinational Corporations. (4)** Lecture, three hours. Requisite: course 230. Financial management of multinational firms from perspective of a financial vice president or other financial officer within the company. Topics include measuring foreign exchange risk, managing that risk with both contractual and operating strategies, foreign investment decisions, capital budgeting and cost of capital in an international perspective, political risk, working capital management, and performance evaluation and control.

**238. Special Topics in Finance. (4)** Requisite: course 230. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

**239A. Theory of Exchanges under Uncertainty. (4)** Requisite: course 230. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Foundations of theory of exchange developed as introduction to theoretical literature on pricing of capital assets.

**239B. Theory of Investment under Uncertainty. (4)** Requisites: courses 230, 239A. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency.

**239C. Empirical Research in Finance. (4)** Discussion, three hours. Preparation: training in econometrics. Requisite: course 230. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. In-depth study of empirical research in the field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. S/U or letter grading.

**239D. Ph.D. Seminar: Corporate Finance. (4)** Preparation: courses in 239 series. Requisite: course 230. Designed for Ph.D. students. Advanced topics in corporate finance theory and empirical research. May be repeated for credit with instructor change. S/U or letter grading.

**239X-239Y-239Z. Finance Workshops. (1-1-2)** Discussion, 90 minutes. Designed for Ph.D. students. Intended to develop ability to critically evaluate finance research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**240A. The Operating Manager. (4)** Definition and analysis of problems of production planning, inventory management, quality control, system design, and implementation from operating manager's perspective, primarily through case studies. Course is integrative in nature, rather than one of developing new methodologies and techniques.

**240B. Operations Planning, Scheduling, and Control. (4)** Requisite: course 407. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems.

**240C. Design of Operational Systems. (4)** Requisite: course 407. Issues, concepts, objectives, and criteria in determination of capabilities, characteristics, and configurations of manufacturing and service systems. Examination of analytic and synthesizing methodologies for selection of capacity, location, technology, processes, material movement and storage systems, facilities, work group structures, and jobs.

**240D. Operations Strategy and Policy. (4)** Discussion, three hours. Definition and scope of operations strategy and its relation to corporate strategy, importance of productivity and its amplification in global competition, positioning the system to match market requirements, capacity decisions, product and process technology, work force and job design, strategic implications of operating decisions, suppliers and vertical integration. Case analyses involving strategic issues in manufacturing and nonmanufacturing situations.

**240E. Managing Entrepreneurial Operations. (4)** Lecture, three hours. Designed for second-year graduate students. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodologies, principles, and concepts provided in requisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operations.

**240F. Supply Chain Management. (4)** Lecture, three hours. Requisite: course 410. Business environment today is characterized by globalized operations, intense competition, rapid turnover in technology, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many industries competition has moved from the firm level to the supply chain level. Provides understanding of strategic, tactical, and operational issues in supply chain management. S/U or letter grading.

**240G. Global Operations Strategy. (4)** Lecture, three hours. Requisite: course 410. Challenges of operating globally in range of industries, including software, consulting, automotive, textile, etc. Several opportunities for hands-on quantitative methods, with strategic perspective throughout. S/U or letter grading.

**241A. Managing Technology for Competitive Advantage. (4)** Advanced technologies such as robotics, computer-integrated manufacturing, computer-aided design and manufacturing (CAD/CAM), and flexible manufacturing systems. Effects of technological innovation on operations managers at both strategic and operational levels. Course is integrative in nature.

**241B. Project Management. (4)** Requisite: course 407. Management of development projects. Decision-making environment, economic analysis, network analysis, scheduling, and control of development projects. Sequential and aggregate development decisions.

**242A. Models for Operations Planning, Scheduling, and Control. (4)** Designed for Ph.D. students. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis throughout on formal models and their applications. Aggregate planning, work force scheduling, inventory management, and detailed operations scheduling and control.

**242B. Models for Operations Systems Design. (4)** Designed for Ph.D. students. Survey of research literature on models for design of manufacturing and service systems, including long-range forecasting, operational economics, capacity, location, facilities, processes/technology, work, and work structures.

**243A. Planning for Facilities Systems. (4)** Requisite: course 212A. Planning of location, expansion, and replacement for interdependent systems of facilities. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems.

**243B. Inventory Theory. (4)** Requisite: course 210B. General discussion of inventory models, with emphasis on characterizing the form of optimal policies and efficient computational methods. Consideration of deterministic, stochastic, discrete-time, and continuous-time models.

**243C. Scheduling Models for Intermittent Systems. (4)** Requisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man/machine interaction.

**243X-243Y-243Z. Operations and Technology Management Seminars. (1-1-2)** Discussion, 90 minutes to three hours. Designed for Ph.D. students. Required of all students in operations and technology management concentration during first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit.

**244X-244Y-244Z. Research in Operations and Technology Management. (1-1-2)** Designed for Ph.D. students. Normally taken in first and second years of Ph.D. study. Survey of research literature in operations and technology management. Seminar reports dealing with special topics. May be repeated for credit with topic change.

**245. Special Topics in Operations and Technology Management. (4)** Lecture, three hours. Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and application of specialized knowledge to operational problems. Topics vary each term. May be repeated for credit with topic change.

**246C. Management in Public and Private Nonprofit Sectors. (4)** Designed for graduate students. Examination of roles and management systems of the three sectors of U.S. society; unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

**247A. Environment of the Art World. (4)** Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

**247B. Role of Management in Artistic Decision Making. (4)** Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

**248A. Strategic Management in the Entertainment Industry. (4)** Discussion, three hours. Requisites: courses 403, 405, 406, 408, 420. Examination of financial and strategic aspects of transactions and company management in the entertainment industry. Cases and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; theatrical distribution, international and ancillary markets (pay TV, videocassettes, syndication).

**249A. Special Topics in Public and Private Nonprofit Management. (4)** Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problems. Topics vary each term. May be repeated for credit with topic change.

**249B. Special Topics in Arts Management. (4)** Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

**M250A. Labor Relations: Process and Law. (4)** (Same as Policy Studies M232.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

**250B. Human Resource Management: Process and Law. (4)** Requisite: course M250A. Systematic exposure to theoretical and empirical literature concerning administrative and legal aspects of human resource management. Topics include processes of managing human resources and impact of governmental policies on employer/employee relations.

**250C. Behavioral Foundations of Human Resource Management. (4)** Requisite: course 250B. Topics include development and training; human resource accounting; behavioral foundations of participating management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

**251. Managing Human Resources. (4)** Management of people in organizations, designed for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) issues facing top management which involve management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

**252. Systems of Employee/Management Participation. (4)** Designed to provide understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

**253. Employee Discipline, Discharge, and Grievance/Appeal Settlement. (4)** Designed for graduate students. Analysis of conflict in the employment relationship; theoretical and empirical findings. Principles and philosophies that underlie resolution of labor/management impasses, with emphasis on grievance procedures, arbitration, mediation, and fact-finding.

**M255. Comparative Industrial Relations. (4)** (Same as Policy Studies CM231.) Lecture, three hours; outside study, nine hours. Requisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

**257. Human Resource Management in Creative and Nonprofit Sectors. (4)** Designed for graduate students. Analysis of human resource management theory and practices in industries where primary product is creative or intellectual (e.g., arts, entertainment, education, high technology, and journalism). Consideration of incorporation of work design, employee influences, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior. S/U or letter grading.

**258. Selected Topics in Industrial Relations. (1 to 4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**259A. Individuals and Groups in Human Systems. (4)** Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature dealing with interpersonal dynamics, groups, and aspects of culture in work organizations, with emphasis on theory and research. Current research in psychology, anthropology, and small group studies. Variety of methods represented, including clinical and cross-cultural approaches. S/U or letter grading.

**259B. Advanced Studies in Human Resource Management. (4)** Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiations, and technology/work systems. S/U or letter grading.

**M259C. Labor Markets and Public Policy. (4)** (Same as Policy Studies CM230.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. S/U or letter grading.

**260A. Advanced Marketing Management. (4)** Requisite: course 411. Decision-oriented course concerned with solution of product, price, promotion, and distribution channel problems. Extensive use of case studies.

**260B. Marketing Strategy and Planning. (4)** Lecture, three hours. Requisite: course 411. Development of a framework for strategic marketing planning based on customer behavior, market segmentation, product positioning, product life cycle, market responsiveness, and competitive reaction. Within this framework, development of key elements in annual marketing process.

**261A. Management in the Distribution Channel. (4)** Lecture, three hours. Requisite: course 411. Examination of decisions in the distribution channel. Issues of power in the distribution channel and trade-offs between alternative channel systems.

**261B. Global Marketing Management. (4)** Lecture, three hours. Requisite: course 411. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

**262. Price Policies. (4)** Lecture, three hours. Requisites: courses 405, 411. Consideration of environment of pricing decision — costs, customer, channels, competition, and regulation. Analysis of when and how to apply specific pricing strategies, including two-part tariffs, quantity discounts, product differentiation, bundling, and auctions.

**263A. Consumer Behavior. (4)** Requisite: course 411. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior.

**264A. Marketing Research: Design and Evaluation. (4)** Lecture, three hours. Requisite: course 411. Designed for prospective users of research results rather than for specialists in research. Marketing research is an aid to management decision making. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data.

**264B. Advanced Marketing Research. (4)** Discussion, three hours. Requisite: course 264A. Advanced topics in marketing research, with emphasis on quantitative tools to aid marketing decision making. Topics include demand and market share forecasting, conjoint analysis, market segmentation and cluster analysis, brand positioning and competitive market structures, and assessing market response to price, advertising, promotion, distribution, and sales force.

**265A. Marketing and the Law. (4)** Lecture, three hours. Requisite: course 411. Detailed study of legislative enactments (federal, state, or local) which influence operation of institutions engaged in marketing activities, together with analysis of judicial decisions which have interpreted these laws.

**265B. Social Issues in Marketing. (4)** Lecture, three hours. Requisite: course 411. Environmental impact of marketing in society; study of theories, methods, and relationships for evaluating transaction behavior in a scientific and humanistic context; macroanalytic perspectives in marketing.

**266A. Product Management. (4)** Lecture, three hours. Requisite: course 411. Investigation of process of developing new products and management of mature brands in existing markets. Regarding new product development, focus on concept screening, designing new products, and test marketing. Tactical management of marketing mix with currently available data emphasized in managing mature brands.

**266B. Advertising and Marketing Communications. (4)** Lecture, three hours. Requisite: course 411. Detailed review of use of communication tools in marketing. Critical review of advertising and promotional policies from developmental and executional perspectives. Discussion of other forms of marketing communications, with goal of helping students develop integrated communication strategies.

**268. Selected Topics in Marketing. (4)** Lecture, three hours. Requisite: course 411. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

**269A. Theory in Marketing. (4)** Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

**269B. Research in Marketing Management. (4)** Discussion, three hours. Designed for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

**269C. Quantitative Research in Marketing. (4)** Designed for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research.

**269D. Behavioral Research in Marketing. (4)** Designed for Ph.D. students who are conducting research in consumer behavior or related areas. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives.

**269E. Special Research Topics in Marketing. (4)** Designed for Ph.D. students. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

**269X-269Y-269Z. Workshops: Marketing. (1-1-2)** Designed for Ph.D. students. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in marketing and related disciplines who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

**270A. Information Systems Applications. (4)** Lecture, three hours. Requisite: course 404. Fundamental concepts and uses of information systems in organizations. Systems for intraorganizational and interorganizational transaction, coordination, and control. Information technology for reengineering of business processes. Analysis and evaluation of systems and their impacts. S/U or letter grading.

**270B. Decision Support Systems. (4)** Lecture, three hours. Requisite: course 404. Systems for support of individual and group decision making and collaborative work. Expert and other knowledge-based systems and their applications. Fundamentals of human/computer interaction. S/U or letter grading.

**270C. Application Frontiers in Information Systems. (4)** Lecture, three hours. Requisite: course 404. Exploration of new state-of-the-art applications in information systems, such as in electronic commerce. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**271A. Information Systems Technology. (4)** Lecture, three hours. Requisite: course 404. Computing and communication platform specification, configuration, sizing, and selection for business applications — from handhelds to workstations to mainframes. Open and proprietary architectures. Client/server. Comparative performance and cost analyses. Industry trends. S/U or letter grading.

**271B. Networks for Information Systems. (4)** Lecture, three hours. Requisite: course 404. Telecommunications technology. Design, implementation, and management of local and wide area networks for the firm. Security; protocols and standards; commercial value-added and public-access networks; Internet. Industry trends. S/U or letter grading.

**271C. Emergent Technologies in Information Systems. (4)** Discussion, three hours. Requisite: course 404. Special topics in new and emergent technologies such as multimedia, digital imaging, object-oriented software, heterogeneous databases, and parallel processing. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**272A. Information Systems Development. (4)** Discussion, three hours. Methods and tools for information systems design, development, implementation, and maintenance. User requirements analysis. Design and specification of application software and databases. Classic and alternative approaches, such as rapid prototyping. System integration. Automated support. S/U or letter grading.

**273A. Information Systems Management. (4)** Discussion, three hours. Requisite: course 404. Managing information systems function within the enterprise. Role of chief information officer. Centralized and decentralized organizational designs. Outsourcing and other vendor relationships. Costing and pricing of services. Strategic planning. Management of information systems professionals. S/U or letter grading.

**274A. Special Topics in Information Systems. (4)** Discussion, three hours. Designed primarily for Ph.D. students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**274B. Workshop: Information Systems Research. (4)** Discussion, three hours. Designed for Ph.D. students. New developments in information systems theory, practice, and empirical research. In-depth consideration of research designs and methods. Presentation of student work-in-progress. May be repeated for credit. S/U or letter grading.

**274X-274Y-274Z. Current Research in Information Systems. (1-1-2)** Discussion, two hours. Designed for Ph.D. students. Year-long sequence associated with Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U or letter grading.

**278A. Urban Real Estate Financing and Investing. (4)** Discussion, three hours. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies.

**278B. Sources, Uses, and Flows of Real Estate Capital. (4)** Discussion, three hours. Analysis of money, capital, and mortgage markets to determine potential availability and costs of mortgage money from alternative sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions.

**279A. Special Studies in Urban Land Economics. (4)** Limited to master's or Ph.D. candidates working on thesis- or dissertation-related research. May be repeated for credit.

**279B. Selected Topics in Urban Land Economics. (4)** Discussion, laboratory, and fieldwork. Designed for second-year graduate students. Intended for students who wish to pursue a particular topic in housing, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.

**280A. Studies, Research Philosophies, and Methodology in Human Systems. (4)** Discussion, three hours. Designed for Ph.D. students. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimentation, field studies, case approaches, and a range of analytic and descriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

**280B. Personal and Professional Development. (4)** Discussion, three hours. Designed for Ph.D. students. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

**280C. Research Design in Human Systems Studies. (4)** Discussion, three hours. Designed for Ph.D. students. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and Ph.D. dissertations. May be repeated for credit. S/U or letter grading.

**281A. Sociotechnical Systems. (4)** Designed for graduate students. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

**281B. People in Organizations. (4)** Designed for graduate students. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

**282. Task Group Processes. (4)** Lecture, three hours. Requisite: course 281A or 281B. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technical environment. Imparts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

**284A. Organization Design. (4)** Lecture, three hours. Requisite: course 281A or 281B. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on sociotechnical and differentiation/integration models. S/U or letter grading.

**284B. Organization Development. (4)** Discussion, three hours. Designed for graduate students. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of organization change and action/research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

**285A. Leadership, Motivation, and Power. (4)** Discussion, three hours. Designed for graduate students. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one's own influence styles. S/U or letter grading.

**285B. Managerial Interpersonal Communication. (4)** Discussion, three hours. Designed for graduate students. Interpersonal and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one's own communication styles and skills, considering verbal, nonverbal perceptual, and cross-cultural aspects. S/U or letter grading.

**286. Negotiations Behavior. (4)** Discussion, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for most effective application of these skills. S/U or letter grading.

**287. Groups and Their Facilitation. (4)** Discussion, three hours. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including "sensitivity" basic groups, group counseling, self-help groups, small groups, and committees in managerial decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

**288A. Selected Topics in Behavioral Science. (4)** Discussion, three hours. Designed for graduate students. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretic positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

**288B. Current Issues in Sociotechnical Systems and Organization Design. (4)** Discussion, three hours. Designed for graduate students. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

**288C. Selected Topics in Human Systems Studies and Organizational Behavior. (4)** Discussion, three hours. Designed for graduate students. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

**288D. Current Issues in Human Systems Change and Development through Consulting. (4)** Discussion, three hours. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and exit, diagnosing, process consultation, consciousness raising, team building, and values. Relevant to development of effective M.B.A. field-study teams. S/U or letter grading.

**288E. Proseminar: Behavioral and Organizational Sciences Colloquium. (4)** Discussion, three hours. Designed for graduate students. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrative themes or major issues in the field, designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

**290. Organization Theory. (4)** Lecture, three hours. Analysis of theory and practice of managerial function of planning and control. Implementation of objectives through policy formulation, decision making, and control. Individual projects and reports. S/U or letter grading.

**M292A. Research and Development Policy. (4)** (Formerly numbered 292A.) (Same as Policy Studies M280A.) Lecture, three hours. Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

**M292B. Growth, Science, and Technology. (4)** (Formerly numbered M202C.) (Same as Policy Studies M280B.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform nature of and population of firms in existing industries. S/U or letter grading.

**292C. Comprehensive Planning in Public Sector. (4)** Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

**293A. Political Environment of American Business. (4)** Lecture, three hours. Evaluation of certain criticisms made by business of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

**M293B. Morality of Capitalism. (4)** (Same as Political Science M211.) Lecture, three hours. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

**293C. Ethical Considerations in Business. (4)** Lecture, three hours. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

**295A. Entrepreneurship and Venture Initiation. (4)** Exploration in entrepreneurship particularly concerned with formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business.

**295B. Small Business Management. (4)** Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characteristic operating problems of small firms and application of appropriate methods or techniques for their solution.

**295C. Corporate Entrepreneurship. (4)** Inquiry into nature of entrepreneurship and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in a corporate context.

**296A. International Business Management. (4)** Discussion, three hours. Identification, analysis, and resolution of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociological, cultural, legal, political, and economic environmental characteristics on planning, structuring of organizational relationships, and coordination and control in multinational firms. S/U or letter grading.

**296B. International Comparative Management Research. (4)** Designed for Ph.D. students. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

**297A. Comparative and International Management. (4)** Comparative study of practice of management in selected foreign countries, as affected by their social environments and development of management theory. S/U or letter grading.

**297B. International Business Strategy. (4)** Discussion, three hours. Analysis of key strategic problems encountered by multinational corporations entering foreign markets. Application of concepts and theories acquired in other courses to series of complex cases on international business or by use of a complex simulation of competition in global markets. Letter grading.

**297C. International Business Law. (4)** Requisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investments; international business and government relations.

**297D. International Business Negotiations. (4)** Requisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.

**297E. Business and Economics in Emerging Markets. (4)** Lecture, three hours. Requisite: course 205A or 405. Analysis of changing economic, political, demographic, and sociocultural conditions in developing countries as they affect the business environment. Process of economic growth, market-oriented reforms, and creation of domestic capital markets. Inflation and stabilization programs, identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

**298A. Special Topics in Management Theory. (4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298B. Special Topics in International and Comparative Management. (4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298C. Special Topics in Sociotechnical Systems. (4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298D. Special Topics in Management. (1 to 4)** Lecture, three hours. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

**298X-298Y-298Z. Management Strategy and Policy Workshops. (1-1-2)** Discussion, three hours. Designed for Ph.D. students. Intended to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**299M. Ph.D. Seminar: Research Methodology. (4)** Discussion, three hours. Designed for Ph.D. students. Methodological issues in management research. Emphasis on identification of research opportunities and formulation and evaluation of a research proposal. Alternative goals, settings, and designs. Hypothesis development and testing. Measurement. Implementation considerations.

**299R. Research Methods in Management. (4)** Designed for Ph.D. students. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

- 375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
- 400. Mathematics for Management. (4)** Designed for graduate students. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with applications to model building and decision making in business firms. S/U grading.
- 401A-401B. Managerial Problem Solving. (3-3)** Discussion, three hours. Use of international business simulation and series of complex multifaceted cases to learn to apply M.B.A. core disciplines in real-world globally focused business problems. In Progress and letter grading.
- 402. Data Analysis, Statistics, and Decision Making. (4)** Designed for graduate students. In-depth introduction to probability, decision theory, and statistical inference, with emphasis on solution to actual business problems.
- 403. Financial Accounting. (4)** Designed for graduate students. Introduction to fundamental financial accounting methods and procedures, with emphasis on financial statements. Provides basis for firm understanding of "the language of business" — accounting. S/U or letter grading.
- 404. Information Systems. (4)** Lecture, three hours. Designed for graduate students. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. S/U or letter grading.
- 405. Managerial Economics. (4)** Lecture, four hours; discussion, one hour (when scheduled). Designed for graduate students. Analysis of consumer, producer, and market behavior. Market structure, pricing, and resource allocation. Applications to managerial strategy and public policy, with emphasis on competition, market power, and externalities.
- 406. Global Economy. (4)** Requisites: courses 402, 403, 405. Provides analytical framework required for understanding the way changing macroeconomic conditions in world economy affect economic growth, inflation, interest rates behavior, exchange rate determination, global competitiveness, unemployment, and the trade account. Provides skills to enable students to assess critically how developments in world economy affect particular industry environments.
- 407. Managerial Model Building. (4)** Lecture, three hours. Requisites: courses 402, 403, 405. Survey of uses of formal modeling approaches in managerial decision making. Emphasis on model types and formulations, and use of solutions obtained from computer routines. Application areas include finance, marketing, production, and public systems.
- 408. Managerial Finance. (4)** Requisites: courses 402, 403, 405. Analysis of main decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which lead to effective allocation and use of organization's resources.
- 409. Managing Human Resources in Organizations. (4)** Introduction to human resource management function and management of human behavior in organizations. Emphasis on relationships among individuals, groups, and organizational units as they influence the managerial process and development of prospective general managers.
- 410. Operations and Technology Management. (4)** Requisites: courses 402, 403, 405. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. S/U or letter grading.
- 411. Elements of Marketing. (4)** Requisites: courses 402, 403, 405. Principles of market-driven managerial decision making: consumer, competitor, and company analysis, market segmentation, definition of target markets, and product positioning. Management of marketing function: product and pricing decisions, channels of distribution, marketing communications. S/U or letter grading.
- 412. Management of Organizations. (4)** Lecture, three hours. Preparation: completion of first-year core program. Integrative approach to theory and practice of management in complex organizations, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of human interaction such structures and systems tend to produce.
- 413A. Personal Computing for Managers. (4)** Lecture, three hours. Designed for graduate students. Personal computing in support of strategic analysis, decision making, and management communication. Use of personal productivity tools and network resources. Accessing publicly available information. Emphasis on hands-on exercises. S/U or letter grading.
- 413B. Advanced Topics in Managerial Computing. (4)** Lecture, three hours. Designed for graduate students. New information technology for personal computing by managers. In-depth study of a specific new technology. Extensive hands-on assignments. S/U or letter grading.
- 420. Business Strategy. (4)** Lecture, four hours. Evaluation and formulation of organization's overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management's role in managing the policy process. S/U or letter grading.
- 421A. Management Communications I. (1)** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, decision recommendations, etc. Emphasis on analytically based persuasive writing. S/U grading.
- 421B. Management Communications II. (1)** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective preparation of group writing assignments in managerial contexts where multiple audiences are important. Issues include achieving a single voice, establishing appropriate tone, incorporation of multiple points of view, etc. S/U grading.
- 422. Analysis and Communications. (4)** Discussion, three hours. Designed for graduate students. Study and practice of oral and written management communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and uses of computer technology. Organized around writing and speaking exercises. Personal attention to students' written communications and oral presentations.
- 444A-444B. Managerial Field Study: Two-Quarter Plan. (4-4)** Fieldwork, four hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress and S/U or letter grading.
- 445. Managerial Field Study: One-Quarter Plan. (8)** Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students) and be based on client need and adviser approval. Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.
- 451. Fieldwork in Organizational Development. (2 to 12)** Fieldwork, to be arranged. Requisite: course 284B. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intergroup, total organization, and interorganizational settings. S/U or letter grading.
- 452. Fieldwork in Technical Assistance for Minority Business Enterprise. (1 to 4)** Preparation: completion of first year of master's program. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.
- 453. Fieldwork in Arts Management. (4 to 12)** Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.
- 454. Fieldwork in Organizations. (4)** Preparation: completion of two terms of M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal classwork. May not be repeated for credit.
- 457. Fieldwork in Investment Management. (4)** Discussion, three hours. Use of academic theories learned in a practical experience by managing a portfolio started with donated funds. Mirrors situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.
- 501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.
- 596. Research in Management. (1 to 8)** Directed individual study or research. May be repeated. S/U or letter grading.
- 597. Preparation for Qualifying Examinations. (4 or 12)** Preparation for master's comprehensive examination or Ph.D. qualifying examinations.
- 598. Thesis Research in Management. (4 or 12)** Research for and preparation of master's thesis. May be repeated. S/U grading.
- 599. Ph.D. Dissertation Research in Management. (4 or 12)** Research for and preparation of Ph.D. dissertation.

## Executive M.B.A. Program

- 461. Managerial Problem Solving. (2)** Limited to Executive M.B.A. Program students. Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual's diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progress, working with others, and shaping the work culture.
- 462. Economic Analysis for Managers. (4)** Limited to Executive M.B.A. Program students. Policy-oriented problems in antitrust, tax securities, and environmental regulation. Concepts of microeconomic theory illustrated. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm's optimal response to regulation.
- 463. Data Analysis and Management Decisions under Uncertainty. (4)** Limited to Executive M.B.A. Program students. Survey of statistical model building, with emphasis on managerial interpretation of statistical summary of data. Classical statistics covered through multiple regression to support courses in finance and marketing that follow. Fundamental approaches to decision making under uncertainty.
- 464. Managerial Accounting. (4)** Limited to Executive M.B.A. Program students. Familiarizes the manager with functions of accounting by focusing on use of external financial reports for evaluating corporate performance and use of accounting information for internal planning and control.
- 465. Quantitative Methods for Managers. (4)** Limited to Executive M.B.A. Program students. Survey of modeling approaches to managerial planning and decisions. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed.
- 466A-466B. Financial Policy for Managers. (4-2)** Limited to Executive M.B.A. Program students. Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment decisions, for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in case-work.
- 467. Management Issues in Information Systems. (2)** Limited to Executive M.B.A. Program students. Growing role of information systems in the corporation and how they change ways of doing business. Examples from airlines, health, computer, communications, distribution, and publishing industries. Strategic, organizational, and societal implications.

**468. Economic Forecasting. (2)** Limited to Executive M.B.A. Program students. Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macro-econometric techniques applicable to business decisions.

**469. Management of Human Resources. (4)** Limited to Executive M.B.A. Program students. Introduction to major areas of human resource management — personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each.

**470A. Introduction to Action Research and Policy Analysis. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Provides methods of organizational and strategic analysis to determine relationship of the organization with its environment. In Progress grading (credit to be given only on completion of course 470D).

**470B. Strategic Overview. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Preparation of a strategic overview of a selected international company entailing collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and/or surveys. In Progress grading (credit to be given only on completion of course 470D).

**470C. Action Research Project. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Further research and analysis of one of the strategic issues facing the selected company and identified in the strategic overview (course 470B). In Progress grading (credit to be given only on completion of course 470D).

**470D. Seminar: Policy Analysis. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel. S/U or letter grading.

**472. Marketing Strategy and Policy. (4)** Limited to Executive M.B.A. Program students. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions.

**473A. Managerial and Organizational Processes. (2)** Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Macroanalytic issues, including intergroup relations, design and functioning of organizations, and relationships of organizations to their environment. S/U or letter grading.

**473B. Customer Information Strategy. (2)** Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Development of a customer orientation as a necessity for success in the highly competitive global marketplace, including principles of customer orientation, information as a strategic asset, customer equity, market forecasting, measuring effects of marketing investments, and customer response-based strategy. S/U or letter grading.

**474. Operations and Technology Management: Systems, Strategies, and Policies. (4)** Lecture, three hours. Limited to Executive M.B.A. Program students. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems.

**475. International Managerial Policies and Strategies. (4)** Limited to Executive M.B.A. Program students. Study of economic and business decisions in an international context, with emphasis on formulation and implementation of management strategies in multinational enterprises. Application of concepts of international economic analysis and exploration of international corporate strategies.

**476. Competitive Strategy and Business Policy. (4)** Limited to Executive M.B.A. Program students. Study of general management task of forging a corporate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial settings and implications of changing environments on business strategy.

**477. The Manager and Business/Society Relationships. (4)** Limited to Executive M.B.A. Program students. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

**478. Selected Topics in Management. (2 to 4)** Seminar, 90 minutes to three hours. Limited to Executive M.B.A. Program students. Examination of selected problems and issues in an area of current concern in management. S/U or letter grading.

## MATERIALS SCIENCE AND ENGINEERING

Henry Samueli School of Engineering and Applied Science

UCLA  
6532 Boelter Hall  
Box 951595  
Los Angeles, CA 90095-1595  
(310) 825-5534  
<http://www.seas.ucla.edu/ms/>

King-Ning Tu, Ph.D., *Chair*  
Mark S. Goorsky, Ph.D., *Vice Chair*  
Jenn-Ming Yang, Ph.D., *Vice Chair*

### Professors

Alan J. Ardell, Ph.D.  
Bruce S. Dunn, Ph.D.  
Kanji Ono, Ph.D.  
King-Ning Tu, Ph.D.  
Ya-Hong Xie, Ph.D.  
Jenn-Ming Yang, Ph.D.

### Professors Emeriti

David L. Douglass, Ph.D.  
William Klement, Jr., Ph.D.  
John H. Lyman, Ph.D.  
John D. Mackenzie, Ph.D. (*Nippon Sheet Glass Company Professor Emeritus of Materials Science*)  
Aly H. Shabaik, Ph.D.  
George H. Sines, Ph.D.  
Christian N.J. Wagner, Dr.rer.nat.  
Alfred S. Yue, Ph.D.

### Associate Professors

Mark S. Goorsky, Ph.D.  
Yang Yang, Ph.D.

### Assistant Professor

Benjamin Wu, Ph.D.

### Adjunct Professors

John J. Gilman, Ph.D.  
Harry Patton Gillis, Ph.D.  
Marek A. Przystupa, Ph.D.

## Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of

solids are, in essence, what materials science is all about.

Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optimal selection of engineering materials that must simultaneously fulfill dimensional, property, quality control, and economic requirements.

The department also has a program in electronic materials which provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's Materials Engineering major. A joint major field, Chemistry/Materials Science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science).

The graduate program allows for specialization in one of the following fields: ceramics and ceramic processing, electronic and optical materials, and structural materials.

## Undergraduate Study

### Materials Engineering B.S.

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

### The Major

Course requirements are as follows (181 minimum units required):

- Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 105D
- Materials Science and Engineering 88, 110, 110L, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L; Mechanical and Aerospace Engineering 191A or 192A
- Three elective courses from Chemical Engineering C114, Civil and Environmental Engineering 130, 130F, 135A, Electrical Engineering 2, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 123 (2 units), 143A, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C

4. One course from Electrical Engineering 131A or Mathematics 170A or Mechanical and Aerospace Engineering 193 or Statistics 100A, plus 12 additional units from Chemistry and Biochemistry 30A, 30AL, Materials Science and Engineering 197, Physics 1C, or by petition, upper division courses from engineering, intermediate or advanced foreign language, mathematics, or physical or life sciences. Intermediate foreign language courses may be lower division
5. Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 15 or Electrical Engineering 5C or Mechanical and Aerospace Engineering 20; Materials Science and Engineering 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B
6. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

### Electronic Materials Option

Course requirements are as follows (194 minimum units required):

1. Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Electrical Engineering 10, 101, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, and Civil and Environmental Engineering 108 or Mechanical and Aerospace Engineering 105D
2. Materials Science and Engineering 88, 110, 110L, 121, 122, 130, 131, 131L, 190; Electrical Engineering 2, 121B, 122AL, 123A, 123B, and two courses from Materials Science and Engineering 132, 150, 160; Mechanical and Aerospace Engineering 191A or 192A
3. Four elective courses from Materials Science and Engineering 111, 143A, 162, Electrical Engineering 110, 124, 131A, 172; two laboratory courses from Materials Science and Engineering 161L, 191L, 199, Electrical Engineering 172L
4. Chemistry and Biochemistry 20A, 20B, 20L; Electrical Engineering 5C; Materials Science and Engineering 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined

in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Materials Science and Engineering offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Materials Science and Engineering.

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. and Ph.D. programs are required to take the General Test of the Graduate Record Examination (GRE). A bachelor's degree in materials science, metallurgy, or ceramics is required. Students having a bachelor's degree in chemistry, physics, or other engineering disciplines are admitted if an introductory materials course has been taken or remedial work comparable to an introductory course is performed.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Applicants are encouraged to apply online. Application forms, including a departmental supplement to the application, may be found at <http://www.seas.ucla.edu/ms/> or by writing to the Materials Science and Engineering Department, 6532 Boelter Hall, UCLA, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601.

### Master's Degree

There are three main areas in the M.S. program: ceramics and ceramic processing, electronic and optical materials, and structural materials. Students may specialize in any one of the three areas, although most students are more interested in a broader education and select a variety of courses. Basically, students select courses which serve their interests best in regard to thesis research and job prospects.

The M.S. degree is offered through the comprehensive examination and thesis plans. Nine

courses are required, six of which must be graduate courses. The courses are to be selected from the specific course lists outlined in *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and departmental material. Suitable substitutions can be made from other engineering disciplines or from chemistry and physics with the approval of the departmental graduate adviser.

### Doctoral Degree

Major fields include ceramics and ceramic processing, electronic and optical materials, and structural materials.

There is no formal course requirement for the Ph.D. degree, and students may substitute coursework by examinations. Normally, however, students take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and one minor field. The major field has a scope corresponding to a body of knowledge contained in nine courses, at least six of which are graduate courses, plus the current literature in the area of specialization. The major fields named above are described in a Ph.D. major field syllabus.

The minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. If students fail to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor field is selected to support the major field and is usually a subset of the major field.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Written and oral qualifying examinations are required. During the first year, students take the oral preliminary examination which encompasses the body of knowledge in materials science. After all coursework is completed in the major and minor fields, students take a written preliminary examination in the major field.

Following successful completion of both preliminary examinations, students take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research as well as a review of the dissertation prospectus.

# Materials Science and Engineering

## Lower Division Courses

**14. Science of Engineering Materials. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Chemistry 20A, 20B, 20L, Physics 1A, 1B. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering. Letter grading.

**88. Freshman Seminar: New Materials. (2)** Seminar, two hours; outside study, four hours. Preparation: high school chemistry and physics. Not open to students with credit for course 14. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and micro-electronics. Letter grading.

**90L. Physical Measurement in Materials Engineering. (2)** Laboratory, four hours; outside study, two hours. Various physical measurement methods used in materials science and engineering. Mechanical, thermal, electrical, magnetic, and optical techniques. Letter grading.

## Upper Division Courses

**110. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Material). (4)** Lecture, three hours; laboratory, two hours. Requisite: course 14. Modern methods of materials characterization; fundamentals of crystallography, properties of X rays, X-ray diffraction; powder method, Laue method; determination of crystal structures; phase diagram determination; X-ray stress measurements; X-ray spectroscopy; design of materials characterization procedures. Letter grading.

**110L. Introduction to Materials Characterization A Laboratory. (2)** Laboratory, two hours; outside study, four hours. Requisite: course 14. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, lane method, crystal structure determination, and special projects. Letter grading.

**111. Introduction to Materials Characterization B (Electron Microscopy). (4)** Lecture, three hours; laboratory, two hours. Requisites: courses 14, 110. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy; emissive and reflective modes; chemical analysis; electron optics of both instruments. Letter grading.

**120. Physics of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 14, 110 (or Chemistry 113A). Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, dielectric properties, and p-n junctions. Letter grading.

**121. Materials Science of Semiconductors. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications. Letter grading.

**122. Principles of Electronic Materials Processing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 14. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics. Letter grading.

**123. Electronic Packaging and Interconnection. (2)** Lecture, two hours; outside study, six hours. Various electronic packaging methods and interconnection technologies. Design, fabrication, and testing of complex microelectronic components, interconnections, and assemblies. Letter grading.

**130. Phase Relations in Solids. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 14, and Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions. Letter grading.

**131. Diffusion and Diffusion-Controlled Reactions. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 130. Diffusion in metals and ionic solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Letter grading.

**131L. Diffusion and Diffusion-Controlled Reactions Laboratory. (2)** Laboratory, two hours; outside study, four hours. Corequisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory. Letter grading.

**132. Structure and Properties of Metallic Alloys. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131. Physical metallurgy of steels, lightweight alloys (Al and Ti), and superalloys. Strengthening mechanisms, microstructural control methods for strength and toughness improvement. Grain boundary segregation. Letter grading.

**143A. Mechanical Behavior of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 14. Recommended: Civil Engineering 108. Plastic flow of metals under simple and combined loading, strain rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications. Letter grading.

**150. Introduction to Polymers. (4)** Lecture, three hours; laboratory, two hours. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plastication. Letter grading.

**151. Structure and Properties of Composite Materials. (4)** Lecture, four hours; outside study, eight hours. Preparation: at least two courses from 132, 143A, 150, 160. Requisite: course 14. Relationship between structure and mechanical properties of composite materials with fiber and particulate reinforcement. Properties of fiber, matrix, and interfaces. Selection of macrostructures and material systems. Letter grading.

**160. Introduction to Ceramics and Glasses. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 14, 130. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering. Letter grading.

**161. Processing of Ceramics and Glasses. (4)** Lecture, four hours; discussion, one hour. Requisite: course 160. Study of processes used in fabrication of ceramics and glasses for structural applications, optics, and electronics. Processing operations, including modern techniques of powder synthesis, greenware forming, sintering, glass melting. Microstructure properties relations in ceramics. Fracture analysis and design with ceramics. Letter grading.

**161L. Laboratory in Ceramics. (2)** Laboratory, four hours. Requisite: course 160. Recommended corequisite: course 161. Processing of common ceramics and glasses. Attainment of specific properties through process control for engineering applications. Quantitative characterization and selection of raw materials. Slip casting and extrusion of clay bodies. Sintering of powders. Glass melting and fabrication. Determination of chemical and physical properties. Letter grading.

**162. Electronic Ceramics. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 14, Electrical Engineering 100. Utilization of ceramics in microelectronics; thick film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical wave guide applications and designs. Letter grading.

**CM180. Introduction to Biomaterials. (4)** (Formerly numbered M180.) (Same as Biomedical Engineering CM180.) Lecture, three hours; outside study, nine hours. Requisites: course 14, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM280. Letter grading.

**190. Materials Selection and Engineering Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 132, 150, 160. Explicit guidance among the myriad materials available for design in engineering. Properties and applications of steels, nonferrous alloys, polymeric, ceramic, and composite materials, coatings. Materials selection, treatment, and serviceability emphasized as part of successful design. Design projects. Letter grading.

**191L. Computer Methods and Instrumentation in Materials Science. (2)** Lecture, two hours; outside study, four hours. Preparation: knowledge of BASIC or C or assembly language. Limited to junior/senior Materials Science and Engineering majors. Interface and control techniques, real-time data acquisition and processing, computer-aided testing. Letter grading.

**197. Seminar: Technical Writing for Materials Engineers. (2)** Seminar, two hours; outside study, four hours. Corequisite: course 132 or 190 or 598 or 599. Types of technical documents and basic document patterns. Document planning, paragraph and sentence structures. Illustration and references. Reports, theses, and proposals. Oral presentation. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

## Graduate Courses

**200. Principles of Materials Science I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Lattice dynamics and thermal properties of solids, classical and quantized free electron theory, electrons in a periodic potential, transport in semiconductors, dielectric and magnetic properties of solids. Letter grading.

**201. Principles of Materials Science II. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 131. Kinetics of diffusional transformations in solids. Precipitation in solids. Nucleation theory. Theory of precipitate growth. Ostwald ripening. Spinodal decomposition. Cellular reactions. Letter grading.

**221. Science of Electronic Materials. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Study of major physical and chemical principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical and transport properties, novel materials systems, and characterization. Letter grading.

**222. Growth and Processing of Electronic Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 120, 130, 131. Thermodynamics and kinetics that affect semiconductor growth and device processing. Particular emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation, oxidation. Letter grading.

**223. Materials Science of Thin Films. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 120, 131. Fabrication, structure, and property correlations of thin films used in microelectronics for data and information processing. Topics include film deposition, interfacial properties, stress and strain, electromigration, phase changes and kinetics, reliability. Letter grading.

**224. Deposition Technologies and Their Applications. (4)** Lecture, three hours; outside study, nine hours. Designed for graduate engineering students. Deposition methods used in high-technology applications. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma-assisted vapor deposition processes, plasma spray, electrodeposition. Applications in semiconductor, chemical, optical, mechanical, and metallurgical industries. Letter grading.

**225. Materials Science of Surfaces. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 120, Chemistry 113A. Introduction to atomic and electronic structure of surfaces. Survey of methods for determining composition and structure of surfaces and near-surface layers of solid-state materials. Emphasis on scanning probe microscopy, Auger electron spectroscopy, X-ray photoelectron spectroscopy, ultraviolet photoelectron spectroscopy, secondary ion mass spectrometry, ion scattering spectroscopy, and Rutherford backscattering spectrometry. Applications in microelectronics, optoelectronics, metallurgy, polymers, biological and biocompatible materials, and catalysis. Letter grading.

**243A. Fracture of Structural Materials. (4)** Lecture, four hours; laboratory, two hours; outside study, four hours. Requisite: course 143A. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design. Letter grading.

**243C. Dislocations and Strengthening Mechanisms in Solids. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 143A or Mechanical and Aerospace Engineering 156B. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work hardening, and other strengthening. Letter grading.

**244. Electron Microscopy. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 111. Essential features of electron microscopy, geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Moiré fringes, direct lattice resolutions, Lorentz microscopy, laboratory applications of contrast theory. Letter grading.

**245C. Diffraction Methods in Science of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 110. Theory of diffraction of waves (X rays, electrons, and neutrons) in crystalline and noncrystalline materials. Long- and short-range order in crystals, structural effects of plastic deformation, solid-state transformations, arrangements of atoms in liquids and amorphous solids. Letter grading.

**246A. Mechanical Properties of Nonmetallic Crystalline Solids. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 160. Material and environmental factors affecting mechanical properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, microstructural features, residual stresses, temperature, stress state, strain rate, size, and surface conditions. Methods for evaluating mechanical properties. Letter grading.

**246B. Structure and Properties of Glass. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 160. Structure of amorphous solids and glasses. Conditions of glass formation and theories of glass structure. Mechanical, electrical, and optical properties of glass and relationship to structure. Letter grading.

**246D. Electronic and Optical Properties of Ceramics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 160. Principles governing electronic properties of ceramic single crystals and glasses and effects of processing and microstructure on these properties. Electronic conduction, ferroelectricity, and photochromism. Magnetic ceramics. Infrared, visible, and ultraviolet transmission. Unique application of ceramics. Letter grading.

**250A. Analysis and Design of Composite Materials. (4)** Lecture, four hours; outside study, eight hours. Preparation: one course from 143A, Electrical Engineering 175, Mechanical and Aerospace Engineering 156A, or 156B. Requisite: course 151. Mechanics of laminated composites, textile structural composites, strength and failure theory, fracture, fatigue and damage tolerance, environmental effects, microcomputer software for composite analysis and design. Letter grading.

**250B. Advanced Composite Materials. (4)** Lecture, four hours; outside study, eight hours. Preparation: B.S. in Materials Science and Engineering. Requisite: course 151. Fabrication methods, structure and properties of advanced composite materials. Fibers; resin-, metal-, and ceramic-matrix composites. Physical, mechanical, and nondestructive characterization techniques. Letter grading.

**CM280. Introduction to Biomaterials. (4)** (Same as Biomedical Engineering CM280.) Lecture, three hours; outside study, nine hours. Requisites: course 14, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM180. Letter grading.

**296. Seminar: Advanced Topics in Materials Science and Engineering. (2)** Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in materials science and engineering. Discussion of current research and literature in research specialty of faculty members teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate materials science and engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**474A. Advanced Transportation Systems. (4)** Lecture, four hours; outside study, eight hours. Survey of aerospace and advanced ground transportation systems, materials, structures, propulsion systems, control systems, communication systems, and infrastructure support. Letter grading.

**475A. Manufacturing Processes. (4)** Lecture, four hours; outside study, eight hours. Manufacturing properties of materials, thermomechanical processes, chemical and physical processes, material removal processes, packaging, fastening, joining and assembly, tooling and fixtures. Letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

 Luminita Vese, Ph.D.  
 Thomas Watson, Ph.D.  
 John Westman, Ph.D.

## Scope and Objectives

Gauss has called mathematics the "Queen of the Sciences." It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

## Undergraduate Study

### Admission

Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter any of the Mathematics Department majors.

### Preliminary Examination in Mathematics

If students wish to enroll in Mathematics 1, 3A, or 31A, they must pass the Mathematics Diagnostic Test.

The examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It is also given several times during the academic year. For specific dates and test locations, refer to the *Schedule of Classes* or the departmental website at <http://www.math.ucla.edu/undergrad/diagnostic.html>, or contact the Mathematics Student Services Office, 6356 Math Sciences.

### Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 4 or 5 receive 4 units of credit and Mathematics 31A equivalency; those with a score of 3 receive 4 units of calculus and analytic geometry credit. They may petition for 31A equivalency, or they may take course 31A at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students who take the BC Test and obtain a score of 4 or 5 receive 8 units of credit and Mathematics 31A, 31B equivalency; those with a score of 3 receive 8 units of calculus and analytic geometry credit. They may petition for 31A, 31B equivalency, or they may take courses 31A, 31B at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students receiving a score of 3 on the AB or BC examination should consult the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA.

### Credit Limitations

Credit is given for at most one course in each of the following groups: (1) 3A, 31A; (2) 3B, 31B, 31E; (3) 3C, 33A; (4) 110A, 117.

Courses from only one of the following statistics sequences may be applied toward any mathematics major: (1) Mathematics 170A or Statistics 100A, Statistics 100B, 100C or (2) Statistics 100B, 110A.

Mathematics 170A and Statistics 100A are not open for credit to students with credit for Electrical Engineering 131A.

Mathematics 2, 38A, 38B, and Statistics 10 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 132 is not open for credit to students with credit for Physics 132.

Mathematics 151A and 151B are not open for credit to students with credit for Electrical Engineering 103.

Students may not take or repeat a mathematics course for credit if it is a requisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Mathematics 31B, they must do so before completing course 32A).

Students may not receive credit for both a course and the honors version of that course (e.g., they may not receive credit for both Mathematics 131A and 131AH).

### Upper Division Courses

Mathematics 113, 115A, 117, 131A, 132, 142, 151A, 164, and 197 are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

### Undergraduate Majors

The department offers five majors: Mathematics, Applied Mathematics, Mathematics of Computation, Mathematics/Applied Science, and General Mathematics. The department also participates with the Economics Department in the Mathematics/Economics Interdepartmental Program, which offers a Mathematics/Economics major.

The Mathematics major is designed for students whose basic interest is mathematics; the Applied Mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the Mathematics of Computation major for individuals interested in the mathematical theory and the applications of computing; the Mathematics/Applied Science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the General Mathematics major for students planning to teach mathematics at the high school level. As part of the Mathematics/Applied Science major, the de-

partment offers programs for students interested in the fields of actuarial science, management/accounting, medical and life sciences, and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

Students planning to pursue graduate study in mathematics are strongly encouraged to take a three-term sequence of graduate-level courses during their senior year.

## Mathematics B.S.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 1A, and two courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Life Sciences 1, Philosophy 31, 32, Physics 1B, 1C, 6B, 6C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

### Transfer Students

To be admitted as Mathematics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus for majors, one calculus-based physics (mechanics) course, one C++ programming course, and two courses from general chemistry for majors, economics, symbolic logic, and calculus-based physics.

### The Major

*Required:* Mathematics 110A, 110B, 115A, 120A, 131A, 131B, 132, and at least five elective courses from 106 through 199 and Statistics 100A through M120B. The 12 courses must be passed with a minimum overall grade-point average of 2.0.

## Applied Mathematics B.S.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 1A, 1B, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

### Transfer Students

To be admitted as Applied Mathematics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus for majors, two calculus-based physics courses, one C++ programming course, and one course from general chemistry for majors or calculus-based physics.

### The Major

*Required:* Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences from two of the following categories: *numerical*

*analysis* — courses 151A and 151B, *probability and statistics* — courses 170A and 170B, or Statistics 100A and 100B, or 110A and 110B, *differential equations* — courses 135A and 135B; four courses from 110A through 199 and Statistics 100A through M120B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall grade-point average of 2.0.

## Mathematics of Computation B.S.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C, Physics 1A, 1B, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

### Transfer Students

To be admitted as Mathematics of Computation majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus for majors, one discrete structures course, two calculus-based physics courses, three programming courses, and one course from general chemistry for majors or calculus-based physics.

### The Major

*Required:* Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A, 151B, and six courses from 110A through 199 and Statistics 100A through M120B; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall grade-point average of 2.0.

## Mathematics/Applied Science B.S.

The Mathematics/Applied Science major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: actuarial plan, management/accounting plan, medical and life sciences plan, or operations research plan. In the past, Mathematics/Applied Science majors have combined the study of mathematics with fields such as atmospheric sciences, biochemistry, biology, chemistry, economics, geography, physics, psychology, and statistics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied

science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

### Transfer Students

To be admitted as Mathematics/Applied Science majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus for majors and one C++ programming course. Additional courses are required for each concentration plan.

### The Major

*Required:* Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics 100A through M120B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students are not admitted to the major if they have 135 or more units by the end of the term in which they plan to enter the program.

### Actuarial Plan

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 11, 100. Economics 100 may not be applied as one of the upper division courses for the major.

#### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 151A, 164, 170A and 170B or Statistics 100A and 100B or 110A and 110B, and two courses from Mathematics 113, 151B, 171, Statistics 100C, M120A; six outside courses, including Economics 101, 102, 147A, 160, and two courses from Economics 145 through 199, English Composition 131A through 131D, Management 130A, 130B, 190.

### Management/Accounting Plan

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Management 1A, 1B.

#### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 131A, 164, 170A or Statistics 100A or 110A, Mathematics 170B or Statistics 100B or 110B, and

two courses from Mathematics 110A through 199 and Statistics 100C; seven management courses, including Management 120A, 120B, 122, 140, 212A, 212B, and one additional course from 108 through 190.

### Medical and Life Sciences Plan

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L, Life Sciences 1, 2, 3, 4, Physics 1A, 1B.

#### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 135A, 151A, 170A, 170B, and two courses from 110A through 199 and Statistics 100B through M120B; six outside courses, including Physiological Science 111A, 111B, and 111C or M180A, M180B, and M180C, and three courses from Biomathematics 110, Computer Science M196B, Physiological Science C100, and C135 or Neurosciences 103 (appropriate courses from other departments may be substituted for some of the courses provided departmental consent is given before such courses are taken).

### Operations Research Plan

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 11, 100, Management 1A, Program in Computing 10A.

#### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 131A, 151A, 151B, 170A or Statistics 100A or 110A, Statistics 100B or 110B, and one course from Mathematics 110A, 113, 117, 164, 167, 170B, 171, Statistics 100C; six outside courses, including Economics 101, Management 140, 212A, 212B, and two courses from Management 201A, 203A, 210A, 210B, 210C, 211A, 213A, 213C, 217A, 217B, 240B, 240C.

### General Mathematics B.S.

The General Mathematics major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the Mathematics, Applied Mathematics, or Mathematics of Computation major.

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 1 or 6 sequence, Chemistry and Biochemistry 20A, 20B, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

### Transfer Students

To be admitted as General Mathematics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus for majors, one discrete structures course, one C++ programming course, and three courses from calculus-based physics, general chemistry for majors, and computing.

#### The Major

*Required:* Mathematics 110A or 117, 115A, 120A or 123, 170A or Statistics 100A or 110A, one course from 131A through 136, one course from 142 through 167, and six elective courses from 106 through 199, 370A, 370B, and Statistics 100B through M120B.

### Honors

#### Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

#### Honors Program

Students majoring in Mathematics, Applied Mathematics, and Mathematics of Computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall grade-point average of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

### Computing Specialization

Majors in Mathematics, Applied Mathematics, Mathematics/Applied Science, or General Mathematics may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, two courses from 10C, 15, 20, 30, 40, 60, and at least two courses from Mathematics 149 through 159, with a minimum grade of C- in each course and a combined grade-point average of at least 2.0. Students must petition for

admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

### Subject Matter Preparation Program for Single Subject Credential in Mathematics

Students interested in obtaining a single subject secondary school credential in mathematics should consult with a departmental counselor regarding the requirements for a waiver from the Mathematics Single Subject Assessment Test (SSAT) and the Praxis Examination, both of which are required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible because the program does require additional courses beyond the major requirements. For additional information on teaching credential requirements, consult the Department of Education at (310) 825-8328.

### Mathematics Minor

The Mathematics minor is designed to provide students with the opportunity to widen their background and general comprehension of the role of mathematics in various disciplines.

To enter the minor, students must have an overall grade-point average of 2.0 or better and meet with the undergraduate mathematics adviser in the Student Services Office, 6356 Math Sciences.

*Required Lower Division Courses (12 units):* Mathematics 32A, 33A, 33B.

*Required Upper Division Courses (20 units):* At least five courses (20 units) selected from Mathematics 106 through 199.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

#### Graduate Degrees

The Department of Mathematics offers the Masters of Arts in Teaching (M.A.T.) degree and Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Mathematics.

## Admission

### M.A./Ph.D. in Mathematics

Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to a master's degree program, applicants must have earned in the upper division mathematics courses a cumulative grade-point average of at least 3.2.

For direct admission to the Ph.D. program, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master's degree must have maintained an average of better than 3.5 in graduate study.

Applicants must take the Graduate Record Examination (GRE) General Test and the Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

### M.A.T. in Mathematics

The M.A.T. program serves the needs of present and prospective mathematics teachers in high school and junior college. Consult the department for specific admission requirements.

## Master's Degrees

### M.A. in Mathematics

The M.A. degree may be earned in a basic (pure mathematics) program and an interdisciplinary program in applied mathematics.

The M.A. degree is offered through the comprehensive examination plan. Students in the pure option take one examination in algebra and one examination in either real analysis or complex analysis. Students in the applied option take one examination in real analysis or complex analysis and one examination in numerical analysis or applied differential equations.

Eleven courses are required for the M.A. degree, eight of which must be graduate courses, while the remaining three may be approved upper division courses. With consent of the graduate vice chair, students in the applied mathematics program may take up to five of the required 11 courses in other departments, provided that the courses are in professional or scientific fields closely related to research in applied mathematics.

### M.A.T. in Mathematics

The M.A.T. degree is offered through the comprehensive examination plan. Students take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics.

Eleven courses are required. Students planning to teach in secondary schools who do not already have valid credentials for such teach-

ing enroll in the single subject instructional credential program in the Department of Education (Graduate School of Education and Information Studies). Interested students should check with the Department of Education for a full and up-to-date description of credential requirements and should submit a Department of Education application for admission to the credential program.

A master's essay on some subject in mathematics related to the student's prospective teaching is required and is written under the direction of a faculty member while enrolled in an individual studies course.

Teaching experience is not a formal requirement for the M.A.T. degree; however, students who are working for a secondary credential must take the supervised teaching course.

## Doctoral Degree

The Ph.D. degree may be earned under the pure or applied option. Many possible choices of fields exist within these programs, and students are urged to read the booklet, *Graduate Studies in Mathematics at UCLA*, that describes the specialties of the faculty and the active research areas in the department in some detail.

Under the pure mathematics option, students must take at least 12 approved graduate courses. Each student must actively participate and lecture in at least two advanced seminars. Under the applied mathematics option, students must take at least 18 approved graduate courses.

Written and oral qualifying examinations are required. Students must pass four written qualifying examinations. Students in the applied option have the opportunity to substitute an outside examination for one of the regular departmental examinations.

Students in the pure option are required to take one examination in algebra and one examination in real analysis. Students in the applied option are required to take one examination in real analysis and one examination in either numerical analysis or applied differential equations.

Following successful completion of the four written qualifying examinations, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Mathematics

### Lower Division Courses

**1. Precalculus. (4)** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Requisite: successful completion of Mathematics Diagnostic Test. Function concept. Linear and polynomial functions and their graphs, applications to optimization. Inverse, exponential, and logarithmic functions. Trigonometric functions. P/NP or letter grading.

**2. Finite Mathematics. (4)** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Finite mathematics consisting of matrices, Gauss/Jordan method, combinatorics, probability, Bayes theorem, and Markov chains. P/NP or letter grading.

**3A. Calculus for Life Sciences Students. (4)** Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 with a grade of C– or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of differential calculus. Introduction to the integral. P/NP or letter grading.

**3B. Calculus for Life Sciences Students. (4)** Lecture, three hours; discussion, one hour. Requisite: course 3A with a grade of C– or better. Techniques and applications of integral calculus, introduction to differential equations and vector calculus. P/NP or letter grading.

**3C. Calculus and Probability for Life Sciences Students. (4)** Lecture, three hours; discussion, one hour. Requisite: course 3B with a grade of C– or better. Elementary probability, calculus-based probability, matrix algebra, and systems of differential equations. P/NP or letter grading.

**31A. Calculus and Analytic Geometry. (4)** Lecture, three hours; discussion, one hour. Preparation: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 with a grade of C– or better. Differential calculus and applications; introduction to integration.

**31B. Calculus and Analytic Geometry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31A with a grade of C– or better. Transcendental functions; methods and applications of integration.

**31BH. Calculus and Analytic Geometry (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 31B.

**31E. Calculus for Economics Students. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31A with a grade of C– or better. Not open for credit to students with credit for course 3B, 3C, or 31B. Calculus for applications to economics. Partial differentiation, implicit functions, exponential and logarithmic functions, extrema, optimization, constrained optimization. P/NP or letter grading.

**32A. Calculus of Several Variables. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31B with a grade of C– or better. Introduction to differential calculus of several variables, vector field theory. P/NP or letter grading.

**32AH-32BH. Calculus of Several Variables (Honors). (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 31B with a grade of B or better. Honors sequence parallel to courses 32A, 32B.

**32AL. Calculus Computer Laboratory. (1)** Corequisite: course 32A. Prior knowledge of computers not required. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

**32B. Calculus of Several Variables. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32A with a grade of C– or better. Introduction to integral calculus of several variables, line and surface integrals. P/NP or letter grading.

**32BL. Calculus Computer Laboratory. (1)** Corequisite: course 32B. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

**33A. Linear Algebra and Applications. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32A with a grade of C– or better. Introduction to linear algebra: linear maps, inner product spaces, determinants, eigenvalues, eigenvectors, systems and higher order differential equations with constant coefficients. P/NP or letter grading.

**33AH. Matrices and Differential Equations (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 33A. P/NP or letter grading.

**33AL. Linear Algebra and Differential Equations Computer Laboratory. (1)** Corequisite: course 33A. Application of mathematical software to solve problems in linear algebra and differential equations.

**33B. Infinite Series. (4)** (Formerly numbered 31C.) Lecture, three hours; discussion, one hour. Requisite: course 33A with a grade of C– or better. Infinite sequences and series; applications.

**33BH. Infinite Series (Honors). (4)** (Formerly numbered 31CH.) Lecture, three hours; discussion, one hour. Honors course parallel to course 33B. P/NP or letter grading.

**35AH-35BH-35CH. Intermediate Calculus (Honors). (4-4-4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 31B. Introduction to matrix theory, differential equations, and systems of differential equations. Differential calculus of several variables. Integral calculus of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

**38A-38B. Fundamentals of Mathematics for Elementary Teachers. (4-4)** Not open to freshmen or for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. P/NP or letter grading. **38A.** Lecture, three hours; discussion, one hour. Counting numbers and other subsystems of real numbers; sets; operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures. **38B.** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 38A. Continuation of course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom.

**61. Introduction to Discrete Structures. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, Program in Computing 10A or 3. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebras.

## Upper Division Courses

### General and Teacher Training

**104. Fundamental Concepts of Geometry. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 38A, 38B. Designed for prospective elementary teachers. Informal geometry and topology, motion geometry, measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

**106. History of Mathematics. (4)** Requisite: course 3A or 31A. Roots of modern mathematics in ancient Babylonia and Greece, development of algebra through Middle Ages to Fermat and Abel, invention of analytic geometry and calculus, selected topics in modern mathematics. P/NP or letter grading.

### Algebra, Number Theory, and Logic

**110A-110B. Algebra. (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. **110A.** Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. **110B.** Groups, structure of finite groups.

**110AH-110BH. Algebra (Honors). (4-4)** Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 110A, 110B.

**110C. Algebra. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 110A, 110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

**111. Theory of Numbers. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 110A or 117, 115A. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

**M112. Introduction to Set Theory. (4)** (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Requisite: course 31B or Philosophy 32. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**113. Combinatorics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem.

**114A-114B. Logic and Computability. (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; Herbrand expansions. Effectively computable, Turing computable, and recursive functions; thesis of Church. Universal functions; unsolvability results. Recursive and recursively enumerable sets; recursive enumerability of valid sentences. Formal number theory; definability of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. P/NP or letter grading.

**115A-115B. Linear Algebra. (4-4)** Lecture, three hours; discussion, one hour. P/NP or letter grading. **115A.** Requisite: course 33A. Abstract vector spaces, linear transformations, and matrices; determinants; inner product spaces; eigenvector theory. **115B.** Requisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

**115AH. Linear Algebra (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 115A.

**117. Algebra for Applications. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

### Geometry and Topology

**120A-120B. Differential Geometry. (4-4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature, Gaussian curvature, congruence of curves and surfaces, intrinsic geometry of surfaces, isometries, geodesics, Gauss/Bonnet theorem. P/NP or letter grading.

**121. Introduction to Topology. (4)** Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

**123. Foundations of Geometry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

### Analysis

**131A-131B. Analysis. (4-4)** Lecture, three hours; discussion, one hour. **131A.** Requisites: courses 32B, 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in Euclidean space, functions, continuity. **131B.** Requisites: courses 33B, 115A, 131A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

**131AH-131BH. Analysis (Honors). (4-4)** Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 131A, 131B.

**131AX. Analysis Techniques. (1)** Lecture, one hour. Requisite: course 33B. Corequisite: course 131A. Review of elementary techniques of mathematics and their applications to topics in analysis, such as geometric and algebraic constructions, least upper bound axiom, etc. P/NP or letter grading.

**131C. Topics in Analysis. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 131A, 131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

**132. Complex Analysis for Applications. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy/Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

**135A-135B. Ordinary Differential Equations. (4-4)** Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. **135A.** Basic procedures and techniques for solving differential equations; linearity, basis of solutions, variation of parameters, Green's function; systems of equations; constant coefficient equations, matrix differential equations, method of eigenvalues and eigenvectors. **135B.** Laplace transform method; existence and uniqueness results; series solutions at regular singular points; Sturm/Liouville problems, orthogonal series, eigenfunction expansions; two-dimensional autonomous systems, phase-plane analysis; stability and asymptotic behavior of solutions; selected applications.

**136. Partial Differential Equations. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Linear partial differential equations, boundary and initial value problems; wave equation, heat equation, and Laplace equation; separation of variables, eigenfunction expansions; selected topics, as method of characteristics for nonlinear equations.

### Applied Mathematics

**142. Mathematical Modeling. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor, such as physical sciences, biology, economics, and traffic dynamics.

**143. Analytic Mechanics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange equations; calculus of variations, variable mass; related topics in applied mathematics.

**146. Methods of Applied Mathematics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

**149. Mathematics of Computer Graphics. (4)** Lecture, three hours; discussion, one hour. Requisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

**151A-151B. Applied Numerical Methods. (4-4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, 115A, Program in Computing 3 or 10A. Introduction to numerical methods with emphasis on algorithms, analysis of algorithms, and computer implementation issues. Letter grading. **151A.** Solution of nonlinear equations. Numerical differentiation, integration, and interpolation. Direct methods for solving linear systems. **151B.** Numerical solution of differential equations. Approximation theory, iterative solutions of linear equations, solution of nonlinear systems, two-point boundary value problems, optimization.

**153. Numerical Methods for Partial Differential Equations. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 151A, 151B. Introduction to first- and second-order linear partial differential equations. Finite difference and finite element solution of elliptic, hyperbolic, and parabolic equations. Method of lines and Rayleigh/Ritz procedures. Concepts of stability and accuracy. Letter grading.

**157. Software Techniques for Scientific Computation. (4)** Lecture, three hours; discussion, one hour. Requisites: course 151A, Program in Computing 10C. Software structures, concepts, and conventions that support object-oriented programming. Identification of class structure, problem partitioning, and abstraction. Design and implementation of computer applications requiring scientific computation, visualization, and GUI components. Interlanguage interfacing. P/NP or letter grading.

**164. Linear Programming. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Electrical Engineering 136. Principles of linear programming, duality theorem, simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

**167. Game Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Games in extensive form, strategic equilibrium, matrix games and minimax theorem, cooperative and noncooperative solutions of bimatrix games and Lemke/Howson algorithm. Possible additional topics include combinatorial games, stochastic games, coalitional games and the core, marriage problem, and cost allocation. P/NP or letter grading.

## Probability

**170A. Probability Theory. (4)** (Formerly numbered M170A.) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Not open to students with credit for Electrical Engineering 131A or Statistics 100A. Probability distributions, random variables and vectors, expectation. P/NP or letter grading.

**170B. Probability Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 170A or Statistics 100A. Convergence in distribution, normal approximation, laws of large numbers, Poisson processes, random walks. P/NP or letter grading.

**171. Stochastic Processes. (4)** Lecture, three hours; discussion, one hour. Requisite: course 170A or Statistics 100A. Discrete Markov chains, continuous-time Markov chains, renewal theory. P/NP or letter grading.

**172A-172B. Actuarial Mathematics. (4-4)** Lecture, four hours. Letter grading. **172A.** Requisite: course 170A or Statistics 100A or 110A. Annuities, amortization, life annuities, pension applications. **172B.** Requisite: course 172A. Multiple life functions, applications to life insurance, pensions, and health insurance.

**181. Mathematics of Finance. (4)** Lecture, three hours; discussion, one hour. Requisites: course 33A, Economics 11, and Statistics 110A or equivalent background in calculus-based probability. Modeling, mathematics, and computation for financial securities. Price of risk. Random walk models for stocks and interest rates. No-arbitrage theory for pricing derivative securities; Black/Scholes theory. European and American options. Monte Carlo, trees, finite difference methods. P/NP or letter grading.

## Special Studies

**190. Honors Mathematics Seminar. (4)** Seminar, three hours. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

**192. Problem Solving. (4)** Lecture, three hours; discussion, one hour. Requisite: course 33B with a grade of C- or better. Problem-solving techniques and mathematical topics useful as preparation for Putnam Examination and similar competitions. Continued fractions, inequalities, modular arithmetic, closed form evaluation of sums and products, problems in geometry, rational functions and polynomials, other nonroutine problems. Participants expected to take Putnam Examination. Letter grading.

**197. Advanced Topics in Mathematics. (4)** Lecture, three hours. Variable topics course in mathematics that covers material not covered in regular mathematics upper division curriculum. P/NP or letter grading.

**199. Special Studies in Mathematics. (1 to 4)** At discretion of chair and subject to availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward upper division courses required for a major offered by Mathematics Department.

## Graduate Courses

### Teacher Preparation

**201A-201B-201C. Topics in Algebra and Analysis. (4-4-4)** Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

**202A-202B. Mathematical Models and Applications. (4-4)** Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

## Number Theory

**205A-205B-205C. Number Theory. (4-4-4)** Lecture, three hours. Requisites: courses 210A, 246A. Algebraic number theory, including ideal theory, valuations, local fields, cyclotomic fields. Introduction to class-field theory, analytic number theory, L-functions and class number formulas, and modular forms. S/U or letter grading.

**206A-206B. Combinatorial Theory. (4-4)** Generating functions. Probabilistic methods. Polya theorem. Enumerative graph theory. Partition theory. Number theoretical applications. Structure of graphs, matching theory, duality theorems. Packings, pavings, coverings, statistical designs, difference sets, triple systems, finite planes. Configurations, polyhedra. Ramsey theory, finite and transfinite, and applications.

**207A-207B-207C. Topics in Number Theory. (4-4-4)** Lecture, three hours. Requisites: courses 205A, 205B, 205C. Adelic analysis on  $GL(1)$  and  $GL(2)$ , especially Tate thesis and Hecke theory, automorphic representations. Special values of L-functions and p-adic L-functions, arithmetic theory of modular forms, advanced topics in analytic number theory. Arithmetic geometry, especially of modular curves. S/U or letter grading.

**208A-208B. Topics in Applied Number Theory. (4-4)** Lecture, three hours. Basic number theory, including congruences and prime numbers. Cryptography: public-key and discrete log cryptosystems. Attacks on cryptosystems. Primality testing and factorization methods. Elliptic curve methods. Topics from coding theory: Hamming codes, cyclic codes, Gilbert/Varshamov bounds, Shannon theorem. S/U or letter grading.

## Algebra

**210A-210B-210C. Algebra. (4-4-4)** Requisites: courses 110A, 110B, 110C. Students with credit for courses 110B and/or 110C cannot receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

**211. Structure of Rings. (4)** Requisite: course 210A. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

**212. Homological Algebra. (4)** Requisite: course 210A. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

**213A-213B. Theory of Groups. (4-4)** Requisite: course 210A. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

**214A-214B. Introduction to Algebraic Geometry. (4-4)** Requisite: course 210A. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

**215A-215B. Commutative Algebra. (4-4)** Requisite: course 210A. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

**216. Further Topics in Algebraic Geometry. (4)** Requisites: courses 214A, 214B. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

**M217. Geometry and Physics. (4)** (Same as Physics M236.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

## Logic and Foundations

**220A-220B-220C. Mathematical Logic and Set Theory. (4-4-4)** Lecture, three hours. Requisite: course M112. Model theory: compactness theorem; Lowenheim/Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: thesis of Church; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo/Fraenkel and von Neumann/Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing. S/U or letter grading.

**222A-222B. Lattice Theory and Algebraic Systems. (4-4)** Lecture, three hours. Requisite: course 210A. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

**223A. Model Theory. (4)** Requisites: courses 220A, 220B, 220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

**223B. Set Theory. (4)** Requisites: courses 220A, 220B, 220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

**223C. Recursion Theory. (4)** Requisites: courses 220A, 220B, 220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

**223D. Descriptive Set Theory. (4)** Requisites: courses 220A, 220B, 220C. Classical descriptive set theory: Borel and projective sets. Effective descriptive set theory. Consequences of strong set-theoretic hypotheses.

## Geometry and Topology

**225A. Differentiable Manifolds. (4)** Lecture, three hours. Requisites: courses 121, 131A, 131B. Smooth manifolds and maps, basic examples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius theorem, Lie derivative, tensors, differential forms and exterior derivative, Stokes theorem on manifolds.

**225B. Introduction to Algebraic Topology. (4)** Lecture, three hours. Requisite: course 225A. Elementary concepts of homotopy theory; covering spaces and fundamental group. Singular homology theory, axioms of homology, Mayer/Vietoris sequence, calculation of homology of standard spaces, applications, Betti numbers and Euler characteristic, cell complexes and cellular homology.

**225C. Further Topics in Geometry and Topology. (4)** Lecture, three hours. Requisites: courses 225A, 225B. Topics may include cohomology (singular, cellular, de Rham), duality theorems, de Rham theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

**226A-226B-226C. Differential Geometry. (4-4-4)** Lecture, three hours. Requisite: course 225A. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

**227A-227B. Algebraic Topology. (4-4)** Lecture, three hours. Requisite: course 225B. CW complexes, fiber bundles, homotopy theory, cohomology theory, spectral sequences.

**229A-229B-229C. Lie Groups and Lie Algebras. (4-4-4)** Preparation: knowledge of basic theory of topological groups and differentiable manifolds. Lie groups, Lie algebras, subgroups, subalgebras. Exponential map. Universal enveloping algebra. Campbell/Hausdorff formula. Nilpotent and solvable Lie algebras. Cohomology of Lie algebras. Theorems of Weyl, Levi-Mal'cev. Semi-simple Lie algebras. Classification of simple Lie algebras. Representations. Compact groups. Weyl character formula.

**233. Partial Differential Equations on Manifolds. (4)** Lecture, three hours. Requisites: courses 226A, 251A. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green's function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang/Mills equation, Monge/Ampere equations.

**234. Topics in Differential Geometry. (4)** Lecture, three hours. Requisites: courses 226A, 226B. Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

**235. Topics in Manifold Theory. (4)** Lecture, three hours. Requisites: courses 225A, 225B. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

**236. Topics in Geometric Topology. (4)** Lecture, three hours. Requisites: courses 225A, 225B. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

**237. Topics in Algebraic Topology. (4)** Lecture, three hours. Requisites: courses 227A, 227B. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

**238A-238B. Dynamical Systems. (4-4)** Lecture, three hours. Recommended preparation: first-year analysis courses. Topics include qualitative theory of differential equations, bifurcation theory, and Hamiltonian systems; differential dynamics, including hyperbolic theory and quasiperiodic dynamics; ergodic theory; low-dimensional dynamics. S/U or letter grading.

## Analysis and Differential Equations

**240. Methods of Set Theory. (4)** Lecture, three hours. Requisites: courses 110A, 110B, 121, 131A, 131B. Naive, axiomatic set theory, axiom of choice and its equivalents, well-orderings, transfinite induction, ordinal and cardinal arithmetic. Applications to algebra: Hamel bases, Stone representation theorem. Applications to analysis and topology: Cantor/Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet theorem.

**245A-245B-245C. Real Analysis. (4-4-4)** Lecture, three hours. Requisites: courses 121, 131A, 131B. Basic measure theory. Measure theory on locally compact spaces. Fubini theorem. Elementary aspects of Banach and Hilbert spaces and linear operators. Function spaces. Radon/Nikodym theorem. Fourier transform and Plancherel on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ .

**246A-246B-246C. Complex Analysis. (4-4-4)** Requisites: courses 131A, 131B. Students with credit for course 132 cannot receive M.A. degree credit for course 246A. Cauchy/Riemann equations. Cauchy theorem. Cauchy integral formula and residue calculus. Power series. Normal families. Harmonic functions. Linear fractional transformations. Conformal mappings. Analytic continuation. Examples of Riemann surfaces. Infinite products. Partial fractions. Classical transcendental functions. Elliptic functions.

**247A-247B. Classical Fourier Analysis. (4-4)** Lecture, three hours. Requisites: courses 245A, 245B, 246A. Distribution on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ . Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on  $\mathbb{R}^n$ . Distributions with compact or one-sided support and their complex Fourier transforms.

**250A. Ordinary Differential Equations. (4)** Requisite: course 246A. Basic theory of ordinary differential equations. Existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and nth order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

**250B. Nonlinear Ordinary Differential Equations. (4)** Requisite: course 250A. Asymptotic behavior of nonlinear systems. Stability. Existence of periodic solutions. Perturbation theory of two-dimensional real autonomous systems. Poincaré/Bendixson theory.

**250C. Advanced Topics in Ordinary Differential Equations. (4)** Requisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

**251A. Introductory Partial Differential Equations. (4)** Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, properties of harmonic functions. Classification of second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

**251B-251C. Topics in Partial Differential Equations. (4-4)** In-depth introduction to topics of current interest in partial differential equations or their applications.

**252A-252B. Topics in Complex Analysis. (4-4)** Lecture, three hours. Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; univalent functions; Riemann surfaces; extremal length, variational methods, quasi-conformal mappings. Topics vary from year to year. S/U or letter grading.

**253A-253B. Several Complex Variables. (4-4)** Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Introduction to analytic functions of several complex variables. The  $\bar{\partial}$  problem, Cousin problems, domains of holomorphy, complex manifolds.

**254A-254B. Topics in Real Analysis. (4-4)** Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

## Functional Analysis

**255A. Functional Analysis. (4)** Requisites: courses 245A and 245B, or 265A and 265B, and 246A. Banach spaces, basic principles. Weak topologies. Compact operators. Fredholm operators. Special spaces including Hilbert spaces and  $C(X)$ .

**255B-255C. Topics in Functional Analysis. (4-4)** Requisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semigroups of operators, linear topological vector spaces, and other related areas.

**256A-256B. Topological Groups and Their Representations. (4-4)** Lecture, three hours. Requisite: course 255A. Topological groups and their basic properties. Haar measure. Compact groups and their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups. S/U or letter grading.

**259A-259B. Operator Algebras in Hilbert Space. (4-4)** Requisites: courses 255A, 255B, 255C. Selected topics from theories of  $C^*$  and von Neumann algebras. Applications.

## Applied Mathematics

**260. Introduction to Applied Mathematics. (4)** Requisite: course 142. Construction, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

**M261. Game Theory. (4)** (Same as Economics M214B and Political Science M208A.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

**264. Applied Complex Analysis. (4)** Requisite: course 246A. Topics include contour integration conformal mapping, differential equations in complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

**265A-265B. Real Analysis for Applications. (4-4)** Requisites: courses 131A, 131B. Not open for credit to students with credit for courses 245A, 245B, 245C. Lebesgue measure and integration on real line, absolutely continuous functions, functions of bounded variation,  $L^2$ - and  $L^p$ -spaces. Fourier series. General measure and integrations, Fubini and Radon/Nikodym theorems, representation of functionals, Fourier integrals.

**266A. Applied Ordinary Differential Equations. (4)** Lecture, three hours. Requisites: courses 131A, 131B, 132, and 135A and 135B, or 146. Spectral theory of regular boundary value problems and examples of singular Sturm/Liouville problems, related integral equations, phase/plane analysis of nonlinear equations. S/U or letter grading.

**266B-266C. Applied Partial Differential Equations. (4-4)** Requisite: course 266A. Classification of equations, classical potential theory, Dirichlet and Neumann problems. Green's functions, spectral theory of Laplace equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

**266D-266E. Applied Differential Equations. (4-4)** Requisites: courses 266A, 266B, 266C. Advanced topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to fluid mechanics. Additional topics include dispersive waves, systems with multiple time scales, and applications to fluid mechanics.

**268A. Applied Functional Analysis. (4)** Lecture, three hours. Requisites: courses 115A, 115B, 131A, 131B, 132. Topics may include Hilbert spaces, distributions, Fourier transforms,  $L^2$ -space, the Laplacian, linear operators, spectrum and resolvent, self-adjoint and unitary operators, problems of evolution in Banach spaces, well-posed initial value problems, semigroups, applications to applied problems.

**268B-268C. Topics in Applied Functional Analysis. (4-4)** Requisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.

**269A-269B-269C. Advanced Numerical Analysis. (4-4-4)** Lecture, three hours. Requisites: courses 115A, 135A, 151A, 151B. Numerical solution for systems of ordinary differential equations; initial and boundary value problems. Numerical solution for elliptic, parabolic, and hyperbolic partial differential equations. Topics in computational linear algebra. S/U or letter grading.

**270A-270F. Mathematical Aspects of Scientific Computing. (4 each)** Lecture, three hours. Requisites: courses 115A, 151A, 151B, Program in Computing 10A. S/U or letter grading:

**270A.** Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

**270B-270C.** Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problem.

**270D-270E.** Computational Fluid Dynamics. Basic equations, finite difference, finite element, pseudo-spectral, and vortex methods; stability, accuracy, shock capturing, and boundary approximations.

**270F.** Parallel Numerical Algorithms. Requisites: courses 270B, 270C. Recommended: courses 270A, 270D, 270E. Design, analysis, and implementation of numerical algorithms on modern vector and parallel computers. Discussion of classical numerical algorithms and novel parallel algorithms. Emphasis on applications to PDEs.

**271A. Tensor Analysis. (4)** Requisite: course 131A. Algebra and calculus of tensors on  $n$ -dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

**271B. Analytical Mechanics. (4)** Preparation: prior knowledge of mechanics. Requisite: course 271A. Newtonian and Lagrangian equations. Hamilton principle. Principle of least action. Holonomic and nonholonomic systems. Hamilton canonical equations, contact transformations, applications.

**271C. Introduction to Relativity. (4)** Preparation: prior knowledge of mechanics. Requisite: course 271A. Restricted theory of relativity. Extensions to general theory. Relativistic theory of gravitation.

**271D. Wave Mechanics. (4)** General concepts of mechanical systems (states, space-time, "logics," etc.). Classical and quantum examples. Correspondence principle. Spinors.

**272A. Foundations of Continuum Mechanics. (4)** Lecture, three hours. Kinematic preliminaries, conservation laws for mass, momentum and energy, entropy production, constitutive laws. Linear elasticity, inviscid fluid, viscous fluid. Basic theorems of fluid mechanics. Simple solutions. Low Reynolds number flow, Stokes drag. High Reynolds number flow, boundary layers. Two-dimensional potential flow, simple aerofoil. Compressible flow, shocks.

**272B. Mathematical Aspects of Fluid Mechanics. (4)** Lecture, three hours. Requisite: course 272A. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions, flow created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

**272C. Magneto-hydrodynamics. (4)** Lecture, three hours. Requisite: course 272A. Basic electromagnetism. Steady flows, Hartmann layers. Alfvén theorem and waves. Compressible media. Magnetostatic equilibria and stability.

**272D. Rotating Fluids and Geophysical Fluid Dynamics. (4)** Lecture, three hours. Effects of Coriolis forces on fluid behavior. Inviscid flows, Taylor/Proudman theorem, Taylor columns, motions of bodies, inertial waves in spheres and spherical shells, Rossby waves. Ekman layers, spin-up. Shallow-water theory, wind-driven ocean circulation. Effects of stratification, Benard convection. Baroclinic instability, Eady model. S/U or letter grading.

**273. Optimization, Calculus of Variations, and Control Theory. (4)** Application of abstract mathematical theory to optimization problems of calculus of variations and control theory. Abstract nonlinear programming and applications to control systems described by ordinary differential equations, partial differential equations, and functional differential equations. Dynamic programming.

**274A. Asymptotic Methods. (4)** Lecture, three hours. Requisite: course 132. Fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems. S/U or letter grading.

**274B-274C. Perturbation Methods. (4-4)** Lecture, three hours. Requisite: course 266A. Boundary layer theory, matched asymptotic expansions, WKB theory. Problems with several time scales: Poincaré method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

## Probability and Statistics

**275A-275B. Probability Theory. (4-4)** Requisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

**275C. Stochastic Processes. (4)** Lecture, three hours. Requisite: course 275B. Brownian motion, continuous-time martingales, Markov processes, potential theory. S/U or letter grading.

**275D. Stochastic Calculus. (4)** Lecture, three hours. Requisite: course 275C. Stochastic integration, stochastic differential equations, Ito formula and its applications. S/U or letter grading.

**275E. Stochastic Particle Systems. (4)** Lecture, three hours. Requisite: course 275C. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading.

**278F. Structural Equation and Graphical Models. (4)** Lecture, three hours. Preparation: two quarters of graduate-level statistics, such as courses 276A and 276B or equivalent sequence in another department. Statistical and causal dependencies. Linear structural equations, latent variables, categorical variable models, multilevel structures, hierarchical sampling plans. Conditional, unconditional statistical theory. Causal diagrams, directed acyclic graphs, conditional-independence models for continuous, categorical, mixed data. Parameter estimation, identification, model testing, policy analysis.

**M282A-M282B. Applied Probability. (4-4)** (Formerly numbered 282A-282B.) (Same as Statistics M220A-M220B.) Lecture, three hours. Requisite: course 170A or Statistics 100A. S/U or letter grading. **M282A.** Conditioning, Markov chains, Poisson process, Brownian motion, stationary processes, applications. **M282B.** Simulation, renewal theory, martingale, and selected topics from queuing, reliability, speech recognition, computational biology, mathematical finance, epidemiology.

## Special Studies

**285A-285N. Seminars. (4 each)** Seminar, three hours. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading:

**285A.** History and Development of Mathematics.

**285B.** Number Theory.

**285C.** Algebra.

**285D.** Logic.

**285E.** Geometry.

**285F.** Topology.

**285G.** Analysis.

**285H.** Differential Equations.

**285I.** Functional Analysis.

**285J.** Applied Mathematics.

**285K.** Probability.

**285N.** Dynamical Systems.

**290. Seminar: Current Literature. (4)** Designed for Ph.D. students. Readings and presentations of papers in mathematical literature under supervision of a staff member.

**296A-296N. Participating Seminars. (1 to 4 each)** Seminars and discussion by staff and students. S/U grading:

**296A.** History and Development of Mathematics.

**296B.** Number Theory.

**296C.** Algebra.

**296D.** Logic.

**296E.** Geometry.

**296F.** Topology.

**296G.** Analysis.

**296H.** Differential Equations.

**296I.** Functional Analysis.

**296J.** Applied Mathematics.

**296K.** Probability.

**296M.** Mathematics.

**296N.** Dynamical Systems.

**330. Observation and Participation: Mathematics and Science Instruction. (1 to 2)** Seminar, one hour; classroom observation and participation, two hours. Observation, participation, or tutoring in mathematics and science classes at middle school and secondary levels. May be repeated for credit. P/NP (undergraduates) or S/U (graduates) grading.

**370A-370B. Teaching of Mathematics. (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 33B. Limited to senior Mathematics Department majors. Course 370A is requisite to 370B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from a problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Mathematics. (2)** Seminar, one hour; two-day intensive training at beginning of Fall Quarter. Required of all new teaching assistants and new Ph.D. students. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

**495B. Technology and Teaching. (2 to 4)** Seminar, two hours; laboratory, one hour (when scheduled). Requisite: course 495. Focus on undergraduate mathematics instruction. Web-based electronic communication, using technology for class organization, use of presentation software packages, and creation of electronic teaching portfolio. Provides mechanics of technology and forum for evaluation and comparison of technology in undergraduate mathematics teaching. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA department chair and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (8 units) may be applied toward M.A. degree unless departmental consent is obtained. S/U or letter grading.

**599. Research in Mathematics. (2 to 12)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Study and research for Ph.D. dissertation. May be repeated for credit. S/U grading.

## Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation, but who have no prior experience in computing.

Courses 10A, 10B, and 10C provide an extensive introduction to programming, using the C++ language. Courses 15, 20A, 20B, 30, 40, and 60 are of interest to Letters and Science majors who are completing a specialization in Computing or who are planning to take upper division coursework in computer science. These students should seek the advice of their major department.

## Lower Division Courses

### 1. Introduction to Computers and Computing.

**(4)** Lecture, three hours; laboratory, one hour. Not open for credit to students with credit for course 1S or 10A; may not be taken concurrently with course 1S or 10A. Fundamentals of computers and computing; editors, spreadsheets, file manager; machine organization and computer hardware; Internet; software applications. P/NP or letter grading.

### 1S. Software Tools for Information Management. (1)

Lecture, one hour; laboratory, two hours. Preparation: some familiarity with computers. Not open for credit to students with credit for course 1; may not be taken concurrently with course 1. May be taken by students with credit for more advanced courses. Introduction to spreadsheets and databases in a laboratory setting. P/NP grading.

**10A. Introduction to Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended requisite for students with no prior computing experience: course 1. Students with credit for former course 3 receive only 2 units of credit for this course. No prior programming experience assumed. Basic principles of programming, using C++; algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

**10B. Intermediate Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Abstract data types and their implementation using the C++ class mechanism; dynamic data structures, including linked lists, stacks, queues, trees, and hash tables; applications; object-oriented programming and software reuse; recursion; algorithms for sorting and searching.

**10C. Advanced Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. More advanced algorithms and data structuring techniques; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms.

**13. FORTRAN Programming with Numerical Methods. (5)** Lecture, three hours; discussion, two hours; laboratory, 10 hours. Enforced requisite: course 10A. Introduction to numerical methods in science and engineering with structured programming in FORTRAN 77 and later versions. Solution of linear and nonlinear equations, numerical integration, interpolation, and similar topics. Introduction to parallel and high-performance computing. P/NP or letter grading.

**15. Introduction to LISP and Symbolic Computation. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

**20A. Principles of Java Language with Applications. (5)** (Formerly numbered 20.) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. Introduction to Java computer language. Class and interface hierarchies; graphics components and graphical user interfaces; streams; multithreading; event and exception handling. Issues in class design and design of interactive Web pages. P/NP or letter grading.

**20B. Advanced Aspects of Java Language with Applications. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 20A. Further aspects of use of classes, graphics components, exception handling, multithreading, and multimedia. Additional topics may include networking, servlets, database connectivity, and JavaBeans. P/NP or letter grading.

**30. Machine Organization and Assembly Language Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, input/output (I/O) processing and interrupts.

**40. Programming for Internet and Multimedia. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. HTML, Perl language, programming for Common Gateway Interface (CGI), other scripting languages, XML and its derivatives, programming for multimedia. P/NP or letter grading.

**60. Data Structures and Algorithms. (4)** Lecture, three hours; discussion, one hour; laboratory, five hours. Enforced requisites: course 10B, Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching techniques. Corresponding algorithms.

**97. Special Topics in Programming. (1 to 4)** Lecture, one to three hours; discussion, zero to one hour. Enforced requisite: course 10A. Variable topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Upper Division Courses

**110. Parallel and Distributed Computing. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Requisite: course 10B or equivalent familiarity with programming in C or C++ language. Introduction to programming of parallel computers. Shared and distributed memory parallel architectures; currently available parallel machines; parallel algorithms and program development; estimation of algorithmic performance; distributed computing; selected advanced topics.

**197. Advanced Topics in Programming. (4)** Lecture, three hours; discussion, one hour. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Graduate Courses

**285C-285L. Seminars. (4 each)** Considered equivalent to Mathematics 285A through 285N for purposes of degree requirements. Topics in various computational fields by means of lectures and informal conferences with staff members. S/U or letter grading:

**285C.** Computational Algebra.

**285D.** Logic and Theory of Computation.

**285J.** Scientific Computation.

**285K.** Randomness and Computation.

**285L.** Computational Statistics.

**296. Participating Seminar: Logic and Theory of Computation. (1 to 4)** Seminar and discussion by staff and students. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

# MATHEMATICS/ ECONOMICS

*Interdepartmental Program  
College of Letters and Science*

UCLA  
6363 Math Sciences  
Box 951555  
Los Angeles, CA 90095-1555  
(310) 825-4701  
<http://www.math.ucla.edu/undergrad/mathecon.html>

Robert F. Brown, Ph.D., *Chair*  
**Faculty Advisory Committee  
Professors**

Kirby A. Baker, Ph.D. (*Mathematics*)  
Robert F. Brown, Ph.D. (*Mathematics*)  
Bryan C. Ellickson, Ph.D. (*Economics*)  
Jonathan D. Rogawski, Ph.D. (*Mathematics*)  
William R. Zame, Ph.D. (*Economics*)

## Scope and Objectives

In recent years economics has become increasingly dependent on mathematical methods, and the mathematical tools it employs have become more sophisticated. Mathematically competent economists, with bachelor's degrees and with advanced degrees, are needed in industry and government. Graduate programs in economics and finance programs in graduate schools of management require strong undergraduate preparation in mathematics for admission.

The Mathematics/Economics B.S. degree program is designed to give students a solid foundation in both mathematics and economics, stressing those areas of mathematics and statistics that are most relevant to economics and

the parts of economics that emphasize the use of mathematics and statistics.

## Undergraduate Study

### Mathematics/Economics B.S.

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

#### Transfer Students

To be admitted as Mathematics/Economics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus for majors, two principles of economics courses, one microeconomic theory course, and one C++ programming course.

#### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 164, 170A or Statistics 100A or 110A, Statistics 100B or 110B, and one course from Mathematics 110A through 199 and Statistics M120A, M120B; six economics courses, including Economics 101, 102, and four additional upper division courses, with at least three from 105AH, 105BH, and 142 through 148. The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the six courses from the Economics Department.

## Honors Program

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the preparation for the major courses with an overall grade-point average of 3.5 or better.

To qualify for honors at graduation, students must (1) complete Mathematics 110B or 131B, (2) prepare a senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 195H, and (4) complete the major requirements with at least a 3.5 GPA in the mathematics and economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

## Computing Specialization

Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major and (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, two courses from 10C, 15, 20, 30, 40, 60, and at least two courses from Mathematics 149 through 159, with a

minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Mathematics Department Student Services Office). Students graduate with a bachelor's degree in mathematics/economics and a specialization in Computing.

C.H. Chang, M.S., *Emeritus*  
Alexander Samson, Ph.D., *Emeritus*

### Adjunct Professors

Leslie M. Lackman, Ph.D.  
Frank E. Marble, Ph.D.  
Rudolph X. Meyer, Ph.D., *Emeritus*

## Scope and Objectives

The Mechanical and Aerospace Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curricula in aerospace engineering and mechanical engineering are offered on both the undergraduate and graduate levels. The Gorman Report ranked UCLA's mechanical engineering program tenth in the nation for undergraduate programs. The aerospace program is the only accredited aerospace program in the University of California system.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydraulics. Topics in the area of design, dynamics, and control include robotics, mechanism design, control and guidance of aircraft and spacecraft, helicopter dynamics and aeromechanics, and dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aeroelasticity of helicopters and jet engine blades, computational transonic aeroelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are under way on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbomachines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics, surface modification by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology; societal risk management; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, preliminary design, dynamics and control, or structures and space technology, while the latter includes opportunity to em-

phasize design and manufacturing, dynamics and control, or fluids and thermal engineering.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering and in Aerospace Engineering. An M.S. in Manufacturing Engineering is also offered.

## Undergraduate Study

### Aerospace Engineering B.S.

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

### The Major

Course requirements are as follows (190 minimum units required):

1. Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A
2. Twelve aerospace engineering core courses: Electrical Engineering 102, Mechanical and Aerospace Engineering 150A, 150B, 150P, 154A, 154B, 154S, 157A, 161A or 169A, 166A, 171A, and one mathematics elective from Mechanical and Aerospace Engineering 191A, 192B, 192C, Electrical Engineering 103, 131A
3. Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical and Aerospace Engineering 131A, 131AL, 132A, 133A, 133AL, 150C (heat and mass transfer, thermodynamics, combustion/propulsion); 153A (acoustics); 155, 163A, 164, 169A (unless taken as part of the core), Civil and Environmental Engineering 137L, Electrical Engineering 142 (dynamics and control); Mechanical and Aerospace Engineering 156B, 166C, 168, 193, Civil and Environmental Engineering 130F (structural and solid mechanics); Mechanical and Aerospace Engineering 150R, 161A (unless taken as part of the core), 161B, 161C, 161D

(space technology); 162A, 162C (design and mechanisms); Materials Science and Engineering 143A.

4. Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details

## Mechanical Engineering B.S.

The ABET-accredited mechanical engineering program is designed to provide basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with options in design and manufacturing, dynamics and control, and fluids and thermal engineering.

### The Major

Course requirements are as follows (192 minimum units required):

1. Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100 (also 110L — see item 2 below), Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A
2. Ten mechanical engineering core courses: Electrical Engineering 110L (may be taken concurrently with 100), Mechanical and Aerospace Engineering 131A, 133A, 156A, 162A, 162B, 162M, 169A, 171A, 193
3. Twenty technical elective units, to be selected from the three subject areas listed below, of which at least 12 units (including at least 4 laboratory units) should be from a single subject area:
  - a. *Design and Manufacturing*: Materials Science and Engineering 143A, Mathematics 120A, Mechanical and Aerospace Engineering CM140, 155, 163A, 164, 168, 174; laboratory courses: Mechanical and Aerospace Engineering 162C, 163C, 172, M180L, 194, 195
  - b. *Dynamics and Control*: Electrical Engineering 102, 103, 131A, 131B, Materials Science and Engineering 143A, Mathematics 115A, 115B, 131A, 131B, Mechanical and Aerospace Engineering CM140, 155, 156B, 163A, 164, 168, 174, 191A; laboratory courses: Civil and Environmental Engineering 130F, 137L, Mechanical and Aerospace Engineering 163C, 172
  - c. *Fluids and Thermal Engineering*: Electrical Engineering 103, Mechanical and Aerospace Engineering 132A, 134, 136, 150A, 150B, 150C, 150P, 150R, 153A, 161A, 161B, 174, 192B, 192C; laboratory

courses: Mechanical and Aerospace Engineering 131AL, 133AL, 157A

4. Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical and Aerospace Engineering 94; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) course requirements. See the College and Schools section of this catalog for details
6. Four free technical elective units selected from upper division courses offered by the department; students are strongly encouraged to consult their adviser

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Mechanical and Aerospace Engineering offers the Master of Science (M.S.) degree in Manufacturing Engineering, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Aerospace Engineering, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Mechanical Engineering.

## Admission

### Aerospace Engineering and Mechanical Engineering

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. and Ph.D. programs are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. However, exceptional students can be admitted to the Ph.D. program without having the M.S. degree. For additional information, see <http://www.mae.ucla.edu/admission/admission.html>.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

## Manufacturing Engineering

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Applicants are encouraged to apply online. Application forms, including a departmental supplement to the application, may be found at <http://www.mae.ucla.edu/> or by writing to the Mechanical and Aerospace Engineering Department, 48-121 Engineering IV, UCLA, Box 951597, Los Angeles, CA 90095-1597 or to the Office of the Associate Dean for Academic and Student Affairs, Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601.

## Master's Degrees

### Aerospace Engineering and Mechanical Engineering

Major fields include dynamics; fluid mechanics; heat and mass transfer; microelectromechanical systems (MEMS); structural and solid mechanics; systems and control.

The M.S. degree is offered through the comprehensive examination and thesis plans. The comprehensive examination may include an oral component and, in consultation with the adviser and the major field chair, students may elect to take the first part of the Ph.D. written qualifying examination as the comprehensive examination.

At least nine courses are required, five of which must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The courses should be selected so that the breadth requirements and the requirements at the graduate level are met. The breadth requirements are only applicable to students who do not have a B.S. degree from an ABET-accredited aerospace or mechanical engineering program. Specific course information, including breadth and other course requirements for each area, are outlined in *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and departmental material.

### Manufacturing Engineering

The M.S. degree is offered through the comprehensive examination and thesis plans. The comprehensive examination may include an oral component.

At least nine courses are required, five of which must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200

series. Specific course information is outlined in *Program Requirements for UCLA Graduate Degrees*, the school's *Announcement*, and departmental material.

## Doctoral Degrees

### Aerospace Engineering and Mechanical Engineering

Major fields include dynamics; fluid mechanics; heat and mass transfer; manufacturing and design (mechanical engineering only); microelectromechanical systems (MEMS); structural and solid mechanics; systems and control.

Ph.D. students may propose ad hoc major fields, which must differ substantially from established major fields and satisfy one of the following two conditions: (1) the field is interdisciplinary in nature and (2) the field represents an important research area for which there is no established major field in the department. This condition most often applies to recently evolving research areas or to areas for which there are too few faculty to maintain an established major field.

Students in an ad hoc major field must be sponsored by at least three faculty members, at least two of whom must be from the department.

The basic program of study for the Ph.D. degree is built around major and minor fields. The established major fields are listed above, and there is a detailed syllabus describing each Ph.D. major field.

The program of study for the Ph.D. requires students to perform original research leading to a doctoral dissertation and to master a body of knowledge that encompasses material from their major field and breadth material from outside the major field. The body of knowledge should include (1) six courses in the major field, four of which must be graduate courses, (2) one minor field, (3) any three additional courses, two of which must be graduate courses, that enhance the study of the major or minor field.

The major field syllabus advises students as to which courses contain the required knowledge, and students usually prepare for the written qualifying examination by taking these courses. However, students can acquire such knowledge by taking similar courses at other universities or even by self-study.

The minor field embraces a body of knowledge equivalent to three courses, two of which must be graduate courses. Minor fields are often subsets of major fields, and minor field requirements are then described in the syllabus of the appropriate major field. Established minor fields with no corresponding major field can also be used, such as applied mathematics and applied plasma physics and fusion engineering. Also, an ad hoc field can be used in exceptional circumstances, such as when certain knowledge is desirable for a program of study that is not available in established minor fields. If students fail to satisfy the minor field

requirements through coursework, a minor field examination may be taken.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in *Program Requirements for UCLA Graduate Degrees*.

Written and oral qualifying examinations are required. After mastering the body of knowledge defined in the major field and completing a proposal, students take a written qualifying examination covering this knowledge. Students in an ad hoc major field must pass a written qualifying examination that is equivalent to the written qualifying examination for an established major field.

Following successful completion of the written qualifying examination, students take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but include a review of the dissertation prospectus and may include a broad inquiry into the student's preparation for research.

## Mechanical and Aerospace Engineering

### Lower Division Courses

**20. FORTRAN Programming with Numerical Methods Applications. (4)** Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Mathematics 31A, 31B. Introduction to programming with FORTRAN. Applications to numerical methods used in engineering; concepts of probability and statistics. Letter grading.

**94. Introduction to Computer-Aided Design and Drafting. (4)** Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects. Letter grading.

### Upper Division Courses

**102. Mechanics of Particles and Rigid Bodies. (4)** Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Mathematics 33A, Physics 1A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse/momentum and work/energy relationships. Applications. Letter grading.

**103. Elementary Fluid Mechanics. (4)** Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Mathematics 32B, 33A, Physics 1B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids. Letter grading.

**M105A. Introduction to Engineering Thermodynamics. (4)** (Same as Chemical Engineering M105A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20B, Mathematics 32B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

**105D. Transport Phenomena. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 103, Mathematics 32B, 33A, Physics 8B. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control. Letter grading.

**131A. Intermediate Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 105D, 192A. Steady conduction: two-sided, two-ended, tapered, and circular fins; buried cylinders, thick fins. Transient conduction: slabs, cylinders, products. Convection: transpiration, laminar pipe flow, film condensation, boundary layers, dimensional analysis, working correlation, surface radiation. Two-stream heat exchangers. Elements of thermal design. Letter grading.

**131AL. Thermodynamics and Heat Transfer Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 131A, 157. Experimental study of physical phenomenon and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena. Letter grading.

**132A. Mass Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Principles of mass transfer by diffusion and convection. Simultaneous heat and mass transfer. Analysis of evaporative and transpiration cooling, combustion, and catalysis. Mass exchangers, including automobile catalytic converters, precipitators, filters, scrubbers, humidifiers, and cooling towers. Letter grading.

**133A. Engineering Thermodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive fluid flow systems. Letter grading.

**133AL. Power Conversion Thermodynamics Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 133A, 157. Experimental study of power conversion and heat transfer systems using state-of-the-art plant process instrumentation and equipment. Experiments include studies of thermodynamic operating characteristics of an actual Brayton cycle, Rankine cycle, compressive refrigeration unit, and absorption refrigeration unit. Letter grading.

**134. Design and Operation of Thermal Hydraulic Power Systems. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: courses 133A, 133AL. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems. Letter grading.

**136. Thermal Hydraulic Design of Nuclear and Other Power Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Designed for seniors. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, overall plant design, steady state and transient operation. Letter grading.

**CM140. Introduction to Biomechanics. (4)** (Formerly numbered M140.) (Same as Biomedical Engineering CM140.) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Civil Engineering 108), 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM240. Letter grading.

**150A. Intermediate Fluid Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 20, 103, 192A. Basic equations governing fluid motion. Fundamental solutions of Navier/Stokes equations. Lubrication theory. Elementary potential flow theory. Boundary layers. Turbulent flow in pipes and boundary layers. Compressible flow: normal shocks, channel flow with friction or heat addition. Letter grading.

**150B. Aerodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, 150A. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils ( $C_l$ ,  $C_m$ ) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl/Meyer expansion. Linearized subsonic and supersonic flow around thin airfoils and wings. Wave drag. Transonic flow. Letter grading.

**150C. Combustion Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Chemical thermodynamics of ideal gas mixtures, premixed and diffusion flames, explosions and detonations, combustion chemistry, high explosives. Combustion processes in rocket, turbine, and internal combustion engines; heating applications. Letter grading.

**150P. Aircraft Propulsion Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 103, M105A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

**150R. Rocket Propulsion Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Rocket propulsion concepts, including chemical rockets (liquid, gas, and solid propellants), hybrid rocket engines, electric (ion, plasma) rockets, nuclear rockets, and solar-powered vehicles. Current issues in launch vehicle technologies. Letter grading.

**153A. Engineering Acoustics. (4)** Lecture, four hours; outside study, eight hours. Designed for junior/senior engineering majors. Fundamental course in acoustics; propagation of sound; sources of sound. Design of field measurements. Estimation of jet and blade noise with design aspects. Letter grading.

**154A. Preliminary Design of Aircraft. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of a low-speed aircraft. Letter grading.

**154B. Design of Aerospace Structures. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 154A, 166A. Design of aircraft, helicopter, spacecraft, and related structures. External loads, internal stresses. Applied theory of thin-walled structures. Material selection, design using composite materials. Design for fatigue prevention and structural optimization. Field trips to aerospace companies. Letter grading.

**154S. Flight Mechanics, Stability, and Control of Aircraft. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft. Effects of airplane flexibility on stability derivatives. Letter grading.

**155. Intermediate Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. Axioms of Newtonian mechanics, generalized coordinates, Lagrange equation, variational principles; central force motion; kinematics and dynamics of a rigid body. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinates, orthogonality relations. Letter grading.

**156A. Strength of Materials. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 192A, Civil Engineering 108. Concepts of stress, strain, and material behavior. Stresses in loaded beams with symmetric and asymmetric cross sections. Torsion of cylinders and thin-walled structures, shear flow. Stresses in pressure vessels, press-fit and shrink-fit problems, rotating shafts. Curved beams. Contact stresses. Strength and failure, plastic deformation, fatigue, elastic instability. Letter grading.

**156B. Introduction to Elasticity. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 156A, 192A. Kinematics of deformation, strain displacement relations. Balance laws, stress tensor, principal stresses, equilibrium equations. Conservation of energy, strain energy function. Generalized Hooke's law, thermoelasticity and viscoelasticity. Stress calculation in cylinders and spheres. Plane elasticity, Airy's stress function. Stress concentration problems at holes, corners, and crack tips. Letter grading.

**157. Basic Mechanical Engineering Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 103, M105A, 105D, Civil Engineering 108, Electrical Engineering 100. Methods of measurement of basic quantities and performance of basic experiments in heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis. Letter grading.

**157A. Fluid Mechanics and Aerodynamics Laboratory. (4)** Laboratory, eight hours. Requisites: courses 150A, 150B, 157. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in the field. Letter grading.

**161A. Introduction to Astronautics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. Recommended: course 192A. Space environment of Earth, trajectories and orbits, step rockets and staging, two-body problem, orbital transfer and rendezvous, problem of three bodies, elementary perturbation theory, influence of Earth's oblateness. Letter grading.

**161B. Introduction to Space Technology. (4)** Lecture, four hours; outside study, eight hours. Recommended preparation: courses 102, 105D, 150P, 161A. Propulsion requirements for typical space missions, thermochemistry of propellants, internal ballistics, regenerative cooling, liquid propellant feed systems, POGO instability. Electric propulsion. Multistage rockets, separation dynamics. Satellite structures and materials, loads and vibrations. Thermal control of spacecraft. Letter grading.

**161C. Spacecraft Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 161B. Coverage of preliminary design, by students, of a small spacecraft carrying a lightweight scientific payload with modest requirements for electric power, lifetime, and attitude stability. Students work in groups of three or four, with each student responsible primarily for a subsystem and for integration with the whole. Letter grading.

**161D. Space Technology Hardware Design. (4)** Lecture, two hours; laboratory, three hours; outside study, seven hours. Recommended requisite or corequisite: course 161B. Design, by students, of hardware with applications to space technology. Designs are then built by HSEAS professional machine shop and tested by the students. New project carried out each year. Letter grading.

**162A. Introduction to Mechanisms and Mechanical Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 20, 102. Analysis and synthesis of mechanisms and mechanical systems. Kinematics, dynamics, and mechanical advantages of machinery. Displacement velocity and acceleration analyses of linkages. Fundamental law of gearing and various gear trains. Computer-aided mechanism design and analysis. Letter grading.

**162B. Mechanical Product Design. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 94, 156A, 162A, 193, Electrical Engineering 110L. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project. Letter grading.

**162C. Electromechanical System Design Laboratory. (4)** Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite: course 162B. Laboratory and design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. Assembled machine is instrumented and monitored for operational characteristics. Letter grading.

**162M. Senior Mechanical Engineering Design. (4)** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 131A, 133A, 162B, 169A, 171A. Must be taken in last two academic terms of students' programs. Analytical course of a large engineering system. Design factors include functionality, efficiency, economy, safety, reliability, aesthetics, and social impact. Final report of engineering specifications and drawings to be presented by design teams. Letter grading.

**163A. Introduction to Computer-Controlled Machines. (4)** Lecture, four hours; outside study, eight hours. Requisite or corequisite: course 171A. Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall electromechanical systems. Motion and command generation, servo-controller design, and computer/machine interfacing. Letter grading.

**163C. Robotics and Motion Control Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisite: course 171A. Hands-on experience with robotic devices and articulated machines, with emphasis on motion planning and control. Design and implementation of servo control of DC motors, gear trains, multi-axis coordination, programming of industrial robots. Final project required. Letter grading.

**164. Digital Control of Physical Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical Engineering 141. Analysis and design of digital control systems. Discrete-time transfer functions for physical systems. Design using classical methods: performance specifications, frequency response, root locus; compensation. Design using state-space methods: control laws, estimators. Practical considerations: roundoff, sample rate selection, computer implementation. Letter grading.

**166A. Analysis of Flight Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: Civil Engineering 108. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections: shear flow, shear-lag; combined bending torsion of thin-walled, stiffened structures used in aerospace vehicles; elements of plate theory; buckling of columns. Letter grading.

**166C. Design of Composite Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites. Letter grading.

**168. Introduction to Finite Element Technology. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 20, Civil Engineering 108, Mathematics 33A. Recommended: courses 94 or 194, 166A. Introduction to finite element method (FEM) and its matrix formulation of computer implementation of FEM concepts; practical use of FEM codes. Pre-processing and postprocessing techniques; graphics display capabilities; geometric and analysis modeling; interactive engineering systems; links with computer-aided design. Recent trends in FEM technology; design optimization. Term projects using FEM computer codes. Letter grading.

**169A. Introduction to Mechanical Vibrations. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 102, 192A, Civil Engineering 108. Recommended: Electrical Engineering 102. Fundamentals of vibration theory and applications. Free, forced, and transient vibration of one and two degrees of freedom systems, including damping. Normal modes, coupling, and normal coordinates. Vibration isolation devices, vibrations of continuous systems. Letter grading.

**171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 191A or 192A or Electrical Engineering 102. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and other fields; transform methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Letter grading.

**172. Control System Design Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisite: course 171A. Application of frequency domain design techniques for control of mechanical systems. Successful controller design requires students to formulate performance measures for control problem, experimentally identify mechanical systems, and develop uncertainty descriptions for design models. Exploration of issues concerning model uncertainty and sensor/actuator placement. Students implement control designs on flexible structures, rate gyroscope, and inverted pendulum. Detailed reports required. Letter grading.

**174. Probability and Its Applications to Risk, Reliability, and Quality Control. (4)** Lecture, four hours; outside study, eight hours. Introduction to probability theory; random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress-strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling. Letter grading.

**M180L. Introduction to Micromachining and Microelectromechanical Systems Laboratory. (4)** (Formerly numbered 180.) (Same as Biomedical Engineering M150L and Electrical Engineering M150L.) Lecture, three hours; laboratory, four hours; outside study, five hours. Requisites: Electrical Engineering 1 or Physics 1C, Chemistry 20A. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce a variety of MEMS, including microstructures, microsensors, and microactuators. Students fabricate set of basic MEMS structures in hands-on microfabrication laboratory. Letter grading.

**191A. Complex Analysis and Integral Transforms. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 192A. Complex variables, analytic functions, conformal mapping, contour integrals, singularities, residues, Cauchy integrals; Laplace transform: properties, convolution, inversion; Fourier transform: properties, convolution, FFT, applications in dynamics, vibrations, structures, and heat conduction. Letter grading.

**192A. Mathematics of Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 33A, 33B. Methods of solving ordinary differential equations in engineering. Review of matrix algebra. Solutions of systems of first- and second-order ordinary differential equations. Introduction to Laplace transforms and their application to ordinary differential equations. Introduction to boundary value problems. Letter grading.

**192B. Mathematics of Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 192A. Analytical methods for solving partial differential equations arising in engineering. Separation of variables, eigenvalue problems, Sturm/Liouville theory. Development and use of special functions. Representation by means of orthonormal functions; Galerkin method. Use of Green's function and transform methods. Letter grading.

**192C. Numerical Methods for Engineering Applications. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 192A. Recommended: Electrical Engineering 103. Basic topics from numerical analysis having wide application in solution of practical engineering problems, computer arithmetic, and errors. Solution of linear and nonlinear systems. Algebraic eigenvalue problem. Least-square methods, numerical quadrature, and finite difference approximations. Numerical solution of initial and boundary value problems for ordinary and partial differential equations. Letter grading.

**193. Introduction to Manufacturing Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 14. Mechanical behavior of materials. Manufacturing properties of metals. Surfaces of materials. Metal cutting, deformation processes, and casting. Joining and fastening. Nonconventional material-removal processes. Polymers, ceramics, and composites. Letter grading.

**194. Introduction to Geometry Modeling. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 20, 94. Fundamentals in parametric curve and surface modeling, parametric spaces, blending functions, conics, splines and Bezier curve, coordinate transformations, algebraic and geometric form of surfaces, analytical properties of curve and surface, hands-on experience with CAD/CAM systems design and implementation. Letter grading.

**195. Computer Numerical Control and Applications. (4)** Laboratory, eight hours; outside study, four hours. Designed for juniors/seniors. Fundamentals of numerical control (NC) technology. Programming of computer numerical control (CNC) machines in NC codes and APT language and with CAD/CAM systems. NC postprocessors and distributed numerical control. Operation of CNC lathe and milling machines. Programming and machining of complex engineering parts. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

## Graduate Courses

**231A. Convective Heat Transfer Theory. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 192B. Recommended: course 250A. Conservation equations for flow of real fluids. Analysis of heat transfer in laminar and turbulent, incompressible and compressible flows. Internal and external flows; free convection. Variable wall temperature; effects of variable fluid properties. Analogies among convective transfer processes. Letter grading.

**231B. Radiation Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 105D. Radiative properties of materials and radiative energy transfer. Emphasis on fundamental concepts, including energy levels and electromagnetic waves as well as analytical methods for calculating radiative properties and radiation transfer in absorbing, emitting, and scattering media. Applications cover laser-material interactions in addition to traditional areas such as combustion and thermal insulation. Letter grading.

**231C. Boiling and Condensation. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Phenomenological theories of boiling. Hydrodynamic instability of liquid-vapor interfaces and their application to predict maximum and minimum heat fluxes. Forced flow boiling and boiling crisis in pipes. Pool and forced flow boiling of liquid metals. Film and dropwise condensation. Letter grading.

**231D. Application of Numerical Methods to Transport Phenomena. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 132A. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields. Letter grading.

**231E. Two-Phase Flow Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Generalized constitutive equations for various two-phase flow regimes. Interfacial heat and mass transfer. Equilibrium and nonequilibrium flow models. Two-phase flow instability. One-dimensional wave propagation. Two-phase heat transfer applications: convective boiling, pressure drop, critical and oscillatory flows. Letter grading.

**231F. Advanced Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 231A. Advanced topics in heat transfer from current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transport. Letter grading.

**231G. Microscopic Energy Transport. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 105D. Heat carriers (photons, electrons, phonons, molecules) and their energy characteristics, statistical properties of heat carriers, scattering and propagation of heat carriers, Boltzmann transport equations, derivation of classical laws from Boltzmann transport equations, deviation from classical laws at small scale. Letter grading.

**232B. Advanced Mass Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 132A. Formulation of general convective heat and mass transfer problem, including equilibrium and nonequilibrium chemistry. Similar and nonsimilar solutions for laminar flows; solution procedures for turbulent flows. Multicomponent diffusion. Application to hypersonic boundary layer, ablation and transpiration, cooling combustion. Letter grading.

**235A. Nuclear Reactor Theory. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 135, 192A. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory. Letter grading.

**M237B. Fusion Plasma Physics and Analysis. (4)** (Same as Electrical Engineering M287.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker/Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts. Letter grading.

**237D. Fusion Engineering and Design. (4)** Lecture, four hours; outside study, eight hours. Fusion reactions and fuel cycles. Principles of inertial and magnetic fusion. Plasma requirements for controlled fusion. Plasma-surface interactions. Fusion reactor concepts and technological components. Analysis and design of high heat flux components, energy conversion and tritium breeding components, radiation shielding, magnets, and heating. Letter grading.

**239B. Seminar: Current Topics in Transport Phenomena. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

**239D. Seminar: Current Topics in Nuclear Engineering. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

**239F. Special Topics in Transport Phenomena. (2 to 4)** Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change. S/U grading.

**239G. Special Topics in Nuclear Engineering. (2 to 4)** Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change. S/U grading.

**239H. Special Topics in Fusion Physics, Engineering, and Technology. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced treatment of subjects selected from research areas in fusion science and engineering, such as instabilities in burning plasmas, alternate fusion confinement concepts, inertial confinement fusion, fission-fusion hybrid systems, and fusion reactor safety. May be repeated for credit with topic change. S/U grading.

**CM240. Introduction to Biomechanics. (4)** (Same as Biomedical Engineering CM240.) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Civil Engineering 108), 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM140. Letter grading.

**250A. Foundations of Fluid Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Corequisite: course 192B. Development and application of fundamental principles of fluid mechanics at graduate level, with emphasis on incompressible flow. Flow kinematics, basic equations, constitutive relations, exact solutions on the Navier/Stokes equations, vorticity dynamics, decomposition of flow fields, potential flow. Letter grading.

**250B. Viscous and Turbulent Flows. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number; wakes, boundary layers, instability, transition, and turbulent shear flows. Letter grading.

**250C. Compressible Flows. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Effects of compressibility in viscous and inviscid flows. Steady and unsteady inviscid subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized and hypersonic); shock dynamics. Letter grading.

**250D. Computational Aerodynamics. (4)** Lecture, eight hours. Requisites: courses 150A, 150B, 192C. Introduction to useful methods for computation of aerodynamic flow fields. Coverage of potential, Euler, and Navier/Stokes equations for subsonic to hypersonic speeds. Letter grading.

**250E. Spectral Methods in Fluid Dynamics. (4)**

Lecture, four hours; outside study, eight hours. Requisites: courses 192A, 192B, 192C, 250A, 250B. Introduction to basic concepts and techniques of various spectral methods applied to solving partial differential equations. Particular emphasis on techniques of solving unsteady three-dimensional Navier/Stokes equations. Topics include spectral representation of functions, discrete Fourier transform, etc. Letter grading.

**250F. Hypersonic and High-Temperature Gas Dynamics. (4)** Lecture, four hours; outside study, eight hours. Recommended requisite: course 250C. Molecular and chemical description of equilibrium and nonequilibrium hypersonic and high-temperature gas flows, chemical thermodynamics and statistical thermodynamics for calculation gas properties, equilibrium flows of real gases, vibrational and chemical rate processes, nonequilibrium flows of real gases, and computational fluid dynamics methods for nonequilibrium hypersonic flows. Letter grading.

**251A. Stratified and Rotating Fluids. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamentals of fluid flows with density variations or rotation, illustrated by examples with environmental, geophysical, or technical importance. Linear and finite amplitude wave motion. Flow past bodies; blocking phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents. Letter grading.

**252A. Stability of Fluid Motion. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. Letter grading.

**252B. Statistical Theory of Turbulence. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include stochastic processes, kinematics of turbulence, energy decay. Kolmogorov similarity, analytical theories, and origins of Reynolds stress. Letter grading.

**252C. Fluid Mechanics of Combustion Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Recommended: course 250C. Review of fluid mechanics and chemical thermodynamics applied to reactive systems, laminar diffusion flames, premixed laminar flames, stability, ignition, turbulent combustion, supersonic combustion. Letter grading.

**252D. Combustion Rate Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 252C. Basic concepts in chemical kinetics: molecular collisions, distribution functions and averaging, semiempirical and ab initio potential surfaces, trajectory calculations, statistical reaction rate theories. Practical examples of large-scale chain mechanisms from combustion chemistry of several elements, etc. Letter grading.

**253A. Advanced Engineering Acoustics. (4)** Lecture, four hours; outside study, eight hours. Advanced studies in engineering acoustics, including three-dimensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. Letter grading.

**253B. Fundamentals of Aeroacoustics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Detailed discussion of plane waves, point sources. Nonlinearity, layered and moving media, multiple reflections. Inhomogeneous wave equation. Monopole, dipole, quadrupole source fields from scattering inhomogeneities and turbulence; Lighthill theory; moving sources. Similarity methods. Selected detailed applications. Letter grading.

**254A. Special Topics in Aerodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B, 192A, 192B, 192C. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. Letter grading.

**255A. Advanced Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 155, 169A. Variational principles and Lagrange equations. Kinematics and dynamics of rigid bodies; precession and nutation of spinning bodies. Letter grading.

**255B. Mathematical Methods in Dynamics. (4)**

Lecture, four hours; outside study, eight hours. Requisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Liapunov direct method; the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems. Letter grading.

**256A. Mechanics of Deformable Solids. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 156B, 166A. Kinematics of deformation, strain, tensors, invariance, compatibility; conservation laws; stress tensors; equations of motion; boundary conditions; constitutive equations: general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems. Letter grading.

**M256B. Elasticity. (4)** (Same as Civil Engineering M230.) Lecture, four hours; outside study, eight hours. Requisite: course 256A. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy's stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Letter grading.

**M256C. Plasticity. (4)** (Same as Civil Engineering M239.) Lecture, four hours; outside study, eight hours. Requisites: courses 256A, M256B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity. Perzyna and Duvant/Lions types of viscoplasticity. Thermoplasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations. Letter grading.

**256F. Analytical Fracture Mechanics. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 156A, 156B, or 166A, and Materials Science 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells. Letter grading.

**M257A. Elastodynamics. (4)** (Same as Earth and Space Sciences M224A.) Lecture, four hours; outside study, eight hours. Requisites: courses 256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes. Letter grading.

**258. Experimental Techniques in Fluid Mechanics and Thermal Science. (4)** Lecture, four hours; outside study, eight hours. Survey of wind tunnels and other facilities for research in fluid mechanics, aerodynamics, and heat transfer; analysis of their critical design features. Modern sensors, instruments, and measurement techniques. Signal processing and storage by analog and digital methods. Letter grading.

**259A. Seminar: Advanced Topics in Fluid Mechanics. (4)** Seminar, four hours; outside study, eight hours. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers). Letter grading.

**259B. Seminar: Advanced Topics in Solid Mechanics. (4)** Seminar, four hours; outside study, eight hours. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids. Letter grading.

**260. Current Topics in Mechanical Engineering. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U grading.

**261A. Energy and Variational Principles in Structural Mechanics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 156A or 156B or 166A. Theory of linear elasticity. Calculus of variations. Principles of minimum potential energy and complementary energy. Stationary variational principles. Energy theorems. Matrix methods of structural analysis, with application to truss and frame problems. Variational principles as basis of finite element methods. Letter grading.

**261B. Methods of Computational Mechanics I. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 168, 261A. Weighted residual methods, weak forms, local trial and test functions, primal finite element method, multifield finite elements, high-performance elements and avoidance of locking, integral equation and field boundary element methods, finite volume methods, meshless methods, term projects using digital computers. Applications to aerospace and mechanical engineering structural and solid mechanics, incompressible fluid flow, and heat transfer. Letter grading.

**262. Mechanics of Intelligent Material Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 156B. Recommended: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber-optic sensor technology. Micro/macro analysis, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, inch-worm, and bimorph. Letter grading.

**263A. Electromechanics of Computer-Controlled Machines. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 171A. Recommended: courses 163A, 163B, 163C. Mechanics and control problems of computer-controlled electromechanical systems, with special emphasis on analysis of energy flow between mechanical, electrical, and control components when applied to electromagnetic and piezoelectric actuators and control systems with mechanical flexibilities. Letter grading.

**263B. Spacecraft Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 255A. Recommended: course 255B. Modeling, dynamics, and stability of spacecraft; spinning and dual-spin spacecraft dynamics; spinup through resonance, spinning rocket dynamics; environmental torques in space, modeling and model reduction of flexible space structures. Letter grading.

**263C. Mechanics and Trajectory Planning of Industrial Robots. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 163A. Theory and implementation of industrial robots. Design considerations. Kinematic structure modeling, trajectory planning, and system dynamics. Differential motion and static forces. Individual student study projects. Letter grading.

**263D. Advanced Robotics. (4)** Lecture, four hours; outside study, eight hours. Recommended preparation: courses 155, 163C, 171A, 263C. Motion planning and control of articulated dynamic systems: nonlinear joint control, experiments in joint control and multi-axis coordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and manipulator design, kinematic redundancies, motion planning of manipulators in space, obstacle avoidance. Letter grading.

**M267A. Optimum Structural Design. (4)** (Same as Civil Engineering M240.) Lecture, four hours; outside study, eight hours. Requisite: course 261A or Civil Engineering 235A. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. Letter grading.

**268B. Failure of Structural Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: Civil Engineering 135B. Exploration of a current area of research in depth. Letter grading.

**M269A. Dynamics of Structures. (4)** (Same as Civil Engineering M237A.) Lecture, four hours; outside study, eight hours. Requisite: course 169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. Letter grading.

**269B. Advanced Dynamics of Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M269A. Analysis of linear and nonlinear response of structures to dynamic loadings. Stresses and deflections in structures. Structural damping and self-induced vibrations. Letter grading.

**269D. Aeroelastic Effects in Structures. (4)**

Lecture, four hours; outside study, eight hours. Requisite: course M269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, buildings, and other structures. Derivation of aeroelastic operators and unsteady airloads from governing variational principles. Flow induced instability and response of structural systems. Letter grading.

**M270A. Linear Dynamic Systems. (4)** (Formerly numbered 270A.) (Same as Chemical Engineering M280A and Electrical Engineering M240A.) Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical Engineering 141. State-space description of linear time-invariant (LT) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

**270B. Linear Optimal Control. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M270A or Electrical Engineering M240A. Existence and uniqueness of solutions to linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control; algebraic and differential Riccati equations; implications of controllability, stabilizability, observability, and detectability solutions. Letter grading.

**M270C. Optimal Control. (4)** (Formerly numbered 270C.) (Same as Chemical Engineering M280C and Electrical Engineering M240C.) Lecture, four hours; outside study, eight hours. Requisite: course 270B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

**271A. Stochastic Processes in Dynamical Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 171A, 174. Probability space, random variables, stochastic processes, Brownian motion, Markov processes, stochastic integrals and differential equations, power spectral density, and Kolmogorov equations. Letter grading.

**271B. Stochastic Estimation. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators. Letter grading.

**271C. Stochastic Optimal Control. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271B. Stochastic dynamic programming, certainty equivalence principle, separation theorem, information statistics; linear-quadratic-Gaussian problem, linear-exponential-Gaussian problem. Relationship between stochastic control and robust control. Letter grading.

**271D. Seminar: Special Topics in Dynamic Systems Control. (4)** Seminar, four hours; outside study, eight hours. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc. Letter grading.

**M272A. Nonlinear Dynamic Systems. (4)** (Same as Chemical Engineering M282A and Electrical Engineering M242A.) Lecture, four hours; outside study, eight hours. Requisite: course M270A or Chemical Engineering M280A or Electrical Engineering M240A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

**273A. Robust Control System Analysis and Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 171A, M270A. Graduate-level introduction to analysis and design of multivariable control systems. Multivariable loop-shaping, performance requirements, model uncertainty representations, and robustness covered in detail from frequency domain perspective. Structured singular value and its application to controller synthesis. Letter grading.

**275A. System Identification. (4)** Lecture, four hours; outside study, eight hours. Methods for identification of dynamical systems from input/output data, with emphasis on identification of discrete-time (digital) models of sampled-data systems. Coverage of conversion to continuous-time models. Models identified include transfer functions and state-space models. Discussion of applications in mechanical and aerospace engineering, including identification of flexible structures, microelectromechanical systems (MEMS) devices, and acoustic ducts. Letter grading.

**M280. Microelectromechanical Systems (MEMS) Fabrication. (4)** (Formerly numbered 280.) (Same as Biomedical Engineering M250A and Electrical Engineering M250A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M180L. Advanced discussion of micromachining processes used to construct MEMS. Coverage of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

**280L. Microelectromechanical Systems (MEMS) Laboratory. (4)** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisite: course 180. Hands-on micromachining. Mask layout, clean room procedure, lithography, oxidation, LPCVD coatings, evaporation, wet etchings (both isotropic and anisotropic), dry etchings, process monitoring. Students fabricate simple micromechanical devices by both surface and bulk micromachining and test and characterize them. Letter grading.

**281. Microsciences. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control of micro devices. Letter grading.

**M282. Microelectromechanical Systems (MEMS) Device Physics and Design. (4)** (Same as Biomedical Engineering M250B and Electrical Engineering M250B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M280. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

**283. Experimental Mechanics for Microelectromechanical Systems (MEMS). (4)** Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/material properties, mechanical characterization. Topics include fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/fracture/fatigue) as they relate to microscale. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

**284. Sensors, Actuators, and Signal Processing. (4)** Lecture, four hours; outside study, eight hours. Principles and performance of micro transducers. Applications of using unique properties of micro transducers for distributed and real-time control of engineering problems. Associated signal processing requirements for these applications. Letter grading.

**286. Molecular Dynamics Simulation. (4)** (Formerly numbered 282.) Lecture, four hours; outside study, eight hours. Preparation: computer programming experience. Requisites: courses 192A, 192C. Introduction to basic concepts and methodologies of molecular dynamics simulation. Advantages and disadvantages of this approach for various situations. Emphasis on systems of engineering interest, especially microscale fluid mechanics, heat transfer, and solid mechanics problems. Letter grading.

**287. Advanced Microelectromechanical Systems (MEMS). (4)** Lecture, four hours; outside study, eight hours. Requisite: course M280 or Electrical Engineering M250A. Silicon micromachining, nonsilicon micromachining, nonlithographic processes. Mechanical issues of MEMS structures. Driving mechanisms for microactuators, including electrostatic, electromagnetic, thermal, and fluidic actuation. Applications to mechanical and aerospace areas. Studies of MEMS products and state-of-the-art research. Letter grading.

**M291A. Analytical Methods of Engineering I. (4)** (Same as Electrical Engineering M208A.) Lecture, four hours; outside study, eight hours. Requisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L_2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering. Letter grading.

**M291B. Analytical Methods of Engineering II. (4)** (Same as Electrical Engineering M208B.) Lecture, four hours; outside study, eight hours. Requisite: course M291A or Electrical Engineering M208A. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems. Letter grading.

**291C. Integral Equations in Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mathematics 250B. Introduction to generalized function theory and Green's functions. Conversion of partial equations to integral equations and classification of integral equations. Solution to integral equations with degenerate kernels; discussions of successive approximations and Fredholm and Hilbert/Schmidt theory. Letter grading.

**293. Quality Engineering in Design and Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 174. Quality engineering concepts and approaches. Taguchi methods of robust technology development and off-line control. Quality loss function, signal-to-noise ratio, and orthogonal arrays. Parametric design of products and production processes. Tolerance design. Online quality control systems. Decision making in quality engineering. Letter grading.

**294. Computational Geometry for Design and Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 194. Computational geometry for design and manufacturing, with special emphasis on curve and surface theory, geometric modeling of curves and surfaces, B-splines and NURBS, composite curves and surfaces, computing methods for surface design and manufacture, and current research topics in computational geometry for CAD/CAM systems. Letter grading.

**295. Computer-Aided Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Preparation: one course from 163A, 163C, 195. Requisite: course 94. Concepts, methods, and elements of computer-aided manufacturing. Planning and control of manufacturing systems. Group technology and computer-aided process planning. Design and modeling of flexible manufacturing systems. Computer-aided manufacturing. Letter grading.

**296A. Damage and Failure of Materials in Mechanical Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 156A, Materials Science 143A. Role of failure prevention in mechanical design and case studies. Mechanics and physics of material imperfections: voids, dislocations, cracks, and inclusions. Statistical and deterministic design methods. Plastic, fatigue, and creep damage. Letter grading.

**296B. Thermochemical Processing of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 193. Thermodynamics, heat and mass transfer, principles of material processing: phase equilibria and transitions, transport mechanisms of heat and mass, moving interfaces and heat sources, natural convection, nucleation and growth of microstructure, etc. Applications with chemical vapor deposition, infiltration, etc. Letter grading.

**297. Composites Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 166C, Materials Science 151. Matrix materials, fibers, fiber preforms, elements of processing, autoclave/compression molding, filament winding, pultrusion, resin transfer molding, automation, material removal and assembly, metal and ceramic matrix composites, quality assurance. Letter grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate mechanical and aerospace engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**474B. Concurrent Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 474A. Product design, CAD/CAM, engineering analysis integration, project management. Letter grading.

**474C. Total Quality Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 474B. Total quality management, statistics, probability, off-line quality control, online quality control, quality inspection. Letter grading.

**475B. Automation. (4)** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 475A. Automatic control of single devices and processes for manufacturing automation. Integrated automation design. Introduction to control, digital control, and rule-based systems. Sensors and actuators used in manufacturing processes. Robotics and multi-axis machine tools. Integration of computer-controlled systems and control hardware. Letter grading.

**476. Integrated Manufacturing Engineering (IME) Seminar Series. (1)** Lecture, one hour. Lectures by engineers in executive positions to provide management perspectives in manufacturing enterprises. Current manufacturing techniques and integrated product development efforts by industry experts. S/U grading.

**478. Integrated Manufacturing Engineering (IME) Group Project Studies. (1 to 12)** Lecture, one hour; group projects, one to 12 hours. Teams of students perform detailed analyses to address problems presented and implement manufacturing solutions within industrial settings. S/U grading.

**497A-497B. Field Project in Manufacturing Engineering. (4-4)** Lecture, two hours. Teams of students perform detailed system analysis and plan design of manufacturing engineering systems at various manufacturing plants. In Progress and S/U or letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

### Chairs

Alan M. Fogelman, M.D. (*Castera Professor*),

*Executive Chair*

Jan H. Tillisch, M.D., *Executive Vice Chair*

Mary C. Territo, M.D., *Executive Vice Chair, Academic Affairs*

Robert K. Oye, M.D., *Executive Vice Chair, Clinical Services*

Dennis J. Slamon, M.D., *Executive Vice Chair, Research*

Robert M. Strieter, M.D., *Vice Chair, Hospitalist Program*

## Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught *information acquisition* through history taking, physical examination, and laboratory evaluation; *information synthesis* through achieving a differential diagnosis and evaluative plan; and *medical decision making* for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Medicine

### Upper Division Courses

**190C. Health Outreach and Education to At-Risk Populations. (4)** Discussion, two hours; fieldwork, six to eight hours. Requisites: courses M190A, M190B. Processes involved with designing, delivering, and assessing community health education programs, under supervision of professional staff. P/NP or letter grading.

**M196B. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Biomedical Engineering M196B, Computer Science M196B, and Cybernetics M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematic models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

**199. Special Studies. (2 to 8)** Individual projects carried out under direction of a faculty member. Special studies in medicine with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

## Graduate Courses

**M215. Interdepartmental Course: Tropical Medicine. (2)** (Same as Microbiology and Immunology M215, Pathology M215, and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**M235. Neuroactive Peptides: Molecular Biology to Function. (2)** (Same as Neurobiology M235 and Neuroscience M246.) Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

**M260A-M260B. Methodology in Clinical Research I, II. (6-6)** (Same as Biomathematics M260A-M260B.) Lecture, three hours; discussion, two hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

**M260C. Methodology in Clinical Research III. (2)** (Same as Biomathematics M260C.) Discussion, four hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U grading.

**M270C. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4)** (Same as Biomedical Engineering M296A and Computer Science M296A.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multi-compartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

**M270D. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Biomathematics M270, Biomedical Engineering M296B, and Computer Science M296B.) Lecture, four hours; outside study, eight hours. Requisite: course M270C or Biomathematics 220. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

## MEDICINE

*School of Medicine*

UCLA  
37-120 Center for the Health Sciences  
Box 951736  
Los Angeles, CA 90095-1736

(310) 825-6275

**M270E. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4)** (Same as Biomedical Engineering M296C and Computer Science M296C.) Lecture, four hours; outside study, eight hours. Requisite: course M270C. Recommended: course M270D. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training. Letter grading.

**M290A-M290B. Child Abuse and Neglect. (2-2)** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300A-M300B-M300C, Education M217G-M217H-M217I, Law M281A-M281B, Nursing M290A-M290B-M290C, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M290A is requisite to M290B. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

### Professors Emeriti

Dexter H. Howard, Ph.D.  
James N. Miller, Ph.D.

### Associate Professors

Douglas L. Black, Ph.D.  
David Chang, M.D., Ph.D.  
M. Carrie Miceli, Ph.D.  
Robert W. Simons, Ph.D.

### Assistant Professors

Genhong Cheng, Ph.D.  
Kent L. Hill, Ph.D., *in Residence*  
Beth Lazazzera, Ph.D.  
Benhur Lee, M.D.  
Kohnosuke Mitani, Ph.D.

### Adjunct Associate Professors

David Blanco, Ph.D.  
Imke Schroeder, Ph.D.

## Scope and Objectives

The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.

Microbiology and immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises, and academic positions.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Microbiology and Immunology offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Microbiology and Immunology.

## Admission

The department does not accept students whose sole objective is a master's degree. Admission to the Ph.D. program is through UCLA ACCESS to Programs in Molecular, Cellular,

and Integrative Life Sciences. Information may be obtained from UCLA ACCESS, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

Under very special circumstances, prospective students may obtain permission to apply directly to the department. Information is available from the graduate adviser.

## Master's Degree

The M.S. degree is offered through the comprehensive examination plan, which consists of successful completion of both the Ph.D. written and oral qualifying examinations. The department does not have specific requirements for the M.S. degree, as it is rarely conferred. A decision on conferral is made by the Graduate Affairs Committee. Nine courses, with at least five at the graduate level, are required.

## Doctoral Degree

Required Ph.D. coursework includes a biological chemistry course in macromolecular structure, one of two required courses in microbiology and immunology (cellular biology of host/pathogen interactions) and biological chemistry (cell structure, signaling, and differentiation), and two seminar courses related to cell and molecular biology. Also required are one of three courses from a list in microbiology and immunology and one additional lecture course in the field of molecular life sciences.

A minimum of two quarters of teaching assistantship is required.

Written and oral qualifying examinations are required. The written examination is in the form of a mini-grant proposal and focuses on one or a few specific questions asked by the student's current research project.

The University Oral Qualifying Examination consists of an oral presentation of the written research proposal, a discussion of the student's own research plans and results, and an examination on general knowledge of microbiology and immunology. Once students have completed the dissertation, they are required to present an overview of their dissertation work in an open seminar at which their committee is present.

# Microbiology and Immunology

## Upper Division Courses

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**199. Directed Individual Research Studies in Microbiology and Immunology. (2 to 8)** Preparation: submission of written research proposal. Limited to seniors. Individual research projects carried out under direction of a professor.

**199H. Honors Thesis. (4 or 8 units)** Tutorial, to be arranged. Limited to microbiology and molecular genetics honors program students. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H terms required. Progress report must be submitted to faculty sponsor at end of each of the first two terms, with honors thesis submitted at end of final term. Maximum of 4 units may be applied toward the microbiology and molecular genetics major. P/NP or letter grading.

## Graduate Courses

**201. Microbiology and Immunology. (8)** Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host/parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis.

**202A. Fundamentals of Immunology. (2)** Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell-mediated immune functions.

**202B. Medical Bacteriology. (2)** Characteristics of bacteria rickettsiae and chlamydiae associated with diseases of humans; host/parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity.

**202C. Medical Virology. (2)** Biological properties of animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts, introduction to tumor viruses.

**202D. Medical Mycology and Parasitology. (2)** Morphology, physiology, and pathogenicity of fungi which cause human and animal diseases. Study of morphology, biology, host/parasite relationship, public health problems, and control of protozoa, helminths, and arthropods parasitic in and on humans and animals.

**M208. Molecular Biology of Animal Viruses. (4)** (Same as Molecular, Cell, and Developmental Biology CM279.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host.

**M215. Interdepartmental Course: Tropical Medicine. (2)** (Same as Medicine M215, Pathology M215, and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**M217. Basic Science and Strategies of Gene Therapy. (2)** (Same as Microbiology M217 and Molecular, Cell, and Developmental Biology M217.) Preparation: basic knowledge of virology. Basic science and viral vector systems utilized for gene therapy. S/U grading.

**M223. Membrane Research Seminar. (2)** (Same as Microbiology M223.) Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

**M226A-M226B. Principles of Microbial Pathogenesis. (4-4)** (Same as Microbiology M226A-M226B and Molecular, Cell, and Developmental Biology M226A-M226B.) Lecture, one hour; discussion, three hours. Requisites: courses 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction.

**M226A. Bacterial and Mycotic Infections; M226B. Parasitic and Viral Infections.**

**M227. Molecular Genetics of Bacteria and Phage. (4)** (Same as Chemistry M227, Microbiology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Requisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

**M229. Cellular Biology of Host/Pathogen Interactions. (6)** (Same as Microbiology M229 and Molecular, Cell, and Developmental Biology M226A-M226B.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

**CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Ethics and Accountability in Biomedical Research. (2)** (Same as Microbiology CM234.) Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. S/U grading.

**M240. Cytokines and Reproductive Biology. (2)** (Same as Microbiology M240 and Molecular, Cell, and Developmental Biology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

**M241. Use of the Computer in Biology. (2)** (Same as Human Genetics M201 and Molecular, Cell, and Developmental Biology M201.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

**M246. Computer Analysis of Genetic Organization. (4)** (Same as Microbiology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, two hours; laboratory, six hours. Requisite: Life Sciences 4 or Microbiology C159. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

**250. Cell and Molecular Biology. (4)** Lectures and student seminar presentations. Review of selected current topics in molecular and cellular biology. Topics include recent experimental results on organization, expression, and regulation of genes in eukaryotic cells. S/U or letter grading.

**M252. Seminar: Microbial Pathogenesis. (2)** (Same as Microbiology M252.) Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

**M256. Seminar: Viral Oncology. (2)** (Same as Pathology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

**M260. Immunology Forum. (2)** (Same as Microbiology M260.) Requisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

**M261. Molecular and Cellular Immunology. (6)** (Same as Microbiology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

**M262A. Seminar: Current Topics in Immunobiology of Cancer. (2)** (Same as Microbiology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

**M262D. Selected Topics in Immunology. (2)** (Same as Microbiology M262D.) Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

**M263. Molecular and Cellular Immunology Seminar. (2)** (Same as Microbiology M263.) Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

**M268. Molecular Parasitology. (4)** (Same as Microbiology CM268.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Letter grading.

**271. Immunology Overview. (2)** Lecture, two hours; discussion, one hour. Designed for graduate students. Identification of major components of immune system, their modes of active maturation and regulation, cytokine signaling systems, principal effector mechanisms, and immune contributions to autoimmunity and hypersensitivity.

**274. Interactions of Immune System and Nervous System. (2)** Lecture, one hour; discussion, one hour. Designed for 10 graduate and postdoctoral immunology, behavioral sciences, and neurosciences students. Study of existing knowledge of interrelationships between central and peripheral nervous system and immune system. Review of research on central nervous system effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes.

**M275. Biology of HIV. (4)** (Same as Epidemiology M228.) Lecture, three hours. Preparation: two biology courses. Requisites: Biostatistics 100A, Epidemiology 100. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory. Letter grading.

**M285. Intermediate Immunology. (4)** (Same as Microbiology CM285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Requisite: course M185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A.

**M294. Molecular Basis of Cancer. (4)** (Same as Pathology M294.) Lecture, three hours. Requisites: course M229, Biological Chemistry CM253, CM267, Neurobiology M209A. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

**M294L. Cancer Histopathology Laboratory. (2)** (Same as Microbiology M294L and Pathology M294L.) Lecture, one hour; laboratory, two hours. Requisites: courses M229 or Neurobiology M209A, M294 (preferred) or M293, Biological Chemistry CM253, CM267. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Laboratory, to be arranged. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 6)** Tutorial, to be arranged.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 12)** Research on an original problem in the field of microbiology and immunology to be selected by graduate student with advice of adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.

Imke Schroeder, Ph.D.

## Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, immunology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in Microbiology and Molecular Genetics prepare for careers in biomedical research, medicine, dentistry, or other health professions, biotechnology and genetic engineering, industrial microbiology, agricultural or environmental sciences, public health, and law or bioethics, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology, immunology, and molecular genetics at the undergraduate level and depth and training in independent study and research for graduate students.

Note: Several upper division and graduate courses in this department are multiple-listed

with those in the Microbiology and Immunology Department in the UCLA School of Medicine.

## Undergraduate Study

### Microbiology and Molecular Genetics B.S.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Microbiology and Molecular Genetics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Students intending to major in Microbiology and Molecular Genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

### The Major

*Required:* Microbiology and Molecular Genetics 101, 101L, 102, 102L, C106, C159, 185A; Chemistry and Biochemistry 153A, 153C, 153L; four additional upper division courses from the departmental list (available in the Student Affairs Office and at <http://www.mimg.ucla.edu>) or from related departments selected with approval of the faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 grade-point average in the major. A maximum of 4 units of Microbiology and Molecular Genetics 199 or Microbiology and Immunology 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

## Honors Program

Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty

adviser from the Department of Microbiology and Molecular Genetics or the Department of Microbiology and Immunology. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, students are awarded the bachelor's degree with departmental honors. The department also offers an honors seminar course each Winter Quarter which is required for the honors program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Microbiology and Molecular Genetics offers the Master of Science (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Microbiology and Molecular Genetics.

## Admission

Applicants to the M.A. program must obtain faculty sponsorship before submitting an application and, in addition to the other application materials (see Ph.D. application procedures), must submit a five-page research proposal describing the thesis problem. Information and the proposal format are available from the graduate adviser's office.

The department accepts relatively few students whose objective is an M.A. degree and does not encourage applications at this level.

Admission to the Ph.D. program is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences. Information may be obtained from UCLA ACCESS, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

Under special circumstances, new Ph.D. students may be admitted directly. Such applicants must have completed an undergraduate major in microbiology or a related field with superior scholastic achievement and should have preparation in calculus, physics, biology, genetics, physical chemistry, organic chemistry, biochemistry, and microbiology. In certain cases, on recommendation of the graduate adviser and the departmental admissions committee, background deficiencies may be remedied concurrently with graduate studies.

The Graduate Record Examination (GRE) General Test is required for admission, and the Subject Test in Biochemistry, Cell and Molecular Biology, Chemistry, or Biology is recommended. Three letters of recommendation from individuals who can provide direct knowledge of both the applicant's academic record and potential for superior achievement in independent research are required. The GRE scores and letters should be submitted directly to the department. The department generally accepts students in Fall Quarter only. Under exceptional circumstances the Graduate Admissions Committee may agree to admit a student in Winter or Spring Quarter. Completion of a master's degree is not normally required.

## Master's Degree

The M.S. degree is offered through the thesis plan. A total of nine courses is required, five at the graduate level. Required courses are specified on an individual basis by the initial advisory committee which generally becomes the thesis committee.

Teaching is a requirement for the degree but in certain cases may be waived by the graduate adviser or thesis committee.

## Doctoral Degree

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research in all of these fields. The objective of the department is to provide depth and training in independent study and research for graduate students.

Required formal lecture/laboratory courses include (1) biochemistry: a required chemistry course in macromolecular structure and (2) cell biology: a required chemistry or microbiology course in cell biology.

A total of 8 additional units of 200-level coursework to be selected from at least two of four subject areas (general microbiology, host/parasite interactions and virology, immunology, and genetics and regulation) is required. The courses may be selected to remedy background deficiencies or to deepen knowledge of a particular subject area. There is a list of acceptable courses.

Students must enroll in five seminar courses, in which they read and report on current scientific research literature, during their first five years of residence. During the first 12 months in residence, students rotate for one quarter each through three laboratories. There is a required first-year research proposal.

All Ph.D. candidates are required to serve as teaching assistants or in some other formal teaching capacity for two quarters.

Written and oral qualifying examinations are required. The written examination consists of a research proposal. Before presentation to the doctoral committee, students are encouraged to present the proposal before a student seminar group.

Following successful completion of the written proposal, students take the University Oral Qualifying Examination, which covers both their proposal and general scientific background.

## Microbiology and Molecular Genetics

### Lower Division Courses

**6. Introduction to Microbiology. (4)** Lecture, three hours. Not open for credit to students with credit for course 101 or Life Sciences 2. Designed for nontechnical students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. P/NP or letter grading.

**7. Developments in Biotechnology. (4)** Lecture, three hours; demonstration, one hour. Recommended preparation: course 6 or Biology 2 or Life Sciences 2. Not open for credit to students with credit for course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

**10. Applied Medical Microbiology. (5)** Lecture, three hours; laboratory, five hours. Enforced requisite: Life Sciences 2. Designed for students interested in medical microbiology and those going into allied health professions. Not open for credit to students with credit for course 101; does not substitute for course 101 in the major. Introduction to biology of bacteria and their role in diseases of humans. Letter grading.

**12. Biological Threats to Society: Bioterrorism and Emerging Infections. (4)** Lecture, four hours. Examination of biological threats to American society. Coverage of biological weapons going back to first attempts to use microbes or toxins as weapons, and of emerging infections. Introduction to basic biology to understand infectious disease. P/NP or letter grading.

### Upper Division Courses

**101. Fundamentals of Bacteriology. (5)** Lecture, three hours; discussion, one hour; computer/multimedia laboratory, one hour. Requisites: Chemistry 153A, Life Sciences 3, 4. Recommended corequisite: course 101L. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Letter grading.

**101L. Bacteriology Laboratory. (3)** Discussion, one hour; laboratory, six hours. Requisites: Chemistry 153A, Life Sciences 3, 4. Corequisite: course 101 (or 101 with a grade of C or better if previously taken). General laboratory techniques and theory in microbiology and molecular genetics, including isolation and identification of bacterial species from nature, transformation of *Escherichia coli*, Ames test, analysis of auxotrophic mutants. Letter grading.

**102. Introductory Virology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, with grades of C or better. Recommended: Chemistry 153A. Recommended corequisite: course 102L. Biological properties of bacterial and animal viruses, replication, methods of detection, interactions with host cells and multicellular hosts. Letter grading.

**102L. Virology Laboratory. (2)** Discussion, one hour; laboratory, four hours. Prerequisites: Life Sciences 3, 4, with grades of C or better. Corequisite: course 102 (or 102 with a grade of C or better if previously taken). General laboratory techniques and theory in virology, including complementation, recombination, transduction, experiments in animal virology using tissue culture. Letter grading.

**C106. Molecular and Genetic Basis of Bacterial Infections. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C206.

**C111. Biology of Prokaryotic Cell. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153C. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211.

**C112. Molecular Biology of Bacterial Growth. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153A, 153L, Life Sciences 4. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multicomponent cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C212.

**120. Advanced Techniques in Microbiology. (4)** Lecture, one hour; laboratory, six hours. Prerequisites: courses 101 and 101L, with grades of B or better. Techniques used in research laboratories in microbiology/biotechnology field. Introduction to current techniques. Practical and theoretical background of these techniques. Interested qualifying students to be given opportunity to participate in summer internships.

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**C134. Ethics and Accountability in Biomedical Research. (2)** Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course CM234. P/NP grading.

**CM156. Human Genetics. (4)** (Same as Human Genetics CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours. Prerequisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

**C159. Advanced Molecular Genetics. (5)** Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 153A, Life Sciences 4. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C259.

**CM165. Bioprocess Technology. (4)** (Same as Chemical Engineering CM165.) Lecture, two hours; laboratory, eight hours. Prerequisites: course 101, Chemical Engineering C115, Chemistry 156. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265.

**C168. Molecular Parasitology. (4)** (Formerly numbered CM168.) Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course CM268. Letter grading.

**C174. Advanced Topics in Molecular Parasitology. (2)** (Formerly numbered Molecular, Cell, and Developmental Biology C174F.) Lecture, two hours. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Concurrently scheduled with course C222. Letter grading.

**M176. Advanced Topics in Animal Virus/Host Interaction. (4)** (Same as Molecular, Cell, and Developmental Biology M176.) Lecture, four hours; discussion, one hour. Prerequisites: Life Sciences 3, 4. Recommended: course 102 or Chemistry 153B or Molecular, Cell, and Developmental Biology 144. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. P/NP or letter grading.

**185A. Immunology. (5)** (Formerly numbered M185A.) Lecture, three hours; discussion, 90 minutes. Prerequisites: Life Sciences 3, 4. Recommended prerequisites or corequisites: Chemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Not open for credit to students with credit for course M261 or Molecular, Cell, and Developmental Biology C180. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions. Letter grading.

**CM185B. Intermediate Immunology. (4)** (Same as Molecular, Cell, and Developmental Biology CM185B.) Lecture, three hours; discussion, one hour. Prerequisite: course M185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

**192. Teaching Practicum in Microbiology and Molecular Genetics. (1 to 4)** Tutorial, to be arranged. Limited to junior/senior Microbiology and Molecular Genetics majors. Training and supervised practicum for advanced undergraduates in teaching courses related to microbiology and molecular genetics. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. P/NP or letter grading.

**195. Proseminar. (2)** Designed for seniors. Discussion by small groups of students and instructor on current research literature. Topics vary each year. May be taken only once for credit in the major but may be repeated for University credit.

**199. Special Studies in Microbiology and Molecular Genetics. (2 to 8)** Preparation: minimum 3.0 grade-point average in premajor and major. Prerequisites: Chemistry 153A, 153L. Limited to junior/senior Microbiology and Molecular Genetics majors. Individual research project under direct supervision of departmental faculty member. Copy of report describing the research must be filed with Student Affairs Office by end of term. First 4 units must be taken P/NP; 12 additional units, 4 of which may be applied toward the major, may be taken for a letter grade.

**199H. Honors Thesis. (4 or 8)** Limited to microbiology and molecular genetics honors program students. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H terms required. Progress report must be submitted to faculty sponsor at end of each of the first two terms, with honors thesis submitted at end of final term. Maximum of 4 units may be applied toward the major, with balance applied toward B.S. degree requirements.

## Graduate Courses

**C206. Molecular and Genetic Basis of Bacterial Infections. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C106.

**C211. Biology of Prokaryotic Cell. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153C. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student required.

**C212. Molecular Biology of Bacterial Growth. (4)** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153A, 153L, Life Sciences 4. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multicomponent cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C112.

**M217. Basic Science and Strategies of Gene Therapy. (2)** (Same as Microbiology and Immunology M217 and Molecular, Cell, and Developmental Biology M217.) Preparation: basic knowledge of virology. Basic science and viral vector systems utilized for gene therapy. S/U grading.

**C222. Advanced Topics in Molecular Parasitology. (2)** (Formerly numbered Molecular, Cell, and Developmental Biology C222F.) Lecture, two hours. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Concurrently scheduled with course C174. Letter grading.

**M223. Membrane Research Seminar. (2)** (Same as Microbiology and Immunology M223.) Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

**M226A-M226B. Principles of Microbial Pathogenesis. (4-4)** (Same as Microbiology and Immunology M226A-M226B and Molecular, Cell, and Developmental Biology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

**M227. Molecular Genetics of Bacteria and Phage. (4)** (Same as Chemistry M227, Microbiology and Immunology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Prerequisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

**M229. Cellular Biology of Host/Pathogen Interactions. (6)** (Same as Microbiology and Immunology M229 and Molecular, Cell, and Developmental Biology M229.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and host.

**CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**CM234. Ethics and Accountability in Biomedical Research. (2)** (Same as Microbiology and Immunology M234.) Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course C134. S/U grading.

**M240. Cytokines and Reproductive Biology. (2)** (Same as Microbiology and Immunology M240 and Molecular, Cell, and Developmental Biology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

**242. Seminar: Microbial Molecular Genetics. (2)** Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

**M246. Computer Analysis of Genetic Organization. (4)** (Same as Microbiology and Immunology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, two hours; laboratory, six hours. Requisite: course C159 or Life Sciences 4. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

**M248. Molecular Genetics. (6)** (Same as Biological Chemistry CM248, Human Genetics CM248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Letter grading.

**250. Seminar: Microbial Metabolism. (2)** Discussion and student presentations of recent work in areas of genetic regulation and physiology of bacterial metabolism.

**251. Seminar: Regulation and Differentiation. (2)** S/U grading.

**M252. Seminar: Microbial Pathogenesis. (2)** (Same as Microbiology and Immunology M252.) Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

**254. Pre-mRNA Processing in Cellular Metabolism and Differentiation. (2)** Seminar, three hours. Designed for graduate students. Reading and discussion of papers dealing with mRNA metabolism and posttranscriptional control of gene expression. From detailed RNA chemistry and autocatalytic reactions to more recently described and less understood systems, topics include RNA catalysis, general splicing and spliceosome assembly, splicing regulation, polyadenylation and three prime end formation, mRNA stability, mRNA transport, RNA editing and modification, and RNA localization. S/U or letter grading.

**CM256. Human Genetics. (4)** (Same as Human Genetics CM256 and Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

**C259. Advanced Molecular Genetics. (5)** Lecture, three hours; discussion, two hours. Requisites: Chemistry 153A, Life Sciences 4. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C159.

**M260. Immunology Forum. (2)** (Same as Microbiology and Immunology M260.) Requisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

**M261. Molecular and Cellular Immunology. (6)** (Same as Microbiology and Immunology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

**M262A. Seminar: Current Topics in Immunobiology of Cancer. (2)** (Same as Microbiology and Immunology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

**M262D. Selected Topics in Immunology. (2)** (Same as Microbiology and Immunology M262D.) Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

**M263. Molecular and Cellular Immunology Seminar. (2)** (Same as Microbiology and Immunology M263.) Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

**M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics. (2-2-2)** (Same as Biological Chemistry M264A-M264B-M264C and Chemistry M264A-M264B-M264C.) Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

**CM265. Bioprocess Technology. (4)** (Same as Chemical Engineering CM265.) Lecture, two hours; laboratory, eight hours. Requisites: course 101, Chemical Engineering C115, Chemistry 156. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165.

**266. Genetic Mechanisms Seminar. (2)** Seminar, three hours. Designed for students in Predoctoral Training Program in Genetic Mechanisms. Current research topics in genetics. May be repeated for credit. S/U grading.

**CM268. Molecular Parasitology. (4)** (Same as Microbiology and Immunology M268.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course C168. Letter grading.

**270. Seminar: Molecular Virology. (2)** Designed for graduate students. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.

**CM285. Intermediate Immunology. (4)** (Same as Microbiology and Immunology M285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Requisite: course M185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

**290. Seminar: Molecular Genetics. (2)** Seminar, one hour; discussion, one hour. Designed for graduate students. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. S/U grading.

**M294L. Cancer Histopathology Laboratory. (2)** (Same as Microbiology and Immunology M294L and Pathology M294L.) Lecture, one hour; laboratory, two hours. Requisites: course M229 or Neurobiology M209A, Biological Chemistry CM253, CM267, and Pathology M294 (preferred) or M293. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

**296A-296Z. Seminars: Research Topics in Microbiology and Molecular Genetics. (1 to 4 each)** Discussion, three hours. Advanced study and analysis of current topics in microbiology and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**296A.** Eukaryotic Transcription Control.

**296B.** Regulation of Pre-mRNA Splicing.

**296D.** *Escherichia coli* Physiological Research.

**296E.** Archaeobacterial Research.

**296F.** Molecular Biology of Microbial Diversity.

**296G.** Structure and Function of Membrane Transport Proteins.

**296H.** Genetics of Common Diseases.

**296J.** Microbial Pathogenesis.

**296K.** Advanced Topics in Immunology.

**296L.** Molecular Biology of Bacterial Growth.

**296M.** Immune Regulation and Autoimmune Disease.

**296N.** RNA and Protein Structure and Function.

**296O.** Cell Growth and Signal Transduction.

**296P.** Bacterial Toxins and Human Cytokines.

**296Q.** Mechanisms of Hematopoietic Development.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Microbiology in Higher Education. (2)** Seminar/discussion/laboratory. Designed for graduate students. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.

**596. Directed Individual Research. (2 to 12)** Tutorial, to be arranged.

**598. Research for M.A. Thesis. (2 to 12)** Tutorial, to be arranged.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged.

Tatsushi Toyokuni, Ph.D.  
Hong Wu, M.D., Ph.D.

## Scope and Objectives

The Department of Molecular and Medical Pharmacology has basic and clinical components in which students have opportunities to

develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts integrative teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Departmental investigators study the biochemistry and pharmacology of drugs, gene expression and its regulation, signal transduction processes, cell-to-cell communication, viral replication and pathogenesis, autoimmune disease, neuronal development and plasticity, and integrated organ functions using techniques of chemistry and structural biology, DNA microarrays, molecular and cell biology, transgenic and chimeric mice, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Molecular Imaging, Ahmanson Biological Imaging Clinic, and UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interest, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Molecular and Medical Pharmacology offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Molecular and Medical Pharmacology.

Note: There is no degree program in pharmacy at UCLA.

## Admission

### M.S./Ph.D. in Molecular and Medical Pharmacology

In addition to meeting University requirements for graduate admission, applicants must have received a bachelor's degree in a biological or physical science or in the premedical curriculum. Requisite courses include basic biology, basic chemistry, organic chemistry, biochemistry, and laboratory. Quantitative analysis and physical chemistry are recommended.

In suitable cases, students who have course deficiencies may be admitted to graduate status, but any deficiencies have to be removed within a specified time. Graduate Record Examination (GRE) scores and three letters of recommendation are required. Applicants may write to the department for a departmental brochure and/or application form.

Students may also enter the program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences. Information may be obtained from UCLA ACCESS, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

### M.D./Ph.D. Programs

The department offers two M.D./Ph.D. programs concurrently with the School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the School of Medicine in order to qualify. The second is the Specialty Training and Advanced Research (STAR) Program in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

## Master's Degree

The M.S. degree is offered through the thesis plan, by special petition and only under special circumstances: for example, to candidates who already have a doctoral degree in another field and wish to obtain additional training in pharmacology or to students who are already in the program and, for some reason, cannot continue for the Ph.D.

The M.S. degree requires satisfactory completion of the required courses for the Ph.D. degree, excluding the three quarters of laboratory research coursework.

## Doctoral Degree

Major fields include cardiovascular pharmacology; chemical pharmacology; medical pharmacology; molecular pharmacology; immunopharmacology; neuroendocrine pharmacology; neuropharmacology; psychopharmacology; nuclear medicine (positron emission tomography); pharmacokinetics; signal transduction; structural biology; and toxicology.

For students entering through UCLA ACCESS, the ACCESS curriculum is required in the first year. Ph.D. students must complete a set of required courses in molecular and medical pharmacology and biological chemistry. The course requirements are waived for students who have passed equivalent courses with grades of B or better within the past 36 months.

The department provides a system of laboratory rotations in order to familiarize students with a variety of pharmacological research areas and techniques. During the first year in the department, students participate in projects of the laboratories of their choosing. Students also become familiar with the literature relevant to the various research projects and thus establish a basis for the selection of their own research areas.

Students entering through ACCESS are required to serve as teaching assistants for two quarters.

Written and oral qualifying examinations are required. The written examination consists of a written research proposal, prepared according to the NIH grant application format, with a maximum length of 10 pages, excluding references.

Following successful completion of the research proposal, students take the University Oral Qualifying Examination, which is a defense of the proposal.

## Molecular and Medical Pharmacology

### Upper Division Courses

**110A-110B. Drugs: Mechanisms, Uses, and Misuse. (4-4)** Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Life Sciences 2, 3. Course 110A is requisite to 110B. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students. P/NP or letter grading.

### Graduate Courses

**200. Introduction to Laboratory Research. (2 to 4)** Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

**203. Medical Pharmacology. (2)** Lecture, zero to two hours; discussion, zero to two hours. Requisites: courses 211A, 211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. S/U or letter grading.

**211A-211B. Principles of Pharmacology. (4-2)** Lecture, three to eight hours; discussion, zero to nine hours. Preparation: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. S/U or letter grading.

**212A-212B. Graduate Commentary: Medical Pharmacology. (2-2)** Preparation: mammalian physiology, biochemistry. Supplementation of topics covered in course 203. Primarily for graduate students. S/U or letter grading.

**M221. Cellular and Molecular Neurochemistry. (4)** (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**234A-234B. Experimental Methods in Pharmacology. (2-2)** Laboratory, three hours. Survey of experimental methods and instrumentation used in analysis, identification, and study of mechanisms of action of pharmacologically active compounds. S/U or letter grading.

**M234C. Laboratory in Toxicological Methods. (2)** (Formerly numbered 234C.) (Same as Environmental Health Sciences M245.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxin to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

**237. Research Frontiers in Cellular and Molecular Pharmacology. (4)** (Formerly numbered 237A-237B-237C.) Lecture, four hours. Detailed examination of principles of pharmacology and mechanisms of drug action at organismal, tissue, cellular, and molecular levels, with emphasis on receptors, receptor/effector coupling, neurotransmitters, cardiovascular pharmacology, autonomic and central nervous system pharmacology. S/U or letter grading.

**241. Introduction to Chemical Pharmacology. (6)** Preparation: organic and biological chemistry. Designed for molecular and medical pharmacology students. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action. Letter grading.

**M248. Introduction to Biological Imaging. (4)** (Same as Biomedical Engineering M248 and Biomedical Physics M248.) Lecture, three hours; laboratory, one hour; outside study, seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories. Letter grading.

**251. Seminar: Pharmacology. (2)** Seminar presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

**M255. Biological Catalysis. (4)** (Same as Biological Chemistry M255, Chemistry CM255, and Molecular, Cell, and Developmental Biology CM252.) Requisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Letter grading.

**M257. Introduction to Toxicology. (4)** (Same as Pathology M257.) Requisite: course 241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems. S/U or letter grading.

**M258. Pathologic Changes in Toxicology. (4)** (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system). S/U or letter grading.

**288. Gene Therapy. (4)** Lecture, three hours; discussion, one hour. Introduction to basic concepts of gene therapy, wherein treatment of human disease is based on transfer of genetic material into an individual. Discussion of molecular basis of disease, gene delivery vectors, and animal models. Letter grading.

**291. Special Topics in Pharmacology. (2 to 4)** Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates and faculty. S/U or letter grading.

**293. Nitric Oxide Chemistry, Biochemistry, and Physiology. (2 or 4)** Lecture, two or four hours. Basic chemistry, biochemistry, and physiology of nitric oxide and related species, with emphasis on understanding novel mechanisms of nitrogen oxide function as both a physiological and pathophysiological agent/messenger. S/U or letter grading.

**298. Seminar: Current Topics in Molecular and Medical Pharmacology. (2)** Limited to pharmacology, ACCESS program, and interdepartmental Molecular Biology Ph.D. program students. Students conduct or participate in discussions on assigned topics. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Research in Pharmacology. (4 to 12)** Tutorial, to be arranged. S/U or letter grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 12)** Tutorial, to be arranged. S/U grading.

## Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; developmental biology and neurobiology; DNA replication, repair, and recombination; gene regulation; immunobiology; microbiology/virology; molecular evolution and paleobiology; oncogenes and signal transduction; plant molecular biology; protein structure and function; genomics; and structural biology.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degree

The Molecular Biology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Biology.

## Admission

Students are admitted to the Ph.D. program through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

At the completion of the first-year ACCESS curriculum, including three laboratory rotations, students choose a permanent research and thesis adviser. Students interested in entering the program for their research work must choose a research adviser who is a member of the Molecular Biology Institute (MBI) faculty. There are currently 120 faculty members, representing 15 different departments in the College of Letters and Science and the Schools of Medicine and Dentistry.

Entrance to the program is determined by an evaluation of the student's undergraduate and first-year graduate performance and the proposed area of thesis research. Undergraduate coursework should include calculus, general chemistry and/or biochemistry, organic chemistry, physics, biology, and genetics. Any course deficiencies should be addressed in the first year in the ACCESS program.

## Doctoral Degree

Required first-year Ph.D. coursework is completion of the ACCESS curriculum, including core courses, student seminar courses, and the ethics course. Second-year coursework includes two to three molecular biology student seminar courses. Students may take these one or two per quarter. Three different topics are offered each quarter taught by various MBI faculty members.

Two quarters of teaching experience are required by the end of the fourth year of graduate study.

Written and oral qualifying examinations are required. The written examination is coupled to the molecular biology student seminar courses. One examination must be submitted for each of the three required student seminar course sections. Examinations take the form of a research proposal based on the topic and required reading for each section.

Following successful completion of the written examinations, students prepare a research proposition and take the University Oral Qualifying Examination, which covers the proposition as well as general scientific background. In year three students are required to present a midstream seminar on the dissertation research.

## Molecular Biology

### Graduate Courses

**297. Seminar: Molecular and Cellular Life Sciences. (2)** In-depth surveys of recent developments in specific fields of life sciences research. By reading and presenting primary research articles, students learn to critically evaluate research papers and organize and present a seminar on a specific research topic. S/U or letter grading.

**298. Current Topics in Molecular Biology. (2)** Student presentation/seminar, two hours. Students present oral critiques and participate in discussions on assigned topics. S/U grading.

### Related Courses

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

#### Biological Chemistry

M221. Cellular and Molecular Neurochemistry  
CM248. Molecular Genetics  
CM253. Macromolecular Structure  
M255. Biological Catalysis  
M263. Metabolism and Its Regulation  
M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics  
M266A-M266B-M266C. Seminars: Molecular Embryology  
CM267. Cell Structure, Signaling, and Differentiation

#### Chemistry and Biochemistry

M230B. Structural Molecular Biology  
M230D. Structural Molecular Biology Laboratory  
CM253. Macromolecular Structure  
M263. Metabolism and Its Regulation  
M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics  
M267. Cell Structure, Signaling, and Differentiation

#### Microbiology and Immunology

250. Cell and Molecular Biology  
M256. Seminar: Viral Oncology  
M260. Immunology Forum  
M262A. Seminar: Current Topics in Immunobiology of Cancer  
M263. Molecular and Cellular Immunology Seminar

#### Microbiology and Molecular Genetics

242. Seminar: Microbial Molecular Genetics  
M248. Molecular Genetics  
250. Seminar: Microbial Metabolism  
251. Seminar: Regulation and Differentiation  
M260. Immunology Forum  
M263. Molecular and Cellular Immunology Seminar  
290. Seminar: Molecular Genetics

#### Molecular, Cell, and Developmental Biology

228. Prokaryotic and Eukaryotic Gene Systems  
M230B. Structural Molecular Biology  
M230D. Structural Molecular Biology Laboratory  
M234. Genetic Control of Development  
CM248. Molecular Genetics

## Scope and Objectives

The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science degree in Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, bio-

medical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The M.A. and Ph.D. degrees provide opportunities for advanced concentrated study and require independent and innovative research that ultimately results in publishable thesis and dissertation materials.

## Undergraduate Study

### Molecular, Cell, and Developmental Biology B.S.

The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

##### Transfer Students

To be admitted as Molecular, Cell, and Developmental Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required Courses:* Chemistry and Biochemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140, 104, 138 or C141, 144.

*Electives:* At least 20 upper division elective units, of which at least 10 must be in courses

“**T**his is the most exciting time ever for molecular biology,” says an enthusiastic Robert Goldberg, professor of Molecular, Cell, and Developmental Biology. “Undergraduates have the opportunity to both learn how cutting-edge experiments are affecting their lives, but also to participate themselves in these experiments.”

In his laboratory Goldberg investigates how plant cells become specialized during development and employs a combination of genetic and molecular approaches to answer this question. His observations also lead to methods he applies to teaching. “I love experimenting in the classroom, trying out new approaches, and getting the class to help in one big experiment.” he says. “And I love to convey the excitement of discovery to my students, to bring my own passion for discovery into the classroom so that students can see that science is alive and exciting.”

Goldberg uses an interactive teaching style and makes it a point to know

offered by the department. Any upper division departmental course, except Molecular, Cell, and Developmental Biology 193 or 199, is acceptable. The following courses outside the department may be taken to satisfy a maximum of 10 units in this category: Biological Chemistry CM153G, Chemistry and Biochemistry 153C, 156, CM159A, CM159B, Microbiology and Molecular Genetics 101, 102, C106, C112, C159, C168, C174, 185A, Organismic Biology, Ecology, and Evolution 110, 121, 146, 157, 162, M166, Physiological Science 126.

*Laboratory:* At least 4 units of upper division laboratory experience selected from Chemistry and Biochemistry 154, Microbiology and Molecular Genetics 101 and 101L (both courses must be taken), 102 and 102L (both courses must be taken), Molecular, Cell, and Developmental Biology 155, 190A through 190D, 190HA through 190HD, 199, Organismic Biology, Ecology, and Evolution M158, 162, M166.

A maximum of 12 units of Molecular, Cell, and Developmental Biology 190 and no more than

students by name, even in large classes. His aim is to encourage them to work collectively on projects and activities both inside and outside the classroom. “When you allow the students to participate,” he explains, “the entire class becomes an ‘organism’ that moves collectively in attempting to achieve excellence. One of the differences between my class and others is that students must work together and learn how to have an effective intellectual exchange with their classmates—being critical and instructive at the same time.”

“The most important thing I want my students to learn is how to think and solve problems—to be in a dark room and see light, to learn to be creative and obtain new insights into real situations,” he says. “Because science is moving so rapidly—especially molecular biology—the facts will change with time—but the ability to solve problems and think creatively lasts forever.”

**Robert Goldberg,**  
Molecular, Cell, and  
Developmental Biology  
Department

---

*I love to convey the excitement of discovery to my students, to bring my own passion for discovery into the classroom so that students can see that science is alive and exciting*

---

one course from 190C, 190HC, or 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.

Any single course may be applied toward only one category within the major (e.g., course C141 may be applied toward the required or elective category but not toward both).

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Departmental majors must earn a C– or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Honors Program

### Admission

The honors program provides exceptional Molecular, Cell, and Developmental Biology majors with the opportunity to do research culminating in an honors thesis. Junior and senior

majors who have completed all university-level coursework, including all preparation courses and requirements for the major with an overall grade-point average of 3.0 or better and a 3.5 GPA or better in the required major courses, may apply for admission to the honors program. Students must have the sponsorship of an approved faculty adviser; those intending to pursue highest honors must have faculty sponsorship from within the department.

For further information and application forms, students should consult the Student Affairs Office, 2124 Life Sciences, early in their educational planning.

## Requirements

The core of the program consists of at least one undergraduate seminar selected from Molecular, Cell, and Developmental Biology C174A through C174G and three research courses (12 units minimum) from 190HA, 190HB, and 190HC, culminating in a thesis.

To be eligible for graduation with honors, students must satisfactorily complete all requirements for the honors program and the major and obtain at least an overall 3.0 grade-point average and a 3.5 GPA or better in coursework required for the major. On recommendation by the faculty sponsor and with approval of the thesis by the departmental honors committee, students are awarded no honors, departmental honors, or highest departmental honors.

At the discretion of the departmental honors committee, students who have (1) a GPA of 3.6 or better, both overall and in the major, (2) research sponsorship from a faculty adviser within the department, and (3) demonstrated exceptional accomplishment on the research thesis are awarded highest departmental honors.

## Computing Specialization

Majors in Molecular, Cell, and Developmental Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science M196B or Organismic Biology, Ecology, and Evolution C159. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Student Affairs Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*,

available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Molecular, Cell, and Developmental Biology offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Molecular, Cell, and Developmental Biology.

## Admission

The department does not accept students whose sole objective is the M.A. degree. The department rarely awards the M.A. degree except in instances where students are unable to complete the requirements for the Ph.D. The department admits students directly into the first year of its program leading to the Ph.D. degree.

Students admitted through the UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences (172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, 310-206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu)) may also be admitted to the department's Ph.D. program by the beginning of their second year of study.

Applicants for study leading to the Ph.D. are not required to have a master's degree as a requisite; however, the department expects graduate students to have or to acquire a background comparable to the requirements for the B.S. degree in Molecular, Cell, and Developmental Biology at UCLA. A background in chemistry, physics, and mathematics is essential. Deficiencies in these or other subjects must be made up at the earliest opportunity, preferably during the first year of the Ph.D. program.

Applications and additional information may be obtained from the Student Affairs Office, Molecular, Cell, and Developmental Biology, 2124 Life Sciences, UCLA, Box 951606, Los Angeles, CA 90095-1606.

## Master's Degree

For fields of emphasis, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination and thesis plans. The program consists of at least nine courses, five of which must be graduate-level (200-series) courses. Specific course requirements are established for each student by the guidance committee.

## Doctoral Degree

Specific fields of emphasis in the department naturally reflect the research foci of the faculty. These include cell biology, molecular biology, genetics and developmental biology, in both plants and animals; and immunology, neurobiology, and molecular evolution.

In addition to any remedial coursework specified by the graduate adviser, all Ph.D. students are required to take a minimum of four graduate-level courses and three graduate seminars approved by the department. Students may elect, in consultation with their dissertation adviser, to take additional graduate courses or seminars in a particular area of specialization.

All students are required to take the teaching assistant training course and are expected to teach a minimum of two quarters.

Written and oral qualifying examinations are required. The written examination requirement is satisfied through three written papers generated in connection with selected courses, including seminar courses. The papers are written in the form of a mini research proposal.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which is composed of a presentation of a research proposal and testing of general knowledge of advanced biology.

# Molecular, Cell, and Developmental Biology

## Lower Division Courses

**30. Biology of Cancer. (4)** Introduction to molecular, cellular, and clinical aspects of cancer and consideration of sociological and psychological impacts of cancer on the individual and society. P/NP or letter grading.

**40. AIDS and Other Sexually Transmitted Diseases. (4)** Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

**70. Genetic Engineering and Society. (4)** Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for Life Sciences 3 or 4. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

**80. The Green World: Plant Biology for Now and the Future. (4)** Lecture, three hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable "clean" energy, reclamation of deforested and nutritionally depleted soils, and "biological factories" to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

**88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective. (4)** Seminar, three hours. Limited to freshmen who have not completed Life Sciences 3. Designed for nonmajors. Study of biology at molecular level has unlocked secrets of the gene, started the biotechnology revolution, and promises a new scientific age that uses gene therapy to cure human disease, produce superplants that grow in the desert, and uncover the mysteries of the mind. Exploration of origins and history of molecular biology by analyzing papers written by Mendel, Watson, Crick, and others who played a major role in changing society with their discoveries of new biological principles. P/NP or letter grading.

**88D. Lower Division Seminar: Genetics and Society. (4)** Discussion, three hours. Some ways genetics affects us now and what changes are possible for our children. Examination of biological basis of inheritance in order to understand scientific methods and science teaching.

**88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications. (4)** Seminar, three hours. Recent advances in genetics have opened up new possibilities in fields of forensics, medicine, agriculture, and industry, with corresponding legal, social, and economic ramifications. Examination of scientific/genetic basis underlying genetic engineering, genetic screening, gene therapy, eugenics, DNA fingerprinting, cloning, etc., and discussion of current and future applications. P/NP or letter grading.

**88F. Lower Division Seminar: Science and Scientists — Expectations and Realities. (2)** Examination of change from when science was done by individuals as an avocation without societal goals to contemporary science which is done by professionals and is driven by societal needs and pressures. P/NP or letter grading.

**M88H. Lower Division Seminar: Limits of Biological Design through Physical Principles. (4)** (Same as Physics M88.) Seminar, three hours. Enforced prerequisites: Chemistry 20A, 20B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or 6A, 6B, and 6C. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. P/NP or letter grading.

## Upper Division Courses

**100. Introduction to Cell Biology. (5)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L, Life Sciences 3, 4. Not open for credit to students with credit for course C139 or M140. Analysis of cell organization, structure, and function at molecular level. Cell membranes and organelles, membrane transport, cellular signaling, cytoskeleton and cell movement, intracellular trafficking, cell energetics. Letter grading.

**104. Cell and Molecular Biology Laboratory. (6)** Lecture, 90 minutes; discussion, one hour; laboratory, eight hours. Requisites: Life Sciences 3, 4. Introduction to methods in molecular biology. Topics include purification, manipulation and analysis of DNA, RNA, and protein. Emphasis on computer sequence analysis and use of current literature. May not be repeated for credit. Letter grading.

**CM133. Principles, Practices, and Policies in Biotechnology. (2)** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, and Microbiology and Immunology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**138. Developmental Biology. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Cellular and molecular basis of animal embryology. Letter grading.

**C139. Molecular, Cellular, and Developmental Neurobiology. (6)** Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotrophic factors. Concurrently scheduled with course CM220. Letter grading.

**M140. Cell Biology: Cell Cycle. (5)** (Same as Biological Chemistry M140.) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L, Life Sciences 3, 4. Not open for credit to students with credit for course 100 or C139. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion. Letter grading.

**C141. Molecular Basis of Plant Differentiation and Development. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C239. Letter grading.

**142. Seminar: Topics in Developmental Biology. (2)** Requisite: course 138. Undergraduate seminar on topics in developmental biology. Reading and group discussions on current research. P/NP or letter grading.

**144. Molecular Biology. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open for credit to students with credit for Chemistry 153B or Organismic Biology 121. Structure of genes and chromosomes; prokaryotic and eukaryotic replication and transcription; repair and recombination; RNA processing. Letter grading.

**C150. Plant Chemical and Molecular Communication. (4)** Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C250.

**155. Molecular Genetic Methods. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours. Recommended preparation: course 104. Designed for and limited to Molecular, Cell, and Developmental Biology majors for priority pass and first pass. Gene mapping and detection and analysis of gene variants by means of inheritance patterns. Letter grading.

**CM156. Human Genetics. (4)** (Same as Human Genetics CM156 and Microbiology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

**CM160. Biological Catalysis. (4)** (Same as Chemistry CM155.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM252.

**165. Biology of the Cell. (5)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14 or 20 series, Life Sciences 3, 4. Methods to study cell. Structural, functional, and molecular aspects of cell membrane, mitochondria, chloroplasts, peroxisomes, lysosomes, Golgi, endoplasmic reticulum, and nucleus. Cell cycle regulation. Cell-cell and cell-matrix interactions. Cell motility. Cellular alterations during differentiation programs, tissue architecture, and organogenesis. Pathological alterations in response to cellular transformation, oncogenes, and anti-oncogenes. Letter grading.

**CM169. Cell Structure, Signaling, and Differentiation. (6)** (Same as Biological Chemistry CM169 and Human Genetics CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM223. Letter grading.

**M170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4)** (Same as Chemistry CM170.) Lecture, two to three hours; discussion, zero to two hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3, and Chemistry 153L. Recommended: Chemistry 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. P/NP or letter grading.

**171. Principles of Neurobiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, Organismic Biology M166. Strongly recommended: course 100 or C139 or M140. Introduction to basic principles of neurobiology, including description of structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information transduction and coding in sensory pathways, and neural control of movement; development of and trophic interactions between cells of nervous system.

**C172. Molecular Genetics of Bacteria and Phage. (4)** Lecture, three hours; discussion, one hour. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course CM207.

**C174A-C174G. Advanced Topics in Cell and Molecular Biology. (2 each)** (Formerly numbered C174A-C174F.) Lecture. Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C222A-C222G. Letter grading:

**C174A. Molecular Evolution. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Letter grading.

**C174B. Molecular Biology of Cell Nucleus. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Letter grading.

**C174D. Molecular Biology of Extracellular Matrix. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation. Letter grading.

**C174G. Signal Transduction by G-Protein Coupled Receptors. (2)** Lecture, one hour; discussion, one hour. Requisites: course 100 or C139 or M140, Life Sciences 3, 4. Introduction to G-protein mediated signal transduction as used by sensory, neurotransmitter, and many hormones receptors that alter intracellular second messengers. Structure and functions of molecules that participate in signal transduction via G proteins (receptors, G proteins, effectors), with emphasis on original experiments leading to present concepts. Letter grading.

**M175A-M175B-M175C. Neuroscience: From Molecules to Mind. (5-5-5)** (Same as Neuroscience M101A-M101B-M101C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading:

**M175A. Cellular and Systems Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A or former course 10D or 30 (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C– or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

**M175B. Molecular and Developmental Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Prerequisites: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

**M175C. Behavioral and Cognitive Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Prerequisite: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

**M176. Advanced Topics in Animal Virus/Host Interaction. (4)** (Formerly numbered 176.) (Same as Microbiology M176.) Lecture, four hours; discussion, one hour. Prerequisites: Life Sciences 3, 4. Recommended: course 144 or Chemistry 153B or Microbiology 102. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. P/NP or letter grading.

**C177. Molecular Biology of Animal Viruses. (4)** Lecture, three hours. Prerequisites: Chemistry 153B, Life Sciences 3. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course CM279.

**CM178. Molecular Genetics. (6)** (Same as Biological Chemistry CM178 and Human Genetics CM178.) Lecture, five hours. Prerequisites: course 100 or C139 or M140, Chemistry 153A, 153B, Life Sciences 3, 4. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**C180. Molecular and Cellular Immunology. (6)** Lecture, four and one-half hours; discussion, 90 minutes. Prerequisites: course 100 or C139 or M140, Chemistry 153A, Life Sciences 3. Not open for credit to students with credit for former course M185A. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course CM261.

**CM185B. Intermediate Immunology. (4)** (Same as Microbiology CM185B.) Lecture, three hours; discussion, one hour. Prerequisite: course C180 or M185A. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

**189. Seminar: Social Implications of Current Biological Research. (2)** Seminar, two hours. Discussions about how current research in biology, particularly in areas of molecular, cell, and developmental biology, affects social issues and policy. May be repeated once for credit; however, only 2 units of this course or Organismic Biology 188 may be applied toward either the Biology or Molecular, Cell, and Developmental Biology major. Letter grading.

**190A-190D. Research in Molecular, Cell, and Developmental Biology. (2 to 4 each)** Seminar, to be arranged. Limited to seniors. Individual research designed to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken with Molecular, Cell, and Developmental Biology Department faculty for at least two terms and for a total of at least 8 units. In Progress and letter grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken.

**190HA-190HD. Honors Research in Molecular, Cell, and Developmental Biology. (4 each)** (Formerly numbered 190A-190D.) Laboratory, 16 hours. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Individual honors research project under direct supervision of approved faculty member to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken for at least three terms and for a total of 12 units. In Progress and letter grading (credit to be given only on completion of course 190HB). A report on progress must be presented to undergraduate adviser each term a 190H course is taken. Letter grading (courses 190HC-190HD).

**M191. Biological Bases of Psychiatric Disorders. (4)** (Same as Neuroscience M130, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Prerequisite: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**193. Teaching Practicum in Molecular, Cell, and Developmental Biology. (1 to 4)** Tutorial, to be arranged. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Training and supervised practicum for advanced undergraduates in teaching courses related to molecular, cell, and developmental biology. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology major. May be repeated once for credit. P/NP or letter grading.

**M194. Undergraduate Seminar: Current Topics in Biomedical Sciences. (2)** (Same as Organismic Biology M194 and Physiological Science M194.) Seminar, two hours. Designed for juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**197. Undergraduate Seminar: Current Topics in Molecular, Cell, and Developmental Biology. (2)** Seminar, two hours. Designed for juniors/seniors. Intended for students with strong commitment to pursue graduate studies in molecular, biochemical, physiological, and biomedical fields. Weekly variable topics course with presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**199. Special Studies. (2 to 16)** Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than 8 units of course 199 in any one term must obtain authorization from department chair and appropriate dean.

## Graduate Courses

**M201. Use of the Computer in Biology. (2)** (Same as Human Genetics M201 and Microbiology and Immunology M241.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

**CM207. Molecular Genetics of Bacteria and Phage. (4)** (Same as Chemistry M227, Microbiology M227, and Microbiology and Immunology M227.) Lecture, three hours; discussion, one hour. Prerequisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course C172.

**M217. Basic Science and Strategies of Gene Therapy. (2)** (Same as Microbiology and Immunology M217 and Microbiology M217.) Preparation: basic knowledge of virology. Basic science and viral vector systems utilized for gene therapy. S/U grading.

**CM220. Molecular, Cellular, and Developmental Neurobiology. (6)** (Same as Neurobiology M200B and Physiology M209A.) Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotrophic factors. Concurrently scheduled with course C139. Letter grading.

**C222A-C222G. Advanced Topics in Cell and Molecular Biology. (2 each)** (Formerly numbered C222A-C222F.) Lecture. Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C174A-C174G. Letter grading:

**C222A. Molecular Evolution. (2)** Lecture, two hours. Prerequisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Original research proposal required. Letter grading.

**C222B. Molecular Biology of Cell Nucleus. (2)** Lecture, two hours. Prerequisites: courses 100 or C139 or M140, 144, Life Sciences 4. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Original research proposal required. Letter grading.

**C222D. Molecular Biology of Extracellular Matrix. (2)** Lecture, two hours. Prerequisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation. Original research proposal required. Letter grading.

**C222G. Signal Transduction by G-Protein Coupled Receptors. (2)** Lecture, one hour; discussion, one hour. Prerequisites: course 100 or C139 or M140, Life Sciences 3, 4. Introduction to G-protein mediated signal transduction as used by sensory, neurotransmitter, and many hormones receptors that alter intracellular second messengers. Structure and functions of molecules that participate in signal transduction via G proteins (receptors, G proteins, effectors), with emphasis on original experiments leading to present concepts. Letter grading.

**CM223. Cell Structure, Signaling, and Differentiation. (6)** (Same as Biological Chemistry CM267, Chemistry M267, and Human Genetics CM267.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

**M226A-M226B. Principles of Microbial Pathogenesis. (4-4)** (Same as Microbiology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

**228. Prokaryotic and Eukaryotic Gene Systems. (2)** Presentations concerning current experimental approaches in study of DNA replication, organization, transcription, and translation.

**M229. Cellular Biology of Host/Pathogen Interactions. (6)** (Same as Microbiology M229 and Microbiology and Immunology M229.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

**M230B. Structural Molecular Biology. (4)** (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

**M230D. Structural Molecular Biology Laboratory. (2)** (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

**CM233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, and Immunology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Genetic Control of Development. (4)** (Same as Biological Chemistry M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

**M237. Introduction to Cellular Physiology and Biophysics. (6)** (Same as Physiological Science M212 and Physiology M212.) Lecture, five hours. Requisite: Physiological Science 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**C239. Molecular Basis of Plant Differentiation and Development. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and presentation of term paper, in addition to other coursework, required of graduate students. Letter grading.

**M240. Cytokines and Reproductive Biology. (2)** (Same as Microbiology M240 and Microbiology and Immunology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

**242. Topics in Neurobiology. (4)** Lecture, three hours. Requisite: course 171. Selected current problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.

**M246. Computer Analysis of Genetic Organization. (4)** (Same as Microbiology M246 and Microbiology and Immunology M246.) Lecture, two hours; laboratory, six hours. Requisite: Life Sciences 4 or Microbiology C159. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

**CM248. Molecular Genetics. (6)** (Same as Biological Chemistry CM248, Human Genetics CM248, and Microbiology M248.) Lecture, five hours. Requisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

**C250. Plant Chemical and Molecular Communication. (4)** Lecture, three hours; discussion, one hour. Designed for graduate students. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C150.

**CM252. Biological Catalysis. (4)** (Same as Biological Chemistry M255, Chemistry CM255, and Pharmacology M255.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM160. Graduate students required to write research paper and present oral report on it. Letter grading.

**254. Seminar: Plant Morphogenesis. (2)** Seminar, two hours. S/U or letter grading.

**255. RNA Editing. (4)** Lecture, two hours; discussion, one hour. Preparation: knowledge of molecular biology and molecular genetics. Discussion of diverse set of novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type of editing in trypanosome mitochondria, C to U substitution editing in apo B mRNA and plant mitochondria, C insertion editing in Physarum mitochondria, etc. Discussion of mechanism, function, and evolution of these phenomena.

**CM256. Human Genetics. (4)** (Same as Human Genetics CM256 and Microbiology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

**CM261. Molecular and Cellular Immunology. (6)** (Same as Microbiology M261 and Microbiology and Immunology M261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course C180. Oral presentation required of graduate students. S/U or letter grading.

**M266A-M266B-M266C. Seminars: Molecular Embryology. (2-2-2)** (Same as Biological Chemistry M266A-M266B-M266C.) Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

**276. Seminar: Molecular Genetics. (2)** Topics vary each term.

**277. Seminar: Genetics. (2)** Seminar, two hours. S/U or letter grading.

**278. Seminar: Molecular Genetics of Development. (2)** Designed for graduate students. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading.

**CM279. Molecular Biology of Animal Viruses. (4)** (Same as Microbiology and Immunology M208.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course C177.

**281. Seminar: Molecular Biology. (2)** Seminar, two hours. S/U or letter grading.

**283. Seminar: Topics in Cell Biology. (2)** Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function.

**284. Seminar: Structural Macromolecules. (2)** Seminar, one hour; discussion, three hours. Presentation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology.

**CM285. Intermediate Immunology. (4)** (Same as Microbiology CM285 and Microbiology and Immunology M285.) Lecture, three hours; discussion, one hour. Requisite: course C180 or M185A. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

**286. Seminar: Plant Development. (2)** Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

**289. Current Topics in Plant Molecular Biology. (2)** Discussion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

**292. Seminar: Molecular Evolution. (2)** Discussion, three hours. Detailed analysis of current understanding of evolution of molecular sequences and structures.

**295. Seminar: Molecular, Cell, and Developmental Biology. (2)** Seminar, two hours. In-depth surveys of recent developments in molecular, cell, and developmental biology research. Reading and presentation of primary research articles to learn to critically evaluate research papers and to organize and present seminars on specific research topics. S/U or letter grading.

**296. Advanced Topics in Molecular, Cellular, and Developmental Biology. (2)** Discussion, three hours. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**297. Advances in Molecular Analysis of Plant Development and Plant/Microbe Interactions. (2)** Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant/microbe interactions. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Molecular, Cell, and Developmental Biology in Higher Education. (2)** Seminar, two hours. Designed for graduate students. Study of problems and methodologies in teaching molecular, cell, and developmental biology, including workshops, seminars, apprentice teaching, and peer observation. S/U grading.

- 596. Directed Individual (or Tutorial) Studies. (2 to 12)** Tutorial, to be arranged. S/U grading.
- 597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.
- 598. M.A. Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.
- 599. Ph.D. Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

## MOLECULAR, CELLULAR, AND INTEGRATIVE PHYSIOLOGY

*Interdepartmental Program

Hal Yee, M.D., Ph.D., *in Residence (Physiology)*

## Scope and Objectives

Physiology is the study of the functional processes that collectively constitute life. The studies usually employ quantitative analyses of normal life processes, of pathological defects in normal life processes, of model systems to clarify and test basic physiological principles, and of functional specializations of organisms that have evolved under the influence of differing selective forces. Thus, physiology contributes importantly to advances in knowledge both in the basic biological sciences and in biomedical sciences and provides an essential foundation for the practice of medicine.

The primary objective of the interdepartmental Molecular, Cellular, and Integrative Physiology Program is to train a new generation of physiologists who apply modern knowledge in molecular and cellular biology and systems physiology to important questions in organismic function. Students learn to conceptualize physiological questions across several levels of organization and to understand how research strategies incorporating each of the levels of analysis can be formulated. This approach to physiology education is responsive to the need for physiologists who can intellectually and technically span disciplines related to physiology that are typically separated.

Coursework consists of formal instruction in the most current information in molecular biology, cell biology, and the molecular and cellular foundations of physiology. In addition, students identify an area of emphasis in biophysics, cellular and molecular biology, or integrative/comparative physiology in which additional studies are pursued. The heart of the program, however, is the research that leads to the dissertation, which is performed under the guidance of a faculty mentor. The program faculty includes more than 40 professors in the School of Medicine and College of Letters and Science. Collectively they have been recently ranked by the National Research Council in the top five in the U.S. for their quality as an academic faculty.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Molecular, Cellular, and Integrative Physiology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular, Cellular, and Integrative Physiology.

## Admission

Applicants interested in the Ph.D. program may apply directly to the interdepartmental program or may apply through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu). Students admitted through UCLA ACCESS complete one year of graduate study that includes coursework in cellular and molecular biology and research ethics prior to admission to the interdepartmental program. Coursework completed through ACCESS is credited toward the Ph.D. program. In addition, STAR program participants are admitted if their research mentor is on the interdepartmental program training faculty.

Successful applicants must meet the University's general graduate admission requirements and usually hold a bachelor's degree in a biological or physical science. Prior to matriculation, applicants generally are expected to have completed college coursework in mathematics though calculus, college physics, general chemistry, organic chemistry, biochemistry, and biology. Courses in cell and molecular biology are recommended. Applicants who lack preparation in a recommended course, but who otherwise have outstanding academic records, may be admitted to graduate status provided that they make up the deficiencies.

Applicants must submit (1) transcripts of grades for all college coursework, (2) results of the Graduate Record Examination (GRE) General Test and Subject Test in Biology or in the undergraduate major (applicants who hold the M.D. may submit Medical College Admission Test scores in lieu of GRE scores), (3) at least three letters of recommendation, and (4) an essay describing academic background, work experience, and motivation for research and career goals. Students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the Interna-

tional English Language Testing System (IELTS) examination.

Selected applicants are invited to interview with members of the faculty and graduate student representatives. The graduate program committee decides on admission based on the application information, recommendation of the interviewers, and availability of appropriate training faculty and financial support for applicants.

## Doctoral Degree

Major fields/subdisciplines include biophysics, cellular and molecular physiology, and integrative/comparative physiology.

Students complete two years of coursework. The first year consists of approved graduate coursework in molecular biology, cellular biology, research ethics, and physiology (the ACCESS curriculum meets this requirement). Students who hold graduate or professional degrees (e.g., M.S., M.D., D.D.S) may be exempt from first-year coursework if previously completed coursework is substantially similar. The second year consists of three additional courses related to the students' research interests.

Students are required to complete two quarters as a teaching assistant. Advanced students, such as STAR or MSTP program participants or those who hold the M.S. degree, may be exempt from this requirement.

Written and oral qualifying examinations are required. The written examination is based on the students' ability to read and critically evaluate research reports in their selected subdiscipline. Following successful completion of the written examination, students take the University Oral Qualifying Examination, the purpose of which is to determine their ability to formulate research questions in physiology and test ability to design testable hypotheses and experimental protocols relevant to the research questions, as well as to review the dissertation project. Following completion of the examinations, there is a midstream oral presentation in which progress on the research project is reviewed by the dissertation committee.

Wendie A. Robbins, Ph.D., M.S.N. (*Environmental Health Sciences, Nursing*)

## Scope and Objectives

Faculty from a variety of departments and schools at UCLA, including Biological Chemistry, Chemistry and Biochemistry, Environmental Health Sciences, Epidemiology, Medicine, Molecular and Medical Pharmacology, and Pathology and Laboratory Medicine, have joined forces to create an interdisciplinary Ph.D. program in Molecular Toxicology. The program is designed to train multidisciplinary professionals in molecular toxicology, as well as to develop linkages between researchers and educators in the basic biological and chemical sciences with faculty whose interests are in toxicology. There is a particular emphasis on mechanisms of toxicity.

The program is administered through the School of Public Health, where the existing toxicology concentration in the Department of Environmental Health Sciences has been expanded. Program faculty and students seek to address problems of societal significance in California related to public exposure to toxic chemical agents in the environment, from foods and therapeutic drugs to other lifestyle exposures, and to investigate gene-environment interactions that have toxicologic significance. Specialties within the program include, but are not limited to, neurotoxicology, immunotoxicology, reproductive and developmental toxicology, genetic toxicology, toxicokinetics and metabolism, genetics and molecular biology, carcinogenesis, and environmental toxicology.

Toxicology is a discipline that is central to the long-term development of environmental pro-

grams in the next century. The traditional training programs in the University are changing to better address societal need and to provide the highest level of intellectual leadership. Whether and how to address chemical toxicity is now recognized as a chief limitation in the ability to stimulate growth and new technological change. The training of new scientists equipped with skills to address toxicologic issues and who also understand the multidisciplinary nature of the problems is key to our long-term progress as a society.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Molecular Toxicology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Toxicology.

## Admission

A master's degree is not a requisite for admission. In addition to meeting University minimum standards, applicants must have an excellent record, perform satisfactorily on the Graduate Record Examination (GRE), have completed a minimum of a 4-unit undergraduate course in statistics, and be acceptable to the admissions committee.

The ideal training for an undergraduate is either a major in Chemistry or Biology and a solid background in both of these disciplines. Courses of value for toxicologists include the following: calculus, statistics, cell biology, genetics, physiology, microbiology, molecular biology, inorganic chemistry, organic chemistry, biochemistry, and physical chemistry. However, excellent students from all disciplines are considered for admission and, if admitted, can make up deficiencies during their graduate study.

Students who apply directly to the program do so through an application process in the School of Public Health. Applications are accepted for Fall Quarter only. The deadline is January 30 for admission for the following Fall. Completed applications consist of the *UCLA Application for Graduate Admission*, the School of Public Health supplemental application, two official copies of transcripts, three letters of recommendation, GRE General Test scores, and a statement of purpose. International applicants whose native language is not English must also submit results from the Test of English as a Foreign Language (TOEFL) or

International English Language Testing System (IELTS) examination.

Students who apply through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences (172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, 310-206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu)), a standard first-year biomedical curriculum that allows entry into a department in the second year, declare Molecular Toxicology as their preferred major at the end of the first year, submit a supplemental Public Health application and, once accepted, a change of major form.

## Doctoral Degree

During the first year all Ph.D. students follow the UCLA ACCESS curriculum. In all quarters of the first year students take a 2-unit seminar and a 6-unit laboratory rotation within the department of a faculty sponsor. In Fall Quarter of the second year students take two required courses in molecular toxicology. Beginning with the second year students spend most of their time on dissertation research.

All students serve as teaching assistants or readers for two quarters.

Written and oral qualifying examinations are required. The written examination consists of a research proposal, the topic of which cannot be closely related to the dissertation topic.

Following successful completion of the proposal, students take the University Oral Qualifying Examination, which is organized to question them regarding the proposal and in general regarding scientific topics that should be common knowledge to a doctoral-level toxicologist.

## Scope and Objectives

Students interested in a concentration in music history and literature should consider the majors in Music History and Musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in Ethnomusicology offered through the School of the Arts and Architecture.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group perfor-

mance. Given in the context of a liberal education, this provides a foundation for an academic or professional career and affords valuable cultural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degrees of Master of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.

## Undergraduate Study

### Music B.A.

#### Admission

All applicants for admission and change of major are required to pass an audition in their principal performing medium.

#### Preparation for the Major

*Required:* Music 20A, 20B, 20C, 12 units from courses 60A through 65, two years (12 units) of performance organizations (courses C90A through 90N) for a letter grade, Music History 26A, 26B, 26C. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N. Students must participate in a minimum of two different organizations over the course of their stay at UCLA. In addition, they are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

#### The Major

*Required (for all concentrations except composition and jazz studies):* A minimum of 48 upper division units, including Music 120A, 120B, 120C, Music History 126A, 126B, 126C, and six courses selected from one of the concentrations listed below.

*Composition:* A minimum of 65 upper division units, including Music 104A or 104B, 106A, 106B, 116, 120A, 120B, 120C (accelerated sections), 123A, 123B, 123C, 124A or 124B or 124C, C176, and at least 8 elective units selected from courses 101, 104A or 104B (if not already taken), 117, 118A, 118B, additional terms of 123A, 123B, 123C, 124A or 124B or 124C (if not already taken), 156, 199, Ethnomusicology 117, 128, C136A, C136B, 146, C156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 181. A senior recital, to include at least 30 minutes of original music, is also required (exceptions by petition only).

*Music Education:* Music 100A, 100B, 100C, 116, 117, 8 units from courses 115A through 115E. Students are encouraged to take additional coursework from 112A, 112B, 118A, 118B, 199, Ethnomusicology 170, 172B, 174 as their schedules allow. They are required to en-

roll in the type of performance organizations (courses C90A through 90N; 90M may be used in Fall Quarter only) that they plan to teach. In addition, if they intend to teach instrumental music, they are encouraged to select three terms of choral organizations (courses C90A, 90B, 90C, 90J, or 90K); if they intend to teach general music, they are encouraged to elect three terms of ethnomusicology performance organizations (Ethnomusicology 91A through 91Z).

*Performance:* Twelve units in performance instruction from Music 160A through 165 (including junior and senior recital requirements), 4 units of chamber ensembles (Music C175), 4 units of elective courses from 101, 106B, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 199, Music History 127A through 127G, 130, 133, 134, 135A, 135B, 135C, 139, Ethnomusicology M108A, 108B, 120A, 120B, 121, 170, and one upper division elective course in music. During each term in which students take private lessons, they must participate in a performance organization for a letter grade. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N.

*Theory:* Music 120C and six courses selected in consultation with a faculty adviser.

## Jazz Studies Concentration

### Preparation for the Major

*Required:* Music 20A, 20B, 20C, 12 units from courses 60A through 65 or 12 units of course 71, two years (12 units) of performance organizations (courses C90A through 90N) for a letter grade, Music History 26A, 26B, 26C.

### The Major

*Required:* Music 120A, 120B, 120C, M127, M129A, M129B, M129C, M186, 12 units of course M177, Ethnomusicology M110A, Music History 126A, 126B, 126C, 150.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Music offers the Master of Music (M.M.) degree, Doctor of Musical Arts (D.M.A.) degree, and Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Music.

## Admission

### M.A. in Music

Applicants to the M.A. program must have completed a B.A. degree, or its equivalent, in Music. Other fields of study are accepted if applicants have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants are required to (1) take a departmental assessment examination, (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music, (3) submit three letters of recommendation from former instructors and/or professionals with whom applicants have worked, and (4) submit written examples of work. For composition, musical scores of at least three compositions must be submitted.

No application can be considered until the departmental assessment examination has been taken and all of the above materials have been received.

The assessment examination for the M.A. is administered at Schoenberg Music Building on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed below. Information is included in the applicant's packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by each area to assess the applicant's potential as a graduate student in that field at UCLA.

### Master of Music

Applicants to the M.M. program must have completed a B.A. degree, or its equivalent, in Music. Other fields of study are accepted if applicants have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants are required to (1) submit a statement of purpose which also includes a description of their background of study, (2) submit three letters of recommendation from former instructors and/or professionals with whom the

applicants have worked, and (3) perform an audition. A repertoire list, summary of recent performances, and sample recital programs are also required.

The placement examination, which is administered during the week before classes start in Fall Quarter, is required of all new M.M. students and covers theory, musicianship skills, and music history. Those who do not pass any portion are required to do remedial work which must be completed by the end of the first year.

### Ph.D. in Music

Applicants to the Ph.D. program must have completed an M.A. degree in Music (or the equivalent degree). The degree normally should have been taken in the same field of concentration as the proposed Ph.D. If applicants wish to obtain a Ph.D. in a field other than that of the M.A., additional coursework, as prescribed by the area, must be completed.

Applicants are required to (1) take a departmental assessment examination, (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music, (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked, and (4) submit written examples of work. For composition, musical scores of at least three compositions are required. Applicants should submit their M.A. thesis or composition, if possible.

No application can be considered until the assessment examination has been taken and all of the required materials have been received.

The assessment examination for the Ph.D. is administered at Schoenberg Music Building on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed below. Information is included in the applicant's packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by each area to assess the applicant's potential as a graduate student in that field at UCLA.

### Doctor of Musical Arts

Applicants to the D.M.A. program are required to (1) submit a statement of purpose which also includes a description of their background of study, (2) submit three letters of recommendation from former instructors and/or professionals with whom the applicants have worked (for the D.M.A. the Music Department is especially interested to hear from persons who can speak to the applicant's academic potential), (3) submit a sample seminar or research paper, and (4) perform an audition. A repertoire list, summary of recent perfor-

mances, and sample recital programs are also required.

No application can be considered until the audition has been taken and all of the required materials have been received.

The placement examination, which is administered during the week before classes start in Fall Quarter, is required of all new D.M.A. students and covers theory, musicianship skills, and music history. Those who do not pass any portion are required to do remedial work which must be completed by the end of the first year.

### Admission Timetable

Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Examination/audition is administered.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due.

Early April — Examination is administered.

By May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

## Master's Degrees

### M.A. in Music

The department offers the M.A. degree in the field of composition.

The M.A. degree is offered through the thesis plan. Students are required to complete a minimum of nine courses, five of which must be at the 200 level. In addition to the thesis, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Students are responsible for the campus presentation of one original work during each year of residency.

There is a language requirement for this degree.

### Master of Music

The department offers the M.M. degree in all classical solo instruments, voice, and conducting.

The M.M. degree is offered through the comprehensive examination plan. The examination takes the form of a master's recital. Students are required to complete a minimum of 68 required and elective units of coursework, all at the graduate and professional level. There are specific course requirements for instrumental/vocal performance and conducting. The department provides a maximum of six

quarters of enrolled private instruction in performance.

There is a language requirement for this degree.

## Doctoral Degrees

### Ph.D. in Music

The department offers the Ph.D. degree in the field of composition and in the field of composition with a cognate in ethnomusicology.

Students may petition to their area on the advice of their graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level. If students are in the program in composition with the cognate in ethnomusicology and have had no prior coursework in ethnomusicology, they are required to take a graduate course sequence in ethnomusicology. They are also encouraged to participate in the ethnomusicology performance organizations.

Students may complete the residence requirement by electing courses recommended by the graduate adviser from the 200- or 100-level course requirements for the M.A. degree. In addition to the dissertation, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Students are responsible for the campus presentation of one original work during each year of residency.

Written and oral qualifying examinations are required. The six written examinations are in style composition, the general history of music, analysis of form and style, twentieth-century music, and two or more from: acoustics, aesthetics, psychology of music, ethnomusicology, or music theory from the medieval period to the present with an optional emphasis on theoretical writings before or after 1700. Students with a cognate in ethnomusicology have some variations on the areas.

Following successful completion of the written examinations, a departmental oral qualifying examination is scheduled. After successful completion of the written and departmental oral qualifying examinations and the language requirement, students submit the dissertation topic and take the University Oral Qualifying Examination.

There is a language requirement for this degree.

### Doctor of Musical Arts

The department offers the D.M.A. degree in all classical solo instruments, voice, and conducting.

Students are required to complete a minimum of 102 units, all at the graduate and professional level. There are specific requirements in instrumental/vocal performance and conducting and one elective. Students who received the M.M. at UCLA are expected to complete at least 32 additional units and two recitals beyond the M.M. requirements, subject to the specific requirements of their area of specialization.

The department provides a maximum of nine quarters of enrolled private instruction in performance. Students who were admitted to the program with a master's degree from another institution may petition for up to a year of private lessons (18 units) and 12 units of academic courses to be applied to D.M.A. requirements.

Written and oral qualifying examinations and two preliminary recitals are required. The written examinations cover material in a required three-quarter core sequence, one of the performance practice seminars, and the appropriate pedagogy course.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination, which consists of a defense of the final recital repertoire dissertation topic.

There is a language requirement for this degree.

## Music

### Lower Division Courses

**1A-1B. Fundamentals of Music. (4-4)** Lecture, three hours; discussion, two hours. Designed for nonmusic majors. P/NP or letter grading. **1A.** Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. **1B.** Requisite: course 1A. Diatonic harmony; four-part writing, including inversions, sevenths, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

**3. Preparatory Music Theory for Music Majors. (4)** (Formerly numbered 3A-3B.) Lecture, four hours; laboratory, one hour. Limited to Music majors. Course for Music majors in music fundamentals, including musicianship, theory, and terminology. Letter grading.

**4A-4B-4C. Basic Musicianship. (2-2-2)** Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

**8G. Graduate Piano Sight-Reading. (2)** Limited to graduate students. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.

**10. Computer-Assisted Sight-Singing Laboratory. (2)** Lecture, two hours; laboratory, one hour. Requisite: course 1A. Individualized, self-instructional approach for development of sight-singing skills through use of a music computer, keyboard instrument, and linear program learning.

**12A-12B. Counterpoint. (2-2)** Lecture, four hours. **12A.** Preparation: music theory placement examinations. 16th-century modal counterpoint in two parts, including writing of motets. **12B.** Requisites: courses 20A, 20B, 20C. 18th-century tonal counterpoint in two parts, including writing of inventions.

**15. Art of Listening. (4)** Lecture, three hours; laboratory, one hour. Acquisition of listening skills through direct interaction with live performance, performers, and composers. Relationship of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice.

**19. Hollywood Musical and the American Dream. (4)** Lecture, three hours; discussion, one hour. Examination of composers, writers, and filmmakers whose creative efforts changed how the world came to view the American dream. Full features and music clips illustrate American life as seen through the Hollywood musical. P/NP or letter grading.

**20A. Music Theory I. (4)** Lecture, two hours; discussion, six hours. Preparation: passing score on departmental examination. Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: interval recognition; fixed-do solfège of diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-compass, note-against-note melodies; simple rhythmic dictation; use of treble, alto, and bass clefs.

**20B. Music Theory II. (4)** Lecture, four hours; discussion, four hours. Requisite: course 20A with a grade of C or better. Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. Musicianship: harmonic dictation, including secondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic one-part dictation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

**20C. Music Theory III. (4)** Lecture, four hours; discussion, four hours. Requisite: course 20B with a grade of C or better. Theory: chromatic harmony including development of tonality, 1800 to 1850; appropriate analysis and style composition. Musicianship: advanced sight-singing; two-part contrapuntal dictation; keyboard harmony (harmonic sequences in major and minor keys); reading in open score of four homophonic parts in four clefs.

**23. Composition Workshop. (2)** Requisites: courses 20A, 20B, 20C. Introductory composition course which provides compositional experiences at a basic level. May be repeated once for credit.

**60A-65. Undergraduate Instruction in Performance. (2 each)** Limited to Music majors (all freshman/sophomore majors, and junior/senior majors not in performance specialization). Individual instruction of one hour per week. Students must perform in a practicum once during academic year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. **60A.** Violin; **60B.** Viola; **60C.** Cello; **60D.** String Bass; **60E.** Harp; **60F.** Classical Guitar; **60G.** Viola da gamba; **60K.** Lute; **61A.** Flute; **61B.** Oboe; **61C.** Clarinet; **61D.** Bassoon; **61E.** Saxophone; **62A.** Trumpet; **62B.** French Horn; **62C.** Trombone; **62D.** Tuba; **63.** Percussion. **64A.** Piano; **64B.** Organ; **64C.** Harpsichord; **65.** Voice.

**71. Instruction in Jazz Performance. (2)** Laboratory, one hour. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for a maximum of 12 units.

**80F. Beginning Guitar Class. (4)** Laboratory, five hours; preparation/practice, seven hours. Introduction to guitar techniques, accompanying, and arranging for the instrument; coverage of note reading and tablature. Offered in summer only. P/NP or letter grading.

**C90A. UCLA Chorale. (2)** Activity, four hours. Preparation: audition. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C480. P/NP or letter grading.

**90B. Collegiate Chorus. (2)** Nonaudition mixed chorus of 50 to 150 voices performing medium- and concert-length choral works from baroque to the present. Collegiate Chorus performs only as part of "Choral Union," a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

**90C. Chamber Singers. (2)** Activity, three hours. Preparation: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

**90D. Opera Workshop. (2)** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

**C90E. Symphony Orchestra. (2)** Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C481. P/NP or letter grading.

**90F. Symphonic Band. (2)** Preparation: audition. Group performance of instrumental music scored for band. May be repeated for credit without limitation. P/NP or letter grading.

**C90G. Wind Ensemble. (2)** Activity, four hours. Preparation: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C482. P/NP or letter grading.

**90H. Collegium Musicum. (2)** Activity, three hours. Preparation: audition. Group performance of vocal and instrumental music of medieval, Renaissance, and baroque eras on period instruments. May be repeated for credit without limitation. P/NP or letter grading.

**90J. Men's Glee Club. (2)** Activity, three hours. Preparation: audition. Select male chorus of 40 to 45 voices performing male choral music of all periods, with emphasis on popular and folk arrangements. May be repeated for credit without limitation. P/NP or letter grading.

**90K. Women's Chorus. (2)** Activity, three hours. Preparation: audition. Select female chorus of 45 to 55 voices performing treble choral music of all periods, with emphasis on music after 1750. May be repeated for credit without limitation. P/NP or letter grading.

**90L. Music Theater Workshop. (2)** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete musical theater productions, including repertoire and stage movement coaching. May be repeated for credit without limitation. P/NP or letter grading.

**90M. Marching and Varsity Bands. (2)** Activity, four hours. Preparation: audition. Group performance of special band arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading.

**90N. Jazz Ensemble. (2)** Activity, three hours. Preparation: audition. Group performance of jazz and popular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading.

**90P. Alexander Technique. (2)** Activity, two hours; outside preparation and practice, four hours. Limited to Music majors. Introduction to principles of Alexander technique. Study of musician's postural attitude at the instrument. Designed to help instrumentalists and vocalists prevent injuries and performance anxiety. May be repeated with consent of instructor. P/NP grading.

## Upper Division Courses

**100A-100B-100C. Music in American Education. (4-4-4)** Lecture, four hours; laboratory, one hour. Requisites: courses 20A, 20B, 20C, 116, 120A, 120B, 120C, Music History 26A, 26B, 26C. Critical study and analysis of philosophy, history, organization, curriculum, and literature of music programs for elementary and secondary schools in American education. Each course may be taken independently for credit. Letter grading. **100A.** General Music; **100B.** Choral Music; **100C.** Instrumental Music.

**101. Advanced Keyboard Harmony and Score Reading. (4)** Requisite: course 120B. Intensive individual work in keyboard harmony and reading of chamber and orchestral scores. May be repeated once for credit.

**102. Instrumentation. (4)** Lecture, three hours. Requisite: course 120B with a grade of C (2.0) or better. Not open for credit to students with credit for course 106A. Designed for Music majors in specializations other than composition. Ranges and characteristics of instruments, exercises in scoring.

**104A. Modal Counterpoint. (3)** Lecture, three hours. Requisite: course 120C (accelerated section). In-depth exploration of styles and techniques of counterpoint of 15th and 16th centuries through writing and analysis of important forms of the period, including species, canon, free counterpoint, cantus, firmus, point of imitation, motet, ricercare, etc. Letter grading.

**104B. Special Topics in Counterpoint. (3)** Lecture, three hours. Requisite: course 120C (accelerated section). In-depth exploration of polyphonic styles and textures since 1750, with emphasis on late-19th- and 20th-century modes of expression, through writing and analysis. Letter grading.

**105. Introduction to Composition. (4)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Designed for Music majors in specializations other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

**106A. Orchestration I. (4)** Discussion, three hours. Requisites: courses 120C (accelerated section), 123C. Ranges and characteristics of instruments, with exercises in scoring. P/NP or letter grading.

**106B. Orchestration II. (4)** Discussion, three hours. Requisites: courses 106A, 120C (accelerated section), 123C. Scoring and analysis for ensembles and full orchestra. P/NP or letter grading.

**109A-109B-109C. Composition for Motion Pictures and Television. (2-2-2)** Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 109A is requisite to 109B, which is requisite to 109C. Composition of music for dramatic and documentary film in cinema and television. Techniques used in recording and editing.

**112A-112B. Practical Scoring. (4-4)** Lecture, two hours; laboratory, two hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C, Music History 26A, 26B, 26C. Emphasis on practical problems in scoring for small and large ensembles at various educational levels. **112A.** Band Scoring; **112B.** Choral Scoring.

**113A-113B. Music Literature for Children. (4-4)** Lecture, three hours; laboratory, one hour. Requisites: course 1A, Music History 2A. Course 113A is not requisite to 113B. Designed for nonmusic majors, particularly elementary education students. Study of music literature applicable to elementary school programs. **113A.** Emphasis on listening analysis, movement, and improvisation. **113B.** Emphasis on class performance — music reading, singing, and folk instruments.

**115A-115E. Study of Instrumental and Vocal Techniques. (1 each)** Laboratory, three hours. Requisite or corequisite: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 115A through 115D may be repeated once for credit. Letter grading. **115A.** Strings; **115B.** Woodwinds; **115C.** Brass; **115D.** Percussion; **115E.** Voice.

**116. Introduction to Conducting. (2)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

**117. Study and Conducting of Instrumental and Choral Literature. (2)** Lecture, three hours. Requisite: course 116. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

**118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature. (2-2)** Lecture, one hour; laboratory, two hours. Requisites: courses 116, 117. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. **118A.** Choral; **118B.** Instrumental.

**120A. Music Theory IV. (4)** Lecture, four hours; discussion, four hours. Preparation: passing score on departmental first-year examination. Requisite: course 20C with a grade of C (2.0) or better. Theory: baroque counterpoint including chorale prelude; two-part invention; exposition and first modulation of a three-part invention; canon principles; analysis of inventions, canons, and fugues. Musicianship: sight-singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

**120B. Music Theory V. (4)** Lecture, four hours; discussion, four hours. Requisite: course 120A with a grade of C (2.0) or better. Theory: advanced chromatic harmony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental examination.

**120C. Music Theory VI. (4)** Lecture, four hours; discussion, two hours; listening, two hours. Requisite: course 120B with a grade of C (2.0) or better. 20th-century harmonic language, including nonfunctional harmony, polytonality, free atonality, serialism, and minimalism.

**121. Special Topics in 20th-Century Music. (4)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. In-depth study of certain aspects of 20th-century music ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit.

**C122. Speculative Music Theory. (4)** Discussion, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

**123A-123B-123C. Composition. (4-4-4)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is requisite to 123B, which is requisite to 123C. Designed for composition students. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence.

**124A. Scoring for Symphony Orchestra. (4)** Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical applications in scoring for symphony orchestra. Preparation and production of parts and full scores. At least one reading by UCLA Philharmonia Orchestra scheduled. Letter grading.

**124B. Scoring for Wind Ensemble. (4)** Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical applications in scoring for large wind ensembles. Preparation and production of score and parts. May include percussion. At least one reading by UCLA Wind Ensemble scheduled. Letter grading.

**124C. Scoring and Arranging for Choral Ensemble. (4)** Discussion, three hours. Requisites: 106B, 120C (accelerated section), 123C. Practical applications in scoring and arranging for choral ensembles, including a capella as well as chorus with instruments. Preparation and production of score and parts. At least one reading by UCLA Chorale or other choral group scheduled. Letter grading.

**M127. Jazz Keyboard Harmony. (1)** (Same as Ethnomusicology M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

**M129A-M129B-M129C. Jazz Theory and Improvisation. (2-2-2)** (Same as Ethnomusicology M129A-M129B-M129C.) Lecture, four hours. Elements of jazz theory and improvisation. **M129A.** Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. **M129B.** Requisite: course M129A with a grade of C or better. Medium-level jazz harmonic constructions. **M129C.** Requisite: course M129B with a grade of C or better. Advanced-level jazz harmonic constructions.

**M131. Development of Latin Jazz. (4)** (Same as Ethnomusicology M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as "Latin jazz." P/NP or letter grading.

**136A-136B-136C. Historical Survey of Music Theater. (4-4-4)** Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, tracing development of the art form from its European beginning to the American music theater of today. P/NP or letter grading. **136A.** Early Forms to 1900; **136B.** 1900 to 1945; **136C.** 1945 to 1975.

**150. Introduction to Music Criticism. (4)** Lecture, three hours. Designed for Music majors. Readings and discussion of music criticism past and current, and exercise in the writing of criticism of live concert events and recordings. Designed to aid students (performers, critics, or listeners) in verbalizing the experience of listening to music.

**151A-151B. History of Musical Performance Practices. (4-4)** Requisites: courses 20A, 20B, 20C, 120A, 120B, Music History 26A, 26B, 26C. General survey of musical interpretation and re-creation from viewpoint of stylistic authenticity. **151A.** Medieval through Baroque; **151B.** Classic through 20th Century.

**155. Audio Technology for Musicians. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses 20A, 20B, 20C. Theory and practice of sound engineering in relation to concert and studio recording techniques.

**156. Electronic Music: Theory and Techniques. (4)** Lecture, three hours; laboratory, three hours. Requisites: courses 123A, 123B, 123C. Designed for composition students. Applicable acoustical and electronic theory, history of technological and compositional development of classical electronic music. Analysis, manipulation of analog and digital synthesizers and ancillary equipment, invention and realization of materials.

**158. New Orleans Jazz. (4)** Lecture, three hours; discussion, two hours. Major black and Creole figures in origin and development of jazz in New Orleans from turn of the 20th century through the 1960s, with emphasis on polycultural roots, local municipal traditions, and stylistic analysis.

**160A-165. Undergraduate Instruction in Performance for the Performance Specialist. (2 each)** Limited to junior/senior Music majors who have been accepted by audition into performance specialization. Individual instruction of one hour per week. Students must perform in a noon concert once during their junior year and must present a full recital in their senior year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. **160A.** Violin; **160B.** Viola; **160C.** Cello; **160D.** String Bass; **160E.** Harp; **160F.** Classical Guitar; **160G.** Viola da gamba; **160K.** Lute; **161A.** Flute; **161B.** Oboe; **161C.** Clarinet; **161D.** Bassoon; **161E.** Saxophone; **162A.** Trumpet; **162B.** French Horn; **162C.** Trombone; **162D.** Tuba; **163.** Percussion; **164A.** Piano; **164B.** Organ; **164C.** Harpsichord; **165.** Voice.

**C167. Selected Topics in Keyboard Literature. (4)** Lecture, three hours. Corequisite: course 164A or 164B or 164C. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C267.

**174A-174B-174C. Language of Song. (2-2-2)** Designed for Music majors. Sounds of the language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student's current vocal repertoire. Background in the language is encouraged. **174A.** German; **174B.** French; **174C.** Italian.

**C175. Chamber Ensembles. (2)** Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C485. P/NP or letter grading.

**C176. Electronic Music Composition. (4)** Lecture, three hours; studio, three hours. Preparation: advanced experience and accomplishment in serious composition (art music). Requisite: course 156. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition at least five minutes in duration. May be concurrently scheduled with course C226.

**M177. Jazz Combo. (2)** (Same as Ethnomusicology M177.) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

**C185. Historical and Philosophical Foundations of Music Education. (4)** Lecture, three hours. Preparation: completion of undergraduate music education specialization. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C225.

**M186. Senior Recital or Research Paper. (No credit)** (Same as Ethnomusicology M186.) Preparation and performance of one-hour senior recital of jazz repertoire or preparation of a senior paper (topic and length to be approved by assigned adviser). P/NP grading.

**199. Special Studies in Music. (2 or 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in music resulting in research project. May be repeated for a maximum of 8 units.

## Graduate Courses

**202. Analysis for Performers. (4)** Lecture, three hours. Designed for graduate students. Survey of analytical techniques and approaches required for professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles.

**203. Musical Terminology. (4)** Lecture, three hours. Designed for graduate music students. Survey of musical terminology intended to clarify the performance and interpretation of vocal and instrumental music in the European tradition. Coverage of terms in Italian, French, and German.

**204. Music Bibliography for Performers. (4)** Lecture, three hours. Designed for graduate music performance students. Survey of general bibliographic techniques in music, with emphasis on materials for the performing musician.

**C222. Speculative Music Theory. (4)** Discussion, three hours. Designed for graduate music students. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C122.

**C225. Historical and Philosophical Foundations of Music Education. (4)** Lecture, three hours. Designed for graduate students. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C185. Additional assignments, as well as evidence of greater depth of study, required of graduate students.

**C226. Electronic Music Composition. (4)** Lecture, three hours; studio, three hours. Preparation: advanced experience and accomplishment in serious composition (art music). Requisite: course 156. Designed for graduate students. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition of major proportions at least seven minutes in duration. May be concurrently scheduled with course C176.

**251A-251D. Seminars: Special Topics in Composition and Theory. (4 each)** Seminar, three hours. Intensive exploration of specialized aspects of composition. May be repeated for credit. **251A.** Orchestration; **251B.** Specific Media; **251C.** Specific Styles; **251D.** Compositional Analysis.

**252A-252B-252C. Seminars: Composition. (6-6-6)** Seminar, three hours. Requisites: courses 106B, 123C. Course 252A is requisite to 252B, which is requisite to 252C. Courses may be taken out of sequence only with consent of instructor. May be repeated for credit.

**261A-261F. Problems in Performance Practices. (4 each)** Seminar, three hours; outside study, nine hours. Limited to graduate performance students. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. S/U or letter grading. **261A.** Medieval; **261B.** Renaissance; **261C.** Baroque; **261D.** Classical; **261E.** Romantic; **261F.** Contemporary.

**266A-266B. Seminars: Music of the 20th Century. (4-4)** Seminar, three hours. Designed for graduate music students. Discussion and analysis of major works of the 20th century, with emphasis on study of groups of works written at the same time in history. **266A.** 1900 to 1949; **266B.** 1950 to the Present.

**C267. Selected Topics in Keyboard Literature. (4)** Lecture, three hours. Corequisite: course 464A or 464B or 464C. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C167.

**270A-270G. Seminars: Music Education. (6 each)** Seminar, three hours. May be repeated for credit. **270A.** History; **270B.** Non-Western Musics; **270C.** Curriculum Innovations; **270D.** Tests and Measurements; **270E.** Choral Literature; **270F.** Instrumental Literature; **270G.** General Topics.

**271. Music and Electronic Technology. (4)** Lecture, four hours; media laboratory, one hour. Designed for graduate music performance students. Survey of music and its place in emerging digital world of the arts, including training in arranging and multimedia production.

**330. Introduction to Orff Schulwerk. (2)** Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Intended for teachers of music, church musicians, and music therapists who have had little or no previous experience with Orff Schulwerk. Introduction to Orff Schulwerk, including history, philosophy, and teaching processes of this approach to music instruction for children. Offered in summer only. S/U or letter grading.

**S331A-S331B-S331C. Orff Schulwerk Training Courses. (4-4-4)** Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Requisite: course 330. Course S331A is requisite to S331B, which is requisite to S331C. In-depth courses in teaching of Orff Schulwerk approach to music instruction for children. Students who successfully complete each course are eligible for certification at that level through the American Orff Schulwerk Association. Offered in summer only. S/U or letter grading. **S331A.** Level I (Beginning); **S331B.** Level II (Intermediate); **S331C.** Level III (Advanced).

**S341. Conducting for High School and College Band/Wind Ensemble Teachers. (2)** Lecture, 25 hours. Comprehensive view of current trends in band/wind ensemble programs, including nonverbal communication, conducting, and rehearsal techniques. Study of new and recently published literature and discussions of administration of a band/wind ensemble program. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**S342. Contemporary Marching Band. (1)** Lecture, 12 hours. Innovative approaches to marching band programs for high school and college teachers, including creative approaches to marching and drill design and use of microcomputers. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**343. Effective and Creative String Teaching. (2)** Lecture, 24 hours. Comprehensive course for teachers of string classes and string orchestras at elementary, junior high, and high school levels. Topics include development of instructional techniques for violin, viola, cello, and bass; critical examination of current pedagogical materials; and reading sessions of recently published music for string orchestra. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**343L. Effective and Creative String Teaching Laboratory. (1)** Laboratory, 12 hours. Exploration of string orchestra, ensemble, and chamber music literature appropriate for elementary, junior high, and high schools. Examination of this literature in reading and discussion sessions. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**S345. Symposium on Art of Choral Music. (2)** Lecture, 25 hours. Symposium for college, high school, and junior high school choral directors on development of practical techniques for solving real challenges in choral conducting and teaching. Topics include innovative choral methods, choral conducting, vocal pedagogy, voice classification, and survey of standard and current choral literature. Offered in summer only. S/U or letter grading.

**350A. Introduction to Computer-Assisted Instruction of Music. (2)** Lecture, three hours; laboratory, two hours. Introduction to instructional uses of computers in music classroom, with emphasis on practical information necessary to intelligently purchase and implement microcomputers in schools. Courseware to be experienced and reviewed, jargon defined and illustrated, and practical hands-on experience obtained. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**350B. Exploration of MIDI Computer Resources: Keyboards and Synthesizers. (2)** Lecture, two hours; laboratory, three hours. Creative use of MIDI-based synthesizers under computer control. Exploration of available hardware resources allied with various software sequencing packages. Use of software for computer-based music printing. Hands-on experience. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**351. World Music in the Classroom: Implementation through Orff Schulwerk. (3)** Lecture, 36 hours. From Orff Schulwerk perspective, presentation of current visual and aural materials from various world cultures and methods for teaching world musics in the classroom. Discussions of problems — practical and philosophical — of incorporating world musics into curriculum. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**370. Music in General Education. (2)** Designed for Graduate School of Education and Information Studies teacher training program students (all music students must take course 370 concurrently with Education 100A, 100B, 112, 312, 315A, 315B, and supervised teaching). Critical discussions related to supervised teaching in progress. May be repeated twice for credit.

**371. The Marching Band in Secondary Education. (2)** Study of contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band, as well as historical perspective. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. New Music Forum. (2)** Tutorial/laboratory. Preparation: one year of graduate study in music at UCLA. Interactive course in preparation and performance of a premiere work especially composed for a graduate performer or performers by a graduate composer at UCLA.

**460A-465. Graduate Instruction in Performance. (6 each)** Studio, one hour; performance laboratory/outside study, 17 hours. Limited to graduate performance students. Individual instruction. Intensive study and preparation of musical literature in area of specialization. May be repeated for credit. Letter grading. **460A.** Violin; **460B.** Viola; **460C.** Cello; **460D.** String Bass; **460E.** Harp; **460F.** Classical Guitar; **460G.** Viola da gamba; **460K.** Lute; **461A.** Flute; **461B.** Oboe; **461C.** Clarinet; **461D.** Bassoon; **461E.** Saxophone; **462A.** Trumpet; **462B.** French Horn; **462C.** Trombone; **462D.** Tuba; **463.** Percussion; **464A.** Piano; **464B.** Organ; **464C.** Harpsichord; **464D.** Fortepiano; **465.** Voice.

**469. Instrumental Pedagogy. (4)** Lecture, three hours; outside study and preparation, nine hours. Preparation: advanced proficiency on a musical instrument. Designed for graduate music students. Study of art of teaching a musical instrument, including discussions of philosophy of teaching, learning process itself, and teaching of musical interpretation. Individualized study of various considerations, such as physical/technical aspects and pedagogical repertoire, peculiar to teaching student's primary instrument. Letter grading.

**470. Opera Studio for Graduate Students. (4)** Laboratory, six hours. Designed for graduate students. Performance techniques and repertoire for graduate students in opera.

**471. Vocal Pedagogy. (4)** Lecture, three hours; discussion, one hour. Preparation: advanced proficiency in voice. Designed for graduate music students. Study of teaching techniques for voice, including thorough investigation of the vocal mechanism and its use, plus study of noted teachers of the past and present. Further emphasis on practical teaching experience in class.

**472. Master Class in Opera. (6)** Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of opera literature. May be repeated for credit. S/U or letter grading.

**475. Master Class in Conducting. (6)** Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit. S/U or letter grading.

**C480. UCLA Chorale. (2)** Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C90A.

**C481. Symphony Orchestra. (2)** Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C90E. S/U or letter grading.

**C482. Wind Ensemble. (2)** Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C90G.

**C485. Chamber Ensembles. (2)** Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C175. S/U or letter grading.

**495. Introductory Practicum for Teaching Apprentices in Music. (2)** Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**496. Technology Seminar. (2)** Seminar, two hours; laboratory, one hour; outside study, three hours. Introduction to departmental and campuswide technology resources, exploration of applications of technology in education, and development of means of using technology to assess and document teaching competence. S/U grading.

**595A. Preparation of Master's Recital. (6)** Tutorial, three hours. Limited to graduate master's program in performance students. Intensive study and preparation of final master's recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

**595B. Preparation of Final Doctoral Recital. (6)** Tutorial, three hours. Preparation: advancement to candidacy for D.M.A. degree. Intensive study and preparation of final D.M.A. recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

**596A. Directed Individual Studies in Orchestration and Composition. (2, 4, or 6)** Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

**596C. Directed Individual Studies in Music Education. (2, 4, or 6)** Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

**596D. Directed Individual Studies in Performance Practices. (2 to 12)** Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4)** Tutorial, to be arranged. S/U grading.

**598. Guidance of M.A. Thesis. (4, 8, or 12)** Tutorial, to be arranged. Only 4 units may be applied toward degree requirements. May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. or D.M.A. Dissertation. (4, 8, or 12)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

Elisabeth C. LeGuin, Ph.D.  
Mitchell B. Morris, Ph.D.

## Scope and Objectives

The Department of Musicology provides students with a broad understanding of the history of the music of Europe and North America. Courses cover virtually every period, style, and genre, including jazz and other popular musics. Music history appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The graduate program provides students with a strong foundation that enables them to pursue careers in teaching and research.

The undergraduate program prepares students for graduate programs in music and related fields and offers training within the broader context of the humanities. If students wish to participate in performance at UCLA, they are encouraged to do so.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for qualified students.

## Undergraduate Study

### Music History B.A.

#### Admission

The Music History program assumes that students have some musical background before entering UCLA. Although auditions are not required, prospective majors should be sufficiently competent on an instrument or in voice to participate in a performance group, as required by the program.

#### Preparation for the Major

*Required:* Music 20A, 20B, 20C, Music History 26A, 26B, 26C, and 6 units (three terms) of performance organizations selected from Ethnomusicology 91A through 91Z or Music C90A through 90M. Enrollment in Music 20A re-

quires either a minimum score on the Music Theory Placement Examination administered by the Music Department or successful completion of Music 3A and 3B (or a comparable year-long college-level music theory sequence). Students with limited musicianship skills may find it useful to enroll in Music 4A, 4B, 4C concurrently with Music 20A, 20B, 20C. Transfer applicants may petition to waive courses 20A, 20B, 20C if they have completed equivalent work prior to enrolling at UCLA.

#### Transfer Students

To be admitted as Music History majors, transfer students with 90 or more units must complete the following courses prior to admission to UCLA: one year of music theory and one year of music history and analysis. Experience in music performance is strongly recommended.

#### The Major

*Required:* Music 120A, 120B, 120C, Music History 101, 126A, 126B, 126C; three courses from Music History 127A through 127G; two additional upper division music history courses (8 units) or, via petition, lower division courses with additional work as specified by the instructor; and three upper division ethnomusicology courses (12 units), each from a different geographical or cultural area. Students may petition to substitute theory courses in ethnomusicology or music history for one or more of Music 120A, 120B, 120C, as appropriate. Students may enroll in lessons from the Music Department, if instructors are available.

## Honors Program

The honors program is designed for Music History majors who wish to carry out an independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior Music History majors who have completed a minimum of four upper division music history courses with a departmental grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Normally, the thesis must be completed during Fall Quarter of the senior year.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete at least one quarter of Music History 195 with a grade of A- or better on the resulting thesis.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete at least one quarter of

Music History 195 with a grade of A or better on the resulting thesis.

## Music History Minor

The Music History minor provides undergraduates with an overview of music history and the study of music. Beyond the required introductory course, students may select from a wide variety of undergraduate courses that range through the history of European and American music.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the department in 2443 Schoenberg Music Building. Any departmental undergraduate course is available for the minor, although some require substantial background in music. For further information, contact the department at (310) 206-5187.

*Required Lower Division Courses (12 units):* Music History 1 and two other courses, with grades of C or better.

*Required Upper Division Courses (20 units):* Five courses, of which one should be either from the Music History 127 series or a course in which students participate in an honors discussion group.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degrees

The Department of Musicology offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Musicology.

### Admission

The department admits only students whose degree objective is the Ph.D. An M.A. degree may be earned while completing requirements for the Ph.D. Applicants to the Ph.D. program must have completed an M.A. degree (or the equivalent) in Music. The degree normally is in musicology or music history. Otherwise additional coursework, as prescribed by the department, must be completed.

Applicants for the Ph.D. are required to (1) take the Graduate Record Examination (GRE) General Test, (2) submit a letter describing their background of study and stating reasons for wishing to pursue graduate studies in musicol-

ogy, (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked, (4) submit two official transcripts from each college attended, and (5) submit writing samples that demonstrate sound scholarship, intellectual vigor, and the ability to analyze musical and cultural complexities. Applicants should submit their M.A. thesis, if possible. No application can be considered until the GRE General Test has been taken and all of the above materials have been received.

### Admission Timetable

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

By March 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action on an application for admission, as well as that for a fellowship or assistantship.

### Master's Degree

For fields, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination plan. Students are required to complete a minimum of nine courses at the 200 level, including specific requirements in musicology.

There is a language requirement for this degree.

### Doctoral Degree

The department offers the Ph.D. degree in the field of historical musicology. Degrees in composition, performance, and ethnomusicology and systematic musicology are offered through other departments.

In addition to the M.A. course requirements, students are required to take a minimum of six courses at the 200 level, up to two of which may be from outside of the department. Students whose M.A. is not from UCLA must take the required introductory seminars in musicology and complete a minimum of eight additional courses at the 200 level.

Written and oral qualifying examinations are required. After completion of the Ph.D. coursework students take the special field examination, which includes both written and oral components. Following successful completion of the examination, students take the University Oral Qualifying Examination, which is a defense of the dissertation prospectus.

There is a language requirement for this degree.

## Music History

### Lower Division Courses

**1. Introduction to Music History. (4)** (Formerly numbered 1A.) Lecture, four hours. Designed for Music History minors. Survey of issues and methods of music history and criticism for nonmajors. Letter grading.

**2A-2B. Introduction to Literature of Music. (4-4)** Lecture, four hours; laboratory, one hour. Course 2A is not requisite to 2B. Limited to undergraduate students. Designed for nonmusic majors. P/NP or letter grading.

**2A.** Technical and formal principles of music literature through the mid-18th century. **2B.** Music literature from the mid-18th century to the present.

**5. History of Rock and Roll. (4)** Lecture, four hours. Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to the present. Emphasis on how this music has reflected and influenced changes in sexual, racial, and class identities and attitudes. Letter grading.

**6GA-6GB. Musicianship for Musicology Graduate Students. (2-2)** Seminar/laboratory, three hours. Designed to help entering graduate students remedy entrance deficiencies. S/U grading.

**7. Film and Music. (4)** Lecture, four hours. History of music and cinema, particularly ways music is used to produce meanings in conjunction with the visual image. P/NP or letter grading.

**10. Music Now. (4)** Lecture, four hours. Guided interactive tour of contemporary musical landscape. Current events in historical perspective, with special attention to questions of culture, taste, and value hierarchies. Discussion and evaluation of representative works and practices from avant-garde, mainstream, world, and popular spheres. Letter grading.

**12W. Writing about Music. (5)** (Formerly numbered 110.) Lecture, two hours; laboratory, two hours. Preparation: ability to read music. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 110. Emphasis on learning specific skills, incorporating technical description, historical contextualization, subjective reaction, and certain stylistic conventions necessary in writing about music. Satisfies Letters and Science Writing II requirement. Letter grading.

**13. 20th-Century Music of the Western World. (4)** Lecture, four hours. Survey of main trends in 20th-century music, with emphasis on representative works from avant-garde, mainstream, and popular traditions. P/NP or letter grading.

**26A-26B-26C. History and Analysis of Music I. (4-4-4)** Lecture, four hours; laboratory, one hour. Enforced requisite for course 26A: Music 20C. Course 26A is enforced requisite to 26B, which is enforced requisite to 26C. Students must receive a grade of C- or better to proceed to next course in sequence. History and literature of music from ancient world to 1815, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Letter grading.

**28A-28B-28C. Early Music Laboratory. (2-2-2)** Laboratory, three hours. Enforced corequisite: course 26A or 26B or 26C. Practical laboratory in which students perform music of various periods, as correlated with courses 26A, 26B, 26C. P/NP or letter grading.

### Upper Division Courses

**101. Issues and Methods in Music History. (4)** Lecture, four hours. Requisite: course 26C. Introduction to principles, problems, and methods of music history and criticism through examination of selected issues. Letter grading.

**126A-126B-126C. History and Analysis of Music II. (4-4-4)** Lecture, four hours; laboratory, one hour. Requisites: course 26C, Music 20A, 20B, 20C. Course 126A is requisite to 126B, which is requisite to 126C. Students must receive a grade of C- or better to proceed to next course in sequence. History and literature of music from 1815 to the present, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Letter grading.

**127A-127G. Selected Topics in History of Music. (4 each)** (Formerly numbered C127A-C127G.) Discussion, three hours. Requisites: courses 26A, 26B, 26C. Designed as proseminars for undergraduates in preparation for graduate work. Special aspects of music of each period studied in depth. P/NP or letter grading. **127A.** Middle Ages; **127B.** Renaissance; **127C.** Baroque; **127D.** Classic; **127E.** Romantic; **127F.** 20th Century; **127G.** Other Topics.

**130. Music of the U.S. (4)** Lecture, four hours. Survey of music in the U.S. from Colonial times to the present. P/NP or letter grading.

**131. American Popular Song. (4)** Lecture, four hours. Survey of American popular song from the 18th century to the present, with emphasis on relationship of popular song to important currents in American life and culture. P/NP or letter grading.

**132. Mozart. (4)** Lecture, four hours. Designed for students who do not read music. Life, works, and mythology of Wolfgang Amadeus Mozart, in context of both his age and our own. P/NP or letter grading.

**133. Bach. (4)** Lecture, four hours. Designed for undergraduate students. Life and works of Johann Sebastian Bach. P/NP or letter grading.

**134. Beethoven. (4)** Lecture, four hours. Designed for undergraduate students. Life and works of Ludwig van Beethoven. P/NP or letter grading.

**135A-135B-135C. History of Opera. (4-4-4)** Lecture, four hours; laboratory, one hour. Designed for undergraduate students. P/NP or letter grading. **135A.** Opera of Baroque and Classical Periods; **135B.** Opera of Romantic Period; **135C.** Opera of the 20th Century.

**M136. Music and Gender. (4)** (Formerly numbered 136.) (Same as Women's Studies M136.) Lecture, four hours. Analysis of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular music; methods in feminist and gay/lesbian theory and criticism. Letter grading.

**M137. Gay and Lesbian Perspectives in Pop Music. (4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M137.) Lecture, four hours. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

**138. History of Electronic Dance Music. (4)** Lecture, four hours. Survey of groove-based electrified dance music from its origins in 1960s' pop and soul to the present, covering disco, house, techno, ambient, rave, and jungle. Emphasis on interaction of technology, musical structures, psychoactive drugs, and club cultures to induce "altered states" of musical consciousness; promise (versus reality of) political and spiritual transformation; electronic dance music as a new "art" music. Letter grading.

**139. History and Literature of Church Music. (4)** Lecture, four hours. Study of forms and liturgies of Western church music. P/NP or letter grading.

**140. Music, Media, and Consumer Society. (4)** Lecture, four hours. Consideration of impact of recording technologies (gramophone, tape recorder, Walkman, sampler), broadcast media (radio, television, MTV, Internet), and global capitalism (record labels, advertising, Muzak) on way we consume and are consumed by music. How music functions and malfunctions on records, under movies, behind ads, and in semiotic fabric of everyday life. Letter grading.

**145. American Musical. (4)** Lecture, four hours. Survey of American musical in the 20th century, beginning with its roots in operetta, vaudeville, and Gilbert and Sullivan, and focusing on its connections to politics, technology, film, opera, and a variety of popular musical styles, including Tin Pan Alley, jazz, and rock. P/NP or letter grading.

**150. History of Jazz. (4)** Lecture, four hours. Designed for Music History, Music, and Ethnomusicology majors, and other students with some background in musical performance and theory. History and analysis of variety of jazz styles, from late 19th-century forerunners to the present, with emphasis on social meanings of musical practices. Letter grading.

**156. Studies in Musical Genres. (4)** Lecture, four hours. Survey of musical genres, with emphasis on analysis of structural organization. P/NP or letter grading.

**188. Topics in Music History. (4)** (Formerly numbered 188A-188F.) Lecture, three hours; laboratory, one hour. Variable topics selected from several outstanding composers in Western art music. Consult *Schedule of Classes* for topics to be offered. Letter grading.

**189A-189B. The Symphony. (4-4)** (Formerly numbered 189.) Lecture, four hours. Designed for undergraduate students. Survey of symphonic literature from Haydn through the 20th century. Letter grading.

**195. Honors Course. (4)** Tutorial, two hours. Preparation: completion of minimum of four upper division music history courses with departmental grade-point average of 3.5 or better and an overall GPA of 3.0. Limited to junior/senior Music History majors. One- to two-term independent research study project under supervision of an appropriate faculty member, culminating in department honors thesis of approximately 25 pages. P/NP or letter grading.

**199. Special Studies in Musicology. (2 or 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in musicology resulting in a research project. May be repeated for a maximum of 8 units. P/NP or letter grading.

## Musicology

### Graduate Courses

**200A. Research Methods and Bibliography. (6)** Lecture, three hours. Designed for graduate musicology students. Survey of general bibliographic material in music and introduction to discipline. Letter grading.

**200B. Historiography. (6)** Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Critical examination of principles and procedures which inform historical study of music, with emphasis on impact of recent cultural theory.

**200C. Contemporary Music Criticism. (6)** Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to recent developments in the field of musicology, focusing on problems of how music operates as a cultural practice and how musical meanings can most effectively be analyzed and written about.

**210. Medieval Notation. (6)** Lecture, three hours. Vocal and instrumental notation; paleography of the period.

**211. Renaissance Notation. (6)** Lecture, three hours. Vocal and instrumental notation; paleography of the period.

**250A-250B. Seminars: History of Music Theory. (6-6)** Seminar, three hours. Requisite: course 200A. Course 250A is not requisite to 250B. **250A.** Investigation of principal theoretical writings concerning music from antiquity through Zarlino. **250B.** Investigation of principal theoretical writings concerning music from Rameau to the present.

**254. Structure and Interpretation of Music. (4)** Seminar, three hours. Requisite: course 200C. Critical survey of recent music theory and its analytical methods for musicologists. Questions of analysis and value judgment, formalism and autonomy, popular and vernacular musics, cultural versus musical theory, hermeneutic risks and (im)proprieties. Individual students work practically and in depth on specific analytic problems most relevant to their interests. Letter grading.

**256. Seminar: Musical Form. (6)** Seminar, three hours. Requisites: courses 126A, 126B, 126C. Analysis of structural organizations in music. Specific topics vary from year to year.

**257. Music of the U.S. (6)** Discussion, three hours. Designed for graduate students. Examination of principal figures and trends in music of the U.S. since the 18th century.

**260A-260F. Seminars: Historical Musicology. (6 each)** Seminar, three hours. Requisite or corequisite: course 200A. Specific topics vary from year to year. May be repeated for credit. Letter grading. **260A.** Medieval; **260B.** Renaissance; **260C.** Baroque; **260D.** Classical; **260E.** Romantic; **260F.** 20th Century.

**261A-261F. Performance Practices. (4 each)** Lecture, three hours. Designed for graduate students. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. Letter grading. **261A.** Medieval; **261B.** Renaissance; **261C.** Baroque; **261D.** Classical; **261E.** Romantic; **261F.** Contemporary.

**262. Contemporary Popular Music Studies. (4)** Seminar, three hours. Designed for graduate students. Critical exploration of methodologies of interdisciplinary field of popular music studies. Analysis of how music, lyrics, and visual images produce meanings within contexts shaped by mass mediation, capitalism, and political realities of gender, class, and race.

**263. History of Performance. (4)** Seminar, three hours. Designed for graduate students. Survey of role of performers and performance in Western music history. Critical understanding of (and set of tools for addressing) frequent invisibility or "transparency" of performance and performers in histories of music. Letter grading.

**264. Seminar: Topics in Musicology. (6)** Seminar, three hours. Designed for graduate students. Specific topics vary from term to term. May be repeated for credit.

**265. Ideal of Authenticity in Performance: 1827 to the Present. (4)** Seminar, three hours. Preparation: ability to read musical notation and knowledge of musical history equivalent to successful completion of courses 126A, 126B, 126C. Not a course in performance, but intellectual history of performance and interpretation from solidification of classical canon to disintegration. How have performers mediated between claims of imaginative sympathy, performing tradition, and textual evidence? Use of historical texts and recordings to reconstruct interpretive strategies and justifications of the past and consideration of such major 20th-century trends as idea of *Werktreue*, Toscani versus Furtwängler debates, impact of recording and mass media, and rise of historical performance movement. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Introductory Practicum for Teaching Apprentices in Musicology. (2)** Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Studies in Musicology. (2, 4, or 6)** Tutorial, to be arranged. Limited to graduate students. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4)** Preparation: completion of all M.A. or Ph.D. course and language requirements. Limited to graduate students. S/U grading.

**599. Guidance of Ph.D. Dissertation. (4, 8, or 12)** Preparation: advancement to Ph.D. candidacy. Limited to graduate students. May be repeated for credit. S/U grading.

Anahid Keshishian, Ph.D.  
Michael Rosenbaum, Ph.D.

## Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area that was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in Ancient Near Eastern Civilizations, Arabic, Hebrew, Iranian Studies, and Jewish Studies. Master's and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

## Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the requisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

## Ancient Near Eastern Civilizations B.A.

There are four options for a major in Ancient Near Eastern Civilizations: (1) Mesopotamia, (2) Egypt, (3) Near Eastern archaeology and cultures, and (4) biblical studies.

### Preparation for the Major

Requisite for all options: Near Eastern Languages 50A; requisites for options 1, 2, and 3: German 1, 2, 3 (French 1, 2, 3 may be substituted); requisites for option 4: Hebrew 1A, 1B, 1C. Majors in all four fields are encouraged to continue their language study beyond the requisite levels.

### Transfer Students

To be admitted as Ancient Near Eastern Civilizations majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one civilization course for all options, one year of German or French for the options in Mesopotamia, Egypt, and Near Eastern archaeology and cultures, and one year of Hebrew for the biblical studies option.

### The Major

Majors in all four options are required to take 14 upper division courses selected in consultation with the program adviser.

Majors selecting option 1 (Mesopotamia) are required to take 14 courses as follows: four language courses (Semitics 140A, 140B, 141, 142) and two literature and history courses (Ancient Near East M105, 150A). The remaining eight courses are to be selected from Ancient Near East M104A, M104B, 130, 140A, 140B, 140C, 145, 150B, 150C, 160A, 160B, 161A, 161B, 161C, 162, 163A, 163B, 164A, 164B, 164C, 170, Iranian 169, Jewish Studies M150A. One course must be in research methodology (such as Anthropology C115R, 130, 150, English 140A, or Linguistics 110) taken preferably in another department with the consent of the adviser.

Majors selecting option 2 (Egypt) are required to take 14 courses as follows: four language courses (Ancient Near East 120A, 120B, 120C, 121A) and three literature and history courses (Ancient Near East M104A, M104B, 150B). The remaining seven courses are to be selected from Ancient Near East M105, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160A, 160B, 161A, 161B, 161C, 162, 163A, 163B, 164A, 164B, 164C, 170, Art History 101A, 101B, Iranian 169, Jewish Studies M150A, M191A. One course must be in research methodology (such as Anthropology C115R, 130, 150, English 140A, or Linguistics 110) taken preferably in another department with the consent of the adviser.

Majors selecting option 3 (Near Eastern archaeology and cultures) are required to take 14 courses as follows: three upper division courses in any Near Eastern language (Akkadian, Arabic, Egyptian, Hebrew) and two courses in research methodology (such as An-

thropology 111, M115A, C115R, 117, 130, 150). The remaining nine courses are to be selected from Ancient Near East M104A, M104B, M105, 120A, 120B, 120C, 121A, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160A, 160B, 161A, 161B, 161C, 162, 163A, 163B, 164A, 164B, 164C, 165, Art History 101A, 101B, M102A, M102B, Classics 168, Jewish Studies M150A, 170, M191A, Semitics 140A, 140B, 141, 142.

Majors selecting option 4 (biblical studies) are required to take 14 courses as follows: four language courses (Hebrew 102A, 102B, 102C, 120) and three history and literature courses (Jewish Studies M150A, M191A, English 108B). The remaining seven courses are to be selected from Ancient Near East M104A, M104B, M105, 130, 150A, 150B, 160A, 160B, 161A, 161B, 161C, 162, 163A, 163B, 164A, 164B, 164C, 165, 170, English 108A, 108C, Greek 130, Hebrew 125, 130, 135, History 194A, 194B, 194C, Jewish Studies 150B, 170, Latin 120, Semitics 130.

### Study Abroad

Students are encouraged to spend time abroad either to (1) study with an education abroad program or (2) work on a UCLA-affiliated archaeological excavation in the broader Middle East. For information on studying abroad, contact the Education Abroad Program, 1101 Hershey Hall, (310) 825-2770; for UCLA-affiliated excavations, contact the departmental student affairs officer at (310) 825-4165.

## Arabic B.A.

### Preparation for the Major

*Required:* Arabic 1A, 1B, 1C, 102A, 102B, 102C, 150.

### Transfer Students

To be admitted as Arabic majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Arabic and one Arabic literature and culture course.

### The Major

*Required:* Fifteen courses, including Arabic 103A, 103B, 103C, and History 107A or Islamics 110; five courses from Arabic 120, 130, 132, 141; three courses from Arabic 111A, 111B, 111C, 112A, 112B, 112C, 114A, 114B, 114C; three courses from Art History 104A, Geography 187, History 106A, 106B, 106C, 107B, 108A, 108B, Political Science 132A, 132B, 157.

## Hebrew B.A.

### Preparation for the Major

*Required:* Hebrew 1A, 1B, 1C, 102A, 102B, 102C, Jewish Studies M150A, 150B, or equivalent.

### Transfer Students

To be admitted as Hebrew majors, transfer students with 90 or more units must complete the

following introductory courses prior to admission to UCLA: two years of Hebrew and two Hebrew literature courses.

### The Major

*Required:* Sixteen courses, including Hebrew 103A, 103B, 103C; three terms of Hebrew 120 and/or 125; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A, 190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

## Iranian Studies B.A.

Students majoring in Iranian Studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

### Preparation for the Major

*Required:* Iranian 1A, 1B, 1C, or equivalent, 150A, 150B.

### Transfer Students

To be admitted as Iranian Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Persian and two Persian literature survey courses.

### The Major

*Required:* Sixteen courses, including Iranian 102A, 102B, 102C, 103A, 103B, 103C, 140, 141, 142, 180A, 180B; five courses from Ancient Near East 163A, 163B, Arabic 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology 20B, History 106A, 106B, 106C, 110B, Iranian 120, 169, 170, 190A, 190B, Political Science 157.

## Jewish Studies B.A.

Students must select one of five tracks: (1) Jewish history, (2) Jewish religions, (3) Jewish literature and culture, (4) American Jewish literature and culture, or (5) Israeli studies.

### Preparation for the Major

*Required:* Jewish Studies 10.

### Transfer Students

To be admitted as Jewish Studies majors, transfer students with 90 or more units must complete the following introductory course prior to admission to UCLA: one social, cultural, and religious institutions of Judaism course.

### The Major

Majors in all five tracks are required to take 14 upper division courses selected in consultation with the program adviser, including six required core courses, five courses within the selected track, and three electives to be chosen from Hebrew, Jewish studies, or any courses listed under any track.

Core requirements include one year of upper division Hebrew (either Hebrew 102A, 102B,

and 102C, or Hebrew 103A, 103B, and 103C); two terms of the Jewish history sequence selected from Jewish Studies M191A through M191D; and one course on the Hebrew Bible selected from English 108A, Hebrew 120, or Jewish Studies M150A, 150B.

A third year of Hebrew or one year of Yiddish or another Jewish language is strongly recommended but not required.

Students are encouraged to take a research tutorial within Jewish Studies 199. A maximum of 8 units of 199 courses may be applied toward the major.

A course may be applied toward only one category within the major (i.e., core requirement, track requirement, or electives). No more than 20 units applied toward the Jewish Studies major may count toward fulfilling the requirements for a major or minor in another department or program.

For the Jewish history track, students are required to complete the remaining two courses from Jewish Studies M191A through M191D and three courses from the following list, in addition to the core courses for the major: Ancient Near East 162, History 191E, 191F, 191G, 194A, 197A, 199, Jewish Studies 170, M192A, M192B, 199.

For the Jewish religion track, students are required to complete Jewish Studies 150B and four of the following courses, in addition to the core courses for the major: Ancient Near East 162, English 108A, 108C, 199, Hebrew 120, 125, 130, History 194A, Jewish Studies 130, M150A, 151A, 155, 170, M191A, M191B, 199.

For the Jewish literature and culture track, students are required to complete Hebrew 103A, 103B, 103C, and two of the following courses, in addition to the core courses for the major: English 103, 108A, 108C, 189, German 112, Hebrew 120, 125, 130, 140, Iranian 131, Jewish Studies M143, M150A, 150B, 151A, 155, 170, 175, M187, 197A through 197Z, 199.

For the American Jewish studies track, students are required to complete Sociology 159 and four of the following courses, in addition to the core courses for the major: English 103, 189, 199, History 199, Jewish Studies 140A, 140B, 199, Yiddish 101A, 101B, 101C, 102A, 102B, 104.

For the Israeli studies track, students are required to complete Hebrew 103A, 103B, 103C, and two of the following courses, in addition to the core courses for the major: Hebrew 140, History 191F, 199, Jewish Studies 142, 151B, 175, M191B, 199, Political Science 121, 132A, 132B, 139, 164, 199.

### Study in Israel

Students are encouraged to spend up to one year in Israel either to (1) study with an education abroad program or (2) study at an Israeli university. For information on studying in Israel, contact the Education Abroad Program, 1333 Hershey Hall, (310) 825-4889.

## Arabic and Islamic Studies Minor

The Arabic and Islamic Studies minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of Arabic language and literature and Islam.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Arabic 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses in Arabic or Islamic; 199 courses may not be applied. With approval of the undergraduate adviser, two of the seven courses may be taken outside the department. Courses recommended as electives for the major in Arabic (Art History 104A, Geography 187, History 106A, 106B, 106C, 107A, 107B, 108A, 108B, Political Science 132A, 132B, 157) may be applied. Other courses may be applied as extra-departmental courses with approval of the adviser.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Armenian Studies Minor

The Armenian Studies minor is designed for students who wish to augment their major program with a group of courses that provide a systematic introduction to the study of Armenian culture.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Armenian 101A, 101B, 101C, or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses from the Armenian section of the department; 199 courses may not be applied. At least one course from each of the three disciplines of language, literature, and history must be selected. Eligible language courses begin in the fourth quarter of study (i.e., course 102A for Western Armenian, course 105A for Eastern Armenian). With approval of the undergraduate adviser, two of the seven courses may be taken outside the department. Ordinarily, courses listed as Related Courses under the Armenian section in the *UCLA General Catalog* may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Hebrew and Jewish Studies Minor

To enter the Hebrew and Jewish Studies minor, students must have an overall grade-point average of 2.0 or better, have completed Hebrew 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses from the Hebrew or Jewish studies section of the department; 199 courses may not be applied. With approval of the undergraduate adviser and based on course content, two of the seven courses may be taken outside the department.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Near Eastern Languages and Cultures Minor

The Near Eastern Languages and Cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses selected in consultation with an academic adviser from any of the courses offered by the department; 199 courses may not be applied. With approval of the undergraduate adviser, two of the seven courses may be taken outside the department, provided the content of the courses bears a direct relation to the culture of the Near East.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

## Graduate Degrees

The Department of Near Eastern Languages and Cultures offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Near Eastern Languages and Cultures.

## Admission

In addition to the regular University requirements, the M.A. program requires a bachelor's degree or its equivalent in the language area chosen for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation. As a rule, applicants selected for admission have a grade-point average of at least 3.25 and a GRE combined score of at least 1,600. The GRE must be taken within 24 months prior to the date of the application.

In addition to these requirements, admission to the Ph.D. program requires an M.A. or the equivalent in the applicant's field (the M.A. need not have been completed at UCLA).

## Master's Degree

For major fields of specialization, see Doctoral Degree.

The M.A. degree is offered through the comprehensive examination plan. A minimum of nine upper division and graduate courses is required, six of which must be at the graduate level. Students are required to take an introductory course in bibliographical resources and methods of research in Near Eastern languages and cultures.

In general, students choosing either the language, literature, or archaeology option are required to study two Near Eastern languages, one of which is considered the major language. Students in Semitics or in Old Iranian study three languages.

In ancient Near Eastern civilizations, students may choose as their major language any of the following: ancient Egyptian (including Coptic), Akkadian, Aramaic (including Syriac), Hebrew (with Ugaritic and Phoenician), or Old Persian. For the second language, any of the above or Hittite or Sumerian may be chosen.

Students in Hebrew choose Hebrew and another Semitic language. In Turkic, either two Turkic languages or Turkish and a second culturally related language may be chosen. In Arabic, Armenian, and Iranian (modern), a major language and a second culturally related language are chosen.

Students in Semitics are required to study three Near Eastern languages, at least two of which should be Semitic (the third may be Hittite or Sumerian). In Old Iranian, Persian, Sanskrit, and Old and Middle Iranian are studied.

There is a language requirement for this degree.

## Doctoral Degree

Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

Students who choose a language emphasis for the Ph.D. are required to add a third Near Eastern language to the two that are required for the M.A.

Students are required to achieve high competence in two of their languages and to familiarize themselves with the cultural backgrounds of each of the languages chosen. Students are also expected to take the equivalent of one year of general linguistics. Those studying Semitics or Old Iranian study three languages.

If the literature option is chosen, students are required to achieve high competence in two Near Eastern languages and their literatures. Students are required to familiarize themselves, through appropriate coursework, with the history of the cultural area, and the methods of literary research and the history of literary criticism.

If the archaeology emphasis in the ancient Near Eastern civilizations specialization is chosen, students are required to achieve high competence in two ancient Near Eastern languages and must be well-versed both in the history of the cultural area and in archaeological methodologies.

Written and oral qualifying examinations are required. Students in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Students in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Students in ancient Near Eastern civilizations are examined in two ancient languages and in the history and archaeology of the major areas of the ancient Near East.

Following successful completion of the written examinations, students take the University Oral Qualifying Examination.

There is a language requirement for this degree.

## Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

## Lower Division Course

**10W. Jerusalem: The Holy City. (5)** (Formerly numbered 10.) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 10. Survey of religious, political, and cultural history of Jerusalem over three millennia as a symbolic focus of three faiths: Judaism, Christianity, and Islam. Transformation of sacred space as reflected by literary and archaeological evidence through examination of testimony of artifacts, architecture, and iconography in relation to the written word. Study of creation of the mythic Jerusalem through event and experience. Satisfies Letters and Science Writing II requirement. Letter grading.

## Upper Division Courses

**M104A-M104B. Ancient Egyptian Civilization. (4-4)** (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not requisite to M104B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.

**M105. History of Ancient Mesopotamia and Syria. (4)** (Same as History M105.) Lecture, three hours. Designed for juniors/seniors. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period. Letter grading.

**120A-120B-120C. Elementary Ancient Egyptian. (4-4-4)** Lecture, three hours; laboratory, two hours. Grammar and texts. P/NP or letter grading.

**121A-121B-121C. Intermediate Ancient Egyptian. (4-4-4)** Lecture, three hours. Requisites: courses 120A, 120B, 120C. Readings in ancient Egyptian literature. P/NP or letter grading.

**123A-123B. Coptic. (4-4)** Lecture, three hours. Introduction to Coptic grammar and reading of Coptic texts. P/NP or letter grading.

**124. Middle Egyptian Technical Literature. (4)** Lecture, three hours. Requisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included. P/NP or letter grading.

**130. Ancient Egyptian Religion. (4)** Lecture, three hours. Introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religiopolitical institutions such as divine kingship and pious foundations. P/NP or letter grading.

**140A-140B-140C. Elementary Sumerian. (4-4-4)** Lecture, three hours. Requisites: Semitics 140A, 140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period. P/NP or letter grading.

**145. Sumerian Literary Texts. (4)** Lecture, three hours. Requisites: courses 140A, 140B. Reading and interpretation of selected Sumerian literary texts. P/NP or letter grading.

**150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. (4-4-4)** Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. **150A.** Mesopotamia; **150B.** Egypt; **150C.** Syria and Palestine, Asia Minor, Persia.

**160A-160B. Introduction to Near Eastern Archaeology. (4-4)** Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and general survey of Near Eastern archaeology. P/NP or letter grading.

**161A-161B-161C. Archaeology of Mesopotamia. (4-4-4)** Lecture, three hours. Survey of main archaeological periods in Mesopotamia, with special emphasis on late prehistoric and early historical periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. P/NP or letter grading.

**162. Archaeology and Religion of the Holy Land. (4)** Lecture, three hours. Survey of archaeology of Palestine from the Bronze Age to destruction of Jerusalem in A.D. 70, with emphasis on religious development of ancient Israel. P/NP or letter grading.

**163A-163B. Archaeology of Iran. (4-4)** Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. P/NP or letter grading. **163A.** Prehistoric and protohistoric phases of Iranian archaeology. **163B.** Archaeology of Elam, Iron Age, and Achaemenid Empire.

**164A-164B-164C. Archaeology of Historic Periods in Mesopotamia. (4-4-4)** Lecture, three hours. Requisites: courses M105, 161A, 161B, 161C. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. P/NP or letter grading.

**165. Archaeology of Pharaonic Egypt. (4)** Lecture, three hours. Requisites: courses M104A, M104B. Selected topics on archaeology of Pharaonic Egypt, with emphasis on material culture as source for political, social, and economic history of ancient Egypt. P/NP or letter grading.

**170. Introduction to Biblical Studies. (4)** Lecture, two hours. Knowledge of original languages not required. The Bible (Old and New Testaments) as a book. Canon, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to the present. P/NP or letter grading.

**M194. The Hero in the Bible and the Ancient Near East. (4)** (Same as Folklore M185.) Lecture, three hours. Investigation of concepts of the hero/heroine in literatures of ancient Mesopotamia, Canaan, and Israel. Texts include epics of Gilgamesh and Aghat, Hebrew Bible, and New Testament. All texts read in translation. Letter grading.

**199. Special Studies in the Ancient Near East. (2 to 8)** Tutorial, to be arranged. P/NP or letter grading.

## Graduate Courses

**210. Late Egyptian. (4)** Lecture, three hours. Requisites: courses 121A, 121B, 121C. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. S/U or letter grading.

**211A-211B. Egyptian Texts of the Greco-Roman Period. (4-4)** Lecture, three hours. Requisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types. Letter grading.

**220. Seminar: Ancient Egypt. (4)** Seminar, three hours. May be repeated for credit. S/U or letter grading.

**221A-221B. Demotic. (4-4)** Lecture, three hours. Requisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres. S/U or letter grading.

**240A-240B-240C. Seminars: Sumerian Language and Literature. (4-4-4)** Seminar, two hours. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history. S/U or letter grading.

**M250. Seminar: Ancient Mesopotamia. (4)** (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. S/U or letter grading.

**250X. Seminar: Ancient Mesopotamia. (1)** Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading.

**260. Seminar: Ancient Near Eastern Archaeology. (4)** Seminar, two hours. May be repeated for credit. S/U or letter grading.

**261. Practical Field Archaeology. (2 to 8)** Field-work, two hours. Participation in archaeological excavations or other archaeological research in the Near East under staff supervision. May be repeated for credit. S/U or letter grading.

**262. Seminar: Object Archaeology. (4)** Seminar, two hours; laboratory, one hour. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heeramanek Collection of Los Angeles County Museum of Art. S/U or letter grading.

**263. Seminar: Egyptian Monuments. (4)** Seminar, two hours. Selected monuments and sites in area of Luxor (Ancient Thebes). Architecture and decoration of temples and tombs; structure and occupation of settlements. May be repeated. S/U or letter grading.

**M265. Depositional History and Stratigraphic Analysis. (4)** (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

**272. Semitic Background of the New Testament. (4)** Lecture, two hours. Requisites: Hebrew 102A, 102B, 102C, Semitics 130, Greek 1, 2. Study of Semitic elements in the Greek New Testament: traditions transmitted in Aramaic, relations to the Old Testament and to post-Biblical literature, and Palestinian Judaism. S/U or letter grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Arabic

### Lower Division Courses

**1A-1B-1C. Elementary Literary Arabic. (4-4-4)** Lecture, six hours. Basic grammar and syntax. P/NP or letter grading.

### Upper Division Courses

**102A-102B-102C. Intermediate Literary Arabic. (4-4-4)** Lecture, four hours; discussion, one hour. Requisites: courses 1A, 1B, 1C. Grammar and syntax; readings of excerpts from literary texts; composition. P/NP or letter grading.

**103A-103B-103C. Advanced Arabic. (4-4-4)** Lecture, four hours. Requisites: courses 102A, 102B, 102C. Review of grammar, composition, conversation, and readings from classical and modern literary texts. Letter grading.

**111A-111B-111C. Elementary Spoken Egyptian Arabic. (4-4-4)** Lecture, three hours. Requisites: courses 1A, 1B, 1C. Basic grammar and syntax of Egyptian colloquial Arabic. P/NP or letter grading.

**112A-112B-112C. Advanced Spoken Egyptian Arabic. (4-4-4)** Lecture, three hours. Requisites: courses 111A, 111B, 111C. Grammar and syntax; excerpts from literary texts using colloquial Arabic. P/NP or letter grading.

**113A-113B-113C. Elementary Spoken Levantine Arabic. (4-4-4)** Lecture, three hours. Requisites: courses 1A, 1B, 1C. General introduction to spoken Arabic of Syria, Lebanon, and Palestine. Grammar and syntax, with emphasis on language of everyday conversation. P/NP or letter grading.

**114A-114B-114C. Spoken Moroccan Arabic. (4-4-4)** Lecture, three hours; laboratory, one hour. Introduction to spoken Arabic dialect of Morocco. Phonology, morphology, and syntax. Emphasis on developing oral skills. P/NP or letter grading.

**120. Islamic Texts. (4)** Lecture, four hours. Requisite: course 103C. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit. Letter grading.

**130. Classical Arabic Texts. (4)** Lecture, four hours. Requisite: course 103C. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit. Letter grading.

**132. Philosophical and Kalam Texts. (4)** Lecture, three hours. Requisite: course 120. Readings in medieval and Kalam texts. May be repeated for credit. P/NP or letter grading.

**141. Modern Arabic Literature. (4)** Lecture, four hours. Requisite: course 103C. Conducted in Arabic. Readings in selected texts representing important trends in Arabic literature of the 19th and 20th centuries. May be repeated for credit. Letter grading.

**150. Introduction to Arabic Literature and Culture. (4)** Lecture, three hours. Readings in English; knowledge of Arabic not required. Culture of Arabic-speaking peoples through their literature. Texts range from pre-Islamic poetry to contemporary novels, along with works in history and anthropology, to place these writings in their social context. P/NP or letter grading.

**151. Survey of Modern Arabic Literature in English. (4)** Lecture, three hours. Readings of selected texts covering basic literary trends from middle of the last century to the present. Letter grading.

**180. Linguistic Analysis of Arabic. (4)** Lecture, four hours. Requisite: course 102C. Linguistic description of Arabic in both its modern standard and dialect forms. Introduction to linguistic analysis of Arabic phonology, morphology, and syntax and to linguists' approaches to specific problems posed by Arabic grammar and dialectology. Letter grading.

**199. Special Studies in Arabic. (2 to 8)** Tutorial, to be arranged. P/NP or letter grading.

## Graduate Courses

**220. Seminar: Islamic Texts. (4)** Seminar, three hours. Doctrines and hermeneutics of various schools of thought in Islam, with selected readings from major works. May be repeated for a maximum of 24 units. S/U or letter grading.

**230. Medieval Literary Texts. (4)** Lecture, two hours. Readings in Arabic prose and poetry, survey of prosody. May be repeated for a maximum of 24 units. S/U or letter grading.

**240. Seminar: Arab Historians and Geographers. (4)** Seminar, three hours. Selected readings from works of major historians, geographers, and travelers. May be repeated for a maximum of 24 units. S/U or letter grading.

**250. Seminar: Arabic Literature. (4)** Seminar, two hours. Selected topics from Arabic literature. Readings of texts from manuscript. May be repeated for a maximum of 24 units. S/U or letter grading.

**251. Seminar: Modern Arabic Literature. (4)** Seminar, three hours. Requisite: course 141. Studies of specific problems and trends in Arabic prose and/or poetry in the 20th century. May be repeated for credit. Letter grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Armenian

### Upper Division Courses

**101A-101B-101C. Elementary Modern Western Armenian. (4-4-4)** Lecture, four hours. Course 101A is requisite to 101B, which is requisite to 101C. Armenian grammar, conversation, and exercises. P/NP or letter grading.

**102A-102B-102C. Intermediate Modern Western Armenian. (4-4-4)** Lecture, four hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. Reading of selected texts, composition, and conversation. P/NP or letter grading.

**103. Advanced Modern Armenian. (4)** Lecture, three hours. Requisites: courses 102A, 102B, 102C. Readings in advanced modern Armenian texts. May be repeated twice for credit. P/NP or letter grading.

**104A-104B-104C. Elementary Modern Eastern Armenian. (4-4-4)** Lecture, four hours. Course 104A is requisite to 104B, which is requisite to 104C. Designed for students with little or no previous knowledge of Eastern Armenian, official idiom of Republic of Armenia. Introduction to basics of grammar and conversation. Letter grading.

**105A-105B-105C. Intermediate Modern Eastern Armenian. (4-4-4)** Lecture, four hours. Requisite: course 104C. Course 105A is requisite to 105B, which is requisite to 105C. Continuing introduction to Armenian grammar, with greater attention to readings from short stories and simple newspaper articles and film viewing on video. Emphasis on improving students' self expression in the idiom, both orally and in written form. Letter grading.

**106A-106B-106C. Advanced Modern Eastern Armenian. (4-4-4)** Lecture, four hours. Requisite: course 105C. Course 106A is requisite to 106B, which is requisite to 106C. Discussion of contemporary Armenian social and cultural issues through readings from critical essays, editorials, short stories, and poems written since World War II and film showings. Emphasis on enhancing students' self expression orally and in written form. Letter grading.

**130. Armenian Civilization under Bagratid Dynasty, 884 to 1064. (4)** Lecture, four hours. Interdisciplinary investigation of interface between sociopolitical and economic factors in creation of works of art (literature, art, architecture, etc.) and social function these works performed in this important period of Armenian history. Letter grading.

**131. Armenian Civilization in Cilician Period, 1080 to 1375. (4)** Lecture, four hours. Interdisciplinary investigation of rise and fall of unique form of Armenian polity established outside the homeland and examination of degree to which its social structure and cultural and aesthetic norms were impacted by those of the West (Byzantium, Western Europe) and East (Crusader states, Seljuqs, Mamluks, Mongols). Letter grading.

**150A-150B. Survey of Armenian Literature in English. (4-4)** Lecture, three hours. Knowledge of Armenian not required. Each course may be taken independently for credit. P/NP or letter grading.

**151. Canon Formation and Encounter with Modernity: Case Studies in Armenian Literature. (4)** Lecture, four hours. Discussion of fundamental themes and genres around which Armenian literary tradition evolved and modalities by which this has been transformed in course of last two centuries as a result of exposure to European thought and expressive forms, as well as its response to sociopolitical, demographic, and economic changes in Armenian life. Letter grading.

**152. Modern Armenian Drama as Vehicle for Social Critique. (4)** Lecture, four hours. Readings of selected plays from 1668 to 1992 in English translation, with particular reference to comedy. Focus on their role as commentators on contemporary mores and as agents for social reform. Discussion supplemented by video recordings of staged performances. Letter grading.

**153. Art, Politics, and Nationalism in Modern Armenian Literature. (4)** Lecture, four hours. Readings in English. Examination of role of literature in modern Armenian society in service to a cause or causes, as propaganda for various ideologies, as art for art's sake, etc. Exploration of contrasting aesthetics implicit in these differing interpretations. Students may work on texts in original language for extra credit. Letter grading.

**155. Armenian American Literature and Culture. (4)** Lecture, four hours. Theoretically informed exploration of some of most salient questions related to Armenian American community as reflected in its literature and other cultural artifacts in interaction with its pluralistic American ambience. P/NP or letter grading.

**160A-160B. Armenian Literature of the 19th and 20th Centuries. (4-4)** Lecture, three hours. Requisites: courses 102A, 102B, 102C. Reading of texts and discussion of various genres of modern Armenian literature within context of the Armenian cultural renaissance. P/NP or letter grading.

**199. Special Studies in Armenian Language and Literature. (2 to 8)** Tutorial, to be arranged. P/NP or letter grading.

## Graduate Courses

**207. Armenian Intellectual History. (4)** Lecture, three hours. Intellectual and cultural trends reflected in Armenian literature, historiography, religious and philosophical thought. S/U or letter grading.

**210. History of the Armenian Language. (4)** Lecture, three hours. Development of the Armenian language in its various stages: classical, middle, and modern. S/U or letter grading.

**220. Armenian Literature of the Golden Age (A.D. 5th Century). (4)** Lecture, three hours. Requisites: courses 131A, 131B. Readings of texts and discussion of literary genres; original works and those translated from Greek and Syriac. S/U or letter grading.

**230A-230B-230C. Elementary Classical Armenian. (4-4-4)** Lecture, three hours. Course 230A is requisite to 230B, which is requisite to 230C. Introduction to grammar of the classical literary language (5th to mid-19th century) and guided readings in narrative prose texts. Letter grading.

**231A-231B-231C. Intermediate Classical Armenian. (4-4-4)** Lecture, three hours. Requisite: course 230C. Intensive review of grammar and reading of select prose and poetic texts. Each course may be taken independently for credit. Letter grading.

**232A-232B-232C. Advanced Classical Armenian. (4-4-4)** Lecture, three hours. Requisite: course 231A or 231B or 231C. In-depth reading and linguistic analysis of texts related to the Philhellene School of the 6th to 8th century and related works up to the 19th century. Each course may be taken independently for credit. Letter grading.

**250A-250B. Seminars: Armenian Literature. (4-4)** Seminar, three hours. Selected topics from various periods of Armenian literature. May be repeated for credit. S/U or letter grading.

**290. Seminar: Armenian Paleography. (4)** Seminar, three hours. Discussion of a variety of Armenian scripts and training in use of manuscripts. S/U or letter grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**50C. Modern Middle Eastern Cultures.** (4) Lecture, three hours. Survey of modern Middle Eastern cultures through readings and films from Arab countries, Iran, Turkey, and Israel. Letter grading.

## Graduate Courses

**200. Bibliography and Method of Near Eastern Languages and Literatures.** (4) Lecture, two hours. Required for M.A. degree. Introduction to bibliographical resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

**210. Survey of Afro-Asiatic Languages.** (4) Lecture, three hours. Survey of structures of a number of representative languages from various major branches of Hamito-Semitic (Afro-Asiatic) language family.

**M241. Folklore and Mythology of the Near East.** (4) (Same as Folklore M241.) Requisite: Folklore 101.

**290. Seminar: Paleography.** (4) Seminar, three hours. Provides students with ability to cope with varieties of manuscripts.

**375. Teaching Apprentice Practicum.** (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**501. Cooperative Program.** (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study.** (2 to 8) Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation.** (2 to 8) Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation.** (2 to 8) Tutorial, to be arranged. S/U grading.

## Semitics

### Upper Division Courses

**110. Neo-Aramaic.** (4) Lecture, three hours. Grammar and reading of selected texts (folktales, homilies, songs) in modern Aramaic dialects of the Jews and Christians of Kurdistan.

**115. Syriac.** (4) Lecture, two hours. Morphology and syntax of Syriac language, introductory reading.

**130. Biblical Aramaic.** (4) Lecture, three hours. Requisites: Hebrew 102A, 102B, 102C. Grammar of biblical Aramaic and reading of texts.

**140A-140B. Elementary Akkadian.** (4-4) Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian.

**141. Advanced Akkadian.** (4) Lecture, three hours. Old Babylonian syntax; reading of basic Old Babylonian texts.

**142. Akkadian Literary Texts.** (4) Lecture, three hours. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

**199. Special Studies in Semitics.** (2 to 8) Tutorial, to be arranged.

## Graduate Courses

**210. Ancient Aramaic.** (4) Lecture, two hours. Requisite: course 130. Reading of surviving inscriptions and papyri. May be repeated for credit.

**215B. Syriac.** (4) Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of the Bible and Syriac literature. May be repeated for credit.

**220A-220B. Ugaritic.** (4-4) Lecture, two hours. Requisites: Hebrew 102A, 102B, 102C. Study of Ugaritic language and literature. Only course 220B may be repeated for credit.

**225. Phoenician.** (4) Lecture, two hours. Requisites: Hebrew 102A, 102B, 102C. Study of Phoenician language and inscriptions. May be repeated for credit.

**230. Seminar: Northwest Semitic Languages and Literatures.** (4) Seminar, two hours. May be repeated for credit.

**240. Seminar: Akkadian Language. (4)** Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

**240X. Seminar: Akkadian Language. (1)** Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

**241. Seminar: Akkadian Literature. (4)** Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.

**241X. Seminar: Akkadian Literature. (1)** Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

**280A-280B-280C. Seminars: Comparative Semitics. (4-4-4)** Seminar, two hours.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Turkic Languages

### Upper Division Courses

**101A-101B-101C. Elementary Turkish. (4-4-4)** Lecture, five hours. Grammar, reading, conversation, and elementary composition drills.

**102A-102B-102C. Advanced Turkish. (4-4-4)** Lecture, five hours. Requisites: courses 101A, 101B, 101C. Continuing study of grammar, conversation, and composition. Readings in modern literature and social science texts.

**111A-111B-111C. Elementary Uzbek. (4-4-4)** Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.

**112A-112B-112C. Advanced Uzbek. (4-4-4)** Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

**114A-114B-114C. Bashkir. (4-4-4)** Lecture, three hours. Requisite: course 102A. Grammar, reading of literary and folkloric texts.

**115A-115B-115C. Elementary Azeri. (4-4-4)** Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill.

**116A-116B-116C. Advanced Azeri. (4-4-4)** Preparation: placement test. Proficiency-based course in descriptive Azeri grammar. Reading and analysis of Azeri literary and folkloric texts in new writing system. High-style composition and conversation.

**120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek. (4-4-4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 102A, 102B, and 102C, or 111A, 111B, and 111C, or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonemics, morphology, syntax, paremiology, and lexicology analyzed on today's native material.

**160. Turkish Tradition. (4)** Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

**165. Islamic Literary Heritage of Central Asia. (4)** Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

**170. Turco-Mongolian Nomadic Empires. (4)** Lecture, three hours. Required of students in Turkic program. Survey of history of Turkic and Mongolian dominions from the 3rd century B.C. to A.D. 19th century (Hsiung-nu, Hsien-pi, Juan-Juan, T'u-Chueh, Uyghur, Khitan, Karakhanid, Seljuq, Kara-Khitay, Khorazmian, Jengiz-Khanite).

**180. Modern Turkic Languages and Peoples. (4)** Lecture, three hours. Required of students in Turkic program and recommended for students in Soviet studies. Ethnic and linguistic survey of the Turkic peoples.

**199. Special Studies in Turkic Languages. (2 to 8)** Tutorial, to be arranged.

## Graduate Courses

**210A-210B-210C. Introduction to Ottoman. (4-4-4)** Lecture, three hours. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

**211. Ottoman Diplomats. (4)** Lecture, three hours. Requisites: courses 210A, 210B, 210C. Organization and contents of Ottoman archives; reading and discussion of documents and registers. Introduction to use of Ottoman archive materials as a source for historical research.

**220A-220B-220C. Classical Uzbek (Chagatay). (4-4-4)** Lecture, three hours. Requisites: courses 101A, 101B, and 101C, or 111A, 111B, and 111C, or Iranian 102A, 102B, and 102C, or Arabic 102A, 102B, and 102C, or Hebrew 102A, 102B, and 102C. Language of classical Central Asian Turkic literature. Descriptive and historical grammar, text analysis, translation, and composition drills.

**225A-225B-225C. Old Turkic: Turk and Uygur. (4-4-4)** Lecture, three hours. Requisite: course 180. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works.

**230A-230B-230C. Historical and Comparative Survey of Turkic Languages. (4-4-4)** Lecture, three hours. Requisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis.

**235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian. (4-4)** Lecture, three hours. Requisite: course 180. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

**240A-240B-240C. Advanced Ottoman. (4-4-4)** Lecture, three hours. Requisites: courses 210A, 210B, 210C. Emphasis on different genres of Ottoman writing (belles lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

**250A-250B-250C. Islamic Texts in Chagatay. (4-4-4)** Lecture, three hours. Requisites: courses 220A, 220B, 220C. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.

**280A-280B. Seminars: Modern Turkish Literature. (4-4)** Seminar, two hours. Requisite: course 102B. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

**290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatay, and Azeri. (4-4)** Seminar, two hours. Requisites: courses 210A, 210B, and 210C, and/or 220A, 220B, and 220C. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**Scope and Objectives**

The graduate major in this discipline is called Islamic Studies. For details, see the program by that name earlier in this section.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this geographic area from the ancient to the modern period, (2) those who plan to live and work in the Near East whose careers can be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

**Undergraduate Study****Near Eastern Studies B.A.****Preparation for the Major**

*Required:* The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. Students must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or the equivalent in the language of their choice. Students may substitute for the European language requirement Program in Computing 1 and one course from Economics M40, Political Science 6, Sociology M18, or Statistics 10, plus one course from Geography M171, Political Science 102, Psychology 142H, or Sociology C112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Art History 104A, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

**Transfer Students**

To be admitted as Near Eastern Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Arabic, Armenian, Hebrew, Persian, or Turkish, two years of French, German, Italian, Russian, or Spanish (coursework in computing and statistics may be substituted for the European language), one course in Near and Middle Eastern history, and four courses from history of Western civilization, archaeology, sociocultural anthropology, Western Islamic art, principles of economics, cultural geography, world politics, comparative politics, or sociology.

**The Major**

*Required:* Sixteen courses as follows: (1) completion of the advanced level or equivalent in

the same language taken in lower division; (2) History 106A, 106B, 106C, and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Ancient Near East M104A, M104B, Anthropology 110, Art History 101A, 101B, M102A through M102H, 104A, 104B, C104C, 105E, Economics 110, 111, 112, 190, Ethnomusicology 20B, Geography 187, Political Science 132A, 132B, 157, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

For further information, contact Professor Irene A. Bierman at the program address.

 Carlos A.E. Lemmi, Ph.D., *Adjunct*  
 Anselmo R. Pineda, M.D., *Clinical*

**Scope and Objectives**

The Department of Neurobiology offers advanced training leading to the Ph.D. degree. Graduates can anticipate an academic career at the college or university level or as a basic science researcher at a research institute or biotechnology company. In accord with this the department strives to produce graduates soundly qualified both for teaching at that level and for the conduct of productive research in neurobiology.

The overall objective of the Ph.D. program is to provide a strong theoretical and practical foundation in the area of cellular and systems neurobiology, with the goal to develop a better understanding of normal and pathological brain function and behavior. The graduate program provides (1) basic and advanced instruction in the fundamentals of neuroscience, (2) advanced independent research training in the areas of cellular, structural, and systems neurobiology, and (3) teaching experience in undergraduate, graduate, and professional (dental and medical) courses in neuroscience. The program is targeted toward highly qualified and self-motivated doctoral students who take advantage of a flexible curriculum characterized by extensive informal and formal interactions with faculty in small groups and on an individual tutorial basis. The curriculum is structured to allow students extensive opportunities for critical examination of contemporary neuroscience literature and research and for the development of oral and written communication skills.

**Graduate Study**

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

**Graduate Degrees**

The Department of Neurobiology offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Anatomy and Cell Biology.

## Admission

The department normally admits only students whose degree objective is the Ph.D. Applicants must have a bachelor's degree in a physical or life science, psychology, or a premedical curriculum. Introductory courses in general and organic chemistry, biochemistry, and physics are required. Courses in cell biology, genetics, molecular biology, psychology, neuroscience, physiology, and statistics are highly recommended.

Applicants may apply either through the Department of Neurobiology, 73-235 CHS, UCLA, Box 951763, Los Angeles, CA 90095-1763 or through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 Boyer Hall, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, <http://www.uclaaccess.ucla.edu>, e-mail: [uclaaccess@mednet.ucla.edu](mailto:uclaaccess@mednet.ucla.edu).

## Master's Degree

For major fields, see Doctoral Degree.

The M.S. degree is offered through the comprehensive examination and thesis plans. A minimum of 36 units of coursework is required, 24 of which must be in graduate-level courses. All M.S. candidates must take required core courses, other courses essential to their program, and courses in the minor field (for those under the comprehensive plan).

## Doctoral Degree

The major fields are microscopic anatomy and cell biology, molecular biology, and neuroscience.

Ph.D. course requirements include core courses, seminar and journal club courses, lecture series, electives, an ethics course, and laboratory rotations. The Department of Neurobiology is a participant in UCLA ACCESS, and students are referred to that program for questions about course requirements related to the ACCESS Program.

Students are required to serve as teaching assistants for two quarters.

Written and oral qualifying examinations are required. The written qualifying examination is a research proposal in the format of an individual National Institutes of Health (NIH) grant application and reflects, as closely as possible, the plan for the dissertation research.

Following successful completion of the written examination, students take the University Oral Qualifying Examination, which consists of an oral defense of the proposal accompanied by a presentation with appropriately prepared visual aids.

## Medical History

### Upper Division Courses

**107A-107B. Historical Development of Medical Sciences. (4-4)** Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. P/NP or letter grading. **107A.** Contributions of medicine and medical personalities from earliest times through 1650. **107B.** Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

**120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions. (4)** Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

**135. Popular Beliefs and Medicine. (4)** Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedicine and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

### Graduate Courses

**240A-240B. History of Medical Sciences. (2-2)** Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present. S/U or letter grading.

**M246. Survey of History of Neuroscience: Its Impact on Psychology and Medicine. (4)** (Formerly numbered 246.) (Same as Neurobiology M246.) Lecture, one hour; discussion, two hours. Development of experimental neuroscience from ancient concepts of nervous system through medieval, Renaissance, and Enlightenment eras to mid-20th century. Emphasis on landmarks in history of human brain and behavior demonstrating multidisciplinary approaches to contemporary social contexts. Letter grading.

**250. History of Medical Psychology. (2)** Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues. S/U or letter grading.

**596. Directed Individual Studies in Medical History. (2 to 12)** Tutorial, to be arranged. Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences. S/U or letter grading.

## Neurobiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Neurobiology. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

### Upper Division Courses

**104. Histology and Cell Biology. (6)** Lecture, four hours; laboratory, six hours. Designed for dental students. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Nervous system included. P/NP or letter grading.

**106. Functional Neuroanatomy. (4)** Lecture/laboratory, three two-hour sessions. Designed for dental students. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system. P/NP or letter grading.

**M168. Ideas and Experiments in History of Physiology. (4)** (Same as Physiological Science M168.) Lecture, three hours. Interaction of concepts and experimental techniques in physiology from the early 19th to latter 20th centuries, including heart and circulation, hormones, nutrition and vitamins, the brain, spinal cord, and peripheral nervous system, as well as development of physiology as scientific discipline. Discussion of weekly readings and presentations by students. Letter grading.

**199. Individual Special Studies. (2 to 8)** Tutorial, to be arranged. Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. P/NP or letter grading.

### Graduate Courses

**M200A. Synapses, Cells, and Circuits. (4)** (Formerly numbered M209B.) (Same as Neuroscience M244.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.

**M200B. Molecular, Cellular, and Developmental Neurobiology. (6)** (Formerly numbered M209A.) (Same as Molecular, Cell, and Developmental Biology CM220 and Physiology M209A.) Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

**200C. Sensory Systems Neurobiology. (3)** Lecture, one hour; discussion, one hour; laboratory, one hour. Fundamental topics in sensory systems neurobiology, including sensory transduction, taste and olfaction, audition, vision, and somatosensory system. Letter grading.

**200D. Motor Systems Neurobiology. (3)** Lecture, one hour; discussion, one hour; laboratory, one hour. Fundamental topics in motor systems neurobiology, including muscle, motor units, and motoneuron pools, spinal motor control, reflexes, locomotion, basal ganglia, cerebellum, and eye movements. Letter grading.

**200E. Regulatory, Behavioral, and Cognitive Neurobiology. (6)** Lecture, two hours; discussion, two hours; laboratory, two hours. Topics include hypothalamus, cardiovascular system, breathing, food intake and metabolism, water intake and body fluids, neuroendocrine systems, circadian timing, sleep and dreaming, psychosexual development, motivation, reward and addiction, cognitive development, object, face, and spatial recognition, learning and memory, language and communication, and thinking and problem solving. Letter grading.

**M200F. Cellular Neurophysiology. (4)** (Same as Neuroscience M202 and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

**201. Microscopic Anatomy and Cell Biology. (7)** Lecture/laboratory, two to three three-hour sessions (16-week semester). Designed for medical students. Microscopic study of structure and function of tissues and cells, with special reference to the human body. Letter grading.

**M202. Neuroanatomy: Structure and Function of Nervous System. (4)** (Same as Neuroscience M201.) Lecture, three hours; laboratory, three hours. Requisite: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems. Letter grading.

**M203A-M203B. Neuroscience. (4-4)** (Same as Physiology M203A-M203B.) Lecture/laboratory, two to three hours. Designed for medical and qualified graduate program students. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system, with emphasis on their applications in the medical sciences. To receive credit, both courses must be taken together in same academic year. In Progress and letter grading.

**M204. Cellular and Molecular Developmental Neurobiology. (4)** (Same as Neuroscience M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A and 201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging. Letter grading.

**211. Cellular Basis of Learned Behavior. (2)** Lecture/discussion, one two-hour session; laboratory, to be arranged. Preparation: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory. S/U or letter grading.

**M221. Cellular and Molecular Neurochemistry. (4)** (Same as Biological Chemistry M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M227. Cellular, Molecular, and Functional Aspects of Reproductive System. (4)** (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis. Letter grading.

**M229. Oral Embryology and Histology. (4)** (Same as Oral Biology M203.) Lecture, four hours. Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues. Letter grading.

**M234. Seminar: Developmental Neuroendocrinology. (2)** (Same as Oral Biology M234.) Seminar, two hours. Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

**M235. Neuroactive Peptides: Molecular Biology to Function. (2)** (Same as Medicine M235 and Neuroscience M246.) Lecture, two hours. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

**M246. Survey of History of Neuroscience: Its Impact on Psychology and Medicine. (4)** (Same as Medical History M246.) Lecture, one hour; discussion, two hours. Development of experimental neuroscience from ancient concepts of nervous system through medieval, Renaissance, and Enlightenment eras to mid-20th century. Emphasis on landmarks in history of human brain and behavior demonstrating multidisciplinary approaches to contemporary social contexts. Letter grading.

**251. Problems in Developmental and Comparative Immunology. (2)** Lecture/discussion, two hours. Review of current literature emphasizing early development and evolution of immune competence. S/U or letter grading.

**252. Evolution as a Complex Process. (2)** Lecture, two hours. Designed for graduate students. Study and examination of biological evolution as a fundamental complex process. S/U or letter grading.

**254. Structure and Function of Cells and Tissues. (2)** Lecture, one hour; discussion, one hour. Requisite or corequisite: course 104. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

**M255. Seminar: Neural and Behavioral Endocrinology. (2)** (Same as Physiological Science M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function. Letter grading.

**258. Seminar: Neuroscience. (2)** Seminar, two hours. Preparation: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit. S/U or letter grading.

**259. Current Topics in Neurobiology. (2)** Discussion, two hours. Review and discussion of current research literature in varying areas of neurobiology. S/U grading.

**M261. Neuronal Circuit Analysis. (2)** (Same as Neuroscience M261.) Lecture, two hours; discussion, one hour. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions. S/U or letter grading.

**265. Evolution of Cancer. (2)** Lecture, two hours. Review of current literature emphasizing appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint. S/U or letter grading.

**270A-270B-270C. Cell, Molecular, and Integrative Biology Seminars. (1-1-1)** (Formerly numbered M270A-M270B-M270C.) Seminar, one hour. Formal lectures on current research topics in neuroscience by speakers from national, international, and local neuroscience communities. S/U grading.

**290. Tutorials in Anatomy. (2)** Tutorial, one hour. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

**296. Research Seminar and Journal Club. (1)** Seminar, one hour. Seminar and journal club with focus on current research topics and activities occurring within department. S/U grading.

**298A-298B-298C. Advanced Topics in Neurobiology. (2-2-2)** Seminar, one hour; discussion, one hour. Advanced seminar courses in neurobiology to be offered by different departmental faculty members. Topics are grouped thematically. S/U grading. **298A.** Molecular, Cellular, and Developmental Neurobiology; **298B.** Sensory and Motor Systems Neurobiology; **298C.** Regulatory, Behavioral, and Cognitive Neurobiology.

**390A-390B. Peer Review System. (2-2)** Discussion, two hours. Preparation: advancement to candidacy in integrative or systems biology. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

**495A-495F. Preparation for Teaching in Anatomical Sciences. (2 to 4 each)** Seminar, to be arranged. Designed for graduate students. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. S/U grading.

**598. Thesis Research for M.S. Candidates. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Dissertation Research for Ph.D. Candidates. (2 to 12)** Tutorial, to be arranged. S/U grading.

## NEUROLOGY

*School of Medicine*

UCLA  
C-128 Reed Neurological Research Center  
Box 951769  
Los Angeles, CA 90095-1769

(310) 206-6584

### Chairs

Robert C. Collins, M.D. (*Frances Stark Professor of Neurology*), Chair

Jeffrey L. Cummings, M.D., *Vice Chair*

Mark A. Goldberg, M.D., Ph.D., *Vice Chair, Harbor-UCLA*

Christopher M. DeGiorgio, M.D., *Vice Chair, Olive View-UCLA*

Claude G. Wasterlain, M.D., *Vice Chair, Sepulveda VA*

### Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Neurology

### Upper Division Course

**199. Special Studies. (2 to 8)** Discussion, one to two hours; laboratory, four to six hours. Individual projects carried out under direction of a faculty member. Special studies in neurology, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students.

William P. Melega, Ph.D. (*Molecular and Medical Pharmacology*)  
Karen A. Miotto, M.D. (*Psychiatry and Biobehavioral Sciences*)  
Thomas J. O'Dell, Ph.D. (*Physiology*)  
Paul H. O'Lague, Ph.D. (*Molecular, Cell, and Developmental Biology*)  
Diane M. Papazian, Ph.D. (*Physiology*)  
Helen Raybould, Ph.D., *in Residence (Medicine)*  
Stanley J. Schein, M.D., Ph.D. (*Psychology*)  
Barney A. Schlinger, Ph.D. (*Physiological Science*)  
Igor Spigelman, Ph.D. (*Dentistry*)  
Alexander Van der Blik, Ph.D. (*Biological Chemistry*)  
James A. Waschek, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Joseph B. Watson, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Nancy L. Wayne, Ph.D. (*Physiology*)  
Geraldine A. Weinmaster, Ph.D. (*Biological Chemistry*)

#### Assistant Professors

Bernard W. Balleine, Ph.D. (*Psychology*)  
Mark G. Barad, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Ellen M. Carpenter, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Christopher S. Colwell, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Ana Maria Correa, Ph.D., *in Residence (Anesthesiology)*  
Stephan A. Engel, Ph.D. (*Psychology*)  
Daniel Geschwind, M.D., Ph.D. (*Neurology*)  
Marco Iacoboni, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Barbara Knowlton, Ph.D. (*Psychology*)  
Harley I. Kornblum, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
Linda Liao, M.D., Ph.D. (*Surgery*)  
Xin Liu, M.D., Ph.D. (*Pathology and Laboratory Medicine*)  
Kelsey C. Martin, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Gary W. Mathern, M.D., *in Residence (Surgery)*  
John D. McCann, M.D., Ph.D. (*Ophthalmology*)  
Michael S. Mega, M.D., Ph.D., *in Residence (Neurology)*  
Sheila Nirenberg, Ph.D. (*Neurobiology*)  
Thomas Otis, Ph.D. (*Neurobiology*)  
Patricia E. Phelps, Ph.D. (*Physiological Science*)  
Uma Rao, M.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Sanjaya Saxena, M.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
Felix Schweizer, Ph.D. (*Neurobiology*)  
Jeffrey L. Twiss, M.D., Ph.D. (*Pathology and Laboratory Medicine*)  
Cui-Wei Xie, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

#### Adjunct Professors

Charles L. Wilson, Ph.D. (*Neurology*)  
Dahlia Zaidel, Ph.D. (*Psychology*)

#### Adjunct Associate Professors

Larry F. Hoffman, Ph.D. (*Surgery*)  
Jen Yu Wei, Ph.D. *in Residence (Medicine/Digestive Diseases)*

## Scope and Objectives

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

## Undergraduate Study

### Neuroscience B.S.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.5 or better. Students are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the college general education requirements, students are encouraged to select

courses that complement the major; Psychology 10 is recommended as a social sciences elective. They are also encouraged to take a statistics course (e.g., Statistics 10 or approved lower or upper division equivalent).

### Transfer Students

To be admitted as Neuroscience majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

### The Major

The following 12 courses are required for the Neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 1: Neuroscience M101A, M101B, M101C, M102, Chemistry and Biochemistry 153A, 153L

Group 2: Three 4-unit area electives (one from each area) as follows:

Area 2A: One *behavioral and cognitive neuroscience* course from Neuroscience M119L, M130, C172, 197A, Psychology 110, 112A, 118, 119A, 119B, 119D, 119E, 119M, 120A, 124A

Area 2B: One *systems and integrative neuroscience* course from Neuroscience M119N, M130, M145, 197B, Organismic Biology, Ecology, and Evolution M173, Physiological Science C125, 126, 138, 147, Psychology 119A, 119M

Area 2C: One *molecular, cell, and developmental neuroscience* course from Molecular, Cell, and Developmental Biology C139, Neuroscience M145, M148, 151, 197C, Physiological Science 126, 147

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms) or 199HA and 199HB (one term in each course) or Psychology M181A and M181B (with approval of the neuroscience curriculum committee before start of project; one term in each course). All majors who elect to do two terms (one term applies toward Group 3 and one toward Group 4) of Neuroscience 199 or 199HA and 199HB or Psychology M181A and M181B must do one term of Honors Collegium 99 in the same laboratory. In addition, they must submit a poster to the neuroscience undergraduate poster session or the curriculum committee prior to graduation

Group 4: Two additional elective courses from the Group 2 or 3 list or from Neurobiology/Medical History M246 or Physiological Science C135. Students who select two terms of Neuroscience 199 or 199HA and 199HB or Psy-

chology M181A and M181B must select only one additional elective to satisfy Group 4

Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted.

No more than eight courses may be from any one department. A maximum of 8 units of Neuroscience 199 or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

## Honors Program

The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis. Requirements for admission include completion of at least 40 units toward the preparation for the major with a 3.2 grade-point average and an overall GPA of 3.2 at UCLA. Applications and program requirements are available in the Neuroscience Undergraduate Office, 1506D Gonda Center. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

## Neuroscience Minor

The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.

To enter the minor, students must have an overall grade-point average of 2.0 or better and a 2.5 GPA in the requisite courses for Neuroscience M101A.

*Required Upper Division Courses (31 units):* Neuroscience M101A, M101B, M101C (5 units each) and four elective courses (16 units) selected from M102 or from Group 2, 3, or 4 as listed under the Neuroscience major.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Neuroscience

See the Neuroscience Interdepartmental Graduate Program for the graduate course offerings.

## Upper Division Courses

**M101A-M101B-M101C. Neuroscience: From Molecules to Mind. (5-5-5)** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading:

**M101A. Cellular and Systems Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A or former course 10D or 30 (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

**M101B. Molecular and Developmental Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

**M101C. Behavioral and Cognitive Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

**101L. Neuroscience Laboratory. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses M101A, M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 116. Introduction to laboratory methods in neuroscience. Laboratory exercises range from molecular and cell biological to behavioral. Hands-on experience with important methodology and experimental approaches in neuroscience.

**M102. Introduction to Functional Anatomy of Central Nervous System. (4)** (Same as Psychology M117K.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

**103. Neuroscience for Physicists, Mathematicians, and Engineers. (4)** Lecture, three hours. Introduction to the brain and neural function; mathematical models and computer simulations of neural networks. Biophysics of neurons, engineering approaches to neural control systems.

**M119L. Human Neuropsychology. (4)** (Same as Psychology M119L.) Lecture, three hours. Requisites: courses M101A and M101C (or Psychology 115), Psychology 120A or 120B. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

**M119N. The Visual System. (4)** (Same as Psychology M119N.) Lecture, three hours. Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

**M130. Biological Bases of Psychiatric Disorders. (4)** (Same as Molecular, Cell, and Developmental Biology M191, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**M145. Neural Mechanisms Controlling Movement. (5)** (Same as Physiological Science CM145.) Lecture, four hours. Requisite: course M101A or Physiological Science 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Letter grading.

**M148. Molecular and Cellular Physiology of Neurons. (4)** (Same as Physiological Science M148.) Lecture, three hours. Requisite: course M101A or Physiological Science 111A or M180A. Advanced treatment of selected topics in cellular neurophysiology. Letter grading.

**151. Transgenic Models and Gene Transfer Technology in Understanding and Treatment of Neuropsychiatric Disease. (4)** Lecture, three hours. Requisite: course M101B. Genetic defects in neuropsychiatric disease; how genome is experimentally manipulated to understand more about role of genes in normal development of brain and in disease. Required student participation in discussions.

**C172. Neuroimaging and Brain Mapping. (4)** Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. Strongly recommended: course M102. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging. Concurrently scheduled with course CM272. Letter grading.

**194. Independent Study of Neuroscience Literature. (2)** Library research, six hours minimum. Requisite: course M101A. Directed independent library research with a faculty member. Written proposal must be submitted prior to start of course, with a paper required at end of term. May not be applied toward elective requirements for the major and may not be taken concurrently with course 199, 199HA, or 199HB. P/NP grading.

**196H. Honors in Neuroscience. (4)** Lecture, one hour; discussion, two hours. Preparation: one statistics course (Statistics 10 or equivalent). Limited to neuroscience honors program students. Instruction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for the major. Must be taken during Winter Quarter of academic year that student enrolls in courses 199HA and 199HB. Letter grading.

**197A-197B-197C. Special Topics in Neuroscience. (4-4-4)** Lecture, four hours. Requisite: course M101A or Physiological Science 111A. Topics on one or more aspects of neuroscience. May be applied as an elective only in the specific area of group 2. Each course may be repeated once for credit. P/NP or letter grading.

**197A.** Behavioral and Cognitive Neuroscience. Description of specific neurological diseases from clinical perspective, in-depth analysis and discussion of mechanisms responsible for the disorder, and examination of new treatments. Designed to be interactive with considerable student participation. **197B.** Systems and Integrative Neuroscience; **197C.** Molecular, Cell, and Developmental Neuroscience.

**199. Independent Research in Neuroscience. (4)** Laboratory, 12 hours minimum. Requisites: course M101A, Honors Collegium 99. Limited to seniors and juniors with grades of B (3.0) or better. Directed independent research with a faculty member. Maximum of 8 units of courses 199, 199HA, 199HB may be applied toward the major. Letter grading.

**199HA. Honors Thesis in Neuroscience. (4)** Laboratory, 12 hours minimum. Requisites: course M101A, Honors Collegium 99. Limited to neuroscience honors program students. Directed independent research involving extensive reading and research in the field of proposed honors thesis. For departmental honors, students must also take course 196H. Maximum of 8 units of courses 199, 199HA, 199HB may be applied toward the major. In Progress grading (credit to be given only on completion of course 199HB).

**199HB. Honors Thesis in Neuroscience. (4)** Laboratory, 12 hours minimum. Requisite: course 199HA. Continued reading and research that culminate in honors thesis. For departmental honors, students must also take course 196H. Maximum of 8 units of courses 199, 199HA, 199HB may be applied toward the major. Letter grading.

## Course List

### Molecular, Cell, and Developmental Biology

C139. Molecular, Cellular, and Developmental Neurobiology

### Organismic Biology, Ecology, and Evolution

M173. Anatomy and Physiology of Sense Organs

### Physiological Science

C125. Comparative Endocrinology: Molecular to Behavioral

126. Biological Clocks

C135. Dynamical Systems Modeling of Physiological Processes

138. Neuromuscular Physiology and Adaptation

147. Neurobiology of Learning and Memory

### Psychology

110. Fundamentals of Learning

112A. Basic Processes of Motivated Behavior

118. Comparative Psychobiology

119A. Neuropsychopharmacology

119B. Human Neurophysiology

119D. Behavioral Pharmacology

119E. Stress and Bodily Disease

119M. Physiological Psychology of Learning

120A. Cognitive Psychology

124A. Advanced Topics in Sensation and Perception

M181A-M181B. Research in Contemporary Problems in Mental Retardation

## NEUROSCIENCE

### Interdepartmental Graduate Program School of Medicine

UCLA  
1506D Gonda Center  
Box 951761  
Los Angeles, CA 90095-1761

(310) 825-8153

<http://www.neuroscience.ucla.edu>

Marie-Francoise Chesselet, M.D. Ph.D., *Chair*

### Professors

Arthur P. Arnold, Ph.D. (*Physiological Science*)

Utpal Banerjee, Ph.D. (*Anesthesiology, Biological Chemistry, Molecular, Cell, and Developmental Biology*)

Francisco J. Bezanilla, Ph.D. (*Physiology*)

Lutz Birnbaumer, Ph.D. (*Anesthesiology, Biological Chemistry*)

Mariel Birnbaumer, Ph.D. (*Anesthesiology, Physiology*)

Nicholas C. Brecha, Ph.D., *in Residence (Medicine, Neurobiology)*

Anthony T. Campagnoni, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Scott H. Chandler, Ph.D. (*Physiological Science*)

Michael H. Chase, Ph.D. (*Physiology*)  
Marie-Francoise Chesselet, M.D., Ph.D. (*Neurology; Charles H. Markham Professor of Neurology*)

Robert C. Collins, M.D. (*Neurology; Frances Stark Professor of Neurology*)

Jean S. de Vellis, Ph.D., *in Residence (Neurobiology, Psychiatry and Biobehavioral Sciences)*

V. Reggie Edgerton, Ph.D. (*Neurobiology, Physiological Science*)

Christopher J. Evans, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Gordon L. Fain, Ph.D. (*Ophthalmology, Physiological Science*)

Michael S. Fanselow, Ph.D. (*Psychology*)

Debra B. Farber, Ph.D. (*Ophthalmology*)

Kym F. Faull, Ph.D., *in Residence (Chemistry and Biochemistry, Psychiatry and Biobehavioral Sciences)*

Jack L. Feldman, Ph.D. (*Neurobiology*)

Robin S. Fisher, Ph.D., *in Residence (Neurobiology, Psychiatry and Biobehavioral Sciences)*

Joaquin M. Fuster, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Roger A. Gorski, Ph.D. (*Neurobiology*)

Carlos V. Grijalva, Ph.D. (*Psychology*)

Alan D. Grinnell, Ph.D. (*Physiological Science, Physiology*)

Ronald M. Harper, Ph.D. (*Neurobiology*)

Volker Hartenstein, Ph.D. (*Molecular, Cell, and Developmental Biology*)

Harvey R. Herschman, Ph.D. (*Biological Chemistry*)

Vincente Honrubia, M.D. (*Surgery*)

Carolyn R. Houser, Ph.D., *in Residence (Neurobiology)*

David A. Hovda, Ph.D. (*Neurosurgery*)

Bruce D. Howard, M.D. (*Biological Chemistry*)

Franklin B. Krasne, Ph.D. (*Psychology*)

Michael S. Levine, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Julio Licinio, M.D. *in Residence (Psychiatry and Biobehavioral Sciences)*

John C. Mazziotta, M.D., Ph.D. (*Molecular and Medical Pharmacology, Neurology, Radiological Sciences*)

James T. McCracken, M.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Paul E. Micevych, Ph.D. (*Neurobiology*)

Istvan Mody, Ph.D. (*Neurology, Physiology*)

Peter M. Narins, Ph.D. (*Physiological Science*)

Richard W. Olsen, Ph.D. (*Molecular and Medical Pharmacology*)

William M. Pardridge, M.D. (*Medicine*)

Gregory S. Payne, Ph.D. (*Biological Chemistry*)

Michael E. Phelps, Ph.D. (*Molecular and Medical Pharmacology*)

Russell E. Poland, Ph.D. (*Psychiatry and Biobehavioral Sciences*)

Leonard H. Rome, Ph.D. (*Biological Chemistry*)

Arnold B. Scheibel, M.D. (*Neurobiology, Psychiatry and Biobehavioral Sciences*)

John D. Schlag, M.D. (*Neurobiology*)

Jerome M. Siegel, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Gary W. Small, M.D. *in Residence (Psychiatry and Biobehavioral Sciences)*

Michael Sofroniew, Ph.D. (*Neurobiology*)

Enrico Stefani, M.D., Ph.D. (*Anesthesiology, Physiology*)

Allan J. Tobin, Ph.D. (*Neurology, Physiological Science*)

Arthur W. Toga, Ph.D. (*Neurology*)

Julio L. Vergara, Ph.D. (*Physiology*)

Harry V. Vinters, M.D. (*Pathology and Laboratory Medicine*)

Claude G. Wasterlain, M.D., *in Residence (Neurology)*

Peter C. Whybrow, M.D. (*Psychiatry and Biobehavioral Sciences*)

Charles D. Woody, M.D., *in Residence (Neurobiology, Psychiatry and Biobehavioral Sciences)*

Eran Zaidel, Ph.D. (*Psychology*)

S. Larry Zipursky, Ph.D. (*Biological Chemistry*)

### Professors Emeriti

Carmine D. Clemente, Ph.D. (*Neurobiology*)

Samuel Eiduson, Ph.D. (*Psychiatry and Biobehavioral Sciences*)

Lawrence Kruger, Ph.D. (*Anesthesiology, Neurobiology*)

### Associate Professors

Susan Y. Bookheimer, Ph.D. (*Psychiatry and Biobehavioral Sciences*)

James R. Boulter, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

Jeff Bronstein, M.D., Ph.D. (*Neurology*)  
 Mark S. Cohen, Ph.D. (*Neurology, Psychiatry and Biobehavioral Science, Radiological Sciences*)  
 Joseph L. Demer, M.D., Ph.D. (*Ophthalmology, Neurology*)  
 Itzhak Fried, M.D., Ph.D., in Residence (*Neurosurgery, Psychiatry and Biobehavioral Sciences*)  
 Alan Garfinkel, Ph.D. (*Medicine, Physiological Science*)  
 David L. Glanzman, Ph.D. (*Neurobiology, Physiological Science*)  
 Cameron B. Gundersen, Ph.D. (*Molecular and Medical Pharmacology*)  
 Daniel L. Kaufman, Ph.D. (*Molecular and Medical Pharmacology*)  
 Sally J. Krasne, Ph.D. (*Physiology*)  
 Andrew F. Leuchter, M.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Nigel T. Maidment, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 William P. Melega, Ph.D. (*Molecular and Medical Pharmacology*)  
 Thomas J. O'Dell, Ph.D. (*Physiology*)  
 Diane M. Papazian, Ph.D. (*Physiology*)  
 Stanley J. Schein, M.D., Ph.D. (*Psychology*)  
 Barney A. Schlinger, Ph.D. (*Physiological Science*)  
 Alcino J. Silva, Ph.D. (*Neurobiology*)  
 Igor Spigelman, Ph.D. (*Dentistry, Oral Biology*)  
 Ligia Toro, Ph.D. (*Anesthesiology*)  
 Alexander Van der Blik, Ph.D. (*Biological Chemistry*)  
 Rhonda R. Voskuhl, M.D. (*Neurology*)  
 Joseph B. Watson, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Geraldine A. Weinmaster, Ph.D. (*Biological Chemistry*)

#### Assistant Professors

Mark G. Barad, M.D., Ph.D. in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Dean V. Buonomano, Ph.D. (*Neurobiology, Psychology*)  
 Ellen M. Carpenter, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Susana Cohen-Cory, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Christopher S. Colwell, Ph.D. (*Psychiatry and Biobehavioral Sciences*)  
 Ana Maria Correa, Ph.D., in Residence (*Anesthesiology*)  
 Stephen A. Engel, Ph.D. (*Psychology*)  
 Daniel H. Geschwind, M.D., Ph.D. (*Neurology*)  
 Susan Harkema, Ph.D. (*Neurology*)  
 Marco Iacoboni, M.D., Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 George Jackson, M.D., Ph.D., in Residence (*Neurology*)  
 Joanna C. Jen, M.D., in Residence (*Neurology*)  
 Jack Judy, Ph.D. (*Electrical Engineering*)  
 Barbara Knowlton, Ph.D. (*Psychology*)  
 Harley I. Kornblum, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
 David E. Krantz, M.D., Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Linda M. Liau, M.D., Ph.D. (*Neurosurgery*)  
 Xin Liu, M.D., Ph.D. (*Molecular and Medical Pharmacology, Pathology and Laboratory Medicine*)  
 Kelsey C. Martin, M.D., Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Paul Mischel, M.D. (*Pathology and Laboratory Medicine*)  
 Jonathan R. Monck, Ph.D. (*Physiology*)  
 Sheila Nirenberg, Ph.D. (*Neurobiology*)  
 Thomas Otis, Ph.D. (*Neurobiology*)  
 Patricia E. Phelps, Ph.D. (*Physiological Science*)  
 Dario L. Ringach, Ph.D. (*Neurobiology, Psychology*)  
 N. Carolyn Schanen, M.D., Ph.D. (*Human Genetics, Pediatrics*)  
 Felix E. Schweizer, Ph.D. (*Neurobiology*)  
 Desmond Smith, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
 Jeffrey L. Twiss, M.D., Ph.D. (*Pathology and Laboratory Medicine*)  
 Eric Vilain, M.D., Ph.D. (*Human Genetics*)  
 James A. Waschek, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Nancy L. Wayne, Ph.D. (*Physiology*)

Stephaine A. White, Ph.D. (*Physiological Science*)  
 Cui-Wei Xie, M.D., Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
 Xianjie Yang, Ph.D., in Residence (*Ophthalmology*)

#### Adjunct Professor

Dennis J. McGinty, Ph.D. (*Psychology*)  
 Charles L. Wilson, Ph.D. (*Neurology*)

#### Adjunct Assistant Professor

Valeriy I. Nenov, Ph.D. (*Neurosurgery*)

## Scope and Objectives

The interdepartmental Neuroscience Ph.D. Program prepares students for careers in neuroscience research and education. The hallmark of the program is an integrated approach to study of the nervous system, using the multi-level analytical tools of molecular, cellular, systems, and/or behavioral biology, as well as quantitative approaches from the fields of mathematics, physics, and engineering. Students working at one or two analytical levels nevertheless learn to appreciate the methods and advantages of other levels of analysis. Emphasis is both on mechanisms of neural function and the biological basis of disease. Students select their research mentor from the list of all neuroscience faculty at UCLA.

## Graduate Study

For applicants, the following includes admissions information and a brief outline of the graduate degree program(s) offered. Official, specific degree requirements, including language requirements, are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, even more detailed guidelines may be outlined in *Announcements* and other publications available from the schools, departments, and programs and included on their websites.

### Graduate Degree

The Neuroscience Program offers the Doctor of Philosophy (Ph.D.) degree in Neuroscience.

## Admission

Applicants must satisfy the University minimum requirements. In addition, Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) scores are required. Recommended preparation includes mathematics through calculus and at least one year each of general chemistry, organic chemistry and biochemistry, physics, and basic biology, including molecular and cell biology. Three letters of recommendation are required.

## Doctoral Degree

Major fields include neuroengineering and molecular, cellular, developmental, systems, behavioral, and clinical neuroscience.

First-year Ph.D. students take a five-course sequence in neuroscience and participate in at least two laboratory rotations. Students also attend a "Meet the Professors" presentation series and enroll in a three-quarter seminar se-

ries. In the first or second year, students take a course in scientific ethics.

Second-year students take at least one quarter of biomathematics, as well as three courses from a menu of advanced neuroscience courses. In the second or third year, students take an additional three quarters of the seminar series.

First-year students specializing in neuroengineering take one required course in neuroscience and one in biomedical engineering, one course from a menu of engineering courses, and two courses selected from a four-course sequence in neuroscience. First-year neuroengineering students participate in at least two laboratory rotations, one in neuroscience and one in engineering. Students also attend a "Meet the Professors" presentation series.

In the first and second years, neuroengineering students enroll in six courses from a menu of seminar courses. In the first or second year, students take a course in scientific ethics. Second-year students take at least one quarter of biomathematics from a departmental list, as well as three courses from a menu of advanced neuroscience and engineering courses.

One quarter of teaching experience is required.

Written and oral qualifying examinations are required. The written examination tests basic knowledge and ability to relate knowledge in different neuroscience areas, to locate and interpret literature, and to apply research problems.

Following successful completion of the written examination, students prepare a research proposal (in the basic format of an NIH grant proposal focusing on an important question pertinent to the field of study) and take the University Oral Qualifying Examination, which consists of a defense of the proposal. Students also are required to present a midstream seminar at the end of the fourth year.

## Neuroscience

### Graduate Courses

**M201. Neuroanatomy: Structure and Function of Nervous System. (4)** (Same as Neurobiology M202.) Lecture, three hours; laboratory, three hours. Requisite: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

**M202. Cellular Neurophysiology. (4)** (Same as Neurobiology M200F and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

**M203. Molecular Neurobiology. (4)** (Same as Psychiatry M203.) Lecture, three hours; discussion, one hour. Preparation: basic biochemistry. Requisites: Biological Chemistry 201A, 201B. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

**M204. Cellular and Molecular Developmental Neurobiology. (4)** (Same as Neurobiology M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: courses M201, M202, and M203, or Biological Chemistry 201A and 201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**M205. Behavioral and Systems Neuroscience. (4)** (Same as Physiological Science M205 and Psychology M205Z.) Lecture, three hours. Requisites: courses M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2)** Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with emphasis on critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals and humans in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

**210A-210B-210C. Introduction to Current Literature in Neuroscience. (2-2-2)** Critical discussion of current research literature related to topics of the five core courses in neuroscience graduate curriculum. S/U grading. **210A.** Corequisites: courses M201, M202, M203. **210B.** Corequisite: course M204. **210C.** Corequisite: course M205.

**211A-211B-211C. Evaluation of Research Literature in Neuroscience. (2-2-2)** Requisites: courses M201, M202, M203, M204, M205. Advanced critical analysis of current research in neuroscience. S/U grading.

**215. Seminar: Neuroscience. (2)** Topics of current importance presented for discussion. S/U grading.

**M230. Molecular and Cellular Mechanisms of Neural Integration. (5)** (Same as Physiological Science M210 and Physiology M210.) Lecture, four hours; discussion, one hour. Requisite: course M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**M233. Mechanisms and Relief of Pain. (2)** (Same as Oral Biology M204.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

**M240. Cellular and Molecular Neurochemistry. (4)** (Same as Biological Chemistry M221, Neurobiology M221, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M244. Synapses, Cells, and Circuits. (4)** (Same as Neurobiology M200A.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.

**M246. Neuroactive Peptides: Molecular Biology to Function. (2)** (Same as Medicine M235 and Neurobiology M235.) Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

**M247. Neural Control of Cardiopulmonary Function. (4)** (Same as Physiological Science M247.) Lecture, two hours; discussion, two hours. Requisites: Physiological Science 111A, 111B or 133 or 142 or M180A, M180B. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

**254. Interdisciplinary Research Seminar. (2)** Lectures and discussions on many different disciplinary approaches to knowledge of brain function in order to broaden experience of students studying in fields other than that of lecturer; new information in depth from students in fields closely related to subject discussed. S/U grading.

**M255. Functional Organization of Behavior. (2)** (Same as Psychiatry M255.) Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

**257. Structure and Function of Limbic System. (2)** Current knowledge of mammalian limbic system presented by surveying studies of its developmental anatomy, intrinsic synaptic organization, synaptic chemistry, afferent and efferent circuits, and dysfunctions in memory and cognition association with limbic system function. S/U or letter grading.

**M259. Neurobiology of Sleep. (3)** (Same as Psychiatry M249 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

**M260. Neuromuscular Factors in Movement Regulation. (4)** (Same as Physiological Science M260.) Requisite: Physiological Science 138. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

**M261. Neuronal Circuit Analysis. (2)** (Same as Neurobiology M261.) Lecture, two hours; discussion, one hour. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

**M262. Neural Systems for Motor Control. (4)** (Same as Physiological Science M240.) Requisite: Physiological Science C143. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

**M263. Neuronal Mechanisms Controlling Rhythmical Movements. (4)** (Same as Physiological Science M263.) Requisite: Physiological Science CM145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

**M266A-M266B-M266C. Seminars: Cellular Neuroscience. (2 to 4 each)** (Same as Physiological Science M295A-M295B-M295C.) Seminar, two to four hours. Requisite: course M202. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar. S/U or letter grading.

**M267. Advanced Magnetic Resonance Imaging. (4)** (Same as Biomedical Physics M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

**271. Neurobiology of Disease. (2)** Analysis of clinical neurological and psychiatric disorders from perspective of basic neuroscience.

**CM272. Neuroimaging and Brain Mapping. (4)** (Formerly numbered M272.) (Same as Physiological Science M272 and Psychology M213.) Lecture, three hours. Requisites: courses M201, M202. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging. Concurrently scheduled with course C172. Letter grading.

**M273. Neural Basis of Memory. (4)** (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

**274. Computational Neuroscience. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neuronal, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

**275. Advanced Techniques in Neurobiology. (2)** Lecture, one hour; laboratory, one hour. Preparation: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Methods in Neuroscience Public Education. (2)** Seminar, one hour; fieldwork, six hours. Designed for juniors/seniors and graduate students. Training and supervised practicum for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Dissertation Research for Ph.D. Candidates. (2 to 12)** Tutorial, to be arranged. Designed for students requiring special instruction or time to work on dissertation. S/U grading.

Anna Gawlinski, R.N., D.N.Sc.  
Colleen K. Keenan, R.N., Ph.D.

### Adjunct Assistant Professors

Suzette Cardin, R.N., D.N.Sc.  
Joan E. Hahn, R.N., D.N.Sc.  
Janna Lesser, R.N., Ph.D.  
Susan R. Opas, R.N., Ph.D.

## Scope and Objectives

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702, or by calling (310) 825-7181 Tuesday through Thursday.

## History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in Nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. in Nursing was approved in 1995.

The B.S. degree curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master's nurse practitioner and nurse-midwifery programs have Board of Registered Nursing approval. In 2000, the Commission on Collegiate Nursing Education gave preliminary approval of the baccalaureate and master's degree programs.

## Undergraduate Study

### Nursing B.S.

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional

education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

## Admission

The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on licensure as a registered nurse and a minimum of one year of full-time experience as an R.N. within the past five years, completion of requisite courses, scholarship, and attainment of a passing score on four Excelsior College Examinations. Students must have grades of C or better in requisite courses and an overall grade-point average of 3.0 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications should reflect clearly identified career goals and documentation of potential in advanced practice nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits students each Fall Quarter. In addition to the regular *UC Application for Undergraduate Admission and Scholarships* which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702.

## Degree Requirements

Students must complete 180 quarter units of college work and satisfy the general University requirements as follows:

1. Completion of all required general education courses as specified for completion both prior to admission and/or at UCLA: human anatomy (one course), sociocultural anthropology (one course), humanities (one or more courses), English composition (two courses), mathematics (one course), introductory or general microbiology with laboratory (one course), human nutrition (one course), introductory physics (one course or one year of high school physics with laboratory, with a grade of B or better), human physiology (one course), introductory psychology (one course), introductory sociology (one course), and electives as needed

2. Completion of a block of 30 units of credit by examination administered by the Excelsior College Examination Service in Adult Nursing, Fundamentals of Nursing, Maternal and Child Nursing-AD, and Psychiatric/Mental Health Nursing (this unit credit applies to the Nursing major only)
3. Completion of 76 to 88 units of lower and upper division coursework in residence, including Biostatistics 100A, Chemistry and Biochemistry 14A, 14B, 14C, Epidemiology 100, Life Sciences 2, 3, Nursing 102, 104, 190, 192, 193, 195, 196, 200A, 220, and one or more courses from 213A, 214F, 216F, 237A, and three 4-unit electives

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

All required nursing courses in the school must be completed with a grade of C or better in each course.

#### Study Lists

Students may not enroll in more than four courses per term unless a petition is approved in advance by the associate dean.

### Honors

#### Dean's Honors

Dean's Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible students must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

#### Honors at Graduation
